INTRODUCTION.

THE general utility of a work of this description not only to those who may have but a limited knowledge in the science of numbers, or be totally ignorant of it, but even to the most skilful arithmeticians, requires but little argument to demonstrate.—The convenience and welfare of an individual, in the present state of society, do not so imperatively demand an acquaintance with any one specific science, as with Arithmetic, inasmuch as there are few, if any situations in which he can be placed, whose duties can be effectively discharged without its assistance. Correctness in calculations is indispensably necessary to ensure prosperity in all commercial pursuits, and in other lines, where the qualification is less in request, it may obviously be productive of the greatest degree of benefit, by detecting imposition, and protecting property from depredation. Let an individual move in whatever sphere of life he may, he has continual occasion to revert to this science, and though he may be fully competent to avail himself of its benefits, yet the variety and importance of other occupations, may leave him without the leisure to perform its necessary operations, and therefore, such an Assistant as he is now presented with, must, it is presumed, be peculiarly acceptable, as at once economizing time and labour, and precluding that loss, which might accrue from trusting to the erroneous or impositious calculations of others. To Merchants and Tradesmen, it is almost superfluous to offer a single remark in elucidation of its utility: they have obviously but little time to spare, and a reference to the columns of this

book, must eminently tend to curtail the time and labour consumed in their multifarious transactions. The Editor also cannot refrain from particularly adverting to the advantage which may be derived from the work by those, on whom Providence has not bestowed the benefits of arithmetical education — For such persons may by the mere knowledge of the figures only ascertain the result of the most difficult operation. This compilation may also be useful as a test or proof of arithmetical operations, which individuals may themselves chuse to work. It may likewise be farther observed, that by furnishing questions and results it is peculiarly adapted for the use of schools, and private teachers, as well as for individuals in general in every rank or station of life.

The very flattering reception which the first edition of this work has met with from the public, and the continued and encreasing demands for it, have tended in no inconsiderable degree to encourage the author to spare neither pains nor trouble to render this (second) editon of more extensive utility ; and he should be unpardonably wanting in sensibility and gratitude were he to omit availing himself of this opportunity of expressing his acknowledgments for the very liberal patronage with which it has been already honoured.

The following explanatory notices will, it is hoped, enable the reader completely to comprehend and make use of the Tables comprised in the body of the work.

TABLE I.

Contains the value of any quantity of Goods or Wares, from number 1 to 10,000, at the rate of from 1 Pie to 100 Rupees each. To use this Table, observe the following rule, viz.

If the value of 30 cubits of Bafta be demanded at 2 Annas per cubit, look for the number 30, in page 4, column the 1st, and opposite to that number in column the 2d, you will find 3 Rs. 12 As. the answer required.

TABLE II.

Contains the value of any Commodity in gross weight, from 2 Annas to 100 Rupees per maund, and from 1 seer to 1 maund. For using this Table, observe the following rule:—

If the price of 27 seers of fine Benares Sugar be demanded at 11 Rupees per maund, look for the number 27 in page 36, column the 1st, and opposite to that number in column the 4th, you will find 7 Rs. 6 As. 9-3 Pies, the answer required.

TABLE III.

Contains the value of any Commodity, from 1 chhattack to 1 maund, at the rate of from 1 Anna to 10 Rupees per seer. For using this Table, observe the following rule:—

If the price of 15 seers of Wax Candles be required at 2 Rs. per seer, look for the number 15 in page 63, column the 1st, and opposite to that number in column the 2d, you will find 30, the answer required.

N. B.—By the use of the three foregoing Tables, the buyers and sellers of commodities will, obviously, be exempted from many necessary and burthensome calculations.

TABLE IV.

Contains the Interest of any sum of money, from 100,000 Rupees to 1 Pie, from 1 to 30 days, and from 1 to 12 months, at the rate of from 4 to 12 per cent.

For using this Table, suppose it be required to know the Interest of 599 12 3 for 5 months at 9 per cent. per annum, reference must be made to page 186.

In the 1st column	500	3d column	18	12	
	50		1	14	
	40		1	8	
	5			3	
	4			2	800
	12				5 400
	3				1 350
Principal Sa.Rs	599 12 3	Interest Sa.Rs	29	7	11,550

TABLE V.

Contains the Commission of any sum of money, from 100,000 Rupees to 1 Pie, at the rate of from $\frac{1}{2}$ to 10 per cent.

TABLE VI.

Contains the Calculations of Batta, from 1 to 16 per cent. upon any sum, from 100,000 Rupees to 1 Pie, and from thence may be ascertained the equivalent sum in Current Rupees, of any given number of Areot, Sonaut, or Sicca Rupees, according to the respective Batta that they bear.

By way of example, in the use of this table, suppose it be required to determine how many Current Rupees are in the sum of Sicca Rupees 5550 12 6. Sicca Rupees bear 16 per cent. batta, reference must be had to page 280, and in the first column will be found the 16 per cent. Rupees.

S. Rs.	Batta.	C. Rs.	D. Ps.
In the 1st col.	5000	2d col.	5000
	500	80	580
	50	8	58
	12	1 11 40	12 11 40
	6	960	6 960
Sa.Rs.	5550 12 6	888 2 ..	6433 11 6

TABLE VII.

Appertains to the subject of Exchange, and contains Current Rupees rendered into Rupees of different values, from 1 to 16 per cent.—This table will be found extremely useful in purchases and sales, when it is often stipulated that the value of commodities shall be paid in particular species of Rupees bearing a fixed batta; and, as the established coin is Sicca Rupees, which is sixteen per cent. superior to the current. It may be proper to remark here (tho' it cannot be very necessary, it being so well understood), that the difference between any kind of Rupee and the Current, is always calculated in currency, so that altho' 16 per cent. Rs. are 8 per cent. better than those which are 8 per cent. above currency, yet one hundred 16 per cent. Rs. are not equal to one hundred and eight 8 per cent. Rupees, but to one hundred 8 per cent. Rupees, increased by the addition of eight Current Rupees reduced to that centage; that is, Rupees 7 6 6 making the sum of 8 per cent.—Rupees 107 6 6 the equivalent to one hundred 16 per cent. Rupees; and vice versa, one hundred 8 per cent. Rupees, because 8 per cent. less in value than the 16 per cent. Rupees do not equal 92 of that sort; but 100 lessened by the reduction of 8 Ct. Rs. reduced to value in that centage, viz., Rs. 6 14 4, making the sum 93 1 8 sixteen per cent. Rupees; and so of all the other kinds. By way of example under this table, suppose Current Rupees 25355 12 are to be paid in Sicca, or 16 per cent. Rupees, in page 283.

Curt. Rs.		S. Rs.	D. Ps.
The first column shews	20000	17241	6 0 827 17
	5000	4810	5 6 206 26
	300	258	9 11 172 12
	50	43	1 7 862 2
	5	4	4 11 586 6
	12	10	4 137 27
Current Rs.	25355 12	Equivalent S. Rs. 21858	6 5 793 3

Or, if that sum, or any other Current is to be paid in Arcot, or Sonauts, reference must be made in the same way to the pages containing the 8 per cent. and 11 per cent. calculations, and so with all others.

TABLE VIII.

Exhibits the equivalent sum in any species of Rupees, for any number of Gold Mohurs, from 10,000 to 1, valuing the Gold Mohur at 16 best Sicca Rupees, at 16 per cent. above currency. It also shews the comparative value of different species of Rupees with each other. By way of example suppose the value of 1258 Gold Mohurs is required in Rupees which are 13 per cent. above currency—Turn to page 289, and in the second column will be found the 13 per cent. Rupees.

	G. M.		13 per cent. Rs.
In the first column	1000	Second column 16424 12 6
—	200	3284 15 4
—	50	821 3 10
—	8	131 6 4
Gold Mohurs	1258		Equivalent Rs. 20652 6 0

TABLES IX. X. XI. X.*

Exhibit the equivalent value, to and with each other of Sicca, Current, Sonaut, and Arcot Rupees, which are the common coins of Bengal, from 100,000 Rupees to 1 Pie.—Their comparative values have been also ascertained by the Tables of Batta. To use these Tables, let it be supposed that Sicca Rupees 10330 4 2 are to be paid in Sonauts, refer to pages 291 and 292.

S. Rs.		Sonauts.	D. Ps.
In the first column is	10000	third column 10450	7 2 486 54
—	300	—	313 8 2 594 66

—	2	—	2 90 10
Sicca Rs.	10330 4 2	Equiv. Sonauts 10295 9 4	792 83

TABLE XI*.

Contains the Exchange of Rupees into Dollars, from 50,000 to 1 Rupee, beginning at the exchange of 201, and ending with the exchange of 212 Rupees per 100 Dollars.

The Exchange consists in finding the true sum value for value, in the coin of one country for that of another.—The par of exchange is the fixed value of the coin of one country compared with that of another. The course of exchange is the current price, and is always unsettled, being sometimes above, and sometimes below par, according to various contingencies, connected with, and arising out of the commercial and political relations of countries with each other.

The different kinds of exchange are so multifarious that I must limit my exposition to one example only.

If it be proposed to remit to China the sum of Sicca Rupees 15609, then to ascertain the value of the same in Spanish Dollars, the rate of Exchange being at 204 Sicca Rupees per 100 Dollars, refer to page 300.

	Sa. Rs.		Dollars	D. Ps.
In the first column	10000	second column	4901 980. 160
	5000		2450 980. 80
	600		294 117. 88
	9		4 411. 156
Sicca Rupees.	15609		Dollars.	7651 474. 4

In the use of Tables 11*, 12, 13, 14, 15, 16, and 17, by referring to the first and second or third columns, the value of the coin of one country for that of another will be found.

TABLE XI.*

Contains the Exchange of Dollars into Rupees, from 50,000 to 1 Dollar, at the same rates of exchange, as in the foregoing table.

TABLE XII.

Contains the Exchange between Calcutta and Bombay, from 100,000 Rupees to 1 Pie, beginning at the exchange of 101, and ending with the exchange of 116 Bombay per 100 Calcutta Rupees.

TABLE XIII.

Contains the Exchange between Bombay and Calcutta, from 100,000 Rupees to 1 Rea, at the same rates of Exchange as in the foregoing table.

TABLE XIV.

Contains the Exchange between Calcutta and Madras, from 100,000 Rupees to 1 Pie, beginning with the exchange of 300, and ending with the exchange of 350 Rupees per 100 Pagodas.

TABLE XV.

Contains the Exchange between Madras and Calcutta, from 50,000 Pagodas to 1 Cash, at the same rates of exchange as in the foregoing table.

TABLE XVI.

Exhibits the Exchange between Calcutta and London, from 100,000 Rupees to 1 Pie, beginning at the exchange of 2 shillings and ending with the exchange of 3 Shillings per Rupee.

TABLE XVII.

Contains the Exchange between London and Calcutta, at the same rates of exchange, as are exhibited in the foregoing table.

TABLE XVIII.

Contains Calculations for paying Servants' Wages, House Rent, &c. from 4 Annas to 500 Rupees per month, from 1 to 30 days, and from 1 to 12 months.

TABLE XIX.

Contains the Solution of Questions in Multiplication, Division, Reduction and Merchandizing.—For the use of this Table, see page 468.

TABLE XX.

Contains the Reduction of English Weight into Factory and Bazar Weights, from 500 Tons to 1 Ounce.—For the use of this and the two following Tables, see page 472.

TABLE XXI.

Contains the Reduction of Bazar Weight into Factory and English Weights, from 10,000 Maunds to 1 Chittack.

TABLE XXII.

Contains the Reduction of Factory Weight into Bazar and English Weights, from 10,000 Maunds to 1 Chittack.

TABLE XXIII.

Contains the Decimal Part for every day in the twelfth part of a Year, reckoning the year to consist of $365\frac{1}{4}$ Days.

TABLE XXIV.

Contains the Exchange as established for the adjustment of the Calcutta Customs.

It may also not be amiss to notice that at the end of these Tables, I have subjoined a complete explanation of the Art of Gauging, with a description of the Gauging Rod, and appropriate examples—a Table of Specific Gravity, or the relative Weights of various bodies; also several Arithmetical Rules for calculating all Mercantile Accounts expeditiously and with facility; likewise an alpha-

betical list of Coins, Weights, and Measures, of most parts of India, China, Persia, Arabia, and the Eastern Islands, from the best and latest Authorities, which I hope will be regarded as a useful *addenda* to the Tables, and particularly so to the Merchants and Agents of Calcutta.

After the above synopsis of the nature and contents of this Work, the editor has only to add that several of the Tables are entirely original, and of course not to be found in any similar book which has ever been published in this country. They have been calculated with the greatest degree of care and labour by the author, whose undeviating object has been, by the joint efficiency of accumulated matter, and eminent attention to correctness, to stamp this work with a character of general and comprehensive utility, hitherto unequalled by any similar performance, which has appeared in British India, so that it may, most truly and emphatically, deserve and enjoy, as well as bear the name of The "UNIVERSAL CALCULATOR."

34 3332	67 6566	—	34 3366	67 6633	—		

The use of the foregoing Table: 1. In Multiplication. 2. In Division. 3. In Reduction. 4. In Merchandizing,

1. THE USE OF THE TABLE IN MULTIPLICATION.

Example 1.—Admit it were required to multiply 81 by 53: look at the top of the Table under (*The length or value of any Thing*) for 53 and casting your eye downward in the column of (*Breadth or Things valued.*) you will find 81, right against which under (*Products*) you will find 4293, which is the answer.

Example 2.—If you would find the Product of any 2 Numbers, with Cyphers to one or both, work for the significant figures as before, and add the Cyphers to the Product. Thus the Product of 53,000, by 81, is (adding the 3 Cyphers to the Product of 53 by 81) 42,930,000; or the Product of 5300 by \$100 is 42,930,000.

Example 3.—From the two foregoing Examples it may easily be gathered that any two Numbers may be multiplied together, tho' they exceed those actually mentioned in the Table: As suppose you would find the Product of 3159 by 95; to perform which, divide the number given into 2 or 3 parts, as here the 3159 into 3100 and 59; by the Table you will find that the Product of 3100 (or 31) by 95 (as by the 2d Example) is 294500
And the Product of 59 by 95 is 5605

The Sum of which is the Answer 300105

Example 4.—Or, if the Figures, both in the Multiplicand and Multiplier, exceed those in the Table, the work may be performed thus:

If 3159 is to be multiplied by 957, the Product of 3100

(as in the 2d Example) by 900 is 2790000

Also the Product of 3100 by 57 is 176700

And the Product of 59 by 57 (by the 1st Example) is 3363

And the Product of 59 by 900 is 53100

The Sum of which is the Answer 3023163

And thus may any two Numbers, tho' ever so large, be multiplied together only by Addition, with the help of the foregoing Table, dividing such large Numbers given into such Numbers as are contained in the Table, observing the first and second Examples and placing Units under Units, Tens under Tens, &c. of the several Products, as in the last Example, and having regard to the places of the Numbers you would have multiplied together in order to the right placing of such Products.

2. THE USE OF THE TABLE IN DIVISION.

Example 1.—When one Number is required to be divided by another, look for the Dividend in the Column of Products, and for the Divisor at the top and the Quotient is found to the left-hand such Dividend under (*Breadth*)

To divide a Sum or Things valued,) so if 4559 were to be divided into that can be found 47 equal parts, look at the upper end of the Table for in the column of 47, and under that for 4559, right against which, toward the left-hand, you will find 97, which is the Quotient.

Example 2.—To divide a greater or other Number than what is expressed in the Tables: as suppose it were required to divide 45,59,654 by 85, look for 85 your Divisor at the top of the Table, and underneath that Number, in the column of Products, seek for the 4 first places of your Dividend toward the left-hand, which is 4559, and tho' you cannot find it exactly,

yet you will find 4505 to be next to it, less than it, against which, in the column under (*Breadth or Things valued*) you will find 53, which put in the Quotient, or any where by itself; and deducting the 4505 from the 4559, the remainder is 54, to which bring down the two next Figures in the Dividend or Number to be divided, which is 65; then look under your said Divisor 85, in the said column of Products for 5465, and you will find 5440 to be next to it, against which is 64 toward the left-hand, which put toward the right-hand of the 53 aforesaid, and deduct the 5440 from 5465, and the remainder is 25; to which bring down the last Figure, or that in the Units' place of the Number given to be divided, and then look in the column of Products for 254, and you will find 170, against which, under your said Divisor 85, you will find (2) which put to the right-hand of your Quotient, viz. of the said 5364, and deduct the said 170 from 254, and the remainder is 84; so that 45.59.654 being divided by 85, the Quotient is 53642; which is a large sum, and done much sooner than by the common way of Division, and without the trouble of Multiplication. See the Example in the margin.

$$\begin{array}{r} 85)4559654(53642 \\ \underline{4305} \end{array}$$

$$\begin{array}{r} 5465 \\ 5440 \\ \hline 254 \\ 170 \end{array}$$

80 Remain.

But Note, That if nothing had remained after deducting the said 4505 (or had but one Figure remained) you might then have brought all the remainder of the Dividend down, and so proceeded, but two places of Figures remaining viz. 54, if you had brought to that the 654, you would have had five places of Figures to have had five sought for in the Table, which is one place more than can be found there for the most part.

Note also, That the first of the two Figures (toward the right-hand) first A Rule to know put in the Quotient must always possess the same place the true Quotient, in the Quotient, as that Figure does in the Dividend, when Cyphers fall which you first subtract from, as in the last Example, in the middle thereof. 3 in the Quotient must be in Thousands' place, because of. 5 (the first Figure you make Subtraction from) in the Dividend is in that place, & therefore to make 85)4505654(53007 Quotient, the 3 in the Thousands' place of the Quotient, 4504
I place the 2 Cyphers between the 3 and the 7. 654
See the Example in the Margin. 595

59 Remain.

3. THE USE OF THE TABLE IN REDUCTION.

Example 1.—If you would reduce Rs. As. and Ps. into Ps.; as 47 Rs. 13 Rs. As. & Ps. reduced As. 11 Ps. Under 16, and against 47, is 752, to which add the 13 As. then by Examples the 3d and 4th of the use of the Table in Multiplication, 760 by 12, produceth 9120; to which add the Product of 5 by 12; also 11 Pies, and the sum is the Answer. See the work in the Margin.

$$\begin{array}{r} 752 \\ 13 \\ \hline 765 \\ 12 \\ \hline 9120 \\ 11 \\ \hline 9131 \text{ Ans.} \end{array}$$

Example 2.—To reduce Pies into Rupees; as 23774 Pies. You may Pies reduced into do this by columns 12 and 16. First look in the column under 12, the Pies in 1 Anna, and you will find by the Rules in Division by the Table 2981 Annas, and 2 Pies, which reduce into Rupees by the column under 16, by the same Rules, and you will find Rs. 123 13 2, the Answer, as 12/23774/1981 Annas per Example in the Margin.

228

974

972

2 Pies

16/1981: 2(123. Rupees.

192

61

48

13 Annas.

Example 3.—If you would reduce Avoirdupois Weight by the Table; as Hundreds, Quarters, 47 Cwt. 12 Qrs. 16lb. into Pounds: look at the top of Quarters, and Pounds, the Table for 47, and against 4, you will find 188; to be reduced into Pds. which add your Quarter of a hundred, and the sum is 189 Quarters, because 4 Quarters is 1 Cwt, then multiply 189 by 28 (as by the 3d and 4th, or last Example foregoing) and adding the 16lb. the sum is 5308lb. for Answer. But this Question may be sooner resolved, by multiplying 47 by 112, and adding the 1 Quarter (or 28lb.) and the 16, thus:

189

28

5040

252

16

5308 Answer.

47

112

47 by 110 is.....	5170lb.	}
47 by 2 is.....	94lb.	
1 Quarter	28lb.	

5308 Sum, or Answer.

Example 4.—If you would reduce Liquid Measure, viz. Tuns, Hogsheads, Reduction of Liquids, and Gallons, into Gallons, &c. as 32 Tuns. 3 Hds. quid, or thin Measure, and 42 Gallons, into Gallons: look at the top of the Table for 4, the Hds. in a Tun, and against 32, you will find 128, to which add the 3 Hogsheads given, and the sum is 131 Hogsheads.

32 3 42

4

128 Add.

3

131 Hogsheads.

63

Then by the 3d and 4th Examples of the use of the Table in Multiplication look at the head of the Table for 13, viz. Multiply 131 by 63 and the Product adding the 42 Gallons given is 19635 Gallons for Answer. See the work in the Margin.

19580	}	
63	}	Add.
42		

19635 Gallons.

4. THE USE OF THE TABLE IN MERCHANTIZING.

Example 1.—If the price of a Unit of any Commodity exceed 2 Rupees, The Price of Wine, &c. cast-up by the Table, may be found by this Table; as 13 dozen of Wine at 37 Rs. per dozen, will cost 481 Rupees which is found by looking at the top of the Table for the price 37, and underneath in the column of Products, against 13, is 481 Rs. the Answer.

Example 2.—What cost 87 pieces of Cloth at 17 Rs. 8 As. per piece? The Cloth, 17 Rs. being found at the top of the Table, in the column of Products, under it you will find (against the 87) 1479 Rs. to which add $\frac{1}{2}$ of 87 for the 8 As. and the sum is 1522 Rs. 8 As. the Answer.

But Note, That where there are Annas above the Rupees in the price of a unit of any thing, then the best way is to work as in the 1st Example last foregoing, for the Rs. and for the As. by multiplying them by the number of the things, and reducing them into Rupees by the Rules in Division.

