THIS BOOK IS PRESENTED BY THE GOVERNMENT OF THE UNITED STATES OF AMERICA AS AN EXPRESSION OF THE FRIENDSHIP AND GOOD-WILL OF THE PEOPLE OF THE UNITED STATES TOWARDS THE PEOPLE OF INDIA.
DICTIONARY OF
BRITISH SCULPTORS
1660–1831
GVILIELMO BARONI DE LISLE ET DUDLEY
NECNON IACOLINAE VXORIS SVAE
ITINERVM DOMI PEREGREQUE
FORTVNA BONA CONCTORVM
COMITIBVS DILECTIS
This book should perhaps have been called an "attempted dictionary of British sculptors, 1660–1851," for it is obvious that no one person working on his own could ever hope to cover completely so wide and so vast a field. The chief object has been to give the lives and known work of the craftsmen and I have avoided any attributions on stylistic or other grounds. All the statues, busts, monuments, etc., given here are either signed works or sufficiently documented from MS. or printed sources. It is to be hoped, therefore, that this book may serve as a foundation and that the lists of the various artists' certain works may enable other students to identify those which are unsigned.

The writing of this book, however, has not been an easy task, and indeed, looking back, I wonder at my temerity in thinking that I could ever hope to achieve anything. And yet something may have been accomplished, for the great majority of the biographies which follow are not to be found in any printed book of reference; some of these, however, are of men who have played a large part in the artistic life of England.

The sculpture of the eighteenth and nineteenth centuries has for many years past been unpopular and neglected, for all that there is so much of it in Britain. There is hardly a village church or churchyard which has not a monument, a tablet or gravestone by craftsmen whose names are often unknown and whose lives are buried in obscurity. It has been my desire to discover, however imperfectly, something about them which has driven me on to finish this book—a task which has taken more than fourteen years of hard work.

The idea of such a work had been in my mind for a long time; indeed, I recently found a postcard, written to a relation more than forty years ago, proudly announcing the fact (which was probably of no interest to her) that I had found the sculptor's signature on a monument in a London church. It was perhaps, because no one was able to tell me anything about these statuaries that I decided to start collecting information on the subject. Other works and interests, however, intervened, and it was not until much later that I began in earnest to make a large card-index containing facts and dates regarding sculptors and their works.

Having collected the information, it was difficult to know how to present it to the public or how to plan it. I had had little experience of such work and was uncertain on many points. For example, which craftsmen were to be included and which excluded; what period should be covered and how many works by each sculptor should be given. In the end I have thought it wisest to include all those who could be called artists or fine craftsmen, though of some who figure here it may well be said that I have made "a fond attempt" to write about "names ignoble born to be forgot."

As to the period covered, I had originally intended to write a complete dictionary of British sculpture from the earliest times until the close of the last century. But I quickly discovered that such a task was utterly beyond my powers, nor would any publisher have printed so large a volume. It has, therefore, seemed best to confine
myself to the period between the Restoration and the opening of the Great Exhibition, a period less than two hundred years in length, though even so it has meant writing more than seventeen hundred separate biographies.

The next thing to decide was how much to write about each artist and how many of his works to list. Again it seemed best to give a considerable amount of information about those sculptors who have, as yet, found no biographer, and less about those (such as Gibson, Nollekens or Roubiliac) of whom lives already existed. For the more important artists I have given a fairly complete list of their works, and with the minor craftsmen have only mentioned their best productions. As to the dates of these, in the case of statues or busts it is the date of execution, in the case of monuments or tablets the date of death of the person commemorated, unless the sculptor has not only signed, but dated, the work itself.

It has not, however, been an easy task to collect this information. It has entailed visits to more than six thousand churches all over Britain (besides a number in Eire), and numberless hours have been spent reading through archives and documents in public and private collections. With the exception of works overseas, I have seen practically every monument and tablet mentioned in this book, and the great majority of the statues and busts.

The work has certainly been of the greatest interest and has had all the excitement of a detective story. One finds a signed monument in a church, or a stone-carver mentioned in some building accounts, and one begins with a name. Then comes the hunt to find out more about the man, and by searching in places likely and unlikely, in books and MSS. obvious and obscure, one slowly begins to rediscover his life and work. And what was once a mere name in the card-index may in the end grow into a more or less complete figure. How can one ever tire of the moment when one opens the door of a parish church, not knowing whether in the next few minutes an unrecorded monument by Rysbrack or an unnoticed bust by Nollekens may come to light.

Of course, the checks and disappointments are frequent. It is maddening how many volumes are missing in the archives of provincial cities and towns—those books of apprentices, freemen, or ratepayers which would help to fill in the gaps. Nor has the fate of private collections of monuments been happier. Taxation has forced owners to sell their family homes, and the papers, the bills, the letters of interest, have all been scattered, sold or destroyed.

It is impossible to attempt to mention the very large number of sources from which information has been obtained, extending as they do from lists of bankrupts to the monuments at Chatsworth, but I have, in most cases, stated where or how I have obtained my information, though where the facts about London masons obviously come from the archives of the Company I have not thought it necessary always to state that fact.

The chief source has indeed been the archives of the Masons’ Company; valuable too were the minute books and lists of students at Burlington House, and the papers of the Society of Arts. I am deeply grateful to the Worshipful Master of the Masons’ Company, the President and Secretary of the Royal Academy, and the Secretary of
the Society of Arts for permission to search through these muniments, and also to the Secretaries of the Artists' Annuity Fund, the Artists' General Benevolent Institution and the Suffolk Street Galleries.

The Court minute books, list of apprentices, etc., of the Masons' Company have proved the foundation to many of the biographies, for from them it has been possible to discover the parentage, apprenticeship, etc., of a very large number of statuaries, and they had, so far as I am aware, hardly been examined for this purpose before. The papers at Burlington House provided invaluable information, including the dates of birth of those sculptors who had been students at the Royal Academy Schools, while the minute books of the Society of Arts gave a number of facts about those artists who had received premiums from the Society.

I must also offer my thanks to the Masters of the City Companies for the readiness with which they have granted my requests to examine their records; the Headmasters of Eton, Christ's Hospital and Stonyhurst; the Custodians of the Archives of St. Bartholomew's Hospital, St. Thomas's Hospital, Guy's Hospital and to the Secretary of the Foundling Hospital. I would also like to thank Messrs. Coutts and Messrs. Child, and especially the Directors of Messrs. Hoare, not only for permission to examine their own most important family archives, but also for the help they gave me when the muniments of the Masons' Company were in their custody. Nor must I forget Messrs. Christie, who allowed me to look through all their sale catalogues.

To those many owners who have allowed me access to their family muniments my debt is very great, and among those to whom I am especially grateful I should like to mention the late Duke of Devonshire; the Duke of Manchester; the Duke of Portland; the Duke of Richmond; the Duke of Sutherland; the Duke of Wellington; the Marquess of Bath; the Marquess of Exeter; the Marquess of Lothian; the Earl of Cardigan; the Earl of Coventry; the Earl of Darnley; Earl Ferrers; Earl Fortescue; the Earl of Radnor; the Earl of Stamford; the Viscount Scarsdale; Lord Brownlow; Lord Brabourne; Lord De L'Isle and Dudley; the late Lord Leconfield; Baroness Lucas and Dingwall; Lord Methuen; Lord Sackville; Lord Sandys; Sir Charles Chute, Bart.; Sir Gyles Isham, Bart.; Hon. Sherman Stonor; the late Lady Catherine Ashburnham; the Hon. Clive Pearson; Colonel Stopford-Sackville; Mr. Humphrey Brand, of Glynde; Mr. R. Hoare, of Stourhead; Mr. George Howard, of Castle Howard; Colonel Myddelton, of Chirk; Mr. Verney, of Claydon; Mrs. West, of Alscot Park; Mrs. Harbord, of Battle Abbey; and Messrs. Wedgwood.

To librarians all over England I am grateful for so courteously answering my questions concerning their local sculptors, but especially to Dr. Hollaender of Guildhall Library, who has never failed to let me know of any manuscript acquired by his library which he thought might be of interest to me; to Miss Dorothy Stroud of the Soane Museum, for her guidance, advice and help about manuscript material in her charge, and to the Director of the Museum for allowing me access to it; to Mr. Beard, of the Birmingham Library; Mr. Hodgkinson, of the Victoria and Albert Museum; Mr. Erith, late of the Essex Record Office; and to Mr. Marcus Whifffen, Mr. Laurence Whistler, Mr. Edmund Esaile and Mr. Frederick Burgess.

My list of personal obligation and thanks is especially long. First and chiefly I shall
always remember with deep gratitude the help I received from the late Mrs. Arundell Esdaile, and recall with pleasure the many days we spent visiting churches together and discussing the authorship of the monuments we found in them. Her friendship and encouragement meant a great deal to me and for these I can never be sufficiently grateful. Her works on English sculpture are too well known to mention here. She was the first person to realize the importance of the eighteenth-century monuments in British churches, and as she wrote on post-Reformation sculpture so did many begin to realize for the first time that the later monuments were worth looking at, even if neglected by guide-books, whose authors scornfully dismissed them as ugly and pretentious.

I cannot mention all those who have helped me to collect the information for this book. There are so many scattered all over Britain who have assisted me, giving up valuable time and taking an infinite amount of trouble to answer the questions and deal with the problems with which I have bombarded them. But there are, however, some whom it would be the grossest ingratitude not to thank. To Mr. John Whitehead, the Town Clerk of my own town of Tunbridge Wells, I am particularly grateful, for he has furnished me with letters of introduction to his fellow Town Clerks, so that I have been able without difficulty to search the archives of most of the chief cities and towns of England. To my friends who have accompanied me in my numberless journeys to visit churches, and who have with unfailing patience, good nature and kindness read maps, found keys of locked churches, climbed ladders to read skied monuments and, indeed, made this book possible, I can never be grateful enough. And of these friends I would especially mention Lord and Lady De L'Isle and Dudley, the late Lady Catherine Ashburnham, the late Hon. John Colville, Mr. Richard Brain, Mr. James Burr, Mr. Colin Fenton, Mr. Alastair Goldsworthy, Mr. Peter Sandberg and Mr. Derek Sherborn.

To Mr. Howard Colvin I owe an especial debt. Not only did he accompany me on several of my more extended tours, but during his own researches for his forthcoming Dictionary of Architects he was unfailing in sending me any information he found bearing on English sculpture.

Many of the photographs in this book I owe to the kindness of Mr. Alan Lamboll, who took them specially for me, and I must also thank Mr. Richard Brain for reading through the typescript.

This list could be extended much further, but space, not ingratitude, forbids. The heads and librarians of Oxford and Cambridge colleges, the incumbents I have met during my tours, the mayors, town clerks and other borough officials, the heads of County Record Offices and Cathedral Libraries, the directors of Art Galleries and Museums, and the authorities at Somerset House, all I should wish to thank and, at the same time, to apologize for the valuable time which I must have so frequently wasted during my unceasing and, indeed, almost remorseless, search for information.

In conclusion, may I again repeat that this is but an "attempted" dictionary, and I hope that younger and more experienced hands will add to it as the years pass. If it has formed a foundation for others to build on it has served its purpose. Finally
I shall be most grateful to anyone who will send me any further information or correct the inevitable mistakes which must have crept into a work of this nature, consisting, as it does, so largely of names of places and persons.

To hear of any new discoveries will assure me that there are some at least who have looked at works of sculpture in churches and public and private buildings with greater delight and interest since this book was published, and I shall count that a further reward after the many years of work from which I myself have drawn similar pleasure.

</table>
ABBOTT, C., of Aylsham
fl. 1805–1830
His work is typical of the early nineteenth-century Norwich school and he signs tablets in Norfolk to Charles Smith, 1802; and Anne Bond, 1803, at Southrepps; Edward Figgion, 1805, at Aylsham; Charles Horner, 1811, at Istead; and Robert Doughty, 1817, at Hanworth. Another to Sir John Lubbock, 1823, at North Walsham is signed “Abbott and Thompson.”

ABBOTT, GEORGE
b. 1803, d. 1883
He was born in London on 18 July, 1803. Although he had exhibited a bust of Mrs. George Abbott at the Royal Academy in 1834, it was not until five years later that Abbott joined the Academy Schools on the recommendation of Benjamin Wyon (Royal Academy Archives). In 1850 he executed bronze cabinet busts of Wellington and Peel. A large number of replicas was made of both these works, those of Peel being manufactured by Messrs. Hetley of Soho Square; an example of the Duke’s bust is at Stratfield Saye.

At the Great Exhibition of 1851 Abbott showed a group entitled “Alexander the Great Crossing the Granicus.” In 1862 he modelled for Copeland small seated figures of the Prince Consort and Wellington for mass production in “Parian” (Art Journal, 1852, page 211). He exhibited a number of busts at the Academy between 1829 and 1867, including those of Dr. Solomon Herschell (1838); Thomas Blizzard (1840), now at the Royal College of Surgeons; Lord Raglan (1857) and Miss Maria Dickson (1858).

ABRAHAM, CHARLES J.
b. 1816
He was the son of an architect named Robert Abraham and attended the Royal Academy Schools in 1833 (Royal Academy Archives). In 1841 he carved in stone “an admirably executed statue” of the Duke of Wellington for J. N. Franklin. This work which, with its pedestal, was 14 ft. high, was erected by Mr. Franklin on the lawn in front of his house at Henbury Hill, near Bristol (Gentleman’s Magazine, 1841, Vol. II, page 407).

ABRAHAM, NICHOLAS
fl. 1678–1688
He signs the magnificent monument with its kneeling life-size figures of Mr. and Mrs. Langdon, 1678, at St. Martin by Looe, Cornwall. In 1688 he obeyed the summons of the London Masons’ Company to appear before them as “a foreigner of the Mason’s trade” and “to be sworn of the company.” His son, Nicholas Abraham the Younger, was apprenticed to Thomas Shadbolt and died in 1727 (Archives, Masons’ Company).

ADAMS, GEORGE GAMON
b. 1821, d. 1898
He attended the Royal Academy Schools in 1840 on the recommendation of William Wyon, chief engraver to the Royal Mint, and studied there both as a sculptor and as a medallist. In the same year he won a Silver Medal from the Academy, and in 1841 exhibited a medallion of “Melpomene.” In 1844 he showed a statue of “An Ancient Briton” at Westminster Hall. The Literary Gazette (1844, page 483) called this “a capital figure for an aspirant, great decision in the muscular development, as well as in character and drawing,” adding that “Mr. Adams has done this well, but he’ll live to do better.”

In 1845 another competition was held for sculpture for the new Palace of Westminster and Adams submitted a work entitled “The Contest between the Minstrel and the Nightingale.” The Art Union (1845, page 258) thought this had “much grace and elegance,” although the effect was “in some degree diminished by the lines formed by the arms of the figure.”

In the following year Adams went to Rome where he studied under J. Gibson (q.v.), but by 1847 he was back in England, for in that year he won the Royal Academy Gold Medal for his group of “The Murder of the Innocents.” This was one of the works which he showed at the Great Exhibition of 1851, the others being “The Combat of Centaurs and Lapithae” and a “Figure With a Torch.”

In 1852 Adams was the sculptor chosen to take the death-mask of the Duke of Wellington. From this he executed a marble bust which was apparently very successful, for the second Duke wrote to say that it was “considered by myself and those gentlemen who knew him best, as well as by his servants, as the best by far that has appeared, and we are obliged to you for thus making a likeness which hereafter will be considered as authentic.”
(Wellesley's Iconography of the First Duke of Wellington.)

Adams carved a number of public statues of unequal merit, the one of General Napier in Trafalgar Square being described by the Art Journal (1862, page 98) "as perhaps the worst piece of sculpture in England." For the Baroness Burdett Coutts he made a number of red-marble pedestals each with a white marble bas-relief set in front, the object of the latter being to represent an appropriate scene from the life of the person whose bust was to stand on the pedestal. Three of these pedestals, including the one intended for the bust of Sir Francis Burdett, which shows him arriving at the Traitors' Gate in a wherry, are in the possession of the writer; another is at Stratfield Saye.

Adams signs the monument with a portrait-medallion to Augustus de Burgh, 1864, at West Drayton, Middlesex. As a medallist he designed and cut a number of medals, including the prize ones for the Great Exhibition of 1851, the funeral medal of the Duke of Wellington, and that of the S.P.C.A. in 1880. He exhibited at the Royal Academy, 1841–1885, and at the British Institution, 1864–1865. Plaster-casts of his busts of the Prince Consort, Lord Brougham, Sir Henry Havelock, Sir Charles Napier, Lord Palmerston, Lord Seaton, Sir Harry Smith, and Sumner, Archbishop of Canterbury, are in the National Portrait Gallery. (Various references Art Union, Art Journal and Builder.)

STATUES, etc.

1851 Duke of Wellington
1856 General Sir Charles Napier
1856 General Sir Charles Napier
1858 The Good Shepherd
1860 Sir William Napier
1862 Richard Cobden
1862 Night
1866 Lord Seaton
1868 Admiral Sir Charles Napier
1868 Youth Diving
1871 Hugh McNicke, Dean of Ripon
1875 Music's Martyr

1849 Sir Harry Smith

1850 Viscount Gough
1852 Duke of Wellington
1852 Duke of Wellington
1853 Sir Charles Napier
1853 Duke of Wellington
1855 William Brown
1855 Lord Clyde
1855 Sir John Pennefather
1855 Sir William Napier
1855 Duke of Beaufort
1855 Sir William Napier
1861 Lord Charles Wellesley
1861 Lord Clyde
1863 Lord Seaton
1864 Sumner, Archbishop of Canterbury
1867 Lord Palmerston
1869 Baroness Burdett Coutts
1869 Lord Brougham
1876 Thomas Proctor
1878 Lord Cottesloe
1882 Second Duke of Wellington
1888 Duke of Cambridge
1888 Samuel Graves

MONUMENTS

1856 Capt. Thompson
1862 Sir Duncan MacDougall
1882 Hon. and Rev. Gerald Wellesley

ADDISON, ROBERT

He was described in 1726 as "a freemason of King's Meaburn" when he made the font for Bampton Church, Westmorland (M. E. Noble's History of Bampton, chapter xi).

ADKINS, JOHN, see ATKINS, JOHN

ADRON, WILLIAM

fl. 1792–1838

He may be the son of "William Adron, mason", ...
of King Street, Golden Square, who is listed in the Westminster poll-book for 1748. Adron received £220 for marble chimney-pieces for Gleveringham Hall, Suffolk, in 1792 (Archives, Soane Museum) and, in 1812, £314 for chimney-pieces for Longleat (Archives, Marquess of Bath). In 1825 and 1826 he and his son Charles were employed on decorative work at Buckingham Palace (P.R.O. Works 5/125). Between 1810 and 1813 he was paid £318 by the Duke of Bridgewater for chimney-pieces for Ashridge Park (Archives, Lord Brownlow).

As a statuary Adron is uninspired, though the details of his tablets are carefully carved. His best work commemorates Henry Bewes, 1793, at Duloe, Cornwall, which has a relief of a woman mourning by a pillar bearing a portrait-medallion of the dead man. Other signed works by Adron (although the last three may be by his son Charles who assisted his father) include those to William Golding, 1800, in Southwark Cathedral; Thomas Manning, 1805, at Diss, Norfolk; Sir James Musgrave, 1814, at North Leigh, Oxford; Aretas Akers, 1816, at Yalding, Kent; Thomas Easton, 1835, at Ryton, Durham; Clare Thornhill, 1836, at Riddlesworth, Norfolk; and Major-General Adye, 1838, in Woolwich Parish Church.

**ADYE, or ADY, THOMAS**

*fl. 1730–1753*

From 1737 until 1744 he held the post of sculptor to the Society of Dilettanti, for which he carved a ballot-box in 1738. This was the so-called "Bacchus' Tomb" in which the books and papers of the Society were kept (Cust's *History of the Society of Dilettanti*, page 31).

When the Mansion House was being furnished in 1752, Adye submitted estimates for various lamp-stands, "six rich carved frames with looking-glasses," and "six brackets richly carved." These do not seem to have been accepted, though he was paid later in the year for "atlases and globes of glass for lights" (City Corporation MSS., Mansion House Box 2, Nos. 644 and 663).

In 1742 he made the marble bust of the seventh Earl of Westmorland. There are practically identical signed versions of this work, one at West Wycombe Park and another in the Victoria and Albert Museum. The terra-cotta model of the base, which is also signed, is in the possession of the Hon. Denzil Fortescue, of Ebrington Park, Gloucestershire; this has Lord Westmorland's arms in front and trophies of "War" and "The Arts" on each side.

Adye's monuments are of first-rate importance and all have large medallion portraits either unveiled or held by a cherub. The grandest are those which commemorate Charles Sergison, 1732, at Cuckfield, Sussex, and William Mitchell, 1745, at Fowlmere, Cambs. The former has a life-size figure of "Truth," who sits on a sarcophagus, a mirror in one hand while the other supports one side of the medallion of Sergison, the other side being held by a cherub. The latter, an even larger work, is of practically the same design, although in this case the seated figure represents Mitchell's widow. Other signed works by Adye include those to Hugo Raymond, 1737, at Beckenham, Kent; Lane Harrison, 1740, at Perivale, Middlesex; and Humphrey Hall, 1742, at Bengeo, Herts.

The sculptor apparently left his widow badly off, for in 1762 she had to apply for financial assistance to the Society of Artists (Archives, Society of Artists).

**AGLIO, AUGUSTINO**

*fl. 1831–1838*

He was the son of Agostino Aglio, of 36, Newman Street, a painter who exhibited at the Royal Academy, 1807–1834.

In 1831 the younger Aglio received a Silver Isis Medal from the Society of Arts for a bust, while in the following year he exhibited a "bust of a gentleman" at the Manchester Academy.

**AIREY, —, of Kendal**

Signs a well-carved marble tablet to Anne Stewardson, 1815, in Kendal Parish Church, Westmorland.

**ALCOTT, JOHN, of Coventry**

*fl. 1820–1850*

He was presumably the son of "Mr. Alcott, mason of Coventry," whose wife died in 1803 (*Monthly Magazine*, 1803, Part II, page 387), and who was employed from 1796 until 1802 on the rebuilding of Abury, Warwickshire, where he carved a great number of Gothic Strawberry Hill pinnacles, panels, coats of arms, etc., in stone for both the exterior and interior (Newdegate Archives).

John Alcott, who had yards at Coventry and Rugby, signs a number of tablets, mostly Gothic in design. They include those to the Rev. Arthur Mill, 1831, at Over Whitacre, Warwick; Maria Powys, 1833, at Achurch, Northants; the Rev. Henry Walpole, 1840, at Winslow, Bucks; and Thomas Eagle, 1847, at Alsley, Warwick.

**ALKIN, or ALKAN, JEFFERIN, of London**

*fl. 1744–1783*

In 1744 he was working at Stourhead, Wiltshire, where he was paid £187 for decorative
carving. In 1753 he received an order from Sir Richard Hoare for a marble chimney-piece which cost £67 16s., but this was destroyed when Stourhead was burnt down in the early part of the present century.

In the same year Alkin was paid £59 for a chimney-piece by Mr. Arnold, a partner in Hoare’s Bank, while in 1754 he received £67 for work in connexion with the house Mr. Henry Hoare was building at Clapham (Archives, Hoare’s Bank). Also in 1754 he made “a richly carved pier-glass” for Lady Dungarvon, Henry Hoare’s daughter, which was sent to her home at Marston House, Somerset (Archives, Stourhead).

In the Fitzwilliam papers there are payments to Alkin in 1750 and again in 1774 for unspecified work at Milton Hall, near Peterborough. In 1757 he was employed at St. Margaret’s, Westminster. A pamphlet, written four years later and dealing with the repairs carried out in the church, notes that “directly under the window is placed in a square moulding our Saviour at Emmaus (sic), represented in basso-relievo and well executed by Mr. Alkin, of St. Anne’s Westminster, from the famous painting by Titian.” In 1759 Alkin carved capitals for Longford Castle and was paid £50 8s. for six Portland stone “termes,” which can still be seen in the garden (Archives, Earl of Radnor).

In 1770 he was at Blenheim Palace making chimney-pieces (British Museum, Ad. MS. 41133), while from 1777 until 1783 he was working at Somerset House, carving five “fronts of Corinthian capitals to pilasters,” and, in 1778, twelve more “fronts” in Portland stone, for which he received £117. In 1781 he was paid £261 for “twenty-nine faces in Portland stone of composite capitals” (Building Accounts, Somerset House, R.I.B.A. Library), and he also carved a number of wooden chimney-pieces for the interior of the building (P.R.O., A.O.1/2495).

In 1767 Sir William Chambers, writing to Lord Charlemont about the furnishing of “Marino,” the latter’s seaside villa near Dublin, informs him that “Alkin has carved one of the little heads for the corner of the doors of the medal-cases. It is very fine, but as he tells me that he cannot do them under three guineas and a half a head, I have stopped his further progress till I hear from your Lordship.” Later in the same letter Chambers says: “Alkin I have set about a head of Plato to match that of Homer” (Historical Manuscripts Commission, Earl of Charlemont, Vol.1, page 283).

In Mortimer’s Universal Directory for 1763 Alkin is listed as living in Broad Street. He may have died in 1783, for all payments for work done at Somerset House after that date are made to his son Samuel (q.v.).

**ALKIN, or ALKAN, SAMUEL**

b. 1756.

Son of Jefferin Alkin (q.v.), he was born on 22 October, 1756, and attended the Royal Academy Schools in 1769, winning a Silver Medal in 1773 (Royal Academy Archives). Ten years later he received £151 for “sixteen composite capitals in Portland stone for the east front of the west return building” of Somerset House. In 1784 he carved in the same material nine goats’ heads above the windows of the principal floor of the building, and he also carried out a good deal of wood-carving for the interior (Building Accounts, Somerset House; R.I.B.A. Library).

**ALLCOTT, or ALCOT, JOSEPH**

b. 1796–1815

He began life as a carpenter and was sent to Stoke Park to prepare wooden pillars for the Italian artists to cover with scagliola, but being an ingenious man he watched the workmen and soon learnt the secret of the process. “He then obtained a piece of marble and imitated it so well as to please the architect (Wyatt), more than what had been done by the Italians” (Builder, 1845, page 50).

Allcott now set up on his own account as a maker of scagliola. In 1796 he was paid £70 for twenty scagliola columns of “yellow antique marble,” and £14 for four “of jasper” for Arbury, Warwickshire. In a letter to Sir Roger Newdegate, written in 1799, Allcott tells him that he has “received an order from his Grace the Duke of Bridgewater for an imitation of a very fine porphyry table in his Grace’s possession.” In the same year he made a chimney-piece for Arbury with “twenty small Doric flutes in each column” and a year later the porphyry columns for the saloon chimney-piece (Newdegate Archives).

In 1811 the Earl of Coventry paid Allcott £180 for scagliola columns for Coventry House, Piccadilly (Archives, Earl of Coventry), and four years later he made the noble columns with their elaborate composite capitals for the entrance-hall of Goodwood, Sussex (Mason’s Goodwood, page 7).

**ALLEN, —**

He signs the monument to Sir Thomas Allen, 1681, at Finchley, Middlesex. This large work is 8 ft. high, with Corinthian pillars and an open pediment with an urn in the centre. The only craftsman of this name who was a member of the Masons’ Company at the time was Peter Allen, so the monument is possibly his work.

Peter Allen, who became free by redemption in 1674, had a son Theophillus. The latter was
JAMES ANNIS
Sir George Fettiplace, 1743, Swithbrook, Oxon.

JOHN BACON THE YOUNGER
William Markham, Archbishop of York, 1813, Windsor Castle.

JOHN BACON THE ELDER
George III, 1775, Windsor Castle.
JOHN BUSHNELL
William Ashburnham, 1675, Ashburnham, Sussex.

E. H. BAILY
Viscount Brome, 1837, Linton, Kent.
leased to John Thomson (q.v.) in 1686, but
did not become free until 1694, when a “General
Search” was made by the Masons’ Company.

ALLEN, —, of Plymouth
fl. 1795–1802

He signs a few tablets in Devon, the best of
which commemorate James Luce, 1795, and Sir
Thomas Byard, 1798, both in St. Budeaux Parish
Church; and William Forbes, 1802, at Plympton.

ALLEN, JAMES, of Bristol
fl. 1756–1780

His tablets are well carried out, the design in
most cases being the conventional one of a semi-urn
set against a pyramid. Signed examples of his
work commemorate Ann Taylor, 1765, in St.
Mary Redcliffe, Bristol; Priscilla Colley, 1775, at
Barnstable, Devon; and Samuel Smith, 1775, at
Powick, Worcestershire.

