Index of Hindu Castes and Animists Tribes with their Sub-divisions	... 219 (j) to 249	

INTRODUCTION

—:o:—

The peculiar way in which the States of the Central India Agency intermingle, so that one State often has possessions in several Political Charges, made the Statistics collected for the Imperial Tables useless for administrative purposes, as far as individual Darbars were concerned. This has perhaps made the Provincial Part somewhat bulky, but when the expenses borne by the States are taken into consideration, it will be seen to be only just that they should obtain Statistics in a form which could be of practical value to them.

This Volume contains tables made out by States giving all the information that, I think, is likely to be required for ordinary administrative purposes.

The States are so far as possible arranged by Political Charges.

Cantonments, Military and Civil Stations, and Railways have been separated, as the land in these cases is ceded to British jurisdiction, and the administration has passed out of the hands of State officials.

To give all tables was impossible, and I can only hope that those which I have compiled will prove useful.

Any special information, not contained in these tables but recorded, can always be obtained from the Tabulation Registers.

State Reports.—A note on the Census of certain Selected States in each Political Charge has been added to this Volume together with a few Subsidiary Tables. It would have been impossible to do this for all States, nor could I spare the time to do more than give a sketch of the State figures. I must leave it to those interested in any particular State to search the tables themselves for more detailed information.

The States taken are Indore, Riwa, Bhopal, Dhar, Barwani, Datia, Charkhari, Chhatarpur, Senior and Junior Dewas, Jaora and Ratlam.

The arrangement of this Part falls into 3 Sections.

Section I gives notes on the 12 Selected States of Central India. All important Tables are dealt with.

Section II deals with the remaining States and Estates. Tables I to VI are dealt with. A few Tables giving the main results for Cantonments, Military and Civil Stations, and for portions of different Railways in Central India, have also been added to this Section.

It will be noticed that Section II gives details by *perganas* for the large States and by whole Estates in case of small holdings.

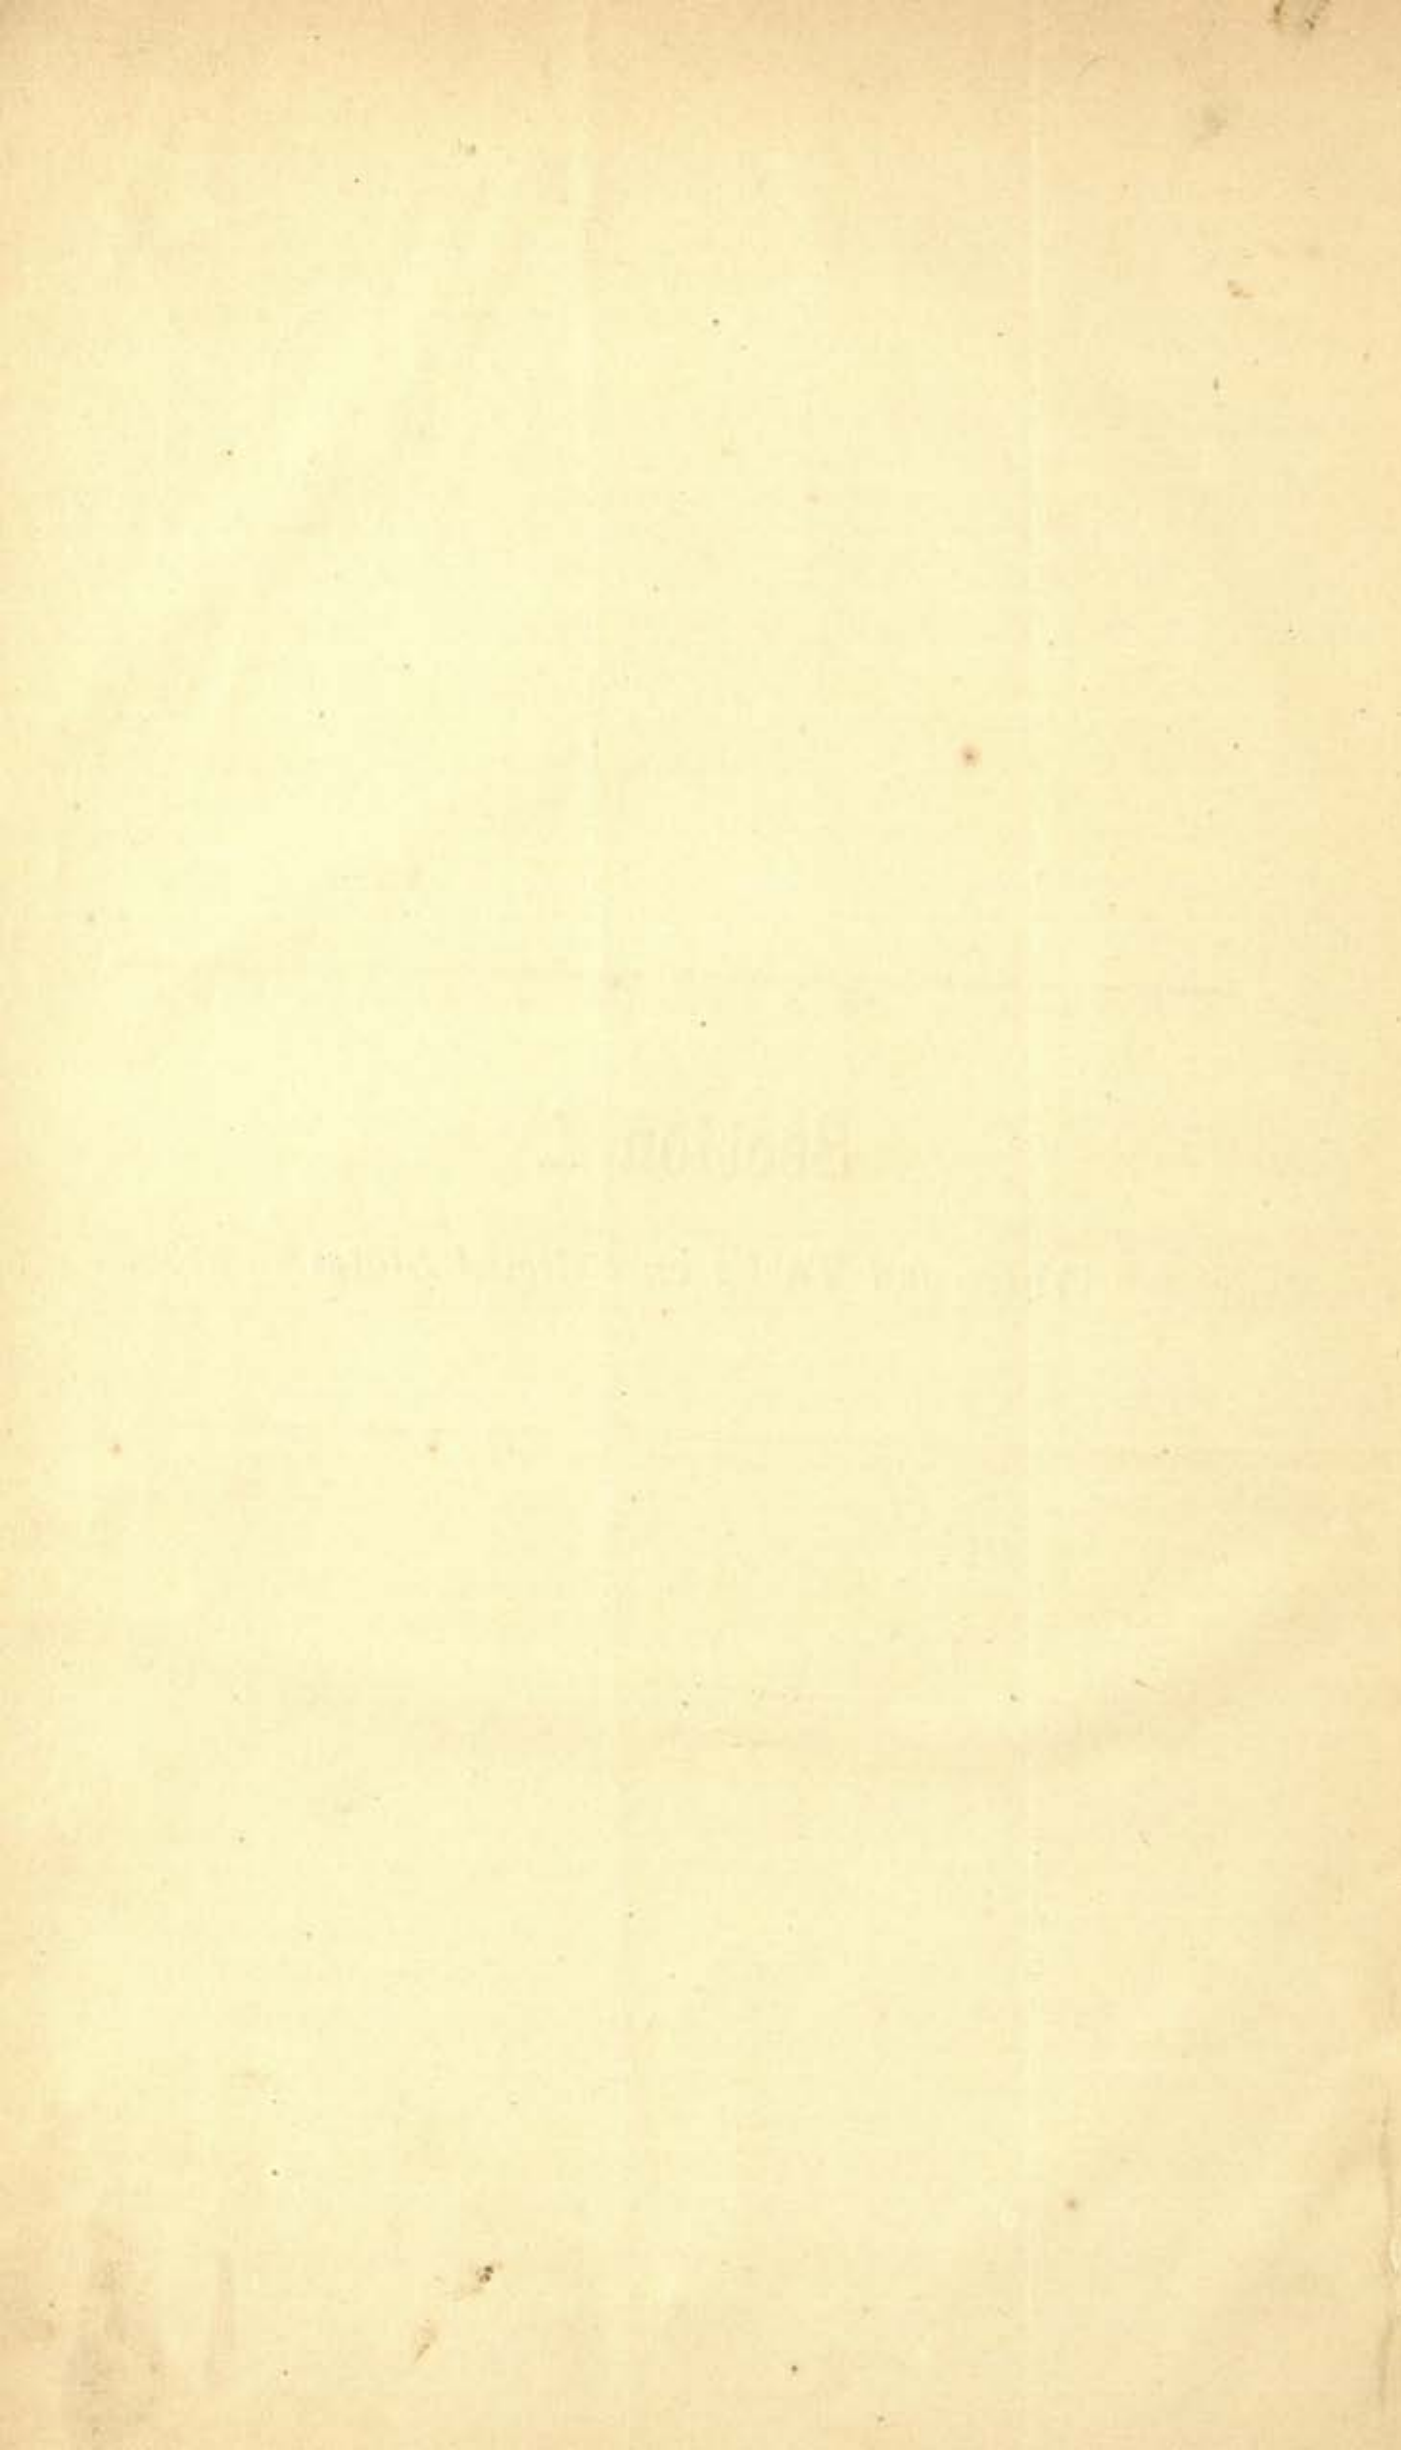

Section III contains notes on Famine and Overcrowding, Provincial Table C., an Alphabetical list of Castes, Tribes, and Races, and Statements shewing Variation in Area since 1881, and its distribution by Natural Divisions. Supplementary Tables giving Leading Statistics, and a List of castes and sub-castes, with figures denoting the Political Charges in which they were found, are also added.