Example 3.—This Table is also useful in casting-up Bills of Exchange; Use in casting-up as if you would know the value of 1500 Spanish Dollars, Bills of Exchange, at 36 Annas, or 2 Rs. 4 As. per Dollar. By the Table, if you multiply 36 by 15, and add the Ciphers to the Product, you will find 54,000 Annas, which reduce at once into Rupees, by the Example of the use of the Table in Reduction, and you will find the Answer 54. Rs. 3375.

Example 4.—You may likewise by this Table find the Interest or Disuse in Questions count of any sum of money; as the Interest of 472 of Interest. Rs. 12 As. and 10 Ps. for six months, at 11 per cent. per annum, is 52. Rs. 26.

This is done by dividing the given Number by 10, supposing it 10 per cent. (because 10 is one-tenth part of 100) so under 10, you will find in the column of Products 470, against which stands 47, and the 470 taken from 472, there rest 2 Rs. or 32 As. and the 12 As. given, make 44, against the next less to 44, viz. 40 in the column under 10, you will find 4, which is 4 As. then deducting 40 from 44, there rest 4 As. or 48 Ps. and the 10 Ps. given, make 58 Ps. the next number to which, in the Table under 10, is 50, against which stands 5, which is 5 Ps. so that a 10th-part of 472 12 10, is found 47 4 5; a tenth-part of which is 4 11 7, for a tenth-part of 47 Rs. is 4 Rs. and 7 Rs. remain, or 112 As. which, with the 4 As. make 116 As., a tenth-part of which is 11 Annas, and there resteth 6 As. or 72 Ps. and the 5 Ps. is 77 Pies; a tenth-part of which is 7 Pies, or 4 11 7, the sum of which is 52 Rs. the Interest of 472 12 10, for 1 year,

half of which
is the Interest for six months. 1. 10th 47 4 5, --- 5 ---

See the whole work in the Margin, 1-10th of that is 4 11 7, --- 1 --- all of which is easily done without the Table, by such as understand Arithmetic.

$\frac{1}{2}$ of which is 26 the Answer.

If the Discount for six months were required, that is to say, if 472 12 10, were paid six months before due, and an abatement, or Discount were to be made of 6 per Cent. for prompt payment.—You may do it near enough, by first finding the Interest of 472 12 10 for six months, as before taught, and deducting out of that principal the Interest 26 Rs. so the remainder is 446 12 10, to be paid presently, in lieu of 472 12 10, six months hence!

No. 1.

A Table, for reducing English Weight into Factory and Bazar Weights, from 500 Tons to 1 Ounce.

EXAMPLE.

	Tons.	Cwt.	Qrs.	lb.
Required the Bazar Weight of	47	6	1	14
45 Tons				Bazar Mds. Seers. Ch. piz.

1 Qr.				62 . 29 . 1 . 5
14 lb.				13 . 10 . 2
				6 . 13 . 1
<u>47 . 6 . 14 Tons.</u>				<u>Bazar Maunds</u> 1290 . 29 . 7 . 3

No. 2.

A Table, for reducing Bazar Weight into Factory and English Weights, from 10,000 Maunds to 1 Chittack.

EXAMPLE.

	Tons.	Cwt.	lb.	oz.	dr.
Required the English Weight of 4572 Bags of Rice, each 2 Bazar Maunds, $4572 \times 2 = 9146$ Bazar Maunds.			330		
9000 Maunds			3 . 13 . 1 . 9 . 5 . 5		
100 ditto,					
45 ditto,			1 . 13 . 2 . 26 . 2 . 2		
<u>9146 Bazar Maunds.</u>			<u>Tons</u> 335 . 7 . 0 . 7 . 7 . 7		

No. 3.

A Table, for reducing Factory Weight into Bazar and English Weights, from 10,000 Maunds to 1 Chittack.

EXAMPLE.

	Factory Mds. Seers.				
	Tons. Cwt. Qrs. lb. oz. dr.				
Required the English Weight of					9534 . 10
9000 Maunds			300		
500 ditto,			16 . 13 . 1 . 9 . 5 . 5		
34 ditto,				2 . 2 . 18 . 10 . 11	
10 Seers					18 . 10 . 11
<u>9534 . 10 Factory Maunds.</u>			<u>Tons</u> 316 . 16 . 0 . 18 . 10 . 11		

GENERAL RULES.

ENGLISH WEIGHTS.

- 16 Drams 1 ounce.
- 16 Ounces 1 lb.
- 28 lb. 1 qr. of a cwt.
- 20 cwt. 1 ton.

BENGAL WEIGHTS.

- 10 Tenth-parts 1 chittack.
- 16 Chittacks 1 seer.
- 40 Seers 1 maund.
- 50 Factory mds. 1 ton.
- 110 do. 100 bazar mds.

Georgia,	Ditto,	

GAUGING.

GAUGING is the art of measuring casks, by means of a *gauging rod*, or by taking the diameters of the cask at the head, bung, &c. and thereby ascertaining the contents.

DESCRIPTION AND USE OF THE GAUGING ROD.

The Gauging Rod is an instrument used in gauging, or measuring the contents of any vessel. That usually employed is the four-foot gauging rod. It is commonly made of box, and consists of four rules each, a foot long, and about three-eighths of an inch square, joined together by three brass joints; by which means the rod is rendered four feet long when the four rules are quite opened, and but one foot when they are all folded together. On the first face of this rod, marked 4, are placed two diagonal lines; one for beer and the other for wine; by means of which the content of any common vessel in beer or wine gallons may be readily found by putting the rod in at the bung-hole of the vessel till it meets the intersection of the head of the vessel, with the staves opposite to the bung-hole. For distinction of this line, there is written thereon, *beer* and *wine gallons*. On the second face, 5, are a line of inches and the gauge-line; which is a line expressing the areas of circles, whose diameters are the correspondent inches in ale-gallons. At the beginning is written, *ale area*. On the third face, 6, are three scales of lines; the first, at the end of which is written *hogshead*, is for finding how many gallons there are in a hogshead when it is not full, lying with its axis parallel to the horizon. The second line, at the end of which is written *B. L.* signifying a *butt lying*, is for the same use as that for the hogshead. The third line is to find how much liquor is wanting to fill up a butt when it is standing: at the end of it is written *B. S.* signifying a *butt standing*. In the half of the fourth face of the gauging rod, 7, there are three scales of lines, to find the wants in a firkin, kilderkin, and barrel, lying with their areas parallel to the horizon. They are distinguished by letters *F. K. B.* signifying a *firkin*, *kilderkin*, and *barrel*.

Use of the diagonal lines on this rod. To find the content of a vessel in beer or wine gallons, put the brased end of the gauging rod into the bung-hole of the cask, with the diagonal lines upwards, and thrust this brased end to the meeting of the head and staves; then with chalk make a mark at the middle of the bung-hole of the vessel, and also on the diagonal lines of the rod, right against, over one another, when the brased end is thrust home to the head and staves: then turn the gauging-rod to the other end of the vessel, and thrust the brased end home to the end, as before. Lastly, see if the mark made on the

gauging-rod come even with the mark made on the bung-hole when the rod was thrust to the other end ; which if it be, the mark made on the diagonal line will, on the same lines, show the whole content of the cask in beer or wine gallons.

If the mark made on the bung-hole be not right against that made on the rod when you put it the other way, then right against the mark made on the bung-hole make another on the diagonal lines ; and the division on the diagonal line between the two chalks will show the vessel's whole contents in beer or wine gallons. Thus, e gr. if the diagonal line of a vessel be 28 inches four-teenths, its contents in beer gallons will be near 51, and in wine gallons 62.

If a vessel be open, as a half barrel, tun, or copper, and the measure from the middle on one side to the head and staves be 38 inches, the diagonal line gives 122 beer-gallons ; half of which, viz 61, is the content of the open half tub.

If you have a large vessel, as a tun or copper, and the diagonal line taken by a long rule proves 70 inches ; the content of that vessel may be found thus : every inch at the beginning end of the diagonal line call ten inches. Thus ten inches become 100 inches ; and every tenth of a gallon call 100 gallons ; and every whole gallon call 1000 gallons.

Example. At 44.8 inches on the diagonal beer-line is 200 gallons ; so that 4 inches 48 parts, now called 44 inches 8 tenths, is just two-teenths of a gallon, now called 200 gallons ; so also if the diagonal line be 76 inches and 7-tenths, a close cask of such diagonal will hold 1000 beer-gallons ; but an open cask but half so much, viz. 500 beer gallons.

Use of the Gauge Line. To find the content of any cylindrical vessel in ale gallons ; seek the diameter of the vessel in inches, and just against it on the gauge-line is the quantity of ale-gallons contained in one inch deep : this multiplied by the length of the cylinder will give its content in ale-gallons.

For example, suppose the length of the vessel 32.06, and the diameter of its base 25 inches ; to find what is the content in ale-gallons ? Right against 25 inches on the gauge-line is one gallon and 745 of a gallon ; which multiplied by 32.06, the length, gives 55.9447 gallons for the content of the vessel.

The bung diameter of a hogshead being 25 inches, the head diameter 22 inches, and the length 32.06 inches ; to find the quantity of ale-gallons contained in it ? Seek 25, the bung diameter, on the line of inches ; and right against it on the gauge-line, you will find 1.745 : take one-third of it, which is .580, and set it down twice : seek 22 inches in the head

diameter, and against it you will find of the gauge-line 1.356; one-third of which added to twice .580, gives 1.6096; which multiplied by the length 32.06, the product will be 51 603776, the content in ale-gallons. Note, this operation supposes, that the aforesaid hogshead is in the figure of the middle ustrum of a spheroid.

The use of the lines on the two other faces of the rod is very easy; you need only put it downright into the bung-hole (if the vessel you desire to know the quantity of ale-gallons contained therein be lying) to the opposite staves; and then where the surface of the liquor cuts any one of the lines appropriated to that vessel, will be the number of gallons contained in that vessel.

PROBLEM *To determine the contents of any cask, by taking the head and bung diameters, and the length of the cask.*

NOTE. Casks have been divided into four varieties or forms; and for determining their contents several rules have been laid down, which are sometimes operose and at best but proximations; for in taking the dimensions of casks if the heads be not circular, if the bung-hole be not exactly in the middle of the cask, or if the bung stave or its opposite, be thicker, thinner, or more or less prominent than the others, a difference will arise. But the following rule will on all occasions be found the most easy and expeditious, and sufficiently, accurate for the common purposes of business.

RULE. Subtract the head diameter from the bung diameter, and note the difference.

Multiply the difference by 7, if the cask be of the *first form*, that is when the staves are much curved or bulging between the bung and the head. If the cask be of the *second form*, or having its staves less bulging, multiply by .65. If the staves are still less bulging, multiply by .57, which is the *third form*. And lastly, if the staves are nearly straight from the bung to the head, the cask is then reckoned of the *fourth form*, and the difference between the head and bung diameters must be multiplied by .52.

To the product thus found, add the Head diameter and the sum will be a *mean diameter*; by which means the cask is reduced to the form of a cylinder.

Square the mean diameter and multiply the square by the length of the cask; divide that product by 359, which will give the contents in ale gallons, or divide by 294 for the contents in wine gallons.

EXAMPLES.

Required the contents of a cask of the first form, whose length is 40, and bung and head diameters 32 and 24 inches?

$$32 - 24 = 8 \text{ the difference.}$$

$$\text{and } 8 \times 7 \times 24 = 29.6 \text{ the mean diameter.}$$

$$\text{then } 29.6 \times 40 \text{ (the length)} = 35046.4.$$

and $\frac{35046.4}{3.14} = 97.62$, &c. the contents in ale gallons.

and $\frac{35046.4}{2.05} = 119.2$ wine gallons.

Required the contents of a cask of the second form, whose length is 40, and bung and head diameters 32 and 24 inches?

$$32 - 24 = 8 \text{ the difference.}$$

$$\text{and } 8 \times 6.5 \times 24 = 29.2 \text{ the mean diameter.}$$

$$\text{then } 29.2 \times 29.2 \times 40 = 34105.6.$$

now $\frac{34105.6}{3.14} = 95$. the contents in ale gallons.

and $\frac{34105.6}{2.05} = 116$. the contents in wine gallons.

Required the contents of a cask of the third form, whose length is 40, and bung and head diameters 32 and 24?

$$\text{Ans. } \left\{ \begin{array}{l} \text{Wine gallons } 110.976. \\ \text{Ale gallons } 90.883 \text{ nearly.} \end{array} \right.$$

Suppose the bung diameter of a cask be 26.5 inches, head diameter 23 inches, and length 28 inches, what is the contents in ale gallons for each variety of casks?

$$\text{Ans. } \left\{ \begin{array}{ll} \text{first variety} & 50.5171 \\ \text{second variety} & 49.8248 \\ \text{third variety} & 48.727 \\ \text{fourth variety} & 48.047 \end{array} \right.$$

OF SPECIFIC GRAVITY.

The specific gravities of bodies, are their relative weights, contained under the same given magnitude, as a cubic foot, or a cubic inch, &c.

The specific gravities of several sorts of matter are expressed by the numbers annexed to their names in the following table:

A Table of the Specific Gravities of Bodies.

Fine gold.....	19640	Cast brass	8000
Standard gold	18888	Steel.....	7850
Quick silver.....	13600	Iron	7645
Lead.....	11325	Cast iron.....	7425
Fine silver.....	11091	Tin	7320
Standard silver.....	10535	Marble.....	2700
Copper.....	9000	Common stone.....	2520
Gua metal.....	8784	Loom.....	2160

Brick	2000	Oak.....	925
Light earth.....	1984	Gun-powder, shaken.....	922
Solid gun-powder.....	1745	Ash	800
Sand.....	1520	Maple.....	755
Pitch.....	1150	Elm.....	600
Box-wood.....	1030	Fir.....	550
Sea-water.....	1030	Cork	240
Common-water.....	1000	Air.....	14

NOTE.—The several sorts of wood are supposed to be dry. Also, as a cubic foot of water weighs just 1000 ounces avoirdupois, the numbers in this table express, not only the specific gravities of the several bodies, but also the weight of cubic foot of each, in avoirdupois ounces; and hence, by proportion, the weight of any other quantity, or the quantity of any other weight, may be known, as in the following problems.

PROBLEM I. *To find the magnitude of any body from its weight.*

As the tabular specific gravity of the body,
Is to its weight in avoirdupois ounces,
So is one cubic foot, or 1728 cubic inches,
To its content in feet, or inches, respectively.

EXAMPLES.

1. Required the content of an irregular block of common stone, which weighs 1 cwt. or 112 lb.?

$$1 \text{ cwt.} = 112 \text{ lb} = 1792 \text{ oz.}$$

Then as $2520 : 1792 \text{ oz.} : 1728 : 1228.8$ the Answer.

2. How many cubic inches of gun-powder are there in one pound weight?

Ans. 30 nearly.

3. How many cubic feet are there in a ton weight of dry oak?

Ans. $38\frac{1}{12}\frac{1}{12}$

PROBLEM II. *To find the weight of a body from its magnitude being given.*

RULE. As one cubic foot or 1728 inches,
Is to the contents of the body,
So is its tabular specific gravity,
To the weight of the body.

EXAMPLES.

I. Required the weight of a block of marble, whose length is 63 feet, and its breadth and thickness, each 12 feet; these being the dimensions of one of the stones in the walls of Balbec.

$$\left\{ \begin{array}{l} 63 \times 12 \times 12 = 9072 \text{ cubic feet in the stone.} \\ \text{Then as 1 cubic foot : 9072 cubic feet : : 2700 oz. (tab. wt.)} \\ \qquad\qquad\qquad 683.4 \text{ tons.} \end{array} \right.$$

Answer 683.4 tons, which is equal to the burthen of a large ship.

2. What is the weight of a pint of gun-powder, ale-measure?

Ans. 19 oz. nearly.

3. What is the weight of a block of dry oak, which measures ten feet in length, 3 feet in breadth, and $2\frac{1}{2}$ feet deep;

Ans. $4335\frac{1}{4}$

PROBLEM III. To find the specific gravity of a body.

RULE 1. When the body is heavier than water, weigh it both in water, and out of water, and the difference will be the weight lost in the water.

Then as the weight lost in water, is to the whole weight,

So is the specific gravity of water, to the specific gravity of the body.

EXAMPLES.

A piece of stone weighed in air 10 pounds, but in water only $6\frac{1}{2}$ lb. required its specific gravity?

$$10 - 6\frac{1}{2} = 3\frac{1}{2}$$

And $3\frac{1}{2} : 10 : 1000 : 3077$ the Answer.

RULE 2. When the body is lighter than water, so that it will not quite sink; affix to it a piece of another body heavier than water, so that the mass compounded of the two may sink together. Weigh the heavier body, and the compound mass, separately, both in water and out of it; then find how much each loses in water, by subtracting its weight in water from its weight in air; and subtract the less of these remainders from the greater. Then say,

As this last remainder,

Is to the weight of the light body in air,

So is the specific gravity of water,

To the specific gravity of the body.

EXAMPLES.

Suppose a piece of elm weighs in air 15 lb. and that a piece of copper which weighs 18 lb. in air, and 16 lb. in water, is affixed to it, and that the compound weighs 8 lb. in water. Required the specific gravity of the elm?

18 in air	33
16 in water	6
—	—
loss 2	27 loss
	2
	—
	25
25 : 15 :	: 1000 : 600 Ans.

PROBLEM IV. To find the quantities of two ingredients in a given compound.

RULE. Take the differences of every pair of the three specific gravities, viz. of the compound and each ingredient, and multiply the difference of every two by the third.

Then as the greatest product is to the whole weight of the compound, so is each of the other products, to the weights of the two ingredients.

EXAMPLES.

A composition of 112 lb. being made of tin and copper, whose specific gravity is found to be 8784; required the quantity of each ingredient? The specific gravity of tin being 7320, and of copper 9000.

$$(9000 - 7320) \times 8784 = 14757120$$

$$(9000 - 8784) \times 732 = 1581120$$

$$(8784 - 7320) \times 9000 = 13176000$$

Then as 14757120 : 112 :: 13176000 100 : the quantity
of copper, and 112—100=12 the quantity of tin.

TO FIND THE TONNAGE OF SHIPS.

RULE. Multiply the length of the keel, by the breadth of the beam, that product again by half the breadth of the beam, and divide the last product by 94, the quotient will be the tonnage required.

EXAMPLES.

A Ship's keel is 72 feet, the breadth of her beam 24, what is her tonnage?

$$\frac{72 \times 24 \times 12}{94} = 220.6 \text{ the Ans. or tonnage.}$$

A vessel is 60 feet long by the keel, and 20 by the beam, what is her tonnage?

Ans. 127 $\frac{1}{2}$ nearly.

What is the tonnage of a ship, whose keel is 84 feet long, and the breadth of her beam 28 feet?

Ans. 360.93 tons.

TO FIND THE WEIGHT OF ROPES.

RULE. Multiply the square of the circumference in inches, by the length in fathoms, and divide the product by 480 for the weight in cwts.

NOTE. Rope is distinguished by its circumference; thus a two-inch rope, means a rope of 2 inches circumference, &c.

EXAMPLES.

What will be the weight of 100 fathoms of 3-inch rope?

$$\frac{3 \times 3 \times 100}{480} = \frac{900}{480} = 1 \text{ cwt. } 3 \text{ qrs. } 14 \text{ lb.}$$

What will be the weight of a 6-inch hawser of 120 fathoms long?

Ans. 9 cwt.

Several Arithmetical Rules

FOR

CALCULATING ALL MERCANTILE ACCOUNTS

EXPEDITIOUSLY AND WITH FACILITY.

INTEREST AND DISCOUNT.

The Interest of any sum, for any number of years, is found by multiplying the principal by the rate per cent. and that product by the number of years, then dividing the last product by 100. The Interest for any number of months may be found by considering what part they are of a year—and for any number of days, by considering what part they are of a month of 30 days.

For Discount, first find the Interest of 100 for the given time, and add it to 100, then say, as that sum is to 100, so is the sum to be discounted to its present value, which subtract from the principal, and the difference is the discount.

EXAMPLE.

What is the Interest of 11245 Rupees, for 2 years, at 8 per cent. per annum?

SOLUTION.

$$\begin{array}{r} 11245 \\ \times 8 \\ \hline 89960 \\ -2 \\ \hline 1799.20 \\ -16 \\ \hline 3.20 \\ -12 \\ \hline 2.40 \end{array}$$

Answer, Rupees 1799 3 2

What is the discount on the same sum, for the same time, and at the same rate?

Interest on 100 Rs. for 2 years is 16 Rs. which added to 100 is 116 Rs.

116: 100: 11245
100

116) 124500(9693 Rs.

- 44 -

Principal ..	11245	0	0
Present Worth	9603	15	5
Discount ..	1551	0	7

The solution in the above Interest sum speaks for itself, and so does the other in discount ; but we must observe, this last is a mode of calculation rendered by a universal custom entirely obsolete, and although equitable and perfectly correct, it is nevertheless disregarded and rejected by merchants all over the world ;—with merchants, to discount a bill is simply to

take of the rated Interest for the time it has to run, thus,—in the first example, to discount a bill for 11,245 Rupees that has to run two years :

Principal.....	11,245	0	0
Less Interest for 2 years...	1,799	3	2
Present Worth.....	9,445	12	10

By doing which there is a positive loss sustained by the bill holder of Rupees 248 2 7, and which arises upon the Interest being deducted, without making any allowance for Interest upon that deduction, which would not be the case if discounted correctly.

