Introduction ......................................... xxxi

PART I

THE BUDDHIST SAHAJIYĀ CULT

CHAPTER I

Growth of the Buddhist Sahajiya Cult

(i) General Information About the Available Literature ........................................ 3-9

[Earliest literature in Bengali—the Caryā-padas—linguistic character of the songs, essentially Bengali—the Dohās are composed in Western Apabhramśa—reasons for the linguistic anomaly—time of composition of the songs.]

(ii) History of Buddhism in Bengal ............. 9-14

[The study of Sahajiya Buddhism in Bengal—necessity for the study of the history of Buddhism in Bengal—little trace of Buddhism in Bengal before the Gupta period—Buddhism in Bengal of the Gupta period—evidence of the foreign pilgrims—the epigraphical records—Buddhism of the Pāla period.]

(iii) Origin and Development of Tāntric Buddhism ........................................ 14-26

[Mahāyāna as contrasted with Hīnayāna—the quarrel between the elders and the liberals—ideal of Arhathood replaced by that of Bodhisattvahood—the element of Karuṇā—the theory of the three Kāyas or bodies—predominance of philosophical thought and culture of the Pāramitās—degenera-
tion by too much popularisation—rise of Tāntric Buddhism—Mantra-naya or Mantra-yāna—tradition about the introduction of Tāntricism in Buddhism—evidence from the Mahāyāna-sūtrālāṃkāra—Dr. B. Bhaṭṭacārya’s view on the introduction of Tāntricism in Buddhism untenable—the introduction of the Mantra-element—Mudrā, Maṇḍala—rise of Vajra-yāna from Mantra-yāna—Kālacakrayāna.]

(iv) Mode of Transformation of the Main Ideas of Mahāyāna to those of Tāntric Buddhism ...
[Transformation of the idea of Śūnyatā into that of Vajra—Vajra-sattva—Bodhi-citta—Śūnyatā and Karuṇā as Prajñā and Upāya—Prajñā and Upāya as the female and the male, the left and the right, the moon and the sun—Advaya and Yugasaddha—Advaya and Samārasa—evolution of the idea of Mahā-sukha—positive attributes of Nirvāṇa in popular literature—idea of Nirvāṇa-dhātu—idea of Mahā-sukha in Tāntric Buddhism.]

CHAPTER II
THE GENERAL PHILOSOPHICAL STANDPOINT OF THE CARYĀ-PADAS ...
[Caryā songs represent a mixture of the Mādhya-mika, Vijñānavādic and Vedāntic thoughts—the dominant note of idealism—idealism explained under various poetic imageries—idealism illustrated—the theory of the four Śūnyas—Śūnya—Atiśūnya—Mahā-śūnya—Sarva-śūnya—the theory of the Śūnyas explained in the Caryās under various imageries.]

CHAPTER III
THE GENERAL RELIGIOUS OUTLOOK OF THE SAHAJIYĀS
(i) Salient Features of the Religion Preached in the Buddhist Dohās and Songs: ...

51-77
(A) The Spirit of Protest and Criticism ...
[Sahaja-path the most natural path—and at the same time the easiest path.]

(B) Aversion to recondite scholarship ...

(C) Scathing Criticism of the Formalities of Life and Religion (and similar spirit found in the Jaina Dohās) ...

(D) Possible Sources of the Spirit of Criticism of the Sahajiyās ...
[The spirit of the Āraṇyakas and the Upaniṣads—evolution of the conception of Brahman and the stress on Brahma-realisation—Karma-kāṇḍa made subservient to Brahma-knowledge—stress on the subjective side of religion—post-Upaniṣadic spirit of the epics, particularly of the Mahābhārata—the spirit of Vedānta—antagonism towards Pūrva-mīmāṃsā—Brahma-jījñāsā does not presuppose Dharma-jījñāsā—no activity is involved in true religion—Brahma-knowledge is no action or the product of any action—the spirit of Vaiṣṇavism—question of divine mercy, a break in the law of Karma—unconditional self-resignation—the ideal of passionate love—idealism of Yoga and the stress on the subjective side—heterodoxy of the Tantras—heterodoxy of the early atheistic schools—the Cārvāk school—ruthless anti-religious criticism—schools that are atheists but not anti-religious—Jainism and Buddhism—the religious perspective of Jainism—the perspective of Buddhism—strong criticism against Brahminism—monastic orthodoxy and the revolt of the Mahāyānists—revolt of Tāntric Buddhism against both Hinayāna and Mahāyāna—the orthodoxy and formalism of Tāntric Buddhism and the revolt of the Sahajiyās.]

(ii) The Idea of Sahaja ...
[The unspeakable nature of Sahaja—the nondual and unchanging nature of Sahaja—Sahaja
as the underlying reality—Sahaja as the Supreme Being, both transcendent and immanent.]

CHAPTER IV

THE PRACTICES OF THE SAHAIJYĀS AND THE STATE OF SUPREME BLISS (MĀHĀ-SUKHA)

(i) The Guru-vāda ... ... 87-88

[Guru-vāda, a salient feature of Indian philosophy and religion—stringency of the esoteric Sādhana responsible for so much stress on Guru-vāda in Tāntricism.]

(ii) The Importance of the Body in the Sādhana ... 88-92

[Body, the microcosm of the universe—all truth within—the theory of the plexus as associated with the theory of the Kāyas—the theory of the nerves.]

(iii) The Esoteric Practice ... 92-94

[Production of Bodhicitta—two aspects of Bodhicitta, Samavṛta and Viavṛta.]

(iv) The Middle Path in the Esoteric Sādhana ... 94-99

[The philosophical view of the middle path—middle path in Yoga—middle path variously described in the Caryā-songs—the upward flow of Bodhi-citta through the middle path—four stages of bliss, four Mudrās, four moments, etc.]

(v) The Yogic Sādhana of the Sahajiyās and the Female Force ... ... 99-106

[Śakti as Caṇḍālī—nature of Caṇḍālī—various transformations of the Caṇḍālī into Ḍombī, Nairāmanī, Šavari, Śahaja-sundari, etc.]

(vi) The Final State of Bodhi-citta or the State of Mahā-sukha ... ... 107-09

PART II

THE MEDIEVAL SAHAIJYĀ SCHOOLS
CHAPTER V

THE VAISHNAVA SAHJIYA CULT

(i) Transition from Buddhist Sahajiya to Vaishnava Sahajiya

[Extent and nature of Vaishnava Sahajiya literature—general nature of the cult and relation with standard Vaishnava religion and literature—doubtful authorship of the texts and songs—the fundamental tenets of the Sahajiya and its relation with Tantricism, Hindu and Buddhist—the general feature of the Vaishnava Sahajiya and that of the Buddhist Sahajiya—probable historical cause of the transition.]

(ii) The Mode of Transformation

[The final state of the Vaishnava Sahajiya, Buddhist Sahajiya and the Hindu Tantrikas compared—the idea of the union of Radha-Krsna, Prajna-Upaya and Sakti-Siva—the psychological innovation of the Vaishnava Sahajiya and stress on it.]

(iii) The Psychological Aspect of the Sadhana of the Vaishnava Sahajiya

(A) The Ideal of Love

[The ideal of Love between Radha-Krsna and the philosophy behind it—the ideal of Parakhyaa love—Radha and Krsna combined in Caitanya—Caitanya’s religious attitude as Radha-bhava—the eternal Lila as conceived by the Vaishnava poets—Lila is concrete—adoption of the theory of Lila in the Sahajiya school—the Svarupa-lila and the Rupa-lila—three aspects of Vrndavana—Vana-Vrndavana, Mana-Vrndavana and Nitya-Vrndavana—transition from the gross to the spiritual—two currents of Sahaja—Krsna and Radha as Rasa and Rati and the male and the female.]

(B) The Theory of Arupa

[Arupa of Svarupa to Rupa—no categorical distinction between human love and divine love—}
Kāma leads to Prema or rather transforms itself into Prema—real significance of Āropa—a change of perspective—the importance of Rūpa in realising the Svarūpa.]

(C) The Stringency of Sahaja-Sādhana ... 138-44

[The Sāmānyā and the Viśeṣā in Rasa and Rati—Kāya-sādhana in Sahaja-sādhana—the transcendental nature of the Sahaja-love—Caṇḍīdāsa’s conception of love.]

(iv) Sahaja-realisation of the Self and the Not-Self 144-46

CHAPTER VI

A NON-SECTARIAN APPROACH TO THE DOCTRINES OF THE SAHAJIYĀS

(i) The Purely Psychological Approach Apart from the Theological ... 147-54

[Most intense love produces a state of arrest—repression of sex replaced by the Sahajiyaḥ by sublimation—liberation through intense emotion—evidence of the Upaniṣad—of the Bhāgavata—of the Padma-purāṇa—the view of the rhetoricians of the Rasa-school—the view of Kāśmīra Śaivism—the view of the Spanda-kārikā—similar views of the Viśnū-ḥaṭhavaya.]

(ii) Criticism from the Yoga Point of View ... 154-56

CHAPTER VII

THE BĀULS OF BENGAL

(i) General Nature of the Bāul Sect ... 157-64

[Meaning of the word Bāul—the restricted denotation of the word Bāul in the present discourse—the reverse path of the Bāuls.]

(ii) The Bāuls and the Sahajiyaḥ ... 164-67

[The Bāuls are Sahajiyaḥ in a general sense—influence of Sūfī-ism against the earlier Sahajiyaḥ]
background—the Sahajiyā background—difference with the earlier Sahajiyās—the ‘Man of the heart’—the line of transformation of the conception of Sahaja to that of the ‘Man of the heart’—the Bāuls of Bengal and the medieval saints of the other provinces of India.]

(iii) The Bāuls and the Sūfīs

(A) A brief History of Sūfī-ism in India and particularly in Bengal

[A brief history of Sūfī-ism in India—reasons for its popularity in India—Sūfī-ism in Bengal.]

(B) Influence of Sūfī-ism on the General Nature of the Bāul sect

(a) The Influence of Samā

(b) The importance of the Murshid

[The Murid and the Murshid—excellence of the Murshid-songs.]

(c) Heterodoxy of the Bāuls

(d) Body as the Microcosm of the Universe

(e) The Man of the Heart

[What the ‘Man of the Heart’ and love towards him really signify—difference with the Vaiṣṇava conception of love—the conception of the ‘Man of the Heart’ really represents a mixture of the conceptions of the ultimate truth in the Sahajiyā schools and in Sūfī-ism—the Sahajiyā element in the man of the heart—the Upaniṣadic background—the conception of the Divinity in Sūfī-ism—creation proceeds from love—the cosmos is supported in love—self-realisation of God through self-manifestation in creation—as creation has reached perfection in man, he is the best medium for the self-realisation of God—the dual nature of man as the finite and the infinite—as human and divine—the love of the Sūfīs is the love between the human personality and the divine personality of man—love brings about union between the two—separated in love and again to be united in love—imagery of the lover and the beloved]
—love is the only religious method—the Sūfis and
the Bāuls—the 'unknown bird'—the 'unknown'
to be searched and realised within—divine beauty
to be realised through the medium of the human
form—love-union really means self-realisation.]

(ii) Poet Tagore and the Bāul Songs ... 186-87

PART III
THE NĀTH CULT

CHAPTER VIII
LEGENDS AND HISTORY

(i) Origin of the Nāth Cult ... 191-202

[Nature of the Nāth cult—the Siddha cult of
India—the Nāth cult as an offshoot of the Siddha
cult—the Siddha cult and the school of Rasāyana—
reasons for the misconception of the crypto-Buddhistic origin of the Nāth cult—general similarity
in ideas and practices among the esoteric schools
—general Śaivite air of the Nāth cult—confusion
about the Nāth Siddhas and the Buddhist Siddhācāryas—the Nāth Siddhas and the Ājīvikas.]

(ii) Traditions of the Eighty-four Siddhas and the
Nine Nāthas ... 202-10

[The tradition is not probably historical—mystic
nature of the number eighty-four variously demon-
strated—the tradition of the nine Nāthas—the Nāth
Gurus—Bengali account of the Nāth Gurus.]

CHAPTER IX
RELIGION OF THE NĀTH SIDDHAS

(i) General Air of Supernaturalism ... 211-18

[Aṣṭa-siddhi—display of supernatural powers
by the Nāth Siddhas—supernatural powers of Hāḍi-siddha—general difference in tone between Bengali Nāth literature and Sahajiyā literature—preponderance of supernaturalism—spirit of criticism in Nāth literature.]

(ii) The Final End of the Nāth Siddhas ...

[Immortality the general aim of Haṭha-yoga—Jīvan-mukti or immortality in a perfect body is the final aim of the Nāth Siddhas—the ripe body and the unripe body—real significance of immortality—this truth demonstrated by the stories of Nāth literature—molestation of Yama by Gorakh—the significance of the story of the downfall of Mīna-nāth—the original question of Gaurī to Śiva—the central point of the story of Māṇik-cānd—Mayanāmati’s control over death through Mahājñāna—the significance of the initiation of Mayanāmati by Gorakh into the secret yogic cult—Hāḍi-siddhā’s control over death illustrated through various legends—the keynote of Gopī-cānd’s great renunciation—the quest of immortality—the difference in aim between the Nāth Siddhas and the Sahajiyās.]

(iii) The means ...

(A) Ulṭā-sādhana or the Regressive Process ...

(The Ulṭā-sādhana of the Nāth yogins—the real significance of Ulṭā-sādhana—spiritual march is Ulṭā-sādhana in general—Kṣemāi as the yogic control.)

(B) Kāya-sādhana ...

(a) The Theory of the Sun and the Moon ...

[Metaphysical implications of the sun and the moon—the sun and the moon as associated with Śakti and Śiva—various yogic implications of the union of the sun and the moon—the sun and the moon of the Nāth yogins—Mahā-rasa and the Daśama-dvāra—the process of saving the Mahā-rasa from the sun—drinking of nectar—the theory of the Tithis—the theroy of Mahā-rasa as the
central point of the yogic Sādhanā of the Nāth yogins.]

(b) The Sun and the Moon as Woman and Man ... 244-46

[Saving of the moon from the sun means in the grosser sense man’s saving himself from the clutches of woman—general attitude of the Nāths towards woman—Mayanāmati’s reflection on woman’s nature—similar tone in the Nirguṇa school of Hindi poetry.]

(c) Points of Similarity and Difference in the Practical Aspect of Yoga between the Nāth Cult and other Esoteric Schools 246-50

(iv) The Vedic Soma-sacrifice and the Drinking of Nectar in Yogic Schools ... 250-51

(v) The Raśāyana School and the Nāth Cult ... 251-55

PART IV

THE DHARMA CULT AND BENGALI LITERATURE

CHAPTER X

General Nature of the Cult ... 259-67

[Dharma cult a local cult of West-Bengal and of some parts of Orissa—prevalent among low-class people—the composite nature of the cult—the liturgical works of the Dharma cult—and those of later Buddhism—is the Dharma cult Buddhist in essential nature?—in what sense can the Dharma cult be said to be crypto-Buddhistic?—possible Muslim influence on the Dharma cult—causes for amity among the Muslims and the Dharmites—oppression by the Hindus of the Dharmites—the story of the wrath of Nirajñana and its significance—some Muslim practices in the Dharma cult.]
CHAPTER XI

SPECULATIONS ON THE CONCEPTION OF DHARMA

(i) Hindu Conceptions of Dharma ... 268-72

[Dharma personified in various Hindu texts—Dharma as Yama—Dharma as Yama in the Dharma cult.]

(ii) Buddhistic Substratum of Dharma ... 272-84

[The relation between the conception of Dharma as the supreme deity and the conception of the ultimate reality of the Buddhists is very remote—theistic tendency of Mahāyāna—the docetic tendency through the theory of Tri-kāya—all docetic and theistic conceptions of the reality resulting in later times in the conception of a Supreme Being—Dharma and the three jewels, viz., Buddha, Dharma and Saṅgha—the theory of the transformation of Saṅgha into Śaṅkha is not convincing—the transformation of the three jewels—Buddha as Jagannātha—Dharma, the second jewel and Dharma-ṭhākura—Dharma and his Śakti—Dharma identified with Śiva—Śiva-śakti and Ādi-buddha-Ādi-prajñā—Ādi-buddha as the Dharma-rāja.]

CHAPTER XII

DHARMA AS DESCRIBED IN THE DHARMA LITERATURE 285-301

[Śūnya or Śūnyatā as applied to Dharma—Niraṇjana, a popular epithet for Dharma.]

(i) Dharma—confusedly described as the Lord Supreme in the Liturgical Works ... 287-91

[Various descriptions of Dharma in the Dharma-pūjā-vidhāna—descriptions of Dharma in the Śūnya-purāṇa—Dharma as the Lord Supreme.]

(ii) Dharma as the Sun-god ... 291-93

(iii) Dharma of the Dharma-maṅgalas:

(A) Dharma as Viṣṇu in general ... 293-96
(B) Dharma as Rāma

(iv) The Description of Dharma as All-white

[Description of Dharma as all-white in the liturgical works and the Dharma-maṅgalas—Śiva and Sarasvatī, the all-white deities of the Hindu Pantheon—significance of white colour—whiteness in Buddhism.]

CHAPTER XIII

The Theory of the Pañḍitas, Koṭālas, Āminis, etc. . . . 302-10

[The theory expounded—chart illustrating the scheme of the Dharmites—chart illustrating the theory of the Pañca-tathāgatas of the Buddhists—the conception of the gates in the Buddhist Tantras—correspondence of the theory of the Tathāgatas and the Pañḍitas in the Hindu Tantras—the colour scheme.]

CHAPTER XIV

Cosmogonical and Cosmological Theories in Old and Medieval Vernacular Literatures

(i) A brief Exposition of the Theories . . . 311-23

[Cosmogonical and cosmological accounts of the vernaculars represent mainly a jumbling of older ideas—account given in the Śūnya-purāṇa—in the Dharma-pūjā-vidhāna—versions of Sahadev Cakravartī and Sitārām-dās of Anādi-maṅgala of Rāmdās Ādak—account given by Ghana-rām—by Māṇik Gaṅguli—by Narasimha Vasu—account given in the Gājana-songs of West Bengal—in the Caṇḍī-maṅgala of Māṇik Datta—of Mukunda-rām—of Mādhavācārya—in the Annadā-maṅgala of Bhārat-candra and others—account given in the Nāth literature in texts like Anādi-purāṇa, or Anādi-carita, Hāḍamālā-tantra, Yogi-tantra-kalā, etc.—in Gorakṣa-vijaya—in Gopī-candra Sannyāsa—account found in
the Vaiṣṇava Literature of Orissa—account given by Kabir—by Sundar-dās, Tulsī-dās and others.

(ii) Analysis of the ideas of Cosmogony and Cosmology found in the Vernacular Literature
(A) The Primordial Nihil ... 324-26
(B) The Conception of Nirañjana—a Replica of Prajāpati Brahmā ... 326-28
(C) The Primordial Goddess ... 328-37

[The primordial Goddess in the Upaniṣads—Prakṛti of Sāmkhya—Kṣetra and Kṣetrajñā of the Gitā—a hotch-potch of the Upaniṣadic and the Sāmkhya accounts in the Purāṇas—the triad, personification of the three guṇas of Prakṛti—the conceptions of the Ādi-deva and the Ādi-devī of the vernaculars and the conceptions of Śiva and Śakti in the Tantras—the triad and the three goddesses associated with them—the story of the test of the triad.]

(iii) Buddhistic element in the Accounts of Cosmogony and Cosmology of the Vernaculars ... 337-41

[The idea of the primordial Śūnyatā—Dharmakāya, the cosmic oneness—mythological account of cosmology in the Kāraṇḍa-uyūka—cosmological implications of Prajñā and Upāya—Prajñā and Upāya in Nepalese Buddhism.]

(iv) Similarity of the Descriptions of the Vernaculars with those of other Literatures ... 341-42

APPENDICES

APPENDIX (A)
The Religious Tenets of the Non-Bengali Medieval Saints in relation to the Earlier Bengali Sahajiyās ... 345-66

(i) The spirit of revolt and criticism ... 346-55
(ii) Guru-vāda ... 355-56
(iii) All truth within ... 356-60
APPENDIX (B)

General Information about the Literature of the Nāth Cult in Bengali ... 367-81

[Discovery of the narratives on Māṇik-candra and Gopī-candra—the narrative on Gorakh-nāth—the ballads and songs popular among the Yugis and the Muslims—probable reason for the popularity of the ballads and the songs among the Muslims—yogic literature of the Muslims—stray songs of the Nāth yogins—popular ceremonies and folk-song on the Nāth yogins—the question of the time and authorship of the narratives and songs—Sanskrit literature associated with the Nāth cult—Nāth-literature in the vernaculars other than Bengali—Nāth movement an All-India movement inspiring literature in many of the vernaculars—the story of Gorakh-nāth—the story of Gopī-cānd.]

APPENDIX (C)

An Account of the Prominent Personalities in the Nāth Literature of Bengal ... 382-98

(i) Mīna-nāth ... 382-87
(ii) Gorakh-nāth ... 387-91
(iii) Jālandharī-pā ... 391-92
(iv) Kānu-pā ... 392-94
(v) Gopī-candra or Govinda-candra ... 394-97
(vi) Mayanāmatī ... 397-98

APPENDIX (D)

General Information about the Dharma Literature of Bengal ... 399-412

APPENDIX (E)

Enigmatic Language of the Old and the Medieval Poets … … 413-24

PREFACE TO THE FIRST EDITION

The book represents the thesis of the author which was submitted by him in 1940 for the Degree of Doctor of Philosophy from the University of Calcutta. The book was written in 1939 and submitted to the Calcutta University Press for publication in 1941. A considerable portion of it was printed by the year 1942 and then the work of printing was indefinitely postponed for scarcity of paper caused by the Second World War. This will explain the long interval between the submission of the book to the press and the actual publication of it.

The aim of the present work is an expository study of the obscure religious cults that inspired Bengali literature in the old and the medieval times. Religion has always been one of the main motives of literature. It has been so in all countries and particularly in India which is pre-eminently a land of religion. As a matter of fact, the history of the modern Indian literatures is so intimately related with the history of some of the most important religious movements flourishing in this country that an intimate acquaintance with those religious movements seems indispensable for a thorough study of the vernacular literature.

But it is no use treading the beaten track. Some of the religious schools have already been discussed by scholars; some again are very simple so far as their theological standpoint is concerned. The mere introduction of a Pantheon in literature cannot be the subject of serious study unless the Pantheon in question admits of fruitful theological speculation. Instead of gleaning in the already harvested field or discussing the obvious, the writer has limited his scope by selecting the more obscure cults, which are noteworthy by nature and have inspired a considerable amount of literature, but the true nature of which has not yet been thoroughly discussed and clearly determined.

The Buddhist Sahajiyā cult has been the main source of inspiration of Bengali literature in the earliest period. By the discovery and publication of the songs and Dohās of the
Buddhist Sahajiyās, Mm. H. P. Śāstrī had, no doubt, done a memorable service not only to Bengali literature but to modern Indo-Aryan vernacular literatures as a whole; but the task of making a thorough study of the songs and Dohās in the light of the cults inspiring them had been left out by him. Dr. M. Shahidullah’s *Les Chants Mystiques de Kānha et de Saraha* and Dr. N. C. Chaudhuri’s *Dākārṇava* dwell more upon the linguistic than the literary and philosophical aspects of the Dohās. Dr. P. C. Bagchi, M.A., Dr. ès Lettres (Paris), in his occasional papers and articles, no doubt emphasises the doctrinal aspect of the Sahajiyās; but no comprehensive and critical study of the cult offering a consistent and connected interpretation of the songs and Dohās has yet been undertaken.

Similar is the case with the Vaiṣṇava Sahajiyā movement of Bengal. Mr. M. M. Bose, in his work *Post-Caitanya Sahajiyā Cult*, has, indeed, supplied us with valuable information regarding the literature of the Vaiṣṇava Sahajiyās and some of the doctrines and practices preached therein; but the *raison d’être* of the whole school and the process of evolution of this love religion from the ideology and methodology of the earlier Tāntric and Yogic sects remain unexplained.

The songs and Dohās of the Buddhist Sahajiyās have important bearing in spirit as well as in form and language on the songs and Dohās of many of the medieval saints, who flourished abundantly in many parts of India, and who, for reasons to be discussed later on, were mostly Sahajiyās in a wider sense. In a chapter on the Bāul-songs of Bengal the writer has dealt with the question of the relation between the earlier and the mediaeval Sahajiyās. He has also tried to show how on the spirit of a section of the Bāuls, who have stressed the conception of the ‘Man of the heart,’ Sūfī-istic Islam acted conjointly with the Upaniṣadic spirit ingrained in the different Sahajiyā movements as also with the Vaiṣṇa-vite spirit of love. In an appendix he has dealt at some length with the religious tenets of the non-Bengalee medieval saints of India in relation to those of the earlier Sahajiyās.

The nature and history of the Nāth cult, which has inspired a considerable amount of literature in Bengal as also in many other parts of India, is still shrouded in the mist of
myths and legends. The stray articles found on the subject seem to be inadequate. Dr. Mohan Singh's work, *Gorakhnāth and Mediaeval Hindu Mysticism*, is hardly a sufficient exposition of the mystic religion of the sect. The recent work of Mr. Briggs, *Gorakhnāth and the Kāṇphaṭa Togīs*, is a commendable accumulation of facts and traditions. But the distinctive feature of Nāthism remains hitherto unexplained. Hence there is ample scope for serious study in the practically unexplored field of Nāthism.

The Dharma cult of Bengal also invites attention. The cult is not theologically complex,—but it is queerly composite. Different conceptions of godhead have been confusedly amalgamated in the evolution of the Supreme Lord of this Dharma cult. The present writer has in this thesis passed over the simple practices, which are mainly aboriginal, but has centred his attention on analysing its composite nature.

The theory of cosmogony and cosmology, which is substantially the same in description in all the vernaculars notwithstanding small deviations of details, also demands serious attention. The tentative suggestions made by different scholars here and there about the nature and significance of this theory seem to be inadequate. The present writer has given a short exposition of the different versions of the theory as found in different types of vernacular literature, analysed ideas composing the main theory, and tried to trace their sources, Vedic, Purānic, Tāntric or otherwise.

The above, it is hoped, will give the reader an idea about the exact scope of the present work. To put it more briefly, the aim of the present work is a thorough study of the Buddhist Sahajiyā cult, the Vaiṣṇava Sahajiyā cult, the Bāul sect of Bengal and other mediaeval sects of India who may be called Sahajiyā in a general sense, the Nāth cult, the Dharma cult, and the cosmogonical and cosmological theories to be found in the Bengali literature of different periods. The author has thought it convenient not to distract the interest in the main contention by the occasional introduction of a mass of details, texts and stories; but as these informations cannot be altogether neglected without making the work defective, they have been included in the appendices.
In the following pages attempt has been made to make the study as thorough as possible from the religious and cultural points of view. This, it is hoped, will bring to the notice of the reader the obscure side-issues of Indian theological thought and esoteric religious practices. Whether congenial to our modern taste or not, the fact remains that these religious sects enjoyed, and some of them have still been enjoying, widespread popularity among the masses of India; it is for this reason that a critical study of these minor religious sects cannot be neglected in the history of Indian religious thought. It may easily be seen that the religious sects, with whom the present writer is dealing, represent mainly the religious views and practices of the masses of the country as opposed to the intelligentsia belonging to the higher classes. But to understand fully the civilisation and culture of a country as a whole we cannot do without a proper study of the mass-mind.

It may be added in this connection that in conducting the study the writer has tried throughout to be guided by the scientific spirit of a truth-seeker, neither defending the theories and practices of the schools, nor passing any personal judgment on them in respect of their merits. His main aim has been the correct exposition of the schools on textual basis, and the criticisms that are added are applied only to review the position from different angles of vision. The question of abuses and aberrations, which are to be found in a greater or lesser degree in the history of almost all the religious systems of the world, has been deliberately neglected; for it is the rationale of a cult or system and not its abuses and aberrations that have academic value.

The materials for the work are gathered from both published and unpublished sources. A good number of manuscripts of texts and commentaries has been utilised in the study of the Buddhist Sahajiyā cult; some of these texts are preserved in the University Library of Cambridge, some in the Bibliothèque Nationale of Paris, and some in the Central Library of Baroda,—and all these manuscripts were available to the writer in rotograph through the courtesy of Professor S. N. Dasgupta, M.A., Ph.D. (Cal.), Ph.D. (Cantab.), D.Lit. (Rome), the Indian Philosopher of international fame.
The indebtedness of the writer to Professor Dasgupta knows no bounds. The indebtedness is not only for the manuscripts which Professor Dasgupta was kind enough to procure for the writer but also for his ungrudging help and guidance which may be regarded as a rare boon to any student of Indian philosophy and literature. The rest of the manuscripts of Buddhistic texts are preserved in the Royal Asiatic Society of Bengal and the authorities of the institution deserve cordial thanks of the writer for giving him every facility to utilise them. As for the Bengali manuscripts, the author has consulted them in the Manuscript Library of the University of Calcutta and in the Vaṇgiya Sāhitya Parisat, Calcutta. The texts preserved in both the institutions being generally common, the manuscripts of the University Library have been referred to. The author records his deep sense of gratitude also to the authorities of these two institutions. The sources, whether published or unpublished, from which materials have been gathered, have been indicated everywhere in the form of foot-notes. To make his position clear and convincing, the author has sometimes quoted copiously in foot-notes, particularly when the sources are unpublished.

A few words must be added in connection with the method of transcription. In transcribing Sanskrit the commonly accepted device of diacritical marks has been adopted. The language of the Dohās being unanimously accepted to be Western Apabhramśa, the propriety of the use of ‘j’ to the exclusion of ‘y’ and the use of ‘s’ to the exclusion of ‘ś’ or ‘ś’ cannot be questioned. But difficulty arises in the choice between ‘b’ and ‘v’. With the advice of Dr. S. K. Chatterji, M.A., D.Lit., the writer has used ‘v’ all along in the transcription of the Dohās and ‘b’ initially and ‘v’ medially and finally in the transcription of Bengali songs. Another point to be noticed is that the phonology of modern Bengali, as also of many other modern Indo-Aryan vernaculars, seldom allows the retention of final vowels, and the medial vowel also drops when the word is composed of more than two syllables; but the dropping is never indicated in orthography. The writer has dropped the medial and final vowels in orthography, where they are dropped in actual pronunciation. The principle of transcription has often been adopted in
transcribing the proper names, but rigorous consistency could not be maintained in this matter, as many of the Indian names have already been naturalised in English. Corruptions and mistakes in the spelling of old and middle Bengali texts have never been interfered with. For typographical difficulties nasalisation of vowels had to be indicated by the addition of ‘m’ with the vowels. The writer begs to draw the attention of the reader to another important point. He has found many mistakes and corruptions in the reading of the manuscripts, both Sanskrit and Bengali. These also have not been freely handled unless the mistake or the corruption has been apparent.

In fine, the writer acknowledges his debt to Professor Rai K. N. Mitra, M.A., Bahadur, late Ramtanu Lahiri Professor of Bengali, Calcutta University, under whom he had the privilege of working as the Ramtanu Lahiri Research Assistant of the Calcutta University for about four years, and under whose affectionate care the present work was prepared. The writer records his deep sense of gratitude towards his examiners, particularly to Mahāmahopādhyaya Gopināth Kavirāj, M.A., of Benares, in whom the author has discovered a prodigy of Oriental Learning. His valuable suggestions on various topics have substantially helped the writer in revising some of the chapters of his book. In Dr. Syamaprasad Mookerjee, M.A., D.Litt., Barrister-at-Law, President, Post-Graduate Council of Teaching in Arts, University of Calcutta, the writer found a never-failing source of inspiration. In spite of the multifarious duties he has to attend to in the wider sphere of his life, he remains a true patron of learning, and the author deems it a privilege to have the name of the great man associated with his book.

S. B. DASGUPTA.
PREFACE TO THE SECOND EDITION

As it will appear from the preface to the first edition, the present book had been written in 1939; its publication by the University of Calcutta was delayed till 1946 because of the scarcity of paper caused by the World War II. The book was out of print by 1951; preoccupations of the author were again responsible for the delay in handing the manuscript of the second edition over to the press after making necessary revision. Enthusiasm on the part of Firma K. L. Mukhopadhyay, the publishers of the present edition, was an active encouragement for the author.

A number of important books have been written and published during the last twenty years on the topics dealt with by the author in the present book. Some of these books present more facts and a more detailed study of some of the aspects. So far as the Buddhist Sahajiyā Cult is concerned the book, Studies in the Tantras, by Dr. P. C. Bagchi, M.A., Dr. ès. Lettres (Calcutta, 1939) throws sufficient light on some of the technical points. The Doha-kośa of Saraha-pāda critically edited with the help of Tibetan translation by Pandit Rāhul Sāmkṛtyāyana is a scholarly textual study. The book (in Hindi) contains a Hindi translation of all the Dohās as also a good introduction dealing with the doctrines of the Buddhist Sahajiyās. So far as textual study in the field of Tāntric Buddhism is concerned the critical studies of the important Buddhist Tantric text, the Hevajra-tantra, by Mr. D. L. Snellgrove, Lecturer in Tibetan, School of Oriental and African Studies, London, (in two volumes, London, 1959) deserves respectful mention. The book An Introduction To Tāntric Buddhism by the present author (first published in Calcutta in 1950 and reprinted in Calcutta in 1958) presents an exposition of the Tāntric background of the Buddhist Sahajiyā cult. Yoganaddha: or The Tantric View of Life by Herbert V. Guenther (Banaras, 1952) is a commendable attempt at understanding the deeper implications of the principle of Yoganaddha or union or non-duality, much too spoken of by the esoteric Buddhists. Siddha-sāhitya (in Hindi, Allahabad, 1955) by Dr. Dharmavir Bharati, M.A., D.Phil. is interesting in understanding the inter-
relation between the various Siddha Cults including the later ramifications.

So far as the Bāul sect is concerned, two books, one Bāmlār Bāul O Bāul Gān (in Bengali, Calcutta, 1957) by Dr. Upendranath Bhattacharya, M.A., D.Phil., and the other Bāmlār Bāul (in Bengali, Calcutta, 1954) by Pandit Kṣiti-mohan Sen, are commendable studies from different angles of view. On the Nāth cult there has been an attempt at a comprehensive study by Dr. Kalyani Mallick, M.A., Ph.D., in her book Nāthasampradāyar Itiḥās, Darsan O Sādhana-praṇāli (in Bengali, Calcutta 1950). Gorakh-bāni, an anthology of old Hindi songs ascribed to Gorakh-nāth, collected, critically edited and scholarly annotated by Dr. P. D. Barthwal, M.A., D.Litt., brought into light a large quantity of fresh materials for a study of the doctrines and practices of the Nāth Siddhas. Professor Hazari Prasad Dwivedi’s book on Nātha-sampradāya (in Hindi, Allahabad, 1955) is also a commendable book on the subject. With regard to the Dharma cult of Bengal the long chapters devoted to the study of the Bengali Dharma-maṅgals in the book, Bāmlā Maṅgal-Kāvyer Itiḥās, (in Bengali, Calcutta, third edition 1958) by Dr. Asutosh Bhattacharya, M.A., Ph.D., contains a study of the history of the cult as also a study of the ritualistic details.

It has been gratifying to the author to find that though the new publications throw new light on different points and supply new information they do not assail the views held and explained in his book. They have, therefore, been referred to in the contexts where they will be of profit and interest to the reader. The author has himself undoubtedly profited by them in making revision here and there.

The author expresses his gratitude to all scholars, Indian and foreign, who have encouraged him by their long reviews in respectable journals and periodicals and also by sending their opinion in personal letters. Such reviews and opinions are the best reward that a humble worker in the field can expect. He again counts on such sympathetic understanding in bringing out this revised second edition of the book. Mr. Nirodeprasad Nath, M.A., a pupil of the author, has helped him in preparing the index.

S. B. DasGUPTA
INTRODUCTION

The origin and growth of the modern Indian literatures (we mean the modern Indo-Aryan literatures) are closely associated with the origin and growth of some religious sects, which began to stir the life of the people from about the tenth century onwards. Up till the advent of the nineteenth century with a new outlook on life and literature, none of the Indo-Aryan literatures seem to have had the capacity to stand erect without the prop of some religious view, and this again seems to be particularly the case with Bengali. We have no type of literature in Bengali even corresponding to the Rāsau literature (literature based on the annals of heroic episodes) of Hindi, and poets like Cāṇḍ Bardāi or Bhūṣāṇ and Lāl are almost unknown in old and medieval Bengali. In our old and medieval¹ literature man’s glory is seldom depicted in its own grandeur and eulogised independently of divine glory. The versions of the Rāmāyaṇa and the Mahābhārata that we have in our literature possess a vein more religious than human; the heroes and heroines of the various Maṅgala-Kāvyas are depicted more as toys in the hands of the gods and goddesses than as dignified figures glowing with the heroic grandeur of their personality. Läusen of the Dharma-maṅgalas is a mere agent of the Dharma-ṭhākura, Kālaketu of the Caṇḍī-maṅgalas is originally a god, being the son of Indra, and is dragged down from heaven on earth only to glorify the almighty power of goddess Caṇḍī and to establish her worship on earth. The human interest of the life-long struggle of Cāṇḍ Sadāgar of the Manasā-maṅgalas has been minimised by the undercurrent of the religious tone—by the fact that it really represents the struggle of decaying Śaivism of Bengal against the growth and spread of Śāktaism represented by the Manasā cult. During the long period, beginning with the Cāryā-padas of the tenth, eleventh or twelfth century, the only type of literature that may be said to be free from the

¹ The word ‘medieval’ will mean throughout our discussions as belonging to the middle period of the Modern Indo-Aryan literatures, i.e. belonging to the period roughly between the thirteenth and the eighteenth century A.D.
influence of religion, is the ballad literature of Bengal dealing purely and simply with the diversified life of rural Bengal and pastoral love-episodes.  

Apart from the general relation of literature with religion and apart from the fact that Bengal is a province of India, which is specially noted as a land of religion and philosophy, there seems to be some historical reason for such predominance of religion in Bengali literature. Deep unrest is sometimes caused by social and political vicissitudes of a nation and the common man finds himself face to face with the stern realities which may help the growth and development of his personality. It is through the continual struggle for existence, fight against the adverse circumstances, conflict with the external powers that a nation becomes conscious of her real worth and learns to hold in high esteem the glories of terrestrial life. The paucity of such noteworthy social or political events happening in the life of Bengal may account for the fact that the history of Bengali literature during its old and medieval period is practically the same as the history of the different religious movements that flourished in the province for about a decade of centuries.  

Even in the nineteenth century the general practice was to borrow stories either from the Rāmāyaṇa and the Mahābhārata or from the annals of the Rājputs, Sikhs and Mārhāṭās to introduce heroic grandeur in the epics, novels and dramas. There is a striking uniformity in the historical development of the different literatures of the modern Indo-Aryan vernaculars. The reason behind this fact is that the literary history of almost all the vernaculars is moulded essentially by the religious movements in the different parts of India.

1 It should be noted that the authenticity of many of the East Bengal ballads, as compiled by Dr. D. C. Sen, D.Litt., in collaboration with Candra Kumar De and some other assistants and published by the University of Calcutta, has been questioned. We have no scope here to enter into the details of the controversy; but our considered opinion on the point is that though the ballads may not belong to a hoary past (as Dr. Sen holds), and though there may be some handling of the verses at the time of collection and compilation, at least the skeleton of some of these verses surely belongs to the seventeenth and the eighteenth centuries and some go even earlier.

2 Of course, in the Caitanya-bhāgavata of Vṛndāvana-dās we find reference to the songs of Yogi-pāl, Bhogi-pāl (cf. yogipāl bhogipāl māhpāl gīta i iha śunite sav lok āndita II). Some are of opinion that these songs deal with the life and glory of the Pāla Kings,—but we cannot say anything about them as long as the songs are not discovered.
which, during the old and the medieval periods were strikingly similar.

Bengali, along with other modern Indo-Aryan languages, grew up with the tenets of some minor religious sects, which rose mostly outside the circle of the upper-class people and were characterised by a general tendency of protest against current orthodox religious systems. These religious movements were sponsored by people who had no aristocracy of blood or advantage of culture and education; they rose mostly from among the ranks and preached their doctrines among the masses in their own tongue. The modern Indo-Aryan literatures, as we have indicated in the preface, are, therefore, essentially mass-literature and the religions preached through them represent the mass-religions of India. But this religious zeal of the masses has been responsible for the copious growth of the vernacular literature in spite of the derision and opposition of the elite, who sometimes threatened these revolutionaries with curses of hell.

The history of Bengali language and literature, so far as it has been explored, begins with the religious doctrines and practices of the Sahajiyā Buddhists. Sahajiyā Buddhism is a particular development of a phase of later Buddhism, widely known as Tāntric Buddhism. Investigation reveals that during the reign of the Pāla dynasty Buddhism in various Tāntric forms gained popularity in Bengal and many Tāntric texts and commentaries were written in the different Buddhist monasteries that were established in Bengal. The authors of the Sahajiyā Buddhistic songs were mostly inhabitants of Bengal or adjoining areas.¹

But though an offshoot of popular Buddhism, the real origin of the Buddhist Sahajiyā cult is not to be traced exclusively or even mainly in any of the theories and practices of Buddhism proper either in its Hīnayāna or Mahāyāna aspect. The real origin of the cult lies more outside Buddhism than inside it. The Buddhist Sahajiyā cult, notwithstanding the Buddhistic tone and colour which it assumes, is essentially an esoteric yogic cult. Side by side with the commonly known theological speculations and religious practices there has been flowing in India an important

¹ Vide infra, Ch. 1.
religious undercurrent of esoteric yogic practices from a pretty old time; these esoteric practices, when associated with the theological speculations of the Śaivas and the Śāktas, have given rise to Śaiva and Śākta Tāntricism; when associated with the Buddhistic speculations, have given rise to the composite religious system of Buddhist Tāntricism; and again, when associated with the speculations of Bengal Vaiṣṇavism the same esoteric practices have been responsible for the growth of the esoteric Vaiṣṇavite cult, known as the the Vaiṣṇava Sahajiyā movement.

It will not be out of place to give here just an idea of the speculations and practices, round which grew all the esoteric schools either within Hinduism or Buddhism. All kinds of esoteric Śādhanā (i.e., religious endeavours) of India have a common background. In all the esoteric schools the absolute reality is conceived of possessing in its nature the potency of two aspects or attributes. These two aspects or attributes are, again, conceived as the negative and the positive, the static and the dynamic, rest (nirvṛtti) and activity (pravṛtti),—the principle of pure consciousness and the principle of activity;—one represents subjectivity and the other objectivity; and, again, the one is conceived as the enjoyer and the other as the enjoyed. In the absolute Being these two aspects lie unified together in a state of absolute non-duality; but in the process of becoming or phenomenalis- sation there comes separation and duality. This process of change or becoming through a state of duality is bondage and suffering,—and the final escape from it is liberation. The secret of all esoteric Śādhanā is to destroy all principles of dualism and to attain the final state of non-duality. This ultimate state of non-duality is variously called in the different esoteric systems as the state of Advaya, Maithuna, Yugasadhi, Vāmalā, Sama-rasa, Yuvala, or the Sahaja- samādhi, or simply the final state of Samādhi.

In Hindu Tāntricism these two aspects of the absolute reality have been conceived as the Śiva and the Śakti, or the primordial male and the female. Again, one of the fundamental tenets of all the esoteric schools is to hold that the human body is the epitome of the universe, all ‘truth’ (tattva) is contained within the body. Consistent with this view it
has been held that Śiva resides in the Sahasrāra (the lotus of thousand petals situated in the cerebrum region) as the principle of pure consciousness and Śakti as the principle of world-force resides in the other pole of the Mulādhāra-cakra in the form of the coiled serpent. Now, the Śādhanā consists in raising the coiled force from the one pole to the other and to unite her there with Śiva,—and this union of the Śiva and the Śakti produces the state of the absolute. Thus the principles of Śiva-Śakti or the male and the female are contained within the person of every man and woman.

Again it has been held that the principles of the male and the female are contained within the body of a man in the right and the left respectively,—the right half being the masculine part and the left half the feminine part. This will explain the conception of Mahādeva or Śiva as Ardhanārīśvara or the half-female and half-male deity, and in the sculptural or pictorial representation of the Ardhanārīśvara the deity is always depicted as having the left half as the female and the right half as the male. Thus, there are principles of masculinity and femininity contained in every man and woman,—a man is a man because of the predominance in him of the principle of masculinity, whereas a woman is a woman because of the predominance of the principle of femininity in her. Now as the left and the right represent two aspects of the absolute reality, the two important nerves in the left and the right, viz., Iḍā and Piṅgalā, and the two courses of the vital wind, Prāṇa and Apana, associated with the two nerves, are also associated with these two aspects of the ultimate reality. From this theory follows the Śādhanā of controlling the courses of the vital wind in the two nerves and of making them flow together through the middle nerve Suṣumnā. Thus the union of the right and the left through the union of the two courses of the vital wind within the middle nerve Suṣumnā, is the vital part of the Śādhanā of Haṭha-yoga, and the state that

---

1 It may be pointed out that in the Sahajiyā school of Vaiṣṇavism also Rādhā and Kṛṣṇa are said to reside in the left and the right respectively; Rādhā is often said to reside in the left eye and Kṛṣṇa in the right. Cf. bāme rādha dāhine kṛṣṇa dekha rasik jān 1 . . . . . dui netre bīrājamān 1 rādha-kūnda dui netra hāy 1 sajal nayan duāre bhāve preme āsvāday 11

is attainable through such a process is the state of final non-duality.

Again it has been held, particularly in the Tantric and the Sahajiya schools, that the division of the creatures of the world into the male and the female has an ontological reason behind it. The male and the female represent in the visible world the division which is present in the nature of the absolute as Śiva and Śakti, and the perfect union of the Śiva and the Śakti is the highest reality. Within the physical body of man and woman reside the ontological principles of Śiva and Śakti; therefore to realise the absolute truth, or in other words, to obtain the highest spiritual experience, man and woman must first of all realise themselves as manifestation of Śiva and Śakti and unite together physically, mentally and spiritually, and the supreme bliss that proceeds from such union is the highest religious gain. Such a view is the *raison d'être* of all the esoteric Sādhanā which are carried on by the male and the female together.

As a school of esoteric yoga the Buddhist Sahajiya school is fundamentally based on the speculations explained above. The Absolute is the Sahaja—it is the ultimate reality behind the self and the not-self. The realisation of this Sahaja in and through the self and the not-self is the ultimate aim of the Sahajiya. Now, in Sahajiya Buddhism Śūnyatā (void) and Karuṇā (compassion), transformed as the Prajñā and the Upāya, are held to be the two primary attributes of the ultimate reality which is Sahaja. As two aspects of the ultimate reality Prajñā and Upāya are conceived in the Buddhist Tantras and in Sahajiya Buddhism just as Śakti and Śiva of the Hindu Tāntric school. Prajñā and Upāya thus represent the principles of dualism and the unification of the two in a supreme non-dual state is the final aim of the Buddhist Sahajiya. The practical yogic method for the realisation of the Sahaja is, therefore, fundamentally based on the principle of the union of Prajñā and Upāya. The union of Prajñā means, in the first place, the union of the female and the male, who are considered to be the manifestations of Prajñā and Upāya respectively. Again, we have seen that the two important nerves in the left and

* Vide infra, Ch. V. 
the right also represent the principles of Prajñā and Upāya in the microcosm of the human body; therefore the union of the two implies the perfect control over these two nerves and the vital process associated with them and to make them function unitedly through the middle nerve which represents the principle of non-duality. The yogic practice involving this physical and physiological union of the Prajñā and the Upāya will lead the yogin to the inner union of the Prajñā and the Upāya. Upāya as the Lord (called Vajra-sattva, or the principle of immutable adamantine existence) resides in the highest pole of the cerebrum region and Prajñā as the world-force\(^1\) resides in the lowest pole (which is the plexus in the navel according to the esoteric Buddhists); the inner union consists in the raising of the Goddess from the navel region and in making her unite with the Lord of the cerebrum region.

In the Vaiṣṇava Sahajiyā school the two aspects of Sahaja or the absolute reality are explained as the eternal enjoyer and the enjoyed, as Kṛṣṇa and Rādhā; and it is further held that all men and women are physical manifestations of the ontological principles of Kṛṣṇa and Rādhā. When men and women can, therefore, realise themselves as the manifestations of Kṛṣṇa and Rādhā through a process of attribution (Āropa), the love of any human couple becomes transformed into the divine love that is eternally flowing on between Kṛṣṇa and Rādhā; when the union of a human couple thus becomes the union of Kṛṣṇa and Rādhā, the highest spiritual realisation dawns in the state of union or Ṭugala. The element of love is the innovation of the Vaiṣṇava Sahajiyā school; but this element of love is essentially based on the element of yoga in the form of physical and psychological discipline.

In the Nāth cult, which seems to be synchronous with the Buddhist Sahajiyā movement (though the origin of the cult may be much earlier), the two aspects of the absolute

---

\(^1\) We may notice here a great anomaly. In Tāntric Buddhism the Lord as Upāya always represents the principle of phenomenalism and the consort Prajñā is generally depicted as the principle of rest or void; but in the conception of the world-force, we shall see later on, the order was reversed and Prajñā or Nairātma herself, as associated with the principle of defilement, was conceived as the Śakti or the world-force.
reality are represented by the Sun and the Moon, where the Sun represents the principle of destruction (kālāgni) through the process of change and decay,—and the Moon represents the principle of immutability. The final aim of the Nāth Siddhas is the attainment of a non-dual state through the attainment of immortality in a perfect or divine body. This non-dual state of immortality can be attained only through the union or rather the commingling of the Sun and the Moon. In its speculations on the attainment of an immutable and divine body through psycho-chemical process of Haṭha-yoga involving the theory of the Sun and the Moon, the Nāth cult seems to be akin to the Rasāyana school of Indian thought, the main difference being that the medical and chemical science of the Rāsayana school became transformed into a psycho-chemical yogic science with the Nāth Siddhas.

It may, however, be noted in this connection that though the culture of the body (kāya-sādhana) through processes of Haṭha-yoga for the attainment of physical perfection, was of paramount importance in the Nāth cult, it was more or less common to all the esoteric schools including the school of Vaiṣṇava Sahajiyā which laid emphasis on love. The realisation of Sahaja either of the nature of 'supreme bliss' (Māha-sukha) as is understood by the Buddhist Sahajiyās, or of the nature of 'supreme love' (as is conceived by the Vaiṣṇava Sahajiyās), presupposes the strength of the physical organism to stand such a supreme realisation. It is for this reason that we shall find that all the esoteric schools spoke of the culture of body through some Haṭha-yogic practice.

Thus it is clear from the above that all the esoteric schools of India are fundamentally based on the speculation on the two aspects in which the ultimate reality functions and manifests itself,—and that the religious creed is based on the final aim of the attainment of a state of non-duality. It is to be noticed that this idea of unity of the esoteric systems implies no process of negation; it, on the other hand, implies a process of supreme position through a regressive process of transformation and transubstantiation. It is for this reason that all the schools of Tantra speak of the final state as a state where enjoyment and liberation have become one and
the same. The process of Āropa which makes the ultimate union possible is not peculiar to the Vaiṣṇava Sahajiyās only,—it is a process common to all the Tāntric and Sahajiyā schools, either Hindu or Buddhist. We shall see later on that this process of Āropa implies no negation; it implies a change of perspective where the physical existence is not denied, but replaced by a permanent spiritual existence, where the gulf between the physical and the ontological is bridged over in an absolute existence. The Tāntric Buddhists have also repeatedly emphasised that the final state is not a state of Nirvāṇa as it is not also a state of Bhava (existence); but neither the Bhava nor the Nirvāṇa is denied it,—it is a state where Bhava and Nirvāṇa become united together in the realisation of the absolute.

Closely associated with the religious literature of the different Sahajiyā movements of Bengal is the literature of the Bāuls. The Bāuls as a religious sect are characterised by their peculiarly unconventional manners and customs in social as well as religious life. From this point of view the followers of the Vaiṣṇava Sahajiyā school and religious people much akin to such an order bear the general name of Bāul. But the Bāul songs, which are composed by illiterate masses from both the Hindu and the Muslim communities, and which are familiar to us with the theory of the ‘Man of the heart’ and man’s love towards him, have a distinctive feature of their own. This ‘Man of the heart’ is the Divine in man and stands as the eternal Beloved in relation to the human personality, who is the crazy lover. Such songs of the Bāuls and similar songs of the medieval saints of Northern, Central and Upper India, represent the spirit of Sūfi-ism against the background of Indian thoughts.

The Dharma cult of Bengal and of some parts of Orissa is, as we have said in the preface, a local cult having no element of esoterism in it; as a religion it consists of extremely popular rites and ceremonies. The literature belonging to the cult embodies the infiltration and transformation of various religious ideas in the untrained mind of the masses. The cosmogonical and cosmological theories also represent popular jumbling of various older ideas received through various sources.
As all the above-mentioned obscure religious cults will come directly within the purview of our present study, we need not enter into any further details here. It will not be out of place, we think, to add here a brief outline of the other religious movements which have been strong factors in the evolution of Bengali literature as a whole and which will not directly come within the province of our present study because of the reasons adduced in the preface.

The devotional movement in Bengal, as is the case in other provinces also, has given great impetus to our literature, and the beautiful literary fragments, which are extant, can be found abundantly in the love-lyrics of the Vaiṣṇava poets. Caṇḍī-dāsa, Govinda-dāsa, Jñāna-dāsa, among the host of Vaiṣṇava poets, undoubtedly deserve world-wide recognition as first-rate poets. Though we have a fair amount of Rāmāyaṇic literature in Bengali and though a deep religious vein runs through many of them, the Rāma cult could not gain sufficient ground as a religious faith in Bengal, it being pushed to the corner by the Kṛṣṇa cult. The Vaiṣṇava movement of Bengal, in the line of the Kṛṣṇa cult, grew along with the traditions of the Purāṇas like the Bhāgavata-purāṇa, Viṣṇu-purāṇa, Brahma-vaivarta-purāṇa, etc., and there was perhaps, through the life of Caitanya and some renowned Gosvāmīs, some influence also of the devotional movement of the South.¹ The first literary record of Bengal Vaiṣṇavism is to be found in the famous lyrical poem the Gītā-govinda of Jaya-deva. After him Caṇḍī-dāsa and Vidyāpati (who, though a Maithili poet, was more popular in Bengal than in his native province) sang the immortal songs of the eternal love of Rādhā-Kṛṣṇa, and were precursors, as some scholars are disposed to think, of Śrī-Caitanya, who flourished about a century later and brought with him a devotional movement, which for a long time overflowed Bengal and some of the neighbouring provinces. Vaiṣṇavite apostles like Mādhavendra-purī, Advaitācārya Śrīvāsa and others, of course, flourished just before the advent of Caitanya,—but the advent of Caitanya was some-

¹ See an article, Bhakti-dhāmer Vivartan, by the present writer in the Bhārata-varṣa, Caitra, B.S., 1343. See also an article, Prem-dhāma, by K.N. Mitra, Udayan, B.S., 1341, Agraḥāyaṇa.
thing like a fruition of all their devotional penances, and it was an event which was really epoch-making in the religion and literature of Bengal. Caitanya, as he is interpreted by his followers, embodies in him the quintessence of both Rādhā and Kṛṣṇa, and is both the realiser and the realised in the same personality.

Through his life and teachings Caitanya preached a doctrine of divine love, which was philosophically systematised and theologically codified by the six Gosvāmis of Vṛndāvana, viz., Rūpa, Sanātana, Raghunāth Dās, Raghunāth Bhaṭṭa, Gopāla Bhaṭṭa and Jīva Gosvāmī. The philosophical and theological system known as Gauḍīya Vaiṣṇavism (i.e., the Vaiṣṇavism of Bengal) is really the contribution of these six Gosvāmis, who were all religious apostles inspired by the life and teachings of Caitanya. Pre-Caitanya Vaiṣṇavism of Bengal generally flourished with the legends of Kṛṣṇa and his dalliances with the cowherd girls of Vṛndāvana and particularly with Rādhā; but in Post-Caitanya Vaiṣṇavism the divinity of Caitanya as the synthesis of the two aspects of the same reality as the lover and the beloved was recognised and emphasised, and as a result thereof Post-Caitanya Vaiṣṇava literature laid the same stress, if not more, on the life and teachings of Caitanya as on the legends of Rādhā and Kṛṣṇa.

The other two important cults that have influenced Bengali literature almost from the beginning are the Śaiva and the Śākta cults. So far as the religious history of Bengal is concerned, of the two, Śaivism seems to be the older and the Śākta cults, which are more often indigenous than Purānic, sprang up later in strong opposition to the former. In our literary records we find the Śākta cults often at daggers drawn with the cults that centred round the male deities. In this conflict with the other systems, particularly with the Śākta systems, Śaivism, the religion centring round the most indifferent and inactive god, had to give way and the Śākta cults gradually gained ground. This conflict seems to have resolved itself in another way in a synthetic transformation in the Rādhā-Kṛṣṇa cult of Bengal.

If we take a bird's eye view of the religious history of Bengal as a whole it will appear that among the Hindu
deities Śiva enjoyed wide popularity in the early and medieval period. In the preliminary chapter of some of the Dharma-maṅgalas, which belong to the seventeenth and the eighteenth century, we find salutation to all the male and female deities of Bengal and also an enumeration of the localities where they were popular.¹ A general consideration of these lists of the gods and goddesses of Bengal will reveal the extent of the popularity that Lord Śiva enjoyed in Bengal even up to the eighteenth century. It is also to be noticed that though in the Dharma-maṅgala literature we find Dharma-ṭhākura identified more with Kṛṣṇa and Rāma, yet in religious practice the Dharma cult has got itself amalgamated more with Śaivism. It will also appear from a perusal of the different kinds of Bengali Maṅgala-kāvyas (which are practically propaganda literature belonging to the different religious schools) that the different Śākta cults of Bengal presuppose a Śaivite background, against which they thrived, though their origin might have been earlier.

Śiva of Bengal, at least as found depicted in Bengali literature, is not exactly the same Śiva with whom we are acquainted in the Brahminical literature, particularly in the Purāṇas. The indigenous elements of Bengalee life and culture have supplied flesh and blood to his Brahminic skeleton and made him into a typical Bengalee Śiva of the period between the tenth and the fourteenth century really represents much of the Lord Supreme of Tāntric Buddhism as indiscriminately mixed up with the ancient Lord of India. Śiva of the later period, as depicted in relation to his troublesome family, composed of two sons, two daughters and a wife, represents, through his wild mode of life and unscrupulous activities, a vivid picture of some of the aspects of the social life of medieval Bengal. In almost all the literatures belonging to this religious school, human interest of the family-life of Śiva far outweighs the interest of his divine nature, and in this indigenous character of Śiva the Purāṇic elements have been set here and there with

¹ See Dharma Vandanā, MS, preserved in the Bengali Manuscript Library of the Calcutta University, No. 2470. Also see the first chapter of the Dharma-maṅgalas by Māṇik Gāṅguli, Rām-dās Ādak and others.
the avowed purpose of giving it a Purānic colouring. The literature of the Śaivite cult consists chiefly of the Śivāyanas, which deal with the peculiar life and activities of Lord Śiva, particularly in relation to his family. Like the Śaivite devotional lyrics of the South or even like the few songs on Hara-Gaurī (i.e., Śiva and his wife) composed by Vidyāpati of Mithilā, we have no Śaivite devotional lyric in Bengali. A large portion of fragmentary literature concerning Śiva is, however, to be culled from the Maṅgala-kāvyas belonging to the Dharma cult and particularly to the Caṇḍī and the Manasā cults.

The Śākta cults of Bengal represent a particularly distinctive feature of the religious life of Bengal and the extent of literature which flourished under the direct influence of those cults is also fairly large. We do not know of any such Śākta influence in the religion and literature of any other province of India excepting Malabar. The Śākta literature of Bengal generally belongs to the type of Maṅgala literature, which, as we have said, is the literature of religious propaganda. Among the Śākta cults, the more important are the cults of Caṇḍī (or Kālī or Kālikā), the consort of Lord Śiva, and the cult of Manasā, the serpent goddess. We have also Maṅgala-kāvyas belonging to the cult of goddess Śitalā (the goddess of the direful small pox), Kamalā or Lakṣmī (the goddess of wealth), Śaṣṭhi (the goddess believed to be in charge of the welfare of children) and others, but the literature belonging to such cults is comparatively negligible both in quality and in quantity.

The Maṅgala literature of Bengal is a continuation in vernacular of the religious literature in Sanskrit, generally known as the Purānic literature. The Sanskrit Pūraṇas are sometimes infused with a spirit of propaganda on behalf of some half-indigenous and half-traditional religious cult and there is the spirit of glorifying some of the gods and goddesses with the help of a huge network of stories which bear testimony to their irresistible divine power and thus make them acceptable to the Brahminical people. The same spirit is found in the Maṅgala-kāvyas of Bengal, which launched vigorous and continuous propaganda on behalf of some god or goddess in question with reference to various episodes.
where he or she had the supreme power to save the devotee from all sorts of dangers and difficulties and to bring destruction to all who opposed his or her supremacy. These gods and goddesses of the Maṅgala-kāvyas, in spite of their Purāṇic garb, are often indigenous in nature. Naturally, therefore, when the worship of these gods and goddesses began to be introduced in the society at large their divinity was questioned and the move for the introduction of their worship was strongly resisted by different sections of people. The followers of these gods and goddesses had, therefore, to justify, in keen competition with their rivals, the divinity of the deity in question and the legitimacy of his or her claim for worship on earth; and this will explain the origin of our Maṅgala literature. But it is to be observed that, after once this literary form could gain sufficient currency and popularity, it became ere long more or less a literary convention. It cannot be said with a sufficient degree of certainty that Mukunda-rām, the greatest among the poets of the Caṇḍi-maṅgalas, was a devotee of Caṇḍi or that Bhārata-candra, practically the last and most secular of the poets of the Maṅgala literature, was a sincere devotee of Annadā. Religious garb was rather a device in medieval literature to make literature acceptable to the masses, who were prompted to listen to these literary works more with a religious fervour than with a literary taste.

Maṅgala literature may be said to have its origin in the fourteenth century, but it developed in the sixteenth and seventeenth centuries, after which the old literary convention fell into disuse and literature began to flourish with a new spirit and form. Up till the last quarter of the eighteenth century, Śākta literature consisted exclusively of the different Maṅgala-kāvyas; but by the last quarter of the eighteenth century a new type of Śākta literature flourished in the form of fine devotional lyrics mainly on Šyāmā or Kālī (popularly known as Šyāmā-saṅgīt or songs on Šyāmā, the universal Mother of dark-blue colour) and sometimes also on Umā, or Gaurī, the daughter of the mountain Himalaya, and the young wife of the old, wild and indifferent husband Śiva. Rāmprasād Sen of the eighteenth century, the greatest devotee of the Mother, a devotee of the most unassuming
and non-sectarian type, may be taken to be the representative poet of this school. About a century later Rāma-kṛṣṇa Parama-haṁsa of Daksīneśvara, through his most devoted life and his sweet and simple teachings, gave a new impetus to this cult, and the literature of the Rāma-kṛṣṇa cult should never go unnoticed in the history of our literature. Śrī Aurabindo of Pondicherry again gave a new orientation to the Mother cult and inspired occasional lyrics on the line.

In surveying the general trends of the religious history of Bengal in particular relation to the history of Bengali literature, we cannot neglect the influence which the great religion of Islam exerted on the religion and literature of Bengal. The Mahomedans first came to the land as a conquering nation; but after they had settled here and became natives of the land and succeeded in making a large number of converts, their religious thoughts and ideas began to influence those of their neighbours; and at the same time the thoughts and ideas of their neighbours also began to affect and modify theirs in their turn. Some sort of a compromise between the religious ideas and practices of popular Islam and popular Hinduism evolved in the rank and file of the two communities through a slow and gradual process of cultural reciprocation. Islam of Bengalis is rather Sūfī-istic Islam and the influence of this Sūfī-ism on the Indian religious movements is best exhibited in the songs of the Bāuls. Besides these, the divinities like Satya-pīr, Mānīk-pīr, Gāji and others of popular Islam represent the continuity of the process of a happy admixture of elements both from Islam and Hinduism. About the influence of Islam on the Dharma cult we shall have detailed discussion in our study of the Dharma cult.

The popular religious ceremonies of women-folk, particularly of the maidens, have also supplied us with nice pieces of folk literature. The ceremonies, of which there are a good number of varieties, are generally known as the Vratas (vows) and are accompanied by the recitation of rhymed or unrhymed verses (generally known as the Vrata-kathā) which contain fine touches of rural poetry. In the performance of these ceremonies there is always
an element of art,—either the art of poetry or the art of painting. These *Vratas* are still adding a subconscious aesthetic pleasure to the conscious religious sentiment of the women-folk of Bengal.

The nineteenth century dawned with a new ideal of life, religion and literature. The spirit, form and technique of the old and medieval literature, flourishing up to the end of the eighteenth century, grew hopelessly monotonous and roused a subconscious feeling of dissatisfaction in the mind of the people and also an inward demand for a change; and a change was inevitable in the course of nature. The most important factor, that intensified this demand for a change and accelerated its speed, was the influence of Western thoughts and ideals on our political, cultural and religious life. From the beginning of the seventeenth century Bengal-ees began to come in contact with the European merchants, and clergy and as time went on, the contact began to be more and more intensified. This began to bring about a slow and gradual change in our general outlook. This was much more accelerated by the consolidation of British power in Bengal, and the political conquest soon brought with it a cultural conquest. Through the propaganda of the European clergies, whose principal business was to point out the illogicality, absurdity and immorality of the mythological Hindu faith, and through the easy accessibility of the theological and philosophical works embodying the spirit of the Western religion and culture, there actually dawned a great change in the mental horizon of the Bengal-ees. Western education and culture roused a spirit of revolution in the mind of youths and the revolution found expression first through the life and activities of Rājā Rām Mohan Roy, who by the first quarter of the nineteenth century had, at the very prime of his youth, the courage of standing against the prevalent religious beliefs of the Hindus, which he called superstitious and mythological. His call for revolution was responded to instantaneously by a section of the educated Bengal-ees and he did succeed in establishing a new religious school which was fundamentally based on Upāniṣadic monism, supplemented by cognate thoughts of Islam and Christianity. This newly reformed religion soon
developed into the religious school known as Brāhmaism, which broke asunder the barriers of the caste-system and the orthodox canons of the Hindu Smṛtis (canonical texts) and stood against all formalities in life and religion. Through the life and activities of Maharshi Devendranāth Tagore, Brahmānanda Keśav Chandra Sen, Vijay-kṛṣṇa Gosvāmī and a host of other staunch followers of this new faith this religion soon gained a strong footing among an educated and cultured section of the Bengalees and it cannot be gainsaid that this new faith of rationalism has been exerting a reformative influence on orthodox Hinduism for more than a century, and that it exerted an appreciable influence also on the literature of the nineteenth century.

Among the important literary figures of the last half of the nineteenth century Bankim Chandra Chatterjee had a religious conception of his own, and the importance of this conception in the history of our literature lies in the fact that many of his novels and essays distinctly presuppose this religious background. Bankim Chandra was essentially a Hindu,—but he was a staunch rationalist at the same time, and this rationalism of Bankim was to a great extent roused in him through his intimate contact with the thoughts and ideas of the European scientists and philosophers of the eighteenth and nineteenth centuries. Though Bankim Chandra had a fair acquaintance with the leading philosophical views of Europe, the two systems that exerted the greatest influence on the formation of his new religious faith are the Positivism of Comte and the Utilitarianism of Mill. Bankim Chandra’s religion is fundamentally based on Positivism and Utilitarianism; but he thought that Hinduism, as represented by the most popular scripture, the Gitā (the Divine Song), ascribed to the authorship of Lord Śrī-Kṛṣṇa, can very well be reconciled with the principles of Positivism and Utilitarianism. He, therefore, interpreted the ideals of the Gitā in the light of Positivism and Utilitarianism and tried to construct a new system of thought by a synthesis of the ideas from the East and the West. How far Bankim Chandra succeeded in amalgamating the religious views of the East and the West and how far his new system was placed on a sound basis is a matter of controversy;
but what concerns us here is that not only his essays but many of his novels also were infused with this new ideal of religion,—characterised by a distinct humanitarian tone, much too in keeping with the general tone of the time.

It has sometimes been said that the religious attitude and the aesthetic attitude coincide in their ultimate nature. There is no antagonism or even a relation of contrariety between truth and beauty; on the other hand truth, beauty and goodness are sometimes viewed as the three attributes of the ultimate reality. This relation of truth with beauty, or of religion with art, has best been illustrated in the art-creation of Rabindranath Tagore. There are many songs among the poetical works of Tagore, which keep us in a fix as to whether we should eulogise them as masterpieces of art or as the best expression of religious experiences. Tagore made no distinction between his aesthetic vision and his spiritual realisation, and he has repeatedly declared that as essentially a poet he could never make any distinction between the poet in him and the spiritual aspirant. As a matter of fact, rarely have we seen another poet sink so deep in the unfathomable mysteries of nature, life and mind and come out with the priceless gems of his intuitional realisation, and at the same time give them the best artistic expression.

Tagore sings of an infinite supreme Being underlying the whole cosmic process of finite creation. The world-process is an eternal process of self-realisation through self-manifestation of that supreme Being. The Infinite is becoming self-conscious through the eternal art-creation of all finitude,—and the truth of the Finite lies in the ideal of unity which it finds in the deeper relatedness with the Infinite. The Finite and the Infinite have embraced each other in the personality of man and the religion of man, which consists of his realisation of the ultimate truth in him, lies in the perfect evolution of his personality or the extension of it into infinity through the increase of knowledge, love and disinterested activities. There is an ideal unity underlying the diversity of the world-process, and the world of inanimate objects is evolving with the same rhythm with which the biological, the psychological and the spiritual
processes of man are moving; and the world-process as a whole is moving towards an ideal end—the ideal of perfection, which is to be attained by the realisation of our deeper relatedness with the Infinite Being. In speaking of a vision of his childhood Tagore says in his work, The Religion of Man, “The rhythmic picture of the tremulous leaves beaten by the rain opened before my mind the world which does not merely carry information, but a harmony with my being. The unmeaning fragments lost their individual isolation and my mind revelled in the unity of a vision. In a similar manner, on that morning in the village the facts of my life suddenly appeared to me in a luminous unity of truth. All things that had seemed like vagrant waves were revealed to my mind in relation to a boundless sea. I felt sure that some Being who comprehended me and my world was seeking his best expression in all my experiences, uniting them to an ever-widening individuality which is a spiritual work of art.” When this ever-widening individuality of personality approximates infinity, we realise the divinity in man and that is the ideal realisation of truth.

This conception of religion propagated by Tagore, both through speculative essays and through his art-creations, much akin though it may be to the Hegelian and the neo-Hegelian thoughts in striking points, is, however, fundamentally based on the teachings of the Upaniṣads, which were ingrained in the heart of poet Tagore from the early days of his childhood. On the Upaniṣadic canvas the Vaiṣṇava love poets and the mystic Bāuls of Bengal and other mystic poets of upper and northern India, viz., Kabīr, Dādū, Rajjab and others have supplied colour and tone of different shades. But this background and the other probable influences do in no way minimise the individual contribution of Tagore, and it has to be admitted that Tagore, as the seer of truth, has realised something new and given something substantial to the religious thought and literature of the world.

The world has changed a good deal in this twentieth century of ours. Through the materialistic and positivistic tendencies of centuries we have now learnt to care more for our material life than for anything higher and spiritual.
The advancement of positive sciences, the growing keenness in the struggle for existence,—the sternly acute problems of the grossly real life have turned the mind of the general mass away from the problems of the supra-mental reality. This life of flesh and blood, the apparently repulsive naked truths of the mysterious sphere, commonly known as the mind, the earthy weal and woe with which we are beset in our ordinary daily life,—the mute pangs of the lowly humanity—the injustice of the powerful, the suffering of the weak—inequity of the social machine, crashing of the innocent heart,—triumph of the bourgeoisie and the cry of the proletariat—these are the things that are engaging our whole attention,—and these are the things which we think and feel, and the mysteries of which we try to give expression to. The influence of the Continental literature and the closer contact of our life with the rapidly progressive life of the rising powers of the world around are rousing in us almost a craze for realism, and history must have its course.
PART I

THE BUDDHIST SAHAJIYĀ CULT
CHAPTER I

GROWTH OF THE BUDDHIST SAHAJIIYA CULT

(i) General Information About The Available Literature

The earliest available literature in Bengali language consists of a number of fifty songs composed by different Siddhācāryas (i.e., preceptors who have attained perfection) belonging to the Buddhist Sahajiyā cult. These poems which are popularly known as the ‘Caryā-padas’ (literally, verses on practices) were first published by MM. H. P. Śāstri under the caption of Caryā-caryā-viniścayaḥ, this being the title found in the Nepalese manuscript. MM. Vidhuvśekhara Bhaṭṭācārya, however, suggested that the correct caption should be—Āscarya-caryā-caya—(a collection of verses on mystic practices), which is found in the commentary of Munidatta on the opening verse. Dr. P. C. Bagchi has suggested another improvement on the title which is Caryā-scarya-viniścaya.

Though doubt has been cast from some quarters as to whether the linguistic character of the Caryā-padas is genuine Bengali, Dr. S. K. Chatterji, after a thorough examination of the linguistic character of these songs, has emphatically expressed his opinion that “the language of the Caryās is the genuine vernacular of Bengal at its basis.”

1 These songs were first discovered by the late Mahāmahopādhyāya Haraprasāda Śāstri in the Darbar Library of Nepal in 1907. They were edited by MM Śāstri and published about ten years later under the auspices of the Vaṅgiya Sāhitya Pariṣad under the general caption of “Baudhā-Gāṇ-O-Dohā.” In the edition of MM Śāstri three songs, viz., the twenty fourth, twenty-fifth and the fiftieth songs are missing. Dr. P. C. Bagchi, M.A., Dr. es Lettres (Paris), has fortunately been able to discover from Tan-jur the Tibetan translation of all the fifty songs. (Vide Materials for Critical Edition of the Old Bengali Caryāpadas, Part I, reprinted from the J. D. L., Vol. XXX.)

2 Vide, the note of MM. Bhaṭṭācārya in the Indian Historical Quarterly, 1928, Vol. IV, No. 2.

4 Mr. B. C. Majumdar, M.A., emphasised the Odiyā nature of the Caryāpadas (see History of Bengali Language, by B. C. Majumdar, Lecture XIII, also a series of articles contributed by him in the Bengali monthly Vaṅga-vāgpī). Again Mr. Jayaswal, following R. Sāmkṛtyāyana, refers to the language of the Caryā-padas as old Bihārī in his presidential address to the seventh All-India Oriental Conference held in Baroda.
Inspite of sporadic intrusions of a few Maithili and Odiyā forms, and also of the influence of Śaurasenī Apabhramśa, the essential linguistic nature of these songs cannot but be admitted to be Bengali. Apart from the general consideration of phonology and morphology the use of some idioms, phrases and proverbs peculiar to Bengali unmistakably points to the Bengali character of the language. The language of the Dohās, which are published with the songs, is admittedly Western Apabhramśa. Many names will be found common between the authors of the Western Apabhramśa Dohās and those of the Bengali songs. The mere commonness of names in the list of authors does not, however, establish the identity of these authors, and we have no other positive evidence to be sure that the authors of the Dohās and those of the Caryā-padas, where common names are to be found, are identical. But a comparison of the Dohās with the Caryā-padas will reveal the fact that in their religious attitude, in theories and practices and in the manner of literary representation, in imagery, phraseology and vocabulary they present a striking similarity, which warrants the belief that the authors of the Dohās and the Caryās, where common names are found, might have been identical; —we must at least admit that both the Dohās and the Caryās represent the same school of thought and they belong to the same literary school. The anomaly as to why the poets, composing songs in Bengali, should have composed songs also in Śaurasenī Apabhramśa on the same subject may be explained by referring to the prominence and popularity that Western Apabhramśa enjoyed during the period between the ninth century and the twelfth through the prestige of North Indian Rajput princes, in whose courts dialects akin to the later form of Śaurasenī were used, and whose bards spread and popularised such dialects in almost

1 The peculiar Bengali nature of the songs will be evident if we consider the peculiar forms of the language, e.g., the genitive in "era, -ara," dative in "-re, " locative in "-ta;" post-positional words like "mājha," "antara," "sānga;" past and future bases in "-il-, -ib;" and not "al-, ab-" of Bihāri; present participle in "-anta," conjunctive indeclinable in "-iā," conjunctive conditional in "-ite;" passive in "-iā, " which is preserved as a relic in Middle Bengali; substantive roots "śch" and "thāk," and not "thik" of Maithili or "tha" of Odiyā. See Dr. S. K. Chatterji, *The Origin and Development of the Bengali Language*, Vol. 1, p. 112.
all parts of Aryan India, from Gujrat and Western Punjab to Bengal.¹

Leaving aside the purely linguistic question, if we discuss the nature of these Dohās and songs from the religious, cultural and literary points of view, we shall find that they belong to no particular province of India, but may be regarded as representative of the earliest stage of Indo-Aryan vernacular religious poetry inasmuch as their influence in thought and presentation on a considerable portion of the medieval vernacular literatures of Western, Northern and Eastern India is palpable.

Later investigation in the field of Buddhist Sahajiyā cult and literature show that these Buddhist Sahajiyā Dohā and Caryā songs were popular in a wide area of the Indian soil during a period ranging roughly from the eighth to the twelfth century A.D. The number of the songs and Dohās was not certainly limited to what was discovered and published by MM. H. P. Śāstrī. Dr. P. C. Bagchi discovered and published more Dohās composed by Saraha-pāda and Kānha-pāda and also a number of Dohās composed by Tillo-pāda.² Pandit Rāhula Śāmkṛtyāyana has discovered and published many more Dohās of Saraha-pāda; he has also published the Tibetan translation (giving a Hindi translation side by side) of a good number of Dohās of Saraha-pāda the originals of which are still missing.³ In the appendix of his book Pandit Śāmkṛtyāyana has published some fifteen Caryā-pādas by Vinayaśrī and a few Caryā-songs by others also. None of these songs are included in the collection of MM. H. P. Śāstrī except the last one ascribed to Kānha-pāda. Curiously enough, this last song is just a collection of some lines with slightly different readings from some of the songs of Kānha-pāda published by MM. Śāstrī. It may be noted that Munidatta in his Sanskrit commentary on the Caryā-songs has quoted fragments from a few Caryā-songs which are not yet discovered. All these lead us to think that the number of

¹ Dr. S. K. Chatterji, The Origin and Development of the Bengali Language, p. 113.
² Vīda, Dr. P. C. Bagchi, Dohākoṣa, Part I, Calcutta, 1938 (Calcutta Sanskrit Series).
³ Dohā-kosta (with Hindi translation), Patna, 1957.
Dohās and Caryā-songs composed by the Buddhist Siddhā- cāryas had been in all probability much larger than what we have as yet been able to discover, and that these Dohās and songs obtained popular currency in a wide area so as to be mixed up and distorted.

The fact of the popularity of the Dohās and Caryā-songs over a wide area will be evident also from the influence of these Dohās and songs over the regional literatures of India during the medieval period. On the influence of the Dohās and songs on medieval Bengali literature we shall have occasion to discuss in detail in some of the chapters that will follow. In the appendix A of the book we shall see how some of the Dohās and songs composed by Kabir, the medieval Hindi poet, bear striking similarity in spirit and diction with some of the Dohās and songs of the Buddhist Siddhā-cāryas. It will be interesting to note that a song by Šavara-pāda, collected in the edition of MM. Šāstrī (song No. 28), gives us a nice pen-picture of the crude way of the conjugal life of a couple of the hilly Šavara tribe; a striking resemblance to this song will be found in some of the songs of Vidyāpati, the well known Maithili poet, where the conjugal life of Śiva and Pārvatī are depicted. Folk songs of a similar type are still found in the rural areas of Mithila. A Hindi folk song bears striking resemblance with a Caryā-song which presents us with a nice description of the sad plight of an unfortunate couple of the deer and the doe surrounded unawares by a band of shouting hunters. Again the metre of the Caryā-songs with its varieties in Pādākulaka-Pajjhaṭikā-Paddhaḍi-Caupaṭi had its ramifications in medieval Bengali and Hindi poetry. Some of these were popular with the poet Jayadeva of the twelfth century in

---

2 Caryā-song No. 8, MM. Šāstrī's edition. The Hindi song is—

maṁ śāḍhi śāḍhi araj karāṁ, mere ab ke ṛṣī bacao
hiranā hiranā surge janggal meri vyādhe lāi phāṁs,
kumā phāṁs ke hiranā nīkaltī hiran ke lag gāī phāṁs
maṁ śāḍhi śāḍhi etc.

tab hiranā hiranā se boli, sun hiranā meri bāī,
tum to phāṁs gaye jāī meri ab merā kaun havāī
maṁ śāḍhi śāḍhi etc.

Collected by Dr. Satyendra, M.A., Ph.D., D.Lit. of the Arga University.
his well known poetical work \textit{Gita-govinda}. \textit{Pādākulaka} of the Caryā-songs is probably responsible for the most popular Bengali metre \textit{Payāra} and some of the Caryā-songs themselves supply us with clear indication of the line of change. Investigation in the field of Indian music also supply us with important data with regard to the wide-spread popularity of the Caryā-songs. Various references to this Caryā as a type of song are available in the treatises on Indian music in Sanskrit from the twelfth to the seventeenth century A.D.\footnote{For these references see an article on \textit{Caryāgīti} by Rajyeśvara Mitra in the Bengali journal \textit{Visva-Bhārat Patrikā}, Vol. XVI, No. 1. See also Madan Mohan Kumar, \textit{Bāṅglā-Śaṅhiyā Ālocanā} (in Bengali), Calcutta, 1960, pp. 223-33.} This type of songs is described as songs dealing with religious mysticism and generally sung by a class of Yogins. As the treatises, where references to this type of Caryā songs are found, were written in different parts of India including the South and the West we can be sure of the currency of this type of religious songs over a wide area and that also for a period covering about six centuries.

Investigation reveals that many of the authors of these Dohās and Caryā-padas, besides a good number of writers of Buddhist Tāntric texts and commentaries, belong to the province of Bengal or to the close neighbourhood of Bengal.\footnote{\textit{Vide an article on Buddhist Tantric Literature of Bengal}, by Dr. S. K. De in the \textit{New Indian Antiquary}, Vol. 1, No. 1. \textit{Vide also}, introduction in the \textit{Bauddha-Gān-e-Dohā}, by MM. H. P. Śāstrī.} Though with the insufficient data that are available about the authors of the Dohās and the Caryā-padas it is not possible to ascertain the exact time when these Siddhācāryas flourished and composed the Dohās and songs, we have reasons to believe that they flourished during the reign of the Pāla kings of Bengal, which extended from the eighth to the twelfth century A.D. Among the Siddhācāryas Lui-pā is generally taken to be the first. Lui-pā and Dīpan-kara Śrī-jñāna conjointly wrote a book named \textit{Abhisamaya-vibhaṅga}. Śrī-jñāna was born in 980 A.D. and went to Tibet in 1042 A.D.\footnote{\textit{Vide an article by Mr. N. N. Dasgupta the \textit{Vaṅgīya-Sāhiya-Parīṣat Patrikā} b.s. 1333, No. 2.}; he preached religion in Tibet for long fourteen years and died in 1056 A.D. So it may be supposed that \textit{Abhisamaya-vibhaṅga} was written sometime by the first quarter
of the eleventh century. Lui-pa was senior to Śrī-jiśa, and therefore, he may reasonably be supposed to have flourished sometime in the second half of the tenth century.\footnote{The Presidential address of MM H. P. Śāstri in the Vaṅgiya Sāhitya-Parīṣad in B.S. 1329.} Again, we find in the colophon of the commentary on the Ḥevajra-tantra, called the Ḥevajra-paṇḍjitā or the Ṭoga-ratnamālā, preserved in manuscript in the University Library, Cambridge,\footnote{See Bāṅgālī Ṭīkā (in Bengali) by Rākhaḷdāś Bandopādhīyā, p. 318. The colophon of the manuscript referred to here in this book of Mr. Banerjee is taken from a brief notice of the MS. in Bendall’s Catalogue of Buddhist-Sanskrit Manuscripts in the University Library of Cambridge. The MS. is, however, available to the present writer in rotograph (MS. Add. 1699). There is also a copy of the MS. preserved in the A.S.B. (No. 10745), but the colophon is missing there.} that the commentary was made or rather finished by Paṇḍitācārya Śrī-kānha-pāda in the thirty-ninth year of the reign of Govinda-pāla, who flourished in the twelfth century a.d. (1199 a.d.). Dr. S. K. Chatterji thinks it possible to identify this Paṇḍitācārya Kānha-pāda with the Kānha-pāda of the Čaryā-padas and thus to place Kānha-pāda of the Čaryā-padas in the second half of the twelfth century.\footnote{The evidence on the strength of which Dr. Chatterji tries to establish the identity of the author of the commentary Ḥevajra-paṇḍjitā with the author of the Čaryā-padas and that of the Dohā-koṣa does not seem to be convincing. In the edition of the Čaryā-padas published by MM. Śāstri the last couplet of the song No. 36 reads as follows:—

\begin{quote}

sāthi kariva jālandhari pātra

paṇākha na rāhāa mori paṇdiā cāde
\end{quote}

The reading is evidently corrupted. The correct reading should, however, be

\begin{quote}

sāthi kariva jālandhari pāśa

paṇākha na cāhāi (or caḥā) mori paṇḍitācāḍe
\end{quote}

which means,—"I shall make Jalandhari-pā (reputed to be the preceptor of Kānha-pā) bear witness for me; I do not find the scholastic preceptors (paṇḍitācārya) standing by my side (i.e., holding the same view with me)." Dr. Chatterji, however, interprets the lines in the following manner:

"I shall call to witness my Guru Jālandhari-pāda: my Paṇḍitācārya (i.e., myself who am a great scholar) does not look at me." (The Origin and Development, ment etc., 122.) With this interpretation of the couplet Dr. Chatterji thinks that the word "paṇḍitācārya" referred to here can very well be a reference by Kānha to himself. But the interpretation of Dr. Chatterji cannot be accepted without much twisting of the construction of the couplet, and the meaning derived thereby does not conform to the meaning that the commentary on the lines and the Tibetan translation yield. Pandit R. Sāmkṛtyāyana gives the reading of the line like this:

\begin{quote}

sāthi karahu guru jālandhari bāja

mohe na būhái paṇḍitā a(ja)
\end{quote}

Dohā-koṣa, p. 369. This reading also goes to show that the word paṇḍitā here does not refer to Kānha-pāda himself.} But Pandit...
R. Sāmkṛtyāyana holds that Saraha-pāda, and not Lui-pāda, was the earliest of these Siddhācāryas of the Buddhist Sahajiyā cult. He has his support from a number of earlier scholars also. Saraha-pāda had his disciple in Šavara-pāda and Lui-pāda was in his turn the disciple in Šavara-pāda; Lui-pāda was therefore the third in the chronology of preceptors. Saraha-pāda was the pupil of Haribhadra who again was the disciple of the well known Buddhist scholar and writer Śāntaraksita. Haribhadra was a contemporary of King Dharma-pāla of the Pāla dynasty who ruled from 770 to 815 A.D. Saraha-pāda must therefore had flourished some time in the eighth century A.D. Pandit Sāmkṛtyāyana therefore holds that the Buddhist Dohās and songs were composed within a period extending from the eighth century to the twelfth century A.D. Pandit Sāmkṛtyāyana also gives a chart showing the chronology of the disciples; if this chronology is to be given any credit, it corroborates the view that various religious Dohās and Caryā-songs were composed by a good number of poets during the period extending from the eighth to the twelfth century A.D.

(ii) History of Buddhism in Bengal

As already hinted, the Caryā-padas embody the religious tenets of Sahajiyā Buddhism, which was a later offshoot of Tāntric Buddhism. It will not be out of place here to say a few words about the nature and extent of the growth and spread of Buddhism in Bengal at the time of and before the rise of these Siddhācāryas. In all probability Bengal was outside the empire of Aśoka and Buddhism could have no access to this province during his reign in the third century B.C. Mention is made of various centres of Theravāda Buddhism in India from which representative monks went to Ceylon to attend the ceremony of the consecration of the Mahā-stūpa erected by King Duṭṭhagāmaṇī in the second century B.C.; but though in the list of the centres we find mention of many places closely adjacent to Bengal, we find no mention of Bengal. Traces of Buddhism as a religious faith in Bengal are, however, found from the

time of the Gupta emperors. The Chinese pilgrim, Fa-Hien, visited India during the reign of Chandragupta II. Fa-Hien stayed in Tāmrālipti (modern Tamluk in Midnapore) for two years, copying Śūtras and painting images. He noticed the existence of twenty-four Saṅghārāmas in the city, which were all residential seats for the Buddhist monks. It was also noticed by the pilgrim that Buddhism at that time began to command reverence with the public in general. After Fa-Hien another renowned Chinese pilgrim, Hiuen Tsang, came to India during the seventh century A.D. in the reign of Harṣavardhana and visited Bengal. He found ten Buddhist monasteries with more than 1,000 monks residing in them in Tāmrālipti, twenty Saṅghārāmas with some 3,000 priests who studied both the Little and the Great Vehicle in Puṇḍravardhana, thirty or so Saṅghārāmas with about 2,000 priests, all of the Sthavira school in Samataṭa, and ten Saṅghārāmas or so with about 2,000 priests studying the Little Vehicle of the Samataṭiya school in Karṇasuvarṇa. He also spoke of two most notable colleges, rather universities, of his time, one at Puṇḍravardhana and the other at Karṇasuvarṇa, both renowned as great seats of learning for the Eastern Buddhist scholars. I-tsing, another Chinese pilgrim, speaks of the University of Bhā-rā-hā in Tāmrālipti and gives a vivid picture of its inner life, organisation, discipline, splendour and fame. While speaking of the four tracts of Bengal referred to by Hiuen Tsang, I-tsing referred to the great reverence of people in general for the Buddhist faith and for the monastic life of the Bhikṣus (monks living on alms). He also found an Aśoka tope and the vestiges of the four past Buddhas.

A renowned Buddhist teacher of Bengal of the pre-Pāla age was Śīlabhadra of Samataṭa. He was at first a disciple of Ācārya Dharmapāla of Nālandā and gradually became the head of that great Buddhist University. He was a friend as well as a preceptor of Hiuen Tsang who had deep reverence for the monk. Buddhhabhadra, the nephew and disciple of Śīlabhadra, was also a devout Buddhist, and both the uncle and the nephew were reputed as great devotees and profound scholars. Buddhhabhadra has been described as a specialist in Yogācāra Buddhism, and
tradition says that he derived his inspiration from Avalokiteśvara, Maitreya and Mañjuśrī.

One thing to be noticed in this connection is that the evidence of the Chinese pilgrims or of the epigraphical and archaeological records does not help us much in ascertaining the nature of Buddhism that was current in Bengal before the Pālas. We find mention of Mahāyāna Buddhism as well as of Hinayāna. It seems, however, that in the historical evolution of Buddhism, Mahāyāna, with its more liberal policy and generous ideal of the final goal, could capture the mind of the public much more than Hinayāna with its strict monasticism and ethical rigorism, and as a result Mahāyāna was fast gaining in popularity. During the time of the Pālas, however, a tendency towards esoterism was manifest and Buddhism very soon underwent another great change from Mahāyāna to Vajrayāna.

Coming to the time of the Pālas, who were professed Buddhists, we find many Buddhist monasteries established in different parts of Bengal mainly through the patronage of these Pāla kings. The great Vihāra of Nālandā was enriched and repaired and some new land-grants were made to it by the Pālas, and it was made the meeting place of all sorts of Buddhist scholars from countries within and without India. On the evidence of Tāranātha we know that Gopāla I founded the Odantapurī or Uddaṇḍapura Mahāvihāra, while according to the Pag-Sam-Jon-Zang he was the founder of the monastery of Nālandā. Dharmapāla, the son of Gopāla, who himself bore the epithet of Vikramaśiladeva, founded the monastery of Vikramaśīla which for some time rivalled the glory of Nālandā. An inscribed clay-seal discovered in Pāhāḍapura bears testimony to the fact that the Mahāvihāra of Somapura in North Bengal also was erected by Dharmapāla. Close to this important monastery was situated, in the eleventh century A.D., a temple of Khasarpāṇa Avalokiteśvara, in which was permanently deposited a manuscript of the Prajñā-pāramitā in a casket artistically executed by Vipulaśrīmitra. On four sides of this big temple were built four alms-houses wherein images of the Goddess Tārā were installed. Another big temple of Tārā was built in Somapura to ‘dispel entirely the eight great dreads of the
people. This monastery of Somapura and also the Vikrama-
sīla monastery were probably brought to perfection by
Devapāla, son of Dharmapāla. The Bstan-hgyur refers to
another Vihāra of Vikramapurī, which was most probably
situated in Vikramapura of East Bengal. Kumāra Candra,
called Ācārya Avadhūta, wrote a Tāntric commentary in
this monastery of Vikramapurī. Another Vihāra which
was already in existence in Bengal during the time of
Dharmapāla was the Traikūṭaka Vihāra, where Ācārya
Haribhadra wrote his famous commentary on the Aṣṭa-
sāhasrikā-prajñā-pāramitā. Prajñā-varman, called Ācārya,
and his preceptor, Bodhivarman, are said to have hailed
from Kāpaṭya of Bengal, which was either a monastery
itself or a place having a monastery. There was probably
another monastery in Devīkot in North Bengal to which
Advayavajra, the great Tāntric Buddhist scholar, as also
Mekhalā, a nun, are said to have belonged. The Pag-Som-
Jon-Zang mentions the Paṇḍita Vihāra of Chittāgong,
which was a great centre of Tāntric learning and culture,
and with this Vihāra Tili-pā as Tilo-pā or Tailapāda is said
to have been associated. Taila-pāda had a disciple of
the name of the Nāḍa-pāda, who again is said to have been the
preceptor of the renowned Bengali Buddhist missionary who
got to Tibet and preached Buddhism there for full fourteen
years. Nāḍa-pā was the author of the commentary on the
Vajrapāda-sāra-saṅgraha, which is said to have been composed
by Śākyabhikṣu Yaśobhadra of Kāśmīra at the demand
of Vinaya-śrī-mitra and others belonging to the grand Vihāra
of Kanakastūpa in the city of Paṭṭikera. This city of Paṭṭikera,
frequently found in the ballads on King Gopi-
cāṇḍ or Govinda Candra as the city of Pāṭi-kāra, has con-
vincingly been identified with the paraganā of Pāṭi-kārā,
conterminous with Meherkul in the district of Tippera.¹

In connection with the Buddhism of the Pāla period
mention must be made here of Aṭīśa Dīpaṅkara, the great
Buddhist scholar of Bengal. Of his life and activities in India
and in Tibet we now know much, which need not be re-
produced here.

¹Mr. N. N. Dasgupta, M.A., Buddhist Vihāras of Bengal, Indian Culture,
Vol. 1, No. 2.
The grand Vihāra of Jagaddala, founded by the last great Pāla king, Rāmapāla, speaks of the last glory of Buddhism in Bengal. The king installed in this Vihāra images of Avalokiteśvara and Mahā Tārā. This great monastery was situated in a part of Rāmāvatī, the new metropolis founded by Rāmapāla at the confluence of the Ganges and the Karatoya. Bibhūticandra and Dānaśila were the two most reputed scholars of Jagaddala. Besides, Mokṣakaragupta of the same Vihāra was a good logician and composed in three chapters the Tarka-bhāṣā. Šubhakaragupta, who lived there for some time, wrote a commentary on the Tāṇtric text Siddhaikavira-tantra. Dharmakara of the same monastery translated the Samvaravyākhyā of Krṣṇa. Buddhists from Tibet flocked here to have Sanskrit texts translated into Tibetan.¹

In the brief survey made above it must have been noticed that a good number of Tāṇtric scholars of Buddhism flourished during the period of the Pālas, and many of the authors of the Dohās and Caryās probably flourished during this time. The art and iconography of the same period will bear testimony to the fact that by this time Mahāyāna began to be eclipsed by Vajrayāna Buddhism. The icons of various Buddhist gods and goddesses of the period and also the representation of some of the gods (including the Lord Supreme as Hevajra or Heruka or Vajreśvara or Vajra-sattva, as he was variously called in esoteric Buddhism) with their respective female consorts in a state of union (yuganad-dha) will indicate the introduction of the female element in the Buddhist religion of the time.

With this brief survey of the history of Buddhism in Bengal before and at the time of the advent of the Buddhist Siddhācāryas of the Sahajiyā sect, let us now turn our attention directly to the religious background of the Bengali Caryā-padas, which embody the religious doctrines and practices of the Sahajiyā Buddhists. This will naturally lead us to the question of the nature, origin and development of Tāṇtric Buddhism as a whole, of which Sahaja-yāna is a later offshoot. The question of the inter-relation among

¹ Ibid.
the various schools of Tāntric Buddhism, viz., Vajra-yāna, Kālacakra-yāna and Sahaja-yāna, has also to be discussed in this connection.

(iii) Origin and Development of Tāntric Buddhism

The phase of later Buddhism, widely and roughly known as Tāntric Buddhism, may be said to be a popular development of Mahāyāna Buddhism through a gradual process of centuries having its fullest sway during the period between the eighth and twelfth centuries A.D. Mahāyāna or the 'Great Vehicle,' as contrasted with the ethico-religious rigorism of Hīnayāna, or the 'Little Vehicle,' was a religion of progress and liberalism. In the Mahāyāna-sūtrā-laṅkāra of Asaṅga Hīnayāna has been characterised as a very narrow system of religion,—narrow in its aim of self-liberation, narrow teachings to realise that aim, narrow method applied for this realisation, insufficiency of equipment and the shortness of time within which final liberation is guaranteed.¹ On the other hand, the Mahāyāna school represents the religion of the dissenters and the protestants and was always characterised by a broadness of outlook and deep sympathy for the suffering beings of the whole universe.

After the death of Buddha there arose a great controversy among his followers as to the correct interpretation of the sayings of the master as well as about the rules of discipline indispensable for a monk. To settle these controversies great councils were held. It is said that in the second council held in Vesālī the controversy finally ended in a split among the Buddhists, and the dissenters convened another great assembly (Mahāsaṅgha) to have a separate school of their own and they were known as the Mahāsaṅghika. In this way, as time passed, the controversy between these radicals and the orthodox elders (thera) began to be more and more uncompromising and the points of dissension were also gradually increasing in number. This controversy between the elders and the radicals finally resulted in the growth of the two separate schools within the province of Buddhism itself, the canonical tenets of the elders being

styled as Hīnayāna and the tenets of the radicalists as Mahāhyāna.

Among the radical changes in thought and outlook that we find in Mahāyāna, as contrasted with Hīnayāna, the most important is the change in the conception of the final goal. Whereas the summum bonum of Hīnayāna is to attain Arhathood or final liberation of the self from the whirl of existence through strict ethical discipline and the processes of ‘Jhāna’ (Sk. dhyāna, meditation), the final aim of Mahāyāna was to attain Buddhahood in and through different stages of Bodhisattvahood, which is a state of perfect knowledge about the void-nature of the self and the not-self mixed up with an emotion of universal compassion for the redemption of all the suffering beings. The conception of Bodhisattvahood, very important as it is in Mahāyāna Buddhism as well as in all forms of Tāntric Buddhism, requires some elaboration. The belief of the followers of Mahāyāna is that every man, nay, every being of the world, is a potential Buddha; he has within him all the potency of becoming the perfectly enlightened one (Samyak-sambuddha), which latent possibility can be made patent only through the attainment of perfect knowledge, associated with universal compassion, which prompts one to utilise that knowledge in missionary activities for the uplift of all beings. The ideal of missionary life was consequently preferred to the ideal of the attainment of final extinction (nirvāṇa). Bodhisattvahood means the attainment of the Bodhi-mind (Bodhi-citta), which is defined as a unified state of vacuity (Śūnyatā) and universal compassion (Karuṇā).¹

The other noteworthy departure in Mahāyāna was the development of the docetic conception of the three Kāyas (bodies) of the Buddha. The Hīnayānists conceived the Buddha only as a historical personage in the life and activities of Śākyamuni; but with the Mahāyānists the Buddha is no particular historical personage, he is but the ultimate principle as the totality of things and beings in an unqualified state of all-existence. This ultimate principle has three aspects, known as the three Kāyas of the Buddha, viz., the

¹ sūnyatā-karuṇā-bhinnam bodhi-cittam iti smṛtam ||
Dharma-kāya (i.e., primordial element, or the ‘thatness’ underlying all that exists), the Sambhoga-kāya (the body of bliss, or the effulgent body in the form of the Bodhisattvas) and the Nirmāṇa-kāya (i.e., the body of transformation, or the historical personage of Buddha).\footnote{Vide infra.} With these fundamental changes in outlook and a predominance of philosophical thought and the culture of the supreme virtues (pāramitā) Mahāyāna Buddhism flowed on side by side with Hīnayāna for centuries. But as, on the one hand, this freedom of thought, broadness of outlook and spirit of liberalism liberated Buddhism from the walls of narrow scholasticism and raised it from the selfish hankering of personal liberation to the sublimity of a religion for suffering humanity, it, on the other hand, contained the germs of indiscipline and the revelry of wild thoughts which reduced Buddhism to a body of unintelligible mutterings and a system of practices which are unconventional. It should be observed that the pledge of Mahāyāna was the redemption of suffering humanity as a whole, nay, the liberation of all beings. With this end in view the apostles of Mahāyāna had to make their religion catholic enough to make it acceptable even to the most ordinary people of the society. In other words, Mahāyāna, as a religion for all people, had to make provision within its fold for people of widely different tastes and intellectual calibre. It is for this reason that heterogeneous elements of faith and religious practices began first to creep in and then to rush into the province of Buddhism. For ordinary people religion consists in the belief in innumerable gods and goddesses, in time-honoured customs, muttering of mystic formulas, and in the paraphernalia of rites, ceremonies and practices; when through the zeal of liberating all the beings from the bondage of existence Mahāyāna began to be too much popularised, all these popular religious elements of heterogeneous nature began to be incorporated into Buddhism. Though the general custom is to style this composite religious system of heterogeneous faiths and practices as Tāntric Buddhism, the raison d’être of Tāntric Buddhism is not to be sought in this popular phase of the religion. It seems that with the purpose of attaining
the final state of Buddhahood a new school developed within the province of Buddhism itself with a more forward policy. This forward school introduced elements like the Mantras and the Dhāraṇīs into the province of this religion. It is for this reason that in the *Tattva-ratnāvalī* collected in the *Advaya-vajra-saṃgraha*¹ we find Mahāyāna sub-divided into two schools, *viz.*., Pāramitā-naya and Mantra-naya. The principles of Mantra-naya are said to be very deep and subtle and inaccessible to ordinary men; and though the ultimate purpose of the Mantra-śāstra is the same as that of other Śāstras, it is said to be distinctly superior to them because of the fact that it is free from delusions and is accessible only to people with a higher intellectual calibre.² This Mantra-naya or Mantra-yāna seems to be the introductory stage of Tāntric Buddhism, from which all other offshoots, like Vajra-yāna, Kālacakra-yāna, Sahaja-yāna, etc., arose in later times. In the *Laghu-kālacakra-tantrarāja-tīkā*, entitled *Vimalā-prabhā*³ we find that the doctrines of the Pāramitā-naya are written wholly in Sanskrit, while those of the Mantra-naya are explained in Sanskrit, Prakrit, Apabhramśa and even in non-Sanskritic languages like those of the Śavaras and others.