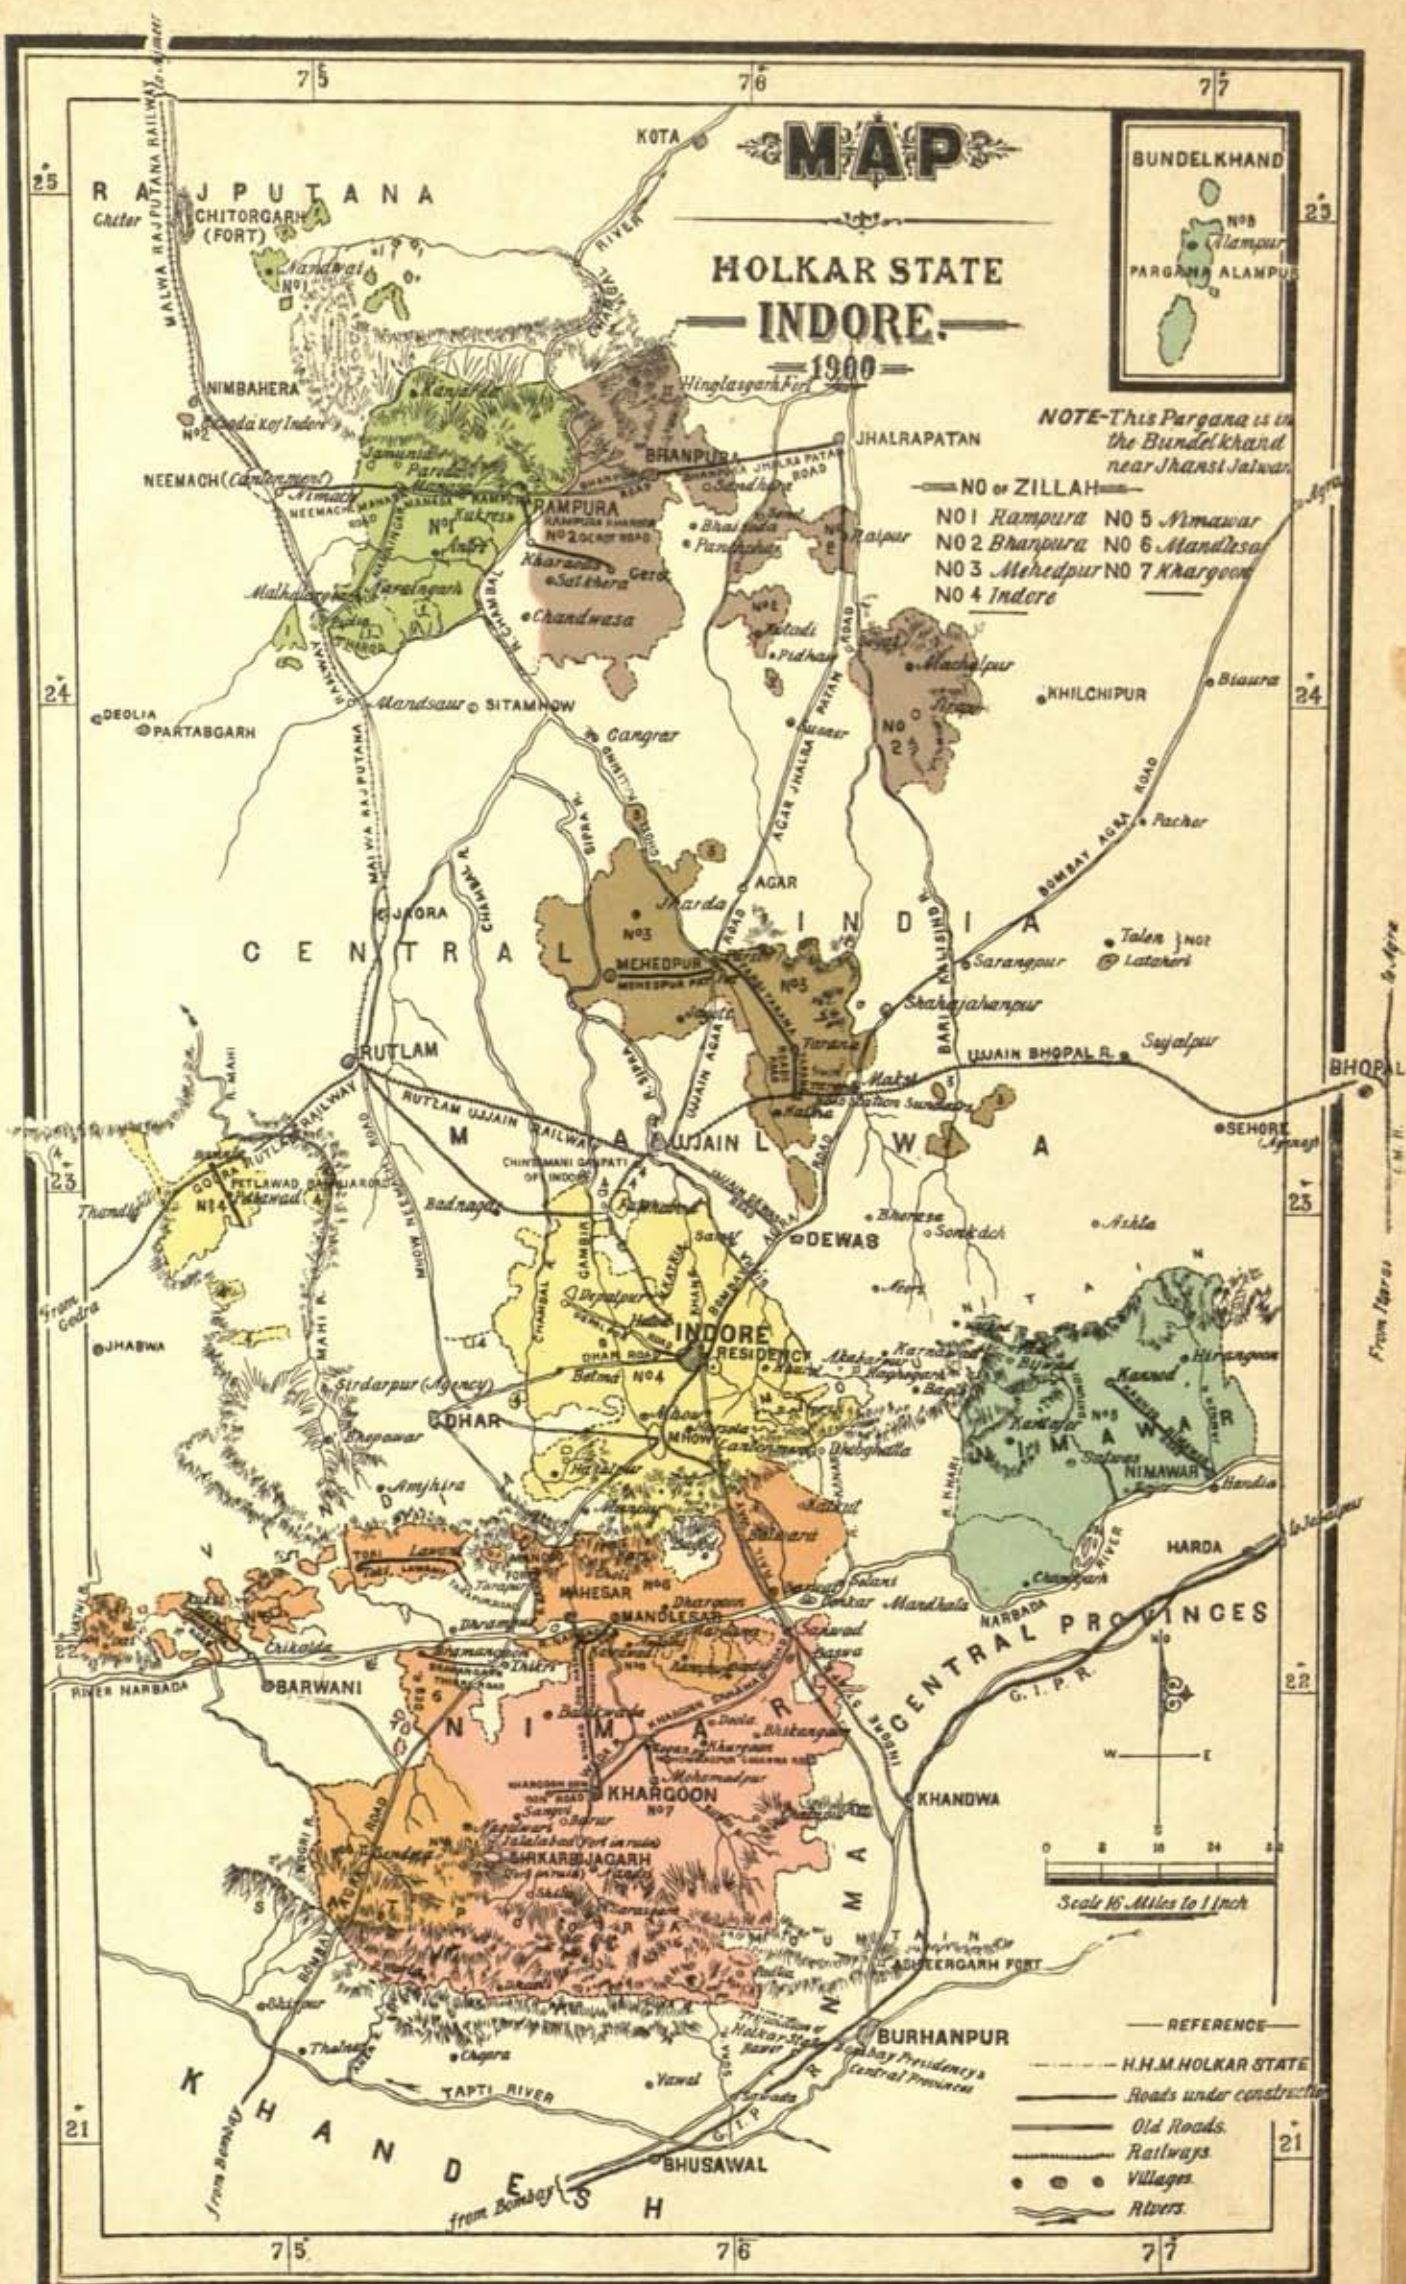

The Supplementary Tables will shew Political Officers at a glance the area and population in their respective charges.