What is the Interest of Rupees 1540 14 9 for 2 years, 7 months and 25 days, at 8 per cent. per annum?

SOLUTION.

1540	14	9
		8
6 months is the $\frac{1}{2}$	12327	6 0
		2
1 month is the $\frac{1}{3}$	24654	12 0
15 days is the $\frac{1}{2}$ and 10 days $\frac{1}{3}$	6163	11 0
	1027	4 6

	342	6 10
	327,01	12 7
		16
		—
		28
		12
		—
		3,43
Answer, Rupees	327	0 3

Illustration.—Agreeably to the rule—“ The Interest for any number of months may be found by considering what part they are of a year, and for any number of days, by considering what part they are of a month of 30 days :” The above solution exhibits the rule of Interest in all its branches, viz. the principal multiplied by the rate per cent.

then by the number of years ; and in considering what portion of a year 7 months are, they are found to be in two divisions, viz 6 are the half of 12 months, or one year, and 1 the $\frac{1}{2}$ of 6 the first divisor, and for the days 15 are the $\frac{1}{2}$ of one month, and 10 the $\frac{1}{3}$, both taken out of the last divisor by months ; —this addition divided by 100, gives the answer as seen in the work.

COMMISSION, PREMIUM, BROKERAGE AND INSURANCE.

RULE :

Multiply the sum by the rate per cent. and take parts with the fraction (if any); that amount, divided by 100, will give the answer.

EXAMPLE.

What is the commission on 10,000 Rs. at $2\frac{1}{2}$ per cent.?

SOLUTION.

$$\begin{array}{r} \frac{1}{2} \text{ is } \frac{1}{2} \text{ of } 10,000 \\ \underline{2} \\ 20,000 \\ \underline{5000} \\ 250,00 \end{array} \text{ Answer, 250 Rs.}$$

BARTER.

Is the changing one commodity for another, and teaches traders to proportion the quantities without loss.

RULE :

Find the value of given and required quantities by the most concise method; then proportion, or find the rate of exchange, buying or selling, by the rule of three.

EXAMPLE.

How many corse of baftaes, at 5 Rs. per piece, must be given in barter for 45 maunds of cloves, at 10 Rs. per seer.

SOLUTION.

mds.

45 maunds, at 10 Rs. per seer

EQUATION OF PAYMENTS.

Is the finding of a time to pay at once several Debts due at different times, so that no loss shall be sustained by either Party.

RULE :

Multiply each payment by the time at which it is due, then divide the sum of the products by the sum of the payments, and the quotient will be the equated time.

EXAMPLE.

Suppose I receive drafts in payment of an old standing debt, as follows: 1 draft at 3 months, for 5000 Rs. 1 ditto, at 6 months, for 5000 Rs. 1 ditto, at 9 months, for 5000 Rs. and 1 ditto, at 12 months, for 5000 Rs. what is the equated time for the whole to be made in one payment.

SOLUTION.

$$\begin{array}{rcl} 5000 \times 3 & = & 15000 \\ 5000 \times 6 & = & 30000 \\ 5000 \times 9 & = & 45000 \\ 5000 \times 12 & = & 60000 \\ \hline \end{array}$$

$$\begin{array}{rcl} 20000 & & (150000) \quad 7 \text{ months} \\ & & 140000 \\ \hline & & 10000 \end{array}$$

20000	(300000) 15 days
20000	
	100000
	100000

Answer, 7 months and 15 days.

LOSS AND GAIN.

Is an excellent rule by which all who are engaged in mercantile pursuits, may discover their profit or loss, per cent. by the gross, &c. It also instructs us to raise, or fall the price of goods, so as to gain, or lose just so much, and no more.

RULE:

1st. Calculate the cost and sale, and the difference between them, will give the gross loss, or gain; then if the gain or loss per cent. be required.

As the prime cost is to the gain, or loss, so is 100 to the gain, or loss per cent.

2d. To ascertain the rate, an article should be sold to gain, or lose so much per cent.

As 100 is to the price, so is 100 with the profit added, or loss subtracted to the gaining or losing price.

3d. When there is a gain, or loss per cent. to find the prime cost of the article.

As 100 with the gain per cent. added, or loss per cent. subtracted, is to the price, so is 100 to the prime cost.

EXAMPLE.

If I buy Nyansook, at 15 Rs. per piece, and sell it at 18 Rs. what is the gain per cent.?

18	
15	
	3 gross gain
15: 3: 100

15)300(20 per cent. Answer.

SINGLE FELLOWSHIP.

Is when Partners' Stocks are employed an equal time in Trade.

RULE.

As the whole Stock is to the whole gain, or loss, so is each person's particular Stock to his particular Share of the gain or loss.

Proof.—Add all the particular Shares of the gain, or loss, together; that sum if it be equal to the whole gain, or loss, the work is right.

EXAMPLE.

A and B in company, A put in 80,000 Rs. and B 1,20,000, and they gain 50,000 Rs. what is each man's share?

SOLUTION.

A's stock... 80,000

B's ditto... 1,20,000

$$\begin{array}{r} 80,000 : 50,000 :: 80,000 \\ \hline 80,000 \end{array}$$

$$\hline 4000,000,000$$

20,000 A's share of the gain.

Whole gain..... 30,000

A's share..... 20,000

B's ditto..... 30,000

To which add A's. 20,000

Proof 50,000

DOUBLE FELLOWSHIP.

Is when partner's stocks are employed an unequal length of time.

RULE.

Multiply each partner's particular stock by his respective time, taking the total of these products for the first number; take the whole loss or gain for the second, and let the product of every particular partner's stock and time be the third number; repeat the Rule of Three as often as there are partners, and the several fourth numbers produced by these operations are the numbers required.

Method of Proof is the same as in Single Fellowship.

EXAMPLE.

A and B enter into a joint Concern, or Copartnership; but A had been 6 months in the business, when B came in, who brought a Stock of 40,000 Rs which was double A's Capital at his commencing, and at the expiration of 6 months from the period of B's coming in, at the winding up of Accounts, they had gained 30,000 Rs. how much is each man's share?

SOLUTION.

$$\begin{array}{rcl} 20,000 \times 12 & = & 240,000 \text{ A's stock and time} \\ 40,000 \times 6 & = & 240,000 \text{ B's ditto} \end{array}$$

$$\begin{array}{rcl} \hline \text{A's } 240,000 : 30,000 & :: & 240,000 \\ & & 24 \\ \hline \end{array}$$

$$\begin{array}{rcl} \hline 48)720,000(15,000 \text{ A's share.} \\ & & 48 \\ \hline \end{array}$$

$$\begin{array}{rcl} \hline & 240 \\ & 240 \\ \hline \end{array}$$

$$\begin{array}{rcl} \hline \text{A's } 240,000 : 30,000 & :: & 240,000 \\ & & 24 \\ \hline \end{array}$$

$$\begin{array}{rcl} \hline 48)720,000(15,000 \text{ B's share} \\ & & 48 \\ \hline \end{array}$$

$$\begin{array}{rcl} \hline & 240 \\ & 240 \\ \hline \end{array}$$

Then 15,000 + 15,000 = 30,000 proof

Illustration. When Partners adventure Stock upon equal time, it is evident the shares of gain or loss must be in proportion to the Stock, as fully shewn in single Fellowship; and when the Stocks are equal, the shares are proportioned on the time; and when neither are equal, the shares must be as their products. In the above example, neither are equal, yet the Partners receive an equal share of the gain, owing entirely to the difference of time, as is evident from the work;—in the following example, the shares are proportioned on the time only, viz.

THE RULE.

As the aggregate of the time is to the whole loss or gain, so is each partner's time to his particular share of the loss or gain.

EXAMPLE.

A adventured 40,000, twelve months, and B 40,000, six months, they gained 30,000 Rs.; now to divide the profits, say

As A's time 6 months

Added to B's 12 ditto

18 is to 30,000 so is A's time 6 months

6

18)1,80,000

10,000 to A's share of the gain.

And as 18 is to 30,000 so is B's time 12 months.

12

18)3,60,000

20,000 to B's share of the gain.

$10,000 \times 20,000 = 30,000$ Proof.

EXCHANGE,

Is the bringing of Money, or Weight of one country to that of another country.

The first point to be considered in calculating exchanges, is the divisions, sub-divisions, and fractional parts of each species of money or weights.

2. To observe that whatever remains after division, to multiply it by the next sub-division of the money or weight into which it is to be reduced, and divide as before, and so on to the last.

3. When there is a division of a fraction, (which is very frequently the case) it must be reduced into such a fraction, and the dividend must also be multiplied by the same, before division, thus: English Avoirdupois weight, compared with Factory weight is at $74\frac{2}{3}$ lbs. per maund; here the 74 must be multiplied by 3, and add in the 2, making 224 for the divisor, —the dividend, must of course be of the same name before you can proceed in the operation, according to the Rule of Three.

These circumstances well considered, there can be no difficulty in performing any operation through exchanges.

EXCHANGE OF MONEY,

Means the bartering or exchanging of the money, (whether real or imaginary) of one place for that of another, and consists in finding what quantity of money of one place will be equivalent to a given sum of another, at a certain rate of exchange.

BENGAL.	Ct. Rs.
---------	---------

100 Sicca Rupees	aré	116
100 Madras Arcot	108	
100 Bombay Soortie.....	110	
100 Moouey Soortie	109	
100 Sonaut Fooley	113	
100 Old Sonaut.....	111	
100 Patney Sonaut.....	111	
100 Farruckabad	112½	
100 Moohedah	109	
100 Moorshedabad	111	
100 Lucknow	113½	
100 Duss Massa	110	

Money, in this country, is of two descriptions, sicca or real, and current or imaginary,—and the difference between the one and the other is called batta: money in this country is turned into each other through the medium of currency.

To bring Rupees of one description into Rupees of another description, multiply the description given (reduced if required) by 100 increased by the centage of its own kind, and divide by 100 increased by the centage of the description required, the results will be the answer in the same name with the last denomination.

EXAMPLE :

Bring 7250 old Sonaut Rupees into Sicca Rupees.

7250

111

Illustration. The above example proposes to change old so-naut rupees, (which are 11 per cent. better than current rupees,) into sicca rupees, (at 16 per cent. better than current); according to the rule, therefore, add 11 to 100 for a multiplier, and 16 to 100 for a divisor, the result will be in sicca specie; and in like manner proceed in all other similar cases: suppose it were required to change 5350 12 9 sicca rupees to Bombay soortie rupees; then sicca rupees being the description given, and are 16 per cent. better than current, add 16 to 100 for a multiplier; and Bombay soortie rupees being the description required, add 10 to 100 for a divisor, the result will be in Bombay specie, as follows:

5350 12 9

16

In this example the last denomination is in pie, consequently the quotient will be in pie, which must be brought into Rupees.

LONDON, MADRAS, BOMBAY, CHINA, &c. &c. &c.

In calculating Exchanges as well as in all other calculations, the shortest method should always be adopted, and the Rule of Practice made as much use of as possible, being the most expeditious, thus :

In 20,000 Sicca Rupees, how many £ sterling, exchange at 2s. 3d. per Sicca Rupee.

OPERATION.	
3d. =	20000
2	<u>2</u>
	40000
	5000
20)45000(
	£2250 Answer.

And so of all other monies, when it can be done ; and where it cannot the Rule of Three must be resorted to. For instance the above sum cannot be prored by the Rule of Practice, consequently the operation must be performed by stating thus :

In 2250 £ sterling, how many Sicca Rupees at 2s. 3d. per Sicca Rupee.

OPERATION.

r.	£
2s. 3d.....	1.....

Sa. Rs. 2472,00 Answer

The above few examples, will it is hoped be fully sufficient to lay a foundation in the Student for practical knowledge.

EXCHANGE OF WEIGHTS,

Means the bringing or reducing of the weight of one place into that of another place, and consists in finding what will be the weight of one place equivalent to a given weight of another place.

BENGAL.

80 Sicca Weight is.....	1 Calcutta Bazar Seer
60 ditto.....	1 Serampore ditto
82 ditto.....	1 Hooghly ditto
84 ditto.....	1 Benares ditto
96 ditto.....	1 Allahabad ditto
84 ditto.....	1 Mirzapore ditto
96 ditto.....	1 Lucknow ditto

To bring maunds of one place into maunds of another place ; multiply the weight given (reduced if of more denominations than one) by the siccas in its own name, and divide by the siccas in the place required ; the result will be the answer in the same manner with the last denomination.

In 1500 Serampore maunds how many Calcutta Lazzar maunds ?

$$\begin{array}{r} 1500 \\ \quad\quad\quad 80 \\ \hline 60) 120000 \\ \hline 20000 \text{ Answer} \end{array}$$

In 875 maunds 10 seers 14 chittacks of Lucknow, how many maunds, seers and chittacks Calcutta Bazar Weight.

$$\begin{array}{r}

 \end{array}$$

Illustration. This example has a third denominator, that is maunds, seers and chittacks; consequently after being reduced and wrought as the rule directs, the quotient will be, in chittacks, which must be brought into maunds by division, as usual.

To bring Bazar maunds into Factory maunds multiply by 11 and divide by 10, and to bring Factory maunds into Bazar maunds multiply by 10 and divide by 11

Bring 980 maunds 10 seers Bazar weight into Factory weight.

$$\begin{array}{r}
 980 \quad 10 \\
 -11 \\
 \hline
 10)10782 \quad 30
 \end{array}$$

Factory Maunds 1078 11 Answer.
Ee*

Bring 1 78 maunds 11 seers Factory weight into Bazar weight.

$$\begin{array}{r} 1078 \quad 11 \\ -10 \\ \hline 11)10782 \quad 11 \end{array}$$

Bazar Maunds 980 10 Answer.

LONDON, MADRAS, BOMBAY, CHINA, &c. &c &c.

Comparative view of the several denominations of Weights used in different parts of India, compared with Avoirdupois Weight:

	lb.
1 Bazar Maund, is equal to	$8\frac{1}{2}$
1 Factory ditto	$8\frac{1}{2}$
1 Madras ditto	$7\frac{1}{2}$
1 Ditto Candy	25
1 Bombay Maund	500
1 Ditto Candy	28
1 Tellierry maund	560
1 Ditto Candy	30
1 Anjango maund	600
1 Ditto Candy	28
1 Cochin maund	560
1 Ditto Candy	$27\frac{1}{2}$
1 Goa maund	$54\frac{1}{2}$
1 Ditto Candy	$24\frac{1}{2}$
1 Caiicut maund	495
1 Ditto Candy	30
1 Muscat maund	600
1 Pegue Candy of 150 Vis	$8\frac{1}{2}$
1 Pecul of 10 Catties, at China and Bencoolen	500
1 Ditto ditto, at Manilla	$133\frac{1}{3}$
1 Ditto of 50 Catties, at Siam	$137\frac{1}{4}$
1 Baffar of 3 Peculs, at Malacca	129
	405

To bring weights of one description into weights of any other description, multiply the weight given by its own avoirdupois weight, contained in one maund, candy, pecul, or bahar, and divide the product by the avoirdupois weight contained in one maund, candy, pecul, or bahar of the weight required, the quotient will be the answer.

EXAMPLES.

Bring 1078 mds. 11 seers Factory Weight into Avoirdupois Weight.

$$\begin{array}{r} 1 : 74\frac{1}{3} : : 1078 \quad 11 \\ 3 \qquad 3 \qquad \qquad 224 \\ \hline 3 \qquad 224 \qquad \qquad 4312 \\ \qquad \qquad \qquad 2156 \\ \qquad \qquad \qquad 2156 \end{array}$$

$$\begin{array}{r} 10 \text{ seers } \frac{1}{3} \dots \dots 56 \\ 1 \text{ ditto } \frac{1}{3} \dots \dots \quad 5 \quad 0 \quad 9 \\ \hline 3)241533 \quad 9 \quad 9 \\ \hline \text{lbs. } 8051 \quad 3 \quad 3 \quad \text{Ans.} \end{array}$$

Bring 7 Tons 2 Quarters, Avoirdupois Weight into Factory Weight.

AN
Alphabetical List
OF
COINS, WEIGHTS, AND MEASURES,
OF MOST PARTS OF
India, China, Persia, Arabia, and the Eastern Islands,
FROM THE BEST AND LATEST AUTHORITIES.

ACHEEN.

Coins, Weights, and Measures.

COINS.—Spanish dollars, pagodas, rupees, and other foreign coins pass current here. They have a small gold coin called a manna, which serves to pay servants and other small expences, but is of very base metal, and difficult to pass; also a small lead cash, of which you get from 800 to 1000 for a mace.

Accounts are kept in tales, mace, copangs, and cash.

GOLD WEIGHTS are the copang, mayam, mace, tale, buncal, and catty, and are thus divided:

4 copangs.....	1 mace
5 mace	1 mayam
16 mayams.....	make	1 tale
5 tales.....	1 buncal
20 buncals.....	1 catty.

The true standard of a buncal is 80 mace, though the merchants alter it at their pleasure, making it heavier or lighter: but in proportion as the buncal is altered, so must the catty be: from this cause the catty varies from 265 to 280 pagodas.

1 Acheen catty of gold dust, weighing 280 pagodas, is worth at Madras from 300 to 310 pagodas.

GREAT WEIGHTS are the buncal, catty, and bahar, and are thus divided:
oz. dwt. gr. lbs. oz. gr.

20 buncals make 1 catty, which is troy wt. 3^{lb} 17^{oz} 12^{dwt} avoir. 2 1 13
200 catties.—1 bahar, ditto, 501 lbs. 5 oz. 10 dwt. 422 15 0

14 China catty is commonly reckoned a Malay catty, which brings 3 China peculs equal to 1 bahar.

All goods are weighed by the dotchin, which should be carefully examined and proved with English weights; the smaller the quantity of your goods which are weighed at a time to the Native, under 100 catties, the more to your advantage.

MEASURES.—With the following they receive and deliver all kinds of grain:

2 chopahs.....	{ make	1 quarter
2 quarters.....		1 bamboo
16 bamboos.....		1 nely
10 nellys.....		1 chuncha
10 chuchas.....		1 coyang

They have a particular measure with which they deliver salt, called a parah, which ought to contain 25 punies or bamboos, 80 of which make a quoyane, about two-thirds of a Madras gaice.

Beetle-nut is measured by the parah, swept off with a board, one of which being counted, serves for a whole cargo. A box of beetle-nut is 10,000 nuts, and when good, should weigh 168 lbs.

AMBOYNA.

Coins, Weights, and Measures.

COINS—Accounts are kept in rix dollars. All kinds of coins pass here, but those most current are Spanish dollars, rupees, schillings, dubbeltjees, and doits, thus divided:

4 doits.....	{ make	1 stiver
4 stivers.....		1 dubbeltjee
6 stivers.....		1 schilling.

The following are the rates at which the undermentioned foreign coins pass current:

New duccatoon	80 stivers	Rix dollars.....	48 stivers
Old duccatoon	78 ditto	Rupees.....	30 ditto
Spanish dollar	64 ditto	Star pagoda.....	99 ditto
German crown.....	60 ditto	Gold Mohur.....	480 ditto

The usual rates of exchange in turning one species of coin into another, are thus calculated:

100 Spanish Dollars.	Rix dollars.....	133 6 4	Spanish dollars.	93 13 2
New duccatoons....	80 0 0	100 German crowns.	Rix dollars.....	125 0 0
German crowns....	106 16 0	Rupees.....	New duccatoons....	75 0 0
Rupees.....	213 4 0	100 German crowns.	Rupees.....	200 0 0
Star pagodas.....	64 21 53	Rupees.....	Star pagodas.....	60 20 25
£ Sterling.....	26 13 4	100 Rupees.....	£ Sterling.....	25 0 0
Spanish dollars....	75 0 0	Star pagodas.....	Spanish dollars....	46 22 4
New duccatoons....	60 0 0	100 Star pagodas.	Rix dollars.....	62 9 6
German crowns....	80 0 0	Rupees.....	New duccatoons....	37 16 0
Rupees.....	160 0 0	100 Rupees.....	German crowns....	50 0 0

WEIGHTS.—The Dutch and Chinese weights are in common use; but while the island was in the English possession, goods were in general sold by avoirdupois weight.

ANJENGO.

Coins, Weights, and Measures.

COINS.—Accounts are kept in rupees, fanams, pice, and budgerooks, thus divided :	
4 budgerooks.....	1 pice
12 pice.....	1 fanam
6 Gallion fanams.....	1 rupee
7 Travancore ditto.....	1 rupee

An Anjengo fanam is reckoned in the Company's account at one-fifth of a rupee. There are two kinds of fanams, Gallion and Travancore; the former are the best by 16 per cent.

Foreign coins pass current here, the mean rates of change being as under :

Negapatam pagoda passes for.....	20 to 21	Gallion fanams
Madras, or 3 Swamy pagodas.....	19 to 19½	ditto
Port Novo pagoda.....	17 to 18	ditto
Venetians.....	22 to 22½	ditto
Mexico dollars, full weight.....	12½ to 13	ditto
Duccatoons in tale.....	14½ to 15	ditto
Bombay, or Surat rupees.....	5 to 5½	ditto

100 oz. Mexico dollars at 12½ fanams per dollar weight, and 5½ fanams per rupee, produce Rs. 242 3 65.