Tradition holds Asaṅga, the great exponent of the Yogācāra school, to be responsible for the introduction of Tāntricism in Buddhism; he again, in his turn, is believed to have been initiated into this mystic cult by Maitreya in the Tuṣita-heaven. Others, on the other hand, hold that Nāgārjuna, the renowned exponent of the Mādhyamika school, was the real founder of the esoteric school, and that he, in his turn, received the doctrines from the Celestial Buddha Vairocana through the divine Bodhisattva Vajra-sattva in the “iron tower” in South India.

Apart from these traditions, some scholars are disposed to think that in the *Mahāyāna-sūtrā-laṅkāra* of Asaṅga there are clear references to the sexo-yogic practice of the Tāntric Buddhists. In the *Sūtrā-laṅkāra* the word *parāśṛti* occurs several times in connection with acts which constitute the

¹ Edited by MM. H. P. Śastri, G. O. S., No. XL.

³ MS., A. S. B., No. 4727.
supreme greatness of the Buddha. One of these verses runs thus, "In the parāvrtti of sexual union supreme greatness is obtained, (namely) in the enjoyment of Buddha-happiness and in looking without impure thoughts at a wife." Sylvain Lévi in translating this verse suggests that "parāvrtti of sexual act" alludes to "the mystic couples of Buddhas and Bodhisattvas which have so much importance in Tāntricism." But Winternitz in his notes on the "Guhyasamāja Tantra and the Age of Tāntra" doubts this interpretation of Lévi and suggests that parāvrtti means nothing but "turning aside, discard." The phrase maithunasya parāvrtti may really refer to the Tāntric sexo-yogic practice through which there is the enjoyment of bliss similar to that arising from the sexual act,—and the significance of this mystic union and the consequent enjoyment of blissful union is given in the Sūtrā-laṅkāra itself.\(^1\) If this interpretation of the word parāvrtti in the present context be accepted, it may be inferred that the Tāntric ideas were already prevalent in Mahāyāna Buddhism in the time of Asaṅga (4th-5th centuries A.D.), and the tradition of Tāntricism being introduced in Buddhism by Asaṅga himself becomes to a great extent significant.

Some scholars are again of the opinion that the Tāntric elements were introduced into Buddhism by Lord Buddha himself as a mere provision for the laïties whose intellectual calibre and moral equipment would not allow them to follow the path chalked out by him. Thus Dr. B. Bhāṭṭācārya says,—"Though Buddha was antagonistic to all sorts of sacrifices, necromancy, sorcery or magic, he is credited nevertheless with having given instructions concerning Mudrās, Maṇḍalas and Tantras, etc., so that, by virtue of these, prosperity in this world could be attained by his less advanced disciples, who seemed to care more for this world than for the Nirvāṇa preached by him. India in Buddha's time was so steeped in superstitions that any religion which dared forbid all kinds of magic, sorcery and

\(^3\) Studies in the Tantras, Dr. P. C. Bagchi, p. 92.
necromancy could hardly hope to withstand popular opposition. A clever organiser as Buddha was, he did not fail to notice the importance of incorporating magical practices in his religion to make it popular from all points of view and attract more adherents thereby.\(^1\) As a conclusive evidence of this inference Dr. Bhaṭṭācārya refers to Buddha’s belief in the four “iddhis” (ṛddhi) or miraculous power obtained by the advanced disciples and also to a verse in the Tattva-samgraha of Śāntaraksīta and its commentary by Kamalaśīla, where Buddha himself is said to have prescribed Mantra, Mudrā, Maṇḍala, etc., for his lay disciples. But the mere belief in the “ṛddhi” is no convincing proof of Buddha’s sanction of Tāntricism, and the evidence of Śāntaraksīta and Kamalaśīla (which too is extremely insufficient by itself) cannot be credited much on the ground that they flourished about fourteen hundred years after the advent of Buddha. Of course, we find occasional references to Tāntric practices including the sex-element even in the time of Buddha,\(^2\) but we find no conclusive evidence in any early record of Buddha’s sanction to Tāntricism as the mere policy of a clever organiser.

Without entering into any controversy on the point we may say that it will perhaps be wrong to suppose that Tāntricism was introduced into Buddhism at any particular time by any particular man. Belief in Mantra or in the mysterious power in the sound of a particular syllable or a string of such syllables is a social heritage with the Indian masses from the hoary past. Such a belief in various forms is to be occasionally found in early Buddhism also. Worship of the Stūpa, reversion for the mystic Bodhi-maṇḍala, or the circle round the famous tree beneath which Buddha attained his Bodhi (perfect knowledge) were popular features also of early Buddhism. The postures and gestures of Buddha were also held mystically significant. These are elements in early Buddhism which no doubt paved the path for the vigorous propagation of the Mantra,

Mudrā (posture and gestures) and Maṇḍala (mystic diagram) elements in Tāntric Buddhism.

A popular tendency is manifest among some of the scholars to determine the priority either of the Hindu Tantras or of the Buddhist Tantras. We have pointed out in the Introduction and we shall have other occasions to repeat, that Tāntricism with its heterogeneous nature is neither exclusively Hindu, nor exclusively Buddhist in origin. It is an ancient religious cult of India manifesting itself sometimes as Hindu being associated with Hindu theology, thoughts and ideas and sometimes as Buddhist in association with later Buddhist theology, thoughts and ideas. In view of this fact it will not be sound to say, as has sometimes actually been said, that the Hindu Tantras are later in origin and are derived from the Buddhist Tantras. We have seen that Asaṅga has traditionally been held to be the propagator of Tāntricism in Buddhism; but the tradition of the existence of a vast array of Āgamas during the days of Asaṅga or even in earlier times cannot altogether be brushed aside. These ancient Āgamic texts seem to be the source of all Tāntric texts. That an extensive Tāntric literature existed in the days of Somānanda and Utpala is well-known. Internal evidences show that most of these works, even as they were then known, were very old. Abhinava Gupta's (10 A.D.) work Tantrā-loka is based on many ancient Āgamas, which were accessible to him personally. A study of the Buddhist Tantras and Hindu Tantras will show that there are numerous points of contact implying thereby that they had a common cultural background in the past.

Apart from the theological doctrines, which differ in details from one another, the fundamentals of the Hindu and the Buddhist Tantras are the same. It is only the colour and tone that are sometimes different. As we shall have occasions to refer to these points of similarity later on we do not propose to illustrate them here.

The Mantra-element seems to have been introduced in Mahāyāna Buddhism first in the form of the Dhāraṇī, which literally means that by which something is sustained or kept up (dhāryate anayā iti), i.e., the mystic syllables that
have got the capacity of keeping up the religious life of a man. In the Bodhisattva-bhūmi of Vasubandhu we find a discourse on the nature of the Dhāraṇīs and a philosophical explanation for the adoption of these unmeaning Mantras for the realisation of the ultimate truth.

According to the Bodhisattva-bhūmi the Dhāraṇīs of the Bodhisattva are of four kinds, viz., Dharma-dhāraṇī, Artha-dhāraṇī, Mantra-dhāraṇī and the Dhāraṇī for the attainment of the transcendental merit of forbearance belonging to the Bodhisattva (Bodhisattva-kṣānti-lābhāya ca dhāraṇī). The Dharma-dhāraṇī is composed of that kind of Mantras through the hearing of which (even though they are not explained in any Śāstra or by any preacher) the follower attains memory (smṛti), perfect knowledge (prajñā) and spiritual strength (bala). Artha-dhāraṇī is that type of Mantras through the mystic power of which the correct significance (artha) of the Dharma (which significance is never explained in any Śāstra or by any preacher) is revealed to the follower in a spontaneous way. The Mantra-dhāraṇī enables a man to attain perfection. The Dhāraṇī for the attainment of forbearance (kṣānti) is the Mantra through which the ultimate nature of the Dharmas is revealed to the reciter; through the realisation of the ultimate immutable nature of the Dharmas the follower attains generosity of heart which produces in him the merit of forbearance.1

In this connection, however, Vasubandhu gives a philosophical explanation of how the ultimate immutable nature of the Dharma can be realised through the Mantras of unmeaning syllables, such as “iṣṭi miśi kiṣṭi bhikṣānti padāni svāhā.” He says that these syllables, viz., “iṣṭi miśi kiṣṭi, etc.,” have got no meaning whatsoever,—and the follower through concentration should realise the truth that these Mantras can have no meaning at all,—this unmeaningness is their real meaning. Through this absolute negation of all possible meanings to the Mantra, the real meaning of the Mantra as pure void is intuitively revealed to a man. Thus this realisation of the meaning of the Mantras (as pure negation) helps the man to realise in pure intuition the nature of the Dharmas as essenceless. But through this negation of all

1 Bodhisattva-bhūmi, Ed. by Unrai Wogihara (Tokyo), pp. 272-74.
Meanings to the Mantras a unique transcendental, immutable meaning is revealed to the heart of the Sadhaka; this immutable nature is the real nature of all things.¹

Closely associated with this Mantra-element is the Mudrā element, which in Buddhism in general is but the different signs made by the particular position of the hands and the fingers.² This Mudrā-element, however, with the Mantra-element and some other esoteric practices has a deeper significance in the Yogic Sādhanā of the Tāntrics, and as the Mantra-element contains all the secrecy of the potency of sound, the Mudrā element contains all the secrecy of touch as associated with the potency of the physiological system. With Mantra and Mudrā the element of Maṇḍala or describing of mystic circles was also introduced.

But once the portals of Buddhism were flung open to let in elements of esoterism, all the traditional beliefs in gods, demi-gods, demons and ghosts, magic, charms and sorcery with all their details rushed in and quickly changed the whole ethico-religious outlook of Buddhism. To these again were added elements of Yoga,—Hāṭha-yoga, Layayoga, Mantra-yoga and Rāja-yoga. All these elements made for the growth of the elaborate system of Tāntric Buddhism.

¹ sa esāṁ mantra-padānāṁ evam samyak pratīpana evam-arthaṁ svayaṁ evaśrutavā kutaścit pratīpanyati. tad yathā nāsty esāṁ mantra-padānāṁ kācid ārtha-poṁprīnipatiḥ, nirarthā evaiś, ayaṁ eva caiva arthaṁ yad uta nirarthatāḥ...... sa teṣāṁ mantra-padānāṁ arthāṁ samyak pratīvīdyata tenaścīrthā-nusāreṇa sarva-dharmaṁ api arthaṁ samyak pratīvīdyati svayaṁ evaśrutau parataḥ | ............... yā punar esāṁ nirabhilāpya-svabhāvabā. ayaṁ esāṁ svabhāvārthāḥ.

² It should be noted here that the word Mudrā in the Tantric and the Yogic literature has got different meanings. In the Tantras it often means the woman to be selected in the secret practice; in Hāṭha-yoga it refers to practices including control of limbs, muscles, nerves and the vital breath-process. We have again different descriptions of four types of Mudrās associated with both processes of Yoga and meditation which are again associated with four types of realisation of bliss (vide Catur-mudrā of the Adyaya-vajra-sahgraha, G. O. S., XL.). In the University Library of Cambridge there is a manuscript with the colophon "Śrī-mac-chākyarāja-sarva-durgatī-parisodhana-mukhā-khyāna-prathama-dīyoga-nāma saṁādhi (MS. Cambridge, Add. No. 1278, available to the present writer in roto-graph) with as many as one hundred and fifty-eight coloured illustrations of the different kinds of Mudrās. Of these some seem to be purely postures of the hands and fingers, some on the other hand illustrate the different manners of holding the thunderbolt (vajra), lotus, bell, sword, conch-shell, bunch of flowers, garlands, etc. Others again illustrate the manner of offering flowers, water, incense, lamp and other materials of worship. Some again illustrate the different manners of playing on the different musical instruments. All these are done with the aim of obtaining final purification and final deliverance from the miseries of life.
It is to be noticed that in the earlier phase of Tāntric Buddhism emphasis was laid generally on the elements of Mantra, Mudrā, Maṇḍala, Abhiṣeka (initiation and the ceremonies associated with it), etc.; but gradually the sexoyogic practice also began to be referred to. In course of evolution, however, the sexoyogic practice came to be held as the most important esoteric practice for the attainment of the final state of supreme bliss, all the other practices and ceremonies being held as preparatory accessories. The six kinds of ritual intended for the good or evil of anybody (Abhicāra) and the five accessories of wine (madhya), meat (māṁsa), fish (matsya), woman (?) (mudrā) and sexual intercourse (maithuna) gradually made their way into Buddhism.¹

This composite system of Tāntricism with the introduction of the sexoyogic practice came to be known by the general name of Vajra-yāna or the Adamantine path.² Kazi Dawa-samdup in his introduction to the Śrī-cakra-sambhāra-tantra divides this Vajra-yāna into further parts, viz., Kriyā-tantra-yāna, Caryā-tantra-yāna and Yoga-tantra-yāna; the last is again sub-divided into Mahāyoga-tantra-yāna, Anuttara-yoga-tantra-yāna and Atiyoga-tantra-yāna. The general custom, however, is to divide Vajra-yāna into four classes viz., Kriyā-tantra, Caryā-tantra, Yoga-tantra, and Anuttara-tantra. The first two classes are called 'lower Tantras' inasmuch as they are concerned with the rites, ceremonies, worship of gods and goddesses and other practices; and the latter schools are known as 'higher Tantras' inasmuch as they describe yogic processes for the realisation of the ultimate truth and also contain discussions on the nature of the ultimate reality³.

¹ We do not, however, find any direct mention of the Pañca-ma-kāras in the Buddhist Tantras; but we find sporadic mention of wine, fish, meat, etc. and much of Mudrā and sexual intercourse. We also find frequent reference to the Pañca-kāma-guṇa or five objects of desire through the enjoyment of which perfection can be attained.

² The original name Mantra-yāna is also often found used in a general sense for later Buddhist Tāntric schools. Cf. Hevajra-pañjikā, MS. (Cambridge Add. No. 1699), p. 45(B); Advayavajra-saṅgraha, p. 54 (G.O.S.); commentary on the Dohākosa of Kānha-pāda, verse No. 12.

³ In this connection compare also four divisions in the arrangement of the Vaiṣṇava-tantras (found in the Padma-tantra), viz., Jñāna-pāda, Yoga-pāda, Kriyā-pāda and Caryā-pāda. (See J.R.A.S., 1901, p. 900.)
There is still another customary way of dividing Tāntric Buddhism into three schools, *viz.*, Vajra-yāna, Kāla-cakra-yāna and Sahaja-yāna. This division seems to us erroneous inasmuch as Kāla-cakra-yāna and Sahaja-yāna seem to us to be schools within Vajra-yāna. MM. H. P. Śāstrī speaks of Nāthism as another school of Tāntric Buddhism. As we shall devote separate chapters to the problems regarding the nature, origin and growth of Nāthism we do not propose to discuss at this stage the question of its relation to Tāntric Buddhism. The problem of Kāla-cakra-yāna, however, appears to us perplexing. About its nature Waddell says in his *Lajnaism,*—"In the tenth century A.D., the Tāntric phase developed in Northern India, Kasmir and Nepal into monstrous and polydemonist doctrine, the Kāla-cakra, with its demonical Buddhas, which incorporated the Mantrayāna practices, and called itself the Vajrayāna, or the 'Thunderbolt-vehicle,' and its followers were named Vajra-carya, or, 'followers of the Thunderbolt.'"4 In another place he says—"The extreme development of the Tāntric phase was reached with the Kāla-cakra, which, although unworthy of being considered as a philosophy, must be referred to here as a doctrinal basis. It is merely a course of Tāntric development of the Adi-Buddha theory combined with puerile mysticism of Mantrayāna, and it attempts to explain creation and the secret powers of nature by the union of the Kāli, not only with the Dhyani Buddhas, but even with Adi-Buddha himself." The account and interpretation given by Mr. Waddell seem to us to be based on confused ideas about Tibetan Buddhism. We have not yet been able to discover the reason behind the general tendency of associating the name Kāla-cakra-yāna with the terrible aspect of Tāntric Buddhism. MM. H. P. Śāstrī, however, says on this point, "What is Kāla-cakra-yāna? The word Kāla means time,—death and destruction. Kāla-cakra is the wheel

---

1 See the introduction to *Śādhana-mālā,* Vol. II, by Dr. B. Bhaṭṭācārya.
2 See the introduction by MM. H. P. Śāstrī to *Modern Buddhism and its Followers in Orissa* of Mr. N. Vasu.
3 Vide infra.
4 *Lamaism,* by Waddell, p. 15.
of destruction, and Kāla-cakra-yāna means the vehicle for protection against the wheel of destruction.” But this explanation of MM. Śāstrī is not confirmed by any textual evidence.

The traditional view concerning the origin of Śri-kāla-cakra-mūla-tantra, which is recorded in the Abhinīśramana Sūtra² is that it was delivered by the Buddha at Śri Dhanya Kaṭaka. Regarding this system Csoma de Koros says that it was introduced in India from Śambhala at about 965 A.D.

We have at our disposal a text of the Śri-kāla-cakra-tantra³ a study of which does not substantiate the statement that Kāla-cakra-yāna is that school of Tāntric Buddhism, which introduced demonic Buddhas in it,—at least, it is not the main characteristic by which the school should be recognised. In the text at our disposal the Lord has explained how the universe with all its objects and localities are situated in the body and how time in all its divisions and sub-divisions (viz., day, night, fortnight, month, year, etc.) is within the body in the processes of the vital wind (prāṇa-vāyu). In the text Sahaja has been explained and also the details of the sexo-yogic practice for the attainment of the Sahaja. The only thing that strikes the reader is the stress laid on the control of the vital winds (prāṇa and apāṇa) and the results attained thereby. A study of the commentary on the text (Laghu-kāla-cakra-tantra-rāja-tīkā, entitled Vimala-prabhā) also reveals no fundamental difference between the tenets of Vajra-yāna Buddhism and those of Kāla-cakra-yāna. The stress on yoga seems, however, to be the special feature, if there be any at all, of Kāla-cakra-yāna.

It is interesting to note here that similar doctrines of Kāla-cakra are elaborately described and explained in a fairly old text like the Tantrā-loka of Abhinava Gupta. The sixth chapter of the Tantrā-loka (which is a fairly big chapter) is devoted to the exposition of the doctrine of Kāla (time) and the process of keeping oneself above the influence of the whirl of time. Time (Kāla) in all its phases (day and night, fortnight, month, year, etc.) has been explained

¹ Modern Buddhism, etc., Introduction, p. 8.
² Pag Sam Jon Zang., p. 37.
³ MS. Cambridge Add., 1364.
here mainly with reference to the functions of the vital wind (mainly prāṇa and apāna) spread through the whole nervous system and the process of controlling time is to control the vital wind in the nerves through yogic practices.

(iv) Mode of Transformation of the Main Ideas of Mahāyāna to those of Tāntric Buddhism

Before we pass on to the fundamental characteristics of Sahaja-yāna, on which the Caryā-padas are based, we deem it necessary here to make a very short survey of the mode of transformation of some of the philosophical ideas of Mahāyāna Buddhism into those of Tāntric Buddhism. Tāntricism seems to be a religious under-current, originally independent of any abstruse metaphysical speculation, flowing on from an obscure point of time in the religious history of India. With these practices and yogic processes, which characterise Tāntricism as a whole, different philosophical, or rather theological, systems got closely associated in different times, and the association of the practices with the fundamental ideas of Mahāyāna Buddhism will explain the origin and development of Tāntric Buddhism. Being associated with the Tāntric system the fundamental ideas of Buddhism underwent a great change; or it may also be that the transformation of the fundamental ideas by lay people, who were indiscriminately admitted into the school of Mahāyāna, facilitated the association of Buddhism with Tāntricism. There seems to have been a mutual interaction between the cause and the effect in either case.

In this mode of transformation the most important point is the transformation of the idea of Śūnyatā (vacuity) into the idea of Vajra, or the thunderbolt. The Śūnyatā-nature of the world is its ultimate immutable nature, as immutable as the thunderbolt, and so it is called the Vajra. It has been said in the Advaya-vajra-saṁgrabha,—“Śūnyatā, which is firm, substantial, indivisible, impenetrable, incapable of being burnt and imperishable, is called the Vajra.” This trans-

\[\text{Advaya-vajra-saṁgrabha (G.O.S.), p. 37.}\]
\[\text{Cf. also, abhedyayām vajram ity ukṣat—Hevajra-tantra,}\]
\[\text{MS. (A.S.B., No. 11377), p. 2 (A).}\]
formation of Śūnyatā to Vajra will explain the title Vajra-yāna and in Vajra-yāna all the gods, goddesses, articles for worship, yogic practices and elaborate rituals have been marked with Vajra to specialise them from their originally accepted nature. The supreme deity of Vajra-yāna is the Vajra-sattva (vajra=śūnyatā=vacuity; sattva=quintessence), who is of the nature of pure consciousness (vijñāpti-mātratā of the Vijñāna-vādin Buddhists) as associated with Śūnyatā in the form of the absence of subjectivity and objectivity. All the other gods of Vajra-yāna are generally marked by a miniature figure of the Vajra-sattva in the crest. This Vajra-sattva as the Lord Supreme has been described by and invoked with various attributes in all the Tantras belonging to Vajra-yāna.

The Vajra-sattva is often found in the Buddhist Tantras conceived exactly in the manner of the Upaniṣadīc Brahman. It is the Self in man,—it is the ultimate substance behind the world of phenomena. It is often spoken of as the ultimate reality in the form of the Bodhi-citta. The Mahāyānic idea of Bodhi-citta also underwent a change beyond recognition in esoteric Buddhism. Originally it was conceived as the mental state in which there is nothing but a strong resolution for the attainment of perfect wisdom (bodhi) combined with a strong emotion of universal compassion. Thus Bodhi-citta presupposes two elements in the Citta, viz., Śūnyatā (i.e., the knowledge of the nature of things as pure void) and Karuṇā (universal compassion). This Bodhi-citta, with the elements of Śūnyatā and Karuṇā in it, marches, after it is produced, upwards through ten stages and in the final stage of Dharmamegha it attains perfection. In the practice of Vajra-yāna particularly in Sahaja-yāna (where Śūnyatā and Karuṇā, the two elements to be united together for the production of the Bodhi-citta, were identified with the female and the male or Prajñā and Upāya) Bodhi-citta is conceived as the extremely blissful state of mind produced through the sexo-yogic practice. In yogic practices the union of the seed and the ovum is also known

śūnyatā vajra ity uktam—Jvalāvalī-vajra-mālā-tantra

as Bodhi-citta and it has been held that in the process of production this Bodhi-citta acquires the nature of the five elements, \textit{viz.}, earth, water, fire, air and ether and thus it stands as the ultimate substance of the universe.\footnote{Dohākoṣa of Kāṇha-pāda. Dohā No. 7. See also Hevajra-tantra, MS. (A.S.B., No. 11317), pp 37(B)-38(A); also Sāṃpuṣṭikā MS. (A. S. B., No. 4854), pp. 47(B)-48(A).}

Closely related to the history of the transformation of the idea of Bodhi-citta is the history of the transformation of the ideas of Śūnyatā and Karuṇā into the ideas of the female and the male. In Mahāyāna texts we find that Śūnyatā is Prajñā, \textit{i.e.}, perfect knowledge of the void-nature of the self and the Dharmas. Karuṇā or universal compassion is called the Upāya, \textit{i.e.}, the means or the expedience for the attainment of the Bodhi-citta. These two terms, Prajñā and Upāya, are found already used by the Tathatāvādin Aśvaghoṣa as well as by Nāgārjuna, the exponent of the Mādhyamika school.\footnote{See Aśvaghoṣa’s Mahā-yāna-śraddhotpāda-sūtra translated as the \textit{Awakening of Faith in Mahāyāna} by Suzuki, pp. 66, 99. Cf. also Mādhyamika-vrtti of Nāgārjuna, La Vallee Poussin’s edition, p. 2.} Upāya is generally explained in the Mahāyānic texts like the \textit{Saddharma-puṇḍarika}\footnote{Saddharma-puṇḍarika, Ch. II, Bibliotheca Buddhica publication, pp. 28-58.} and the \textit{Bodhisattva-bhūmi}\footnote{The \textit{Bodhisattva-bhūmi} is but the fifteenth section of the \textit{Togācāra-bhūmi} of Vasubandhu. Edited by Unrai Wogihara, Tokyo, pp. 261-72.} as missionary works which are prompted by universal compassion for the suffering beings. This Prajñā as perfect wisdom was conceived as absolutely passive, the negative aspect of the reality and the primordial source of all entities; whereas Upāya, because of its dynamic nature, began to be conceived as the positive and the active aspect of the reality. Upāya brings into existence in the phenomenal world all the entities, the possibility of which lie in the Prajñā or the void. Unlike the Sāṅkhya system and the popular Vedāntic thoughts, the negative or passive or the unqualified aspect of the reality as perfect knowledge was conceived as the female in the Buddhist school,—and the positive or active principle was conceived as the male. When thus the idea of the male and the female could once creep into Buddhism the whole outlook began to change, and the production of Bodhi-citta through the unification of void-knowledge and universal compassion was trans-
formed into the production of great bliss through the yogic union of the female and the male.

We shall see later on that with this identification of Prajñā and Upāya with the female and the male the idea of Śakti and Śiva was established in the Buddhist Tantras,—and through this transformation of Prajñā and Upāya to the female and the male the sexo-yogic practice could be associated with Mahāyāna philosophy. Again, consistently with the theory of all the Tantras that the human organism is but an epitome of the universe and that all truth is within this body, the Tāntric Buddhists had to locate all the philosophical truths within this physical organism,—and in that attempt Prajñā and Upāya have been identified with the two important nerves in the left and the right of the Spinal Chord, and these nerves are known in yoga-literature in general as Idā and Piṅgalā, the moon and the sun, the left and the right, vowels and consonants, etc.¹ The middle nerve, corresponding to the Suṣumnā of the Hindu Tantras, is called the Avadhūtikā through which Bodhi-citta passes in its upward march from the Nirmāṇa-cakra (cf. the Nirmāṇa-kāya of Buddha), which is situated in the region of the navel, first to Dharmacakra (cf. Dharma-kāya) in the heart and then to Sambhogacakra (cf. Sambhoga-kāya) in the neck and thence it passes to the lotus in the head producing supreme bliss.

In this connection we should take notice of the import of the concept of Advaya (non-duality) and Yoganaddha (principle of union) as we find them in esoteric Buddhism. Originally the word Yoganaddha implies the synthesis of all duality in an absolute principle of unity. This principle of Yoganaddha or union is very clearly explained in the fifth chapter (Yoganaddha-krama) of the Pañca-krama. It is said there that Yoganaddha is a state of unity reached through the purging off of the two notions of the world-process (samsāra) an absolute cessation (nirvāṇa), through the realisation of the ultimate nature of both the phenomenal (saṃklesa) and the absolute (vyavādāna), through the synthesis of thought-constructions of all corporeal existence with the notion of the formless. It is the unification of the

¹ See Infra.
Grāhya (perceivable) with the Grāhaka (perceiver), of the temporal with the eternal, of Prajñā (perfect knowledge) with Karuṇā (universal compassion). To enter into the final abode or the 'thatness' (tathatā) in body, speech and mind and thence to come down again and to turn to the world of miseries,—to know the nature of Samvṛti (the provisional truth) and the Paramārtha (the ultimate truth) and then to unite them together—this is what is called the immutable state of Yukanaddha. In the Yukanaddha-prakāśa of Advaya-vajra-sāṅgraha we find that the nature of the union of Śūnyatā and Karuṇā is incomprehensible; they remain always in union. In the Prema-pañcaka of the same text Śūnyatā has been spoken of as the wife and Karuṇā, which is the manifestation of Śūnyatā, has been spoken of as the husband and the relation between them is that of conjugal love, which is but natural (sahajam pañca). So inseparable are they in their deep love that Śūnyatā without her husband, manifestation, would have been dead and Karuṇā (or Kṛpā) without Śūnyatā would have always suffered bondage. In the Sādhanamālā it has been said that the one body of the ultimate nature which is the unity of both Śūnyatā and Karuṇā is called the neuter (napuṁsaka) or as Yukanaddha.

This principle of Yukanaddha is the same as the principle of non-duality (advaya). The principle of conjugal union (maithuna or kāma-kalā as it is called in the Kāma-kalā-vilāsa) of the Śaiva and Śākta Tantras originally refers to the same principle. There also the designations of the

male and the female or of the seed and the ovum were used originally to explain the two aspects of the absolute reality, static and dynamic, negative and positive; and their union refers to the unity in the ultimate truth. But though this analogy of the male and the female or of the seed and the ovum has often been declared to be merely a mode of expression,¹ yet in practice it has, more often than not, been taken as real in both the Hindu and the Buddhist Tantras. We have seen that the two cardinal principles of Šunyatā and Karuṇā or Prajñā and Upāya were transformed in Vajra-yāna to the female and the male, and this will explain the representation of the Tāntric Buddhist gods and goddesses in a state of union. Closely associated with the idea of Advaya and Yuganaddha is the idea of Sama-rasa or the sameness or oneness of emotion. In a deeper sense Sama-rasa means the realisation of the oneness of the universe amidst all its diversities,—it is the realisation of one truth as the flow of a unique emotion of all-pervading bliss. In the Hevajra-tantra it has been said that in the Sahaja or the ultimate state there is the cognition of neither Prajñā nor of Upāya,—there is no sense of duality of difference anywhere; in such a state everything,—whether the lowest, or the middle or the best—should be realised as the same.² The self should be realised as neither something static, nor something dynamic; through the transcendent meditation on the underlying oneness of the cosmic principle everything should be viewed as of the same character and function.³ All the entities come out of transcendent knowledge of the form of Sama-rasa,—they are all equal and non-dual in nature.⁴ When through the yogic process

one enters into the state of supreme bliss (Mahā-sukha), the whole world becomes of the form of unique emotion in the nature of Mahā-sukha, and through this unique emotion of bliss the whole world as static and dynamic becomes one. This Sama-rasa has been extensively used in many of the Buddhist as well as Hindu Tāntric texts to signify the union of Prajñā and Upāya, or of the Śakti and the Śiva, or rather to signify the intense bliss that is derived from the sexo-yogic practice, which, in its highest intensity, has got the capacity of producing an absolute homogeneity in the psychical states and processes.

The other important innovation in Tāntric Buddhism is the idea of Mahā-sukha (supreme bliss) which evolved from the idea of Nirvāṇa in earlier Buddhism. Etymologically the word Nirvāṇa may mean either the final stoppage to a flow,—i.e., complete cessation of the cycle of birth and death;—or it may mean ‘blowing out’ as in the case of a lamp;—or the eternal tranquillity resulting from the cessation of all the Vāsanā (root-instincts) and Saṃskāras (deep impressions). In either case, from the idea of complete cessation and perfect tranquillity developed the idea of perfect peace in Nirvāṇa. There is, of course, a lot of controversy over the question whether Nirvāṇa is any positive state at all; without entering into the philosophical subtleties involved in the question, we may say that in popular belief as represented through the popular Pāli literature Nirvāṇa was conceived as something positive. Though in Pāli literature Nirvāṇa is often described as something unspeakable, yet in course of poetic description we find it described as supreme (param) tranquil (santa), pure (visuddha), excellent (panita), calm (santi), immutable (akkhara), eternal (dhruva), true (sacca), infinite (ananta), unborn (ajāta), uncreated (asamkhata, akata), all alone (kevala), and all good (siva). It is, as Rhys Davids puts it,—“the harbour of refuge, the cool cave, the island amidst the floods, the place of bliss, emancipation, liberation, safety, tranquillity, the home of ease, the calm, the end of suffering, the medicine for all evil, the unshaken,

3 A Dictionary of Pāli Language. See the word nibbāna.
the ambrosia, the immaterial, the imperishable, the abiding, the further shore, the unending, the bliss of effort, the supreme joy, the ineffable, the holy city, etc." Nirvāṇa is spoken of in many popular Pāli texts as not only something positive, but as a state of infinite bliss.¹ In the Vijnāna-vāda school of Mahāyāna Buddhism pure consciousness as bereft of the notions of the knower and the knowable has been spoken of as the ‘element of Nirvāṇa’ (nirvāṇa-dhātu); and this pure consciousness (vijnapti-mātratā) has been described in the Vijnapti-mātrātā-siddhi of Vasubandhu as “the immutable element which is beyond the reach of all mentation; it is all good, permanent, perfect bliss,—it is liberation, the substance itself.”²

This positive aspect of Nirvāṇa as supreme bliss or Mahā-sukha was emphasised in Tāntric Buddhism and in later times Nirvāṇa and Mahā-sukha were held to be identical. Nirvāṇa is described frequently in the Tantras as incessant bliss (satata-sukhamaya),³ the place of both enjoyment and liberation, changeless supreme bliss, the seed (bijā) of all substance (vastu), the ultimate state of those who have attained perfection, the highest place of the Buddhas, called the Sukhāvatī.⁴

Gradually the idea of Mahā-sukha began to acquire a cosmological and ontological significance in the various schools of Tāntric Buddhism. As Mahāyāna Buddhism often speaks of Nirvāṇa as the ultimate reality—as the Dharma-kāya, which is neither existence nor extinction,—so also the Mahā-

⁴ Guhyā-siddhi of Padma-vajra. MS. (C.L.B. No. 13124), pp. 13(A)-13(B).
sukha is variously described in the Buddhist Tantras as the ultimate reality transcending, or rather absorbing within it, both existence (bhava) and extinction (nirvāṇa). It is described as something which has neither beginning nor middle nor end; it is neither existence nor annihilation, neither the self nor the not-self.¹ The Mahā-sukha is the Lord Vajra-sattva of the nature of the unity of Prajñā and Upāya; it is the non-dual quintessence of all the entities.² It is the Bodhi-citta or perfect enlightenment combined with compassion.³ In the Hevajra-tantra it has been said that Sukha or bliss is the ultimate reality, it is the Dharmakāya, it is the Lord Buddha Himself. Sukha is black, it is yellow, it is red, it is white, it is green, it is blue, it is the whole universe; it is Prajñā, it is Upāya, it is itself the union; it is existence, it is non-existence, it is the Lord Vajra-sattva.⁴

When Nirvāṇa was thus identified with a state of supreme bliss, the attainment of an absolute state of supreme bliss was accepted to be the *summum bonum* of life by all the Tāntric Buddhists.⁵ For the realisation of such a state of supreme bliss they adopted a course of sexo-yogic practice. This conception of Mahā-sukha is the central point round which all the esoteric practices of the Tāntric Buddhists grew and developed.

After this brief account of the general characteristics of Vajra-yāna Buddhism or Tāntric Buddhism in general, and after indicating the mode of transformation of the cardinal principles of Mahāyāna into the esoteric doctrines of Vajra-yāna, let us now concentrate our attention on the study of the old Bengali Caryā-songs and the cognate Dohās, which explain the special features of the Sahajiyā school of Buddhism.

CHAPTER II

THE GENERAL PHILOSOPHICAL STANDPOINT
OF THE CARYĀ-PADAS

The general philosophical standpoint of the Caryā-padas, as that of Tāntric Buddhist literature in general, represents unsystematised notions of Mahāyāna philosophy including the negativistic tendency of the Mādhyamikas and the positivistic tendency of Aśvaghoṣa and of the Vijnānavāda school led by Maitreya, Asaṅga and Vasubandhu. The influence of monistic thought is not also negligible. In many places the Buddhist Tantras, Dohās and songs have frankly accepted the monistic standpoint of the Upaniṣads and the highest reality, either in the form of the Vajra-sattva or the Bodhi-citta or the Mahā-sukha or the Sahaja, has been conceived exactly in the line of the Upaniṣadic Brahman. It may be observed in this connection that scholars have often discovered something behind the nothingness (śūnyatā) even of Nāgārjuna, who has described the reality as neither existent, nor non-existent, nor a combination of both, nor the absence of both; it is but what transcends the four logical categories (catuskoti). Again, it may be pointed out that the Abhūta-parikalpa (the increate) or the Vijnāpti-mātratā (pure consciousness) of the Vijnānavādin Buddhists approximates the Vedāntic conception of the Brahman in a striking manner. Of course, subtle points of difference there are, but they can very easily be, and have often actually been, missed by the untrained mind of ordinary thinkers. It is for this reason that the Mahāyānic ideas have frequently been confused or blended with the Vedāntic ideas; and we shall see that there is practically no difference between the Vedāntic idea of the reality and the idea of the Sahaja as conceived by the Sahajiyās. Kānha-pāda says

1 For a detailed discussion on the philosophical position of the different schools of Mahāyāna Buddhism and its relation to the Vedāntic thoughts, and also for a detailed study of the philosophical standpoint of Tāntric Buddhist literature in general reference may be made here to the study of the subject in the work An Introduction to Tāntric Buddhism by the present writer.
in a song that it will be a gross mistake to think that everything ends with the decay of this body. "My Citta," says the poet, "is perfect in vacuity; don't be sorry at the disappearance of the skandhas or the five elements. Say, how it can be that Kānha is no more,—for he is throbbing for ever pervading the whole universe. Only foolish people are sad at the sight of the decay of the perceivable;—can the flow of waves dry up the whole sea? Foolish people do not see people who are existent (in their subtle Sahaja form) as they do not find the cream that remains pervading the milk. Here, in this world, entities neither come nor go, yogin Kānha reveals in these thoughts."

The dominating philosophical note of the Caryā-songs is, however, of an inherent idealistic vein as associated with the various theories of illusion. As this idealism, associated with the theories of illusion, is common to the Mādhyamika and Vijñāna-vāda Buddhism as well as to Vedānta, we shall find a mixture of the philosophical views of these schools in the songs of the Buddhist Sahajiyā poets.

The first song of the Caryā-padas begins with the assertion that our mind (citta) is solely responsible for the creation of the illusory world. "In the unsteady mind"—says Lui-pā in one of his songs,—"enters Time," i.e., the disturbed mind is the cause of all our spatio-temporal experiences and the disturbance of the mind is due to the defiling principle of nature (prakṛty-ābhāsa-dōṣa-vasāt cāṇcalyatāyā, etc.—comm.).

 bhāga-taraṅga ki soṣai sāra ||
 mūḍhā acchante loa na pekhai
 dudha mājhein laḍa acchante na dekhai || etc.

Song No. 42.

As for the reading of the Caryā-padas the writer has generally accepted the readings suggested by Dr. P. C. Bagchi with the help of the Tibetan translation (J.D.L., Vol. XXX); but he has often differed from Dr. Bagchi, and the point's of difference with reasons and the suggested improvements have appeared in an article of the writer in the Bengali Monthly Śrī-bhāratī, (Vol. 1, No. 7). Dr. Bagchi's readings have, therefore, been accepted with the improvements suggested therein.

2 cāṇcalā cīt pāṭha koṭā || Ibid., Song No. 1.

This line has been explained in the commentary in an esoteric sense. Vide, Infra.
The notion of difference proceeds from the notion of existence (bhava). It is said, “They are three, they are three—the three are held different;—Kānuh says,—all (differences) are limitations due to the notion of existence.” The world of our experiences is only provisional (sāmr̥ti-satya) and the provisional nature of the world is revealed to us when we see that everything that comes also invariably goes, there is nothing permanent; all is an eternal flux of coming and going. It is said,—“Whatever came also went away; in this (rotation of) coming and going Kānuh has become convinced (of the unsubstantial nature of the fleeting world).” But everything is pure in the ultimate nature. Neither existence nor non-existence is impure in the least; all beings, produced in the six ways (sād-gatikā), are pure by their ultimate nature. The empirical world is like a dramatic device (nādapeḍā, Skt. nata-peatskī=basket for holding dress, etc. for the performance of drama) with nothing real in it,—it is merely an artifice of the mind. By pure knowledge the mind must first be tranquillised and when it becomes perfectly controlled all the forces of the illusory world are subdued. In that ultimate stage external objects of smell, touch, etc., remain as they were, but the perceptual knowledge of the whole world appears to be just like the perception of objects in a waking dream, i.e., the whole universal process seems to be a great dream, though we remain with our outward eyes open. In one song of Bhusukapāda, the mind (citta) has been compared to a fickle rat and it is said to be closely associated with the vital wind. It is said,—“Dark is the night and the play of the rat begins.” The dark night is the darkness of ignorance in which the function of constructive imagination goes on.

4 Ibid.  
5 Ibid., Song No. 9.  
6 Ibid., Song No. 12.  
7 Ibid., Song No. 13.  
8 Ibid., Song No. 21.
whereby you will escape coming and going. The rat causes existence and makes holes; this fickle rat remains inactive only when skilful devices are employed. This rat is Time or death itself (i.e., the fickle mind constructs all temporal existence),—but in it there is no colour. When it rises to the void it moves there and drinks nectar. The rat remains restless (as long as it is not pacified by the instructions of the preceptor); pacify it through the instructions of the wise preceptor. Bhusuka says,—when the activities of the rat will be destroyed, all bondage will also be destroyed.”

In another song of Bhusuka-pāda the mind has been compared to a deer. The song goes thus:—“Near whom and with whom am I living and in what way!—a clamour is rising around from all the four quarters. The deer has become the enemy of all because of its own flesh. I see, the hunters do not leave Bhusuka (who is like unto the fickle deer) even for a moment. The deer does not touch the grass nor does it drink water; the abode of the doe is not known to the deer. The doe says to the deer, hearest me, thou deer, leave this forest and become mad. While running in haste the hoofs of the deer are not seen,—Bhusuka says,—it does not enter into the heart of the ignorant.”

Here the deer represents the mind; due to the principles of defilement it is always surrounded by the hunters who are the miseries of life. As the deer is the enemy of all because of its own flesh, so also the citta itself is the cause of all its miseries; for, it itself constructs the world of miseries through its own activities. But when the deer citta is troubled thus amidst the miseries of life, then comes the doe or the goddess Nairātmā (essencelessness or perfect vacuity) to its help and she takes it away from this world beset on all sides with the hunters.

It has been said in another song,—“Going on constructing for himself (the notions of) existence and extinction, for nothing does man bring him under bondage.

1 Ibid., Song No. 6. It may be noted in this connection that the story of the deer and the doe is very popular in old and medieval folk-songs of the vernacular literatures. The saying that the deer is enemy to the world because of its own flesh is to be frequently met with in old and medieval vernacular literatures. The Siddhācārya has here made use of the popular imagery to explain the religious theory. We have already referred to a Hindi folk song which bears striking similarity with this song. See Supra.
We, the supralogical Yogins (acinta yoi), do not know how birth, death and existence come at all to be. Death is exactly the same as birth,—there is no distinction between being and dying. Let them, who are here afraid of birth and death, care for (the practice and ceremonies of) rasa and rasāyana.¹ Those who generally roam about (in the temples of) gods and goddesses become neither free from decrepitude, nor do they become immortal. It is not known whether there is karma due to birth, or there is birth due to karma; Saraha, however, says,—unthinkable is that abode.”² Due to the beginningless root-instincts (pāsanā) man falsely constructs the notions of existence and extinction and thus himself puts the fetters of bondage on him. When the citta becomes tranquillised there is no birth—no death,—no bondage—no liberation,—so all the differences between all theses and anti-theses vanish at once.

In another place Lui-pāda says,—“Existence does not come, neither is there non-existence;—who does understand the truth in this way? Incomprehensible indeed is the nature of pure consciousness,—says Lui; in the three elements it sports but it itself is not known. How can the Āgamas and the Vedas explain that, whose colour, sign and form are not known? By speaking of what, should I give an exposition of truth? Just like the moon in water it is neither real nor unreal. How should it be thought of?—says Lui,—I

¹ This evidently refers to the practice of the Rasāyana-school of yogins who tried to escape death through a yogic process akin to the process of Rasāyana (see infra). We may incidentally notice another practice held in the temple of the lamas of Tibet. It has been said:—“Another service, known by the Mongolian name Tūrungnikjī has for object the preparation of the lustral water (rasāyana). It includes prayer, absolution of sins, a recital of all the ablutions made by Sakya-muni, and finally Thanksgiving. Between the first and the second part of the rite is performed the preparation of the holy water. One of the priest’s assistants raises a mirror so that it reflects one of the statues of the divinities; another takes the vessel (kuje, Mongolian) filled with water and pours it upon the mirror. The water which flows off and is believed to have caught the image of the divinity is collected in a special dish (k’ris-ge’os—Tibetan) held by a third acolyte, while a fourth wipes the mirror with a silken napkin (Qadaq Mong.). Fifteen libations are made in this way and at the end of the ceremony the lustral water is poured off into a bum-pa and set on the sacrificial altar. Thereafter it is used for the aspersion of offerings and washing the mouths of the ‘Lamas’, while among the laity it serves the same purpose as does holy water among Catholics.” Introduction by J. Deniker to the Gods of Northern Buddhism—by Alice Getty, p. xi.
² Song No. 22.
do not see any magnitude or locality of what I am now (i.e. mahā-sukha).”

Here also the phenomenal world is described as neither existent, as we do not find any reality anywhere by analysing it,—nor is it non-existent, as non-existence itself is unreal (asad-rūpavāt); it is not real as it has no ultimate nature (paramārtha-satya) neither is it unreal as it has got its provisional truth (saṁvrti-satya);—it is just like the moon in the water. The ultimate truth, however, can never be explained,—for, there is no knower, no knowable—no knowledge in it, the citta being perfectly tranquil there. It has been said,—‘When one practises yoga with one’s mind fixed in pure wisdom, none can ascertain where the citta goes and where it remains. It has also been said by Āryadeva,—“When the mind, the senses and the vital wind are all destroyed, I do not know where the self goes and enters...

As the moon manifests itself as the rays (so also the citta manifests itself in the various illusory constructions, i.e., vikalpa); but as the moon having set, all the rays vanish, so also when the citta is destroyed all its modes and modifications vanish.” It is again said,—“The moon having set, all her rays vanish indeed; exactly in the same way, when the citta is merged in the Sahaja-bliss, all the impurities of

false constructions are destroyed.” Bhāde-pāda says in one of his songs,—“Uptil now I was absorbed in self-illusion,—but now I realise the truth through the instruction of my good preceptor. Now my great citā is not,—it has fallen down into the ocean of the void. I behold the ten quarters all void,—without the citā there is neither any merit nor any demerit. The wise preceptor has explained to me all the illusions and I have destroyed them all in the void. Says Bhāde,—Taking that which is indivisible (i.e., non-dual), I have devoured the great mind.” The active mind brings in the question of morality; but when it is destroyed there is neither any morality nor immorality,—merit and demerit are all provisional. In another song of Saraha-pāda we find,—“O my mind, to drive away the impurities in the dream of ignorance the sayings of the preceptor are around you,—where shalt thou hide thyself and how? Curious indeed is the nature of illusion, through which the self and the not-self are seen; in this water-bubble of the world, the self is void itself in the Sahaja.”

In a song of Bhusuka-pāda the non-essential nature of the world and its illusory nature as mere subjective construction have been very nicely explained. It is said,—“Increase is the world from the beginning,—it is through illusion that it appears thus (in this form); but does a serpent actually bite the man who startles at the sight of the rope-snake? O wonderful yogin,—don’t stain your hands with salt,—if you understand the world to be of this nature, your Vāsanās will be eradicated. It is like a mirage in the desert,—it is like an imaginary city of the Gandharvas,—it is just like the reflection in the mirror,—it is just like the water becoming condensed and solidified by the whirl of wind and thus

becoming (solid like) stone: It is just like the son of a barren woman—sporting and playing various games,—it is like oil coming out of sand,—like the horns of the hare—like the flower in the sky. Rāuta says, or Bhusuka says,—Everything is of this nature, if you be a fool, ask your true preceptor for (the solution of) your doubts taking shelter at his feet. The world is as increate as the locks of hair (gossamer) seen flying in the sky by a man with defective eyes,—it is a product of constructive imaginations, which are in their turn produced by the three-fold impurities of the citta. It has been said,—‘I am as much a product of the mind as magic or dreams are.’ As water solidifies itself into hard stones through the whirl of wind, so also through the disturbance of Vāsanā voidness itself turns into all existence.

Bhusuka-pāda says in another song,—“The great tree of Sahaja is shining in the three worlds; everything being of the nature of void, what will bind what? As water mixing with water makes no difference, so also, the jewel of mind enters the sky in unity of emotion. Where there is no self, how can there be anything not-self? What is increate from the beginning can have neither birth, nor death nor any kind of existence. Bhusuka says, or Rāuta says,—this is the nature of all;—nothing goes or comes,—there is neither existence nor non-existence there (in Saha-
Kaṅkaṇa-pāda says in a song,—“When the void (i.e., the three-fold void of impurities) will merge itself in the void, (i.e., the fourth or the perfect void) the ultimate nature of all the objects will come within realisation.... The bindu and the nāda do not enter the heart and by seeing one (viz., vacuity) the other (viz., mind) is destroyed.... All clamour, says Kaṅkaṇa, merges into the roaring of Tathatā (thatness).” The bindu may be explained as the principle of subjectivity; the principle of objectivity is the nāda. This conception of the Śunya-tā as the negation of the knower and the knowable is the same as is found in the doctrine of the Vijñāna-vādins. In another song of Kānha-pāda the mind has been compared to a tree of which the five branches represent the five senses, and hopes and passions are the innumerable leaves and fruits. Kānha says,—“Cut the tree down with the axe of the great preceptor’s instructions so that the tree may not shoot forth any more. The tree grows up in the water of good and evil and the wise cut it down with the instructions of the preceptor. Those fools who do not know how to cut the tree and to split it, go astray and have to accept existence (and bondage with it). The tree is of the (defiled) void, and the axe is of the perfect-void,—cut the tree down, so that no root or branch be left.” Our mind becomes deeply entangled in the notion of existence and all the impurities associated with it, and the notion of good and

evil acts as the dynamic principle of disturbance behind the realm of the mind. In destroying this mind we should not try only to suppress the modes and modifications of the mind (compared to the branches of the tree), but the roots of the tree, *i.e.*, the Vāsanās should also be eradicated. Jayanandipāda says in another song that as we perceive in dream or in the mirror objects which have no reality in them, so also is the illusion of this world. When the mind is free from this illusion, all coming and going are stopped. At that stage none can be burnt, none can be wetted, none can be cut into pieces. But alas,—in spite of all these, in spite of seeing this, foolish people firmly bind themselves to illusion;—they perceive it—yet they bind themselves to this self-created false world. It is indeed astonishing that people would discard milk and take poison.

But the wise Kambalāmbara-pāda says in a song,—"I have filled my boat of compassion with gold (of void) and have left silver (of all false appearances) with the world. Kāmali (Kambalāmbara-pāda) is steering on towards the sky (void),—if once birth can be totally annihilated how can it recur again? I have (says Kambala) pulled the peg up and torn the rope of the boat,—and Kāmali is steering forward seeking at every step the instructions of the wise preceptor." Here the peg symbolises the impure principles of the active mind (*ābhāsa-dōṣāṇi*—com.) and the rope is made of the thread of book-knowledge (*vidyā-sūtram*—com). Thus, to proceed forward with the heart full of universal compassion, the Yogin must first uproot all the principles of

---

2 *āścaryam etaddhi manuṣya-loke kṣīrām paritvajja viṣam pivanti*.
3 There is a beautiful pun on the word *sōna* and *rāpā* here. *Sōna* may be derived from the Sanskrit word *śvarṇa* or *svaṅra* (gold) or from the word *śūnya* (*cf.* *sōna*, *verse 49*), and *śūnya* may here be very happily compared to gold. Again *rāpā* may be derived from the Sanskrit word *raupya* (silver) and it may also be associated with the word *rāpa* (form) and silver may also be compared to the illusory form when gold is compared to the void.

defilement in his mind and tear off the rope of scriptural knowledge. It has been declared by Saraha,—"The body is the boat, a pure mind is the oar—with the instruction of the wise preceptor take the helm (rightly). Make the mind quiet and then direct the boat on,—by no other means can one reach the other shore."  

The Caryā-padas, following the Tāntric texts, often speak of four gradations in the doctrine of Śūnyatā. In the Pañca-krama of Nāgārjuna-pāda the four gradations have been arranged in the following manner:—the first is the Śūnya, the second Ati-śūnya, the third Mahā-śūnya and the fourth or the final is the Sarva-śūnya,—and these are all different according to their cause and effect. The first stage Śūnya has been explained as light (āloka); it is knowledge (prajñā), and the mind (citta) remains active in it,—it is relative (para-tantra) by nature. In this state there are as many as thirtythree impure functions (dōsa) of the mind; these are sorrow, fear, hunger, thirst, feeling (vedanā), sympathy, self-analysis (pratyavēkṣā), kindness, affectionateness, fickleness, doubt, jealousy etc. This mental state of Śūnya has also been called the woman (strī) and it has been said that of all illusions the illusion of the woman is the greatest. It is also called the left (vāma), the lotus in the lunar circle,—and the first vowel. The second stage, viz., Ati-śūnya is said to be the manifestation of light (ālakā-bhāsa), which shines like moon-rays and proceeds from the

Also, sarveṣāṁ eva māyānnāṁ strī-māyāvā vītiṣyate ||
   Ibid., MS., p. 21 (A).
former (i.e., āloka-jñāna). It is called the Upāya and is of the nature of constructive imagination (parikalpita). It is also called the right (dakṣiṇa), the solar circle (sūrya-mandala) and the thunderbolt (vajra). Forty mental functions of defilement, such as passion, contentment, joy, pleasure, wonder, patience, valour, pride, energy, greed, etc., are associated with this state. The third stage, viz., Mahā-śūnya proceeds from the union of Prajñā and Upāya or āloka and āloka-bhāsa, or Śūnya and Ati-śūnya,—and it is called the intuition of light (āloko-palabdhi) and is of the absolute nature (parinispanna); and yet it is called ignorance (avidyā) and is associated with seven impure mental functions of defilement, viz., forgetfulness, illusion, stupor, laziness, etc. Thus āloka, āloka-bhāsa and āloko-palabdhi—these are the three stages of the citta from which there follow the principles of impurities, numbering hundred and sixty in all. They function throughout the whole day and night with the flow of the vital wind, which has been said to be the medium (vāhana) through which the impurities of nature function. It has been said, wherever there is the function of the bio-motor force or the vital wind, nature with all its impurities is also brought along with it, and so long as there is the function of this bio-motor force or the vital wind, the principles of impurity will not cease to function.

The fourth stage, viz., Sarva-śūnya (all-void or perfect void) is free from the three-fold impurities mentioned above, and is self-illuminant. It is absolute purity obtained by transcending the principles of defilement. It is the purified knowledge, the ultimate truth, the supreme omniscience. It is a state which can be said to be neither without beginning, nor with beginning,—neither without middle nor with middle, neither without end nor with end. It is beyond the categories of either being or non-being, merit or demerit, or even a combination or the absence of both.

1 The total number of the principles of defilement (prakṛti-dosa) are really eighty; (thirty-three in the first state of Śūnya, seven in the second and forty in the third state); but the number is doubled taking into consideration both day and night.

2 etāḥ prakṛtyāḥ sūkṣmāḥ śatam śaṣṭhī-uttaram dīvā
dītraiu cāpi ṣravartante vāyu-vāhana-hetund ||
Pañca-krama, MS., pp. 21(A)—21(B).

3 Ibid., MS., p. 30(A).
This theory of the four Śūnyas, as expounded in the Pañca-krama of Nāgarjuna-pāda seems to be the reminiscence of a similar doctrine of Śūnyas expounded in some Hindu and Buddhist texts. An exposition of the theory of seven Śūnyas is found in the old Tāntric text Svacchanda, a theory which found its echo in many of the subsequent texts of the Śaiva and Śākta literature. The Svacchanda contends that there are seven kinds of Śūnya, of which the first six are impure and contain the seeds of phenomenalism, whereas the seventh is the Supreme Reality itself, which is Pure Being and Consciousness and is free from all the Vikalpas. The doctrine of sixteen or eighteen Śūnyas as enumerated by Asāṅga or Diṅnāga (in the Madhyānta-bibhāga or the Aṣṭa-sāhasrikā-piṇḍārtha) and also by the Nātha writers is also of a similar character.

The theory of the four Śūnyas was accepted both in the Dohās and the Caryā-padas. In a Dohā of Kṛṣṇācārya it has been said that in the abode of Mahā-sukha there are four stalks and four leaves. Here the four leaves are the four Śūnyas, and the four stalks are the four sources. Sarva-śūnya is said to be the effulgent principle,—there is no higher truth than this. It is the abode of Avadhūti (i.e., the damsel of the nature of perfect bliss), it is the abode of the Jinas.

In the Caryā-padas and their commentary we find occasional reference to this theory of the four Śūnyas and the impurities of nature (prakṛti-doṣa), which are the cause of the cycle of birth and death and all the resulting sufferings, and they have always been prescribed to be eradicated. There

2 patta-cauṣṭha cau-mūnāla fhiha mahāsuha vāsā ।
Verse No. 5, Dr. Bagchi’s edition in the J. D. L. Vol. XXVIII. 1935
3 śāṅkā-śāṅkāsūrya-saraśāṃśāraḥ iti cauṣṭha-sūrya-svarūpena pata-cauṣṭha-
4 yam, catur aśi-svarūpena catur mṛśāla-saṁsthithāḥ, etc., Com.
5 sarva-sūnyāṁ prabhāsaram ato nāyac chūniyam tattvam asit’ ye arthoḥ Com.
This commentary on the Dohākṣa of Kāhna-pāḍa is, however, different from the commentary discovered and published by MM. Śāstri. It is found in a MS (B. N. Sans. No. 47, available in rotograph)., p. 43(A).
6 Ibid., MS., p. 57(A).
is a song of Dhenḍhaṇa-pāda, which may be literally translated thus,—"On a lofty height is situated my house; no neighbour have I. There is no rice in the earthen pot,—(guests) come every day……. The bull has given birth, but the cow is barren. The milk-pot is being filled with milk thrice in the day." The esoteric significance of the lines (in light of the commentary) is that when all the hundred and sixty impurities of nature pertaining to the body, word and mind all vanish away in the Mahā-sukha-cakra (which is compared to the house on the height), the neighbours, viz., the sun and the moon are gone; i.e., with the destruction of the prakṛti-doṣas all the functions of the sun and the moon are also destroyed. The mind with the three principles of impurity (ābhāsa-traya), compared, to the bull, gives rise to the notion of the external world, but barren is the non-essential void (compared to the cow). The Yigin always tries to destroy all these impurities (piṭa-piṭhakam, ābhāsa-doṣam). In another place Dārika-pāda says,—"Dārika revels on the other side of the sky; and this sky (gaana=gagana) has been explained in the commentary as the three-fold void or light discussed above. The final stage is the other side of the three-fold Śunya. In one song of Kānha-pāda it is said,—"On the arm of the void I strike with the ‘thatness’ and I plunder the whole storage of attachment and take away (all it contains)".

1 ṭalaṭa mora gharā nāhi padīvesī || hāditā bāṭā nāhi nī nī dosī || balada biśēla gaviā bāṁjhe || piṭā duhīā e tinā sāṁjhe || Song No. 33.
2 asadṛpaṁ kāya-cak-cittasya saṣṭhy-uttara-śata-prakṛti-doṣaṁ yasm(i)n samaye mahā-sukha-cakre layaṁ gataṁ tad eva mama grham., etc. Ibid. Com., p. 51.
3 Cf. Com. pārśvastha-candra-sūryou.
4 Candra-sūrya may here imply subjectivity and objectivity,—or, the two-nerves in the left and the right; about this we shall have detailed discussion later on.
5 balada ityādi—baḷaṁ mānasād deha-vigrāhāṁ dadaīti baḷadas tad eva bodhi-citta(m) ābhāsa-traya-prastutam. Com. p. 52, (Sāstri’s edition).
6 dohanam iti niḥsvabhāti-karanaṁ kriyate sandhyā-trayam iti ahaṁ- niṣaṁ yogin-dreṇe’ti. Ibid., Com. p. 52.
7 bilaṣai dārika gaanata pārimakuleṁ. Ibid., Song. No. 34.

9 suna bāha tathātā pahāriḥ || mohya-bhaṅgāra lai saalā ahāri || Ibid., Song. No. 36.
whole storage of attachment was in possession of the threefold Śūnya; the arms of this threefold Śūnya are struck with the perfect-void (sarva-śūnya) which is ‘thatness’, and the Śūnya is thereby undone; then the whole storage of illusory attachment is plundered and all that it contained is taken possession of. In the commentary this three-fold Śūnya has been explained as the storage of the Vāsanās,¹ which are responsible for the illusory world. In another song of Kānha-pāda it is said,—‘Split up the two; O lord, you are also dead.’² According to the commentary the two refers to the first two principles of impure knowledge (ābhāsa-dvayam), i.e., Śūnya and Ati-śūnya; the lord (śākura) represents the third stage of Mahā-śūnya or the ignorant mind (avidyā-citta). After splitting up or destroying the two principles of the defiled void, the third or the avidyā-citta is also to be killed. It is further said in the same song,—“First I took the vādiā and killed it by a dash and then taking the great elephant destroyed the five.”³ Here the esoteric doctrine is explained in terms of the game of chess. The vādiā in the game represents the infantry, but here it represents the hundred and sixty kinds of impurities.⁴ First the impurities must be shaken off and then raising the mind (gaavara—gaja-vara—citta-gajendra) the five Skandhas are destroyed. Again in a song of Śavara-pāda we find that he has awokened the Nairātmā damsel by destroying Śūnya, Ati-śūnya and also the adjoining house (i.e., Mahā-śūnya) by the stroke of the fourth Śūnya of his heart,⁵ and by the side of

¹ suna ity ādi śūnyam iti | āloko-palabdhi-sandhyā-jñānena vāsanā-gārānaḥ bodh-dhavam | Ibid., Com. p. 56.
² Dr. Shahidullah, however is disposed to explain mādesi re śākura as ‘don’t give the lord anything’ (mā don’t, desi give) (Cf. his pamphlet, Dacca Sāhitya-Parasad-granthāvali, No. 10); but mādesi may also be explained with reference to the Prakrita form madesi (√ mṛ) and the latter derivation gives a more suitable meaning. Dr. Shahidullah in his Les Chants Mystiques de Kānha et de Sūraha (p. 119) takes the reading as—phīlau duāra dekhī re śākura (La porte est otverte. Oh! Jai vu le seigneur. Ibid., p. 119). Dr. P. C. Bagchi takes the reading as—phīlau duā māresīre śākura. (Materials for, etc. Dr. Bagchi, p. 119).

the adjoining house (*i.e.*, Mahā-śūnya) shines another house lit with moon-rays, and when all the mass of darkness is driven away—the sky shines with lustre.¹ This last house is the Sarva-śūnya (all-void).

As we have seen, Mahāyāna Buddhism do not recognise Śūnyatā or the knowledge of the essencelessness of the world to be the highest truth,—the highest truth is a state where Śūnyatā and Karuṇā are united together. This element of Karuṇā or compassion is emphasised in all the Buddhist Tantras, and all the esoteric practices including the sexoyogic practice are professed to be undertaken with the avowed intention of liberating the whole world. This emphasis on the element of Karuṇā side by side with the theory of Śūnyatā is found also in the Caryā-padas. We have seen that Kambalāmbara-pāda filled his boat of Karuṇā with the gold of vacuity.² In the song where Kānha-pāda explains the esoteric doctrine by the metaphor of the chess-game, compassion is made the play-board.³ In another song he says that he has realised his body (*i.e.*, existence) in a non-dual state of compassion and vacuity.⁴ The commentary on the Caryās explains that all the Caryā-songs were composed by the Siddhācāryas only for the uplift and ultimate deliverance of the beings.

The philosophical notions found in the Caryā-songs are of a general Buddhistic nature; but the Caryā-songs as a whole represent a special school of religious thought with distinctive features of its own. Let us concentrate our attention on the study of the special features of the school of religious thought, to which the Caryā-songs belong, *viz.*, the school of Sahajiyā Buddhism.

CHAPTER III

THE GENERAL RELIGIOUS OUTLOOK
OF THE SAHAJIYĀS

(i) Salient features of the religion preached in the Buddhist Dohās and Songs

(A) The Spirit of Protest and Criticism

The poets of the Sahajiya school laid their whole emphasis on their protest against the formalities of life and religion and this made them distinct in their religious attitude from the Vajra-yānists or the general school of Tāntric Buddhism. Truth is something which can never be found through mere austere practices of discipline; neither can it be realised through much reading, philosophising, fasting, bathing, constructing images and painting the gods and goddesses; it is only to be intuited within in the most unconventional way through initiation in the Tattva (secret truth) and the practice of yoga. This process of yoga is the most natural process for a man; for in the nature of man hunger and sex are recognised by all to be the most primitive and fundamental propensities; and all religions would prescribe strict rules for their suppression; but that is a way, said these Yogins, which is absolutely unnatural. The continual suppression of natural propensities only makes a man morbid and neurotic, but never helps him in realising the truth. The Sahajiyaś would never prescribe any unnatural strain on human nature, but would take human nature itself as the best help for realising the truth. It is for this reason that this path has always been described as the easiest and most natural. It will be totally wrong to suppose that the question of moral discipline was in any way less emphasised in the sahajiya school (barring the cases of abuses and aberrations) than in the other schools of religion; but the difference of the view-point of the Sahajiyaś from that of other schools lies in the fact that while the other schools recommend the total annihilation of the sexual impulse, the Sahajiyaś would recommend the transforma-
tion and sublimation of them. The question of annihilation is regarded by the Sahajiyās as unnatural and impossible, and therefore, the wisest way is the way of transformation and sublimation.¹

Thus the name Sahaja-yāna is doubly significant: it is Sahaja-yāna because its aim is to realise the ultimate innate nature (Sahaja) of the self as well as of the Dharmas, and it is Sahaja-yāna also because of the fact that instead of suppressing and thereby inflicting undue strain on the human nature it makes man realise the truth in the most natural way,—i.e., by following the path along which the human nature itself leads him. In the Sampūṭikā it has been said that this supreme process of yoga is eternal,—it originates from our sex-passions; our sex-passions are part and parcel of our nature and our nature is never transgressible,—it is, therefore, wise to transform these sex-passions in the yogic process for realising the truth.² What is natural is the easiest and thus Sahaja, from its primary meaning of being natural, acquires this secondary meaning of being easy, straight or plain. In a song Śānti-pāḍa says that truth is purely of a self-intuited nature, there cannot be any speculation as to its transcendental nature;—those who have trodden the straight path have been able to reach the other shore.³ Śānti-pāḍa warns the foolish beginners against missing this straight path (ujv-vāṭa),—it is called by him the royal road (rāja-patha) for attaining perfection. Again Sarahapāḍa says in a song,—"O Yogins, do not leave off this straight and easy path and follow the crooked and curved path;—bodhi lies near you,—do not go to Laṅkā (Ceylon) in search of it. Do not take the glass (dāpana) to see the bracelets in your hands,—realise your own pure citta for yourself (and within yourself).⁴ If the Sahaja or the Bodhicitta can once be realised, everything is attained,—and so there remains no more necessity for the muttering of the

¹ For further discussion on the point see infra.

mantras, or of penances, fire-sacrifices, Maṇḍala (circle) or the other rites in the Maṇḍala; the Sahaja or the Bodhicitta in the form of Mahā-sukha is the Mantra, penance, sacrifice, circle (maṇḍala) and everything belonging to the circle.¹

(B) Aversion to recondite scholarship

Thus we see that the Sahajiyās were averse to the elaborate formalities of religion and concentrated their whole attention on the attainment of the blissful ultimate nature as the highest truth, for which they took help of the natural propensities of man. Deepest was their hatred towards those recondite scholars who would try to know the truth through discursive reason. Tillo-pāda (and also Saraha-pāda) says that the truth which can fully be realised only by the self, can never be known by the scholars,—for, what comes within the scope of our mind, can never be the absolute truth.² Kānha-pāda also says that the scholars who generally depend on their reason and scholarship, are indifferent to (or rather ignorant of) the true path of religion.³ Saraha says,—Those who go on reciting and explaining, cannot know the truth, it is not only unknown, but also unknowable to them.⁴ Those who do not drink eagerly (to their heart’s content) the nectar of the instructions of the Guru, die of thirst like fools deceived by the mirage of the desert.⁵ Scholars explain the scriptures, but do not know of the Buddha who is residing in their own body; by such scholarship they can never escape the cycle of coming and going,—yet those

⁶ Ibid., p. 27.
shameless creatures think themselves to be Pundits.¹ Saraha regrets that the whole world is disturbed in its course of progress by mere thought-constructions of discursive reason,—by the mere functions of the citta,—but the acitta which transcends the function of the mind is not sung by any one.² The world is rather sick of scholarship,—none is illiterate here,—but Saraha says, all scholarship will be upset when one will attain that state which transcends all letters (i.e. scholarship).³ People pride themselves that the secret of the great truth has long been in their keeping,—but Kānha says that even out of crores of people rarely does one become absorbed in perfectly pure truth.⁴ They read the Āgamas, the Vedas and the Purāṇas and are always proud of their knowledge,—but they are like bees hovering round the ripe marmelos fruits.⁵ As the bees outside go on humming at the mere smell of the marmelos fruit but can never break into the hard kernel and have the taste of the fruits —so also is the case with all the scholars who boast of their knowledge of the truth; they can have only a very faint smell of the truth from outside, but can never break into it and have a direct realisation of it. Sahaja is something supreme, declares Kānha to all,—but the Pundits read and hear the scriptures and the Āgamas, and know absolutely nothing.

(C) Scathing Criticism of the Formalities of Life and Religion

The formal rules and regulations of religion were also severely criticised by the Sahajiyās. The most penetrating and scathing criticism was made by Saraha-pāda in his Dohākoṣa. His first revolt is against the orthodox system of

the fourfold division of colours (caturvarṇa) placing the Brahmins at the top. Saraha says that the Brahmins as a caste cannot reasonably be recognised to be the highest of men,—for the saying that they dropped from the mouth of Brahmā is a myth invented by a section of clever and cunning people; if, on the other hand, a man becomes Brahmin by religious initiations (śaṁskāra), then even the lowest of men may be a Brahmin. If a man becomes a Brahmin by reciting the Vedas, let the people of the lower classes also recite the Vedas and they will also become Brahmins; and they also do read the Vedas, for, they read grammar which contains many words of the Vedas. The Brahmins take earth, water, kuśa grass and recite Mantras and perform fire-sacrifices in their houses,—in vain do they offer ghee to the fire, for thereby their eyes will only be affected with intense smoke.¹ They become holders of singlefold or of three-fold sacred threads,—but this is of no avail unless truth is realised. Deceived is the whole world by false illusion,—none does know the all-excelling truth where both religion and non-religion become one. The devotees of the Lord (Īśvara), again, anoint the whole body with ashes, wear matted hair on the head, sit within the house and light lamps and ring bells seated in a corner; they take a yogic posture (āsana) with their eyes fixed; they whisper (religious doctrines) into the ears (of credulous people) and deceive them thereby.² The widows, the Munḍis (women taking the vow of fasting for the whole month)³ and others taking different vows, get themselves initiated by these devotees who do it only in greed of money (dakṣiṇā). Against the Jaina Kṣapaṇaka-yogins it is said that they keep long nails, put on a pale air, become naked and shave the head; but by all these they merely lead themselves astray and

³ munḍiti māsiko-pavāsikīyā—Com.
never attain perfection. "If only the naked attain libera-
tion, the dog and the fox would also attain it; if liberation is
attained by tearing off of hairs, the hips of young women
would also attain it; if liberation can be attained by merely
putting on the feathers of the peacock, then the peacock and
the deer should themselves attain liberation; if the eating
of grass ensure liberation, why should not elephants and
horses be liberated?" The Cellas, the Bhikṣus and the
Sthaviras (i.e., the elders)² take the vow of pravrajyā (i.e.,
renouncing the world and going away in search of truth);
some of them are lost in explaining the Sūtras, some again
in strenuous thinking and reading. Others again rush into
the Mahāyāna fold,—but none of them get at the ultimate
truth. The Lord (Buddha) has prescribed ways according
to the capacities of his disciples, but can one attain libera-
tion only by meditation?³ What will one do with lamps,
offerings, Mantras and services,—what is the good of going
to holy places or to the hermitage?—can liberation be
attained only by bathing in holy waters? Tear off all these
irrational ties of superstition, drive away all doubt,—no
mokṣa (liberation) can be compared with Sahaja,—and
all kinds of liberation are included in Sahaja. Sahaja is
what is read, what is gauged, what is explained in the scrip-
tures and the Purāṇas. Saraha says, "The world is bound
to existence by all kinds of nonsense,—the childish Yogins
like the Tirthikas and others can never find out their own
nature; they lead the life of Pravrajyā without knowing
the truth at all. One has no need of Tantra or Mantra, or
of the images or the Dhārāṇis—all these are causes of con-
fusion. In vain does one try to attain Mokṣa by meditation,⁴
—by meditation one will only be entangled in snares.
Through self-conceit the truth is never perceived,—but

prīchīgahane dīṭṭha mokkha (tā moraha samaraha) 1
ucchehī bhoanem hoī jāpa tā karīha tuṛaṅgha 1
Ibid.

² The commentary explains cella as daśa-sīkṣā-падि, bhikṣu as kośi-sīkṣā-падि
and sthavira as daśa-vargo-papannah.

³ mokkha ki lābbhī jhāna-(pa)viṭṭho 1  Ibid.

⁴ This jhāna (i.e., dhyāna) seems to refer to the system of meditation as
prescribed in the scholastic texts like the Visuddhi-magga, etc.
the blame is often put wrongly on the yānas (i.e., the ways or schools for attaining bodhi). All are hypnotised by the system of the jhāna (meditation), but none cares to realise his own self.¹ This is the truth which Saraha preaches,—never does he care for any Tantra or Mantra.²

Lui-pā says in a song,—“Of what consequence are all the processes of meditation? In spite of them you have to die in weal and woe. Take leave of all the elaborate practices of Yogic bandha (control) and false hope for the deceptive supernatural gifts, and accept the side of Śūnyatā to be your own.”³ “Of what use are Mantras, Tantras and the explanation of the different kinds of meditation?”⁴ Kānha-pāda says in another place that the Sahaja Đombi⁵ sells the loom (tanti) and bamboo-baskets⁶ (as is the general custom with the women of the Đoma classes). The word (tanti) which is derived from the Sanskrit word (tantri) suggests the net-work of the false mental construction which, again, can very well be compared to the loom, the only business of which is to weave; and the basket, referred to here, is symbolical of the superstitious mental complexes. Kānha-pāda explains elsewhere that conventional practices and the outward garment do not really make a man a Kāpālika Yogin. A real Kāpālika is he who shakes off all conventionalism and realises the great bliss of the nature of the Bodhi-citta (kaṁ mahā-sukhaṁ samvṛti-bodhi-cittam pālayat̄ti kāpālikah—com). The Yogin Kānha says that his nerves are fully under his control and the ādāra of the spontaneous sound⁷ is rising tremendously. Kānha, the Kāpālika Yogin,

⁵ The conception of the Đombi or Sahaja-damai will be explained later on.
⁶ tanti bikanaya đomui asaṛa nā cāmgeda||
   Song No. 10.

⁷ The text has anahā ādāra. The word anahā refers to the anāhata (literally, unobstructed; spontaneous) sound. It is held in the texts on Yoga that when all the senses are shut up and the nerves controlled and the breath suspended
is engaged in his yogic practices and is roaming about in the
city of his body in a non-dual form. The āli and the kāli, i.e.,
the principles of all kinds of duality are made the bell and the
anklets; and the sun and the moon (i.e., Upāya and Prajñā)
have been made the ear-rings. The poet has burnt into
ashes all his passions, hatred and false attachment and
is rubbing his body with the ashes therefrom; he is wearing
the pearl-necklace of final salvation. Again, for his Tān-
tric Sādhanā, which requires a female companion, the
poet has the Sahaja-damsel as his female consort. The
Yogin says that he has killed the mother-in-law of breath
(sāsu), and done away with the sister-in-law (naṇanda) of
his consort, which is the senses, and has also put to death
his mother (māa) of illusion (māyā), and thus Kānha has
become a real Kāpālikā.

It is interesting to note here that the Jaina Apabhraṣṭa.
Dohās which seem historically to synchronise with the
Buddhist songs and Dohās, are also strikingly similar in spirit:
as well as in form to the Buddhist songs and Dohās. The
spirit is well exemplified in the collection of Dohās called:
Pūhuḍa-dohā of Muni Rāma-simha (1000 A.D.).

through a yogic process there arises a spontaneous sound within, which is known
as the anāhata-dhūmi. For this theory of sound see An Introduction To Tāntric Bud-
dhism by the present writer. Beating of the drums is one of the customs of many
sects of Yogins and ascetics.

1 To roam about in different localities, generally in forests, lonely out-
skirts of villages and in cremation grounds is a custom with the Kāpālikā Yogins.
2 For a detailed discussion on the meaning of the pair of words āli and
kāli see infra and also An introduction To Tāntric Buddhism by the present writer.
3 Some sects of Yogins bear bells, anklets, ear-rings and such other orna-
ments.
4 There is a pun on the word sāsu here which may be associated with both.
Sk. śaḍra (the mother-in-law) and with Sk. śvaśa (breath).
5 Again there is a pun on the word naṇanda which may mean the sister-in-
law of a woman, or it may mean that which gives pleasure, i.e., the senses.
6 The word used is māa which may be associated with both the words mātā
(mother) and māyā (illusion).

Song No. 11

8 "As verse from this work are quoted by Hemacandra who wrote about
1000 A.D., and as it quotes verses from Sāvaya-dhamma-dohā which was composed.
it is said,—"O the Pundit of Pundits, you are leaving aside the grains of corn and gathering husk instead. You are satisfied with the scriptures and their meaning, but O ye foolish people—you know nothing about the ultimate meaning of the world. Those who are proud of their knowledge of bombastic words do not know the raison d'etre of things and like a Doma of a very low origin is always at the mercy of others. O fools, what is the utility of reading much? A single flame of real knowledge is sufficient to burn within a moment all virtue and vice. Everyone is impatiently eager to be a perfect man,—but perfection can be attained only through the purity of heart.\footnote{Much has been read, but foolishness has not been removed,—only the throat has been parched into the bargain. Read a single letter through which alone you may be able to go to the city of supreme goodness.} Caught up in the meshes of the six systems of philosophy the mind finds no way of getting rid of illusion. The one God is divided in six ways in the six systems, and hence none attains Mokṣa or liberation through them.\footnote{What can one do with the letters which will shortly die with the times? That is, O fool, called Mokṣa by which a man becomes changeless (anakkharu). What good can the reading of books render to a man whose mind is not pure? Even the hunter, when hunting a deer bows his head down before the deer (for throwing his arrow). (The idea is that actions have no objective value in the religious sphere,—the value is always subjective). You are getting emaciated by reading books of many kinds,—but even now you have no access to the mystery of coming and going.}"

About going on pilgrimage or wandering in forests and on mountains it is said,—"Prevent this elephant of the mind from going to the mountain of Vindhya,—for it will trample under feet the forest of Śīla (i.e., good conduct

\footnote{Prefer this elephant of the mind from going to the mountain of Vindhya,—for it will trample under feet the forest of Śīla (i.e., good conduct.}

\footnote{about 933 A.D. the present work may be taken to have been produced about 1000 A.D.} Preface to the Pāhuḍa-dohā by the editor of the text, Hiralal Jain. Ambāḍāsa Gavare Digambara Jainā Granthamālā, No. 3.

\footnote{Ibid., verse 116.}

\footnote{kiṁ kijjat bahu akkharahāṁ je kāliṁ khau janṭi\l jema anakkharu saṁtu muni tava vaḍha mokku kahaṁti || Ibid., verse 124.}

\footnote{Ibid., verses 146, 173.}
discipline) and once more fall into the pitfall of the world. There are stone-images in the temples, water in the sacred places and poetry in the books; all these will but be fuel to the fire (of decay). Of no avail is travelling from one sacred place to another; for the body may be cleansed with water, but what about the mind? When the body is being washed with water, the mind is being made dirty with the filth of sin, which cannot be washed away with water. What may penances do when there is impurity within? Hold fast your mind to the Nirañjana (the Stainless One) and only thereby will the stains of the mind be blotted out. Liberation can be attained only if the mind, stained with worldliness, be fixed on Nirañjana,—the Mantras and the Tantras are of no use. The Jinas say,—“Worship and worship;” but if the self residing within one’s own body be once realised in its ultimate nature, who else remains to be worshipped?

Again, it is said about people who are particular about their religious garb.—“The snake shakes off its slough, but its poison is not destroyed thereby. Putting on of religious dress can never remove the internal desire for worldly enjoyment. O, you, the head of all the shaven-headed,—you have indeed got your head shaven,—but you have not got your heart free from worldly desires;—he who has shaven his heart, i.e., has made his heart free from desires, has indeed done away with this world of bondage.”

The above will give us an idea of the spirit of Indian literature during the proto-vernacular period and the earliest period of the vernaculars. This spirit of heterodoxy and criticism that characterises the Buddhist and the Jaina songs and Dohās is a very noteworthy phenomenon in the history of the vernacular literatures of India; for, here we find the inception of a new type of literature, which grew abundantly in many parts of India during the medieval period, and the type is not extinct even in modern times. This type of literature is generally known as Sahajiyā or the Maramiyā

1 Pāhuda-dohā, Verses 155, 161-163, 178.
2 Ibid., Verses 61, 62, 206.
3 vāndau vāndau jīnu bhānai ko vāndau hali ithub
   niyadehān vasaṁtayahān jai jānu paramatthu
school of literature. The Vaiṣṇava Sahajiyās of Bengal and the host of village poets roughly known under the general name of Bāul belong directly to the same school of thought; the Santa-poets of Northern and Upper India and the other devotional lyrists, the mystics of Mārāṭhā, and even the Śikh and Sūfī poets belong to the same school of heterodoxy and criticism. Thus we see that this type of literature has a continued history in the vernaculars from the earliest period down to the modern times. As we are now dealing elaborately with the early Sahajiyās and shall also deal later on with different types of medieval Sahajiyā literature we think it necessary here to discuss in detail the possible sources of the critical spirit of the various Sahajiyā schools. The utility and relevancy of such an elaborate discussion on the point will be clearer, we hope, when the different medieval Sahajiyā schools will be studied in the succeeding chapters and also in the appendix.

(D) Possible Sources of the Spirit of Criticism of the Sahajiyās

An analysis of and scrutiny into the nature of the spirit of these different Sahajiyā schools of vernacular poetry will reveal that much of their heterodoxy and criticism is a thing of heritage; the ideas found in the vernaculars are but infiltrations from the older ideas found in the different lines of criticism in the history of Indian religious thought, and these infiltrated ideas have been variously emphasised by the vernacular poets so as to give them a new colour and tone. Older lines of criticism of different kinds have got blended in the critical and revolutionary spirit of the vernacular poetry. To make a critical study of it, it is necessary therefore to make a general survey of the different lines of heterodoxy that have moulded the religious history of India in the different periods of its evolution.

The earliest trace of heterodoxy and criticism in the history

1 The popular vernacular word maramiya comes from the Skt. word marma, which means the vital part or the very core of anything. The Maramiya school is thus the school that deals with the vital part or the inner truth of religion to the exclusion of the formalities and outward shows.
2 Vide infra. Chs. V., VII.
3 Vide infra. Appendix (A).
of Indian religious thought is to be found in the Āraṇyakas and the Upaniṣads. In its practical aspect the religion of the Samhitās and the Brāhmaṇas was pre-eminently sacrificial with innumerable accessories of chants, ceremonies and rituals. Though the sacrifices were generally made to some particular god or gods they were nothing of the kind of an attempt at establishing any sort of personal contact between the god or gods in question and the sacrificer. The desired effect of the sacrifice does not depend on the will of the god to whom the sacrifice is offered,—it depends absolutely on the rigorous correctitude of the sacrificial method in all the minutest details. But when we pass on from the Samhitās and the Brāhmaṇas to the Āraṇyakas and the Upaniṣads we find a remarkable change in the fundamental religious spirit. In the hymns and ritualistic and sacrificial net-work of the Samhitās we do not find any unified idea of the Brahman or the Supreme Being, though, however, we often find a tendency towards monotheism. In some of the Brāhmaṇas we first have, in a rudimentary form, the conception of the Brahman as the ultimate principle and the highest reality and the conception was established in the Āraṇyakas and the Upaniṣads. With the establishment of the conception of the Brahman the religion of the Āraṇyakas and the Upaniṣads was no longer the objective and deterministic religion of ritualism and sacrifice,—all these are made subordinate to the final end of self-realisation or Brahma-realisation. In the Āraṇyakas and the Upaniṣads ritualism and sacrifice began to be replaced by meditation, and the spirit of sacrifice sometimes began to have a philosophic interpretation.¹ When we find Maitreyī, wife of the famous seer Yājñavalkya, exclaiming,—"What shall I do with that, which will not make me immortal?"²—we discover the key-note of the Upaniṣadic thought, a hankering, not after any mundane happiness and prosperity,—nor after

¹ Thus the Byhad-āraṇyaka begins with a new conception of the horse of the Horse-sacrifice. There it is said that dawn is the head of the horse, the sun is his eye, wind his breath, heaven the back and the intermediate space between heaven and earth the belly; the quarters are the sides, the seasons the limbs, the stars the bones and the sky his flesh. To meditate on such a horse and to realise the truth of this horse is the real meaning of the Horse-sacrifice.

² Ibid., (2.4).
any enjoyment of bliss in heaven,—but after the realisation of the self which is of the nature of the Brahman. It has been said that those who know the self or the Brahman and seek for truth reach the region of the Brahman wherewith they never turn back; but those who acquire better regions through sacrifice or gift or penances roam about from this region to that and constantly suffer under the whirl of coming and going. ¹ It is neither by the making of sacrifices, nor by hearing and memorising the Vedas that one can realise the Brahman or the supreme truth, it is only through the absolute purification of heart—through the removal of the veil of ignorance that one can realise the self or the ultimate truth. Thus we see that the whole emphasis of the Upaniṣads is on the subjective side of religion, which seems to be conspicuous by its absence in the Samhitās and the Brāhmaṇas. The Upaniṣads discourage much reading, erudition and discursive reason and also sacrifices, ritual and worship of the gods;—they on the other hand emphasise absolute purification of heart; for, it is in the absolutely purified and mirror-like heart that the supreme truth reflects itself in its illuminating and blissful effulgence.

In the post-Upaniṣadic period a free spirit of religion, leaning mainly to the subjective side, characterises the early epic literature of India, particularly the Mahābhārata. There are stories in the Mahābhārata, where the teachings of true religion are being received from people belonging to the lowest class of the social order. In the Anuśāsanika-parva of the Mahābhārata,² where Bhīṣma is explaining to Yudhiṣṭhira the really sacred places of pilgrimage, we find that the mind with the transparent water of purity and truth, when associated with the lake of patience, is the best of all places of pilgrimage. He whose body is washed with water, cannot be said to be the really cleansed one; he, who has controlled all his senses, is the really cleansed one, and he is pure within as well as without. To dive into the water of the bliss of Brahma-knowledge in the lake of the pure heart is the best of all bathing, and it is only he, whom the wise recognise to be a real pilgrim.

¹ Bhāhad-āranyaka.
² Ch. 108.
The Upaniṣadic spirit, however, is found in the post-Upaniṣadic period bifurcated into the two main lines of religious thought, viz., Vedānta and Vaiṣṇavism. The Śaṅkarite and the post-Śaṅkarite Vedāntic schools cherished nothing but uncompromising antagonism towards the school of Pūrva-mīmāṁsā, the staunchest advocate of the sacrificial religion of the Vedas. Even Rāmānuja, the great exponent of Vaiṣṇavism, tried to make a compromise between dharmajijñāsā and brahma-jijñāsā and held that the former leads to the latter; but Śaṅkara stoutly denied this relation of succession between the two; for, he held that the nature and the ultimate end of the two are diametrically opposite to each other. While the aim of dharmajijñāsā is the attainment of prosperity (abhyudaya) in life and the attainment of heaven after death, the aim of brahma-jijñāsā is liberation (mukti); and while the function of the former is to induce one to perform various sacrificial and ritualistic duties, the function of the latter is only to induce one to know the Brahman, and to know the Brahman is to be the Brahman. A hankering after the knowledge of the Brahman presupposes no performance of scriptural duties,—it follows rather from a discriminative knowledge of what is permanent and what is transitory (nityā-nitya-nastu-viveka), from absolute indifference to the pleasures of life here and hereafter, the capacity for internal and external control and a true desire for being liberated from the fetters of life.

As the Mīmāṁsakas go to the one extreme of saying that religion always involves some kind of activity,—the Vedāntins go to the other extreme of saying that true religion involves no kind of activity whatsoever. The aim of all activities is to produce some sort of effect,—but Brahma-knowledge cannot be the effect of any activity; it is already there, and it is there for all time; it is, however, veiled by our ignorance,—by the world-illusion;—the function of the true knowledge of the scriptures is to remove this veil of ignorance from our mind,—and when this veil of the world-illusion is removed Brahma-knowledge will dawn upon us instantaneously and spontaneously. Brahma-knowledge is not something attainable through human effort,—it is rather self-revealed. Brahma-knowledge is not even
a mental function,—for, a mental function presupposes the fact that the agent has the power to do or undo it according to his own will,—but we have no such power in the case of Brahma-knowledge. Moreover, as we have noticed before, to know the Brahman is nothing but to be the Brahman, and knowing and being being identical here, no action is implied even in the knowing.

The Vaiṣṇavas, however, represent the spirit of heterodoxy in another way. While the whole emphasis of the Vedāntins is on pure knowledge, the emphasis of the Vaiṣṇavas is on devotion or love. The Vaiṣṇavas always speak very indifferently of heaven and the enjoyment of happiness there,—they discourage even the idea of liberation,—what they want is the blissful realisation of the eternal love of God. It is necessary to remark here that this cult of devotion or love was not and is not limited strictly to the sphere of Vaiṣṇavism,—we have already referred to the Śaivite devotional cult of South India, and even in the Śakta cult of later days (we may mention here the exquisite songs of Rāma-prasāda Sen and others of his time) we find traces of pure devotion and love. But in Northern India and in Eastern India this devotional cult flourished mostly along the line of Vaiṣṇavism and they are commonly taken to be identical.

The innovation made by the Vaiṣṇavas (and all devotional cults in general) is the introduction of the element of divine mercy within the deterministic view of the law of Karma. Germs of the law of Karma can be traced to the ritualistic and sacrificial religious thought of the Vedas, and it is a particularly noticeable fact that practically all the systems of Indian thought accept this theory in some form or other. We have seen that the Samhitās and the Brāhmaṇs leave no scope for the interference of the gods in the matter of the fruition of the rites, rituals and sacrifices. But already in the Upaniṣadic period we come across a statement like this,—“This self or soul (ātmā) can never be realised through great sayings,—neither by memorising (the scriptures) nor by listening to the scriptures; it is only by him, to whom it reveals itself of its own accord that it can be realised, and to him this soul or self reveals its real
form.\(^1\) Herein we find germs of the predominance of the divine will, which reigns supreme over all human efforts, and herein comes the question of divine mercy. Along this line developed the theory of divine mercy of all the devotional cults, and the only religious duty left, therefore, to the followers of these schools, was unconditional self-resignation to the divine will.

Up to the eighth and ninth centuries A.D. the dominating feature of Vaiṣṇavism was this spirit of self-resignation and seeking the haven of the infinite mercy of God. This very spirit indicates that the elaborate system of religious duties, customs, rituals and ceremonies—strict rules for food and dress could find no prominence in the Vaiṣṇava school; whenever they were adopted they were adopted with the purpose of preparing a mental atmosphere favourable to the growth and development of this spirit of devotion and self-surrender. Already in the Bhāgavata Purāṇa we find elements of pure love spoken of as the best and highest method through which the direct communion with God becomes possible. There the uncultured rustic cowherd girls of Vṛndāvana are regarded as the best of all religious people for their most sincere and passionate love for Śrīkṛṣṇa, the perfect incarnation of God. Devotion (bhakti) in later times was classified under two heads, viz., vaidhi bhakti, i.e., devotion that arises through the performance of religious duties, observance of vows and rites, and strict obedience to the rules and regulations laid down in Vaiṣṇava theology; and the other kind of devotion is called rāgānugā bhakti, i.e. passionate devotion,—or love for God that depends on no extraneous cause,—it is love absolutely for love’s sake. The former kind of devotion has always been spoken of as being much inferior to the latter and as such the former is never recognised as devotion proper. This exclusive stress on love has naturally minimised to a considerable extent all the formalities, conventionalism and ceremonialism in religion. Even a man of the lowest origin, such, for example, as a Caṇḍāla, in spite of being a riteless untouchable, has been acclaimed as being much superior to the twice-born

\(^1\) Kaṭha (1.2.22).
(Brahmin), by being merely a sincere lover of God; on the other hand, a caste Brahmin, in spite of his loyalty to the rites, customs and duties of Brahminic life minus his sincerity of love, has been emphatically declared to be inferior to a Caṇḍāla,—and this really represents the true spirit of Vaiṣṇivism.

Again, the Yoga-school of Indian thought has a religious perspective of its own, and its emphasis is exclusively on the subjective side of religion. Though all sorts of occultism and necromancy prevailed and still now prevail within the school of Hātha-yoga, and though with a large number of Indian Yogins Hātha-yoga has become a science of physical feats, serenity prevails within the school of Yoga proper. As a philosophical system Yoga represents a purely idealistic view and it is the mind in all its states and processes that has been held responsible for the whirl of birth and death and consequent sufferings. Religion, according to Yoga, consists in the final arrest of the states and processes of the mind, and the final arrest of the mind means the final arrest of the flux of coming and going and that is the state of final liberation. Yogic Sādhanā, therefore, consists essentially in a process of psychological discipline against a moral background. It is evident from the very nature of Yoga proper that it leaves no scope for idolatry, ritualism and ceremonialism. The dominant trend of Indian thought is idealism; it is the mind with all its principles of defilement that has been held responsible for the world-process. It is for this reason that in practical Sādhanā elements of Yoga have been adopted in almost all the practical systems of Indian religion;—even Vaiṣṇavism with all its love-theories is no exception. In the critical spirit of the old and medieval vernacular poets we shall find this spirit of Yoga acting strongly in unison with the spirit of the other heterodox system.

In spite of their heterogeneous practices, ritualism and ceremonialism the Tāntric schools (both Hindu and Buddhist) breathe throughout a spirit of revolt against the orthodox schools,—the Hindu Tantras having the same apathy towards the caste-religion or Varṇāśrama-dharma of the Brahminic people as the Buddhist Tantras have against
monasticism. We have already seen that the main emphasis of the Tāntrikas is on the practical side of religion, and naturally they discouraged much reading and erudite scholarship, either philosophical or scriptural. The stress of Tantra proper was on Yoga, where discursive knowledge is of little avail. As for the other practices of Tantra, good or bad, their unconventional nature is palpable, and to have these unconventional practices recognised as purely religious practices the Tantras had to decry strongly the conventional practices of both Brahminism and Buddhism. Because of the extremely unconventional nature of the practices, the Tāntrikas had to launch the bitterest attack on the commonly accepted practices and religious views of the orthodox systems. The importance of this critical and revolutionary spirit of the Tantras lies in the fact that the earliest literature of our language (we mean the songs of the Sahajiyā Buddhists) inherited much of its spirit of revolt and criticism directly from the Buddhist Tantras.

It will be noticed that the above critics of orthodox Brahminism were all theists; but the severest attack came from the atheists of whom the Cārvākas, the Jainas and the Buddhists deserve mention here. Already in the Upaniṣads we find mention of schools of naturalism which recognised no ultimate conscious Being as the author of the universe, but thought of the world-process as a product of the course of nature. The materialists are generally spoken of in early texts as the Lokāyata school or the school which admits the truth only of the visible world. In early Pali texts we find mention of many pre-Buddhistic heretical ascetics, of whom mention may be made of Sañjaya, the sceptic, Ajita Keśakambalin, the materialist, Purāṇa-kaśyapa, the indifferentist, Maśkarin Gośāla, the wandering ascetic, and Kakuda Kātyāyana.1 The Cārvāka school of thought deserves special mention here. The Cārvākas were not believers in any kind of divinity,—the whole world-process including the psychosis, has been explained by them as the creation of matter. Let a man be happy so long as he lives;—life is short and none can escape the jaws of death; and if once this

1 See B. M. Barua, M.A., D. Lit., *A History of Pre-Buddhistic Indian Philosophy*
body is burnt to ashes there is no returning back; let one, therefore, eat, drink and be merry. The Cārvākas strongly defied the authority of the scriptures. It has been said that religion is nothing but a device of the cunning priests for earning livelihood as they have no other resources. It is said,—“There is no heaven, no emancipation, no soul,—nothing belonging to the after-world,—never are the duties, prescribed according to the castes and the different stages of life; capable of producing any effect. All fire-sacrifices, the three Vedas, the ascetic practice of holding three sticks (bound together), the practice of rubbing the body with ashes—are inventions of stupid and coward people for the earning of their livelihood.” It has been further said,—“If it be true that an animal, when killed in the Jyotiṣṭoma-sacrifice goes to heaven—why then should not the sacrificer kill his own father in the sacrifice? If the funeral rite of offering food, drink and other gifts to the departed may produce satisfaction in them, then the supply of oil to an extinct lamp should also increase its flames. Utterly futile is the contemplation of providing food for those who have departed this life,—for, had there been any truth in this practice, one might have had his satisfaction on his way while gifts were being offered to him in his house. If those who are in heaven can be satisfied by offering of gifts here on earth, then why should not offerings be placed on the lower floor of the house for the satisfaction of those who are above the roof?” It is therefore strongly recommended that one should live joyously as long as one lives,—one should borrow money to procure butter;—if body be once burnt to ashes, it can never return. If after dissociating himself from this particular body a man goes to a different

---

2 Ibid., p. 13.
3 Ibid., pp. 13-14.

It is interesting to note here some of the verses of the Viṣṇu-puṇāṇa which breathe exactly the same spirit.

nīhataṣya pāśor yajñe svarga-prāptir yadiṣyate |
sva-pīlā yajamāṇena tadā kiṁ na niḥanyate ||
tyāpīte jāyate puṁso bhaktam anyena cet tadāḥ ||
dadyaḥ cṛhādāhāṁ śramāyānāṁ na vaheyuḥ pravāśinaḥ ||

region, why should not he come back many times again through his deep affection for the relatives? So, all these are meaningless talks having absolutely no reality behind. It stands obvious that the Brahmins invented all the funeral rites only to find out a source for their livelihood—they have got absolutely no other justification. Those are hypocritical, cunning and demonic people, who have composed all the Vedas,—and it is really strange that meaningless mutterings like jarbharī, turpharī etc., are said to be the sayings of learned Pundits. The obscene practice that the wife of the sacrificer should hold the penis of the horse in the horse-sacrifice and all such other practices are prescribed by base hypocrites, and all the injunctions in the Vedas regarding the eating of meat are the sayings of none but the goblins and the demons, who are particularly fond of meat.¹

The Buddhists and the Jainas, though atheists, were not anti-religious like the Cārvākas. From sacrificial rituals and ceremonies the ground of religion was shifted to a humanitarian plane and the ethical aspect of religion received a great emphasis. Notwithstanding all the differences in metaphysical and theological view-points Buddhism and Jainism had a common front to push in their defiance against the authority of the Vedas, in their absolute denial of any ultimate reality in the form of any Supreme Being, in their emphasis on the cardinal ethical virtues,—particularly on the principle of non-violence. As we have hinted, Jainism viewed religion from a distinctly different perspective from that of the Upaniṣadic or the other Brahminical schools. The ultimate aim is salvation (mokṣa),—which can only be attained by the eradication of the Karmas which stick to the soul like dust particles to a body besmeared with oil, and thus bind the soul to this world of sufferings. This inrush of Karma is to be stopped by various kinds of control (samvara) and nirjarā or the purging off of the Karmas from the soul. The controls are generally the vows of non-injury, truthfulness, abstinence from stealing, sex-control, non-acceptance of the objects of desire, gentle and holy talk, full control over

body, speech, and mind, habits of forgiveness, humility, penance, meditation on the real nature of the world and man, and principles of right conduct (caritra). Ahimsā or non-injury is regarded as the highest virtue in Jainism as well as in Buddhism, and in their practical religious conduct the Jains take the greatest precaution to avoid the slightest injury to the smallest of insects.¹ The Buddhists brought about a revolution not only in the religious sphere, but also in the sphere of philosophical thought. The truth, which Śākyasimha realised through his great renunciation and profound meditation and by the realisation of which he became the Buddha or the perfectly enlightened one is the truth of pratītya-samutpāda or dependent origination which presents an entirely new perspective in the field of philosophy. The fundamental notions of causality, substance, time and space underwent complete change and the general tendency of all logical and metaphysical enquiries was directed not towards any thesis but towards contradicting all kinds of thesis of the established schools. From the religious side, the authority of the Vedas was openly challenged and the efficacy of the rituals and sacrifices was stoutly denied. Moreover the inhuman cruelties inflicted on the beasts in the different kinds of sacrifices was severely condemned. The existence of any ultimate reality, at least in the form of the Supreme Being, was denied or at least strict silence was maintained on all such ontological points; the sumnum bonum of life was declared to be the final liberation from this life of suffering by a strict code of moral

¹ It is to be noticed that orthodox Jainism like other dogmatic schools incorporated various dogmatic beliefs like the self-revealing eternal nature of Jainism as a religion, the godhood of the Tirthānikāras and many others of this nature; and a fighting within Jainism itself began between the two main sects, viz., the Śvetāmbaras (i.e., wearers of white cloth) and the Digambaras (i.e., the naked). The peculiar beliefs of the Digambaras are that the Tirthānikāras live without food, that a monk, possessing property and wearing clothes, cannot attain liberation and that no woman is entitled to liberation. The Jaina monks generally bear clothes of a blanket, an alms-bowl, a stick, a broom to sweep the ground, a piece of cloth to cover his mouth lest any insect may enter it by chance. The Digambaras bear a similar outfit, but they always remain naked and carry brooms of peacock's feather or long hairs of the tail of animals (cānara). The monks have their head shaven; there is often the custom of plucking the hair out and this plucking of the hair is sometimes regarded as a cardinal religious practice.
discipline. Thus the sacrificial religion of the Vedas was replaced by the Buddhists by the principles of moral virtues and good conduct (śīlācāra). Leaving aside the innovations of later Mahāyāna Buddhism or Tāntric Buddhism where Buddhism developed innumerable gods and goddesses and the paraphernalia of worship, partly as a reaction against the negativistic regorism, partly through the influence of Hindu faiths, and mainly through the influence of indigenous religious cults or such other cults of the neighbouring localities, Buddhism denied godhood unreservedly and even the existence of any supreme creator of the universe as no positive evidence of any such being can ever be demonstrated. The spirit of monastic Buddhism on this point is best illustrated in the Tēvijja Sutta of the Dīghanikāya where the belief in the existence of Brahmā (the creator) and the belief in the Brahminical religious systems have been compared to the funny belief of a foolish man in the existence of some beautiful girl somewhere and his wish to enjoy her without knowing absolutely anything about her and her whereabouts.