Allen became a Freeman of Bristol on 23
February, 1756, by marriage with Ann, daughter
of John Weaver, gentleman. He was dead by
18 September, 1780, the date on which his son
James became a Freeman of Bristol. It is presumably
the younger Allen who signs the tablet to
John Bennett, 1780, at Camerton, Somerset.
James Allen the younger became a bankrupt in
1793; he was living in 1810.

(Bristol City Archives and Directories.)

ALLEN, WILLIAM, of Norwich
fl. 1820–1830

According to the *New Monthly Magazine* (1827,
Part III, page 405), he was responsible for the
monument to the Rev. Charles Chapman, designed
by Arthur Browne and erected in St. Peter Mancroft,
Norwich, in 1826.

ALLWOOD, THOMAS
fl. 1769–1772

He attended the Royal Academy Schools in
1769, and between 1771 and 1772 exhibited three
unnamed busts at the Society of Artists. In the
latter year he was elected a Fellow of the Society.

ANDERSON, —
fl. 1760–1770

Between 1760 and 1770 he did a great deal of
decorative carving at Penicuik House, Mid-
lothian (private information). A “Mr. Anderson”
(who may be the same person) exhibited at the
Free Society of Artists in 1761 “a tripod, from an
original design of Mr. Stuart’s.”

ANDERSON, DAVID
*fl. 1847

He was a self-taught Perthshire sculptor who
had a considerable local success with his statue of
“Tam O’Shanter.” In 1847 he went to Liverpool
to exhibit his groups in stone of “Tam O’Shanter
and Kirkton Jean” and “The Parting Between
Watty and Meg,” but died of typhus there in
October of the same year. The *Gentleman’s Magazine* (1847, Vol. II, page 668), considered him “a
man of great ability as an artist,” while the
*Liverpool Mercury* (October, 1847), in its obituary,
stated that “like most men of genius he was
modest, retiring, plain and unassuming.”

Anderson was buried at Perth. A number of his
groups illustrating Scottish poems, including
Scott’s “Last Minstrel” and “The Highland
Drover,” Burns’s “Three Jolly Boys,” and Alex-
der Wilson’s “Watty and Meg,” now stand in the
grounds of Fingask Castle, near Perth.

ANDERSON, EDWARD
*fl. 1760–1770

He was the son of Edward Anderson (1679–
1749), of Chelsea, farmer, and was apprenticed in
1720 to Benjamin Denny, “citizen and mason of
London.” He became free in 1731 and set up for
himself at the “Horse-ferry near Chelsea”
(Archives, Masons’ Company). Between 1747 and
1749 he was employed on stonework for the
theatre at Surgeons’ Hall (Archives, Royal
College of Surgeons) and a year later became
Master of the Masons’ Company.

It was during Anderson’s term of office that the
Company began to go downhill, as in their Court
Book for that year is a note that it was to be “a
frugal dinner next election day and to have neither
ladies or musique.” In 1751 Anderson was appointed
churchwarden of Chelsea Old Church. Shortly
after this he was appointed Master Mason to
Chelsea Hospital and later held the same post for
three of the Royal Palaces (Royal Calendar).

In 1778 he was paid £157 for three stone
obelisks for the use of the observatory at Richmond
(P.R.O. Works 5/66). He died on 17 June three
years later, and was buried in Chelsea Old Church,
where a slab of touch in the floor of the porch
commemorated him and his father. Here he was
described as mason “to His Majesty’s Palaces at
Hampton Court, Richmond and Kew.”

ANDERSON, WILLIAM, of Perth
*fl. 1845–1859

He was the son of David Anderson (q.v.) and
showed at the Great Exhibition of 1851 a figure of
a Highlander throwing the “putting-stone,” while
on the pedestal were reliefs of figures “further illustrative of Highland games” (Exhibition Catalogue, Vol. II, page 831).

In 1853 Anderson carved the bust of Peel for the memorial erected at Forfar (Builder, 1853, page 152). In the following year he executed a heroic statue of Burns, which he presented to his native town, and which was described by the Builder (1854, page 295) as of “manly make.” It now stands above a public-house in County Place.

Anderson’s statues of Prince Charles Edward and Flora Macdonald, carved about 1845, are in the grounds of Fingask Castle, near Perth.

ANDREWS, JAMES, of Olney
b. 1735, d. 1817

When William Cowper lived at Olney, Andrews taught him drawing. The poet called him “my Michelangelo,” and in a letter to Mr. Newton said that “James Andrews pays me many compliments on my success in the art of drawing, but I have not yet the vanity to think myself qualified to furnish your apartment” (Wright’s Town of Cowper, page 32).

Andrews signs a number of local monuments and tablets in Buckinghamshire, the most important commemorating Alexander Small (d. 1752) at Clifton Reynes. The fine terra-cotta bust of Small, which is set on the monument against a pyramid, is known from the parish records to have been executed by P. Scheemakers (q.v.).

Other signed tablets and tombstones by Andrews include those to Ann Buck, 1776, and Bartholomew Higgins, 1778, both at Weston-Underwood; William Lambry, 1779, at Olney; John Campion, 1787, at Sherrington; Charles Small, 1787, at Clifton Reynes; and Thomas Skevington, 1793, at Newton Blossomville.

ANDREWS, SAMUEL, of Wisbech
fl. 1801–1840

His tablets are of provincial workmanship, the best commemorating M. Smith, 1801, at Yaxley, Hunts; Robert Wing, 1824, at Walsoken, Norfolk; and James Smith, 1835, at Wisbech, Cambs. In Yaxley Church there is also a large wall-tablet to Captain William Papp, 1797. This has an urn and military trophies and is signed by “S. Andrews, of Yaxley,” who is presumably identical with S. Andrews, of Wisbech.

ANGELINI, GIUSEPPE
b. 1742, d. 1811

Wilfred Whitten, in a footnote to his edition of J. T. Smith’s Nollekens and His Times (Vol. II, page 58), says that Angelini was born in 1735, but when the latter joined the Royal Academy Schools in 1772 he gave his age as thirty, which would make the year of his birth 1742 (Royal Academy Archives).

Angelini was a Roman sculptor who had studied under Cavaceppi and who came to England about 1770. As already stated, he joined the Royal Academy Schools and in 1775 exhibited a group entitled “Chastity Rejecting Profane Love” at the Society of Artists. He was employed by J. Nollekens (q.v.) and was often mistaken for his master from “his dashing method of dressing in a fashionable coat and red morocco slippers.” One of the works executed by him in England was a life-size marble group of the Virgin and Child, but he was unable to sell it and was forced to dispose of it by means of a lottery (op. cit., page 58).

Angelini was apparently in financial difficulties by 1777, for in that year he applied for assistance to the Royal Academy, who granted him a “charitable donation” of twenty-five guineas (Royal Academy Archives). By 1787 he was back in Rome, where he modelled for Wedgwood various works, including “Apollo With the Muse Erato,” “Pluto Carrying Off Proserpine,” “Victory,” “Mercury” and “The Whole Fable of Meleager” (Meteyard’s Wedgwood, Vol. II, page 591).

ANNIS, JAMES
b. c. 1709, d. 1775

He was the brother of John Annis (q.v.), to whom he was apprenticed in 1723 and whom he succeeded as mason to the Ironmongers’ Company in 1740, ten years after gaining his freedom. He also worked as a mason for St. Bartholomew’s Hospital, receiving a total sum of £361 between 1754 and 1767 (Hospital Archives).

Annis was a competent statuary, but his monument to Sir George Fettiplace, 1743, at Swinbrook, Oxon, is of real importance, for the modelling and cutting of the portrait-bust is magnificent and not unworthy of a Rysbrack. He also signs a monument, with a cherub unveling a medallion portrait, to Zachariah Foxall, in St. Botolph’s, Aldersgate.

In 1756 Annis married Sarah Shapman, of the parish of St. Dionis Backchurch (Parish Register). His yard was in Aldersgate Street, and he was Renter Warden of the Masons’ Company in 1764, Upper Warden in 1765, and Master a year later. His death is noted in the Court Book of the Company. In 1748 he took as an apprentice his nephew William, son of John Annis.
ANNIS, JOHN
b. c. 1699, d. 1740.

He was the son of John Annis of Beckenham and was apprenticed to William Holland (q.v.) in 1714. He was free in 1721 and soon set up on his own account in Aldersgate Street (Archives, Masons’ Company). As a mason he was employed at the College of Physicians in Warwick Lane in 1727 (Archives, Royal College of Physicians). He was mason to the Ironmonger’s Company from 1730 until his death ten years later, as the payment for 1740 is made to his executrix, Elizabeth Annis. For the Company he built three houses in Old Street in 1731 (Company Archives).

Annis signs a number of monuments. That to William Lytton Strode, 1732, at Knebworth, Herts, has two small kneeling figures each side of a sarcophagus, while above is a relief of a family group. The monument to John Styleman, 1734, at Bexley, Kent, is a large architectural work, while one commemorating Thomas Hawes and family, c. 1740, at Leyton, Essex, has a broken pediment on which cherubs recline. It is possible, however, that this last monument may be the work of his brother James (q.v.).

ANSPACH, the Margravine of
b. 1750, d. 1828

She was Elizabeth, daughter of the fourth Earl of Berkeley, and married the sixth Earl of Craven in 1767. A fortnight after the latter’s death in 1791 she became the wife of Christian, Margrave of Brandenburg-Anspach.

In 1806 the Margravine received the Silver Medal from the Society of Arts for a marble bas-relief of her second husband, who had died in the previous year. An illustration of this work forms the frontispiece of the second volume of her autobiography, published in 1826.

ARCHER, FREDERICK SCOTT
b. 1814, d. 1857

He was the second son of a butcher in Bishop’s Stortford, and as a young man worked as an assistant to a silversmith of Leadenhall Street, named Massey. In 1836 he attended the Royal Academy Schools on the recommendation of Edward Hawkins (Royal Academy Archives) and in 1844 exhibited “Alfred the Great With the Book of Common Law” at Westminster Hall. The Builder (1844, page 367) considered it “a very good work,” a view not shared by the Literary Gazette (1844, page 466), who considered that “to fulfil our idea of Alfred the figure should be grand and powerful, but Mr. Archer seems to think that a tame, spiritless specimen of vulgarity will do.”

In 1850 Archer carved the monument to Lady Albert Conyngham for Mickelham Church, Surrey, which was illustrated in the Gentleman’s Magazine of that year (Part II, page 510). He exhibited at the Royal Academy, 1836–1851, showing, among other works, a group entitled “A Young Briton Receiving Instruction”; a statue of Gertrude Hanson (1851); and busts of Sir George Smart (1839), the Dean of Manchester (1848) and the Marquess of Northampton (1850).

Archer’s chief claim to fame is based, not on his work as a sculptor, but as the inventor of the collodion process in photography, but his activities in that field are, of course, outside the scope of this book. He died in May, 1857, and was buried in Kensal Green Cemetery. A subscription list was opened for the benefit of his family, who had been left ill-provided for, and over £600 was raised; but as his widow died in the following year, the money was used for the benefit of his children. The latter were also granted a pension of £50 by the Crown, on the grounds that their father’s photographic discoveries had been of no benefit to him, although they had been extremely profitable to others.

(Various references: Art Journal, Builder, etc.)

ARMINGER, WILLIAM
b. 1752, d. 1793

He was born on 22 November, 1752, and attended the Royal Academy Schools in 1774 (Royal Academy Archives). J. T. Smith (Nollekens and His Times, Vol. I, page 51) describes Arminger as “a raw-boned man, full six feet in height,” who came to Nollekens one day saying that he was a “cutter of funeral inscriptions come from the City of Norwich, and would be glad of a job.” Nollekens took him into his employment and allowed him to cut the inscription for the monument to Goldsmith, which was to be erected in Westminster Abbey. Arminger carried this out so well that Nollekens gave him regular work, and he afterwards cut many of his employer’s busts.

Arminger later set up for himself as a carver of tablets for chimney-pieces. He died in 1793 and was buried at Paddington (Lyson’s Environs of London, Vol. IV, page 603). After his death Messrs. Greenwood held a sale of his effects on 6 March, 1794, disposing, among other works, of the following chimney-piece tablets: “Aurora, stained upon marble”; “Adam and Eve Conducted by St. Michael Out of Paradise”; and “The Slaughter of the Innocents.” (Sale Catalogue, Victoria and Albert Museum.)
ARNALD, SEBASTIAN WYNDHAM
b. 1806

He was the son of George Arnald, A.R.A. (1763–1841), the landscape painter, and attended the Royal Academy Schools in 1824, winning the Gold Medal in 1831 for his group of "The Massacre of the Innocents" (Royal Academy Archives). He exhibited this work, and also "War in Heaven," at Burlington House in the following year. The former was considered by the Literary Gazette (1832, page 395) as "not a subject for the public eye," as it could "be viewed by the artist or amateur only as an academic exercise"; the latter, however, was described by the Library of Fine Arts (Vol. I, page 430) as "a composition in no way discreditable to the English school."

Arnald exhibited at the Academy, 1823–1841, showing both ideal works and busts, including those of G. Garrard, A.R.A. (1828); the Rev. E. Irvine (1831); and S. T. Coleridge (1836). At the Birmingham Society of Artists in 1834 he exhibited "The Iron Age," "Bacchus" and "Design from Revelations."

He later seems to have abandoned sculpture for painting, as he did not exhibit at the Academy for some years after 1840, and when he did finally send in a work in 1846 it was a picture of "Christian and Pliable in the Slough of Despond."

ASHCROFT, EDMUND, of Liverpool
fl. 1819–1831

He may have been the son of "Mr. Henry Ashcroft, of Liverpool, stonemason," who died in 1810 at the age of seventy (Gentleman's Magazine, 1810, Part II, page 493). He signs a large walltablet at Rostherne, Cheshire, to Thomas Hewitt, 1820.

ASHMORE, JOHN

In 1662 he was paid £4 7s. for the font in Wirksworth Church, Derby. This is described by Cox (Churches of Derbyshire, Vol. II, page 552) as of "octagon design and ornamented with patterns of unusual style, having more resemblance to Egyptian art, than anything that pertains to either Gothic or Renaissance."

ASHTON, HENRY, of London
fl. 1813–1814

He was the son of Robert Ashton the Elder (q.v.), and from 1813 until 1814 was the mason responsible for building 18, Park Lane.

A "Thomas Ashton, of London," who signs a monument to James Bennett, 1815, at North Cadbury, Somerset, is perhaps a member of the same family.

ASHTON, ROBERT, the Elder
fl. 1770–1792

He was first the pupil and later the assistant of W. Tyler, R.A. (q.v.), and together they sign a number of monuments. All these are large and important works and include those to Martin Folkes (died 1754: erected 1783), in Westminster Abbey; Elizabeth Yorke, 1779, at Marchwiel, Flint; William Pym, 1788, at Sandy, Beds; and William Franks, 1790, in the parish church of Kentish Town.

Ashton also carved chimney-pieces and in 1788 supplied several to the Duke of Devonshire for Chiswick House, including those for the drawing-room (£94), the dining-room (£73), the Duchess's dressing-room (£73), the Duke's dressing-room (£40), and the Duke's bedroom (£36). In 1790 he made a chimney-piece for John Weyland, of Woodcote Hall (Notebook, Soane Museum).

In 1788 Ashton put in a tender for building the Freemasons' Tavern, quoting as his figure the sum of £7,283. As the lowest tender was under £5,000 he very naturally did not get the work, although he was afterwards employed on decorative carving for the building from 1791 until 1792 (Freemasons' Archives).

ASHTON, ROBERT, the Younger
fl. 1795–1836

He was the son of Robert Ashton the Elder (q.v.), and in 1813 was employed by Lord Ashburnham at his house in Dover Street, for which he may also have carved a chimney-piece (Ashburnham Archives).

The younger Ashton signs a number of monuments and tablets, the best being that commemorating Christian Gosselin, 1824, at Faversham, Kent, which has a finely cut relief. The tablet to Anne Norton, 1796, at Little Gaddesden, Herts, has a relief of a mourning woman seated by a sarcophagus, a broken lily in her hand. Other signed memorials by Ashton include those to Mrs. Dinwiddie, 1795, in the Grosvenor Chapel; John Bailey, 1813, at Great Wenham, Suffolk; the Rev. B. Barnard, at Peckirk, Northants; Earl Beauchamp, 1816, at Madresfield, Worcs; William Edmonds, 1818, at Wendover, Bucks; the Houghton family, 1818, in St. Botolph's, Aldersgate; and Mrs. Zenogle, 1836, at Farnham Royal, Bucks.
ASSITER, THOMAS, of Maidstone
d. 1826

His tablets are good for a provincial statuary, the best being that to Sir John Twisden, Bart., 1810, at East Malling, Kent, which has a relief not unlike the work of John Bacon the Younger (q.v.). Other signed tablets by Assiter in Kent include those to William Jewell, 1778, at Seal; William Bowles, 1814, at Aylesford; William Bryant, 1816, at Maidstone; and Robert Foote, 1818, at Boughton Monchelsea.

Assiter was also employed by Lord Romney on mason's work during the rebuilding of "The Mote," near Maidstone (Building Accounts, Maidstone Museum). He was buried in the graveyard of Maidstone Parish Church.

ATHOW, JOHN, of Norwich
b. 1742, d. 1822

He lived in the precincts of Norwich Cathedral and in 1788 married Mrs. Waller, widow of a linen-draper, who died in 1808 at the age of sixty-one.

Athow signs tablets in Norfolk to Thomas Wright, 1775, Kilverstone; Robert Tilyard, 1786, at Hemsby; William Bullock, 1792, at Walsingham; and the Rev. W. Enfield, 1797, in the Octagon Chapel, Norwich.

ATKINS, or ADKINS, JOHN
fl. 1761–1783

In 1761 he received a premium of £31 7s. from the Society of Arts for a bas-relief in stone entitled "Regulus Returning to Carthage," and exhibited the work in the same year at the Society of Free Artists (Archives, Society of Arts).

Atkins was a pupil of L. F. Roubiliac (q.v.) and his name is noted on the list of those attending the latter's funeral in 1762. He then became assistant to J. Wilton (q.v.), and according to J. T. Smith (Nollekens and His Times, Vol. II, page 110) it was Atkins and Nathaniel Smith who modelled and carved the statuary on Somerset House for which Wilton received the payment and the credit.

ATKINS, ROBERT
fl. 1800–1815

His yard was in Charlotte Street, Brompton, and he signs a very pretty little tablet at Buntingford, Herts, to Edward Saunders, 1800. Another, commemorating Major Chambers, 1815, is in Lowestoft Parish Church, Suffolk.

ATKINS, WILLIAM

In 1720 he made several chimney-pieces for the Duke of Wharton's house, "The Wilderness" (Archives, Lord Braye).

ATKINS, WILLIAM

In 1761 he made a marble chimney-piece for the second Earl of Ashburnham which he sent down to Ashburnham Place, Sussex, with his man, Joseph Gilliam. The latter was paid £2 10s. "subsistance allowance" during the time he spent erecting this in the drawing-room (Ashburnham Archives).

ATKINS, WILLIAM, of Ludlow
fl. 1800–1817

He signs a wall-tablet to Richard Harper, 1817, at Ashford Bowdler, Salop.

ATKINSON, CHARLES, of London
fl. 1750–1770

At the time of the erection of Holkham Hall, Norfolk, Atkinson was responsible for most of the chimney-pieces. He also signs the large monument, 20 ft. high, of the Earl of Leicester, 1760, at Tittleshall in the same county, although the busts of Lord and Lady Leicester which form part of it are the work of L. F. Roubiliac (q.v.).

According to the London Directory of 1768, Atkinson's yard was in Leadenhall Street.

ATKINSON, JOHN, of London
fl. 1800–1830

*His yard was at 100, Goswell Street, and he and his partner, Thomas Whitfield Browne, were the masons for building Salters' Hall, 1823–1827. Their tender of £17,362 was the lowest submitted, although in the end, owing to various alterations and additions, they exceeded this figure by over £10,000. As early as August, 1823, the Clerk of the Company wrote to them to express the great dissatisfaction of the Building Committee "at the extreme slowness and want of energy with which they had hitherto proceeded." In addition to the building itself, they were also responsible for most of the carved stonework, and for the marble chimney-pieces for the Court Room, dining-room, breakfast-room and drawing-room (Company's Archives).

The partners also built the New Hall of Christ's Hospital in 1824, where they also executed all the carved stonework (Archives, Christ's Hospital).

Atkinson signs tablets to Johanna Howland, 1815, at Haverhill, Suffolk, and to John Kipling, 1830, at Overstone, Northants.
ATKINSON, THOMAS, of London
fl. 1790–1804

Between 1790 and 1804 he was working at Stourhead, Wiltshire, where he built the wings of the house and was also responsible for the decorative stone-carving. These wings were saved when the rest of the building was destroyed by fire in the early part of the present century. (Stourhead Archives.)

ATKINSON, THOMAS, of York
d. 1798

Atkinson took his son James as an apprentice in 1761, a year after he had become a Freeman of York. Another son, Joseph, had been apprenticed to Samson White, "stonemason of York," in 1757 instead of to his father, probably because the latter at that time was classed as a "foreigner" (York City Archives).

Between 1763 and 1769 Atkinson designed the Gothic front and the gate-house of Bishopthorpe for Archbishop Drummond, and also made chimney-pieces for the drawing-room and dining-room. His monuments, which are of good provincial workmanship and carried out in coloured marbles, include those to John Dixon, 1782, in Leeds Parish Church, Yorks; Sir Henry Vane, 1794, and Lady Vane, 1795, both at Long Newton, Durham; and Elizabeth Scarisbrick, 1797, in Holy Trinity, York. In 1778 James Atkinson sent in an estimate for repaving Lincoln Cathedral with marble (Cathedral Archives).

ATKINSON, W., of London
d. 1766

From 1756 until 1759 he and his partner, Joseph Pickford (q.v.), were building the New Library at Cambridge, where they received nearly £5,000. Atkinson himself seems to have been responsible for most of the decorative stone-carving and was paid £333 for work which included "four large heads representing the Seasons, £32"; "twenty-two large festoons of fruits and flowers, £159"; and "two vases, £9" (Vice-Chancellor's Accounts). In 1765 he made the chimney-piece in the alcove bedroom at Corsham Court, Wilts (Methuen Archives).

Atkinson signs a large rococo monument to the Rt. Hon. Walter Cary, 1757, at Heston, Middlesex. The words "Guls. Atkinson, Londini, fecit" are cut on the medallion of a man mourning over an urn which forms part of the monument to Mrs. Osborne (d. 1798) at Fiddown, Co. Kilkenny. As the work itself is signed by Carew of Waterford, it seems possible that the medallion originally came from another of Atkinson's memorials. After his death a sale of the contents of his studio was held at his yard in Piccadilly on 2 April, 1767. Among the lots was the bust of "Champion Dymoke." This was the model for the bust (a very fine work) on Lewis Dymoke's monument, dated 1760, in Scrovettsby Church, Lincolnshire. Other lots were "Garden terms in Portland stone 7 ft. high of Alcibiden (sic) and a Grecian Venus"; "bust of Lord Westmorland" and "a large and magnificent vase in Bath stone, designed by Mr. Kent." Among the furniture was "a most beautiful and magnificent table inlaid with horses' teeth and different rich marbles in fret and with a statuary marble border."

There had been a previous sale on 24 and 25 July, 1766, when among the lots sold were a "Head of Apollo"; "two side frizes (sic) of statuary carved with Diana's trophies"; "5 figures in Portland stone (the Stuart family) and one pedestal"; "Figures of Peace, Plenty and Cleopatra" and "a fine cast of dolphin and boys by Rysback."

AURIOL, —

In 1697 he was making statues for Chatsworth. Some of these were for the fountain, so he may have been a worker in lead (Chatsworth Building Accounts).

AUSTIN, FELIX
STATUARY AND TERRA-COTTA WORKER
fl. 1828–1850

About 1800 Van Spanghen (q.v.), a Dutchman, founded a manufactory of artificial stone at Bow. He later went into partnership with a Mr. Powell, but the firm was broken up about 1828 and the moulds were purchased by Felix Austin, who set up in the New Road works to produce "artificial stone" which, according to the Builder (1868, page 546), was made from Portland cement, broken stone, pounded marble and coarse sand. The process proved successful, and among the works produced by Austin in this material were oriental vases (designed by S. Smirke) for the Pantheon Bazaar (1833) and a pedestal for Ironmongers' Hall (1834).

Like his predecessor, Mrs. Coade (q.v.), Austin was shrewd enough to get the leading architects and designers to work for him. Besides S. Smirke, already mentioned, he employed J. Papworth, and these two and others designed a number of large fountains, including those for the Pantheon Bazaar; for Earl Amherst, at Montreal House, Sevenoaks; and for the Earl of Shrewsbury, at Alton Towers (Architectural Magazine, 1834, page 295; and 1835, page 123).
As a statuary, Austin signs a number of tablets, including those to William Ruddiman, 1826, in St. John’s Wood Chapel; the Countess of Athlone, 1830, at Sacombe, Herts; the Hon. Catherine Petre, 1830, at Selby, Yorks; and Lieutenant-Colonel Dashwood, 1832, at Kirklington, Oxon. About 1840 Austin went into partnership with John Seeley (q.v.) and together they sign tablets to Frances Samwell, 1841, at Upton, Northants, and to Sophia Pym, 1841, at Willian, Hertfordshire, the latter being designed by a “B. Watson.”

**AVARY, or AYRAY, ROBERT, of York**

He signs the monument at St. Crux, York, commemorating Sir Tancred Robinson who was twice Lord Mayor of York and who died in 1754. This fine work has a cherub holding a medallion portrait of Sir Tancred; behind it are naval trophies and below the emblems of a Lord Mayor.
BACON, CHARLES

b. 1821, d. 1885 (?)  

Bacon first exhibited at the Royal Academy as a gem-cutter when, in 1842, he showed a cornelian intaglio of "Eve," and it was not until four years later that he attended the Academy Schools on the recommendation of Alarick Watts, the poet and writer (Royal Academy Archives). In 1847 he showed a bust of his friend Watts, and in 1853 offered for sale at the British Institution a group entitled "Helen Veiled Before Paris," for which he asked five hundred guineas.

In 1861 Bacon was given the commission for a statue to be erected at Spilsby, Lincolnshire, to the memory of Sir John Franklin, the Arctic explorer. The sculptor was apparently unknown at that time, for the Art Journal (1861, page 29), on hearing who had been chosen for the work, asked: "Who is Mr. Bacon? We do not know of any living sculptor of that name."

In 1864 Bacon made a bust of Shakespeare for the Agricultural Hall, Islington. In 1874 Mr. Charles Oppenheim offered to present a statue of the Prince Consort to the City of London, and Bacon was chosen to execute it for a fee of £2,000. The result was the poor equestrian bronze statue at Holborn Circus, which shows the Prince, cocked hat in hand, on a prancing horse. The granite pedestal on which the work stands is 15 ft. high; on the east and west sides are seated figures of "Commerce" and "Peace," while to the north and south are bronze reliefs showing the Prince laying the foundation-stone of the Royal Exchange, and Britannia distributing awards for the 1851 Exhibition. The Art Journal (1874, page 61) was kind when it wrote that "on the principle that one must not too narrowly examine a gift horse, we abjure criticism."

In 1875 Bacon carved the statue of John Candlish for Sunderland. His bust of George Grote, 1855, is in Westminster Abbey, and he also executed others of Warren Stormes Hale, Lord Mayor in 1864, and the Rev. G. F. W. Mortimer, both of which are at the City of London Schools. He exhibited at the Royal Academy, 1842-1884, where his busts included those of Henry Faudel (1864); Sir George Barrow (1865); the Rt. Hon. B. S. Phillips (1866); the Duke of Edinburgh (1867); and the Bishop of Chichester (1884). Bacon probably died in 1885 as his name is no longer noted in The Year's Art after that date. He was then living at the Bolton's Studios, South Kensington, London, S.W. According to Graves's Royal Academy Exhibitors, a "G. Bacon" (of whom there is no other trace) showed heads of "Minerva," "Antinous" and "Ariadne" between 1846 and 1848. As his address is the same as that given for Charles Bacon, he may be a brother or some other relation (unless, of course, the "G." in the catalogue is a misprint for "C.").

BACON, JOHN, R.A.

b. 1740, d. 1799  

He was born in Southwark on 24 November, 1740, the son of a clothworker in that district, and at the age of fourteen was apprenticed to a Mr. Crispe of Bow Churchyard. Crispe, a maker of porcelain, also had a china factory at Lambeth and it was with him that Bacon first learnt to model figures. He was so apt a pupil that he was soon able "to make all the models of 'The Deer and the Holly Tree,' 'The Bird and the Bush,' and 'The Shepherd and the Shepherdess,' which were required for his master's factory" (Allan Cunningham, Lives of the Painters).