The list of sub-castes is exactly as recorded at the Census and has been printed simply to assist the Ethnographic Survey work. It has not been examined at all and is necessarily most incorrect.

Section I.

Notes and Tables on Selected States.

NOTE ON THE CENSUS

OF THE

INDORE STATE.

DESCRIPTIVE.

(1). *General*.—Indore is the third largest State in Central India. Its area exclusive of guaranteed holdings on which it has claims, is 9,500 square miles, and its total population 850,690.

The Gwalior State has an area about 25,000 square miles, which may be compared to that of Greece (24,977) or of Ceylon (25,363), Riwa of about 13,000 square miles.

The borders of Indore are for the most part included within Central India, but it meets the Bombay District of Khandesh and the Central Provinces on the south, while on the west it touches Rajputana. (*vide* Map).

(2). *Administrative Divisions*.—The State is for administrative purposes divided into seven *zillas* or districts shewn on the map in different colours:—Rampura (green), Bhanpura (mauve), Indore (yellow), Nemawar (blue), Mahitpur (chocolate), Mandleshwar (brown), Khargon (pink); and 53 *pergas*. The largest district is that of Khargon in Bhopawar with an area of about 2,824 square miles nearly the same as Yorkshire (2,773), while the smallest is Mahitpur in Malwa.

The *pergas* again vary in size from Nagalwari with 816 square miles of area, to Talen Lataheri, which has an area of 2 square miles only.

Like most States in Central India the territory is not homogeneous but distributed over several political charges. It has portions in five out of the eight charges of Central India, and one small portion in Mewar in the Rajputana Agency. The whole State has been, since October 1899, under the general control of a Resident, formerly it was directly under the Agent to the Governor-General.

The greater part of the State lies in Bhopawar some 4,000 square miles, while least lies in Bundelkhand, only 36 square miles.

Some changes have taken place in the State for when, as mentioned above, a Resident was appointed, 8 *pergas* were placed directly in his jurisdiction. Six were taken from the old Indore Agency, one from Bhopawar and one from Malwa, to form this charge.

All three natural divisions are represented, but the portion in the Lowlying country, the *pergana* of Alampur, is situated far from the rest of the State, and consequently presents peculiar features, which are not always comparable with portions in the other two divisions.

There are some 4,000 square miles in the Plateau, 5,000 in the Hilly tracts and 37 in the Lowlying.

(3). *Ruling Family*.—The State is ruled by the Holkar Family of Maratha Shudras. The house was founded in the beginning of the XVIII Century when Malwa was divided between the houses of Sindia and Holkar. In the beginning of the XIX

Century arose the contest for power between the Maratha confederacy and the British. It ended as regards the Holkar family at the battle of Mahitpur on December 21st 1817—which resulted in the signing of the treaty of Mandsaur on 6th January 1818.

(4). *Census*.—There have been in all four enumerations of the Indore State or of parts of it. The first was the enumeration made by Sir John Malcolm in 1820. In this only a few *perganas* of the Indore State were dealt with. In 1881 the whole State was enumerated, but no *pergana* figures were recorded. In 1891 also the whole State was enumerated, but the results were, save for a few general figures, shewn only by political charges and, no *pergana* figures were kept. On this occasion all important figures are being published, while figures for all tables by *perganas* are available.

The Census of the State was carried out from headquarters at Indore by Mr. Fattah Singh, acting under my orders. The State was taken as a single unit and not dealt with separately for each political charge in which portions of the State are found. The work was well carried out, the books being carefully filled in and well written up.

DISTRIBUTION OF THE PEOPLE.

(5). *General*.—The mean density of the State is 89 persons per square mile, a little lower than the figure for all Central India, and the figure has fallen since 1891 by 26 persons per square mile.

The density for the Lowlying country is very high, and due to the peculiar position of Alampur, as I have already remarked. The Plateau figure is 19 persons higher, and the Hilly tracts figure 6 lower, than the corresponding figures for Central India. Since 1891 the Plateau region has lost 42 persons per square mile and the Lowlying 22 and the Hilly tracts 12.

The Districts vary considerably from 117 persons per square mile in Mandleshwar to 48 in Khargon. It is noticeable that Bhanpura and Rampura which suffered severely in 1900 from famine shew the greatest decrease in population 64 and 57 persons per square mile respectively. Indore City, of course, shews a high density; and also a considerable increase.

These variations are for the most part due to the bad seasons which have affected the State.

The rainfall as the figures below shew has been scanty :—

years.	Inches.	Cents.
1891	28	22
1892	34	25
1893	30	62
1894	26	47
1895	23	86
1896	20	69
1897	23	49
1898	24	3
1899	7	58
1900	29	...

This has affected both public health and the crops. The total cultivated area of the Indore State in 1898-1899 was 1,504,636 acres, but in the famine of 1899-1900, 386,764 acres of land went out of cultivation.

The subjoined table shews by districts the figures for cultivated area, and the area which went out of cultivation on account of the famine of 1899-1900.

DISTRICTS.	Area in square miles.	Cultivated area in acres in 1898-99.	Cultivated area in 1899-00.	Gone out of cultivation (in acres.)
Indore	1,569½	362,082	327,533	34,549
Khargon	2,824	209,369	199,905	9,464
Mandleshwar	1,047½	166,224	125,732	40,492
Nemawar	1,095½	178,428	163,027	15,401
Rampura	936	280,893	87,444	193,449
Bhanpura	1,186½	252,777	175,888	76,889
Mahitpur	840½	54,863	38,343	16,520
Total	9,500	1,504,636	1,117,872	386,764

(6). *Town and Village.*—The Town of Indore has been treated for Provincial purposes as a "City" and separate tables made out for it.

Indore city stands on the Khan and Saraswati streams which meet near the old bridge at a temple of Mahadev.

Aberigh Mackay in his "Chiefs of Central India" says the name is derived from "Indur" a rat. This seems to be a mistake "Undir" being the word for a rat, and this is not, moreover, the derivation which is given locally. The name is said here to have come from the name of the old temple which stands on the bank of the Saraswati stream near "Juna Indore," near the new bridge. It is an old temple of 500 years standing as tradition goes. It is dedicated to Shiva, but has always been known as the temple of "Indreshwar." Malhar Rao Holkar and Ahilya Bai encamped by this temple on the banks of the stream. I think this derivation is a far more probable one.

The place was raised to the status of a town by the well-known Ahilya Bai after the death of Malhar Rao Holkar towards the end of the XVIII Century. It was originally a small village which stood on the site of what is now known as "Juna" (old) Indore."

Its population was about 63,000 in 1820, 75,000 in 1881, 82,000 in 1891 and on the present occasion about 86,000.

There are 11 towns in Indore State and 3,379½ villages.

The average town population of the State is 12,000 persons which is the same as that for Central India, the average village having about 200 people in it. The natural divisions have the same averages as those for all Central India.

(7). *Town and Village groups.*—Most people live, it would appear, in towns of over 20,000. This ratio is due to the overwhelming population of Indore city.

Among villages those of under 500 persons are most numerous.

There are on an average 18 houses per square mile, 25 on the Plateau and 12 in the Hilly tracts. The average number of persons in a house is about five, even in the city it is the same, shewing that large houses are not as common as we might expect.

The city figures shew an increase of 580 houses per square mile. The Lowlying and Hilly tracts have more persons per house than the Plateau—and agreeably to this the hilly district of Khargon stands first—while Rampura stands last.

(8). *Comparison*.—I have in Table II., compared where possible the return for other Censuses and that of 1901. Though we have no official *pergana* figures for 1881 or for 1891, I have in this case been able to obtain the 1891 figures from the Darbar; they were not preserved in the Report or in the Agency Office. The table speaks for itself and needs no comment.

It is possible that some changes of boundary may have taken place since Sir John Malcolm made his enumeration in 1820, still the results are interesting.

RELIGIONS OF THE PEOPLE.

(9). *General*.—Of the State population 79 per cent. are Animists.

Mahitpur has the largest proportion of Hindus, 91 per cent.

Rampura has most Jains, 3 per cent., Indore most Mahomedans, 11 per cent., and Khargon most Animists, 23 per cent.

The Natural Division figures shew that there are 11 times as many Animists in the Hilly as in the Plateau region.

(10). *Variation*.—Owing to the difference in classification adopted at different enumerations it is only possible to compare Animists and Hindus combined.

There has been a fall of 24 per cent. among them. Jains shew a fall of 5 per cent., Mahomedans of 10 per cent. The total population shews a fall of 22 per cent.

AGE, SEX AND CIVIL CONDITION.

(11). *Proportion of the sexes*.—There are 945 women to 1,000 men in Indore State.

The Lowlying tracts shew most females, Nemawar district in which there are many Animists shews most, 990 females to 1,000 males, while Mahitpur shews least, 931.

The preponderance of males in Indore city is marked.

There is a general excess of females in the State.

All the natural divisions shew an excess of females, in all districts. The city shews defect.

(12). *Civil Condition*.—The late marriage age among the tribes is shewn by the Natural Division figures, only 3 per cent. of girls between 0—10 being married in the Hilly tracts to 7 per cent. in the Plateau and 8 per cent. in the Lowlying country.

There are 978 wives to 1,000 husbands in the State, but in the city it falls to 951, due no doubt to men seeking work there who have left their families behind. The Plateau figure is highest in this case,

Among religions the Animists come first, save for an extraordinary return for Jains in the Lowlying tract (Alampur *pergana*), which I cannot understand.

EDUCATION.

(13). *Literacy*.—In the whole state there are 8·9 per cent. literate males and 0·4 per cent. females.

The Natural divisions shew marked differences. The Plateau, which includes Indore city, Mhow Cantonment and the A. G. G.'s Camp within its area has a very high figure 10·7 per cent. while the Lowlying shews only 4·6 per cent.

The district figures I do not understand as the most jungly has the highest return, Bhanpura shewing 7 per cent.

(14) *Means of Education*.—The Means of education in the Indore City.—

1. The Holkar College, up to B. A.
2. The Engineering School.
3. The Indore English Madrassa, up to Entrance.

- 4 The Military School, up to Entrance.
- 5 The City Girl School, Marathi and Urdu,
- 6 Marathi Schools, up to 5th Standard, (4).
- 7 Hindi Schools, up to 5th Standard, (3).
- 8 Sanskrit Schools teaching (1) Vedashástra, (2) Vyákarna.
- 9 Urdu Schools, up to 5th Standard, (2).
- 10 Miscellaneous Schools teaching, Sanskrit, Marathi, Hindi, Urdu, and English, up to 4th Standard (12).

The following are the Schools in the *perganas*.—

1. Marathi Schools teaching up to 5th Standard, (4).

Do.	4th	„	(5).
Do.	3rd	„	(6).
2. Sanskrit Schools teaching Vedashástra and Vyákarna at Maheshwar, Khargon, Mahitpur, Manasa, Bhanpura, and Garoth.
3. Hindi Schools teaching up to 5th standard, (2).

Do.	4th	(4).
Do.	3rd	(8).
4. Urdu Do. 4th (6).
 Miscellaneous (10).
5. Private Schools teaching Marathi, Hindi, Urdu, only hand-writing, etc., (29.)

LANGUAGE.

(15). *General*.—The prevailing tongues in Indore State are Bhilali, some 1,200 speaking it, Gondi-Malwi 31,000, Marathi 18,000, Marwari 10,000 and Gujarathi 6,000. Hindi and Urdu are of course found.

CASTE.