The Buddhists were strongly opposed to the caste-system and the Varnāśrama religion of the caste Hindus. A great campaign against the caste-system is found in the Vajra-sūcī of Aśvaghoṣa where the author tried to prove on the basis of the evidences found in the Vedic literature and the standard Brahminical texts like the Manu-saṃhitā, the Mahābhārata, etc., that the Brahmins as a class can never be superior to the other castes and that the superiority or the inferiority of man can never be determined by the accidental fact of birth. The orthodoxy and conventionalism of the Śramaṇas and the Brāhmaṇas¹ were constantly criticised by

¹ It should be noted here that wherever we find criticism of the Buddhists against the Brahmins in the Pali texts (and we come across such criticism very frequently) we find mention of the Śramaṇas as one of the ancient orthodox sects along with the Brahmanical sect. These Śramaṇas seem to be an orthodox sect of ascetics who were somewhat akin to the Buddhists in their insistence on the misery and sufferings of Śāṃśāra, in the emphasis on compassion and Ahiṁsā and in their disregard of caste system. But it seems they were somewhat dogmatic in view and formality prevailed in their asceticism which made them target of criticism from the monastic Buddhists. In this connection see an article by Winternitz in the journal Indian Culture (Vo l. No. 2) 'Jainas in Indian Literature.'
the Buddhists. Whenever and wherever we find mention of the Śramaṇas and the Brāhmaṇas we find them as representing the mistaken or distorted spirit of religion as contrasted to the true spirit of religion represented by the well-disciplined and perfectly enlightened Buddhists.¹ Without entering into the details, let us give here a few specimen of criticism that were levelled by the Buddhists against these orthodox sects. A good specimen of popular criticism is to be found in the *Vatthu-pama-sutta* where Buddha preached to the audience that a man can be said to have bathed only when he has become pure in heart.² At this a Brahmin from among the audience asked Buddha,—

"Does your Holiness go to the Bāhukā river to bathe?"

The Lord replied,—"What's the need of going to the Bāhukā river,—what may it do?" The Brahmin said,—

"O Gautama, the river Bāhukā is known to many and recognised by many as associated with Mokṣa and virtue and as rendering liberation and destroying sin; many people wash away their sin of past deeds in the river Bāhukā." Then the Lord addressed the following verse—"Indeed there are (sacred) rivers like the Bāhukā, Adhikakkā, Gayā, Sundarikā, Saravati, Prayāga and the Bāhumati; there the fool, the evil-doers take their bath everyday; but surely they are not purified thereby. What will the Sundarikā do? What can the Prayāga and the Bāhukā do? He who does harm to living beings and who is the doer of all evil deeds, is never purified by (the water of) these rivers."³ Another instance of the criticism of the same nature can be cited from the dialogue between the nun Puṇṇikā and a Brahmin in the *Therī-gāthā*. Puṇṇikā asks the Brahmin, who was bathing early in the morning in an extremely cold weather, —"I indeed used to plunge into water in cold weather with a view to bring water,—but that was only out of fear of punishment or rebuke from the ladies I served; but of whom

---

¹ Cf. *pāgāḍhā ettha na dissanti eke samapa-bahmapā taṁ tu desaṁ na jāniṁ yena gacchanti subbataṁ* || *Paññā-sutta.*

² *āyatā vuiccati bhikkhu śīlo antareṇa śīnānena.*

³ *bāhukam adhikakkāṇa ca gayāṁ sundarikam api saravatīṁ prayāgaṁ ca atha bāhumatiṁ nadiṁ kiṁ sundarikā karissati, kiṁ payāga, kiṁ bāhukā nadiṁ viṁ katakibbaṁ naraṁ na hi nāṁ sodhayte pāpakamminoṁ.*
are you so much afraid, O Brāhmaṇa, that you plunge into water and bear extreme cold with a shivering body?”

“The reason is known to you”,—replied the Brahmin,—

“why then this question? I acquire virtue and destroy the effect of my evil deeds (by bathing). Whoever perfoms evil deeds, whether an old man or young, will escape the fruition of such evil acts by taking bath in holy water.”

“Who is the fool of fools,” asked Puṇṇikā “that has instructed you that the effects of evil-deeds can be washed away by bathing in the water? Had it been the fact, all frogs and tortoises and snakes and porpoises and other aquatic creatures would certainly have gone to heaven. Should all sheep, boar, fish hunters, thieves and murderers and other evil-doers be liberated from all evil deeds by their bathing in water? If this river should wash away all the sins you have accumulated by your former evil deeds, she should wash away all your merits too;—but what should remain then? You do not care to cast away that (i.e., evil deeds) through the fear of which you are plunging every day into water,—the effects of evil deeds will never be washed away by cold water.”

The nun then adds that if a man is really conscious of the direful effects of the evil deeds and if sin has become something repulsive to him, let him not try to flee from sin or to wash away his sin in water, let him take refuge in the Buddha and adopt his creed and lead a life of discipline and righteousness.

But though Buddhism first began with a freedom of thought and spirit of revolt against orthodoxy, orthodoxy in practical religious life gradually crept into Buddhism itself and the ethical rigorism, strictness of rules and regulations,—austere practices of penance, vows and fastings.
prescribed for the monastic life again made the monks objects of criticism. We have noticed before that a large section of people with more liberal views, freedom of philosophic thought and a generous outlook seceded from the orthodox body. But in course of time when Tāntric made its way in Buddhism, the Tāntric School again revolted against both the monasticism and scholasticism of Hīnayāna Buddhism and the intellectual pedantry of the Mahāyānists; the Tāntrikas advocated their esoteric practice which were held to be the surest and at the same time the easiest way to liberation. In the Buddhist Tantras we always find that austere practices and penances inflicting disciplinary rigorism on body and mind can never conduce to the attainment of perfection; perfect enlightenment must be attained through an easy process—through the enjoyment of the five objects of desire.¹ So the hard rules of discipline, the practices of fasting, bathing, purifying the body and the mind through strict rules and regulations should all be avoided,² and the most pleasant and easiest way of attaining perfection is through initiation in the tattva and the practice of yoga in company with the Prajñā (i.e., the female counterpart). The austere penances and vows only make a man sorry, and make his face disfigured; through this pain and sorrow the mind can never be expected to attain perfection.³ It is, therefore, enjoined,—'Do not cast away the five objects of desire and do not inflict strain on the body through penance; try to attain bodhi (i.e., perfect knowledge) in a pleasant way by follow-

This verse is also found in the Citta-viśuddhi-prakaraṇa, Verse No. 58.

³ Vajra-dāka-tantra, quoted in the Catalogue of Sanskrit Buddhist MSS. J.R.S.B., Vol. I. p. 105. This verse is quoted in the commentary of the Cāryāpada, No. 1, and is said to belong to the Śrī-samāja; it is not, however, found in the Śrī-guhyā-samāja-tantra published in G.O.S.
ing the injunction of the science of esoteric yoga. It has been said in the \textit{Citta-viśuddhi-prakaraṇa} of Āryadeva that bathing in the holy water of the Ganges is of no avail; for, if the water of the Ganges had the capacity of purifying man’s body, it would have the capacity of purifying the body even of a dog and the dog also would have been entitled to liberation by bathing in the Ganges. Again, there are fishermen who dive in the water of the Ganges, why should not they be liberated from the fetters of this world? And there are fish in the water of the Ganges; what prevents these poor creatures from attaining Mokṣa? Mokṣa is never possible through going on pilgrimage or bathing, it is to be attained only through the purification of mind, by purging it of all the blemishes of subjectivity and objectivity.\textsuperscript{2}

But the fun is that though Tāntricism condemned orthodoxy in the strongest possible terms, it developed within its province the most elaborate form of practices. In formalism, ceremonialism, ritualism, magic, sorcery and in the most complicated system of worship accompanied by the muttering of innumerable Mantras Tāntricism superseded all the other orthodox systems. Vajra-yāna Buddhism, which is the most general name for Buddhist Tāntricism as a whole, developed all possible rites and practices, both conventional and unconventional. Though the secret yogic practice is often spoken of in Vajra-yāna, it was not emphasised as the only method for realising the truth, and hence was the importance attached also to all rules of worship, muttering of the Mantras, describing of the circles and hundred other rituals and ceremonies. Again there arose another group of Yogins within the province of esoteric Buddhism, who revolted against this formal nature of Vajra-yāna and stressed some esoteric yogic practice to be the only method for realising the highest truth or attaining perfection; this school is known as Sahajiyā Buddhism.

We have discussed before at some length the salient

\textsuperscript{1} \textit{Pañca-krama}, Ch. I, MS. (B.N. Sans. No. 65, 66) p. 1 (A). This verse is quoted in the commentary of the Čaryā-pada (No. 1) as belonging to the Śrī-\textit{samāja} : but it is not found in the text published in G.O.S.

\textsuperscript{2} Verses (59-68).
features of this Buddhist Sahajiyā cult. If we analyse and examine the ideas of the Buddhist Sahajiyās we shall find that, as an off-shoot of Tāntric Buddhism, it embodies the heterodoxy of Buddhism in general mixed up with the spirit of Tāntricism. In its aversion towards discursive reason and scholastic erudition and in its stress on the practical side of religion we may find the spirit of Tantra and Yoga working together on it. Again the influence of the Tantra as well as of the Vedānta is palpable in the view that truth can never be found outside—it is to be intuited within. In the highest stress laid by the Sahajiyās on Sahaja-realisation or self-realisation as the *summum bonum* of the religious life we may trace the old Upaniṣadic spirit under the Buddhistic garb. Ideas, derived from different lines of thought, have merged together in a popular way in the songs and Dohās of these later Buddhist poets. In the Jaina Dohās we have almost a similar admixture against a popular Jaina background. The devotional line of thought or the spirit of love is, however, conspicuous by its absence from the Buddhist and Jaina songs and Dohās; but it predominates in the songs and Dohās of the medieval period. The fact will be demonstrated when we shall deal with the salient features of the Vaiṣṇava Sahajiyās and the Bāuls of Bengal in a succeeding chapter, and with those of the innumerable Sahajiyā and Sūfī poets of Upper and Northern India in an appendix. Besides the inherited elements from older thoughts the medieval poets received cognate thoughts and ideas also from Sūfī-istic Islam. As we shall have occasion to turn to the question in detail in future, we need not discuss it now.

(ii) The Idea of Sahaja

The criticism made by the Buddhist Sahajiyās, with which the Jaina mystics also joined their voice, defines the Sahajiyā school more negatively than positively. In the positive side, however, the conception of the Sahaja or the ultimate innate nature of all the objects and beings will give us a definite idea about the fundamental tenets of the school.

The word 'Sahaja' literally means that which is born or
which originates with the birth or origination of any entity
(saha jāyate iti sahaṇaḥ). It is, therefore, what all the Dharmas
possess by virtue of their very existence, and is thus the
quintessence of all the Dharmas. As Mahā-sukha is the
quintessence of all the Dharmas, this Mahā-sukha-nature is
the Sahaja-nature of all the Dharmas. In the Hevajra-
tantra we find,—“The whole world is of the nature of
Sahaja—for Sahaja is the quintessence (svarūpa) of all; this
quintessence is Nirvāṇa to those who posses the perfectly
pure Citta.”1 But though this Sahaja in the form of Mahā-
sukha is realised in and through a physiological process, it
should never be conceived as something belonging to the
body; though it is within the body, it is not something
physical.2 As the quintessence of all, it is the absolute
reality, both immanent and transcendent.

We find in the Upaniṣads that the Brahman as the
ultimate nature of our self and of the external world trans-
cends all intellectual comprehension and verbal expression.
Similar is the position of the Sahajiyās, who hold that the
Sahaja nature is neither definable nor accessible to our
mind, nor expressible by speech. As the Brahman is to be
realised within, so also this Sahaja-nature is to be intuited
within (svasamvedya). We find in the Upaniṣads that when
one realises the self as the Brahman, there is neither the
knower (jñātā) nor the knowable (jñeya) nor the knowledge
(jñāna); for, in such a transcendent state, “where every-
thing becomes the self, who will see whom and by what
means, and who will know whom and by what means?”3
This Upaniṣadic principle has also been adopted by the
Sahajiyās in speaking of the Sahaja nature. It is said in the
Hevajra-tantra,—“Sahaja can neither be explained by any
man nor can be expressed by any speech; it is realised by

the self through the merit of serving at the feet of the Guru.\(^1\)
In the Guhya-siddhi also it is said that this truth is to be attained through personal intuition,—the tongue can never speak anything of it.\(^2\) That is an all-pervading supreme state where there is neither body nor speech nor any work.\(^3\)
It has very nicely been said in a song of Kānha-pāda—
“Whatever is related to the mind and to all the Āgamas (scriptures) and religious texts and the beads (for counting the time of taking the name of God)—all are confusing and anomalous. Say, how Sahaja can be explained,—
(for) neither body nor speech nor mind can enter into it. In vain does the Guru preach to the disciple, for, how can he explain that which transcends the capacity of all verbal means? Whoever will explain it will misrepresent it; here the preceptor is dumb and the disciple is deaf. Asks Kānha, —how then is that jewel of the Jinas?—it is just as the deaf is made to understand by the dumb (i.e., through the movement of the lips, or by the facial expressions, or by the suggestions by postures and gestures).”\(^4\)
Tāḍaka-pāda also says,—“How can what is beyond the path of speech be explained?”\(^5\) Again we find,—“The Sahaja stage can never be explained by the preceptor, neither can it be understood by the disciple,—it is like the flow of nectar;—

to whom and by what means can it be explained?” Tillopāda says in his Dohā,—Sahaja is a state where all the thought-constructions are dead (i.e., destroyed) and the vital wind (which is the vehicle of the defiled Citta) is also destroyed,—the secret of this truth is to be intuited by the self,—how can it be explained (by others)? The truth (tattva=tattva) is inaccessible to the ordinary foolish people, and it is also unknown and unknowable to scholars,—but it is never inaccessible to that fortunate and meritorious one who by services has propitiated the Guru.² Sarahapāda also says in his Dohā,—What can be known through meditation of that, which is without knowability? How can that be explained which transcends all speech?³ In the commentary of the Dohā it is said,—whatever is a production of the mind is false; that is the truth, which is never mentally constructed.⁴ Again it is said by Sarahapāda,—where neither mind nor the vital wind moves, nor is there any function of the sun and the moon, there should the Sahaja-citta rest,—this is the advice of Saraha.⁵ Where the mind dies out and the vital wind is also destroyed,—that is the supreme Mahā-sukha, it does not remain steady nor does it go anywhere (or, it never becomes expressible through words).⁶ In the Sahaja state the individual mind enters the Sahaja as water enters into water.⁷ The nature of the self can never be explained by others;

it can be caused to be realised only through the instructions of the Guru,—none else can make one realise it. The subtle and varied emotions resulting from the realisation of truth is not something capable of being expressed through words,—that stage of bliss is absolutely free from all mental constructions—a supreme world is revealed there. There intellect fails,—mind dies out, all pride and self-conceit vanish away,—mysterious is that Sahaja,—it is a master magician—how can it be bound by meditation? It is free from all the letters and colours and qualities, it can neither be spoken of, nor can it be known. That great Lord of transcendental bliss cannot be spoken of,—just as the pleasure derived from sex-union cannot be explained to an unmarried girl who has never personally experienced it. Unless the body, speech and mind are destroyed, none can experience the bliss of his Sahaja-nature. Kānha-pāda also says in his Dohākoṣa,—Only he who revels in Sahaja and who realises his jewel of mind (as the Bodhi-citta) can realise the course of religion,—others cannot understand it even if it is explained to them.

It is, therefore, clear from what is stated above that the nature of Sahaja cannot be defined,—it can only somehow be described. It will be evident that this Sahaja is the Brahman of the Upaniṣads and the Vedānta. It is the Nirvāṇa-dhātu of canonical Buddhism, it is the tathatā (thatness) of AŚvaghosa, it is the negatively described absolute reality of Nāgārjuna, which transcends the four logical categories,—it is the Abhūta-parikalpa or the increate absolute with the potency of all objectivity and subjectivity but in itself bereft of all dualism,—or the pure consciousness (vijñaptimātratā) of the Vijnāna-vādins. It is again the Vajra-dhātu

or the Vajra-sattva of the Vajra-yānists. It is the Bodhicitta in the form of the unity of Śūnyatā and Karuṇā, it is the Mahā-sukha or the Supreme Bliss. All these ideas have merged in the idea of Sahaja of the Sahajiyās. In describing Sahaja Tillo-pāda says in his Dohās,—When in the Sahaja stage the Citta and the vacuity enter into an union of bliss all the objects of senses vanish away. Sahaja is without beginning and without end;—this non-dual state of Sahaja is only explained by the venerable Guru. When (in the Sahaja) the Citta vanishes, the Acitta (i.e., negation) also vanishes; the state of non-dual unity (samarasa) is free from both existence and non-existence. This transcendental truth is free from all merit and demerit,—for there cannot be any merit or demerit in what is realisable only within. It is bereft of all colour and form,—it is perfect in the form of all. In Sahaja the self is void, the world is void,—all the three worlds are void; in pure Sahaja there is neither merit nor sin. Saraha-pāda also says,—“In Sahaja there is no duality; it is perfect like the sky. The intuition of this ultimate truth destroys all attachment and it shines through the darkness of attachment like a full moon in the night. Sahaja cannot be heard with the ears, neither can it be seen with the eyes; it is not affected by air nor burnt by fire; it is not wet in intense rain, it neither increases nor decreases, it neither exists nor does it die out with the decay of the body; the Sahaja bliss is only an oneness of emotions,—it is oneness in all. Our mind and the vital wind are unsteady like the horse;—

but in the Sahaja-nature both of them remain steady. When the mind thus ceases to function and all other ties are torn aside, all the differences in the nature of things vanish; and at that time there is neither the Brahmin nor the Śūdra. Sahaja cannot be realised in any of its particular aspects—it is an intuition of the whole, the one underlying reality pervading and permeating all diversity. As the truth of the lotus can never be found either in the stalk, or in the leaves, or in the petals or in the smell of the lotus, or in the filament,—it lies rather in the totality of all these parts,—so also Sahaja is the totality which can only be realised in a perfectly non-dual state of the mind. From it originate all, in it all merge again,—but it itself is free from all existence and non-existence,—it never originates at all.

For such Sahaja a man must do away with the positive as well as the negative functions of his mind and remain like a pure child absolutely depending on the instructions of the Guru, and when the mind thus remains absolutely inactive in the Sahaja, all the cycles of birth and death are at once stopped. So long as one does not realise the true nature of the self as the ultimate truth one cannot realise the transcendental reality underlying all phenomena. This realisation of the self as the ultimate truth is not possible either through meditation or the muttering of the Mantras. All the external forms are to be realised as pure void,—and the mind also must be beheld as pure void; and through this realisation of the essencelessness of the objects (dharma-nairātmya) and also of the subject (pudgula-nairātmya) the Sahaja-reality reveals itself in

the heart of the Sādhaka.¹ This Supreme Lord (of Sahaja) is neither seen coming nor seen going; nor is he seen remaining within; he is a waveless sea of perfect purity.² In Sahaja knowledge there is neither ‘without’ nor ‘within,’—it pervades the fourteen worlds in its non-dual form.³ “There is some one formless hiding himself within our body,—he who knows him is liberated.”⁴ As a lunar gem in deep darkness brightens all things by its lustre, so also the Supreme Mahā-sukha or the Sahaja drives away all the miseries of life at once.⁵ The truth is neither in the house (i.e., in the body) nor in the forest (i.e., in the external objects),—the truth is in the absolute purity of the Citta which is free from all the Vikalpas.⁶

Kānha-pāda also says that Sahaja is without any wave, it is free from all the defilements,—it is free from both merit and sin—there is absolutely nothing in it.⁷ It is unchanging, without thought-constructions, without any transformation or corruption; it neither rises nor sets,—here mind has no function at all, this is what is called Nirvāṇa.⁸

It is to be noticed in this connection that though Buddhism as a religion began its course as an uncompromising atheistic school, believing neither in God nor in the self or the soul-substance, it gradually showed a theistic tendency in course of its evolution. Beginning with the Tathatā-vāda of Āsvaghoṣa and the Vijñāpti-mātratā or the Abhūta-parikalpa of Asaṅga and Vasubandhu, Buddhism

was coming closer and closer to the Upaniṣadic conception of the Brahman as the Supreme Being. In the conception of the Vajra-sattva and the Lord Śrī-Mahā-sukha of the Vajra-yānists we have seen how the monistic conception of the Supreme Being is clearly established. In the conception of the Sahaja or the Svābhāvika-kāya (the body of the ultimate nature) of the Sahajiyās the same tendency of conceiving it just in the image of the monistic Supreme Being is sometimes manifest. Often the Upaniṣadic description of the Brahman as having hands and legs on all sides,—having eyes, heads and faces on all sides,—having ears in all the worlds on all sides—and as pervading the whole universe,—are all applied to this Sahaja.¹ And this Sahaja is none but the self,—and all the worlds are the transformations of this one Sahaja-self,—all the universe is pervaded by the Sahaja-self,—and nothing else is to be found anywhere.² All the various phenomena produced by the deeds (karma) of the beings are nothing but the modes and modifications of the self-revealed Sahaja; but though they are Sahaja in the ultimate nature, they are produced in their varieties through mentation (bodhanāt) in the form of the subject and the object.³ The Sahaja is itself the sustainer (bhātā), itself the performer (kārtā), itself the king, itself the Lord⁴.

Hevajra-tantra, MS. p. 23(B).
It is the life of the animate, it is the supreme and immutable,—it is all-pervading and resides in all the bodies,—it is the great life (the vital process)—and the whole universe is imbued with it,—all the existent and the non-existent and everything else proceed from it and it alone. It is the Being of the nature of pure consciousness,—it is the eternal sovereign personality,—it is the Jiva (the individual personality),—it is time,—it is the ego.¹ Tillo-pāda says in a Dohā,—“I am the universe,—I am the Buddha,—I am perfect purity,—I am the non-cognition (amanasiāra)—I am the destroyer of the cycle of existence.”² And this nature of the self is its Sahaja-nature. Saraha-pāda also says,—“One is the Lord explained in all the scriptures and he manifests himself (as the variety of all phenomena) through his own will.”³ In the Dākārṇava it is addressed to Sahaja,—“Thou art the cause of all the Dharmas,—but who art thou Sahaja, mysteriously unknown to all?”⁴ Again it has been said,—“Only Sahaja-nature is seen (—nothing else is there),—salute to the Lord of all the Suras (gods) and the Asuras! The senses do not know where it is,—worship it through the songs (gāthā).”⁵

The reading of the last line given in the commentary of the Dohākosa (Dohā No. 6) of Kāhā-pāda is “svayam kartā svayam kartā svayam rājā svayam prabhuh,” and “harta” is further explained as the destructive form (svayam eva sahkhāra-rājāḥ) of the Lord. [The Ms. of the Commentary on the Dohakoṣa of Kāhā-pāda in the possession of the writer, MS. Cambridge Add. No. 1699, p. 43(A)].

CHAPTER IV

THE PRACTICES OF THE SAHAJIYĀS AND THE STATE OF SUPREME BLISS (MAHĀ-SUKHA)

We have said that the Tāntric systems, whether Hindu or Buddhist, do not profess to discover and preach any truth anew; their main function is to indicate practical methods for the realisation of truth. The Sahajiyā cult, as an offshoot of Tāntric Buddhism, lays the highest stress on the practical method for realising the Sahajā-nature of the self and of all the Dharmas. We, however, do not propose to go into all the details; we shall give here a very brief account of the main practices and also of the state of supreme bliss produced through this process of Sādhanā.

(i) *The Guru-vāda*

The most important thing in connection with the practical aspect of the Sahajiyā religion is the selection of a proper preceptor. The whole field of Indian philosophy and religion is characterised by a unanimous emphasis on the Guru-vāda or the doctrine of the preceptor. It will be seen that in a sense all the systems of Indian philosophy and religion are mystic,—for according to all the systems truth always transcends intellectual apprehension or discursive speculation,—it is to be intuited within through the help of the preceptor, who has already realised it. Truth is transmitted from the preceptor to the disciple just as light from one lamp to the other. The only way of knowing the truth is, therefore, to seek the grace of the Guru, who, and who alone, can make a man realise the Supreme Reality. It is believed that the true preceptor in his non-dual state identifies himself with the disciple and performs from within the disciple all that is necessary for the latter’s spiritual uplift. The true disciple becomes an instrument in the hands of the true preceptor. It is for this reason that in Indian religions the Guru is held in the highest esteem. Sometimes the Guru is a substitute even for God, or at least God
is to be realised through the medium of the person of the Guru, who stands as the living proof for the existence of God. To ordinary people God is a mere time-honoured belief; but the preceptor opens the eyes of the disciple and makes him realise the existence of God. Tāntricism, which lays emphasis on the practical aspect of religion, naturally, lays equal stress on the function of the Guru. Moreover, many of the Tāntric practices are secret practices involving complex processes of esoteric yoga. Because of this stringent nature of the Tāntric practice the help of the Guru is enjoined to be sought at every step. These intricate esoteric practices, when properly and systematically carried out, may lead a man to the highest spiritual elevation,—on the other hand there is the chance of physical and mental aberration at every step, and if they are not pursued very cautiously and methodically with the guidance and directions of the experienced Guru they may lead, and are very likely to lead, a man into the darkest abyss of hell. Because of their stringent nature these practices have repeatedly been declared in all the Tantras as the secret of all secrets (guhyād guhyam), and therefore, there is no other way of being initiated into this method of Yoga save the practical help of the Guru. In almost all the Tantras the Guru is always praised in the superlative terms and is declared to be the highest reality itself.¹ Almost all the Caryā-songs speak highly of the Guru, who is the only help in the path of Sādhanā; the yogins are warned of the pitfalls of the path and are enjoined repeatedly to seek the help of the Guru, wherever there is an iota of doubt in mind and wherever there is the slightest difficulty. We shall see later on that the theory of Guru-vāda, as we find in the Dohās and the Caryā-songs, may be recognised as one of the main characteristics of all the religious sects represented by our old and medieval literature.²

(ii) The importance of the Body in the Sādhanā

In connection with the practical aspect of the Buddhist

¹ See the first part of the Subhāṣīta-samgraha, edited by Cecil Bendall, where various quotations are to be found from various Buddhist Tāntric texts in praise of the Guru and also defining the nature of a true preceptor.
² Vide Infra, Ch. V, Ch. VII, Appendix (A).
Sahajiyā cult we should also notice that along with the uncompromising spirit of revolt against all formalities and orthodoxy in religion, great emphasis is laid in the Sahajiyā literature on the human body, which is conceived as a microcosm of the universe. This feature, we have hinted, predominates in all the Tantras in general, wherever the yogic element prevails; but as the Sahajiyās laid their whole stress on the yogic element this theory of the body being the epitome of the whole universe was most emphasised. In the Hevajra-tantra we find that the Lord (Bhagavān) was asked by a Bodhisattva whether there was any necessity at all of this physical world and the physical body, everything being in reality nothing but pure void. To this the reply of the Lord was that without the body there was no possibility of the realisation of the great bliss and here lies the importance of the body.¹ But though the truth is within the body and arises out of it, it should never be confused to be something physical.² In the Śrī-kāla-cakra we find that without the body there cannot be any perfection, neither can the supreme bliss be realised in this life without the body,—it is for this reason that the body with the nervous system is so important for yoga; if perfection (siddhi) of the body be attained, all kinds of perfection in the three worlds are very easily obtained.³ In discouraging going on pilgrimage and bathing in the sacred rivers, Saraha says,—“Here (within this body) is the Ganges and the Jumna, here the ‘Gaṅgā-sāgara’ (the mouth of the Ganges), here are Prayāga and Banaras,—here the sun and the moon. Here are the sacred places, here the Pithas and the Upa-pithas—I have not seen a place of pilgrimage and an abode of bliss like my body.”⁴ The Tattva is within

he house of our body; yet, curious indeed it is, that we generally roam about in the whole world in search of it. It is nicely said by Saraha,—"He is within the house,—but you are enquiring about him outside. You are seeing your husband within, yet are asking the neighbours as to his whereabouts." "Know thyself, O fool," says Saraha,—"the truth is neither to be meditated nor to be held in the body as a Dhāraṇi, neither is it to be muttered as a Mantra.”

The scholars explain all the scriptures,—but do not know the Buddha residing within the body. "Some one bodiless is hiding himself in the body,—he who knows him there (in the body) is liberated.” In the Caryā-songs also the body is highly spoken of as the abode of truth. Thus Kānha-pāda says in a song,—"The yogin Kānha has become a Kāpāli, and has entered into the practices of yoga, and he is sporting in the city of his body in a non-dual form.” Again he says,—"Make the five Tathāgatas the five oars and, O Kānha, steer the body on and tear off the snare of illusion.” The image of the body being the boat and a pure mind the oar for proceeding on to the way of realising the truth is very popular with the poets of the Caryā-songs.

The body being thus recognised as the abode of all truth the fundamental principles of Mahāyāna as transformed into Vajra-yāna began to be located within the

physical system. Thus, corresponding to the six nerve-plexuses (ṣaṭ-cakra), or the six lotuses as they are also called, along the spinal cord,¹ as conceived in the Hindu Tantras as well as in the other texts on yoga, the Buddhists conceived of three plexuses or lotuses, with which they identified the three Kāyas. Thus the lowest Cakra in the region of the navel represents the lowest Kāya, *i.e.*, the Nirmāṇa-kāya (body of transformation); the Cakra in the heart is identified with the Dharma-kāya, (*i.e.*, the body of ultimate reality as the cosmic unity); and the Cakra just below the neck is said to be the Sambhoga-kāya (the body of bliss).² The Vajra-kāya or the Sahaja-kāya, which is the fourth Kāya with the Tāntric Buddhists, is located in the Uṣṇīṣa-kamala, or the Sahasrāra of the Hindus. It is also called the Mahā-sukha-cakra or the Mahā-sukha-kamala, being the seat of supreme realisation.

We have seen that the Bodhicitta is constituted of two factors, *viz.*, Śūnyatā and Karuṇā, or Prajñā and Upāya. Among the nerves of the body, which are innumerable, thirty-two are more important,³ of which again three are the most important, two by the two sides of the spinal cord and one in the middle; with these two side-nerves are identified the cardinal principles of Prajñā and Upāya, and the middle nerve, which is the meeting-place of the other two nerves, is spoken of as the path for the Sahaja, or rather Avadhūti-mārga or simply Avadhūtikā. Avadhūt is explained as being that, through the effulgent nature of which all sins are destroyed,⁴ or that which washes away

¹ These are (1) Mūlādhāra-cakra, or the sacri-coccygeal plexus, situated between the penis and the anus and facing down with four petals of red colour; (2) Svadhīṣṭhāna-cakra, or sacral plexus, near the root of the penis with six petals of the colour of vermillion; (3) Manipura-cakra, or the lumen plexus in the region of the navel with ten petals of the colour of the cloud; (4) Anāhata-cakra in the heart with twelve petals of the colour of Bandhuka-flower (red); (5) Viśuddha-cakra or the laryngeal and pharyngeal plexus at the junction of the spinal chord and the medulla oblangata with sixteen petals of smoky colour; and (6) Ajñā-cakra between the eye-brows with two petals of white colours. Above all, there is the Sahasrāra-cakra or lotus (padma) in the highest cerebral region.

² In the natural order, however, the Cakra in the heart, being next to the Cakra of Nirmāṇa-kāya, ought to have been the Sambhoga-kāya and the Cakra below the neck ought to have been the Dharma-kāya; this would have been consistent with the general order of the Kāyas.

³ See Śrī-sampūṭikā, MS. p. 3(B).

⁴ Commentary on the Dohākāṣa of Kānha-pāda, Dohā No. 4. (MS. B. N. Sans. No. 47) p. 39(B).
the beginningless thought-construction of existence,\(^1\) or that which removes the evils of afflictions very easily.\(^2\) The two nerves on the left and the right, which are identified with Prajñā and Upāya, and which meet together to produce the Bodhicitta, are variously termed in the Buddhist Tantras and the Caryā-songs. The nerve in the right which is the Upāya and which in the Hindu Tantras and the yoga literature is most generally known as the Piṅgalā, is also called rasanā, sūrya, ravi, prāṇa, camana, kāli, bindu, yanunā, rākta, rajas, bhāva, puruṣa, grāhya, vyāñjana (consonants) and also the syllable vaṃ. Again the nerve in the left, which is the Prajñā, and which is known generally as the nerve Iḍā, is also called lalanā, candra, śaśin, apāna, dhamana, āli, nāda, gaṅgā, śukra, tamas, abhāva, (also nirvāṇa), prakṛti, grāhaka, svara (vowel) and also ‘ē’.\(^3\) Without entering into the details of the significance of these names, it may be said that the two nerves represent the principle of duality and the middle nerve (known as Suṣumnā or Avadhūṭikā) represents the principle of absolute unity.

(iii) The Esoteric Practice

Coming to the question of the esoteric practice of the Sahajiyās, the first thing that we should take notice of is the importance attached to the process of Kāya-sādhana or the yogic practices for making the body strong and fit for higher realisations. This principle and practice of Kāya-sādhana is, we shall see, common to all schools of esoteric yoga and the exclusive emphasis of the Nātha-siddhas was on this Kāya-sādhana.\(^4\) Yoga in general involves psychophysiological processes; it is therefore that higher kinds of yoga should never be entered upon without a mature or perfect body. For this purpose of making the body mature or perfect the practices of Haṭha-yoga are to be adopted. It is for this reason that the Buddhist Siddhācāryas were, in the practical field, great Haṭha-yogins. In the Caryā-

4 Vide Infra.
songs we find frequent reference to the strengthening of the 'Skandhas' or the elements whose aggregate constitutes the body. Until and unless the 'Skandhas' are strengthened, or, in other words, the body is made ripe through practice of Haṭha-yoga, the supreme realisation, known in the Buddhist fold as Mahā-sukha becomes a lulling sleep of the senses or something like a swoon. It will be a blunder to confuse this state of swoon with the state of Mahā-sukha. It has been said in the Rati-vajra that if the body and the mind fall into a swoon in the practice of yoga, how can there be perfection in yoga? The yogin has, therefore, been repeatedly advised to acquire a strong body before entering on the yogic process for the attainment of Mahā-sukha.

It has been explained before how the principles of Prajñā and Upāya were identified with the female and the male (or even with the female organ and the male organ which are known also as the lotus and the thunder), and Bodhicitta was identified with the bliss produced through the union of the female and the male. The actual esoteric practice of the Buddhist Sahajiyās is the production of this Bodhicitta in the Nirmāṇa-cakra or the Maṇipura-cakra (in the region of the navel) through processes of Haṭha-yoga and then to give it an upward motion so as to make it pass through the Dharma-cakra and the Sambhoga-cakra and then make it motionless in the Uṣṇīṣa-kamala where it produces Sahaja of the nature of Mahā-sukha. It is held that the Bodhicitta has two aspects; in the ordinary restless aspect (i.e., in the form of gross sexual pleasure which accompanies the discharge) it is called Samvṛta, and in the motionless aspect of intense bliss it is called the Viśīta or the Pāramārthika. This Samvṛta and Pāramārthika aspects of the Bodhicitta represent the Samvṛti-satya, i.e., the phenomenal or the provisional aspect of reality and the Pāramārthika, i.e., the ultimate reality of Mahāyāna philosophy. The yogic Sādhanā of the Sahajiyās is employed first for the production of Bodhicitta through the union of

1 For ripe (paksha) and unripe (apaksha) body, see Infra.
2 mūrcchite skandha-vijnāne kutaḥ siddhir anindita ||
Quoted in the commentary of the Cāryā-song No.1
the Prajñā and the Upāya and then for transforming the Saṁyutta Bodhicitta into Pāramārthika. The contention of the Sahajiyās is that so long as the intense bliss produced through the union of the Prajñā and the Upāya remains in the region of Maṇipura-cakra or in the region of the navel which is the Nirmāṇa-cakra or the gross physical plane of bondage and suffering, it keeps the yogin in the world of grossness. But as according to standard Mahāyāna philosophy the Bodhicitta, after its production, must march upwards through ten stages known as the Bodhicitta-bhūmis and reach the highest state of Dharmamegha and attain Buddhahood there, so according to the view of the Sahajiyās this flow of bliss must be made to march upwards through the different Kāyas (corresponding to the Bhūmis) and finally reach the region of Vajra-kāya or Sahaja-kāya. In the process of upward march the bliss first produced goes on acquiring a higher nature and when it reaches the Uṣṇīṣa-kamala or the Vajra-kāya or Sahaja-kāya it becomes Mahā-sukha, where all kinds of duality vanish in a unique realisation of supreme bliss.

(iv) The Middle Path in the Esoteric Sādhanā

A dominant feature of Mahāyāna is its stress on the middle path avoiding the opposite extremes of views. Thus the philosophical system of Nāgārjuna is known as the 'Mādhyamika' system, or the philosophical school of the middle course, and it is held that Nāgārjuna’s school is a school of the middle course in the sense that he steered clear a transcendental path which denies the views of the positivists as well as the negativists. The philosophy of the Abhūta-parikalpa of Vasubandhu as expounded in his well-known treatise Madhyānta-vibhāga is again a challenge to both the extreme realists (like the Sarvāstī-vādins) and the extreme negativists (like the Mādhyamikas),¹ and the Vijnāna-vādins always professed to be the followers of the middle path. Apart from these philosophical speculations we find in the religious sphere on the whole that the Mahāyānists were opposed to the Idea of Nirvāṇa as much

¹ The Mādhyamika school was always criticised by the Vijnāna-vādins (as also by the Vedāntins) as a pure negativistic school.
as to that of existence in the world of suffering (bhava or samsāra); and according to them the final state is neither the Bhava, nor the Nirvāṇa,—it is rather a state of non-duality where Bhava and Nirvāṇa become one and the same. In connection with the idea of Advaya or Tuganaddha we have seen that the final state is that where all kinds of duality are absorbed in a principle of non-duality. This principle was adopted also by the Sahajiyās in their process of yoga. We have seen that the nerves in the right and the left in the microcosm of the body represent the principles of duality; their separate function which binds one to the world of sufferings must, therefore, be checked by the Yojin and they must unite with the middle nerve and function there conjointly. The middle nerve is, therefore, the middle path which leads to the non-dual state of Sahaja.

The flow of Bodhicitta must be regulated along the middle nerve, and this is the most important and at the same time the most difficult part of the Śādhanā, and it is for this reason that in the Caryā- paddas and the Dohākośas as well as in many of the Buddhist Tāntric texts we find repeated warnings to the novice to take practical suggestions from the preceptor at this stage. If the flow of Bodhicitta moves either left or right, the whole thing is spoiled. In the Caryā- paddas, therefore, we find repeated warnings not to go either right or left, but to steer clear through the middle path. We often find injunctions in the Caryās for securing perfect control on the two nerves in the right and the left and to join them together (i.e., to make them function together) in the middle nerve. Thus in a song Lui-pā says, "I have intuited the (non-dual truth) through the suggestion (of the preceptor). I have sat where the couple of the nerves Dhamana (the nerve in the left) and Camana (the nerve in the right) are united together."  

1 ḍhapai lui āmhe sāne diṭhā [ jhāne diṭhā—Bagchi]

Again
Cāṭilla-pāda says,—"The deep river of existence is flowing on in a tremendous flow; there is mud on either side of the river, but the middle is unfathomable. For the sake of 'Dharma' (i.e., for the realisation of the non-essential nature of all the Dharmas) Cāṭilla has built up a bridge, and people, desirous of going to the other shore, can now cross (the river of existence) fearlessly.... After walking up the bridge go neither right nor left,—near is the Bodhi, do not go far." From the yoga point of view this river of existence refers to the nervous system mainly with the three principal nerves, which are described in the commentary as ābhāsa-traya (viz., Śunya, Ati-śunya and Mahā-śunya), which are the principles of defilement and therefore also the cause of all existence. The two sides, i.e., the two nerves on the left and the right are muddy, i.e., they are the paths which lead to the principles of defilement, and the middle nerve leads to the depth of the truth and so it is unfathomable. The bridge however, signifies the establishment of the unity between the two aspects of the Bodhicitta, viz., Samvṛti and Pāramārthika, in other words, it is the way to realise as well as demonstrate how the physical Bodhicitta can be transformed into the ultimate Bodhicitta through processes of yoga. Cāṭilla-pāda warns that when one is on the bridge, i.e., when one is engaged in transforming the Samvṛti Bodhicitta into the Pāramārthika through the yogic process, one should go neither left nor right,—the Bodhi is to be attained through the middle nerve.

Kānha-pāda says in one of his songs,—"The path (i.e., the right path) is obstructed by the Āli and the Kāli." Again we find,—he (Kānha) enters the lotus-pool of Sahaja by breaking the two posts of 'e' (representing Prajñā, or the

1 The original word is dhāma which may be derived from the Sanskrit word dharmā; but Dr. Sukumar Sen suggests that the original word dhāma refers to Dhāma-pāda, a disciple of Cāṭilla-pāda.

left nerve) and ‘vam’ (representing Upāya or the right nerve).\(^1\) Again we see that after entering into the yogic practice Kānha has made the Āli and the Kāli the anklets of his legs and the sun and the moon his earrings.\(^2\) Both these metaphors signify that Kānha has got full control over the Āli and the Kāli or the moon and the sun (which refer to the two principles of Prajñā and Upāya as well as to the two nerves). Kānha says that he has realised the wave (i.e., the vibration of bliss) in the middle course.\(^3\) In his Dohās also he says that he has broken off the two nerves lalanā-rasanā or ravi-saśi in the two sides.\(^4\) Kambalāmbara-pāda says that after pressing the left and the right (nerves) and keeping close to the middle way he has been able to realise supreme bliss.\(^5\) Again Đombi-pāda says in a song,—“The boat is steered through the middle of the Ganges and the Jumna; there the exhilarated lady (i.e., Nairātmā, absorbed in the Sahaja-bliss) smoothly carries her children (i.e., the yogin) to the other shore. Steer on,—steer on Oh Đombi, (exclaims the poet), time is high up in the way; through the (blessings of the) lotus-feet of the Guru we shall go to the land of the Jinas (i.e., the self-controlled ones). Five oars (taken in the commentary to indicate the five-fold instructions given in the Pañca-krama) are moving;—when in the way tie up the rope of the boat with the pītha, (i.e., arrest the flow of the Bodhicitta, which is compared here to the boat, in the Maṇi-mūla). Throw out water with the pot of void, so that water may not enter through the joint. The moon and the sun are the two wheels, and (the unity of) creation and destruction is the mast (pulinda); the two paths to the left and the right are not seen,—steer the boat at your own pleasure.”\(^6\) Śanti-pāda also says that he is roaming avoiding the two ways in the left and the right.\(^7\) In another song of

Viñña-pāda he says that he has made a viñña (i.e., lyre) of which the sun is the gourd (lāu) and the moon is the string and Avadhūtī is the stand. On hearing the tune of the Āli and the Kāli, he says, the mighty elephant has entered Samarasa.  

Here the sun which is said to be the gourd and the moon which is said to be the string, are but the two nerves in the two sides, and the stand (daṇḍa) is the middle nerve. When the two nerves in the left and the right are controlled and fitted to the middle one, an anāhata sound is produced and it leads the elephant (i.e., citta) to the state of Samarasa. Saraha-pāda says, “In the right and the left are canals and falls,—the straight path is the safe path.”

We need not multiply the instances and the analogies given in connection with the yogic process of controlling the two nerves on the two sides and the raising of the Bodhi-citta along the middle nerve. But what is the process for giving the Bodhi-citta an upward motion? The Āpāna wind, it is held, has always a downward motion the Prāṇa an upward motion; the yogin, therefore, should arrest the course of both the Prāṇa and the Āpāna and then make them flow through the middle nerve and with his flow of the vital wind within the middle nerve the Bodhi-citta will also flow upward and reach the Uṣṇiṣa-kamala,—and thereby Mahā-sukha will be produced. The Bodhi-citta should then be made steady by making steady the breath, and this state of Yoga is the ultimate stage for the yogin.

In this production of the Bodhi-citta four stages, associated with the four Cakras or lotuses, are distinctly marked, and on the basis of these four stages we find mention of the four Mudrās (viz., Karma-mudrā, Dharma-mudrā, Mahā-mudrā and Samaya-mudrā), which are the four stages of yoga. There are again four mental states called the four moments (viz., Vicitra, Viḍāka, Vimarda and Vilakṣaṇa,

and four kinds of bliss, viz., Ānanda, Paramānanda, Viramānanda and Sahajānanda. Ānanda is the bliss when the Bodhicitta is in the Nirmāṇa-cakra, Paramānanda in the Dharma-cakra, Viramānanda in the Sambhoga-cakra and Sahajānanda is more intense; Viramānanda means the detachment from the worldly pleasure, and Sahajānanda is the final bliss.¹

(v) The Yogic Sādhanā of the Sahajiyās and the Female Force

Another thing that deserves special attention in connection with the yogic practice of the Sahajiyā Buddhists is the conception of the female force. In the Cārya-songs we find frequent references to this female force variously called as the Caṇḍālī, ṃbī, Śavarī, Yoginī, Nairāmanī, Sahaja-sundarī, etc. and we also find frequent mention of the union of the yogin with this personified female deity.

This Yogini or the Sahaja-damsel should not be confused with the woman of flesh and blood, associated with the actual yogic practices; she is but an internal force of the nature of vacuity (Śūnyatā) or essencelessness (nairātma) and great bliss residing in the different plexuses in different stages of yogic practice.

In the Hindu Tantras we find that in the Mūlādhāra-cakra (which is the lowest of the Cakras) remains coiled an electric force known as the Serpent-power (coiled like a serpent) or the Kula-kundalini Śakti, and the Sādhanā consists in rousing this Śakti, lying dormant in the Mūlādhāra, and making her unite with the Śiva in the Sahasrāra; and we have seen that the union of the Śakti with the Śiva is what is meant by perfection in Tāntric Yoga. Corresponding to this Kula-kundalini Śakti of the Hindu Tantras we find the conception of a fire-force of the Buddhists in the Nirmāṇa-kāya, and she is generally described as the Caṇḍālī. Thus it is said by Kānha-pāda in one of his songs,—“One is that lotus, sixty-four are the petals,—the ṃbī climbs upon it and dances.”² In the Hevajra-tantra we find, “The Caṇḍālī burns in the navel and she burns the five Tathāgatas

¹ Śrī-kāla-cakra-tantra, MS., p. 57(A); Hevajra-tantra, MS., p. 27(B).

and the goddesses like Locanā and others, and when all is burnt, the moon pours down the syllable hum.” This Caṇḍāli is the goddess Nairātmā or Avadhūti kā or Prajñā, and when she is roused through the yogic practice in the navel, all the five Skandhas or the material elements represented by the five Tathāgatas and all the goddesses like Locanā and others associated with these Tathāgatas are burnt away, and when all is burnt the moon, which represents the Bodhi-citta, pours down hum, which again represents the ultimate knowledge (vajra-jñāna). In a song of Guṇjārīpāda we find,—“The lotus and the thunder meet together in the middle and through their union Caṇḍāli is ablaze; that blazing fire is in contact with the house of the Dombī—I take the moon and pour water. Neither scorching heat nor smoke is found, but it enters the sky through the peak of mount Meru.” When the lotus and the thunder are united through the emotion of Mahā-sukha (which is happily compared to a gush of wind) Caṇḍāli is ablaze in the Nir-

1 caṇḍāli jvalātā nābhau dahati pañca-tathāgatān ||
   dahati ca locanādīni dagdhe hum sravatā sāsī ||

Hevajra-tantra, MS., p. 4(B).

2 In the Hevajra-paṭikā we find as many as four interpretation of this verse. In the first interpretation we find that Caṇḍā means Prajñā as she is of very fierce (caṇḍa) nature in controlling all the great and minor afflictions (kleśopakleśa) and Āli means Vajra-sattva; therefore Caṇḍāli means the union of Prajñā with the Vajra-sattva; and as a result of that union the fire of great emotion (mahā-rāga) burns away the five Skandhas and the five elements of earth, etc. (Cf. locanā-
dīn‘ti prāthiyā-dīnāti) and the Sāsī as the Vajra-sattva adopts the nature of hum, (it may be remembered in this connection that hum is the bīja mantra of the Vajra-sattva). The second interpretation is almost the same as the first. Another sectarian view (sampradāya-vyākhyā) is that Caṇḍā is Prajñā, or the left nerve (i.e., flowing from the left nostril) and Āli is Upāya or the right nerve; when they are combined together through the instructions of the preceptor, it is called Caṇḍālī; Nābhi indicates the middle, i.e., the Avadhūti kā (i.e., the middle nerve) through which the fire of great emotion (mahā-rāgāgni) all the five Skandhas and the material elements (earth, etc.) are burnt, and when they are burnt the knowledge of the Mahā-sukha is produced. Again, another sectarian explanation is,—Caṇḍā is Prajñā, i.e., Śūnyatā-knowledge,—and Āli means the mind full of universal compassion; caṇḍāli then means a commingling of these Śūnyatā and Karunā and when it is thus combined Sāsī, i.e., the Vajra-dhara attains an illuminating Samādhi (prabhāśvaravamaya-samādhi) where the world of the past, present and the future is realised to be one and unchanging. [(Vide Hevajra-paṭikā, MS., pp. 9 (B)-10(B).]

māna-cakra in the navel. In contact with this fire of Mahā-
sukha the house (i.e., the store of all complexes, desires and
root-instincts) is burnt, but the moon (i.e., Bodhi-citta)
pours water in the fire. This fire of Mahā-sukha has neither
heat nor smoke, but it enters into vacuity (gaṇa) through
the spinal column (mount Meru).

In the Sādhana-mālā we find that Mahā-mudrā resides in
the navel and she is the producer of Mahā-sukha, and for
intense scorch she is described as of the nature of fire. She is
of the nature of the first vowel, she is taken to be the wisdom
by the Buddhhas,—she remains pervading the three elements
(tri-dhātu, and is never known by lay people (prthag-jana).

In the Sampuṭikā this Caṇḍāli is depicted as the female
counterpart of the Vajra-sattva; she is absorbed in him, as
Prajñā and when roused by the yogic practice she becomes
ablaze in the region of the navel. She is known as the god-
ess Nairātma as well as the Vasanta-tilaka, she consumes
in her thousand heaps of fire—her lustre is like the dazzle
of the lightning; at the time of the yogic practice (of making
oneself a god) the Śakti moves throughout the whole body
with all her power,—she burns the Dharma-cakra in the
heart and then through the Sambhoga-cakra proceeds for-
ward and enters the Cakra in the head and then after burn-
ing everything and producing bliss returns to the region of
the navel again. In the commentary on the Marma-kalikā-
tantra we find a description of the nature of this Caṇḍāli.
It is said to be of the nature of a peculiar affection produced

through the application of all yoga-practices with the instructions of the preceptor,—it is like juice extracted from sugarcanes through pressure,—like great light produced in the wood through friction,—like the pleasure produced in the couples through their intense love in copulation,—like cream produced in milk through churning,—like the most substantial thing (ghṛta) produced in cream through the power of heat,—like hard pottery produced from mud through the power of whirling,—like the best potency (wine) produced in grapes, etc., through medicinal processes, like the actual presentation of the desired one through the power of attraction produced in Mantra, etc.¹ Thus it seems from all these descriptions that the goddess Caḍāḷī is nothing but an internal force produced through the yogic process and that the rising of the Caḍāḷī marks the first perception of the Mahā-sukha produced through esoteric yogic practices; when in her upward march she reaches the Uṣṇīṣa-kamala, she becomes of the nature of pure Mahā-sukha. This conception of Sakti of the Buddhist Sahajiyās is an adoption of the general Tāntric conception of the Sakti mixed up with the principle of the destructive fire, or the fire-force situated in the navel as postulated and emphasised by the Nātha-yogins.² When through the yogic-process this Sakti is made to move upwards and is gradually dissociated from the principles of grossness and defilement, she gradually reveals to the yogin her pure nature of bliss and in the region of the lotus in the head, i.e., in the highest state completely dissociated from the principle of grossness and defilement, she becomes pure Mahā-sukha.

In the upward march the Caḍāḷī is often described as the Ḍombi and when in the Mahā-sukha-kamala, she is the Sahaja-damsel (Sahaja-sundari) with whom the perfect yogin is always united. In the Caryā-padas we often find that the

² Vide Infra Ch. IX.
yogin is sporting with the goddess Nairātmā in the Sambhoga-kāya near the neck. Thus Savara-pāda says in a song,—"(I chew the) betel-leaf of my heart and chew camphor in great bliss,—and then with the goddess Nairāmaṇi in the neck I pass the night in Mahā-sukha." Here the ‘betel-leaf of heart’ stands for the luminous Cittā, and camphor (kāpura=karpūra) for semen.² Nairāmaṇi (or Nairā-
maṇi) is the goddess Nairātmā or Prajñā,—neck implies the Sambhoga-cakra, and night implies the darkness of ignorance and afflictions. In a song of Kānha-pāda we find that the uninitiate speak ill of the Ṛombī (Nairātmā) but the wise never separate her from the neck, i.e., from the Sambhoga-
kāya.³ In another song of Śavara-pāda we find that the yogin remains awake with the damsels Nairātmā awakened in the neck (i.e., the Sambhoga-cakra).⁴ In a song of Guṇ-
ḍari-pāda we find,—"After pressing the three (i.e., after purifying and controlling the three nerves), I embrace the Yōginī. . . .O Yōginī, (exclaims the yogin) I shall not live even for a moment without thee,—I shall kiss thy lips and drink the lotus-juice."⁵ In another song of Kānha-pāda we find,—"Outside the city, O Ṛombī, is thy cottage; thou goest just touching the Brahmins and the shaven-headed (and never reveal thyself to them). O Ṛombī, I shall keep company with thee and it is for this purpose that I have be-
come a naked Kāpālī without aversions. There is one lotus and sixty-four are the petals,—the dear Ṛombī climbs on it and dances there. Honestly do I ask thee, on whose boat dost thou come and go? The Ṛombī sells the loom and also the flat basket (made of bamboo). For thee have I done

away with this drama of life. Thou art the Ṛombi and I am the Kāpālī, for thee have I put on a garland of bones. The Ṛombi destroys the lake and eats up the lotus-stalk. I shall kill thee, Ṛombi, and take thy life."¹ Here, the Ṛombi is the Nairātmā and we have already seen that as a Ṛombi (i.e., a woman of the Ḍoma-caste) cannot be touched by a Brahmin because of her low caste, so also the Nairātmā cannot be realised by the orthodox Brahmin, as she transcends all sense-perception.² She, therefore, lives outside the city, i.e., outside the world of senses. In the metaphor of selling the loom and the basket of bamboo there seems to be a pun on some of the words; tanti in the vernacular means a loom, but it may also be associated with the Sanskrit word tantrī or tantra, the thread of mental constructions; the word cām-geḍā means a basket (made of bamboo), but the commentary explains it as viṣayābhāsam, i.e., the defiling principle of objectivity. The lake mentioned above is the body and the lotus-stalk is the Bodhi-citta; and the Ṛombi, unless she is perfectly purified, spoils both of them. It is for this reason that the Ṛombi should be purified and made steady in order to attain the Bodhi-citta. This latter Ṛombi, however, seems to be the vital wind, impure and uncontrolled, and in the Hevajra-tantra we find that the element of air is represented by the goddess Ṛombi.³ In a song Vīṇā-pāda, who has made a lyre with the sun, the moon and the Avadhūti, says that when the lyre produces sound, the Vajradhara (the yogin himself) dances and the goddess (Nairātmā) sings and thus the drama of the Buddha is played.⁴ Kānha-pāda says in another song,—"Of what nature is, O Ṛombi, thy cleverness?—the aristocrats are outside thee and the Kāpālīs are within (i.e., the arrogant pundits and the orthodox priests can never have any access to the Sahaja-Nairātmā, but only the Kāpālīyogins can realise her). Thou hast spoiled everything, through the law of cause and effect thou hast destroy-

⁴ nācanti vājīla gānti deś
buddha nājaka visamā hoi /// Song No. 17.
ed the moon. (The significance is that the Nairātmā, when covered with the veils of ignorance, deceives the whole world through illusory knowledge, in that respect she spoils the moon, i.e., the Bodhi-citta). Some speak ill of thee, but the learned never cast thee off from the neck (i.e. the Sambhoga-cakra). Thou art the Kāma-caṇḍālī,—there is no woman more cunning and unfaithful than the Ḍombī.

In another song of Kānha-pāda we find a beautiful analogy of marriage with the Ḍombī. First follows a wedding procession in which existence and extinction are made the musical instruments pataha and mādala and the mind and the vital wind are similarly made two other musical instruments,—the drum is proclaiming a victorious sound and Kānha is on his march for marrying the Ḍombī. By marrying the Ḍombī the gain is the escape from birth, and the transcendent region (ānatu-dhāma=anuttara-dhāma) of Mahā-sukha is obtained as the dowry. After marriage day and night pass away in sex-discourse and the night is passed in the bright company of the Yoginī (i.e., the dark night of ignorance vanishes away at the appearance of the effulgent Sahaja-knowledge). The yogin who is in love with the Ḍombī never leaves her even for a moment and always remains mad in the Sahaja-bliss.

In a song of Kukkuri-pāda we find it put into the mouth of the Nairātmā,—“I am free from all hopes and desires and the void mind is my husband,—the nature of the realisation of bliss that proceeds from me cannot be expressed.” In another song, Śavara-pāda says, “High is the mountain (i.e., the spinal column) and there on it (i.e., in the Mahā-sukha-cakra which is above the spinal column) sits the Śabarī girl; she is decked with the coloured feathers of the peacock and with a garland of jequirity on her neck. O exhilarated Śavara, O mad Śavara, (exclaims the girl on the mountain), do not revel in worldly pleasure; I am thy dear consort of the name of Sahaja-sundari (i.e., beautiful Sahaja-lady). Many are the trees on the mountain

whose branches touch the sky,—the Śavārī girl decked with earrings and the thunder plays alone in this forest. The bed-stead of the three elements (viz., body, speech and mind) are placed and the Śavara spreads the bed in great bliss, and the serpent-like Śavara (i.e., the citta) and the goddess Nai-rātmā (who destroys all the affictions) pass their night of love on that bed.”\(^1\) In another song of Bhusuka-pāda he says,—“I have steered the thunder-boat through the canal of the lotus,—and have left off all the affictions after reaching the non-dual Bengal. To-day Bhusuka has indeed become a Bengalee, for he has taken Caṇḍālī as his own wife.”\(^2\)

Here the Vajra (the thunder) stands for the Citta-vajra (i.e., the adamantine mind) and the lotus stands for the Prajñā, and through their union the non-dual truth (Bengal) is obtained.\(^3\) By making Caṇḍālī (produced through the union of the thunder and the lotus) his wife, the yogin has realised the purely non-dual truth.

\(^{3}\) It is to be noticed that Bengal here represents non-duality. (Cf. also, bāṅge jāyā nilesi etc. Song No. 39). How it came to be so we do not know. MM. Hara prasāda Śāstrī, however, says in his introduction to the Baudhā-gān-O-Dohā (Intro., p. 12) that in the Sahajiyā School there are three ways of Sādhanā—viz., Avadhūti, Caṇḍālī and Dombī, or Vaṅgālī (i.e., Bengalee). In the Avadhūti there is only duality, Caṇḍālī seems to be a mixture of dualism as well as non-dualism, but in Dombī there is only uncompromising non-duality. In Bengal, continues MM. Śāstrī, there was a predominance of monistic thought and therefore the author Bhusuka says that he has become a Bengalee or a pure non-dualist. We, however, do not know on the authority of what text or texts MM. Śāstrī has made these observations. We have never come across any text explaining or even mentioning these three ways of Sahajiyā Sādhanā and it seems a puzzle to us why Avadhūti should represent dualism. His assertion that Bengal has always stood particularly for non-dual knowledge does not also seem to be historically correct.
(vi) The Final State of Bodhi-citta or the State of Mahā-sukha

From our previous discussions it will be clear that the question of the production of the Bodhi-citta and its upward march through the different Kāyas to the Uṣṇīṣa-kamala so as to be transformed there into Mahā-sukha is closely associated with the question of raising the Śakti from the lowest pole of phenomenalism to the highest pole of absolute truth. When the Śakti reaches the Vajra-kāya or the Sahaja-kāya she becomes Śūnyatā herself,—and our prefected Citta becomes the lord Vajra-sattva; real Mahā-sukha follows only when this Śūnyatā is united in the Sahaja-kāya with the Vajra-sattva.

There are, however, some signs which are observed by the yogin when the ultimate state is produced. In the Śrī-guhyā-samāja we find mention of five such signs: the first is of the form of a mirage, the second of the form of smoke, the third in the form of a firefly, the fourth is like a burning lamp and the fifth is like the stainless sky.¹ These signs are rather significant. In the commentary on the Marma-kalikā-tantra it has been explained that the sign of mirage signifies the knowledge about the nature of the world, which at that time appears to the yogin to be as illusory as a mirage. When the illusory nature of the Dharmas is thus realised, there remains no appearance (pratibhāsa) and, therefore, everything appears to be smoky, a mere illusory happening through the collocation of the causes and conditions like the origination of an elephant in magic; this dependent origination (pratitya-samutpāda) is the smoky nature of the world and hence is the second sign.² Again, as for the third sign it is said that as the firefly shines in the sky now and then for a single moment, so also in this stage perfect knowledge appears through the void-nature of the Dharmas like momentary

Com. on the Marma-kalikā-tantra, MS. (BN. Sans. No. 83), p. 45(B).
flashes and hence is the appropriateness of the third sign.¹ In the fourth stage knowledge becomes as bright as a burning lamp and in the fifth or the final stage it becomes like the clear blue mid-day sky of autumn. These signs are referred to also by the Śrī-kalā-cakra-tantra;² but there as well as in the Saḍāṅga it is found that smoke is the first sign and mirage is the second.³

But what is the condition of the yogin when the Bodhicitta is produced and the ultimate realisation is obtained? It is said in the Vyakta-bhāvānugata-tattva-siddhi⁴ that at that time all the senses are absorbed within, all thought-constructsions are destroyed, all the seeds of existence are annihilated; it is full of lustre of bliss,—it is like the vacant sky and yet cool and congenial.⁵ It is said elsewhere that at that stage it seems as if the senses are all asleep,—the mind enters within,—and the body completely absorbed in supreme bliss seems to be without any function.⁶ In the Cāryā-padas we find many songs describing this ultimate stage of perfection or the realisation of the Sahaja-nature in the form of Mahā-sukha. Kānha-pāda in a song compares himself, when absorbed in the Sahaja bliss, to an intoxicated elephant; like the elephant he has trampled down all the posts of ‘c’ and ‘vaṁ’ or the moon and the sun and torn asunder all the various ties, and like the elephant under strong intoxication has entered the lake of the lotus and become perfectly

   Quoted in the Kriyā-saṁgraha-paṭijīka, MS. (BN. Sans. No. 31), p. 76(B); also in the Com. on the Cāryā-pada No. 1 (Śāstri’s Edition).
pacified there.² Mahīdhara-pāda says in a song that he has identified himself with the three wooden boards (i.e., the three kinds of bliss as belonging to the body, speech and mind), or, in other words, he has identified the bliss of the body with that of the speech and that again with that of the mind and finally identified all with the self,² and there follows a tremendous roar of the spontaneous anaha (anāhata) sound;—on hearing that sound the arch-enemy, Māra, and all the desires and afflictions of the body vanish away. The exhilarated elephant of Citta is marching on—and in the sky it is always rubbing the sun and the moon (i.e., all principles of duality). Both vice and merit are destroyed, the chain is torn away—the posts trampled, and the sound of the sky is raising—the Citta enters into Nirvāṇa. The Citta neglects all the three worlds, drinks the great liquor (of Mahā-sukha) and revels in intoxication; thus he becomes the lord of the five objects, i.e., becomes the Vajra-sattva himself,—and no enemy is then to be found anywhere. In the scorching heat of the rays (of Mahā-sukha) he has entered the skirt of the sky. Mahīdhara says, "When here I sink within—nothing is seen by me."³ Bhusukapāda says in a song,⁴ "The clouds of compassion are shining always after pressing down the duality of existence and non-existence. The wonderful has risen up in the sky,—behold, Bhusuka, the Sahaja-nature! On seeing and hearing it (i.e., the Sahaja-nature) all the senses are destroyed and the mind within revels in solitude.⁵" As all darkness vanishes with the rise of the bright moon in the sky, so also all darkness of ignorance is removed through the rise of the Bodhi-citta and through the realisation of the Sahaja-bliss the ultimate reality underlying the objects is also realised.

PART II
THE MEDIAEVAL SAHAJIYA SCHOOLS
CHAPTER V

THE VAIŚṆAVA SAHAJIYĀ CULT

(i) Transition from Buddhist Sahajiyā to Vaiśṇava Sahajiyā

The Vaiśṇava Sahajiyā movement of Bengal marks the evolution of the Buddhist Sahajiyā cult in a different channel as strongly influenced by the love-religion of Bengal Vaiśṇavism. The Vaiśṇava Sahajiyā cult has a considerable literature to its credit. As many as two hundred and fifty manuscripts of small texts containing the various doctrines and practices of the cult are preserved in the Manuscript Library of the Calcutta University and about an equal number of texts (many of them being common with those preserved in the Manuscript Library of the Calcutta University) belong to the Manuscript Library of the Vaṅgīya Sāhitya-pariṣad. These texts, however, do not possess much intrinsic literary value and as such their contribution to Bengali literature would not have been of much importance but for fact that they help us in studying a large number of lyrical songs belonging both to the Sahajiyā Vaiśṇava and the standard Vaiśṇava cults, both of which accepted the ideal of Parakīyā love as contrasted with the ideal of Svakīyā love in their doctrines.¹

These love-lyrics, belonging to the province of Vaiśṇavism, combine in them a genuine poetic vein of an absorbing human interest with an avowedly religious sentiment and as such they offer a good specimen of how far it may be possible for erotic sentiment, aesthetic sentiment and religious sentiment to combine in popular poetry. In the history of the Vaiśṇava literature of Bengal the most important factor is the gradual evolution of the ideal of Parakīyā love; but whereas the ideal of Parakīyā love was merely recognised as a theological speculation in standard Vaiśṇavism, it was accepted even in its practical bearing by the Sahajiyās. In the history of Bengal Vaiśṇavism there seems

¹ For the ideals of Svakīyā and Parakīyā see infra, p. 124.
to have been a process of interaction between the two sects—the practice of the Sahajiyās influencing to a great extent the ideal of the Vaiṣṇava poets, and the ideal of the Vaiṣṇavas in its turn influencing the practices of the Sahajiyās. Though the story of the love-episodes of Caṇḍīdāsa, the greatest love poet of Bengal, with the washer-woman, Rāmī, is still shrouded in mystery and as such cannot be credited historically as supplying proof of Caṇḍīdāsa himself being an exponent of the Sahajiyā practice, yet we should remember that tradition always indicates possibility. Judging from the heaps of tradition centering round the figure of poet Caṇḍīdāsa and also from the number of Sahajiyā poems ascribed to him, it will not be far out of the mark to hold that there might have been some truth in the tradition of Caṇḍīdāsa himself being a Sahajiyā Sādhaka and that his practical culture of the divinisation of human love had supplied him with the deep inspiration that made him the immortal poet of the Rādhā-Kṛṣṇa songs. The indebtedness of Śrī-Caitanya to the love-lyrics of Jayadeva, Vidyāpati and Caṇḍīdāsa is well-known through the Caitanya-caritāmṛta (a standard biography of Caitanya) and the songs of some other poets; the inspiration derived from these songs was not negligible in moulding Caitanya’s ideal of divine love. Apart from the controversy over the religious viewpoint of Caṇḍīdāsa and its influence on Caitanya’s ideal of love, it may be held that the general history of the Vaiṣṇava Sahajiyā movement with its stress on Parakīyā love was closely related to the general devotional movement of Bengal; it is because of this close relation between the two that the rich field of Bengali lyrics cannot be fully and properly studied without a proper study of the Sahajiyā religion and literature.

The lyrics belonging to the Vaiṣṇava Sahajiyā school are generally ascribed to the well-known poet Caṇḍīdāsa and to some other poets like Vidyāpati, Rūpa, Sanātana, Vṛndāvana-dāsa, Kṛṣṇa-dāsa Kavirāja, Narahari, Narottama, Locana, Caitanya-dāsa and others, and the innumerable Sahajiyā texts are also ascribed to their authorship.

Such assignment, which was evidently made with a view to securing authoritative support from the great Vaiṣṇava
poets and thinkers for the unconventional practice of the Sahajiyās, need not be credited historically. In their zeal for propaganda these Sahajiyās have held all the great poets like Jayadeva, Vidyāpati, Caṇḍīdāsa and others, and the great Vaishṇava apostles like Rūpa, Sanātana, Svarūpa Dāmodara, Jīva Gosvāmī and others to be the exponents of Sahajiyā practice. Even Śrī-Caitanya himself has been held by some of the Sahajiyās as having practised Sahaja Sādhanā with female companions and attained perfection through it,¹ as lord Buddha was held by the Buddhist Sahajiyās as having practised Sahaja Sādhanā in company of his consort Gopā. It seems, however, that almost all the songs (including the enigmatic songs ascribed to Caṇḍīdāsa well-known as the Rāgātmika Padas) and the texts were composed by the exponents of the Sahajiyā cult in the post-Caitanya period, and mostly in or after the seventeenth century A.D.

We have hinted on several occasions that the secret yogic practices, round which grew the paraphernalia of the different Sahajiyā cults, belong neither strictly to the Buddhist fold nor exclusively to the Hindu fold; they are essentially yogic practices, which by their association with different theological systems, either Buddhist or Hindu, have given rise to different religious cults. The most important of the secret practices is the yogic control of the sex-pleasure so as to transform it into transcendental bliss, which is at the same time conducive to the health both of the body and the mind. This yogic practice with its accessories, being associated with the philosophy of Śiva and Śakti,

¹ It is curiously held by a section of the Sahajiyās that Caitanya practised Sahaja Sādhanā in company of Śāthi, daughter of Sārvabhauma, and it was because of this fact that the mother of Śāthi once said that she would have her daughter a widow. (Cf. Caitanya-caritāmṛta, Madhya-īla; Ch. XV). The Sahajiyās hold that all the great Vaishnava apostles of standard Vaishnavism practised Sahaja Sādhanā with some female companion. Thus it is said in the Vivarta-vilāsa of Akiñcan-dāsa,—Sīrī rūp karilā sādhanā mirār sahite bhaṭṭā raghu-nāth kailā karn-bāi sāthē | laksṇī hirā sāne karilā goṁśā saṅālān māhāmanātra preme sevā sadā ācaran | gośālī lokānāth caṇḍāliṁ-kanyā saṅge | doḥā jan anurāg premer taraṅge | goyālim piṅgalā se braja-deśi samaś | gośālī kṛṣṇa-dās sadā ācarana | syāmā nāpādār saṅge Śrī-jīva-gosvātī | paraṁ se bhūva kailā yār sīnā nāī | ṛaghu-nāth gośāmī prīti ulāše | mirā-bāi saṅge teha rālā kuncā-bāse | guar-prīyā saṅge goṇāl bhaṭṭa goṁśāī | karage sādhan anya kichu nāī | rāy rāmānanda yājye devakanyā saṅge | ēropete sthiti teha kriyā taraṅge | Vaṅga-sāhitya-paricaya, Vol. II, p. 1650.
stands at the centre of the net-work of the Hindu Tāntric systems, and when associated with the speculations on Prajñā and Upāya of later Buddhism, has given rise to the Tāntric Buddhist cults including the Buddhist Sahajiyā system; and again, when associated with the speculations on Kṛṣṇa and Rādhā conceived as Rasa and Rati in Bengal Vaiṣṇavism, the same yogic practice and discipline has been responsible for the growth and development of the Vaiṣṇava Sahajiyā movement of Bengal. It will, therefore, be incorrect to say, as has really been said by some scholars, that the Vaiṣṇava Sahajiyā movement of Bengal is a purely post-Caitanya movement having no relation whatsoever with the earlier Buddhist Sahajiyās and that the two cults are distinct fundamentally. A close study of the literature of the Vaiṣṇava Sahajiyās will leave no room for doubting the clear fact that it records nothing but the spirit and practices of the earlier Buddhist and Hindu Tāntric cults, of course in a distinctly transformed form, wrought through the evolution of centuries in different religious and cultural environments. The psycho-physiological yogic processes, frequently referred to in the lyrical songs of the Vaiṣṇava Sahajiyās and also in the innumerable short and long texts, embodying the doctrines of the cult, are fundamentally the same as are found in the Hindu Tantras as well as in the Buddhist Tantras and the Buddhist songs and Dohās. There are sometimes discrepancies only in details and differences more often pertain to terminology and phraseology than to conception.¹

¹ We may point out here that in the literature of the Vaiṣṇava Sahajiyās we find reference not only to the sexo-yogic practices of the Tāntrics, but also to the important yogic practice of drinking the nectar oozing from the moon situated beneath the lotus of Sahasrāra, which practice was emphasised by the Nātha-yogins (vide infra, Ch. IX.) Cf.:

It is very interesting to note in this connection that like some of the texts of the Sahajiyā Buddhists some of the Bengali texts of Sahajiyā Vaiṣṇavism, composed some time between the seventeenth and the nineteenth centuries, are introduced in the form of a dialogue between Śiva and Śakti, who are depicted as discussing the secrets of the Vaiṣṇava Sahajiyā Sādhanā,¹ and in the Ānanda-bhairava it is hinted that Hara or Śiva himself practised this Sahaja Sādhanā in the company of the different Śaktis in the country of the Kucnis (women belonging to the Koc tribe).²

We have discussed before at length the salient features of the Buddhist Sahajiyā cult and literature. The Vaiṣṇava Sahajiyās, like other medieval schools who were Sahajiyās in a broader sense, and of whom we shall speak in detail in the next chapter, harped on the same string. But we have seen that the angle of vision from which the different schools of Indian religious thought criticised one another was different. Consequently, whereas the criticism of the Buddhist Sahajiyās represents an admixture of the spirit of Buddhism, Vedānta, Tantra and Yoga, the criticism of the Vaiṣṇava Sahajiyās is marked by a dominating spirit of love, which is the watchword of their Sādhanā, although, however, the lurking influence of Yoga and Tantra is not

The dalliances of Śiva with the Kucnis is very well known in the Śivāyanas of Bengali literature.
altogether missing. The Buddhist Sahajiyās, we have seen, inherited from the Yogic and Tāntric schools in general the spirit that all truth underlying the universe as a whole is contained in the microcosm of the human body; this belief, we shall presently see, was brought by the Vaiśṇava Sahajiyās to a deeper significance, which inspired them to declare to the world abroad, “Hearken men, my brothers,—man is the truth above all truths,—there is nothing above that.” Again, the same spirit of Guruvāda that characterises the songs, Dohās and other Sanskritic texts of the Buddhist Sahajiyās as also the literature of the medieval saints, characterises also the songs and other texts of the Vaiśṇava Sahajiyās. Again, as many of the Buddhist Siddhācāryas and medieval saints employed an extremely enigmatic and paradoxical style in their songs in describing the secrets of their Sādhana, so also it was the custom with the Vaiśṇava Sahajiyās to couch the secrets of their cult under a similar enigmatic style. Many of the songs ascribed to Caṇḍīdāsa are good specimens of such an enigmatic style. Thus it is clear that in spirit as well as in literary representation the relation between the Buddhist Sahajiyās and the Vaiśṇava Sahajiyās clearly shows an easy gliding from the one to the other.

Historically it seems that the fall of the Pāla dynasty of Bengal marked also the fall of Buddhism in the province and that there was something like a Hindu revival during the reign of the Senas, who succeeded the Pālas. Vaiśṇavism, based mainly on the love-dalliances of the cowherd Kṛṣṇa with the cowherd girl Rādhā, began to gain popularity during the reign of the Senas and the first Bengali Vaiśṇava poet to sing the sweet immortal songs of Rādhā-Kṛṣṇa was Jayadeva, who is said to have been the court-poet of the last Sena King Laksmanasena in the last half of the twelfth century A.D. Caṇḍīdāsa of the fourteenth century popularised the legends and ideals of

\[ \text{Song ascribed to Caṇḍīdāsa.} \]

\[ \text{Vide the songs on Guru collected in the anthology Sahajiyā Sāhitya by Mr. Bose.} \]
the love of Rādhā and Kṛṣṇa through his exquisitely lyrical poems. Similar lyrics were composed also by poet Vidyāpati of Mithilā, who was contemporaneous with Caṇḍidās and enjoyed enormous popularity in Bengal; this widespread popularity of the Rādhā-Kṛṣṇa songs began to influence the mind of the people belonging to all sub strata of the society. It was through the influence of this love-ideal of the Rādhā-Kṛṣṇa songs that the ideology of the Buddhist Sahajiyās gradually began to change, and the change of methodology was consequent on the change of ideology.

With the popularity of the Rādhā-Kṛṣṇa songs the ideal of Parakiyā Rati, or the unconventional love between man and woman not bound by the conjugal tie, became emphasised. In almost all the theological discussions of the Vaiṣṇavas of the post-Caitanya period the superiority of this ideal of Parakiyā love to that of Svakiyā was variously demonstrated. In his Typical Selections from Old Bengali Literature (Vol. II, pp. 1638-1643) Dr. D. C. Sen has quoted two old documents, belonging to the first half of the eighteenth century, where we find that regular debates were arranged between the Vaiṣṇava exponents of the Parakiyā and the Svakiyā ideals of love, and in the debates the upholders of the Svakiyā view were sadly defeated and had to sign documents admitting the supremacy of the Parakiyā ideal of love. This will help us in guessing how much influence this Parakiyā ideal did exert on the people of the time belonging to the Vaiṣṇava fold. This ideal of Parakiyā love has been the strongest factor in moulding the doctrines of the Sahajiyā Vaiṣṇavism of Bengal.

It is customary to sneer at the Vaiṣṇava Sahajiyā cult as an order of debauchery under the cloak of religion. Abuses and aberrations there are in every religion, and there is no denial of the fact that debauchery found its field of play in the Tāntric schools, both of Hinduism and Buddhism and in the school of the Vaiṣṇava Sahajiyās, but that should not be the only point for consideration in judging the value of these religious orders. As students of literature, religion and culture, let us, like the wise swan, drink only milk out of a mixture of milk and water.
We have pointed out before that the innumerable texts available on the doctrines and practices of the Sahajiyās few can be said to possess much intrinsic merit; but the lyrics of the Sahajiyās, whoever might have been their author, really reached a high pitch of poetry and philosophy, and these songs assigned a sublime value to human love; and with this deification of human love humanity as a whole has also been deified, and heaven above and earth below have met together in the songs of the Vaiṣṇava Sahajiyā poets.

(ii) The mode of Transformation

Let us now follow the mode of transformation of the ideology of the Buddhist Sahajiyās into that of the Vaiṣṇava Sahajiyās. The final aim of the Buddhist Sahajiyās, apart from the customary way of describing it as the Vacuity, or the Prajñā, or the Bodhi-citta, was supreme bliss,—and this conception of the final state of the Buddhist Sahajiyās differed from that of the early Buddhists in this that the Mahā-sukha state of Nirvāṇa is a definitely positive state, while the earlier Buddhistic tendency was towards negation; again, the conception of the Buddhist Sahajiyās differs from the general conception of the final state of the different schools of yoga in this that it is not a state of absolute dissolution; though it is a state of arrest and a negative state in so far as it invokes the arrest of all states and processes of mind, it is a positive state of supreme bliss. Of course, sometimes this state of supreme bliss has been criticised as a state of mere thought-construction,—and Nirvāṇa has been defined as a pure state of negation bereft of all sorts of thought-constructions;¹ but in general Mahā-sukha itself, bereft of subjectivity and objectivity, has been held to be the final state—the state of vacuity and perfect enlightenment. The final state of Mahā-sukha as the state of Sahaja of the Buddhists is also the final state of

¹ yāvān kācit vikalpaḥ prabhavati manasi tyājya-rūpo hi tāvān

Aññatiṣṭhāna-prakāla of Nāgārjuna-pāda, quoted in the Com. on the Gāryā Nos. 8 and 13 (Śāstrī's edition).
Sahaja with the Vaiṣṇava Sahajiyās; but the Vaiṣṇavas con-
ceived this Sahaja state as the state of supreme love, and
this supreme love has been conceived as the primordial
substance which underlies the world-process as a whole. But
how can this Sahaja be the ultimate reality? It is the ulti-
mate reality inasmuch as it is the non-dual state of the unity
of Śiva and Šakti, which are but the two aspects of the ab-
solute reality as conceived in the Hindu Tantras. 1 Again in
the Buddhist school it is the non-dual state of unity of Prajñā
and Upāya which are also the two aspects of the absolute
reality. 2 The principles of Śiva and Šakti or Upāya and
Prajñā are represented by man and woman, and it is,
therefore, that when through the process of Sādhanā man
and woman can realise their pure nature as Śiva and Šakti,
or Upāya and Prajñā, the supreme bliss arising out of the
union of the two becomes the highest state whereby one
can realise the ultimate nature of the absolute reality. Now
the conception of Kṛṣṇa and Rādhā of the Vaiṣṇavas was
interpreted by the Sahajiyās in a sense akin to the con-
ception of Śiva and Šakti, or Upāya and Prajñā,—and
all males and females were thought of as physical mani-
festation of the principles of Kṛṣṇa and Rādhā. So, the
highest state of union of the two, which is the state of
supreme love, is the final state of Sahaja. Thus the theo-
logical speculations centering round the love-dalliances of
Rādhā and Kṛṣṇa in standard Vaiṣṇāvism could very easily
be assimilated by the Sahajiyās into their cult. Moreover,
the standard Vaiṣṇava schools of devotion were all deadly
against the final aim of liberation either in any sense of
negation, or in the merging of the individual self in the
absolute. The supreme state of the Vaiṣṇavas is no state
of absolute cessation, or annihilation,—it is a positive state,
though of a supra-mental nature, of the eternal flow of divine
love—like the smooth and incessant flow of oil. This ideal
of the final positive state of love could very well be utilised
by the Sahajiyās in a slightly modified way and thus the
Sahajiyās could gradually associate their practices with the

1 Vide infra, Ch. XIV.
2 Infra, Ch. XIV, Supra, Ch. 1.
whole network of Bengal Vaiṣṇava theology. And once the practices of the Sahajiyās could be thus associated with the Vaiṣṇava theology, their whole ideology and methodology began to be influenced palpably by those of standard Vaiṣṇavism.

The main deviation of the Vaiṣṇava Sahajiyās under the sway of Vaiṣṇavism was towards a psychological development, and it will be more correct to speak of it as an innovation through a process of gradual transformation. The Tāntric schools, which emphasised the sexo-yogic practice (and all schools did not certainly emphasise or encourage it), were essentially schools of psycho-physiological yogic practices; but already in the Buddhist Sahajiyā we find a tendency towards the psychological development. There we sometimes find it explained that the most intense sex-emotion, produced under a perfect control of yoga, has the capacity of suspending the ordinary states and processes of the mind and producing a non-dual state of supreme bliss, where, absorbed in the unfathomable depth of emotion, our mind shakes off all its relation to objects and all its character as the subject; and this unique state of bliss is the absolute state of Sahaja-realisation. This psychological aspect of the Sādhanā was, however, most emphasised in the school of the Vaiṣṇava Sahajiyās, with whom the Sahaja Sādhanā soon developed more into a religion of psychological discipline in the culture of love than a religion of mere psycho-physiological yogic process. In fact, the importance of the Vaiṣṇava Sahajiyās consists in the high pitch which they reached in their enquiry and practical culture of love-psychology and in the new interpretation of our whole being offered in the light of love. It was a religious process of the divinisation of human love and the consequent discovery of the divine in man. As we have said before, the psycho-physiological yogic process was there, but its yogic aspect was dominated by the psychological aspect of the Sahajiyās with which we are mainly interested in our present study.
The psychological aspect of the Sahaja-sādhanā of the Vaiṣṇavas grew mainly with the philosophy of Rādhā and Kṛṣṇa and the eternal love between them in the land of eternity. It is, therefore, necessary, first of all, to elucidate the philosophy of Rādhā-Kṛṣṇa and their eternal love as conceived by the Vaiṣṇavas. According to the philosophical and theological works of Bengal Vaiṣṇavism (popularly known as Gauḍīya Vaiṣṇavism) Rādhā is nothing but the transfiguration of the infinite potency of love contained in the very nature of Kṛṣṇa. The ultimate Being, it is held, may be conceived in three of its states, either as the unqualified Brahman, or as the Paramātman, the indwelling principle of all beings, or as the Bhagavān, the active and qualified God. Kṛṣṇa as Bhagavān possesses three powers, viz., Svārūpa-śakti, i.e., the power which He possesses by virtue of His ultimate nature, Jīva-śakti or the power through which all the beings are produced (also known as the Tatāsthā-śakti, the accidental power), and the Māyā-śakti, through which evolves the material world. This Svārūpa-śakti of the Lord has again three attributes, viz., the attribute of existence (sat), the attribute of pure consciousness (cit) and the attribute of bliss (ānanda). The potency of the three attributes acts like three powers, in the nature of God, which are known as Sandhinī (the power of existence), Samvit (the power of consciousness) and Hlādinī (the power of bliss which is of the nature of infinite love). The transfiguration of this power of bliss or love is Rādhā, and as such the very being of Rādhā is already involved in the very nature of Kṛṣṇa and the two are one and the same in the ultimate principle. Why then the apparent separation of Rādhā from Kṛṣṇa? It is for the self-realisation of Kṛṣṇa. God has within His nature two aspects, the enjoier and the enjoyed, and without the reality of the enjoyed He cannot even realise His own nature as the enjoier. Rādhā represents the eternal enjoyed while Kṛṣṇa is the eternal enjoier, —and the enjoyed and the enjoier being co-relative, the
reality of the one involves the reality of the other; or, in other words Rādhā as the eternal enjoyed is as much real as Kṛṣṇa the eternal enjoier. This inseparable relation between the two is the eternal love-dalliance of Kṛṣṇa with Rādhā,—and as Rādhā is eternally realising the value of her whole being with reference to her relation to the eternal enjoier Kṛṣṇa, Kṛṣṇa too is eternally enjoying Rādhā to realise the infinite potency of love and bliss that is in him. This mutual relation of love is the secret of the whole drama enacted in the eternal land of Vṛndāvana. This eternal sport (līlā) or love-dalliance of Rādhā and Kṛṣṇa does not presuppose any kind of shortcoming or imperfection in the nature of the ultimate reality, it follows from the very nature of the ultimate reality as such.

This relation of eternal love between Rādhā and Kṛṣṇa has been conceived and expressed in the Vaiṣṇava theology and literature anthropomorphically through analogies of human love. So, to understand the nature of this divine love, human love has been analysed psychologically into all its varieties and niceties to the minutest details, and it has been found on analysis that divine love can be expressed only through the analogy of the most intense and the most romantic and unconventional love that exists between a man and a woman who become bound together by the ideal of love for love's sake. Post-nuptial love is not the highest ideal of love so far as the intensity of emotion is concerned,—for long association and acquaintance devour the strange mystery, which is the salt of love, and social convention and legal compulsion take away much from the passion in it and thus make it commonplace and attenuated. The highest ideal of human love, which is the most intense, is the love that exists most privately between couples, who are absolutely free in their love from any consideration of loss and gain, who defy the society and transgress the law and make love the be-all and end-all of life. This is the ideal of Parakīyā love,¹ which is the best human analogy for divine love. It is because of this theological ideal that in none of the legends of Rādhā-Kṛṣṇa is Rādhā depicted as the

¹ Parakīyā love literally means the love of a man for a woman, who legally belongs to another man.
wife of Kṛṣṇa, she is generally depicted as the wife of another cowherd, or as a maid just attaining the prime of youth.

Śrī-Caitanya, as he has been docetically conceived by his followers, combined in him the enjorer and the enjoyed,—and it has been said that he was of the ultimate nature of Kṛṣṇa hallowed with the lustre of the supreme emotion of Rādhā (rādhā-bhāva-dyuti-suvalita). This speaks of the religious attitude of Caitanya. Though he himself became often conscious of his true self as none but Kṛṣṇa, his dominating religious attitude was Rādhā-bhāva or the love attitude of Rādhā towards Kṛṣṇa. This Rādhā-bhāva, or the religious attitude of the devotee towards God as the attitude of the most unconventional romantic love of a woman towards her beloved, may be recognised as the fundamental tone of the religion preached by Caitanya, not so much by sermons and teachings as by his tears and frequent love-trances.

The religious attitude of the Vaiṣṇava poets of Bengal, as represented in the innumerable love-lyrics, composed by them, was not, however, exactly the same as that of Caitanya. The attitude of the Vaiṣṇava poets was Sakhibhāva rather than Rādhā-bhāva. Śrī-Caitanya placed himself in the position of Rādhā and longed with all the tormenting pangs of heart for union with his beloved Kṛṣṇa; but the Vaiṣṇava poets, headed by Jayadeva, Caṇḍidāsa and Vidyāpati, placed themselves rather in the position of the Sakhis, or the female companions of Rādhā and Kṛṣṇa, who did never long for their union with Kṛṣṇa,—but ever longed for the opportunity of witnessing from a distance the eternal love-making of Rādhā and Kṛṣṇa in the supranatural land of Vṛndāvana (aprākṛta-vṛndāvana). This eternal līlā is the eternal truth, and, therefore, it is this eternal līlā—the playful love-making of Rādhā and Kṛṣṇa, which the Vaiṣṇava poets desired to enjoy. If we analyse the Gīta-govinda of Jayadeva we shall find not even a single statement which shows the poet’s desire to have union with Kṛṣṇa as Rādhā had,—he only sings praises of the līlā of Radhā and Kṛṣṇa and hankers after chance just to have a peep into the divine līlā, and this peep into the divine
līlā is the highest spiritual gain which these poets could think of. The exclamation—"Glorious be the secret dalliances of Rādhā and Kṛṣṇa on the bank of the Jumna"—sounds the key-note of the Vaiṣṇava attitude of Jayadeva. The same is the attitude of Caṇḍīdās and Vidyāpati, who were absorbed in the līlā of Rādhā-Kṛṣṇa, who indulged themselves in making comments on the līlā,—and longed to have the chance to stand by when Rādhā and Kṛṣṇa were united in their love.²

It is to be noted that in the religious discourse, which took place between Śrī-Caitanya and Rāy Rāmānanda,³ the latter stressed Sakhi-bḥava as the best means for realising divine love. The theological explanation of this Sakhi-bḥava is not far to seek. The general Vaiṣṇava view is that Jīva being the Taṭasthā Śakti of Kṛṣṇa is, after all, a Prakṛti and its pride as being the Puruṣa (puruṣābhimāna) must be removed before it can be permitted to have its proper place in the eternal region of Svarūpa-śakti, and even then only as a Sakhī, rather than as Rādhā, and never as Kṛṣṇa.

To put the poetical utterances of the Vaiṣṇava poets in a clear theological form we should say that, according to them, the absolute reality has from the very beginning divided itself for the sake of self-realisation into two counterparts as the enjoyer and the enjoyed, or as Kṛṣṇa and Rādhā; these Kṛṣṇa and Rādhā are not mere abstract notions,—neither are they purely legendary figures invented through the imagination of the poets,—they are concrete in their divine form and represent the original concrete type of the two aspects of the nature of the absolute as the lover and the beloved having their eternal dalliances in the supra-

³ Caitanya-caritāmṛta, Madhya-līlā, Ch. viii.
natural land of Vṛndāvana.¹ The historical personages of Rādha and Kṛṣṇa as the cowherd boy and the cowherd girl in the geographical area of Vṛndāvana are but the temporal manifestation of the eternal type, a condescension of the supra-natural in the natural form so as to help man to understand the eternal in terms of the temporal.² The Vaiṣṇava poets sang of the historical love-episodes of Rādha and Kṛṣṇa with the belief that corresponding to these love-episodes on earth there are the eternal love-episodes of Rādha-Kṛṣṇa in the Ṛṣṭikṛta or supra-natural Vṛndāvana and the historical episodes will enable them to form an idea of and to have a peep into the eternal episodes, the realisation of which is the sumnum bonum of the spiritual life.

We have seen that the religious approach of Śrī-Caitanya, as depicted by Kṛṣṇadāsa Kavirāj in his work, the Caitanyacaritāmṛta, was somewhat different from that of the Vaiṣṇava poets. The post-Caitayana Vaiṣṇava poets stuck mainly to the tradition of the pre-Caitanya Vaiṣṇava poets in their poetic treatment of the love-episodes of Rādha and Kṛṣṇa and the Vaiṣṇava Sahajiyās received their philosophy of Rādha-Kṛṣṇa from these Vaiṣṇava poets. The Sahajiyās believed in the eternal dalliances of Rādha-Kṛṣṇa in the highest spiritual land,—but they further held that the eternal concrete spiritual type manifested itself not only in the historical personages of Rādha and Kṛṣṇa, but that it reveals itself in actual men and women themselves. Every man has within him the spiritual essence of Kṛṣṇa, which is his Svarūpa

(real nature) associated with his lower existence, which is his physical form or Rūpa, and exactly in the same way every woman possesses within her a lower self associated with her physical existence, which is her Rūpa,—but within this Rūpa resides the Svarūpa of the woman, which is her ultimate nature as Rādhā. It is none but Kṛṣṇa and Rādhā who reside within men and women, and it is this Kṛṣṇa and this Rādhā that are making dalliances as men and women.¹ These rūpa-lilā and svarūpā-lilā of Rādhā-Kṛṣṇa have also been explained as the prakṛta-lilā and aprakṛta-lilā (i.e., sports in the natural plane and the supranatural plane).² This view of holding men and women to be nothing but physical manifestation of Rādhā and Kṛṣṇa seems to have been inherited by the Vaiṣṇava Sahajiyās from the earlier Tāntric philosophy. In the Hindu Tantras, we have seen, all men and women have been held to be nothing but the incarnations of Śiva and Śakti manifested in the physical form,—and in the Buddhist philosophy they have been spoken of as the embodiment of Upāya and Prajñā respectively, and this philosophy has most probably influenced the Vaiṣṇava Sahajiyās in their belief of men and women being Kṛṣṇa and Rādhā in their Svarūpa. We have pointed out before that many of the Vaiṣṇava Sahajiyā texts are introduced in the form of the earlier Āgamas and Nigamas, and in these texts Kṛṣṇa and Rādhā have always been explained as nothing but the different forms of Śiva and Śakti, and we have also pointed out that Śiva has sometimes been described as practising the Sahaja Sādhanā with Śakti as Kṛṣṇa with Rādhā.

Even in a popular Vaiṣṇava text like the Brahma-saṁhitā, which was brought by Śri-Caitanya himself from South India, the Tāntric influence on Vaiṣṇavism is palpable. In the fifth chapter (which only is available now-a-days) of the Brahma-saṁhitā we find that the lotus of thousand

Campokaka-kalikā, B.S.F.P., B.S. 1307, No. 1.

² See Rati-vilāsa-paddhati, MS. (C. U. No. 572), pp. 3(A)-3(B).
petals in the cerebrum-region is described as Gokula, the abode of Kṛṣṇa. Within the lotus we find description also of the Tāntric yantra (the physiological machinery through which truth is to be realised) as also of the kilaka (the wedge, the support). Śiva of the nature of the linga (the symbol of the male productive energy) is described as the Lord Nārāyaṇa and Śakti of the nature of the yoni (the symbol of the female productive energy) is described as Ramā Devī (the consort of Nārāyaṇa).  

Again it has been said in the Śrī-haya-śirṣa-paṇcarātra, "Hari (the saviour) as the Paramātman is the Lord, Śrī is called his power (śakti); goddess Śrī is the Prakṛti and Keśava is the Puruṣa; the goddess can never be without Viṣṇu and Hari (Viṣṇu) cannot be without the goddess, born in the lotus. It has also been said in the Viṣṇu-purāṇa,—"The mother of the world is eternal and she remains inseparable with Viṣṇu; as Viṣṇu is all-permeating so also is she."  

It is very interesting to note in this connection that there is a small poetical work, entitled Sādhaka-raṅjana, by Kamalā-kānta (who flourished in the first half of the nineteenth century) where the yogic Kulu-kuṇḍalinī Śakti has been conceived exactly in the image of Rādhā; she is described in exactly the same way with the same imageries and even in the same diction as Rādhā is described in the Vaiṣṇava literature. The rise of the Śakti to meet Śiva in the Sahasrāra has been sung as the coming out of Rādhā to meet her beloved in private. The

philosophical concepts of the pairs Śiva-Śakti and Kṛṣṇa-Rādhā were generally confused; and as a matter of fact Puruṣa-Prakṛti, Śiva-Śakti and Kṛṣṇa-Rādhā mean all the same in popular theology. This fact has helped the development of the theological belief in the Vaiṣṇava Sahajiyā school that men and women are but the Rūpa of the Svarūpa as Kṛṣṇa and Rādhā. But the important point to be remembered in this connection is that while in the Sahajiyā Sādhanā the Kṛṣṇahood of man has been admitted it has never been admitted in the Standard Vaiṣṇava school under any circumstances.

According to the Vaiṣṇava Sahajiyās the region of Sahaja is an ideal transcendental region and it is generally styled as the ‘land of eternity’ (nityer deśa)—this is the Nitya-Vṛndāvana or the eternal Vṛndāvana as contrasted with the other two kinds of Vṛndāvana, viz., Mana-Vṛndāvana and Nava-Vṛndāvana or Vana-Vṛndāvana. By Nava-Vṛndāvana the Sahajiyās refer to the geographical Vṛndāvana, and by Mana-Vṛndāvana the Vṛndāvana of the mental plane of the Sādhaka, and the Nitya-Vṛndāvana transcends both. In this Nitya-Vṛndāvana (also called the

gupta-candra-pura) resides Sahaja of the nature of pure love which flows between Rādhā and Kṛṣṇa in and through their eternal dalliances. This Sahaja as the Supreme Delight is the ultimate substance underlying the whole world and it can never be realised as such in the gross material world of ours. But how should then men and women of this world attain Sahaja? It is said in reply that there is a passage or transition from this world to the other—or rather this gross world can itself be transformed into the Nitya-Vṛndāvana by the process of spiritual culture, and the principle of nescience, which is responsible for the grossness of the world can thus be removed. This removal of the fundamental principle of nescience and of the principle of grossness with it through a process of continual psychological discipline, is the primary requisite for Sahaja Sādhana,—and when this is effected it is revealed to the Sādhaka that the difference between this world and that is more imaginary than real. At that moment there remains no distinction between our physical existence and our spiritual existence. It has been said in a poem ascribed Caṇḍidās, “Great is the difference between this world and that,—this is the truth known to all ordinary people; but there is a way of transition from the one to the other,—don’t speak of it to any one else.”

jagat bāṅcile āmi se mari | jagat āṃbile āmi se tari

Here jagat means the changing gross reality.

4 se deṣe e deṣe jānaye sakal lokie || anek antar
We have seen that Sahaja as the absolute reality of the nature of pure love involves within it two factors, i.e., the enjoyer and the enjoyed, represented in the Nitya-Vrndavana by Kṛṣṇa and Rādhā. These principles of the enjoyer and the enjoyed are known in the Sahajiyā school as the Puruṣa and the Prakṛti, manifested on earth as the male and the female.¹ It has been said in a song (ascribed to Caṇḍīdās)—“There are two currents in the lake of love, which can be realised only by the Rasikas (i.e., people versed in Rasa). When the two currents remain united together in one, the Rasika realises the truth of union.”²

---

¹ Sj. S. Song No 84.
² Songs of Caṇḍīdās.
Through man and woman flow these two currents of love,—
man and woman are, therefore, the gross manifestations of the same principles of which Kṛṣṇa and Rādhā are the pure spiritual representations. Man and woman, in other words, are manifestations on earth of the eternal types that are enjoying each other in their eternal Vṛndāvana, and the bliss of intense love that is enjoyed by man and woman through their mutual attachment even in the physical body is but a gross transformation of the eternal purest love that exists only in Vṛndāvana. Man and woman as the representatives of the two flows of love are known in the Sahajiyā literature as Rasa (the ultimate emotion as the enjoyer) and Rati (i.e., the object of Rasa), or as Kāma (the lover that attracts towards him the beloved) and Madana (the exciting cause of love in the lover).¹ In standard Vaiṣṇavism also Kṛṣṇa is known as Kāma or Kandarpa, as he attracts the mind of all creatures towards Him,—while Rādhā is Madana or the object that renders pleasure to the enjoyer. Sahaja is the emotion of the purest love flowing between Rasa and Rati or Kāma and Madana. For the realisation of this Sahaja-nature, therefore, a particular pair of man and woman should first of all realise their true self as Rasa and Rati or Kṛṣṇa and Rādhā,—and it is only when such a realisation is perfect that they become entitled to realise the Sahaja through their intense mutual love. This realisation of the true nature of man as Kṛṣṇa and that of woman as Rādhā is technically known as the principle of aropa or the attribution of divinity to man. Through continual psychological discipline man and woman

Sahaja-udāsanā-latica of Taruṇi-ramaṇ, B. S. P. P., B. S. 1335, No. 4.
must first of all completely forget their lower animal-selves and attribute Kṛṣṇahood to man and Rādhāhood to woman. Through this process of attribution there will gradually dawn the realisation of the true nature of the two as Kṛṣṇa and Rādhā. When man and woman can thus realise themselves as Kṛṣṇa and Rādhā in their true nature, the love that exists between them transcends the category of gross sensuality,—it becomes love divine, and the realisation of such an emotion of love is realisation of the Sahaja.

(B) The Theory of Āropa

The above, in a nut-shell, is the fundamental basis of the religious creed of the Vaiṣṇava Sahajiyās expressed in their lyrical poems and other prose and poetical works. The principle of Āropa is the most important in the process of Sahaja Sādhanā. We have seen that the Sahajiyās have spoken of two aspects of man, viz., the aspect of physical existence which is the Rūpa and the aspect of spiritual existence (as Kṛṣṇa or Rādhā as the case may be) which is the Svarūpa (i.e., true spiritual self). This Svarūpa must be attributed to and realised in the Rūpa to attain any kind of spiritual gain. But this Āropa of Svarūpa to Rūpa does not mean the negation of the Rūpa; it is rather the act of imbuing every atom of the Rūpa with the Svarūpa. The Sahajiyās are deadly against the principle of denying the value of life on earth and undervaluing our human love. The gross physical form with all its charm and beauty is as real as our spiritual existence, for it is this charm of physical beauty,—the maddening passion, which we call human love, that leads us gradually to a new region where we can find a glimpse of divine love. The spiritual existence

*Ibid., Song. No. 5.*
of man in divine love does not mean the negation of human love,—it is this human love, beginning in the form of carnal desires and progressing gradually through a process of continual physical and psychological discipline towards an emotion of supreme bliss, boundless and unfathomable in extent and depth, that itself becomes the love divine—the highest spiritual gain. There is no categorical distinction in kind between human love and divine love;—it is human love, transformed by strict physical and psychological discipline, that becomes divine. Divine love is rather an emergence from the carnal desires of man as the full-blown lotus, with all its beauty and grandeur above the surface of water, is an emergence from the mud lying much below. Here there is a difference of outlook among the Sahajiyās and the standard Vaiṣṇavas of Bengal. Kṛṣṇadās Kavirāj has unambiguously declared in the Caitanya-caritāmya that kāma (love in its grosser aspect) and prema (divine love) are characteristically distinct in their nature like iron and gold, and while the keynote of kāma is the fulfilment of selfish desires, the keynote of prema is self-elimination and the fulfilment of the divine desires in and through our whole being. But the Sahajiyās, while agreeing to the latter part of the statement, do not agree to the former part of it. The same flow of emotion, they hold, that becomes kāma in association with the selfish desires, transforms itself into prema when dissociated from such desires through physical and psychological discipline. Prema is but the purified form of kāma, and as such the former has its origin in the latter.¹ There cannot be prema without kāma, and hence, prema cannot be attained through the absolute negation of kāma; it is to be attained rather through the transformation of kāma. The prema of the Sahajiyās is not the emotion of the most intense devotion of man towards God,—it is the most intense emotion of love existing between Kṛṣṇa and Rādhā residing as the Svarūpa in the Rūpa of every man

and woman. It is from this point of view that Caṇḍīdās exclaimed,—“Harken men, my brothers, man is the truth above all truths,—there is nothing above that.” In another song of the Sahajiyās we find,—Humanity is the essence of divinity,—and man becomes God in the strength of his love; man is the highest in the world, for it is only he who revels in supreme love.¹ The religion of the Vaiṣṇava Sahajiyās was thus a religion of humanity. The Sahajiyās have not gods or God other than man. Even Rādhā and Kṛśṇa are never regarded as deities to be worshipped,—they represent principles to be realised in humanity. Humanity itself is thus viewed from a sublime perspective.