In 1759 Bacon received a premium from the Society of Arts for a figure of "Peace," and between 1760 and 1778 he received ten further awards (Archives, Society of Arts). About 1769 he became a modeller for the manufactory of artificial stone which Mrs. Coade (q.v.) had just opened at Lambeth. For her he made a great variety of works, the most important being "A Tiger" for Sir Francis Bassett; "Charity" for the Marine Society of London; "Contemplation" for Dr. Lettsom of Cambervell; and reliefs for Hooton Hall, Cheshire. In 1768, Bacon entered the Royal Academy Schools and removed from the City to lodgings in Wardour Street, although he still continued in Mrs. Coade's employment.

One of the first works from his chisel which caught the attention of the public was a colossal head of "Ossian," and in 1769 he won the first Gold Medal for sculpture ever awarded by the Academy for a bas-relief, entitled "Aeneas Escaping From Troy." In 1770 he was elected an Associate of the Royal Academy and seven years later a full member.

In 1769 Bacon was employed by Wedgwood, for whom he modelled two reliefs of "The Good of Day" and "The Good of Night." Peter Swift, Wedgwood's London agent, in a letter dated
21 March, 1769, tells his master that "Mr. Bacon brot a model of Apollo and Daphne which I have got a cast of. He asks for your future instructions, since which I have found a paper with two drawings of vases and some references for modelling—went with them tonight but did not find him at home" (Wedgewood Archives). In the Royal Collection are three Derby biscuit groups modelled by Bacon, made in 1772 and based on the picture by Zoffany of George III, Queen Charlotte and their children.

In 1770 the sculptor executed a statue of "Mars" which he showed at the Royal Academy in the following year, but which did not find a purchaser. He accordingly presented it, with a companion statue of "Venus," to the Society of Arts in 1778 and was awarded their Gold Medal. It was the statue of "Mars" that so impressed Benjamin West and caused him to exclaim: "If this is his first essay, what will this man be when he arrives at maturity?" It also attracted the attention of the Archbishop of York, who arranged for Bacon to model a bust of the King for the Hall of Christ Church, Oxford. The bust was so successful, and the King so delighted with it, that he ordered a replica to be made for the University of Göttingen, while a third was subsequently executed for the Prince of Wales and a fourth for the Society of Antiquaries.

The King's friendship was to bear fruit later, for it was owing to his influence that Bacon received the commission, in 1779, for the monument to Chatham in Westminster Abbey. This towering mass of marble, with its picturesque magnificence and riot of figures, was greatly admired at the time of its unveiling. The European Magazine (1790, page 84) considered that it would "at all times remain a proof of the genius of the artist who produced it; an artist who has acquired his fame without foreign instruction or study in the schools of Italy, and who may be produced as a proof that genius is the growth of the British Isles unassisted by such aids." Cowper wrote in "The Task" that "... Bacon there gives more than female beauty to stone And Chatham's eloquence to marble lips."

Apparently the inscription, which the sculptor wrote himself, was not so successful, for the King remarked: "Now, Bacon, mind you do not turn author, stick to your chisel."

Bacon was now fairly launched, and from then on his career was one of unbroken prosperity. He was a shrewd, perhaps almost grasping, man of business and at one period had the audacity to propose to the government that he should execute all the national monuments at a certain percentage below the price fixed by Parliament. This extraordinary suggestion naturally infuriated his fellow-artists and called forth from Fuseli, the painter, the acid retort that: "If Bacon is to do all the stonework for the Army and Navy, they ought also to give him the contract for hams and pork." It is, however, only fair to the sculptor to add that his son, J. Bacon, the Younger (q.v.), called this story "a gratuitous, unqualified falsehood" in a letter written to Peter Cunningham in 1854.

Bacon was largely a self-taught artist and was accused by his enemies of having no knowledge of the antique or ability to produce works of a classic character. In reply he modelled a head of "Jupiter" to which he carefully gave the appearance of antiquity before producing it among the connoisseurs. They were completely deceived and inquired from what ancient temple the work had come.

As a sculptor Bacon lacked the true fire of genius, but he knew what the public wanted and gave it in full measure. According to the New Monthly Magazine (1816, page 27), he "was singular in never setting his draperies, but executing them according to his ideas as the work came out," while, perhaps because of his early training with Crispé, the delicately cut details of his monuments have the appearance of porcelain. The symbolism, however, is always obvious and he was too fond of repeating certain designs. The "Pelican in its Piety," for example, appears with remorseless frequency and bears out Cunningham when he says that if Bacon could think of nothing else he would fall back on what he used to call "our old friend the Pelican" (op. cit.)

In 1773 the sculptor had married a Miss Wade and moved to more commodious premises in Newman Street; his wife died in 1783 and he re-married in October of the same year, his second wife being a Miss Martha Holland. He was still living in Newman Street at the time of his death, which took place on 7 August, 1799. He was buried in Whitefield's Tabernacle, where his grave bore the following epitaph written by himself: "What I was as an artist seemed of some importance while I lived; what I really was as a believer in Jesus Christ is the only thing of importance to me now."

Of the various accounts of Bacon, the best is given in his obituary which appeared in the Gentleman's Magazine of 1799, and which was the work of "one who had a long and intimate acquaintance" with him. His life by Cunningham was considered by his family to be coloured by personal dislike, while the "Memoir" by Robert Cecil is over-flattering and deals more with his activities as a pillar of the Methodist Church than as a sculptor.

**BACON, JOHN, the Younger**

_b. 1777, d. 1859_

He was the second son of John Bacon, R.A. (q.v.), and was born at his parents' house in Newman Street on 13 March, 1777. His father trained him in sculpture and, to quote the _European Magazine_ (1815, page 3), "put the tools so early in his hands that there are now in various parts of the kingdom monumental figures executed completely by him when only eleven, twelve or thirteen years of age." In 1789 Bacon entered the Royal Academy Schools and four years later won a Silver Medal; in 1797 he received the Academy Gold Medal for a statue of "Cassandra."

It was in 1792 that he had first exhibited at the Royal Academy, showing a relief of "Moses Striking the Rock," while a figure of "Providence" for Trinity House appeared in 1796. In 1799, on the death of his father, he took over the conduct of the business and completed the unfinished works in the studio. Bacon received so many commissions, mostly for monuments, that he decided in 1803 to have a public exhibition of his larger works, a plan, according to the _European Magazine_, "never before adopted in the same way by any artist."

In 1806 Bacon competed for the statue of Pitt to be erected in Cambridge and the model he submitted is now in the possession of the Earl of Normanton. In 1809 he made for the island of Antigua a group in memory of Lord Lavington, a work later destroyed by a hurricane. The sculptor, before he sent it to the West Indies, gave the following description of it to Prince Hoare: "A representation of his Lordship habited (agreeably to the wish of the Council) in his robes as Knight of the Bath. He is seated and elevated to convey the idea of vice-regal authority. His sarcophagus is also introduced. The island of Antigua, personified, pays a tribute of sorrow to his memory" (Hoare, _Academic Correspondence_, 1809, page 42).

In 1814 Bacon restored Gibber's famous figures of "Madness" and "Melancholy" at Bethlem Hospital. Till about 1830 his life was untroubled and prosperous. He had more than enough work and he never lacked commissions, but for the last thirty years of his life he practically retired from active business and produced, as far as I know, only two major works. One was the reredos of St. Laurence, Exeter, described by Miss Cresswell in her _Churches of Exeter_ (page 76) as "very remarkable, not to say remarkably ugly." It represented "an Angel holding a cross, rising from clouds towards a crown." The other work is also in Exeter and is a recumbent figure of the sculptor's daughter, Mrs. Medley (1842), in the Church of St. Thomas, of which her husband was Vicar. Even that severe critic, the _Ecclesiologist_, approved of the tomb and was "glad to be able to present to our readers the following instance of true and Catholick taste and feeling." The writer continues with a description of the recumbent effigy of which "it is not too much to say that few of the best ages of Christian art surpass it."

It is a curious commentary and shows how utterly the once famous Bacon was forgotten that the _Art Journal_, that repository of information on contemporary art and artists, hardly troubles to mention his death. Bacon was not as great a sculptor as his father, and it is perhaps significant that though his name was put forward he never secured sufficient votes to be elected an Associate of the Royal Academy. Nor apparently did his
fellow-artists think highly of his work. Smirke told Farington (Diary, Vol. III, page 173) that if Bacon's model of the statue of Lord Wellesley was carried out "he would shun the place where it was to be seen"; while N. Marchant, R.A. (op. cit., page 182), said of Bacon's work that he finished it with care but was "deficient in taste and knowledge of the antique," and that he designed "his parts in a petite manner."

Bacon exhibited at the Royal Academy from 1792 to 1824 and at the British Institution in 1806 and 1807. His portrait by Russell, R.A., is reproduced in the European Magazine for 1815. (Authorities quoted in the text.)

BACON, JOHN, and MANNING, SAMUEL
Partnership fl. 1818–1843

John Bacon the Younger (q.v.) and his former pupil, Samuel Manning, later went into partnership as monumental masons, and the firm turned out a large number of dull and second-rate monuments and tablets. As most of this work was produced when Bacon had practically retired from business, it seems doubtful if he had much to do either with designing or carving the monuments; indeed he can have been little more than a sleeping partner. To the public, however, the name “Bacon” stood for the prolific and popular statuary whose works could be admired, not only in Westminster Abbey and St. Paul’s, but also in a hundred village churches. The widow, ordering a modest tablet from the firm, felt that she was employing the sculptor of national monuments. In reality all she would get would be either some stock “Bacon” design, which had been in use since the end of the eighteenth century, or the not very original one showing a widow in flowing weeds bowed over a funeral urn; extra carving, in the form of branches of yew or cypress, cost a little more.

Manning, save on the rarest of occasions an inferior sculptor, doubtless ran the firm; and a prosperous one it must have been, to judge by the very large number of works it produced. Peter Cunningham wrote in the Builder (1863, page 167) “that Bacon should die worth £60,000 without making busts seems to be inexplicable, and I cannot see how Bacon acquired by sculpture alone the large sum he was unable to take with him.” The answer is that Bacon found turning out endless similar memorial tablets far more paying than cutting busts.

As the years pass so do the firm’s tablets get duller, and as one enters a church it is only occasionally that the eye lights on one of their works which has a fresh, original or well-thought-out design. To Bacon and Manning, therefore, must go much of the blame for the mass-produced memorials which, by the middle of the last century, had become so lamentable and frequent a blot on the wall of aisle and chancel. A list of their better works is given below:

**BACON, THOMAS**

_b. 1773_

Eldest son of John Bacon, R.A. (q.v.), he worked in his father's studio and himself exhibited at the Royal Academy, 1793–1795, showing a few religious works. After his father's death he assisted his younger brother John (q.v.) in the completion of the unfinished works in the studio, including the statue of William III, but soon after 1800 all trace of him is lost.

**BAILY, EDWARD HODGES,**

_R.A._

_b. 1788, d. 1867_

He was born on 10 March, 1788, at Bristol, his father being a ship's carver and a man of considerable artistic talent. At the age of fourteen Baily was taken from school and placed in a merchant's counting-house where he worked for two years, although even at this time he felt a strong leaning towards art. For this reason he began to take lessons from a modeller in wax, and made such rapid progress that by the time he was sixteen he had given up all idea of a commercial career. He started his artistic work by executing portraits in wax, and even considered making this his medium for the rest of his life until he saw Bacon's monument to Mrs. Draper, in Bristol Cathedral, and felt "the first emotion of a higher aspiration" (_Art Union_, 1847, page 230).

Baily now determined to study sculpture and received help from a young surgeon named Leigh, who not only lent him Flaxman's designs for Homer's Iliad, but also gave him a commission for two small groups to be executed from the drawings. The result was so satisfactory that Leigh sent one of these groups to Flaxman himself, urging him to give the artist a chance. Flaxman must have been equally impressed, for he summoned Baily to London and accepted him as a pupil in his studio. Here the young man remained for seven years and in 1808 won a Silver Medal from the Society of Arts for a plaster-cast of "Laocoön." He joined the Royal Academy Schools in the same year and was awarded a Silver Medal by the Academy in 1809.

In 1811 Baily won the Academy Gold Medal and a purse of fifty guineas for his "Hercules Restoring Alcestis to Admetus." In 1816 he accepted the post of chief modeller to the firm of Rundell and Bridge, the best-known gold- and silversmiths of the period, and for thirty years designed for them a very large number of works, including presentation plate, candelabra, racing trophies, etc., among the last-named being the Doncaster Cup in 1843, and the Ascot Gold Cup in the following year.

Baily's first exhibited work to attract attention was a figure of "Apollo Discharging his Arrows Against the Greeks," which he showed at the Royal Academy in 1817, and which made so favourable an impression on the members that it procured him election as an Associate. It was a year later that he showed a model of his most celebrated work, "Eve at the Fountain," which at once gained him a European reputation; it is curious to reflect that he had made the original design as the handle of a cover for a soup-tureen for one of the City Companies. In 1821 "Eve" was executed in marble and purchased by the citizens of Bristol for their Literary Institute. In the same year the sculptor was elected a Royal Academician, and he deposited as his diploma work a bust of Flaxman. In 1825 he made the frieze for the portico of the Masonic Hall at Bristol, and in the following year the relief for General Picton's monument at Carmarthen.

In 1826 Baily also received extensive orders for sculpture for the Marble Arch; this consisted of four trophies upon columns (£3,200); two square

panels (£600); six spandrels with "Victories" (£900); three keystones (£300); and four statues of "Victories" (£1,200) (P.R.O. Works 20 4/1). All this work was apparently finished and paid for by the Government, although it was not all placed on the Marble Arch and some was probably used for other Government buildings. The statues on the façade of the National Gallery were also executed by Baily, though they were originally commissioned by George IV either for Buckingham Palace or the Marble Arch. In 1829 the sculptor agreed to execute eight statues for the gateway at Hyde Park Corner, but owing to the King's death they were never carried out. Apparently he found it difficult to get the Government to pay him for his work, for in 1831 he and Sir Richard Westmacott (q.v.) wrote a letter to the Treasury in which "as the principal sculptors employed on the Arch now erecting in St. James's Park, in honour of the late military and naval achievements," they asked for payment of the "third and last instalment due to us." They ended by asserting that "the greatest part of these works have been executed nearly three years ago" (P.R.O. Works T.1/3489).

In 1833 Baily wrote to the Royal Academy "representing the depressed state of sculpture and urging the Council to adopt some measures for its assistance," but though the Academy agreed with all he said they were unable to suggest any remedy (Academy Archives).

Baily also worked at Buckingham Palace, being responsible in 1828 for the relief of "Britannia Acclaimed by Neptune and Tritons Being Drawn in her Chariot" which formed the pediment of the portico of the quadrangle. In the same year he made four friezes for the throne-room depicting incidents in the Wars of the Roses from designs by Stothard.

As a monumental sculptor he had a large practice, though his work was never as popular as Chantrey's. His recumbent figure of Lord Broome at Linton, Kent, is, however, far more moving and beautiful than Chantrey's much better-known and applauded effigy of Lady Frederica Stanhope at Chevening in the same county, which is starred in every guide-book. On the other hand, he could produce works of utter bathos; for example, his monument to Sir William Ponsonby in St. Paul's, which a contemporary critic described as a "vulgar combination of nature and art, a confused idea wrought with a heavy hand" (Smyth's *Monuments of St. Paul's*, page 789).

Baily's monuments were undoubtedly much admired during his lifetime. After seeing one of them, the Rev. J. Eagles wrote in his *Rhymes Latin and English* a poem which ends as follows:

"And by his last Will and Testament
Provide for his own monument.
Baily's man, in spite of death
To chisel in again his breath,
Make blood reflow in marble vein
And set him on his legs again."

In 1847 the sculptor exhibited his statue of Chief Justice Tindal which aroused a great deal of unfavourable comment in artistic circles, where it was alleged that he had patched up an old model by J. Bacon, R.A.—"Sir William Blackstone's statue made to do new duty," as the *Art Journal* put it (1867, page 170). He did very little work for some years prior to being made an "Honorary Retired Academician" (with a pension of £200) in 1863, and after this he exhibited no more.

Though Baily must have made a large sum of money during his career, he seems to have been extravagant and the last years of his life were much embarrased; indeed in 1857 he applied to the Royal Academy for assistance. The *Art Journal* in its obituary (1867, page 110) said that "the years of his prolonged life were actively passed in upholding the dignity and purity of his art, and in its annals his name must always be referred to as one of the most successful sculptors of the nineteenth century." The *Builder* on the same occasion (1867, page 387) wrote that "his 'Eve' was a marble inspiration softened into life," though they were forced to remark that his portrait statues "were luckily few in number and did not add to his reputation." Busts they considered to have been "little understood by Mr. Baily, save that of Douglas Jerrold," which was "very fine in conception and execution and true to the man and his wit."

Baily exhibited at the Royal Academy, 1810–1862, and at the British Institution, 1812–1840, where he showed in the latter year a confused design for the Nelson monument with an obelisk and figures of Nelson, "Victory," "Neptune" and "The Nile," while "the subordinate deities of the ocean form a triumphal procession round the rock on which the monument is placed." This gained the second prize, but there was a good deal of controversy over the memorial and two competitions had to be held before it was finally decided that William Railton's column should be chosen, while Baily should execute a simple figure of the Admiral without any "subordinate deities." The model for this statue is now in Admiralty House, London.

A number of Baily's works were in Mr. Elkanah Bicknell's sale held at Christie's on 25 April, 1853. They had originally been made for Mr. Bicknell's gallery at Herne Hill, and the chief lots sold were
“Paris” (£161); “Helen” (£162); “Psyche” (£315) and “Cupid” (£254). At the Manchester Art Treasures Exhibition held in 1857, Douglas Jerrold and Professor Owen lent their own busts by Baily, while the Duke of Newcastle sent the sculptor’s “Head of Eve.”

At the Royal Academy in 1843 T. Mogford exhibited a portrait of Baily, and a drawing of him by T. Bridgeford appeared in the *Art Journal* four years later.

1833 Wotton-under-Edge, Glos David Taylor
Baker, Robert Charles, of Southampton
fl. 1836–1851

At the Great Exhibition of 1851 Baker showed the model of "A Cemetery Memorial." He signs a small wall-tablet to Charles Baker (d. 1836) at Upton, Bucks.

Baldwyn, Stephen

In the Worcester audit of account-books (No. 3, 1640–1669) is the bill for the statue of Charles II. This was erected at the Worcester Guildhall in 1661 by Baldwyn, who was paid £20 "for cutting and setting up the King's statue, according to the agreement." There is also a later payment to him of £8 12s. for his "men's wages in setting up the Pediston and the Arch." The statue must either have been damaged or become very worn, for Thomas White (q.v.) was paid for repairing it in 1712.

A Samuel Baldwin of Stroud signs the important monument with its recumbent figures of Sir John and Lady Young, 1606, in Bristol Cathedral. He died in 1645 and was buried at St. Nicholas, Gloucestershire (Fosbrooke's Gloucestershire, page 309).

Ballant, Theodore

In 1767 he received a premium of twenty-five guineas from the Society of Arts for a bas-relief of "The Sacrifice of Iphigenia" (Archives, Society of Arts). There is no further mention of him, so he apparently never exhibited again.

Ballard, Francis

b. 1751, d. 1811

He signs a tombstone to Mary Gibbs, 1804, at South Littleton, Worcs.

Bally, William, of Manchester
fl. 1832–1846

At the Manchester Exhibition of 1832 he showed a bust of the Rev. R. Newton and, in 1846, "Two busts of Clergymen." His busts of Samuel Hope (1832) and Thomas Henry Ildridge (1837) were shown at the Liverpool Academy. His wax portrait of Lord Eldon is in the Victoria and Albert Museum.
BANKES, HENRY
b. 1679, d. 1716

He was the son of Matthew Bankes (d. 1706), who became His Majesty's master-carpenter under Charles II in 1683 and was reappointed by William and Mary in 1689. Young Bankes was apprenticed to Edward Strong (q.v.) in 1695, and from 1705 until 1709 was working at Blenheim Palace, where he built part of the colonnade of the Great Court. He was employed at Marlborough House, 1709-1712 (Malcolm's Londinium Redivivum, Vol. IV, page 317), while in the following year he received £41 for work at the Royal Mews, Charing Cross (Wren Society, Vol. XVIII, page 164), and in 1715 went to Windsor Castle, where he was paid for a Portland-stone chimney-piece (P.R.O., A.O.1, 2448/149). He died in 1716 and was buried at Hampton, Middlesex, where a much-worn slab on the floor of the church tower commemorates him.

A Mr. John Banks (who may be a member of the same family) received £25 for “5 stags heads for ye Hall” of the banking house built by Sir Robert Clayton in Old Jewry. They were presumably carved in wood and the payment for them is entered in Sir Robert’s ledger in the Guildhall Library.

There is also a Richard Bankes, described as 3 Bus Regius Lapidum on the tablet commemorating his son-in-law and daughter, the Rev. and Mrs. Francis Clerke, in Shoreditch Parish Church. Sarah Clerke died in 1709 at the age of sixty-four, and her husband six years later. The monument not only bears his arms but also those of the Bankeses—“on a cross or, between four fleur de lys or, a cross patty gules.”

BANKES, CHARLES
b. 1745 (?)–1792

Son of William and Mary Banks and brother of Thomas Banks, R.A. (q.v.), he was probably born about 1745. In 1764 he was a pupil of L. Holm (q.v.) and, a year later, was working with a Mr. Powell of Oxford Road. In 1765 he was also awarded a premium of fifteen guineas by the Society of Arts (Archives, Society of Arts), and in 1769 attended the Royal Academy Schools. Here he won a Silver Medal in 1771 and three years later was awarded the Gold Medal for his group entitled “The Story of Pygmalion” (Archives, Royal Academy).

Banks exhibited at the Royal Academy, 1774-1792, showing various models, a design for a monument (1783) and a bas-relief in wax. His niece, Mrs. Foster, afterwards wrote to Allan Cunningham, giving her reminiscences of him, as well as of her more famous father, Thomas Banks. Of her uncle she says: “He was principally instructed by my father, but he died young and was not, I believe, very industrious, therefore nothing remains of his talents in his profession” (Builder, 1863, page 4). To describe Charles Banks as having “died young” is hardly accurate, as he must have been at least forty-seven.

BANKS, THOMAS, R.A.
b. 1735, d. 1805

He was the son of William Banks, steward to the Duke of Beaufort and surveyor of the works while Kent was building Badminton. Banks was sent to school at Ross-on-Wye, Hereford, but at the age of fifteen was apprenticed to W. Barlow (q.v.), with whom he served his full term of seven years. His master lived near Peter Scheemakers (q.v.), and it was to that sculptor’s studio that Banks would go to study when his day’s work was over. He was also employed by William Kent, the architect, who must have known his father well.

In 1763 Banks received a premium from the Society of Arts for a relief of “The Death of Epaminondas” in Portland stone; a second came two years later for a marble relief of “The Redemption of the Body of Hector”; while in 1769 he won two more for a life-size model of “Prometheus” and “A Design for Ornamental Furniture” respectively (Archives, Society of Arts).

At that time Banks may have been working or studying with R. Hayward (q.v.), for Nollekens addresses a letter to “Mr. Thomas Banks, Sculptor, at Mr. Hayward’s, Piccadilly, London” (Whitley’s Art in England, 1821-1837, page 40). He was certainly studying at the Royal Academy, where in 1770 he received the Gold Medal for a bas-relief of “The Rape of Proserpine.” He also exhibited there, and the talent shown in his works, especially a “Mercury, Argus and Io,” shown in 1772, decided the Academy to grant him a travelling studentship. In the summer of that year Banks and his wife (for he had married a Miss Elizabeth Hooton in 1766), set out for Rome. Mrs. Banks was an heiress and owned property in London, so they were able to remain in Rome for seven years, untroubled by financial considerations, although the Academy grant was only for three.

While in Italy, Banks carved the grand relief of “The Death of Germanicus” for Mr. Coke, which is now at Holkham, and also a smaller one of “Thetis and Her Nymphs Rising From the Sea to Console Achilles for the Loss of Patroclus,” a work which Mrs. Foster, the sculptor’s daughter, afterwards presented to the National Gallery; it is now in the Victoria and Albert Museum.
In 1779 Banks returned to London and took a house in Newman Street. In the following year he exhibited a marble bas-relief of “Caractacus Before Claudius” at the Royal Academy. The commission for this had been given when Mr. Grenville (later Marquess of Buckingham) was in Rome in 1774 and, indeed, had been finished and dispatched from Italy in 1777. The work was placed on the west wall of the entrance-hall at Stowe, where it still remains. While in Rome Banks had also modelled a statue of “Cupid” and, on his return to England, carved it in marble. “The artist, being then unemployed, embarked with it for Petersburg in June, 1781, and, arriving there in August, it was by the recommendation of Lord Malmsbury and Prince Potemkin showed to the Empress who purchased it for four thousand roubles and ordered it to be placed in a building called the Grotto in the gardens at Szarsko-Zelo” (European Magazine, 1790, page 24).

Banks remained for a year in Petersburg and made a model of a statue of the Empress for Prince Potemkin; he also, according to Mrs. Foster (Builder, 1863, page 4), carved the relief of “Armed Neutrality” for the Empress.

Finding that the Russian climate did not suit him and that he was unlikely to receive any more commissions, Banks returned to London in 1782 and almost at once was employed by Mrs. Newton on a large monument of her late husband, Bishop Newton, which was to be erected in St. Paul’s Cathedral. Permission not being granted for its erection in the Cathedral, Banks made a smaller version, which was placed in St. Mary-le-Bow. Though damaged and calcined when that church was burned during the Second World War, the monument still remains and it is to be hoped that one day it may be restored.

In 1783 Banks made stone statues of “The Four Quarters of the Globe” for the attic of the north front of the Dublin Customs House, but these were destroyed when the building was shelled and burned during the Irish Rebellion in 1916. In 1784 he carved for Somerset House two trophies with naval and military ornaments, one for the centre of the north front and the other for the centre of the building next the river, receiving a total sum of £144 15s. (P.R.O., A.O.1/2497). In the same year he was elected an Associate of the Royal Academy and, in 1786, became a full member. He deposited as his Diploma work “The Falling Titan,” which J. T. Smith considered “far superior to any before produced in England and perhaps which will never be surpassed” (Nollekens and His Times).

In 1789 Banks executed the alto-relievo of “Shakespeare Between the Dramatic Muse and the Genius of Painting” for the exterior of Alderman Boydell’s gallery in Pall Mall; it is now in the gardens of New Place, Stratford-on-Avon. In 1790 Boydell, then Lord Mayor, presented to the sculptor the statues of “Religion,” “Temperance” and “Fortitude,” originally on the front of the Guildhall. These he repaired in his studio, and at the sale held after his death they were bought by Mr. Banks, M.P., for Corfe Castle (Athenaum, 1846, page 1223).

Between 1787 and 1792 Banks made various chimney-pieces, including one (£93 3s. 6d.) for the Egyptian Hall at Fonthill (Britten’s Beauties of Wilts, Vol. I, page 214), and several for the house of Richard Cosway, R.A., at 20, Stratford Place (Wheatley’s London, Vol. III, page 327). In 1790 he carved one for the Bank of England with a “rich ornamented tablet, a festoon of laurel leaves and ribbons on the frieze; Vitruvian scrolls and flutes on the architrave; angular columns with staff and ribbon and twisted flutes” (Building Accounts, Bank of England, Soane Museum). Two years later he made the famous chimney-piece for Daylesford House, to the order of Warren Hastings.

In 1793 Banks executed his most admired monument, that commemorating Miss Penelope Boothby for Ashbourne Church, Derbyshire. This was first exhibited at Somerset House, where a crowd of enthusiastic spectators, including Queen Charlotte and her daughters, was often moved to tears by the simple figure of the sleeping child.

There is a puzzling note in the Gentleman’s Magazine in 1794 (Part I, page 410) to the effect that the large monument of Lady Henniker “lately erected in Rochester Cathedral” was the work of “Mr. Banks.” The work, save for an unimportant marble sarcophagus, is entirely carried out in Coade’s artificial stone, the chief feature being two magnificently modelled life-size figures of “Time” and “Eternity.” This is the only statement I have found which indicates that Banks was employed by Mrs. Coade (q.v.). The report may be incorrect, but if so it seems strange that so widely read a journal made no attempt to contradict it in a later number.