(16). A table comparing the castes of 1881 and 1901 is given. It explains itself.

The castes returned by Indore State alone are Shimpi (Tailor), Parwari, Manbhao (religious sect) Komti and Badigar, (bazigar).

OCCUPATION.

(17). Occupations predominant in Indore State are :—

Agriculture, Opium Grocers and Manufacturers, Cotton Weavers, Spinners by hand, Wholesale Merchants in Grain, Cotton, Cloth, Opium, Spices, etc.

NOTE ON THE CENSUS
OF
RIWA STATE.

I. *Description*.—Riwa is the only large state in Baghelkhand. It is the second largest state in Central India having an area a little more than half that of Gwalior. Its area is about 13,000 square miles which may be compared to that of Bulgaria (13,362), and a population of 1,327,385. It is bounded on the north by the United Provinces of Agra and Oudh, on the east by the Bengal district of Chutia Nagpur and on the south by the Central Provinces. On its western side it meets the states of Bundelkhand. It contains two natural divisions, Lowlying with 3,778 square miles of area and Hilly with 9,222.

II *Administrative divisions*.—Riwa is divided for administrative purposes into 7 *perganas*, 3 of which, Bardi, Ramnagar and Sohagpur fall in the Hilly tracts. The largest of these has an area of 3,535 square miles, rather larger than the combined areas of the East and North Ridings of Yorkshire (3,016). The smallest is Mhowganj with an area of 784. The size of the *perganas* is noticeable.

III *Historical*.—The ruler of Riwa is a Rajput of the Baghel branch of the Solanki race descended from the founder of the Anhalwari Pattan dynasty. The present ruler succeeded in 1880.

IV. *The Census*.—The Census of the State was admirably carried out by the Naib Dewan Rao Bahadar Lal Pratap Singh. The Darbar spent a considerable sum on the work. The books were most excellently filled in and were the most legibly written of any.

V. *Distribution of the People*.—The mean density of Riwa state is 102 per square mile, which is rather higher than the figure for all Central India. Mean density in urban area is 9,331 persons per square mile and rural 1,004. The rural figure is high as compared with other parts of Central India. The density for the Low-lying country is 176, for the Hilly 72. Since 1891 the variation shows a decrease of 14 persons per square mile.

VI. *Town and Village*.—The average town population of Riwa is 10,509, the average village population 231. There are 4 towns and 5,565 villages in Riwa.

VII. *Town and Village Groups*.—Most people live in towns of 5,000-10,000. But villages of under 500 are preferred.

VIII. *Variation*.—Tables II & IV need no special comment. They shew the variation which has taken place.

IX. *Proportion of Sexes*.—There are 1,013 women to 1,000 men in the State an increase since 1891 of 24 females in 1,000. There is also now an excess of 8,000 females instead of a similar defect. The two natural divisions both shew an excess. There are more females in the Low-lying than the Hilly Tracts. The better enumeration must be the cause of this.

X. *Civil Condition*.—There are a large number of wives to husbands, about 105 wives to 100 husbands. As will be seen it is the Hilly tracts which mainly raise the figure. I have in the report mentioned that Gonds, who chiefly people the region, shew signs of polygamy and many Gonds have, I believe, come under the class of Hindus, through concealing their tribal names and returning themselves as Rajputs. There is a marked difference between the infant marriage of girls in the Hilly and Low-lying tracts at 0-10 which are as usual equalised at 15-40 only.

XI. *Literacy*.—Some 4 per cent. are literate among males and 0.8 per cent. among females which compare well with the figures for all Central India. Urban figures shew 19 per cent. of literate males and 1 per cent. of literate females.

XII. *Means of Education*.—*Schools*.—English up to Entrance 2, Vernacular Middle 6, Vernacular Upper Primary 29, Vernacular Lower Primary 2. Girls' school Lower Primary 1, Arabic 1, Persian 1, Sanskrit 1. and Sanskrit Visharada 1.

XIII. *Languages*.—The languages and dialects most prevalent in Riwa are Baghelkhandi, Hindi, Urdu, Bundelkhandi, Gondi (which is only in Sohagpur *pergana*) and Marwadi met with in almost all the *perganas* of the State.

XIV. *Castes*.—The castes and tribes peculiar to Riwa are Agaria, Baiga, Baiswar Bargahi, Basuha, Bemariha, Bywar, Chirwa Darwan, Dhimar, Dhirkar, Kachera, Maj, Mahora, Pakhia, Paliha, Panika, Pathari, Pawak, Sarangia, and Umrao and mostly they are found in the Bardi, Hāzur, Ramnagar, Sohagpur, Satna and Teonthar *parganas* of the State.

XV.—*Occupations which may be considered as predominating in the State*:—Herdsman, Cultivators, Farm servants, General labour, Merchants, Grain dealers, Coal Mine subordinates, etc., etc.

NOTE ON THE CENSUS

OF THE

BHOPAL STATE.

—:O:—

I. Description of the State.—The state of Bhopal is situated in the political charge of Bhopal. It is surrounded on all sides except on the south where it touches the Central Provinces by other states of Central India. It has a total area of 6,859 square miles which may be compared to that of Wurtenburg (7,528). The natural divisions in it are Plateau with 4,003 square miles of area and Hilly with 2,855 square miles of area. The Total population is 665,961.

II. Historical.—Bhopal is the only large Mahomedan State in Central India and indeed is next to Haiderabad the most important Musalman Chiefship in India. The ruling family are descended from Dost Mahomed, an Afghan in the service of Aurangzeb. Dost Mahomed was sent as Superintendent of Bairasia on behalf of the Moghal Emperor ; this occurred towards the end of the XVII Century. In 1817 at the close of the Pindari war a close alliance was made between the British and the ruler of Bhopal and a formal treaty executed in 1818. The throne has descended in the female line since 1844 when Sikandar Begam became ruler. The present Begam succeeded in 1901.

III. Administrative divisions.—For administrative purposes the state is divided into 4 Districts and 33 *Perganas*. The largest *Pergana* that of Tal has an area of 516 square miles about the size of Bedford County ; the smallest is Piklaun with an area of 20 square miles.

IV. Distribution of the people.—(1) *Mean density.*—The mean density of the state is 97 people per square mile. There has been a fall of 138 persons per square mile since 1891. This must be in part due to some difference in the method of enumerating. The natural divisions show 97 people per square mile in the Plateau country and in the Hilly 96. (2) *Town and village.*—There are 5 towns in Bhopal State and 3,073 villages. The average town population is 19,166, the average village 186. Of the five towns met with two, Ichhawar and Bairasia, have populations which fell just below 5,000 this year on account of famine. Villages are mostly of "under 500" population, 380,000 persons out of 600,000 living in villages of this size.

V. Religions.—The state is on the whole Hindu in character. There are 72 per cent. Hindus, 14 per cent. Animists and 12 per cent. Mahomedans in the state. The urban figures show 43 per cent. Hindus and 54 per cent. Mahomedans shewing markedly the effect of the Mahomedan rule. The natural divisions shew 5 per cent. of Animists in the Plateau but 25 per cent. in Hilly tracts.

VI. Age, Sex and Civil Condition.—*Proportion of the sexes.*—There are 999 females to 1,000 males in the state. In the urban area the ratio is 969, in the rural 1,004. The natural divisions shew 981 in Plateau and 1,026 in Hilly tracts. The enormous diminution here in the defect of females, which as I have pointed out in the Report is due to the better enumeration, is worthy of notice. There is as usual nothing special to remark on the figures we find here. There are fewer married males at 0-10 in the City than in the State. There are 104 wives to 100 husbands in the state. The city shews 91 wives to 100 husbands. One would have expected more wives in a Mahomedan town. Perhaps the *Purdah* custom is responsible. The figures seem to point to the fact that girl marriage is not common in Bhopal city. The natural division figures shew the prevalence of the Hinduised Gond ; indeed more so than one would expect as it would appear that the Gond here out-does the Hindu in his desire for infant marriage.

VII. Education.—There are 26,453 or 79 per 1,000 literate males in the state and 3,030 or 9 per 1,000 literate females of all ages. The urban return shows 17,555 or 451 per 1,000 males and 2,880 or 76 per 1,000 females, the rural only 8,898 or 30 per 1,000 males. In the natural divisions we find in the Plateau 22,673 or 115 per 1,000 males and 2,965 or 15 per 1,000 females, and in the Hilly tracts 3,780 or 27 per 1,000 males only.

The means of education in the state are at Bhopal—

1. High School taught up to Entrance Standard.
2. Victoria Girls' School.
3. Hindi School.
4. Five Madrasas.

And at Sihor—

1. Boys' School taught up to Entrance.
2. Boys' Islamia School and a Hindi Night School.
3. Girls' Schools, three in number, taught up to II Standard.
4. A Private School.

VIII. *Language*.—The dialects spoken by large numbers in this state are Malwi and Gondi of which Malwi is found mostly in southern and western districts and Gondi entirely in the southern district. It being a Mahomedan state Urdu is spoken more generally than is usual in states of Central India, persons speaking Hindi predominate.

IX. *Castes*.—The castes which are returned by this state *only* are amongst Hindus Daroi, Gelot, Gudhelia Lilgar, Pansari, and Raghuvansi. Gelot is mostly found in Huzar Tehsil, Doraha, Ashta and Sihor *Perganas* and Raghuvansi in Odeypura *Pergana*. Amongst Musalmans Balewa, Behana, Beldar, Bhanmati, Dafali, Darzi, Dhati, Dom Mahotia, of these Dafalis are found in Bhopal city only. The castes which predominate in this state are among Hindus Ahir, Balai, Chamar, Kachhi, Lodhi, Sutar and Teli in Musalman Shaikh and Pathans, Gond, Kirar and Mina are the most common, among Aminists, Gujar, Balai, Pamar and Teli show an increase since 1881, there is a noticeable decrease in Kunbis and amongst Gonds since 1881.

X. *Occupations which may be considered as predominating in the state*.—Indigo Labourers, Rice Pounders, Opium Preparers, Coal Dealers, Marble Workers, Palki Makers, Wood and Ebony Carvers, Cotton Fullers and Dyers, Brass and Bell Metal Workers, Wax and Honey Collectors.

NOTE ON THE CENSUS OF THE DHAR STATE.

I. *Description of the State*.—The State of Dhar is situated in the Bhopawar Political Charge. It is surrounded on all sides, except on the east where it meets the Central Provinces, by other states of Central India. It has a total area of 1,775 square miles which may be compared for size with Somersetshire (1673). The Natural Divisions are Plateau area 744 and Hilly area 1,031. The total population is 142,115.

II. *Historical*.—The State of Dhar is ruled by Ponwar Marathas, The founder was Anand Rao Ponwar. The State was confirmed by British Government in 1819. The present Chief, who is a minor, succeeded in 1898.

III. *Administrative Divisions*.—There are 9 *Perganas* in the State. The largest, Nimanpur has an area of 350 square miles, the smallest is Sundarsi with an area of 10 square miles.

IV. *Distribution of the people*.—

(1). *Mean density*.—The mean density of the State is 99 persons per square mile. The Natural Divisions shew 106 persons per square mile in Plateau and 60 in the Hilly tracts. The density has decreased by 19 per cent. (2) *Town and Village*.—There are two towns and 513½ villages in the State. The average town population is 11,597 and the average village is 232. The village group chiefly met with is "Under 500."

V. *Religions*.—The State is essentially Hindu in character. There are 66 per cent. Hindus, 23 per cent. Animists and 9 per cent. Mahomedans in the State. The Urban figures shew 72 per cent. Hindus, 20 per cent. Mahomedans and 4 per cent. Animists. The Natural Divisions shew a greater population of Animists in the Hilly tracts. 14 per cent. to 9 per cent. in Plateau.