What is then the real significance of the Āropa of the Sahajiyās? It is nothing but viewing our whole being in all its physical, biological and psychological aspects from an ontological point of view. And when everything is thus viewed from the ontological perspective, human love acquires an ontological significance. This act of viewing all the gross realities of body and mind from the perspective of the eternal is what is meant by the mixing up of the Rūpa and the Svarūpa.² When such an understanding dawns on man there remains to him no difference between the

Rūpa and the Svarūpa. The Svarūpa remains in the Rūpa just like the scent of a flower permeating every atom of it. It is said in a song,—"Many speak of Svarūpa,—but it is not the gross reality (of our sense perception)......It is of the nature of the scent of the lotus. Who is the man capable of knowing it?.......If one worships this Svarūpa, one will be able to discover the ‘real man’;—but without the Āropa one is bound to go to hell." As the Svarūpa permeates the Rūpa, it is to be realised through the Rūpa. It is said in the Ratna-sāra that one can attain the supra-natural land of Vraja, only by loving and worshipping the human form. Man realises his ultimate nature as the pure emotion of love through his most beloved sweetheart. Man cannot realise his love-nature without being in relation to his sweetheart, it is through the touch of the sweetheart that the lamp is lit within. It is said in a poem of Caṇḍīdās that man by himself can never realise his own grace and loveliness,—it is for this reason that there is a continual burning within; he ponders within, but himself does not know what his heart wants and what makes him so uneasy! The inward longing is for the beloved,—without whom there is the burning sensation in the heart that makes a man dead while living. This death in love is the most covetable death,—and he who knows the real nature of this death accords to it the most hearty reception, and he is the only man who

really lives through his death in love. Through their terrestrial love man and woman proceed towards their divine love,—through the love of body arises in man and woman pure love between their inner selves as Kṛṣṇa and Rādhā. It is for this reason that it has been said in a song that the beloved is the pitcher to fetch water in from the lake of love. Again it has been said that as milk does not thicken without being boiled over the fire, so also the love of man does not become intense enough to be transformed into divine love without the woman of his heart, who serves as the oven to boil and thicken love.  

(C) The Stringency of Sahaja-Sādhana

As love with Āropa leads one to Vṛndāvana, love of the Rūpa without the Āropa of the Svarūpa leads one nowhere but to hell. The Sahaja-sādhaka must not be an ordinary man—the sāmānya māṇuṣ who lives within the province of desires and instincts,—or the man of passions (rager māṇuṣ).

He must rise above the level of ordinary animal existence and become the man ‘unborn’ (ayoni mānuṣ) and thence the sahaja mānuṣ or the ‘man eternal’ (nityer mānuṣ).\(^1\) In the same way Sahaja cannot be attained through the sāmānḍya rati or the ordinary woman,—it is to be attained through the biśeṣa rati or the extraordinary woman who has herself become of the nature of Rādhā. In the culture of love the man of the physical body must be realised by the woman as the ‘eternal man,’ i.e., the man as Rasa or Kṛṣṇa; and similarly the woman of the physical body must be realised by the man as the ‘extraordinary woman,’ i.e., the woman as pure Rati or Rādhā. When the sāmānḍya (ordinary) man or woman thus becomes transformed into the viśeṣa (extraordinary), he or she becomes fit for undertaking the culture of supreme love.\(^2\) In the Ujjvala-nilāmaṇi of Rūpa Gosvāmī we find description of three kinds of Rati, viz., Samarthā, Samañjasā and Sādhāraṇī. Samarthā Rati is the woman who unites with the beloved with no selfish motive of self-satisfaction—the only desire in her is to give her beloved the highest satisfaction by complete self-surrender. Among the lady-loves of Kṛṣṇa Rādhā is the only example of Samarthā Rati. The Samañjasā Rati, however, wishes to have equal share of enjoyment with the lover,—Rukmīṇī and others are examples of this class. The Sādhāraṇī Rati or the most ordinary Rati is the woman who is inspired in love-union only with the desire

of self-satisfaction,—and Kubjā represents a Rati of this class. The Sahajiyās accepted this classification of Ratis and according to them the Samarthā Rati is the only Rati suited for the culture of love.

The Sahajiyās lay stringent conditions regarding the practice of love. It has frequently been said that for the attainment of true love a man must become dead first of all,—dead in the sense that the animal in him must be eradicated, giving scope for full play to the divine in him; in plainer words, his body and mind must be placed above even the possibility of susceptibility to the lower animal instincts and must be imbued through and through with the radiant glow of his Svārūpa. This strictness has also been frequently emphasised by the condition that a man must do completely away with his nature as a man and transform his nature to that of a woman before he takes the vow of love. Here also the emphasis is really on the total transformation of the ordinary attitude of man towards a woman.

The stringency of Sahaja-sādhanā and the great danger sure to result from the slightest deviation have been repeatedly sung by the Sahajiyā poets in enigmatic statements. The process of Sādhanā has frequently been compared to the process of diving deep in the ocean without getting wet in the least,¹—or to the process of making the frog dance before the serpent, or to wreath the peaks of mount Sumeru with a piece of thread, or to bind the elephant with the help of the spider’s net.²

This stringency in the Sahaja-sādhanā leads to the importance of strict physical and mental discipline without

which it is simply disastrous to enter upon such a course of Sādhanā. It is for this reason that three stages have been marked in the course of Sādhanā, viz., Pravarta, or the stage of the beginner; Sādhaka, i.e., an advanced stage,—and Siddha or the perfect stage. Closely associated with these three stages of Sādhanā are the five Āśrayas (Refuges), viz., Nāma (divine name), Mantra, Bhāva (divine emotion), Prema (love) and Rasa (bliss). Nāma and Mantra are associated with the stage of Pravarta, Bhāva with the second stage of Sādhaka and Prema and Rasa are associated with the third stage of Siddha.¹ It has been repeatedly enjoined that the Sādhanā in company of a woman can be entered upon only in the Sādhaka stage and real love can be realised only in the perfect stage and never before. In the question of perfection equal stress is laid on the perfection of body as on the perfection of mind; for, the Sahaja can never be realised without a perfect body.² Herein comes the question on Kāya-sādhana or the culture of body, which is very often stressed in the Sahajiyā texts on practical Sādhanā.³ We have seen that this question of Kāya-sādhana plays an important part in the Sādhanā of the Buddhist Sahajiyās,⁴—and the esoteric yogic practice of the Vaiṣṇava Sahajiyās being substantially the same, the question of Kāya-sādhana is equally emphasised in the Vaiṣṇava school.

Again we have seen that in all schools of esoteric yogic practice the body has been held to be the abode of all truth. The same view is equally emphasised in the Vaiṣṇava Sahajiyā school. It is said in a song ascribed to Cauḍīdās that truth resides in the body.⁵ It is said in the Rainasāra that if one can realise the truth of the body (bhāṇḍa)

one will be able to realise the truth of the universe (brahmāṇḍa). The realisation of the truth of the body leads to the realisation of the truth of the self, and the truth of the self is the truth of Viṣṇu. All truth of Kṛṣṇa and Rādhā is to be known from the own body.¹ In the Caitta (tra, sic)-rūpa-padma-mālā² we find that the Caitta-rūpa is the Sahaja-rūpa and this Caitta-rūpa or Sahaja-rūpa resides in the different lotuses of the body.

The important point to be noticed in this connection is that as the psychological Śādhanā of love of the Vaiṣṇava-Sahajiyās gradually evolved from the psycho-physiological Yogic Śādhanā of the Tāntrics and the Buddhist Sahajiyās, the culture of love of the Vaiṣṇava Sahajiyās was always based on the psycho-physiological Yogic Śādhanā. It is for this reason that in Sahajiyā texts and songs we find hints on the Yogic Śādhanā associated with the culture of love. Any attempt at the culture of love without being conversant with the secrets of Yogic practices will lead not only to failure, but to extremely direful results. The ideal love of the Vaiṣṇava Sahajiyās can be realised only in a perfectly purified body and mind, whence all the principles of defilement are absolutely eradicated. This state has been said to be the state of Viṣuddha-sattva. By the purification of body and mind there is first the subsidence of the elements of Tamas (inertia) and Rajas (energy) and there is the predominance of the element of Sattva (intelligence-stuff); but even above the state of Sattva is the state of Śuddha-sattva (or pure intelligence-stuff); and by further purification Śuddha-sattva is transformed into Viṣuddha-sattva. This state of Viṣuddha-sattva is a transcendentental state where there is neither the natural nor the supra-natural,—and pure love is possible only in such a state.³

² MS. (C.U. No. 1111), p. 54(B).
For the realisation of the ultimate nature as pure love the lover and the beloved must be identical physically, mentally and spiritually; they must be one body, one mind and one soul. It has been said,—“Do away with the idea of the two and be of one body, if you have the desire for real love; very difficult is this Sādhanā of love, says Dvija-Caṇḍīdās.”

“All the accessories of love—the separate existences of the lover and the beloved must merge in a unique flow of love,—then and then only this Sādhanā will be fulfilled.”

About the nature of this love it has enigmatically been said,—“Love-making sits on love-making—and love (bhāva) is over that; above that love resides a higher love, and over that remains what may be said to be the highest consummation. In love resides the thrill of joy, and over that thrill the flow,—and there is the flow over the flow,—and that bliss who should know?”

“There is the flower over the fruit and the scent is over that,—and on that scent are these letters three (i.e., pī—ri—ti=love; Skt. pṛiti),—great riddle is it to understand!” Again,—“There is the fruit over the flower,—and over that is the wave,—and there is wave above wave,—who does this secret know?”

It is extremely difficult to follow these and many such other enigmatic descriptions of love closely and literally,—and we doubt if every one of these statements can be explained rigorously. Such paradoxical statements were made only to emphasise the transcendental nature of the Sahaja love. It is said,—“There is water on earth and above that water rises the wave; love remains above that wave, does anybody know anything about it?”

It is about this transcendental love that Caṇḍīdās exclaimed,
"The love of the washerwoman is like tested gold,—there is no tinge of sexuality in it."

Thus the Sādhana of love of the Vaiṣṇava Sahajiyās is a transcendence from the finite to the infinite,—from the enjoyment of the external object to the realisation of the self which in its ultimate character is but of the nature of pure love. When real love dawns in the heart of the Sādhaka the beloved becomes to him a mere symbol for infinite love,—the whole universe with all its grandeur and mystery contracts in the body of the sweetheart,—not only that, she becomes a symbol for the supreme truth. In such a state of love did Candidās, the great lover, exclaim to his sweetheart Rāmī, the washerwoman:— "Hearest Rāmī, O thou washerwoman,—I knew thy feet to be a cool retreat and so I took shelter there. Thou art to me the revealer of the Vedas, thou art to me as the consort of the Saviour Lord Śiva,—thou art the iris of my eyes;—my worship of love towards thee is my morning, noon-tide and evening services,—thou art the necklace of my neck. The body of the washerwoman is of the nature of the eternal maid Rādhā (kiśorī-svarūpa),—there is no scent of sensuality in it,—the love of the washerwoman is tested gold,—says Baḍū Candidās."

(iv) Sahaja-realisation of the Self and the Not-Self

We have said that the final aim of the Vaiṣṇava Sahajiyās through a culture of love is the realisation of the Sahaja nature not only of the self, but also of the external objects, or in other words, of the world as a whole. The realisation of the Sahaja-nature of the not-self, they contend, follows

1 Candidās says, in a similar song—"One confession of my heart—repeatedly am I making to thee,—hearest Rāmī, thou washerwoman,—I have taken shelter under thy feet only because I learnt them to be a cool retreat. The form of the washerwoman is of the nature of the eternal maid, Rādhā,—no scent of sensuality is there;—if I do not see thee my mind is upset,—and it is pacified just at the sight of thee. Thou art, O washerwoman, my consort,—thou art my mother,—my father,—all the religious functions performed thrice a day are nothing but worshipping thee,—thou art Gāyatrī, the mother of the Vedas. Thou art the mother of all speech, the wife of Lord Śiva,—the necklace of my neck,—thou art heaven, earth and hell and every thing,—thou art the iris of my eyes.... I cannot forget the sweetness of thy beauty,—how am I to make thee my own? Thou art my Tantra, thou art all my Mantras, thou art all the bliss of my prayer. My days fly on in thinking who else in these three worlds may be so much my one,—and through the order of goddess Bāsuli exclaims Candidās,—the feet of the washerwoman are the highest truth."
from the realisation of the Sahajā-nature of the self. The Sahaja (of the nature of supreme love) that underlies the self as its ultimate reality, underlies also the not-self,—and both the self and the not-self are mere transformations of the same Sahaja, the plurality of objects with all their differences owes its origin only to the illusory nature of our sense-perceptions. The duality of self and external objects is said to be due to a mere confusion of the senses, and it exists only as long as there is no attainment of self-knowledge. The senses are playing with the objects; but in reality the objects and the self are one and the same in their ultimate nature. When knowledge of the self dawns on man any differentiation like this and that becomes impossible,—and at that time, there is not the least cognition of duality and the whole universe is realised as of the nature of the self. Thus it is contended that the realisation of the Sahaja-nature of the self as pure love automatically leads one also to the realisation of the ultimate nature of the external world.

In the Tantras we find that the world proceeds from the bliss which is the cessation of all duality and which is the nature of the ultimate reality. It has been said in the Upaniṣad,—“Bliss (ānanda) is to be known as Brahman, and from bliss proceeds all the objects, and through bliss they live and in bliss do they return and merge.” We find an echo of the same truth in the utterances of the Sahajiyās, who say that all the beings are born in Sahaja, they live in Sahaja and again return to Sahaja. The Sahaja is the Rasa, the supreme emotion of love, the quintessence in every body.

It is the primordial emotion—it is Kāma and from Kāma proceeds everything.¹ There is sometimes the tendency of explaining the two aspects of Sahaja (i.e., Rasa and Rati) under the imagery of the seed and the ovum and the cosmos as following from their union, just as it is explained in the texts of the Tāntric and the Buddhist Sahajiyā schools.² Both the self and the not-self being thus the product of Sahaja are homogeneous in their ultimate nature and it is, therefore, that the realisation of the nature of the self through the culture of love leads also to the realisation of the ultimate nature of the not-self.

Chapter VI

A NON-SECTARIAN APPROACH TO THE DOCTRINES OF THE SAHAJIYĀS

(i) The Purely Psychological Approach Apart from The Theological

Apart from the theological speculations advanced by the Vaiṣṇava Sahajiyās in connection with their Śādhanā of love, there can be another approach to their Śādhanā from a purely psychological point of view. The Vaiṣṇava Sahajiyās have always mixed up this psychological principle with the theological speculations of Bengal Vaiṣṇavism, and the ideal of Parakīyā love in the human sphere has generally been associated with an ontological significance. But apart from the ontological significance attached to the ideal of Parakīyā love let us see if some religious significance can pertain to such a kind of love even from the purely psychological point of view. From this psychological point of view it may be said that human love, when dissociated completely from selfish carnal desires, not by a process of violent suppression, but by a slow and gradual process of strict physical and psychological discipline, has the capacity, in its boundless extent and deep intensity, of producing a transcendental state of mind, which is of the same kind as the state of mind produced through the highest state of divine love, or communion with God. We have said before that the arrest of the states and processes of the mind plays the most important part in almost all the religious systems of India. Intense human love, or even sex-emotion, has the capacity of producing a supreme state of arrest. In a unique flow of emotion, uninterrupted by subjective or objective notions there dawns an infinite oneness in the mind, which is recognised to be the highest spiritual experience. This is the state of Samarasa after which all the esoteric schools of yoga aspired. The Tāntrics of Hindu as well as of Buddhist schools would often recommend the attainment of such a state of mind through the attainment of intense bliss by a
strictly yogic regulation of the sex-act, while the Vaiṣṇava Sahajiyās added the psychological element of love to it. The final aim, however, in all such cases was the attainment of an infinitely blissful state of arrest either purely through a psycho-physiological process of yoga or through the intense emotion of love.

The fundamental principle of the esoteric schools, mentioned above, is that man can never get rid of his sex-propensities even by a life-long struggle of rigorous suppression,—nay, as we have seen, it is in the form of Samarasa or Mahāsukha or Mahābhāva the ultimate nature of our whole being—the ultimate reality from which the world evolves. In the grossest sexual pleasure we have the lowest kind of realisation of the same kind of bliss which follows the realisation of the ultimate reality. It is, therefore, foolish to try to do absolutely away with this fundamental nature of man; the best thing, on the other hand, will be to eliminate the element of grossness from it through physical and psychological discipline.

This theory of the esoteric schools involving the element of sex in religion, may be made subject to severe criticism from the Freudian point of view of modern psycho-analysis,—and there is much cope for such criticism particularly in the field of Vaiṣṇava Sahajiyā cult with all its theory of love, human and divine. But though a Freudian explanation of the whole thing may not be absolutely inadmissible in such religious practices, one fundamental point, which we should never lose sight of even from the empirical point of view, is that though the lotus above the surface of water may have its origin in the mud deep below, mud and the lotus cannot surely be placed in the same scale in our general scheme of valuation.

The main truth of these cults, as we have pointed out, is the possibility of the attainment of an intensely blissful state of arrest, which has been spoken of in these cults as the state of liberation or the state of Brahman-realisation or the state of divine love. This idea that it may be possible to attain liberation through the most intense emotion, or that the state of mind under the most intense emotion of any kind is of the nature of bliss produced by self-realisation, or Brahma-
realisation, is not new in the history of Indian religious thought. In the *Bṛhad-āranyaka Upaniṣad*, realisation of self has been compared to the transcendental realisation of bliss arising through the deep embrace of a loving woman. Thus it is said,—“As, when deeply embraced by the dear woman, one knows neither anything external nor anything internal, —so also a man deeply embraced by the self (ātman) through perfect knowledge knows neither anything external nor anything internal.”¹ In the *Bhāgavata-purāṇa* we find that the cowherd girls of Vṛndāvana did attain salvation through their passion towards their beloved Śrīkṛṣṇa, with whom they combined even knowing that it was jāra (prosnicuity).² It is also cited in this connection that Śiśupāla, king of Cedi, attained liberation through his intense emotion of hatred to Śrīkṛṣṇa.³ In the *Padma-purāṇa* we find that in ancient times all the great sages of the Daṇḍakāranya saw the Lord in the form of Rāma and desired to enjoy Him; all of them afterwards were born in female forms in the land of Gokula and there they enjoyed the Lord with their passions and were

¹ tadyathā priyayā striyā sampariṣvako na bāhyān kiścana veda nā’ntaram evam eva’yān puruṣaḥ prajñena atmanā sampariṣvako na bāhyān kiścana veda nā’ntaram. *Bṛhadāranyako-paniṣat*, 4-3-21.

² Bhāgavata-purāṇa*, (10, 29, 11) Vaṇgavāsi edition. This fact described in the *Bhāgavata* has been fully utilised by the Vaiṣṇava Sahajiyās in the following song ascribed to Narahari—

nander nandan karaye bhajan
upapati bhāo layā l
gopi-anugata braja-jana-rita
mane āropita hayā ||
atī biparīt braja-jaṇa-rita
sahaj māṇus seha l
'puruṣ prakṛti haiyā kemane
kāhāre karive leha ||
sāksāte bhajan kaila gopi-gan
e deśa se deše dur l
kothā bṛndāvan kothā braja-jan
kothā prema-rasa-pur || ctc. Sj. S. Song, No. 69.

³ Thus it is said,—“I have already described to you how the king of Cedi (i.e., Śiśupāla) attained salvation even through his hatred of Kṛṣṇa; what wonder then about the (salvation of) girls who were so dear to the Lord? (i.e., what wonder if the cowherd girls have attained salvation through their intense love towards the Lord?)..... By continually applying the emotions of passion (kāma), anger, fear, affection unity and friendship to the Lord, people are attaining perfect oneness with the Lord.”

uktam purastād etat te caidyāḥ siddhim yathā gataḥ l
duisann api hṛṣikeśam kimetaḥ dhoṣajaya-priyāḥ ||
kārṇam krodhan bhayam sneham aikyam sauhrdam eva ca l

*Bhāgavata-purāṇa*, 10-29-13, 15.
thereby liberated from the ocean of existence. Their liberation was just like the liberation of the demons who approached the Lord with anger, were killed in battle and afterwards attained liberation. Sex-passion and anger are generally the cause of man’s downfall in the world, but being united with the Lord with strong emotion the cowherd ladies were all liberated. Those, who worship the Lord through passion, fear or even animosity, will attain Vaikuṇṭha (the land of the Lord),—not to speak of those who worship the Lord through pure devotion.¹

In their discussion on the nature of aesthetic pleasure some Indian rhetoricians have described it as equal to the bliss of Brahma-realisation. Through the intensity and purity of aesthetic emotion the limitations of mundane life are transcended and in the profound tranquillity of mind the artist enjoys a transcendental bliss equal to the bliss of Brahma-realisation. Viśvanātha Kavirāja says in describing the nature of Rasa that through the intensity of the transcendent emotional appeal of literature our mind becomes out of touch with the objective world, and due to the separation of mind from the objective world there is the subsidence of the elements of Rajas (energy-stuff) and Tamas (mass-stuff) and there is the emergence of Sattva (intelligence-stuff); as a result of this emergence of the Sattva element there is the spontaneous rise in mind of a unique bliss of the nature of pure consciousness untouched by the notion of any other knowable,—and as such it is of the nature of Brahma-realisation.² The quintessence of this Rasa is an emotion of supramundane sublimity and nicety, which removes all the limitations of our mind and expands it to a limitless extent. It is only by the meritorious few that such Rasa is realised in its entirety and in its changeless unique character.

This view that it may be possible to attain a state of arrest through the intensity of any kind of emotion or sensation has been emphasised by the Śaiva mystics of Kāśmira also. It has been said by Abhinava Gupta in his

¹ Padma-purāṇa, Uttara-khaṇḍa, verses 64-68.
² sattvo-ārektād akhaṇḍa-svā-prakāśā-nanda-cinmayah

Tantrā-loka that when our mind ceases to form all kinds of false thought-constructions (vikālpa), we realise our motionless true self as Śiva; even if a beast attains such a state of mental equilibrium it attains the state of Śiva.¹

The state of homogeneity that is produced in the mind through the absorbing interest of pleasureable sensation of sight, sound and touch leads one to the realisation of the ultimate motionless nature of the self,—and the bliss that is derived from such experience is but a playful manifestation of the blissful nature of the ultimate Being.² We find a very clear exposition of this view in the Spanda-kārikā and the Vījñāna-bhairava. The Spanda-pradīpikā (Spanda-kārikā) says that for the realisation of the self as the Śiva one has to make his mind absolutely motionless,—the absolutely motionless state of mind is liberation.³ When the self passes on from its active state of the doer and the knower to its absolutely motionless inactive state, it is no more disturbed by the pernicious memory (ku-smṛti) of its past active states; but by passing into the inactive motionless state the self does not lose its nature as the ultimate subject. It is said that two states of the self can be distinguished, viz., the state of pure agency (kārtṛtva) and the state of being the effect (kāryatva). Of the two states the state of being the effect is capable of being destroyed, but the agent is indestructible. This is to say that all outward efforts or activities, which are but the manifestation of the disturbed agent may vanish; but with the vanishing of the active efforts the self as the supreme agent does not die out.⁴ The implication is that the outward efforts or activities may die out, but the deep internal emotional states produced thereby do not die out with them. The intense emotional state of our mind which is not limited by any

   Ibid., Verses 14, 15,
notion of space, time and dimension approximates the nature of the indestructible true self which is the omniscient pure intelligence.\textsuperscript{1} When even the ordinary emotions of our daily life attain a high degree of intensity, our mind attains a state of equilibrium which leads to the realisation of our self as 'the motionless one'. It is said that when a man is very angry or highly pleased, or is in a state of extreme bewilderment, even when he runs fast away (through some emotion of fear or joy), he attains a state which may be said to be the spanda, or the ultimate potential nature of the self.\textsuperscript{2} When in such a state the sun and the moon go down in the great void, the man in the walking state will feel himself as if fallen into profound, dreamless sleep,—he shall have no other cognition or emotion regarding his body or the world outside,—that is the unveiled state of the self.\textsuperscript{3} When the spatio-temporal character of the knower and the knowable is gone the self remains as a pure flow of consciousness, a

\textsuperscript{1} Cf. \textit{na tu yo'ntarmukho bhāvah sarvaṣaṇātava-guṇā-spadam \lbrack\textit{tasya lopaḥ kadācit syād anyasya mupalambhanāt} \rbrack} \textit{Ibid. Verse 16.}

\textsuperscript{2} \textit{ati-kruddhaḥ praḥṛṣṭo vā kīṁ karonti'ti vā mṛṣān \lbrack\textit{dhāvan vā yat padah ācacet tatra spandaḥ pratīṣṭhitah} \rbrack} \textit{Ibid., Ch. II., Verse 6.}

It is said that even when a man very eagerly waits for the command of any other person with the firm resolution that whatever will be ordered by the latter must be carried out, he will, through the intensity of his eagerness and the firmness of his resolution, attain a state of equilibrium; through such a condition of mind his inhaling and exhaling breath (the sun and the moon, \textit{i.e.}, \textit{prāṇa} and \textit{apāṇa}) will enter the middle nerve \textit{Suṣumṇā}, which is the passage for the transcendental region, and all the motion of the sun and the moon (\textit{i.e.} inhaling and exhaling) will stop there.

\begin{itemize}
  \item \textit{yāṁ avasthāṁ samālambhya yad ayaṁ mama vaksyati \lbrack\textit{tad avaśyāṁ karisyey'ham iti samkalpya tiṣṭhāt} \rbrack}
  \item \textit{tāṁ āśṛityordhva-mārgena candra-sūryāvahāvapi \lbrack\textit{saṃsumne'dhvany āstamito hitvā brahmāṇḍa-gocaram} \rbrack}
\end{itemize}

\textit{Ibid., Ch. II., Verses 7, 8.}

It is explained in the commentary that whenever, due to whatever reason it may be, one is under the compulsion of carrying out the order of any other man, due to the intensity of concentration of the former just to receive the order of the latter, all the mental states of the former will die out, and because of the dying out of all the mental states his consciousness must attain the ultimate state of perfect tranquillity, and through the practice of such acts of endurance he realises the ultimate truth.

\textsuperscript{3} \textit{tadā tasmin mahā-yomni pralīna-śaśi-bhāskare \lbrack\textit{sauṣupta-pada va māṅgali prabuddhaḥ syād anvīrtah} \rbrack} \textit{Ch. II, Verse No. 9.
stream of colourless emotion. This flow of pure emotion, which is not determined by any quality whatsoever, is the pure nature of the self.

In the Vijñāṇa-bhairava we find corroboration of what is stated in the Sūnda-pradīpikā. There it is said that to attain the state of Bhairava, or rather to realise the ultimate nature of the self, one has to realise the ultimate nature of the self and of objects as pure consciousness bereft of all waves of mentation. But how to attain such a state of Bhairava? The Vijñāṇa-bhairava enjoins that such a state may be attained through a state of arrest produced by any intense emotion or even sensation. Just as after the ringing of a bell the main sound dies out leaving behind a continuous unqualified lingering vibration, so also after the mind is deeply disturbed by a strong emotion (like the sex-emotion), there follows a flow of unqualified lingering emotion, and that oneness of emotion becomes to the Śādhaka as of the same nature as the unqualified bliss resulting from the realisation of the self.¹ Through kissing and embracing of woman there follows an over-flood of joy which proceeds from within and amounts to the bliss of self-realisation. If we are very glad at any time on any account,—or if we meet any of our nearest and dearest ones after a long separation, there is an excess of emotion, through the meditation on which it is possible to merge oneself in the ‘thatness.’² If we take meal to our heart’s content after we are very hungry and if we take some palatable drink after we are very thirsty, there follows a contented joy of relish through which also we may attain Māhāsukha (great bliss). Through the qualityless intense joy that may follow from attending to music or to any such other object the yogin may merge himself in it and realise ‘thatness’ thereby. The mind should be kept fast wherever there is the satisfaction of mind,—for, thereby will the ultimate nature of the self as supreme bliss be reveal-

¹ sjakti-saṅgama-saṅkṣubdha-saktyā-veśa-vasāni gat-sukhaṁ brahma-tattvasya tat-sukham svākyam ucyate || Vijñāṇa-bhairava, Sl. 69. See also the commentary on the verse by Kṣemarāja.

² ānandā mahati pṛāpte dṛṣte vā bāndhave cīrāt ānandam udgataṁ dhyāto ā talayās tan-manaṁ bhavet || Ibid., Verse 71.
ed to us.\(^1\) Through the sudden arrest or careful control of any of the senses the particular sense enters into the non-dual vacuity and the soul shines there in its ultimate nature.\(^2\) Whenever the mind is disturbed either through knowledge or through ignorance, mind attains the ultimate state as an after-effect of this disturbance. If a man stands by the side of a great hole like a well, etc., and then looks upwards, his mind will be bereft of all thought-constructions and the states of mind will be suspended. In our deep emotions of anger, fear, sorrow,—or in the emotion produced in a lonely cave, or in the emotion resulting from flying away from the battle field, or in the emotion of strong curiosity or of hunger there is a state which may be said to be identical with the state of the Brahman.\(^3\)

(ii) Criticism from The Yoga Point of View

From the above it will be clear that the view that it may be possible to attain some religious experience through an intense emotion or even through some strong sensation is not very uncommon in the field of Indian religious thought. But as this view is closely associated with the question of a state of arrest, which is so much emphasised in the Patañjal system of yoga, it will not be unfair to make some comment on it from the yoga point of view.

The exponents of yoga have admitted the fact that it may be possible to attain a state of arrest even through

\[\text{yatā yatra mana-sūṣṭir manaṣ tatraiva dhārayet} \]
\[\text{tatra tatra pāri-nanda-svarūpān sampravartate} || \]
\[\text{Ibid., Verse 74.} \]

\[\text{yasya kasya 'ndriyasyā'pi vyāghātāc ca nirodhātaḥ} \]
\[\text{praviśṭasyā'dvyaye śūnye tatrai 'vātmā prakāśate} || \]
\[\text{Ibid., Verse 89.} \]

The author goes so far as to say that if any one first pinches a particular limb with a pointed needle and then concentrates his mind on the place of painful sensation he will attain a stainless state of Bhairava. (Ibid., Verse 93.) When our mind is deeply absorbed in any object of sex-passion, anger, greed, in-fatuation, pride and jealousy, through the deep absorption in the emotion the distinctive features of the objects vanish away and what remains is the ultimate reality. (Ibid., Verse 101).

\[\text{Ibid., Verse 118.} \]

The reading of the verse in the edition we are using is as follows:—
\[\text{ksudhāyante bhaye śoke gahvare vā ranaśrute} \]
\[\text{kutāhale ksudhāyante brahma-sattva-mayāt dalā} || \]

But the reading of the verse as quoted in the commentary on the Spanda-sūtras by Utpalācāryya is as follows:—
\[\text{krodhāyante bhaye śoke gahvare vāraṇe rāpe} \]
\[\text{kutāhale ksudhāyante brahma-sattvā-samipaga} || \]
\[\text{Vide., p. 51.} \]
some strong sensation or emotion; but that kind of arrest of mind is very transitory and as such falls far short of the final state of Samādhi. Samādhi of yoga proper does not mean a temporary arrest of mind,—it means a permanent state of arrest which removes all our afflictions and which eradicates all mental complexes and root-instincts that serve as the seed of the future recurrence of life and suffering.

In the yoga scheme of psychology there have been recognised five planes of mind, which are technically known as the five citta-bhūmis. These are, (1) kṣipta, (2) mūḍha, (3) vikṣipta, (4) ekāgra and (5) niruddha. The kṣipta state is the ordinary unsteady state of mind which is always changing from one object to another. The second state is the state in which mind, under the sway of some strong sensation or emotion, lies infatuated, as it were. In this state there is the excess of the tāmas (i.e., the gross material stuff) and under the sway of the tāmas mind falls asleep, or, swooning, as it were. The third state is the state of vikṣipta, which is distinguished from the kṣipta state by the possibility therein of temporary arrest of the mental states. It is the momentary steadiness that the mind may have amidst its unsteady changes. The other two states are ekāgra (one-pointed) and niruddha (perfectly arrested). Of these two ekāgra state has been explained by Vācaspati in his commentary as eka-tāna, which literally means ‘one-tuned,’ i.e., the state where all the mental states attain an oneness in deep concentration on some particular object of meditation. This ekāgra state leads to the next state which is the state of final arrest (niruddha).

Now of the five planes (bhūmi) of the mind only the last two are recognised as the planes of yoga proper. Temporary arrest may be possible in the mūḍha and vikṣipta planes also,—but they cannot be recognised as states of yoga as there is the possibility of their relapse to ordinary active states at any moment. The important thing in yoga proper is not therefore somehow to attain a state of arrest, but to well-prepare the planes of mind for Samādhi. If the plane be well-prepared even active states cannot disturb the mind.

If we examine the states of Samādhi described particularly by the Kaśmīra-school of Śaivism, we shall be tempted to
say that many of these states can be classed as the mūḍha state of mind and only a few of them fall within the state of ekāgra. There is no denial of the fact that when we are deeply absorbed in any intense emotion, we transcend our ordinary physical, biological and psychological existence,—and even it may be admitted that such states of transcendental emotion approximate in nature deep religious experience, but the question remains, how far it will be correct to accept all such states to be identical with our supreme religious experience. In states of great hunger, anger, jealousy, fear, curiosity, sex-passions, etc., there may be a temporary sleep of the ordinary mental states and processes,—but they being outside the plane of yoga may at any time relapse into activity, and for this reason such states should never be confused with the final state of Samādhi.

To judge the state of Samarasa of the Tāntriks or of Mahā-sukha of the Buddhist Sahajiyās, or the state of supreme love of the Vaiṣṇava Sahajiyās, we should first of all examine the citta-bhūmi in which such a realisation is possible. If the realisation be in any of the first three planes of the citta, i.e., if it be a mere state of sleep of the senses, or just like a state of swoon of a temporary nature then it cannot be recognised as a state of yoga proper. Everything, therefore, depends on the plane of citta. The Tāntriks and the Sahajiyās were conscious of this truth and they laid sufficient stress on it. All the stringent conditions laid by the Tāntriks and the Sahajiyās for the esoteric practice may be viewed from the yoga point of view as conditions for a proper plane of citta where the absorption of the psychical processes may amount to a state of Samādhi. Whenever the esoteric practice is resorted to in a lower plane the result produced must be dangerous; it is for this reason that the Sahajiyās repeatedly declared that a real Sahajiyā Sādhaka is rarely found even among crores (koṭike goṭik hay).
CHAPTER VII

THE BĀULS OF BENGAL

(i) General Nature of the Bāul Sect

Far from the empty noise and busy bustle of urban life, flourished in the villages of Bengal an order of singers, still extant,—an institution of immense literary and religious interest; for, the songs of these bards are as much noted for their naïveté and spontaneity of expression as for the spiritual intensity of their content. The ‘unpremeditated art’ of their ‘first fine careless raptures’ lifts us to a level of experience where the æsthetic and the religious work together for a unique spiritual transport. Indeed we can say about these songs what Keats says about the songs of the Nightingales of heaven,—

... ... divine melodious truth
Philosophic numbers smooth.

When a number of these Bāul songs were collected by revered Kṣitimohan Sen, a close associate of the poet Rabindranath Tagore in Santinekatan, and were made public¹ they presented a pleasant surprise to the enlightened public both for the lofty and subtle sentiments they embodied and the spontaneity and nicety of expression. We are quoting below some lines from these songs.

‘O thou cruel and hasty enthusiast, wouldst thou make a fry of the buds of your mind by applying heat of fire? Wouldst thou make flower bloom and scatter fragrance all round without giving it the time? Lo, here is my supreme preceptor—my Lord, He makes the bud unfold itself through ages—He has no haste in this!²

There must not be unusual haste in spiritual life for having all the buds of mind unfolded all at once. Mild heat

¹ The songs were first published in an anthology of old and modern Bengali songs, entitled Bangavāni, edited by Lalitmohan Chatterjee and Charu Chandra Banerjee.
² niñhar garai, tu ki mānas-mukul bhājī aģune etc. The song was composed by Madan. Vide, Kṣitimohan Sen, Bāmlār Bāul, Calcutta, 1954, p. 63.
from the sun and the moon—from the unknown stars above—helps the bud in expressing itself in exquisite colour and scent; but it takes some scheduled time; if in our hectic effort to shorten the time to the minimum we apply heat of fire to it, it will be fried—it will never bloom. The artist behind the whole cosmic process teaches us the same lesson; the cosmic process is a process in millions and billions of ages—it is a process for unfolding whatever colour and scent lie dormant in it—for unfolding the true meaning of the universe; but the Supreme One makes the flower of the Universe bloom slowly and gradually in time. When the original creator shows no impatience—why should we?

Bīṣā Bhumimālī\(^1\) says in a song, ‘The lotus of my heart is going on blooming and blooming for ages; in it are bound together both Thou and I—what help for it now!’\(^2\) The implication is that the life-process of man binds both God and man in a bond of creative comradeship, for as the poet Tagore puts it, ‘the creation in me is Yours as well as mine’; so both has a common interest in the unfolding of this lotus, and both become bound together in the common interest.

Īṣān Yugi, the preceptor of Madan, sings in one of his songs,—‘Hail be to me to me—a flute which receives the blow from Thy own mouth. No grief for me—no grumble from me if I become spent up after this blowing by Thee even for once.’\(^3\) The flute has its wounds in life which make holes; but all the wounds are compensated when the Supreme One blows His own breath through the holes of life’s wounds.

In a song (probably by Kṛṣṇakānta Paṭhak\(^4\)) we find the lotus waiting in the morning for the beloved—the sun. All the other flowers have bloomed, but the lotus has been waiting and waiting, for it says, ‘I would not open my eyes if I cannot see him (my beloved, the sun) just at my first glance; so I entreat ye, all (all the other flowers), ye whisper into my ears through all your scent,—he has come—he has come in the sky in the east.’ All the hidden wealth and

3 dhanya āmī—bāhālāte tor āpan mukher phuk etc.
4 Vide, Kṣitimohan Sen, Loc. cit. The song is, āmī melum nā nayan etc.
grandeur of the spiritual aspirant have meaning with reference only to the Supreme Beloved; so the progress of whole life should be directed to the glancing of the Beloved and the Beloved only.

In speaking of the deep spiritual experience one Bāul1 sings,—“My eyes close up in the dimness of my sweet realisation. The lotus has drawn back all its petals in the shore of vast dimness.”2 The profound mystic experience is the vast dimness in which merges the individual self with all the mental states and processes.

These songs, the Bāul themselves have said, have to be approached not with the arrogance of philosophic erudition, nor with the customary way of scholarly scansion, but with a softness of feeling and a meekness of spirit. The traditional philosophers and academicians have been snubbed by the Bāuls in the characteristic piquant way. It has been said in a song, ‘Who is this man, a dealer and expert in gold, that has entered the flower-garden? He rubs his touchstone against the (petals of the) lotus, Oh the fun, Oh the fun!’3 Applying an academic way of scanning to songs bearing religious experience is just like applying the touchstone to the petals of the lotus with a view to evaluating the lotus.

But academicians as we are, if we are anything at all, we cannot avoid the academic way of approach. Pandit Kṣitimohan Sen was no doubt a pioneer in collecting the Bāul songs and in popularising them among the élite of our country; but only a small number of the songs from among the songs he has collected were published. The literature was therefore very scanty. The next notable attempt was made by Maulavi Muhammad Mansur Uddin, M.A., who published4 about hundred Bāul songs under the caption Hārāmanī (the lost jewel). The number of songs increased considerably in the enlarged edition of the book published by the University of Calcutta. Dr. Upendranath Bhattacharyya, M.A., D.Phil, who had conducted extensive

4 With a foreword by Rabindranath Tagore.
field work in this direction has been able to collect a large number of Baul songs and he has published more than five hundred songs in his commendable work Bāmlār Bāul O Bāul Gān (the Bauls and Baul songs of Bengal) published in 1957. The next note-worthy publication is from the University of Calcutta which, contains about four hundred songs of Lalan Fakir, the most reputed of the Baul composers. Two hundred and ninety-seven songs of Lalan Fakir have also been published by M. Mansur Uddin, M.A., in the Bengali journal Sāhitya Patrikā from Dacca (1958). We may incidentally refer also to the publication of two hundred forty songs of Pāglā Kānāi by Dr. P. M. Islam of the Rajshai University. Pāglā Kānāi was not known particularly as a Baul poet, but if we compare the songs composed by Pāglā Kānāi with those composed by the well known Baul singer Lalan Fakir we shall find no characteristic difference except that the songs of Lalan Fakir include a few songs on an esoteric sexo-yogic practice.

Judging from the songs hitherto available to us, it is extremely difficult to ascertain who the Baul poets exactly were. We, for the past few decades, have been influenced in this matter by the ideas propagated by the poet Tagore in his poems and writings, and also by the writings and speeches of his close associate, Pandit Kṣitimohan Sen; for them Baul represents more a spirit of unconventional approach to divinity through unassumed love and piety than any precise religious cult. As a matter of fact, these unlettered village-singers, known as the Bauls, belong to the lower ranks of both the Muslim and the Hindu communities of Bengal and they are composed partly of householders and mainly of mendicants. The Bauls belonging to the Hindu community are generally Vaiśṇavite in their faith and those belonging to the Muslim community are generally Śūfī-istic and in both the schools the emphasis is on the mystic conception of divine love. The word bāul

2 Vide, Dr. M. Islam, Kavi Pāglā Kānāi, Dacca, 1959.

3 We find the use of the word bāul in the Caitanya-bhāgavata of Vṛndāvana-dās as also in the Caitanya-caritāmṛta of Kṛṣṇa-dāsa Kavirāj. Cf. the well-known enigmatic message that was sent by Advaitācarya to Caitanya (Caitanya-caritāmṛta, Antya-līlā, Ch. xix).
with its Hindi variant bāur may be variously derived; it may be derived from the Sanskrit word vātula (affected by wind-disease, i.e., mad, crazy), or from vyākula (impatiently eager); both these derivations are consistent with the modern sense of the word, which denotes inspired people with an ecstatic eagerness for a spiritual life where one can realise one’s union with the eternal Beloved—the ‘Man of the heart’. The name Bāul also its cognate form Āul can very well be associated also with the Arabic word awliya (plural of wali, a word originally meaning “near,” which is used for ‘friend,’ or ‘devotee’), that refers to a class of perfect men. With the Bengali word bāul we may also compare the Sūfī word Diwānā which means mad, i.e., free from all social responsibilites.

Religious people with different modes of Sādhanā are included within the Bāul sect; in spite of the differences in modes of Sādhanā, their general religious feature is characterised by a common spirit of extreme unconventionalism. Pandit Kṣitimohan Sen and the poet Tagore have emphasised that aspect of the Bāul songs where the mystery of the infinite being defined in terms of the finite has been very naively and nicely expressed and the pangs of the human heart for union with the ‘Man of the heart’ (maner mānuṣ) has dominated. But in his recent researches on the subject Dr. Upendranath Bhattacharyya has practically challenged the validity of the older view and has tried to establish that the distinctive feature of the religion of the Bāuls is represented by the doctrines and practices of a secret cult involving sexo-yogic relations. There is truth in the assertion of Dr. Bhattacharyya inasmuch as, in a general way, the Sādhakas of the Vaiṣṇava Sahajiyā order, and orders akin to it, with their secret practices involving the ‘four moons’ (cāri candra), were also known as the Bāul. But it

Cf. also:—

bāuliya bīvāsere nā dive āsite ||
prabhu kahe bāuliya aiche kene kara l etc.

Caitanya-caritāmṛta, Ādi-lilā, Ch. XII.

1 These indifferent mendicants are also sometimes known by the name Āul which may be derived from the Skt. word ākula.

3 The ‘four moons’ imply semen, ovum, stool and urine.
seems that out of their doctrines and practices their search for the ‘unknown bird’ (acin pākhi) that mysteriously comes in and goes out of this cage of the human body emerged as the most striking feature. This life-long search for the ‘unknown bird’ got itself mingled with the Vaishnavite and Sufi-istic devotional approach to the divinity. This striking feature of the songs of the Bauls attracted well known poets and composer of songs of the second half of the nineteenth century to compose poems in the pattern of the Baul songs, though, however, these poets and composers were not in any way attracted to the secret sexo-yogic practices of the Bauls. Even the well known Bengali lyric poet Bihirilal Chakravarti of the second half of the nineteenth century was irresistibly tempted to compose hundred songs in the pattern of the Baul songs and he himself called these songs Baul songs. Similarly Harinath Majumdar of the late nineteenth century composed many Baul songs in a nom de plume. So it will not be correct to say that the spirit of the Baul songs of which we speak to-day is but an attribution to the Baul songs of our own ideas, or the ideas of Pandit Kshitmohan Sen and of the poet Tagore; it emerged as a distinctive feature of the Baul songs by the middle of the nineteenth century, if not earlier.

As for the doctrines and practices of the orders who resorted to a Sadhanā of the ‘four moons’, or sexo-yogic practices akin to it, we have made a study of it already in the previous chapters. We shall not, therefore, in the present context, deal with Baul songs referring to such secret practices; we, on the other hand, shall restrict our study to the Baul songs that celebrate the ‘Man of the heart’ and speak of the mystic love these Bauls cherish for this ‘Man of the heart’.

The Bauls are somewhat strange people, peculiar in their manners and customs, habits and practices. They refuse to be guided by any cannon or convention, social, or religious. Freedom of spirit is their watch-word and they take to an unsophisticated way of life in which the more natural inclinations of the mind are not restrained by social institutions. They proceed in a direction opposite to that followed by the general run of people. They avoid all religion in which the
natural piety of the soul is overshadowed by the useless paraphernalia of ritualism and ceremony on the one hand and pedantry and hypocrisy on the other. It is for this reason that the Bauls would call their path ulṭā (i.e., the reverse) path and would call the process of their spiritual advance as the process of proceeding against the current.\footnote{napahcer ulṭā nāo bāio, re manorāl etc. Vicīrā, B. S. 1335, Caira. anurāgi rasik yārā bāche tārā ujān bānke1 yakhān nadīr "humā" ḍāke jāgāy tarīr phānke phānke ॥ Hārāmāyi, collected and edited by Mr. M. Mansur Uddin, M.A. Song No. 46.} It is said in a beautiful song,—

"Reverse are the modes and manners of the man who is a real appreciator of the true emotional life and who is a lover of true love; none is sure about the how and the when of his behaviour.

"Such a man is affected neither by the weal nor by the woe of the world, and constantly realises the delight of love; it appears that his eyes are floating on the water of delight; sometimes he laughs alone in his own mood, sometimes he cries alone.

"He lights the lamp of love and sits on and on with his mind immersed in the fathomless depth of the sea of emotion; he has in his hand the key for happiness, but he never seeks it.

"Awkwardly wild are all his manners and customs,—and the other extremely wonderful fact is that the glory of the full-moon closes round him for all time; and further, this moon ceases not to shine day and night—there is no setting of the moon of his heart.

"He is as much satisfied with mud as with sandal-paste; no hankering has he after name and fame, equal are to him all that are far and near; he builds his house in the sky, even if the fourteen worlds are burnt to ashes.\footnote{bhāver bhāvuk premī premīk hay re ye jan1 o tār biparītī pattī paddhati; ke jaśe kaḥkhu se thāke kyāman ॥ bhāver mānuṣ (bhāver mānuṣ) tār nāi ānanda nīrānanda, labhi nītya premānanda, ānanda-salīle yāma tār bhāsche di'nayan; o se kabhā āpan mane hāse, āciār kaḥkha bā kare rodan ॥ (bhāver mānuṣ)}"
It may be observed in this connection that this ultā path, with all its theological as well as yogic implications, was the path spoken of and adopted by all the medieval saints of India, and a detailed study of it will be found in a succeeding chapter where we shall deal with the cult of the Nāthayogins. It may be further noted that the Sūfīs, whose influence on the Bauls was immense, were also Šadhakas in the ‘reverse path’ exactly in the same sense as explained above. Thus, as R. A. Nicholson puts it,—“Unification (tawhīd) is defined as ‘the absoluteness of the Divine nature realised in the passing-away of the human nature,’ so that ‘the man’s last state reverts to his first state and he becomes even as he was before he existed’.\(^1\)

(ii) The Bauls and the Sahajiyās

The Baul poets are Sahajiyās in a general sense of the term. We have said before that a general consideration of the tenets of the Sahajiyās will lead to the conclusion that the different Sahajiyā sects would style them as Sahajiyās for two reasons. In the first place, they are Sahajiyās inasmuch as the ultimate reality, in whatever form it may be, was always conceived by them as the Sahaja, i.e., that which is inborn or the quintessence which all the animate and the inanimate possess by virtue of their very existence; the realisation of this Sahaja was regarded by the Sahajiyās as the highest attainment of spiritual yearning. Secondly, the Sahajiyās are Sahajiyās inasmuch as they condemned in

\[^1\text{The Idea of Personality in Sufism, p. 13.}\]

\[^2\text{Cf. also—‘Hence the upward movement of the Absolute from the sphere of manifestation back to the unmanifested Essence takes place in and through the unitive experience of the soul;’ vide, Nicholson, Studies in Islamic Mysticism, p. 84.}\]
the strongest language they could command all kinds of insincerity and artificiality in life and religion and at the same time recommended the most natural path for the attainment of truth. We shall see later on that in this general sense the host of the Santa poets (including the Sikh poets and the Indian Sūfi poets) of upper, central and northern India were all Sahajiyās. In the Bāuls of Bengal, therefore, we find the continuity of the Sahajiyā movement, the first systematised form of which is found in the school of the Buddhist Sahajiyās. When we shall analyse the tenets of the Bāuls, as embodied in their songs that are available to us, we shall find that the doctrines of the earlier Sahajiyās form the real background of their religion,—although Sūfi-ism of Islam have introduced a new spirit in it. A study of the Bāul songs will, therefore, naturally lead us, first to a study of their Sahajiyā background and then to the line and colour that have been given to it by Sūfi-ism.

In speaking of the earlier Sahajiyā background of the Bāuls we mean mainly the schools of Buddhist Sahajiyā and of Vaiṣṇava Sahajiyā. Though there are no positive data to enable us to ascertain the exact time when the Vaiṣṇava Sahajiyā movement first began and when it reached its fullest development, yet it seems that the Vaiṣṇava Sahajiyās were earlier than the Bāuls. There are however some instances of striking similarity between the creeds of the earlier Sahajiyās and these the Bāuls which definitely points a genealogical connection between them. The songs and Dohās of the earlier Sahajiyās are characterised by a spirit of heterodoxy and criticism, which is likewise a feature of the songs of the Bāuls. Secondly, the earlier Sahajiyās lay strong emphasis on Guru-vāda, and so do the Bāuls as it will appear from their ‘Murshid’ songs. Thirdly, we have seen that according to the earlier Sahajiyās the human body is the microcosm, or rather the epitome of the universe and that truth resides within and is to be realised within;—this is exactly the belief shared by the Bāuls. Finally, the earlier Sahajiyās conceived of the ultimate reality as the Sahaja and

1 Vide Appendix A.
2 The word Baul is used in the present discourse always in its restricted denotation.
this conception of the Sahaja is also found in the songs of the Bauls; and like the earlier Sahajiyās the Bauls also advocate the most natural path for the realisation of this Sahaja-nature.

But the earlier Sahajiyā cult underwent a notable transformation in the hands of the Bauls; for, the Bauls, by deviation and innovation, effected a great change both in the ideology and practice of the Sahajiyās. The difference in ideology is palpable in the conception of Sahaja. The Buddhist Sahajiyās conceived Sahaja as Mahā-sukha which is the unity of the duality represented by man and woman as Upāya and Prajñā. The method for the realisation of this Sahaja consisted, therefore, essentially in a sexo-yogic practice. To this, however, the Vaiṣṇavas supplied the element of love. But here, in the Vaiṣṇava school also, Sahaja was conceived as supreme love which can be realised by the union of Kṛṣṇa and Rādhā who reside in the corporeal form of man and woman. The process of Sādhanā is also, therefore, a process of the Divinisation of the human love. But we have seen that this love is not the love of the nature of the most intense yearning of human soul towards God, it is the yearning of man for woman, or of woman for man. In all their theories of love and speculations on the lover and the beloved, the Vaiṣṇava Sahajiyās never speak of any love beyond the purest and the most perfect form of human love and of any lover and beloved other than man and woman, who are themselves incarnations of the eternal Lover and the Beloved. But the Bauls conceived Sahaja as the innermost eternal Beloved who is the ‘Man of the heart’ (maner mānum). The Bauls also speak of love and union, but this love means the love between the human personality and the Divine Beloved within and in this love man realises his union with the Divine, or in other words he merges his personal existence in the Beloved that resides within this temple of the body. Great has been the influence of Sūfism on the Bauls in the evolution of this new conception of Sahaja and in the difference in their religious approach. But a little penetration into the nature of Sahaja, variously described in the songs and Dohās of the Buddhist Sahajiyās, will show that the germ of such evolution was already there
in the ideas of the Buddhist Sahajiyās. We have already made it clear that in spite of the conventional way of describing the Sahaja under a Buddhistic garb, the Sahaja of the Buddhist Sahajiyās often implies a supreme Being residing within. It has been said in a Dohā of Saraha-pāda that some One Formless is residing within this form of ours,—he who knows Him becomes liberated. Again it is said,—“He is within your house (of body), and you are looking for him outside! You are beholding your husband (within), and asking for his whereabouts to your neighbours!”

These and such other verses will supply us with a clue to the tendency of the Buddhist Sahajiyās of conceiving the Sahaja as a Being, who became gradually transformed into a Personal God with whom it may be possible to have personal relations. This tendency of the earlier Sahajiyās paved the way for the evolution of the conception of the ‘Man of the heart’ under the strong say of Śūfī-ism.

It may be observed that the literature of the Santa poets of upper, central and northern India also represent, as will be demonstrated later, the spirit of Śūfī-ism against the background of the earlier Sahajiyās. In this respect the Bāul songs of Bengal have the closest affinity with the songs of the medieval saints of the other parts of India. As Śūfī-ism is so important a factor in the religious tenets of the medieval saints of India, we propose to deal with the nature and extent of the influence of Śūfī-ism on the Bāuls in some detail. Our present study will also help us in the future study of the cognate literature of the medieval saints of other parts of India.

(iii) The Bāuls and the Śūfīs

(A) A Brief History of Śūfī-ism in India and particularly in Bengal

In all probability Śūfī-ism began to make its way in India in the eleventh century A.D. and apostles like Shah Sultan Rumi (who came to Bengal in 1053 A.D.),

1 Vide p. 90
2 Vide p. 90
3 Vide Appendix A.
4 Vide Appendix A.
Sayad Nathar Shah (who carried Sufi-ism to the Deccan for the first time and died there in 1039 A.D.), Makhdum Sayad 'Ali 'Uluvvji 'al Huzurri (who settled in Lahore) are the preachers of this first period. But Sufi-ism as a religious school began to influence the mind of the Indian people on a large scale from the end of the twelfth century and the two orders of Sufi-ism that gained sufficient ground on the soil of India by this time are the Chishti and the Suhrawardi orders. The renowned apostle Khwajah Mu'inu-d-din Chisti, who settled in Delhi in 1193 was the founder of the Chishti Order in India. The Suhrawardi Order was also almost synchronously founded by Shyak Baha'u-d-din Dhakiriya Multani (born in Multan in 1169 and died in 1266). These two Sufi-istic orders soon succeeded in attracting a considerable number of Indian people to accept their tenets. Another Sufi-istic Order, viz., the Quadiri Order was introduced and popularised in India during the fifteenth century A.D. by Sayad Muhammad Ghauth Gilani, who came to India in 1482. Another Sufi-istic Order was introduced in India by the end of the fifteenth century by Khwajah Muhammad Bakvi Billah, it is the Naqshbandi Order. Badi'u-d-din Shah-i-Madar founded another important Sufi-istic Order in the fourteenth century A.D., which is known as the Madari Order.

The Pantheistic or rather the Panentheistic mysticism of the Upanisads, the devotional mysticism mainly in the Vaisnavite line and the Sahajiyā movements offered Sufi-ism a ready field and this will account for the speedy growth and spread of Sufi-istic faith in India. Moreover, from the twelfth century A.D. the history of India represents a history of contact, conflict and compromise—political, cultural and religious. In this period of contact Sufi-ism, as transformed in India, could very well serve as a medium of compromise and it is this additional possibility that may be held responsible for the wide-spread popularity of the Sufi-istic thoughts.

Sufi-ism entered Bengal rather as an overflow from Northern India. There are as many as seven Sufi-istic orders in Bengal, of which the Suhrawardi Order, introduced

* Vide Dr. M. Anamul Haq, M.A., Ph.D., *Vahge Sufi-prabhāva*, Ch. III.
by Makhdum Shaykh Jalalu’d-din Tabriyi (death 1125 A.D.), seems to be the earliest. The Chishti Order was introduced probably by the North Indian saint Shaykh Faridu’d-din Shakranganj (death 1269 A.D.). Shah Safi’-d-din Shahi (1290? 1295) of Pāṇḍuā (in Hughli) was in all probability the first apostle of the Qadadari Order. The Madari Order was perhaps introduced in Bengal by Shah Madar himself as an itinerant mendicant. Another popular Sūfī-istic Order of Bengal is the Adhami Order, more pūpularly known as the Khidwari branch. The Naqshbandi Order was perhaps introduced first by Shaykh Hamid Danishmand in the seventeenth century. The other Order of Sūfī-ism in Bengal is the Qadiri Order, which was introduced probably by Abdul Kadir Gilani in the sixteenth century.¹ We need not enter here into the detailed history of how the Sūfī-movement spread with all its branches and sub-branches in Bengal; it will be sufficient for us to know that different orders of Sūfī-ism did penetrate into Bengal, and did very easily and promptly recruit large number of converts. The Sūfī-istic ideas that were thus introduced were soon assimilated with the prevalent Sahajiyā ideas and the results of this amalgam has been the Bāuls of Bengal.

(B) Influence of Sūfī-ism on the General Nature of Bāul Sect

(a) The Influence of Sama

In gauging the nature and extent of the influence of Sūfī-ism on the Bāuls we may observe in the first place that the out-pouring of the heart through songs was an important religious mode with the Bāuls; in this we may find on the one hand the influence of Bengal Vaiṣṇavism, which attached much importance to music as a medium of holy communion, and on the other hand the influence of the Sūfī-istic custom of ‘Sama’ (i.e., song and dance).² The effect of

¹ Ibid., Ch. III.
² Dr. Anamul Huq postulates the influence of Sūfī-istic Sama even in the Vaiṣṇava religious function of Kirtana (i.e., singing in congregation); but the custom of such singing and dancing is found among the Southern Vaiṣṇavite saints, the Ālvars, from sometime the sixth or seventh century A.D.; the postulation of Sūfī influence on this point, therefore, does not seem warrantable. Prediction to such religious practice of Kirtana is also found in the Bhāgavata-purāṇa, e.g.,—krṣṇavarnam tvaisā-krṣṇam sāṅgasmāṅgā-stre-pārṣadam/ yañjñat saṁkirtana-prāyair yañjani hi sumedhasah || (11.5.32, Vaṁgavāsi edition).
music, the Sūfīs hold, helps one much in passing into the fana, i.e., in passing away of consciousness in mystic union with God.

(b) Importance of the Murshid

Secondly, we may consider the importance that is laid by the Sūfīs on Guru-vāda. We have seen how Guru-vāda is ingrained in the religious thoughts of India in general, and how in the spiritual life God has sometimes been replaced by the Guru. The Sūfīs laid the same stress on the Murshid or the Shaykh, i.e., the preceptor or spiritual guide. The view of Sūfī-ism on this point will be best illustrated if we quote here the view contained in the Awarifus-l-Ma’arif. It is said,—“When he (i.e., the Murid or the disciple) is possessed of manners, he taketh in love a place in the Shaikh’s heart; and is agreeable to God’s sight. Because, with mercy, favour and care, God ever looketh at the hearts of His own friends (the darvishes).

“Thus, by dwelling in the Shaikh’s heart, the constant blessings of God’s mercy and of his endless bounty, comprehend his existence: and the Shaik’s acceptance becometh his mark of the acceptance of God, Muhammad, and of all Shaikhs.”

In the ‘Murshidā-songs’ of the Bāuls we find a mixture of the Indian spirit with the spirit of Sūfī-ism. The excellence of the ‘Murshidā-songs’ of the Bāuls consists in there pathos, in their expression of the groaning and the beating heart of the restless aspirers; additional charm has been imparted to the songs by the unconditional self-resignation of the Murid or the disciple, who has accepted the Murshid as a sure mast in the boundless heaving sea of existence,—like a lamp in the abyss of darkness. “To and fro is tossing my boat with a jingling sound in the rough wind,” proceeds the cry from a heart,—“O my Murshid, yet let me live in my hope in thee. Clouds have thickened in the west and the roarings are now on,—torn is the rope of my helm,—and the boat is moving in the whirl; yet, O my Murshid, let me live in my hope in thee! The waves sweep from helm to prow,—and all my

1 Awarifus-l-Ma’arif, translated by H. Wilberforce Clarke, p. 18.
merchandise, more precious than gem and diamond, is being swept away by the current; yet, O my Murshid, let me live in my hope in thee.' Songs of this type may be found abundantly in the Baul literature of Bengal.

(c) Heterodoxy of the Bauls

The next point to be noted is the heterodox spirit of the Bauls. In this, as we have said, the background of Sahajiyā thought cannot be overlooked; but the influence of Sūfī-ism is also not less noteworthy. As essentially a cult of love-mysticism Sūfī-ism, in spite of the rites and customs that gradually developed around it, breathes a spirit of heterodoxy in general. It is rightly said,—"Transactions as it were directly with the Divine Being, the Sūfīs throw off the shackles of the positive religion; pious rebels, they neither fast nor make pilgrimages to the temple of Mecca, nay, they forget their prayers; for with God there is no other language than the silent language of the heart. From excess of religion they have no religion at all. Thus is confirmed the trite saying that "extremes meet." "The perfection of a man's state," says Jami, "and the utmost degree to which

saints may attain is to be without an attribute, and without a mark." The most fervent zeal sinks into the coldest indifference about religion.¹

The mystics in all countries are as much opposed to the paraphernalia of practices, rites and customs as to scriptures and speculative literature. The mystics do not believe in the powers of our discursive reason, which, it is held, is limited by its very nature. It is, therefore, that all attempts to comprehend the ultimate truth through intellectual pursuits are bound by nature to be sadly baffled.² But though truth cannot be known, it can be intuited or realised within,—it can be realised in the Sahaja (natural) path through the secret communion of love. In love we become one with the reality and it is in this union of love that the mystery of the whole universe is revealed to us. The mystery of the universe can never be understood unless it is revealed in love.³ It is for this reason that the mystics discard all ceremony and ritualism on the one hand and scholasticism and discursive erudition on the other and proceeds straight in the path of love. It is said in a song,—"O my lord, I hear thy call, but I cannot come,—for, the sham Guru and Murshid block my way. If that, which ought to cool the body when immersed, begins to burn all around, then, tell me, Master, where on earth I shall find a foothold!—my spiritual endeavour for ‘unity’ dies away in differences of plurality. Many are the locks in thy gate, viz., the scriptures, the Qur’an and rosaries;—showiness mars the endeavour and is the greatest impediment,—Madan cries in remorse.”⁴ It is said in another song, "Grass by no means grows on the beaten

foot-tract void; so, how would they find the living ‘Sahaja’ (i.e., the Man of the heart) they that leave not custom-beaten way? The heart-flow comes out when custom is shed away. Cast away thy fears, to Biśā Balā sayeth,—the path shines out clear, when ties are all loosened.” Religion, it is held, cannot be confined to ritualistic observances,—it is a functioning of the whole being extending over the entire gamut of human experiences. If we try to confine religion to any code of rituals and practices we shall be strangely fettered by the very means of liberation. If a necklace of wish-yielding gem loses its wish-yielding capacity, the necklace itself will be nothing but a chain. We have said that as a Sahajiyā sect the Bauls would always advocate the Sahaja (i.e., the most natural) path for the spiritual life. It is said, “If thou wouldst visualise that Man, thou must be natural in Sādhanā and must go to the land of Sahaja.”

(d) Body as the Microcosm of the Universe

We have seen that the Sahajiyās recognised the human body as the microcosm of the universe and that, according to them, Sahaja as the ultimate reality resides within this human form as our true self or the ultimate nature. This is exactly the view that has been contended by the Sūfī mystics. The Bauls also cherished the same doctrine. The human body has always been described as the temple of the Dear One. In vain, they say, are people mad after going on pilgrimage,—in vain are they searching the Beloved in temples and mosques and in other places. Thus it is said,

1. 

2. 

3. 

4. Cf. “The mosque that is built in the hearts of the saints
Is the place of worship for all, for God dwells there.”

"The Man of the house is dwelling in the house,—in vain have you become mad by searching Him outside. It is for your own fault that you are roaming about for ever. You have been to Gayā, Benares (Kāśī), and Vṛndāvana,—and have travelled through many rivers and forests and other places of pilgrimage; but say,—have you seen in all these anything of Him of Whom you have heard? Through false illusion you have lost all your power of understanding,—with jewel tied in your own skirt, you have been swimming in search of it. With care you might have easily got the gem,—but you are losing everything carelessly,—the jewel shines so near to your eyes, but alas! you are keeping your eyes shut—and you do not see."  

Again it is said, "Search, O brother, for the Lord, who is the kind sympathiser of the poor (dīna-darādi sāṁī), in the company of enlightenment as thy preceptor. The heart deceiving, blinds the eye and a single hair hides the mountain truth! The Lord in His lone seat looks. What humour enjoys my Lord at the folly and laughs! Carefully proceed in your spiritual effort; may be, you will find wealth very near; says Lālan, search your own house, truth is not very far!"  

(e) The Man of the Heart

In the songs of the Bāuls we hear much of the 'Man of the Heart' Whose abode is the human body and Whose seat is the human heart. Poetically this 'Man of the Heart' has variously been depicted as the Supreme Beloved, the poet himself being the passionate lover. The songs embody

throughout the pangs of separation for the 'Man of the Heart' and a maddening desire to be united with Him. This Bāul doctrine of divine love naturally brings in the question of its similarity or dissimilarity with the Vaiṣṇava conception of love with which we are familiar in Bengal. In a general way it may be said that the intensity of divine love, which we find in the songs of the Bāuls was influenced, no doubt, to a considerable extent by the general prema (love) movement of Bengal. But when we analyse the conception of love, as enunciated in the school of Bengal Vaiṣṇavism, it appears that this theory of love is based on a principle of duality, theological, if not metaphysical. Theologically the Vaiṣṇavas have conceived some kind of duality between God and the individual (jīva) and this principle of duality brings in the question of devotion, which gradually culminates in the conception of passionate love. Metaphysically, however, the relation between God and the individual has often been spoken of as incomprehensible (acintya); it is a relation of non-dualism, and yet of dualism and this principle of dualism in non-dualism is something that transcends intellectual comprehension. In their theology, however, the conception of dualism prevails, and all poetical and metaphorical descriptions of love seem to be based on this theological speculation. But the Bāul conception of love is ultimately based on a non-dualistic belief, the dualism is either illusory or metaphorical.

The difference between the Bāul conception of love and the Vaiṣṇava Sahajiyā conception of love is however palpable. The love of the Vaiṣṇava Sahajiyās exists between individual beings as Rādhā and Kṛṣṇa, but not between the individual and the Absolute; it is the love between Rādhā and Kṛṣṇa that ultimately leads to the realisation of the Absolute. The love of the Bāuls is, on the contrary, the love directly between the Sahaja as the ultimate reality on the one hand and the individual on the other. To conform to the emotional approach of the Bāuls the Sahaja has gradually transformed itself into a Personal God, or the Supreme Being with whom it may be possible to have personal relations. The mode of transformation of the conception of Sahaja into a Personal God has already been
indicated at the very outset. This Sahaja as the Personal God is the ‘Man of the Heart.’ From this point of view the love-union of the Bāuls with the ‘Man of the Heart’ really means the realisation of the Sahaja or the ultimate nature of Self. The love, of which we hear so much in the songs of the Bāuls, is the love between our human personality and the Divine Personality residing in the human as the true self. The Beloved as the Divine Personality residing in us is our Sahaja-nature, and the lover is the human personality, falsely viewed as separate from this Divine Personality. Love here really implies self-love, the gradual passing away of the human into the Divine.

The creed of the Bāuls is thus fundamentally based on the question of self-realisation. From the days of Upaniṣadic mysticism this question of self-realisation has been the pivot round which the religious thoughts of India have mainly revolved. The minor religious sects like the different branches of the Sahajiyās are saturated through and through with this Upaniṣadic spirit of self-realisation. In this spirit, however, Sūfī-ism is intimately related to Upaniṣadic mysticism, although the element of love which is conspicuous in Sūfī-ism is not stressed in the Upaniṣads. It is because of this striking similarity in spirit that scholars have often postulated influence of Indian thought on the evolution of Sūfī-ism itself. Without entering into the controversy involved in such postulations it may be said, that the religious contents of Sūfī-ism were in no way foreign to the mass-mind of India; it is for this reason that Sūfī-ism was very easily acceptable to the masses. But whenever we should discuss the influence of Sūfī-ism on the evolution of the minor religious sects like the Bāuls of Bengal and the Santa poets of Upper and Northern India we should never lose sight of the Indian background prepared by Upaniṣadic mysticism and the devotional movements mainly in the Vaiṣṇava line. The fact seems to be that the popular composite-religious consciousness which was formed by an unconscious admixture of Upaniṣadic mysticism and the devotional fervour of the Vaiṣṇavas was further modified by the kindred thoughts of Sūfī-ism where the spirit of the
Upaniṣads and that of later Vaiṣṇavism are found combined together.

Let us now turn our attention to the Sūfī-istic conception of the divinity and the ideal of love as conceived by the Sūfīs. The whole ideology of the Sūfī mystics is also shaped and coloured on a Pantheistic or rather a Panentheistic canvas. The creation proceeds from God, the Absolute, as His self-manifested attribute, mode or modification. The sum-total of the manifested attributes of God is the universe. Hallaj, the well-known Sūfī poet, who was done to death because of his novel belief of Ana l’haqq (i.e., I am the truth), says that “the essence of God’s essence is love. Before the creation God loved Himself in absolute unity and through love revealed Himself to Himself alone. Then, desiring to behold that love-in-aloneness, that love without otherness and duality, as an external object, He brought forth from non-existene an image of Himself, endowed with all His attributes and names. This Divine image is Adam, in and by whom God is made manifest—divinity objectified in humanity.”¹ We find a very beautiful echo of this Sūfī-istic principle in the Jñāna-sāgar of Ālirājā². There it is said that the Absolute was alone in the beginning; but it could not realise the infinite potency of love that was in it without a dual; in love therefore it created a dual out of its ownself,—and the dual was Muhammad. This first pair represent the original lover and the beloved. Because of this fact that God in His absolute aloneness could not realise His love and a second was required as the beloved, love cannot be realised in the world without there being a pair.³ The whole universe thus proceeds from the Love of God. Love is the

* * * * *
underlying principle of the cosmic process as a whole. The fact has very nicely been put in the Jnāna-sāgar, mentioned above. It is said there that the universe has its origin in love, and the chaos is systematised into the cosmos through the bond of love. There is love between fire and air, between earth and water; without this love neither heaven, nor earth, nor the nether world would have originated at all. There is love between heaven and the skies, between heaven and earth, between hell and the nether world in which it lies, and thus are the three worlds supported in love. There is love between the sun, the moon, the planets and the stars and in love are they all fixed into the sky above. There is love between the sea and its water, between the moon and the night and the sun and the day;—the tree is fixed to the earth by its root, the black-bee is attached to the lotus, fish is bound to the water, man is bound to the woman—and all in love. The body is in love with the mind and the mind with the vital wind. In love does the mother conceive the child, in love does the earth hold fast the root of the tree, in love does the tree hold fast the branches and the flowers and fruits,—in love does the fruit accumulate juice in its kernel,—thus is the whole creative process supported in love.¹

This Love of God as the raison d'être of the whole universal process brings in the question of self-revelation for self-realisation. The whole universe thus serves as a mirror where the love and beauty of the Absolute are reflected.² This manifestation of the love and beauty of the Absolute has reached perfection in the personality of man and it is for this reason that "Man is the microcosm in which all attributes (of the Absolute) are united, and in him alone does the Absolute become conscious of itself in all its diverse aspects. To put it in another way, the Absolute, having completely realised itself in human nature, returns into itself

through the medium of human nature; or more intimately God and man become one in the Perfect Man—the enraptured prophet or saint—whose religious function as a mediator between man and God corresponds to his metaphysical function as a unifying principle by means of which the opposed terms of reality and appearance are harmonised.\footnote{Nicholson, loc. cit.}

It has been said in the Ibnul'-Arabi that "When God willed in respect of His beautiful names (attributes), which are beyond enumeration, that their essence (a'yan) or if you wish, you may say "His essence ('aynahu')—should be seen, He caused them to be seen in a microcosmic being (kawn jam'i) which, inasmuch as it is endowed with existence, contains the whole object of vision, and through which the inmost consciousness (sivi) of God becomes manifested to Him.\footnote{Quoted by Nicholson, loc. cit.} Man thus represents in him a synthesis of the create and the increate,—of the finite and the infinite.

As the best manifestation of the life-principle man serves as the connecting link between the noumenon and the phenomenal creation. Man thus synthesises within his nature two aspects of existence, which are called in Sufi-ism the nasut, which is his human personality and the lahut, which is his Divine personality. The pangs of separation from which humanity suffers follow from the false notion of dualism between this human personality and the Divine in man.

This conception of the Divine and the human combined in man may well be affiliated with the Upanishadic conception of the Paramātmā and the Jīvātmā. They are like two birds living in friendly terms on the same tree,—one of them (i.e., Jīvātmā) tastes the sweet fruit of world-experience, but the other never touches it, but gazes on and on.\footnote{Mundakopaniṣad (3.1.1); Śvetā (4.6). Cf. the poem Two Birds by Tagore in Sonār Tari.} This Divine in us is dearer to us than our son, than wealth—than everything else.\footnote{Bṛhadāraṇyaka (1.4.8).} Immortal becomes the beloved of the man who adores this inner self as the dearest one.\footnote{Ibid (1.4.8).} That Divine personality is the ear of our ears, eye of our eyes,
word of our words, mind of our minds and life of our lives.\textsuperscript{1} He resides in the heart of man and is to be known in the heart of man.\textsuperscript{2}

But while the Upaniṣads speak of the love between the Divine personality and the human personality more or less metaphorically, the whole emphasis of the Sūfīs and the Bāuls is on love.

Through ecstasy of the purest love the mystic passes in the \textit{fana}, which is the passing-away of the human in the Divine. The fire of love burns into ashes the bundle of complexes from which emerges the false notion of the ‘I-ness’, and through pangs of heart the ice of ‘I-ness’ melts into flow of tears and the ‘I’ in man and the ‘He’ in man become one and the same. This is the truth which was perceived by Hallaj in his mystic trance, and which inspired him to exclaim to the world abroad \textit{Ana’l haqq}—‘I and the truth are one’! In such a moment did he declare:—

\begin{quote}
I am He whom I love, and He whom I love is I.
We are two spirits dwelling in one body,
If thou seest me, thou seest Him;
And if thou seest Him, thou seest us both.
\end{quote}

So long as there is even an iota of dualism, the door of the divine temple remains banged against us and our Eternal Beloved dwelling within refuses to respond to our call. It is only after the melting away of the human personality that the door is opened and the screen before our eyes is removed leaving the lover and the beloved unified in bond of infinite love.\textsuperscript{3}

The Divine Personality, Who is the eternal Beloved of

\begin{itemize}
\item[\textsuperscript{1}] \textit{Kena} (1.2).
\item[\textsuperscript{2}] \textit{Sūta} (4.17).
\item[\textsuperscript{3}] This truth has been very poetically and nicely illustrated by the Sūfī poet Jalalu’ddin Rumi through the following story in his \textit{Masnavi}:
\begin{quote}
“A man knocked at the door of his friend. The latter asked: ‘Who art thou, my dear?’—‘It is I’,—‘In this case, be off; I cannot at present receive thee; there is no place at my board for one who is still raw; such a man cannot be sufficiently dressed (that is matured) and cured of hypocrisy, but by the fire of separation and refusal.’ The unfortunate man departed. He employed a whole year in travelling, consuming himself in the flames of desire and affliction, caused by the absence of his friend. Matured and perfected by his long trial he again approached the door of his friend and knocked modestly, fearful that an uncivil word might again fall from his own lips.—‘Who is there?’ was asked from the interior of the house—‘Dear friend, it is thyself who art at the door’.—‘Because it is myself, enter to-day; this house can contain no other than I.’” \textit{Vide, Dabistan}, Vol. III, p. 292, F.N. 1.
\end{quote}
\end{itemize}
the human personality and with whom man becomes one in his ecstasy of love, is the indwelling principle not only of the self, but also of the not-self. It is for this reason that the sights and sounds of the external world always bear love-message of the Beloved to the responsive heart of the mystic lover. In love are we all separated from the Beloved with whom we were once one,—and in love again shall we proceed in the regressive way and realise our true original self being one with the Beloved.

In the conception of the ‘Man of the heart’ of the Bauls we find a happy mixture of the conception of the Paramātman of the Upaniṣads, the Sahaja of the Sahajiyās and the Sūfī-istic conception of the Beloved. The mystic attitude of the Bauls is best expressed in the wonder how that Infinite has objectified itself in the finite,—how through the whole being of the finite that Infinite is expressing itself in infinite ways and thereby realising itself in infinite varieties. It is not through any intellectual speculation,—but through the ecstasy of love that the truth has revealed itself to the lover, that there is ‘some one unknown’ living within his corporeal form. Thus the Baul says,—“Methinks, by this time I have become mad; otherwise, why should I feel so troubled inside every now and then? When I remain quiet with the undisturbed mind, I see that Some One speaks loudly from within,—“I am here, here I am’! In the dimness of the sky of my heart, methinks, I see Some One come to my side; He moves, He speaks, He plays,—He smiles,—He indulges in hundred other sports!... If I try to leave Him off and live alone, I cannot; it seems, He has settled His dwelling in the core of my heart.”’ It is like an ‘unknown bird’ that comes within the cage of this corporeal form,—and it is the greatest wonder with the Baul, how the ‘unknown bird’ is playing its eternal play of coming and going,—the play of

self-manifestation and of returning once more to itself.\textsuperscript{1} Though the bird lives in the cage of the human body, it floats in the boundless sky high above.\textsuperscript{2} The life-long search of the Baul is for this ‘unknown bird’, which is felt to be very near, singing within and enchanting us by its beauty and sweetness of song,—but which we are not being able to find out. It is always playing the game of hide and seek, as it were. In the pang of his heart the Baul says,—“Where has the ‘Bird of Beauty’ hidden itself by deceiving me? I roam about in search,—but cannot find it out,—it has flown far away.

“. . . . Very affectionate is that bird, and it comes of itself and invites me to talk, if even I forget it; but if I attempt to catch hold of it, it escapes my grasp,—and alas! it has made me mad!

“O my brethren, if any of you have seen that ‘Bird of Beauty’, catch it once for me; if I once can get hold of it, I shall keep it tamed with care for ever in the cage of my heart.”\textsuperscript{3} It is after this ‘some one unknown’ that the Baul has run mad.\textsuperscript{4} The vision of the unknown, the call of the Infinite, the secret touch of the Beloved have made the Baul peculiarly indifferent to the social life on earth,—and have made him come outside the limitations of earthly considerations. It is the beauty of the Formless residing within all

forms that has entrapped the heart of the Baul—and he weeps and weeps. This incessant weeping in secret gives him a peep into the beauty that pervades the whole universe by its matchless glow and grandeur. In such a state when he looks at the sky, the divine beauty appears before him floating with the clouds; the splendour of that beauty moves from star to star and the heart is illumined by its flash.¹

Through the whole cosmic process the one Lord-Beloved is playing the play of self-expression and self-realisation, endless is His sport—incomprehensible is its mystery.²

But though the Beloved is pervading the whole universe, the best way of finding Him out is to search within and to realise Him through the realisation of the self. Like the full moon He is in the sky of our heart,—but heaps of clouds have gathered over the moon; spiritual endeavour consists in driving the clouds away with the instructions of the true preceptor and to let the moon shine unobstructed in its own lustre.³ In the mystery of the self lies the mystery of the Lord and to know the former is to know the latter.⁴ It has been said by Kāṅgāl Harināth,—“O the mad, thy 'Bird of Beauty' is sitting in its nest in the bower of thy heart, find it out there; offer it fruits of devotion and water of love, and it will be tamed for ever.”⁵ Phakir-când says in a song,—“O my mind, let me tell thee,—the 'Man of the heart' is in the heart and search for Him there; why art thou roaming from

country to country?—never have I seen a greater fool than thee.”

“In man resides the Lord, why hast thou not known Him with thy common sense?... In eternal union does that Beloved daily in the heart,—He dailies in the heart with all the gates shut—and from the side of man, he (man) shuts up all the doors of the chamber of his heart with the strength of love and therein gazes at the beauty of the Beloved.”

It is the screen of illusion,—the shade over the eyes that prevents us from beholding the beauty of the ‘Man of the heart’; it is this illusion that lengthens the distance between man and the ‘Unknown One.’ Man often feels that it is not he, but that ‘Unknown One’ that is moving and working through him,—but yet alas,—because of the shade over the eyes,—he cannot catch at the ‘Unknown One.’

‘In man,’ says Lālān, ‘resides that Jewel of Man,’—but ah me, that Jewel I could not recognise!” Lālān says in another beautiful song that ‘changeless beauty’ resides within the house of this man,—it is to be realised there. It is through the medium of the human form that the divine beauty is to be realised. The truth is metaphorically explained in the following lines:—“At the gate of that ‘Divine Beauty’ there is the revered Śrī-rūpa (i.e., the human form and personality), and the lock and the key for ‘Divine Beauty’ are in his hand; one, who will be a devotee of the Śrī-rūpa, will obtain the lock and the key; Phakira

Lālan says that such people will be able to get hold of that one who escapes all grasp.\textsuperscript{1}

The love celebrated in the Bāul songs is mutual, inasmuch as it induces on the one hand the Infinite Absolute to find self-expression in the finite and relative nature of the manifested world, including human personality which is the highest expression of the Absolute,—and, on the other hand, inspires man to find his true nature by gradually dissolving his separate existence and passing away into his original being in God. We have seen that man is the marginal being, or a finite-infinite being; when associated with principles of illusory defilement, he passes on to his purely finite nature of animal existence, when he suffers bondage on all sides; but when he purifies himself in love, the principles of defilement in him being all burn away, he passes again on to his true divine nature and becomes liberated by transcending all limitations of finitude. In such a state, when the apparent difference between humanity and divinity is totally removed through love, man becomes one with the Reality itself. It is in such a state that the Bāul exclaims that the self is everything—everything proceeds from the self.\textsuperscript{2}

In the same strain did the Śūfī poet exclaim—

\begin{quote}
None lives but his life is from mine, and every willing soul is obedient to my will;  
And there is no speaker but tells his tale with my words, nor any seen but sees with the sight of mine eye;  
And no silent listener but hears with my hearing, nor any one that grasps but with my strength and might;  
And in the whole creation there is none save me that speaks or sees or hears.
\end{quote}

But we should notice that though love is the main religious mode of the Bauls, the element of yoga is in no way less important in their Sadhanā. The element of love is generally associated with elements of yoga in the Baul sect as it is in Sufi-ism. The modus operandi of the Bauls who take to the Sadhanā of the 'four moons' is essentially yogic. But elements of yoga are resorted to also by the devout Bauls as a process of purification and concentration.

(iv) Poet Tagore and the Baul Songs

The Baul songs, with the ingrained spirit of freedom, the mystic conception of divinity and love and also with the charm of their tune, leading the mind to supreme renunciation and indifference, had strong influence in the evolution of the poetico-religious mind of poet Tagore. Tagore says in The Religion of Man that in his youth he could not harmonise his inner spiritual demands with his relationship with the monotheistic church with which he was closely associated. After a long struggle with the feeling that he was 'using a mask to hide the living face of truth,' he severed his connection with the church. "About this time," says the poet, "one day I chanced to hear a song from a beggar belonging to the Baul sect of Bengal. ...What struck me in this simple song was a religious expression that was neither grossly concrete, full of crude details, nor metaphysical in its rarefied transcendentalism. At the same time it was alive with an emotional sincerity. It spoke of an intense yearning of the heart for the divine which is in Man and not in the temple, or scriptures, in images and symbols. The worshipper addresses his songs to Man the ideal..." Again he says,—"Since then I have often tried to meet these people, and sought to understand them through their songs, which are their only form of worship. One is often surprised to find in many of these verses a striking originality of sentiment and diction; for, at their best, they are spontaneously individual in their expressions."2

In another place the poet says,—"Those, who have gone through my writings, know that I have expressed my love

---

1 The Religion of Man, Ch. VII, The Man of My Heart, p. 110.
2 The Religion of Man, p. 111.
towards the Baul songs in many of my writings. When I was in Silaidaha I would frequently meet these Bauls and I had occasion to have discourses with them. I have fitted the tune of the Bauls to many of my songs, and in many other songs the tune of the Bauls has consciously or unconsciously been mixed up with other musical modes and modifications. It will be easily understood from the above that the tune as well as the message of the Bauls had at one time absorbed my mind as if they were its very element.1

The conception of the ‘Man of the heart’, as confessed by Tagore himself, deeply stirred his poetic mind even in his youth. Tagore, with the Upaniṣadic background of his mind prepared in his early days by his father as well as by the whole environment of his life, naturally tried to assimilate the message of the Bauls with the Upaniṣadic doctrines.

We have indicated in the introduction that through all his songs and poems Tagore sings of an Infinite Being, Who is seeking His self-expression through the whole creative process for self-realisation,—and the best expression of the Divine personality is through the human personality, and throughout the life-process of man there is going on this continual process of love-making between the human and the Divine. This human personality and the Divine personality, both of which remain combined in the nature of man, are the ‘I’ and the ‘You’, the ‘Lover’ and the ‘Beloved’ so much spoken of by poet Tagore in his songs and poems. In singing of this ‘I’ and the ‘You’ in man, between man and the ‘Man of the heart’, Tagore has been the greatest of the Bauls of Bengal.

1 Foreword to Harāmaṇi by Tagore.
PART III
THE NĀTH CULT
Chapter VIII

LEGEND AND HISTORY

Another obscure religious cult, that has influenced the growth of Bengali literature as also the literature in many other modern Indian languages to a considerable extent from an early period, is Nāthism. As an All-India religious movement Nāthism enjoyed and is still enjoying immense popularity. The religious and literary history of Nāthism in Bengal is, therefore, intimately connected with that of many other provinces of India as also of the Himalayan regions like Nepal and Tibet. There are many yogic texts in Sanskrit either directly ascribed to the Nāth-gurus (mainly to Gorakh-nāth), or somehow associated with the cult. The Nāth literature in the vernaculars consists mainly of longer narrative poems of the nature of ballads and also stray songs. A general survey of the nature and extent of Nāth literature with particular reference to Bengali will be found in the Appendix (B); a detailed list of Sanskrit and Hindi texts ascribed to Gorakh-nāth may be found in the Hindi book Nātha-sampradāya by Prof. Hazariprasad Dwivedi.1

(i) Origin of the Nāth Cult

The problem of the origin and development of the Nāth cult in India, including the Nāth movement of Bengal, is as yet shrouded in the mist of legends and myths. From the heaps of traditional accounts it is possible for us only to form an idea of the extent of popularity which the cult enjoyed and is still enjoying in the soil of India; but no definite history of its origin and development can be constructed with the data that we have at our disposal. We have, however, made it clear on several occasions that the historical study is not our primary concern,—we are rather interested in the religious contents relating to our literature; but as the mythical and semi-historic accounts will help us to a great extent to under-

1 Published by Hindustani Academy, Allahabad, 1950.
stand the religious nature of the cult, we propose to make here a brief study of them.

The Nāth cult is essentially a yogic cult; but among the innumerable yogic sects of India the cult is characterised as the Nāth cult due mainly to the fact that its stalwarts generally bear the title of ‘Nāth’, and the word Nāth has been dealt with in some of the standard Sanskrit texts as a philosophic concept for a state of supreme existence. Various theories are current among scholars as to the nature and origin of this cult. Some take it to be essentially a crypto-Buddhist or an esoteric Buddhist cult, which later seceded from the Buddhist fold and transformed itself into a Śaivite cult. Others, on the other hand, are of opinion that the Nāth cult is essentially a Śaivite cult, which, in course of its evolution, was assimilated within esoteric Buddhism and it is for this reason that we find in it a hotchpotch of esoteric Buddhism and yogic Śaivism. But before indulging in such speculations we should first of all be sure of what the Nāth cult stands for. The Nāth cult seems to represent a particular phase of the Siddha cult of India. This Siddha cult is a very old religious cult with its main emphasis on a psycho-chemical process of yoga, known as the Kāya-sādhanā or the culture of body with a view to making it perfect and immutable and thereby attaining an immortal spiritual life.

To escape death, as we shall see, was the central point round which grew the details of the Siddha cult, and the Siddhas in general hold “that death may either be put off ad libitum by a special course of restrengthening and revitalising the body so as to put it permanently en rapport with the world of sense, or be ended definitively by dematerialising and spiritualising the body, according to prescription, so that it disappears in time in a celestial form from the world of sense, and finds its permanent abode in the transcendental glory of God.”1 This Siddha school seems to be closely associated with the Indian school of Rasāyana and it is sometimes held that the Siddha school was originally based on the

---

theories and practices of the Rasāyana school.¹ This Rasāyana school has been accepted as a school of Indian philosophy in the Sarva-darśana-saṅgraha of Śaṅkara-Mādhava. The school is styled there as the Rasaśvāra-darśana and the doctrines of the school are explained with reference to well-known texts on Rasāyana. The school is, however, recognised here as a Śaivite school. Rasāyana or alchemy is an ancient science of the pre-Christian origin having immense popularity in different parts of the world. In India, however, instead of being purely a chemical science, it developed theological speculations and already in fairly old medical texts we find references to the view that siddhi or perfection can be attained by making the body immutable with the help of Rasa (i.e., some chemical substance). There is a popular tradition that the Siddhas were “a band of death-defying theriacal and therapeutic alchemists indebted in all respects to Bhoga, a pre-Christian Tāoist immigrant from China, who, in his methods of keying up the body of impure matter through ‘reverberation’ and ‘projection’ to the pitch of practically cancelling demise, merely sought to promulgate the lesser athanasian precepts of Lao-tse, since the vital objective of the Tāo-Teh-King is the transfiguration of the immortalised ethereal body into a permanent garment of celestial virtue, in order to fit it to associate to eternity with the Tāo.”²

Patañjali, the great exponent of yoga, who flourished most probably some time between the second and the sixth century A.D.,³ says in the Kaivalya-pāda of his yoga-aphorism that siddhi can be attained even by the application of herb or medicine (auṣadhi).⁴ In the commentary on this aphorism Vyāsa and Vācaspati say that this siddhi by auṣadhi refers to the schools of yogins who attained perfection with the help of Rasāyana.⁵ We shall presently see that the Rasa of the Rasāyana school was replaced, in the cult of the

¹ For the details of the fundamental points of similarity between the Nāth school and the school of Rasāyana, see infra, Ch. IX, Sec. V.
² Dr. Raman Śāstrī, Loc. cit.
³ See History of Indian Philosophy by Dr. S. N. Dasgupta, Vol. I.
⁴ janamauṣadhi-mantra-topāḥ-samādhiḥāḥ siddhāyāḥ
⁵ auṣadhiḥ-āśura-bhavanetra rasāyaneṣu evam ādi etc. 1 Comm. of Vyāsa. auṣadhi-siddhim āha—“āśura-bhavanetra” iti 1 manuyo hi kutasfin nimittaḥ āśura-bhavanam upasampraptah kamanvābhir āśura-kanyābhir upamannad rasāyanaḥ upaṇu- jyājāra-maranaḥvam api yātā siddhir āśādayati hāviva va rasāyanoṣayogena 1 yathā māṇḍayoc muniḥ, rasopayogad bindhyavāsī iti 1 Vācaspati.
Nāth Siddhas, by the nectar oozing from the moon situated in the Sahasrāra and the whole chemical process was changed into a psycho-chemical process of Haṭha-yoga. From the above it seems plausible to hold that the siddha mārga evolved gradually from the ancient school of Rasāyana. The theory of the Sun and the Moon as expounded by the Nāth Siddhas\(^1\) and the principle of being immortal by drinking the nectar oozing from the Moon are found explained in the second Brāhmaṇa of the Brhad-jābālopaniṣat.\(^2\) Of course the Brhad-jābālopaniṣat is not one of those Upaniṣads that are recognised by scholars to be authentic and fairly early in origin, and therefore the occurrence of the principles of the Nāth cult in this text may not help us much in ascertaining the exact time when these doctrines were prevalent; but the fact will at least hint at an antiquity of the tradition. What we can be sure of on this point is that the science of Rasāyana was accepted much prior to the advent of Patañjali by a section of yogins for the attainment of the immutability of the body and for the attainment of many other supernatural powers and that escape from death through the perfection of body was regarded by these yogins as the highest achievement in religious life. As this is essentially the position held also by the Nāth Siddhas, the history of the Nāth yogins may be traced back to a period prior to Patañjali.

From the above discussions it will be clear that any hypothesis about the possibility of the Nāth cult being originally an esoteric Buddhist cult and seceding from Buddhism in course of time to assume a Śaivite air is based purely on a misconception of the fundamental nature of the cult. Such a misconception arises also from the reliance on some popular traditions current in Eastern India. In Eastern India, particularly in the Himalayan regions (in Nepal and Tibet), many of the traditions of the Nāth Siddhas got mixed up with those of the Buddhist Siddhācāryas. The reason for such a mixture and confusion is not very far to seek. If we analyse and examine the different schools of esoterism, which go by the name of Tāntric Buddhism, or Śāktaism, or Śaivism, we shall find that in their composite practical nature they

---

\(^1\) Vide infra.

\(^2\) Vide infra.
contain mainly two elements: one is the paraphernalia of rites and rituals of a heterogeneous nature, which are neither Hindu nor Buddhist in origin, but represent a common stock of heritage to all the popular religious systems of India; the other element is the element of yoga in its various forms, which also is a common heritage. We have hinted before\(^1\) that at different periods in the history of Indian religion these paraphernalia of practices together with the various yogic elements got themselves associated with the different schools of Hindu and Buddhist philosophy, giving rise to the different esoteric schools. This fact has been responsible for so much mixture and confusion among the views and practices of these esoteric schools.

If we are to recognise any fundamental philosophy in the Hindu Tāntric systems, we should say that it is the philosophy of Śiva and Śakti with all ontological and cosmological speculations on them; and we have seen before that all the yogic practices of the Tāntric Buddhists have also grown with the fundamental ideology of Prajñā and Upāya, which is essentially the same as that of Śiva and Śakti. The traditional belief of Hinduism is that Śiva is the original instructor of all yoga,—the Tāntric Buddhists also believe that Lord Buddha, or rather lord Vajra-sattva (or Hevajra, or Heruka), who is conceived just as Śiva, is the original instructor of all secret yoga. The traditional belief of the Nāthas is that Ādi-nāth is the first in the list of the chronology of the Nāthas,—and all secrets of yoga proceed from him. This Ādi-nāth is none but Śiva of the Hindus,\(^2\) and Buddha, in the form of the Vajra-sattva, of the Buddhists; and as a matter of fact we frequently come across the epithets of ‘Ādi-nātha’ and ‘Bhūta-nātha’ applied to the Vajra-sattva or Hevajra in the Buddhist Tantras as they are frequently applied to Śiva in the Hindu Tantras. We have also pointed out that some of the important Buddhist Tantras are introduced as a dialogue between the lord and the compassionate lady just as many of the Hindu Tantras are, and according to the literary traditions of the Nāthas also, we find that Matsyendra-nāth

\(^1\) Supra, introduction.
(the first among the human Gurus) received the secret of yoga in the form of a fish when it was being disclosed to the Goddess in a castle on the Kṣīrodasea. The theory of the Sun and the Moon of the Buddhists has correspondence in the Nāth cult. It is because of the general similarities of this nature that Tāntric Buddhism seems allied to the other yogic sects. The final state of yoga is called the Sahaja state or Sahaja-samādhi or Śūnya-samādhi by the Buddhist Sahajiyās and this idea is to be met with also in the literature ascribed to the Nāths. In the two versions of the Akula-viratantra¹ (authorship attributed to Matsyendra-nāth) we find a detailed description of the state of Sahaja; there it is defined as a state of perfect equilibrium, which transcends all our perceptual knowledge with positive and negative attributes. In that state of perfect quietude the yogin becomes one with the whole universe and realises a non-dual existence. In such a state “He himself is the goddess, himself the God, himself the disciple, himself the preceptor; he is at once the meditation, the meditator and the divinity (meditated upon).”²² It is very easy to see that this Sahaja is the same as the Sahaja described in the Buddhist Tantras and the Buddhist Dohās and songs. In the vernacular literature on the Nāth cult we frequently meet with this conception of Sahaja or Sahaja-Śūnya, particularly in the old Hindi poems ascribed to Gorakh-nāth and in similar poems ascribed to Nāth-Siddhas like Carpaṭi, Jālandhar, Cauraṅgī and others.³

³ See Gorakh-bānī edited by P. D. Barthwal, Prayaṅg, 1943. See also the text of the Gorakh-bodh as quoted by Dr. Mohan Singh in his work on Gorakhnath and also similar literature of the medieval yogic saints illustrated at the end of the same text. Also Dr. Dharmavira Bhāratī, Siddha-sāhitya (in Hindi), Allahabad, 1955, Ch. V; Dr. Barthwal, Yogi-pravāhā, Banaras, 1947, pp. 69-75.
text on Haṭha-yoga) we find that the Buddhist theory of the four kinds of Śūnya, viz., Śūnya, Ati-śūnya, Mahā-śūnya and Sahaja-śūnya (or Sarva-śūnya)¹ is associated with the four stages of sound produced through yogic practices.² Again, the Nāṭh literature (including the Sanskrit and vernacular texts) is sometimes characterised by a spirit of heterodoxy and criticism similar to that of the Tāntric Buddhists.³ It is found further that in the texts ascribed to the Nāṭhs holy places of pilgrimage located within the human organism are described under several categories, viz., Pīṭha, Upa-pīṭha, Kṣetra, Upa-kṣetra, Sandoha, etc., and this is the custom also with the Buddhist and the Hindu Tantras.⁴ As for the technical yoga terminology, it can be said that they have been common to all the esoteric yogic schools.

The most important thing common to all schools of esoterism is the culture of the body or Kāya-sādhana through the processes of Haṭha-yoga. We have seen before that though Kāya-sādhana was not the final aim of the Buddhist and the Vaiṣṇava Sahajiyās, the process of Kāya-sādhana was regarded in both the sects as an indispensable accessory for the realisation of the Sahaja-nature as supreme bliss or supreme love.

The fact of such a similarity and mixture has been responsible for the frequent association of the Nāṭh cult with the cult of the Tāntric Buddhists in myths and legends. But judging from the literary records and the legends and traditions still prevalent among the yogins of the Nāṭh order it appears that the Nāṭh cult has grown with a general air of Śaivism. It is noticeable that not only is there the tradition of Mahādeva or Śiva being the original instructor of the cult, but that Gorakh-nāth, the most renowned and most important yogin of the sect, has frequently been identified with Śiva or deified as such. The deity of the cult, where traditional or iconographic record of the deity is available, is found to be Śiva; the places of pilgrimage of the yogins of

this order\(^1\) are generally of Śaivite importance and the temples there often contain an image of Śiva or the phallic symbol of the lord. Again in dress and other accessories the Nāth yogins are depicted just like images of Śiva, who himself is the greatest of yogins. The Siddhas of the Nāth cult are sometimes described in vernacular literature as fond of intoxicants like Siddhi and Gānjā just as Śiva is.\(^2\) ‘Vam, Vam’ is the peculiar mystic sound of the Nāth yogins as it is of Śiva himself. It is also noticeable that in the Vallāla-carita the priests of the Yogī caste of Bengal have been spoken of as rudraja brāhmaṇa (i.e., Brahmins deriving their origin from Rudra or Śiva),—and as a matter of fact the Yogīs of Bengal even in the present day speak of themselves as belonging to the Śiva-gotra (i.e., the Śiva-lineage).\(^3\)

But in spite of all these, the general similarity in tone and practice has been responsible for the confused identification of the later Buddhist apostles with the Nāth yogins, and it may be probably for this reason that Matsyendra-nāth, who is taken to be the first of the human exponents of the Nāth cult, has been deified in Nepal as Avalokiteśvara, and even at the present day the Buddhists of that land hold annual procession in honour of the deified Matsyendra-nāth. It is also perhaps for this reason that Matsyendra-nāth is identified in Tibetan traditions with Lui-pā (or Luyi-pā), who is generally taken to be the first among the Buddhist Siddhācāryas.\(^4\) In the Sanskrit commentary on the Caryā-song No. 21 we find a quotation of a few lines (composed in the language similar to that of the Caryā-songs), which is ascribed to Mīnā-nāth (commonly accepted as identical

\(^2\) As a typical instance we may cite the following description of Hāḍipā or Jālandharīpā in the version of the Gopī-candrer Sannyās by Sukur Mahammad:

\[
\text{takhane ānyā dīla siddher jhult} ||
\text{soō ducā siddhā haste kari nila} 1
\text{soō maa dhuṭār phal tāthe niśāila} ||
\text{soō maa ducā siddhā ekatra kariyā} 1
\text{mukhe tule dīla nāth śīva nām līyā} ||
\]

\(^3\) Vide introduction to Mayanāmatīr Gān by Dr. N. K. Bhaṭṭaṣālī, p. iv.

\(^4\) Vide introduction to the Bauddha-Gān-O-Dohā by MM. H. P. Sāstri.
with Matsyendra-nāth)\(^1\) and MM. H. P. Śāstrī, on the evidence of it went so far as to say that the Nāth yogins (who, according to MM. Śāstrī, flourished some time before the Buddhist Siddhācāryas) also composed Bengali songs exactly in the manner of the songs of the Buddhist Siddhācāryas. The hazardous leap involved in the inference of MM. Śāstrī seems to be too long to justify his inference. Of course, many Sanskrit texts and Hindi texts are ascribed to Gorakh-nāth, who has even been recognised as the first prose-writer in Hindi (or Panjabi),\(^2\) but we cannot be sure that the heap of literature (either in Sanskrit or vernacular) ascribed to Gorakh are not later texts, embodying some of the doctrines of the cult.