The rest of Banks’s life was passed in executing commissions mostly for busts and monuments. Colonel Johnes, of Hafod in Cardiganshire, was one of his chief patrons, but his works formerly in that house have now been scattered and dispersed.

Banks died on 2 February, 1805, and was buried in Paddington Churchyard. A small cenotaph to his memory was erected in Westminster Abbey with the lines: “Whose superior abilities in his profession added a lustre to the arts of his country, and whose character as a man reflected honour on human nature.”
In the *Builder* of 1863 (pages 3–5) are published letters between Allan Cunningham and Mrs. Foster. They give a great many details of her father’s career and of his friendship with Horne Tooke and their discussions on politics, “which at that period engaged his attention almost exclusively and even endangered his liberty.” After Tooke’s arrest for high treason “an officer came to my father with an order from the Secretary of State for him to accompany him to his office.” Banks, however, returned a few hours later honourably acquitted.

Mrs. Foster gives this sketch of her father: “He was remarkably taciturn and spoke but little, yet that little was ever to the purpose. . . . He was a most minute observer of nature. . . . He spent much time and was at a considerable expense in forming a collection of drawings and engravings. . . . Simple and frugal in his general style of living, from which he did not deviate, even when fortune began to smile on his talents. . . . Latterly he became very strict in his religious tenets, which opened the way to numberless applications from those who attended the same place of worship which he did. . . . Yet notwithstanding he left a handsome provision for his widow.”

At the sale of “a nobleman,” held by Mr. Christie on 17 May, 1782, the following lots by Banks were sold: a model in terra-cotta of a “design for a monument of the late Earl of Chatham,” a head of Agrippina, “a bas-relief of Doctor Watts, dictated by Divine poetry” and “a mould of Mr. West’s bust.”

At the sale of Banks’s effects held by Mr. Christie on 22 May, 1805, the casts of a number of busts by him were sold, these included “Bonaparte, Mrs. Cosway, Horne Tooke, Mrs. and Miss Johnes, Mrs. Campbell, Miss Rose, Mr. West (terra-cotta), Mr. Home the artist (modelled at Rome), Mr. Palmer, Duchess of Gloucester (terra-cotta modelled in Rome), Dr. Egerton and Dr. Warner (both in clay), Felix Vaughan, J. C. Schroeter, General Martin and another of him when young, Marquis Cornwallis, Lord Camden, Sir R. and Lady Lawley, Mr. West’s dog, and Mrs. Taylor.” The busts of Warren Hastings included two in “different drapery” and another “in Roman drapery executed in marble for the late Marquis of Lansdowne.” Other lots included bas-reliefs of the heads of Lord Daer and Cipriani; and a “circular bas-relief allegorical of the Revolution of King William III” and a “terra-cotta of the death of Hector.”

A large number of the original models of Banks’s monuments were sold, including those of Sir Eyre Coote, Earl Howe and “Captain Cook, never executed,” and “an original model for a monument to Lord Chatham, a great composition of five figures, modelled at Rome. N.B.—This model arrived in England too late for the decision of the Judges.” (Archives of Messrs. Christie.)

The original terra-cotta busts of Warren Hastings and Mr. Schroeter belonged to William Tassie and were lots 207 and 208 in his sale held by Mr. Christie on 12 July, 1805.

1804 William Woollett
BARNARD, JOHN
fl. 1760–1762

He was “under twenty-two and trained by his father when, in 1760, he received a premium from the Society of Arts for a model of ornaments in clay” (Archives, Society of Arts). Two years later he exhibited at the Society of Free Artists a “model in clay, piece of flowers” and “piece of ornament with two swans.”

Graves, in his List of Exhibitors, wrongly gives Barnard’s initial as “P.”

BARRATTA, JOSEPH

At the sale of a “Gentleman” held by Mr. Christie on 25 April, 1804 one of the lots was his “beautiful whole length statue of the Great Duke of Marlborough in the character of Mars, executed for his youngest daughter Lady Mary, who was married to the Duke of Montagu. It was lately the ornament of the Hall of Entrance at Ditton Park.” The statue fetched 180 gns. (Archives, Messrs. Christie.) There are a number of Italian sculptors called “Barratta” or “Baratta” and I am uncertain which carved this statue, though it may possibly be Giovanni Di Issidoro Baratta (1670–1747).

BARREL, or BARRELL, HENRY
fl. 1775–1805

In 1775 he received £85 from Lord Radnor in part payment for the “capitals of the chapel columns” at Longford Castle (Archives, Earl of Radnor). In 1777–1778 he was paid £72 10s. for “statuary work” at Guy’s Hospital on the central building. This work included “12 faces” (£50) and “5 pattern’s for ye frieze” (£6 6s.) (Archives, Guy’s Hospital). In 1780 he was paid £138 for the carving in the library, dressing-room and drawing-room at Gorhambury, Herts (Hertford County Archives, B.12). Between 1786 and 1791 he was working at the “new building next the Admiralty,” receiving £139 for wood-carving and chimney-pieces. The latter came from a demolished house at Blackheath belonging to Sir Gregory Page, so Barrel only had to reset most of them, though he did recut one (P.R.O., Ad. Ms. 17/1).

From 1788 until 1805 he was employed by Sir John Soane on mason’s work at the Bank of England, where he did a great deal of ornamental stone-carving. In the former year he was paid £4 for a mask-head and, in 1789, £75 for four Corinthian capitals, besides other sums for carving various roses, honeysuckles, runs of moulding, etc., in stone. In 1798 Barrel made for the same architect chimney-pieces for the offices of the Commercial Commissioners at 7, Austin Friars (Soane Note-books, Soane Museum).
BARRETT, B., of London
He carved the monument, designed by L. N. Cottingham, erected to the memory of Lady Boothby, 1838, at Ashbourne, Derby.

BARRETT, G.
fl. 1846-1849
In 1846 he exhibited "Mercury and Pandora" at the Royal Academy, and three years later showed "Mercury and Argus."

BARRETT, JAMES, of Norwich
fl. 1728-1732
He signs the monument to Augustine Curtis (q.v.), 1732, in St. Peter Mancroft, Norwich. This work, which is about 8 ft. high, takes the form of a central Corinthian pillar with a curtain behind it, while to left and right hang curtains supported by cherub-heads. The unusual and curious design almost exactly resembles that of the monument at Dersingham, Norfolk, to Mrs. Hodgson, 1743, though here the statuary was Francis Stafford (q.v.). Barrett also signs the monument to George Warren, 1728, at Horstead, Norfolk.

BARTOLI, DOMINICK
fl. 1764-1813
Bartoli was a worker in scagliola who was employed at Gorhambury, Herts, where in 1785 he was paid sixteen guineas (Hertford County Archives, MS. XI. 71). He later went to the Earl of Darnley's seat at Cobham, Kent, receiving, in 1793, £301 for the twenty-four pilasters and the frieze in the Great Hall (Archives, Earl of Darnley). He also worked at Stowe, and here he was responsible, not only for the beautiful scagliola columns in imitation of Sienna marble for the music-room, but also for those in imitation jasper for the saloon (Lipscombe's Buckinghamshire, Vol. III, page 90). According to Britton's Beauties of England (Vol. III, page 414) he made the pilasters of verd antique for the saloon at Kedleston, Derbyshire. (See also "Richter, John Augustus").

BARTOLINI, LORENZO
b. 1777, d. 1850
He was born at Voria in Tuscany and died at Florence. His "Venus" is in the Walker Art Gallery, Liverpool, and he also signs (in Greek) the monument with a fine relief which commemorates Sir Vyell Vivian, 1820, at Mawgan in Meneage, Cornwall. His bust of Master Henry Hope was formerly at Deepdene, Surrey, as was his "Venus Coming From the Bath." His bust of The Marchioness of Bristol is at Ickworth Park, Suffolk.

BARTON, WILLIAM, of Derby
In 1839 he exhibited various works at the Derby Mechanics' Institute, including a bust of John Gibson (q.v.), a greyhound in alabaster, and medallic portraits of Queen Victoria, Sir Richard Arkwright and the Rev. William Falkner.

BASTARD, BENJAMIN, of Blandford
b. 1698, d. 1772
He was born in 1698, the son of Thomas Bastard and Bridget Creech, and during his lifetime worked as a statuary, architect and builder. In the cloisters of Wells Cathedral is his large monument to Peter Davis, 1749, which is 14 ft. high, and consists of a cherub standing in front of a pyramid and leaning his elbow on a down-turned smoking torch. Bastard died in 1772 and was buried at Castleton, Dorset (Hitchen's Dorset, Vol. IV, page 205).

BASTARD, JOHN
b. 1687, d. 1770
His brothers were Benjamin (q.v.) and William (1689-1764), the builder of Blandford Church. John Bastard signs a large architectural monument, with a delightful circular relief of angels' heads at the base, to Henry Dirdoe, 1724, at Gillingham, Dorset.

BASTARD, JOHN, the Younger
b. 1722, d. 1778
He was the nephew of John (q.v.) and Benjamin Bastard (q.v.) and worked for Lord Winterton in 1764 and also at Stoneleigh Abbey.
In 1770 he made "126 bannisters" for Greenwich Palace, and between 1771 and 1772 received £1,081 for masonry-work on the south-west pavilion of King Charles's building. In the following year he was paid £686 for further work at the Palace, including a "run of very large, fully enriched Corinthian block cornice" (P.R.O., Ad. MS. 68/876).

BATCHelor, RICHARD, of Buckingham
fl. 1750-1760
In 1759 Mrs. Purefoy of Shalstone, Bucks,
signed an agreement with Richard Batchelor, of Buckingham, "mason and statuary," for a marble monument to herself, which was to be made in a "good, sound and substantial (sic), firm, neat and workmanlike manner." This monument, which was erected in Shalstone Church, is an architectural work with Corinthian capitals, and a broken pediment with a bust of Mrs. Purefoy in the centre. There were originally two cherubs on the pediment, but a nineteenth-century vicar, disliking their nakedness, caused them to be removed. The work cost altogether £98, of which £30 went on the carving of the "busto" (sic) and the "two boys" (i.e., the offending cherubs) in marble. As a mason, Batchelor was employed on repairs to Buckingham Church between 1754 and 1757 (Records of Buckinghamshire, Vol. XII, page 261, et seq.; C. Eland's The Purefoy Letters).

A "George Batchelor of Buckingham," who was working between 1825 and 1845 and may be a descendant, signs a number of small tablets in churches in the county, including those of Oakley, Padbury and Buckingham (Parish Church).

Another member of the same family may be John Batchelor of Oxford, who was born in 1734 and apprenticed to Jacob Hayfield, mason, of Oxford. He became free in 1762 (Oxford City Archives) and died in 1810 (Gentlemen's Magazine, 1810, page 91).

BATE, RICHARD, of Shrewsbury

Bate, who became a Burgess of Shrewsbury in 1814 (Town Archives), signs the large wall-tablet to the Birch family which was erected in 1823 in the village church at St. Martin's, Shropshire. At first sight this appears to be a typical London production of the late eighteenth century, and is interesting as showing how slowly new designs reached the more distant counties.

BATESON, WILLIAM, of York

In 1729 he made a chimney-piece for York Guildhall and in 1731 became, with his partner, William Ellis, master-mason for the York Assembly Rooms on the dismissal of Leonard Smith (q.v.). Bateson and Ellis took over the shell of the building and "worked all the columns," which were finished before the year was out, although the hall was not roofed until 1736. These columns, forty in number, with very fine Corinthian capitals, are closely spaced and divide all the four sides of the main room, or Egyptian Hall, from its aisles. A year later, besides executing a great deal of masonry-work, the partners carved "the cornice stone of ye Corinthian order," but for some reason or other they were not allowed to finish the building, which was completed by the reinstated Leonard Smith.

Bateson died some time before 1757, for in that year his widow, "Elizabeth Bateson, mason," took a Richard Waddington as an apprentice (York City Archives and Assembly Room accounts).

BAX, JOHN, of Deal

fl. 1830–1837

He signs two unexciting wall-tablets to Henry and Richard Harvey (erected c. 1830) and to Sir Richard Lee (d. 1837), both in Walmer Parish Church, Kent.

BAYES, ROBERT, of Kettering

fl. 1810–1845

The firm consisted of Robert Bayes and his son Joseph, who later succeeded him. They sign a wall-tablet with a semi-urn to Robert Stanley, 1821, at Weekley, Northamptonshire, and another in the form of a hatchment to the Rev. James Hogg, 1844, at Geddington in the same county.

BAYLIFF, —, of Kendal

In 1832 he made chimney-pieces for Mr. Dunsley's house at Micklegate Bar, York, including one of Italian marble for the drawing-room and another in black Kendal marble for the dining-room (Account-book of Peter Atkinson, architect, in private possession).

BAYLISS, EDWARD, of Helmdon

fl. 1738–1740

He signs an architectural marble monument with a broken pediment and well-carved details to Job Hamner, 1738, at Simpson, Buckinghamshire. In 1739 he was employed to set up at Shalstone in the same county the "turkey marble" chimney-piece which Mr. Henry Purefoy had bought from William Palmer (q.v.) (Eland's Purefoy Letters).

BAYLISS, NATHANIEL

At Flitton in Bedfordshire there is a wall-tablet to George Hadley, 1768, which is signed "Bayliss." This is probably Nathaniel Bayliss, who was working in the county at Woburn Abbey from 1762 until 1768 and who, according to the building account-books, died in 1768 (Bedford Archives). He is buried at Woburn.
BAZZANTI, PIERRE and NICHOLAS, of Florence 
fl. 1823–1843

Although there is no record that they ever came to England, the Bazzantis must have had English patrons, for there are several monuments by them in Britain. Those to Isabella Cave, 1827, at Henbury, Glos., and Mary Jones, 1829, at South Stoneham, Hants, are signed by Nicholas and both have reliefs in the classical tradition; the monument commemorating Lady Sophia Pierrpont, 1823, at Holme Pierrepont, Notts, is the work of Pierre. The model for this last-named work, and the correspondence concerning its dispatch to England, are in the possession of the Duke of Wellington. The letters are signed by Pierre Bazzanti and his partner, Joseph Moise, and their address is given as “près du Palais Corsini.”

Nicholas Bazzanti carved a marble statue of Orcagna for the Uffizi in 1843.

BEAL, F., of Barnstaple 
fl. 1790–1800

The best of his tablets, commemorating John Palmer, at Torrington, Devon, measures 10 ft. by 4 ft. and has an urn of coloured marble against a pyramid. Beal also signs tablets to Colonel M — (rest of name illegible), 1790, and Henry Tippitts, 1796, both in Barnstaple Parish Church.

BEAL, J., of Exeter 
fl. 1789–1793

His tablets, like those of F. Beal of Barnstaple (q.v.), are in marble and well carried out. Two of them commemorate the Rev. John Penneck, 1789, and William Harris, 1792, both at Gulval, Cornwall.

BEAL, JOHN, of Doncaster 
fl. 1713–1750

He became a Freeman of Doncaster on 19 September, 1713. In 1744 the Town Council decided that he should be employed to do “the inside masons’ work at ye Mansion House” which was then being built from Paine’s design. His son, John Beal, the Younger, became a Freeman on 28 December, 1742, and William Beal, presumably also a relation, on 1 October, 1750; both being described as “masons” (Doncaster Corporation Archives).

BEARD, THOMAS
b. 1727, d. 1803

He was the son of Robert Beard, a barber of Navestock, Essex, and was apprenticed to William Hoathly in 1739. He was afterwards turned over to William Spratt (q.v.) and became free of the Masons’ Company in 1747; he was later appointed Renter Warden in 1779, Upper Warden in 1780, and finally Master of the Company in 1781 (Archives, Masons’ Company). Beard, who took his son Robert as an apprentice in 1774, died in 1803 and was buried at Islington, where his tombstone describes him as “citizen and mason of London” (Nelson’s Islington, page 329).

He signs two large architectural tablets to Owen Phillips, 1748, at Haverfordwest, Pembroke, and Katherine Masters, 1760, at Meopham, Kent.

BEARD, WILLIAM 
fl. 1674–1680

In 1674 he was paid for work on the great model of St. Paul’s Cathedral (Wren Society, Vol. XVI, page 202) and, four years later, as a “stone-cutter of London,” he repaired “the breeches and decays in the Earl of Leicester’s and Ambrose Earl of Warwick’s monuments” in St. Mary’s Church, Warwick (Anon, Churches of Warwick, 1837, Vol. I, page 63).

Sir William Dugdale, the Garter King of Arms, in his diary (edited by W. H. Hamper, 1826, page 143) has “June 15th, 1680, delivered to Mr. William Beard, stone cutter, the summe of ten pounds in part of the summe of £20 for a monument of white marble for Mr. Edward Bonham, which summe of £20 Mrs. Eliz. Dike is to pay to my son at Coventre.” This monument is in Ryton-on-Dunsmore Church, Warwickshire.

It was presumably his son, another William Beard, who was apprenticed to Edward Pearce (q.v.) in 1686.

BEATTIE, WILLIAM 
fl. 1829–1864

He exhibited at the Royal Academy, 1829–1864, and at the British Institution, 1834–1848, his work including busts, chased silver medallions, and a bronze statue of Lord Bacon. At the Great Exhibition of 1851 he showed a vase with a statuette of the Prince Consort, which was 4 ft. high and made of solid silver.

In 1855 Beattie exhibited “A Group of Boys” at the Birmingham Society of Artists; his bronze statuette of Newton is at Windsor Castle. He was also employed by the firm of Wedgwood, modelling for them “The Finding of Moses,” “The Flute Player,” and statuettes personifying England, Scotland, Ireland and America (Wedgwood Archives).
BEAUCHAMP, EPHRAIM
b. 1660, d. 1728

He was made free of the Masons' Company in 1684, and later became Renter Warden in 1697, Upper Warden in 1698, and Master in 1701. Beauchamp and his partner, Christopher Kempster (q.v.), were the master-masons responsible for a great deal of building and carved stonework at St. Paul's between 1691 and 1707, while in 1699 Beauchamp was working at Greenwich Palace, either as partner or assistant of Edward Strong the Elder (q.v.). He was also employed at St. Dunstan's-in-the-East in 1696, and at Sir Edward de Bouverie's London house two years later (Longford Castle Archives).

Beauchamp seems to have retired from business and left London in 1708, for in that year his address is given as "Tottenham High Cross" in the Court book of the Masons' Company. He was buried in All Saints' Church, Tottenham, where his tomb bore a long inscription stating that he died on 16 September, 1728, that he was for many years one of the Governors of Christ Church, Bethlehem and Bridewell Hospitals, and that his widow, Laetitia, daughter of John Coppin of Pullox Hill, Bedford, died in 1739, at the age of seventy-two (Cansick's Epitaphs, Vol. III, page 53).

A Thomas Beauchamp built Founders' Hall, 1669-1671 (Archives, Founders Company).

(Wren Society's Publications.)

BEAUPRÉ, —
fl. 1764-1783

Beaupré was a Frenchman who "came over to try his fortune in England" and lived for a time in Covent Garden (Angelo's Reminiscences, Vol. I, page 113). He exhibited various works at the Society of Artists, 1764-1767, and at the Free Society in 1766 showed "a sketch for a monument to Mr. Churchill."

In the same year, under the direction of J. Wilton, R.A. (q.v.), he executed a lead statue of George III, which was erected by Princess Amelia, the King's sister, in Berkeley Square. According to J. T. Smith (Vol. II, page 112), Beaupré was an excellent carver of flowers and had been recommended to Wilton by the French sculptor Pigalle, under whom Wilton had studied in Paris. To be a carver of flowers, however excellent, does not necessarily mean that a sculptor can execute a successful equestrian statue in lead, and though this was much praised at the time it was in a state of collapse by 1827 and had to be supported with props. Shortly afterwards it was removed and presumably melted down.

In 1777 Beaupré went to Dublin, where he remained for six years. He does not seem to have exhibited in Ireland, and no work by him is known there (Strickland's Dictionary of Irish Artists).

BEAUCLERK, G.
fl. 1848-1851

In 1848 he exhibited at the Royal Academy "Cupid and Psyche," while at the Great Exhibition of 1851 he showed "A Female Figure on a Couch" and "A Sleeping Nymph."

BEDBOROUGH, JAMES,
of Windsor
fl. 1808-1830

He was much employed at Windsor Castle under Wyatville, becoming chief mason in 1808 on the death of John Slingsby (q.v.), and thereafter describing himself as "statuary and stonemason to His Majesty." He received £1,042 for building part of the terrace walk at Windsor in 1810, and two years later constructed the Royal vaults beneath St. George's Chapel, for which he was paid £3,626 (P.R.O. A.O.1/2501).

Bedborough signs a few tablets, including those commemorating John Mackie, 1818, at Felham, Middlesex; Henry Neech, 1823, in Windsor Parish Church; Maurice Swaby, 1826, at Langley Marish, Bucks; and Mrs. Wagstaffe, 1826, at Horton, Bucks.

BEDFORD, J., of London
fl. 1821-1864

He was a popular monumental mason with a yard at 256, Oxford Street, and though most of his work is apt to be obvious and conventional in design on a few occasions it is not too unfortunate. His monument commemorating William Tallents, 1837, at Newark, Notts, has a well-cut portrait relief, and he also signs three Naval ones, to Edward Long (died 1809, though the memorial was erected later) at Seale, Hants; Mrs. Dawson, 1843, at Barnes, Surrey; and Captain Ellicke, 1853, in Hampton Parish Church. The first two respectively have reliefs of the wreck of the Isis and a mourning naval officer, while the Ellicke monument shows the figure of the Captain in full naval uniform, standing against a white ensign, his telescope tucked under his arm and his cap at his feet.

Other signed works by Bedford include those to John Hope, 1821, at St. Ewe, Cornwall; Sir Thomas Metcalfe, 1822, at Winkfield, Berks; Sarah Bedford, 1832, at Penzance, Cornwall; Sir
Richard Jones, 1835, at Broadwater, Sussex; Sarah Bott, 1836, at Bromfield, Salop; Harriot Cotton, 1837, at Birchington, Kent; Jane Bonnell, 1841, at Walthamstow, Essex; Sir Edward Page-Turner, 1846, at Bicester, Oxon; Francis Price, 1853, at Overton, Flint; Sophia Greaves, 1857, at Tooting, Surrey; the Officers and Men of the 84th Regiment, 1859, in York Minster; and Arthur Saltmarsh, 1864, at Howden, Yorks. Bedford’s monument to Earl Grey, 1849, at Howick, Northumberland, was designed by J. Francis (q.v.).

BEHNES, WILLIAM
b. 1795, d. 1864

There seems to be some confusion about the date of Behnes’s birth, for the D.N.B. and his obituary notice in the Art Journal both say it is unknown, while Redgrave in his Dictionary of Artists gives it as “before 1795.” Behnes himself, however, gave his age as eighteen when he joined the Royal Academy Schools in 1813, so we may take it that 1795 is correct.

He was born in London, the son of a pianofortemaker from Hanover and his English wife. The elder Behnes had come to London when his apprenticeship in Germany had ended, probably because he already had a link with Britain, for his elder brother had joined the British Navy and served as a surgeon in H.M.S. Cumberland. When William was quite young the family went to live in Ireland. Here the father, assisted by his sons, worked at his craft, though William himself was never happy unless he had a pencil in his hand and spent his spare time in a public drawing-school, where he distinguished himself by the accuracy and finish of his work.

Piano-making in Ireland, however, did not prove a paying proposition, so the family returned to England and settled near the Tower of London, where they still continued with the manufacture of musical instruments. In 1812 they moved again, this time to Charles Street, near the Middlesex Hospital. William and his brother Henry (who later changed his name to Burloe, q.v.) had in the meantime continued to study art, and in 1813 the former joined the Royal Academy Schools. In his spare moments he painted portraits on vellum which, according to the Art Journal (1864, page 83), were “among the most beautiful we have ever seen on that material.”

In the same house in Charles Street lodged the sculptor, P. F. Chenu (q.v.), whom William and Henry used to watch at work. Seeing that he had a considerable practice and a number of clients, they decided to adopt the same profession, although towards the end of his life William sometimes regretted his choice and was heard to say thoughtfully: “I should like to paint a picture before I die.”

In 1816, 1817 and 1819 Behnes won Silver Medals at the Royal Academy. He also received a Silver Medal from the Society of Arts in 1814, and, in 1819, was awarded the Society’s Gold Medal for inventing “an instrument for transferring points to marble” (Archives, Society of Arts). He first exhibited at the Royal Academy in 1815 when he showed a bust of a Mr. Badger; after that date success came swiftly to him and in three years he was an established and sought-after artist. One of his earlier patrons was Barrington, Bishop of Durham, of whom he made a bust in 1818. This led to other commissions from the County Palatine, including one from Lord Durham for a statue of his son, the “Master Lambton” of Sir Thomas Lawrence’s famous picture.

Work now came in so fast that Behnes felt he was justified in moving to larger premises and bought a house in Dean Street, Soho. This was a fatal mistake, for the building was totally unsuited to his purpose and it was the expense incurred in trying to adapt it, and in building on a modelling room high enough to admit statues of heroic proportions, that crippled him financially. His extravagant habits caused him to fall into the hands of moneylenders, and he later began to neglect his pupils and be off-hand with his clients. Nor was this all, for the Art Journal hints darkly that “his moral reputation began to suffer from irregularities which mark a man even among the ‘indifferently honest’” (1864, page 83).

In 1829 Behnes received a contract for a group of figures in Roche Abbey stone for the clock-tower of Buckingham Palace, the amount being £700 (P.R.O. Works 19/3). In 1837 he was appointed Sculptor in Ordinary to the Queen, probably because he had already executed a very successful bust of her in 1828 (a plaster-cast of which is in the Bethnal Green Museum). The appointment, however, was purely honorary and did not produce a single Royal commission, although before that date he had executed busts of the Duke of Cumberland, Prince George of Hanover, the Duchess of Cambridge, the Duke of York and the Duchess of Kent. In 1843 he carved the head of “Queen of Beauty,” the horse ridden by Lord Seymour in the Eglington tournament (Illustrated London News, 30 September, 1843).

Behnes’s last years were sad. His financial troubles grew worse, and in 1861 culminated in a bankruptcy which swept from him all his belongings and mementoes of a lifetime. He was forced to move to miserable lodgings in Charlotte
Street, but later fell ill and died in the Middlesex Hospital on 3 January, 1864, indeed, according to S. C. Hall’s account he was “Found one night literally in the gutter with threepence in his pocket, somewhere close to the Middlesex Hospital” (S. C. Hall, *Retrospect of a Long Life*, Vol. II, page 238).

He was buried in Kensal Green Cemetery, and a Committee was formed, with George Cruikshank as secretary, to raise money to erect a monument and bust over his grave and to present a bronze bust to the National Gallery. Later, in 1864, however, the *Art Journal* regretted that “the fund was not making the progress it deserved” and part of the scheme was afterwards abandoned.

Behnes was a great artist. He was particularly successful with busts; indeed, the *Art Journal* considered that they had “never seen anything finer in modern or ancient art” than his bust of Clarkson, while H. Weeke’s (q.v.), when lecturing on art, was inclined to rate him as the superior of Chantrey in the field of portrait sculpture. The reliefs on some of his monuments at times reach the highest level of true art, and no one who sees the memorial to Mrs. Botfield at Norton, Northamptonshire, can fail to be moved by the figure of Beriah mourning by his mother’s coffin. The figure is not only superbly carved, but conveys the grief of a son for the death of a beloved mother in a finer, nobler and more touching manner than any other monument in England.

Behnes’s statues, with the exception of his Dr. Babington in St. Paul’s, are less happy. For his statue of Sir Henry Havelock in Trafalgar Square he relied on a photograph to obtain a likeness, the first time that photography had been used for such a purpose.

Behnes exhibited at the Royal Academy, 1815–1863, and at the Great Exhibition of 1851 showed his colossal statue of Sir William Follett and a figure of Lady Godiva. To the International Exhibition of 1862 he sent his “Cupid with Two Doves.” He also modelled a work in mezzorelief, with half-sized figures, illustrating Shakespeare’s “Seven Ages of Man,” which, according to Palgrave (*Essays on Art*, page 221), was “of great ingenuity and beauty, but never produced in marble.”

BELL, ALEXANDER,
of Newcastle-upon-Tyne
fl. 1764-1778

From 1764 until 1768 he was employed at Seaton Delaval House, returning there in 1776 to build the mausoleum which took two years to complete. He also received £211 for the carved stonework, the capitals of the columns costing £7 4s. each and the frieze around the entrance-door £15 3s. 8d. (Archives, Lord Hastings).