WEIGHTS.—The mānd is 28 lbs. avoirdupois, and 20 mānds 1 candy, equal to 560 lbs. avoirdupois, which is equal to 7 factory māunds, 20 seers of Bengal, or 22 Madras māunds, 3 vis, 8 pollams.

MEASURES.—The Aujengo covid is half an English yard, or 18 inches.

ARACAN.

There was a mint at Aracan, where silver rupees were coined. An Aracan rupee is equal to 12 annas duss mussa, or in Aracan to three Kahawous, each Kahawou 16 puns of cowries.

AURUNGABUNDER.

Coins, Weights, and Measures.

Accounts are kept in rupees, carivals and pice, 12 pice making one carival, 50 carivals 1 rupee. Cowries are current in Scindy—48 cowries 1 pice.

The exchange between Tatta and Aurungabunder is 2½ per cent.

The weights and measures are as follows :—

SMALL WEIGHTS.		LONG MEASURE.	
28 moons .. .	3 ruttees	1 garce ..	2 inches
6 ruttees .. .	1 māna	16 garces ..	1 Guz.
12 mānas.....	1 tellah	but 1 guz is 3½ inches in cloth at Tatta.	

GROSS WEIGHTS.			GRAIN MEASURE.		
4 pice	1 anna	4 puttoes	1 twier
16 annas	1 puc.sr.	4 twiers	1 cosa
40 seers	1 maund	60 cossas	1 carival
which is equal to 74 lbs. 5 oz.		7 dwis.	of wheat, which is 22 pucca maunds, or		
avoirdupois.			21 Bombay parahs.		

Diamonds and pearls are sold by hubbas and ruttees—3 hubbas equal to 1 ruttee, about 2 grs. troy.

BANDA NEIRA.

Coins, Weights, and Measures.

COINS.—Accounts are kept in pennings, stivers, and rix dollars: 16 pennings make 1 stiver, 6 stivers 1 schilling; 8 schillings 1 rix dollar. Spanish dollars pass current, 125 Rix per 1.0 Spanish dollars.

WEIGHTS.—The catty weighs 5½ Dutch lbs. A bahar is 100 catties, or 610 lbs. avoirdupois.

BANJAR MASSIN.

Coins, Weights, and Measures.

COINS.—Spanish dollars are the current coin; a few Dutch coins from Batavia are to be met with; and for small change they have the Chinese cash. The following coins are also in circulation:

Pillar dollars; these, if full weight, pass the same as Spanish dollars.

French crowns; there is a loss on these if taken to China, therefore they should be avoided.

Rupees of various kinds, none of which should be carried to China.

Duccatoons pass here at the rate of 125 Spanish dollars per 100 duccat ons; at Canton, they vary, being sometimes as low as 122 Spanish dollars per 100 duccatoons.

WEIGHTS AND MEASURES.—The weights in common use for gross articles are the pecal and catty; the small weights are tees, mace, and malaboorongs:

3 malaboorongs	1 teea
6 tees	1 mace
16 mace	1 tale, equal to 20 dwis.

The measure for grain is the gantoo, 230 of which are a last of rice, weighing 306½ lbs. avoirdupois; the covid, as a long measure, is in common use.

BANTAM.

Coins, Weights, and Measures.

COINS.—The coins current are similar to those at Batavia, viz. Spanish dollars, duccatoons, rupees, schillings, dubbelijces, dais, and cash; the king having no coin of his own. The cash are of different value, according to the quantity in the market. They keep their accounts thus:

10 peccoes	make	{	1 laxsen
10 taxans			1 carry
10 catties			1 uta
10 das			1 bahar.

Each pecco should contain 1000 cash, but they are frequently deficient; the price varies from 25 to 35 for a Spanish dollar.

WEIGHTS AND MEASURES — Pepper is sold by the timbang, which is equal to half a Chinese pecco or 62½ Dutch lbs. 3 peccos are the small bahar, and 4½ peccos the great bahar. But the natives not being expert in weighing, a measure called a kulinck is used, which contains 7½ catties; but this depends upon the quality of the pepper, whether light or heavy.

The weight for gold, musk, &c. is the tale; the China one is only six-tenths of that of Bantam.

The long measure is the hasta, which is 18 English inches.

BEETLEFACKIE.

Coins, Weights, and Measures.

Accounts are kept in Spanish dollars and cavears; 40 cavears are equal to one Spanish dollar; cavears are an imaginary coin, both here and at Mocha. All foreign coins pass current, and as coffee is always paid for in ready money, large quantities of various kinds of foreign coins are to be met with. The custom-house weights are vakias, rattles, mounds, and frazils, thus divided:

15 vakias	make	{	1 rattle	lbs. oz. dwt. gr.
2 rattles			1 mound, weighs	2 0 10 23
10 mounds			1 frazil	20 6 4 0
40 frazils			1 bahar	814 to 816 lbs.

They reckon 1½ vakias to a rattle, and 2 rattles to a mound in coffee, and to all other goods, 15 vakias to a rattle; but of all sorts of merchandise whatever (excepting jagger, dates, candles, and iron, of which 16 vakias make a rattle,) 10 mounds are a frazil, and 40 frazils a bahar. The rattle is only used in the bahar. The weights are seldom exact, though annually received by the Imam's shroff.

BENCOOLEN.

Coins, Weights, and Measures.

Accounts are kept in Spanish dollars, termed plasters. The coins current here are double and single fanams, rupees, and Spanish dollars:

2 single fanams	make	{	1 double fanam
6 double fanams			1 rupee
2 rupees			1 Spanish dollar.

The Spanish dollar is always valued at five shillings sterling in the accounts on the Coast of Sumatra.

WEIGHTS.—The Chinese pecul is in common use in the bazar; but most commodities are weighed with English weights. The s-uan here is 550 lbs. avoindupois.

MEASURES.—The coyang dry measure is 800 bamboo, each bamboo about an English gallon.

BINTANG.

Coins, Weights, and Measures.

The Spanish dollar is the principal coin. China cash pass current in small payments. All goods are bought and sold by the Chinese pecul and caty, and all bargains are made for Spanish dollars.

BOMBAY.

COINS.—Accounts are kept at Bombay in rupees, quarters and reas. The following is a list of the current coins, with their sterling value, estimating the Bombay rupee at 2s. 6d. sterling.

	£. s. d. q. dec.
2 reas	0 0 0 60
4 reas	0 0 1 20
6 reas, or 3 urdees	0 0 1 80
8 reas, or 4 urdees	0 0 2 40
3½ pice, or 4 annas	0 0 1 30
1½ pice, or 4 annas	0 0 1 30
25 pice, or 8 annas	0 0 7 20
50 pice, or 16 annas	0 1 3
5 rupees	0 2 6
3 pauscheas, or 15 rupees	0 12 6
make	1 urdee
	1 doogany, or single pice
	1 doreea
	1 tuidien, or double pice
	1 anna
	1 quarter rupee
	1 half rupee
	1 rupee
	1 paunchea
	1 gold mohur

Remarks on the Coins of Bombay.

SILVER.—The old Bombay rupee is the same as was coined at Surat under the Mughal Government. It weighed 178.314 grains, and contained 1.24 per cent. of alloy. By an ancient agreement with the Nabob of Surat, the rupee of both Governments was to circulate through both at an equal value; while they mutually pledged themselves to keep up the coin to its exact standard of weight and fineness. The Nabob, however, did not keep to this agreement; for his rupees were found soon afterwards to contain, instead of 1.24 per cent. of alloy, no less than 10.12, and even 15 per cent. The consequence of this was, that all the Bombay rupees were carried to Surat to be recoined. This mint was entirely stopped in its silver coinage for more than twenty years, and the circulation of silver was occupied by the Surat rupee.

In this situation of things the merchants could not afford to coin their bullion here, and therefore Bombay was long without a silver coinage of its own; when Government in 1800 ordered the Surat rupee to be struck in this mint, and since that time the rupee has been kept at an equal value in both mints. In both the silver rupee weighs 179 grains, and contains 7.97 per cent. of alloy.

GOLD.—In the year 1774 the gold mohur was made of the same weight as the silver rupee. It was ordered to be of the fineness of a venetian, and to pass for 15 silver rupees. In this coinage, therefore, 14.9 grains of silver represented one grain of gold, for such is the proportion between the quantity of gold in this gold mohur, and the silver in 15 old Bombay rupees. When the Surat silver currency had occupied the circulation, this proportion between gold and silver was quite destroyed; so that gold coined according to the regulation of 1774, was now exchanged for no more than thirteen times its weight in silver, and often for much less.

In order to remedy this, and to bring back the coins of gold and silver to nearly their ancient proportions, and their relative value in the market, it was ordered in 1800, that the gold mohur should be of the same weight as the silver rupee, that it should contain the same quantity of alloy, and that it should pass for 15 rupees. At present, therefore, in the Bombay coins, 15 grains of silver represent one of gold.

Coins of gold have never circulated as a coin, either at Surat, or in the Mahratta states on this side of India. They are occasionally carried to those parts, but it is only as bullion.

The following table was drawn from actual assays; the first column contains the alloy in 100 parts of each of the different coins; the second column contains their weight in grains. From these two columns the value of the whole of the coins may easily and with perfect accuracy be ascertained.

SILVER COINS.

	Standard or Alloy p. cent.	Weight in Grains.
British standard of silver coin	8.1
Spanish dollar A. D. 1790	10 — 416
Old Spanish 4 real piece	8.99

Gold mohur of the Surat impression now current	7.97	— 179	

WEIGHTS.—The English weights being in common use here, and at all the other Presidencies, the following account of their relative proportions may be found useful.

The two principal weights established in Great Britain are the avoirdupois and troy weights; the last is again divided into diamond and money weights; the grain is understood to be a grain of wheat, gathered in the middle of the ear:

AVOIRDUPOIS WEIGHT.

3 scruples	1 dram
15 drams	1 ounce
16 ounces	1 pound
28 pounds	1 quarter
4 quarters	1 cwt.
20 cwt.	1 ton

Comparison between troy and avoirdupois.

175 troy lbs.	144 avoird. lbs.
175 troy ounces	192 avoird. oz.
1 troy lb.	57.0 grains
1 avoird. lb.	2000 grains
1 avoird. oz.	437½ grains
1 troy oz.	480 grains
the avoird. oz. is near less than the troy ounce.	

TROY WEIGHT.

24 grains	1 penny wt.
20 penny wts.	make 1 ounce
12 ounces	1 pound

The moneyer have a peculiar subdivision of the grain (troy thus):

24 blanks	1 periot
20 perios	make 1 droat
24 droats	1 mite
20 mitas	1 grain

DIAMOND WEIGHTS

Are carats, each carat being divided into 4 grains or 64 parts. The ounce troy contains 150 such carats; therefore this carat is $\frac{1}{36}$ grains troy; hence 5 diamond grains are equal to 4 gold grains.

The other weights and measures in use at this Presidency are the undermentioned:

SILVER WEIGHTS.

6 chawes .	1 goonze
2½ goonzes .	make 1 vail
40 vails .	1 tola, or rupee
2½ tolas .	1 seer

Silver is commonly sold from 95 to 100 single pice per tola, but computations in money are made by fuddeas, or double pice.

LONG MEASURE.

18 inches .	1 hast or cubit
24 inches .	1 guz.

The English yard of 36 inches is in common use.

N. B. Piece goods, and a few other articles are sold by the coorie.

SALT MEASURE.

100 baskets .	1 anna, or 2½ tons
16 annas .	1 rash 40 tons.

DRY MEASURE.

2 tiprees .	1 seer
4 seers .	1 mallowey
16 adowlies .	1 parah
8 parahs .	1 candy.

These measures serve for wheat, and all kinds of grain, except rice or barley, which is sold by

BATTIA MEASURE.

2 tiprees .	1 seer
7½ seers .	1 mallowey
20 adowlies .	1 parah
6½ parahs .	1 candy
25 parahs .	1 moorah
4 candies .	1 moorah.

A bag of rice weighs 6 maunds, or 123 lbs. and is Madras jnd. 6 5 30 4 A Bombay candy is ditto 22 3 8

The Bombay great weights are pice, seers, maunds, and candies, thus divided:

lb. oz. drs. dec.

30 pice.....	1 seer.....	avoirdupois	0 14 14 93
40 seers.....	1 maund.....		28 0 0
20 maunds.....	1 candy.....		560 0 0

Although the above represent the common received standard of gross weights at Bombay, yet there are a great number of commodities which are not governed by them, but sold by the Suria manui, which, notwithstanding it is said to contain only 40 seers, is sometimes 41, 42, 43, through all the intermediate gradations up to 46; nor is the candy uniformly confined to 20 maunds.

BORNEO TOWN.

Coins, Weights, and Measures.

Spanish dollars are the common coin, and China cash. The weights are the pecal and carry. The China kanga-h are used as a currency in the same manner as at Soolo.

BUSHIRE.

Coins, Weights, and Measures.

Many of the European, and most of the Asiatic coins pass at the same rates as at Bushire; but the price fluctuates according to the quantity of the specie in the market.

Accounts are kept in loose, mamoodies, and tomunds, 100 mamoodies making 1 tomund.

Pearls are sold by the abas, a weight equal to about $3\frac{1}{2}$ diamond grains, or 2,875 dec. gold grains.

BUSSORAH.

Coin, Weights, and Measures.

COINS.—Accounts are kept in loose, dinims, mamoodies, and tomunds, thus divided:

10 loose	}	1 dinim
10 dinims		1 mamoodie
100 mamoodies		1 tomund, value about 15 rupees.

Few of the coins current in Persia are coined in the country. The consequence of this want of standard coins, and the introduction in their stead of foreign gold and silver, is a constant fluctuation in their value, so much so, that it is impossible to ascertain the value of gold coins for any length of time, and the Governors of the different districts frequently alter their standard value without assigning any reason. Excepting the Turkish piastre, and the tomund, all other coins are taken at a disadvantage.

The following is the value in mamoodies of some of the foreign coins in circulation here:

Gold mohur....	71 to 72	mamoodies	Spanish dollars	71 to 8	mamoodies
Sequoia.....	21 to 21½ ditto		Lion dollars	7½ to 8	ditto
Fuaduncie.....	21 to 22 ditto		Turkish piastre....	8	ditto
Zermabob.....	20 to 21 ditto		Bombay rupee	3½ to 3½	ditto
Stambole.....	20 to 21 ditto		Persian rupee	3 to 3½	ditto
Gingerlee.....	11½ to 13 ditto		Abaace	2 to 2½	ditto.

WEIGHTS AND MEASURES.—The weights are vakias and maunds; the latter are of two sorts, atree, and sophy.

24 vakias.....	}	1 maund atree, equal to avordupois 28 lbs.	8 oz.
76 ditto.....		1 ditto sophy	ditto. 90 4
117 ditto.....		1 curia	ditto 138 14

The maund sophy is equal to 1 Bengal factory maund, 8 seers, $5\frac{1}{2}$ chittacks; and the maund atree to 15 seers $4\frac{1}{2}$ chittacks.

There are sundry allowances made on goods on delivery, beyond the above weights, viz.

- 26 vakias per maund, for clover, pepper, and coffee.
- 25 ditto..... for cardamom, sugar candy, and benjamin.
- 24 ditto..... for sugar, and all kinds of metals.

The maund for cotton is equal to 2 Surat maunds, and for indigo 3 Surat maunds 25 seers.

Gold and silver are weighed by the cheki of 100 miscal, each miscal $1\frac{1}{2}$ dram, or 72 grains troy. A miscal of the finest gold is worth about 22 mamoodies; a cheki of silver, or 150 drams, is worth about 180 mamoodies.

The oka of Bagdad is 25 vakinas a'ree, and weighs 266 misca's, or about 400 drams.

The preceding is the mode of reduction of weights used by the Arabians; but the Europeans at Bassora reckon the masud sophy to consist of 3 mands a'ree, and 25 vakinas a'ree equal to 1 masud a'ree. The rattle is 14½ vakinas a'ree.

The guz, or cubit, is about 37 English inches, 93 being equal to 100 English yards.

CACHAO.

Coins, Weights, and Measures.

COINS.—Cash are the only coins here, and are two sizes, large and small; 600 large and 1000 small cash are reckoned 1 maradoe. Accounts are kept in tales, mace, and candareens, all of which are regulated by the price of the maradoes and copper cash.

The price of silver is always variable here, on account of its rising and falling according to the quantity brought in; by this the Chinese make considerable advantage. Sometimes they allow 25 maradoes for 1 bar of silver of 10 tales weight, and at others not more than 21. All the Mexico and Pilar dollars imported are run into bar silver, without any distinction; these bars should weigh 10 tales each. They frequently put alloy into them, so that they are seldom so good as the dollar silver; though in payments you are obliged to make them an allowance of 2 per cent. to make it their standard, as they call it.

10 tales weigh, with the 3 per cent. included.....	12	6	2	2
1 tale ditto ditto.....	1	4	14	2
Which is more than the China tale	0	0	9	2

WEIGHTS.—All goods are weighed by the Chinese dotchin. The King's weights hold out full 132 lbs. to a peccu; but it is necessary that every person should have a true dotchin of his own.

MEASURES.—The Chinese covid and punta are in general use of measuring cloth.

CALCUTTA.

Coins, Weights, and Measures.

COINS.—Accounts are kept here in an imaginary coin, called secca rupees, with its subdivisions, annas, and pice; 12 pice make one anna, 16 annas one rupee, and 16 rupees 1 gold mohur. To this currency must all the real specie be turned or reduced, before any sum can be regularly entered into a merchant's book.

The coins current are gold mohurs, with its subdivisions, halves and quarters; secca rupees, halves and quarters; annas, pice, and half pice. The two last are of copper.

GOLD.—In 1766 the Bengal gold mohur weighed 179.66 grs. was of the fineness of 20 carats, and passed for 14 silver rupees. The gold was here overvalued, for it passed in proportion to silver, as 169.45 to 1. In 1769 it was ordered that the Bengal gold mohur should weigh 190.773 grs. and in this coinage gold was valued to silver nearly as 14.8 to 1; and lastly, by Regulation 35, Anno 1793, it was directed that the nine,

teen sun gold mohur should weigh 190.894 grs. and contain $\frac{1}{2}$ of a grain in 160 of alloy, and that it should pass for 16 nineteen sun sicca rupees. Here gold is valued in proportion to silver as 14.85 to 1, which is a small fraction less than gold bears to silver in the present coinage of Bombay.

SILVER.—The standard of the Bengal money has ever been silver. Gold is occasionally coined, but the great bulk of the currency is silver.

The most common silver coin is the rupee of 1 sicca, or 10 maha weight, of the fineness of 11 oz 15 dwt. 4 grs. 8 dec. troy. The sicca weight is equal to 7 dwt. 16 grs. 55 dec. and is thus divided:

1 pie.....	{	is equal to troy weight, grs.....	9354
12 pie.....			11,2219
16 annas.....			179,5311
16 rupees.....			190,894

These rupees were formerly called sicca rupees, only during the year after their coinage, when the batta they bore on current rupees was 16 per cent; the second year, this was reduced to 13, and the third and following years the batta was 11 per cent; they were then called sonamt or sonat rupees. But with a view to abolish this distinction, all the rupees coined of late years by the East India Company have been dated the nineteen sun, that is the 19th year of the mogul's reign; and by Regulation 35, anno 1793, it is ordered that the nineteen sun sicca rupees shall be received as the legal coin of Bengal, Behar, and Orissa.

There are various other kinds of rupees to be met with in Bengal, whose fineness and weight are different, though their denominations are the same. From this, and from the natives frequently punching holes in the rupees, and filling up the vacancy with base metal, and their wilfully diminishing the weight of the coins after coming from the mint, the currencies of rupees in the different provinces are of different values. This defect has introduced a custom of employing shroffs or money-changers, whose business it is to set a value upon these different currencies, according to every circumstance, either in their favour, or their prejudices. When a sum of rupees is brought to one of these shroffs, he examines them piece by piece; and ranges them according to their fineness; then by their weight; he then allows for the different legal battas upon siccas and sonants; and this done, he values in gross by the rupees current what the whole are worth; so that the rupee current is the only thing fixed, by which coin is valued.

Cowries are made use of for small payments in the bazar, and are generally thus reckoned:

4 cowries.....	{	make	1 gonda
20 gundas.....			1 gun
4 pines.....			1 nang
4 annas.....			1 calau, which is about $\frac{1}{2}$ of a rupee.

But they rise and fall according to the demand there is for them, and the quantity in the market.

Accounts are kept in lacs and crores. A lac is 100,000, and 1 crore is 100 lacs.

All rupees weigh, or ought to weigh, 10 maha weight; but they differ in fineness and touch, so that the coin of one province varies in another more than the intrinsic value of the specie.

The following is a table of the different kinds of rupees current at the presidency, with their relative value to each other.

CURRENT RUPEES COMPARED WITH OTHER RUPEES.

100 current rupees are equal to	siceca rupees.....	85 3 4	100 siceca rupees.....	116 0 0

CALICUT.

Coins, Weights, and Measures.

COINS.—The principal coins in circulation are tars, fanams, and rupees; but accounts are kept in rupees, quarters, and reas, as at Bombay.

16 tars or vias....	make	1 fanam:
5 fanams		1 rupee
3½ rupees		1 star pagoda
3¼ rupees		1 Port-Novo pagoda
16 rupees		1 Bombay gold mohur.