VI. *Age, Sex and Civil Condition*.—

(1) *Proportion of the sexes* — There are 992 females to 1,000 males in the State. In the Urban the ratio is 974 and in the rural 995. The Natural Divisions shew 1,020 in Plateau and 956 in Hilly. There is a defect of females in the State but the difference is far smaller than in 1891. (2) *Civil Condition*.—There is as usual nothing special to remark on. The figures shew a difference of 14 per cent. between the number of girls between 10-15 married in the Plateau and in the Hilly tracts.

VII. *Education*.—There are 5,335 literate males or 7 per cent. in the State and 195 literate females or 3 per cent. of all ages. The Urban return shews 2,932 literate persons or 13 per cent. and the rural 2,403 or 2 per cent. In the Natural Divisions we find 3,910 literate males or 10 per cent. and 120 literate females or 5 per cent. in the Plateau, and 1,425 literate males or 5 per cent. and 75 literate females or 2 per cent. in the Hilly tracts. The means of education in the State are :—1 English School up to Entrance, 29 Hindi Schools, 7 Marathi Schools, 6 Urdu Schools, 2 Sanskrit Schools and 4 Unspecified Schools.

VIII. *Languages*.—Certain dialects are spoken by large numbers in the State they are (1) Hindi in whole State (2) Marathi in whole State, (3) Malwi in whole State, (4) Nimari in Dharampuri and Sultanabad *Perganas*, (5) Bhili (Bhilari) in Badnawar, Dharampuri and Kukshi *Perganas*, (6) and Marwari in Dhar town.

IX. *Castes*.—The castes which predominate in the State are :—Ahir, Brahmans, Bania, Banjara, Balai, Chamar, Darzi, Gowali, Jat, Kalota, Kulmi, Kumhar, Kalal, Kachhi, Maratha, Mali, Rajput, Teli, Shaikh, Saiyad, Pathan, Oswal and Bhil.

X. *Occupations which may be considered predominant in the State* :—Landlords, tenants, agriculturists, grain and pulse dealers, tenants unspecified, general labourers, and field labourers.

NOTE ON THE CENSUS

OF THE

BARWANI STATE.

I. *Description of the State.*—The State of Barwani is situated in the Political Charge of Bhopawar. It is surrounded on all sides by other States of Central India. It has a total area of 1,178 square miles which may be compared to Chester (1,116). The only natural division in it is the Hilly. The total population is 76,136.

II. *Historical.*—The Ranas of Barwani are Sisodias and connected with the Udaipur family. Though the family lost most of its possessions during the Maratha invasion in the XIV century it never became tributary to any Malwa chief. The present Chief is a minor and succeeded in 1894. The State has practically been under administration since 1894.

III. *Administrative Divisions.*—For administrative purposes the State is divided into 6 *Perganas*. The largest has an area of 340 square miles, the smallest is Barwani with an area of 85 square miles.

IV. *Distribution of the people* :—

(1). *Mean Density.*—The mean density of the State is 65 people per square mile, which low figure agrees well with its physical constitution, of only Hilly tract.

(2). *Town and Village.*—There are only 1 town and 332 villages in the State. The population of the only town is 6,277 and the average village population is 210. The village group chiefly met with is that of "under 500."

V. *Religions.*—The character of the State is Hindu. The population consists of 50 per cent. Hindus, 5 per cent. Mahomedans and 43 per cent. Animists. The urban figures shew 67 per cent. Hindus, 24 per cent. Mahomedans, and 7 per cent. Animists.

VI. *Age, Sex and Civil Condition* :—

(1) *Proportion of the sexes.*—There are 983 females to 1,000 males in the whole State. In towns there are 1,072 and in villages 976. Females are in defect but as in other cases the difference is much less than that at other enumerations. (2) *Civil Condition.*—There is nothing special to note in the figures in this case.

VII. *Education.*—There are 2,160 literate males or 6 per cent. and 36 literate females or 1 per cent. in the state of all ages. The urban figures shew 714 or 11 per cent. and the rural 1,482 or 2 per cent. The means of education in the State are 1 English School up to VII standard, 19 Hindi Schools, 8 Urdu Schools, and 5 Rote Schools.

VIII. *Languages.*—The dialects which are most talked in this State are :—Nimari, Marwadi, Gujarathi, Marathi and Rathvi (a Bhili dialect).

IX. *Castes.*—The castes which seem to be most prevalent are Ahir, Bania, Brahman, Koli, Kunbi, Kachhi, Mankar, Rajput, Sirvi, Tadvī, Bhil, Bhilala, Bharud and Shaikh.

X. *Occupations which may be considered predominant in the State* :—Milk and butter sellers, Fuel sellers and grass cutters, Watchmen and other village servants, Tenants unspecified, Grain dealers, Beggars and Fishermen.

NOTE ON THE CENSUS OF THE DATIA STATE.

I. *Description of the State.*—The State of Datia is situated in the Political Charge of Bundelkhand. It is surrounded on all sides, except on the east where it meets the United Provinces of Agra and Oudh, by other states of Central India. It has a total area of 912 square miles which may be compared to that of Berkshire (897). The only natural division in it is the Low-lying. The total population is 173,759.

II. *Historical.*—One of the three treaty states of Bundelkhand, the other two are Orchha and Samthar. The Maharajas of this State are of the Orchha family. Datia came under the British Government after the treaty of Bassein (1802). The present Chief succeeded in 1857.

III. *Administrative divisions.*—For administrative purposes the State is divided into five *perganas*. The area of the *perganas* is not known.

IV. *Distribution of the people:*—

(1) *Mean density.*—The mean density of the State is 190 people per square mile. It has fallen by 13 per square mile since 1891. (2) *Town and village.*—There are 3 towns in Datia and 455 villages. The average town population is 11,352, the average village 308. The villages are mostly of the "under 500" class.

V. *Religions.*—The character of the state is Hindu. The population consists of 95 per cent. Hindus, 4.08 per cent. Mahomedans, .0005 per cent. Animists. The Urban figures shew 82.6 of Hindus 17.3 of Mahomedans and rest insignificant.

VI. *Age, Sex and Civil Condition:*—

(1) *Proportion of the sexes.*—There are 923 females to 1,000 males in the whole State. In towns there are 960 and in villages 912. There is a defect of females, but as in other cases less than in 1881 or 1891. (2) *Civil Condition.*—There are 864 wives to 1,000 husbands in the State, in rural 951. There is nothing in particular to comment on here.

VII. *Education.*—There are 3,506 or 3.8 per cent. of literate males and 102 or 1 per cent. of literate females in the State of all ages. The Urban figures shew 10 per cent. for males and 3 per cent. for females, the Rural 2.3 per cent. for males and 0.07 per cent. for females. The means of education in the State are 5 Vernacular schools, one school teaching Persian up to first class, one School teaching up to Middle, and a High School teaching English up to Entrance Standard.

VIII. *Languages.*—The tongues which are most talked in this state are Bundelkhandi, Hindi and Urdu. There are no dialects peculiar to the state.

IX. *Castes.*—The castes which seem to be most prevalent and peculiar are Dharni, Jasondi, Jangada, Kamarya, Kasera, Dahayat, Bunkar, Barar, Sanjogi and Chamar.

X. *Occupations predominating in the State.*—Weavers, Singers, Actors, etc., Betel growers and sellers, Baskets, mats, etc., makers and sellers, Paper makers, Workers in iron, Cotton spinners, Knife grinders and Toolers.

NOTE ON THE CENSUS OF THE CHARKHARI STATE.

I. *Description of the State.*—The State of Charkhari is situated in the Bundelkhand Political Charge. It is surrounded on all sides, except near Charkhari town where it meets the United Provinces of Agra and Oudh, by other States of Central India.

It has a total area of 703 square miles. The Low-lying natural division only is represented. The total population is 123,954.

II. *Historical.*—Founded by Bije Bahadur—a *sanad* was granted him in 1804 and another in 1811.

In 1857 Raja Ratan Singh received an hereditary salute of 11 guns, a *khilat* and a perpetual Jagir of Rs. 20,000 a year in recognition of his services during the Mutiny. The present chief succeeded in 1880.

III. *Administrative divisions.*—There are four *tehsils* in the State. Their individual area is unknown.

IV. *Distribution of the people:*—

- (1). *Mean density.*—The mean density of the State is 176 persons per square mile.
- (2). *Town and village.*—There are one town and 504 villages in the State. The population of the only town is 11,718, the average village 222. The town falls in the group "10,000—20,000" the villages chiefly in the "under 500."

V. *Religions.*—The character of the State is Hindu. The population consists of 95 per cent. Hindus, 3.9 per cent. Mahomedans and 0.62 per cent. Animists. The Urban figures shew 77 per cent. of Hindus and 23 per cent. of Mahomedans.

VI. *Age, Sex and Civil Condition:*—

- (1) *Proportion of the sexes.*—There are 974 females to 1,000 males in the whole State. In towns there are 1,032 and in villages 969. There is a defect of 1,500 females on the total population.
- (2) *Civil Condition.*—There are 103 wives to every 100 husbands in the whole State. Urban area shews 113 wives to 100 husbands; Rural area 102. There is nothing special to note as regards Civil Condition and Age.

VII. *Education.*—There are 1,634 or 2.6 per cent. literate males and 66 or 0.1 per cent. literate females in the State of all ages. The Urban figures shew 9 per cent. males and 0.9 per cent. females, the Rural 1.8 per cent. males and 0.03 per cent. females. Female figures are high except at "20 and over" The means of education in the State are one High School teaching English up to Entrance Standard, one Girls' School and 3 Vernacular Schools, teaching Hindi.

VIII. *Languages.*—The dialects which are most talked in this State are Bundelkhandi, Banaphari in Bawan-Chaurasi and Satwara *Perganas*, Khatola in Bawan-Chaurasi and Isanagar, Rathori in Bawan-Chaurasi.

IX. *Castes.*—The castes which seem to be most prevalent and peculiar are Jasondi, Kondar, Kurmi, Kachhi, Sor and Chamar.

X. *Occupations predominant in the State.*—Weavers, Betel growers and sellers Baskets, Mats, etc., makers and sellers; Paper makers, Workers in iron, Knife and tool grinders and Cotton spinners.

NOTE ON THE CENSUS OF THE CHHATARPUR STATE.

I. *Description of the State.*—The State of Chhatarpur is situated in the Bundelkhand Political Charge. It is surrounded on all sides, except on the north where it meets the United Provinces of Agra and Oudh, by other states of Central India. It has a total area of 1,118 square miles including Nowgong Cantonment and Bilehri. The natural divisions are Low-lying and Hilly tracts. The total population is 156,139.

II. *Historical.*—The State was guaranteed to Kunwar Suni Singh in 1806. In 1854 the State, which would have lapsed to the British Government for want of direct heirs, was conferred on Jagat Raj as a special act of grace. The present Raja succeeded in 1867.

III. *Administrative divisions.*—There are four *tehsils* in the state. The individual areas are not known.

IV. *Distribution of the people:*—

(1) *Mean density.*—The mean density of the State is 140 persons per square mile, which is high compared with Plateau States. The natural divisions shew 131 per square mile in the Low-lying and 314 in the Hilly which last is rather curious. The density has fallen by 15 per cent. since 1891. (2) *Town and village.*—There are one town and 421 villages in the State. The population of the only town is 10,029, of the average village 347. The groups of town and village met with are 10,000—20,000 for towns and “under 500” for villages.