BELL, JOHN
b. 1812, d. 1895

According to the D.N.B., Bell was born in 1811, but in the 1862 edition of Men of Our Times (of which he presumably saw the proof) it is stated that he was born a year later. His birthplace was Hopton in Suffolk, and he was educated at the village school of Catsfield in Norfolk. He attended the Royal Academy Schools in 1829 on the recommendation of H. Sass, and in 1833 won a large Silver Medal from the Society of Arts for a model of a bust. In 1839 he competed for the Nelson memorial, but his design was rejected and he afterwards presented it to Greenwich Hospital.

In 1844 Bell sent his statues of “The Archer” and “Jane Shore” to Westminster Hall. The former, which had already been shown at the Royal Academy in 1837, was described by the Literary Gazette (1844, page 466) as “a performance so striking and masterly that it at once fixes the attention, not only by the novelty of the subject, but by the ability of the treatment”; the latter, however, it considered “not so successful.” In 1848 the sculptor executed the figures on the Corn Exchange at Newark (Builder, 1848, page 391), and also designed a number of objects for the exhibition of “British Manufacture and Decorative Art.” These included fish-knives, a door-stop in the form of Cerberus, and a match-box in the shape of a Crusader’s altar-tomb, which even moved the Art Union to remark that they “were unable to appreciate it.”

Bell had first exhibited at the Royal Academy in 1832, when he showed a religious group. Ten years later came his “Babes in the Wood,” which was a great success and caused the Art Union (1842, page 128), to say of the sculptor: “His mind is deeply imbued with poetic feeling, he is one of the few artists who attempt higher efforts than mere busts.”

His best-known work in London is the Crimea monument of the Brigade of Guards at the junction of Pall Mall and Waterloo Place. The work soon came to be known somewhat irreverently as “The Quoit Player,” from the figure of “Honour” with outstretched arms and a pair of coronals in each hand. On its unveiling in 1861 the Art Journal (1861, page 158) wrote regretfully: “We have tried in every possible way to like this work and consider it the right thing, but we have failed signally.” Another critic was more outspoken when he declared that it “looked best in a fog.”

Bell was employed by Blashfield (q.v.) from 1854 and in the following year modelled a figure of “Hibernia” for him, which was carried out in terra-cotta. His “Una and the Lion” was reproduced in miniature in “Parian” by Copeland. In 1845 he had designed for the Colbrookdale Company a fearsome object called “the deerhound hall table,” which consisted of four life-sized deerhounds, cast in iron and seated on their haunches, supporting a table decorated with “emblems of
the chase and with the leaves and fruit of the vine." This canine monstrosity, which was illustrated in the *Art Union* of 1845 (Appendix, page 6), had a great success and in the same year appeared at the Paris Exhibition. Nor do the statues of Queen Victoria and the Prince Consort "in bronze and ormolu," which the sculptor sent to the Great Exhibition of 1851, seem in better taste.

In 1858 Bell modelled heads of various animals which were cast in iron and used as part of the railings for the Metropolitan Cattle Market at Pentonville. Five years later he made a fountain for Kew Gardens with the figure of a child raising a shell to its lips. In 1859 he was awarded a medal by the Society of Arts for a treatise on "The Origin of the Principle of Entasis as Applied to the Obelisk," a form for which he apparently had a passion. The *Art Journal* of 1861 (page 30), comments on the fact that "Mr. John Bell, who has been eagerly and rather unaturally striving to erect an obelisk somewhere, is at length to be gratified. We are not sorry to say it will be placed far off, at Bermuda, to the memory of Sir William Reid." His model of "Peace," originally designed in 1876 for the main hall of the Foreign Office, was presented to the Guildhall in 1888.

As a monumental sculptor, Bell signs the tablet with a medallion portrait erected in 1868 to the memory of John Grome, the landscape painter, in St. George's, Norwich. He also exhibited "a monument to Miss Legard" at the Royal Academy in 1847.

He died on 14 March, 1895, at 15, Douro Place, Kensington, where he had lived for more than forty years. His early works of sculpture had shown vigour and imagination, but his later groups exhibited at the Academy were remarkable for nothing but bad taste and sickly sentimentality. Among these may be included "Cherub with Primroses" (1865), "Mother and Child" (1867), "The Last Kiss" (1868), and "The Dove's Refuge" (1871). They were much admired at the time and are typical of the work which has brought the sculpture of the late Victorian era so deservedly into disrepute.

*(Magazine of Art, 1894, page 16; authorities cited in text.)*

**BELL, LADY**

*d. 1825*

She was Maria, sister of William Hamilton, R.A., and studied painting under her brother and Sir Joshua Reynolds, many of whose works she
copied. These were much admired by the Gentleman's Magazine (1825, Part I, page 570), which considered them "the more valuable because they retain their fine colouring of which time has deprived the originals."

She later married Sir Thomas Bell, Sheriff of London, and exhibited at the Royal Academy in 1816 and 1819, showing pictures and, in the latter year, busts of her husband and daughter. She died on 9 March, 1825, in Dean Street, Soho.

**BELL, R.**

He signs a marble monument with a curved pediment, and a skull with bats' wings at the base, to Samuel Walford, 1746, at Stratford-on-Avon, Warwick.

**BELLAMY, THOMAS**

*b. c. 1699, d. c. 1754*

Son of Richard Bellamy, tailor, of St. Botolph's, Aldgate, he was apprenticed to James Paget or Padgett on 12 March, 1714, becoming free of the Masons' Company in 1721 (Archives, Masons' Company). His workshop was in Camberwell, but in 1754 he wrote to the Company asking to be allowed to resign from the post of Assistant to the Court, "being obliged, on account of my health, to live in the country."

Bellamy signs large architectural monuments to Sir Thomas Halton, 1733, at Long Stanton, Cambridgeshire, and to Sir Henry Fetherston, Bart., 1746, at Stanford-le-Hope, Essex. In 1753 he was employed at the house of James West in Lincoln's Inn Fields (Archives, West of Alscot Park).

**BENNIE, JOHN**

The Historical Manuscripts Commission in their seventh report (Part II, page 816) publish the articles of agreement between John Bennner and the Earl of Longford, dated 23 December, 1681, for casting four large and sixteen small statues for the Duke of Ormonde.

**BENNER, or BESNIE, PETER**

*d. 1693*

He was the brother of Isaac Besner, whom he succeeded as Sculptor in Ordinary to Charles I, for a Royal Warrant issued in 1643 orders him to "take into his custody and keeping all the moulds, statues and modell which were heretofore committed to the charge of Isaac Besner."

Peter lost his office during the Commonwealth, but in May, 1660, petitioned to be reinstated on the grounds that the late King had granted him the "place of sculptor to His Majesty" and the custody of his statues, etc., "but by reason of the most unhappy distraction befallen since, hee enjoyed not the same place, but was reduced into very great poverty and want through his faithfulness and constancy" (Calendar of State Papers Domestic, Charles II, Vol. II, page 66). Charles II granted his request and he held the post until 1692–1693. On 30 May, 1693, C. G. Cibber (q.v.) was appointed on the "decease of Peter Bennner" (Faber's C. G. Cibber, page 12).

Bennier signs the monument with a noble portrait-bust of Sir Richard Shuckburgh (died 1656) in Shuckburgh Church, Warwickshire. In 1655 he was employed at Lamport Hall, Northants, where he carved the shield-of-arms on the garden front of the house (Isham Archives).

**BENNIE, or BERNIER, THOMAS**

*b. c. 1663, d. 1693*

Vertue (Walpole Society, Vol. I, page 89) wrote of him: "Thomas Beniere is a curious ingenious Statuary. Born in England of French parents, his works in small in Marble from the Life or modell are very fine. The anatomy figure commonly seen at apothecary was from his Original model many other things are in the hands of the Curious of his doing, he was much imploied by Mr. Salmon for the wax work figures shown in Town. he us'd to cutt in Marble from the Life a Portrait for 2 guineas, being industrious & young & very quick at his work. he livd & died near fleet ditch aged about 30 ano 1693. (Buried in Black Fryers. St. Annes Sep. 18. 1693)."

**BENNISON, A., of Hull**

*ft. 1790–1821*

His yard was in Mytongate in Hull. He signs monuments to Sir James Pennyman, Bart., 1808, at Stainton, Yorks, and to Henry Legard, 1819, and William Williamson, 1821, at Kirk Ella in the same county.

**BERCHETT, or BURKETT**

*ft. 1692–1706*

He did a good deal of work for Chatsworth, and in 1692, with his partner Carnall, supplied busts for the great hall. In the following year he and another partner, Mr. Finch, made the bases for the west terrace on which C. G. Cibber's (q.v.) sphinxes now stand, and in 1694 they executed a marble basin for the Great Stairs (Francis Thompson's A History of Chatsworth).

Bercett later worked at the Inner Temple, and in 1706 received £21 10s. for "the eight figures at

BERNASCONI, FRANCIS
fl. 1800–1835

He may have been a son of Bernato Bernasconi, who was employed as a plasterer by the second Earl Verney at Claydon Hall, Bucks, between 1770 and 1784. Bernato seems to have settled in the county, for it is as “a poor man with a large fameley (sic) in the town of Buckingham” that he asks to be paid by Lord Verney, who was then on the verge of bankruptcy (Verney Archives).

Francis Bernasconi was mostly employed on scagliola work and decorated the Royal Palaces and many of the great houses in London and the country. Under Wyattville he worked at Windsor Castle, where in 1805 he was paid for “Gothic elliptical arches, elliptical soffits, Gothic compos mouldings, twelve enriched spandrels, the Royal Arms, thirteen angels with plain shields, etc.” (P.R.O. Works 5/59). Between 1800 and 1809 he received a total of £1,556 for plaster-work, Gothic mouldings, etc., at Cobham Hall (Earl of Darnley’s Archives). In 1813–1815 he was paid £879 for work at Ashridge Park (Archives, Lord Brownlow). In 1810 he repaired with Roman cement the east side of the great court of Trinity College, Cambridge, while five years later John and Peter Bernasconi (who one imagines were his brothers) agreed to cover the exterior of Jesus College with the same material (Willis and Clarke’s Architectural History of Cambridge, Vol. II, pages 147 and 420). In 1816 Bernasconi was at Chicksands Priory, where he made Gothic ornaments (Notebook, Soane Museum). Between 1814 and 1818 he repaired the figures on the screen at York Minster (Allen’s Yorkshire, Vol. I, page 284), and, in 1819, the canopy of Wolsey’s statue at Christ Church, Oxford (Hiscock’s A Christ Church Miscellany, page 206). Among 1820 he modelled four groups, designed by Stothard, for the grand staircase at Buckingham Palace, and, in the same year, repaired the sedilia at Southwell Cathedral, Nottinghamshire. In 1825 he executed the altar-piece for Westminster Abbey which “consisted of a series of shrines, or rather ornamental niches, canopied with a profusion of delicate tabernacle work” (Gentleman’s Magazine, 1825, Part II, page 226). He was also employed by The Duke of Bridgewater to decorate the chancel of Gaddesden Church, Herts, in 1817 (Archives, Lord Brownlow). As a plasterer, his contract (dated 1803, for £826) for stucco-work in “The Great Tower” of Westminster Abbey is in the Abbey Archives.

BEERY, JOHN, of Barnstaple
fl. 1755–1790

He carved a number of sundials for churches in Devon, the best of these being the elaborate one, dated 1757, above the south door at Tawstock Church. Berry, who was later assisted by his son Thomas, signs a tablet to John Thorn, 1763, at Marwood in the same county.

BIDFORD, —

He signs a marble tablet in the form of a curtain, bunched and cored at the corners, to William Smith (d. 1818) at Alcester, Warwickshire.

BIELFIELD, C. F.
fl. 1821–1832

He received a Silver Isis Medal in 1821 from the Society of Arts for an “original bust.” He exhibited at the Royal Academy in 1832 a “medallic portrait of J. Thrupp.”

BIENAIME, ANGELO
fl. 1829–1851

He was born at Carrara and had studied under Thorwaldsen before he came to London about 1828. In the following year he showed busts of Sir Astley and Lady Cooper at the Royal Academy, and in 1838 exhibited a statue of “Innocence Lamenting the Loss of Her Dove.” Another statue “Innocence” had been commissioned in Italy by the Marchesa Somareva, but was unfinished when she died and was accordingly sent over to London. It was exhibited at the Colosseum in Regent’s Park in 1829 and was later bought by Sir Matthew Ridley. At the Great Exhibition of 1851 Bienaimé showed his “Love Triumphant.”

The sculptor’s “Recumbent Bacchante” is at Powerscourt, Ireland, and was executed in 1836, a replica being made in the following year for the Emperor of Russia. Bienaimé also made another replica later for his patron, Sir Augustus Clifford, for whom he carved statues of “Narcissus” and “The Four Seasons,” as well as six marble vases for Clifford’s house at Westfield, in the Isle of Wight (Privately printed description of Westfield, 1862).

For the Duke of Devonshire he made eight statues and two vases which are now at Chatsworth. His signed bust of Sir Robert Peel (c. 1840) is at Felbrigg Hall, Norfolk.

BIGÉE, NICHOLAS
fl. 1705–1712

In 1712 he and his partner, John Woodward, carved the two eagles on the gate adjoining the

Bigé signs two monuments at St. Leonard’s, Buckinghamshire; the first, erected in 1707, commemorating Mr. and Mrs. Seth Wood, and the second their son, Colonel Cornelius Wood, who died in 1712. The Colonel’s monument has a portrait-bust set against a great baroque trophy-of-arms, in the centre of which is Hercules’s club, crowned by a plumed helm. A curious feature is provided by the skulls with bats’ wings, placed on either side of the trophy, and holding in their teeth heavy fringed curtains which fall in thick folds.

**BIGGS, JOSIAH, of Bath**

*fl. 1821–1840*

He was a minor local statuary whose tablet to Theodore Haultain, 1832, in St. Mary’s, Bath, is inscribed: “This marble came from Pompeii.” He also signs tablets to Thomas Morgan, 1821, at Hinton Charterhouse, Somerset; the Rev. Benjamin Richardson, 1832, at Farleigh Hungerford, Somerset; William Whipham, 1835, at Calne, Wilts; and Susanna Manifold, 1836, at Brackley, Northants.

**BIGGS, RICHARD, of Bath**

*fl. 1744–1758*

He was apprenticed to his father, Richard Biggs, of Bath, in 1735 and became free in 1744 (Bath Corporation Archives). He signs a tablet in Bath Abbey to Sir Everard Fawkener, who died in 1758.

The younger Biggs also worked in London, for in 1749 he was employed as a mason at St. Bartholomew’s Hospital (Hospital Archives).

**BIGGS, WILLIAM, of Bath**

*fl. 1732–1764*

He was employed on the new buildings of St. Bartholomew’s Hospital between 1731 and 1739 and was responsible for most of the carved stonework. He also executed three chimney-pieces for the “Great Room,” for which he received £68 in 1734 (Hospital Archives).

Biggs was living at Monkton Combe, near Bath, and gave Ralph Allen as his security when, in 1741, he was engaged by John Wood for the building of Bristol Exchange. He continued working there until 1744, but does not seem to have given entire satisfaction for, as early as 4 September, 1741, “being summon’d to attend the Committee, Mr. Wood told him great complaints were made of his work and admonished him to keep strictly to his contract” (Exchange Minute Book, Bristol Archives).

Another member of the same family was Benjamin Biggs, who was the mason responsible for building Bath Guildhall, 1760–1770.

**BINGHAM, EDWARD, of Peterborough**

*d. 1796*

In 1750 he carved chimney-pieces for Lord Fitzwilliam at Milton Hall (Fitzwilliam [Milton] Archives), while in 1773 he was employed under Sir William Chambers on marble carving for the same house (R.I.B.A. Library, Chambers’ Correspondence).

Bingham was an excellent provincial statuary, producing architectural monuments and tablets in coloured marbles. He died on 16 July, 1796 (*Gentleman’s Magazine*, 1796, page 621).

**MONUMENTS**

1751 Stamford (All Saints) Mr. and Mrs. Denshire
1751 Titchmarsh, Northants Colonel John Creed
1754 Gamlingay, Cambis Ralph Lane
1756 Oundle, Northants Jane Squire

1767 Peterborough (Cathedral) Richard Tryce
1767 Clinton, Northants James Edings
1769 Grantham, Lincs Edmund Turner
1771 Sleaford, Lincs Richard Moore
1782 Stamford (All Saints) George Denchyre
1783 Peterborough (St. John’s) William Bowker
1786 Peterborough (St. John’s) Rev. John Image
1788 Peterborough (Cathedral) William Gery
1788 Stamford (St. Martin’s) John Truman
1790 Ufford, Northants Lord James Manners
1792 Clinton, Northants Richard Arnold
1793 Stamford (St. Martin’s) Henry Fryer
1795 Peterborough (St. John’s) Thomas Sambrook

**BINGHAM, JAMES, of Peterborough**

*fl. 1800–1820*

Presumably the son or grandson of Edward Bingham (q.v.), he signs a tablet to William
Harper, 1803, in St. Martin's, Stamford, and a ledger to Eleanor Wing, 1816, at Sedgbrook, Lincolnshire.

**BINGLEY, JOHN,** of London  
fl. 1773–1802

About 1790 he went into partnership with J. C. F. Rossi (q.v.) and together they executed a number of works in terra-cotta. The partnership, however, does not seem to have been a success and was later dissolved (for details, see under "Rossi, J. C. F."). In 1796 he was paid £145 17s. for chimney-pieces by the Duke of Bridgewater for Cleveland House, London; they included a marble reeded one (£46 15s.) for the drawing-room and a dove-grey marble one (£18) for the ante-room (Archives, Lord Brownlow).

In 1801 Bingley was working for Mr. Henry Peters, carving a veined marble chimney-piece, inlaid with black marble, for the latter's country seat at Betchworth Castle, Surrey, and another marble one costing £38 for his London house in Park Street (Notebooks, Soane Museum). In the following year he was employed by Lord Radnor at 6, Grosvenor Street (Longford Castle Archives).

Bingley, whose studio was in John Street, Tottenham Court Road, signs monuments to Mark Darker, 1773, and John Darker, 1784, both in St. Bartholomew's the Less; Jacob Evelyn, 1793, at Godstone, Surrey; James Blicke, 1793, in Twickenham Parish Church; and John Davenport, 1796, at Teddington, Surrey.

**BIRCH, ROBERT**  
fl. 1726–1747

In 1746 he made marble chimney-pieces for Welbeck Abbey, including those for the Duke's bedroom and dressing-room, and for the Duchess's bedroom. In the following year he supplied three more for the same house (Welbeck Abbey Archives).

**BIRCH, WILLIAM**  
fl. 1749–1751

In 1749 he received over £1,000 or mason's work at Welbeck Abbey, while two years later he was paid a further £944 for building the riding-house, stables, etc. (Welbeck Abbey Archives).

**BIRD, EDWARD CHAPMAN**

From his names he would appear to have been the only son of Francis Bird (q.v.), whose father-in-law was Edward Chapman; if so, he was born about 1716, as we know that when Francis died in 1731 he left a son aged fifteen. E. C. Bird became as "a mason" bankrupt in 1770 and a sale of his stock-in-trade was held at his yard at Millbank on 4 April, 1771, by Mr. Christie. Among the lots sold were a "Head of Venus"; reliefs of "The Crucifixion" and the "Death of Lucretia" and "Sicilian Jasper marble tablets." As a number of marble chimney-pieces, marble vases, etc., were sold it seems as if Bird must have had a considerable business.

**BIRD, FRANCIS**  
b. 1667, d. 1731

He was born in the parish of St. James's, Westminster, and, when he was about eleven years old, was sent to Flanders, where he studied under the sculptor Cozins. He then went on to Rome and worked in the studio of Le Gros, but returned home about 1689, though he had been so long abroad he found he could hardly speak English. In London he worked under Grinling Gibbons (q.v.) and C. G. Cibber (q.v.), but after a few years went back to Rome for a further nine months' study under Le Gros.

Bird, who was again in England by 1700, is best known for his work at St. Paul's Cathedral. In March, 1706, he was paid £329 for the panel over the west door, and, in December of that year, £650 for carving the "Conversion of St. Paul," 64 ft. long and 17 ft. high, for the great pediment. This contained "eight large figures, six whereof on horseback and several of them two and a half feet imbot" (Wren Society, Vol. XIV). Between 1712 and 1713 he executed the two panels over the west portico for £339, but it was not until 1721 that he carved the statues of various apostles and evangelists (each nearly 12 ft. high) for the west front and south side of the Cathedral. For these he received a total sum of £2,040 (Wren Society, op. cit.).

Between 1711 and 1712 Bird made a marble statue of Queen Anne to stand in front of St. Paul's. This work had a chequered career, for it was mutilated by a mad lascar (who considered it a reflection on his mother) in the eighteenth century and, though it was afterwards repaired by John Henning the younger (q.v.), by 1885 it had become very dilapidated. There was, however, little excuse for removing it in that year, and none at all for employing Mr. Richard Belt, one of the worst of the late Victorian sculptors, to make the "copy" which now stands in its place. Mr. Augustus Hare rescued Bird's original statue from the yard of the City's stone-mason and transported it with considerable difficulty to his house, Holm-hurst, near Hastings, in the grounds of which it still remains (Hare's Story of My Life).
Bird was also a prolific statuary and the "many lofty tombs and magnificent monuments in Westminster Abbey and other churches" (Gentleman's Magazine, 1731, page 83) for which he was responsible range from the vast erection commemorating the Duke of Newcastle in the Abbey, to the fantastic and macabre tablet, with its two skeletons tearing in half an ancient oak, to the memory of Elizabeth Benson in Shoreditch Church. This is unsigned, but is included in the list given by the sculptor to his friend, Le Neve, for the latter's Monumenta Anglicana. Many other monuments noted by Bird have been identified by Mrs. Esdaile (Antiquaries' Journal, Vol. XXII), while one which has been traced even more recently is that to the Rev. John Cawley. This, according to an MS. note made in 1751 by Richard Rawlinson in his copy of Le Neve (now in the library of St. John's College, Oxford), is at Henley, Oxfordshire.

Bird was for many years accused of having executed the monument to Sir Clodyssey Shovel in Westminster Abbey. All writers on the Abbey have attacked it; the D.N.B. considers it "one of the worst works in the world"; it often gave Addison "great offence"; while Horace Walpole wrote of it that "Bird bestowed busts and bas-reliefs on those he decorated, but Sir Clodyssey Shovel's and other monuments by him made men of taste to dread such honours." Because nobody has ever had a good word for the monument, writers on English sculpture have hastened to condemn other works by Bird, but the main reason for these attacks now no longer holds good, for the late Mrs. Esdaile's researches have proved conclusively that the work is not Bird's, but was carried out by Grinling Gibbons. Henrietta, Countess of Oxford, mentions Bird's monument to John Holles, Duke of Newcastle, also in Westminster Abbey, when in 1742 she writes to her trustee, Mr. West, that she thinks "the model of my father's monument may sometime hence be properly disposed at Welbeck" (Archives, West of Aiscton Park).

Lot 412 at Sotheby's sale on 6 November, 1951, was an undated letter to Bird from Alexander Pope ordering a monument to be erected to his father who had died in 1717. This was to "be entirely white marble," and the poet also indicated on the scale drawing the inscription he wanted. This tablet is in the north gallery of Twickenham Parish Church.

In the minute book for the building of Greenwich is "April 5th, 1718, resolved that the great marble block, bought by the Hospital some time since, should be cut into a statue of King William and that Mr. James do write to Mr. Bird the statuary to attend here next Board Meeting." Bird attended on 19 April and brought a sketch, but the work was never carried out (Wren Society, Vol. VI, page 71).

At Christmastide, 1729, Bird had a serious accident. He was coming out of a tavern near his home one frosty night when he slipped and broke his leg, and this was badly set by the surgeon. In January, 1730–1731, "he became swelled, his body and legs like a dropsy and this continued to his death on 27 February, 1730–1731, aged sixty-five. He was buried in a vault in the church of St. Andrew's, Holborn," (Walpole Society, Vertue Notebook, Vol. III, page 49.) He left a considerable sum of money and also an estate near Windsor, which he had inherited from his father-in-law, Edward Chapman (q.v.). Of his six children, five were daughters, the only son being fifteen at the time of his father's death.

Bird's workshop was in Lincoln's Inn Fields. Many years after his death a mason named William Green wrote to Lord North in 1770, with reference to recutting an inscription on a monument at Amesbury, Wiltshire. Green asked a penny a letter and undertook for this price to do it "as it should be done, which is what ye old one never was, nor indeed was any of those things performed as they ought to be in Mr. Bird's shop from my knowledge" (Bodleian, MS. North, C.11, F.222).

For some reason or other the sale of Bird's belongings was not held till twenty years after his death. The auction took place on 30 April, 1751, by Langford of Covent Garden. Many of the lots were prints, drawings, etc., but among the models sold were those of the monument of Congreve in the Abbey and the statue of Queen Anne outside St. Paul's.

**BIRD or BYRD, WILLIAM, of Oxford**

*B. 1624*

He was born in 1624 in the parish of St. Nicholas, Gloucester, and was baptized in the church on 1 June of that year (Parish Registers). When he gave evidence in a lawsuit on 7 June, 1681, he told the Court his age and place of birth, and also that he "had worked in Oxford for thirty-four years"; that he was "an accepted Mason and served an apprenticeship of eight years to one Walter Nicholls, of Gloucester, an accepted mason"; and that, since he had been "a Master Workman," he had "in diverse Counties work'd several noble buildings too many to be here mentioned and lately in Oxford he built the Arch at New College and Edmund, Hall Chappell." He also mentioned that he was responsible for the "dorcasa of the Divinity School" and for a chimney-piece "of Burford stone in Mr. Lentall's house at Hasely" (University Archives, Vice-Chancellor's Court, 1681, Mich.).

At "the latter end" of 1658 Bird discovered the art of "paynting or stayning of marble." He presented specimens of his work to Charles II and his Queen when they visited Oxford, and to Cosmo, Prince of Tuscany, when he came to the city in 1669 (Wood's Life and Times, Vol. I, page 241).

In 1659 he made a sundial for All Souls, and in 1665 and 1670 was working at Christ Church, first carving the Royal Arms for the Canons' lodgings, and later a statue of Mercury (Hiscock's A Christ Church Miscellany, page 201). In 1664 he was paid £11 7s. for restoring the monument of William of Wykeham at Winchester (Kirby Annals of Winchester College, page 333). Between 1666 and 1667 he received £307 for all the stone-carving at the Sheldonian Theatre and was also paid for making a model of the building (Vice-Chancellor's Accounts).

In 1668 payment of £24 0s. 6d. was made to Bird "for repairing and setting up the remainder of the marbles given by my Lord Howard and Mr. Selden," and he also received £28 15s. 0d. for the two inscriptions intended for them (Vice-Chancellor's Accounts). This, of course, refers to the Arundel Marbles. For the Ashmolean he carved "the coat of arms of the founder, twelve terms, trophies, the King's arms and six cartouches in the front" (Vice-Chancellor's Accounts, 1679–1682). On 19 November, 1683, he signed a contract with Sir Christopher Wren, under which he agreed to execute carved stonework at Winchester Palace (Wren Society, Vol. VII, page 34–36).

Bird's monuments are important, especially that commemorating Brideoake, Bishop of Chichester, 1678, in St. George's Chapel, which has a life-size figure in full vestments. His monument to the Fettiplace family, 1686, at Swinbrook, Oxon, is a curious work, apparently based on an earlier one in the same church, with life-sized effigies of three of the Fettiplaces lying one above the other on shelves, for all the world as if they were in bunks on board ship.

Other monuments signed by Bird include those to M. Dunch, 1679, at Pusey, Berks; William Guise, 1683, in St. Michael's, Oxford; William Wilmore, 1684, at Wantage, Berks; and Samuel Sandys, 1685, at Ombersley, Worcs.
BISHOP, EDWARD, of Tenterden
b. 1757, d. 1822

He signs a tablet to William Stringer, 1817, at Goudhurst, Kent. Bishop is buried at Tenterden, where a stone in the churchyard commemorates him and his wife, Ann Cloake.

BISWICK, —
fl. 1743–1745

Probably a Bristol mason, he was employed by Maynard Colchester as a “stone-carver” during the building of Westbury Court, Gloucestershire, between 1743 and 1745. In February–March, 1744–1745, he was also paid for carving “Lions.” These were probably heraldic beasts for a shield-of-arms, or for the gate-piers (Archives, Sir Francis Colchester-Wemyss).