WEIGHTS.—100 pools make 1 maund of 30 lbs., and 20 maunds 1 candy of 600 lbs., avoirdupois.

LONG MEASURE.—1 coid is 18 inches, and 1 guz is $2\frac{1}{2}$ inches. Timber is sometimes measured at Calicut by the coid and borel; 12 borels (when the timber is sawed, and 24 when unsawed) are 1 coid.

CAMBAY.

Coin, Weights, and Measures.

COINS.—Gold mohurs, rupees, and pice are the current coins; for small change a species of almond, called badam, is used, in the same manner as cowries at Bengal. These almonds are imported from Persia, and the general rate is about 60 for a pice.

All foreign coins are taken according to weight, and their prices vary according to the demand.

WEIGHTS AND MEASURES.—The maund is 40 seers, and the seer 30 pice; the maund is equal to 37½ lbs. avoirdupois, and varies according to the different kinds of goods bought or sold, viz.

Metal of all kinds	40 seers to a maund	Myrrh	44 seers to a maund
Elephant's teeth	40 ditto	Sugar	41 ditto
Spices of all kinds	42 ditto	Cardamoms	42 ditto
Coffee	42 ditto	Indigo	44 ditto

The long measures are the cubit, about 18 English inches, the guz of 25, and in the bazar $28\frac{1}{2}$ inches.

CANANORE.

Coin, Weights, and Measures.

All sorts of Indian coins pass current here; the weights and measures are the same as at Tellicherry.

CANTON.

Coin, Weights, and Measures.

COINS.—Accounts are kept in taels, mace, candareens, and cash, thus divided: 10 cash 1 candareen; 10 candareens 1 mace; 10 mace 1 tael.

There is but one kind of money made in China, which is called cash: it is of a base metal, cast, not coined, and very brittle; it is round, about the size of an English farthing, marked on one side with Chinese characters, rather raised at the edges, with a square hole in the middle. They are usually strong, 100 in a string; but they rise and fall according to the quantity in the market, varying from 750 to 1000 cash for a tael. Their chief use is in making small payments amongst the lower classes of the people.

Spanish dollars are the principal coin current, but other silver coins are occasionally met with. For small change they cut the coins into pieces, and weigh them, for which purpose every merchant carries scales and weights with them, put up

In small portable wooden cases; they are made somewhat after the plan of the English steelyards, and are called by the Chinese a *datchin*. For the purpose of cutting the silver, they have a pair of scissars; and some are so dexterous, that they will cut the quantity required, without having occasion to cut a second time. All dollars which pass through the Hong merchants' hands bear their stamp, or chop, so that by frequent exchanges, the dollars become soon mutilated, and are then cut up for small change, or melted into ingots. All duties are paid in sycee or pure silver.

In the East India Company's accounts the tale is reckoned at 6s. 8d. sterling, but its intrinsic value is according to the price paid for silver in London.

The following table shews the value of the tale when Spanish dollars are from 5s. 2d. to 6s. 6d. per ounce.

Price.			Value of a Tale.			Price.			Value of a Tale.		
s.	d.	ss.	s.	d.	ss.	s.	d.	ss.	s.	d.	ss.

5	7	6	8	926		6	3	7	6	590	
5	8	6	10	144		6	4	7	7	798	
5	9	6	11	242		6	5	7	9	996	
5	10	7	0	550		6	6	7	10	214	

At China they divide things decimaly, as in buying gold and silver, which is not considered as money, but merchandise, it is esteemed by the hundredth part, and their touching needles (by which they try the fineness of gold and silver) are marked and numbered accordingly. The finest silver among them is 100 touch, called sycee that is without alloy. England silver standard is 11 oz. 2 dwts. fine, and 18 dwts. alloy, making pure silver 12 oz. The following table is calculated, supposing the China assay to be of equal goodness with the English, that is 100 touch, or sycee, and 12 ounces English.

English silver compared and adjusted with China silver, from $\frac{1}{2}$ to superfine, or 12 oz.

English Assay.	China Assay.								
oz. dwts.	tch. pds.	z. dwts.	tch. pds.	oz. dwts.	tch. pds.	oz. dwts.	tch. pds.

11	6 94	4 10	11 87	22 9	16 81	16 9	1 75	10	

The Chinese will sometimes take silver several pennyweights under full fine for sycee silver, but generally one pennyweight; thus English silver of 11 oz. 19. dwts. and 1 dwt. alloy will pass for sycee silver.

WEIGHTS.—The great weights are the *pecul*, *catty* and *tale*, thus divided:

		lbs.	oz.	dwt.	dec.
16 tales,	{ make {	1	catty, or avoirdupois.....	1	5 3 333
100 catties,		1	pecul, or ditto.....	133	5 5 333

All goods are weighed at China; likewise provision, as milk, fowls, hogs, &c.

In delivering a cargo, English weights and scales are used, and afterwards turned into China peculs and catties. If the weights and scales are brought from Canton, care should be taken that the beam is not longer on one side than the other; some of them have holes or notches at each end of the beam, by which they can, by hanging the scales in one or other, diminish or increase the weight considerably.

The weights are in general light, particularly those they sell by, as have been found by weighing tutenague, raw silk, &c. many of their dotchins are loaded in the pan; above all, it is particularly necessary to pay attention to the weighing man, who is very apt to jerk the scale down, or pull it to him before he cries the weight, and that often erroneous. If a person delivering a cargo, will take the trouble of putting in the weights himself and balancing the scales, the benefit that will be derived by the cargo turning out well, will be an ample compensation for his trouble.

SMALL WEIGHTS.—Gold and silver are also weighed by the *tale* and *catty*; 100 tales are reckoned to weigh 120 oz. 16 dwt. troy, which make the *tale* equal to 679.8 dec. troy.

The Chinese arithmetic is mechanical. To find the aggregate of numbers, a machine is in universal use with all descriptions of people. By this machine, which is called a *swanpan*, arithmetical operations are rendered palpable. It consists of a frame of wood, about an inch deep, and of various sizes, from 4 to 12 inches long, by 2 to 6 broad, divided into two compartments by a bar down the middle; through this bar at right angles are inserted a number of parallel wires, and on each wire, in one compartment are five moveable balls, and in the other two. These wires may be considered as the ascending and descending power of a numeration table, proceeding in a ten-fold proportion; so that if a ball upon any of the wires in the larger compartment be placed against the middle bar, and called unity, or one, a ball on the next wire above it will represent ten; and one on the next, one hundred; so, also, a ball on the wire next below that expressing unity, will be one-tenth; the next lower, one hundredth; and the third, one thousandth part of an unit; and the balls on the corresponding wires in the smaller compartment will be five, fifty, five hundred, five tenths, five hundredths, five thousandths; the value or power of each of these, in the smaller division, being always five times as much as those in the larger. This system, from its apparent ease and simplicity, is much admired, but is subject to error; and a person commonly conversant with arithmetic, will make more progress, and be more correct, than the most skilful of the Chinese, with the swanpan.

MEASURES.—The long measure in use at Canton is called the *covid* or *enbit*, it is divided into ten *pungs*, and is about 14 $\frac{1}{2}$ English inches. There are several measures answering to our foot.

	Dec.	French Lines.	Eng. Inches.
The foot of the mathematical tribunal, is	147.7	or	13 $\frac{1}{2}$
The builder's foot, called <i>kongpn</i> , is	148.1	or	13 $\frac{1}{2}$
The tailor's and tradesmen's foot, is	150	or	13 $\frac{5}{8}$
The foot used by engineers, is	148.7	or	13 $\frac{1}{8}$

The li contains 180 fathoms, each of 10 feet, of the last-mentioned length, which make the li 1,897 English feet, and 192½ lis measure a mean degree of the meridian nearly, but the European missionaries divide the degree into 200 lis, each li 1,826 English feet.

CAPE TOWN.

Coin, Weights, and Measures.

COINS.—The accounts of the colony are kept in rix dollars, schillings, and stivers.

2 stivers	make	1 duhheltjeo
3 duhheltjees		1 schilling
8 schillings		1 rix dollar.

The rix dollar is a paper currency, which rises in value, according to the real or supposed scarcity of cash; the discount varying from 15 to 35 per cent. In all bargains it is necessary to state whether the payments are to be in specie, or in paper money. Bills on England, at a date not exceeding 30 days, are generally considered equal to cash, particularly Government Bills. The following are the rates at which foreign coins pass current.

Table of Specie, as regulated to be current at the Colony of the Cape of Good Hope.

	Schil.	Stiv.	£	s.	d.
Guinea	44	264	1	2	0
Doubloon, 16 Spanish dollars..	960	960	4	0	0

Copper coin		2	0	0	2
PAPER MONEY					
Rix dollar	8	48	1	3	4
Dutch schilling	1	6	0	0	4½

The English weights and measures are in general use, except for wines; these are sold by the num and lenger, four of the former making one of the latter, which contains from 150 to 152 gallons.

CARWAR.

Coin, Weights, and Measures.

COINS.—Accounts are kept in pagodas, fanams, and pice. All bargains with the country merchants are made for Darwar pagodas, which are 36 fanams, or 48 imaginary jettals;—six cash, or pice, are reckoned a fanam in accounts, but they rise and fall in the bazar; one pice is six budgerrooks.

The Darwar pagoda always passes for $3\frac{1}{2}$ rupees.

The venetian passes for .56 to .57 jettas, or 42 to 43 fanams.

The gubber ditto53 to .54 ditto.

The Darwar pagoda being coined in the province, is most esteemed by the natives; but the Ikeri pagodas are worth more; they are of the same fineness, but differ in form and weight, 40 $\frac{1}{2}$ of these being equal to 42 $\frac{1}{2}$ Darwar pagodas. Spanish dollars pass current here.

WEIGHTS.—One seer is near 8oz. 19dwts. troy; 48 seers make 1 mānd, and 20 māunds 1 candy, which makes the candy about 51lbs. 14oz though it is commonly reckoned 52 lbs. avoirdupois.

MEASURE.—The long measure is the cord, equal to 18 English inches.

COCHIN.

Coin and Weights.

COINS.—Accounts are kept in rupees of 16 annas; these are considered of equal value to the Bombay rupees. Accounts are also kept in fanams, 20 of which are reckoned equal to a rupee.

Most Indian and other coins pass current here; Venetian sequins for 72 fanams; Dutch ducat one 5 $\frac{1}{2}$; Spanish dollars 40; Dutch six dollars 32; and Negapatam pagodas 64 fanams.

WEIGHTS.—Gold and silver are weighed by the sicca weight; 1 sicca is equal to 31 fanams; 72 fanams are equal to 8 pagodas, or 1 dollar weight; and 96 fanams are the weight of 10 sequins, or 3 sicca weight.

The great weight are the māund, which is 27 lbs. 2 $\frac{1}{2}$ oz. avoirdupois, and the candy of 20 māunds, or 543 lbs. 8 oz. avoirdupois.

The Cochin candy is equal to 7 Bengal factory māunds, 11 seers, 2 $\frac{1}{2}$ chattacks.

COLUMBO.

Coin, Weights, and Measures.

COINS.—Accounts are kept in pice, fanams, and six-dollars or elephant rupees, thus divided:

4 pice	make	1 fanam
12 fanams		1 six-dollar or rupee
63 ditto		1 star pagoda.

The star pagoda varies from 39 to 61 $\frac{1}{2}$ fanams in bills of exchange drawn on Madras. The civil servants and military officers receive two-thirds of their pay in bills at 45 fanams to a star pagoda, or 3 $\frac{1}{2}$ rupees: these are called accommodation bills. This has recently undergone some alteration.

The sicca rupee passes for 18 fanams either in specie, or bills. The Bombay rupee passes current for 17 fanams in exchange for bills, and for 18 in the bazaar. The Spanish dollar varies from 37 to 39 fanams, according to the demand; 350 Arcot rupees are 400 Ceylon rupees, or six dollars, or 100 star pagodas.

WEIGHTS AND MEASURES.—English weights are in common use, in receiving and delivering foreign goods; but for the produce of the island, the parah, a measure of 16 $\frac{1}{2}$ inches long, 16 $\frac{1}{2}$ wide, and 5 $\frac{1}{2}$ deep, is used, its weight varying according to the article.

Parah of salt weighs	44 lbs.	Parah of Pepper weighs	39 lbs.
Ditto of coffee	30	Ditto of chunam	30

The ammanam contains 16 parahs to the northward among the Malabars, and 24 ammanams to the south; but to the southward among the Hindous, 8 parahs make 1 ammanam.

The Dutch bahr, or candy, is 450 Dutch lbs. or 52 $\frac{1}{2}$ lbs. avoirdupois. The long measure is the covid, equal to 18 English inches.

FAIFOE.

Coin, Weights, and Measures.

COINS.—The only currency of the country is a sort of cash made of tutenagne, 600 making a quan, which is equivalent to 2 rupees, or 1 Spanish dollar; this is divided into 10 mace of 60 cash each, the whole strung up together, and divided by a knot at each mace. Those you receive from the King in payment for goods, are always new, and may be paid away again with at any doubt of a deficiency; but in your dealing with the merchants, you are liable to receive the cash old and mixed, which is very troublesome in disposing of, besides a loss of 6 or 7 per cent.

The King refines and runs all his silver into bars of 10 tales weight, with which he sometimes pays his troops at the rate of 20 quans each; but they never pass current, being sold at from 16 to 17 quans each.

WEIGHTS AND MEASURES.—The weights are exactly the same as in China, and all goods are weighed by the dotchin. Only for sugars they allow, instead of 100, 150 catties to the pecul, though the Chinese in general receive 160 catties to a pecul. The measure is the covid, equal to about 15 English inches.

GOA.

Coin and Weights.

COINS.—Accounts are kept in pardos, tangas, vintins, and budgerooks, but there are good and bad of each kind; 1 pardo is worth 4 good or bad tangas, 16 good vintins, or 20 bad; the pardo is also divided into 240 good or 300 bad reas.

The current coins are, the St. Thome, a gold piece which passes for 1 good tangas; it weighs 53 $\frac{1}{2}$ grains troy, and is of the purity of 18 carats, and worth about 6s. 8d. sterling.

The silver coin is the parso, which is of two sorts: the pardo xeraphim passes current for 5 good tangas each, about 7 $\frac{1}{2}$ d. sterling; and the common parso for 4 tangas; the former has on one side a figure of St. Sebastian, and on the other a sheaf of arrows.

The budgetook is made of tin, having on one side a globe, and on the other 2 arrows crossed.

Spanish dollars, venetians, rupees, and all other foreign coins pass current here, but the price fluctuates according to the quantity in the market.

WEIGHTS.—The quintal of 4 arahas is in common use, but they have the Indian candy thus divided:

		lb. oz. drs.
1 rattle	{ make	is equal to avoirdupois 1 0 8
24 ratties	{	1 maund 24 12 0
20 maunds	{	1 candy 425 0 0

GOMBROON.

Coins, Weights, and Measures.

COINS.—Accounts are kept in shahées, an imaginary coin, and for which all bargains are made; the returns for goods, allowing 7 or 8 per cent. for the exchange, are generally made in abasées. All coins pass current here, Spanish dollars, rupees, venetians, French crowns, &c.

10 coz or pice	make	1 shahée
2 shahées		1 mamoody
2 mamoodies		1 abasée
2 abasées		1 Surat rupee
28 shahées		1 venetian
16 shahées		1 Spanish dollar
200 shahées		1 tonnand.

Abasées and sequins are the common coins; of the latter there are several kinds, of which the venetians are the best in India by 2 per cent. When a parcel of venetian ducats are mixed with others, the whole go by the name of sequins; but when separate, one sort is called venetian, and all the rest indifferently by the name of gubbers.

WEIGHTS AND MEASURES.—The larger weights are of different sorts, and vary according to the names of the commodities sold.

The maund tabrees is 6½ lbs. in the factory, but only 6 lbs. in the bazar; by this weight, sugar, copper, tumeric, and all kinds of drugs are sold.

The maund copra is 7½ lbs. at the custom-house, but in the bazar from 7½ to 7½ lbs. by this weight, rice, almonds, raisins, and other eatables are sold.

The maund shaw is likewise in use, being 2 maunds tabrees, and equal to 13½ lbs. avoirdupois.

The weight for gold and silver, is the miscal; 2½ miscals are equal to a Surat tola, and 200 is 1 maund tabrees. By this weight, all valuable commodities are weighed.

The long measure is the guz, 93 of which are considered equal to 100 English yards.

ISLE OF FRANCE.

The currency of the island are Spanish dollars, the exchange of which with Madras is fixed at 15½ Spanish dollars for 10 pagodas, each pagoda 45 fanams. The dollar is worth 200 colonial sous; the component parts bear a relative value.

JAPAN.

Coins, Weights, and Measures.

COINS.—Accounts are kept in tales, mace, and candareens; 10 candareens make one mace, and 10 mace 1 tale. The gold coins current are the new and old itjib, and cobangs or kobangs; the silver coins are the nandiojin, itaganne, and kodama. They are in general very simple, struck plain and unadorned, the greater part of them without any rim round the margin, and most of them without any determined value. For this reason they are always weighed by the merchantis, who put their chop or stamp upon them, to signify that the coin is standard weight, and unadulterated.

The new cobangs are oblong, rounded at the ends, and flat, about two inches long, and rather more than 2 inches broad, scarcely thicker than an English farthing, of a pale yellow colour, the die on one side consists of several cross lines stamped, and at both ends there is a parallelogrammatical figure with raised letters on it, and besides, a moonlike figure, with a flower on it in relief. On the other side is a circular stamp with raised letters on it, and within the margin towards one end, two smaller sunk stamps with raised letters, which are different on each cobang; these are valued at 60 mace, or six dollars. There are old cobangs occasionally met with, which are of fine gold, somewhat broader than the new, and are worth 10 six dollars.

The itjib is called by the Dutch golden bean, and is made of pale gold, of a parallelogrammatical figure, and flat, rather thicker than a farthing, with many raised letters on one side, and two figures or flowers in relief on the other; the value of this is one-fourth of a cobang. There are old itjibs also to be met with; these are thicker than the new ones, and in value 22 mace 5 candareens.

Nandiojin is a parallelogrammatical flat silver coin, of twice the thickness of a halfpenny, one inch long, and half an inch broad, and formed of fine silver. The edge is stamped with stars, and within the edges are raised dots. One side is marked all over with raised letters, and the other on its lower and larger moiety is filled with raised letters, and at the same time exhibits a double moonlike figure. Its value is 7 mace 5 candareens.

Itaganne and kodama are denominations by which various lumps of silver, without form or fashion, are known, which are neither of the same size, shape, or value. The former of these, however, are oblong, and the latter roundish, for the most part thick, but sometimes, though seldom, flat. These pass in trade, but are always weighed in payment from one individual to another, and have a dull leaden appearance.

Seni is a denomination applied to pieces of copper, brass, and iron coin, which bear a near resemblance to our farthings. They differ in size, value, and external appearance, but are always cast, and have square hole in the middle, by means of which they may be strung together; and likewise have always broad edges. Of these are current, sjumon seni, which pass for half a mace, or 10 common seni. Simoni seni, of the value of four common seni, are made of brass, and are almost as broad as a half penny, but thin. The common seni are the size of a farthing, and made of red copper; 80 of them make a mace. Doos seni, is a cast iron coin, in appearance like the last, of the same size and value, but so brittle, that it is easily broken by the hand, or breaks in pieces when let fall on the ground.

The seni are strung 100 at a time, or, as is most commonly the case, 96 on a rush. The coins in one of these parcels are seldom all of one sort, but generally consist of two, three, or more different kinds; in this case, the larger sorts are strung on first, and then follow the smaller; the number diminishing in proportion to the number of large pieces in the parcel, which are of greater value than the smaller.

WEIGHTS.—These are the candareens, mace, tale, catty and pecul, thus divided :

10 candareens.....	make	1 mace
10 mace.....		1 tale
15 tales.....		1 catty

100 catties.....

1 pecul

The pecul is 125 Dutch pounds, which are equal to 133½ lbs. avoirdupois.

MEASURES.—The revenues of Japan are estimated by two measures of rice, the man and kokf; the former contains 10,000 kokfs, each 3000 holes, or bags of rice.

The long measure is the ien, which is about 4 China cubits; and 2½ Japanese leagues are computed to be about 1 Dutch league.

JAVA.¹

Coins, Weights, and Measures.

COINS.—Accounts are kept in rix dollars, an imaginary coin, each 40 stivers; and each stiver 16 pennings; but the currency is dols, stivers, dubbeljees, schillings, and rupees, thus divided :

4 dols.....	make	1 stiver
2½ stivers.....		1 dubbeljee
3 dubbeljees.....		1 schilling
4 schillings.....		1 rupee.

GOLD COINS.—The following are current at Java, with their sterling value, reckoning gold at the standard price of £ 3 17s, 10½d. per ounce, and the rates at which they pass current :

Milled Dutch ducat weighs 2.5½ contains 52.8 grains pure gold, worth £ 0 9 4, passes for 132 stivers.

Old Japan Capang..... 11.9 239.2 ditto 2 1 3½,
passes for 480 stivers.

New ditto..... 8.01 134.5 ditto 1 3 9½,
passes for 233 stivers.

English guineas are sometimes to be met with; when new, they pass for about 240 stivers; but when old, only from 200 to 204, which are equal to about 17 shillings sterling.

East India mohur, or gold rupee passes for 430 stivers; its subdivisions in proportion.

Doubloon, or Portugal £3 12s. piece, passes for 16 Spanish dollars.