V. *Religions.*—The State is essentially Hindu in character. There are 148,343 or 95 per cent. Hindus, 1,651 or 1 per cent. Animists and 5,379 or 3·5 per cent. Mahomedans in the State. The Urban figures shew 8,376, or 83·5 per cent. Hindus and 1,540 or 15·3 per cent. Mahomedans. The natural divisions shew Low-lying, 90 per cent. Hindus 3 per cent. Muhomedans and rest insignificant. Hilly tracts shew 5 per cent. Hindus, 0·5 Mahomedans.

VI. *Age, Sex and Civil Condition:*—

(1) *Proportion of the Sexes.*—There are 935 females to 1,000 males in the State. In the Urban area the ratio is 1,164, in the Rural 975. The natural divisions shew 938 in Low-lying and 900 in Hilly country. (2) *Civil Condition:*—There is as usual nothing special to remark on in the figures we find here. There are 970 wives to 1,000 husbands. The Urban and Rural figures shew 126 wives to 100 husbands in towns. The natural division figures show 96 wives to 100 husbands in Low-lying and 103 in Hilly tracts.

VII. *Education.*—There are 2,388 literate males or 3 per cent. in the State and 115 or 0·1 per cent. literate females of all ages. The Urban return shews 519 males and 32 females or 11·2 per cent. males, 0·6 per cent. females, the Rural 1,869 males or 2·4 per cent. and 83 females or 0·1 per cent. In the natural divisions we find 1·7 per cent. literate in Low-lying and 1·6 per cent. in Hilly tracts. The means of education in the State are 17 Lower Primary Schools, 2 Upper Primary Schools teaching Hindi, 2 Girls' Schools and one High School teaching English up to Entrance.

VIII. *Languages.*—Certain dialects are spoken by large numbers in the State, the chief one is of course Bundelkhandi, next comes Banaphari spoken in Laundi *pergana* and Khatola in Deora *pergana*.

IX. *Castes.*—The castes which predominate and are peculiar in this State are Dangi, Jasondhi, Jangda, Kondar, Sor, Kurmi, Kachhi and Chamar.

X. The occupations which may be considered as peculiar to the State are : Weavers, Workers in iron, Cotton spinners and Diamond miners.

NOTE ON THE CENSUS OF THE DEWAS STATE.

I. *Description*.—The two States of Dewas form the greater part of the Indore Agency. Their territory lies chiefly round the town of Dewas. The area of the Senior Branch is 402 square miles and of the Junior Branch 440 square miles. The total population of the Senior Branch is 62,312, of the Junior 54,904. The whole of each State has been included in the Plateau, though perhaps strictly speaking Bagod should have been classed as Hilly.

II. *Historical*.—The rulers of Dewas are Ponwar Marathas. They are equal in power, rank and authority. The territory is shared between the two States. The town of Dewas is also divided between them. The States were founded by two brothers, Tukaji and Jiwaji who came into Malwa with the Peshwa Baji Rao. The present chief of the Senior Branch is a minor. The chief of the Junior Branch succeeded in 1892.

III. *Administrative divisions*.—The Senior Branch territory is divided into four *perganas*, the largest having an area of 176 square miles, the smallest of 31. The Junior Branch has 6 *perganas* the largest Dewas *Khasgi* and *pergana* having an area of 206 square miles.

IV. *Distribution of the People*:—

(1). *The Mean density*.—The mean density of the Senior Branch is 155 persons per square mile, that of the Junior Branch 122. There has been a fall of 50 persons in the density of the Senior and of 37 in the case of the Junior, since 1891.

(2). *Town and village*.—There are two towns, Dewas and Sarangpur which are shared by the two States. Dewas has an area of 0.53 square mile and a population of 15,403. There are 238 villages in the Senior and 237 in the Junior Branch. The average village population of the Senior Branch is 260 and of the Junior 230. The commonest village group is that of "under 500" in both states.

V. *Religions*.—The characteristic of both States is Hindu, each having about 85 per cent. of them. The Senior Branch has 85 per cent. Hindus, 1 per cent. Animists, 1 per cent. Jains, 11 per cent. Mahomedans. The Junior Branch has 85 per cent. Hindus, 3 per cent. Animists, 1 per cent. Jains, 9 per cent. Mahomedans.

VI. *Age, Sex and Civil Condition*:—

(1) *Proportion of the Sexes*.—There are 938 females to 1,000 males in the Senior Branch and 960 in the Junior. As in other cases the difference between men and women is less than in 1891. There is a defect of 2,000 women in the Senior and of 1,116 in the Junior Branch. These figures also show a smaller difference than in 1891.

(2) *Civil Condition*.—It is interesting to note the difference in the number of married females in the two States. There are 3 per cent. more girls between 0-10 married in the Junior than in the Senior Branch. A similar difference is kept up at the other ages. There are 101 wives to 100 husbands in the Senior, and 99 in the Junior Branch. The Jains of the Junior Branch seem especially addicted to matrimony.

VII. *Education*.—Taking all ages there are 7 per cent. males, 0.9 per cent. females literate in the Senior Branch and 8 per cent. and 3 per cent. respectively in the Junior Branch. All the females of the Junior Branch seem to go in for education considerably at all ages. The means of education in the Dewas town is a High School teaching up to Entrance Standard, also Marathi, Hindi and Urdu schools up to Vth Standard. The two branches combined have the above English School in common. There are also Hindi, Marathi and Urdu Schools up to IVth Standard in the *perganas* of the States.

VIII. *Languages*.—The languages and dialects prevailing in these two States are Hindi, Rangri, Marathi, and Malwi.

IX. *Castes*.—The Castes peculiar to the two States are Makwana, Ramoshi, Sirvi. The most prevalent castes in the two States are:—Balai, Bania, Chamar, Brahman, Chattri, Rajput, Gujar, Khati, Kunbi, Mali and Sondhia.

X. *Occupations*.—The Occupations chiefly followed are those of agriculturists, grain dealers, labouring people, etc.

NOTE ON THE CENSUS OF THE JAORA STATE.

I. *Description*.—The State of Jaora lies in the Malwa Agency. It has an area of 568 square miles, Urban 142, Rural 566.58. Its total population is 84,202. It is all on the Plateau.

II. *Historical*.—The rulers of Jaora are Mahomedans, the founder being Ghafur Khan, the brother-in-law of the famous Amir Khan. The State was confirmed by the British Government in 1818 by the 12th Article of the treaty of Mandsaur. In 1862 a special *sanad* was granted. The present chief, who is a minor, succeeded in 1895.

III. *Administrative divisions*.—For administrative purposes the State is divided into 7 *tehsils*. The largest is that of Jaora-cum-Nawabganj, with an area of 213 square miles.

IV. *Distribution of the people*.—

(1). *Mean density*.—The mean density of the State is 148 persons per square mile. The Rural density is 98. (2). *Town and village*.—There are two towns in Jaora, and 337 villages. The average town population is 1,464, the average village 164. Most villages fall in the "under 500" group.

V. *Religions*.—The State though under Mahomedan rule is essentially Hindu in character, some 74 per cent. of the population being of this religion. The Mahomedans reach 19 per cent. ; in Bhopal they reach only 12 per cent. In the Urban area the Mahomedan population reaches 44 per cent. which shows the influence of the ruling class. Mahomedans too have increased by 6 per cent. since 1891.

VI. *Age, Sex and Civil Condition*.—

(1).—*Proportion of the sexes*.—There are 972 females to every 1,000 males in the State. In the Urban area there are 1,007, in the Rural 955. There is a defect of females, but the defect is less than in 1891. (2). *Civil Condition*.—There is nothing much to note. Infant female marriage is 8 per cent. higher than in Ratlam between the ages of 0-10. There are 102 wives to 100 husbands.

VII. *Education*.—There are 8 per cent. of literate males and 0.2 per cent. females. *Means of Education*.—One High School teaching English, 9 Schools teaching Vernaculars.

VIII. *Languages*.—The dialects predominating in Jaora are Malwi which is spoken by two-thirds of the State and Urdu which is common in the towns.

IX. *Castes*.—The castes peculiar to the State are Ganchi, Kotwal and Jain-Brahman.

X. *Occupations*.—The peculiar occupations are leather dying, embroidery on shoes, silk weaving, and sack making.

NOTE ON THE CENSUS OF THE RATLAM STATE.

I. *Description*.—The State of Ratlam lies in the Malwa Political Charge. Its territory is, however, much cut up by portions of other states. It has an area of 902 square miles, and a population of 83,773. The whole of the State lies on the Plateau land.

II. *Historical*.—The Ratlam family is descended from the Jodhpur Rathors. The Chiefship was founded in 1819, when a *Sanad* was granted to Partab Singh by Sir John Malcolm. It is tributary to Gwalior. The present chief succeeded in 1893.

III. *Administrative*.—Ratlam is divided into 3 *Tehsils*. The town of Ratlam, which owing to the opening of the railway has become an important place, has been treated as a City.

IV. *Distribution of the People*:—

(1) *Mean density*.—The mean density of the State is 93 persons per square mile. The city has a density of 29,146 per square mile while the rural area shews 54. (2) *Town and Village*.—There is only one town in the State that of Ratlam. There are 206 villages. The average village population is 236 persons. Most of the villages are of "under 500" people.

V. *Religions*.—The State is Hindu in character 62 per cent. of the population being of this religion, and 17 per cent. Animists, while 7 per cent. are Jains. In Ratlam city 14 per cent. of the population is Jain, this place being the stronghold of the Jain religion in Central India. The community contains 649 of the Digambari sect, 2,065 of the Swetambari and 2,185 of the Dhundia.

VI. *Age, Sex and Civil Condition*:—

(1) *Proportion of the Sexes*.—There are 986 women to 1,000 men. In the city there are rather fewer females as is only natural. There is a defect of females in all parts of the State, but the difference is much less than in former Censuses. The total population of the State has fallen but that of the city has risen. (2) *Civil Condition*.—There is nothing special to note in these figures.

There are 96 wives to 100 husbands in the State as a whole, in the city 95. Men come to the city on business leaving their wives behind which accounts for the lower ratio. The Jains shew most wives.

VII. *Education*.—There are 6,030 males or 14 per cent. literate in the State and 485 females or 1 per cent. In the city there are 26 per cent. males and 2 per cent. females literate. *Means of education*. (1) Ratlam Central College teaching up to University Entrance, where English, Hindi, Urdu, Marathi are taught. (2). Three Anglo-Vernacular schools. This includes mission schools. English is taught up to 3rd. Standard. (3) *Vernacular Schools*, Ratlam Boys Orphanage school, Hindi branch school, two Urdu branch schools. 6 Hindi Girls' schools. All teach elementary subjects only. The Urdu school teaches the Kuran. Thirteen boys' Hindi elementary schools, two for girls, two Urdu religious schools, 21 Hindi and Sanskrit schools, 21 Arabic and Urdu for religious and elementary teaching. In all 69 vernacular schools and one college and 3 schools teaching English.

VIII. *Languages*.—The dialects peculiar to Ratlam are Rangri, which two-thirds of the population speak, others are Dungri and Malwi.

IX. *Castes*.—The only caste peculiar to Ratlam is Ganchi.

X. *Occupation*.—Occupations which seem peculiar are gum selling, making and selling of snuff, making of pots for *ghi*, and manufacture of ploughs and other agricultural implements.

Special information collected at the Census.

This state added certain special columns and collected the information given below.

No. of ploughs,	CATTLE,							No. of Bullock carts,	IRRIGATION.		REMARKS.
	Plough.	Pack.							Wells.	Tanks.	
		3	4	5	6	7	8

NOTE ON THE EFFECT OF FAMINE.

Owing to the fact that all *pergana* figures were destroyed after the Census of 1891, I have been unable to go into this question in the way I could have wished. I have, however, been able to obtain returns from some Darbars of certain *perganas* and from these a few subsidiary tables have been made out.