BLACKBURN, JOHN, of Norwich
d. 1814

In 1788, the year he became a Freeman of Norwich, he put an advertisement in the Bury Post “informing his friends and the public (not being generally known) that the articles which existed between Mr. Ivory and him confining him from executing marble business has been for some time by mutual consent entirely dissolved. He now executes every article in the stone and marble branches. Monuments, ornamental and plain chimney-pieces in the most improved taste, best manner and on reasonable terms.”

As a mason, Blackburn was employed by Sir Thomas Proctor Beauchamp on repairs to Langley Park, Norfolk, in 1796 (Beauchamp Archives). He died in 1814 “aged about fifty years, after a lingering illness” (Bury Post, 18 May, 1814). He signs monuments to John Woodbine, 1786, and Richard Pillans, 1793, both at East Dereham, Norfolk; and to William Powell, 1810, in St. Saviour’s, Norwich.

BLAGDEN, JOHN, of Sheffield
fl. 1792–1805

He signs a tablet to Elizabeth Bagsnaw, 1792, at Chesterfield, Derbyshire, and another to Elizabeth Jackson, 1805, at Badsworth, Yorkshire.

BLAKE, WILL, of Basingstoke

He agreed with Anthony Chute in 1753 for £91 13s. 4d. to lay a pavement of Portland stone and black and white marble in the gallery at the Vyne (Archives, Sir Charles Chute, Bart.).

BLANCHARD, M. H.
fl. 1839–1870

A terra-cotta worker, served his apprentice-ship with Coade and Sealy (q.v.) and, in 1839, set up his own manufactory in the Blackfriars Road, buying some of the Coade moulds, etc.

His principal works include the enrichments on the Brighton Aquarium; the South Kensington Museum; the Charing Cross, Cannon Street and Star and Garter Hotels; and the Grand Hotel, Cairo. He also made the twelve panels representing the months of the year on the Wedgwood Institute at Burslem.

At the Great Exhibition of 1851 Blanchard showed Ionic capitals for Clifden House, and “pinnacles and tracery windows for the new chapel, Tottenham and for Kingston Church” at the Architectural Exhibition of the following year (Builder, 1852, page 34).

(Various references, Art Journal and Builder.)

BLAND, THOMAS

A self-taught artist, he carved in 1842 the statue of Britannia and the bas-reliefs on the octagonal column which was erected at Shap Wells Spa, Westmorland, to commemorate Queen Victoria’s accession (Builder, 1842).

BLASHFIELD, J. M.
fl. 1830–1870

Having purchased some of Coade’s moulds when W. Croggon (q.v.) closed down the original factory in 1836, Blashfield opened terra-cotta works at Poplar. In 1858 he moved to Stamford, but shortly afterwards left the firm he had founded, which was then formed as a limited company and became insolvent in 1875.

Blashfield employed the sculptors Bell (q.v.), Nixon (q.v.), Woodington (q.v.) and Weigall (q.v.) to model for him, and it was the first-named who was responsible for the statue of a Triton, executed in 1857 for the fountain at Oxford Infirmary.

Works turned out by Blashfield’s firm during his régime include the urns for the Royal Mausoleum at Windsor; vases for Buckingham, Kew and Hampton Court Palace; and a heroic “Apollo Belvedere” for the Earl of Normanton. He was also responsible for the Terra-cotta enrichments for Alford House, Dulwich College, the Sun Fire Office at Charing Cross, the Duke of Cornwall’s Hotel at Plymouth, and Farnham Town Hall. For the Crystal Palace he supplied a statue of Australia, four colossal Tritons, and a fountain in the Renaissance Court. In 1863 he made a Terra-cotta portico for Viscount Strangford’s house in Cumberland Street, Hyde Park, and, in 1868, the gate-piers for Castle Ashby, Northants.

(Various references, Art Journal and Builder.)
BLAXLAND, H., of Milton-next-Sittingbourne, Kent
fl. 1802–1828

He signs a few small tablets in churches in the neighbourhood of Faversham and Milton.

BLAYNEY, J., of Chester
fl. 1820–1840

Signed examples of his tablets, which are mostly Hellenistic, include those to John Corser, 1822, at Moreton Say, Salop; Elizabeth Panton, 1833, and Edward James, 1834, both in Chester Cathedral; Mary Boydell, 1835, at Gresford, Denbigh; and Harriet Evans, 1837, at Tarvin, Cheshire.

BLORE, ROBERT the Elder and ROBERT the Younger, of Piccadilly
Firm fl. 1786–1835

It is difficult to distinguish between the monuments carved by the elder Blore and those for which his son was responsible, for the firm seems to have been styled “R. Blore and Son” from about 1790. The firm also made chimney-pieces, and in 1806 supplied one for Ramsey Abbey (Soane Notebooks).

The senior partner became bankrupt in 1818 and apparently retired about two years later. His son carried on the business and, some time after 1830, went into partnership with George Wilcox, a former pupil.

Monuments and tablets executed by the firm were sent all over England; they are always well carved, but the designs are dull and uninteresting. However, they cannot be held responsible for the monument to Edward Foley, 1805, at Stoke Edith, Hereford, for this large and very ugly erection, 18 ft. high, was executed to a design by Tatham (Gentleman’s Magazine, 1805, Part I, page 278). In 1826 Blore brought an action for defamation against the notorious Harriette Wilson on the publication of her “Memoirs.” He was awarded £300 damages.

MONUMENTS AND TABLETS

BLORE, ROBERT, of Derby
b. 1810, d. 1868

He was born in Derby, the son of Joseph Blore, a monumental mason of that city. About 1837 he modelled a figure of the “Sleeping Endymion,” based on a work by Canova, and copies of this were later made in biscuit porcelain by the Derby china works. Blore also made the ornamental vases in the Arboretum in Derby and, in 1839, a bust of the Rev. Noah Jones.

In 1841 he moved to Middlesbrough, where he worked for Moss, Isaac Wilson and Co., who had opened a pottery there in 1838. In 1851 he carved a bust of Sir Joseph Paxton.

(Information from Public Library, Derby.)

BLUNDELL, WILLIAM, of Daventry
fl. 1810–1830

He signs tablets in Northamptonshire with well-cut details to John Lucas, 1810, at Dunchurch; John King, 1816, at Long Buckley; and Colonel David Rattray, 1820, at Daventry.
BOAG, MAITLAND, of London
b. 1759, d. 1817

In 1809 he and his son David were the principal
stone-carvers engaged on the restoration of Henry
VII's Chapel in Westminster Abbey (Brayley's

BOHSE, —

He was an assistant of J. F. Moore (q.v.) and
exhibited a tablet for a chimney-piece at the Free
Society of Artists in 1773.

BONE, CHARLES
b. 1791

He attended the Royal Academy Schools in
1811 and exhibited at the Academy, 1815–1826.
His principal work seems to have been "Ulysses
Throwing the Rocky Fragments," for he showed
this at the Academy in 1815 and at the British
Institution in the following year. (Royal Academy
Archives.)

BONOMI, JOSEPH
b. 1796, d. 1878

He was born in Rome on 9 October, 1796, the
son of the architect, Joseph Bonomi (1739–1808).
In 1815 he won a Silver Medal from the Society of
Arts for an original bas-relief in plaster and, in the
following year, joined the Royal Academy Schools,
where he was awarded Silver Medals in 1817 and
1818. He also studied under Nollekens (q.v.) and
was, indeed, the only pupil the sculptor ever
accepted. His monument in the old Cathedral at
Calcutta, which commemorates Captain C. L.
Showers, is signed "Bonomi, Nollekensi Discipulus
feci, 1819." This is a fine work with a bas-relief of
the action at Malown, in which the Captain was
killed in 1815, together with his companions,
Lieutenants Bagot and Broughton. Bonomi also
signs a tablet with a medallion portrait in the
same Cathedral, in memory of Lieut.-Colonel
John Weston, who died in 1819.

Nollekens was extremely attached to Bonomi,
whom he took with him on his Sunday evening
walks. According to J. T. Smith (Nollekens and His
Times, Vol. I, page 39), "it was generally sup-
posed that he would have left a considerable part
of his immense property" to his ex-pupil "from
his long continued attachment to him from his
birth." As a matter of fact, Nollekens did nothing
of the kind and only left Bonomi £100, though he
did bequeath a similar sum to each of the latter's
five brothers and sisters.

In 1823 Bonomi returned to Rome, where he
made a bas-relief of a "Dancing Bacchanal" and a
small statue of one of the Muses. A writer in the
Literary Gazette (1824, page 668) who saw them
considered that "this accomplished and intelligent
artist is particularly distinguished by animation,
freedom and simplicity in his works, very different
from the usual manner of his countrymen."

From 1824 until 1844 Bonomi lived almost
entirely in Egypt and the Near East, where he
worked at drawing and Egyptology, and was also
engaged in exploration. Between 1852 and 1853
the sculpture and modelling for the Egyptian
Court at the Crystal Palace was executed under
his direction and in great part by his own hand
(Handbook to the Crystal Palace, 1853). In 1861 he
was appointed Curator of the Soane Museum, a
post he held until his death on 3 March, 1878.

Bonomi exhibited at the Royal Academy,
1820–1838, and at the British Institution in 1820.
His group of "Jacob Wrestling With the Angel"
was sent to the Academy in 1820, and he later
showed busts of James Northcote (1821), Joseph
Hume (1822, now in the possession of the New
York Historical Society) and Henry Parks (1838).
A cast of his bust of Prince Hoare (1822) was
formerly at the Crystal Palace, and a smaller
undated one of Dr. John Lee is in the Aylesbury
Museum.

(Authorities cited in text.)

BOOBYER, JAMES, of Bath
fl. 1780–1790

Boobyer, who was succeeded in the business by
his son James, signs a tablet to James Moutray,
1785, in Bath Abbey.

BOOL, GEORGE M.
b. 1812

In 1831 he attended the Royal Academy
Schools on the recommendation of J. Francis
(q.v.) and won a Silver Medal three years later.
He exhibited at the Academy, 1833–1836, showing
various medallic portraits, busts and bas-reliefs.
The Literary Gazette (1834, page 299) considered
Bool's bust of William IV, which he showed at the
Academy in 1834, "one of the most perfect resem-
bances of the King that has yet been executed; the
effect of it is very grand."

BOOTH and JOHNSON,
of Nottingham
fl. 1770–1800

They sign tablets in a good eighteenth-century
style to John Bulstrode, c. 1770, at Keyworth,
Notts; Elizabeth Cripple, 1778, at Ruddington,
Notts; the Hawksley family, 1780, in St. Nicholas's Church, and Robert Wright, 1799, in St. Mary's Church, Nottingham; and Elizabeth Bainbrigge, 1797, at Lockington, Leicestershire.

BOSSOM, CHARLES, of Oxford
b. 1788, d. 1830

His tablet to Dr. Loveday, 1828, at Magdalen College, Oxford, is illustrated in the Gentleman's Magazine of that year (Part I, page 209). He also signs tablets to Mrs. Deane, 1822, at Kingston Bagpuize, Berks, and to John Oglander, 1825, in Merton College Chapel.

Bossom died on 14 June, 1830, and was buried in the churchyard of St. Giles's, Oxford, where his tombstone referring to him as a “sculptor” can still be seen. He was succeeded in the business by his son, who signs the tablet to Lord Stavordale, 1837, at Farley, Hants.

BOSSOM or BOSON, JOHN
d. 1743

Bossom, whose yard was at Greenwich, was the carver employed at St. George's, Bloomsbury, 1720–1730; St. Luke's, Old Street, 1727–1733; St. John's, Horsleydown, 1728–1733; and St. Olave's, Southwark, 1737. With his partner, John How, he was responsible for all the carved woodwork on the façade of the East India House in Leadenhall Street, and also for the chimney-pieces in that building (Archives, East India Company).

In 1732 Bossom carved the reredos in Canterbury Cathedral, for which he received £242 (Fabric Account Book, Cathedral Library). Three years later he was paid £61 by the Hon. Francis Godolphin, of Baylies, Stoke Poges, for carving which included the chimney-piece in the “great room” (Archives, Duke of Leeds). In 1740 he made a chimney-piece for Culverthorpe Hall, Lincolnshire, the seat of Sir Michael Newton.

In 1729 he was paid £33 for carved woodwork for the screen and organ gallery of Westminster Abbey. In 1741 he was paid a further £95 which was also presumably for the organ case (Westminster Abbey Archives).

Vertue (Walpole Society, Vol. III, page 116) refers to Bossom as “a man of great ingenuity and undertook great works in his way for the prime people of quality and made his fortune very well in the world.” He also records that he “dyd about April, 1743, of an age not considerably above middle age.” (Authorities mentioned in the text; information from Mr. H. M. Colvin.)

BOTTOMLEY, CHARLES, of Bury and Cambridge
fl. 1729–1749

His signature is to be found on the obelisk, made about 1739, which was placed on a hill between Shelford and Newton in Cambridgeshire, in memory of Gregory Wale. He also signs the ledger to Elizabeth Wenyaide, 1747, at Brettenham, Suffolk. The cartouche tablet to John Stevenson (d. 1749) at Newton, near Cambridge, is said by William Cole, the antiquary (fl. 1742–1782), to be the work of “Bottomley, a mason in Cambridge, who was to have thirty guineas for it” (W. M. Palmer’s Monumental Inscriptions from Cambridgeshire).

In 1749 Bottomley married Susannah Flowerday at St. James’s Church, Bury St. Edmunds. She seems to have carried on the business after his death, for in 1757 she was paid for “mason’s work to the back of the Senate House” (Vice-Chancellor’s Accounts).

BOTTOMLEY, GEORGE
fl. 1728–1735

About 1729 he went into partnership with R. Singleton (q.v.), and together they sign architectural monuments in Norwich to Thomas Batchelor, 1729, in the Cathedral, and to Daniel Fromantall, 1734, in St. Mary Colsany.

BOUQUET, W. V.
fl. 1782–1798

He exhibited a large number of unnamed wax portraits at the Royal Academy, 1782–1798, and at the Free Society in 1783.

BOWER, JOSEPH the Elder and JOSEPH the Younger
Firm fl. 1714–1759

The Bowers, father and son, were the master-masons for building Wentworth Castle between 1714 and 1722, and they were also responsible for the carved stonework.

In 1725 the younger Bower was paid £92 for making “the cascade in the menagerie,” and two years later he built three miniature towers named after Lord Strafford’s daughters, the Ladies Lucy, Anne and Harriett Wentworth. In 1734 his work included an obelisk erected in the Park to the memory of Queen Anne; in 1739 he built a temple copied from one at Tivoli; and in 1742 he made a column with a carved capital (British Museum, Ad. MS. 22241).

In 1744 “Mr. John Bower ye carver and stone-
cutter” was employed at Westbury Court, Gloucestershire, then being built by Mr. Maynard Colchester (Archives, Sir Francis Colchester Wemyss).

BOWLES, RICHARD
In 1765 Trevor, Bishop of Durham, who was building a church at Glynde in Sussex, paid Bowles £20 for a “handsome veined marble font, properly ornamented.” This charming work is still in the church (Archives, Brand of Glynde).

BOZZONI, LUIGI
fl. 1838–1847
He was a native of Florence and had studied under Finelli in Rome before he came to England in 1838, where he took for his studio part of the ground floor of the Imperial Hotel in Covent Garden. Here, between 1839 and 1844, he executed for Mr. Constable Maxwell, of Everingham Park, Yorkshire, life-sized statues of the Twelve Apostles, four martyrs, and eighteen bas-reliefs of religious subjects. All these were intended for the Roman Catholic Church which Mr. Maxwell had built at Everingham (Art Union, 1839, page 106).

Before the statues went to Yorkshire, Bozzoni exhibited those of St. Andrew and St. John in Westminster Hall in 1844. The Literary Gazette (1844, page 466), described them as having “good modelling about the drapery, though as much cannot be said for the figures.”

In 1847 Bozzoni exhibited a subject from the Aeneid at the Royal Academy. He probably died in the same year.

BRADSHAW, —, of South Molton
In 1739 the Mayor and Corporation of South Molton, Devon, decided to build a Town Hall and accordingly sent a Mr. Joshua Bawden to buy some materials from Stowe (the famous house of Granville, Lord Bath, near Kilkhampton), which was then being demolished. Mr. Bawden spent £129 and purchased, among other things, four Corinthian capitals and pilasters, the “ornaments of three windows,” a “carved architrave,” a picture of “The Triumph of King Charles II,” and a ton of lead.

The building was erected between 1740 and 1741 to the plans of a Mr. Cullen, and into it were incorporated the fragments from Stowe. Bradshaw, however, was responsible for the rest of the carved stonework, including shields, festoons, Corinthian capitals, etc., and the result is undoubtedly one of the most charming town halls in England (South Molton Town Archives).

BRADSHAW, W., of Manchester
fl. 1735–1772
He signs large wall-tablets to William Lawson, 1735, in Wakefield Cathedral, and to the Massey family, 1765, at Rostherne, Cheshire.

Hilbert, in his Foundations of Manchester (Vol. II, page 316), describes Bradshaw’s monument to William Clowes, 1772, in Manchester Cathedral as “a mural monument which for elegance is not exceeded by any one within the church.”

BRAINTWAITE, WILLIAM
b. 1757
He was born on 13 October, 1757, and in 1776 attended the Royal Academy Schools, where he won a Silver Medal in 1782. After that date, however, all trace of him is lost.

BRAMWHITE, CHARLES,
of Bristol
fl. 1836–1845
In 1836 he received the Silver Medal from the
Society of Arts for a bas-relief. His bust of W. J. Muller, 1845, is in Bristol Cathedral.

BRAYNE, T., of London

According to the Gentleman’s Magazine (1812, Part II, page 221), the monument to Sir George Booth (d. 1797) at Cotterstock, Northants, is the work of Brayne.

BREAMER, FREDERICK CHRISTIAN, of London
fl. 1793–1816

In 1793 he exhibited “a tablet of flowers in marble” at the Royal Academy, and in 1801 made a chimney-piece for the London house of Rt. Hon. Henry Dundas, in Charles Street, Berkeley Square (Soane Notebooks). In 1816 he made nine chimney-pieces; two of dove-grey marble for the Royal Pavilion at Brighton and five of statuary and two of veined marble for Mr. Nash’s house in Langham Place (R.I.B.A. Library, Shide Ledger).

Breamer signs tablets in Kent to Sir Richard Clode, 1804, at Orpington, and to Mrs. Oswald Smith, 1809, at Bexley.

BREWER, FRANCIS, of Petersfield
fl. 1820–1830

He signs tablets to John Clement, 1820, and to the Baker family, 1823, both at Steep, Hants.

BREWER, W., of Box and Colerne
fl. 1777–1813

He carried out monuments and tablets in marble and stone, and frequently executed a charming wall-tablet with a bow of ribbon at the top; another design for a circular one has crossed torches at the base. His signed tablets in Wiltshire commemorate James White, 1787, and Fanny Warner, 1779, both in St. Peter’s, Marlborough; Richard Legg, 1778, and William Merewether, 1783, both at Market Lavington; Anne Cullerne, 1778, Thomas Pinnell, 1787, and William Fry, 1799, all at Malmesbury; Elizabeth Millington, 1783, at Cliffe Pyppard; Rachel Neate, 1794, and John Neate, 1812, both at Aldbourne; and Lucia Pyke, 1813, at Great Somerford. The tablet to John Painter, 1809, at Hinton Charterhouse, Somerset, is also his work.

BRICE, E., of London

He exhibited a bas-relief of “Innocence” at the Royal Academy in 1780.

BRIDGENS, RICHARD, of Liverpool
fl. 1811–1826

He was a pupil of G. Bullock (q.v.) and exhibited a statue of “A Nymph Attiring” at the Liverpool Academy in 1811.

About 1813 he moved to London, and from that year until 1826 exhibited architectural drawings at the Royal Academy.

BRIDGES, —

His workshop was at Knightsbridge, and on 26 May, 1775, a sale of “the remaining stock in trade of artificial stone at the manufactory in Knightsbridge” was sold by Messrs. Christie on the occasion of his “quitting business.” Among the lots sold were medallions of Alfred and Ethelred; busts of Homer and Pitt, statues of Ceres, Flora, Sampson and a Druid. There were also two statuettes of “Rubens and Vandyke.” A number of the lots were purchased by Mrs. Coade (q.v.).

BRIDGES, —

He signs a tablet of good workmanship to H. Bale, 1796, at Bishops Waltham, Hants.

BRINE, JOHN, of London
Firm fl. 1800–1851

Brine was assisted, and later succeeded, by his sons George and James. In 1824 the firm received £2,265 for statuary marble chimney-pieces for the Quadrant, Regent Street, and £155 for chimney-pieces for the Royal Pavilion at Brighton (R.I.B.A. Library, Shide Ledger). They also showed chimney-pieces at the Great Exhibition of 1851. In 1826 the elder Brine made statues for Lady de Grey’s gardens at Wrest Park, Bedfordshire (Archives, Lady Lucas and Dingwall).

The firm’s monuments include those to John Elmslie, 1829, in Windsor Parish Church; the Dick family, 1837, at Chilham, Kent; John Rogers, 1840, in Streatham Parish Church; and Lady Preston, 1846, at Beeston St. Lawrence, Norfolk.

BRISLEY, THOMAS WILLIAM, of Rochester
b. 1800

Brisley’s name is given as “Thomas” when he was apprenticed to his father in 1814, but the local directory of 1828 calls him “William.” He was the son of Thomas Brisley, a mason who became a Freeman of Rochester by purchase in 1795 (Rochester City Archives).

The younger Brisley made a chimney-piece for Cobham Hall, Kent, in 1834 (Archives, Earl of
Darnley), and he also signs the monuments to William Burke, 1836, and James Forbes, 1837, in Rochester Cathedral. The medallion on the Forbes monument is a charming and competent work, surprisingly good for a local statuary.

**BROAD, DAVID**

fl. 1787–1792

Broad, who also worked as a surveyor, received £10 in 1787 for the font in Manchester Collegiate Church (Hilbert's *Foundations of Manchester*, Vol. II, page 247).

**BROAD, RICHARD, of Box**

fl. 1710–1730

In 1710 he was working at Longleat, where he was paid for building the "two great Pallisados" (Archives, Marquess of Bath).

Broad signs the large monument with Corinthian columns and weeping cherubs to William Tipper, 1710, at Seend, Wiltshire, and another to the wife and children of Thomas Smith in Melksham Church in the same county. Smith, in his diary for 1720, notes that he "walked this morning, being frosty, to Broad, the stone-cutter near Bath, to see a monument he has just finished to be put up in memory of my dear spouse and children" (Diary of Thomas Smith, reprinted in J. A. Neale's *Charters and Records of Neale*, page 207).

**BROAD, RICHARD, of Worcester**

He signs a large tablet in coloured marbles to Mary Wolstenholme (d. 1749), at Stoke Edith, Herefordshire.

**BROADBENT, MESSRS., of Leicester**

fl. 1840–1862

In 1847 they carved the marble cenotaph of Latimer, Bishop of Worcester, in Turcaston Church, Leicestershire (Gentleman's Magazine, 1847, Part I, page 539). In the same year they were also working as builders on the restoration of Anstey Church in that county.

**BRODIE, ALEXANDER**

b. 1830, d. 1867

Like his brother, William Brodie (q.v.), he lived at Aberdeen. In 1863 he carved the statue of the Duke of Richmond to be erected at Huntley and, two years later, one of Queen Victoria for his native city. His "Oenone" was exhibited at the International Exhibition of 1862. Brodie died by his own hand on 30 May, 1867.

(Various references, *Art Journal*.)

**BRODIE, WILLIAM**

b. 1815, d. 1881

He was the son of John Brodie, a ship-master of Banff, and was about six years old when his family moved to Aberdeen. He was later apprenticed to a plumber, but in his spare time studied at the Mechanics' Institute, where he amused himself by casting lead figures of well-known people. He soon began to model small medallion portraits which attracted the attention of a Mr. John Hill Burton, and it was Burton who encouraged him to go to Edinburgh in 1847. Here Brodie studied for four years at the Trustees' School of Design, learning to model on a larger scale, and also executing a bust of one of his earliest patrons, Lord Jeffrey.

About 1853 he went to Rome, where he studied under Laurence Macdonald (q.v.), and it was with the latter's assistance that he modelled "Corinna, the Lyric Muse," a work which Copland reproduced in miniature in "Parian" four years later. Brodie was elected an Associate of the Royal Scottish Academy in 1857, becoming a full member in 1859. In 1876 he was appointed Secretary of the Scottish Academy, a post he held until his death. In 1875 he made the group of "A Peer and His Lady Doing Homage" for the Prince Consort Memorial in Edinburgh.

Brodie exhibited at the Royal Academy, 1850–1881, and at the Royal Scottish Academy, 1847–1881; at the Great Exhibition of 1851 he showed a group of "Little Nell and Her Grandfather." He died on 30 October, 1881.

BROMFIELD, BENJAMIN, of Liverpool
fl. 1757-1790

In 1773 he carved the large and imposing red-marble chimney-piece for the saloon at Chirk Castle (Chirk Castle Accounts), and in 1788 received £400 from Sir Corbet Corbet for chimney-pieces for Adderley Hall, Salop. The date of his death is uncertain, but he was buried in a vault in Holy Trinity Church, St. Anne’s Street, Liverpool.

All Bromfield’s monuments and tablets have good details and are obviously influenced by those of Sir Henry Cheere (q.v.). That to Robert Lloyd, 1769, at Oswestry, Salop, is a fine work in coloured marbles with delicately carved angels’ heads, while others commemorate George Coymore, 1757, at Conway, Carnarvon; Mary Eyton, 1764, in St. Mary-on-the-Hill, Chester; the Rev. L. Richmond, 1769, at Stockport, Cheshire; Philip Puleston, 1770, at Wrexham, Denbigh; George Warrington, 1770, at Gresford, Denbigh; Robert Comberbach, 1771, in St. Michael’s, Chester; William Tomkinson, 1771, at Davenham, Cheshire; Richard Thelwall, 1775, in St. Asaph Cathedral; Robert Howard, 1776, at Conway, Carnarvon; Nathaniel Wettenhall, 1776, at Audlem, Cheshire; John Stanley, 1781, at Winwick, Lancs; and Francis Parry Price, 1787, at Overton, Flint.

BROOKSHAW, GEORGE

He manufactured marble chimney-pieces in Curzon Street, Mayfair, and in 1780 exhibited at the Free Society. Here he showed, among other works, “Two figures from Herculaneum; these are marble in a new species of painting”; and “A Sacrifice to Cupid; a frieze for a chimney-piece.”

BROOMHALL, THOMAS, of Fleet Ditch, London
fl. 1677-1718

He became free of the Masons’ Company in 1677 and between 1705 and 1707 made several marble chimney-pieces for Mr. Samuel Tufnell’s house, Langleyes, near Chelmsford (Tufnell Archives). In 1717 Broomhall made, for the parish churches of Fetcham and Great Bookham in Surrey, marble tablets recording the benefactions of Sir George Shiers (Aubrey’s Surrey, Vol. II, page 262).

In the list of Members of the Masons’ Company for 1708 are the names of James and Samuel Broomhall, both of whom are described as “working for Mr. Cartwright.” James was the son of “Richard Broomhall of Madley, Hertford, husbandman,” and was apprenticed to Jasper Latham (q.v.) in 1679.

BROTHERS, P., of London

He signs a Hellenic tablet to Robert Laurence 1838, in Marylebone Parish Church.
BROUGH, JOHN, of London
fl. 1779–1782

In 1779 he made chimney-pieces for Greenwich Hospital to replace those destroyed in the fire and, in 1781, rebuilt the north colonnade. In 1784 he built a school near the hospital and in 1791 made the pedestals for the Coade (artificial stone) figures in the vestibule outside the Hospital chapel. A year later he erected the south-west staircase in King William Building (P.R.O. Ad. MS. 68/825–30 and 68/880).

BROWN, ALFRED
fl. 1845–1856

In 1845 he won the Royal Academy Gold Medal for a relief entitled “The Hours Leading Out the Horses of the Sun,” and exhibited at the Academy from that year until 1853. He made marble chimney-pieces for the Army and Navy Club in 1848, and showed a statue of “David Before Saul” at the Great Exhibition of 1851.

Brown was also a designer of silver. He modelled the trophy presented by the Emperor of Russia for Ascot Races in 1845 and, five years later, a large candelabrum presented to the Marquess of Tweedale by his friends in India. In 1856, when working for Roskell and Hunt, he designed and modelled a silver centre-piece costing £2,500 for the Earl of Stamford. This represented “Stags in Bradgate Park” and must have been one of the largest ever made, for it weighed 112 pounds. (Various references, Art Journal.)