SILVER COINS.—The following are current at Java, and at the following rates : Florin, or guilder, weighs 6 dwts. 18 grs. contains 145 grains of silver, worth 1s. 8d., passes for 20 stivers.

3 guilder piece, weighs 1 oz. 3 grs. 455.7 ditto 5s. 0d.,
passes for 60 stivers.

Ducatoon, milled, is the current coin of all the Company's settlements, and passes for 80 stivers.

Unmilled, or old duccatoon passes for 71 stivers.

The milled duccatoon, though it passes current at 80 stivers, is not, in proportion to the other coins, worth more than 66 stivers; it weighs 1 oz. 22 grs. and contains of pure silver 471.6 grains.

Milled rupee, in the Compan'y accounts, is 24 stivers, but passes current for .30 stivers
Schillings are of two sorts; the one the same as in Holland, passes for .6 ditto
The new, which are called skip schillings, pass for 7½ ditto
Rix dollar, which is coined at Batavia 10 ditto

English and German crowns vary according to the demand and quantity,
from 60 to 63 dimes

Spanish dollars pass at 64 silvers; the half and quarter dollars in exchange.

The Bengal sicea rupee passes for 31½ stivers; taken in exchange for Spanish dollars at the rate of 2 sicea rupees and 1 stiver per dollar; the value being fixed at 31½ stivers; the half sicea rupee passes for 15½ stivers.

The Surat and Arcot rupees are of equal value with that of Java, and pass current for 30 stivers; the half rupee of each sort passes for 15*½* stivers.

The American and Austrian dollars pass for 60 stivers, and the gold eagle for 10 Spanish dollars.

COPPER COINS—Dubbeltjees, which are of two kinds; the old passes current for 2 stivers, and the new for $\frac{3}{4}$ stivers. Doits, 10 of which make 1 dubbeltjee; there are also two doit pieces and half doit. These have all the Company's arms, and no others are taken. China cash are used in the bazaar in purchasing small articles of provision.

WEIGHTS.—The Chinese weights, taels, catties, and peculs are those in common use.

16 tales }
 100 cutties } make }
 3 peculis }
 4½ peculis }
 1 eatty, which is considered 1½ lb. Dutch.
 1 peculi
 7 small bahar
 1 large bahar.

The pecul weighs 125 Dutch lbs. which are equal to 133½ lbs. avoirdupois weight; by these weights most articles of merchandise are bought and sold, but they require comparison with European weights.

Rice and other grain are sold by the covang and gantos; the covang should weigh, on the receipt in the warehouse, 3300lbs. net, though it is received from the outports as 3,500lbs. Dutch.

The Dutch weights in use at Java and its dependencies are the following:

32 ases	make	I engle	make	24 small pens	make	I grain
20 engles		1 ounce		24 grains		1 gr. pen
16 ounces		1 lb.		12 groot pens		1 mark
1000 ases		7417 grains troy		1000 Spanish doll.		fine silv. 109 marks; 6 oz.
1 lb. Dutch troy, is 15 oz. 16 dwt. 11 grs. Eng. troy.						
135 Dutch troy lbs. are 178 English troy lbs.				The mark is reckoned to be 8 troy		

MEASURES

1 measure is 5 gallons, 250 gallons are 1 bushel.

1 leager of wine is 360 rands, each rand 10 measures, and a leager of arrack, is 396 rands.

1 arm of ale or wine is 9 rands.
1 ell is 27 English inches.

1 yard of firewood is 225 feet long
and 4 feet high.
1 ell of stone is 10 inches long 5 broad,
and $\frac{2}{3}$ thick.

JUDDA.

Coins and Weights.

COINS.—Accounts are kept in crude and duanees, 40 of the latter making one of the former.

No money is coined here. Foreign coins of all denominations pass current. From the great influx of pilgrims, large quantities of small coins are in circulation, but they are never carried out of the country by Europeans.

List of Silver and Gold Coins at Judda, and what they commonly pass current for.

	Dollars.	oz.	dwt.	
Judda weight.....	100	.87	4	250
German crowns.....	100	.91	6	255
Razeens (Barbary).....	100	.87	4	240
Lump silver, if good.....	100	.87	4	250
Pistareens of Philip V.....	100	.87	4	225
Lion dollars.....	100	.87	8	195 to 200
Pope's coins, per 100.....				125
Muscovy coins.....				150
Bar silver.....	100	.87	4	230
Zelottas, per lat.....	100	dollars, 100 to 105		cruse
Venetians 100—22½ sicca rupees.....				42
Stamboles.....				42
Zermabols.....				3½
Gingiées.....				3
Turahs.....				3
Gahbers 100 of which are 2½ per cent. less than that of venetians, or stamboles.....				42
Ring gold, sold per takia.....				40

The exchange at Judda fluctuates, but the general average may be taken at 250 Judda cruse per hundred Spanish head dollars. The pillar and head dollars are esteemed here of the same value, although the pillar is about 2 per cent. better than the head. French crowns are 13 per cent. less, though of equal standard, by which you may gain an advantage in purchasing French crowns, or pillar dollars; but if possible, avoid taking any gold coins to India upon your own account.

A comparative View of the relative Value of Coins taken at Judda with Bombay.

100 Mexico dollars will mint.....	239	2	41	100 old abasrees will mint.....	236	3	80
100 French crowns.....	239	0	59	100 new abasrees.....	236	3	0
100 English crowns.....	239	2	74	100 estimates.....	239	2	74
100 pillar dollars.....	241	3	55	100 old Seville estimates.....	242	3	70
100 German crowns.....	226	3	92	100 Peru, or cobh dollars.....	224	2	29
100 duccatons.....	214	1	39	100 linea dollars.....	193	1	4

Should you wish to coin your silver, the above statement will be found pretty correct, exclusive of mintage, which amounts to about 4 per cent.; but if your ship is going to Madras and Bengal, it is better to sell your silver to the shroff, than to coin it. One hundred ounces of standard silver will bring 258½ or 259 Arcot rupees; and there being only 1 per cent. difference between Arcot and Madras rupees, makes it 7 per cent. better thus to sell to the shroffs, than coining it into Madras rupees.

From the above statement, it would be best, in making your sales, to fix both the price and value of your silver and gold coin (in crude) with the merchant. In this be very exact, and observe that gold fluctuates more than silver all over India: it would be necessary, therefore, before you leave Calcutta, Madras, Bombay, or Surat, to have the price current of all kinds of coins, from the Shroffs, in the current rupee of the place: by this means you will know to a certainty what your coins will produce, and the best market for the sale of them: add to this, large sums are paid at Judda in gold, and a small error in calculation may amount to a considerable sum. And be guarded, upon the receipt of gold, not to suffer them to charge you 2 per cent. for what they call overweight; or if obliged to allow it, make your estimate of their relative value accordingly.

WEIGHTS.—Are vakkas, rattles, maunds, frazils, bahars, and are thus divided:

15 vakkas	{	1 rattle
8 rattles	{	1 maund
10 maunds	{	1 frazil
10 frazils	{	1 bahar.

But as all goods are weighed by the steelyards, after the Turkish manner, the European as well as the Turkey merchants, are obliged to rest contented with such weights as the weigher thinks proper to give them. No merchants are allowed to weigh goods, when bought or sold, at their houses.

JUNK CEYLON.

Coins and Weights.

COINS.—All kinds of Indian coins pass current here, but the preference is given to Spanish dollars. They have not the small cash in circulation as at Acheen and other places. They have certain pieces of tin, shaped like the under half of a coin, called poots, which are used on the island as money, weighing about three pounds; these are also their weights:

4 poots	{	1 vis
10 vis	{	1 capin
8 capins	{	1 bahar,

which is equal to 6½ Bengal factory maunds. The China pecul is in use here, by which tin is generally sold, the price varying from 12 to 16 Spanish dollars per pecul.

LOHEIA.

Coins, Weights, and Measures.

COINS.—The only money is a small piece of base and adulterated silver, about the size of a six-pence, called commassie, and by this all different denominations of foreign

coins are ascertained. There are likewise half commassées, which are the smallest coin current.

I venetian sequin passes for....90 com-	1 Barbary sequin passes for....80 com-
massées	massées
1 funduncie.....	80 ditto 1 dollar, or patack.....40 ditto.

When the Indian merchants or vessels are here, the funduncie is raised 3 commassées more; but all species is scarce, notwithstanding the quantity brought hither in dollars, which is the coin in which all purchases are made. When it is necessary to change dollars, the shroff, or broker, only allows 39 instead of 40 commassées, so that there is a loss on the exchange of 2½ per cent.

WEIGHTS AND MEASURES.—The weights are the dram, ounces, rotollo, and quintal. Their proportions are as follow:

10 drams	}	1 ounce
16 ounces		1 rotollo
100 rotollos		1 quintal.

The rotollos are of two sorts, one of 140 drams, which is used in selling fine goods; the other of 160, which is used in weighing sugar, lead, and other heavy articles. There is also another weight, called the faranzula, equal to 20 rotollos.

The long measure is the peck of 27 inches.

MACASSAR.

Coins and Weights.

COINS.—Accounts are kept in rix dollars and stivers. Spanish dollars are the common coin, but the under-mentioned also pass current at the following rates:

Duccatoons.....	13 schillings	Bombay rupees.....5 schillings
English crowns....10 ditto		Madras rupees.....4 ditto.

The exchange is 4 rix dollars for 3 Spanish dollars. All bargains are made in the former, which is a nominal coin. They have a kind of mace, 7 of which go to a dollar.

WEIGHTS.—All merchandize is weighed by the dotchin, and then reduced to other weights. Pepper is sold by the gantong, of which 225 make a Banda bahar; there are 2 gantongs, 20 of the smaller making one of the larger. The quoyan of rice is 40 equal to a China pecul. Tortoise-shell is purchased by the bahar of 200 catties, weighed by the dotchin.

MADEIRA.

Coins, Weights, and Measures.

COINS.—Accounts are kept in reas and milreas, which are imaginary coins; the latter is 1000 reas, and equivalent to 5s. 6d. sterling. The coins current on the island are,

Spanish dollars pass for . . .	1000 reas, equal to 10 hits
Pistareens	200 2 do.
Half pistareens, or hits . . .	100 1 do.
Quarter pistareens	50 1 do.

The gold coins of Portugal do not pass current on the island.

The copper coins are pieces of 5, 10, and 20 reas, being the $\frac{1}{2}$, $\frac{1}{4}$, and $\frac{1}{8}$ parts of the pistareen.

WEIGHTS AND MEASURES.—Those of Portugal are in general use on the island. The Portuguese commercial pound is equal to 1 lb. 3 $\frac{1}{2}$ drams avoirdupois; thus 100 lbs. of Portugal is 101 lbs. 3 oz. 3 $\frac{1}{2}$ drams avoirdupois,

COMMERCIAL WEIGHTS.		LIQUID MEASURES.	
72 grains of wheat		2 meyos	1 quartillo
4 octavos		4 quartillios	1 canada
4 onces		6 canadas	1 pose
4 quarias	make	9 potes	1 almude
22 aratels		25 almudes	1 pipe
4 arashes		9 pipes	1 tun
13 $\frac{1}{2}$ quintals		18 almudes	1 barrel.
1 ton			

LONG MEASURE.—There are two principal measures, the vara and the covado; the former is five palms or pams, and the latter three. The palm is eight Portuguese, nearly nine English inches; the covado being 26 $\frac{1}{2}$ English inches.

MADRAS.

Coin, Weights, and Measures.

COINS.—Accounts are kept at this Presidency in star pagodas, fanams and cash; 80 cash make 1 fanam, but the number of fanams in a pagoda varies from 42 to 46. The bank and European merchants keep their accounts at 12 fanams to a rupee, and 42 fanams to a star pagoda; but the natives keep theirs at 12 fanams 60 cash to a rupee, and 44 fanams 50 cash to a pagoda. In the bazar the pagoda fluctuates from 44 to 46 fanams.

The current coins are pagodas of various kinds, the arest rupee, single and double fanams, and copper coins of 20, 10, 5, and 1 cash each, thus divided:

5 cash		$\frac{1}{2}$ doodee
10 cash		1 doodee
20 cash or 2 doodees		1 pice
8 doodees		1 single fanam
4 pice		1 single fanam
2 single fanams	make	1 double fanam
12 single or 6 double ditto		1 rupee
24 single or 12 double ditto		3 $\frac{1}{2}$ rupees
2 $\frac{1}{2}$ rupees		1 star pagoda

GOLD COINS.—The current or star pagoda, coined at this Presidency, weighs 6 dwt., 2½ grains, is 3 carats worse than standard, and its value at the standard price of gold £3 17s. 10d. per ounce, is 7s. 5½d.

In the Company's accounts 100 star pagodas are valued at 425 current rupees.

The Madras or 3 Swamy pagoda is 20 2-3ds carats fine, and 100 of them are equal to 110 star pagodas.

The old pagodas of Negapatam and Tuticorin are about the same weight and value as the star pagodas; but in the latter coinage of those pagodas, they are depreciated, being only 18½ carats fine, and 104 of them are equal to 100 star pagodas.

The Porto Novo pagoda is only 17 3-4ths carats fine, and passes current 120 for 100 star pagodas.

The Canteria pagoda is of the same value as the Porto Novo, i.e. 120 are equal to 100 star pagodas.

The Pondicherry pagoda was originally considered equal in value to the star pagoda, but its standard has been lowered to 17 carats, and even less.

The following is the relative value of the different kinds of pagodas and other coins current at Madras:

100 Madras pagodas	make	110 star pagodas
90 900 ditto		100 ditto
100 star pagodas.....		120 Porto Novo do.
83. 333 ditto		100 ditto
350 Arcot rupees...		100 star ditto
49½ Madras fanams..		1 Madras ditto
35 do. 54.88 cash..		1 Canteria ditto
16 cash		1 ditto fanam
10 Canteria fanams..		1 ditto pagoda
6 ditto pagodas...		1 star pagoda
45 Madras fanams..		5 ditto
37½ ditto		1 Porto Novo do.
30 Shooly ditto....		1 star pagoda
16½ Coily ditto		1 ditto
46 do. 29.68 ditto ..		1 Bahander do.
1 star pagoda		97 dec of 1 do.
1 star pagoda		1.26 dec. 1 Canteria ditto
8 ditto		weigh 1 Spanish Dollar.

The fineness of gold and silver is expressed by dividing it into 10 touch, or matt, which are sub-divided into 10 parts, answering to the Chinese division of 100 touch.

SILVER COINS.—A new coinage has recently taken place of double rupees, single rupees, halves, quarters, and pieces of 1, 2, 3, and 5 fanams each, from Spanish dollars, which are estimated at 8 dwts. worse than the British standard.

lb. oz. dwts. grs.

lb. oz. dwts. grs.

1 new rupee will weigh of dollar silver, ...	0	0	7	18½ troy, and contains pure silver ..	0	0	6	92½
1,000 ditto	32	4	19	7½ ditto.....	28	10	16	13½

which is the same quantity of pure silver as is contained in the Arcot rupees that have always been issued from the Madras mint.

1 double rupee will weigh of dollar silver,	0 0 15 15 ¹¹	& contains pure silver.....	0 0 13 20 ¹¹
100 ditto.....	46 8 18 14 ¹¹	ditto.....	57 9 13 3
3 half ditto.....	0 0 3 21 ¹¹	ditto.....	0 0 3 11 ¹¹
3,000 ditto.....	16 2 9 15 ¹¹	ditto.....	14 5 8 0
3 quarter ditto..	0 0 1 22 ¹¹	ditto.....	0 0 1 17 ¹¹
1,000 ditto.....	8 1 4 19 ¹¹	ditto.....	7 2 14 3 ¹¹

The smaller coins are inscribed with their denomination in English, Persian, Gentoos, and Malabar.

5 fanams piece weighs.....	71 ¹ ₂	grains troy
3 ditto.....	42 ¹ ₂	ditto
2 ditto.....	28 ¹ ₂	ditto
1 ditto.....	14 ¹ ₂	ditto

A silver coinage of half and quarter pagodas, of dollar silver fineness has likewise taken place.

1 silver half pagoda weighs.....	326 ¹¹ ₂	grains troy, & is equal to 1 ¹ ₂ Arcot rupee.
1 quarter ditto.....	163 ¹¹ ₂	ditto 1 ¹ ₂ ditto

These coins are considered not only as the currency of Madras, but of all the subordinate territories.

The following is the relative value of the Madras or Arcot rupees, with other rupees current in India.

100 Arcot	100 sicca rupees	100 sicca rupees	107	6	6
rupees are	Bombay	100 Bombay	101	13	7
	sonants	100 sonant	102	12	5
	current.....108 0 0	100 current	92	9	6

Formerly the exchange between gold, silver, and copper at this Presidency was subject to great fluctuation. The shroffs, or money-changers, have recently proposed to Government that they would change the larger coins current at the following rates, viz.

For every pagoda to give	44 fanams	70 cash
For every half pagoda	22 ditto	35 ditto
For every quarter pagoda	11 ditto	17 ¹ ₂ ditto
For every rupee	12 ditto	65 ditto
For every half rupee	6 ditto	32 ¹ ₂ ditto ;

and they are supplied at the treasury with fanams and copper coins to carry the same into effect.

COPPER COINS.—Great inconvenience having been experienced from the want of a proper copper coinage in the districts under the Presidency of Madras, a new one has recently been issued of the following numbers, weights, values, and relative proportions to the country weights.

The dubs are to be received and paid in all public payments at the following rates: 24 double dubs, 48 single dubs, 96 half dubs, or 192 quarter dubs to a rupee. They weigh as follow:

Double dubs	11,000	to the Madras candy of 50 lbs. avoirdupois
Single ditto	22,000	ditto ditto
Half ditto	44,000	ditto ditto
Quarter ditto	88,000	ditto ditto
Single dubs	1,100	dittos to the maund of 25 lbs.
Ditto	137½	ditto vis of $\frac{3}{4}$ ditto
Ditto	68½	ditto padalum, or $\frac{1}{4}$ vis
Ditto	51½	ditto yubalum, or $\frac{1}{2}$ vis
Ditto	17½	ditto pump, or $\frac{1}{4}$ vis

When the above copper coins are issued, they measure with the star pagodas and fanam as follows:

84 double, 168 single, 336 halves, or 672 quarter dubs to one pagoda.

299½, regulating ditto to one ditto, whose denominations are inscribed on them.

3 single dubs and 1 regulating dub are equal to 1 fanam	
6 half ditto and 1 ditto	1 ditto
12 quarter ditto and one ditto	1 ditto

There are also issued the following coins, with their denominations inscribed on them in English, Persian, Gentoo, and Malabar.

40 cash piece being 298 grains or $23\frac{1}{2}$ to the pound avoirdupois	
20 ditto	149 ditto $46\frac{1}{2}$ ditto
10 ditto	74½ ditto $93\frac{1}{2}$ ditto
5 ditto	37½ ditto $187\frac{1}{2}$ ditto
2½ ditto	18½ ditto $375\frac{1}{2}$ ditto

WEIGHTS.—Are the pagoda, pollam, seer, vis, maund, and candy, thus divided:

	lbs. oz.
10 paseda	
8 pollams....	
5 seers	
8 vis	
20 maunds....	
make	
1 polam, is....avoirdupois	0 15
1 seer	0 10
1 vis	3 2
1 maund	95 0
1 candy	520 0

Gold sold by the current pagoda weight, poising each pagoda 2 dwt. 4 gr. troy.

The following is a comparative view of the several denominations of great weights used in various parts of India, with those of the Presidency of Madras:

MADRAS WEIGHT.					
Country,	Species of Weight.	maunds.	vis.	pol.	
Bengal	factory maund	2	7	35	
Ditto	hazar maund	3	2	11½	
Bombay	candy of 20 maunds	22	3	8	
China	pecul of 100 catties	5	2	20	
Mocha	bahar of 15 fazils	17	6	16	

Samr	candy of 20 maunds.....	29	6	374
Junkceylon	bahar of 8 capios	19	3	192
Bencoolen	bahar	22	3	8
Calicut	maund of 1000 pools	1	1	24
Cochin	candy of 29 maunds	21	5	302
Malacca	bahar of 3 peculis	16	1	24
Tellicherry	candy of 20 maunds	24	0	0

GRAIN AND DRY MEASURE—Are the ollack, measure, mascal, parah, and garce thus divided:

1 ollack	{	is equal to cubic inches	11,719 dec.	
8 ollucks			93,752	
8 measures			750	
5 mascal			3,750	
400 mascal		{ 1 garce	300,000	

The mascal and lesser measures were ordered, when made of wood, to be round, and rimmed with iron or brass, and the mascal to be $9\frac{1}{2}$ inches deep, and $10\frac{1}{2}$ inches diameter inside, and to hold 27 lbs. 2 ounces, and 2 drams avoirdupois, of fresh well water: hence 43 mascal are equal to 15 English bushels. The parah to measure 2 feet square, and $6\frac{1}{2}$ feet deep.

When grain is sold by weight, 0.256 lbs. equal to 18 candies; 12 $\frac{1}{2}$ maunds are = garce, which is nearly 17 $\frac{1}{2}$ English quarters.

Liquid Measure—The puddy, by which milk, ghee, oil, and some other liquids are sold, is equal to the pony in grain measure, containing 8 ollucks: but for wine, spirits, &c. the English measure is used.