The general similarity among the esoteric yogic sects of the later Buddhists and the Śaivites seems to be responsible also for the tradition that many of the Siddhas of the Nāth cult, including the most renowned Gorakh-nāth, hailed from the Buddhist fold as seceders. According to the evidence of Tāranāth the name of Gorakh-nāth, when he belonged to the Buddhist fold, was Anaṅga-vajra. MM. Śāstrī says that the Buddhist name of Gorakh-nāth was Ramaṇa-vajra.\(^3\) It is said that the Nepalese Buddhists are much displeased with Gorakh-nāth and hate him as a seceder.\(^4\) In the index of the Pag Sam Jon Zang Mr. S. C. Das says,—“Gaurakṣa—a cowherd, who being initiated into Tāntric Buddhism became the well known sage Gaurakṣa, whose religious school survives in the yoge sect, who go under the designaton of Nāth.”\(^5\) Though we are not quite sure of the history either of the Nāths or of the Buddhist Siddhācāryas, yet a consideration of the general circumstances lead us to believe that all these traditions have more confusion for their

genesis than historical facts. We may note here also the queer suggestion about the identification of Gorakh with Árya Asaṅga, or even with Nāgārjuna, the well known Buddhist scholar.\footnote{Vide Introductory note by Mr. Daljit Singh to the Gorakh-nāth and Medieval Hindu Mysticism of Dr. Mohan Singh (p. xiii).} Whatever might have been the history of the origin and development of the Nāth cult and the cult of the Buddhist Siddhācāryas, the fact is that Mīna-nāth, Matsyendra-nāth,\footnote{In the Tibetan as well as in the Indian traditions Mīna-nāth and Matsyendra nāth are sometimes held to be different, while according to the Bengali tradition the two are generally held identical.} Gorakṣa-nāth, Jālandharī and Cauraṅgināth, who are the most prominent among the Nāths, were all included in the list of the Buddhist Siddhācāryas and were sometimes credited with some works on esoteric Buddhism, which were translated into Tibetan.

Dr. B. M. Barua sugests that—in the Nāthism of Bengal as in that of other places, one may trace the recrudescence and continuity of the doctrines and practices of the Ājivikas, who were a factor, as noted before in the religious history of Bengal. The points of similarity between the Ājivikas and the Nāths may, according to Dr. Barua, briefly be noted thus:

(1) Both sects recognised three supreme Personalities in their religious tradition, the Ājivikas: Nanda-vatsa, Kṛṣṇa Sāmkṛtyāyana and Maśkarin Gosāla; the Nāths: Mīna-nāth, Matsyendra-nāth and Gorakṣa-nāth.

(2) Both sects admitted singing and dancing as two important modes of religious expression.

(3) Both sects believed that in order to reach the human state a soul must pass through eighty-four hundred thousand stages.

(4) Both aspired after Ananta-mānasā or Sahasrāra as the highest condition of soul reachable through Haṭha-yoga, in which Prāṇāyāma or control of the vital wind is the essential feature.

(5) Both were Cauraṅgis (Cauraṅgis) in the sense that their religious life was to stand the fourfold test of ascetics, viz., parama-tapassitā (great privation), parama-lukhatā (great austerity), parama-jegucchitā (great loathness to wrong-doing), and parama-pavivittatā (great aloofness from the world).
In criticism of the views of Dr. Barua we may say that though there may be some important points of similarity in some of the views, practices and traditions of the Ājivikas and the Nāṭh Siddhas, there seems to be no similarity in their theological speculations. The Ājivikas were indeed wandering saints, who would often have recourse to some of the important Hāṭha-yogic practices; but these Hāṭha-yogic practices were no monopoly of any particular religious sect; they were and still are important factors in the practical aspect of many of the Indian religious systems. It is a particular theological system growing round these important Hāṭha-yogic practices that have given a distinctiveness to Nāṭhism as a religious sect. The tenets of the Ājivikas are not yet clearly known; but as far as they are known, they do not seem to represent any close resemblance with the speculations of the Nāṭh Siddhas.

The similarity in the tradition of three supreme personalities, of which Dr. Barua speaks, is indeed noticeable and the tradition of the Tri-nāṭh (three Nāṭhs) is still current in many parts of East-Bengal and North-Bengal and there are still extant religious functions which are generally accompanied by popular songs in honour of the Tri-nāṭh. In these functions, however, the Tri-nāṭh have frankly become the trinity.¹ About the second point, though we find that Gorakṣa-nāṭh transformed himself through his yogic power into a dancing girl and rescued his preceptor from the country of Kadali by dancing and singing,—that seems to have been a mere trick to enter into the country of women, and as such need not be recognised to be any important religious mode of the Nāṭhs. Of course the episode of the captivity of Mīna-nāṭh in the land of Kadali and his rescue by Gorakṣa may allegorically be interpreted as the bondage of the human soul² through worldly pleasure and its redemp-

¹ The present writer may speak of one function in honour of the Tri-nāṭh in some parts of East-Bengal. The function is known as Tennāṭher Melā (the congregation of the three Nāṭhs) and is generally held with the purpose of preventing some family calamity and of gaining prosperity for the family or for an individual. In the function, however, the three Nāṭhs are confusedly identified with the trinity, viz., Brahṛ, Viṣṇu and Śiva and three pipes of Gāṅjā are offered to them, which are then smoked. In the songs, however, the Tri-nāṭh is regarded, as one deity.

² There being the Upaniṣadic analogy between the fish (mīna) and the human soul.
tion through practices of yoga, and in that case the dancing and singing of Gorakṣa in the form of the dancing girl may be held important as a religious method; but from a study of the fundamental tenets or the yogic practices of the Nāths it does not seem to be the fact that dancing and singing were any important method of religious expression with the Nāth yogins. Many Kānpaṭ yogins are, however, found begging from door to door singing songs,—but this singing seems to be simply the profession of a beggar—and nothing more. About the third point we may note that the number eighty-four, as we shall presently see, was held to be a mystic number not only by the Nāths, but by various other schools and we find enough of it in popular literature, both Sanskrit and vernacular. The fourth and fifth points are noteworthy inasmuch as the Ājīvakas like the Nāths were wandering yogins who emphasised processes of Haṭha-yoga and were also great ascetics.

(ii) Traditions of the eighty-four Siddhas and the nine Nāths

All yogins, who have attained perfection in the practice of yoga, were honoured with the general epithet of Siddha, or Siddhā (as in the vernacular). The Buddhist Sahajiyā yogins of much renown are commonly known as the Siddhācāryas and the apostles among the Nāth yogins are also called Siddhas; it is for this reason that there has been a popular confusion of the Buddhist Siddhācāryas and the Nāth yogins in the chronology of the Siddhas. Through such a confused amalgamation has arisen the tradition of the eighty-four Siddhas. In the lists available we shall find that some of the Buddhist Siddhācāryas and Nāth yogins have been included indiscriminately. This tradition of the eighty-four Siddhas is very important inasmuch as the tradition is found frequently mentioned in the vernacular literature of different periods. In the Varṇa-ratnā-kara¹ we find a list of the eighty-four Siddhas, where:

¹ MS. preserved in the A.S.B. No. 4834; the author Kavi-śekharācārya Jyotirīśvara was a court-poet of King Hari-simha Deva of Mithilā, who reigned from 1300-1321 A.D. Vide introduction to the Baudha-Gān-O-Dohā by MM. Sāstrī, p. 35.

The list includes the names of the following Siddhas:—Adī-nātha, Matsuynṛa, Sābara, Ananda-bhaṅgara, Caurangī, Mīna, Gorakṣa, Virupaṅka, Bileṣay, Aṭhāmanta, Bhaṅgara, Siddhi, Buddha (Siddha-bodha, see Bhāratavarṣyā Uṣaṅga-ampadāyā, Vol. II, pp. 156-137), Kanthaḥ, Koraṇṭaka, Śurānanda, Siddha-pāda, Carpaṭī, Kānere, Nityānātha, Nārājana, Kapālī, Bindu-nātha, Kākāraṇḍīvara, Ahvaya (Maya?), Allāma, Prabhu-deva, Ghodā, colī, Tinṭṇī, Chāṅkut, Nāradeva, Khaṇḍakapālīka and others. See Haṭha-yoga-ampadāyā, Ch. 1, verses (5-9) (Iyngar’s edition).

The list available through the Tibetan sources is as follows:—(1) Lūhi-pā (Matsyendra or Matsyānātrā), (2) Līlā-pā, (3) Virū-pā, (4) Dombi Heruka, (5) Śābara (or Sabari), (6) Sarāha (or Rāhula-bhadrā), (7) Kanḍāki, (8) Mīna (or Vajrapāda), (9) Gorakṣa, (10) Caurangī, (11) Vinā, (12) Sānti (or Ratnākara Sāntī), (13) Tanti, (14) Cāmari (or Cārmāra), (15) Khadga, (16) Nāgārjuna, (17) Kṛṣṇa-cārī (or Kānha-pāda, Kanapa, Karana), (18) Kānere (Kānari, or Ayadēva), (19) Sthāgana (or Thagana), (20) Nāḍa-pā (or Yasobhadra), (21) Śāli-pā (or Sṛgā-pāda), (22) Tilo-pā (or Tailika-pāda), (23) Chātra, (24) Bhradra (or Bhaḍe), (25) Dvikhandrī (or Dokhandirī), (26) Ajogi (or Yogi-pāda), (27) Kada-pāda (or Kāla), (28) Dhovī (or Dhombhi), (29) Kanakana, (30) Kambala (or Karmari), (31) Tēkī (or Damgī), (32) Bhade (or Bhande, Bhāṇḍārī), (33) Tandhi (or Tandhe), (34) Kukkuri, (35) Cubji (or Kusulī), (36) Dharma, (37) Mahī, (38) Acintya (Acinta, Acintī), (39) Bhaḥahī (or Bhalaha), (40) Nalina, (41) Bhusuku (or Santi-deva), (42) Indra-bhūti, (43) Meghapāda (or Meko), (44) Kutrā, (or Kuthāli), (45) Kāmara, (46) Jālandhara, (47) Rāhula, (48) Gharbāri (or Ghrarm-pāda), (49) Dhaṅkri (or Tokri), (50) Medīnti, (51) Pānkhaja, (52) Gaṇṭṭa (or Vajra-gaṇṭṭa), (53) Vṛt (or Vṛtṛ), (54) Cēluka (or Cēluka), (55) Vṛguri (or Ṛgūṛi), (56) Thenaka (or Lūcca), (57) Nipru, (58) Jayananda, (59) Carṣṭā (or Pācari, Pācāla), (60) Campaka, (61) Viṣṇa (or Bhikhana), (62) Bhaḷi (or Telī, Tailī), (63) Kumari (or Kumbhakāra), (64) Carpaṭī (or Javari), (65) Mani-bhadra, (66) Mekhala, (67) Mankhala.
and has been published by Van Manen from Holland. The tradition is very popular also in the South.

We are not, however, prepared to give any historical credit to the list of these eighty-four Siddhas or even to the tradition of the eighty-four Siddhas. If we just examine the lists of these eighty-four Siddhas it will appear that they are anomalous lists containing names of many Buddhist Siddhācāryas who flourished during some time near about the tenth to the twelfth century A.D., and within the list of these Buddhist Siddhācāryas the name of the most reputed Nāths have been incorporated for reasons discussed before. This tradition of the eighty-four Siddhas is occasionally referred to in the Nāth literature of Bengal as well as in the Santa literature and Sūfī literature of Western and Northern India. It has been rightly held by some scholars that this number eighty-four is rather a mystic than a historical number, and for ourselves we have sufficient reason to be convinced of the purely mystic nature of this number. The significant mention of this number eighty-four is found in the belief of the Ājivikas, who held that soul must pass through eighty-four hundred thousand stages before attaining the human state. In the Maitrāyaṇi Upaniṣat we find mention of eighty-four thousand states of birth. In some of the Tantras and Purāṇas also we find reference to the eighty-four lacs of yonis or birth in different states. The

(or Kaṇakha), (68) Kala-kala, (69) Kanthaḍī (or Pantali), (70) Dhaduli (or Daudī), (71) Udhalī (or Udḍīya), (72) Kapāla, (73) Kīlā, (74) Puṣkara (or Sāgara), (75) Sarva-bhaṭṣa (or Sābhikṣa), (76) Nāga-bodhi, (77) Dārika, (78) Puttal (or Putuli) (79) Panaha (or Upānāhi), (80) Kokilā (or Kokili), (81) Anaṅga, (82) Lakṣmīṅkarā, (83) Sāmudra (or Samuda), (84) Bhali-pā (or Byādi or Byāli). Vide, introduction to the Śūnya-purāṇa by Dr. Shahidullah, pp. 3-4; Kalyāṇa (an article Caurāśi Siddha Tathā Nātha-sampradāya by Bhagavati-prasād Śīnhaji) Togāka number.

1 Vide B. S. P. P.—The Presidential Address of MM. H. P. Śaṅkri, B.S. 1329.
2 Vide Dr. Raman Śaṅkri, loc. cit.
3 Sometimes the number of the Siddhas is said not to be merely eighty-four, but eighty-four million, and that shows that the mystic number became mythical, at least so far as the vernacular poets were concerned.
4 Digha-nikāya, Vol. I., p. 54.
5 Third prāpṭaḥaka.
There is also the popular belief of eighty-four Kundās (bowel-shaped vessel) in the city of Yama in which the convicted are doomed.

Cf. emata dharmar barata avahela jehi jan 1
caurāśi kundeta jama ta ṣele tatakhaṃ ||
Śūnya-purāṇa, Tikā-pāvana, p. 52.
number of the Buddhist dhammakhandas (i.e., dharmaskandha or branches of doctrines, division of the dharma or scripture) is eighty-four, or rather eighty-four thousand. It has been said in the Pāli text Gaṅḍha-vaṁśa that those scholars, who will write commentaries, notes etc. on the Pāli texts containing the eighty-four thousand dhammakhandas, or will cause others to write such works, will gather immense merit equal to the merit derived from building eighty-four thousand shrines, constructing eighty-four thousand images of Buddhas, establishing eighty-four thousand monasteries. It has further been said that he, who makes a good collection of the sayings of Buddha, or causes others to do it, and who scribes, or causes to be scribed the sayings of Buddha in the form of a manuscript, and who gives or causes others to give materials for preparing such a manuscript and to preserve it, will amass immense virtue equal to that, which is gathered by building eighty-four thousand shrines and erecting eighty-four thousand monasteries.\(^1\) Statements of similar nature are also found in later Buddhistic texts.\(^2\) In the Pāli text Anāgata-vaṁśa we find that when Maitreya, the future Buddha, will renounce the world, moved by universal compassion, eighty-four thousand friends, kinsmen and princesses will follow him, and eighty-four thousand Brahmmins, versed in the Vedas, will also accompany him. The mystic nature of the number eighty-four will also appear from the fact that the commonly accepted number of the yogic postures (āsana) is said to be eighty-four in the Yogic and Tāntric texts; and it has sometimes been held that the number of the yogic postures are eighty-four million because of the fact that the number of the different stages in the evolution of a creature is eighty-four million,\(^3\)—and of these eighty-four million only eighty-four are prominent, and so they are described in detail. As a matter of fact, we do not find even these eighty-four Āsanas described anywhere, only a few of them being described in the Yogic and Tāntric literature. We may also note that

\(^1\) Gaṅḍha-vaṁśa, (last Chapter).
\(^2\) Guna-kāraṇa-gyūha, p. 41, pp. 76-77. In this connection see also Amitāyur-dīyaṇa-sūtra, The Sacred Books of the East, Vol. XLIX.
\(^3\) Gorakṣa-paddhati (verse 8); Gorakṣa-saṁhitā (verse 7); Gheraṇḍa-saṁhitā (2. 1-2) etc.; Sundara-dāsa (Sundara-granthāvali, Vol. I, p. 41).
sometimes the number of the beads in the rosary of a Kānphaṭ yogin is also eighty-four. In the Skanda-purāṇa we have detailed description of the eighty-four Śiva-liṅgas (i.e. phallic symbols of lord Śiva) in eighty-four consecutive chapters.¹ All these taken together will convince one of the mystic nature of the number eighty-four, and this will justify the doubt about the historical nature of the tradition of the eighty-four Siddhas.

Side by side with the tradition of the eighty-four Siddhas we find the tradition of the nine Nāths.² In the ceremonies on the occasion of the initiation into the order of Kānphaṭ yogins there is the custom of worshipping the nine Nātas and the eighty-four Siddhas.³ But even in this tradition of the nine Nāths, there is no agreement among the lists, and all sorts of mythical accounts are found concerning them. In the Soḍāsa-nityatantra quoted in the Gorakṣa-siddhānta-saṅgraha we find mention of the nine Nāths who are said to have preached the Tantras in the different ages. In the Tantra-mahārṇava (quoted in the same text) eight Nāths are said to be residing in the eight directions and one in the centre. These Nāths are Gorakṣa-nāth in the east (residing in the forest of Jagannātha?), Jālandhara in the northern region (Uttara-patha, in a forest near Jvālā-mukhī?), Nāgārjuna (in a forest near Godāvari in the south?), Dattātreya in the west (to the west of the river Sarasvatī?), Devadatta in the South-West, Jaḍa Bharata in the North-West, Ādināth in the land of Kurukṣetra in the Midland and Matsyendra-nāth in the South-East in a land near the sea-coast.⁴ We notice further that the Kāpālika-school was introduced by the Nāths and there are twelve personalities, to whom was revealed the truth of this school. They are,

⁴ Vide Gorakṣa-siddhānta-saṅgraha, pp. (44-45). Note that the ninth Nāth in the Ṣāna-kopa is not described.
Ādi-nāth, Anādi, Kāla, Vaikālika, Karāla, Vikarāla, Mahākāla, Kāla-bhairava-nāth, Vaṭuka, Bhūta-nāth, Vīra-nāth and Śrī-kaṇṭha. Again, twelve are the apostles, who are said to be the founders of the cult (mārga-pravartaka), they are Nāgārjuna, Jāda-bharata, Hariścandra, Satyanāth, Bhima-nāth, Gorakṣa, Carpaṭa, Avadya, Vairāgya, Kanthādhāri, Jālandhara and Malayārjuna. In another list we find the following names of the nine Nāths; Gorakṣa-nāth, Matsyendra-nāth, Carpaṭa-nāth, Maṅgala-nāth, Ghugo-nāth, Gopi-nāth, Prāna-nāth, Sūrat-nāth and Cambanāth. These Nāths are believed to be immortal demigods and preachers of the sect for all ages, and it is also believed that they are still living in the Himalayan region; sometimes they are regarded as the guardian spirits of the Himalayan peaks.  

1 Śāhara-tantra, quoted in the Gorakṣa-siddhānta-saṅgraha.

2 The Legends of the Punjab, by R. Temple, pp. 18-19, Vol. I, referred to by Briggs, p. 136. In another list again many of the nine Nāths are identified with the Hindu gods. Thus (1) Orṅkāra Ādi-nātha (Lord of Lords) is identified with Śiva, (2) Shelnātha (Lord of the Arrow Shaft) with Kṛṣṇa or Rāmacandra; (3) Santosa-nātha (Lord of Gratification) with Viṣṇu, (4) Acalacambhunātha (Lord of Wondrous Immortality) with Hanumān or Lakṣmaṇa; (5) Jajabali Gajakaṇṭha-nātha (Lord of the Elephant's strength and Neck) with Gaṇeṣa Gaja-karna; (6) Prāja-nātha, or Udai-nātha (Lord of the People?) with Pārvatī; (7) Māyā-rupī Macchendra-nātha, Guru of Gorakha-nātha, (8) Gathepinde Rīcayakari (?), or Naraṇṭhar, Sambhujīta Guru Gorakha-nātha; (9) Jānasa-varūpa or Purakh-Siddh Gauranjwenātha, or Purān Bhagat. Briggs, pp. 136-37. Almost a similar list of the nine Nāths has been given by Kitts. It runs as follows:—Orṅkārī-nātha, Viṣṇu Sarītak-nātha, Viṣṇu; Gajboli, Gajāna (Gajānana ?), Hanumān; Acaleśvar, Gaṇpati; Udayanāth, Sūrya; Pārvatī Prem, Mahādeo; Santhanāth, Brahma; Gyānī Siddhacewarng Jagannāth; Māyārupī Matsya. Ibid. p. 137.

3 In the Togī-sampradāya-śikṣā, referred to before, we find an account of the incarnation of the nine Nārāyanas as the nine Nāths. Here, however, popular imagination seems to have run riot. It is said that towards the end of the Dvāparayuṇa the earth was heavy with sin, and the attention of Mahādeva, the Lord Sovereign, was drawn to the fact. Moved to pity the Lord at once sent sage Nārada to Badarikāśrama, where the nine Nārāyanas (who were the sons of Rṣabha-rāja) of the name of Kavi-nārāyaṇa, Kara-bhājana (who were the sons of Rṣabha-rāja) of the name of Kavi-nārāyaṇa, Kara-bhājana Nā, Antarikṣa Nā, Prabuddha Nā, Avirhotri Nā, Pippalāyaṇa Nā, Camasa Nā, Hari Nā and Drumil Nā were holding discussions on self-knowledge. Nārada intimated to the Nārāyanas the will of the lord, who would have the Nārāyaṇa come down to the world to preach the secrets of yoga to people so that they may be liberated. The Nārāyaṇas went to Viṣṇu to take counsel from Viṣṇu as to how to carry out the will of lord Viṣṇu, accompanied by the Nārāyaṇas, went to Kailāsa to receive instructions from the Lord, and with His instructions the nine Nārāyaṇas incarnated themselves in the form of the nine Nāths, viz., Matsyendra, Gorakṣa, Gahini, Jvālendra, Kārīṇa-pā, Carpaṭa, Revana, Bhaṭr and Gopi-candra. It was settled that Matsyendra would be initiated by the Lord Himself, Gorakṣa, Carpaṭi and Revana by Matsyendra, Gahini by Gorakṣa: Jvālendra would be initiated by the Lord, Kārīṇa-pā, Bhaṭr and Gopi-candra by Jvālendra. (Vide Ch. 1.).
In this connection, we may take note of the different accounts given of the Nāthgurus. The Mārāṭhi tradition may be illustrated thus:

\[
\begin{align*}
\text{Ādi-nātha} \\
\text{Umā} & \quad \text{Matsyendra} & \quad \text{Jālandhara-nātha} \\
\text{Gorakṣa-nātha} & \quad \text{Caurangini-nātha} & \quad \text{Kanīpha-nātha} & \quad \text{Maināvatī} \quad \text{(Mother of Gopi-cānd)} \\
\text{Gaini-nātha} & \quad \text{Carpaṭi-nātha.} & \text{(Gahini-nātha)} & \text{Nivṛtti-nātha.} \\
\text{Jāneśvara} & \quad \text{Sopāna-deva} & \quad \text{Muktā-bāī.} \\
\end{align*}
\]

According to the chronology of Bahīṇā Bāī Ādi-nātha (Śiva) taught the secrets of Yoga to Pārvatī and Matsyendra managed to hear them; Matsyendra taught them to Gorakṣa-nāṭh, he to Gahinī, Gahinī to Nivṛtti-nāṭh, he to Jāneśvara, he to Saccidānanda and further to Viśvambhara, he to Rāghava (Caitanya), he to Keśava-caitanya, and Keśava to Bāvāji Caitanya, he to Tokobā (Tukārāma) and Tokobā to Bahīṇā Bāī (1700 A.D.). Another chronology runs thus:

\[
\begin{align*}
\text{Śakti} \\
\text{Śiva} \\
\text{Ude} \quad \text{(Second of the nine Nāthas, founder of the Pantha of the 9 yogins.)} \\
\text{Rudragan} \\
\text{Jālandhar} \quad \text{(who was an evil spirit, restored to reason and initiated).} \\
\end{align*}
\]

\[
\begin{align*}
\text{Matsyendra} \\
\text{Jālandhari (Pā)} \\
\text{Bhartṛ-nāṭha} & \quad \text{Kānipā} \\
\text{(Bairāga, son of Rājā Bhoja)} & \quad \text{Siddha-saṅgarī} \\
\text{Gorakṣa-nāṭha} & \quad \text{Paṅgal (Rewal)} & \quad \text{Nima-nāṭha} & \quad \text{Pārasnathpūj} & \quad \text{Sivotorā} \\
\text{Sons of Matsyendra} \quad \text{(both Jainas)} \\
\end{align*}
\]

1 Vide, Śrī-jāneśvara-caritra by Mr. Pāṅgārakara pp. 60-78.
2 Briggs, loc. cit.
Various lists of the nine Nāthas are found also in the literature of the Santa poets. It will be easy to see from the above that as no strictly historical importance can be attached to the lists of the eighty-four Siddhas so also no historical importance can be attached to these chronologies of the Nāth-gurus.

According to the accounts found in Bengali, Mīna-nāth or Matsyendra-nāth (the two being held identical according to the Bengali tradition) and Jālandharī-पā (more commonly known as the Hāḍi-siddhā) were the direct disciples of Ādi-nāth or Śiva; Gorakh-nāth was the disciple of Mīna-nāth and queen Mayanāmatī (mother of Gopī-cānd) was the disciple of Gorakh-nāth; Kānu-पā or Kānu-pā was the disciple of Jālandharī-पā or Hāḍi-siddha,¹ who also initiated King Gopī-cānd to the yogic order. Kānu-pā had his disciple Bāil Bhādāi. Many of the Nāth Siddhas are referred to also in the Dharma-maṅgala literature. SahadevaCakravartī, as we shall see, made a regular mixture of the legends of the Nāth literature and the Dharma literature. In many other texts of the Dharma literature we find the prominent Nāth Siddhas and also other sages descending on earth, along with the various gods, on the occasion of some ritualistic and sacrificial ceremonies held in honour of the Dharma-ṭhākura. In the Dharma-pūja-vidhāna we find the custom of worshipping many of these Nāth Siddhas along with some gods, goddesses and demigods of the Dharmites.² The most prominent names, which we come across in the legends of the Nāth literature of Bengal, are (1) Mīna-nāth, (2) Gorakh-nāth, (3) Jālandharī-पā, (4) Kānu-pā, (5) Maināmatī and (6) Gopī-cānd. Various are the legendary and mythical accounts that have grown round the names of these personalities in Nepal, Tibet, Bengal and in various other provinces of India. We need not enter into the details of these legends or

1. tave yadi prthivīte yāśa īhā kar-gaurī

the controversies of the historical and geographical questions pertaining to them; a brief survey of the various accounts will, however, be found in the Appendix (C).
CHAPTER IX

THE RELIGION OF THE NĀTH SIDDHAS

The religious views of the Nāth Siddhas are as much obscured by the insufficiency and anomaly of accounts as is the history of the whole cult. The distinctive features of their yogic practices as also the theories behind them are not found explained systematically in any of the Sanskrit or non-Sanskrit texts, associated with the cult somehow or other. The Sanskrit texts are mainly texts on Haṭha-yoga in general and the vernacular texts are generally poetical texts on legends and myths. The method of treatment of the present writer has, therefore, been to analyse and examine all the available data and to give a systematic exposition of them so as to give a general idea about the nature of the cult.

(i) General Air of Supernaturalism

The general religious nature of Nāthism is characterised by a wide-spread belief in occult power attained through the practice of yoga. All the legends are permeated through and through with a spirit of supernaturalism more in the form of the display of magical feats and sorcery by the Siddhas than in the form of occasional interference from the gods and goddesses, or any other supernatural being. Occultism is an inseparable ingredient of popular religious consciousness,—nay, it is often the salt of popular religious belief. In the history of Indian religion occultism is associated with religious beliefs and practices from the time of the Atharva-veda, and henceforth it is associated with all esoteric religious systems in the Hindu, Buddhist and other religious schools. In Pāli literature we find occasional reference to the belief in the Iddhis (i.e., ṛddhi) or occult powers attainable through religious practices. We find frequent reference to the ten supernatural powers (daśa-bala) and also to the six supernatural faculties (abhijñā) which are attainable by a Buddhist adept. Patañjali, the great proponent of yoga, who dealt primarily with the psychological
aspect of yoga, also devoted a full chapter of the Yoga-sūtra to the different kinds of supernatural powers (vibhutis) attainable through concentration of mind on different objects or on different centres of the body. The eight supernatural faculties, viz., Aṇīmā (the power of becoming as small as an atom), Mahimā (the power of becoming big), Laghimā (the power of assuming excessive lightness at will), Garimā (the power of becoming as heavy as one likes), Prāpti (the power of obtaining everything at will), Prakāmya (the power of obtaining all objects of pleasure at will), Īśitva (the power of obtaining supremacy over everything) and Vasītva (the power of subduing, fascinating or bewitching) are well known in the school of yoga. It is held that through the practices of Haṭha-yoga “the gross body begins to acquire something of the nature of the subtle body and to possess something of its relations with the life-energy; that becomes a greater force more powerfully felt and yet capable of a lighter and freer and more resolvable physical actions, powers which culminate in the Haṭhayogic siddhis or extraordinary powers of garimā, mahimā, aṇīmā and laghimā.” These powers are generally known as the eight powers of lord Śiva himself, who is the lord of yoga.

The Nāth Siddhas (including Mayanāmati, who too was versed in the mystic knowledge of yoga) displayed throughout these eight supernatural powers. Thus we find in the Gorakṣa-vijaya that when Śiva granted the boon to a princess that she should get Gorakh as her husband, the great Yogin Gorakh, assumed the form of a child of six months before the princess and expressed the desire of sucking her breasts. The princess got offended and insisted on having Gorakh as her husband; Gorakh could not agree to her proposal, but gave her his old patched and ragged garment and asked her to wash it in water and to drink that water. This would, he assured, give her a son. She obeyed and the words of Gorakh came to be true. After that Gorakh was sitting under a Bakula tree and at that time Kānu-pā was passing through the sky above. Gorakh could know of it

1 To these eight another is often added, which is Kāmāvasāyitva (i.e., the power of suppressing desire, self-denial or mortification).
by the shadow of the Siddha falling below; he got offended and sent his pair of wooden sandals to go up and bind the arrogant Siddha down and the order of Gorakh was instantaneously carried out. Again, when Gorakh resolved to enter into the country of Kadalī in the guise of a Brahmin in order to rescue his Guru, he sent Laṅga and Mahā-laṅga (two attendants on Gorakh) to Viśva-karmā asking the latter to supply him at once with a golden sacred thread, a pair of golden ear-rings, golden frontal marks, golden umbrella, stick, etc., and everything was readily and most obediently supplied by Viśva-karmā. When Gorakh again demanded for the necessaries for assuming the form of a dancing girl, Viśva-karmā supplied him with all golden articles at once. The Nāths seldom walked on earth, they moved in the air and would traverse hundreds of miles within the twinkle of an eye. To remove the illusion of Guru Mīna-nāth and to recover him to his sense, Gorakh-nāth displayed various yogic powers before the Guru. He first split into two Binduk-nāth (who was born to Mīna-nāth in Kadalī), then washed his (Binduk-nāth’s) body in the manner of a washerman and dried it up in the sun,—and then revived him once more just by the fillip of his fingers. Mayanāmati and her preceptor Hāḍī-siddhā displayed magical powers at every step in all the versions of the story of Gopī-cānd. They could know everything by their dhiyāṇa (i.e., dhyāṇa, meditation) or maha-jīhāṇa (great mystic knowledge) and could do anything and everything they liked with the help of a mere Huṃkāra (i.e., the sound of the mystic syllable Huṃ) or such other Tāntric mystic syllables.¹ At the time of Mayanāmati’s initiation by Gorakh in her childhood, Gorakh made a full grown banian tree from its seed within the time of twelve Daṇḍas.² Again, twelve crores of Yogins with thirteen crores of disciples, who assembled on the occasion of Mayanā’s initiation, and whose assemblage occupied the space that could be traversed in six months, could be served with the rice that was cooked

¹ In the Rangpur version of the story we always find that Hāḍīpā or Mayanāmati did everything by the muttering of tuḍu tuḍu; tuḍu tuḍu here, however, represents the muttering of the mystic syllables.

² One Daṇḍa is approximate to 24 minutes.
from a single grain of paddy,—and yet after all had eaten to their heart's content, the food for one Siddha was still left in the earthen pot.¹

In the description of Hāḍī-siddhā we find that he makes ear-rings of the sun and the moon, and lord Indra himself fans him; he cooks his food in the moon and eats his food on the back of the tortoise,—and goddess Lakṣmī herself prepares food for him. The five daughters of Indra remove the leaves on which he takes his food and Suvacani² supplies him with betel-nut, the Nāga-girls of Netherland prepare his tobacco-pipe and Meghanāl, son of Yama, comes forward to serve him with a fan. He walks with his golden sandals and if he gets hold of Yama he beats him severely.³ Before Gopī-cānd agreed to accept Hāḍī-siddhā as his Guru, he (Gopī-cānd) wanted to be convinced of the yogic powers of the latter. In one of the versions of the song we find that at the challenge of the king, the Siddha at once got ready, rolled thrice on the ground and got his body pasted with eighty maunds of dust,—made the rope round his loins with eighty maunds of jute, put on a cap made of eighty four maunds of iron, held in hand an iron stick weighing eighty three maunds, and put on a pair of iron sandals weighing eighty two maunds. The Hāḍī got ready and came out of his cell and drank water with twenty two maunds of pea. He stretched his hands which reached the sky above; he stretched his legs which reached the netherland below; the hairs of his body stood like palm trees and the cap on his head reached the mountain Kailāsa. When the Hāḍī Siddhā began to move, mother earth began to quake with cracking sound; when the Hāḍī stood up his head struck against heaven above; when he began to move with a broom, a broken spade, a basket to carry rubbish, and an earthen water jar on head, he crossed fortytwo Kroṣas⁴ in one single step, and wherever he placed his feet, the footprints made large tanks. When he arrived at the port of Kaliṅkā, he first made a Huṁkāra for broom, and innu-

² An indigenous demi-goddess of Bengal.
⁴ A Kroṣa is a little more than two miles.
merable brooms poured down from above and began to cleanse the market automatically; then he made another Huṁkāra for baskets and innumerable baskets began to remove rubbish automatically; when he made Huṁkāra for the spade, innumerable spades began to scrape the ground automatically; similarly innumerable earthen jars began to pour down water. Hāḍipā then went to the house of Mayanā and asked from her something to eat. Mayanā asked him to take his bath and then to take meal. Hāḍipā went to the river to bathe, released in the river a piece of torn cloth with twelve knots and thereby the water was dried up; the merchants in their stranded boats began to weep; fish, shark, dolphin, crocodile—all began to cry in the dry bed of the river; Hāḍipā took pity on them, pressed the piece of cloth with twelve knots and the river became once more overflowed with water. He then entered the coconut-garden of the king and sat on his yogic posture and all coconuts dropped down before him; he spilt them up with his nail, drank water and ate up the nut and the coconuts returned to the trees and remained hanging just as before. By that time Mayanā finished her cooking and invited Hāḍipā to take meal; the meal prepared was taken by the Hāḍi all at once,—but that could not appease his hunger. He then took seven bags of dried paddy, three bags of salted onion and swallowed the whole thing with twenty-two jars of water.¹ Similar other magical feats were displayed by the Hāḍi as proof of his yogic power. He cut a man into two and revived him at will within the twinkle of an eye; he transferred the head of queen Adunā to the trunk of queen Padunā and vice versa and again set everything right. When he was buried under the stable, he tore off all his bondage of rope and chain by means of a single Huṁkāra; the chain of hand became transformed into a rosary of beads; the heavy stone on his chest became the outer garment of yoga (yoga-paṭṭa); the rope with which he was bound became the rope of his loins; and the grave was transformed into an under-ground cave

Cf. also Gopi-candrer Sannyās, pp. 440-441.
where Hāḍī remained absorbed in his yoga-meditation. These are some of the types of magical powers displayed by the Siddhas, mainly by Gorakh, Hāḍīpā and Mayanā-matī. We need not multiply instances. Similar legends of magical powers displayed by the Nāth Siddhas are found abundantly also in the Nāth literature of other vernaculars. This curious blending of supernaturalism and occultism with the most realistic description of the story and the keen human interest involved in the pathos of the great renunciation of a young king like Gopī-candra, has infused Nāth literature with a peculiar literary charm.

In the literary field, at least so far as Bengali literature is concerned, this emphasis on occultism in the Nāth literature sharply makes it distinct from the literature belonging to similar esoteric schools, we mean the literature of the Buddhist Sahajiyās, the Vaiṣṇava Sahajiyās, the Bāuls and such other schools of Bengal. We have seen before how a spirit of revolt against occultism and outward show of austere practices characterises the literature of the different Sahajiyā sects including the literature of the Sūfī poets. Very frequently and severely did Kabir criticise the sect of the Gorakh-yogins in his poems; so have also his followers including Nānak, the Sikh prophet.

Judging from the religious point of view such occultism represents only the popularly adumbrated superficial feature of Nāthism. It is not also a fact that such display of supernatural power characterises all literature belonging to the Nāth cult. In some of the Hindi texts on Gorakh and Matsyendra and in some texts of Hindi literature ascribed to Gorakh-nāth we find the same spirit of heterodoxy as is found in the Sahajiyā literature, and there the Nāths have joined with the Sahajiyās in their spirit of criticism. The perusal of an early Hindi text like the Gorakh-bodh or Gorakh-bānī will tempt one to believe that there is no difference between Nāthism and the various other Sahajiyā cults in their religious attitude. The other fragments of literature ascribed to Gorakh and to Carpaṭa (who also has been included in the list of the Siddhas and is well-known in Hindi and Punjabi

1 Gopī-candra Sannyās, p. 418.
Nāth literature as a great Siddha of the Nāth Sect) will lead once to the same conclusion. In the Sanskrit texts on yoga, which are ascribed to the authorship of Gorakh-nāth, or are traditionally associated with the name of Gorakh and are believed to represent the religious views and practices of the Nāth-yogins, we often find criticism levelled against other orthodox religious systems from the stand-point of yoga. We may for instance refer to the Gorakṣa-siddhaynta-saṁgraha, where we find many orthodox schools severely criticised from the point of view of yoga and there the supremacy of the yoga-school has been established with help of the texts belonging to various yogic schools. In the sixth chapter of the Siddhā-siddhaynta-paddhati we find description of the real yogin, and in the fifth chapter of the Gorakṣa-samhitā we find an elaborate description of the final state of yoga. From these descriptions it will appear that the state of non-duality, bereft of all disturbence of mentation, is the final state of yoga. On this point these yogins, as he have said, appear homogeneous in spirit with the Buddhist Saha-jiyā yogins. In the small texts, entitled Amanaska-vivaraṇa and Yoga-bīja belonging to the yogic cult of the Siddhas, we find the same spirit of criticism. A very faint echo of this spirit of yoga literature in general is sometimes found also in Bengali Nāth literature, where the path of yoga is eulogised to king Gopi-cānd either by his mother Mayanā-mati or by his Guru Hādi-siddhā.

It will be doing the worst sort of injustice to Nāthism as a popular religious sect to hold that in its origin and nature it had noting in it worth considering but the practices

1 For such literature ascribed to Gorakh and Carpaṭa, see Dr. Mohan Singh's work on Gorakh-nath, and see Gorakh-bānī edited by Dr. Barthwal. Also see Yoga-pranāha (in Hindi) by Dr. Barthwal.
2 The text is a compendium of news and views on the yogic cult of Gorakṣa collected from the Sanskrit texts that are traditionally associated with the cult as embodying the doctrines of the cult.
3 Vide pp. 1-9; 12 et seq; 23-24; 49, 54, etc.
5 Cf. also Kaula-jñāna-virāgay ascribed to Matsyendra, particularly Akula-virātantra included in it.
6 The two texts are published in the Vasumati series of Bengal in a collection of many small yogic texts published under the general caption of Śāstra-sātaka.
7 Cf. Amanaska-vivaraṇa, verse No. 1.
of Hatha-yoga with the only end of attaining some occult powers. It is the wild, though sweet, imagination of the uninitiated village poets that is responsible for the growth of so much occultism in the Nath cult at the cost of the truth in the cult which is certainly worth considering. Behind the legends and traditions found in popular poetry we occasionally find glimpses of light, with the help of which we shall try in the following pages to catch at the inner truth of the cult.

(ii) The final End of the Nath Siddhas

What was the final aim of the Nath Siddhas and what was the means (Sadhanā) through which this end was to be attained? If we are to give the answer in a nutshell, we should say that the final aim of the Nath Siddhas was the attainment of Śivahood in and through the attainment of immortality,¹ and the means of attaining it was primarily Hatha-yoga. The question of escaping death may be taken to be the most salient feature of Hatha-yoga in general as contrasted to the other forms of yoga, viz., Mantra-yoga, Laya-yoga and Rāja-yoga. The latter three schools are idealistic in their philosophical outlook and, therefore, lay the greatest emphasis on the final arrest of the mind and the attainment of liberation thereby (liberation from the whirl of coming and going); the emphasis of Hatha-yoga seems to be primarily on the physical or physiological practices which remove disease, decay and death. In the description of the benefits attainable through the practices of yoga we frequently meet with statements that through such and such yogic practices the yogin gets rid of all diseases, his old body becomes rejuvenated, his body becomes changeless like a mountain; he becomes a victor over Kāla (i.e., time) and a deceiver of Kāla; he becomes a victor over Death (mrtyuñjaya). Patañjali, the great propounder of yoga, gives Hatha-yoga but a subsidiary place—it is resorted to only for gaining a control over the physical and the physiological systems, and this control necessarily affects psychological states and conditions, and a perfect control over the psycho-

¹ Cf. jīva thāṁ śīva haibā prāśi—from a created being one must become the Śiva Himself. Sikhyā Darasan collected in Gorakh-bānī (ed. by Dr. Barthwal).
logical states leads to final liberation. In this final state of liberation the Puruśa or the 'seer' remains in his pure essential nature. This final aim of yoga as the final arrest of mind has often been admitted also by Haṭha-yoga, and in some of the standard texts Haṭha-yoga has been made subservient to Rāja-yoga (i.e., the yoga par excellence, which is the yoga of meditation); but considering the general tone of Haṭha-yoga it seems that the very approach of Haṭha-yoga was somewhat different from the approach of the other schools of yoga. There is indeed the question of liberation in Haṭha-yoga,—but here the conception of liberation itself is different from that of the other schools of thought. Liberation here means immortality first in a perfect body (siddha-deha) and then in a divine body (divya-deha), and this is the Siddhi or the perfection after which the Siddhas aspired.

The final aim of the Nāth Siddhas is Jīvan-mukti or liberation while living, and this state of liberation is what is meant by immortality. While the other schools of thought regard the final dissolution of the body or its final dissociation from the spirit indispensable for liberation, the Siddhas seek liberation in a transformed or transmaterialised body, which is the perfect body. What is this perfect body or the divine body? It is an indestructible spiritual body, absolutely free from the principles of defilement or the principles of asuddha-māyā; but it is associated with principles of visuddha-māyā which prevents it from becoming absolutely static and acts as the absolutely purified dynamic principle for its further evolution through subtler stages to lead it to the final state of parā-mukti. The yogins in their perfect body are prompted by the principles of visuddha-māyā to benevolent activities rendering spiritual guidance to innumerable religious aspirants—and this state is the fittest state for becoming a Guru or spiritual preceptor. It is for this reason that the Siddhas are the true preceptors in the world. Further, due to the absolute dissociation of the asuddha-māyā these benevolent activities of the Siddhas cannot any more bind them down to the world of suffering.

1 kevalam rāja-yogāya haṭha-vidyopadiśyate || Haṭha-yoga-pradīpikā, (1-2).
This active state of the Siddha, which helps the religious aspirants on the one hand and evolves its final state of parā-mukti on the other, may very well be compared to the Bodhisattvahood of the Buddhists, where there is the principle of activity in the form of universal compassion, which uplifts the suffering beings on the one hand, and, on the other hand, makes the Bodhisattva march forward through the ten stages of Bodhisattva-bhūmi towards the final goal of Buddhahood.

In the Yoga-viṣṇa, a small yogic text, we find that the body is of two kinds, viz., unripe (apakva) and ripe (pakva). The unripe body is the body not disciplined by yoga, and the ripe body is the body disciplined by yoga. Through the fire of yoga the body becomes supra-material and above all sorrows and sufferings, while the unripe material body of ordinary people becomes the cause of all sorrow and sufferings. Such a yoga body (yoga-deha) is rare even to the gods; it is a body bereft of all limitations and bondage and at the same time possessing great powers; it is limitless like the sky but purer even than the sky. The great yogin with his perfect body moves in the world according to his own will,—and as this perfect body is produced through the burning away of his physical body through the fire of yoga there is no further death for him. Where an ordinary man lives (in his physical form) the yogin is dead,—and where there is the death for all (in the physical form) there is no death for the yogin. He has no duty of his own,—but at the same time is not defiled by any activity,—he is liberated while living—and is always living in his true body, which

Vasumati edition (in the collection of Śāstra-sataka).}
is bereft of all defilement. A deathless ripe body of this type is the first requisite for a Siddha; for such a ripe body helps the Siddhas in attaining the final state of Parā-mukti.

As pre-eminently a Śaivite school the aim of the Nāth cult was the attainment of Śivahood or the state of Maheśvara. Immortality is recognised to be the quintessence of the ultimate nature of the Lord; to attain the state of Parā-mukti in and through the state of Jīvan-mukti is, therefore, virtually the same as to attain the state of Maheśvara. It is for this reason that in common belief we find great Nāth Siddhas like Matsyendra and Gorakṣa often identified with Śiva or Maheśvara. It will not be correct to think therefore that the Nāth cult is essentially an atheistic school of alchemy. The real significance of the attainment of immortality is the attainment of the state of the Great Lord.

The legendary accounts, given in the Nāth literature of the life and activities of the Nāth Siddhas, including king Gopi-cānd’s mother Mayanāmati and king Gopi-cānd himself, will corroborate our statement on the final aim of the Nāth yogins and their general religious attitude. The myths, legends, traditions and stories have all behind them the quest of immortality,—an escape from the clutching jaws of decay and the cruel snatch of death. It is easily detectable in the stories of the Nāth literature that what differentiates the Siddhas from ordinary men is their power of control over death and decay. Yama, the king of death, had no hold over the Nāth Siddhas, and whenever he, in the course of the execution of his ordinary daily duties, forgot this important fact and transgressed the limit of his power and foolishly

Gorakṣa-bāṇī, Sabādi, 26.

Gorakṣa-bāṇī, pada 61.
extended his hands over any of the Siddhas, the poor Lord of Death was taught a very good lesson by the Siddhas. In the Gorakṣa-vijaya or the Mīna-cetana we find, when Gorakh heard from Kānu-pā of the captivity of his Guru Mīna-nāth in the land of Kadalī among the wicked women, he took up his mystic bag (siddha-jhuli), put on his loose garment and the pair of wooden sandals, held his staff in hand and at once entered the city of Yama. Yama was seated on his throne in the open assembly and at the sight of Gorakh he rose from his seat in reverence and humbly enquired about the cause of his (Gorakh’s) sudden visit to the city of the dead. Gorakh took Yama severely to task for summoning his Guru Mīna-nāth and thus poking his (Yama’s) nose in the affairs of the immortal Siddhas. Gorakh further remarked that if Yama would have the audacity of meddling with the affairs of the Siddhas he (Gorakh) would drag him (Yama) to Brahmā himself and let him (Yama) learn from Brahmā the exact limitations of his lordship. Gorakh rebuked Yama strongly in a high spirit, threatened him with an immediate order of dismissal and the ruin of his capital; and as a matter of fact when Gorakh stood up angrily with his hanging bag and loose garment of patched cloth and began to utter the Huṅkāra, Yama began to tremble with his whole kingdom. Yama got afraid, felt helpless and immediately lay before Gorakh all the files of official records; Gorakh examined them one by one, picked up the file containing the decree on his Guru,—effaced the name of his Guru from the list of the dead, upset the decree of Yama and then left the city leaving behind a strict warning.¹

The story of the fall of Mīna-nāth among the women of Kadalī signifies that worldly enjoyment in the form of the satisfaction of carnal desires leads a man to disease and decay; and death in that case becomes the inevitable catastrophe of the drama of life. The self-oblivion of Mīna-nāth symbolises man’s oblivion of his true immortal nature;—and the charms of Kadalī represents the snares of life. What was repeatedly emphasised by Gorakh in his enigmatic songs

¹ Gorakṣa-vijaya, pp. 45-48.
in the guise of the dancing girl to recall his self-forgotten Guru to true judgement, is that the life of pleasure in company of beautiful women leads to the inevitable end of death, while the only way of escaping death and being immortal even in this very life is to have recourse to the path of yoga.¹ This is the cardinal truth which Mīnā-nātha, inspite of all his former Sādhanā, lost sight of through the curse of goddess Durgā, the same curse symbolising the eternal curse of Nescience on humanity: and this is the cardinal truth which was variously explained through various imageries by the worthy disciple Gorakh to his Guru. In his songs as the dancing girl Gorakh repeatedly pointed out that the Guru was going to die a most ordinary death in the company of women; he (Gorakh) therefore urged him to have recourse to the yogic processes of making the body perfect, which has been spoken as Kāya-sādhanā² or the cultivation of the body through the processes of yoga. This Kāya-sādhanā is the most important thing in the Nāth literature and Kāya-siddhi or the perfection of body may be taken to be the sumnum bonum after which the yogins were aspiring.

It may also be pointed out that the original question of Durgā (who may be taken to be the Prakṛti or the embodiment of the principle of phenomenalism) to Śiva (who is the changeless truth in its ultimate form), with which the Gorakṣa-vijaya, or the Mīna-cetana begins, is,—"Why is it, my lord, that thou art immortal, and mortal am I? Advise

me the truth, O lord, so that I also may be immortal for ages."

It was in answer to this question of Durgā or Pārvatī that the secret of Haṭha-yoga was expounded by Śiva to his beloved consort, which the first Siddha Mīnānāth managed to hear in the form of a fish, and which was afterwards preached and popularised by the latter all over the world.

This quest of immortality and the secret of its attainment through yoga is the pivot round which the whole cycle of the stories of Māṅik-candra and his son Gopī-candra revolved. There we find, when Mayanāmatī came to know that due to the spells employed by the subjects of the king through the practice of some malevolent Tāntric rites king Māṅik-candra was about to fall a prey to Death, she hastened to the kingdom and asked the king to learn Mahājñāna (i.e., the secrets of yoga) from her, which, she repeatedly assured, would enable him to defy the decree of Death; but the king declined and as a result he met with the ordinary mortal end.

It has been said that the disregard of Mahājñāna was the plea for Yama for extending his hands on to the king. However, after the death of the king Yama sent one of his officers with summons to bring the life \( jīva \) of the king; Mayanā in her meditation saw the messenger of Yama near the king and offered him a pony in exchange of the life of the king. The next day two officers came, and Mayanā bribed them with the life of a maid-servant; on the fourth day came four, who were bribed with the life of Mayanā’s brother; on the fifth day again came five officers, and Mayanā offered them an amount of five hundred rupees in cash for buying sweet-meats and eating to their heart’s content. But this time Godā-yama, the messenger, would not be satisfied without the life of the king. At this Mayanā

flew into rage and began to tremble,—she at once muttered within the Mahā-mantra, transformed herself through her yogic power into Cāndī and again into Kāli with her large sword (khāḍā= Skt. khaḍga) and attacked the whole host of the Yamas, caught hold of some of them and belaboured them severely and the Yamas flew away somehow with their lives. Godā-yama (who seems to have been the leader of the party) was in a fix; helpless as he was, he, with his elder brother Āvāla-yama, went to Śiva. With the advice of Śiva the Yamas extracted from the king his life in the absence of Mayanā who was sent for water and they flew away in the form of golden black-bees. Mayanā could know of this from the river and at once pursued Godā-yama and entered the palace of Death. Through her spell all the inhabitants of the palace at once got attacked with severe headache, and some flew away in fear. By her Hūṅkāra Mayanā caught hold of Godā-yama, bound him down and began to beat him severely with an iron rod. Godā, however, begged most humbly Mayanā’s mercy and agreed to give her back the life of her husband, which, Godā said, was kept in the market place. Mayanā followed Godā, who somehow managed to slip from her hands and escaped. Godā went straight to the queen of Yama and sought her protection; she took pity on Godā and hid him in a corner covering him with straw; but Mayanā could know everything in her meditation and chased him there in the form of a serpent. Godā transformed himself into a mouse, Mayanā chased it in the form of lacs of cats; Godā became a pigeon,—Mayanā pursued it in the form of innumerable hawks. In this way Godā-yama tried to escape by transforming himself into innumerable beings in land, water and air,—but he did not succeed. Mayanā at last caught hold of Godā who was compelled to let loose the life of Mānik-candra. Lord Śiva and Gorakh, Mayanā’s Guru, however, interfered in the matter and the prestige of Death was somehow saved by coming to respectable terms with Mayanā. The whole story, in its full-fledged form, is nothing but a popular myth; but the spirit that is hidden behind and serves as the nucleus of the whole detail is that a perfect yogin conquers death completely,—and so much is his control
over death that he may deal with Death at any time in any way he pleases.¹

We may further note that Mayanā became Satī with her husband, but fire could not burn Mayanā. At the instance of his queens, Gopī-cānd put Mayanā to cruel and direful tests: She was thrown into fire, but even her garment was not stained with smoke; she was drowned in water bound within a bag, but mother Gaṅgā herself came forward to welcome her in her (Gaṅgā’s) lap; she walked on a bridge made of hair; she walked on the edge of a razor; she was shut up for full seven days and nights within a boiler containing boiling oil, which was being heated from below constantly; she crossed all the rivers in the boat made of the husk of a corn, but nothing could bring about her death, neither was any part of her body damaged in any way.² Mayanā herself declared to her son Gopī-cānd,—“By the practice of the mystic knowledge one becomes immortal, (and the course of life will retard towards immortality from its natural flow towards death and decay) just like the current of the tide-wave running backward. Through the boon granted by Gorakh-nāth I am deathless; I can remain in the void for full fourteen ages,—in water for full thirteen ages, in the fire for twelve years. When the creation will sink below and finally dissolve, and the earth will be not and there will remain only all-pervading water, the sun and the moon will set for ever and the whole universe will be destroyed,—I shall float on for ever,—I shall have no death.”³

Jālandhari-pā or Hādi-siddhā also gave ample proof of his

¹ The story of Mayanāmati’s initiation by Gorakh-nāth in her childhood shows that Gorakh was moved at the idea that even a chaste and beautiful girl like Mayanā should meet with the same fate as other ordinary mortals, and he then initiated her into the cult of yoga to make her immortal. After her initiation Gorakh declared,—‘Death himself has now given a written bond (not to extend his hands over Mayanā).’ He further declared that Mayanā would never be burnt in fire, drowned in water, pierced through by any weapon; if she should die in the day-time he (Gorakh) would not let the sun go, but would bind him down,—if she should die at home, he would not let Yama go, but bind him down,—if she should die of a cut from a flat sword (khāḍā=a large sacrificial knife), he would bind goddess Caṇḍi (who generally bears such a weapon) down,—Mayanā would survive even the sun and the moon. Gopī-candra Pāñcālī, (C.U. Part II), p. 345.

³ Govinda-candra Gīt (Mr. Śīl’s edition), pp. 70-71.
control over Death. In describing the extraordinary yogic power of Hāḍipā Mayanā says to Gopī-cānd that whenever Hāḍipā chances to catch hold of Yama or any of his officers he beats them severely for full eight hours, and there is no escape for Yama from the hands of the Hāḍi.1 When Gopī- cānd accepted Hāḍipā as his Guru, renounced the world and left the palace with his Guru, the king was unable to keep pace with the Guru in the path through the dense forest, created by the Huṁkāra of the Hāḍi and he was lagging behind. The police officers of Yama, so to speak, availed themselves of this opportunity and attacked Gopī- cānd and extracted his life from him2 and went to the city of Death. After sometimes Hāḍipā looked back and found the king dead. The yogin flew into fierce rage, ordered all the tigers of the forest to guard the corpse of the king and himself went straight to the city of the dead, inflicted severe punishment on all, beginning with the king to the lowest of the officers. The king of Death begged his (Hāḍipā’s) pardon and promptly ordered his officers to return the life of king Gopī-cānd.3 These popular legends are significant. Of course the imagination of the poets has often exaggerated the yogic powers of the Siddhas and put the yogic truths in extremely popular legendary form,—but the truth behind is the truth of immortality attainable through Haṭha-yoga.

A very important fact to notice in this connection is that the keynote of the story of Gopī-cānd’s great renunciation also is the quest of immortality. It was his own mother Mayanāmati, who compelled the king by hook or by crook to leave his loving wives, his boundless wealth and immense power and to take the vow of a Nāth yogin in his budding youth at the age of eighteen. Mayanā lamented that she had none else to call her a mother excepting Gopī-cānd,—yet

1 dauḍiyā byāḍāite jadi jamer lagya pāy || cilācāṅgi diyā jamaka tin pahar kilāy || māriyā dhariyā jama karunā sikhāy || hyāna sādhyā nāi jamer ṭalāiyā edāy ||

2 It may be remembered in this connection that in the ordinary course the king had only eighteen years’ longevity.

3 See Gopī-candar Gān, (C.U. Part I), pp. 202-207. In another place Hāḍi-siddha with the help of a Huṁkāra called upon the sovereign Yama with all his followers and officers to make a good road for him and Gopī-cānd; Yama readily obeyed the order and went out with all the necessary implements to construct a long road for them. Ibid., pp. 213-217.
she did insist on (his Gopi-când’s) becoming the disciple of Hāḍipā and taking the vow of a yogin; the unwillingness of the king and his conspiracy with the queens was of no avail. What was there in Mayanā that dominated over her ordinary motherly affection? It was the hope of immortality for her only son, who otherwise, in the course of his ordinary life of worldly enjoyment, would have died a premature death at the age of eighteen. She was not by nature a heartless witch,—it was for a higher gain that she acted heartlessly for the time being to compel her son to be a yogin.¹

The ideal of immortality in the Siddha-deha as propounded by the yogins of the Siddha-school exerted considerable influence also on the Orissa school of Vaiṣṇavism of the sixteenth century. Though the general conception of the final state as described by the exponents of this school was mainly in the line of the Bhagavad-gitā, the ideal of immortality in the Siddha-deha was there.² We find there instructions on yoga for making the body immutable.³ The yogic system involving the control over the sun and the moon⁴ was advised to be adopted for the perfection of the body.⁵

Here we should note that though there was a general similarity in the methods adopted by the Nāth yogins, the Buddhist Sahajiyās, the Vaiṣṇava Sahajiyās and the followers of the Nirguṇa-school of Hindi poetry mainly in the practices of Kāya-sādhana, yet there were fundamental differences in their aims and attitude. Thus, while the former schools held the realisation of the ultimate nature of the self as well as of the not-self, either in the form of perfect enlightenment, which is great bliss (as in the case of the Buddhists) or in the form of perfect love (as in the case of the Vaiṣṇavas) or as the ‘Incomprehensible Beloved’ (as in the Nirguṇa school of Northern and Western India), to be the final aim

of all Sādhanā, the Nāth yogins employed all the yogic practices for the attainment of immortality and Maheśvara-hood thereby. Of course, this final immortal state of the yogin has also been spoken of as the state of liberation or the state of the Sahaja, yet a difference in the general outlook as well as in the religious approach is on the whole perceptible. It is thus difference in outlook and approach and also the differences in practices, of which we shall speak later on, that necessitate the postulation of a line of demarcation between the different Sahajiya schools on the one hand and the school of the Nāth yogins on the other.

(iii) The Means

(A) Ulṭā-sādhanā or the Regressive Process

Coming to the question of the practical Sādhanā we find that the Nāth Siddhas called their Sādhanā Kāya-sādhanā (culture of the body) with a view to attaining Kāya-siddhi (perfection of the body). The process has frequently been styled in the vernaculars as the Ulṭā-sādhanā, or the regressive process¹ and the epithet is doubly significant. The yoga practices of the Nāth Siddhas is Ulṭā or regressive, firstly in the sense that it involves yogic processes which give a regressive or upward motion to the whole biological as well as psychological systems which in their ordinary nature possess a downward tendency; and secondly, in the sense that such yogic practices lead the Siddha to his original ultimate nature as the immortal Being in his perfect or divine body, back from the ordinary

creative process of becoming. We have had several occasions to dwell on the two aspects of the reality underlying the universal process as a whole; viz., Siva as the noumenal aspect, or pure consciousness and perfect rest and the Sakti as the phenomenal aspect of world-activity—the aspect of change and evolution. As most of the schools of yoga take the body to be the epitome of the universe, and the life-process, including its physical, biological and psychological aspects, to be a microcosm of the world-process, the life-process in the physical body is also believed to possess these two aspects, viz., the Siva aspect of perfect rest in the divine or the perfect body, and the Sakti aspect of activity in the physical body of continual change. Sakti in her ordinary course of phenomenal manifestation leads to change, death and decay—to the whirl of coming and going. The aim of the yogin is to stop this ordinary downward course of Sakti, downward in the sense of a phenomenal manifestation, and to give her, through physical and psychological, or rather physico-psychical efforts, an upward motion so that by a regressive process she may once more proceed backward to be united with Siva and be absorbed in the nature of Siva who is the Motionless Immortal Being. According to Tantric and Haṭha-yogic belief, we have already seen, the region of the body below the naval is the region of Sakti, while the region above the navel is the region of Siva; the former is called the domain of Pravṛtti or activity and change, while the latter is the domain of Niḥṛtti or rest. It is generally believed that Sakti, or the principle of change, resides coiled as a serpent in the nature of the world-force in the lowest nervous plexus situated just on the lowest extremity of the spinal chord, while Siva, the principle of rest, is situated in the Sahasrāra¹ or the lotus of thousand petals in the head. The Sahasrāra and the Mūlādhāra (the highest and the lowest plexuses) are the two poles within which evolves the whole creative process. Yoga consists in the raising of the Sakti from the lowest region of change and activity to the highest

¹ In many of the Tantras and texts on yoga Ājñā-cakra or the plexus or lotus just below the Sahasrāra is described as the abode of Siva, Sahasrāra being the plexus where there is the realisation of the perfect union of Siva and Sakti.
region of rest so as to be united with and absorbed in Śiva. This union of Śiva and Śakti symbolises in the wider sense the stoppage of the ordinary process of becoming and the retrogression of the whole world-process for the attainment of the changeless state of the Immortal Being. How is this retrogression to be effected? By a perfect control over the physical, biological and psychological process and by setting a regressive motion in them through slow and gradual processes of yoga;—this is what is meant by the Ulṭā-sādhana. Because of this Ulṭā nature of the Sādhana, the language of the songs in which the secret of the Sādhana is couched is also generally of a Ulṭā nature, or extremely paradoxical and enigmatic.¹ The process has also been explained under the imagery of proceeding against the current (ujānasādhana).²

All spiritual or religious endeavours are processes of Ulṭā-sādhana in a general sense inasmuch as they give a higher or upward tendency to our lower being. It has been said in a popular Buddhist verse that when an intense thirst is felt within for something higher, the mind becomes no more perturbed by desires, and at that state one is said to be in an upward current.³ We have referred before to the word parāvṛtti found in Mahāyānic texts. In the Mahāyāna-sūtra-laṅkārā we hear of the parāvṛtti of the five senses, of the mind, of the sex-act, etc.⁴ It seems to us that the real significance of the word parāvṛtti is just the same as the Ulṭā-sādhana. It is the process of introversion, a reversal of the world of pravṛtti to the state of nivṛtti. We have seen also that the Paṇca-śākhā school of Orissa Vaiṣṇavism was influenced to a considerable extent by the ideal of Kāya-sādhana of the Siddha school; these Vaiṣṇavas also have often spoken of

the Uḷṭā process or the Ujāna process in their yogic Sādhana.¹ We have further seen that the Sūfis and the Bauls of Bengal were Sādhakas of this Uḷṭā-sādhana.² A very nice exposition of this Uḷṭā-sādhana is found in the Jñānasāgara of Āli-rājā. There it is said that the process of divine love is a reverse process,—and he who does not know the secret of this reverse process cannot have eternal life. Here the forward becomes the backward and the backward becomes the forward and the world is related to the reality in this inverted law.³ The way towards perfection has been kept hidden by the Lord and only the unreal path (asāra panṭhā) is kept open before all creatures; it is for this reason that man, after his birth in this world, naturally has recourse to the unreal path and remains absorbed in transitory enjoyment. The reason why the path towards perfection is thus concealed by the Lord from the eyes of ordinary creatures is that the possibility of easy access would have made it cheap; the Lord has enhanced the value and the glory of the path by keeping it secret and extremely difficult of access.⁴ All these seem to be an echo of the well-known Upaniṣadic saying that by giving the senses an outward

tendency and turning them away from the inward truth the self-created one (Brahmā) gave proof of his jealousy, as it were; it is because of this fact that man generally sees what is external, and not that which is within; but wise people there are, who, in quest of life eternal, have inverted their visual power and realised the self in and through a reverse process.¹

The process of arrest or control of various sorts, which is the most important function of yoga, is personified in the Bengali texts as ‘Khemā’ (from Skt. Kṣema—safety, security, tranquillity),² who has been spoken of as the best guard to be placed in the different centres of the body so that the wealth within may not be stolen away by Kāla (death, decay, change).³ Khemā has sometimes been depicted as a very smart policeman, who arrests all the evil tendencies, pierces the undisciplined and unsteady elephant of mind with the hook (aṅkuśa);⁴ it is for this reason that Gorakh-nāṭh in the form of the dancing girl instructed the captive Guru Mīna-nāṭh (who was at that time made the king of the country of Kadali) to give his royal sceptre to Khemā and to serve him most obediently, and Gorakh

assured him that he (Khemāi) would be the best man to rule the country (of this body).\footnote{Cf. \textit{pāṭe rājā ḍaḍa kari khemāir sāne mili} \\ \textit{kāmer galāte day lohā jīnjali} || \\ \textit{sakala chādiyā guru khemāire kara rājā} \\ \textit{bhakṣiyā garala candra kāyā kara tajā} || \textit{Ibid.}, p. 152. \\ \textit{Also Ibid.}, p. 159.}

The purification of and the control over the muscles, sinews, nerves, ducts and the nerve-centres through the processes of Āsana (posture), Dhauti (washing), Bandha (different kinds of arrest), Mudrā, Prāṇāyāma and other process of Ḥaṭha-yoga are generally prescribed to be directed towards the final aim of the transformation and transubstantiation of the body. Closely associated with the question of transubstantiation of the body is the question of attaining full control over the mind. An echo of the general Indian trend of idealism is also found here and there in the stories of the Nath literature.\footnote{\textit{biṣam sikal bānde manake nā deya ḍhai} \\ \textit{manake bāndhile bāṭhā taler lāgāl pāī} || \\ \textit{ei saṁsār mājhe man dākāt baḍa} \\ \textit{bīpad pāṭhāre man dāgā dive baḍa} || \\ \textit{man rājā ḍrajā man māyā phanda} \\ \textit{man bāndha tan cinta śuna gopi-candra} || etc. \\ \textit{Gopi-candrer Sannyāś (C.U., Part II) p. 435.}} We have seen that the control of the mind is the yoga \textit{par excellence}, and it is held that the vital wind is the vehicle of this mind, and the control of the vital wind through the processes of Prāṇāyāma leads to the control of the mind. With the arrest of the vital wind the mind becomes arrested, and it is for this reason that the arrest of the vāyu (\textit{i.e.}, the vital wind) has been held very important in the Nath literature as in the literature of other religious schools containing discourses on yoga.

Kāya-sādhana of the Nath Siddhas implies, on the whole, a slow and gradual process of continual purification, rejuvenation and transubstantiation of the body through various yogic processes. It has been said that through the fire of yoga (\textit{i.e.}, the purifying processes of yoga) the ordinary body of change and decay is burnt away and from the process of purification and rejuvenation results a new immutable divine body as a transformation of the old. Without entering into the details of this Kāya-sādhana, let us discuss-
here at some length a particular form of yoga that was most emphasised in Kāya-sādhana.

(B) Kāya-sādhana

(a) The Theory of the Sun and the Moon

To understand fully the secrets of Kāya-sādhana we should first of all understand the theory of the sun and the moon as postulated in yoga.

The sun and the moon are very frequently to be met with in the Tāntric and yogic texts and it is held that yoga consists in the unification of the sun and the moon. The sun and the moon refer generally to the two important nerves in the right and the left and their union generally refers to the union of the two currents of the vital wind, Prāṇa and Apāna or inhalation and exhalation. But the sun and the moon have got a deeper meaning still. In the Siddhāsiddhānta-paddhati (ascribed to Gorakh) we find that the physical body emerges from the collocation of five factors, viz., Karma (activity), Kāma (desire), Candra (the moon), Sūrya (the sun) and Agni (fire). Of these the first two are rather the conditions of the visible body (piṇḍa), while the other three— are the primary elements of which the body is made. Of these three again the sun and fire are generally held to be the same. Then the primary elements out of which the visible body is made are reduced to two, viz., the sun and the moon. The moon represents the elements of Rasa or Soma, (i.e., the quintessence in the form of the juice) and the sun is the element of fire, and, therefore, the body is called the product of Agni and Soma. Rasa as Soma is the food (upabhoga) while fire as the consumer is the eater (bhokta), and through the well-proportioned combination

1 The word Haṭha-yoga really signifies the union of the ha, i.e., the sun and the tha, i.e., the moon.

Vide, Haṭha-yoga-pradīpikā.

2 karma kāmaḥ candraḥ sūryō’ gnir iti pratyakṣa-karaṇa-paśιcakam (1.62).

Gitā, (15.13-14).
of the consumer and the consumed the whole creation is sustained. The sun and the moon as Agni and Soma respectively are manifested in the physical world as the seed of the father and the ovum of the mother, through the combination of which proceeds the visible body,\(^1\) and thus Agni and Soma are the two primordial elements of which the whole creation is made. The moon, in addition to the one digit (kalā), which is the digit of nectar, and which it possesses by virtue of its own nature, possesses sixteen other kalās which are explained here as the sixteen modes in which the moon functions.\(^2\) The sun, again, in addition to its own digit of self-luminosity, possesses twelve other digits, which are the modes in which the element of the sun functions.\(^3\) This theory of the sun and the moon with its cosmological significance is found explained in the second Brāhmaṇa of the Bhāj-jābālo-paniṣat.

In the yogic texts in general the moon and the sun represent the two elements underlying physical existence,—viz., the element of creation and preservation and the element of change and destruction.\(^4\) The moon as the principle of non-change and immortality resides in the region of Śiva and the sun as the principle of change and destruction resides in the region of Śakti. The moon and the sun are thus associated with Śiva and Śakti. The moon is the depository of

dhānsa-paddhati (1.66).

\(^4\) In some places, however, the sun is not identified with the destructive fire,—it is described as situated in the middle as the middle principle.

śūrdhva tu saṁsārāṇaḥ śṛṣṭiḥ paramnanda-dāyīyā śṛṣṭiḥ varṣantī bāndhape paramā kalā
dhānsa-paddhati (3.67) by Jayaratha.
Amṛta or ambrosia which gives immortality, while the sun is the fire of destruction (kālāgni). The moon is situated just below the Sahasrāra or the lotus of thousand petals in the cerebrum region,—it is facing downwards; and the sun is situated in the region of the navel or in the lowest plexus (Mūlādhāra) facing upwards. It is held that bindu which is the quintessence of the body is of two kinds, viz., the yellowish white bindu (pāṇḍura-bindu) and the red bindu (lohit-bindu),—the former is of the nature of semen (śukra), while the latter is of the nature of ovum (mahā-rajas); the bindu (i.e. the white bindu or semen) is contained in the moon in the upper region, while the ovum is contained in the sun in the navel; this bindu is Śiva and that is the moon,—and the rajas is Śakti, which is the sun. Thus it seems that the conception of the moon and the sun has been associated with that of Śiva and Śakti, and metaphysically the moon and the sun represent the nature of Śiva and Śakti, respectively. The sun, we have seen, is called Kālāgni or the fire of destruction, and it is also called Rudra (i.e. the Dire One) as opposed to Śiva (the All-good One). In the Kaulajñāna-nirñaya this Kālāgni as Rudra is associated with Śakti and is said to be seated in the lower region (Mūlādhāra) within the mouth of the Vādavā. It is held that there are seven lower regions called pātāla and seven upper regions called heaven. Creation lasts as long as the Kālāgni remains in the lower region, but when it burns upwards, dissolution

starts.¹ In the Buddhist Tantras and the Buddhist Sahajiyā songs these principles of the sun and the moon have been conceived as the fire-force in the Nirmāṇa-kāya (i.e. the plexus of ‘the body of transformation’) and as the Bodhicitta in the Uṣṇīṣa-kamala respectively. The fire-force in the Nirmāṇa-kāya (situated, according to the Buddhists, in the navel region) is described as the goddess Caṇḍāli. This point has been discussed before in detail.²

The Śādhana of the Haṭha-yogins consists, on the whole, in the act of combining the sun with the moon after getting complete mastery over them. In describing the yogic power of Hāḍī-siddhā Mayanāmatī frequently refers to the fact that Hāḍī-siddhā has made the sun and the moon his ear-rings.³

Though the statement is found in our literature only to describe the mythical power of Hāḍī-siddhā, with whom everything impossible became possible, there is a deeper yogic significance behind. These principles of the sun and the moon have been referred to in the Gorakṣa-vijaya under various imageries.⁴

This act of combining the sun with the moon or the perfect control over them then implies many things in practical yoga. It implies, firstly, the retrogressive process of turning the cosmic manifestation back to its original form of rest, and this is effected by the yogins by rousing Śakti and uniting her with Śiva in the Sahasrāra. The combination of the sun and the moon implies secondly the yogic practice in which the male and the female unite and the combined substance of the seed and the ovum is sucked within by the yogin or the yogini, as the case may be,

through some secret yogic processes. Again the practice of purifying and controlling the nerves like Iḍā and Piṅgalā by controlling Prāṇa and Apāna through processes of Prāṇāyāma is what is meant by combining the sun and the moon. The three important nerves Iḍā, Piṅgalā and Sūṣumnā in the left, right and the middle are frequently described in the yogic texts as of the nature of the moon, the sun, and fire (Soma or Candra, Sūrya and Agni), respectively. In the Nāth cult, however, the commingling of the sun and the moon has the deeper significance of transforming the material body of change to an immutable body of perfection. How can that be effected? It can be effected by a perfect control over the destructive force of the sun and then rejuvenating the whole body with the nectar oozing from the moon. We have seen that the sun represents the principle of destruction and the moon that of creation. The yogin tries to avoid both the extremes and have recourse to a principle of eternal conservation, which can be effected only by the perfect commingling of the principle of destruction and creation. This is what is meant by the real commingling of the sun and the moon.¹

It is held in practical yoga that the quintessence of the visible body is distilled in the form of Soma or nectar (amṛta) and is reposited in the moon in the Sahāsāra. There is a curved duct from the moon below the Sahāsāra up to the hollow in the palatal region; it is well-known in yoga physiology as the Śāṅkhini. This is the baṅka nāla (i.e. the curved duct) frequently mentioned in the vernaculars through which the mahā-rasa (i.e. Soma-rasa) passes. This curved duct

¹ Cf. Vajroli-mudrā.
² baṅkā nāle sādha guru nā kariyā helā || Gorakṣa-vijaya, p. 147.
Kabir in his songs frequently speaks of this baṅka-nāla. The Orissa Vaiṣṇavas also speak of it in connection with their Sādhana.

duct Śaṅkhini is described in the Gorakṣa-vijaya as the serpent with mouths at both ends. The mouth of this Śaṅkhini, through which the Soma or the Amṛta pours down from the moon is called the Daśama-dvāra or the tenth door of the body as distinguished from the other nine ordinary doors. This tenth door is the most important in yoga and is frequently referred to in old and medieval Bengali literature and it is frequently mentioned also in the Hindi texts on yoga. Through this tenth door nectar trickles down from the moon, ordinary people knows nothing of its secret. In the ordinary course the nectar, trickling down from the moon through this tenth door, falls in the fire of the sun and is eaten up or dried up by the sun. The quintessence of the body in the form of Soma or Amṛta being thus dried

The body falls a victim to the fire of destruction (Kālāgni),—this is how in the natural course of things death becomes the inevitable catastrophe of life. This ordinary course of the flow of nectar must be checked and regulated and this is the only way of deceiving Kāla (Time) and becoming immortal. The tenth door must be shut up or well guarded,—and this has figuratively been hinted in the vernaculars by the phrase ‘locking up the tenth door’ or ‘placing sentinels’ there. If this door remains open the Mahā-rama, which is the best wealth of man, will be stolen away by the Sun or Death. On the other hand, if this Mahā-rama can be saved from the sun and if the yogin can himself drink this nectar, the yogin will undoubtedly become immortal.

How to save this Amṛta from the sun? Various are the yogic processes described in Haṭha-yogic and Tāntric texts.

Of all the processes the process known as Khecari-mudrā has been held to be the most important. It is the process of turning the tongue backwards into the hollow above so as to reach the mouth of the Rāja-danta or of the Śāṅkhini (which is the tenth door) and of fixing the sight between the eyebrows. The tongue thus extended backwards shuts up the tenth door and the nectar, thus saved, is drunk by the yogin himself. This Khecari-mudrā has been praised eloquently in all the yogic texts as the best and the surest way of becoming immortal. It is held that this yogic process has the capacity of controlling all kinds of secretion, and if a yogin practises Khecari his bindu (seed) will remain undisturbed even if he is closely embraced by a woman. This process of drinking the nectar by the practice of the Mudrās and the Bandhas is the way to eternal life. In some of the texts this secretion of nectar from the moon is associated with the rousing of Kuṇḍalini Śakti and it is held that the rousing of Śakti in the Sahāsra-ra is instrumental to the trickling down of the nectar,—and sometimes Śakti herself is depicted as the drinker of the nectar. This liquid, trickling from the moon, is also called the wine of the immortals (amara-vārunī), and as the gods have become immortal by drinking Amṛta or the ambrosial wine, so the yogins become immortal by drinking this wine trickling from the moon. Drinking of wine and eating of meat, which are indispensable to a Tāntric Śādhaka, are explained by the

---

These verses are repeated in many other similar texts.

2 See Gorakh-bāṇī, Pada 28.
Nāth yogins as the drinking of the nectar from the moon and turning the tongue backwards in the hollow above.¹

We have seen that the moon has sixteen digits. The secretion of the Soma-rasa in the Kālāgni (the solar fire of destruction) is sometimes figuratively called the eating up of the digits of the moon by the Rāhu,² the passage from the moon to the Kālāgni being conceived as the Rāhu. The idea of the disappearance of the digits of the moon one by one and the reappearance of the digits in order has given rise to the theory of the Tithis (i.e. the lunar day, or the thirtieth part of a whole lunation), including the Pūrṇimā (full-moon) and the Amāvasyā (i.e., the night of the newmoon),—the processes of disappearance and reappearance of the digits being represented as the black and the white fortnight.³

The conservation and the yogic regulation of the Mahā-rasa are at the centre of the yogic Sādhana of the Nāth Siddhas. The Nāth Siddhas (as well as the Buddhist Siddhācāryas) admitted six parts of yoga, viz., Āsana, Prāṇāyāma, Pratyāhāra, Dhyāna and Samādhi,⁴ excluding the two parts, viz., Yama, i.e., restraint and Niyama or discipline of the Pātañjala system. It will be observed that in the Pātañjala system Yama, Niyama and Āsana

⁴ āsanaṁ prāṇa-saṁriddhaḥ pratyāhārā ca dhāraṇāḥ
 dhīyaṁāṁ samādhiḥ etāṁ yogāṅgān vaddantī saḥ ||
Cf. Maitreyāyaṇya Upaniṣāt (Cowell’s edition. Ch. VI. p. 129), where the six Aṅgas are described as Pratyāhāra, Dhyāna, Prāṇāyāma, Dhāraṇā, Tarka and Samādhi.
are physical and moral discipline for the control of the mind, Prāṇāyāma a vital process for the arrest of the mind, and Pratyāhāra, Dhāranā, Dhyāna, etc. are purely psychological processes for the final concentration and arrest of the mind; all these processes are associated in the Nāth cult with the process of retaining the Mahā-rasa and the yogic regulation of its secretion for the transsubstantiation of the body and thus attaining a life eternal.  

(b) The Sun and the Moon as Woman and Man

There is, however, another aspect of the theory of the sun and the moon. We have seen that the sun is the Rajas and the moon is the Bindu,² the sun is associated with Śakti and the moon with Śiva—and the moon must be saved from the destructive sun. In the grosser aspect, man must save himself from the clutches of woman, who has been always depicted in the Nāth literature as the tigress. Charmed and allured by her, man loses vital energy. She has generally been spoken of as the enchantress of the day and the tigress of the night. The Nāth Siddhas were strict celibates, and it appears from the Nāth literature in all the vernaculars that women are regarded as the greatest danger in the path of yoga and they are given no status higher than that of ferocious tigresses always bent on sucking the blood of the prey. The fall of Mīna-nāth in the company of the women of Kadali or the queen of Ceylon and his rescue by Gorakh-nāth seem to be a popular poetical version of the general attitude of the Nāths towards women in general. In his enigmatic counsels to the Guru Gorakh-nāth said,—"The breath of women dries up the body and youth vanishes day by day. Foolish are the people who understand nothing and make pets of tigresses in every house; in the day the tigress becomes the world-enchantress and at night she dries up the whole body. The milk is stolen and the tigress boils it, and the cat

(death?) is sitting by; the essence of milk is thrown down on the ground and only the vacant vessel remains in the sky."

Similar verses ascribed to Gorakh-nāth are also found in Hindi. If we follow the words of reproof that Gorakhnāth levelled against his fallen Guru, we shall be convinced of the uncompromisingly adverse attitude of the Nathś against women, who are generally termed as thieves, dacoits, pirates, thirsty tigresses and hypocrite cats. In one place Gorakh says,—"You have handed over your store to the gang of dacoits, you have employed the mouse as guard for the pepper plant and the cat for thickly boiled milk; you have kept logs of wood to the custody of the carpenter, the cow to the tiger, wealth to plunderers, the frog to the serpent, bulbous root to the boar and arum to the porcupine; you have kept the mouse as the guard of the granary, kept plantains before the crow, offered fish to the rustic rogue, dry fuel to fire. You have lost whatever merchandise you had at your disposal, exhausted your store and created sensation in the vicinity; you are living with your neighbours who are thieves and frauds."

Enigmatic statements of this nature casting serious reflection on the nature of women abound in the Gorakṣa-vijaya, or the Mina-cetana and also

in the songs of Gopī-cānd. Similar words, phrases and imageries were freely used also by Mayanāmatī, who was bent on saving her only son from the clutches of his youthful wives.¹ We need not multiply illustrations. It will be clear from the above that in a grosser sense Māha-rasa means the seed, and the Sādhanā consists in saving the same from any kind of discharge, and it has been emphatically declared in all texts of yoga that he, who has been able to give an upward flow to the fluid, is a god, and not a man.

This attitude towards women, as found in the Nāth cult, seems to have influenced the tone of the poets of the Nirguṇa School (as the school is styled and defined by Dr. Barthwal) of Hindi poetry headed by Kabir. Kabir and his followers, just like the Nāthas, spoke of women in no better terms than as ferocious tigresses always seeking opportunity to prey upon men and to suck their vitality.²

(C) Points of Similarity and Difference in the Practical Aspect of Yoga between the Nāth Cult and other Esoteric Schools

It is important to note in this connection that in the practical aspect of yoga the system of Kabir, as also that of a

¹ In one place Mayanā says to Gopī-cānd:—All men serve women gratis; the Māha-rasa within the body is worth thousands of chests filled with gem; and when that wealth is lost man becomes subdued by a woman. A lioness is she and casts her eyes like the tigress; she leaves aside the bones and the flesh and sucks up the Māha-rasa. Woman deals in the wealth of man, and the allured man goes on serving her gratis. With his plough and bulls man cultivates the field of others,—there is the loss of the bulls and of the seed in the bargain. Though steel is used in the plough it decays in earth. If the bat eats up the soft stem of the plantain-tree the fruits cannot grow,—if the newly grown bamboo is pierced through by insects, how can it stand any weight? Gopī-candrer Sannyās (C.U. part II), p. 438. Cf. also Gopī-candrer Gān, pp. 71, et seq.

   pālṭudās kahe ek upāy hat baṭha saha-sangamā nitya jāge

host of other medieval Hindi poets, was essentially the same as that of the Nāth yogins described above. Of course, there is a remarkable difference in the religious attitude, but in spite of all differences in views and the religious approach, the yogic process seems to have been substantially the same. In his religious approach Kabir, with other poets of his school, is known to us more as representing a devotional school of mysticism, characterised by a spirit of heterodoxy, than as a school professing faith in yogic practice; but the fact remains that the poems of Kabir and the works of many other poets of this school speak of a system of yogic practice behind their devotional fervour. In his work *Nirgpla school of Hindi poetry* Dr. P. D. Barthwal has given an exposition of the yogic practices referred to in the works of this school of poets, and a perusal of the book will convince one of the inherent similarity in yogic practice of this school with that of its predecessors, *viz.*, the Nāth Siddhas. The theory of the sun and the moon and the question of the secretion of nectar referred to above play the most important part in these medieval schools. It is perhaps because of this similarity in yogic Sādhanā and the similarity of the general tone of extreme repulsion against women as a class, that the Kabir-panth has traditionally been affiliated with the Gorakhpanth and Kabir has been believed to have had met Gorakhnāth and have had religious discourses with him.

An important point to note is the difference in the religious approach as well as in method among the Nāth Siddhas on the one hand and the Buddhist Sahajiyās on the other. We have said before that though both the sects were cognate Haṭha-yogic sects there is a sharp difference in the professed final aim as well as in practices of yoga. The final aim of the Nāths, we have seen, is the attainment of immortality; while the final goal of the Buddhist Sahajiyās is the attainment of Māhā-sukha. The Nāth Siddhas believed in the reality of birth and death and tried to avoid the whirl by transubstantiating the material body of change to subtle ethereal body and that again finally to a perfect divine body; but the Buddhist Sahajiyās inherited from the

---

1 See *Infra*, the Appendix (A).
earlier schools of Buddhism the spirit of extreme idealism and tried to avoid the whirl of birth and death by realising the void-nature of the self and of all the Dharmas, and they further contended that the void-nature of the self and the not-self can be realised only through the realisation Mahā-sukha. The emphasis of the Nāths is on the yogic process of transubstantiating this corporeal body of death and decay,—and the emphasis of the Buddhist Sahajiyās is on the sexo-yogic practice, which transforms the ordinary sex-pleasure to a higher and deeper emotion of bliss. Of course, the Kāya-sādhana of the Nāthists is also there in the practices of the Buddhists,¹ and we also find occasional references in the Dohās and the Caryā songs to the flow of nectar and the process of drinking it by the yogin with the purpose of making the Skandha (the elements, the aggregate of which constitutes the physical body) firm and stable and becoming ajara and amara (diseaseless and deathless); we find occasional references to the drinking of the nectar or the honey of the lotus in the head by the black-bee of the mind, and also to the pouring down of water from the moon of Bodhicitta, full in its sixteen digits, into the fire below. Though in some cases these expressions and imageries may be explained figuratively, yet it appears that the practice of the Buddhists for the realisation of the Mahā-sukha was intimately connected with the Kāya-sādhana of the Nāths.² The conception of the Vārunī or the ambrosial liquor is also found in the Caryā-padas,³ and this Vārunī may more satisfactorily be explained in the sense of the ambrosial liquor of the Nāth yogins than figuratively as the flow of Mahā-sukha or grossly as the flow of the Bodhicitta as semen virile. What we want to emphasise is that while one school had recourse to the Sādhanā from a particular

¹ Supra, p. 108.
² For a detailed study of the similarity between the Sādhanā of the Nāth Siddhas and that of the Buddhist Siddhācāryas the reader may consult the book Siddha-sūhitya by Dr. Dharmavir Bharati, Allahabad, 1955 (in Hindi).
³ Cf. eka stri bhujate doāhyām āgata kanna-manḍalāt
ṛṣīyo yāh punās tābhyaṁ sa bhaved ajārāmarāḥ ||
outlook the other approached the yogic practices from a different point of view and while the emphasis of the one is on some particular aspect of the Sādhanā, the emphasis of the other was on another.

It is because of these differences that while the Nāth Siddhas were vehemently opposed to the association of women in any way with their Sādhanā and described them as the greatest impediment in their march towards immortality, the Buddhist Sahajiyās eulogised women in all possible glowing terms as the incarnation of Prajñā, or Śūnyatā herself, and her company was regarded as indispensable for the attainment of perfection in spiritual life. Of course we have seen before¹ that the Prajñā or the Yogini or the Mudrā spoken of by the Buddhist Sahajiyās is not always the corporeal women; she is the Nairātmā or Śūnyatā or the Sahaja-damsel. But it will be equally a great mistake to try to interpret the Mudrā always in this idealised sense and thus to explain away the necessity of the compny of women in the Sahaja-sādhanā.

We have noted before that the Mahā-sukha of the Buddhist Sahajiyās was not a purely physiological sensation,—there was a psychological element involved in it.² This psychological aspect in the Sādhanā (associated with the sex-emotion and sex-pleasure) is conspicuous by its absence in the Nāth school. The Vaiṣṇava Sahajiyā cult, we have seen, was based primarily on the divinisation of the sex-emotion by both physiological and psychological discipline. The Mahā-sukha as the Sahaja-nature of the self and the not-self was transformed into the emotion of supreme love in the Vaiṣṇava school. Neither Mahā-sukha nor supreme love of the purest and the most intense nature is attainable without the help of the chosen woman and it is for this reason that the Buddhists always spoke of her as the incarnation of Prajñā and the Vaiṣṇavas of Mahābhāva (i.e., the supreme emotion of love as personified by Rādhā), —and this attitude of the Sahajiyās, both Buddhist and Vaiṣṇava, will present a sharp contrast to that of the Nāth Siddhas in general. The important point, however, to be

¹ Supra, pp. 99 et seq.
² Supra, Ch. V.
noted in this connection is that in spite of this general attitude of aversion towards women, the Nāth Siddhas also practised some well-known processes of yoga like Vajrauli, Amarauli, Sahajauli, etc. in the company of women. But these practices are yogic practices, pure and simple, in which women are neither philosophised upon, nor idealised.

(iv) The Vedic Soma-sacrifice and the Drinking of Nectar in the Yasic Schools

The most important part of the Śādhana of the Nāth Siddhas, viz., the drinking of the nectar called Soma, oozing from the moon, can very well be associated with the Vedic rite of Soma-sacrifice, in which the Soma-juice was drunk and also offered to the gods and it was believed that the Soma-juice rejuvenates and enlivens the body and gives the drinker, whether god or man, eternal life in heaven or earth. This Soma-juice was prepared from a particular climbing plant (well known as the Soma-plant, Sacrostema Viminalis or Asclepias Acida), which was said to grow luxuriantly on the mountains of India and Persia, and it is very frequently referred to in connection with sacrifice in the Vedic literature as well as in the Avesta. The relation between the Soma-plant and the moon was held very mysterious. The plant itself was often called ‘the moon-plant’ and it was believed that the plant received its exhilarating and enervating juice directly from the moon. As a matter of fact the moon is generally believed to be mysteriously related to all the medicinal herbs and it is held that the juice of the herbs, that possesses capacity of curing diseases and conferring longevity, comes from the moon. In the Viṣṇu-purāṇa (1.22) Brahmā is said to have appointed Soma or the moon to be the monarch of planets, of plants, of sacrifices, and penances, and one of the names of the moon is Oṣadhi-pati or Oṣadhiśa, i.e., ‘the lord of herbs.’

So intimate is the relation between the plant Soma and the moon that in Vedic as well as post-Vedic literature the moon-

---

2 Dictionary of Monier Williams, p. 1137.
herself is called *Soma*. The *Soma*-plant was believed to possess sixteen leaves corresponding to the sixteen digits of the moon,\(^1\) the leaves disappear one by one with the digits of the moon in the black fortnight and again reappear with the reappearance of the digits of the moon in the white fortnight. The mythical legend goes in the Purāṇas that “at the churning of the ocean after all sorts of medicinal plants and healing herbs are thrown in, three of the precious things said to be produced are *Soma* ‘the moon,’ *Amṛta* ‘nectar,’ and *Surā* ‘spirituous liquor,’ and in the other legends this nectar is said to be preserved in the body of the moon.\(^2\) It will be easy from the above to detect the striking similarity of the conception of the moon and *Amṛta* or *Soma* of the yogins with those of the Vedic and post-Vedic traditions,—and it will also be easy to see how the Vedic religious function of sacrifice was transformed into a yogic practice, in both the cases there being the question of drinking *Soma* to gain eternal life.

\((v)\) *The Rasāyana School and the Nāth Cult*

We have said before in connection with the history of the Nāth cult that in ideology as well as in methodology the yoga-system of the Nāth Siddhas is strikingly similar to that of the Rasāyana school. The Sādhanā of the Nāth Siddhas is essentially a Sādhanā of *transubstantiation and transfiguration*. We have already referred to the popular traditions prevalent among the people of the Nāth sect even to-day that the Siddhas like Matsyendra-nāth, Gorakhnāth and others are still living in their subtle super-material body in the hilly regions of the Himalayas. These popular beliefs of a mythological nature have their root in the theological speculations of the sect. It has been said in the *Toga-vīja* that the perfect body of the yogin is subtler than the subtlest, yet grosser than the grossest; the yogin can transform his body according to his will—and his form is above all disease and death. He plays in the three worlds

\(^1\) We may note here that in the yogic texts *Amṛta* is often thought of trickling down from the lotus of sixteen petals (*śoḍaśa-pātra-padma-gālitam*, Gorakṣa-*paddhati*, p. 76, verse 57), which corresponds to the moon with the sixteen digits.

\(^2\) Monier Williams, p. 1137.
sportively wherever he likes, and can assume any and
every form through his incomprehensible power.¹ The same
belief is to be found also in the Rasāyana school.² The
Rasāyana school is fundamentally based on the ideal of
Jīvan-mukti and the method advocated is that of transub-
stantiation with the help of Rasa or chemical element
(generally mercury) and thus making the body immutable.³
This Rasāyana, though primarily a school of chemical
science, was associated with theological speculations, and
renowned personalities like Nāgārjuna (the alchemist),
Vyādi, Vyajapyāyana and others are recognised to have been
the stalwarts of the school. It is believed that many are the
gods, demons, sages and men, who have attained the
immutable divine body with the help of Rasa and have thus
become Jīvan-mukta.⁴ The theological aim of the school
can be postulated from the first chapter of the Rasārnava
where Bhairava (lord Śiva) explains the principles of
Rasāyana to the goddess, and these principles, he says, are
the best and the surest way to attaining perfection. The
question of the goddess is, how to attain Jīvan-mukti. The
Lord replies that the secret of Jīvan-mukti is rarely known
even to the gods. The conception of post-mortem liberation
is totally worthless; for in that case all creatures are entitled

to it by virtue of their mortal nature. Again post-mortem liberation, spoken of in the six systems of philosophy, is a mere inferential speculation inasmuch as no positive proof of such liberation is available at all. On the other hand the state of Jīvan-mukti by making the body immutable is as positive as anything. To be something knowable, liberation must have a ‘knower’; the demise of the knower excludes the possibility of the knowable, and hence the conception of post-mortem liberation is as fictitious as anything. For mukti worth the name, the Piṇḍa (the body, must be preserved and perfected and liberation is thus attainable only through the perfection and preservation of the body by the application of Rasa (which, according to the school of Rasāyana, is mercury), also by the control of the vital wind. The Rasa or Pārada is believed to be vested with the mysterious capacity of transforming a base metal into gold and thus by constant rejuvenation and enivoration through a process of transubstantiation the Rasa can make every creature immortal. It has been said that Rasa is called Pārada because it leads one to the other

shore of the world.¹ It is the quintessence of lord Śiva.² The Rasa is again said to be the seed of Hara (i.e., Śiva) and Abhra (mica) is the ovum of Gaurī; the substance that is produced through the combination of the two elements makes creatures immortal.³ This state of immortality attainable through the application of Rasa has frequently been spoken of also in the standard works on Indian medical sciences as the state of Jīvan-mukti, which has been eulogised as the only state of real perfection. We have hinted that the Rasa of Rasāyana, variously described as the most powerful element and called the Bindu of lord Śiva himself,⁴ has been replaced in the Nāth cult by the Somarasa oozing from the moon in the Sahasrāra. We may also note that in the Rasārṇava the two primordial elements, of which the physical body is produced, have been described as the vital wind (vāyu) and the Rasa and according to this school the only way of making the body ever-lasting is the control over the vital wind and the scientific application of the Rasa; this is the case also with the yoga-system of the Nāth Siddhas, where the control of the vital wind and the proper regulation of the secretion of the Soma are regarded as of paramount importance.

It should be noted in this connection that the alchemists generally use the two words Siddha-deha and Divya-deha as synonymous, evidently because both are free from corruption, mortality and the defects belonging to the ordinary human frame; but a distinction should be made between the aim of

⁴ In many of the texts on Rasāyana Rasa has been held identical with Śiva and as such it is said to be vested with the same potency as Śiva himself, Cf. darśanāṁ tasya bhaksanāṁ sparśanāṁ smeraṇāṁ aṣṭaḥ ।
   pājānāṁ rasa-dānac ca dhyayate saṁ vidhāṁ phalam ॥
   kedārdārini līṅgāṁ prthivyāṁ yāni kāṇcīl ।
   tāṁ dṛṣṭvā tu yat pūnyaṁ tat-pūnyaṁ rasa-darśanāṁ ॥

Cf. also similar other verses quoted in the Sarva-darśana-saṁgraha, p. 208.
the Nāth Siddhas and the Rasa Siddhas on the one hand and that of the Siddhas of the Šuddha-marga (pure path) on the other. The Nāth Siddhas and the Rasa Siddhas are known to be closely allied with each other regarding the ultimate object of their aspiration which consists in making the body a proof against death and decay and always responsive to the stimulus of the world of senses and capable of wielding immense power. But both of them are to be sharply distinguished from the adepts of the pure path. In the view of the latter, for instance, the incorruptible body is of two kinds, viz., the one of the Jīvan-mukta and the other of the Parā-mukta. The former is the pure body of Šuddha-māyā known as Praṇava-tanu or Mantra-tanu, a body into which the corruptible body of Māyā in its triple aspect is finally transmuted: It is deathless and free from disintegration, but disappears in the end in higher Mukti in the Body of Pure Light, or Divine Body, called Divya-deha or Jñāna-deha of Mahā-māyā, which being absolutely spiritual (cinmaya) is beyond the farthest reaches of matter. In Tāntric phrasology the two bodies are known respectively as Baindava and Śākta. That the Nāths also in certain places discriminate between Siddha-deha and Divya-deha as the exponents of the other mystic cults do, is evident from their reference to the two distinct stages of Amara add Aśvināśi as Relative and Absolute Immortality. This contrast between the two conceptions of Kāya-siddhi is brought in an interesting manner in the disputation between Gorakṣa-nāth and Allam-prabhu as recorded in the Bhavisyat-purāṇa-prabhu-liṅga-lilā.¹

¹ Ch. X (Verses 50-79): Vide Introduction to the Liṅga-dhāraṇa-candrikā by M. R. Sakhare, pp. 341-343. The present writer is indebted to MM. Gopinath Kabiraj for this information.
PART IV

THE DHARMA CULT OF BENGAL
CHAPTER X

GENERAL NATURE OF THE CULT

Another popular religious cult, known as the Dharma cult, developed in Bengal out of the admixture of some relics of decaying Buddhism, popular Hindu ideas and practices, a large number of indigenous beliefs and ceremonies, and ingredients derived also from Islam. This cult is responsible for the rise and growth in Bengal of a type of literature which deserves attention because of its quantitative as well as qualitative importance. The cult is called the Dharma cult for the reason that the main deity, around whom the paraphernalia of worship, ceremonies and practices gathered, and whose boundless grace and unquestionable supremacy have been demonstrated by a large number of poets in their semi-epical poems, is the Lord Dharma, or, as popularly known, the Dharma-ṭhākura. Credit must be given in this case also to the late MM. H. P. Śāstrī, who played the pioneer’s part in bringing to the notice of the public the existence of such a religious cult and the literature on it.

Dharma cult is a local cult of Western Bengal and is prevalent even in the present days in some districts. The fact that the Dharma cult originated and spread only in some parts of Western Bengal is proved beyond doubt by the local references found in the ritualistic works and the Dharma-maṅgalas; and the sacred places and rivers mentioned in these works have already been localised in different parts of West Bengal, known as Rāḍha.¹ The stone-images of Dharma-ṭhākura are still found in West Bengal and are still worshipped in the temples of Dharma. Again, all the poets of the Dharma-maṅgala literature, whose works have been discovered up till now, belong to the districts of West Bengal. Moreover, in connection with the salutations found in the opening chapter of some of the Dharma-maṅgalas to

¹ Vide Discovery of Living Buddhism in Bengal by MM. H. P. Śāstrī; and also the introductory articles by Dr. M. Shahidullah, Mr. Basantakumar Ghatterjee and Mr. Charuchandra Banerjee in the Śānyā-purāṇa, edited by Mr. Charu-chandra Banerjee.
the different gods and goddesses worshipped in the temples of the different localities all over Bengal, we find that Dharma-ṭhākura, in all his names and forms, belongs only to the villages of West Bengal. It is also clear from the references that are found in the texts that this cult of Dharma was current among the low-class people like the Hādis, Ḍomas, Bāgdis, Fishermen, Carpenters and the like. Archeological investigations have revealed that ideas and practices similar to those of the Dharma cult are to be found also in some parts of Orissa, particularly in Mayurbhanja and its vicinities. From a comparative study of the thoughts, beliefs and practices of the crypto-Buddhistic cults of Orissa (as Mr. N. N. Bose calls them) and the various forms of the Dharma cult found in the South-Western part of Bengal, it will appear that they are essentially the same in so far as all of them represent only a mixture of later Buddhistic ideas and practices with the popular Hindu beliefs and practices including a mass of the beliefs and practices of the Non-Aryan aborigines.

In our present study we are not very much interested in the ceremonial aspect of the cult; we are concerned with it only in so far as it concerns our literature, or in so far as it supplied inspiration to a good number of poets to compose fairly bulky poetical works to eulogise the sovereign power of Lord Dharma. A detailed account of the extent and the nature of the literature that was inspired by this cult, with a discussion on the controversy over the time of composition and the authorship of the works, will be found in the Appendix (D).