BROWN, F., of Salisbury
fl. 1775–1806

In 1804 he was appointed master-mason to Salisbury Cathedral and, two years later, was paid for “two Portland-stone columns and capitals” for the Cathedral (Cathedral Archives). He signs monuments of good workmanship in Wiltshire to William Batt, 1775, at Nutton; John Mayne, 1779, at Trefont; Thomas King, 1787, at Alvediston; William Brooker, 1799, at West Dean; and John Wyche, 1805, in St. Martin’s, Salisbury.

His son, F. Brown the Younger, was responsible for a few minor tablets, but his chief work, executed about 1835, was an imposing marble chimney-piece, with two life-sized female figures on each side, for the saloon at Somerley, Hampshire, the seat of the second Earl of Normanton. The drawing for this is in the possession of Lord Normanton.

BROWN, GEORGE
fl. 1795–1796

In 1795 he made “a veined-marble chimney-piece” for the Hon. Mrs. Yorke, of Sydney Lodge, Hamble, Southampton. A year later he executed a similar one for the house of a Mr. Thomas Lewis at Palmer’s Green, near London (Soane Notebook, MS. 5).

BROWN, or BROWNE, J., of London
fl. 1830–1850

In 1844 he exhibited a group entitled “Caractacus Before Claudius” at Westminster Hall, a work disliked by the Literary Gazette (1844, page 466), which considered the Britons “abominably bad” and advised the artist to “break the whole thing up.”

Brown signs a number of monuments and tablets, including those to the tenth Lord Saye and Sele, 1830, and the eleventh Lord Saye and Sele, 1846, both at Broughton, Oxon; General Chowne, 1834, and Mrs. Tremaine, 1836, both in Kensal Green Cemetery; Charles Lefevre, 1836, Heckfield, Hants; Emma Sparkes, 1842, at Shalford, Surrey; and the Church family, 1848, at Hatfield, Herts. His monument to Philip saltmarshe, 1848, at Howden, Yorkshire, is a large Gothic work with standing figures of “Hope” and “Charity.”

BROWN, JOHN, of Colchester
He signs a Hellenic tablet to Robert Torrin, 1823, at Kelvedon, Essex.

BROWN, L., of London
fl. 1846–1848

He exhibited at the Royal Academy wax models of “A Dog Setting a Hare” (now in possession of the author) in 1846, and “Caesar Crossing the Rubicon” in 1848.

BROWN, or BROWNE, RICHARD, and Sons of Derby
Firm fl. 1735–1830

The firm was founded in 1735 by Richard Brown, whose advertisement in the Derby Mercury of that year stated that he “performed monuments, gravestones, chimney-pieces on reasonable terms.” In 1759, and again in 1782, he was paid for paving the floor of All Saints’ Church, Derby (Cow’s Chronicles of All Saints, Derby). In 1765 he made a pair of “purple obelisks” for Kedleston, probably the magnificent pair of “blue john” which is still in the house (Kedleston Archives).

At a sale held by Mr. Christie on 7 November, 1797, of “a statuary and mason going abroad” one lot was a chimney-piece of Derbyshire Spar “manufactured at considerable expense at Mr.
Brown’s of Derby for the late Mr. Harris of the Strand.” (Charles Harris, q.v.)

The first Richard Brown died before 1785 and was succeeded by his son, Richard the Younger (1736–1816). He, in his turn, was followed by a third Richard Brown, grandson of the founder of the firm; the latter, having no son, sold the business to J. Hall (q.v.) about 1830.

Work carried out by the Browns included the altar-piece at Stapleford, c. 1783 (Nichols’s Leicestershire, Vol. II, Part I, page 340), and chimney-pieces for Derby Prison. They did marble-carving for the great north wing of Chatsworth, and also did a good deal of work in the local marble, which they quarried at Monyash and Ashford in Derbyshire. Richard Brown the Elder signs the monument to Samson Bulkeley, 1761, at Leek, Staffordshire (Glover’s Derby, Vols. I and II).

BROWN, RICHARD, of London

fl. 1817–1830

Signed examples of his tablets, which are mostly Hellenistic, commemorate John Thornhill, 1817, at Stanmore, Middlesex; the second Earl of Roden, 1820, at Sawbridgeworth, Herts; and William Dodd, 1822, at Sutton Valence, Kent.

BROWN, ROBERT, of London

fl. 1830–1857

At the Great Exhibition of 1851 he showed “a sepulchral monument of the Decorated period.” His monuments and tablets are mostly Gothic in style, though that to Archibald Little, 1844, at Chipstead, Surrey, has a classical relief of a mourning woman, not unlike a minor work by Chantrey.

Signed tablets by Brown commemorate James Foster, 1833, in Streatham Parish Church; Lieut.-Colonel Richard Boteler, 1833, at Easney, Kent; Richard Buckler, 1837, in Chichester Cathedral; Nathaniel Baron, 1841, at North Cave, Yorks; Charles Williams, 1842, Gwennap, Cornwall; Lady Shuckburgh, 1846, at Shuckburgh, Warwick; George Watlington, 1848, at Aldenham, Herts; Benjamin Biddulph, 1849, at Burghill, Hereford; Caroline Williams, 1849, Gwennap, Cornwall; and Henry Kemble, 1857, at Bray, Berks.

BROWN, RICHARD RUSHTON,
of Manchester

d. 1851

In 1812 he exhibited at the Liverpool Academy figures of “Cupid” and of “Young Bacchanals.” At the Exhibition of Contemporary Art at Manchester in 1827, he showed five works, including “The Infant Hercules Strangling a Serpent” and the “Posthumous Bust of a Gentleman.” He continued to exhibit busts and ideal works until 1833. From 1841 to 1851 he was employed modelling for Messrs. Austin and Sealy (q.v.) (Archives, Artists’ General Benevolent Institution).

BROWN, WILLIAM, of Liverpool

d. 1836

He exhibited at the Liverpool Academy in 1812 and 1813, showing a figure of “Diana” in the latter year. His widow, Elizabeth, when she applied for help to the A.G.B.I. in 1837, said that her husband had died of apoplexy on 31 December, 1836.

BROWN, W., of London

b. 1799

He joined the Royal Academy Schools in 1820 and signs a large monument to the second Viscount Sidney, 1845, at Chislehurst, Kent.

BROWN, W., of Stonehouse

fl. 1808–1835

His tablets, which are mostly classical in design, include those to Margaret Nesham, 1808, at Anthony, Cornwall; William Rowe, 1820, at Liskeard, Cornwall; Sarah Body, 1835, at Wonersh, Surrey; and Charles Mathews, 1835, in St. Andrew’s Church, Plymouth.

BROWNE, —, and YOUNG, —

Firm fl. 1816–1820

Their tablets have delicately carved details, a good example being one commemorating Sir Felton Harvey-Bathurst, 1819, at Egham, Surrey, which has reliefs of the numerous medals and decorations won by Sir Felton during the Napoleonic Wars. They sign other tablets to John Kirkpatrick, 1816, in Windsor Parish Church; John Bovill, 1816, in Streatham Parish Church; and Ann Drury, 1817, at Upton, Bucks.

In 1819 the firm agreed to supply for £742 the scagliola columns for the east end of St. Pancras Church (Britton and Pugin’s Public Buildings of London, Vol. I, page 154).

BROWNE, JOSEPH

fl. 1815–1848

In 1815 he was employed by the Duke of Bridgewater at Ashridge Park making scagliola columns and verd antique stands (Archives, Lord Brownlow).
In 1823 he made chimney-pieces for a house in Carlton House Terrace, and from 1827 until 1830 was employed at Buckingham Palace. Here he received over £6,000 for marble chimney-pieces, including those for the drawing-room, and five for the picture-gallery at £250 each. For a chimney-piece with "pilasters, profiles and frieze carved with Greek leaf and ogee" for an unnamed room, he received £145 (P.R.O. Works 5/119).

His scagliola work at the Palace included "six scagliola Corinthian columns, shafts and bases and six pilasters ditto" for the picture gallery; "twenty-eight pilaster shafts with sunk panels on the face and large ogee moulding round" costing £1,278, for the Bow drawing-room; and the "scagliola columns of lapis lazuli" for the blue drawing-room (P.R.O. Works 5/119).

Browne was the chief marble contractor for the Marble Arch and, in 1827, received £1,077 for "six cornices, sixty-four modillions, fifty-eight coffers and six very large wreaths in solid ravaccione marble" (P.R.O. Works 19/3, etc.).

In 1830 he carved chimney-pieces for Stafford House, and also received £37 for a French marble chimney-piece for Lord Sherborne's room at Sherborne Court, Gloucestershire (Archives, Lord Sherborne). In the same year he held an exhibition at his premises in University Street of his collection of antique marble and other works, "forming together nearly two thousand elegant specimens of ancient and modern art" (Library of Fine Arts, Vol. I, page 178). In 1848 he made the chimney-piece for the music-room of Westfield, Isle of Wight (Sir Augustus Clifford's History of Westfield).

Browne's tablets are dull, the best being that to William Kay, 1845, at Tring, Herts, which has a neo-Hellenic relief of a woman seated by an amphora. Other monuments and tablets executed by him commemorate William Bray, 1832, at Shere, Surrey; Elizabeth Pughe, 1833, in St. Mary Aldermary; the Hon. Mrs. Cox, 1836, at Mistley, Essex; the Ranks family (an altar-tomb in the churchyard), 1838, at Royston, Cambs; the Hon. Lionel Damer, 1839, and the Countess of Portarlington, 1839, both at Winterbourne Came, Dorset; Jane Mills, 1842, at Barford, Warwick; and the Hon. Cassandra Graves, 1845, at Burnham, Bucks.

BRYAN, JOHN and JOSEPH, and Sons, of Gloucester
Firm fl. 1749-1802

The firm was founded by John (1716-1787) and Joseph (1718-1780), sons of Joseph Bryan (1682-1730). John, the elder, survived his brother by seven years and died on 21 March, 1787. He was buried under a large pyramidal monument at Painswick, Gloucestershire, and in his will left bequests to his two daughters, Anne Bryan and Mrs. Loveday. The business then passed to his nephew John, the son of Joseph Bryan, who had married his first cousin Anne and went into partnership with George Wood (q.v.) about 1795.

Masonry-work executed by the firm includes the tower of Great Whitcombe Church in 1749, and the spire of St. Nicholas, Gloucester, in 1784. Their monuments have charming and well-carved details, while a delightful and intelligent use is made of coloured foreign marbles. Among these works may be included those commemorating Noble Pitts, 1770, at Much Marcle, Hereford; William Smart, 1772, at Windcumb, Glos; Alexander Colston, 1775, at Fairfield, Glos (there is another in the same church dated 1754, but the name is illegible); Abigail Carter, 1776, at Eldersfield, Glos; Charles Coxe, 1779, at Rodmarton, Glos; James Pitt, 1784, at Maisemore, Glos; Mary Smith, 1787, at Bishop's Cleeve, Glos; Mary Morse, 1788, Samuel Hayward, 1790, and John Webb, 1795, all in Gloucester Cathedral; Anne Coxe, 1790, at Kemble, Glos; Frances Turner, 1793, at Chadlington, Oxon; Mary Milborne, 1793, at Abergavenny, Mon; Mrs. Hughes, 1794, at Cheltenham, Glos; Lucy Dolphin, 1801, at Upper Slaughter, Glos; the Rev. D. Pritchett, 1801, in St. David's Cathedral; and Mary Probyn, 1802, in Pershore Abbey, Worcs. The last-named is the joint work of Bryan and George Wood.

(Information from Mr. H. M. Colvin; Gloucester City Archives.)

BRYSON, DANIEL
fl. 1800-1805

Bryson, who did a good deal of wood and stone carving under Sir John Soane, modelled a figure in 1800 for Bentley Priory, the seat of the Marquess of Abercorn. In 1801 he received £65 for carved stonework on the façade of Messrs. Piafra's offices in Fleet Street, and four years later was paid for decorative details in stone for the offices of Messrs. Peters in Fountain Court. Bryson also worked at Mr. Robert Knight's house in Charles Street, Berkeley Square, in 1802 (Soane Account-books), and, in 1804, he was paid £53 for carving at Aynho, Northamptonshire (Cartwright Archives).

BUBB, JAMES GEORGE
b. 1782, d. 1853

He attended the Royal Academy Schools in 1801, winning a Silver Medal in 1805, and also worked with Bingley (q.v.) and Rossi (q.v.). In
1806 he was given the commission for the monument to Pitt which was to be erected in the Guildhall, not apparently because of the excellence of his model but because "his estimate of expense was some hundred pounds less than that of any other candidate, which influenced many of the citizens to vote for it" (Farington Diary, Vol. IV, page 1). Later in the same year Farington (op. cit., page 55) again stresses the fact that the cheapness of the monument was the first consideration and mentions that Bubb had "canvassed the Members of the Common Council and gave cards on the back of which he put the mark which he put on his model that it might be known."

The sculptor was not at all popular among his fellow-artists, and L. Gahagan (q.v.), an unsuccessful competitor, referred to "Tobacconist Bubb" when he wrote to the committee asking for the return of his rejected model for the Pitt monument. Before being definitely given the commission, Bubb was asked to produce references, and he accordingly requested Bingley and Rossi to supply them. The former stated that "during the partnership with Mr. Rossi and myself, Mr. Bubb did studiously attend to the duties of his profession and was employed in the several works carried on during that period, particularly in marble, viz. Captain Faulkener's monument in St. Paul's" (City Corporation Records, MS. 95.2). Rossi, however, wrote rather differently and his letter is quoted elsewhere (see under "Rossi, J. C. F."). Bubb seems to have taken his time over the work, for the statue was not unveiled until 1813.

In 1809 Bubb made a stone statue for the Hope Insurance Office on Ludgate Hill. Two years later he executed a delightful bas-relief of "Britannia, Neptune and Minerva" for the portico of the Commercial Rooms at Bristol, and for the exterior of the same building carved statues of "Bristol," "Commerce" and "Navigation."

About 1818 Bubb started to manufacture terracotta in partnership with Rossi, for both had been employed at Mrs. Coade's (q.v.) artificial-stone works at Lambeth. The venture began well, for they received a contract for over £5,000 for reliefs, etc., for the façade of the London Customs House, the work to include "a marine shell of large dimensions to be placed over the clock," and a "basso-relief of Commerce, represented by a number of groups of figures, the size of life and in the costume of their respective countries, and another of Prosperity, Britannia, etc., accompanied by Strength, Justice, etc." (P.R.O. Works 5/144).

The result when all was completed does not seem to have been a success. The New Monthly Magazine (1818, page 154) found fault with the material, remarking that "the process of baking which it undergoes frequently distorts and injures the work, it is of a brick-like ferruginous colour and the general effect is very unpleasing," while the works they considered "entirely devoid of all that is requisite in art; they possess no sentiment, they express nothing, they are seen and forgotten." Forgotten they certainly have been, for the badly constructed building had in a short time to be demolished, and Bubb's contribution to it disappeared with the rest.

In the same year he also made other terracotta reliefs for the pediment of the Italian Opera House in the Haymarket. These, according to Allen's London (1827, Vol. IV, page 296), represented "the progress of Music from the earliest attention to sound. Into the groups, dancing is introduced, as associated with its advancement from the rudest ages to the extraordinary accomplishments of the modern ballet."

Notwithstanding the money he seems to have made for his work at the Customs House, Bubb became a bankrupt and his business was taken over by Joseph Browne (q.v.), who employed him as a designer and modeller. While he was working for Browne, Bubb was responsible for a large number of works in terra-cotta, including the portico of the Harmonic Institution, Regent Street, in 1820, and the statues of "The Four Quarters of the Globe" for the Royal Exchange two years later (Elmes's Metropolitan Improvements, Vol. I, pages 103 and 158). About 1823 he made terra-cotta statues and reliefs for the Bristol Exchange (Evans's Bristol, Vol. II, page 353), and, in 1824, the composition ornaments for the Salters' Hall. He also carved the Company's arms on the exterior of the building (Archives, Salters' Company). In 1826 he executed the figures of British Worthies for Chester Terrace, Regent's Park, while in the following year appeared the pediment with forty figures for Cumberland Terrace, a work which the Literary Gazette (1827, page 65) considered to be "on so large a scale that it is only exceeded in size by that on St. Paul's Cathedral."

About this time Browne abandoned the manufactory and Bubb returned to sculpture. In 1830 and 1831 respectively he exhibited statues of "Poetry" and "Vertumnus" at the Royal Academy, and in 1839 carved a figure of "Pomona," which had been commissioned by Sir William Middleton, of Shrublands, Suffolk.

In 1833 Bubb held a sale of his architectural and sculptural casts, etc. Among the lots sold was Zoffany's famous picture of the Royal Academicians which was bought by Joseph Browne (q.v.) for £37 16s. (Gentleman's Magazine, 1833, Part I,
page 252). In 1839 Bubb was employed by Blashfield (q.v.) on experimental terra-cotta work at Canford, Dorset, where Sir John Guest was trying to build inexpensive model cottages for agricultural workers. A small quantity of moulded bricks, tiles and ornaments were made from sketches by Mr. (afterwards Sir Charles) Barry, but Bubb’s health seems to have failed about this time, and he fell on hard times. Indeed, as early as 1835 he had applied to the A.G.B.I. and stated that having had scarcely any employment for the last two years his circumstances had become impoverished and that his complete stock had been taken by his landlord and sold to pay the rent; also that he had to support a wife and two children. A later note states that his wife had eloped with a young man who had been living with him as a pupil. The erring wife was Margaret Alice, second daughter of Henry Blakey of Scots Yard, Bush Lane, whom he had married on 9 May, 1812 (The News, 31 May, 1812). Bubb left a son, Francis, who was employed by Messrs. Seely, of New Road (q.v.).

Bubb exhibited at the Royal Academy, 1805–1831, where his work included busts of Mrs. Furniss (1805), W. Shield (1811), and M. Wood, M.P. (1818). His bust of Lord Nelson (1810) is in the possession of Mr. Nelson-Ward. He also signs monuments to George Children, 1818, at Tonbridge, Kent; Henry Manley, 1819, at Halberton, Devon; and Margaret Pounsett, 1820, and Richard Rothwell, 1821, both in Battersea Parish Church.

(Builder, 1868, page 547; authorities cited in text.)

BUCK, JOHN
fl. 1817–1821

Between 1817 and 1821 he exhibited three relief at the Royal Academy, including one entitled “David [sic] Slaying the Lion.”

BUCKHAM, GEORGE

The only signed work of his I know is the large monument to the Earl and Countess of Kerry, 1799, in Westminster Abbey.

BUCKINGHAM, EDWARD
fl. 1681–1719

Buckingham was apprenticed to Nathaniel Turner in 1672 and became free in 1681. He was the chief mason for the Inner Temple between 1693 and 1711, and in 1696 (the year in which he took his son Jeremiah as an apprentice) he received £115 for “repairs to the Temple Church” (Inver- wick’s Inner Temple Records, Vol. III).

In 1701 Buckingham was at Knole, Sevenoaks, where he was paid £100 for unspecified work (Sackville Archives). In 1708 he was living in “Clements Lane by Clare Market,” according to the Court Book of the Masons’ Company. He became Master of the Company in 1716.

A “John Buckingham,” who may have been a relative, built a house in London before 1730 for Richard Woolley, one of the directors of the South Sea Company (Inventory of Directors, South Sea Company).

BULL, THOMAS
d. 1751

Son of Henry Bull, goldsmith and citizen of London, he was admitted to the Masons’ Company by patrimony in 1712 and was later Master of the Company in 1746. His yard was in Plum Tree Court, Shoe Lane. Bull signs the fine architectural monument with a portrait-bust of Sir Roger Hill, 1729, at Denham, Bucks, and another to Mary Eccleston, 1732, at Redbourn, Herts. Bull died in 1750–1751 and was buried in St. Helen’s, Bishopsgate.

In the Quarterage Book of the Masons’ Company there are references to another Thomas Bull, who was apprenticed to Thomas Crowther in 1725, free in 1732, and living in Broad Street two years later.

BULL, WILLIAM
d. 1762

He was apprenticed to his father, Thomas Bull (q.v.), in 1726, and became free of the Masons’ Company in 1735. In 1737 he received £231 for alterations to Skinners’ Hall (Archives, Skinners’ Company) and, in 1742, repaired a house at Cripplegate for a Mr. Pinch. Bull became a bankrupt in 1752 (Gentleman’s Magazine, 1752, page 336), and his death is noted ten years later in the Court Book of the Masons’ Company.

He signs monuments to John Lloyd, 1740, in the private chapel of Aston Hall, Salop, and to Sir Robert Godschall, 1742, at Albury, Surrey.

BULLOCK, GEORGE, of Liverpool
d. 1818

He was born in Liverpool and worked there as a sculptor and modeller, exhibiting both at the Royal and Liverpool Academies between 1804 and 1816, and acting as President of the latter body, 1810–1811. According to The Stranger in Liverpool (printed 1812), “the showrooms of Mr. George Bullock contain statues, figures, tripods, candelabras, antique lamps, sphinxes, griffins, etc., in
marble, bronze and artificial stone. There is also a
good collection of busts, among them many of the
most distinguished characters in Liverpool and its
neighbourhood, modelled by himself.”

Bullock also worked, under the name of “Mona
Marbles,” quarries which he had discovered in
the centre of the island of Anglesey. These contained
two beds of marble, one resembling “in colour and
effect oriental porphyry and the other verd
antique.” For some time he conducted the business
from Liverpool, sending the blocks of marble to
London, where they were made into chimney-
pieces. One of these is illustrated in Ackermann’s
Repository of Arts, for 1816 (Vol. XV, page 19).
The material seems to have been much admired
and “when enriched with brass work of ormolu”
exceeded “in splendour the most elaborate
carvings in statuary,” according to a writer in
Scott’s Magazine (1815, page 255). In 1813
Bullock left Liverpool for London to become a
director of the Mona Marble Works.

The busts which he exhibited in Liverpool and
at Burlington House included those of W. Roscoe
(1804), W. Stevenson (1804), Master Betty (1805),
the Duke of Gloucester (1806), Sir W. Ellford
(1807), Mrs. Siddons (1808), Sir James Smith
(1810), Dr. Wilkinson (1810), Lord Tamworth
(1811), Mr. Sadler (1812), Colonel Fraser (1813)
and W. Hey (1816). In 1812 he exhibited a bust of
Kemble at the Egyptian Hall. In 1807 he ex-
ecuted a statue of Lord Nelson in artificial stone
which was erected in Liverpool (Monthly Magazine,
1807, Vol. 1, page 396), and in 1814 he made a
cast of the bust of Shakespeare in Stratford-on-
Avon Church. The design for the statue was used
for the frontispiece of the first volume (1807) of the
Literary and Fashionable Magazine, while a large
number of copies were made of the Shakespeare
bust. Some of them may still be seen outside inns
or public buildings in country towns; for example,
there is one at Frome in Somerset. On 3 May,
1819 Mr. Christie held a sale of the contents of
“the late Mr. George Bullock’s house at 4, Tenter-
den Street, Hanover Square.” Among the lots
were a number of Mona Marble chimney-pieces.
(Archives, Messrs. Christie.)
(Authorities cited in text.)

BULLOCK, Miss SYBELLA

While living in Sloane Street she was awarded,
in 1825, the large Silver Medal of the Society of
Arts for “a bust from life.”

BULMER, WILLIAM, of Stockton
fl. 1833–1858

Bulmer was a minor statuary who signs tablets

BULOCK, Miss SYBELLA

While living in Sloane Street she was awarded,
in 1825, the large Silver Medal of the Society of
Arts for “a bust from life.”

BULMER, WILLIAM, of Stockton
fl. 1833–1858

Bulmer was a minor statuary who signs tablets

BUMPSTEAD, JOHN
fl. 1673–1683

In 1679 he carved statues of Charles I and
James I, in wood, for the Clothworkers’ Hall
(Company Archives).

In 1673 he received £47 for “carving work
about the public stairs at Queenhithe,” and, in
the same year, was employed on masonry work at
the Guildhall (Guildhall Library, MS. 184/4).
In 1683 he was paid £17 for carving at the
Mathematical School at Christ’s Hospital (Christ’s
Hospital Account Books).

Bumpstead was Upper Warden of the Masons’
Company in 1676 and Master two years later.
According to Robert Hooke (Diary, page 329),
he made, in 1677, the monument to Miss Garaway
for the Church of St. Peter-le-Poor.

Burch, E., R.A.
b. 1730, d. 1814

According to the New Monthly Magazine (1816,
page 417), Burch was originally a waterman and
“his first effort in painting was exercised in the
imitation of a gold band round his hat and the
superior style of the interior of his wherry.”

He is chiefly known as a gem-engraver and
wax-modeller and entered the Royal Academy
Schools in 1769, becoming an Associate a year
later and a full member in 1771. He was the first
Royal Academician to be elected by his fellow-
members, all of whom had been nominated by the
King.

In 1788 Burch was appointed engraver to the
King and the Duke of York for “medals and seals
in stone.” Two years later he was given a similar
appointment by the King of Poland, and he also
worked for Wedgwood, for whom he modelled
portraits of George III and Queen Charlotte.
He became the Academy Librarian in 1794 and
held the post until his death, although after a few
years illness prevented him from carrying out his
duties. By 1796 he was in financial difficulties, for
in that year the Academy made him a gift of £100;
later on they also granted him a pension (Royal
Academy Archives).

Burch exhibited at the Academy, 1771–1808,
and at the Society of Artists, 1760–1769, showing
various works, including engraved gems, sulphur
casts and models in wax. Among the last-named
were portraits of Dr. Robinson, Primate of Ireland.
BURCHARD

BURCHARD, C.
fl. 1716
Possibly a pupil and assistant of John Nost (q.v.), he modelled for the Duke of Chandos a large equestrian statue of George I (cast and gilded by Nost), which was set up at Canons about 1716. When that house was demolished the statue was purchased in 1748 by the inhabitants of Leicester Fields, who erected it on a stone pedestal in the centre of the square. Here it remained until 1851, when it was removed to make room for an exhibition. It was replaced in 1862, much damaged and disfigured, and was finally sold in 1872 for £16. It was the ill-treatment of this statue that determined the Government in 1854 to bring in a Bill placing all statues in public places under the care of the Board of Works.

BURGESS, CLEMENT,
of Petworth
fl. 1820-1830
In the Sussex directory of 1828 Burgess describes himself as "Statuary and Architect." He made Portland-stone pedestals for Petworth House in 1830 (Archives, Lord Leconfield). He signs a tablet to John Salter, 1820, at Fittleworth, Sussex.

BURGESS, D., of Sandbach
He signs a square tablet with well-cut lettering to John Wilkins, 1740, at High Offley, Staffordshire.

BURGISS, JOHN, of Uxbridge
fl. 1800-1830
In 1802 he was employed under Sir John Soane on masonry-work at the Treaty House, Uxbridge (Soane notebooks). He signs tablets to John Bell, 1800, Harefield, Middlesex; Peter Parker, 1804, Chalfont St. Giles, Bucks; Alexander Stewart, 1820, Wingrave, Bucks; Mrs. Tillyer, 1827, Harmondsworth, Middlesex; Thomas Allen, 1829, Chalfont St. Giles, Bucks.

He was succeeded by his son, F. Burgiss, who signs a number of tablets, including those to Charlotte Raine, 1832, Little Missenden, Bucks, and Thomas Clarke, 1840, Ickenham, Middlesex.

BURLOWE, HENRY BEHNES
b. 1802, d. 1837
He was the brother of William Behnes (q.v.) and took the name of Burlowe at the suggestion of the art critic, S. C. Hall. The reason given was that he did not wish his work to be confused with that of his more famous brother, but the *Art Journal* of 1864 attributed the change to his desire to dissociate himself in the public mind from William, whose irregular life was apparently well known.

Burlowe attended the Royal Academy Schools in 1821 and won a Silver Medal two years later; he exhibited at the Academy, 1831-1833. In 1834 he went to Rome, where he had many patrons among the English residents, but died there during the cholera epidemic of 1837 and was buried in the English Cemetery at Monte Testaccio. The *Art Union* said in its obituary (1840, page 193) that "no person ever had more friends or earned them and merited them better. A more upright, manly or straightforward person never lived; and it will not be too much to say that no one with means so limited ever did more good to those who required assistance."

(*Art Journal*, 1859, page 201.)

BURMAN, BELTHASAR
fl. 1678-1688
Son of Thomas Burman (q.v.), he became free of the Masons' Company in 1678 and two years
later carved the magnificent standing figure of Rachel, Countess of Bath, in Tawstock Church, Devon. This, except for the pedestal, is a replica of the elder Burman’s statue of the Countess of Shrewsbury at St. John’s College, Cambridge, but owing to a misreading of the sculptor’s name in the Wrey Archives it was for many years quite mistakenly assigned to Bernini (1598-1684). Belthasar Burman also signs the monument to Brian Duppa (d. 1662) in Westminster Abbey.