1 ollack	{	is English measure, gall.	0	0	0	1 $\frac{1}{2}$
2 $\frac{1}{2}$ ollucks			ditto	0	0	1 $\frac{1}{2}$
5 ollucks			ditto	0	1	0
8 ollucks			1 measure, or puddy	0	1	4 $\frac{1}{2}$
2 $\frac{1}{2}$ measures			or 20 ollucks	1	1	4 $\frac{1}{2}$
8 measures			1 mascal	3	0	1 $\frac{1}{2}$
20 maunds			1 candy	64	0	0

LAND MEASURE—Land is generally measured with a Gunter's chain of 100 links, or with a rod of 10 feet, and reduced to cawnies, ground, and square feet, agreeably to the following table.

60 feet long, and 40 feet broad, make 1 ground or manney, equal to 2,400 square feet
 $2\frac{1}{2}$ grounds or manneys make..... 1 cawney 57,600 ditto.

The Indian cawney is in proportion to the English acre, as 1 is to 1,3223 or as 121 is to 160.

To reduce Indian cawnies to English acres, multiply the given number of cawnies by 160, and divide by 121: the quotient will be the number of acres, and the remainder the fractional parts of an acre. Or multiply the cawnies by 1,3223, and the product, cutting off 4 places to the right hand, will be the same, and the figures so cut off, are the decimal parts of an acre.

LONG MEASURE—The covid in cloth measure is 18 inches; but the English yard is generally used.

MAGINDANAO.

Coin.

COINS.—The currency in most parts of the country, as in Sooloo, is the Chinese kangan, a piece of coarse cloth, thinly woven, 19 inches broad and six yards long; the value at Sooloo is 10 dollars for a bundle of 25, sealed up, and at Magindanao much the same; but here Spanish dollars are scarce. These bundles are called gandangs rolled up in cylindrical form. They have also as a currency consongs, a kind of nankern, dyed black, and kompow, a strong white Chinese linen, made of flax.

In the bazar, or market, the immediate currency is paly; 10 gantangs, of about 4 lbs. each, make 1 battell, and 3 battells (a cylindrical measure 17 $\frac{1}{2}$ inches high, the same in diameter) about 120 lbs. are commonly sold for a kangan. Speaking of the value of things here and at Sooloo, they say such a horse, proa, &c. is worth so many slaves, the old valuation being one slave for 30 kangans.

China Cash is in use here, their price from 100 to 180 for a kangan. In making bargains, it should be specified whether is meant real or nominal kangan; the dealing in the nominal or imaginary kangan is an ideal barter. When dealing in real kangans, they must be examined, and the gandangs, or bundles of 25 pieces, are not to be trusted, as the dealers will often forge a seal, having first packed up damaged kangans; at this the Chinese here and at Sooloo are very expert.

MALACCA:

Coin, Weights, and Measures.

COINS.—They have no particular coins of their own; some few Dutch schillings and stivers are to be seen; the rest are gold, as compangs, ducats, &c.; but all contracts for goods, bought or sold, are made in Dutch dollars.

Accounts are kept in rix dollars, schillings, stivers, and doits, which are thus divided:

4 doits	make	1 stiver
6 stivers		1 schilling
8 schillings		1 rix dollar.

All Indian coins are current here. The following are the rates at which they usually pass:

Bombay rupee.....	5 schillings	Japan compang	80 schillings
Madras rupee	4 ditto	Ducatoon	13 ditto
Spanish dollar	10 ditto	English crown	10 ditto.

WEIGHTS AND MEASURES.—All goods are weighed here by the dotchins, for which 1 per cent. is paid to the Captain of the Chinese, who is dotchin keeper.

GREAT WEIGHTS.		
16 tales	{	1 catty
100 catties	{	1 pecul
3 peculs	{	1 bahar

GOLD WEIGHTS.		
16 miamis.....	{	1 bunel
20 bunels ...	{	1 carty
which is equal to troy, 29 oz. 16 dwt.		

GRAIN MEASURE.—1 gantong is equal to 6 Dutch lbs.; 10 gantongs 1 measure; 50 measures 1 last; 800 gantongs 1 quoyane. 40 Chinese peculs are 1 quoyane, and 1 pecul is 125 Malacca lbs.

LONG MEASURE.—The covid is two-thirds of a Dutch ell, about 18½ English inches.

MALDIVES.

Coins.

Their money is of silver only, called Larins, and the value about a quarter of a rupee each. All other monies pass current by weight, and every man keeps weights for the purpose, so that they are frequently obliged to cut dollars, rupees, &c. into pieces to pay for any commodity.

MANGALORE.

Coins, Weights, and Measures.

COINS.—The following are the coins in common currency here, and their value in rupees, viz.

Ikeri or Swamy pagoda	4 rupees	Madras or star pagoda	3½ rupees
Bahadary or Hyder's pagoda	4 ditto	Porto Novo ditto	3 ditto
Sultany or Tipoo's ditto	4 ditto	Canner Raya or Ikeri fanam	½ ditto
Kristna or Mysore ditto	4 ditto	Vir Raya fanam	¼ ditto

Of silver coins, the Surat and Madras rupees are considered of equal value, and pass for 3½ silver fanams, the same as are current in Malabar; in the bazar they exchange for 10 dudus or dubs; but in revenue are taken for 14 dubs each.

Of copper coin, the Bombay pice coined in England, and Tipoo's dubs are current here; these with their fractions $\frac{1}{2}$, $\frac{1}{4}$, and $\frac{1}{8}$ are the only small coins in use. Cowries are not in circulation.

In payment for goods or debts, every person must receive these coins at the above rate of exchange. The money changers give silver for gold at the regulated price; but they take a small batta, or exchange, when they give gold for silver. They also give copper for silver at the regulated price, but demand 10½ dubs for the silver fanam.

Accounts are commonly kept in Sultany pagodas, rupees and annas; others are kept in pagodas, a nominal fanam of 10 to a pagoda, and annas, or 16 parts of these fanams.

WEIGHTS.—The seer used for weighing, contains 4297 grains, which is rather more than 24 Bombay rupees. The seer is divided into halves, quarters, eighths, and sixteenths. The number of seers in the maund varies according to the goods to be disposed of.

The maund by which goods are sold in the market is 46
seer, or lbs. 28,14

The mauld by which the merchants purchase, and by which the Company buy and sell, weighs 16 rupees more or less	28.55
Jaggery is bought and sold by the mauld of 40 seers	24.47

The candy contains 20 manuds, and varies accordingly, from 571 lbs. to 589½ lbs.

MEASURES.—The seer in the bazar is formed by mixing equal quantities of salt, and of the nine most common grains, and then by taking of the mixture 48 Bombay rupees weight; this fills the seer measure, and is about 73,633 dec. cubical inches. The moray contains 38 seers, or about 1½ bushel.

The grain measure, by which the farmers sell their crops, is thus formed: 64,125 cubical inches make 1 bany, 14 banies make 1 cullishigay, 3 cullishigays make 1 mudl or moray, which is about 1,2525 bushel.

Grain, salt, and sometimes pepper, are sold by measure; of this last a puchka seer, or 73,683 cubical inches, is reckoned to weigh 51½ Bombay rupees. The corse for rice is 49 morays.

MONTE VIDEO.

Coins, Weights, and Measures.

COINS.—Accounts are kept in pesos of 8 reals, subdivided into 16 parts, and also into 34 maravedis. The gold coins are dousloons of 8 escudos, with halves and quarters in the same proportion. The silver coins are dollars, or pesos, Mexicanos of 8 reals, with halves and quarters, eighths (or reals), and sixteenths in the same proportion.

WEIGHTS.—The quintal is divided into 4 arobas of 25 lbs. each; the pound into 2 marks, or 16 ounces; the ounce into 8 drams, 16 adarmes, or 576 grains. Merchants commonly reckon 100 lbs. equal to 102 lbs. avoirdupois, but the exact proportion is 123 to 125.

MEASURES.—The Spanish foot is 11½ English inches; it is divided into 12 pulgas, each 12 lines. The fanega is a measure for corn, &c. containing 12 celemas; and 5 fanegas, one English quarter.

MOSAMBIQUE.

Coins and Weights.

COINS.—The coins current are Spanish dollars, cruzados, and testoons, 4 testoons making 1 cruzado, the exchange of which with Spanish dollars varies from 250 to 270 cruzados per 100 dollars.

WEIGHTS.—The weights are the fazil, and the bahar, 20 of the former making one of the latter, which is considered equal to 240 avoirdupois pounds.

MUDDI.

Coins, Weights, and Measures.

COINS.—The only coin belonging to the place, is of silver, called a cowrie. The exchange varies from 285 to 295 cowries per 100 Bombay, or Surat rupees. All Indian coins pass current here. Their value fluctuates according to the quantity in the market.

WEIGHTS.—The weights are seers and maunds, the latter of two sorts, Cutch and Pucca.

2 pice	{ make	1 anna
16 annas		1 Cutch seer
40 seers		1 Cutch maund, avoirdupois 37½ lb.

The Pucca maund is 2 Cutch maunds, and 20 Cutch maunds are equal to 1 Surat candy.

MEASURES.—The measures are the grah and the guz, 16 grahs making 1 guz, about 34 English inches. Broad cloth, velvets, silks, &c. are sold by this measure, though the shopkeepers in the bazaar often sell by hand, from the finger's end to the elbow, &c. This is rejected by the merchants.

MUSCAT.

Coins and Weights.

COINS.—Accounts are kept here in gass and mamoodies; 20 gass make 1 mamoody. The coins current are :

50 budgerooks	{ make	1 mamoody
3½ mamoodies		1 Bombay rupee
7½ ditto		1 Spanish dollar.

All Persian, Turkish, and Indian coins are met with here but are generally sold by weight.

WEIGHTS.—The weights are the cucha and maund; 24 cuchas making a maund which is equal to 8 lbs. 12 oz. avoirdupois.

NATAL ON SUMATRA.

Coins and Weights.

Spanish dollars and rupees are current; besides these are single, double, and treble, fanams, the latter called tal-i, coined at Madras; 24 fanams or tal-i, being equal to a Spanish dollar. English and Chinese weights are in common use.

In this part of the island, where the traffic in gold is considerable, it is generally employed as currency instead of coin. Every man carries small scales about him, and purchases are made with it so low as a grain or two of paddy weight. Various seeds are used as gold weights, but more especially two, the one the well-known scarlet pea with a black spot, 24 of which make a mace, and 16 mace a tale. The other is a scarlet, or rather coral bean, much larger than the former, and without a black spot. It is the candureen weight of the Chinese, of which 100 make a tale. The tale differs in the northern and southern parts of the island; here it is only 24 dwts. 9 grs. troy; but at Padang, Bengoolen, and elsewhere, it is 96 dwts. 12 grs. troy.

NEGAPATAM.

Coins.

During the period the Dutch held Negapatam, a coinage took place of four or five lacs of pagodas annually; but this has been discontinued since the English obtained possession of it. As there is no gold coinage in any other place to the southward, nor any regular circulation of rupees, the whole currency of those provinces, exceeding the pagodas that happen to be in use, consists of fanams. Of these every district coins a different sort, and no comparative rate having been established between the star pagodas and these inferior coins, their value fluctuates according to the relative demand, and the coinage of one province is seldom at par in another.

ONORE.

Coins, Weights, and Measures.

COINS.—The common currency here consists of Ikeri, Sultany, and Bahadary pagodas; Surat and Madras rupees, which are considered of equal value; fanams, a small silver coin; and dubs, a copper coin.

10 dubs.....	{	1 fanam
5½ fanams.....		1 rupee
4 rupees.....		1 pagoda.

WEIGHTS.—The seer weight is the same as at Mangalore; it ought to weigh 24 Bombay rupees, but these being scarce, in their stead dubs are commonly used, and are somewhat heavier.

The number of seers contained in the mannd, varies according to goods sold, viz.,

Common articles in the bazar are 40	seers or	avoirdupois lbs. 24.55
Pepper	12	26.91
Beetle-nut	45½	27.92
Dry cocoa-nut kernels	48	29.46
Jaggery	44	26.52

MEASURES.—There are two kinds of grain measures in use, one for the farmers, and one for the merchants; the basis of the former is the haney, containing 87½ cubical inches.

16 hanies	{	1 colaga, which is equivalent to bushels	0.816
20 colagias		1 moray or study for common use	1.632
22½ colagias		1 moray for sale	1.813
15 colagias		1 moray for seed	1.224

The basis of the measure by which the merchants deal, is the sida of 32½ cubical inches.

6 sidas	{	1 colaga	bushels 0.907
20 colagias		1 moray	1.814
30 morays		1 corge	54,419

The bazar moray, and that of the farmers for sale, ought to be the same, but they differ a little.

PADANG.

Coins and Weights.

COINS.—Accounts are kept in six dollars and stivers; 48 stivers making 1 six dollar. Spanish dollars and most of the Indian coins pass, nearly at the same rates as at Batavia.

WEIGHTS.—Both Dutch and Chinese weights are in common use.

PALEMBANG.

Coins and Weights.

COINS.—The currency of the country, and the only money allowed to be received at the King's treasury, is Spanish dollars; but there is also in general circulation a species of small base coin, called petis, which are cut out of plates composed of lead and tin; and having a square hole in the middle, like the Chinese cash, are strung in parcels of 500 each, 16 of which are equivalent to a Spanish dollar. Accounts are kept in six dollars (a nominal coin) and stivers; the exchange between Spanish and six dollars being five of the latter for four of the former.

WEIGHTS.—Here, as well as at all other places where the Chinese have settled, their weights have become in common use. In weighing gold, the tael is considered as the tenth part of the catty, or equal to the weight of 2½ Spanish dollars.

The commercial weights are gantons, baly, and copangs; 10 gantons make 1 baly, about 60 catties; and 80 balies 1 copang; by this measure, rice is also sold.

PASSIER.

Coins and Weights.

Spanish dollars are the general coin, and goods are bought and sold by the Chinese pecul and catty.

PATANY.

Coins and Weights.

The principal coin is the Spanish dollar, and all goods are weighed by the Chinese dotchin.

PEDIR.

Coins and Weights.

Spanish dollars are the principal currency; the other coins are nearly similar to those at Acheen. The Pedir catty weighs 37 Spanish dollars, and the bahar is equal to 424 lbs. avoirdupois.

PLETTEMBERG BAY.

Coins.

The Cape paper money passes current here; and Spanish dollars vary from 11 to 12½ schillings paper currency, each.

PONDICHERY.

Coins, Weights, and Measures.

COINS—Accounts are kept in pagodas, fanams and cash; 60 cash making 1 fanam, and 24 fanams 1 pagoda. The coins current are pagodas, rupees, and fanams, also copper cash or dudus, thus divided:

20 dudus	24 fanams	make	{ 1 fanam 1 pagoda
----------	-----------	------	-----------------------

There are various kinds of pagodas current here, and are nearly all of the same weight. That of Pondicherry was originally equal in value to the star pagodas; but its standard has been considerably lowered; it passes for 3½ rupees, though the exchange varies from 350 to 360 rupees per 100 Pondicherry pagodas. The exchange for Spanish dollars is from 210 to 215 rupees per 100 Spanish dollars.

WEIGHTS—Gold and silver are weighed by the seer, pagoda, rupee and fanam; a seer weighs 28½ rupees, 8 ¼ pagodas, or 73½ fanams; a rupee weight is equal to 30 fanams, or 480 neelos; a pagoda weight is 9 fanams, or 144 neelos; thus 3 rupees are equal in weight to 10 pagodas.

71½ pagodas weigh a French mark, or 3778 English grains, so that the seer contains 4293 grains.

The commercial weights are the candy of 90 maunds, each maund 8 vis. The Pondicherry maund is 23 lbs 14 oz. 5 drs. avoirdupois.

MEASURES—Rice, and all other sorts of grain are sold by the garce of 600 marcals; and 100 marcals are nearly 18 English bushels.

PONTIANA.

Coins and Weights.

Spanish dollars are the principal coin; and the China weights of pecul and catty are in common use.

PORTO NOVO.

Coins.

Accounts are kept in collums of paddy, or in chuckrums. The collum is a measure which is between 70 and 80 quarts, but varies in different parts. The medium price of a collum of paddy is 3½ gold, or 7 silver fanams, about 1s. 4d. sterling; so that 100,000 collums of paddy at the afore-mentioned price, will produce 15,555 Star pagodas 25 fanams.

In the Tanjore country the star pagoda is valued at 45 Madras, or silver fanam; 1 chuckrum is equal to 20 Madras, or 10 gold fanams; 2 chuckrums and 1 fanam is equal to 1 Porto Novo pagoda.

The Porto Novo pagoda passes current at Madras for 37½ Madras fanams, 100 Porto Novo pagodas are reckoned 83½ star pagodas, and 100 star pagodas, equal to 120 Porto Novo pagodas. In the Company's accounts the Porto Novo pagoda is reckoned at 36 fanams.

PRINCE OF WALES'S ISLAND.

Coin, Weights, and Measures.

COINS—Accounts are kept by the Company in Spanish dollars, copangs and pice; 10 pice making 1 copang, and 10 copangs 1 Spanish dollar.

The merchants keep their accounts in Spanish dollars and cents. The current pieces are coined on the island, being pieces of tin, nearly the size of an English penny; they have the Company's mark on one side, and are flat on the other; 100 of them ought to contain 4½ catties of pure tin.

WEIGHTS AND MEASURES—Weighable goods in the wholesale are chiefly sold by the China pecul; they are weighed with English weights, and afterwards turned into peculs and catties.

The English yard is in common use, and piece-goods are bought and sold by the corse.

QUEDA.

Coin, Weights.

Spanish dollars are the principal coin. All goods are weighed by the China dotchin, or wooden steel-yards; but English scales and weights are in common use. The balar is 424 lbs. avoirdupois.

RANGOON.

Coin, Weights, and Measures.

COINS.—The Birmans, like the Chinese, have no coin; silver in bullion, and lead, are the current monies of the country; weight and purity are of course the standard of value, and in the ascertainment of both, the natives are exceedingly scrupulous and expert.

What foreigners call a tical, or tackal, properly kiat, is the most general piece of silver in circulation; it weighs 10 dwts. 10 grs. 75 dec. and is thus divided:

2 tubbers....	2 moos....	make	1 moo
2 moos....	4 maths....		1 math
4 maths....	100 ticals....		1 tical
			1 via.

Money scales and weights are all fabricated at the capital, where they are stamped and afterwards circulated throughout the empire; the use of any others is prohibited.

The bankers, called by foreigners Pymons, are likewise workers in silver, and assayers of metal. This class of people is very numerous, and indispensably necessary, as no stranger can undertake either to pay or receive money without having it first examined. Every merchant has a banker of this description, with whom he deposits all his cash, and who, for receiving and paying, gets an established commission of 1 per cent: in consideration of which, he is responsible for the quality of what goes through his hands, and a breach of trust is very seldom heard of.

The quantity of alloy varies in the silver current in different parts of the empire. At Rangoon it is adulterated 25 per cent. In pure, or what is called flowered silver, all royal dues are paid. The several modifications are as follow:

Rouni.....	or pure silver	Rounassee.....	or 20 per cent. alloy
Rounika.....	or 5 per cent. alloy	Moowadzoo.....	or 25 ditto
Rounizee.....	or 10 ditto	Woosbo.....	or 30 ditto

Any person may have his silver either purified or depreciated to whatever standard he chooses. The nearest silversmith will perform the work free from charge; as the bringer by the operation must lose a trifle, which the artist gains; the small quantity of metal that adheres to the crucible being his profit.

WEIGHTS AND MEASURES.—The weights are the moos, tual, vis, and candy, and are thus divided:

100 moos....	make	1 tual
100 tual....		1 vis
150 vis....		1 candy.

The vis is considered equal to 3 lbs. 5 oz. 5 dms. 33 dec. and the candy to 500 lbs. avoirdupois.

Rice is sold by a measure called tayndanng, or basket; the weight is 16 vis, about 56 lbs. The average price of rice at Rangoon is about 4 or 5 baskets for a tical.

The measures of length are the paulgant, or inch, 18 of which compose the tain, or cubit. The sundanng, or royal cubit, is equal to 22 inches, but varies according to the will of the King.

The dia, or bamboo, consists of 7 royal cubits; 1000 dia make one dain, or Birman league, equal to 2 English miles, and 2 furlongs; the league is also subdivided into tenths.

The Birmans keep their accounts in decimals, after the manner of the Chinese.

RIO DE JANEIRO.

Coin, Weights, and Measures.

COINS.—Accounts are kept in milreas and reas, 1000 reas making a milrea. They separate the milreas from the reas thus—166,208, which is 166 milreas, 208 reas.

GOLD COINS.—The gold monies current, and the weight are as follow. The sterling value is estimated at the British standard of £3 17 10*l*. per ounce.

COINS.	No. of Reas.	WEIGHT. oz. drs. grs.	Sterling value.		Current value.
			£	s. d.	
Gold piece.....	25,600	1 16 12	7	9 1	7 4 0
5 Moidore piece or Debrao	24,000	1 14 12	6	14 5	6 15 0
Doubloon, or 2 Joanese.....	12,800	0 18 6	3	11 0½	3 12 0
½ Debrao.....	12,000	0 17 6	3	7 1½	3 7 6
½ Doubloon or Joanese.....	6,400	0 9 5	1	15 10	1 16 0
Moidore	4,800	0 8 22	1	6 11	1 7 0
½ Doubloon or ½ Joanese..	3,200	0 4 15	0	17 11½	0 18 0
Gold piece.....½ Joanese ..	1,600	0 2 6	0	8 8½	0 9 0
½ Moidore.....	1,200	0 1 16½	0	6 6½	0 6 9
Testoon	800	0 1 8	0	4 6	0 4 6
Crusado	480	0 0 15	0	2 5	0 2 5

SILVER COINS.—The following are the current silver coins, with their weights, and sterling value estimated at the British standard price of 5s. 2d. per ounce.