The Dharma cult is the result of a popular commingling of a host of heterogeneous beliefs and practices; it will therefore be incorrect to style it purely Buddhistic or Hindu or indigenous either in origin or in nature,—it is as much a hotch-potch in its origin as it is in its developed form and nature. Critical analysis of the constituent elements reveals

   Also see Sarva-deva Bandana in the Śrī-dharma-maṅgala of Māṇik Gāṅguli, edited by MM. H. P. Sāstrī and Dr. D. G. Sen, pp. 6-7.
   Cf. also the Anādi-maṅgala or Śrī-dharma-purāṇa of Rām-dās Ādak, edited by Mr. B. K. Chatterjee, M.A., from the Sāhitya-pariṣat, pp. 5-6.
2 Vide Modern Buddhism And Its Followers In Orissa by Mr. N. N. Bose.
that, as a popular religious cult, Dharma cult owes many of its elements to that form of later Buddhism, which is known as Mantra-yāna and laterly, and most commonly, as Vajra-yāna. The liturgical texts, viz., the Śūnya-purāṇa and particularly the compendium entitled the Dharma-pūjā-vidhāna, will at once remind one of the liturgical texts of Mantra-yāna or Vajra-yāna. Of course, in these vernacular works we find but a very faint trace of the earlier practices, we mean those of Tāntric Buddhism, they being replaced by innumerable local and indigenous practices. In the process of assimilating the local indigenous practices the liturgical works of the Dharma cult show the same tendency as is found in the liturgical works of Tāntric Buddhism. With the Śūnya-purāṇa and the Dharma-pūjā-vidhāna of the Dharma cult (excluding the portions on cosmogonical speculations) we may compare more particularly one well-known compendium of the religious practices of Vajra-yāna Buddhism, viz., the Kriyā-saṅgraha. This text begins with the details of the construction of the Vihāra (which is not here the monastery of the monks or the nuns, but frankly the temple of gods and goddesses), worship of various gods and goddesses, and hundred other ceremonies and practices including placing of the jar (kalasa), ablation, fire-sacrifice, etc. These are found also in the Śūnya-purāṇa. The Kriyā-saṅgraha, however, assumes a pseudo-Buddhistic form by professing occasionally that the final aim of all these rituals and ceremonies is the realisation of Bodhicitta with a view to attaining liberation not merely of the self but of the whole universe. But along with this avowedly Buddhist purpose even the performance

1 Edited by Mr. Nani Gopal Banerjee, Sāhitya-pariṣad-granthāvali, No. 56.

2 We have not been able to discover this text; we have at our disposal in rotograph a commentary on the text by Kuladatta, entitled Kriyā-saṅgraha-pañjikā (manuscript preserved in the Bibliothèque Nationale, Paris, Sanscrit 31). A copy of the manuscript of this commentary is also preserved in the Asiatic Society of Bengal (MS. Nos. 3854, 4728). In the Dharma-koṇa-saṅgraha of Vajrācārya Anrātandana of the Mahābodhi-Vihāra in Lalita-pattana (MS. preserved in A.S.B., No. 8055) we find, in connection with the enumeration of the types of Buddhist literature found in Nepal, mention of this Kriyā-saṅgraha and also a brief note on the nature of its contents. The nature and the contents of the text, however, can fully be known through the perusal of the commentary of Kuladatta.

3 Cf. the details of constructing the temple of Dharma or Niraṅjana, found in the Śūnya-purāṇa. See the chapters of Atha Dvāra Mocana, Atha Ghar Dekhā, Atha Dānapatir Ghar Dekhā, etc.
of fire-sacrifice and the sacrifice of animals to the goddesses are also prescribed in this text in complete oblivion of the fact that Lord Buddha began his religious career as a living protest against the sacrificial religion of the Vedas and the cruelty to animals involved therein. The chapters on fire-sacrifice (Homa or Yajña) found in the liturgical texts of the Dharma cult may be a faint echo of this prototype. In the Kriyā-saṅgraha we find that the offering to the goddess Hāritī consists of fish, blood of animals, meat along with all other articles; in the Śūnya-purāṇa also we find that the goddess associated with Dharma is very fond of animal-sacrifice.¹

But admitting the fact of this relation between the liturgical works of the Dharma cult with some liturgical works of Tāntric Buddhism, how far will it be correct to say that the nature of the Dharma cult is essentially Buddhistic? In our opinion, though it may be true to call the Dharma cult Buddhistic from a popular point of view, it is not true from the critical point of view; for, the heterogeneous practices which go by the name of Tāntric Buddhism have nothing in them Buddhistic but an outward colouring effected through the introduction of some stray Buddhistic terms and ideas used generally in a transformed and deteriorated form, and also through the introduction of a pantheon gradually evolved from the docetic conception of Buddhahood. Some Nepalese Buddhistic practices are, indeed, found in the practices of the Dharma cult;² but it is plain to see that these are local practices which are neither Hindu nor Buddhistic either in nature or in origin. The theory propounded by MM. H. P. Śāstri that the stone-images of Dharma-ṭhākura (Dharmaśīlā), which are found abundantly in Western Bengal, and the shape of which approximates the shape of a tortoise, are nothing but the miniature forms of the Nepalese Bud-

¹ See the chapter on Attha Devor Manui in the Śūnya-purāṇa. It is a noticeable fact in this connection that goddess Hāritī occupies an important position in some of the Buddhist Tāntric texts and in Nepal images of goddess Hāritī are frequently found side by side with the supreme Lord in the Buddhist temples. In the Dharma cult also Lord Dharma is often found associated with goddess Śītalā, who is supposed by scholars to be the transformed form of the Buddhist goddess Hāritī (both being goddesses associated with irrigation).

² As for instance, we may note the use of lime in the worship of Dharma, and also in the worship of goddess Śītalā (generally associated with Dharma) who is taken to be goddess Hāritī of Tāntric Buddhism.
dhist representation of the *Stūpa* with the five Bodhisattvas inscribed on them,\(^1\) is not, however, clear and convincing. It is not also a fact that all the stone-images of Dharma are of the shape of a tortoise. In the liturgical texts, however, we find occasional reference to the tortoise on whose back the “wooden sandals” of Dharma are to be placed. This tortoise is so well-known a mythological figure in the Hindu Purānic literature that Buddhistic interpretation of it seems unwarranted. As a matter of fact this importance of the tortoise in a religion may betray its indigenous nature and origin. As for the idea of Dharma, who is the Lord Supreme, it will be more correct to say that he represents the conception of the Lord Supreme found in the religious beliefs of India than to say that he represents the idea of Buddha. The idea of the Lord Supreme, as conceived in all forms of Tāntric Buddhism, is, as we have already hinted, almost the same as conceived in many systems of Hindu theology. The followers of the Dharma cult have proceeded a step farther than the Tāntric Buddhists and Dharma here represents the formless Brahman of the Upaniṣads, the Lord Śiva of the Śaivites and the Tāntrics, Viṣṇu of the general Vaiṣṇavites, Kṛṣṇa of the Kṛṣṇite Vaiṣṇavas and Rāma of the Rāmite Vaiṣṇavas, and again sometimes the Sun-god of the Sun-worshippers. The followers of the Dharma cult seem to have altogether forgotten that this Supreme deity may have something to do with the Buddha of the Buddhists; and excepting two remarks that the original place of Dharma is the land of Ceylon and the Deity Dharma is much revered in the land of Ceylon,\(^2\) there is no direct evidence in the liturgical works or in the Maṅgala literature of the knowledge of the Dharmites that their religion and their deity have anything to do with Buddhism and the Buddha. Even the above

---

\(^1\) See an article by MM. H. P. Šāstrī in the *Nārāyaṇa*, 1322 B.S., Māgha.

The triangular land (*tekana medinti*) of Dharma referred to in the *Śūnya-purāṇa* seems to be Ceylon; but we should notice in this connection that in the *Dharma-maṅgala* of Dvija-rām-candra we find *Sīnhala* to be a village situated somewhere in West Bengal. *Cf.*

\[ \text{bālighāṭ surānadi dekhe bāma-bhite |} \\
\text{rākhila sīnhal grām dekhite dekhite} \]

MS. C. U. No. 2464, p. 6(A).

But nowhere in the *Dharma-maṅgala* do we find any tradition of this Sīnhala’s being the original place (*ādyā sthāna*) of Dharma.
remarks seem to be a mere tradition transmitted to the Dharmites and their import may not be clear to the Dharmites themselves.

So when we say that the Dharma cult is a crypto-Buddhist cult, we should remember that it can be said to be Buddhistic only in so far as it bears faint relation to that form of later Buddhism more than ninety per cent of which belong to religious systems other than Buddhism. We have seen in an earlier chapter that various forms of Tāntric Buddhism were prevalent in Bengal up to the twelfth century A.D. The revival of Hinduism with the rise of the Senas of Bengal and the Muslim invasion of Bengal dealt a death blow to all schools of professed Buddhism in Bengal. It is a well-known fact that many of the Vihāras, which were important centres of Buddhism, were mistaken by the Mahomedan invaders to be the forts of the enemy and were destroyed. But, as it has rightly been pointed out by MM. H. P. Śāstri, no religious movement of long-standing cultural influence can be eradicated all at once from a land by any other religious movement or political and religious causes. Buddhism, even in its Tāntric form, was pushed aside and was gradually assimilated into the cognate religious systems among the Hindus and the Muslims, and the Dharma cult is the outcome of such a popular assimilation. It is to be noted that the yogic element, which forms the most important factor of Sahajiyā Buddhism, had no influence on the Dharma cult and save some yogic imageries and phrases found occasionally used in the liturgical works,¹ no reference to yoga of any sort is to be found in the Dharma cult.

Before passing on to the next topic we think it necessary

¹ Cf. mana haila naukā pavana keraśla |
    sunāra naukā rūpāra keraśla ||
Sūnya-purāṇa, p. 105.

"The mind becomes the boat and the vital wind the oar; golden is the boat and of silver is the oar."

mana kara naukā pavana keraśla |
āpuni to niraśjana hoitā kāyāra || Ibid., p. 209.

"Make your mind the boat and the vital wind the oar; Niraśjana himself has become the helmsman." Cf. also—"Make your mind the boat and the vital wind the oar,—and make your mind concentrated, and then only can you expect to go to the other shore. When the Dūṇa-pati (i.e., the man who met all the expenses for Dharma-worship) heard the oracle, his mind became the boat and his vital wind was stopped. Of silver was the boat and of gold was the oar,—and Dharma-rāja himself became the helmsman." Ibid., p. 41.
to say here a few words about the probability of some Muslim influence on the Dharma cult. After the Mahomedan invasion of Bengal in the thirteenth century, the Muslims began gradually to settle in the land and to exert political, religious and cultural influence on the people. It seems that the followers of the Dharma cult with their monotheistic belief in the formless God could easily have friendly terms with the Muslims who had the same monotheistic belief in the formless God and who were particularly antagonistic to the politeistic belief of popular Hinduism. There seems to be palpable influence of the Muslims in the description of Dharma of later days.\(^1\) The Muslims of Bengal were in their turn variously influenced by these minor cults of Bengal, and as a matter of fact we find that in the popular Muslim literature of Bengal the Muslims used all the terminology of the Dharma cult and the Nāthā cult in their description of God.

It seems that the followers of Dharma suffered much for their religious beliefs and practices from the Caste Hindus and when the Mahomedans entered Bengal as a conquering power the Dharmites took shelter under them, and when the caste Hindus were being persecuted in the hands of the Mahomedans for their beliefs and practices ‘the ancient grudge’ which the Dharmites had against the Hindus was daureen. We find in the *Yama-purāṇa* of the Śūnya-purāṇa that the messenger of Yama assumed the form of a human being and entered the city where Rāmāi lived in the form of a Hindu ghost. Rāmāi came forward and inscribed some mark on the forehead of the ghost (so as to initiate him to the Dharma cult), but the latter chained Rāmāi hand and foot and took him to Dharma-rāja Yama, who ordered Rāmāi to be cut into two with the help of a saw. But Rāmāi began to meditate on the *Karātār* (the Lord) and the saw could not pierce him; he was then successively cast into fire with hands and legs tied up and into the ocean with a slab of stone on his chest; but in each case Rāmāi was saved by the

\(^1\)Cf. hāle nila tira kāmaptha pāya diyā musī |
    gauḍe balāna giyā dharma mahā-rāja \(\)  

As has been suggested by Dr. Shahidullah Dharma is described here just in the image of a Muslim emperor of Bengal.
Karātār. The historical fact behind the legend is the persecution of the Dharmites by the Caste Hindus.¹ We find that some of the poets of the Dharma-maṅgalas as first refused to comply with the request of Dharma to compose any poem in his honour for the fear of social persecution and it was after repeated assurance that the Lord could persuade them to compose poems.² The story of the wrath of Lord Niraṅjana (Niraṅjaner Ruśmā) found in the Śūnya-purāṇa as well as in the Dharma-pūjā-vidhāna points out the simple fact that the Muslim conquest of Bengal and the persecution of the Hindus by the Muslims were regarded by Dharmites to be the gracious device of the Lord himself to save the Dharmites from the hands of the persecuting Hindus.³ In the Dharma-pūjā-vidhāna the story of the wrath of Niraṅjana was followed by many pseudo-Urdu verses, which are ascribed to Rāmāi Paṇḍit. Here Rāmāi eulogises the religion of the Muslims and condemns that of the Hindus and prefers the practices of the former. As a matter of fact there are some customs in the Dharma cult which are essentially Muslim. As for instance, we find in the liturgical texts the custom of sacrificing goats or duck or pigeon before Dharma by cutting their throat in a particular manner (javāi—Arabic Yavah), which is peculiarly a Muslim custom. Again, the animals or the birds are to be sacrificed with their face westward. In other places we find much importance given to the western direction in connection with the worship of Dharma or the accessory ceremonies. The description of the gates invariably begins with the description of the western gate. Much importance is also attached to the moon, who is depicted as

¹ See introduction to the Śūnya-purāṇa by Dr. Shahidullah, p. 35.
² Vide Dhm. of Māṇik-gāṅguli, p. 9.
³ There we find that when the Brahminic people of Maldah began to tax the Saddharmis (i.e., the Dharmites who professed to be the Saddharmis), to persecute them and to kill them, Lord Niraṅjana got much angry in Vaiṅchā and revealed himself as the Khoda (God) of the Muslims in the village of Jājpura; he was seated on a horse with a black hat on and with a bow and arrow in hands, and all the gods and goddesses of the Hindu pantheon gladly put on the dress of Muslim soldiers to accompany the lord. The lord, however, with his army broke all, the temples of the Hindus, plundered the Hindus, ravaged them and persecuted them, and the Dharmites were saved. Jājpura, a village in the district of Hugli, is described in the Dharma-maṅgala literature as very important place of the Dharmites, and there is also the tradition in later Dharma-maṅgalas that Dharma revealed himself as a Muslim (javana-avatāra) in the place. jājpurar dehārā bandiva ekaman | jīt khāne avatār hailajavan || MS. entitled Dharmer-Bandana (C.U. No. 2470), p. 1(B).
the Koṭāla (gate-keeper) of the western direction. This importance given to the western direction and the moon undoubtedly bears testimony to the Muslim influence.¹ It is also to be noted in this connection that one of the most important incidents of the Dharma-maṅgalas is the incident of making the sun rise in the west by Dharma in response to the prayers of Lāusen. The incident is described in detail in all the Dharma-maṅgalas. Instead of taking this incident simply as an instance of the display of supernatural power by the devotee of Dharma, will it be far wide of the mark to infer that the whole incident was construed only to explain from the stand-point of the Dharmites why the west was regarded so important by them? Again, we find that some importance is also attached to Friday which is an auspicious day with the Muslims. All these practices, however, seem to have been introduced into the Dharma cult in later times in course of its evolution.

¹ See a discussion by Dr. B. M. Barua, M.A., D.Lit., in the Śanivārer Cīhī B.S. 1345, Pauṣa.
CHAPTER XI

SPECULATIONS ON THE CONCEPTION OF DHARMA

(i) Hindu Conceptions of Dharma

As the Dharma cult represents a composite form of religion developing from a popular adoption of diverse religious practices, rites and ceremonies, so also is the idea of Dharma, which has been the receptacle of various conceptions of the sovereign deity found in various religious thoughts. Here, as we have hinted before, we have the unconscious mixture of the conception of the Upaniṣadic Brahman with the Purusa of the Sāṃkhya, Śiva of the Tantra, Viṣṇu, Kṛṣṇa and Rāma of the Vaiṣṇavas, Yama, the lord of justice and death, and also with Dharma, the popularly conceived godhead in general. These ideas of the Supreme Being have again coalesced with the idea of the supreme deity variously conceived in later Buddhism.

The idea of Dharma as the godhead has a fairly old history in the Hindu texts. The word dharma ordinarily means that which is to be held fast or kept, or that which holds fast or keeps, or law, statute, religion, piety, right, justice, equity, virtue, merit, nature or character of entities, an essential of characteristic quality, mark, peculiarity of an entity, or the entity itself. In its Vedic form (dharman) it meant the maintainer, the supporter, the arranger. When popularly personified, Dharma means the lord of all laws and ordinances, the lord of justice, the central figure of all religion, and in this last aspect Dharma is popularly conceived as God, the Lord Supreme, who is maintaining the whole world by administering order, discipline and justice. Even in the present day the custom among the common run of people is to swear by the name of Dharma, to appeal to Dharma for redress from distress, to invoke the blessings of Dharma in time of calamities,—and in all these cases Dharma is none but the supreme deity or God Himself. From as early a time as the time of the Vedas, the word
Dharma is found used in its variously personified forms. In the Śatapatha-brāhmaṇa (13.4.3) we find in connection with the enumeration of the kings and the subjects of all quarters and localities that Dharma Indra was the king of the gods. Here Dharma is identified with Indra, the lord supreme of the later Vedic literature.¹ In the Purānic literature we find mention of another Dharma, who is Righteousness, Justice, Law or Virtue personified; he was born from the right chest of Brahmā and had three offsprings, Śama, Kāma and Harṣa. Dharma or Dharma-rāja is well-known in the Purānic and epic literature of Sanskrit as the epithet of Yama who is the God of justice and the king of death. Even in popular Buddhistic literature Yama is widely known as the Dharma-rāja.² Dharma is, again, one of the attendants of the Sun-god; he is Justice or Virtue, identified with Viṣṇu; he is Prajāpati, and is said to be the son-in-law of Dakṣa. We find mention of many other personalities in the Purānic literature of the name of Dharma who were notable for various virtues and activities.

Of all these, however, Yama, the king of death and justice, is the most widely known by the name of Dharma or Dharma-rāja. In the Mahābhārata Yudhiṣṭhira is traditionally described as the son of Yama, and he himself was known as Dharma-putra (i.e., the son of Dharma) and the epithet Dharma-rāja is also found frequently used for him. It is a very popular story of the Mahābhārata that Dharma in the guise of a Yakṣa put a few questions to Yudhiṣṭhira and the answers given by the latter was to the entire satisfaction of Dharma and Yudhiṣṭhira obtained boons from him. When Yudhiṣṭhira was bewildered at the superhuman form and glow of the disguised Yakṣa, the latter declared,—“I am Dharma, your father of supreme power—and am come here only to see you. My body is constituted of fame, truth, self-control, purity, simplicity (ārjava), modesty, steadiness (acāpalya), bounty, penance and physical and mental discipline (brahmacarya); non-violence, equity, peace,

¹ Vide B. K. Chatterjee’s introduction to the Śrī-dharma-purāṇa of Mayūra-bhaṣṭa.
moral virtue, purity and non-exhilaration are my senses."

This Dharma once more came to test the righteousness of Yudhiṣṭhira in the guise of a dog when the latter was about to enter heaven (Mahā-prasthānika-parva, Ch. 3). In the Skanda-purāṇa, Yama, the son of Sūrya, is depicted as a great sage (ṛṣi) of the name of Dharma or Dharma-rāja. He was practising austere penances to propitiate Mahādeva (i.e., Śiva). The gods (including Indra) got frightened at the penances of Dharma and sent down a celestial damsel, Varddhini by name, to disturb the penance of Dharma. In course of a dialogue with her Dharma said,—"I am Yama to all beings who are evil-doers,—and I am Dharma to all self-controlled people."² Lord Śiva was propitiated by the penances of Dharma and as desired by the latter the forest Dharma-ranya became a sacred place for pilgrimage through the boon of Śiva. Dharma himself preferred to be transformed into a bull and became the mount of Śiva.³

In the Bengali Manuscript Library of the Calcutta University we have a manuscript entitled Dharma-itihāsa (i.e., the history of Dharma, MS., C. U. No. 6152) which is ascribed to the poet Guṇa-rāja-khān.⁴ The Dharma of the text is none but the Lord Supreme, and it has been demonstrated with reference to the stories of Rāmāyaṇa and the Mahābhārata how the genuine devotees in different times and places were, under various critical circumstances, protected through the infinite grace of the Lord.

Traditions in the Dharma cult often show a great tendency to identify Dharma, or Dharma-rāja with the Dharma-rāja Yama. As a matter of fact Yama himself, seated on his Vāhana (mount) or buffalo, is often identified with the Dharma-rāja of the Dharmites in many places of West-Bengal and the festivities in connection with the gājana of Dharma are known as the festivities of Dharma-rāja Yama.

¹ Mahābhārata, Vana-parva, Ch. 312.
² yamō hah sarva-bhūtānāṁ duṣṭānāṁ karma-kāriṇām |
    dharmarāpo hi sarveṣāṁ manuṣyānāṁ jīlawarmanām ||
    sa dharmāh hah varārohe dādamī tava durlabham |
    tat-sarvāṁ prārthaya tvam me Śīhram cāpāsaraśāṁ vare ||
Dharma-ranya-khaṇḍa (417-18) included within the Brahma-khaṇḍa.
³ Skanda-purāṇa, Brahma-khaṇḍa, Śetu-māhātmya, Ch. III.
⁴ We do not think that this Guṇa-rāja-khān is the same as Mālādhara Vasu, the well-known translator of the Bhāgavata in the pre-Caitanya period.
Often it has been found that in worshipping Dharmarāja the priests utter the Mantra,—‘Salute to Dharmarāja, who is Yama and who is of various forms’ (namaste bahrūpāya yamāya dharma-rājāya). In the ritualistic texts also we find corroboration of the fact. In the chapters on the river Vaitarani of the Śūnya-purāṇa we find that Dharma himself is acting as the helmsman and carrying all the devotees of Dharma to heaven, which is situated on the other side of the direful river Vaitarani. Rāmāi Paṇḍita himself is here helping all lay people on board. The name of the river Vaitarani is so closely associated with the name of Yama in Hindu mythology that it takes no time to recognise that this Dharma-rāja is none but Dharma-rāja Yama. In a chapter of the Dharma-pūjā-vidhāna we find the deity of the Dharmites unconsciously identified with Yama seated on his Vāhana of buffalo and accompanied by his well-known clerk, Citra-gupta, and his attendants, Kāla and Vikāla with iron chains in their hands; he is found administering law to all people of the world.

In the liturgical texts of the Dharma cult the tradition of Dharma’s identity with Yama seems to be less popular than the tradition of his identity with Śiva and Viṣṇu; in the Dharma-mañgalaś again the tradition of the Śaivite nature of Dharma seems to be in a dwindling condition and the Vaiśṇavite nature, either in the form of Viṣṇu in general or Kṛṣṇa or Rāma in particular, predominates. But before we deal in detail with this question it will be helpful to us

1 Vide an article Rādha-bhramana by Pañcāna Banerjee, B.S.P.P., 1314 B.S. It is interesting to compare with the above Mantra the ordinary Mantra of Yama-tarpaṇa:—yamāya dharma-rājāya mṛtyaye cāntakāya ca etc.

2 Of course, in some other chapters (viz., the chapters on Yama-purāṇa, Yama-dūta-samvāda, Yama-rāja-samvāda) we find that the Purānic Dharma-rāja Yama and Dharma-rāja are differentiated. It is demonstrated with legends that Dharma-rāja Yama has no sovereignty over people who are devotees of Dharma-rāja Niraṇjana or the Karatār and that, being sadly harassed on several occasions, Dharma-rāja Yama with the help of Rāmāi Paṇḍit made an exhaustive list of the priests and devotees of Dharma-ākṣaka of the five ages (including the void-age) so that he might instruct his officers not to meddle with them. About this disagreement of traditions we have nothing more to say than that here in the Dharma cult, which offers the best specimen of the religious psychology of untrained masses, nothing but anomaly and confusion can be expected.

3 pp. 249 et seq. In one line of this chapter, however, Dharma and Yama are spoken of as two (Yama dharmas duṣjan bogyā āchen-deva-sabhāy); but in fact they are treated as one throughout the whole chapter.
to investigate into and examine the Buddhistic substratum of lord Dharma.

(ii) Buddhistic Substratum of Dharma

In the Sanskrit dictionary *Amarakoṣa* Dharmā-ṛaja has been mentioned as a synonym for Buddha;¹ in the Jātaka stories also the epithet Dharma-ṛaja refers to Buddha. It may be noted that the Dharmītes still observe the days of *Buddha-pūrṇimā* (i.e., Baiśākhi pūrṇimā, the birthday of Buddha) and *Āśādhi pūrṇimā* (the day on which Dharma-cakra was first preached by Buddha) as highly auspicious festive days. But it will not be fair to surmise from such identifications that Dharma or the Dharma-ṛaja, or rather the Dharma-ṭhākura of the Dharma cult directly represents Buddha. In discussing the Buddhistic substratum of the idea of Dharma we should remember that the Buddhism we are referring to here is not the Buddhism with which we are acquainted in any of the standard Buddhistic schools; it is that phase of later Buddhism which is so-called mainly historically as maintaining in a transformed and modified form the continuity of the older thought. We may illustrate the exact nature of the relation of the Dharma cult with standard Buddhism with reference to an episode of the popular Pāli text *Milinda-pañha*. The question of king Milinda is whether the man who is reborn is the same as the man who is dead or is an absolutely new man. It is indeed very difficult to answer the question directly in consistence with the theory of momentariness of the Buddhists. The answer of the Elder Nāgasena is, therefore, indirect; he says that the man who is newly born is neither the same as the former, nor is he absolutely a new man; but in spite of the absence of personal identity the latter is to be associated with the former only because of the fact that the former is mysteriously responsible for the existence of the latter. The argument of Bhadanta Nāgasena may very aptly be repeated here in connection with the exact relation between the Dharma cult and Buddhism, or the conception of the Dharma-ṭhākura and the conception of the ultimate

¹ sarvajñāḥ sugato buddho dharma-tathāgataḥ
reality propounded in Mahāyāna Buddhism. It may be repeated here that it will be wrong to suppose that any particular Buddhistic conception of the reality has, through processes of long transformation, coalesced with the Hindu conceptions of the supreme deity and has thus given rise to the composite conception of the Dharma-ṭhākura. Dharma-ṭhākura represents as much infiltration of ideas from popular Hinduism as from popular Buddhism, and this explains his extremely heterogeneous nature. In investigating into the Buddhistic substratum of the conception of Dharma, therefore, we shall only indicate the different lines in which Buddhistic ideas might have infiltrated in the mind of ordinary masses to give rise to the conception of a deity of such heterogeneous nature.

We have seen before that the philosophic ideas of Mahāyāna Buddhism, with the spirit of catholicity and adaptation, had an innate tendency towards approximating the Upaniṣadic spirit. Whatever may be the position of Nāgārjuna and his followers, who have been the centre of great controversy, the conception of the ultimate reality of the Vijñānavādins as pure consciousness or the absolute uncreate cannot but be held to be positive in nature. The Tathatāvāda of Aśvaghoṣa admits the Tathatā-nature (i.e., the nature of the Dharmas as thatness) to be something substantial, permanent and unchanging and as such it is something positive, though formless and unqualified. The conception of the Vijñāpti-mātratā or the Abhūta-parikalpa, which is of the nature of consciousness, bereft of the duality of the knower and the knowable, seems to be just the previous step of the conception of the Brahman which in its absolute and unqualified nature transcends all knowledge, knower and knowability. It has always been vehemently argued by the Vijñānavādins that Śūnyatā was never spoken of by the Lord as pure ‘nothing’; while it is the negation of all duality, it implies at the same time the reality of pure-consciousness or the absolute uncreate, which is unchanging, unthinkable, all-good, eternal, all-bliss, the ultimate element of the nature of liberation.

Again in the docetic conception of the Tri-kāya in the Mahāyāna system the Dharma-kāya or the body of the
cosmic unity, or the organised totality of things, though not as a purely philosophical concept, but as an object of religious consciousness, approximates the idea of the Brahman. The word Dharmā-kāya is often explained as the body of law; and it may also be remembered that Buddha is said to have told his disciples that his teachings should be recognised as his own immortal body. But the word dharma is generally used in the Mahāyāna texts in the sense of ‘entity’; and the Dharma-kāya means the ‘thatness’ (tathatā-rūpa) of all the entities, it is in other words the dharma-dhātu or the primordial element underlying all that exists. It has been also termed as the Svabhāva-kāya, i.e., the body of the ultimate nature. It is described as devoid of all characters, but possessing eternal and innumerable qualities. It is neither the mind, nor matter, nor something different from the both.\footnote{The nature of the Dharma-kāya is described in the Avatamsaka-sūtra in the following manner,—‘The Dharma-kāya though manifesting itself in the triple world, is free from impurities and desires. It unfolds itself here, there, and everywhere responding the call of Karma. It is not an individual reality, it is not a false existence, but is universal and pure. It comes from nowhere, it goes to nowhere; it does not assert itself, nor is it subject to annihilation. It is for ever serene and eternal. It is the One, devoid of all determinations. This body of Dharma has no boundary, no quarters, but is embodied in all bodies. Its freedom or spontaneity is incomprehensible, its spiritual presence in things corporeal is incomprehensible. All forms of corporeality are involved therein, it is able to create all things. Assuming any concrete material body as required by the nature and condition of Karma, it illuminates all creations. Though it is the treasure of intelligence, it is void of particularity. There is no place in the universe where this body does not prevail. The universe becomes, but this body for ever remains. It is free from all opposites and contrarieties, yet it is working in all things to lead them to Nirvāṇa.’ Quoted in Suzuki’s Outlines of Mahāyāna Buddhism, pp. 223-224.}

This docetic conception of Buddhahood as implied in the theory of Tri-kāya gradually transformed itself in the monotheistic conception of a Being and latterly in the clear conception of a personal God. The Dharma-kāya Buddha became the Lord Supreme, the Sambhoga-kāya Buddha became the Dhyāni-Buddhas (viz., Vairocana, Akṣobhya and others) and the Nirmāṇa-kāya Buddha gave the idea of the human Buddhas (Māṇuṣī Buddha).

All these various philosophical concepts about the ultimate reality in the different schools of Buddhism, including the docetic conception of Buddha as conceived in the theory of the Tri-kāya, lost their special significance in a popular
idea of a Supreme Being in later schools of Tāntric Buddhism, and the most common name by which He was known among the Tāntric Buddhists was the Lord Vajra-sattva. Though it became customary with the Buddhist Tāntrikas to describe this Vajra-sattva with all sorts of negative attributes (of course, in addition to the positive ones), it is very easy to see that the conception of the Vajra-sattva behind all these positive and negative attributes is definitely positive and is that of a personal God. All Buddhistic ideas, viz., the idea of Śūnyatā, the idea of pure consciousness, the idea of the Bodhicittta, the idea of Mahā-sukha began in later days to acquire cosmological and ontological significance in the form of an all-pervading Being. The origin of the Dharma-ṭhākura with all his positive and negative, Buddhistic and Hindu attributes may historically be associated with the conception of this Lord Supreme of the later Buddhistic schools.

In connection with the evolution of the conception of Dharma the question of its relation with the Dharma of the three ‘jewels’ of Buddhism (viz., Buddha, Dharma and Saṅgha) naturally attracts our notice. MM. H. P. Śāstrī and others have propounded the theory that in later times Buddha, the first of the three jewels, was naturally eliminated by the lay Buddhists with the growing influence of revived Hinduism, and the third jewel Saṅgha became the Śaṅkha (conch-shell), which is very important in connection with Hindu worship; and the second jewel, viz., Dharma became identified with the Buddhist Stūpa, which was worshipped as something like the symbol of Dharma,—and the Stūpa became the Dharma-ṭhākura of the Dharma cult in the form of a tortoise. In propounding such a theory, however, we should proceed a bit cautiously. As for the transformation of Saṅgha into Śaṅkha we may say that the frequent mention of Śaṅkha with various other necessities of worship in the Śūnya-purāṇa cannot convince one of its Buddhistic origin; for Śaṅkha is no less important as one of the necessities of worship in the proper Hindu liturgy than in the cult of Dharma. The story of Viṣṇu’s killing Śaṅkhāsura and giving the Śaṅkha to Padmālaya’s son, as narrated in the Oḍiẏā text Siddhānta-

\[^1\] Vide-Supra, pp. 28-29.
\textit{dambara}, seems to us to have nothing in it to warrant the origin of this \textit{Saṅkha} in the Saṅgha of the Buddhists.\footnote{"We scarcely think it would be very wide of the mark to infer from this that the word Saṅkha here means nothing but a Buddhistic Sangha. In this interpretation of Saṅkha as Sangha, we are supported by the Sunya-Purāṇa, in which Saṅkha is very frequently used for Sangha. The common people in their ignorance of the teachings of Buddhism and its terminology, either misspell Sangha as Saṅkha or mistook Saṅkha for Sangha which really means a congregation of Buddhistic monks." \textit{Modern Buddhism And Its Followers, etc.,} by N. N. Bose, p. 19.} Of course in the \textit{Dharma-pūjā-vidhāna} we find a few confused lines on Saṅkha; what we can at most infer from this is that Saṅkha was held important in the worship of Dharma.\footnote{It should however be remembered in this connection that in the Dharma- maṅgalas we frequently come across the details of Dharma-worship; but there we do not find any special attention paid to this Saṅkha.} We sometimes find also salutation to Saṅkha in connection with the opening chapter of salutation in the Dharma-maṅgalas.\footnote{Cf \textit{ṣaṅkha bandāya aṣaṅkhya loka muni} \textit{e caṛi paṇḍit bandā e caṛi āmanī} || MS. entitled \textit{Dharmer Bandanā}, C. U. No. 2470, p. 1(A).} This importance of Saṅkha has nothing in it which may help us to construe some kind of relation between Saṅkha and the Buddhist Saṅgha on any convincing ground.

We have already pointed out that Śunyatā and Karuṇā, transformed as Prajñā and Upāya, were held very important in Tāntric Buddhism, and a tendency was manifest to interpret this Prajñā and Upāya as static and dynamic, or negative and positive, as female and male, and so on. Gradually the three jewels Buddha, Dharma and Saṅgha came to be interpreted in terms of Prajñā, Upāya and the world produced by them; Upāya as the male principle was identified with Buddha, and necessarily Dharma became Prajñā or the female principle and Saṅgha came to be interpreted as phenomenal world which is produced through the union of Prajñā and Upāya.\footnote{For a detailed discussion on the point see the chapter on Cosmogony, infra.} Some scholars maintain that these transformed
forms of the three jewels are still now preserved in the Jagannātha temple of Puri. There the two male figures, with a female figure in the middle, widely known in their Hinduised nomenclature as Jagannātha and Balarāma with the image of Subhadrā in the middle, are in all probability the representations of the three jewels of Buddha, Dharma and Saṅgha transformed as Upāya, Prajñā and their son, i.e., the phenomenal world. In the esoteric Buddhist literature the epithet Jagannātha (i.e., the lord of the world) is widely used before Buddha or rather the Lord Supreme, and it is also a well-known adjective used before the Lord Supreme of the Hindus,—and thus through the medium of the epithet Jagannātha, the first of the three jewels could very easily be Hinduised and the Hinduisation of the other two was but a matter of course. This theory of the transformation of Buddha, the first jewel of the Buddhists, into Jagannātha (and later on frankly conceived as Kṛṣṇa) has its corroborations in the tradition of the literature of the Dharma cult. Jayadeva, the famous Vaiṣṇava lyric poet, described Buddha as the ninth incarnation of Viṣṇu; and in the literature of the Dharma cult we find in connection with the description of the incarnations of God that in the ninth incarnation God was born as Jagannātha, who is none but lord Buddha, and he settled his residence on the sea-coast, where he has relieved the whole world by distributing to all (irrespective of caste and creed) his Prasāda (i.e., the food offered to God and supposed to be accepted by him.)

In another place we find that in this incarnation of Jagannātha the lord revealed himself to the Hindus and Muslims, who were all united together in his (i.e., Jagannātha’s) place, and in the country of Gauḍa (i.e., in Bengal) he has revealed himself as the Dharma-rāja.

But though Buddha was the first of the jewels and had his prominence also in the temple of Jagannātha, he could not enjoy universal sovereignty for several reasons. In the

---

1 Dharma-pūjā-vidhāna, pp. 206-207; also p. 208. See also Govinda-vijaya of Śyāma-dāsa, Vaṅgavāsi-edition, p. 3. It may be pointed out here that in the ten incarnation of Viṣṇu, inscribed on the gateway of the temple of Jagannātha in Puri, Buddha, the ninth incarnation, has been replaced by Jagannātha.

first place, from the metaphysical standpoint Dharma represents Prajñā or Śūnyatā, which being the ultimate source of all origination and being often interpreted as the noumenal aspect of the reality, was infused with more cosmological and ontological value than Buddha, who represents Upāya or Karuṇā, metaphysically explained as the aspect of phenomenalism. This metaphysical valuation might have been there in the mind of common people in the form of a time-honoured tradition, and this may be why Dharma could supersede the claim of Buddha in being recognised as the supreme divinity among the Dharmites. In the second place, in later times lay people had no idea about what these three jewels might be; they could recognise only Dharma, who was, in common faith and tradition, known to them as the Supreme Lord, the Sovereign Deity over the universe,—some Invisible power administering law and justice; consequently Dharma became gradually recognised as the Lord Supreme. Moreover, with the growing influence of Hinduism it was not possible for ordinary people of lower social order to accept any one but Dharma out of the three jewels as their Lord:

The Dharma-ṭhākura of the Dharma cult is not generally associated with any Śakti or female counterpart. In the Dharma-pūjā-vidhāna, however, we find a goddess, Kāmīnyā by name, whose worship follows the worship of Dharma along with the worship of many other gods and goddesses, and she is the goddess for removing blindness and leprosy. This Kāmīnyā is sometimes described as something like a Śakti of Dharma,¹ and as a matter of fact some of her descriptions resemble the description of the goddess variously described in the Buddhist and the Hindu Tantras. But the

This last verse is found in the Śri-dharma-maṅgala of Māṇik Gāṅguli as:—

uluca (sic. kāḥ)-vāhanaṁ dharmaṁ kāminīyā sahitāṁ (sic. -te) śīvan |
dhauta-kundendu-dhavala-kāyaṁ dhyāyed dharmaṁ namāmy aham ||

p. 4.
more important fact is that Dharma-ṭhākura, as the Sovereign Deity, has frequently been identified with Śiva and as such is always associated with his Śakti as Bhagavatī, Ādi-devī, Ādi-śaktī, or as Bāsulī, Caṇḍī, Durgā, Pārvatī, etc. In the liturgical texts Dharma-ṭhākura is frequently styled as Maheśvara (the great lord) or Mahādeva (the great deity), Devadeva (the God of gods)—epithets which are commonly used before the well-known deity Śiva. In some temples of Dharma Dharma-ṭhākura has been transformed completely into Śiva.¹ In the well-known religious ceremony of West Bengal known as the Gājana of Dharma, which is the most celebrated function of the Dharmites current even to the present day, Dharma has been frankly made Śiva and the Gājana of Dharma really means the Gājana of Śiva. In the book Ādīner Gambahīrā by Mr. Haridās Pālit² we find an elaborate account of the Gājana of Dharma. Even a cursory glance on the verses that are sung with dancing and beating of double drums will show how confusedly Śiva and Dharma have been mixed together in these ceremonies and the verses themselves are really fragments found in the liturgical works of the Dharma cult and the ŚivāyanaS of Bengal. It is very interesting to note that this ceremony of Gājana is also found in some districts of East Bengal in the form of Nīla-pūjā, (i.e., the worship of the deity Nīla), and this elaborate religious ceremony, which takes place in the last week of the Bengali year and takes about a week’s time to be completed, is never suspected by the people in these districts to be anything but a Hindu religious function primarily concerned

¹ It is interesting to note here an incident described by MM. H. P. Śaṅcīrī in an article in the Bengali monthly Nārāyan (B.S. 1322, Māgha) in connection with the transformation of Dharma to Śiva. In a temple of Dharma MM. Śaṅcīrī found a priest dividing into two equal portions the offerings to be presented to Dharma. He asked out of curiosity why such a division was made. The reply of the priest was—“He is Dharma and Śiva at the same time and hence is the division.” On further enquiry MM. Śaṅcīrī came to learn that the Mantra with which the offerings were presented to the deity was,—“Salute be to Śiva, who is Dharma-rāja” (śivāya dharma-rāja namah). After several years of his first visit MM. Śaṅcīrī went there once more and found that by this time a Gaṇī-paṭīya (a symbolic representation of the female organ of the Śakti generally found placed beneath the symbolic representation of the male organ of Śiva) was placed by the Brahmins beneath the stone-image of Dharma so as to Hinduisse him completely.

² Published under the auspices of the Māladaha National Educational Institute, B.S. 1319.
with the Hindu deity Lord Śiva. The fragmentary verses that are generally recited in connection with the various ceremonies of this function have striking affinity with the verses found in the liturgical works of the Dharma cult and also in the Gājana of Dharma of West Bengal not only in matter and spirit, but sometimes in language also with slight deviations.

The conceptions of Śiva and Śakti or the primordial male and the female have their bearing on the literature of the

1 A very brief account of this Gājana of East Bengal will be found in the Vaṅga-Sākiya-paricaya, Part I, of Dr. D. C. Sen (published by the University of Calcutta), pp. 159-161.

2 We have collected from some villages in the district of Backergunge the fragmentary verses akin to those found in the liturgical works of the Dharma cult. They are recited in connection with the Nīla-pājā ceremony. It will be interesting to note that the cosmogonical ideas found in these verses are the same as found in the literature of the Dharma cult. We shall discuss this point later on in our discussion on cosmogony. Lord Śiva is occasionally styled here as Dharma or Dharma-rāja. In the Dharma-pājā-vidhāna (pp. 242-45) we find a discussion on the origin and growth of the foetus; exactly a similar verse is found among the verses that are recited on the occasion of the Nīla-pājā. We find in the liturgical works of the Dharma cult salutation and prayers to the four quarters with a presiding deity in each; the same custom is also found in the Gājana of Śiva, and the peculiar fact to be noticed is this that here as well as in Dharma cult the ceremony begins from the west, which is not surely a Hindu practice. This practice however, seems significant and its significance has been explained before (Sūtra, p. 306). We are quoting here a specimen of the verses recited in Dikkhandana:—

paścim paścim ādi paricay dvārī
dvīrapayā mayamay muktār hār l
śuddha kāṇṭhe kāṅcan dvār l
kāṅcan dvārā bākya nāme takya (?) rudra sthāpitā l
tār rājā śri-jagannāth bāhinī
tār dharma puruṣe dharma dharma hār l
tāṅāre sētāle muktār kātā pāi
nā yāha yama-pūrṇī śiva-pūrṇī thāi ||
āgam beṛ gāyāre bāṅgī
ekāṅcan duṅāre den puṣpāṇjali l
he sādhulī, dik paścim, kārtik ganeś mahādev saṅgini, 
dik paścim sopta-tāl kāthī
tīne saṅge bālā khāstī ||

Similar verses are recited in accompaniment with dances and beating of drums in the other three quarters, the presiding deity in the north being Śrī-sabha-līṅga, in the east Śrī-muṇḍa-cakra and in the south Śrī-vaidyā-nātha. Again, we have in the liturgical works of the Dharma cult descriptions of the construction of the temple of Dharma (commonly known as dharmera deula); with them we may compare the following verses on grha-nirmāṇa, i.e., constructing the house (for the Lord) on occasion of Śiva’s Gājana:—

sopta samudre sthān sthitī tirtha barānāsi l
yāta bahiyā kare stav pāīṛa sāṭa rāmī ||
Śī gane kare stav bhāciyā nīrājana l
ghṛta laīl jukhiyā kare deul sṛjan l
arjun kāṭaṇ pāṭhāra dānave māre hūrā l
kände kariyā bahe dik sonār pāṭhāraarā ||
rajaṇa kāṅcan kāṅcan sāiṛre l
rajaṇa kāṅcan kāṅcan pāṭe ||
śveta cāmare chaīyā cāri cāl l
Dharma cult particularly in connection with the portions on cosmogony and cosmology,—and as we have to deal in detail with these ideas in a separate chapter, we do not propose to deal with them here.

The point to be emphasised here is that in the Buddhist Tantras a tendency was manifest always to conceive the Supreme Lord in the image of Śiva and the female counterpart of the Lord in the image of Śakti, and these Lord and Lady of the Buddhists were in still later times identified completely with the Śiva and Śakti of the Hindus. In the section on cosmogony of the Śūnya-pūrāṇa we find that goddess Ādyā, who is also called Gaurī (Durgā and Pārvatī), was unable to control her youth and sent Kāma (Cupid) to the Lord who was absorbed in deep meditation on the river Ballukā; Kāma disturbed the meditation of the Karatār. The whole scene here has been confusedly borrowed from the tradition of the disturbance of Śiva's meditation by Cupid for his (Śiva's) marriage with Pārvatī, Dharma-ṭhākura being conceived here exactly in the image of lord Śiva. This identification is not, however, complete in the literature of the Dharma cult; there Lord Śiva has not yet been able to cast off or hide away completely his Buddhistic attributes,—

Again in the Śūnya-pūrāṇa, the Dharma-pūjā-vidhāna and the Śrī-dharma maṅgāla of Mayūra-bhaṭṭa (B. K. Chatterjee's edition) we have funny legendary accounts of the origin of the metal copper, of the Beta-stick (beta=Skt. vētra), of the double drum (dhāktē), etc., which are of great importance in connection with Dharma-worship. Similar legendary accounts (of course with more Hindu tinge) are found also in the fragmentary verses which we have collected in connection with Śiva's Gōjana in East Bengal. Space will not allow us to quote them here and to compare them side by side with the accounts that are found in the Dharma-maṅgala literature. We have in our collection accounts of the origin of corn, of Beta, Dhāka, Sāṅkha, iron, thread, copper, the earthen pots and earthen vessel for incense (dhāpātī), of incense, etc.

In the chapter on the cultivation of lands (Aṭha Cāṣa) which seems to be a fragment inserted in the Dharma literature from the Bengali Śaivite literature, the Lord Supreme of the Dharmites has become lord Śiva, as conceived in the Bengali Śivāyanas.
there is still something of later Buddhism round the figure of Lord Śiva.

This conception of the Supreme Lord and the consort, as expounded in later Buddhism, developed itself into the idea of the Ādi-Buddha and Ādi-Prajñā in Nepalese Buddhism. This Ādi-Buddha or the primordial Enlightened One is the Self-created One (Śvayambhū) of the Śvayambhū-purāṇa. He is described there as the Lord Supreme, who is worshipped by all the gods, Yakṣas and Rakṣas in the mountain of Gaurī-śīṅga in the country of Nepal. He is described as of the nature of the ultimate substance (dharma-dhātu). He is often conceived as lord Vairocana with the other four Tathāgatas placed in the four quarters round him. Again, the Lord is often said to be Śākya-muni, who is called both Jagnātha as well as Dharma-rāja. This Lord Supreme is called both Śvayambhū (i.e., the Self-originated One) and Śambhu (literally, the Lord of Welfare), which is the most common epithet applied to Lord Śiva; the name Śiva also implies that the deity is welfare itself. The Ādi-Buddha, who is the Śvayambhū and who is called the Dharma-rāja is sometimes described as of the nature of the three jewels (tri-ratna). It appears from the above that the three jewels were sometimes conceived in later times as the three attributes of the Ādi-Buddha. In the same text, again, Maṅju-śrī is conceived as the Lord and he also is called the Dharma-rāja. The Ādi-Buddha and the Ādi-prajñā have frankly been explained in the Śvayambhū-purāṇa as of the Nature of Upāya and Prajñā or Karuṇā and Śūnyatā, and have again been described as Śiva and Śakti. In the Dharma-koṣa-saṅgraha we find

6 This work, which is preserved in manuscript in the Asiatic Society of Bengal (No. 8055), was written by Vajrācyāya Amatānanda of the Mahābodhi-vihāra Lalita-paṭṭana, who was the first Residency Pundit in Nepal at the request of Brian Hodgson in N. S. 946 (i.e., 1826 A.C.). Mr. Hodgson has made a good use of this work in his papers on the language and literature of
this idea of the Ādi-Buddha and Ādi-prājñā variously explained. It is said there that the Lord is called Ādi-Buddha, because he is the first knowable, and can only be inwardly intuited as he has no form to be perceived. He is called Niraṇjana, because there is no stain (aṇjana=collyrium) in him, he being of the nature and form of the void like the sky. He is formless, supportless (nirādhāra); he is the Upāya, he is the Mahāvairocana. ¹ This Ādi-Buddha is the Dharmarāja. He is Dharma-rāja because he is the lord of all the entities (dharmāṇāṁ rājā), or because he shines in the world in his justice (dharmād rājate saṁsāre rājate), or because all the entities, or all justice shine from him (dharma rājate yastmāt).² He is also called Dharmesā, because he is the lord of all the divine virtues like the ten kuśalas (i.e., ten Buddhistic acts of righteousness) and is also the lord of all people who possess these virtues.³ In another place he is explained to be Dharma-rāja, because he is associated with the knowledge of the perfectly pure ultimate element of all the Dharmas.⁴ Again it is said, Dharma means the Dharma-dhātu (i.e., the ultimate element behind the Dharmas) and the ultimate support of this Dharma-dhātu; and he who shines with the Dharma-dhātu, is called the Dharma-rāja.⁵ He is the Dharma-dhātu in the form of Mahā-sukha or great Bliss. He is also called the lord of all beings—the Prajāpati.⁶ It will be clear from the above that Ādi-Buddha, the Lord Supreme of Nepalese Buddhism, who was of the nature of Upāya, as contrasted with Prajña, was widely known also as Dharma-rāja, and that will make it very clear how the Lord

Nepalese Buddhism (vide, A Descriptive Catalogue of Sanskrit MSS in the Government Collection, under the care of the A.S.B.—prepared by H. P. Śāstrī, pp. 192-193). The text is evidently not very old; but we attach importance to it only because of the fact that being composed by an orthodox Pundit of Nepal, it is likely to contain genuine information, at least so far as Nepalese Buddhism is concerned.

¹ He is called Mahā-vairocana, because, he is great (mahān) and at the same time illuminates or rather enlightens everything vīśeṣaṇa rocyati sarvāṁ mahānāsāt—MS. p. 1(B).

⁶ Ibid. MS. p. 63(B).
Supreme of the later Buddhists can also be associated with the Dharma-ṭhākura of Western Bengal and some parts of Orissa.

The above will confirm our previous statement that Dharma-ṭhākura does not represent the conception of any particular deity,—he rather represents the general idea of Godhead or of the sovereign deity over the universe, and as such he has been associated consciously with all the conceptions of Godhead or of the sovereign deity popularly current in Bengal and Orissa from the tenth century A.D. It is interesting to note that there is a Hindi text, entitled Dharma-parīkṣā¹ which relates the character of Jina Deva as the principal God of the Jainas and Jina Deva is styled in the text as Dharma.

After all these speculations on the origin and nature of Dharma, the supreme deity of the Dharma literature, let us now see how he is actually depicted in the literature of the Dharma cult, and these illustrations will, we hope, guarantee the relevancy and correctness of our speculations.

Chapter XII

Dharma as Described in the Dharma Literature

In the Dharma-maṅgala literature, which flourished comparatively late, the nature of Dharma is found more simplified than in the liturgical works. In the Dharma-maṅgalas we have almost nothing Buddhistic in the conception of Dharma, he being completely Hinduised; the composite nature of Dharma is better illustrated in the descriptions of the Lord found in the liturgical works. In these descriptions of Dharma we should notice the importance that has been attached to the idea of Śūnyatā in various forms as the quintessence of Dharma or as an attribute of Dharma. Vacuity is the support of Dharma—it itself is the essential nature of Dharma. This Śūnya or Śūnyatā has been variously spoken of in the liturgical works of the Dharma cult but rarely in the Dharma-maṅgalas. It will be a great mistake to think that the Dharmites inherited this idea from the Buddhists as a philosophical idea; it was rather transmitted to them through a long process of change in the popular religious psychology,—and we are inclined to believe that whenever the Dharmites spoke of the Śūnya or the Śūnyatā, they simply inherited the idea as a social heritage without being conscious of what the term did actually imply. So much emphasised was the idea of Śūnyatā as the nature of the ultimate reality in Buddhistic philosophy, religion and literature for centuries in India and outside, and so widespread and deep-rooted was its influence on the mass through the enthusiasm of the Mahāyānists, that the association of the idea of voidness with that of the ultimate reality became a tradition. We have already pointed out that in Tāntric Buddhism, roughly and widely known as Vajra-yāna, practically almost all the heterogeneous elements are non-Buddhistic when considered in relation to the ethico-religious spirit of Buddhism; but attempt has always been made to give all these practices a Buddhistic garb mainly through
the frequent use of the word Śūnyatā and more frequently its synonym Vajra, which was believed to be something like the magician’s wand having the capacity of transforming everything non-Buddhistic into Buddhistic. In the Dharma
cult of Bengal and similar religious beliefs and practices of
Orissa, and also in the Vaiśṇavism of Orissa the lingering
effect of the tradition is best exhibited. This Śūnya was
made much use of also in the yogic literature of the Muslims
of Bengal.¹ It is indeed very interesting to notice that the
staunch apostles of Vaiśṇavism of Orissa in the sixteenth
century, viz., Acyutānanda Dāsa, Balarāma Dāsa, Jagannātha Dāsa, Ananta Dāsa, Yaśovanta Dāsa and Caitanya Dāsa,
who were all contemporaries and who propagated
Vaiśṇavism as professed followers of Caitanya, described
Lord Kṛṣṇa as the Śūnya-puruṣa² and made him none but
the incarnation of Śūnyatā,³ the ultimate void.

Another term, which is also frequently used as an epithet of Dharma and often rather as a synonym for Dharma, is Nirañjana, which means "the stainless one." The use of the word Nirañjana is not, however, very uncommon in Hindu philosophical and theological texts; but its use seems to be more common in the Buddhist than in the Hindu fold; and it is very frequently and aptly used as an epithet of the reality, which in its ultimate void-nature is stainless like the sky above. In the liturgical works of the Dharma cult queer derivations of the word Nirañjana are offered which are purely arbitrary in nature. This epithet or rather the synonym Nirañjana for the ultimate reality or the formless Supreme Being became very popular in all the vernacular literature, and in fact it has been very widely used by the Dharmites, the Nāsthīs, the Bāuls, the Sūfī poets, the Nirguṇī-poets of Hindi literature and also by the Sikh poets.

(i) Dharma—confusedly described as the Lord Supreme in the liturgical works

Let us now examine the descriptions of Dharma that are found in the Dharma-pūjā-vidhāna in connection with the meditation on and prayers and salutation to Dharma. The most important, however, is the meditation of Dharma, which runs as follows:—"Let that Lord of the form of vacuity, who has neither end, nor middle, nor beginning, neither hand and legs, nor body and voice, neither form, nor any primordial shape, nor fear and death, nor even birth,—who is accessible only to the greatest of the yogins in deep meditation, who belongs to all the sects (or who permeates all the petals of the lotuses within the body), who is bereft of all mental construction, who is one, stainless, and giver of the boon of immortality, protect me."*2

*Buddhism etc. See also many other similar extracts quoted by Mr. Basu in his work from the standard works of the other poets.—Modern Buddhism, etc. Ch.III.

1 Thus, for instance, we find in the Śīnya-purūpa,—

\[
\text{nīrete nīrmaṇa kāṇā nāma nīraṇjana} \\
\text{i.e., he is called Nīraṇjana because his body is washed clean by primordial} \\
\text{water.} \text{p. 14.}
\]

2 \[\text{om yasya'ntam nā'di-madhyaṁ na ca kara-caraṇam nā'stri kāyo nīnādaṁ} \\
\text{nā'kāraṁ nā'di-rūpam na ca bhaya-maraṇam nā'stri jannaśīva yasya} \\
\text{yogindra-dhyāna-ganayāṁ sakala-dala-gataṁ sarva-saṅkalpa-himaṁ} \\
\text{tatraiko'pi nīraṇjano' mara-varadaṁ, pātu māṁ śīnya-mūrtiḥ} \]

\[\text{Dharma-pūjā-vidhāna, p. 70.}\]
Again,—“I am invoking the Lord, who is the giver of all the fruits of desire, who has nothing like a shape, nor any seat to perform yoga, who is the absence of all and at the same time the abode of all, and who is adorned with all the postures and gestures (sarva-mudrā-susobhitam). Come down, O the voidlord and take your seat here.” Lord Dharma is said to have incarnated into the world only to relieve all the beings of the three worlds from their bondage. And this tone is just the same as is found in the Buddhist Tantras in connection with the invocation of the Lord Supreme. Dharma is again spoken of here as immersing his form in the sea of consciousness which is of the nature of supreme bliss. Seated on his mount Ullūka he is the lord of the nature of the unity of Brahmā (the creator), Viṣṇu (the preserver) and Śiva (the destroyer). He is the great, the Brahman of the beginningless luminous form. He is adored in all the fourteen worlds and is of the form of perfect void. He is knowledge and consciousness, pure and changeless, innocent and formless and is to be known as the syllable “Om”; he transcends all qualities, is the underlying reality not yet manifest in existence (anyakta); he is the transcendent reality, he is the Brahman. He is perfectly pure, all-good, quiet, without beginning and end;—he is the life of the world and is of the form of lustre and bliss; he is not determinable by the four quarters, time and space (a-dīśa-kāla-ṛṣya-veda). He has incarnated himself on the bank of the river Ballukā (which is in the district of Burdwan) seated on his favourite mount Ullūka and he is to be known only through the injunctions of the fifth Veda (i.e. the canonical or rather the liturgical works of the Dharmites).

1 Ibid, p. 70.
4 Ibid, p. 75.
5 Ibid, p. 76. Similar descriptions of Dharma abound in the Dharma-prajā-pāramahā; thus it is said,—“He is the Niraṇjana, who is neither space (sthāna), nor fame, who has neither the lotus-like feet, nor any form, nor any primary colour; who is neither the seer nor sight, neither the hearer nor hearing, neither white, nor yellow, nor red, nor golden, neither like the sun, nor the moon, nor fire,—he neither rises, nor sets; he is stainless, of the form of the syllable “Om”, the supreme abode, unqualified, supportless, unchanging and all-void (sarva-sānyamam). He is neither the full-grown tree, nor the root, nor the seed, nor the shoot, nor the branch, nor leaves, nor the trunk, nor the foliage; neither the flower, nor the scent, nor the fruit, nor the shade. (Ibid, p. 77) He is
Dharma has been saluted as the presiding deity over the gods (devā-dhideva), as the lord of the gods (devesa), as the unity of all the gods (sarva-deva), as the primordial deity (ādi-deva), as the lord of the world (jagannātha), as the bestower of perfection (siddhi-dātā), the lord of all yoga (yogeśvara), as the incomprehensible deity (acintya-devatā) and as the saviour of all, giver of happiness and liberation and the supreme deity of vacuity (śunya-devesa). He is eternal, of pure quintessence (śuddha-sattva), of the form of compassion (karuṇāmaya-mūrti), and having the supreme virtue of contentedness (santoṣa-sīla).

If we examine the descriptions given above as specimen we shall find that some of the descriptions are almost the same as are to be found in the Buddhist Tantras in connection with the meditation of, and the salutation to, the supreme deity, and many of the attributes are taken frankly from the attributes of the divinities of the Hindu pantheon. It is, however, noticeable that in the descriptions of Dharma the negative tendency outweighs the positive. This dominance of the negative tendency even in the most popular religion cannot but be recognised as the dwindling influence of Buddhism with its emphasis on the negative aspect of

neither the up nor the down,—neither Śiva nor Śakti, neither male nor female, nor the astral body (liṅga-mūrti), he possesses neither hands, nor legs, neither form nor shade; he is neither the five elements, nor the seven seas, nor the quarters, neither mountains nor peaks, neither Brahmā, nor Indra, nor Viṣṇu nor Rudra. He is neither the universe (brahmāgada-khaṇḍa), nor the seed of time (kāla-bijam), neither the preceptor, nor the disciple, nor the planets, stars and heaps of clouds; neither the Vedas, nor the scriptures, nor the prayer offered thrice a day, nor the hymns; neither Mantra, nor the muttering, nor meditation, nor fire-sacrifice, nor gifts to or worship of gods. He is profoundly quiet, void in the form of Nirvāṇa, and is the ultimate substance of the universe. He is in the netherlands, in the invisible region (antarikṣa), in the four quarters, in the sky, in all the mountains and seas, in the root-syllable (bija-mantra) and other Mantras, in the plants, in the land of the gods and the demons, in flowers and leaves and in the blade of grass, in iron, wood and ash, in earth, water and air,—in the static and the dynamic, he is all-pervading and one. (Ibid, pp. 78-79).

1 In addition to what is illustrated above compare also:—

nāsti rūpaḥ nāsti dehaṁ nāsti kāya vinādām l
nāsti jānaṁ nāsti mūrtīṁ taṁśi śrī-dharmāya namaṁ ||
nirāijanam nirākāraṁ śūnya-rūpaṁ jagad-gurum l
nirājanaṁ sthitam nityam cintayāṁ nirājanaṁ ||
nirājanaṁ nirākāraṁ nīrōtvālam paṁ māhaṁmānaṁ l
nīpā-puruṣaṁ deveṁ sarva-lokaṁka-ṉāthākam ||
oṁkāra-bindu-sahitaṁ nirākāraṁ nirājanaṁ l
ūpy-anta-rhitauṁ śūnya-rūpaṁ deveṁ nirājanaṁ ||

the reality. In connection with the salutation to Dharma salutations are offered to all kinds of void, viz., great-void (mahā-śūnya), supreme void (parama-śūnya) etc.¹

In the Śūnya-purāṇa we find similar descriptions of Dharma. By combining all the positive and negative attributes applied to him nothing can be said of him but that he is the Supreme Lord. He is saluted in his form of vacuity (śūnya-rūpa), as formless, saviour from calamities, the supreme of all the gods.² He is the Karatāra (the supreme lord), he comes from the void and has his support in the void.³ He himself is the unity of the triad Brahmā, Viṣṇu and Mahādeva (i.e., Śiva).⁴ He is the supreme lord transcending both voidness and non-voidness.⁵ In the beginning the Lord was moving alone in great-void (mahā-śūnya), having only void as his support, and the whole cosmos came out of the great void only through the will of the Lord. In the Deva-sthāna of the Śūnya-purāṇa we find that Brahmā is performing austere penances for the Lord by making his body the instrument for the yogic Sādhanā, and Viṣṇu is also invoking the Lord; Śiva is performing penances with his head down and legs up and singing the praise of the Lord with his horn and drum; Indra (Purandara) is performing penance for Dharma by inflicting severe torture on his body and all the yogins and sages are holding austere penances to propitiate him. For the bath of the Lord, Hanūmān digs a pond with his vajra-nails (vajja-nakha) and constructs four ghats in the four quarters—one of gold, one of silver, one of copper and the other of pearl, and fills up the pond with the water of the river Bhogavatī (i.e., the Ganges of the Netherland). The Lord then gets into a golden palanquin and goes to bathe accompanied by all the gods including Brahmā, Viṣṇu, Śiva, Indra and by all the sages like Vaśiṣṭha, Nārada and others.⁶

It is needless to repeat here that in these descriptions

⁴ Ibid, p. 218.
⁵ gaganā-gaganā (sic,-nā)-pārah paramā paramēswaran etc.  Ibid, p. 228.
⁶ See Atha Mukti-snāna, Śūnya-purāṇa, pp. 179-181.
Also, Atha Dharma-pūjā, Ibid, p. 175 et seq.
Dharma has often been identified with Śiva, Viśṇu (or Nārāyaṇa) and Krṣṇa. The abode of Dharma wavers from Kailāsa to Vaikuṇṭha, showing thereby the tendency of identifying Dharma sometimes with Śiva and sometimes with Viṣṇu. Though Śūnya has been made much use of in describing Dharma and though his formless and non-essential nature has been variously emphasised, yet Dharma is conceived always as a personal God with a form.

(ii) Dharma as the Sun-god

Dharma has sometimes been described as the sun, and there is a two-fold reason behind it. In the first place Dharma is luminous by nature and so is the sun and hence the identity. Secondly, Dahrma is Śūnya and Śūnya is of the shape of a zero and, therefore, Dharma is of the shape of a zero, and as the sun is also of the shape of a zero, Dharma is identified with the sun. Moreover, Dharma moves in the void, and void is the sky, and the sun moves in the sky and hence the sun is Dharma. The Sun-god,

1 Vide Dharma-puja-vidhāna, p. 79.
2 We may note here the reply of Rāmā Pāṇḍita made to some questions put to him. He says,—"My home is in Ballukā and I worship the Formless One; I meditate on the void and adore the form of the Lord." Śūnya-purāṇa, p. 165. It is indeed funny to see that one who worships the formless and meditates on the void should adore any particular form or figure of the Lord! In another place, however, Ulluka, the mount of Dharma, puts the following questions to Dharma, —"Who is the Lord (Karotā) in this world and who is work or action (karma)? Who is the being pervading the fourteen worlds? Who has made Khalla (? a canal, a cut, a creek, a trench, a deephole) and Bihalla (?) and who has made the Salla (Sāla tree (?)) in the mountain? Who is transformed into hands and legs? Who does infuse the blooming flowers with scent and who does create and destroy the sun and the moon? Who does make water flow in the rivers, from whose body does the heavenly river Ganges flow and who has made her (i.e., the Ganges) flow in a zigzag course? Who has placed the mountains on their firm basis and who does reside in the void? Who does come from the Śūnya and goes to the Śūnya, and who does make the Śūnya his support and then meditate on the Śūnya? Who does bear fruits in the form of the tree? Who does rain the form of the cloud? Who does accept worship in every house and who is called the mother of the world?" To every one of these questions the reply of Dharma is that it is he himself who is responsible for this universal process and for all that are in it. Ibid, pp. 211-12.

Dharma-puja-vidhāna, p. 89.

Cf. also:

nirālambe rathe märge śūnya-märteśu divākaram etc. Ibd, p. 51.
maṇḍalaṁ varūla-kāraṇaṁ śūnya-dehaṁ mahābalaṁ Ibd, p. 52.
who is of the form of zero, or in other words circular in shape, is described as the cause of creation, preservation and destruction and as such is of the nature of the three guṇas (i.e. sattva, rajas and tamas) and also of the nature of the triad, Brahmā, Viṣṇu and Śiva, who represent the three guṇas respectively.¹ In the Dharma-pūjā-vidhāna we find the Dharmites presenting offerings to the Sun-god, who is subsequently identified with Dharma. He is described as the lord (gosāṅī), who takes ablution and offers his Brahminic prayers in the bathing-ghat of the river Campā.² Yet at the same time he rises on the shore of the seven seas in a chariot, which is decorated with vermillion, diamond, coral and pearl. Seven horses of pure white colour carry the golden chariot of the Lord which has been decked with sixteen flowers. Sixteen attendants are holding the chain of the chariot, the galaxy of the twelve Ādityas are sitting within, and Indra, the king of the gods, is holding the umbrella over the Lord who is shining on his golden pedestal with a garland of golden lotus round his neck. The lord is then entreated to turn his attention to the beings of the world, for whom wealth and welfare are solicited.³ The descriptions of the Sun-god, seated in his golden chariot of seven white horses, and the way in which he is approached by his devotees for bestowing health and wealth on all beneath at once remind one of the Vedic hymns of similar contents.⁴ The similarity is indeed striking, and that may suggest some link between them through popular traditions. In the Bāra-māsi of the Śūnya-purāṇa we find the worshipper of Dharma presenting offerings to the twelve Ādityas (suns,) who are spoken of as twelve brothers. Again we find, Lord Dharma rises from his sleep early in the morning and Ullūka offers to him his prayer; eight horses of white colour carry the golden chariot of the Lord and the Lord rises

¹ Ibid, p. 51.
² Ibid, p. 52. 
Vide, Rg-veda, (1.22.8), (1.24.4), (1.35.2,4-5) etc.
as the luminous sun. In the east is situated the golden temple of the Lord. The devotees invoke the Lord to rise up from his sleep and to relieve the whole world from darkness. Then the Lord awakes and asks for his chariot and horses, which are prepared for him instantly. The Lord then climbs on his chariot and the crown on his head touches the sky, and Indra begins to shiver in fear in heaven and the serpent Vāsuki in the Netherland. When the Lord of the world thus rises on his chariot with a sacred thread of nine folds round his neck and shining with his radiant lustre like a wonder to all beneath, some think of him to be very near, and some to be far off. Thd Lord removes the sorrow of the poor beneath by distributing immense wealth.

(iii) Dharma of the Dharma-maṅgalas

(A) Dharma as Viṣṇu in general

In the ritualistic works Dharma is often called Svarūpa-nārāyaṇa and there is also the custom of presenting Tulasi leaves to his feet; he has lotus-like hands like Viṣṇu, Vaikuṇṭha is his abode. The transformation of Dharma into some form of Viṣṇu was almost complete in the Dharma-maṅgalas literature. The Dharma-maṅgalas literature, which is now available to us, is of very late origin and flourished under the sway of Vaiṣṇavism both of the Rāma cult and the Kṛṣṇa cult; it is for this reason that Dharma of the Dharma-maṅgalas is mostly identified with Viṣṇu in general and Kṛṣṇa and Rāma in particular. It is only sporadically here and there in the cosmogonical discussions and in some other places that we hear in the Dharma-maṅgalas of the Śunya-mūrtti of Dharma or of his “formless form” with all his negative and positive attributes. The older tradition of the identification of Dharma with Śiva

1 P. 150.
2 It is to be noted that lord Sūrya (Sūrya-thākura) of the folk-songs of Bengal also wears the sacred thread of nine folds round his neck.
3 See Aṭha Dharma-sājana, Śunya-purāṇa, pp. 159 et seq.
Also Dhm. of Māṇik Gāṅguli, pp. 112, 156.
seems to have dwindled away by this time. Though Dharma is sometimes spoken of as the lord of Caṇḍi, and is worshipped with Viśva-patra\(^1\) which is particularly dear to Lord Śiva, and though his abode is located in Kailāsa, yet it seems that with the rise of the various Śākta and Vaiṣṇava cults Śaivism was rapidly losing ground. This was why the tradition of Dharma as Śiva was gradually passing into oblivion in the Dharma-maṅgala literature; and not only that, we sometimes find Śiva introduced in the Dharma-maṅgalas only to obey Lord Dharma and help him in his struggles against the goddesses. The general descriptions of Dharma that are found in the various Dharma-maṅgalas are the popular descriptions sometimes of the unqualified Brahman of the Upaniṣads and sometimes of the Puruṣa of the Sāmkhya and sometimes of a mixture of them in the most confused manner with the legendary accounts of the various incarnations of Viṣṇu and his activities in various ages as are found in the Purānic literature.\(^2\) Again sometimes we find Dharma in the assembly of the gods, including Indra, Brahmā, Viṣṇu, Śiva, Varuṇa and others, seeking advice from them as to the right measure to be taken to keep up his prestige, which was very frequently at stake in the hands of the devotees of Śakti. In the attempt to introduce his worship on earth by establishing his almighty power Dharma-ṭhākura had no plain sailing; his devotee Lāusen was at every step challenged by the devotees of Śakti either in the form of beasts or in the form of men, and whenever his devotee was thus challenged out Lord felt a sudden jerk in his royal seat either in Kailāsa or in Vaikuṇṭha and he would enquire from Ullūka, and more generally from Hanūmān, as to what might have been the cause of that trouble; they would in reply describe the miserable plight in which his devotees might have been. In almost all cases our Dharma-ṭhākura was very helpless and we find him always seeking advice and practical help from his companion and instructor Ullūka and mainly from his

---

\(^1\) Dhm. of Ghana-rāma, p. 68; also Ibid., p. 102, 111.

\(^2\) See the descriptions of Dharma in the Dhm. of Rāma-nārāyaṇa (MS. C.U. No. 2450), pp. 4(B)-5(A), and pp. 16(A) et seq. Dhm. of Ghana-rāma, p. 2, 102; Dhm. of Māṇik Gāṅguli, p. 1, pp 4-5. etc.
chief agent or executor, Hanūmān. But in cases of more serious and emergent nature Dharma-ṭhākura would call for an assembly attended by all the prominent gods (goddesses being conspicuous by their absence) and would seek advice from them all.

In the Maṅgala literature we generally find Dharma in the form of Viṣṇu of dark blue colour with four hands with the conch-shell, disc (cakra), mace (gadā) and lotus; he has ear-rings, his Kaustubha jewel is suspended on his chest, he has his yellow garment and lotus-eyes and he is with his mount Garuḍa. Whenever we find the Lord appearing before the devotee, the devotee would never believe him to be Dharma unless and until he would appear before him in his form of Viṣṇu with four hands. A typical case is the trouble that was created by a dog in the way when Dharma was proceeding to Hākanda to rise in the west at the request of his devotee Lāusen. The dog obstinately obstructed the path of the Lord and would not allow him to pass on without disclosing his identity. The Lord told him that he was Dharma himself; but the dog intentionally refused to believe him to be Dharma unless and until he was in his form with four hands and in blue colour; at last the Lord had to comply with the request of the devout dog and assumed the form of Viṣṇu, and when the Lord asked the dog to pray for any boon it liked, the dog asked the boon of being a Tulasī-leaf so that he might have the rare fortune of sticking to the lotus feet of the Lord constantly. In the Dharma-pūjā-vidhāna and some of the Dharma-maṅgalas the ten incarnations of Viṣṇu have been described as the ten incarnations of Dharma. The Dharma-ṭhākura of Mayanā-pur is known as Yātrā-siddhi and the people of the locality believe Yātrā-siddhi to be identical with Viṣṇu. In the work entitled Yātrā-siddhi-rāyera Paddhati there is a Sanskrit hymn addressed to Dharma; the poet of the work (which seems to be very recent in origin) has gone even so far as to make Lord Dharma indulge in love-dalliances.

1 See the chapter on Paścima-udaya, found in almost all the Dharma-maṅgalas.
3 Vide, B.S.P.P., B.S., 1813, No. 2.
with the cowherd girls in the water of the river Ballukā.¹
In the Dharma-mailsalas devotees have, in connection
with the praise of the Lord, always referred to many of the
Purāṇic incidents where the Lord had shown kindness to
his devotees and given them proper shelter. It is mentioned
that Dharma protected Prahlāda from the hands of Hiranyaka-
sipu, gave shelter to Dhruva and placed him in the
fixed heavenly region, saved Sudhanvā and Ajāmila, pro-
tected the Pāṇḍavas in all their calamities, saved the honour
and chastity of Draupadi when she was being molested
by the evil sons of Dhrūtarāṣṭra; he was all through the
charioteer of Arjuna, killed the demon Rāvana and saved
Sītā, deceived Brahmā, the creator, and taught him a
very good lesson in the land of Vṛndāvana as a cowherd
boy and had all sorts of love-dalliances with the cowherd
girls of Vṛndāvana. These and many such other descriptions
of Dharma-thākura abound in almost all the Dharma-
maṅgalas, where we find nothing but a list of some of the
more important incidents associated with the different
incarnations of Viṣṇu jotted down pell-mell.

(B) Dharma as Rāma

The identification of Dharma-thākura with Rāma in the
Dharma-mailsalas has been brought about mainly through
the mediacy of Hanūmān. In the liturgical works Hanūmān
is only one of the four Koṭālas (gate-keepers) of Dharma,
but in the Dharma-mailsalas he is sometimes the mount of
Dharma, sometimes the counsellor and the conscience-
keeper of the Lord. In the Rg-Veda Ulūka (the owl) has
been described as the mount of Dharma-rāja Yama, and
probably the tradition has come down to the Dharmites;²

¹ prabhinnā-ñjana-ballukā-jala-keli-kalotukam
yodhayantaṁ vihārantanāṁ cakraṁ kuvaṁ gopān etc. ||
² Much speculations are made by scholars as to the exact nature and
significance of this Mount Ullūka or Uluka associated with Dharma, and it is also
a matter of controversy whether Uluka here is actually the bird owl, or is any
other personality. As a matter of fact in the Śānyā-purāṇa and also in the Dharma-
pājā-vidhāna Uluka is more a personality than a mere bird. He is often called a
sage or the great sage (Muni or Mahā-muni). From the very beginning Dharma-
thākura did nothing without the advice of Uluka and in fact the latter seems to be
much wiser than the lord himself. But in the Dharma-mailsalas Uluka is gene-
really depicted as the bird owl and in the legend of Hariścandra of the Dharma-
but in later times Ulûka seems to have practically been outstretched by Hanûmân. Hanûmân, the ape-god, has a special place in the history of our literature. However strong in their supernatural power and in their tenacity of purpose in quarrels and intrigues, the gods and goddesses of our literature seem to have been all through very weak physically, and whenever any gigantic work had to be performed, Hanûmân was invariably approached by all the gods and goddesses. We find him also a good assistant to Viśvakarmā, the great mechanic of the universe. Hanûmân, therefore, served not only Rāma-candra of the Bengali Rāmāyaṇa—as he has served Caṇḍi in the Caṇḍi-maṅgalas, Manasā, the serpent goddess, in the Manasā-maṅgalas, and every one took advantage of his gigantic physical strength and his obedient nature. Dharma-thākura, therefore, was wise enough to have Hanûmân constantly at his disposal to have all the difficult tasks done by him. But by being thus constantly accompanied and obeyed by Hanûmân, Dharma-thākura could no longer retain his Dharma-nature and gradually became transformed into Rāma-candra himself.

maṅgalas he plays an important part. The owl, which was the Mount of Dharma, was once sitting on the branch of a tree, when he was pierced through by an arrow aimed at by Luhicandra, son of Hariścandra; the bird cursed the family of Hariścandra and said that Hariścandra would leave no posterity; it is generally with this curse of the bird Uluka that the Hariścandra legend begins. Saving a few places where Uluka is admitted to be the sage Uluka and the counsellor of Dharma, Uluka is depicted in the Dharma-maṅgalas as a mere bird, the place of sage Uluka being practically usurped by Hanûmân. The name Uluka, however, is well-known in Purānic literature as the name of different notable personalities. In the Purānas Uluka is a name of Indra himself; another Uluka was the son of sage Viśvāmitra,—another the son of Śakuni. In the Mahābhārata we find mention of a king of the name of Uluka; another Uluka was an ambassador in the Mahābhārata. Again the Vaiśeṣika system of Indian Philosophy is also known as the philosophy of Uluka; in the Vaiśeṣika system Dharma has variously been explained (of course, in a sense entirely different from that of the Dharma of the Dharma cult). Mr. B. K. Chatterjee in his introduction to the Dharma-maṅgala of Mayūra-bhaṭṭa is disposed to think that the Dharma cult of Bengal may be a continuation of the religious cult propounded by Uluka in a very early period, and hence is the importance of Uluka in the Dharma-maṅgalas. But such a surmise does not seem to us plausible at all for various reasons. There is nothing in the Dharma cult which can even very remotely be associated with anything of the Vaiśeṣika system; moreover, it is doubtful whether the Vaiśeṣika system of thought represents any religious sect. If the religious doctrines of Uluka were something different, that being entirely unknown to us, the question of the possibility of its relation with the Dharma cult cannot be decided. It should also be remembered in this connection that far from representing any philosophical school, the Dharma cult of Bengal, as we have repeatedly pointed out, cannot be said to represent even any particular religious school.
We find in the Dharma-maṅgalas that whenever Dharma-\text{-}ṭākura asks Hanūmān to do some arduous and hazardous work, Hanūmān refers to all his (Hanūmān’s) heroic deeds of the Rāmāyaṇic period and says that if it were possible for him to do all those great things for the lord at that time, there is no reason why it should not be possible for him to do the same once more for the lord. The lord also occasionally refers to the valour and obedience of Hanūmān that he had shown formerly on various occasions.

As a matter of fact we find Hanūmān often performing the same kind of wonderful feats for the lord in the Dharma-maṅgalas as he did in the Rāmāyaṇas. We have sufficient reasons to believe that at least some of the poets of the Dharma-maṅgalas, such as Ghana-rāma, Sītārāma-dāsa, Rāma-nārāyaṇa and others were devoted to Rāma if they were devoted to any particular deity at all. Ghana-rāma, in many of his colophons, states that his mind is a bee which constantly sticks to the lotus feet of Rāma-candra. Sītārāma-dāsa and others also begin their books or the chapters therein with salutation to Rāma, who is said to be Dharma.

(iv) \textit{The Description of Dharma As All-White}

One very significant point is that the complexion of Dharma-ṭākura is white, and not only that, everything associated with him is white. In the Dharma-pūjā-vidhāna he has been saluted in his form of pure white colour resembling the colour of a fresh Kunda flower and the refreshed moon (dhauta-kundendu-dhavala). He wears white garment and bears a white umbrella. His throne or seat is also described white. In his white form he is associated with pure intelligence-stuff. He wears a white garland and also a...

---

1 As a typical instance compare the dialogue between Dharma and Hanūmān when the former was requesting the latter to protect Lāusen in his (i.e., Lāusen’s) childhood from the hands of the thieves.

2 As an instance we may point out that when Lāusen was crossing the river Ajay to attack Ichāi-ghoṣ he was captured and brought a victim to the Netherlands (Pāṭāla) by the river herself; to this Dharma became perturbed and sent Hanūmān to do the needful. Hanūmān went to the place of action and put all the water of the river Ajay into cavities of his ears; the river begged pardon, released Lāusen and then and then only was her water released. Dhm. of Rāma-nārāyaṇa, Ḍhekura-pāṭā, MS. (C. U. No. 2454) pp. 5(A)-5(B).

3 In the Vīnu-dharmottara Dharma has been described as of four faces, four hands, adorned with ornaments and of white complexions.

4 P. 76.

5 \textit{Ibid.}, p. 81.

6 \textit{Ibid.}, p. 84.
white sacred thread. He has a white disc in his hand, white hair on his head and white horses with his white throne. Clad all in white and seated on the white seat that stainless one moves in the chariot of swans, which are also of pure white colour. In the Śūnya-purāṇa we see that there are white flags on the gate of Dharma, and he is pleased to sit on the white seat being clad in white garment. In Ghana-rāma we find that the lord was worshipped in all ages with white flowers. Even when in his way to Hākanda to rise in the west in the form of a Brahmacārin with a golden colour and red garments, with the bowl and kushagrass in hand and with rosary and frontal marks, Dharma-ṭhākura could not dispense with his old white umbrella. In the fragmentary verses that are recited in the ceremony known as the Gājana of Dharma (and in the Gājana of Śiva in East Bengal) we find the same description of Dharma as all white.

The white-complexioned god of the Hindu Pantheon is lord Śiva. In popular meditation he has been compared to the silver mountain (rajata-giri-nibha). In the Tantras he is the Śveta-bindu (or the white matter) as opposed to Śakti who is the rakta-bindu (or the red matter); he resides in the snow white mountain of Kailāsa. The other popular Hindu deity of white colour is the goddess Sarasvatī, the goddess of learning. She is herself white, is clad in white garment, sits on a white lotus, and has the white swan as

5 Śūnya-purāṇa, p. 67, p. 69, p. 149. Cf. also, Ibid., p. 218.  
6 P. 176.  
7 P. 260. Cf. also. Anādi-maṅgala of Rāma-dās Adak, p. 34. Mānik Gāṅgu says that Dharma has white seat, white paste of sandal besmeared on his body; he has white cloth, white cāmara and a pair of white sandals on his feet (Dhm. of M. Gāṅguli, p. 1). In other places we find that Dharma has white glow around his body, white cloth, and ornaments; he is besmeared with white sandal-paste; he puts on white shoes and sits on a white throne; he has white frontal mark, white and brilliant matted hair, and a garland of white moons; he has white seat with a white canopy, and with white flags, and his temple is lighted with white glow (Ibid., p. 5, p. 33, p. 212, etc.). White is his residence, white his house and white is the pedestal of the lord with everything else white around. Ibid., p. 48; see also p. 55.  
8 Vid. Ādīner Gambhīrā by Haridās Pālit, p. 25. See also p. 83. Similar verses are also found among the fragmentary verses we have in our collection in connection with the Nila-pajā of East Bengal of which we have already spoken.  
9 Cf. the meditation of Sarvasvati:—

yā kunte-ndu-tuṣāra-hāra-dhavalā yā śveta-padmā-sanā
yā viṃśa-hara-dānḍa-maṅḍita-kārā yā subhra-vastra-ṛtāl etc.
her mount. It is customary to worship her with all kinds of white articles; she loves white sandal-paste, white paddy, white flowers, fried paddy of white colour, white curd, etc. In the province of Buddhism also we meet with various form of Sarasvatī, but her pure white colour is generally maintained.

The white colour of Śiva and Sarasvatī seems to have some metaphysical significance. White colour represents perfect purity and knowledge. Metaphysically Śiva is pure consciousness, perfect enlightenment, he is pure intelligence-stuff (viśuddha-sattva), and the white colour of the lord bears a subtle harmony with the metaphysical nature of the lord. Sarasvatī also represents learning and wisdom—she stands for perfect enlightenment. In some of the Purāṇas she has been conceived as representing the Sattva-guṇa of the primordial goddess, who is called Ādyā-śakti or Mahālakṣmī, the other two guṇas viz., Rajas (energy) and Tamas (inertia) being represented by Lakṣmī and Mahākālī respectively. In the Sāmkhya philosophy pure intelligence-stuff (Sattva) has been spoken of as of pure white colour, Rajas or energy of red colour, Tamas or inertia of black colour. It is for this reason that the colour of Sarasvatī is pure white and everything associated with her and her worship is also white.

Cf. also:

taruṇa-śakalam īndor vihrati śubhra-kāntiḥ
kuca-bhara-namitaṁśi sannisaṁ-aśiñha-bhej 1

Also—

viśada-kusuma-tuṣṭa puṇḍartika-paviṣṭā
dhavalā-vasana-vetā mālāti-baddha-keśī 1
śaśadhara-kara-varnā śubhra-tāṣaṇa-karyā, etc.

1 It is noticeable in this connection that in the autumnal worship of goddess Lakṣmī, which is widely known as the worship of Kojāgara-Lakṣmī all the articles of worship are prescribed to be white; even the food and sweet-meats to be offered to her should preferably be white. In this, however, there seems to have been something like a popular confusion. In our religious history Lakṣmī and Sarasvatī have sometimes been confused one for the other, and this will explain the worship of Sarasvatī on the white Pāñcami (i.e., the fifth day of new moon) of the month of Māgha, which was most probably originally the date for the worship of Lakṣmī as the very name Śri-pāñcaṁ will indicate (see Sarasvatī by Mr. Amulya Caran Vidyābhūṣana, Vol. I). May we infer that as we have the worship of Sarasvatī in the Śri-pāñcum of the month of Māgha in the place of the worship of Lakṣmī, so we have the worship of Lakṣmī on the full-moon night of autumn in the place of the worship of Sarasvatī and hence perhaps is the importance of all white articles in the Kojāgara-Lakṣmī’s worship?

2 In literature, however, white colour also represents fame and smile (Cf. yaṣasī dhasalatā varnyate hāsaśkrityoḥ—Sūktya-darpaṇa).

Coming to Buddhism we find that when Buddha began to be docetically conceived, he was conceived as the embodiment of perfect purity and perfect enlightenment. He was pure-consciousness (vijñāpti-mātrata or vijñāna-dhātu) as the ultimate reality,—he is perfect knowledge or wisdom. He has often been described as effulgent by nature (prakṛti-prabhāsvara) and as radiating light of knowledge (prajñā-loka). Round the physical form of historical Buddha as Siddhārtha or Śakya-sīṃha there has always been a glow of perfect purity and enlightenment. Before giving birth to Buddha, Māyā, his mother, dreamt that a white elephant entered her womb and this predicted the birth of Buddha who would attain perfect enlightenment. This notion of perfect purity and enlightenment as the ultimate nature of Buddha or rather of the supreme deity (Bhagavān) was to a great extent traditionally carried down even to the latter periods of Tāntricism. It is, therefore, not very unlikely that in the popular description of Dharma-ṭhākura as all white and having everything white associated with him we have an unconscious mixture of the notions of Śiva and Buddha.
CHAPTER XIII

THE THEORY OF THE PAñḌITAS, KOTĀLAS, ĀMINĪS, ETC.

Lord Dharma has five Pañḍitas in the five ages, Setāi in the golden age (Satya-yuga), Nilāi in the silver age (Tretā-yuga), Kaṁsāi in the copper age (Dvāpara-yuga), Rāmāi in the iron age ((Kali-yuga) and Gomśāi in the void-age or the age to come (Śūnya-yuga or Anāgata-yuga). Setāi is white in colour, Nilāi is blue, Kaṁsāi yellow, Rāmāi red and Gomśāi green. The five Pañḍitas are really the five priests of Dharma in the five ages including the age to come.¹ But at the time of the worship of Dharma all the five ages meet together with all the five Pañḍitas, whom we find placed in the five quarters, and these five quarters are again represented by the five gates of the temple of Dharma facing the five quarters. This theory of the gates in the different directions with respective presiding deities over them is also found in the Gājana songs of Śiva still now current in West Bengal as well as in East Bengal. In the versions of West Bengal the presiding deities over the southern, western, northern and eastern gates are Jagannātha, Ekādaśa Bhīma, the Sun (Bhānu-bhāskara-rāya) and Kāmākhya of Kāma-rūpa respectively.² In the versions of East Bengal the deities in the west, south, east and north are Jagannātha, Vaidyanātha, Śrī-muṇḍa-cakra-vāhinī and Śrī-sabhā-liṅga-vāhinī respectively.³ Sometimes Jagannātha, Kṣīra-nādi-sāgara, Sūrya-divākara (the sun) and the Himalayas are also saluted in the four directions.⁴

The five priests in the five quarters have again five Kotālas, or guards or rather gate-keepers with them, viz., Candra (the moon) in the west, Hanūmān in the south, Sūrya (the sun) in the east, Garuḍa in the north and

¹ The tradition of Pañḍita Gomśāi is not found in all the descriptions.

⁴ See Vaṅga-sāhitya-paricaya, Part I, pp. 159-60.
Ulūka in the void. The Koṭālas, as they are depicted in the Śūnya-purāṇa, seem to be so many attendants on the priests and gate-keepers in the five directions of the Dharma temple; they open doors to the visitors and again shut them up. The association of the sun and the moon with the east and the west is well-known, and the association of Hanūmān with the south is also well-known through the stories of the Rāmāyaṇa (Ceylon, which was the field of activity of Hanūmān being situated to the south of India). So the appointment of these three Koṭālas in the three quarters is easily explicable. Guruḍa and Ulūka are well-known as the mounts of Viṣṇu and Dharma-ṭhākura respectively. As Hanūmān, associated with the south, happens to be something like the mount of Rāma-candra, it is perhaps by the law of association that the two other well-known mounts are placed in the other two quarters. In the Dharma-pūjā-vidhāna, however, the Koṭālas or the guards are differentiated from the gate-keepers (Dvāri or Dvāra-pāla), who are again attended by four Pātras (attendants). The four gate-keepers in the four quarters (the fifth gate of void being omitted here) are, Jharjarhari-sundara (or Jharjarharikā) or Mahākāla in the west, Jambhava or Tīkṣṇa-damśtrā in the south, Mahākāya in the east, and Nandīdeva in the north; and the Pātras are Paḍihāra, Hanūmān, Dāmarāśāṇī and Kāmadeva respectively. We have somewhat detailed description of these Dvāra-pālas in the Dharma-pūjā-vidhāna.

The Paṇḍitas of the five ages are associated with different number of followers, different Āminīs or Ghaṭa-dāsis who are female attendants on the Lord. The whole thing can be illustrated with the help of the following Chart (the discrepancies of the descriptions being neglected).

This theory of the five Paṇḍitas, Koṭālas, Āminīs, etc., is nothing but a popular adoption of the later Buddhist theory of the Pañca-tathāgatas, also known as the five Dhyāṇī Buddhas.1 With the growth of the docetic conceptions in Mahāyāna Buddhism the five skandhas or elements began to have ontological significance and gradually gave rise

to the conception of five deities. In the Pañca-tathāgata-mudrā-vivaraṇa of the Advaya-vajra-saṃgraha we find that the five Tathāgatas are but the modes and modifications of the Dharma-kāya of the Vajrasattva. These five Tathāgatas, though originally conceived as the five deities over the five skandhas, are later on regarded as the five presiding deities over the five gross elements (viz., earth, water, fire, air and ether) and the five senses (viz., senses of vision, taste, hearing, smell and touch). In later Buddhist esoteric literature these deities are described with their Bodhisattvas, human Buddhas (Mānuśi Buddha), Śakti (female counterpart), mounts (vāhana), postures (mudrā), crest, family (kula), bija-mantra etc. They are again associated with the five gross elements (pañca-bhūta), five kinds of sense perception and the five sense organs. They are again located in the five places within the human body. We are giving a chart overleaf of the whole thing, wherein the controversies over the details are ignored.¹

If we put side by side and compare the two charts, one illustrating the theory of the five Tathāgatas, or the five Dhyāni Buddhas and the other illustrating the theory of the five Pañditas of the Dharma cult, no room will be left for doubting the fact that the latter is but a transformed version of the former. With the five Tathāgatas and the five Pañditas we may compare also the popular Islamic tradition of the five Pirs (or saints). It may also be cursorily noticed that the Kabir Panthis have the belief that the Sat Purusa (i.e. the Supreme Being) has four different messengers in the four ages, viz., Sat Sukrit in the Satya-yuga, Munin-darji in the Tretā, Karuṇāmaya Rṣi in the Dwāpara and Kabir Saheb in the Kali.

Already in the Hevajra-tantra we find that there are four corners and four gates or doors of the Maṇḍala or Cakra (mystic diagram) of goddess Prajñā and four are the

Śaktis in charge of the four gates; they are Gaurī in the east, Caurī in the south, Vetāli in the west and Ghasmāri in the north; there are other two goddesses, viz., Bhūcarī and Khecarī in the downward (adhas) and upward (ūrdhva) directions.¹ These goddesses in the different directions are again said to be the presiding Śaktis over the five sense-perceptions. Again the presiding Śaktis over the five Skandhas are said to be Vajrā, Gaurī, Caurī, Vajra-yogini and Nairātya-yogini respectively.² These goddesses are placed in the different quarters.³ Without entering into the anomalous details it will be sufficient for us to note that the conception of the four gates or doors were already there in Tāntric Buddhism. In the exoteric form of northern Buddhism we find the theory of the five Buddhas represented in the Buddhist Stūpas or Caityas of latter time, where one of the five Buddhas was given prominence to be the Lord Supreme and was placed in the centre and the other four were placed on the four gates or doors on the four sides. Such a scheme is to be found also in the sculptural representation of the later Buddhist Stūpas or Caityas. Esoterically, however, these Tathāgatas and also their Śaktis are placed in the central, eastern, southern, western and northern direc-

tions of the mystic diagram (Maṇḍala) of secret practices. In latter times all these esoteric and exoteric traditions transformed themselves into the scheme of the five gates (including the void-gate) of the temple of Dharma, where the five Tathāgatas or the five Buddhas have become the five worshippers of lord Dharma in the five ages in the form of the five Paṇḍitas.

The tradition that there are different deities presiding over the different quarters is, however, as old as the Vedas. Thus in the Atharva-veda we find that, of the Eastern quarter Agni is the overlord, black serpent is the defender, the Ādityas are the arrows, and homage is paid to the overlord, the defender and the arrows. Similarly, of the Southern quarter Indra is the overlord, cross-lined (serpent) defender, the Fathers the arrows; of the Western quarter Varuṇa is the overlord, the adder defender, food the arrows; of the Northern quarter Soma is the overlord, the constrictor defender and the thunder-bolt arrows, of the fixed quarter (dhruva dik) Viṣṇu is the overlord, the serpent with black-spotted neck defender, the plants the arrows; of the upward quarter Brhaspati is the overlord, white serpent defender and rain the arrows.¹

It will be very interesting also to note, in connection with this Buddhist theory of the Paṇca-tathāgatas and their Saktis and the corresponding theory of the five Paṇḍitas with the five Āminis as found in the Dharma cult, that this theory has its correspondence also with the Hindu Tantras. We have seen that the five Tathāgatas, though originally said to be five deities over the five Skandhas, are associated with the five gross elements. These five elements have been represented in the Hindu Tantras by the five (out of the six) lotuses or plexuses, viz., Mūlādhāra representing earth, Svādhiṣṭhāna representing water, Manipura representing fire, Anāhata air and Viśuddha ether. There are five presiding gods and five goddesses associated with these lotuses. The gods are, Brahmā, Viṣṇu, Rudra, Iśāna, and Mahādeva respectively; and the goddesses associated with the lotuses are Ďākinī, Rākinī, Lākinī, Kākinī and Śākinī respectively. The bija-

¹ (3.27.-1-6).
mantras of the lotuses are lam, hâm, ra mâ, jam, and ham; the bija-mantras of the five Dhyâni Buddhas are also almost exactly the same (i.e., l, b, r, y, and om). The first three gods associated with these lotuses are respectively of red, blue and vermilion colour, and the last two are white. The goddesses are of red, deep blue, dark-green, smoky and white colour.

In the colour scheme, however, there is perfect correspondence between the Buddhist and the Dharmite tradition; they have a faint resemblance with the colour scheme of the Tantras also. The five elements in the five plexuses, viz., earth, water, fire, air and sound are described in some of the texts as of yellow, white, red, smoky and blue colour respectively. Again we find in the Purânic literature that there was the tradition of God's having four different colours in the four different ages. God was of white colour in the Satya-yuga, red colour in the Treta-yuga, yellow in the Dvâpara-yuga and black in the Kali-yuga.¹ Rûpa-gosvâmi speaks of the colour scheme as white, red, dark-green and black.² It may also be noted that in the Anâgata-varîsa (a Pâli text describing the tradition of the advent of Maitreya, the future Buddha), there is the description of four gates in the capital city Ketumati and in the four gates there will be four Kalpa-trees of the blue, yellow, red and white colour.³ In the Chândogyo-panisât we find that of the four Vedas, the first, i.e., the Rg-veda is spoken of as of the colour of the white portion of the eye, and the second, i.e., the Sâma-veda is spoken of as of the colour of the deep blue portion of the eye.⁴ Again, of the five material elements Tejas is described as red, water as white an earth as black.⁵ Again, the nerves of the body have been described as secreting four kinds of liquids, which are of white, blue, yellow and red colour.⁶

⁴ Chândogyâ, (1. 7. 4).
⁵ Ibid. (6/4).
⁶ Ibid. (8.6.1).
About the colour of the different articles associated with the worship of Dhārma in the five gates, it will be seen that the articles associated with the western gate, which in its turn is associated with Setāī Pāṇḍita, are all white in colour; similar is the colour scheme of the articles associated with the other gates. Again, as for the metal of the articles it may be noticed that the articles associated with western gate, which is again connected with the Satya-yuga or the golden age, are all made up of gold; those of the southern gate, associated with the silver age, are all of silver; those of the eastern gate, associated with the copper age, are all of copper, those of the northern gate, associated with the iron age, are spoken of as made up of some lead metal, or, bell-metal, stone and brass; and those of the fifth gate, associated with the void age or the age to come, are all of diamond. The tradition of Gosāṇī Pāṇḍita of the age to come (Anāgata-yuga) may possibly have something to do with the tradition of advent of the future Buddha Maitreya in the Anāgata age, as it is described in the Pāli text Anāgata-vaṁsa.
CHAPTER XIV

COSMOGONICAL AND COSMOLOGICAL THEORIES IN OLD AND MEDIEVAL VERNACULAR LITERATURES

(1) A brief Exposition of the Theories

In the old and medieval vernaculars of India we find various theories about cosmogony and cosmology. In spite of the differences in details, there is a general similarity in the description. When we shall analyse the ideas found in these theories we shall find that here also, as in other cases, there is a great jumbling of ideas received from various sources of Indian philosophy, theology and mythology. Of all the descriptions found in the vernaculars, the descriptions contained in the literature of the Dharma cult of Bengal seem to be the most detailed and important, and we shall presently see that all the other descriptions found in other types of literature present a striking similarity with the descriptions found in the literature of the Dharma cult. Though the accounts given in the vernaculars are often extremely confused in nature, we must first of all attempt a very brief exposition of these cognate theories and our next and more important task will be to analyse them and to affiliate the constituent elements to the older thoughts and beliefs.¹

In the Śūnya-purāṇa we find that in the beginning there was nothing,—neither any linear mark, nor any form, nor any colour, nor any trace of anything; there was neither the sun nor the moon, nor the day nor the night. There was neither water, nor earth, nor the sky, nor the mountains. The universe was not,—neither was anything mobile or immobile, nor were the temples, nor the gods in them,—there were only all-pervading darkness and haze (dhundhukāra)—and in the infinite vacuum the Lord alone was moving in

¹ In this connection see introduction to the Śūnya-purāṇa (edited by Mr. C. Banerjee) by Dr. Shahidullah and Mr. B. Chatterjee.
the great void having nothing but void as his support. And in his absolute loneliness the Lord was thinking of creating something, and out of the great vacuum there came out the vital air of the Lord, from which came inhalation and exhalation; from these again proceeded great compassion and from that all the principles of illusion. Then there came out a bubble of water on which the Lord made his seat, but the bubble could not withstand the pressure of the Lord and burst into pieces leaving the Lord once more in the vacuum. Then the Lord sat fixed in the vacuum and in and through his compassion another personality of the name of Nirañjana came out of him. The latter, however, had no hands and legs,—neither had he any father and mother, nor was he born of the seed and the ovum, nor had he any other companion in the great void. This Nirañjana or Dharma then sat on the seat of compassion and passed full fourteen ages in the meditation on the Great (bambha-jāna). After fourteen ages of meditation Nirañjana yawned and from his high breath came out the bird Ullūka. The bird began to flee away from the Lord who was calling it from behind; but Ullūka got tired in the infinite void and came back to the Lord. The Lord then took compassion on Ullūka and made his seat on the back of the bird and once more passed fourteen years in meditation. In the meantime Ullūka became much fatigued with hunger and thirst and asked for some drink from the Lord. The Lord gave a little quantity of fluid from his mouth to the bird to drink. Ullūka drank the fluid, but some portion of it fell outside in the void and water came out of it, and both the Lord and his mount were floating on water. But in the heaving water both of them were being tossed roughly and a feather dropped from the body of the bird and the feather became a swan. The Lord then proposed to have some rest on the back of the swan, and the latter agreed, and the Lord once more passed several ages on the back of the swan. But the swan also got tired and flew away in the void leaving the Lord in water. The Lord then touched water with his lotus-like hand, whereby a tortoise came to being, and the Lord passed several ages in meditation on its back. The tortoise also got tired and flew away.
leaving the Lord and Ullūka on water. Ullūka then advised the Lord to create the world in water. With the instructions of Ullūka the Lord cast off on water his golden sacred-thread, which instantaneously became the serpent Vāsuki of thousand fangs. Then the Lord accumulated a little quantity of dusty substance from his nail and placed it in the form of the world on the head of the serpent Vāsuki. The Lord then went out with the Ullūka to visit the world and the world was increasing with the speed of the Lord. By roaming about in the world the Lord became tired and began to perspire and from the sweat of his body was produced the Ādyā-Śakti (the primordial energy). The Lord built a house for her and placed her there and after creating the river Ballukā engaged himself in meditation once more for fourteen ages. In the meantime Ādyā-Śakti grew young and from her youthful desires proceeded forth Kāma (Cupid) who was sent by Ādyā to the Lord. Kāma went to the Lord, aimed his arrow at him and the Lord was disturbed. The Lord came to know everything from Ullūka and put Kāma in an earthen pot and Kāma became transformed into poison. Ādyā, after some time, became unable to bear the burden of her youth and attempted to commit suicide by swallowing the contents of the earthen pot; but to her astonishment she became pregnant thereby. Three gods were then born to Ādyā, viz., Brahmā, Viṣṇu and Śiva. Just after their birth all the three went out for penance and meditation, and the Lord also went to test them in the form of a corpse flowing on water. Brahmā could not recognise the Lord in disguise, Viṣṇu also could not recognise him; it was only Śiva, who could recognise the Lord. The Lord became pleased with Śiva, and granted him three eyes (for all the three brothers were born blind). Subsequently at the request of Śiva the other two brothers, viz., Brahmā and Viṣṇu also received eye-sight with the sprinkling of the fluid from the mouth of the Lord. All the three brothers then went back to Ādyā, where they were entrusted by the Lord with the task of creation. Ādyā-Śakti was asked to be the wife of Śiva and to help him in the work of creation. Thus after entrusting the whole task of creation, preservation and destruction to the triad the Lord once more went to
the void and remained for ever seated on his mount Ullūka.¹

The fragmentary accounts of cosmogony found in the Dharma-pūjā-vidhāna also tally with those found in the Śûnya-purāṇa; the only difference is that Dharma Nirañjana came out of the formless absolute Lord in the form of a luminous body in the void and was asked to create the universe with his three qualities (guṇas), viz., sattva, rajas and tamas, personified as the triad Brahma, Viṣṇu and Śiva.²

In the Dharma-maṅgalas detailed accounts of cosmogony are found which, though slightly different in details, are substantially the same as found in the Śûnya-purāṇa. Thus almost a similar account of cosmology is found in the Dharma-maṅgala of Sahadev Cakravarti.³ The account given in the Dharma-maṅgala of Sītā-rām Dās also tallies with the account of the Śûnya-purāṇa almost verbatim; the only important deviation is that after the world was created Dharma himself assumed the form of a charming damsel and was then himself in union with her. Through their union three gods of the nature of the three guṇas were born to them.⁴

In the Anādi-maṅgala of Rāmdās Ādak⁵ we find that Mahāmāyā was produced from the left side of Dharma. Mahāmāyā or Ādyā-śakti attained her youth. Dharma proposed to Ullūka that as Ādyā was produced from the left part of his body, she should be the wife of the Lord. The proposal appeared obnoxiously repulsive to Ādyā, who tried to flee away in all the directions; but at last she had to give way and the marriage took place in the void through the mediation of Ullūka. Then follows the birth of the triad and the story of Dharma’s disguise to test them. Here also it was Śiva, who could recognise the Lord, and the propitiated Lord entrusted Śiva with the charge of creation. But Śiva, with the preponderance of tamas in him, created the Yakṣas, Rakṣas, ghosts, genii, demons and

many such other horrible beings. The Lord then put a check to Śiva and asked Brahmā to take the charge of creation. The Lord himself assumed the form of a bear and brought for him (Brahmā) the earth, which lay hidden in the netherland. Then follows the theory of the self-originated Brahmā and the Manus, the Dītis and the Aditis, etc., as it is found in the Purānic literature. In Ghana-rāma we find that in the primordial void and darkness the formless supreme Lord first revealed himself in a form which contained the potency of all creation. The Lord desired to create and from his desire for creation was born Prakṛti in the form of the most beautiful and charming woman,— and the mind of the Lord was disturbed at the sight of her beauty, and through the distubrance in his mind Prakṛti was infused with the three guṇas from which again were born the three gods, Brahmā, Viṣṇu and Śiva. Then follows the story of their penance and their test by Dharma in the guise of a corpse. Here also, as in the case of Rāmdās’s account, Śiva, who was first entrusted with the charge of creation, created all sorts of horrible beings and then the charge was transferred from him to Brahmā. From Prajāpati Brahmā was first produced Ahaṅkāra (egohood), from Ahaṅkāra proceeded the five elements and then the four sons of Brahmā (viz., Sanaka, Sananda, Sanat-kumāra and Sanātana) and so on as in the popular Purānic accounts. According to the account given by Māṇik Gaṅguli the triad with the essence of the guṇas was produced from the union of the Lord and Śakti and for the triad Śakti again divided herself into three goddesses, viz., Brahmāṇi, Vaiṣṇavī and Śaivi. Then follows the test of the triad. Here we find that all the three gods could recognise the Lord and did welcome him warmly and humbly and the Lord, pleased with the triad, entrusted them with the charge of creation, preservation and destruction. The three Śaktis, viz., Brahmāṇi, Vaiṣṇavī and Śaivi were then united with Brahmā, Viṣṇu and Śiva and the triad with their Śaktis created the manifold universe. The account given by Narasiṁha Vasu in

3 Dhm. of Māṇik Gaṅguli, pp. 9-11.
his Dharmāyana comes closer to the Sāṁkhya view of cosmology. From the desire of the Lord for creation in the primordial void Prakṛti was born in the form of a beautiful woman, and from the union of Prakṛti and the Lord was born a son of the name of Maharita (i.e., mahat) and from Maharita came three Ahamkāras of the nature of three guṇas, and from them were born the triad.¹ Then follows the story of the test of the triad and Śiva was entrusted with the charge of creation. But in actual creation we find the Purānic story that the Lord with his mysterious Māyā (i.e. principle of creative illusion) slept on the snake Ananta and from the lotus of his navel proceeded Brahmā, who was always thinking of creation.² Brahmā had four sons proceeding from his desire (mānasa-putra), viz., Sanaka, Sanātana, Sananda and Sanat-kumāra. And then came the theory of the Manus, Diti, Aditi and others just as in the Purāṇas.