I think the results shew clearly, even allowing for the probable exaggeration of the 1891 figures, that famine has had a very serious effect on the country. This is especially noticeable in the *perganas* of Sawyer and Bhanpura which are both situated on the Malwa Plateau.

The *perganas* I have been able to use for the purpose of this note are Sawyer which practically escaped all famine, Bhanpura which suffered severely and for a long period, and Sohagpur in Riwa, which did not feel the effects of scarcity until June 1900. Sawyer is a *pergana* in the Indore *Zillah* of Indore state and lies north-east of Indore city. Bhanpura is also a *pergana* of Indore state but lies in the Malwa Political Charge on its northern border, close to Jhalrapatan. Sohagpur is situated in the south-east of Baghelkhand. Speaking of Bhanpura the famine report says "great scarcity commenced in the Nimach, Rampura and Bhanpura Districts in September 1899, and soon developed into a severe famine."

Of Sohagpur the report says, that it was not affected in 1897-98 when other parts of Baghelkhand suffered but "on the present occasion (1900) these districts Ramnagar and Sohagpur are more seriously affected than any other part of the state" (Riwa).

In January 1900, there was no famine at all and very little distress even, in Sohagpur, but in June emigration began to take place into Mandla, and it became apparent that famine was imminent. The Mahua crop failed and the people were left without any means of support.

It is thus seen that the famine here began some eight months after it did in Bhanpura.

Detailed reports can be found in the famine report and it is of course outside the scope of this note to discuss famine questions. There being no emigration returns for *perganas* in 1891, I am unable to contrast the two Census years in this respect.

Density :—

The variation in density that has taken place is most marked. Sawyer has increased by 11 people to the square mile while Sohagpur and Bhanpura have both lost, the last considerably. 199—II.

Distribution :—

Here the same contrast is apparent. Sawyer stands first then Sohagpur and lastly Bhanpura. 200—III.

The variation since 1891 shews that Sawyer has added 19 people per village while Bhanpura has lost 250, a high figure. Sohagpur has no return for 1891.

Houses :—

200—IV.

Bhanpura shews a loss of 9 houses per square mile while in Sawer the number is practically the same.

Ages :—

200—V.

Taking the total for 0—5 we see that Bhanpura is far behind, Sohagpur comes first in this case. It is interesting to note that, where there has been a great fall through famine, the proportion of the sexes under five is nearly equal, while in Sawer which was unaffected the girls are in excess of 16 per 1,000 and in Sohagpur of 10 per 1,000.

It is notorious that girls in this country are allowed to die of sickness when a boy would be carefully nursed, and I can only suppose that this neglect of female infants was accentuated by the conditions obtaining during a famine season.

Taking the separate years up to five and considering the male figures, which are the most reliable, we see that the lowest figure is shewn by Sawer in 1898, and in the case of Sohagpur and Bhanpura in 1899 and 1898. Now children of 0—1 were procreated in 1898-99 which was a bad season and lowered the normal fecundity considerably. If we look at children of 4 years we see that Bhanpura stands first and that ratios are generally higher though Sohagpur shews a low figure.

200—VI.

Proportion of the sexes.—It must be recollected that female returns are always more inaccurate than male.

I have no figures for 1891 except for Sohagpur.

Bhanpura stands, it will be seen, last with 19 women less than Sawer while Sohagpur and Sawer shew almost the same figure.

By age periods we find taking 0—5 that Sawer comes first with some 1,200 women to 1,000 men, then Sohagpur with about 1,100 and lastly Bhanpura with about 970.

All these *perganas* shew a defect of females, Bhanpura far the greatest defect and Sanwer the least.

It is not possible, as I have said, to make a more detailed examination, but I think the figures collected here give some idea of the ravages a famine and the sickness attendant on it can produce.

It is a pity that no regular record of the castes attending famine works, etc., was made. Such information as was available is given in the table at the end of this section.

A proper record should give a good gauge of the depth to which distress has penetrated into the community and the social *Stratum* to which it has reached. It is to be hoped this will be done on a future occasion. Some form, such as that given in the Subsidiary Table, might be used. It was drawn up for use by the Indore State, but there has been fortunately no regular famine, and I fancy the form has not been tried.

197—α.

The return will be not only interesting as regards social conditions but will give information that should prove useful in future famines. The form has been devised so as to suit either works or poor houses, and can be bound up in books of 100. Vernacular forms would usually be employed.

Castes on famine relief:—

200—VI.

201—VI.

So far as I was able to get information I have done so. There was however no systematic return of castes kept and the data I have to go on are most meagre. From the attached table however it will be seen that both in February and June, the two months selected practically only low castes were relieved.

The June return however shews a greater number of the better classes such as Bhat, Jat and Kunbi.

It is not possible for me to say definitely from the data I have whether the prejudice against entering poor houses has become weaker or not. If, however, some such regular record is made, as I have suggested above, the question will easily be decided.

The general result shews that the castes below came on relief at the time mentioned.

*Admitted in February but declined
or disappeared in June.*

OVERCROWDING IN THE *Bazaar* OF THE AGENT TO THE
GOVERNOR-GENERAL'S CAMP, INDROE.

This note has been prepared rather as a model for the use of any *Darbar* who may wish to inquire into the conditions in their large towns than as a special report on the *Bazaar*.

Some idea of the amount of congestion in the wards of a town might in times of epidemic be of great use to those who were concerned in combating it. The test of overcrowding and insanitariness in any area, or block of buildings, appears to depend less on the number of people per unit of area than on the number of cubic feet of house-room which each individual has.

"The number of rooms occupied by each family is of much greater importance in relation to health than the number of persons living on a given area. Given houses properly constructed and drained, and given cleanly habits on the part of the tenants, increased aggregation of population over given area has no influence in raising the death-rate except in so far as it is accompanied by overcrowding in individual rooms." [*Newsholme's "Vital Statistics"*.]

"In other words there is no casual relationship between density of population *per se* and a high mortality. The true test of density is the number of persons in each occupied room." [*Newsholme's "Vital Statistics."*]

The data needed for an investigation such as this are—

- [1]. The area under consideration, less street area, and that of large open spaces which would abnormally lower the rate.
- [2]. The number of houses.
- [3]. The class of house, *i. e.*, number of stories in each house.
- [4]. The number of families per house.
- [5]. The number of persons per family.
- [6]. The number of rooms per house.

This will give all that is likely to be required. The birth and death-rate, if known, should also be employed in the examination.

The connection between density and mortality has been thus expressed by Dr. Farr:—

If d and d' represent the densities of any two places, and m and m' the rate of mortality, then

$$\frac{m}{m'} = \sqrt[3]{\frac{d}{d'}} \quad \text{or} \quad m:m' :: \sqrt[3]{d}:\sqrt[3]{d'}$$

This formula, as also the remarks quoted above, refer of course to European conditions.

More detailed information on this subject will be found in [*Newsholme's "Vital Statistics."*]

The *Bazaar* is divided into five *Mahallas* Parsi, Kalali, Kauria Gunj, Murai, and Gwaltoli. The smallest and poorest is that of Gwaltoli. The survey was made specially for this report, the street area being excluded.

Report :—

The tables explain themselves and require no special comment.

In summing up, a standard has to be taken. The one I have employed is that used in the Paris report of 1896, and is suited to European conditions. Possibly a less generous allowance of cubic feet might be made in this country.

Standards :—

- | | |
|-------------------------------|--|
| Overcrowded..... | Less than half a room per person. |
| With insufficient space | Less than one room but more than half a room per head. |
| With enough space..... | One room per head. |
| With ample space..... | More than one room but less than two per head. |

With very ample space.....Two rooms or more per head.

As judged by these standards 85% of the bazaar is overcrowded, while 12% have too little room.

The worst conditions obtain in Parsi *Mohalla* and the best in Murai *Mohalla*.

The other tables will give detailed information as to the distribution of families and persons.

TABLE I.

o Mileage 284.3779 Railway Houses included chonkias.

+ In the Imperial Table I, 41 hamlets were taken as villages and hence the reduction in the total number of villages by 41.

THE CASTES AND SUB-CASTES IN THE SCHEDULES
AT THE CENTRAL INDIA CENSUS.

The British India Schedule was adopted in Central India for the first time in 1901 and contained particulars regarding Caste, Tribe and Race and their sub-divisions in Column 4. Clear instructions were issued to Enumerators to record in this Column first Caste, Tribe or Race, etc., and below it, the Sub-caste or equivalent to it, returned by the person enumerated.

The figures regarding Sub-caste or Sub-tribe have been tabulated and the records preserved, but details of the strength are very unreliable and I have not thought it worth while to publish them in the Provincial Part, where, however, an Index, shewing each sub-division of Hindu Castes and Animist Tribes is recorded with the Political Charge whence it was returned.

In preparing the Index, I have retained all sub-castes etc., exactly as returned in the Schedule and have not attempted to combine synonyms. This will be done in the Ethnographic Survey when we shall be in a better position for judging as to how this list of the Castes and sub-castes should be adjusted.

The preparation of the Index has been a work of very considerable labour and expense and only professes to give the information returned in the Schedule.

The figures opposite the name of each sub-caste or sub-tribe denote the Political Charge in which the sub-caste or sub-tribe was found.

The following is the interpretation of them:—

Gwalior Residency	1	Bhopawar Agency	5
Indore Residency	2	Bundelkhand Agency	6
Baghelkhand Agency	3	Indore Agency	7
Bhopal Agency	4	Malwa Agency	8

I give two examples:—

Agaria 3,665.

Indabar	3
Markam	3

The entry "Indabar 3" means that sub-caste was found in Baghelkhand Political Charge.

Most of the sub-castes against which 1 is given are found in the Gwalior State. The particular tract, whence they were returned, can be obtained from the records preserved in the Gwalior State Census Office. They were unfortunately not recorded originally and there was no time to re-arrange the list.

THE HISTORY OF THE UNITED STATES

OF AMERICA

The first of these is the fact that the United States is a young nation, and that its history is a history of growth and development. It is a history of a people who have been able to overcome many difficulties and to build a great nation out of a small colony.

The second of these is the fact that the United States is a nation of immigrants. It is a nation of people who have come from many different parts of the world, and who have brought with them their own customs and traditions. This has made the United States a very diverse and interesting nation.

The third of these is the fact that the United States is a nation of pioneers. It is a nation of people who have been able to overcome many difficulties and to build a great nation out of a small colony. This has made the United States a very interesting and inspiring nation.

The fourth of these is the fact that the United States is a nation of freedom. It is a nation of people who have been able to overcome many difficulties and to build a great nation out of a small colony. This has made the United States a very interesting and inspiring nation.

The fifth of these is the fact that the United States is a nation of progress. It is a nation of people who have been able to overcome many difficulties and to build a great nation out of a small colony. This has made the United States a very interesting and inspiring nation.

The sixth of these is the fact that the United States is a nation of peace. It is a nation of people who have been able to overcome many difficulties and to build a great nation out of a small colony. This has made the United States a very interesting and inspiring nation.

The seventh of these is the fact that the United States is a nation of justice. It is a nation of people who have been able to overcome many difficulties and to build a great nation out of a small colony. This has made the United States a very interesting and inspiring nation.

The eighth of these is the fact that the United States is a nation of love. It is a nation of people who have been able to overcome many difficulties and to build a great nation out of a small colony. This has made the United States a very interesting and inspiring nation.