COINS.

WEIGHT

No. of Reas.	oz. drs. grs.	Sterling value,
Patacas or Sello.....	640	0 11 12
Crusado.....	480	0 9 9
1 Patacao	320	0 5 18
1 Crusado, or 12 Vintem piece	240	0 4 16
1 Patacao, 8 ditto	160	0 2 21
6 Vintem piece	120	0 2 4½
4 ditto	80	0 1 13
3 ditto	60	0 1 9½

The Spanish dollar passes current here; when received by the Portuguese from a foreigner, it is seldom taken for more than 720 to 750 reas, but when paid by them, is estimated at 800 reas.

The Portuguese silver coins are in general 7 to 9 dwts. worse than British standard.

COPPER COINS—Are the piece of 20 reas, or 1 vintem, and the half and quarter vintem in proportion; most of the Portuguese coins have on one side the arms of Portugal, and on the other an armillary sphere.

WEIGHTS—Are about 1 per cent. heavier than avoirdupois; 95lbs. 80dwt. being equal to 100lbs. avoirdupois, and are thus divided:

2	drams	}	1	octave
8	octaves	}	1	ounce
16	ounces	>	1	pound
32	pounds	make	1	asuba
4	arobas	...		1	quintal
13½	quintals	...		1	tog

The ounce is divided into octaves, scruples, and grains. Diamonds are weighed by carat's of 4 grains; the Portuguese ounce is $139\frac{1}{2}$ such carats, each carat equal to $3\frac{1}{2}$ grains English troy.

MEASURES.—The long measures are the covada and varn; the latter is 5 spans and the covada 3; the span is near 9 inches, so that the covada is about 27 inches English.

The measure for coto, salt and other dry commodities, is thus divided :

2 outavas....	make	1 quarto
2 quartos....		1 meyo
2 meyos....		1 alquiere
4 alquieres....		1 fanega

The alquiere measures 817 cubic inches, and 50 alquieres make 19 English bushels.

The liquid measure is thus divided :

4 cuartillos....	make	1 canada
12 canadus....		1 almude
18 almudes....		1 baril
26 almudes....		1 pipa
2 pipas....		1 tonelada

The almude is reckoned equal to 4½ English gallons.

ST. HELENA.

Coin, Weights and Measures.

COINS.—Accounts are kept in pounds, shillings and pence ; but coins of every denomination pass current here, both Indian and European.

Porto Novo pagodas used to pass at the same rate as star pagodas, notwithstanding they are inferior ; but Government having made an alteration, they only pass current at 7s. 6d. Guineas are generally at a premium, likewise bank notes ; passengers returning to England preferring to put up with the loss here to that in England, upon the sale of East India coins.

WEIGHTS AND MEASURES—All weighable commodities are bought and sold by avoirdupois weight, and the English yard is the common measure for cloth, linens, &c.

ST. SALVADOR.

Coin, Weights and Measures.

Are similar to those enumerated at Rio de Janeiro, to which St. Salvador is subordinate.

SALANGORE.

Coin and Weights.

Spanish dollars are in general use, but imaginary dollars are dealt for here, which are computed by weight in the following manner :—8 tompongs of tin of 8 catties weight, are 1 dollar ; 30 dollars, or 240 catties, are 1 bahar. The Malacca bahar of 300 catties is sometimes used for selling ; it is therefore necessary in bargains to men-

tion what bazar you agree for, and insist upon having your tin weighed by your own weights. As their dotchin is generally short of the weight you ought to receive.

The bazar here is China Peculs, or 400 lbs. avoirdupois.

SAMBASS.

Coins and Weights.

The Chinese weights are in common use. Spanish dollars are the coin in which all bargains are made; but herenous wax is the currency of the country; it is melted, but not refined, and cast into moulds of an oblong shape, the breadth about two-thirds of the length, and the thickness about half the breadth, having a rat-tan to lift them by, cast in the wax. A piece weighs a quarter of a pecul, and is valued in payment at about 10 mace; for smaller payments they have pieces of eight and sixteen to a pecul; and for smaller money, cowries are in use.

SIAM.

Coins, Weights and Measures.

COINS.—Accounts are kept in tales, tical, miams, fouangs and cowries, thus divided:

800 cowries....	make	1 fouang, called by the natives phuan
2 f. nan-zi....		1 miam, or mace
4 miams....		1 tical, or batt
4 ticals....		1 tale or tamluni.

10 miams are equal to a China tale, and Siam tales are always reckoned at 8 China tales.

The coins are gold ticals, which pass for 10 silver ticals; miams, fouangs and tampuris. The silver tical weighs $22\frac{1}{2}$ grains, and is from 11 oz. 4 dwt. to 11 oz. 11 dwt. fine; thus it is worth £2 5s in £26s. sterling; these coins are often adulterated. Two ticals pass commonly for a Spanish dollar, and $2\frac{1}{2}$ ticals for a Dutch ducatoon.

The fineness of gold and silver is expressed, as is in China by touches.

GREAT WEIGHTS are ticals, catties, and peculs, thus divided: 80 ticals make 1 catty, and 50 Siam catties should be equal to 1 China pecul of 133 $\frac{1}{2}$ lbs. avoirdupois; for all their goods are weighed by the China dotchin, but the King's weight at Siam is never found to give more than 129 lbs.

GOLD AND SILVER WEIGHTS are the tical, which weighs nearly 9 dwt. 20 grs.

MEASURES.—The largest measure for corn is the cochi, of 40 seutes; the seute contains 50 sats, and weighs 100 Siam catties.

The long measure is 2 soks make 1 ken. 2 kens 1 yonsh, which make 75 $\frac{1}{2}$ English inches; 20 souahs make 1 sea, and 100 seas 1 league, or roeneng, which is 4204 English yards.

SINKELL.

Coins and Weights.

Spanish dollars are the principal currency; but accounts are kept in tales, sooccoos and satallies, viz.

4 satallies	{	1 sooccoo
4 sooccoos		1 tale
1 tale		4 Spanish dollars.

Benjamin is brought here by the tompong or cake, which ought to weigh 20 cattles, each catty 56 ounces avoirdupois, and for camphire 56 ounces troy weight.

The Chinese pecul is in common use in buying and selling most commodities.

SOOLOO.

Coins, Weights, and Measures.

They have no coin at Soolo, only a currency which they reckon by sanampaory, cangan, and cowsoong, or nankeens: the first is a term only, and the second a coarse China cotton cloth, which goes in payment of goods, and is reckoned equivalent to a Spanish dollar, a few of which are occasionally met with among them. In small payments they make use of paddy, or rice in the husk, which rises and falls according to the plenty or scarcity of grain. In their accounts they sometimes reckon by Spanish money, but commonly by the cangan and sanampaory, of which the following is the rate:

4 sanampaories	{	1 cangan of 6 fathoms long
4 sanampaories		1 cowsoong of 4 fathoms long.

The cangan was formerly seven fathoms long; but as the Chinese suffered by impositions here, they have debased the manufacture, and contracted the measure, which example the native so well imitate, that it scarce happens a cangan is found six fms. long.

The use of paddy as a currency has introduced the custom of measuring instead of weighing grain and some other commodities, as cowries, &c.

WEIGHTS.—The Soolo weights are similar to those of the Chinese; but they have given them other names, and they correspond with the latter, in the following manner:

10 moohooks..	{	1 choochock..	equal to	1 candareen
10 choochocks..		1 ammas		1 mace
10 ammas....		1 tale.....		1 tale
16 tales.....		1 catty		1 catty
5 catties		1 booboot....		5 catties
10 booboots....		1 lacksa....		50 catties
2 lacksas....		1 pecul....		1 pecul

The weights in some of the islands are heavier than the standard; however, as an implicit confidence is not to be placed in their docthins, it will be necessary to compare them with English weights.

MEASURES.—Their smallest grain measure is a half cocoa nut shell, called a panching.

8 panchings....	}	1 gantang
10 gantangs.....	}	1 raga
2½ ragas.....	}	1 pecut

The gantang of rice is reckoned to weigh four catties, according to which 2½ ragas make 1 China pecut of 133½ lbs. and also 1 cawan of Manilla.

The measure for cloth, is the fathom, but the Chinese covid is in common use.

SUEZ.

Coins and Weights.

COINS.—The principal current coins are burbers, medine, sequins and Spanish dollars. The burber is a copper coin, 12 of which make a medine. The sequin is of two sorts, one called fundunclee, and passes current for 146 medines; the other zermabob, which passes for 110 medines. The asper, though not coined in Egypt, passes current here, 3 aspers making 1 medine.

4 grains make 1 kellarat, 16 of which make a dram, of which all the weights are compounded.

1½ dram is 1 metigal, by which gold and silver are weighed

144 drams 1 rottolo, equal to 1 lb. 4 oz. avoirdupois

400 ditto 1 oke, by which sugar and other heavy goods are weighed.

The quintal varies from 110 to 150 rottolos, according to the species of goods to be weighed.

SUCCADANA.

Coins and Weights.

COINS.—Spanish dollars are the only coin in circulation in their trade with Europeans, and all bargain are made in this money; but accounts among themselves are kept in tale and mace.

WEIGHTS.—All gross goods are weighed by English weights and then turned into China peculs. Their small weights are busucks, kupang, mace, pahaw and tale, thus divided:

2 busucks....	}	1 kupang
4 kupangs....	}	1 mace
4 mace.....	}	1 pahaw
4 pahaws....	}	1 tale

By these weights diamonds, gold, bezear and other valuable articles are weighed.

SURAT.

Coins, Weights and Measures.

COINS.—Accounts are kept in rupees, quarters and reas, 400 reas making one rupee.

The coins current are the gold mohurs, rupees, their halves and quarters, and tin pice, 72 pice to 1 rupee. For small change they have baddams, a species of almond; these rise and fall according to the quantity in the market, and vary from 48 to 80 for a pice.

The gold mohur weighs 179 grains, and passes current for 15 silver rupees.

The silver rupee coined under the Mogul Government, weighed 178.374 grains, and contained 1.24 of alloy; but in consequence of the Surat coinage being so much depreciated, as to contain from 10 to 15 per cent. of alloy, in 1800, the Bombay Government ordered the Surat rupee to be struck in that mint, to weigh 179 grains, and to contain 7.87 per cent. alloy.

Bullion of all kinds is sold in proportion to its fineness, reckoning Mexico dollars the standard: this varies according to the rates of exchange.

100 ounces Mexico doll.	11	oz.	2 dwts.	fineness will produce from	215	to	246	rs.
100 ditto.	Ducatoons.	11	6½	ditto	245	to 250 do.
100 ditto.	Old Seville.	11	5	ditto	244	to 249 do.
100 ditto.	Pillar doll.	11	4	ditto	242	to 248 do.
100 ditto.	French Crowns	11	1½	ditto	235	to 245 do.
100 ditto.	Lion Dollars	8	19	ditto	190	to 200 do.
Gold venetians, full wt. of vals	9½	ditto	346	to 355 do.
Gabbers.....	ditto	ditto	312	to 330 do.

Coins of gold are seldom circulated as coin at Surat, but generally considered as bullion.

WEIGHTS AND MEASURES.—The great weights are pice, seers, maunds, and candies, but English weights are in common use.

			Cwt.	qrs.	lb.	oz.	dwt.	dec.
20 great or 30 small pice	make	{ 1 seer, equal to avoirdupois	0	0	0	14	15	76
40 seers	make	{ 1 maund	0	1	9	7	6	50
20 maunds	make	{ 1 candy	6	2	21	4	2	0

The maund is considered equal to one half of the Calcutta factory maund. There is also a pucka maund, which is equal to the factory maund. Although the above is the common received standard of gross weight at Surat, yet most of the commodities in the market are sold by a different number of seers to the maund, varying from 40 to 45 seers; nor is the candy uniformly confined to 20 maunds. For example: pepper and sandal wood are sold by the Bombay candy of 21 maunds; and cotton, the great staple commodity of this country, by the Surat candy of 21 maunds. In the list of important Bombay is specified by what number of seers, &c. to a maund each article is sold.

PEARL WEIGHTS.

			dwt.	grs.	dec.
20 ruttas	make	{ 1 rattee is troy	0	8	951
3 rattees	make	{ 1 val	0	5	858
24 rattees	make	{ 1 tank	1	15	324
30½ vals	make	{ 1 Surat rupee	7	11	0
22 vals	make	{ 1 tola	7	19	317

			oz.	dwt.	dec.	oz.	drs.	dec.
1 small Surat pice is troy	9	2	56	or avoirdupois	0	7	992
1 great ditto	13	15	805	ditto	0	11	959
1 Surat tola	7	19	317	ditto	0	6	550

1 miscal is 1 tank, 2 rutter, 1 vassa, and 29 tolas 25 vals is 100 miscals.

47 tolas, 29 vals, 1 rutter, of 50 Surat rupees, is troy 18 oz. 13 dwt., 23 grs. 61 dec.

1 seer of coral, or amber, is 18 great pice, 31½ tolas, or 27 small pice, and weighs troy 12 oz. 293 dec. or avoirdupois 13 oz. 487 dec.

The Venetian sequin is 9½ vals, and the Spanish dollar 73 vals.

The measures are the large covid of 36 inches, and the small covid of 7½ inches. Broad cloth, satins, velets, &c. are generally sold by the English yard of 36 inches. The parah corn measure contains 20 panniers, and weighs about 7½ lbs. avoirdupois.

TELLICHERRY.

Coin, Weights, and Measures.

COINS.—The coins current here are pagodas, rupees, fanams, pice, and tars. There are two kinds of fanams: the one is a small gold coin, with a considerable alloy of silver and copper; the other a silver coin; the pice and tar are copper, coined in Bengal.

2 tars	make	1 pice
10 pice		1 fanam
5 fanams		1 Bombay rupee.

The following are the rates at which gold coins commonly pass current at Tellicherry.

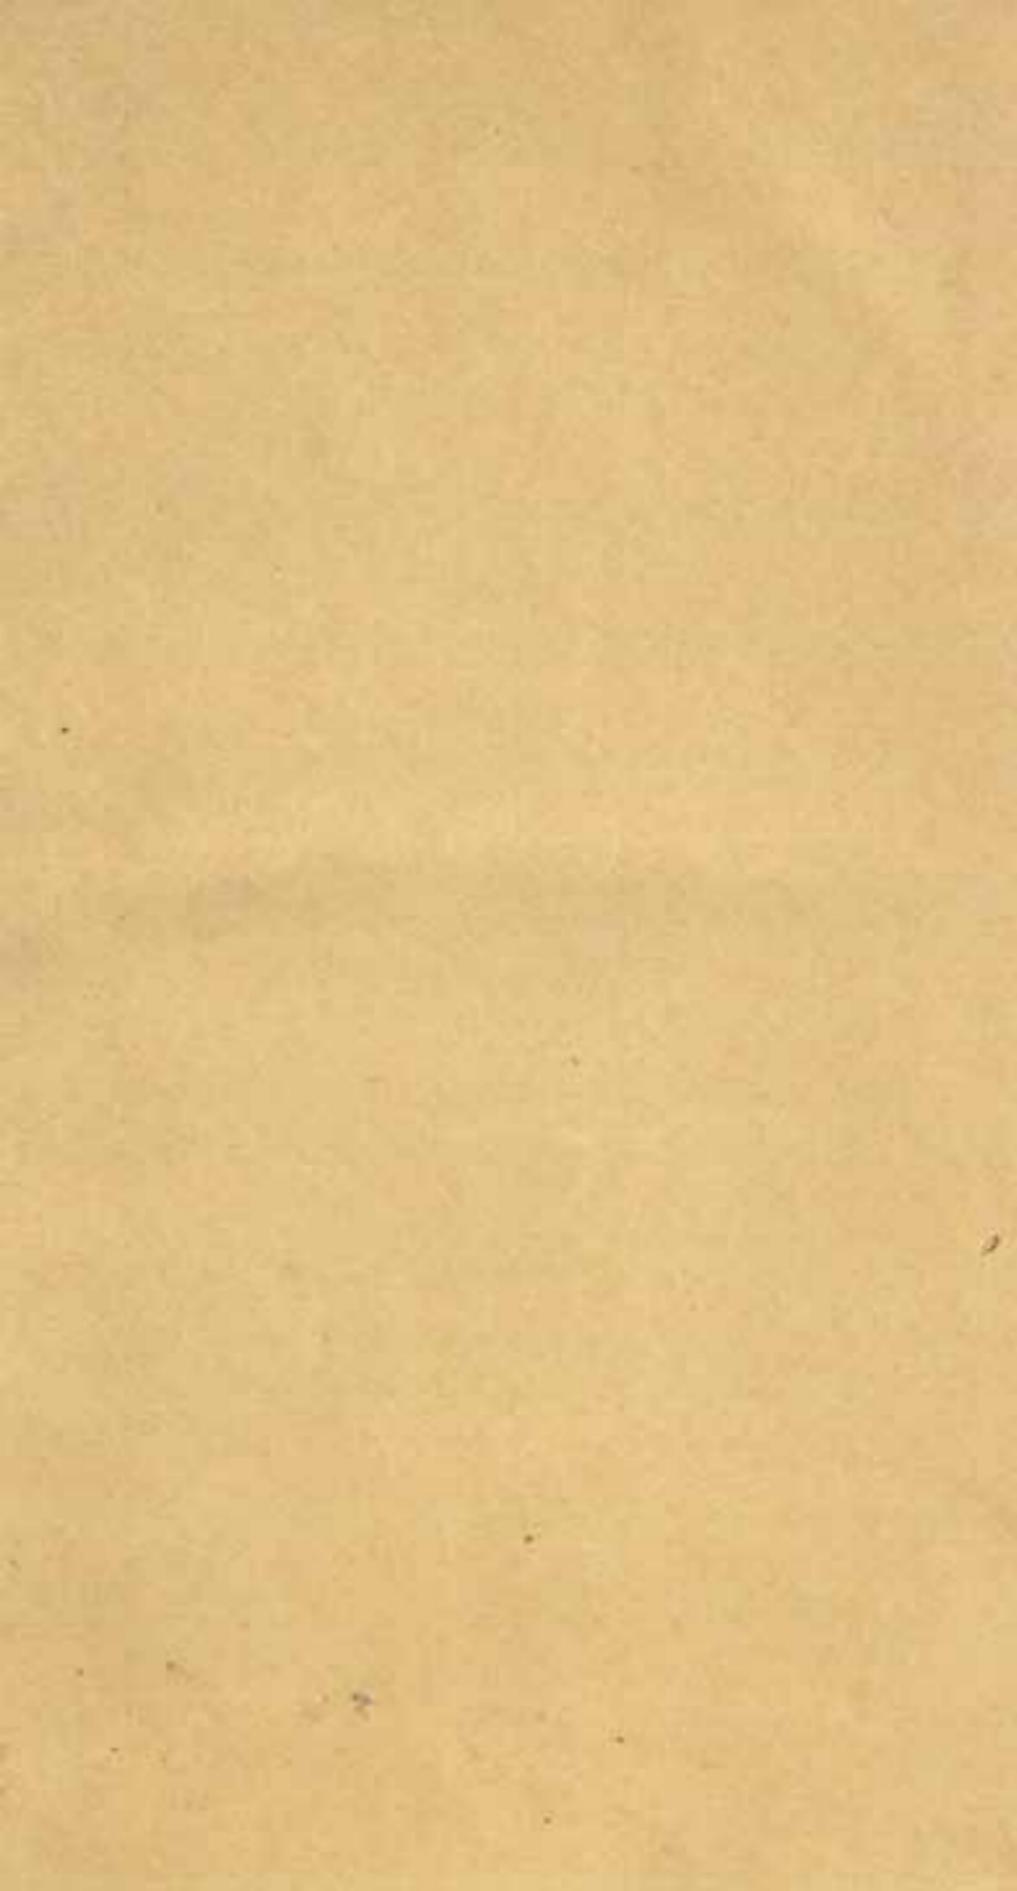

Porto N. to pagodas	3½ rupees	Venetians, 5 rupees each; but if paid 5½ rupees per 100 venetians.
Ser. pagodas	3½ ditto	
Sultany ditto	4 ditto	
but to pay for goods, 450 rupees per 100 pagodas.		
		Ser. 1 gold moinars 13 rupees each
		Bombay ditto 16 ditto.

In selling goods, all bargains should be made for Bombay rupees, or you will lose considerably by the coins you are obliged to take here, more particularly the venetians which seldom fetch more than four rupees each at Bombay, and upon pagodas the loss is from a quarter to half a rupee each.

Accounts are kept in rupees, quarters, and reas, the same as at Bombay.

WEIGHTS.—The commercial weights are pollunds, maunds, and candies, thus divided: 20 pollunds make 1 maund, and 20 maunds 1 candy, which is reckoned equal to 600 lbs. avoirdupois; but the maund does not exceed 28½ lbs. which makes the candy only 570 lbs.

MEASURES.—The long measures are the covid, and the gyz; the former 18 inches and the latter 29 inches.