In the Gājana songs of West Bengal and East Bengal we find the same conception of cosmogony. In the verses collected by Mr. Haridās Pāliit in his book Ādyer Gambhirā we find that in the beginning there was nothing and the Lord (Gosāṇī) was in the form of the void in the boundless void.³ Then there was water and the Lord was floating (?) in his void-form.⁴ He then ordered a crab to sink down and to bring earth from the bottom,—and the crab brought earth for the Lord. According to one version⁵ the Lord made the world with a portion of earth brought by the crab and the world was then placed on the back of a tortoise. According to another version the earth, brought by the crab was of the nature of gold and from it there was an egg and that egg burst into two (one half becoming the earth and the other half the sky?) and the triad, Brahmā, Viṣṇu and Śiva then created the world.⁶

In the fragmentary verses, which the present writer

collected from the district of Bakergunge in East Bengal, and which are sung on the occasion of the *Nila-pūjā* at the end of the month of *Caitra* similar cosmogonical ideas are found. In one verse we find,—"In the beginning there was neither any cause, nor reason, nor the sky; neither was there water nor earth; neither the within, nor the without, and the Lord was all alone. The Lord then perspired and from his sweat was created the universe."¹ In another song we find that Dharma-rāja, after travelling long on his mount, perspired and from his sweat a phantom was produced and the phantom became magically transformed into a girl; she stood before the Lord and the Lord got enamoured with her; she, however, began to flee in the western direction to escape his hands and rebuked the shameless father who was mad after his own daughter; but the Lord paid no heed to her words and pursued her madly.²

In connection with the travelling of Śiva as a mendicant in the market-place (*bajār-sannyāsa*), which is also included in the ceremonies on occasion of the *Nila-pūjā*, we find the following verse:—"Void was the market place, the earth was not,—*Sannyāsins* (those that have renounced the world), *Tapasvins* (those who practise penances) and *Rṣis* (sages) there were none; neither was the day, nor the night. How was the Lord at that time? All the existent was void, the non-existent was also void and the Lord of void was of the body of void; the earth with the seven islands was immersed in water in the void. What was the state of the Lord at that time? He was of the form of an egg. There was no earth, and the boar brought it with the help of his teeth. Lord Śiva then created the earth with the dusty substance of

etc.
his body." There is also mention of Nila and Anila in the verses in a rather unmeaning and confused manner.\(^1\)

In the Caṇḍi-maṅgalas of Bengal we find almost a similar conception of cosmogony and cosmology. In the Caṇḍi-maṅgala of Māṇik Datta, who flourished in or before the fifteenth century, we find a confused echo of the cosmogonical theory found in the Śūnya-purāṇa.\(^2\) In the Caṇḍi-maṅgala of Mukundarām Cakravartī (of the sixteenth century) we find that the primordial Lord (Ādi-deva) was thinking of creation in the void, and when he was thus pondering on, Prakṛti came out of his body, and Prakṛti, who was the manifestation of the power (Śakti) of the Ādi-deva, was called the Ādi-devī. The Lord infused his energy in Prakṛti and thereby a son of the name of Mahān (i.e. Mahat) was born to them; the son of Mahat was Ahamkāra and from Ahamkāra were born the five (elements), viz., earth, water, fire, air and ether. Again one Lord became three (the Triad) according to the guṇas. Of the Triad Brahmā had four sons born of his desire (māṇasa-putra), but all the four went away for penance leaving behind the phenomenal world. Brahmā, however, got angry and from his anger was born Rudra, who was given six female companions (viz. Dhṛiti, Vṛddhi, Iśi, Vaśi, Śivā and Aṇimā) and was ordered to create the creatures. Śiva began to create horrible creatures and was at once stopped by Brahmā. For the purpose of creation Brahmā

then divided his body into two parts, one as the female and the other as the male (the latter being named as Svayambhuva Manu). This latter was then requested by Brahmā to create progeny, but Svayambhuva Manu wanted land where the created beings might have their abode. At this Brahmā became perturbed and from his nostril came out the boar who went to the netherland and brought back on his long teeth the earth that lay hidden there; and then creation began as it is described in the Purāṇas.\(^1\) The account given in the Caṇḍī-maṅgala of Mādhavacārya, though substantially the same as described above, shows a greater amount of confusion of ideas. Here the Devī was created from the breath of the Lord and Brahmā was born in the navel. Of the triad Brahmā, Viṣṇu and Śiva, the Devī was given to the last for creation. In the Annadā-maṅgala of Bhārata-candra also we find a similar account. The Bisahari Padmā-purāṇa of Jīvan Maitra also contains a cosmogonical account of the same nature.\(^2\)

The cosmogonical ideas of the literature of the Nāth cult of Bengal also resemble to a great extent the ideas described above. According to the accounts given in the Anādi-purāṇa or Anādi-caritra, the Hāda-mālā-grantha, the Yogi-tantra-kalā etc.,\(^3\) Alek-nātha (the incomprehensible one) or Niraṇjana Gosāmi created Anādi Dharma-nātha and from the liquid of the mouth of the former there was water on which Anādi-nātha made his seat. Then Alek-nātha created goddess Kāketukā from the energy of his own body, and she was put to death under the pressure of the feet of Anādi. Ādi-devī, or goddess Kāketukā was then revived through the grace of the Lord and he instructed Anādi to create the beings in union with Ādi. Then the creation began. The serpent Vāsuki was created and was placed in the netherland and on the fang of it was placed the earth of a triangular shape. Then from the fist of Dharma were born the triad, who were deaf and

dumb. Then follows a somewhat different version of the test of the triad.

Gorakṣa-vijaya contains a cosmogonical account, which, in spite of slight differences, presents on the whole the same view as described above. In the beginning there was only the Karatār and nothing else. The Karatār himself was not self-conscious,—it was the potentiality in him that made him self-conscious in the process of manifestation. His manifested form followed his self-consciousness and the principle of change and transformation followed from his manifestation in a form.¹ And then there was the desire of the Lord to create the world and for the purpose he produced Dharma Niraṅjana. Dharma was first in a slumbering state, and when he became awakened he found some shadowy entity by his side, who was none but Ādyā (i.e., Ādyā Śakti). The Lord attempted to capture her, but she tried to escape. She was then captured by force and through the union of the Lord and the Ādyā the sun, the moon, the earth and the stars were produced. From the Huṃkāra of the Lord was born Brahmā and from his mouth was Viṣṇu. Through the mutual attraction and affection of Ādi and Anādi (Ādi represents Śakti who has a beginning and Anādi represents the beginningless principle) there was sweat and soul, the ego, the four Vedas and fourteen scriptures; water and earth and all the other beings were produced from this sweat.² From the different parts of the body of Anādyā emanated Śiva and Gaurī (who is the mother of the universe) and all the other Siddhas. The Lord then proposed that some one of them (i.e., either Śiva, or any of the Siddhas) should accept Gaurī as his wife. At this proposal all bent their head out of shame. The Lord then ordered Śiva to accept Gaurī, who (as Anādyā told) was but one with Śiva in her ultimate nature. In accordance with the decree of the Lord, Hara and Gaurī came down on earth and they were accompanied by the Siddhas. In his discussion with Ādyā, Anādyā says that he, as the ultimate reality, has an unchanging permanent nature of his

¹ Gorakṣa-vijaya, edited by Munsi Abdul Karim. Sāhitya-pariṣat Series No. 4, p. 1. Also see Appendix of the text, pp. 4-5.
² Gorakṣa-vijaya, Appendix (ka), alternative readings from MS. No. 5, p.1.
own, which is unspeakable, and in that unchanging ultimate nature he remains pervading the whole cosmos in his formless form. As there is the tree from the seed and the seed in the tree, so is the creation form Anādya and Anādya in creation. As cream is produced by the churning of milk, as fire is produced through the rubbing of two logs of wood, so also is the creation. As there is the cycle of the night of the new moon and of the full moon, so there is the process of creation and dissolution. A similar view of cosmogony is found in the Gopī-candrér Sannyās by Sukur Mahammad.¹

In some of the Vaiṣṇava Sahajiyā texts also we find a similar theory of cosmology, more confusedly mixed up with Vaiṣṇava theology and mythology.²

It is interesting to note in this connection that in course of the religious discussion that took place between a Portuguese Christian Missionary on the one hand and an orthodox Brahmin on the other in the Brāhma-Romāntyāthālik-sāṃvād,³ of Don Antonio we find ideas of cosmogony and cosmology strikingly similar even in details to the ideas found in the descriptions of the texts belonging to the Dharma cult, Caṇḍī cult and the Nāth cult. This fact clearly indicates that the ideas of cosmogony and cosmology described above are neither provincial nor sectarian in nature; on the other hand they represent the general ideas infiltrated in the mind of the masses.

The cosmogonical ideas and description found in the literature of some other vernaculars of India also bear striking resemblance to those found in Bengali. The cosmogonical descriptions found in the Vaiṣṇava literature of Orissa of the sixteenth century are almost the same as found in the Dharma-maṅgala literature of Bengal. As the point has been discussed and demonstrated in the work Modern Buddhism and its Followers in Orissa by N. N. Bose, we need not repeat it here.

The description of the primordial nihil and of the absolute Lord existing all alone in the void is also found in the poems

³ Edited by Dr. S. N. Sen, M.A., Ph.D., D.Lit., and published by the University of Calcutta.
of the Santa poets of Hindi literature. Thus Kabir says,—
When there was no air, and no water,
then who created the universe?
Then was no bud, no flower,
then no womb and no generation.
Then was no learning, no Veda,
then no word, no taste.
Then was no body, no dweller,
no regions below, no earth, no sky, no heaven.
Then was no Guru, no chela, no fathomable and
unfathomable,
no worship of Sagun and Nirgun, no two paths.¹
The creation is due to the activities of Nirañjana, and in the
beginning he alone was, and there was nothing else.²

In the Ād-maṅgal of Kabir and in his Ramaiṇis we find
that in the beginning was the Almighty One (Samaratha)—
and there was no second to the Lord. There first came
consciousness within himself and then proceeded the desire
for creation, and six Brahmās were created. The six failed
in their task of creation and a seventh was produced by the
Lord—and his name was Nirañjana. Nirañjana wanted
a bija-kheta (a field to sow in) for procreation and the Lord
created a woman for him and the woman had to be the
wife of Nirañjana against her will. This woman is none
but Māyā. Through the union of Nirañjana and Māyā
three sons of the nature of the three guṇas were born, they
were Brahmā, Viṣṇu and Maheśvara.³

Dādū also says that Nirañjana is never associated with
anything else;—water and earth, the static and the dynamic
—the earth and the sky, the sun and the moon, water and
air, day and night, heat and cold, hunger and thirst—
nothing can touch him—nothing can be associated with him.⁴

Sundar-dās also says that in the beginning Nirañjana
made out of his own self the five principles (pañca-tattva)

of the material elements and also the three guṇas. From rajas was Brahmā, from sattva was Viṣṇu and from tamas was Śaṅkara, and the three gods had Satya-loka. Vaikuṇṭha and Kailāsa as their respective abode. Three goddesses, viz., Brahmāṇī, Thākurāṇī and Bhavāṇī were then associated with them. From the triad, in association with their Śaktis, proceeded the universe with all its diversities. As it appears from the glimpses that are found in his works, Tulsī-dās also had a cognate cosmogonical view. The cosmos is produced from the Māyā of the Lord and the Māyā is conceived as the Ādi-śakti.

(ii) Analysis of the ideas of Cosmogony and Cosmology found in the Vernacular Literature

Let us now proceed with the task of analysing and examining the accounts found in the vernaculars and let us also see how far the ideas can be traced back to older theories, legends and myths. There is a marked tendency among some scholars to hold that the cosmogonical and the cosmological views discussed above are Buddhistic in origin. If we proceed on in a critical way we shall see that there is no distinctive nature of the views found in the vernaculars. As we have said, here there is but a popular and confused mixture of the cosmogonical and cosmological ideas found in the Vedic literature, in the Upaniṣads, the Sāṁkhya system, in the Purāṇic literature, in the Hindu Tantras and in the later phase of Mahāyāna Buddhism mainly expressed through the various Buddhist Tantras. Yet, if any character is to be given to them, it will be more correct to say that they are essentially Hindu; and even the Buddhistic elements are introduced in their Hinduised form.

Among the various accounts given in the vernaculars the first point to note is that in the beginning there was nothing, and the ultimate Being was floating as the Formless One in the infinite vacuum. The whole universe was then created by him from nothing. Or we shall find that there was the primordial darkness and water and the Lord was there in his formless existence. This idea is, however, to be met with first in the *Rg-veda*. There we find,—

"At that time there was neither the aught, nor the naught, neither the earth nor heaven above. What was there to cover all? Wherein was the abode of all? Was there water deep and fathomless?

"No death was then, nor immortality, no distinction between day and night. The One alone breathed without any air,—nothing existed other than that One.

"In the beginning there was darkness shrouded in darkness, indistinct was all—and water was everywhere. The All-pervading One was covered with all the non-existent, and through the *Tapas* or the divine effort arose the 'One'.'"'

The same idea is variously described in the Upaniśadic literature. In the *Śvetāśvataraopaniṣat* we find, "When there was neither darkness, nor day, nor night,—neither the existent nor the non-existent—there was only the All-good One (Śiva); He was changeless, He was the Adorable, He was the creator,—and from Him proceeded eternal enlightenment." In the *Taittiriyopaniṣat* it is said that the non-existent (*Asat*) was in the beginning and from the *Asat* arose the *Sat* and the *Sat* produced its own self by itself. The *Aitareyopaniṣat* says that in the beginning was the self (*Ālmā*) alone and nothing else; it observed itself (*tadaikṣata*) and the beings were produced thereby. Again we find that in the beginning was the *Asat* alone, and from the *Asat* arose the *Sat* and the *Sat* was one and without a second

in the beginning. The Sat desired that it would be many and energy (tejas) arose from it; from tejas was water (āp) and from āp was produced gross matter (anna).\(^1\) The Brhad-āranyaka says that the Brahman was alone in the beginning and from Him arose all gods and the universe in all its varieties.\(^2\) Again it is sometimes said that water alone was in the beginning,—from water arose Satya, from Satya arose the Brahman, from the Brahman Prajāpati (the lord or the creator of the beings) and from the Prajāpati were the gods.\(^3\) Again we find that water was in the beginning and therein was born Prajāpati in the lotus-leaf. He desired to create the universe and the universe gradually proceeded from his desire.\(^4\) The conception of the primordial water is as old as the Vedas\(^5\) and is very popular so far as the Purānic literature of India is concerned. A very popular conception found in the Purānic literature (and the conception is very old indeed) is that the Supreme Lord was floating in the primordial water and hence is the name Nārāyaṇa for him.\(^6\) In later Vaishnava literature we frequently find the Lord sleeping on the surface of the sea. This primordial water has often been philosophised as the water of original cause-potency (kāraṇa-vāri). With the account given by Māṇik Datta in his Caṇḍī-maṅgala that the Lord was floating on the surface of the primordial water with a lotus-leaf as his support, we may compare the following account given in the Śukla-yajur-veda,—“In the beginning was water and only water; and Prajāpati transformed him into air and accepted a Puṣkara-leaf as his support; but he was tossing and tossing etc.”\(^7\) As for the account given in many of the Maṅgala-kāvyas that the Lord brought to the surface of water the earth, submerged in water, in

the form of a boar, we may refer to the similar description found in the \textit{Sukla-yajur-veda}.\footnote{7.7.1.5.}

(B) The Conception of Nirañjana—a replica of Prajāpati Brahmā

In the next place we find that the Supreme Being in his state of the Absolute is not the creator of the universe. He produced Dharma or Nirañjana, from whom proceeded the universe, and all the vernacular poets are unanimous on the point. This idea also has its origin in the Vedic and the Upaniṣadic literature. The absolute reality in its unqualified qualitiless form is not the creator of the universe, for the Absolute is neither the Ens, nor the non-Ens,—neither existent, nor non-existent. The creator of the universe is, however, Prajāpati, or Brahmā or the Viśva-karmā as he has variously been conceived in the Vedic and Upaniṣadic literature. This Prajāpati or Brahmā, though often described as the most supreme of all the gods, the god of the gods, is never the same as the Absolute Brahman. In the Vedic literature we find that the vast universal process could not be explained with reference to the well-known gods; there was, therefore, naturally the tendency to conceive of a greater god, who represents no particular aspect or force of nature, but an unified conception representing something like the totality of the forces acting behind the universal process. He is the \textit{Hiranya-garbha}—the first radiant manifestation of the Supreme Unmanifest,—as the personification of the creative impulse and the creative force of the Unmanifest. It is said in the \textit{Rg-veda} (10.121) that the \textit{Hiranya-garbha} arose in the beginning; he as the lord of all the existent; he was the lord of the earth and the sky and he vested all creatures with life and breath; the gods do not dare disobey him, he is the god of the gods. In the Brāhmaṇas, Āraṇyakas and the Upaniṣads we find ample references to this Prajāpati Brahmā, also spoken of as the \textit{Hiranya-garbha}, who was the first created,—the first being,—the first born of all the gods. In the Brāhmaṇas and the Upaniṣads we always find Prajāpati Brahmā performing
penance for the purpose of creation. Sometimes it is said that Brahmā was born in the primordial water. The epithet Hiranya-garbha, applied to Brahmā, points to the fact that he was born of a golden egg supposed to have been formed out of the seed deposited in the water when they were produced as the first creation of the Supreme Lord. In the Śatapatha-brāhmaṇa (XI. I, 6. 1-11) we find that Prajāpati was born of a golden egg, which was produced by primordial water through penance. Thus it is said,— "In the beginning there existed here nothing but water, a sea of water. These water desired to propagate their kind. They tortured themselves, they mortified themselves. And when they had mortified themselves a golden egg originated in them. The year did not yet exist at that time; but as long as the duration of a year, this golden egg swam about. After a year a man arose out of it; that was Prajāpati."  

1 In the Chāndogya-upaniṣat it is said that in the beginning was the Asat; from the Asat there was the Sat and from the Sat originated an egg. After one year the egg split up into two and from the golden portion was created the region above and from the silver portion the earth below.  

2 We find somewhat detailed description of this Hiranya-garbha Brahmā also in the Manu-saṁhitā. There it is said that once this universe was shrouded in darkness and everything was imperceptible, indistinct—beyond all understanding and all kinds of intellectual comprehension—as if in deep sleep. Then the Self-existent Unmanifest Lord, with an impulse towards creation, manifested Himself in His radiant form, and that Incomprehensible All-pervading One created Himself in a form. With a view to create various kinds of beings from His own body He first created water and deposited His seed in it. The seed in the water transformed itself into a resplendent egg, from which was born Brahmā, the grand-father of all the worlds (sarva-loka-pitāmaha). The first person, created by the unmanifest cause-potency, which is eternal and is of the nature of both

---

1 A History of Indian Literature, by Winternitz, p. 223.
2 Chāndogya—(3.19).
Ens and non-Ens, is called Brahма.\(^1\) Brahма lived in that egg for full one year and after that broke it into two parts through the force of meditation; with the upper part of the egg he made heaven and with the lower part he made the earth, and in between the two regions was created the sky and the eight quarters, etc. Then follows the creation from Brahма, which of course, was in the line of the Sаmkhyya cosmology.\(^2\) In the vernaculars we find occasional references to this egg; and from what is discussed above about the nature and function of Prajāpati Brahма, it will be very clear to see that the conception of Niraɲjana, as we find variously described in the vernacular literatures, is nothing but a very popular representation of the older conception of Prajāpati Brahма.

We think, it will not be far wide of the mark to recall in this connection the Vedаntic conception of the two aspects of the ultimate reality or the Brahman, the unqualified in-active absolute aspect, which can only be negatively described; the other aspect is the qualified active aspect which has been described as the Īśvara. The Absolute is in no way related to this illusory world; it is the Īśvara, as associated with Māyā (nescience), that is responsible for the creation of this illusory world.

(C) The Primordial Goddess

The next point to notice is that lord Niraɲjana, who personified the creative impulse of the Absolute, desired to create the universe and from the desire emanated the primordial goddess, who is called Ādyā or Ādyā-śakti or Prakṛti or simply the Devī. This also is a very well-known theory absorbing in it many traditions derived from various sources. Already in the Brhad-āranyakopaniṣat we find that in the beginning was the Ātman and it became self-conscious and from its self-consciousness proceeded ‘Egohood’—(aham-nāmā’bhavat). It never enjoyed, and as it was not possible to enjoy all alone it longed for a companion; it then divided

\(^1\) yat tat kāraṇam avyaktam nityāṁ sad-asad-ātmakam

    Manu-saṁhitā, (1.11).

\(^2\) Vide Manu-saṁhitā, Chapter I.
its own self into two as the male and the female, or as the husband and the wife, and from their union proceeded the creation.¹ In another place of the same text we find that the Ātman was alone in the beginning. Desirous of issues the Ātman wished to have a wife.² These two aspects of the Brahman as the male and the female have been variously conceived in the Upanisads. Here (in the Brhad-āranyaka), for instance, the mind is said to be the self (ātmā), speech the wife (vāg jāyā) and life (prāṇa) is the issue. In the Praśno-paniṣat we find that Prajāpati, desirous of progeny, had recourse to penance and produced the couple (mithuna) and the couple consisted of Rayi (matter) and Prāṇa (the vital force),—the Sun is the Prāṇa and the moon is the Rayi.³ In the Bahrūcopaniṣat (which, however, is undoubtedly a text of much later time) it is said that in the beginning was the Goddess (Devī); she created the egg of the world,—and from her were born the gods like Brahmā, Viṣṇu and Śiva.

Though, however, the theory of the female counterpart of the original Lord in connection with cosmogony may be traced back even to the days of the Upanisads, this idea, as found in the Purāṇic literature as also in the vernacular literature, seems to have been influenced more by popular Sāṃkhya ideas. Notwithstanding the controversies of the philosophers as to the exact nature of Puruṣa and Prakṛti and the exact relation between them, the general view is that the whole creation proceeds from Prakṛti (or the primordial cosmic substance) in contact with Puruṣa, who is the unchanging principle of pure consciousness. Though some schools of Sāṃkhya hold that creation proceeds from the spontaneous disturbance in the equilibrium of the three qualities in Prakṛti, the more general view is that the creative impulse is supplied to Prakṛti by Puruṣa through his contact just as active power is supplied to inactive iron by magnet through its contact (sānnidhiya). Through the association or the contact of Puruṣa with Prakṛti the character of the one is infused in the other and the creative process

¹ Brhad-āranyaka (1.4.1-3).
² Ibid (1.4.17).
³ Prāśno-paniṣat, (1.4-5).
follows as a result of the process of infusion. From this philosophical idea of the association of Puruṣa and Prakṛti and the infusion of the character of the one into the other in the process of creation has followed the popular tendency to conceive of Puruṣa as the male and of Prakṛti as the female and of their contact as their union, through which proceeds the visible world. It may be remarked that philosophers also have sometimes taken the analogy of the male and the female in explaining the nature of and the relation between Puruṣa and Prakṛti.

The cosmic process, however, proceeds from Prakṛti. Prakṛti is constituted by nature of three qualities (guna), viz., sattva or the intelligence-stuff, rajas or energy and tamaś or inertia. So long as there is the equilibrium of the three gunas in Prakṛti there is no cosmic process;—the cosmic process follows from the disturbance in the nature of Prakṛti. From the disturbance in Prakṛti first follows the principle of Mahat or Buddhi, which is “the last limit up to which the subjective and the objective can be assimilated as one indistinguishable point which is neither the one nor the other, but which is the sources of them.”¹ From Mahat follows the principle of ‘egohood’ (ahaṅkāra), which in its turn generates the eleven senses on the one hand and the five Tanmātrās (i.e., the five potentials of the five gross elements) on the other. From these five Tanmātrās again follow the five gross elements of earth, water, fire, air and ether. These principles of Puruṣa, Prakṛti, Mahat, Ahaṅkāra, the eleven senses, the five Tanmātrās and the five gross elements taken together constitute the twenty-five Tatvās or principles of Sāmkhya metaphysics.

The Gītā, the most popular religio-philosophical literature of India, echoes the Sāmkhya view of cosmology in a rather popular and synthetic way. There we find the idea of the Absolute (which is known as the Puruṣottama), which approximates the unqualified Brahman of the Vedānta;² but in the active and qualified aspect (i.e., as the Bhagavān) He causes Prakṛti to bear the whole universe.³ Puruṣa and

¹ The study of Patañjali, by Dr. S. N. Das Gupta, p. 51.
² Vide Gītā, (15. 16-18).
³ mayā'dhyaktena prakṛṭih saṁyate sa-carddaram
hetanā'nena kaumātya jagad vipa-rivartate l Gītā (9.10).
Prakṛti are frequently called in the Gitā as the Kṣetrajña (literally, the knower of the field) and the Kṣetra (the field), and everything, whatsoever, is created through the union of the Kṣetrajña and the Kṣetra.¹ Puruṣa and Prakṛti are conceived here just as the original male and the female or the father and the mother.² This idea of Puruṣa and Prakṛti as the primordial male and the female (or the father and the mother) is to be found in almost all religious systems and literature of India. The same idea of the god and the goddess is to be met with in the Vaiṣṇava literature, in the Śaiva literature and in the Tantras.

In the Purānic literature we find but a hotch-potch of the Upaniṣadic and Sāṁkhya ideas with further modification and innovation. Here we generally find a glimpse of the Upaniṣadic idea of the Absolute and then the first manifestation of the Unmanifest in the form of an active personal god with or without the legend of the egg associated with his origin. Then follows Prakṛti from the creative impulse of the Lord as his Śakti (power), and through this introduction of Prakṛti the Sāṁkhya theory becomes interwoven with the ancient legends. The Sāṁkhya theory generally ends with the origination of the gross matter; for the propagation of the human race these Purāṇas generally follow the accounts given in the Manu-sanhitā. On some of the accounts the Tāntric line of thought (which we shall presently discuss) had palpable influence.³

The Sāṁkhya idea of Puruṣa and Prakṛti was inherited by the vernaculars through the medium of the Purāṇas in a more anomalous form. The primordial goddess, originating from the sweat, or the smile of lord Dharma (or Nirāṇjana,

³ For specimens of discussions on cosmogony and cosmology in the Purānic and such other popular literatures see Bhāgavata-purāṇa (3.5, 23-38); Garuḍa-purāṇa (Pūrṇa-khaṇḍa, Ch. IV); Padma-purāṇa (Srīstī khaṇḍa, Ch. II); Padma-purāṇa (Kriyā-yoga-sāra, Ch. II); Brahma-taittīrīya-purāṇa (Brahma-khaṇḍa, Ch. III); Śiva-purāṇa (Jñāna-sanhitā, Chs. V and VI); Sanat-kumāra-sanhitā, Ch. III, Vīṣṇuvīṣṇu-saṁhitā, Ch. VIII; Khila-harivänśa (Ch. I, verses 21 et seq.); Devi-purāṇa, (Ch. AXIX), etc.
or the Ādi-deva) has frequently been styled as Prakṛti, and the idea of Prakṛti brought with it the ideas of the guṇas, which were transformed and personified as the triad. We have seen that through the union of lord Niraṅjana and the Prakṛti (who is depicted as a very beautiful woman) were produced three sons, Brahmā, Viṣṇu and Śiva of the nature of the three guṇas, viz., sattva, rajas and tamas; and these three sons were then entrusted with the charge of the creation of the world. This, however, represents the general and popular Sāṁkhya view of the contact of Puruṣa with Prakṛti and the creation of the world through the activities of the three qualities of Prakṛti. We have seen that according to the version given in the Dharmāyana of Narasimha Vasu the son born to Prakṛti by Niraṅjana was Mahat, and from Mahat originated Ahamkāra and the three guṇas. In the version, found in the Caṇḍi-maṅgala of Mukunda-rāma also we find that through the infusion of the energy of the Lord in Prakṛti a son of the name of Mahat was born to them, the son of Mahat was Ahamkāra, who again had five sons who represent the five gross elements.

It is to be noted that the primordial goddess had emanated from the Lord. The Lord and the goddess have then been conceived in the vernaculars as the Ādi-deva and the Ādi-devī. Sometimes they have been conceived as the Ādi and the Anādi; the Lord is the beginningless eternal One; while the Goddess, emanating from the body of the Lord, is the produced one. The creation, however, proceeds from the Ādi-devī, and the Ādi-deva returns to his meditation after the goddess has been created. In this theory of the Ādi-deva and the Ādi-devī the vernaculars seem to have been more influenced by the Śaiva and Śākta ideas (as they are found in the Śaiva and Śākta texts and in the Tantras in general) than by the Sāṁkhya theory of Puruṣa and Prakṛti. We have already pointed out that though in a popular way Puruṣa and Prakṛti of the Sāṁkhya system have somehow been related together in the process of cosmic evolution, metaphysically they are two distinct and self-

1 It should be noted in this connection that the word Prakṛti in classical Sanskrit literature as well as in the Purānic literature became frankly synoymous with the word Śakti or Ādi-devi, the primordial goddess.
sufficient realities and it is because of the distinct nature of Puruṣa and Prakṛti that various controversies have arisen as to the exact nature of the relation. In the Tantras and other Śaiva and Śākta literatures the primordial god and the primordial goddess, or Śiva and Śakti, as they are commonly called, are not two distinct ultimate realities; they represent two aspects of the absolute reality and sometimes Śakti is conceived as contained in Śiva as his kinetic energy. The absolute truth is a union of Śiva and Śakti. Śiva represents pure consciousness which is inactive—the static aspect of the ultimate reality;—while Śakti represents the world-force—the dynamic aspect of the ultimate reality; Śiva is Nīvrtti (state of rest) and Śakti is Pārvṛtti (the state of activity) and in the ultimate state they remain in a union of oneness. This is the principle of non-duality (advaya) which is explained in the Tāntric texts under the imagery of maithuna (conjugal intercourse) or Kāma-kalā (as it is called in the texts Kāma-kalā-vilāsa, Devī-upaniṣat and such other texts).\(^1\) In the Kāma-kalā-vilāsa we find that Śiva or Maheśa is pure illumination (prakāśa-mātra-tanu) or the abstract self-shining thought with all the principles of activity contracted within it (antar-līna-vimarsaḥ); Śakti is the principle of activity or the inherent activity of thought (vimarsa or kriyā-sakti) and she contains in her the seed of the future world (bhāvi-carācarā-bijam). Śiva, however, realises himself through Śakti, and, therefore, it is said that Śakti is the clear looking-glass in which the form and beauty of Śiva is reflected. The philosophical implication is that pure abstract thought cannot realise its own nature unless it comes back to itself through its own activity, and when thus it returns to itself through vimarsa, it becomes ‘egohood’ or ahaṅkāra, which is called “the mass produced through the union of Śiva and Śakti” (śiva-śakti-mithunapinda).\(^2\) In the gross sense this Śiva is the white-matter (sita-bindu) or seed or semen, while Śakti is the red-matter (śoṇa-bindu), and I-ness or egohood is the son born to them. This conception of Śiva and Śakti has also

\(^1\) Vide supra, p. 30.
\(^2\) Kāma-kalā-vilāsa (Kasmir Series Texts and Studies, No. XII), Verse No. 5.
been interpreted as matter and energy, which are the two essential component parts of all entity. In everything that exists there must be two things,—that which exists and the power or energy by virtue of which it exists or acts; this matter that exists is the Śiva and the energy of existence is Śakti¹ and there is an inseparable relation between them, the one cannot be without the other. Śiva without Śakti is absolutely helpless in doing anything whatsoever,—he himself cannot even vibrate without the help of Śakti.² It is Śakti who creates the universe and preserves it and again destroys it at her own will.³ It is to be noted that sometimes Śiva has been conceived as the absolute, Śakti with the seed of all manifestation and creation is contained in the very nature of Śiva. Though in many places we find that the one absolute truth divides itself into two aspects as Śiva and Śakti and manifests itself in the world-process and realises itself through it, yet in other places we find that Śiva manifests his power in the form of Śakti only for the purpose of self-realisation,—for, the universal abstract thought-principle cannot realise its ownself without the conscious activities in the form of the world-process.⁴ But whether Śakti be contained in the nature of Śiva, or, Śiva and Śakti be the two aspects of the absolute reality, Śakti is directly responsible for the creation of the visible world—either as the energy (i.e., the world-force), or as the principle of illusion (māyā) as she is known in the popular Vedāntic line of thought. It is because of

⁴ On the nature of and the relation between Śiva and Śakti see Tantra-śāstra (in Bengali) by Śiva-candra Vidyārṇava Bhāttācārya, Part I, the chapter on the philosophy of Śakti (Śakti-tattva), pp. 225 et seq.
this that we find in the vernaculars that before the actual cosmological process begins the original goddess comes out of the body of the Lord and herself creates the whole universe. The emanation of the Śakti in the form of a woman from the body of the Lord is to be frequently met with in the Purāṇic and Tāntric texts, and there is no doubt that this idea was received by all the vernacular poets through the Purāṇas and the Tantras. But the oldest basis of the tradition is to be found in the Rg-veda where it is said that the Father became desirous of meeting his own youthful Daughter and had sex-intercourse with her.\(^1\) Sāyaṇa explains the Father as Prajāpati and the Daughter as Uṣā (Dawn). There is an echo of this fact of the Father meeting the Daughter also in the Aitareya Brāhmaṇa,\(^2\) Tāṇḍya-mahā-brāhmaṇa\(^3\) and the Śatapatha-brāhmaṇa.\(^4\)

The three guṇas of Prakṛti as conceived in the Sāṁkhya system were ascribed to Śakti in the Tāntric and Purāṇic texts, and we frequently find that the triad, viz., Brahmā, Viṣṇu and Śiva, who are put in the charge of creation, preservation and destruction, are the three sons of the original Śakti; and they are of the nature of the three guṇas, viz., sattva, rajas and tamas. In the Mahā-bhāgavata we find that in the beginning the universe was without the sun and the moon; there was neither the day nor the night, nor fire nor the directions,—the whole universe was without touch, sight and sound, etc., and it was bereft of all the luminaries. At that time there was only Prakṛti as the supreme reality. When there was the desire for creation in her, she, though formless, assumed the form of a goddess and at once created a personality with the three guṇas she had within her; but the person (Puruṣa) was without consciousness. She then infused her own creative impulse in that Puruṣa and the Puruṣa thus endowed with power created three personalities of the name of Brahmā, Viṣṇu and Śiva, who were of the nature of the three guṇas.\(^5\)

idea of the Śaktis, emanating from the original Śakti and being united with the triad for the purpose of creation, is also found in these Tantras. In the Śaiva and the Śākta Tantras we find that the original Śakti has three qualities in her, viz., Ichā (i.e., the volitional nature), Jñāna (i.e., the cognitive nature), and Kriyā (i.e., active nature). In the Gorakṣa-saṃhitā these Ichā, Jñāna and Kriyā are spoken of as the three goddesses, viz., Gaurī, Brāhmī and Vaiṣṇavī, who are contained in the nature of Praṇava. Again it is said in this connection that with the three component parts of Praṇava (i.e., a, u, and m) are associated the three guṇas and the triad. The triad and the three Śaktis being thus associated with the Praṇava could very easily get associated with one another,—and it is for this reason that in the vernacular texts we find the three Śaktis, viz., Gaurī (or Rudrāṇi), Brāhmī (or Brahmanī) and Vaiṣṇavī (who represent respectively the three aspect of the original Śakti, viz., Ichā, Jñāna and Kriyā) are generally associated with the triad Śiva, Brahmā and Viṣṇu as their female counterparts. There is also reference to the penance of the triad to propitiate the original Śakti, and also to the fact that by this austere penances Śambhu could obtain the goddess as his wife; and we think that these traditions with much poetic innovations, additions and alterations have found place in the cosmogonical traditions of the vernaculars. The story of the god’s or goddess’s assuming the form of a corpse to test the triad does not, however, seem to be very old—but as we have seen, the tradition of the penance of the triad seems to have some older basis behind it,—and it seems that the tradition of the penance of the triad with

the mixture of popular poetic imagination has obtained its full-fledged form in the story of the test of the triad. In the Bhād-dharma-purāṇa, however, we find a detailed account of the story of the test of the triad; but the text has rightly been suspected by scholars to be of much later origin and as such the story might have been borrowed in its full-fledged form from the accounts given in the vernaculars.

(iii) Buddhist Element in the accounts of the Cosmogony and Cosmology of the Vernaculars

It will appear from what is discussed above that the accounts of cosmogony and cosmology given in the vernaculars are based fundamentally on the Hindu ideas, philosophical, theological, mythological and traditional. Yet we should notice that the later Buddhistic ideas of cosmogony and cosmology have also got mixed up with the Hindu ideas and legends in the accounts given in the vernaculars. But we beg to remind that the popular Buddhistic cosmogonical ideas, found mainly in the Buddhist Tantras and in the Nepalese Buddhistic traditions, are nothing but popular adoption of various Hindu ideas under a Buddhistic garb. In the whole field of Mahāyānic thought we find an inherent tendency of compromise with the Hindu thoughts and ideas,—the ideas of cosmogony and cosmology also seem to have evolved gradually on the Hindu line.

We have seen that in Vijñāna-vāda Buddhism Śūnyatā was conceived as something like the ultimate substance or the primordial element, from which evolves the visible world. This idea of Śūnyatā, we have said before, was inherited by the later vernacular poets, not as any philosophical concept, but merely as a popular idea floating in the air. It is therefore that we see in the descriptions of the vernaculars that the primordial divinity, who is responsible for the creation of the universe, was himself void by nature. He was moving in the void and the Lord of the void created the universe out of the great void. Again we have seen that the conception of Dharma as described in the verna-

---

1 Edited by H. P. Śāstrī, Bibliotheca Indica, New Series, No. 668.
2 Vide supra, Ch. XI.
culars reminds one at some places of the Mahāyānic conception of the Dharma-kāya of Buddha which is the 'thatness' underlying all phenomena. Dharma-kāya is the cosmic oneness from which proceeds the diversity of the cosmic process. In the descriptions of the vernaculars we find that the cosmic process emanates from Dharma. In this idea also some influence of the Mahāyānic conception of Dharma-kāya with all its cosmological implications may plausibly be postulated.

From the mythological point of view we find it described in the Kāraṇḍa-vyūha that being desirous of creating the universe the original lord (Ādi-buddha) first created the Bodhisattva Avalokiteśvara; from the eyes of Avalokiteśvara originated the sun and the moon, Mahēśvara from his forehead Brahmā and others from the two shoulders, Nārāyaṇa from his heart, Sarasvatī from the teeth, air from the mouth, the earth from the feet, Varuṇa from his udder; from among all these gods Avalokiteśvara selected Mahēśvara, whom he predicted to be the creator in the age of Kali under the name of the Ādi-deva.\(^1\) It is needless to say that mythological accounts of this type have nothing Buddhistic in them in the fundamental nature.

The Buddhistic influence on the cosmogony and cosmology of the vernaculars is, however, considerably palpable in the conception of the Ādi-deva and the Ādi-devī, with whom the later Buddhistic conceptions of the Ādi-buddha and the Ādi-deva or the Ādi-prajñā or simply Prajñā has got mixed up. We have seen before that this Ādi-buddha and the Ādi-prajñā are nothing but the transformation of the Mahāyānic idea of Śūnyatā and Karuṇā in the image of Prakṛti and Puruṣa or Śakti and Śiva.\(^2\) To understand the cosmological significance of the conception of the Ādi-deva and the Ādi-devī, we should, therefore, discuss the cosmological significance of Śūnyatā and Karuṇā as it is explained in the Buddhist Tāntric texts.

We have seen that in later Mahāyāna texts, we mean the Buddhist Tantras, Bodhicitta was conceived of as the

---

2 Supra, pp. 29 et seq.
highest reality of the nature of the ultimate substance from which everything originates. This absolute ultimate substance have two elements in it, viz., Śūnyatā and Karuṇā, or Prajñā and Upāya. Cosmologically Prajñā is pure consciousness and perfect enlightenment, and is the principle of pure passivity; Upāya is the world-force,—it is the dynamic principle, through the activities of which the phenomenal world comes into existence. The metaphysical implication is that Śūnyatā as perfect enlightenment or pure consciousness is purely inactive; it is the principle of universal compassion that disturbs her and causes waves of mentation in that pure consciousness and these waves of mentation are fundamentally responsible for the existence of the phenomenal world. This principle of Upāya as the dynamic force behind the evolution of the world-process is a means, it is held, for leading all sentient beings to the ultimate goal of perfect purification and liberation; and the idea here seems to be akin to the popular Sāmkhya view that the activities of Prakṛti are finally aimed at the liberation of Puruṣa. It is clear to see, that this cosmological and ontological significance of Prajñā and Upāya are exactly the same as that of Śiva and Śakti, and, as we have already noticed, the only difference is that pure consciousness, which is absolutely passive by nature and represents the negative aspect of the reality, is conceived as the Lord in the Hindu schools, and it is conceived as the goddess in Buddhism; and whereas the active or the positive element is the goddess according to the Hindu view, it is the Lord according to the Buddhist view. But notwithstanding this difference in notion, Prajñā and Upāya have throughout been drawn in the image of Śiva and Śakti. As in the Hindu Tantras Śiva and Śakti are conceived of sometimes as constituting the two aspects of one absolute reality,—but sometimes again Śiva is in many places depicted as the absolute reality, Śakti being included in his nature;—so also is the case with Prajñā and Upāya,—sometimes they are explained as two aspects of the one reality, and sometimes, Prajñā being the absolute reality, Upāya is said to be included in her nature. In either case the relation between the two is inseparable as is in the case of Śiva and Śakti.
These conceptions of Prajñā and Upāya have important ontological and cosmological bearing on the four schools of Nepalese Buddhism.¹ The Svabhāvika school holds that there is no immaterial ultimate truth in the form of the soul substance; matter is the primordial substance, from which the world proceeds. This matter as the ultimate substance has two modes which are called Pravṛtti and Niḥṛtti, action and rest, dynamic and static, concrete and abstract. Matter is eternal as a crude mass (however infinitely attenuated in in Niḥṛtti) and so are the powers of matter. The proper state of existence of these powers is the state of Niḥṛtti or rest as the abstraction from all phenomena. When these powers pass from the state of rest into their causal and transitory state of activity the phenomenal world comes into existence, and it again ceases to exist when the powers repass from Pravṛtti to Niḥṛtti. This Niḥṛtti is the Prajñā² and Pravṛtti is the Upāya. We have seen that Prajñā and Upāya are deified as the Ādi-prajñā and the Ādi-buddha, and the visible world is said to be created through their union. Buddha as the principle of active power first proceeds from Niḥṛtti or Ādi-prajñā and then associates with her and from their union proceeds the actual visible world. The principle is symbolised as Prajñā being first the mother and then the wife of the Buddha. The well-known triad—Buddha, Dharma and Saṅgha—has often been explained, as we have seen, as Upāya (Buddha), Prajñā (Dharma) and the world (Saṅgha) produced through the union. In some of the Nepalese schools of Buddhism Prajñā as Dharma is given the highest prominence in the scheme of the triad and Buddha emanates from Prajñā. In some of the Hindu Tantras also we find that the goddess has been given more prominence than the Lord, the former being conceived as the first principle. In some places, it has been pointed out, the primordial Lord is seen floating in water. What is this water? It is, according to some of the Tantras, Śakti, who is pervading the whole universe in the form of water. This belief influenced the Nepalese Buddhists also, who have

¹ The four schools are:—(i) Svabhāvika, (ii) Aiśvarika, (iii) Kārmika and (iv) Yāttika.
² Vide Illustrations of the Literature, etc., by Hodgson, p. 149.
often conceived of Ādi-prajñā in the form of primordial water. This Ādi-buddha and Ādi-prajñā or Ādi-devī are the original father and mother of the world. In the Svayambhu-purāṇa Prajñā is described as the Śakti of Śiva, as the mother of the three worlds, the void of the voids—the mother of the Buddhas,—the mother of all the gods. Again, all female creatures are said to be the incarnations of Prajñā while all males are the incarnations of Buddha (Upanya). Again the Lord symbolises the generative power while the lady symbolises the productive power. The Lord is the seed (bindu) and the lady is the ovum (rajas), and from their union proceeds the Bodhicitta, from which everything is born. The Ādi-prajñā or the Ādi-śakti is also spoken of as of the triangular form (trī-koṇākāra, which is the symbol of the productive power) as she is described in the Hindu Tantras also.

From the above it will be clear that, in the conception of the Ādi-deva and the Ādi-devī of the vernaculars (or of the Ādi and the Anādi as we find in the Nāth literature), we find a popular mixture of Puruṣa and Prakṛti of the Sāmkhya system, of Śiva and Śakti as we find in Tāntricism in general, and the Ādi-buddha and the Ādi-prajñā of the different schools of later Buddhism. It may cursorily be noticed that in the Taoism of China we find a similar conception of cosmogony, where it is held that the universe proceeds from the primordial parents Tao and Tai or rather from the original male and the female, yang and yin.

(iv) Similarity of the Descriptions of the Vernaculars with those of other Literatures

The cosmogonical and cosmological descriptions found in other parts of the world offer points of similarity with the

1 Cf. parjñā jalamayā-kārāḥ ā prajñā strī-liṅgatvāt drava-rūpā tato jalā-kārāḥ || Dharmakṣaja-saṅgraha, MS. p. 5(B).

2 Devendra-paripṛchchā-tantra, quoted in the Subhāṣita-saṅgraha, p. 76 (MS).
It is interesting to note how Prajñā and Upanya have sometimes been saluted as the mother and the father of the world just in the manner and even in the language in which poet Kālidāsa has saluted Pārvatī and Maheśvara in the first verse of the first canto of the Raghuvamśa.

vägarthāsva sampratikau jyotsnā-candramadāsva

descriptions given above. The *Voluspa*, which supplies us with cosmogonic account of the Scandinavian branch of the Teutons, begins as follows:—

“There was, in times of old, where Ymir dwelt, not land nor sea, nor gelid waves; earth existed not, nor heaven above; there was a chaotic chasm, and verdure nowhere.”

Some Babylonian descriptions also begin in a similar manner; thus:—

“When above unnamed was the heaven, (And) earth below by a name was uncalled, Apsu (the deep) in the beginning (ristu) being their together, (And) the flood (Mammu) of Tiamat the mother of them all,
Their waters were embosomed together (in one place), But no reed had been harvested, no marsh-plant seen; At that time the gods had not appeared, any one (of them)
By no name were they called, no destiny (was fixed).”

The belief that water was the primordial element is found in many countries. Thus according to the Babylonians “the primal element of the universe was water, symbolised and ruled by Tiamat, the personification of ‘Chaos’, until she was slain by the god Marduk.” This conception of the cosmic ocean is found in some Greek and Egyptian accounts also. The tradition of the well-known cosmic-egg is also found in other countries; thus ‘at Eliphantine (of Egypt) it was believed that Khnum had made the cosmic-egg from the mud of the Nile.”

APPENDICES
APPENDIX (A)

THE RELIGIOUS TENETS OF THE NON-BENGALI MEDIEVAL SAINTS IN RELATION TO THE TENETS OF THE EARLIER BENGALI SAHAJIĀŚ

We have pointed out on several occasions that most of the medieval saints who gave vent to their religious emotion through the medium of the different vernaculars were Sahajiyās in a general sense. We have also hinted that in the religious tenets as well as in the literary representation of the medieval saints the form and spirit of Sūfi-istic literature acted strongly against the Sahajiyā background. We have seen how in the case of the Bāuls the spirit of Sūfi-ism acted on the spirit of the Sahajiyās and other devotional schools. In point of time some of the Saint-poets of upper, central and northern India flourished earlier than the Bāuls of Bengal, and many of them were contemporary with, if not earlier than the Vaiṣṇava Sahajiyās of Bengal. When, therefore, we speak of the Sahajiyā background of these non-Bengali medieval poets, we mean the Buddhist Sahajiyā movement in particular. A study of the poems of these medieval poets, particularly of the poems of Kabīr, decidedly the most prominent figure of the middle age, will reveal that there is a clear line of continuity from the Buddhist Sahajiyā poets to the medieval poets.¹ But the difference between the earlier school and the medieval schools lies in the element of love and devotion, which is conspicuous by its absence in the Buddhist Sahajiyā school. This element of love and devotion was supplied profusely to the medieval schools by the different devotional movements as well as by Sūfi-ism. Though devotion may be recognised to be one of the characteristics of later Mahāyānic Buddhism, it is not so in the case of the Buddhist Sahajiyā cult, which was pre-eminently an esoteric yogic school. But in spite of this difference the general similarity

in spirit, in literary form and sometimes even in language, is indeed striking. Let us now demonstrate our contention point by point. As, however, we are not attempting here any comprehensive study of the religion and literature of these medieval Saint-poets, but dealing with them in relation to the Bengali literature, only those points will be touched that directly concern our early and medieval literature.

(i) The Spirit of Revolt and Criticism

We have seen how heterodoxy—a spirit of revolt and criticism—characterises the religion and literature of the Buddhist Sahajiyās. We have seen that the same spirit of heterodoxy characterises the religion and literature also of the Sūfis. This spirit may be recognised as a salient feature of the medieval Saint-poets as a whole. In connection with the analysis of the different lines of heterodoxy in the religious history of India we pointed out that elements of love and devotion have often inspired heterodoxy in the religious schools and that these elements of love and devotion influenced the revolutionary spirit of the medieval saints to a great extent. To begin with, we may consider the religious views of Kabīr as expressed in his poems, songs and couplets. At least one-third of the literature of Kabīr (which is fairly large) is devoted to criticism against the orthodox Hindus and Muslims. As a religious apostle Kabīr was neither a Hindu nor a Muslim and criticised both the communities unreservedly. He says,—“The Hindus have died by worshipping the gods and the Turks have died by going on pilgrimage; the yogins have died by matting hair,—none of them have got at the truth.” Against caste system Kabīr says,—“If thou thinkest, penalties for deeds,—born a Śūdra, you die a Śūdra,—it is only in the world of illusion that you assume the sacred thread. If birth from Brahmin mother makes you Brahmin, why did you not come by another way? If birth from a Turk mother makes you Turk, why were you not circumcised in the womb? If you milk black and yellow cows together, will you be able

to distinguish their milk?"  

Against metaphysical erudition and the recital of the sacred scriptures the criticism of Kabir was equally strong. He says that people read the four Vedas, but none makes any enquiry about the Lord; the truth has been discovered by Kabir, and the Pundits are searching the field in vain. The world is dying of reading books,—yet none have become the real Pundit,—if a single letter of the Dear One be learnt, a man becomes a really learned one.  

Again it is said,—"O brother, thou art misled believing in the six Darshanas; wrapped in the garb of Pakhanda. They came and destroyed the soul and life; the four Vedas are wise and clever, but dumb. The Jainis know not the mystery of Dharma; they pluck leaves and come to God’s temple . . . . . The divine knowledge is outside this way: though it seems near, yet it is far off. To him who knows it is near, for all beings it pervades."

Kabir says that roaming about on pilgrimage and bathing in the sacred rivers are absolutely futile so long as the mind is not purified through the sincere love of the Lord. The world is tired of going on pilgrimage and bathing in sacred rivers; people settle near the city of Benares and drink transparent water,—but no salvation is there without the name of Hari (the Saviour). Some go to Mutter, some to Dvarakā, some to Puri to see Jagannātha,—but without the association of the saints, and sincere devotion to the Saviour nothing avails at all. Nothing avails in putting on

2 *Kabir-granthāvali*, p. 36.
4 *The Bijak of Kabir, Ramaiṇṭā*, No. 30. Cf. also:—
   "The Smriti made known three qualities; and the paths of sin and merit were laid down. From reading the Smriti and the Vedas disputings arose: conceit is practised in the garb of Pakhanda. One reads the Vedas and takes honour to himself; for him knot of doubt is not yet unloosed. He reads the Vedas and then he destroys lives: and offers their severed heads to images. Says Kabir, through Pakhanda they troubled many lives. The inward light is not revealed; no one in this life has seen himself." (Ramaiṇṭā No. 31). "Some go on pilgrimage, some shave their heads; others make discourse on Pakhandas, illusion and mantras. Reading the sciences and the Vedas they are swollen with pride, at the end they fill their mouth with ashes." (Sabdas, No. 21.)
5 *tīrth kari kari jag muva ḍumghai pāṁśi nhāi  
   rāṁmahā rāṁm japantaḍāṁ kāl ghasityāṁ jāī

   Kabir-granthāvali, p. 37.
6 *Ibid.* Sādiṇā Kau Ṭhāṇ, p. 49. Cf. also:—
   "What profit is there by bathing if the mind is full of filth? A fish lives ever in water, yet it never loses its smell. The world perished in visiting the tirthas, in
the robe of a yogin or a mendicant or a saint,—that is nothing but self-delusion; nothing can be gained by such hypocrisy. "There is a roof of falsehood, it spreads over earth and sky. In all ten regions its noose is set: it has beset the soul. Devotion, sacrifice and rosary, piety, pilgrimage, fastings and alms,—nine Bhaktis, Vedas, the Book, all these are cloaks of falsehood."¹¹ What is the good of counting beads if the mind is not controlled?² What is the good of shaving the head if the superstitions and the desire are not removed from the mind?³ What is the good of becoming Vaiṣṇava if true discriminative knowledge is not acquired,—the paintings and the frontal marks are only to deceive people. Everyone is engaged in practices of physical yoga, none is after the union of the mind (with God).⁴

It will be seen from the above and host of such other criticisms made by Kabir that the tone of Kabir is harmoniously tuned with that of the earlier Sahajiyās. The resemblance is not only in spirit, but often also in language and imagery. Like Saraha-pādā⁵ Kabir also says,—"What are the naked,—what are the mendicants with skins, if they do not know the true nature of the self? If one becomes a yogin by roaming about naked, why should not the deer of the forest be liberated? If perfection can be attained by shaving head, why should not the sheep enter heaven? . . . .

Says Kabir, hear O brother,—none have attained salvation without the name of Rāma.⁶ The Pundits know the Āgamas, fasting and in bathing in cold water. Through each knowledge of the True Name death has drowned all the ages. Two go to the tirath,—the mind is restless and the heart covetous. Not one sin was blotted out, but ten maunds burden more was loaded. Millions of tirath visited, millions of temples built; but so long as a Sant goes unserved, all works are fruitless." (The Bijak of Kabir, pp. 21-22.)

all sciences and grammars,—Tantra, Mantra and Medicine they know,—yet they die at the end. The yogins, the ascetics, the observers of penances and the Sannyāsins wander about in many a sacred place; those, who are with their hair plucked out, with shaven heads, the silent ones and those with plaited hair—all these die at the end. They have pondered much and given serious consideration to the problems of the world,—but in no way will they be spared. Says Kabir, take refuge in the Lord and birth and death will be stopped.¹ "If by worshipping stones one can find God, I shall worship a mountain. If by immersion in the water salvation be obtained, the frogs bathe continually. As the frogs, so are these men, again and again they fall into the womb."²

The revolutionary lead that was thus given by Kabir in the early middle period of the vernacular literature was vigorously carried out by a host of poets that followed, and the current still flows on. Dādū of the sixteenth century may be said to have been the worthiest successor of Kabir. He says,—"The Pundits have bound the world by the net-work of illusion and Karma (various activities); a good preceptor is rarely found, who can show the real path. They speak of the sinful path, believe in illusion and Karma,—none points to the perfectly pure One (Nirañjana) who is very near to us."³ Worship by love is the real worship,—that is the best kind of prayer; such love involves no activities whatsoever, neither should there be any fixed time and place for it; throughout the whole life—in all moments we may worship the Lord through our incessant flow of love. Dādū says,—"For decency's sake people (the Muslims) fast, invite others for prayer and offer prayer; the business of

³ See also the Nīrūga School of Hindi Poetry, by Dr. P. D. Barthwal, M.A., D.Litt., Ch. II.
Dādū is with the Lord (Sahib), in what path should he walk? Why this grief, O Dādū,—stand before the Lord every day and every moment, and let your invocation (azan) be there where the Lord is in His true nature.” The Muslims cut the throat of others and compel them to profess their religion; five times daily do they offer their prayer, but there is no sincere faith in their heart for truth. They do never kill their ego,—but go to kill others; but Dādū says,—how can one attain Khudā (God) without annihilating the self? He, who destroys the body and mind and unites with the Lord, and controls himself through the divine realisation, is the real Awliyā Pir (i.e., preceptor of the Muslim Awliyā sect).² Like Kabīr Dādū also repudiated communalism and sectarianism in the strongest possible words. He says,—“The Hindus say,—‘mine is the real path.’ The Turks say—‘mine.’ Say, where the path for the Alekha (Skt. alaksya=invisible) may at all be,—He has been realised without a path.—Says Dādū, both are mistaken,—both are rustic in their view,—know only that to be the truth which transcends both. In innumerable sects the Great One has been divided into parts; O Dādū, they have left the perfect Lord and are bound by the complexes of illusion.³ The earth and the sky—to what sect do they belong? Water, air, day and night, the sun and the moon, and others—to what sect do they belong?²⁴ Without belonging to any particular sect they are serving the Lord incessantly. Pomp and peasantry, erudition and scholasticism can give man no peace,—vain is the pride of literacy, vain is the glory of scriptural knowledge. “I have composed a few verses,—and a few Sākhīs,⁵ and there arises the conviction in me that I am wise in the world. May be, listening to the discourses on knowledge some Śabdās and Sākhīs are mastered;—and simultaneously arises the conviction that there is no match for me. What is the good of composing verses and reciting Sākhīs if the truth of the Lord,—

⁵ Sākhīs are verses which bear testimony to some truth (from Skt. Sākṣī).
the ultimate reality—is not realised?”¹ “Hear, O Pundits, sons of Brahmā (i.e., the Brahmins),—Empty is your pot,—and you are not taking cognizance of it; you are talking all about Āgama and Nigama, but in your house there is going on the dance of ghosts (or the five bhūtas or material elements). Merely by reading you will never reach the ultimate state,—by reading you will never cross to the other shore; by reading creatures do not reach the goal;—O Dādū, call Him aloud through the pangs of your heart. Vain is the knowledge without the name (of the Lord), by explaining the Vedas and the Purāṇas they only become relieved of the burden on their head. Thoroughly have I pondered over all that are in the Vedas and the Kuran,—the land, where Nirānjana is available, is not far off from me. Tired are the Pundits by reading on and on,—but none has crossed ashore; I do not know why the whole world is running on with faith in ink and paper. How many Vedas and Kurans have perished only staining heaps of paper,—O Dādū, a real saint is he, who has read a single letter of love.”² “They serve pebbles and stone and the quintessence of the self is lost to them. When the invisible Lord is residing within, why should we roam about in other places? They wash stone with water which they drink,—the soul worships stone! The soul thus becomes stone,—and many have sunk down thus. They are gathering pebbles in the skirt and are believing them to be bits of diamond; when at the end Hari, the jeweller, will test them, the whole life will be lost.”³ All rites and ceremonies, talking and preaching appear repulsive without Rāma,—vain are all knowledge, yoga and meditation. Wise men there are many,—many are the Pundits, heroes and the bounteous; innumerable are the ways of outward show;—rare is a man who is absorbed in the Lord. All make innumerable outward shows and carry on propaganda and self-advertisement:—but Hari is available only through self-abnegation—one proceeds towards that path.⁴

¹ Kṣitimohan Sen, Dādū p. 278.
² Ibid., p. 281. Also see p. 514.
³ Ibid., p. 283.
⁴ Ibid., p. 308.
is the difference between a real saint and a hypocrite who makes parade of outward show,—their difference is just as much as the difference between the earth and the sky. The saint is absorbed in Rāma, the hopes of the hypocrite, fond of show, lie all in the outward world. Innumerable are such hypocrites in the world, rare are the saints; diamond is available in far off lands, but pebbles everywhere.¹ Through illusion have you got your head shaven,—but this is no yoga (union with God) at all; but with the ultimate Lord you have no acquaintance;—the hypocrite never succeed. Without love, goodwill and affection in vain is all toilet; if the soul be not attached to the Lord, why should he recognise you? ... O, Dādū, the yogin, the Jāṅgama (a Śaivite ascetic), the Sevaḍā (a Jaina saint), the Buddhist monk and the Muslim mendicant, and the six systems of philosophy—all are outward show of hypocrites without Rāma, the Supreme Lord.² Whether you make outward dress, get your body pierced with a saw, or remain with your face upwards, or go on pilgrimage,—the Lord will not be found without truth.³ Illusion has thickened within,—yet outwardly they are assuming the air of one who has renounced all,—they put on a cover of thatched cloth and move in a gay mood. They are controlling the body, but the mind moves on all quarters,—they talk of the dear one,—but make nothing but self-advertisement.⁴

Sundar-dās, the great disciple of Dādū, echoed the voice of his preceptor throughout the volumes of his poems. Like Kabīr, Dādū and a host of other poets Sundar also criticised severely the orthodox rituals and religious practices of both the Hindus and the Mahomadans.⁵ Sundar says that he has seen the six systems of Hindu Philosophy, he has seen the Sūfīs and the Šekh,—but none of the sects could satisfy his

spiritual demand and it is therefore that he has had recourse to the most natural path. In the Sarvāṅga-yoga-pradīpika Sundar criticises the various religious sects of India severely and exhaustively. Similar criticism has been made by Sundar-dās in the chapter on Bhrama-vidīvāma Aṣṭaka where his criticism has been levelled against both the orthodox Hindus and the Muslims. The lifeless orthodoxy and the formalism even of the contemporary Santa-sects, yogic sects and Sūfī sects were also criticised by him.

Nānak, the founder of Sikhism, also echoed the same spirit as is found in Kabīr, Dādū and others. He also criticised the orthodox sects of both the Hindu and the Muslim communities. He says,—

"(Make) kindness the mosque, sincerity the prayer carpet, rectitude (equity) the lawful (food) according to the Kuran.

Modesty circumcision, good conduct fasting, (thus) thou becomest a Musalman."

On going to pilgrimage and bathing in the sacred rivers Nānak says,—"I bathe at a Tirtha, if I please him; without pleasing him, what shall I do with bathing?" Against scholasticism, Brahminism and philosophical erudition Nānak holds the same view as his predecessors. In a

7 Adi-grantha, p.934. Cf. "Reading and reading the Pandit explains the Veda, (but) the intatuation of the Maya lulls him to sleep. (Ibid., p.117.) The Pandit, reading and reading cries aloud, but in him is the intatuation of the Maya and love (to her). (Ibid., p. 118.) In going through the six Shastras, in knowing them by heart, in worship, in (applying) the Tilak, in bathing at a Tirtha, in the practice of purity, in the eighty-four ascetic postures tranquillity is not obtained, O dear!” (Ibid., p. 136.) "He (i.e., the Pandit) explains the Smriti, Shastras and the Veda; but being led astray by error he does not know the truth (the Deity)." (Ibid., p. 158, cf. also p. 326, ix.) It will appear from the
fine poem Nānak says that it is ridiculous to perform Ārati before the Lord in a temple,—for the whole universe is performing Ārati before Him. The sun and the moon are the lamps on the plate of the sky, the constellation of stars is the pearl; the wind is carrying incense, the forests in flower are supplying lustre, the spontaneous sound is serving as the drum—and thus is being performed the Ārati of the Lord.²

The same spirit, as illustrated above, will be found in the devotional lyrics of almost all the poets and poetesses of medieval vernacular literatures of India, including Tulsī-dās, Mīrā-bāī, Rajjabjī, Caran-dās, Sahaj-bāī, Dayā-bāī and other poets and poetesses. If these poets and poetesses stood for anything it was saving religion from degenerating into mere codes of scriptures and time-honoured customs and practices,—the watch-word of all was sincerity of love. The contemporary Sūfī mystic poets (who composed poems in some dialect of Hindi) also had the same spirit as the other devotional lyricists. Thus Rajjab says,—"Amidst the darkness pervading all the quarters the light that will radiate lustre shines within our heart. By dry indifference towards the world and the austere penances inflicting torture on the body, can you expect to destroy the enemy that lies within you, or do you derive any light therefrom?"

"Fill the mosque of your life with prayer (Namaz) and salute; it is the mind that frequently creates disturbance there; from that calm mosque of life drive away this Kafir mind."

"There are as many sects as there are men, and thus the creator created varieties; but salutes of all human hearts are uniting together to form a great stream of salutes to the sea of the Lord Saviour." "The Ganges has her origin at

verses and songs of Nānak that his strongest note was against the Smṛti-sāstra of the orthodox Hindus, and scholastic Brahmanism was made the object of scathing criticism. (See Ibid., pp. 333-334, iv. v. xxii, xxiii.)

the feet of the Lord; if the feet of the Lord be within the heart of all lovers, the Ganges of love will flow in the heart of all the devotees; where the courses of all these Ganges meet together it makes a great Tirtha, and liberation is assured if one bathes in this sacred place.” “This universe is the Vedas,—creation in its fullness is the real Kuran. The Pundits and the Kazis are mistaking a heap-of dry paper to be the real world, and they are sadly disappointed. Paper is in the heart of the sincere devotee,—and all truth shines on it in letters of sincerity; in the universe where all the hearts have united together shine all the Vedas and the Kuran. Break away the barrier of all artificiality and read the truth of the universe formed by the unity of hearts. Readers are seen in this world of lifeless letters inscribed on the lifeless sheets of paper,—but there are the living Vedas in the life of man, and if you are to read anything, O Rajjab, read those living Vedas of life.”

Bulleshah, the Sufi mystic, says,—“O Bulla, people say,—“Thou shouldest sit within the mosque; what is the gain of sitting within the mosque if there is no sincere prayer (Namaz) within the heart?” “O Bulla, places of pilgrimage are filled with plunderers,—in the temple reside the deceivers,—and within the mosque are rogues;—but the beloved Lord is outside all.” “Khudâ (God) is to be found neither in the mosque, nor in the Kâbâ, nor in the scriptures, nor in the routine-work of prayer (Namaz); if something could be understood in a natural way,—the Pundits would create great disturbance.” “O Bulla, there is no salvation by pilgrimage to Mecca—if egohood is not cast away from the heart;—diving hundreds of times in the Ganges cannot give you salvation; salvation will be attained only when the ego is completely resigned.”

(ii) Guru-vâda

Another striking point of similarity in the spirit of the Sahajiyâ Buddhists, the Sufi-ists and the various other Sahajiyâs of the medieval period is the stress laid on the Guru or the preceptor. We have seen that as an offshoot of the

1 See Bhâratiya Madhya-yuge Sādhanār Dhārā by Ksitimohan Sen, pp. 82-83,
Tāntric system Buddhist Sahajiyā school attached the greatest importance on the really qualified preceptor. The same spirit is to be found in almost all the minor religious systems of the medieval period. The highest stress of the innumerable Santa poets is on the Guru, that of the Sūfī poets is also on the Guru or the Mursid,—that of the Śikhs is still more particularly on the Guru, that of the Nāth yogins is similarly on the Guru, that of the Vaiṣṇava Sahajiyās, and the Āuls, Bāuls, Kartā-Bhajās, Darbesis and other religious sects of Bengal is also on the Guru. The fact is so undisputed and so well known that it seems unnecessary to illustrate it from the sayings of the medieval poets. In the works of Kabīr, Dādū, Nānak, Sundar-dās and others separate chapters will be found entirely devoted to the explanation of the importance of the Guru. It has been held there that truth is a flash of light, which is infused from the preceptor into the disciple just as one candle is lighted from another burning candle. As a matter of fact, this Guru-vāda may be regarded as the special characteristic, not of any particular sect or line of Indian religion, it is rather the special feature of Indian religion as a whole.

(iii) All Truth within

We have seen how in the Buddhist Sahajiyā school the physical organism was regarded as the epitome of the universe and how the physical body as such was regarded as the abode of all truth. We have further seen that it is a salient feature also of Sūfī-ism. We have seen how in the Buddhist Tantras all the metaphysical principles with all their corollaries were discovered within the body and how all the sacred mountains, rivers and places of pilgrimage have been located within the physical organism. It has been observed that in the case of the Buddhist Sahajiyās this spirit of regarding the body as the abode of all truth is not a pure and simple case of inheritance from Tāntricism; in many places the influence of Upaniṣadic mysticism is also palpable. In this aspect also the spirit of the medieval Hindi and Bengali literature is strikingly similar to that of the Buddhist Sahajiyā school. We have further noticed before that in this
spirit of the medieval schools the influences of Sūfī-ism was immense against the earlier Sahajiyā background.

In Kabīr, though the Vaiṣṇavite spirit on the Dvaitādvaita line together with the Sūfī-istic spirit may sometimes seem dominant, the Tāntric spirit is not also wanting. By Tāntric spirit, in this connection, we mean the principle of making the physical system, including the physiological and biological processes, an instrument for the realisation of truth. A study of the poems of Kabīr will reveal that Kabīr had a yogic system of his own involving the theory of the lotus or plexus, the nervous system and the control of the vital wind.¹ We find here the two important nerves in the left and the right, most commonly known as the Iḍā and Piṅgalā, as the moon and the sun, or the Gaṅgā and the Jamunā.² The meeting place of the three nerves Iḍā, Piṅgalā and Suṣumnā is, as usual, described here as the tri-veṇi (i.e., the meeting of the three courses).³ The middle nerve Suṣumnā has always been spoken of (like the Buddhist Sahajiyās) as the path to Sahaja or vacuity (sahaja śūnya),⁴ and the yoga has always been described as Sahaja yoga and the final state as Sahaja-samādhi or Sahaja-śūnya. The drinking of the nectar pouring from the moon situated on the top of the mount Meru (i.e., the spinal chord) has been held very important by Kabīr.⁵ All the medieval Hindi poets akin to Kabīr had a similar system of yoga.

5
School of Hindi Poetry, has given an exposition of the yogic system of Kabir and other poets of his school.¹

It will be clear from the above that the yogic and the Tantric influence on Kabir was no less important than the Vaishnavite and the Sufi-istic influence. Like the Buddhist poet Saraha-päda Kabir also says—Within the form resides the formless, his whereabouts are known to none. Musk is there in the navel cavity, yet the dear is roaming about in the forest (in search of it); exactly in the same way, Rāma is residing within every body, but the world does not perceive. The Lord is residing within the body, through illusion none knows Him,—just as the musk-deer smells the grass of the forest and roams about.² Again he says,—“In the lake of the body there is a lotus without parallel, and on it resides the Supreme Being of supreme lustre—of Him there is neither any sign or form.”³ We have seen that the Buddhist Sahajiyās have declared that all the sacred rivers, sacred mountains, places of pilgrimage are within this body, and they localised them within the body.⁴ Kabir also says,—“Within the heart are the Ganges and the Jumna and there is the ghat (bathing step) of Sahaja sūnya and Kabir has created his temple there.”⁵ Again Kabir says that the mind is Muttra, heart Dvārakā and the body is the temple of ten gates and lustre shines within.⁶

In Dādū, however, the Sufi-istic spirit seems to be more prominent. He says,—“O Dādū, in every body resides the jewel of Rāma, but none perceives the Lord; when the Guru gives a light in the hand, people can realise Him there.... The good preceptor has shown, that within the heart is the mosque, here the temple, here is service and salute; why should I then roam about outside? Within is the disciple, within the preceptor, within is advice; in vain

people roam about outside with matted hair on their heads.’’
Again,—‘‘In the temple of my body I shall perform my
prayer,—none else have access there; there shall I count
the beads made of the pearl of mind,—and then will be
my Lord pleased. My bath is in the stream of my heart,
I wash my mind there; I bow down my head before the Lord
and offer me to Him.’’
Again,—‘‘Some run to Dvārakā,
some to Benares and some to Muttra; but the Lord is residing
in the body. Near is that venerable one,—God is within
the body. O Dādū, all are leaving Him aside and are
offering their worship outside.’’
Again Dādū says,—
‘‘Within the body is the sky, within it is the earth; within
the body are the four Vedas, within the body lies their
mystery; within the body there is repeated birth; within
the body is the beginning and the end,—within the body
is God. Within the body are the seven seas, within the body
the unknown Lord; within the body is the water of the
rivers,—within the body is the truth profound, within
the body plays the vital force, within it is Nirvāṇa; within
is the service,—within pours the incessant flow (of nectar);
in the body are arts,—in it the One Being; in it the glow of
love and in it the company of the Lord; in it blooms the
lotus, and resides the bee; in it the manifestation, in it
resides the seer.’’

are Viṣṇu, Maheśa, Brahmā and other god and the sage Nārada, in it are Indra
and Kuṭbera,—in it is the mount Sumeru; within the body is the sun and the
moon, and the seven seas, nine laces of stars, and the flow of the Ganges and the
Godāhari; in it the joyner of worldly bliss and also the Gorakh yogin; in it the
assembly of the Siddhas, in it resides the soul in her loneliness. Within
the body are Muttra and Benares,—in it the householder and the ascetic of the
forest, in it the bathing in the Tirthas; within the body are all dancing and
singing and the playing on of the flute; in it the red powder (phāg) of the spring,
in it the husband and the wife; within it are heaven and the netherlands, in
it the decay of time; in it the beings are living for ages and in it they drink
nectar to be immortal. When the mystery of the body is known, death and
Nānak also says,—
"For whose sake they go to the bank of a Tirtha. (That) exquisite jewel is even in the heart. The Pandit, having read and read, discusses an argument, (But) does not know the thing that is within."  
Again he says,—"The nine regions of the earth are contained in this (human) body; every moment I pay reverence (to it)."

Again,—
"Why do you wander about searching? search should be made in this mind. Who dwells with thee, O Lord, why should he wander from forest to forest?"

(iv) The conception of Sahaja

The conception of Sahaja of the medieval poets also shows striking similarity with that of the earlier Sahajiyās. As in the case of the Bāuls of Bengal, the conception of the ultimate reality of these medieval Hindi poets represents a synthesis between the conception of the reality held by the earlier Sahajiyā school and that of the Supreme Beloved held in Sufi-ism and the then prevalent other devotional schools of India. The ultimate reality being thus conceived as the Supreme Beloved, Sahaja has often been identified with Rāma, where Rāma stands for the Divine Personality as the indwelling principle, with whom it is possible to have relations of love. The Santa-poets flourished mostly before the Bāuls of Bengal; historically, therefore, it seems that the synthesis between the Sahajiyā movement and the Sufi-movement was brought about first by the poets of Northern and Upper India. The same contingency that was responsible for bringing about such a synthesis in Northern and Upper India was responsible for effecting a similar synthesis also in Bengal.

decay (kāla) will not befall anybody, and Sundar says that this mystery can never be fathomed without the help of the right preceptor. ṣhaṭ bhitaṭi ṣiṣṭu mahesā etc., Sundar-granthāvalī, p. 886.

1 Adi-granth, translated by Trumpp, pp. 213-214, iv.  
2 Ibid, p. 298.  
3 Ibid, p. 369.
Speaking about Sahaja Kabir says,—"All speak of the Sahaja,—but none knows what Sahaja actually is. That is really Sahaja, through which a man leaves off all his objects of desire,—that is called Sahaja, which keeps the five (senses)-well-controlled,—that is really Sahaja, in which the son, the wife, all wealth and desire remain merged together, and in which Kabir becomes the maid of Rama; that is really Sahaja, through which the Lord is realised in a natural way. Like their predecessors the medieval poets also emphasised the unspeakable nature of Sahaja, which is the Lord (Sami) or Rama with them. Though Kabir, Dadu, Nanak and other Hindi poets of the Nirguna-school often speak of the Lord or of Rama and Krshna and frequently conceive themselves as the maid of the Lord (and as a matter of fact there is a considerable number of such poems in Kabir, Dadu and even in the Sikh poet Nanak who preached the religion of the Alekh), it will be a mistake to think that these poets believed in any particular incarnation of God; it has been repeatedly declared by these poets that the Lord or Rama or Krshna is no historical being,—neither is he the incarnation of God; He is the Divine Being, the ultimate formless reality—the non-dual all pervading reality, conceived more as immanent than as transcendent,—and that is the Sahaja of these poets. The ultimate state of bliss is frequently described by Kabir as the Sahaja-samadhi just like the Buddhist Sahajiyas. This state of Sahaja is to be attained through the final arrest of the functions of the mind,—and this Sahaja is the state of vacuity and hence it is often called the suni sahaja. This Sahaja is a non-dual state of supreme bliss (sukha or mahasukha)."

   Ibid, p. 316.
The same description of Sahaja is to be found in the poems of Dādū. It is to be observed that the element of yoga-practices is comparatively less in Dādū than in Kabir,—the sole emphasis of Dādū seems to be on the intensity of devotion and love through which mind attains the perfect state of unity and non-duality and this state is what he calls the state of Sahaja. Dādū speaks of the Lord (Śāmi or Rāma) more frequently than Kabir; but the Lord is none but the formless non-dual ultimate Beloved and that ultimate Beloved is the Sahaja.1 It is through self-abnegation or the merging of the self in the absolute or, in the language of the Sūfīs, passing away in the Divine Personality in Fana that Sahaja can be realised.2 It is to be realised not through any austere practice, but through a state of passing away or deep immersion through the intensity of supreme love and devotion.3 About Sahaja Dādū says in a poem,—“When the mind reached the Sahaja state all waves of duality vanished away,—hot and cold became the same,—everything became one.”4 “Bereft of the ‘two’ is Sahaja,—there joy and sorow become one; that Sahaja neither dies nor lives,—it is the state of complete Nirvāṇa... Hold your mind in the Sahaja vacuity amidst all duality, and by attaining the final state of arrest drink nectar,—and there is no fear of kāla (time or death).”5 “O Dādū, let us proceed to that land of Sahaja where none dies or lives,—there is no fear of the whirl of coming and going,—one realisation for all time. Let us proceed, O Dādū, to the land where neither the sun nor the moon can go,—where there is no access for day and night,—everything remains.

\[5 \text{Ibid, verses on pp. 382-383.}
merged in Sahaja.\(^1\) When the mind becomes absorbed in Sahaja, one can see without eyes, feel without the body and mutter the name of Brahman without the tongue, one can hear without the ears, walk without the legs and may have consciousness without the mind,—this is really the nature of Sahaja.\(^2\) According to Dādū also this Sahaja is vacuity (śūnya) and is pervading the whole universe as the ultimate reality behind all phenomena. "In every place, in every body (ghāta) and in everything else Sahaja vacuity lies pervading,—there dwells the Stainless One, no quality has any access there."\(^3\) "One and indivisible is the lake, immeasurable is water,—swans are bathing in that lake; void is the lake of Sahaja where the swans (the mind of the saints and the yogins) are sporting."\(^4\) "A tender plant is the self, where blooms the flower of Sahaja; in a Sahaja (natural and easy) process true preceptor gives advice about it, but rare are persons who can understand."\(^5\) All diversity is but the sporting of Sahaja itself. "That vital power (prāṇa), that body (pyāṇḍa)—that flesh and blood,—those ears and that nose—all are playing wonderful play in Sahaja."\(^6\)

Sundar-dās in his poems on Sahajānanda says that after the preceptor had explained to him the nature of Sahaja, he has given up all religious ceremonialism and yogic practices and has been trying to approach Sahaja (the ultimate truth) in a Sahaja (natural and easy) way. This Sahaja is the Brahman, the unified cosmic principle.\(^7\) As a matter of fact it will be seen that almost all the mystic

7 Sundar says,—"That perfectly pure Sahaja is in everything, and with that Sahaja all religious people gather together. Śāṅkara began his Śādhana in this Sahaja (and in the Sahaja way),—Sukdeva, Sanaka and others also followed this Sahaja way. Devotees like Sojā, Pīpā, Senā and Dhanā all have drunk of this Sahaja-bliss in the natural way,—Raidās was also a Śādhaka of Sahaja and Guru Dādū also realised infinite bliss in this Sahaja path. Sundar-granthāvalī, pp. 303-06.
poets of the medieval period were advocates of Sahaja. Even the Śikh poet Nānak spoke of the Sahaja in the same sense as did Kabīr, Dādū and others. With him also Sahaja is not only the ultimate reality, it is at the same time the Lord—the ultimate Beloved.¹

(e) Similarity in the Literary Form and Language

It may be observed in this connection that not only in ideology, but also in the poetic representation, there is a general similarity between the poetry of the Santa and the Sūfī poets and that of the Buddhist Sahajiyās. Often similar imageries, similar phrases and even similar lines are to be found. Thus, for example, Śānti-pāda in a Caryā song says,—alakkhā lakkhā na jāi, i.e., “the imperceptible cannot be perceived”; the same line is to be found in Kabīr several times.² We have seen that the highest state of realisation has often been spoken of by Kabīr as vacuity or the sky (śūnya or gagaṇa) and the ultimate reality—the Sahaja—is also spoken of as void. In a poem Kabīr says,—“There is the sky or the void in the beginning,—void at the end and void also in the middle,”³—and this indestructible void never comes and goes,⁴ neither does any entity come and go in it. When the mind is placed in this vacuity, death bows down its head before a man.⁵ These lines instantaneously remind one of the Caryā songs studied before. We have seen that Bhusuka-pāda compared the defiled mind to a deer, beset on all sides with hunters;⁶ Kabīr also compares this mind to the deer beset with hunters, kāla (time, decay or death) being generally compared to the hunter.⁷ Saraha-pāda says in a Dohā, “The Pundits are in the habit of explaining all the Śastras, but do not know the Buddha,

who is residing within the body.” The same couplet with a slight change in language is found in Kabir.¹ In a poem of Bhusuka-pāda we find that Sahaja has been compared to a big tree,² Kabir also compares Sahaja to a big tree in a nice poem.³ In a Caryā song Kānhu-pāda compared his purified mind, exhilarated with supreme bliss, to an elephant in rut, who is depicted revelling in the lotus-pond of Sahaja. Kabir also compares Sahaja to a tender plant in blossom, and the mind to an elephant attracted to it.⁴ There are poems in Kabir, which in their entirety can very well be compared with some of the Caryā poems of the Siddhācāryas. Thus the song No. 62, given in the Appendix of the Kabir-granthāvali (edited by Mr. Śyāma-sundar Dās) can very well be compared with some of the Caryā-padas describing the ecstatic realisation of the Sahaja bliss.⁵ The next verse of Kabir (Appendix, Song No. 63) on the illusory nature of the phenomenal world—and the unreality of all duality also offers striking similarity in idea and representation to some of the Caryā-padas dealing with the same idea. There are some other analogies, such as the analogy of the mute in connection with the realisation of the Sahaja, the analogy of mind’s being merged in Sahaja just as salt in the water of the sea, etc.; but they are inherited by all

⁵ The poem of Kabir runs thus:—

these sects from earlier common sources. Saraha-pāda says in another Dohā that those who do not enjoy (with the perfectly purified mind) the perfectly purified objects of enjoyment (viewing them and realising them all as Sahaja in nature) and only hover in the voidness, will have to return to objects (of enjoyment) like a crow, which leaves the mast and hovers over the sea and then turns to the mast once again. The imagery is found in Dādū where he says that the mind must be made firmly fixed in Sahaja which is the mast in the ocean of existence. ‘The crow,’ he says, ‘sat on the mast and took its journey in the ocean; it hovered round and round and got tired and then sat still on the mast of the ship.’ In another Dohā Saraha says,—“Don’t repress the desires for objects,—for see the cases of fish, insects, the elephant, black-bees and the deer” (i.e., they themselves bring about their death by the instinctive attachment towards taste, sight, touch, smell and sound respectively). Almost similar Dohās are found in Tulsīdās, Ravidās, Dādū and others.

Another important point of similarity between the Buddhist Sahajiyā literature and the literature of the medieval vernaculars is the enigmatic style used in describing the secret doctrines of the cults. With this we shall deal in the Appendix (E).

APPENDIX (B)

GENERAL INFORMATION ABOUT THE LITERATURE OF THE NĀTH CULT IN BENGALI

The Nāth literature of Bengal consists mainly of longer narrative poems and strarty songs. Thanks to the scholarly enthusiasm and literary taste of Dr. Grierson, who, when a civilian in the district of Rangpur in North-Bengal, collected for the first time some versions of the songs concerning Māṇik-candra and his son Gopī-candra or Govinda-candra. In course of the narration of the eventful stories of the royal family the poets described the supernatural power attained by some of the Nāths, who are generally spoken of as the Siddhas or yogins who have attained perfection. The first publication of these narrative poems in the *Journal of the Asiatic Society of Bengal* in 1878 under the caption of Māṇik-candra Rājār Gān (song of king Māṇik-candra) readily attracted the notice of the Bengalee scholars to such narrative poems, generally sung by the illiterate villagers in the interiors of Bengal and different versions of the song were soon discovered in different parts of North-Bengal as well as of East-Bengal.  

Besides the different versions of the ballads concerning king Māṇik-candra, his wife Mayanāmati, and his son

---

1 Mr. Śivnāth Sil discovered a manuscript of one version of the song ascribed to the authorship of Durlabh Mallik and it was published in 1902 under the caption of *Govinda-candra Gīt* and in the sub-heading the text was described by the editor as embodying the doctrine of the Tāntric Buddhists. Mr. Viśveśvar Bhāṭṭācārya soon collected a rather complete version of the song of Māṇik-candra and Gopī-candra from the district of Rangpur. Some manuscripts of some versions of the poem composed by Bhavāni-dās were discovered in the districts of Tippera and Chittagong and a version of the poem composed by the Mahomadan poet Sukur Manud was discovered in North Bengal, Dr. N. K. Bhāṭṭaśālī also edited a version of the song, which was published under the caption of *Mayanāmati Gān* under the auspices of the Sāhitya-pariṣāt of Dacca.

The Māṇik-candra Rājār Gān, collected and published by Dr. Grierson and the versions of the song collected by Mr. Bhāṭṭācārya are substantially the same and the *Gopī-candra Gīt* edited by Mr. Śil is rather a concise version of the same song with omissions and additions here and there. All the songs on Māṇik-candra, Mayanāmati and Gopī-candra have been published by the University of Calcutta under the joint editorship of Messrs. Viśveśvar Bhāṭṭācārya, D. C. Sen and Basanta Ranjan Ray in two volumes.
Gopi-candra or Govinda-candra, the other important discovery is the different versions of the songs on Gorakṣa-nāth (popularly known as Gorakh-nāth), mainly based on the story of the down-fall of the great yogin Matsyendra-nāth or Mīna-nāth as a result of the curse of goddess Durgā, and the rescue of the preceptor by his worthy disciple Gorakh-nāth through his yogic strength.¹

The literature of the Nāth cult of Bengal, like most other types of literature of Bengal, consists practically of songs. All the big and small versions of the poems on Gopi-candra and Gorakh-nāth were, and still are sung mainly by the Yogi-sects and also by the Sūfī-istic Muslims in North-Bengal and East-Bengal. The Yogi-castes of Bengal² somehow associate themselves with the Nāth sect that spread almost

¹ A version of the song ascribed to Śyāmdāsa Sen was edited by Dr. N. K. Bhāṣṭāḷi (published under the auspices of the Dacca Sāhiṭya-pariṣad) under the caption of Mīna-cetana. Many versions of the song, which, in spite of the difference in details, are substantially the same, have been discovered in different parts of the Chittagong Division of East-Bengal. In the manuscripts four names are found for the author of the song, viz., Kavīndra-dās, Sekh Payzulla, Bhīm-Dās and Śyām-dās Sen. A version of the song has been edited by Munsi Abdul Karim Sāhiṭya-viśārada. He has prepared the text by comparing the available manuscripts (the alternative readings, omissions and additions being noted in the foot-notes and the appendix). The text has been published by the Vaṅgīya Sāhiṭya-pariṣad under the heading of Gorakṣa-viṣayā. The text has been re-edited by Panchanan Mandal under the caption Gorkha-viṣay, published by Visva-Bharati.

In the Dharma-mahāgala of Sahadeva Cakravarti the story of the fall of Mīna-nāth and his rescue by Gorakh-nāth has been incorporated within the general story of the Dharma-mahāgalas. There we find that the consort of Śiva once became desirous of knowing the truth behind the world and entreated the lord to explain all secrets to her. Śiva agreed and went with her to the bank of the sacred river Vallakā, where he instructed her in all the secrets of the physical and spiritual life. Mīna-nāth heard these instructions from the womb of a fish; then follow Mīna-nāth’s uncharitable remarks on Gauri (the consort of Śiva),—her curse on him—his fall in the land of Kadali-pāṭan and transformation into a sheep through the charm of the women of that country—his rescue by Gorakh—the meeting of the five Nāths, viz., Kāḷūpā, Hāḍīpā, Mīna-nāth, Gorakṣa-nāth and Caurāngi-nāth—their obeisance to Hara-Gauri and the installation of Mīna-nāth as a king in Mahānanda (vide B.S.P.P., B.S. 1304 p. 286). The secret of the Nāth cult has best been explained (of course enigmatically) in the text Gorakṣa-viṣay. There are, however, some other unpublished yogic texts dealing with the general tenets of yoga akin to that of the Nāth cult, and of these mention may be made of the Anādi-purāṇa, or the Anādi-caritra, Haḍa-māla-grantha, Yoga-tantra-kalā and Veda-māla-grantha. (Vide, B. S. P. P., B.S. 1331, No. 2 and B.S.P.P., B.S. 1341, No. 4).

² The Yogis of Bengal are about four and a half lac in number and they reside mostly in East-Bengal and North-Bengal. As a caste they bear the title Nāth with their name, and are mostly weavers, and sometimes dealers in betel-leaves and lime and sometimes cultivators. The Yogis generally bury the dead though now-a-days they are adopting the purely Hindu process of cremating the dead with the Hindu ceremonial. For a detailed study of Nāth yogins of Bengal see Nāthasampradāya Ithās, Darśan O Sādhan-praṇālī by Dr Kalyani Mullick, M.A., PhD. (in Bengali, Calcutta 1950).
throughout the whole length and breadth of India sometime during the tenth to twelfth century A.D.; and in fact, though the Yogis of Bengal are now being gradually assimilated within the composite fold of Hinduism, they retain some old social customs as the characteristic features of their caste. The Yogis (or rather the Ḫugis) generally sing these songs in accompaniment with a musical instrument known as the Gopī-yantra, which is a simple instrument made with the bottle-gourd, a bamboo stick and a string attached to them. These songs, particularly the songs of Mina-nāth and Gorakh-nāth, are very popular also among the Muslims of East-Bengal and some of the versions of the story of Mina-nāth and Gorakh-nāth have been collected from them. The currency and popularity of such versified stories among the Muslims of Bengal has historical reasons behind it. The Muslims of Bengal are mainly converts from the people of Bengal (both Hindu and non-Hindu), and formerly constituted an integral part of the Bengalees both racially and culturally. The stories of Gorakh-nāth and Gopī-cand, at least the skeleton of such stories, had been, in all probability, current in Bengal (and not only in Bengal, but in many other parts of India) before the time of the conquest of Bengal by the Muslims in the thirteenth century. Such stories were, therefore, common heritage of the Muslims and the non-Muslims of Bengal. The gradual revival of Hinduism in Bengal, however, introduced Sanskritic and Purānic stories among the public, and the mind of the Caste Hindus readily responded to this Sanskritic and Purānic influence. As a result the popular vernacular stories were naturally pushed in the corner, and were preserved only by the Muslims and the low-class Hindus, who did not come directly under the pale of the Sanskritic and Purānic

1 This is, however, a very popular musical instrument of Bengal. At the suggestion of Sister Nivedita Dr. D. C. Sen was convinced of the fact that this Gopī-yantra owes its name to king Gopī-candra of the ballads; but we are not quite sure of the fact. Even at the present time the Bāuls and other Vaiṣṇava beggars of Bengal sing songs from door to door in accompaniment with this instrument.

2 In the United Provinces the yogi singers are generally called Bharṭharis or Bharṭharis. They sing the song of Gopī-cand and Maigan-nāth and the teachings of Bharṭhari. Now Hindu domestic festival is complete unless these Bharṭharis come and sing their songs. They use ochre coloured clothes of the Sannyasins. But they are by religion Mahomedans. They seem to be the descendants of their yogi forefathers and have inherited their yogi songs as well.
influence of revived Hinduism. Moreover, the Caitanya-
movement of Bengal over-flooded the soil of the province
with innumerable Rādhā-Kṛṣṇa songs and soon it be-
came proverbial in Bengal that there is no song without
Kānu (i.e., Kṛṣṇa). So strong was this Vaiṣṇava movement
in Bengal and so immense was the lyrical appeal of the
Rādhā-kṛṣṇa songs that its influence was felt even by the
low-class illiterate section of the Hindus. It is for all these
reasons that the indigenous vernacular songs of Bengal,
such as the songs of the Nāth literature, practically became
obsolete among the Hindus and they are preserved as an
ancient heritage largely by the Bengali Muslims and some-
times by the people of the lower substrata of the Hindu
community. It may also be noted in this connection that
the Nāth cult and the Nāth literature of Bengal with its
salient features have inspired the Muslims more than the
Hindus in composing a large number of yoga-literature in
Bengali. To such a type belong the Jñāna-sāgara of Āli Rājā,
Jñāna-pradīpa and Jñāna-cautīśa of Syed Sultan, Nur-Kandila
of Mohammad Safi, Vāra-māsyā, Yoga-Kalandar and Satya-
jñāna-pradīpa of Mursid.1 These texts represent a popular
mixture of the different kinds of yoga, the yoga of the Sahajiyās
and of the Nāths and the Sūfī-istic yogic system. In the
course of its evolution Indian Sūfī-ism was variously influ-
enced by the different yoga systems of India,2 and it was for
this reason that Sūfī-istic Islam of India could easily com-
promise, or rather harmonise itself with the minor religious
sects of India which have largely influenced the growth of
modern Indian literatures. The Muslim yogic literature
of Bengal is but the result of such a compromise.

Besides the stories of Gorakh-nāth and Gopī-cānd, stray
songs of the Nāth-gurus, emphasising the vanity of life
and the pernicious effect of worldly enjoyment and stressing
side by side the importance of yoga as the only path for
escaping death and decay and for attaining liberation, are
found among the Yogis and the Muslims of North-Bengal
and East-Bengal. Munshi Abdul Karim quotes a poem
as a specimen in his introduction to the Gorakṣa-vijaya.

1 Vide introduction to Gorakṣa-vijaya by Munshi Abdul Karim.
2 See Vaṅge Svāp̄hi-prabhāva by Dr. Enamul Haq.
The present writer had occasions to listen to such songs in the interior of the district of Bakergunge, and such songs are invariably couched in an unintelligible enigmatic style, which generally characterises yogic songs in all the vernaculars of India. The enigmatic song in the Dharma-mañgala of Sahadev Cakravarti¹ is a typical song of this class. The Nāths became gods or demi-gods in later times in Bengal as well as in other parts of India, and such is specially the case with Gorakh-nāth. There are many popular beliefs in the divinity of Gorakh-nāth. A typical tale of this nature is associated with a custom of East-Bengal, which is known as the “paying off the debt of Gorakh.” Gorakh is here depicted as the cattle-god and Māṇik-pīr is his disciple. The ceremony consists in offering milk-made sweetmeats to Gorakh and Māṇik. A song is sung in this connection, in which we find that Māṇik-pīr, the Fakir (or the mendicant), comes to the house of Kālu-ghoṣ with his usual cry of Vam, Vam (which is the general custom with the yogi-mendicants); at the sound of Vam, Vam Kālu-ghoṣ’s mother understands that the Fakir has come to beg for something,—and in consultation with the daughter of Beku Bānu she offers the Fakir five pice (in the name of the five Fakirs, or rather the five Pīrs of the Muslims). Māṇik refuses to accept cash-payment and asks for milk curd; but out of her foolishness Kālu’s mother deceives the Fakir and disappoints him. As a result thereof all the cows, calves and even the milk-maid of Kālu-ghoṣ die within a very short time. Kālu’s mother realises her folly, solicits the mercy of the Fakir,—and the Fakir takes pity on her, strikes his stick against the ground with the usual sound of Vam, Vam and everything becomes all right instantaneously.² In some places of North-Bengal Gorakṣa-nāth is taken to be the god of the cow and songs are sung of him in an annual festival.³ In this transformation of Gorakṣa-nāth to a cow-god the word gorakṣa was popularly confused to mean what the word ga-rakṣaka (i.e. the protector of the cows)

¹ Vide, B.S.P.P., B.S. 1304.
² Bāṅlār Sakti, Vol. iii, No. 3.
³ Cf. also:—Rājasāhir Sonā-pīrer Gān by Mr. S. N. Das, Vaṅga-lakṣmi, Baisākh,
   1347.
³ See Gorakṣadār Gītā—Pravāt, B.S. 1329.
means and hence was probably the deification of Gorakṣa-nāth to a god associated with the cow, as Mina-nāth was with fish. The confused etymological meaning of the word gorakṣa seems to be responsible also for the tradition that Gorakṣa-nāth was the son of Śiva by a cow.¹ There are the Punjabi and Nepalese traditions of Gorakh-nāth's being born in cow-dung or upon the dunghill.² According to some Tibetan tradition Gorakṣa-nāth was a cowherd.

In the Vaiṣṇava love-lyrics of Bengal we find occasional references to the yogins of the Gorakh order. In a well-known poem of Govinda-dās we find that Krṣṇa once disguised himself as a Kāṇphaṭ yogin to propitiate Rādhā who had got angry with him. He went as a yogin to Rādhā's house exclaiming the name of Gorakh and blowing the horn (as is the general custom with such yogins).³ We also find occasional references to Rādhā's expressing the desire to assume the form of a yoginī with shaven head and rings in the ears (just like the yoginis of Kāṇphaṭ order) and to wander from place to place in quest of her lover Krṣṇa.⁴

It will not be out of place to say a few words about the time and authorship of the long narrative poems that constitute the main portion of Bengali Nāth literature. As for the time of composition of these poems what we can at most say is that the skeleton of the stories may be as old as the eleventh or the twelfth century; but surely the versions of the songs, which are available to us either in manuscript, or in the oral reproduction of the singers, are not very old. There is sometimes a tendency, however, to take account of the linguistic evidence in this connection; but in the

examination of the linguistic evidence provincialism is more often than not confused with archaism. It is difficult to determine at this late period of the history of our literature who the original composers of the songs of Gorakhnāth and Gopi-cand were; but it seems that these songs were handed down from singer to singer from sometime near about the twelfth century A.D. In course of such transmission the skeleton of the story was supplied with new flesh and blood by different singers and poets in different times and localities. Munshi Abdul Karim in his introduction to the Gorakṣa-vijaya argues from the frequency and the prominence of the name of Sekh Fayjulla in the colophons, and also from the evidence of some Sufi-istic Islamic influence in the version of the Gorakṣa-vijaya, that Sekh Fayjulla is the original poet of the Gorakṣa-vijaya. But it seems that all the poets, including Sekh Fayjulla himself, received some versions of the poem from earlier sources and to the version they received they made sufficient additions and alterations.