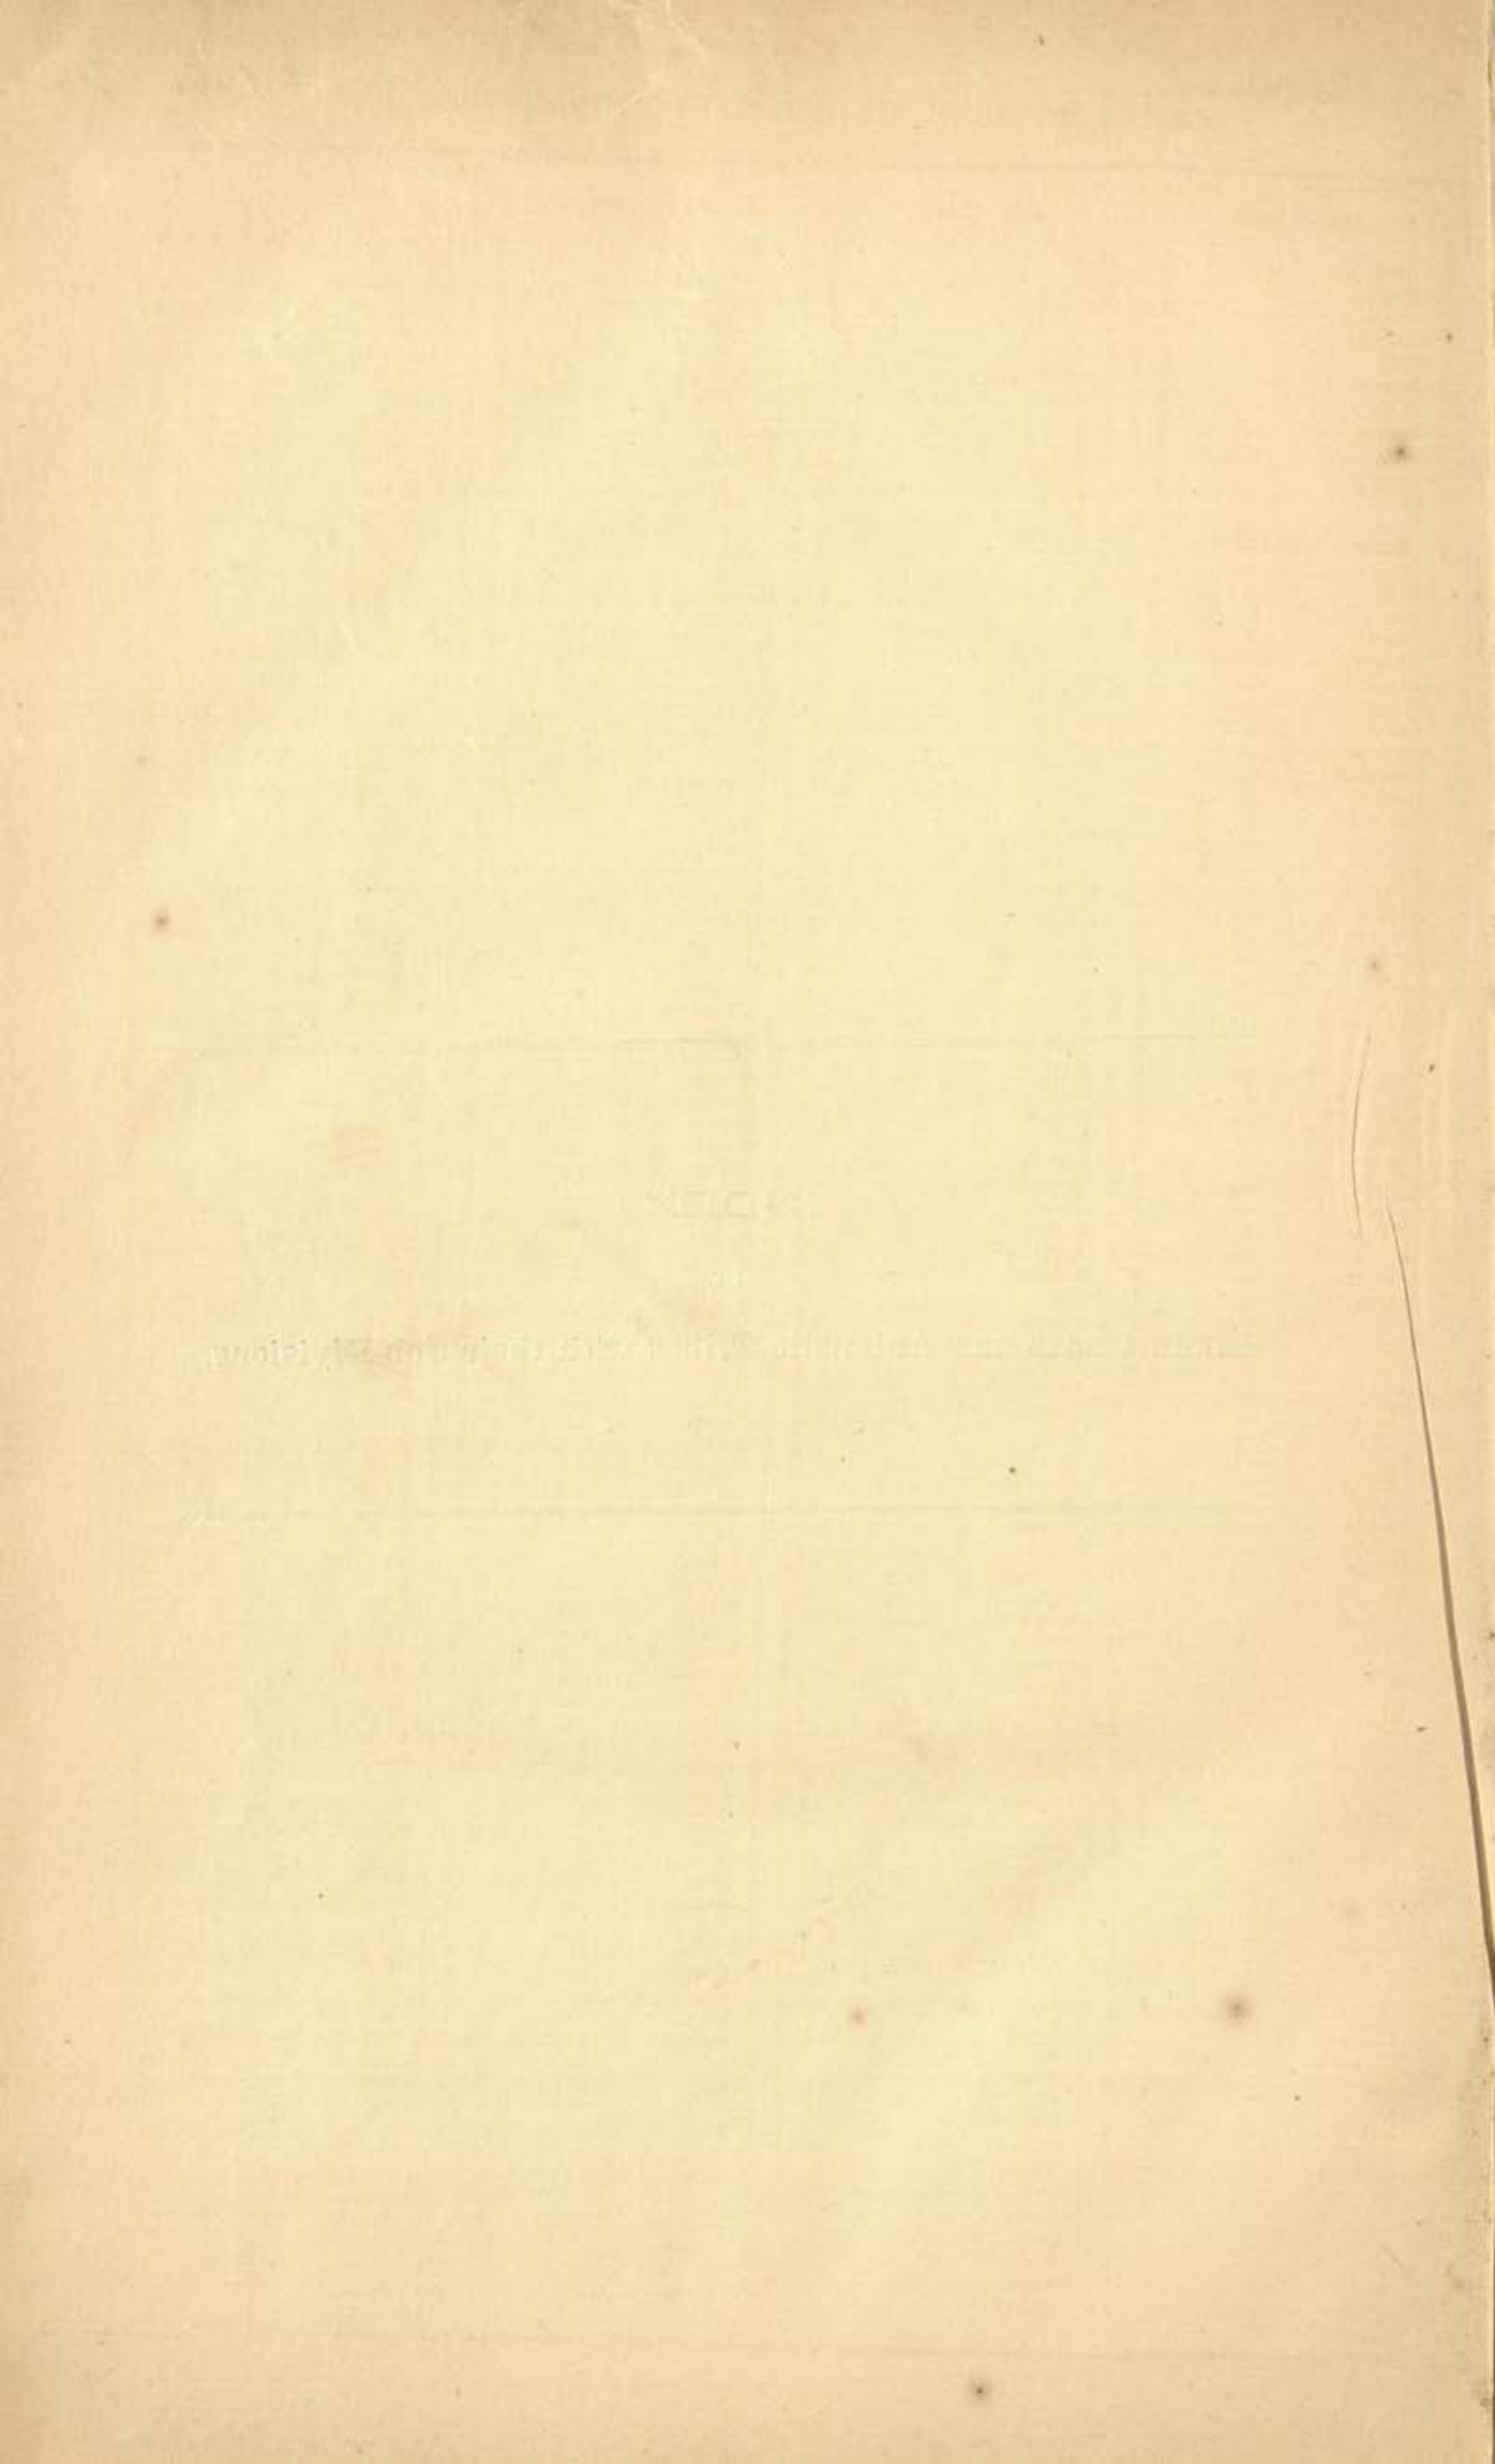

The ninth of these is the fact that the United States is a nation of hope. It is a nation of people who have been able to overcome many difficulties and to build a great nation out of a small colony. This has made the United States a very interesting and inspiring nation.

The tenth of these is the fact that the United States is a nation of faith. It is a nation of people who have been able to overcome many difficulties and to build a great nation out of a small colony. This has made the United States a very interesting and inspiring nation.