The Nāth literature of Bengal, far from being an isolated phenomenon, is closely connected with the history of the Nāth literature of most of the Indo-Aryan vernaculars, viz., Panjabi, Marāṭhi, Midland Hindi and Eastern Hindi and also Odiyā. Besides the vernacular texts on Gorakhnāth and those ascribed to the authorship of Gorakhnāth there are as many as thirty Sanskrit texts on yoga, ascribed to the authorship of Gorakh. Of these Sanskrit texts Gorakhnāth is claimed to have been an early writer of Hindi poetry and he is further claimed to have been the first known Hindi (or Panjabi) prose-writer. Dr. Mohan Singh gives the list

2 Vide Nātha-sampradāya (in Hindi) by Hazariprasad Dwivedi; also Gorakṣa-nāth and Medieval Hindu Mysticism, by Dr. Mohan Singh, and Gorakṣa-nāth and The Kāṇbhaṭa Togis, by G. W. Briggs, Ch. XII.
of as many as twenty-five Hindi works about Gorakh-nāth and
his cult mentioned in the State Library, Jodhpur.\(^1\) He also
gives illustrations from other poetical works embodying
the sayings of Gorakh, and of these the Gorakh-bodh, which
is taken to be a Hindi work of the fourteenth century, deserves
special mention. The most authentic version of the Hindi
texts ascribed to the authorship of Gorakh-nāth is to be
found in the Gorakh-bānī edited with Hindi annotations
by Dr. P. D. Barthwal and published by the Hindi Sahitya
Sammelan from Prayag in 1955. In his collection Dr.
Barthwal has included some twenty-six texts and also some
more songs. He has compared the manuscripts available
and tried to give a correct reading as far as possible.\(^2\) There
are poetical works with the Gopi-cānd legend in old Panjabi,
of which mention may be made of the Udās-Gopī-cānd.\(^3\)
The Gopi-cānd legend is very popular also in the Marāṭhi
literature, particularly in folk-lore. The Marāṭhi legends
on the Nāths (including Gopi-cānd) can be gathered from the
concluding portions of the Jñāṇeshvari\(^4\) of Śrī-jñāṇeśvara
and also from the widely mythical accounts given in the
Yogi-sampradāyavīṣkṛti.\(^5\) There is a Hindi version of the

---
\(^1\) The list is as follows:—Gan Bodh, Gorakh-Ganesh Gosthi, Mahadev-Gorakh-
samvod, Gorakh-Datt Gosthi, Kanthad-bodh, Asht-Mudra, Panchmatri Jogi, Abhai
Matra, Daya-bodh, Navre-bodh, Ankalishalok, Kafar-vodh, Gorakhnath Ki Satra-
Kala, Atam-bodh, Pran Sankhi, Gyan Chautisi, Sankhya Darshan, Rahras, Nathji
Ki Tithali, Battris Lechan, Gramth Homavari, Chhand Gorakhnath Ji ka, Kisan
Astuti-Kari, Siddh Ikhis Gorakh, Sist Praman Gramth. Besides these the following
texts are also said to belong to the sect; e.g., Tattva-sāra, Brahma-jñāna, Svarūpa-
Jñāna, etc., attributed to Gorakh-nāth. Asanga-vāhya of Bāla-nāth, Mahāyoga-
vāhya of Māṇḍuki-pāva, Mukti-sarala-vāhya of Vakra-nāth, Amṛta-prayoga of
Hālika-pāva, etc.

\(^2\) Texts included in the Gorakh-bānī edited by Dr. Barthwal are:—
(i) Sābad, (ii) Pada, (iii) Sīryā Darsan, (iv) Prāṇ Sankatl, (v) Naravaibodh,
(vi) Ātmabodh, (vii) Abhaṁmātrā Šoga, (viii) Pandratha Šitihi, (ix) Sapta sār,
There are three appendices, the first appendix include the following:—
(i) Goras Ganeti Guśṭi, (ii) Gūnādīpam bodh (Goras Datta Guśṭi), (iii) Mahādev
Goras Guśṭi, (iv) Śīṣṭa Purāṇ, (v) Dayābodh, (vi) Kuch Pada.
The second appendix contains:—
(i) Sapta Vār Navagraha, (ii) Brata, (iii) Pānca Agni, (iv) Aṣṭa-Mudrā,
The third appendix contains a few songs.

\(^3\) The M.S. of the text is preserved in the Library of the University of the
Punjab. (No. 374) Dr. Singh in his work on Gorakh-nāth quotes some
portions of the text.

\(^4\) A Marāṭhi commentary on the Gītā by Jñāṇeśvara.

\(^5\) A Hindi work said to be a translation by Čandra-nāth yogi, and published
by Śiva-nāth Śāstrī, Ahmedabad.
Gopī-cānd song by Lakṣaṇa-dāsa. Even at the present day dramas are composed in Marāṭhi and Hindi with the legend of Gopī-cānd, and it is also a popular story of modern Hindi cinema. Dr. D. C. Sen quotes in his Typical Selections From Old Bengali Literature a version of the Gopī-cānd song (in a mixed Odiyā-Bengali dialect) from the yogis of Mayurbhanj. Stray songs on Gopī-cānd and Gorakh-nāth are popular even at the present day among the yogis of the Punjab, Bombay and Marāṭha. Songs of Gopī-cānd, similar to those that are found in Bengal, are current as popular folk-lore also in Magahi and in the Bhoj-puri dialect.

The historical reason for this wide-spread popularity of the Nāth literature throughout India is that the Nāth movement was, and still is, an all-Indian movement. The followers of this sect, who are now best known as the Kānphaṭ yogins (because of the peculiar custom of having the ears pierced through before being initiated into the order and also of wearing ear-rings) are found widely scattered all over India. They are occasionally met with separately as wandering mendicants in towns and villages and also in groups in their headquarters. Such Yogins are found abundantly in the Northern Deccan, in the Central Provinces, in Gujrat and Marāṭha, in U.P., Bihar and Bengal, and also in some Himalayan regions, particularly in Nepal. Even at the present day the Kānphaṭ yogins have their quarters and scared places of pilgrimage all over India, the headquarters of Tilla in the Punjab and that of Gorakhpur and Dinodar being the most important. A detailed study of the important Nāth yogins contemporaneous with the most important yogin Gorakh-nāth is to be found in the

1 B.S.P.P., B.S., 1928, No. 2.
2 Mr. G. C. Halder, M.A., has given a short sketch of the Panjabi, Hindustani, Gujarati, Marāṭhi and Bengali versions of the story of Gopī-cānd under the caption of The Legend of Rājā Gopī-cānd in a paper read in the sixth Oriental Conference. (Vide Proceedings of the Sixth Oriental Conference).

4 For the numerical strength of the Kanphaṭ yagins in the different provinces of India and for their sects, sub-sects, vows, customs, quarters and sacred places of pilgrimage see the work of Mr. Briggs. As Mr. Briggs has dealt with these things in detail, the present writer does not propose to enter into the details of the question here.
commendable Hindi book *Nāth-sampradāya* by Dr. Hazari-prasad Dwivedi; he has also given in his book an account of the different sects of yogins of the later times branching out from the Nāth cult.

Whoever might have been the original exponent of the cult, Gorakh-nāṭh, of all the Nāths, enjoys the most widespread celebrity and popularity, and it will be very clear from the heaps of traditions and legends that have gathered round the figure of this great Yogin that, wherever might have been the birth-place of Gorakh-nāṭh, the field of his activities spread from the Frontier Provinces in the west to Bengal in the east including the Himalayan regions. It is for this reason that literary accounts of Gorakh-nāṭh’s life and activities are found in almost all parts of India. Another point to note is that, though the Kānphaṭ Yogins have their quarters and headquarters, where they generally reside in groups, the custom of going on long pilgrimage to the sacred places scattered all over the country is very popular among them, and it is natural that with their long wanderings they have spread the legends and traditions of their sect to all parts of the country, and this may be recognised as a plausible explanation for the inter-mingling of the stories and traditions. In spite of the legendary and mythological nature of the story of king Gopī-cānd, we have reasons to believe that he was a historical person and that his native land was Bengal;¹ but it is because of the reasons stated above that this story of Gopī-cānd plays a very important part in the folk-literature of the different vernaculars. There is a large number of wandering yogins belonging to the Kānphaṭ sect, who beg from door to door, from one part of India to the other part, singing songs on Gorakh-nāṭh and Gopī-cānd. In Bengal we occasionally find such a class of Hindu Yogins and Muslim Fakirs still singing songs of the Nāths.

We have given before an exposition of the religious background of the Nāṭh literature of Bengal and some other problems, which are associated with the origin and development of the cult. Now we shall give a short sketch of the

¹ *Vide Infra, Appendix (c).*
stories with which the Nāth literature of Bengal flourished. The story of Gorakh-nāth runs as follows:—

At the time of the creation of the universe Śiva came out of the mouth of the primordial Lord in the form of a Yogin with matted hair and ear-rings; Mina-nāth was born as a Siddha and from the bone (hāda) of the Lord was born Hādipā (i.e., Jālandharīpā); from the ear (karna) of the Lord was born Kānpā, and Gorakh-nāth with his long hanging bag of mystic importance (siddha-jhulī) and his outer garment of patched cloth (kānthā) came from the matted hair of the Lord. A beautiful girl of the name of Gaurī was the mother of the world. The Lord then asked some one of the Yogins (including Śiva, who here represents none but Ādi-nāth, traditionally said to be the original Nāth of the Nāth cult) to accept Gaurī as his wife, to which all bent their heads in disapproval. At the suggestion of the Lord then Śiva or Hara accepted Gaurī and came down on earth with her, and all the Siddhas followed them. Mina-nāth and Hādipā became attendants of (i.e., disciples of) Hara-Gaurī, Gorakṣa became the attendant of Mina-nāth and Kānpā of Hādipā, and all of them began to practise austere yoga. Then Gaurī wanted to know from her Lord the supreme truth (tattva). For this purpose both the Lord and his consort repaired to the Kāroda sea where there was a small beautiful castle raised on the surface of water (tāṅgi). There the Lord began to explain to his consort all the secret truths, but the goddess fell asleep. Mina-nāth, however, in the form of a fish (mīna) lay beneath the castle and heard all truth from the mouth of the Lord. The Lord came to know of it and cursed Mina-nāth saying that there would be a time when he would forget all Tattva.

Thereafter once in Kailāsa the goddess proposed to Śiva that the Siddhas should marry and lead a domestic life; but the Lord replied that the Siddhas were perfect yogins and above all wordly emotions. The goddess then proposed to put the Siddhas to a test in the form of a beautiful damsel. All the Siddhas, excepting Gorakṣa, fell victims to the amorous charm of the goddess and every one except Gorakṣa felt within a desire to enjoy her,—and the desire of the
Siddhas was all approved of by her. Mīna-nāth, as he desired, was destined for the land of Kadali, where he would keep company to the amorous girls of the land; Hāḍiphā was destined for the country of Mayanāmati, where he would serve as a sweeper and enjoy the company of Mayanāmati, the queen;—and Kāmphā was destined for the city of Dāhukā. Consequently Mīna-nāth, the great yogin, went to the country of Kadali, where he got enamoured with six hundred women and was passing his days with them in erotic dalliances. Gorakh-nāth, however, came to know of the sad and shameful plight of his Guru and entered the city of Kadali as a dancing girl. In course of his dancing and singing Gorakh rebuked the preceptor in enigmatic words (so that the women of the country could make no sense out of them) and also explained to him the importance and the processes of yoga. The preceptor gradually came to his senses, recollected his own history and came out of the land with his worthy disciple Gorakh and once more engaged himself in austere practices of yoga.

The other story, viz., the story of Gopī-cānd (or Gopī-candra, Govi-candra, or Govinda-candra), which in its complete version includes also the story of his father Māṇik-candra, runs as follows (the differences in the different versions being here ignored):—

Māṇik-candra was a renowned and pious king of Bengal.

---

1 Here we find that the goddess adopted all the vilest means to seduce Gorakh but was sadly defeated in all her attempts. Similar legends are also found in the Dharma-maṅgalas, where the goddess tries to captivate the mind of the hero Lāusen by her charm of body in the for of a beautiful woman; but Lāusen, like Gorakh, could put the goddess to shame by the strength of his character.

2 In the Dharma-maṅgalas also we find mention of such a country inhabited mainly by women full of carnal desire and it was only through the grace of Lord Dharma that the hero Lāusen could get the upper hand over all the allurements. The country is called in the Nāth literature the Kadalī Desa. Various attempts have been made to identify this land of Kadali, the general tendency being to identify it with Kāma-rūpa, which is noted as one of the original centres of Tāntricism, and the yoni-pīṭha of the Goddess. But we should also consider another fact in this connection. In the Sanskrit dramas we find occasional reference to the Kadalī-grha (i.e., a house in the plantain garden) of the kings for love-making with women other than the married ones. The tradition is also continued in the Bengali Maṅgala-kāvyas, where ordinary women, assembled on the occasion of any marriage ceremony get enamoured with the beauty of the bridegroom and wishes to have him allured in the Kala-van (plantain garden). May the name Kadalī for the country where Mīna-nāth got allured by vile women have something to do with the above fact?
He had many wives, including Mayanāmati, the daughter of Tilak-candra. To avoid family quarrels Mayanā was decreed to live separately in the city of Pherusa away from the royal family. In the reign of the pious king the happiness and prosperity of the people knew no bounds; but unfortunately a tyrant with a long beard hailed from East-Bengal and occupied the post of Minister for Revenue. His oppression soon led the subjects to join together in worshipping Dharma with mystic religious rites with a view to putting the king to death. The attempt of the people became fruitful and the future longevity of the king was reduced from eighteen years to six months. Citra Govinda (i.e., Citra-gupta, the record-keeper of the king of death and also something like a personal assistant) opened his record-book and issued summons to the king and Godā-yama was sent to bring the life (prāna) of the king. Mayanā came to know of the mishap and hastened to the king. She requested the king to get himself initiated into the great mystic wisdom (mahā-jñāna) of yoga, so that he might be able to challenge the decree of Death; but the king felt it beneath his dignity to be initiated by his wife and refused the proposal indignantly; as a result death befell the king and he was brought to the city of the dead. But Mayanā at once seized the city of the dead through her mystic power and inflicted all sorts of torment on the officers. The king in charge of the dead was in a fix; but Gorakh-nāth, who was the Guru of Mayanā, brought about some compromise and accordingly Mayanā was endowed with the boon of a son to be born to her. Mayanā came to learn that the life-span of the child was destined to be only eighteen years; she grumbled and it was arranged that the son would be immortal, if he would accept Hādī-siddhā as his Guru and attend upon him. The corpse of the king was then cremated in a truly royal manner; Mayanā became Sati by placing herself on the funeral pyre by the side of her husband; but she came back unburnt and in due time gave birth to a son, who was the king Gopi-cānd in question. The prince grew in age and married Adunā, the daughter of king Hariścandra, at the age of twelve (according to some versions at the age of nine), and received his other
daughter Padunā as present.¹ The prince ascended the throne and began to enjoy his life to his heart's content in company of the young wives. Mayanā felt that if Gopi-cānd was thus allowed to plunge into wordly enjoyment he would soon die at the age of eighteen. She proposed the king's renunciation of all wealth and beauty, and the acceptance of Hāḍipā as his Guru after taking the vow of a yogin. The king first refused the proposal stoutly and indignantly, and he even went so far as to suspect the character of his mother in connection with Hāḍipā. The mother was shocked and Gorakh, her Guru, cursed Gopi-cānd for uttering such calumny against his mother and decreed afflictions during the period of his Sannyāsa. The queen-mother, however, made fresh attempts to convince her son of the vanity of the world and the excellence of the immortal life, which can be attained only through renunciation and yoga. The son was convinced; but when he entered the harem he was once more tutored by the queens and instigated against the mother. The king at the instance of the wives asked his mother to demonstrate her yogic power by standing the ordeals to which she would be put, and the mother agreed. She was put into fire and drowned into water, she was given poison to swallow and made to walk on the edge of a knife and was put under various other direful ordeals of the type; but she came out successful in all cases. According to some of the versions the king, at the instance of the queens, dug a hole under the floor of the stable where Hāḍipā was buried alive; the Siddha resorted to his yogic power and remained absorbed in yogic meditation for a long time and was later on rescued by his disciple Kānupā.² Mayanā also asked the Hāḍi-siddhā to demonstrate his supernatural power of yoga before her son and the Siddha performed unbelievable miracles and thereby commanded respect and obeisance from the king. The king ultimately accepted Hāḍipā as his preceptor,

¹ According to the version of Bhavānī-dās Gopi-cānd had four queens, Adunā, Padunā, Ratan-mālā and Kāñcā-sonā (Kāñcān-mālā?). See Gopi-candrer Gān, Part II, C.U., p. 332). According to Sukur Mahmad the four queens were Adunā, Padunā, Candānā and Phandānā.

² Such is the tradition also in the Marathi versions of the story. See Topi-sampradāyā-viṣkṛti.
renounced the world at the age of eighteen, got his head shaved and ears split, bore the beggar’s Jhuli and the patched outer garment (kānthā) and took to the vow of the yogin. The Guru, however, put the disciple under various trials and tribulations through his magical power, and the worst of all was that the new yogin was sold to a prostitute of the name of Hīrā, who compelled him (the king) to serve her as the humblest menial as a punishment for his refusal to yield to her amorous desires. However, the king bore all these trials with infinite patience and implicit obedience towards the Guru. Mayanā eventually came to know of the sad plight of her son, rebuked Hāḍipā for this maltreatment of her son and demanded the release of her son at once. After long twelve years Hāḍipā came back to the king, cursed the prostitute and all her female attendants to be transformed instantaneously into bats, and conferred the secret wisdom on the king. The king then returned home. He could not first be recognised by the queens; but when recognised, he was welcomed by all and the king began to lead a happy life once more.

1 In the Udās Gopi-cānd, a Panjabi version of the story of Gopi-cānd, we find that Gopi-cānd was made a king at the age of twelve and took Sannyāsa at the age of sixteen (soło barisi kā jogi huā), and that Gorakh-nāth, and not Hāḍipā, was his Guru. See some portions of the text of Udās Gopi-cānd quoted from a MS. at the end of the work of Dr. Mohan Singh.
APPENDIX (C)

AN ACCOUNT OF THE PROMINENT FIGURES IN THE NĀTH LITERATURE OF BENGAL

In the Nāth literature of Bengal the most important figures are (1) Mīnā-nāth, (2) Gorakh-nāth, (3) Jālandharipā, (4) Kānupā, (5) Gopī-candra and (6) Mayanāmatī. Various accounts, mostly legendary in nature, are found about these important personalities; let us give a brief sketch of them in the following pages.

(i) Mīnā-nāth

In all the traditions about the Nāths, Mīnā-nāth or Matsyendra-nāth figures as the first of the human Gurus. In many of the standard texts on yoga Matysendra-nāth has been saluted as the Ādi-guru. In the yogic texts the names of Matsyendra, Gorakṣa, Jālandhara, Cauraṅghē and others are commonly found as the stalwarts of Haṭhya-yoga, and some yogic practices are specially associated with the names of some of these yogins. References to Mīnā-nāth and Gorakṣa-nāth and some other Nāths are also found in some of the Tāntric texts. Mīnā-nāth and Matsyendra-nāth (with all the other variants of the name) seem to have been identical, and they came to be two perhaps in course of time. In the Nāth literature the word Nātha (which originally means ‘the lord’) has sometimes been used with an ontological significance and

1 For a study of these personalities and many others personalities associated with the Nāth cult the reader may consult the following books also:—Dr. Kalyani Mallick, M.A., Ph.D., Nāthasampradāya Itihās, Darśan O Śādhanapravāśī (in Bengali), Calcutta, 1950; Prof. Hazari Prasad Dwivedi, Nātha-sampradāya (in Hindi), Allahabad, 1950; Dr. Dharmavir Bharati, Siddha-sāhitya (in Hindi), Allahabad, 1955.
2 Cf. Matsyendrā-sana, Gorakṣa-sana, Jālandhara-bandha, etc.
4 The popular name is Mīnā-nāth in Bengali, Matsyendra in Sanskrit and Machāmdar in Hindi and Panjabi (Cf. Mocandar in Bengali). The variants of the name found in the Kaula-jñāna-nīrṇaya (which is ascribed to Matsyendra-nāth) are Macchaghnā-pāda, Macchendra-pāda, Matsyendra-pāda, Mīnā-pāda, Mīnā-nātha, Macchendra-pāda Matsyendra, Macchindra-nātha-pāda. (See Introduction by Dr. Bagchi).
there is sometimes a tendency to interpret the names of the Nāthas, particularly of Matsyendra and Gorakṣa, as some transcendentental states of mind or soul attainable through the practice of yoga. Abhinava-gupta in his Tantrāloka speaks of Macchanda-vibhu and explains it as one who tears the fetters of bondage.¹ Prof. Tucci cites one instance from Durjaya-candra’s commentary on Catuspīṭha-tantra, where prajñā is spoken of as makara-mīna.² In the Hindi text Gorakṣa-sār (which is a loose Hindi translation of the Gorakṣa-sātaka)³ Machaṃdara has been explained as one who has controlled his mind, who has known the truth of the six Cakras (nerve-plexus), and who shines in the unflickering lustre of his soul.⁴ Traditionally, however, Mīna-nāth has variously been associated with fish, and that perhaps because of his name (as Gorakṣa-nāth is with the cow, Kukkūrī-pāda with the dog, and so on). We have seen that Mīna-nāth received instructions on yoga from Ādi-nāth in the form of a fish.⁵ In another legend Matsyendra is said to have come out as a boy from the mouth of a fish.⁶ Mīna-nāth is known also by another name, viz., Macchaghna⁷ which

obsure religious cults

means 'a killer of the fish' and as a matter of fact he has been spoken of as a Kaivarta or a fisherman by caste. According to the Kaula-jñāna-nirṇaya Matsyendra, though originally a Brahmin by caste, came to be known as Matsyaghaṇa as he acted like a fisherman in Candra-dvīpa first by killing a big fish and discovering the text containing the sacred knowledge from the belly of the fish and by once more rescuing it (the text) by killing the fish that had once more eaten it up. This tradition is also responsible for the location of Mīna-nāth in Candra-dvīpa, which is generally taken by scholars to be some coastal region of East-Bengal. In the pictorial representations of the Siddhācāryas, available in Tibet and Nepal, Mīna-nāth is always associated with the fish, and somewhere he is found eating the intestines of a fish.

According to all the traditions Gorakh-nāth is the disciple of Matsyendra-nāth. In Bengali Nāth literature we find occasional reference to another disciple of Matsyendra of the name of Gābhur-siddhā. We have discussed before the Bengali legend of the downfall of the great yogin Mīna-nāth being seduced by the women of the country of Kadali. The story has its variant in the story of Matsyendra-nāth being captivated by the two queens of Ceylon (Sangal). The yogin was leading a domestic life in the company of the queens and was ultimately discovered by his disciple Gorakh, who entered the palace as a fly. Matsyendra then left Ceylon, but took with him the two sons, viz., Pāros-nāth

1 Kaula-jñāna-nirṇaya, Pañala xvi (22-37). See also introduction, pp. 8-9.
2 MM. H. P. Śāstrī identifies this Candra-dvīpa with the Candra-dvīpa of the district of Bakergunj. Dr. Bagchi is disposed to identify it with the Sundwip in the district of Noakhali. (See B.S.P.P., B.S. 1329, No. 1; also Introduction to Kaula-jñāna-nirṇaya by Dr. Bagchi, pp. 29-32).
3 See B.S.P.P., B.S., 1329, No. 2; also Kalyāna, Togānka.
4 The Tibetan synonyms for Matsyendra nāth (or Lui-pā with whom he is generally identified) can be restituted in Sanskrit as matsyodara or matsyāṇtrāda ("the eater of the intestines of a fish," Levi, Le Népal, 1, p. 355, referred to by Dr. Bagchi). Lui-pā is also described in the Pag san jon zans as a Buddhist sage sprung from the fisherman caste, who was a disciple of Śavari-pā. In the same work Machendra is said to be the incarnation of Mahādeva as a fisherman in the womb a fish at Kāmarūpa (Vide Dr. Bagchi, pp. 22-23).
5 Cf. ek sīya yāche mor jati gorakhā i
āra sīya ā che mor gābhur siddhā ||

6 In the Bengali legend he entered the city of Kadali as a dancing girl.
and Nîm-nâth, who were born to them, and the two sons became the founders of the Jain religion.¹ According to the Nepalese and Tibetan traditions, as we have noted before, Matsyendra-nâth is identified with Lui-pâ, who is regarded as the Ādi-guru among the Buddhist Siddhācāryas. As S. Levi describes in his Le Nepal, Matsyendra is identified with Avalokiteśvara Padma-pâni. There is the legend that Gorakṣa once came to Nepal in search of his Guru Matsyendra; but as the mountain was difficult of access he had recourse to the stratagem of binding the nine nāgas under a turtle and sat on them. Consequently, the sky becoming cloudless, there was drought in the valley for long twelve years. Then Bandhu-datta, the Guru of Narendra-deva, the then King of Nepal, went to mount Kapotala with the king to bring Avalokiteśvara or Matsyendra. They propitiated Matsyendra with worship. Avalokiteśvara was then cleverly brought to Nepal, imprisoned in the form of a black bee and installed in pomp in a place called Bugama. There then followed rain in abundance and thus the country was saved. The Brahminical version, however, narrates the story somewhat differently. Once Gorakṣa-nâth went to Nepal, but he got offended with the people of the country as he was not warmly received. He imprisoned the clouds and put them under his seat for twelve years; consequently there was drought and famine. Fortunately Matsyendra chanced to come to Nepal at the time and, while the Guru was passing by, Gorakṣa stood up to show him respect and thus the clouds were let loose and there was rain in abundance, which saved the whole country. Matsyendra thus in the form of Avalokiteśvara Padma-pâni commands universal respect in Nepal still to the present time and is still worshipped in the land with much reverence.² There is the celebrated annual procession of Ratha yātrā (a procession with Matsyendra as Avalokiteśvara on a decorated chariot) in honour of this

¹ Vide Dr. Bagchi’s Introduction to Kaula-jñāna-nirnaya, p. 15; Briggs, p. 233. For details and variants of the story see Briggs, pp. 72-73.

² According to the Nepalese tradition Mîna-nâth is the younger brother of Matsyendra and is worshipped almost with equal pomp.
popular god. Matsyendra has, however, been deified in later times in many other places and the images of Matsyendra and his favourite disciple Gorakṣa are found in some shrines of the Nāthists,—and the foot-print of these two demi-gods are also worshipped in some places by the Kān-phaṭ yogins. The peculiar custom of having the ears split is also sometimes traditionally believed to have been introduced by Matsyendra-nāth and many are the legends that are associated with such a tradition. There is another tradition which makes Matsyendra-nāth the founder of Kāmarūpa-mahāpīṭha of the so-called Arddha-tryambakamaṭha, which represents the fourth or Kaula order of Tāntric worship. Again there is a legend recorded in the Gorakṣa-kimaya-sāra, which makes Matsyendra-nāth identical with Mahā Viṣṇu Sāṅga, whom some scholars are inclined to identify (though on insufficient ground) with the old Viṣṇu-svāmī.

Attempts have been made to fix up the approximate time of Matsyendra. The time of his advent has been held in the Nepalese tradition synchronous with the reign of Narendradeva, who flourished in the seventh century a.d., but as the alleged synchronism cannot be historically relied upon because of the extremely mythical nature of the whole tradition, the time of Matsyendra cannot be fixed up with reference to it. Dr. P. C. Bagchi, however, has attempted to fix the date sometime in the tenth century with reference to the date of the manuscript of the Kaula-jñāna-nirṇaya. The mention of Matsyendra (as Macchanda) by Abhinavagupta, who lived towards the beginning of the eleventh century approximately confirms this date. Again the tradition of the identity of Matsyendra with Lui-pā (who flourished in the tenth century) will also put Matsyendra to the same century. The time of Gopi-cānd will also ascribe some such time to Matsyendra. Many of the traditions taken together will strengthen the belief that

1 For detailed description of this procession and other religious functions in Nepal in honour of Matsyendra see Briggs, pp. 144-145, pp. 231, et seq.
2 Sutra, pp. 227-228.
3 Infra, pp. 457-459.
Matsyendra, the first Nāth Guru flourished at the latest in the tenth century A.D., perhaps earlier.

(ii) Gorakh-nāth

Though Mīna-nāth or Matsyendra-nāth was the first of the Nāth Gurus, the most celebrated Nāth Guru was Gorakṣa-nāth. All Indian traditions of later days make him the incarnation of Śiva, who is the divine source of all yoga. It is believed, and there seems to be a considerable amount of truth in the belief, that it was Gorakh, who popularised, if not introduced, the principles and practice of yoga throughout the length and breadth of India. As in the case of Mīna-nāth, the name Gorakṣa-nāth has frequently been explained docetically. Thus in the hymn of Gorakṣa-nāth by Śrīkiṣṇa in the Rāja-guhyā it has been said,—"By the letter 'ga' is implied the qualified nature, 'ra' indicates the form and beauty, by 'kṣa' is implied his nature as imperishable Brahman,—salute be to that Śrī-gorakṣa." He is the supreme Brahman of the Brahmans, the gem on the crown of Rudra and others,—and the three worlds are made by him. He is the totality of all the qualities,—he is at the same time the absence of all the qualities,—he resides in qualities in his unqualified nature,—he is both formless and with form. He is worshipped by the gods (in heaven), by men on earth, and by the Nāgas in the netherland. He is all alone, eternal and free from the fetters of existence, he is the supreme Brahman and the imperishable divine lustre. The sky is his temple decked with various gems, and the all-good lord is there with boons of safety and security. He is saluted by Brahmat, Viṣṇu and other gods,—by the sages and other ordinary people and also by all the Siddhas, who are of the essence of knowledge." Such docetic descriptions of Gorakṣa-nāth are also found in the Śrī-gorakṣa-sahasra-nāma-stotra (hymns of the thousand names of Śrī-gorakṣa) of the Kalpa-druma-tantra and also in the Brahmanḍa-purāṇa. Bengali literary traditions make him the purest

and strongest of all the yogins. The erotic charm even of goddess Durgā herself was repeatedly put to shame by the purity and strength of his character. Most of the renowned medieval saints, who composed songs in vernaculars, paid homage to this great Yōgin along with Matsyendra, Carpaṭa, Bhartṛ, Gopi-cānd and others. Kabir refers to Gorakh several times in his poems and there goes the tradition in the Hindi work Gorakh-nāth-ki-goṣṭhi that Kabir met Gorakh and held religious discourse with him. A similar tradition is found in the Janam Sākhī of Bābā-Nānak, where it is said that Nānak met Gorakh-nāth and Matsyendra-nāth and held religious discourse with them. It is further said that when, in course of his long wanderings as a Yōgin, Nānak went to Ceylon he was mistaken for Gorakh-nāth.1 Dādū refers to Gorakh and the doctrine of the innumerable Siddhas. Gahini-nāth of the twelfth or thirteenth century acknowledges Gorakh to be the great teacher of Pīpā; Guzrati poets also mention Gorakh with reverence. Kṛṣṇa-dās, a Guzrati poet, sings of Mucchandra and Gorakṣa as two Jaina saints.2 Rajjabjī, a Rājputanā saint of the nineteenth century, mentions Gorakh with reverence. If we take account of the literature of Nāthism in all parts of India, we shall find that everywhere traditions hold Gorakh to have been the supreme of all the Gurus.

So widely popular has been the great saint Gorakh-nāth among many of the Yōgi-sects of India, for a long time comprising a decade of centuries, that countless traditions have grown round the figure of the great yōgin, and Mr. Briggs has taken the trouble of collecting many of these traditions in his work on Gorakh-nāth and The Kānpaṭ Togis of India.3 From these heaps of wild legends, which are often contradictory to one another, and which have grown more with a belief in the divinity of Gorakh than in his human personality, it is now impossible to construct any historical account of the life and teachings of the saint. Traditions generally agree to hold him to be the disciple of Matsyendra. Matsyendra, we have seen, was most probably a saint of

1 See Janam Sākhī, Trumpp’s translation.
2 Dr. Mohan Singh, op. cit., p. 8.
3 See also the work of Dr. Mohan Singh.
the tenth century A.D.; Gorakṣa then must also be placed sometimes in the tenth century, or at least in the first half of the eleventh century. Traditionally Gorakh is regarded by the orthodox Kāṅphaṭ yogins to be unborn and deathless; he is the immortal saint, believed to be living still now in some hilly region of the Himalayas. Gorakh has sometimes been held to be the Guru even of the triad, viz., Brahmā, Viṣṇu and Śiva, and there is the story of Viṣṇu’s creating the world in the primordial water from a handful of ashes from the eternal fire (dhuni) of Gorakh in the netherworld (Pātāla). There are also stories of Gorakh’s fighting with many goddesses in different Śākta centres and the goddesses in every case had to bend their heads before the mighty Yogin.¹ Various are the legends even about his birth in the human form. We have seen that in the Bengali work Gorakṣa-vijaya he is said to have come of the matted hair of Mahādeva.² There is also the story of his being born on a dung-hill from a quantity of ashes, which was given by Mahādeva to a barren lady to swallow in order to have a child, and which was thrown away in disregard on a dung-hill. Yet another legend would make him born of a cow by Mahādeva. Apart from these legendary accounts traditions would show that he was born in some low caste family.

There are controversial legends about the birth place of Gorakh. The mythical account says that he lived in the Punjab at Peshwar (?) in the Satya (krita) yuga, at Gorakhpur in the Tretā yuga, at Hurmy beyond Dwārakā in the Dwāpara yuga and at Gorakhmari (Gorakhmandi) in Kathiwar in the Kali yuga. It is also said that Gorakh appeared in the Kali yuga in the form of the Śeṣa Nāga. According to the Nepalese tradition Gorakh lived at Gorakh in Western Nepal in a cave. The cave and the town are said to have obtained their name from Gorakhnāth, and even the national name Gurkha is sometimes explained with reference to Gorakh. Others would again make Gorakh-nāth the original inhabitant of Gorakhpur in

¹ For many such stories see Yogi-sampradāyā-viṣṇu.
² Cf. jaṭā bhedi nikalita jati gorakhs-nāthe l
siddha jhuli siddha kāṭhā tāhār galāte ||
U.P., and the name of the city is also explained with reference to the name of the saint. As a matter of fact Gorakhpur is one of the most important centres of the Kānphaṭ Yogis even to the present day. Some Nepalese tradition would again hold that Gorakh came to Kāṭhmūṇḍū from the Punjab. He is again claimed as a saint of Oudh. The monks of Gorakhpur hold that he came to the United Provinces from the Punjab, and that his chief seat was at Tilla, in Jhelum. Traditions in Kacch (Sindh) would have him in the Punjab. Yogis at Nasik hold that Gorakh went from Nepal to the Punjab and thence to other parts of India. Dr. Mohan Singh holds that Gorakh was an original inhabitant of some place round the area of Peshwar. But from the preponderance of traditions and from the importance which all the Kānphaṭ Yogis attach to Tilla in Jhelum of the Punjab, it will appear that Gorakh was an original inhabitant of the Punjab, at least a considerable portion of his life-time was spent in the province. But at the same time it seems that Gorakh travelled throughout the whole of India and legends associate his life and activities with Afganistan, Beluchistan, the Punjab, North-Western Provinces, Sind, Guzrat and Maratha in the west, north and south, and with Ceylon in the extreme south, with U.P. in the middle, and with Nepal, Assam and Bengal in the east.

In the Nāth literature of Bengal Gorakh-nāth figures prominently as the disciple of Mīna-nāth and the preceptor of queen Mayanāmatī, mother of king Gopi-cānd. But in the literature of the other vernaculars "Gorakh is said to have been the teacher of Puran, son of Salbahan of Sialkot; of Bharthrihari, step brother of Vikramaditya of Ujjain; of Raja Gopi Chand of Ujjain, Rangpur, Dharanagri, or Kanchanpur; of queen Lunan Chamari and queen Sundran of Assam (or Orissa?); of Ranjha of Jhang; of Gugga Pir of Rajputna; of Baba Ratan of Peshwar; of Dharmanath, who migrated to Western India; of king Ajaipal and Venapal; of Kapila muni and Balnath; of the holy Prophet Muhammad; of Madar; of Luharipa; of Ismail, a Siddha; of Ratan Sain, the hero of Padumavati by Jayasi."¹ The tradition of

¹ Dr. Mohan Singh, op. cit., p. 7.
Gorakh’s holding religious discourse with Kabīr and Nānak, the most important poets of the Santas and the Sikhs respectively, have already been mentioned. All these traditions convince one only of the extent of popularity which Gorakh has been enjoying in the religious history of a vast country like India.

(iii) Jālandhari-pā

So far as the Gopi-cānd legend is concerned, Jālandhari-pā figures as the most important as he was the Guru of Gopi-cānd himself. Jālandhari and Matsyendra were direct disciples of Ādi-nāth and as Matsyendra was destined by goddess Durgā to be snared by the women of Kadalī, Jālandhari-pā was destined, as desired by him, to lead the life of a sweeper (which was the work of a Hāḍi) and enjoy the company of queen Mayanāmatī. In the Nāṭh literature of Bengal Jālandhari-pā is better known as Hāḍi-pā.¹ It may be noticed in this connection that while Mīna or Matsyendra and Gorakṣa generally bore the title of Nāṭh with their name, Jālandhari (or Hāḍi-pā) as also his disciple Kānu-pā bore the title of ‘pā’² (and seldom Nāṭh) with their names. It is perhaps because of this fact that Jālandhari-pā has been traditionally held to be the introductor of the ‘Pā’ sect among the Kānphaṭ Yogins. He has also been held responsible for the practice of splitting the ears. It is said that when king Bhartṛ was initiated by Jālandhari into the Yogi-cult, the former asked for some distinctive mark,—and the splitting of ears and wearing long ear-rings were the distinctive marks which he was allowed to have.³ The Aughari sect of yogins also trace their origin to Jālandhari.

According to the Tibetan tradition Jālandhari is identical

¹ In the Gorakṣa-vijaya we find that this Siddha originated from the bone (hāḍa) of Mahādeva and hence the name Hāḍi-pā. But the more plausible reason for the name seems to be his desire to take up the meanest profession of a Hāḍi (a very low class people with the general occupation of the sweeper), if, however, that would allow him a chance to enjoy a woman like goddess Durgā.

² This pā is, however, nothing but the colloquial form of the Sanskrit word pāda commonly used as a mark of reverence with the names of the Siddhācāryas. The use of pāda as a mark of reverence is found in many other religious sects also. The form phā as in Hāḍi-phā, Kānu-phā, etc., seems to be nothing but the East Bengal dialectal aspirated form of pā.

³ Briggs, p. 9.
with the Buddhist Siddha Bāla-pāda, who was born in Sind in a rich Śūdra family. He courted Buddhism and was practising yoga in the province of Udayana. Thence he went to Jālandhar of the Punjab and was henceforth known as Jālandhari.¹ He travelled from Jālandhar to Nepal and thence to Avanti, where he made many disciples including Kṛṣṇā-cārya. He then came to Bengal in the guise of a Hādi, performed miracles, and was recognised by queen Mayanāmati, who made her son king Gopi-cānd his disciple. Gopi-cānd, however, took the Siddha to be a cheat and the Siddha was buried alive and was rescued later on by his disciple Kṛṣṇācārya after twelve years.² This legend of Jālandhari being buried alive by king Gopi-cānd (at the instance of his queens and minister) and his rescue by Kṛṣṇācārya is found in all the traditions,—Bengali, Hindi, Marathi and Tibetan. In the Gorakṣa-vijaya we find that Kānu-pā was informed of the sad plight of the Guru by Gorakṣa-nāth. In the thirty-sixth song of the Cāryāpadas we find Kānha-pāda (or Kṛṣṇācārya-pāda) mentioning Jālandhari-pā as his Guru. We are loathe to believe that this Jālandhari-pā and Kānha-pā of the Buddhist fold are identical with the Nāth Siddhas of the same name. Jālandhari is said to have been the Guru also of king Bhartṛhari of Ujjain, whose renunciation of the royal wealth and enjoyment for taking the vow of a yogin is associated with the same popular pathos as that of king Gopi-cānd. In Western India songs on Bhartṛ are as truly popular as those on Gopi-cānd. Other traditions, however, make Bhartṛ the disciple of Gorakh.

(iv) Kānu-pā

Kānu-pā³ was the worthy disciple of Hādi-pā. Like

¹ We find mention of some Jālandhar-gaḍ in the Dharma-maṅgala literature (cf. Mānık-gāṅguli, p. 70; Dvija Rām-candra, MS. C. U. No. 2464, p. 2) which seems to be some native state in Bengal.
³ Kānu-pā is variously named as Kānuphā, Kānpha, Kāhnāi, Kānāi, Kāluphā, Kālaphā, etc., all of which are dialectal variants of the Sanskrit name Kṛṣṇapāda.
Mīna-nāth and Jālandharī Kānu-pā was destined for the city of Dāhukā in the south, where he would have the opportunity of enjoying a woman like Durgā in her amorous guise. Though there is thus the indication of the fall also of Kānu-pā, we do not get any account of his fall in any of the stories either relating to Gorakh-nāth or Gopī-cānd. On the other hand we find that Kānu-pā once met Gorakh in his way, informed him of the fall of his Guru Mīna-nāth in the country of Kadalī and was in his turn informed by Gorakh of the sad plight of his own Guru Hāḍī-pā, who was buried under the floor of the stable by king Gopī-cānd. Kānu-pā at once hastened to the city of Gopī-cānd (in Meherkul or the city of Pāṭikā) and rescued his Guru by devising various means. All the poets are, however, silent as to what happened to Kānu-pā after the rescue of the Guru. In the Gopi-candrer Sannyās by Sukur Mahammad there is, however, further indication of Kānu-pā’s trials in the city of Dāhukā with the curse from his own Guru Jālandharī, with whom he (Kānu-pā) played false in order to save Gopī-cānd from the wrath of Jālandharī. It was further decreed by the Guru at the supplications of Mayanāmatī that Kānu-pā would be rescued from his trials in the city of Dāhukā by his disciple Bāil Bhādāi. But nothing whatsoever is heard of Kānu-pā in the literature. These stories of the rescue of Jālandharī by his disciple Kānu-pā are also found in the legends of Western and Northern India,—but there Kānu-pā seems to be more commonly known as Kānari-nāth.

The question as to whether the Kānu-pā of the Nāth literature is identical with the Kānhu-pāda, or Kṛṣṇācāryapāda of the Caryā-songs has rightly attracted the notice of scholars. We have already noticed the important fact that Kānu-pā of the Caryā-songs has, at least in one place, spoken of Jālandharī-pā as his Guru. But in spite of this

1 The city is also called Dāhurā, Vahaḍi, Dārāv, etc.
2 For these cities and the controversies over their identification in different parts of East Bengal and North Bengal see the introduction to the Gopi-candrer Gān (C.U.) by Mr Viśveśvar Bhāṭṭācārya.
3 See Hājīr Bāchār Purāṇ Bāṅgalāy Siddhā Kānuḍā Gīt O Dōhhā by Dr. M. Shahidullah, Dacca Sāhitya Pariṣat Granthāvali, No. 10.
coincidence, the identity of the two is still now a matter of speculation. Again, even in the esoteric Buddhist field we find that many Tāntric works including the important commentary on the Hevajra-tantra (known as the Hevajra-pañjikā or Toga-ratnamālā) are ascribed to Kṛṣṇācārya, and we have nothing to be sure that the authors of all these works are the same; on the other hand there is reason to believe that there were more than one person of the same name belonging to the Buddhist fold. Rai S. C. Das, Bahadur in his edition of the Pag Sam Jon Zang has given short accounts of at least three Kṛṣṇācāryas; of these one of the Kṛṣṇācāryas had his disciple in Bhāde, who has been included in the lists of the eighty-four Siddhas. This Bhāde has undoubtedly given rise to Bàil Bhādāi of the Bengali Nāth literature.

(v) Gopī-candra or Govinda-candra

Almost all the legends about Gopī-candra or Gopī-cānd describe him as a powerful king of Bengal. But literary records of Bengal do not agree on the point of localising the kingdom of Gopī-cānd. On the whole two conflicting claims are found; according to some versions of the songs the locality of the whole story of Gopī-cānd is North Bengal in or near about the district of Rangpur, while in many other versions the locality is said to be in the district of Tippera. As a matter of fact the topographical references found in some of the versions lead us to North Bengal and there are traditions in those parts of North Bengal of Gopī-cānd’s being a king of the vicinity; but the topographical references in some other versions will again lead one to think that the locality must be somewhere in the district of Tippera in East Bengal. ¹ The fact may be that the empire of Gopī-cānd extended over parts of East Bengal as well as of North Bengal and hence are the traditions in both the places. The legend of Gopī-cānd has already been described. We shall deal here very briefly with some of the questions pertaining to the probable time of his reign. He was perhaps a Gandha-

¹ For the discussion on the Topography see Mr. V. Bhaṭṭācārya’s introduction to C.U. edition. See also B.Ś.Ś.P.P., 1328, No. 2.
baṇik (literally a seller of perfumes) by caste, and the tradition of his family relation with Cānd Beṇe, the important merchant that figures in our early and medieval literature, will also corroborate this tradition. According to the version of Bhavānī-dās Gopi-cānd left no posterity; while local traditions both in Rangpur and Tippera show that he left a son Bhava-candra or Udayacandra by name. According to the Hindi and Marāṭhi tradition Gopi-cānd had a sister of the name of Campāvatī, who, after Gopi-cānd had taken his vow of Sannyāsa, tried to dissuade him,—but was at last herself convinced of the superiority of the yogic life.1 European scholars like Buchanan Hamilton, Glazier and Grierson held that the family of Gopi-candra was somehow related to the family of the Pāla kings of Bengal. Some hold that Māṇik-candra, who was the father of Gopi-candra, was the brother of Dharma-pāla, and after the death of Māṇik-candra there followed war between Dharma-pāla and Mayānāmatī, mother of Gopi-cānd, and Gopi-cānd inherited the throne after Dharma-pāla had been defeated and killed; some again hold that Dharma-pāla was the brother-in-law of Mayānāmatī. Grierson, however, held that Māṇik-candra was not the brother, but some rival of, or native prince under the sway of king Dharma-pāla. This theory of the relation of Gopi-cānd or his father with Dharma-pāla has been discarded by scholars, as no credible evidence on the point is available. Of the few important historical documents available on Gopi-cānd we may consider first of all the rock-inscription of Tirumalai placed by Rajendra-cola of the Deccan. According to this inscription Rajendra-cola defeated Dharma-pāla of Daṇḍabhukti, Raṇasūra of Southern Rāḍha, Govinda-candra of Vaṅga and Mahipāla of Northern Rāḍha. We have seen that Gopi-candra is also wellknown as Govinda-candra, and Vaṅga would originally mean East Bengal, and there is also the tradition, as we have seen, of Gopi-cānd being a king of East-Bengal; associating these facts together it may be presumed that king Govinda-candra, referred to in the

Tirumalai inscription, is the Gopi-cand of the Nath literature. Rajendra-cola flourished in the first quarter of the eleventh century; if the identity of the Govinda-candra of the inscription and that of Nath literature be accepted then Gopi-cand or Govinda-candra may be taken to have flourished in the first half of the eleventh century; and this fixing of time approximately tallies, we have seen, with the time of Matsyendra-nath, who might have flourished in the tenth century.

The discovery of three copper-plates in the districts of Faridpur and Dacca in East Bengal, containing the genealogy of some Candra-dynasty of East Bengal, has thrown a flood of light on the question of the identification of Gopi-cand. The genealogy of the Candra-dynasty, found in these inscriptions, runs as follows:—

\[
Pūrṇa-candra
\]
\[
Suvarṇa-candra
\]
\[
Trailokya-candra
\]
\[
Śrī-candra
\]

According to Durlabh Mallik the father and grand-father of Māṅik-candra were Suvarṇa-candra and Dhādi-candra respectively. Dr. N. K. Bhaṭṭaśāli has tried to explain Dhādi-candra as referring to Pūrṇa-candra. According to the Marathi and Hindi tradition Tilak-candra or Trailokyacandra was the father of Gopi-candra. Again Mayanāmati herself has sometimes been spoken of as the daughter of Tilak-candra. On the whole the names of Suvarṇa-candra and Trailokyacandra are found common in the inscriptions and in the Nath literature and this has led scholars to suppose that Gopi-candra came out of the Candra dynasty of East Bengal. Experts have given their opinion that these copper inscriptions belong to the tenth or eleventh century a.c., and therefore Gopi-cand might have flourished some time near about this time. Another fact to be considered in this connection is that Deva-gaṇa, grand-father of Bhadreśvara, who again was father of Sureśvara, well-
known author of the Śabda-pradīpa, was the court physician of king Govinda-candra; Suresvara flourished probably in the latter half of the eleventh century,—his great grandfather Deva-gaṇa then flourished perhaps sometime in the second half of the tenth century or in the first half of the eleventh century. But the difficulty is that there is nothing to be sure that the Govinda-candra referred to by Suresvara in the introduction of his work is identical with the Govinda-candra or Gopī-cānd in question.

(vi) Mayanāmati

Before we conclude the chapter we should say a few words about Mayanāmati, who is important not only as the mother of king Gopī-cānd, but also as a woman well versed in yoga and having miraculous power thereby. In some of the versions she is said to be the daughter of some king, Tilak-cānd by name, and her name in her childhood was Śiśumati (and Suvadanī according to another version). According to the Tibetan tradition she was the sister of Bhartṛ, the king of Malvar, mentioned above. A modern author Candra-nāth yogin speaks of her as the Dharma-bahin of king Bhartṛ of Ujjain.\(^1\) In the Hindi version of the story of Gopī-cānd she is said to be the daughter of Candra-sena of Dhārā-nagar. From her very childhood she showed signs of possessing wonderful yogic powers and this attracted the notice of the great yogin Gorakh-nāth, who initiated her into the Nāṭh cult. Gopī-cānd, we have seen, once cast serious aspersions against the mother and the legend of the curse of goddess Durgā towards Hāḍi-pā to be enthralled in the city of Mehera-kula in the company of queen Mayanāmati, lends some support to such a suspicion; but the suspicion of the son was stoutly denied by the mother and the poets have also very cleverly handled the situation.\(^1\) Mayanāmati is depicted in the Nāṭh literature as a Tāntric Dākinī, which means the woman of mystic wisdom. As the Dākinī is deified in the Tantras as the goddess of mystic wisdom, or some sort of a demi-goddess having mystic wisdom as well as supernatural powers, so

\(^1\) Yogi-sampradāya-viśkṛti, Ch. 39.
Mayanāmatī has also been deified in later times as some one midway between a witch and a goddess and she has also sometimes been identified with Caṇḍī or Kāli, and she is still now worshipped in some parts of North Bengal with animal sacrifice by priests belonging to the Rāja-vamśa caste. Mr. V. Bhaṭṭācārya has presented us with one of the interesting songs that are recited on the occasion of the worship of Mayanā-buḍī.
GENERAL INFORMATIONS ABOUT THE DHARMA LITERATURE OF BENGAL

In giving an idea of the literature belonging to the Dharma cult we should first of all mention the two liturgical works available on the cult, the Śūnya-purāṇa ascribed to Rāmāi Pañḍit, who is traditionally supposed to be the founder of the cult in the age of Kali, and the other, the Dharma-pūjā-vidhāna which is also ascribed to Rāmāi Pañḍit, as well as to Raghu-nandana. These liturgical texts represent popular literature of a composite nature in a very loosely versified diction, which embody topics on cosmogony, liturgy, legends about Dharma-worship, building of temples, rituals, ceremonies and indigenous practices, all centering round the godhead of Dharma. There is a great deal of controversy over the authenticity of these texts and the time of their composition and their authorship. As our present study is not primarily historical, we do not propose to enter into the details of these controversies; for our purpose it is necessary to state briefly the conclusions, which we have arrived at by a minute study of the data available on the points at issue.

As for the Śūnya-purāṇa, which is ascribed to Rāmāi Pañḍit, there are sufficient reasons to believe that the text in its published form does not represent the contents of a single book composed at any particular point of time by any particular author. On the other hand the text seems to be a collection of versified accounts of the Dharma cult
which grew during the thirteenth and the seventeenth centuries among the adherents of this cult. It will be observed that the same topics under the same heading have been introduced thrice or even four times within the text with slightly different readings. There is no order in the arrangement,—cosmogonical, liturgical, ceremonial and legendary accounts have been introduced here and there pell-mell. Linguistic differences are also noticeable in different chapters. All these go to prove that the text is more of the nature of a compilation than the authentic version from a single hand. With the pseudo-archaic forms introduced late in the composition of the verses the language of the Śūnya-purāṇa in general presents no archaic character which might justify its claim to have been composed sometime during the fourteenth or the fifteenth century. From the heaps of traditional accounts that have gathered round the figure of Rāmāi Paṇḍit we are loathe to explain away the personality of Rāmāi as purely fictitious. We may not, and we should not, accept all the mythical and semi-mythical accounts given in the Śrī-dharma-purāṇa ascribed to Mayūrabhaṭṭa,¹ or in the Yātrā-siddha-rāyer Paddhati;² but nevertheless Rāmāi seems to have been a historical personage.

Rāmāi was held in all Dharma-maṅgala literature to have been the founder of the Dharma cult. The fact may historically be explained in the following manner. A mass of crude local religious ideas and practices of purely indigenous origin got mixed up with some crypto-Buddhist ideas and practices and with these again were incorporated many Hindu ideas and practices in course of time. This curiously composite whole, which could neither be recognised as any form of Buddhism, nor any form of Hinduism, was perhaps modified and loosely codified into a popular religious system by Rāmāi Paṇḍit and henceforth Rāmāi Paṇḍit has been enjoying the credit of being the founder of the cult. Attempts have been made by scholars to determine the time of Rāmāi Paṇḍit, but it appears to us

¹ Edited by Mr. Basanta Kumar Chatterjee and published by the Sāhitya Parisāt.
² Portions of the work containing the account of Rāmāi Paṇḍit are quoted in the introduction to the Śūnya-purāṇa (Parisāt edition) by Mr. N. N. Vasu.
that no such convincing data are available as may warrant the fixing up of the date historically. One way of forming some idea about the time of Rāmāi is to trace the history of later Buddhism in Bengal, from which evolved this mixed religion among the ordinary people, and from a consideration of the course of evolution of later Buddhism it appears that Rāmāi Paṇḍit might have appeared in or about the twelfth century A.D. As we have said, detailed accounts of Rāmāi Paṇḍit and his heirs are given in the Śrī-dharma-
maṅgala of Mayūra-bhaṭṭa, edited by Mr. B. K. Chatterjee as well as in the Paddhati of Yātrāsiddha Rāya;1 but for various reasons we are not prepared to believe in the historicity of these accounts. The accounts given there are all of an extremely legendary nature.2 It may cursorily be mentioned here that in the ritualistic texts as well as in the Dharma-maṅgalas we find occasional references to Mārkaṇḍeyā Muni in connection with the worship of Dharma, and sometimes he is depicted as the instructor of Rāmāi in the matter of Dharma-worship. This seems to be nothing but an attempt somehow to connect the Dharma cult with the Purāṇic Hindu legends. Attempts have also been made by scholars to connect the legends of the Dharma cult with those of the Nāth literature and to determine the time of Rāmāi Paṇḍit with the help of the personages of the Nāth literature.3 In the Śūnya-purāṇa

1 Vide B.S.P.P., B.S. 1313, No. 2.
2 Thus, for instance, it has been said that at the end of the Dvāpara age Viśvanātha, a Brahmin of the city of Dvārakā, with his wife Kamalā, worshipped Viṣṇu desirous of a child; long time passed without any issue and then the couple went out on pilgrimage and observed austerities in sacred places with the purpose of having a son born to them—but all was in vain; being thus sadly disappointed they were one day about to commit suicide, but were saved by sage Mārkaṇḍeyā who taught them the right method of worshipping Viṣṇu who is here plainly identified with Dharma-raja. They followed his advice, propitiated Viṣṇu or Dharma and had a son born to them,—and as the son was born in the Rāma Tīrtha, the son was called Rāmāi. It has been said in this connection that the child was born in the white Paṇcamī of the month of Vaśākha on Sunday and the Star was Bharaṇī (vaśākha stītā-paṇcamī naktātra bharaṇī i raviśār śubha yoge prasuve brahmaṇī || p. 13). The same account is found in the Paddhati of Yātrāsiddha-rāya (See introduction to the Śūnya-purāṇa, edited by Mr. N. N. Vasu). But it has been pointed out by Dr. Shahidullah that there cannot be any Sunday in the month of Vaśākha with white Paṇcamī and the star Bharaṇī (see introductory article of Dr. Shahidullah in the Śūnya-purāṇa, edited by Mr. C. C. Banerjee, p. 35) and this speaks of the imaginary nature of the whole account.

3 See an article on Rāmāi Paṇḍit by Dr. Binay Kumar Sen, M.A., Ph.D., in the Calcutta Review, August, 1924.
we find that king Haricandra erected a temple of Dharma and with his chief queen Madanā worshipped Dharma with pomp and pageantry avowedly with the purpose of having a son born to them. This Haricandra has been identified with king Harisandra of Sābhār in the district of Dacca. Two daughters of Harisandra, *viz.*, Adunā and Padunā were given in marriage to the renowned king Gopī-candra or Govinda-candra, who flourished in the eleventh century.¹ The Tibetan historian Lama Tāranāth has also mentioned the name of Haricandra, who was a king in Bengal in the eleventh century. But the story of Haricandra (or rather Harisandra), found in the Dharma-maṅgala literature, seems to be purely mythical, and like the story of the sage Mārkaṇḍeya and the fragments of many other Purānic stories, this well-known story of Haricandra or Harisandra has been interwoven with the main story of the Dharmamaṅgala literature. This story of Harisandra was current in India as a very popular story from the time of the Vedas. This story is found in the *Aitareya Brāhmaṇa, Kausītakī Brāhmaṇa* and in many other places of the Vedic literature.² The same story is told in the *Mahābhārata* in a slightly different form as the story of Karṇa’s offering the flesh of his son to Lord Viṣṇu, disguised as a Brahmin-guest. In the Vedic literature the story of Harisandra begins with the question of having a son by propitiating God Varuṇa; it is therefore, very likely that the same story was told in connection with Raṇjāvati’s having a son born to her by propitiating Lord Dharma. We may point out here that, not only king Harisandra, but even Lord Nārāyaṇa has in some versions of the Dharma-maṅgalas been held to have been the first worshipper of Dharma.³ Moreover, it has rightly been pointed out that no stone-image of

¹ *Vide supra.*
³ In the Dharma-maṅgalas we often find a chronology of the twelve worshippers of Dharma. According to the chronology given by Māṇik Gāṅgūli the first worshipper was Lord Nārāyaṇa on the shore of the Kṣīroda sea; the second was the King of the gods (*Indra?*), the third was king Mahīṣura, the fourth was Kuvadatta of Cāpāya; the fifth Haricandra, who sacrificed his son to Lord Dharma; the sixth was Kāśi of the Rāja-varṇa, the seventh was Raṇjāvati, who laid herself on spikes in order to have a son; the eighth was Lāusen; the ninth was Jayasimha, who worshipped Dharma on the bank of
Dharma-ṭhākura or any trace of Dharma-worship is found in any locality of Dacca, or East Bengal as a whole,—whereas stone-images of Dharma-ṭhākura and various traces of Dharma-worship are found abundantly in West Bengal; under the circumstances it is unwarranted to place king Haricandra, the first worshipper of Dharma, in the village Sāhbār of the Dacca district.¹

of the Lake Tāra; the tenth worship was in Kannura and the twelfth worship was in connection with the death of Ichāī-ghos (Śrī-dharma-maṅgala, p. 225). According to Ghana-rām the first worshipper of Dharma was Mahārāja Bhoja; the second was Dhūpadatta, who erected a temple of Dharma in Mānik-dvipa; the third was Mathura-ghos and the fourth the Brahmin Mahīmukha; the fifth was Kālu-ghos who was born from the sweat of Dharma; the sixth was king Hariścandra, the seventh was the son of Sadā Doma; the eighth was Asāi Caṇḍāla; the ninth the Brahmin Mahīpāla; the tenth was Śīvadatta of the Bāruī caste (i.e., people dealing in betel leaves); the eleventh was Haricandra Bāiṭi and the twelfth was Lāusen (Śrī-dharma-maṅgala of Ghana-rām, p. 272). According to Rūp-rām again, the first worshipper was offered by the Brahmin Haricandra, to whom Dharma appeared in the form of a Brahmacārin, the second was made by the son of a cowherd (goōl koň̄är) who built a golden house for Dharma in Sonārapura; the third was made by Isāi Caṇḍāla, who offered Dharma a tank of wine and a dam of cakes (mader pukhur dila pīshār jāṅgāl); the fourth worship was made by the son of a merchant, the fifth by Puradatta and the sixth by king Hariścandra with his wife Madanā (and the author confesses in this connection that the story of Hariścandra is famous in the Purāṇa, named Kāśī-khaṇḍa); the seventh was by Sadā Doma who offered wine and maṅa to Dharma; the eighth was by Ananta Vāsuki, ninth by Kharjuranaṇdana (?),—and the tenth by the Bāiṭi of Gauda; the eleventh worship was by Rājāvati and the twelfth the last by Lāusen. [See MS. C. U. 3279, pp. 85 (A)—85 (B)]. The list according to the Anādi-maṅgala of Rāmdās Ādak is as follows:—Dvija Hariharā, Urvaśī Muni, Sadā-siva in the form of Sīdā Doma, on the bank of the river Bullukā (by whom?), Māndhāṭā, Yudhiṣṭhira, Hariścandra, worship in Gauda (by whom?) etc., the twelfth being Lāusen (see p. 245). Such a chronology of the twelve worshippers of Dharma in the Kaliyuga are found in many of the Dharma-maṅgalas by other poets with some alterations. It is needless to repeat here that no historical importance should be attached to these chronologies which are purely legendary and mythical in nature. It is also to be noted that the number of worshippers of Dharma-ṭhākura in the Kaliyuga is twelve only because of the fact that twelve is the mystic number of the Dharma cult, and the worship of Dharma is called Bāṁati. The ceremonies of the worship take place in twelve consecutive days beginning from the third Tithi of the light half of the month of Vaisākhā. In the Dharma-pūjā twelve flowers, twelve items of all ritualistic articles are required; the male devotees required are twelve and the number of the female devotees is also twelve; even the chapters in the Dharma-maṅgalas are twelve. Mr. B. K. Chatterjee likes to connect this custom of the Dharma cult with the Vedic custom of Twelve days' sacrifice (vide Introduction to Śrī-dharma-maṅgala of Mayūra-bhaṭṭa, p. 245). In the Dharma-pūjā-vidhāna we find that in every age there are seven devotees (bhakta) of Dharma. In the Satya age the devotees are,—Brahmā, Ulūka, Nārada, Vasumati, Durgā, Indra and Gaṅgā; in the Treta age Vaiś, Māndhāṭā, Sāgara, Karttikeya, Kāḷuguṇoṣa, Venupura, and Bhaṭṭa-dhārādhara; in the Dvāpāra age Rāvāṇa, Indra-kumāra, Sāṅkha, Śri-rāma, Gāndhāri, Bhagiratha, Bhāskara and Paksirāja (i.e., Garuḍa); in the Kali age Kapilā, Nārāyaṇa, Manirāja, Bhaṭṭa, Munḍira Ghoṣa, Purvadatta, Bhīṣmaka, Kaunitaka, Bighneśvara, Asāya Caṇḍāla, Varuna, Magara, Manoratha Paṇḍita, Paksāreṅiṅga, Śādhupura Datta and Dhanakuvera (p. 8). The number in the Kaliyuga evidently exceeds seven and becomes fifteen.

¹ Introduction to the Śrī-dharma-maṅgala of Mayūra-bhaṭṭa by Mr. B. K. Chatterjee, p. 45.
Rāmāi Paṇḍit was in later times transformed into a purely mythical figure by being associated with the other four exponents of the cult, viz., Setai, Nilāi, Karṃsāi and Gomīsāi.¹ In the Dharma-maṅgalas of the later period Rāmāi Paṇḍit is found to be the instructor of Queen Raṅjāvatī, mother of Lāusen, the hero of the Dharma-maṅgalas. This Raṅjāvatī is said to have been the sister-in-law of the emperor of Gauḍa. In no one of the Dharma-maṅgalas do we find mention of the name of this emperor of Gauḍa; but it is said that he was the son of Dharma-pāla.² Dharma-pāla is a famous king of the Pāla dynasty of Bengal, who ascended the throne in 815 A.D. He had two sons of whom Tribhuvana-pāla, the elder of the two, died prematurely during the lifetime of his father; consequently Devapāla, the younger son, became the emperor of Gauḍa after Dharma-pāla. If we are to accept the account given by Ghana-rām, Raṅjāvatī was the sister-in-law of king Devapāla, who flourished in the ninth century A.D., and Rāmāi Paṇḍit being the instructor of Raṅjāvatī flourished at or about that time. But in a copper-plate inscription of Devapāla, discovered in Munghyr it is found that some Raṇādevī was the wife of Dharma-pāla and Raṇādevi was the daughter of Govinda III. According to Ghana-rām, however, the chief queen of Dharma-pāla was Ballabhā. To us the account given by Ghana-rām does not seem to be historically correct; he seems to have given rather a traditional account of his hero Lāusen, who must have been a tribal chief at the time of some Pāla king named Dharma-pāla. The association of Rāmāi Paṇḍit with the Dharma-worship by Raṅjāvatī and by Lāusen in later time seems to be merely traditional. Whenever there was the worship of Dharma the help of a

¹ Vide Supra Ch. xiii.
² Many scholars have committed a great mistake by assuming that Rāmāi Paṇḍit was contemporaneous with king Dharma-pāla of Gauḍa, of whom Raṅjāvatī, the mother of Lāusen was the sister-in-law. (See Vaṅga-bhāsa O Sūhiya by Dr. D. C. Sen, D.Litt., chapter on Bauḍha-yuga; Introduction to the Sūnya-puruṣa by Mr. C. C. Banerjee, p. 89). Nowhere in the Dharma-maṅgalas do we find Raṅjāvatī described as the sister-in-law of Dharma-pāla; she was the sister-in-law of the son of Dharma-pāla. Cf. dharma-pālāṁ chāla gaudeśā pariṣṭhakat āśrama pramanam prasave pustrya pāpy ādy dūrāḥ phātyot pātyatā saṣkara bhumijyā nippāvarā bhavyavanta putra tām rājā gaudeśvar āḥ Śrī-dharma-maṅgalā of Ghana-rām (Bāngavāsī edition), p. 12. It was this last Gaudeśvara, son of Dharma-pāla, of whom Raṅjāvatī is said to have been the sister-in-law. The same account is also found in the Anādi-maṅgalā of Rām-dās Ādak, see p. 13 (Sūhiya-pariṣat edition).
Paṇḍit (i.e., a priest versed in Dharma-worship) was required, and Rāmāī being the most famous of the Paṇḍits, it is very likely that his name should be associated with the Dharma-worship of different times. On all occasions of Dharma-worship the priest or the Paṇḍit, who is generally said to be Rāmāī Paṇḍit himself, gave instruction consulting a scriptural text which is called Dharma-purāṇa or Hākanda-purāṇa or simply the Purāṇa.\(^1\) Hanūmān, who has in many occasions given instruction of Dharma-worship, is described as well-versed in the Hākanda-purāṇa (which, we have seen, is another name for the text of Śūnya-purāṇa). This fact leads to the conclusion that among the poets of the later times there was the tradition of some liturgical text containing all the details of Dharma-worship and the text of the Śūnya-purāṇa in its modern form may represent some confusedly collected portions of the aforesaid text.

As for the other ritualistic text, viz., the Dharma-pūjā-vidhāna, we are definitely of opinion that it is a compilation of much later times. The followers of the Dharma cult, however, speak of the Śūnya-purāṇa and the Dharma-pūjā-vidhāna as the fifth Veda embodying the new religion of Dharma, which was first revealed to Rāmāī Paṇḍit. The vernacular verses in the latter text are very few in comparison with the Sanskritic and the pseudo-Sanskritic Mantras and other injunctions regarding the worship not only of Dharma-ṭhākura, but of almost all the gods and goddesses of the popular Hindu pantheon, of esoteric Buddhism as well as of purely local deities of indigenous origin. Beginning with the worship of Gañēsa (as the custom in popular Hindu worship is) we find here injunctions and Mantras for the worship of the Sun, Brahmā, Viṣṇu, Śiva, Durgā, Lakṣmī, Viṣahari, Bhairava, Vāṣulī, Sarasvati, Kuvera, Saṣṭhi, Bhagavati, Vasumati, Viśālākṣi, Baṭuka-

nātha, Kṣetrapāla, Brahmāṇī, Māheśvarī, Vaiṣṇavī, Bārāhi, Nārasimhī, Indrāṇī, Cāmuṇḍā, Garuḍa, Viśvakarṇa, Nandī, Kāmadeva, Vānēśvara, Panḍāsura, the ten Dik-pālas, the
gate-keepers (Dvāra-pāla), and a host of others. In the
colophon of the vernacular verses we find the name of
Rāmāi Paṇḍit as the author, whereas the text as a whole is
ascribed to Raghu-nandana. It is very easy to detect that
many of the Bengali verses of the Dharma-pūjā-vidhāna are
nothing but different version of the verses found in the
Śūnya-purāṇa, and the Sanskrit Mantras regarding the medita-
tion and the salutation of the Hindu gods and goddesses
are nothing but the corrupted forms of them found in the
Hindu texts on worship; the portions composed by our
Raghu-nandana, are the peculiarly funny pseudo-Sanskritic
portions introduced here and there in the text. Whoever
the author of these pseudo-Sanskritic portions might
have been, it is apparent that the text as a whole has
been ascribed to Raghu-nandana only to bestow on it the
dignity and importance of being composed by Raghu-
nandana, the great authority on Śmṛti.

Besides these liturgical texts there are the Dharma-
maṅgalas which represent in many places a type of really
good literature in the art of plot-construction as well as in
characterisation. Though Rāmāi Paṇḍit appears to have
flourished some time before the twelfth century, Dharma-
maṅgala literature did not flourish before the seventeenth
and the eighteenth centuries. Mayūra-bhaṭṭa has been
unanimously credited by other poets of the cults to have been
the first poet of the Dharma-maṅgala literature and all
poets have saluted him (Mayūra-bhaṭṭa) as the pioneer
in the field. But the work of Mayūra-bhaṭṭa has not yet
been discovered and the Śrī-dharmā-purāṇa of Mayūra-
bhaṭṭa discovered and edited by Mr. B. K. Chatterjee
(and published by the Sāhitya Pariṣat) seems to us to be
spurious for various reasons, and this had rightly been the
opinion also of many other scholars after it was first pub-

1 Vide B.S.P.P., B.S. 1338, No. 2.
The reasons, why this text seems to us to be purely spurious may briefly be
lished is incomplete, the Läusen-story being missing. After Mayūra-bhaṭṭa the poetical works of about twenty poets have been discovered, many in the complete form and some in parts. As we have already pointed out, almost all of these poets flourished during the period of a century from the last half of the seventeenth century to the last half of the eighteenth century.\(^1\) Of these poets, however, Rūpa-rām, Kheḷā-rām, Māṇik Gāṅguli, Sītā-rām, Rām-dās Ādak, Ghana-rām Cakravartī, Sahadev Cakravartī, Narasiṃha Vasu, Rām Candra Bandopādhyaẏ seem to be more important.\(^2\) Excepting the work of Sahadev Cakravartī, in whom we find a mixture of the legends of the Dharma literature and of the Nāṭh literature, all the other works are almost the same so far as the theme is concerned. The main theme of all the Dharma-maṅgalas is the story of Läusen, and there is a striking unanimity among the poets not only in the description of the main story, but also in the minute description of the incidents.

The Dharma-maṅgala literature as a whole, like all other Maṅgala literatures of Bengal, represents, as we have already explained in the introduction,\(^3\) the continuation of the spirit of the Purānic literature in the vernacular. It is some sort of a propaganda literature to glorify the god or the

noted below. In the first place the manuscript of the text, as the editor himself admits, is almost brand new (written in 1310 B.S., i.e., 58 yearold), and secondly the language is hopelessly modern. Thirdly, Mayūra-bhaṭṭa being the pioneer in the field, the later poets should have followed him in their works; but that has not been the case. Again, the later poets do not attach so much importance to the stone-image of Dharma (i.e., Dharma-śilā) as the neo-Mayūra-bhaṭṭa does. Moreover, we find here innumerable legends of purely Purānic character very cleverly interwoven in the text to explain all the peculiar customs and factors found in connection with Dharma-worship. Again it is very curious to note that though Mayūra-bhaṭṭa is the earliest poet of the Dharma-maṅgala literature, flourishing in or about the fourteenth century A.D., the Dharma-ṭhākura depicted in this work bears not even the faintest trace of any Buddhistic character whatsoever and has flatly identified himself with Lord Visnu!

\(^1\) Dr. D. C. Sen in his \textit{Typical Selections from Bengali Literature}, Part 1, says that the manuscript of the \textit{Dharma-maṅgala} of Govindarām Bandopādhyaẏ is dated 1071 B.S. (i.e., 1665 A.D.), and from this he assumes that Govindarām flourished in the seventeenth century. But Mr. B. K. Chatterjee holds that the date of the MS. is not of B.S., but of the Malla Era, (1071 Malla Era,—1766 A.D.) and thinks that the poet flourished in the first half of the eighteenth century. (\textit{Vide} Introduction to the \textit{Sri-dharma-maṅgala} of Mayūra-bhaṭṭa, p. 6).

\(^2\) For detailed information about these poets and their works \textit{vide Bāṅlabhā-maṅgala-kāvyer Itihāś} by Dr. Asutosh Bhattacharya, M.A., Ph.D., Calcutta, 1958.

\(^3\) \textit{Supra.}
goddess in question with reference to innumerable incidents on which occasions he or she had the opportunity of displaying his or her sovereign power. The stories are introduced to popularise the worship of the deity pointing out the celestial benefit which the previous worshippers did obtain. The Dharma-maṅgalas relate the eventful life-sketch of the hero Lāusen, who owed his birth to the grace of Dharma and in all the adventures throughout his eventful life was saved from all sorts of calamities through the gracious intervention of Lord Dharma. We have already pointed out that in the delineation of the plot there is a general agreement among all the poets; let us therefore take the version of Ghana-rām Cakravartī to be the representative version of the story and give a summary of the whole story in the following pages.

After creating the universe Lord Dharma was in a fix as to how to introduce his worship in the world. Hanūmān, the sole agent and the main advisor of the Lord, advised him to make device to have Ambuvatī, a dancer-girl in the court of Indra, brought down on earth through some curse. The advice was promptly carried out and Ambuvatī took her human birth with Benu-rāy and Mantharā as her parents and wicked Mahāmad Pātra as her brother, she herself was named Raṅjāvatī.

The son of Dharma-pāla (i.e., Deva-pāla) was at that time the emperor of Gauḍa, and he married the elder daughter of Benu-rāy. Mahāmad Pātra (called by Ghana-rām generally as Pātra or Mahāpātra), who was the brother-in-law of the emperor, eventually became the minister. Once the emperor went a-hunting and chanced to meet Soma-ghoṣ who had been arrested on the order of the minister for non-payment of tax. The emperor took pity on him, ordered his release and placed him as a superintendent over Karṇa-sen, the chief of the fort of Triṣaṭṭi, situated on the bank of the river Ajaya. But ere long Ichāi-ghoṣ became very powerful, drove Karṇa-sen away, established a new fort for the name of Dhekur and defied the supremacy even of the emperor himself. The emperor went to subdue the rebellion with nine lacs of soldiers, but was sadly defeated. The six sons of Karṇa-sen were killed in the battle and his wife was shocked to death. The emperor then took pity on
Karṇa-sen and gave his sister-in-law, Raṇjāvatī, in marriage to him. This, however, was strongly resented by Mahā- pātra for various reasons. Unfortunately Raṇjā proved barren and all rituals, ceremonies and worship of gods and goddesses came to be of no avail. Once, by chance, she came across a religious procession on the occasion of Dharma’s Gājana, and from among the processionists Rāmāi Paṇḍīt explained to Raṇjā and her husband the glory of Dharma and assured them that they also might have a son born to them by worshipping Dharma. With the instructions from Rāmāi Raṇjāvatī laid herself on pikes before Dharma; and the lord was propitiated and granted her a son, whose name was Lāusen. When Mahāmad Pātra came to know of the birth of a son to Raṇjā by Karṇa-sen he engaged a rogue, Indāmeṭe by name, to steal away the child, but the child was saved through the grace of Dharma. Dharma vouchsafed Lāusen a brother, Karpūra by name, as a playmate to him. When the two brothers grew in age Dharma sent Hanūmān from Vaikuṇṭha to teach them duel-fighting and archery. When his education was completed Lāusen, accompanied by his brother, started for Gauḍa to meet the emperor. They had thrilling encounters on the way,— Lāusen had to kill the pet tiger of Pārvatī, kill another crocodile, pass through the land of wicked women,—and Lāusen always came out victorious through the grace of Dharma, which was bestowed mainly through the agency of Hanūmān. After Lāusen reached Gauḍa his maternal uncle Mahāmad Pātra left no stone unturned to harass and insult Lāusen; but Lāusen got the upper hand through the grace of Dharma and returned home safe. Mahāmad Pātra then made another device against Lāusen; he instructed the emperor to send Lāusen to Kāmarūpa with some sturdy followers. This time also Lāusen had to encounter many difficulties; but the grace of Dharma through the agency of Hanūmān made him victorious throughout. He conquered Kāmarūpa very easily and married Kalīṅgā, the princess. When he was returning home in glory, he married on his

1 Gājana (=skt. garjana=roaring) means the ceremonies that take place in honour of Dharma-thākura. It is perhaps the tumultuous nature of the ceremonies which are responsible for the name Gājana.
way Amalā, the daughter of Gajapati of Maṅgala-koṭa, and also Vimalā, daughter of the king of Burdwan.

After returning home Lāusen was passing his happy time in the company of his wives; but Dharma realised that if Lāusen were thus allowed to pass his time in peace the worship of Dharma would not be introduced in the world. He then held conference with Hanūmān and made another device. Through his magical power the emperor of Gauḍa became mad after Kānaḍā, the young beautiful daughter of Haripāla, king of Simulā. The emperor made proposal of marriage and it was sternly refused by Kānaḍā. The emperor got excited and attacked Simulā with nine lacs of soldiers. Kānaḍā then made a promise that, whoever would be able to break a particular iron rod, would be selected as her husband. The emperor failed ludicrously and the man who succeeded was Lāusen. After several other developments in the story, in which gods and goddesses played important parts, Kānaḍā was married by Lāusen.

Mahāmad Pātra was not the man to be cowed down. Lāusen must be crushed by hook or by crook. A fresh intrigue came to his mind and he proposed to the emperor that Lāusen should be sent to Dhekur to collect tax from Ichāi-ghoṣ. In spite of all remonstrance from his parents, who could not forget the death of their six sons at the hands of Ichāi-ghoṣ, Lāusen started for Dhekur and after a great fight killed Ichāi-ghoṣ, of course, through the grace and device of Dharma. Mahāmad Pātra was then convinced that Lāusen had the blessings of Dharma upon him—and that to get the victory over Lāusen he should propitiate Dharma and obtain a boon from Him. Accordingly he advised the emperor of Gauḍa to worship Dharma, and his advice was followed. Dharma came to know of the evil intention of Mahāmad Pātra and through the agency of Hanūmān sent storm and rain below. The emperor got frightened and on the advice of the minister sent for Lāusen, who alone could save them from the direful wrath of the Lord. Lāusen came instantly but the Pātra made an absurd proposal. The Pātra said that the divinely decreed evil of the whole country could be remedied only if Lāusen could make the sun rise in the west at the dead of night on the
new moon. Läusen agreed and did make the sun rise in the west by his austere penances and thus the almighty power and the divine glory of Lord Dharma was finally established. Mahämäd Pätra was, however, punished with leprosy for his wickedness and afterwards relieved at the request of Läusen; and Läusen had heaven as his reward. Thus was the worship of Dharma introduced and popularised by Läusen all over the world.

The struggle of Läusen is virtually the struggle of Dharma himself to be introduced to the people of the world and to be recognised and worshipped by them as the Lord Supreme. It appears from the incidents of the Dharma-marigalas that Dharma-ṭhākura had to establish his supremacy against the Supremacy of the śakti (i.e., the female deity) in the form of Durgā or Vāsūli or Kālī. The opponents of Läusen were all worshippers of Śakti and were protected by her. Goddess Durgā even stooped so low as to assume the form of a charming damsel to allure Läusen and to convert him to the Śakti cult; but all her attempts were frustrated by the strength of character of Läusen and also by his sincere devotion towards Lord Dharma. The severest fight, virtually between Dharma and Śakti, in the person of Läusen and Ichāi-ghoṣ respectively, took place in the battle of Dhekur. Ichāi was protected by the goddess herself and Läusen with his backing in Lord Dharma could do no harm to him. As many times as Läusen cut the head of Ichāi-ghoṣ, the head of Ichāi, separated from the body, muttered the name of Durgā and the separated head was joined with the body by the grace of the goddess. Lord Dharma found himself in a fix and Hanūmān was helpless there. Immediately, however, an assembly of the gods was invited and advice from them solicited. It was then finally decided that the sage Nārada must be sent forth to devise some means whereby the attention of the goddess might be diverted from Ichāi. Nārada, the reputed quarrel-monger, went to goddess Durgā and informed her that, taking advantage of her long absence from Kailāsa (she being long in Dhekur to protect her devotee Ichāi-ghoṣ), old Śiva had left home and was visiting the quarters of the Kotch (a hilly tribe) and having dalliances with Kotch-women; Kārttikeya and Gaṅeśa (the two sons
of Durgā) had left home and went away, Jayā and Vijayā (the daughters) were starving to death, the condition of the whole family was topsy-turvy. Hearing these words from Nārada Durgā at once left Dhekur for Kailāsa and found all the informations, supplied by Nārada, to be totally false; but taking advantage of her absence from Dhekur Dharma, through the agency of Hanūmān, instructed Lāusen to attack and kill Ichai-ghoṣ which Lāusen easily succeeded in executing. By the time Durgā hurried up to Dhekur, Hanūmān carried the head of Ichāi to the netherland and she found, it was too late to give her devotee any help. Thus the honour of Lord Dharma was somehow saved through the cunning device of Nārada, against whom, we are not told, what step was taken by the enraged goddess.
APPENDIX (E)

ENIGMATIC LANGUAGE OF THE OLD AND MEDIEVAL POETS

We have seen before that many of the religious movements, with which we have dealt, were esoteric in nature and it was quite in the fitness of things that the language in which the religious contents were given poetic expression was often extremely enigmatic. This enigmatic language of the old and medieval poetry is popularly styled as *Sandhyā-bhāśā*, which, according to its conventional spelling, literally means 'the evening language',—and the word 'evening' here may be explained as pointing to the mystical nature of the language. In the Hindu as well as Buddhist Tantras, and in the Buddhist Dohās and songs, we find much use of this *Sandhyā-bhāśā* and MM. H. P. Śāstrī has explained it as the 'twilight language', i.e., half expressed and half-concealed (ālo-āṁdhārī). But MM. Vidhuśekhara Śāstrī in an enlightening article in the *Indian Historical Quarterly* has demonstrated with sufficient evidences from authoritative texts that the language is not *Sandhyā-bhāśā*, but is *Sandhā-bhāśā* (sam+√dhā) or the 'intentional language' i.e., the language literally and apparently meaning one thing, but aiming at a deeper meaning hidden behind. Reference to this word *Sandhā-bhāśā* is found in many texts of Pāli Buddhism as well as in Sanskrit Mahāyāna texts. Warning has often been given not to interpret the sayings of Buddha literally, but one should sink deep into them to catch at the right meaning aimed at by the Lord, and we find that the Buddhist preachers, particularly of the esoteric schools, would often use this intentional language to which the faithful adepts only had access. The same device was adopted by all the esoteric schools within the province of Hinduism.

1 1928, Vol. IV, No. 2
2 It may be incidentally noted here that Jesus Christ did also preach in a parabolic language (which also is nothing but a form of *Sandhā bhāśā*) to conceal the truth from the unbelievers like the scribes and the pharisees.
With regard to the spelling of the word *Sandhā-bhāṣā* or *Sandhā-vacana* as *Sandhyā-bhāṣā* or *Sandhyā-vacana* MM. V. Śāstrī is of opinion that it is a mistake of ignorant scribes. But it may be noticed in this connection that the word has consistently been spelt as *Sandhyā* and not as *Sandhā* in all the manuscripts of the Buddhist Tantras. May it therefore be postulated that it is not a mistake pure and simple of the scribes; but through the enigmatic and technical nature of the language and because of the mystical nature of its contents, it acquired in time a secondary meaning of ‘twilight language’ from its original meaning of ‘intentional language’ and hence it is that it is spelt as *Sandhyā* by the scribes?

The tradition of the use of enigmas to conceal the real meaning from the ordinary people is as old as the Vedas. We often meet with riddles in the *Rg-veda* and the *Atharva-veda*, which, when interpreted literally yield a meaning, which, as it is evident from the context, is not the real meaning. There are again statements in the ritualistic works known as the *Brāhmaṇas*, which give us no meaning literally; but the Pūrva-māṁsakas discover important truth behind them with the help of metaphorical interpretation. But the use of technical *Sandhā-bhāṣā* became popular with the rise and development of the various Tāntric literature. The Sādhanā of the Tantras, be it Hindu or Buddhist, was generally a secret Sādhanā, and the best way to maintain the secrecy of the Sādhanā was to express the ideas and experiences of the Sādhakas with the help of technical and enigmatic language. The Tantras have, therefore, a language of their own which is accessible only to the initiated.

The Nature of the *Sandhā-bhāṣā* of the old Bengali Buddhist songs is not however exactly the same as that of the *Sandhā-bhāṣā* of the Tāntric literature. While the Tantras are full of technicalities, the songs are full of enigmas in addition to the technicalities. But enigmas are also sometimes found in the Tāntric and Yogic texts. Cf. go-māṁsāṁ bhākṣayen nityam etc., Supra.

---

1 See *Rg-veda*, (1.164), (1.152.3), (10.55.5), (8.90.14), etc.
*Atharva-veda*, (7.1), (11.8.10).

2 But enigmas are also sometimes found in the Tāntric and Yogic texts.
words of some technical meaning which is known only to
the adept and to none else. It was the greatest sin on the
part of a Tāntric to let the uninitiate into the secret of their
cult, and this extreme technicality of the language, we have
already pointed out, was taken as a device to prevent the
public from making out anything of the secret of their cult.
In the Hevajra-tantra there is a chapter on the Sandhā-bhāṣā
where the Lord Vajra-sattva explains to Vajra-garbha the
technical meaning of many such terms. In the eighteenth
chapter of the Śrī-guhyā-samājā also many such technical
terms have been explained.¹

The Cāryā-songs of the Buddhist Siddhācāryas abound
in technical terms; but more interesting are the enigmas.
Couplets like—

māria śasu naṇanda ghare śāli ¹
māa māria kāhna bhaia kavāli ²

are frequently to be met with in the Cāryā-songs. The
peculiarity of such imageries is that, when interpreted
literally, they yield the most absurd meaning,—but when
one obtains the key to them and learns to enter in, one gets
at the true meaning hidden behind. Thus there is a poem
of Kukkurī-pāda which runs as follows:—“When the two
(teats) are milked (or when the tortoise is milked), it
cannot be preserved in the pot; the tamarind of the tree is eaten
by the crocodile. The front is near the house, harken lady
of the nature of consciousness (biāti); the ear-ring (or the
ornament of the ear) is stolen away at mid night (adharāti)
The father-in-law falls asleep, the daughter-in-law awakes,
—the thief has stolen away the ear-ring, where can it be
searched? Even in the day-time the daughter-in-law shrieks
in fear of the crow,—where does she go at night? Such a
Cāryā is sung by Kukkurī-pāda, and it has entered into the
heart of only one among crores”.³

Here the two refers to the two nerves on the right and the
left; the substance milked is the samvṛtti-bodhicitta and the pot

¹ See Hevajra-tantra, MS. pp. 44(A)-44(B) and Śrī-guhyā-samājā, edited by
Dr. B. Bhaṭṭācāry (G.O.S.) See also the note on Sandhā-bhāṣā and Sandhā-vacana
by Dr. P. C. Bagchi in the Studies in the Tantras, pp. 27-33.
² For the literal meaning and the esoteric significance of this couplet see
Sūtra Ch. III.
³ Song No. 2.
(piṭa=piṭha) is the plexus named Manipura-cakra in the navel region. The tree (rukha=vrksa) refers to the body, and the tamarind fruit is the semen in the form of Bodhicitta, and the crocodile (kumbhira) is the yogic process of suspending the vital wind within (kumbhaka). Biati and Bahudī refer to Āvadhutikā, and the house is the centre of purified bliss; the ear-ornament (kāneṭa) is the principle of defilement, and the thief is sahajānanda, and the mid-night is the yoga-stage just before the state of complete absorption in supreme bliss. The father-in-law (sasurā) is the vital wind; day represents the active state (pravṛtti) of the mind, night the state of rest (nivṛtti) and Kāmaru may refer to Kāma-rūpa, or the Mahāsukha-cakra, Kāma-rūpa being the greatest centre of the Tāntrikas.

The most remarkable fact is that this use of the enigmatic style has its unbroken history in the modern Indian literatures from the time of the Caryā-padas down to the present time. Esoteric poets of all periods have used such extremely epigrammatic and enigmatic style in giving expression to their religious doctrines. There is a song of Dhenḍhaṇa pāda,—

\[
\text{ṭālata mora gharā nāhi paḍiveśi } \quad \| \\
\text{hāḍita bhāta nāhi niti āveśi } \quad \| \\
\text{beṅga saṁśāra baḍhila jāa}^1 \quad \| \\
\text{duhila dudhu ki beṇte samāa } \quad \| \\
\text{balada biāala gaviā bāṁjhe } \quad \| \\
\text{piṭā duhiaī e tinā sāṁjhē } \quad \| \\
\text{jo so budhī sodha nibudhi } \quad \| \\
\text{jo so cora soī sādhi } \quad \| \\
\text{niti niti siālā siha sama jujhaa } \quad \| \\
\text{dhenḍhaṇa pāra gīta birale bujhaa } \quad \| \\
\]

Literally the song means:—“On the height is situated my house, no neighbours have I; there is no rice in the pot, but they (guests) come every day. The frog-like world goes on increasing (or as Dr. Shahidullah and Dr. Bagchi reconstruct the line,—The serpent is being chased by the frog); does the milked milk enter into the teats again? The ox has given

\[^1\text{beṅga sāpa baḍhila jāa—Bagchi.}\]
birth but barren is the cow; it is milked in the pot thrice a day. He who is wise is purely a fool, who is the thief is honest. The fox fights with the lion every day,—understand this song of Dheṇḍhaṇa-pā in secret.” With this poem we may compare a poem of Kabir, which is not only substantially the same, but agrees with the above poem line by line.

kaisaṁh nagari karaṁh kuṭavāri l
cañcala pūriṣa bicaṣana nāri l
bail biyā gāi bhai bāṁjh l
bachrā duhai ūnīyūṁ sāṁjh l
makaḍo dhari māṣī chachi hārī l
mās pasārī cilha rakhavārī l
mūsā khevaṭ nau bilaivā l
miṁḍhak sovaī sāpa paharaiyā l
nīta uṭhi syāl syaṁghasuṁ jhujhain l
kahai kabir koi biralā bujhai l

“How can I guard the city where fickle is the man and clever is the woman? The bull has given birth and barren is the cow; the calf is milked thrice a day. The spider has caught hold of the fly which struggles and is defeated; the kite has been kept guard for meat. The mouse is the boatman, the cat is the boat, and the frog is sleeping under the protection of the serpent. Everyday does the fox fight with the lion; says Kabir, some understand it in secret.”

Enigmatic poems of this nature are found abundantly in the works of Kabir and these are generally known as the Ulṭāwāṁśi. These enigmas are generally employed by Kabir to emphasise the absurdity that Māyā or the principle of illusion should so completely overpower the Jīva, who has his support in Brahman and who lives in Brahman in his ultimate nature; it is a pity that Jīva should become completely oblivious of his true nature and of his divine strength and act as a toy in the hands of Māyā. We are giving below a few more specimens of the enigmatic poems of Kabir. In one of his poems Kabir says,

1 For the inner significance see supra Ch. II.
2 Kabir-granthāvalī, p. 113.
ek acambbau sunahu tum bhāi l
dekhata sīnha carāvata gāī ||
jal kī machuli tarvar vyāī l
dekhata kutrā lai gai bilāī ||
talere vaisā āpar sūlā l
tiskai peḍ lāge phala phūlā ||,
ghorai cari bhais carāvan jāī l
bāhar bail goni ghar āī ||
kahata kabīr yo is pada bujhai l
rām ramata tisu sav kichu sūjhai ||

“Hear of some thing strange, O my brother,—I have seen a lion tending a cow. The fish of water have given birth to the young ones upon the tree and while the dog was looking at, the cat took them away. There is something untoward beneath the tree and a trident on the top of it, and such a tree also bears fruits and flowers. Somebody rode on the horse and went to tend the buffalo; outside remained the bullock and the sack returned home. Says Kabīr, he who understands this poem, always dwells in Rāma and everything becomes clear to him”.

Again,—“Is there any wise Guru who can understand the Veda reversed? In water fire is burning and the blind is made to see. One frog makes a meal of five serpents and the cow has cut the lion into pieces and devoured it. The kid has devoured the tiger and the deer has eaten up the leopard; the crow has snared the fowler, the quail has triumphed over the hawk. The mouse has eaten up the cat, the jackal has eaten up the dog; this is the primal teaching, says wise Kabīr”.

Again it is said in another song,—

O knower of Brahma, swing on.
Heavily, heavily the rain was pouring out, but never a drop of water fell,
To the foot of an ant an elephant was tied: the goat devoured the wolf.

---

1 Kabīr-granthāvalī, pp. 304-305.
2 Cf. also Ibid., Padāvālī, No. 11, pp. 91-92.
3 hai koi jagat guru gyānīnāi ualī bēda bujhai l etc.

Ibid., Padāvālī, 160, p. 141.
From the midst of the sea came a waterfowl, demanding a spacious house.

The frog and the snake dwell together, and the cat is wedded to the dog.

Ever the lion joins battle with the jackal: here is a wonder that cannot be told.

Doubt as a deer besets the forest of the body: the arrow aims at the archer.

The ocean is burning and consumes the forest: the fish is angling for its prey, etc.¹

We need not multiply the examples,—for poems of this nature are numerous in Kabīr. This enigmatic style became very popular also among the later Hindi poets. Thus in Sundar-dās we find as many as three different sections devoted entirely to the treatment of these enigmas.² It is said there,—“The blind sees the three worlds and the deaf hears various sounds; the man without nose smells the lotus and the dumb supplies much news. The broken-handed man lifts the mountain, the lame dances and makes merry; whoever will be able to make out the meaning of these lines, will be able to enjoy (bliss). The ant has swallowed the elephant, the fox has eaten the lion; fish finds much comfort in fire—but becomes much perturbed in water. The lame man climbs upon the mountain, death is afraid at the sight of the dead; these reverse pranks, O Sundar, are known to those who have realised. The sea merges itself in the bubble; the mountain merges itself in the mustard seed; it has become a fun in the three worlds that the sun has made every thing dark. It is only a fool, O Sundar, who will be able to bring out the significance of it—this is a puzzle of words. Fish has caught hold of the crane and made a meal of it,—and the mouse has eaten the serpent; the parrot has captured and devoured the cat and all affliction is pacified thereby. The daughter has eaten her mother, the son has eaten the father. Says Sundar, hear O saint, none of them commits sin thereby, etc.³

¹ The Bijak of Kabir by Ahmad Shah, p. 119.
³ Ibid., Vol. II, pp. 508-516. For an attempt at interpreting these lines see the commentary given in the said edition of the work.
Enigmas are found abundantly in the Nāth literature all over India. Gorakh-nāth, in making his Guru Mīna-nāth return to his senses, used this device of enigma and we came across many such enigmas in our previous discussion on the Nāth cult. These enigmas of Gorakh are still now popular as Gorakh dhāndhām or the puzzles of Gorakh. It is said in the Gorakṣa-vijaya—“There is no water in the pond, yet why is it that the banks are over-flooded? There is no egg in the nest, how is it then that the young ones of the birds are flying above? There is no man in the city, but every house has its roof. The blind man is selling and the deaf man buys.”1 In the song of Gopi-candra we find, “Mind is the name of the tree, Rasika (he who is endowed with good taste) is the name of the fruit; the fruit of the tree remains on the tree, but the stalk falls down. If cut down, the tree grows on, if not cut down it dies out; one fruit of the two trees is conceived by the mother.”2 In the same text we find old Śiva worshipping a boat with a utlā mantra or an enigmatic verse of a funny nature.3 Peculiar songs of this nature, often rousing the sense of the ludicrous, in the form of an address of Gorakh-nāth to his Guru Mīna-nāth, are still prevalent in the rural areas of Bengal. The writer himself has heard many such stray songs in his native district of Bakergunj. The writer cannot check the temptation of presenting such a song collected by Maulavi Abdul Karim in the introduction to the Gorakṣa-vijaya edited by him.

1 Gorakṣa-vijaya, pp. 137-38.

“O my preceptor, all the laws do I find topsy-turvy; rice is dried in the bottom of the pond and is served beneath the granary. O my preceptor, on the mango-tree lie the young ones of the Saula fish and they catch hold of the crane and devour it up, and at the sight of it small ants are marching forward with a machine of bamboo (to catch fish). O my preceptor, with five annas have I brought the boat, nine pice is the price of the nail; in the arum forest did I keep it,—but a frog has swallowed up the seat of the helmsman. O my preceptor, one thing have I heard in the ghat of Tripini—a dead man is cooking food in the womb of a living man. O my preceptor, in the forest of Erali live the young ones of the Karali and the tigress went for them; and a flat frog is waiting to prey upon the tigress.”

It is indeed very difficult to attempt a thorough interpretation of these lines; but the most important point is the assemblage of all sorts of absurd epigrams, which are all put together to emphasise the absurdity that even a great self-controlled yogin like Mina-nāth should fall a prey in the hands of the women of Kadali. Again there are lines in these enigmas, which, though shrouded in obscurity, point to a deeper significance behind. Thus there is the line in the above poem that a dead man is cooking food in the womb of a living man in the ghat of Tripini. Tripini here stands for Tri-ṛṇi or the place where the three important rivers Gaṅgā, Yamunā and Sarasvatī, and in Tāntricism the three nerves, viz., Idā, Piṅgalā and Susumṇā, meet together. When a yogin can control his nerves and can make the two side-nerves Idā and Piṅgalā function conjointly with the middle nerve, he becomes dead so far as the world of physical existence is concerned and that dead man within the physically living man matures from within all the virtues of the spiritual life.

Almost a similar song is found in the Dharma-maṅgala of Sahadev Cakravartī and here also the song is addressed by Gorakh-nāth to his Guru Mina-nāth. We are giving here rather a free translation of the verse:—

O my Guru, I beg to submit to your lotus-feet this (strange) fact, the sea has overflowed with the milk of worms

2 Guru mīṇa-nāth re utṣa utṣa dhārā, etc.
and the mountains are floating away. O my Guru, try to understand it on your own merit,—dry was the tree, but it has shot forth foliages and stone has been pierced through by the worm. See here, the tigress is coming,—through the lids of his eyes man covers the tigress with (different) skin and then tames her in every house. Quarrel has broken out between the Śīla and the Noḍā,¹ and the mustard seed is intervening as the mediator,—the pumpkin gourd on the thatched roof is rolling down, and the herb Pūni dies of laughing. An absurd tale it is,—the completely barren one has given birth, and the child wants milk of the dove. With much care have I tied the boat and the crab held the rope; by the kick of the mosquito the mountain is broken and the ant goes on laughing. First the boat flies above, and then it burns and dust is raised every now and then; there is not a drop of water to wet the mustard seed, but the peaks of the temples are drowned. I have yoked the tiger and the bullock together and the monkey has become the plough-man; the crocodile of water has removed the weeds and the mouse has sown paddy-seed. The young ones of the Śaula fish are on the palm-tree, and they are catching hold of the hawks and devouring them; Kāi fish revels in the water of the sea, and the lame one runs with a machine of bamboo (to catch them). I have placed sentinels in the mid-sea, Sajaki (?) are flocking in abundance; the buffalo and rhinoceros die of fear and hinds flee away in lacs. The lamp is extinguished when there is oil in it,—and the city becomes dark; Sahadev meditates on Kālu Rāy and sings this clever description of the body.²

¹ Śīla is the slab of stone on which spice is rubbed and prepared and Noḍā is the rod-like stone with which spice is rubbed and prepared.
² Vide, B.S.P.P., B.S. 1304.

Cf. The German poem I came A-riding by Reinmar Von Eweter:

I came a-riding in a far country
On a blue goose, and stragne, things I did see.
There was a crow and hawk that in a brook
Fished many a swine; a falcon by a hear
Was hunted in the upper realms of air;
Midges were playing chess; and I did look
Upon a stag that span the fine silk thread;
A wolf was shepherd of the lambs that fed
In the willow tops; a cock caught in a trap
Three giants; and a coney trained a hound;
A crab raced with a dove and won a pound.
If this is true, an ass can sew a cap.

Translated by Jethro Bithell.
Songs of the type, which are still now to be heard in the rural areas, particularly of Bengal, are generally known as the songs of the *Ultrā Bāul*. Mr. Asutosh Chaudhuri of Chittagong collected some of these songs from the district of Tippera and published them in the journal *Pāñca-janya*.1 We are giving below the translation of two of these songs as specimen:—“Under the depth of sixty cubits of water is burning the straw of Āman rice, and the bird *Pheccuyā* is picking it up with its beak and eating fried paddy; the tiger and the wild buffalo are yoked together to the plough and the ant has pressed the ladder. One day, O brother, I went to the bank of the river *Meghnā*, and found the cat breaking the mast of the ship by scratching. I went to the fields of the North and found the crane ploughing; and the *Tyānrī* fish has swallowed up a very big *Boyāl*. When the boys of this house go to that house, dead rats serve them with blows of fists in the path; etc.”2 Again,—“... In the marsh lives the kite and the dog lives in the tree; all the kites are devoured by the fish of the river *Rāma-dariyā*. In the northern marshes grass the hawks and the cows are flying in the air; the father was born on the day of the mother’s marriage and the son was born two days after. The frog is dancing on the head of the serpent and the mongoose is laughing on; the buffalo is smoking the tobacco pipe, but small leeches are coughing. At the sight of the spade the black-smith flees away, the pond cuts the workman; the yoke has been placed on the shoulder of the ploughman and the cow is walking behind. Stone floats on the sea but the lightest of woods sinks down; water of the ebb-tide goes against the current,—and boats are steering men; etc.”3

The enigmatic style was a popular technique also with the *Vaiṣṇava Sahajiyās* and the Bāuls of Bengal. The *rāgātmika padas* (the poems where the doctrines of the love-religion are preached) of *Caṇḍī-dās* are full of technicalities and riddles. Thus it is said,—“The flower is placed on the fruit and smell remains on it, and on smell are placed these

---

1 B.S. 1343, Autumnal Number, pp. (94-96).
three letters, a riddle it is to understand. The fruit lives above the flower, and on that remains the wave; and on the wave remains the wave,—does any one know this secret?'” Again,—“Keep your secret love always secret and have your desire satisfied. You must make the frog dance before the serpent and then only are you true lovers. The skilful man, who can wreathe the peak of mount Sumeru with thread and can ensnare the elephant into the web of the spider, becomes eligible for such a secret love.”

From what is illustrated above it will be clear that the different modern Indian literatures grew not only under some common religious movements, but they show striking similarity even in form, technique and language. The enigmas of the Caryā songs, of Kabīr and Sudar-dās are substantially of the same nature as are found in the rural areas of Bengal even at the present day. The Sandhyā-bhāṣā or the Sandhā-bhāṣā thus becomes an all-Indian literary technique for giving expression to esoteric doctrines, and, as we have said, it has an unbroken history for centuries.