BURMAN, THOMAS
b. 1618, d. 1674

Burman, who was bound apprentice to Edward Marshall (q.v.) in 1633, is chiefly remembered as the master of John Bushnell (q.v.), though the few works he is known to have executed show him to have been an artist of considerable merit. The most important of these is the statue of the Countess of Shrewsbury, 1671, at St. John’s College, Cambridge, in the Architectural History of Cambridge, Vol. II, page 320), and in the same year he was paid £38 for a marble chimney-piece for Alderman (afterwards Sir) Robert Clayton’s banking-house in Old Jewry (Sir Robert Clayton’s ledger, Guildhall Archives).

Burman signs the large monument with a life-size standing figure of John Dutton (d. 1656) at Sherborne, Glos; according to Vertue (Walpole Society, Virtue IV, page 169), he was also responsible for the monument to the Rev. and Mrs. Beale, 1672, at Walton, Bucks, which has portrait-busts set in oval niches.

He was buried in the churchyard of St. Paul’s, Covent Garden, where a stone surrounded by an iron railing bore the inscription: “Thomas Burman, sculptor of St. Martin’s, died March 17th, 1673/4.” His widow, Rebecca, seems to have carried on the business after his death, for Martin Johnson was bound apprentice to her in 1679 (Archives, Masons’ Company).

BURNARD, NEVIL NORTHEY
b. 1818, d. 1878

He was born at Altarnun, Cornwall, the son of George Burnard, a mason, and the only education he received was from his mother, who kept a dame’s school and made straw bonnets in her spare time. When he was old enough he worked as mortar-boy to his father and, at the age of fourteen, made his grandfather’s tombstone for the village churchyard. Two years later he carved in slate a group depicting the death of Laocoon and his sons and sent it to the exhibition of the Royal Cornwall Polytechnic Society at Falmouth, where it won a Silver Medal.

Sir Charles Lemon, M.P., became interested in Burnard and took him to London, where he prevailed upon Chantrey to employ the young man in his studio. In 1848 the influence of the same patron secured permission from Queen Victoria for Burnard to model a bust of the Prince of Wales. This was exhibited at the Royal Academy in the same year and afterwards sent to the Polytechnic Hall in Falmouth.

Burnard, who continued to exhibit at the Academy until 1873, married when he was in London and for a time all went well. On the death of his wife, however, he took to drink and deteriorated so rapidly that by the end of his life he was living like a tramp, wandering about Cornwall and earning a pittance by drawing portraits and sketches at farms and public-houses, for he seems to have been equally skilful with his pencil. He died in Redruth Workhouse on 27 November, 1878.

In his younger days Burnard appears to have been regarded as a local celebrity. Caroline Fox, in her Memories of Old Friends, writes that on “4 October, 1847, Burnard our Cornish sculptor dined with us. He is a great powerful, pugilistic-looking fellow at twenty-nine.” There is a small profile self-portrait of him at Penpont House, and he also executed the relief of John Wesley (1834) on Altarnun Methodist Church. He signs monuments to the Rev. Robert Newton, 1854, in the Wesley Chapel, City Road, and the Rev. Hugh Rogers, 1858, at Camborne, Cornwall.

(D.N.B.; Art Union, 1848, page 180; Builder, 1852, page 205, and 1854, page 467; S. Baring Gould’s Cornish Characters and Strange Events, page 186.)

BURNELL, —
fl. 1733-1750

He signs monuments to Elinor Phillips, 1733, at Haverfordwest, Pembroke, and to John Warden, 1750, at Cuckfield, Sussex. It has been impossible to discover whether he was any relation to Thomas Burnell (q.v.).

BURNELL, THOMAS, and Sons,
of London
Firm fl. 1761-1841

The firm consisted of Thomas Burnell, his son Henry, and the latter's son Thomas, who was apprenticed to his father and became free "by patrimony" in 1792. In the late years of the eighteenth century they were also joined by a George Burnell, who had been summoned to "take up his Freedom" in 1772 by the Court of Assistants of the Masons' Company (Court Book, Masons' Company).

The elder Thomas was born about 1740, the son of John Burnell, "citizen and joiner," and was apprenticed to Edward Anderson (q.v.) in 1754. He became free in 1761 and was Master of the Masons' Company in 1783. In 1790 he and his cousin, a Mr. Tibbs, were left £60,000 between them by their uncle, John Burnell, who had been Lord Mayor two years previously (Gentleman's Magazine, 1790, page 89).

On 9 May, 1792, Burnell was appointed mason to the Inner Temple, a post in which he was succeeded by his grandson Thomas, who was employed under Savage to carry out the drastic "repairs" to the Temple Church. The estimate for the work, however, was exceeded by no less than £6,000; inquiries were made and, as a result, the Committee of Members resolved on 30 April, 1841, that "Mr. Burnell be discharged from his present employment as Mason at the Temple Church."

The monuments executed by the firm in the eighteenth century have finely cut and beautifully finished details, the two most important being those which commemorate John Blencowe, 1777, at Marston St. Lawrence, Northants, and the D'Anvers family, 1790, at Culworth, in the same county. The former has a fine urn, while the latter (a large work, 16 ft. high) has a sarcophagus with a cherub standing on either side.

The Burnells also sign monuments to Benjamin Wheeler, 1783, at Ewelme, Oxon; Mr. Baldwin, 1785, at St. Leonards, Bucks; Major Richard Boom, 1795, at Romsey, Hants; Stephen Wright, 1797, in Hammersmith Parish Church; Captain John Barfoot, 1807, in St. Matthias, Poplar; and Joseph Peel, 1821, at Burton-on-Trent.

BURNS, —

At the Robert Adam sale in 1818, Lot 3 is described in the catalogue as "ten tablets and parts of friezes modelled by Burns."

BURT, JOHN, of Callington

He signs a large slate ledger with a relief of a woman kneeling by a prayer-desk to Ann Holiday, 1753, at Callington, Cornwall.

BURTON, —

Probably a local craftsman, he signs a ledger with a fine coat of arms and mantling to Ann Wigley, 1786, at Scraptoft, Leicestershire.

BUSHNELL, JOHN
d. 1701

Bushnell, who was the son of a plumber, was apprenticed to T. Burman (q.v.), but before his seven years' service was up he was entrapped into marrying a servant-maid, who declared that he was the father of her illegitimate child, whereas she had in reality been seduced by Burman. Bushnell was disgusted by the trick which had been played upon him, and when Burman sent him down to the country to supervise the erection of a monument, seized his chance to escape. He fled overseas, taking £15 of his master's money with him.

The young man first travelled to Rome, where he studied for a time, and then wandered across Europe. He had worked in Flanders and France, as well as in Italy, before he finally settled in Venice, and it was here that he carved the vast monument of Alviso Moncennigo for the Church of S. Lazarro di Mendicanti. He had been living abroad for twenty-two years when an English nobleman, who was visiting Venice, persuaded him to return to his native country.

Bushnell accordingly returned to England, where he was presented to Charles II, who received him courteously. He apparently considered, however, that his fame in Italy made him the superior of all English artists and, "being of a haughty mind," expected "to have particular honours done to him, according to his extraordinary merit, by all the courtiers and nobles as well as the King, which (as) they did not, he soon grew disgusted" (Walpole Society, Virtue, Vol. I, page 86). The only person Bushnell had any right to treat with disgust was his former master, who had treated him so shabbily and who now had the effrontery to sue him for breaking his apprenticeship and stealing the £15.

Bushnell's first public works in England were the statues of the King and Queen which he made for Temple Bar in 1670, and for which he received
£440 (City Corporation MSS., Temple Bar, B.5/27). In the same year he made the effigy for the Duke of Albemarle's state funeral in Westminster Abbey, executing the face and hands in wax and the rest in "stucko." In 1671 he carved the statues of Charles I, Charles II and Sir Thomas Gresham for the Royal Exchange which are today housed in the Old Bailey. The bill for the last-named is in the City Corporation Records (Gresham Account Ledger, 1665-1680) and reads: "Paid to John Bushnell £37 the City moiety in full for making and setting up the figure of Sir Thomas Gresham over the South entrance of the Royal Exchange by order dated Nov. 7th 1671." Bushnell had agreed to do other Royal statues for the Exchange, but when he discovered that another sculptor had "made interest to make some of them, contrary to agreement... though he had begun six of them, he would not proceed and (they) are unfinished to this day" (Walpole Society, op. cit.).

Vertue (op. cit.) describes Bushnell as a haughty man who could not bear to be contradicted and who used to say "that this nation was not worthy of him, nor his works; when any nobleman had once slighted him he would never have anything to do for him or say to him." When he heard that his fellow-sculptors had declared that he could not model a naked statue, he proceeded to make one of Alexander the Great. Vertue saw this many years afterwards and declared that it had "the most wretched to the neck, the hands ill-formed, the feet crippled" (op. cit.).

As time went on the sculptor became more and more eccentric and unbalanced. On one occasion, hearing some courtiers discussing the wooden horse of Troy and declaring that it would be impossible to construct such an animal, he set about making one of wood covered with stucco. The head was so large that there was room for twelve men to sit round a table inside it, the eyes forming the windows. The work was practically completed when a sudden gale blew it over and smashed it to pieces.

In the reign of James II Bushnell began to build himself a house near Hyde Park, but it was unfinished in 1701 when he died there of gout in the stomach. He was buried in Paddington, where the curious entry in the Parish Register reads: "May 15th, 1701. Buried John Bushnell, an image-maker." He was survived by a widow (Mary died on 22 July, 1704) and several children, including two sons who lived in their father's unfinished house "like hermits or brutes," refusing to allow anyone to enter or to see their father's works, which, indeed, they proceeded to destroy. One son, Robert Bushnell, was paid a small pension by the Masons' Company until 1717. He presumably died in that year, for the payment for 1718 is made to "Widow Bushnell" (Archives, Masons' Company).

As a sculptor Bushnell could either be extremely good or madly bad. Dallaway, writing in the Gentleman's Magazine (1818, Vol. I, page 595), attributes to him the monument of Lady Henrietta Wentworth, 1686, at Toddington, Bedfordshire. If this is correct he must have been a very great sculptor, for though the work is sadly mutilated it is still one of the loveliest of its kind in England. Mrs. Esdaile (Archaeological Journal, 1930, page 161) ascribes it to William Stanton (q.v.), but I am inclined to think it is far beyond Stanton's powers.

Of Bushnell's other monuments, that commemorating Sir Palms Fairborne, 1680, in Westminster Abbey, was "originally of greater importance than it now appears, it having been ornamented with relics of Moorish towns and other sculptures" (Brayley's Westminster Abbey, Vol. II, page 240). The most dramatic is the great baroque group of William Ashburnham and his wife, 1675, at Ashburnham, Sussex, with its kneeling figure of the husband, his hands outstretched in agonized entreaty towards the dying woman, whom cherubs beckon to the skies. Notes concerning Bushnell and the black-marble background to the monument are among the Ashburnham Archives. Magnificent also is the proud standing figure of Lord Mordaunt, 1675, in Fulham Parish Church. Three years later the sculptor was paid "for taking down and setting up part of the monument" when Lady Mordaunt was buried with her husband (Churchwardens' Accounts).

In the Chirk Castle archives an entry in the accounts for 1676 notes that "John Harrys" was paid "for his journey to Weston for my lady's picture for Bushnell the stone-cutter to draw a pattern to make her monument at Chirk." Besides this monument to Elizabeth, Lady Myddleton, he also made in the same year another with two busts in memory of Sir Thomas and Lady Myddleton. Both these monuments are still to be seen in Chirk Parish Church. Another of Bushnell's monuments, with a life-size effigy of Dame Mary May, was formerly in Mid Lavant Church, Sussex, but was interred in a vault during a Victorian restoration. Dallaway, writing in 1815, described it as "capricious, but the portrait exact and the execution good" (Western Sussex, Vol. I, page 115).

The sculptor's monument to Abraham Cowley (d. 1667) in Westminster Abbey was paid for by
the Duke of Buckingham. The latter’s finances, however, were so involved that they were taken over by Alderman Sir Robert Clayton, and it was he who made the disbursements to Bushnell amounting to £100 between 5 June and 15 September, 1674. These payments for “setting up Mr. Cowley’s monument” are noted in Sir Robert’s banking ledger in the Guildhall Library.

Two other monuments known to be the work of Bushnell are those to Henry Stanley, 1670, at Little Gaddesden, Herts, and Lord Thomond, 1691, at Great Billing, Northants. He also executed the busts of Charles II in the possession of Lord Hastings, and of Mrs. Pepys, wife of the diarist, formerly in St. Olave’s, Hart Street. A terra-cotta bust of Charles II in the Fitzwilliam Museum, Cambridge, has also been attributed to him, while Vertue (Walpole Society, Vol. I, page 129) says that he cut “a fine bust in marble of Mr. Talman, architect.”

One statue by Bushnell now no longer appears to be in existence; it is that of James II, and was carved in 1685 for the façade of Southwark Town Hall. The payment for it is noted in the Rentals of the Bridge House for 1686 (Corporation of London Records Office): “June 12th, 1686 paid Mr. Bushnell £80 in full for making the King’s statue at St. Margaret’s Hill.”

Southwark Town Hall and Court House were pulled down in 1793 and the statue was bought by some local inhabitants. In 1834 it was standing in a garden in St. George’s Road, Kent Road, but I have failed to trace its history after that date. Two other statues by Bushnell have also disappeared, those of St. Peter and St. Paul which he made for the Chapel at Somerset House. (Mrs. Esdaile, Walpole Society, Vols. XV and XXI; Walpole Society, Vertue Notebooks: Archaeologia, Vol. LX, Part II, pages 559 and 563.)

**BUSHROD, WILLIAM, of Weymouth**

Son of H. Bushrod of Weymouth, mason, he signs a large marble tablet to Charlotte Chaining, 1791, at Maiden Newton, Dorset.

**BUSSELL, WILLIAM, of Gloucester**

fl. 1830–1842

He signs a tablet to Sophia Morris, c. 1830, at Kidwelly, Carmarthenshire.

**BUTLER, TIMOTHY**

b. 1806

He won a large Silver Medal from the Society of Arts in 1824 and in the following year attended the Royal Academy Schools on the recommendation of W. Behnes (q.v.); two years later he was awarded the Academy Silver Medal.

Butler was a popular portrait-sculptor and his busts seem to have been excellent likenesses. In 1842 he executed one of Sir James Eyre which the Art Union of that year (page 128) described as “a work which would do honour to the greatest of our sculptors, a finer bust than this we have never seen, it will bear comparison with any of modern times.”

In 1863 Butler made a memorial to Professor Narrien for the Staff College at Farnborough. In 1870 he designed lamp-standards for the Thames Embankment to be set up on the landing-place between Hungerford and Waterloo Bridges, and also the lions’ heads which “appear on the river front of the pedestals both on the north and south sides of the river” (Builder, 1870, page 210).

He exhibited over one hundred busts at the Royal Academy between 1828 and 1879. His statue of the Earl of Leicester (1858) is on Dereham Town Hall, Norfolk, and he also executed one of Cobden (1877) for Bradford.

**BUTLIN, W.**  
b. 1794, d. 1836  
When his widow applied for help to the A.G.B.I. after her husband's death she stated that: "He had been sent to visit Rome by the assistance of Lord Spencer to perfect his art." Between 1828 and 1835 he exhibited various works at the Royal Academy, including a model for a statue of Lord Althorp to be executed in bronze, which the Gentleman's Magazine (1834, Part I, page 631) considered “wanted proportion.”

In 1836 Butlin applied to the Academy for assistance and was granted eight guineas (Royal Academy Archives). He died in the same year, and his widow, who was left with seven children, was granted a pension in 1837.

**BUTTON, BENJAMIN**  
fl. 1791–1802  
Button, who was probably a local Northamptonshire statuary, signs a tablet with excellent details to George Ashby, 1802, at Hazelbeach, Northants. Another tablet in this church commemorates Mrs. Alcock, 1798, and he also signs a tombstone to Joseph Hearne, 1791, in Kelmash churchyard in the same county.

A “John Button” was paid £789 between 1769 and 1777 for masonry work at Bowood (Archives, Marquess of Lansdowne).

**BYRD, WILLIAM.** See Bird.
Cacciatori, B., of Milan
b. 1794, d. 1871
He signs the monument, with a relief of a woman holding an infant, to Lady Mildmay, 1840, at Dogmersfield, Hants.

Cackett, W.
In 1793 he received £225 from Lady Twisden for carving and erecting a tomb in the churchyard at Newington, Kent, to Isaac Wildash, the family steward (Archives, Twisden, of Bradbourne).

Caesar, Anthony
In 1727 he carved a coat of arms over the hall door of Lord Bingley’s house in Cavendish Square, and also made some mirror-frames for the same patron (Lane-Fox Archives, Bramham Park, Yorks).

Cakebread, George,
of Bloxham
fl. 1806–1848
He worked both in marble and stone, and his tablets, considering that they were executed by a village mason, have careful and well-cut details. Monuments by him in Oxfordshire include those to the Woolston family, 1806, in Adderbury churchyard; Mary Hitchcock, 1818, in Deddington churchyard; Richard Kirby, 1823, at Bicester; and Richard Austen, 1836, at Bodicote. Northamptonshire examples of Cakebread’s work include monuments to Elizabeth Blencoe, 1814, and John Blencowe, 1830, both at Marston St. Lawrence; and to the Rev. Moses Bartholomew, 1838, at Edgcote.

Caldwell, George,
of Chester
In 1824 he exhibited a bust of “Mr. Harrison the Architect” at the Liverpool Academy.

Calvert, James
fl. 1765–1783
In 1766 he was a pupil of J. F. Moore (q.v.), and in the same year received a premium of fifteen guineas from the Society of Arts for a relief of the “Death of Socrates” in Portland stone. In 1770 he deserted sculpture for the stage and appeared in Dublin in Otway’s “Venice Preserved,” but though favourably received he did not remain an actor for long, but returned to his old profession and started to model wax portraits in Dublin. Calvert later came back to England and was apparently employed by J. Wilton (q.v.), for in 1780 he went to Jamaica to erect his master’s monument to Sir B. Keith in the Cathedral. By 1783 he had returned to Britain. He exhibited wax portraits at the Free Society and the Society of Artists, 1765–1783.

(Trickland’s Dictionary of Irish Artists; MS. Notes in Minute-books of Society of Artists.)

Campbell, Thomas
b. 1790, d. 1858
He was born in Edinburgh of humble parents on 1 May, 1790, and at an early age was apprenticed to John Marshall, a marble-cutter, later transferring to James Dalzell, who took over the business on Marshall’s death. Campbell’s first patron was Gilbert Innes, who was struck by the young man’s intelligence when he was putting up a chimney-piece in the latter’s house in St. Andrew’s Square, Edinburgh. This proved a fortunate encounter, for it was Innes who provided him with money to go to London and study at the Royal Academy Schools. Campbell also seems to have worked for E. H. Baily at this time. B. R. Haydon, the painter, notes in his autobiography that when he was lodging in Somers Town in 1817 it was near “where Baily the sculptor was living and where he made his first bust. Campbell, the sculptor, was then his journeyman.”

In 1818 Campbell, again assisted by Innes, went to Rome. Here he studied and later began to carve busts, for which he received a number of commissions from fellow-countrymen visiting Italy. He apparently possessed “the peculiar felicity of seizing the individual likeness of his sitters and of giving them a sentiment and expression highly characteristic,” though he had not “a ready imagination” and was “slow in creation.” When he had “conceived an idea he studied with patience every detail and, having a certain mistrust of his own judgment upon his work, he willingly listened to advice and comment and spared no pains to give it the utmost perfection of finish” (Art Journal, 1858, page 107).

One of Campbell’s earliest patrons was the Duke of Devonshire, by whom he was commissioned to execute a statue of Princess Pauline Borghese, sister of Napoleon, and famous for the beauty of her hands and feet. Of these the sculptor
took casts and afterwards reproduced them in bronze and silver. Campbell while he was in Rome mixed very little with his fellow-artists. He was of a retiring and sensitive nature and preferred to work in his studio rather than to go into society. By 1830 he had commissions to the value of £30,000 and decided to return to England, though he retained his studio in Rome for many years, frequently returning to Italy to purchase marble, etc. In London he first lived in Leicester Square, and afterwards took a house in Marlborough Street, where he remained until his death on 4 February, 1858. He was buried in Kensal Green cemetery.

"In person he was of the middle stature, of a robust frame, lively in temperament, although occasionally subject to depression of spirits. He was never very sanguine and naturally reserved and shy, which he habitually tried to conceal and carry off by a brisk and somewhat boisterous manner. No appeal was unsuccessfully made to him in any case of distress" (Art Journal, 1858).

Campbell exhibited at the Royal Academy 1827–1857 and at the Great Exhibition showed "Portrait of a Lady as a Muse." (D.N.B.; Authorities cited in text.)

**CAMPILLEMAN, ROBERT and RALPH**

Probably York masons. In 1784 they built the stable block at Castle Howard, including the carved work (Archives, Castle Howard).

**CANE, R.**

_b. 1796_

He attended the Royal Academy Schools in 1818, and in the same year exhibited a bust of a Mr. Brindle at the Academy.

**CANOVA, ANTONIO**

_b. 1757, d. 1822_

Canova exhibited at the Royal Academy, 1817–1823. A list of works executed by him for English patrons is given in _The Works of Antonio Canova_ by the Countess Albrizzi (London, 1824).
His three monuments in England are those of the Margrave of Anspach, 1806, at Speen, Berks, and of Sophia, Countess Brownlow, 1814, at Belton, Lincs, and Lord Harrington, 1829, at Elvaston, Derby.

CANSICK, H.
Signs a tablet to James Redfern, 1826, in Kentish Town Parish Church.

CAPIZZOLDI, or CAPITSOLDI, — fl. 1755-1774
He was born in Italy and worked in Florence, but yielded to the persuasion of J. Wilton (q.v.), whom he met in Florence, and accompanied him to England in 1755. On his arrival in London Capizzoldi took the attic storey of a house in Warwick Street, where he proceeded to improve the appearance of his poorly furnished sitting-room by painting chairs, pictures and curtains on the bare walls.

During his stay in England he worked with Wilton, and when the latter received the commission from Parliament to execute the Abbey monument to Wolfe, it was Capizzoldi who carved the bronze relief of the General's death. The work was unveiled in 1772, but it is not known whether the Italian was still in this country at the time. He had certainly returned home by 1774, for in that year T. Banks (q.v.) met him in Rome and received instructions from him on marble-cutting (J. T. Smith's Nollekens and his Times, Vol. II, pages 102 and 122).

C. F. Bell (Annals of Thomas Banks, page 20) thinks that the sculptor's real name was Giovanni Battista Capezzuoli, who was working in Florence about 1760 and again in 1782 and who seems to have come to England. J. T. Smith stated that Capizzoldi had been a pupil of the Italian sculptor Algardi, but this, as Mr. Bell (op. cit.) points out, is impossible as Algardi died in 1653.

CARDELLI, DOMINICO, of Rome fl. 1786-1810
He signed the monument, erected in 1789 in St. Mary Aldermanbury, to the memory of Lieutenant John Smith, drowned off Staten Island, U.S.A.
A "P. Cardelli" (who may be a son) exhibited busts, etc., at the Royal Academy, 1815-1816, and at the British Institution in the latter year.

CARDWELL, HOLME b. 1815
He was born in Manchester, and in 1834 attended the Royal Academy Schools on the recommendation of Chantrey (q.v.), winning a Silver Medal in 1839. In 1841 he went to Paris, where he studied for three years under the sculptor P. J. David (q.v.) and also distinguished himself at the Académie Royale. From Paris he moved to Rome and remained there for some considerable time. A writer to the Gentleman's Magazine in 1844 (Vol. II, page 71), who had just visited Cardwell's studio, mentions that he was engaged on a group for a Mrs. Beaumont, of Yorkshire, and was also executing another entitled "Greyhounds Playing" which "showed a keen observation of nature and great powers." In 1852 Cardwell sent to England his colossal marble group of "The Good Samaritan," which had taken him two years to complete. This work, which had been "highly praised by Gibson and other sculptors in Rome" (Art Journal, 1853, page 297), was placed in the hospital at Cheltenham. In 1855 he made a statue of "Sabrina" (now in the Horse Museum) for J. Murray. Cardwell exhibited at the Royal Academy, 1837-1856, where his busts included those of John Kennedy (1837), Thomas Henshaw (1840) and Dr. Dalton. In 1840 he also showed a bust of Dr. Marsh at the Birmingham Society of Artists and, four years later, won the Heywood Medal at Manchester. The sculptor's "Shepherd Paris" was lent by Mr. J. Pender, and his "Venus Victrix" and "Huntsman and a Stag" by Mr. R. Openshaw to the Exhibition of Art Treasures of the United Kingdom held in Manchester in 1857. The "Venus Victrix" is now in Manchester Art Gallery. In the William Leech Sale at Christie's on 21 May, 1887, Cardwell's "Nymph with Bow and Quiver" fetched two hundred and forty guineas and his "Nymph with Bow and Quiver" a hundred guineas.

CAREW, JOHN EDWARD b. 1785(?), d. 1868
He was born at Tramore, near Waterford, and is said to have been the son of a local statuary. He apparently studied art for a time in Dublin before, about 1809, he went to London and was engaged as an assistant by Sir Richard Westmacott (q.v.). Carew afterwards stated that, during the latter part of his time with Westmacott, he earned as much as £1,500 to £1,800 a year, besides another £800 from his practice in his own studio. An income of over £2,000 seems an incredibly large sum for a minor sculptor in those days, but even if Carew exaggerated it does explain the large fortunes left by men of the status of Bacon, Chantrey and Nollekens.

About 1822 the Earl of Egremont invited
Carew to work entirely for him to the exclusion of all other commissions. The sculptor accepted the offer and the arrangement lasted until his patron's death in 1837. During this time he received generous help, not as definite payment for his services, but to keep him going and to pay expenses incurred for marble, etc., but he also seems to have made up his mind that he was going to be left a large legacy under Lord Egremont's will. When he found that he had been left nothing, he proceeded to bring an action against the Earl's executors, claiming the fantastic sum of £50,000 from the estate for works executed.

The executors, anxious that no slur should rest on the name of a man who in his lifetime had been one of the most distinguished and generous patrons of British art, decided to allow the case to go to trial. They were even generous enough to supply Carew with money when he declared he could not afford the legal expenses. Their attitude was, however, amply justified, for when the case was heard at the Lewes Assizes in 1840 it was proved that Carew had received no less than £20,000 while working for his patron and he was nonsuited. In the following year he was declared a bankrupt, and it was during these proceedings that he gave the following version of the arrangement between himself and the Earl: "The late Earl of Egremont proposed my leaving Sir Richard Westmacott, his Lordship agreed to settle £1,700 a year upon me. I was eight years in town after that period, during which Lord Egremont occupied the greater portion of my time, and from that period to the present (upwards of seven years) having been induced to quit London on purpose, I devoted the whole of my time and services to his Lordship, sacrificing all the prospects which a residence in town and competition with other sculptors held out and during the best period of my life. I built a house and large studio at Brighton at the desire of Lord Egremont and expended upon those, and also with my changes of residence, considerable sums."

Besides executing statues and busts, Carew also made two marble chimney-pieces for Buckingham Palace in 1829 (P.R.O. Works 19/3). His contract for these was £800, but for some reason he seems to have received only £500. In 1830 he made other chimney-pieces for Lord Egremont's seat at Petworth in Sussex and, five years later, the altar-piece for the Roman Catholic Chapel at Brighton. As he was working for Lord Egremont at the time it was thought that his patron must have paid for this, an idea which the latter hastened to contradict when he wrote to the Press that he had "never given, never thought of giving, and never intend to give, one shilling for the building or decoration of any Roman Catholic Chapel in England."

In 1841 Carew exhibited a "Descent from the Cross" which the Literary Gazette of that year (page 252) called a "noble, affecting and sublime production" which placed the sculptor "in the very highest order." Three years later he carved the Royal Arms for the Royal Exchange (Builder, 1844, page 419) and, in 1850, executed the great bronze relief of "The Death of Nelson" for the base of the column in Trafalgar Square. In 1853 he made the reredos for the Royal Bavarian Chapel in London (Builder, 1853, page 624), now in the Chapel of the Assumption, Warwick Street.

Carew exhibited at the Royal Academy, 1821-1846, and at the British Institution, 1824-1843. At the latter he showed in 1842 a figure of a "Boy Playing at Marbles" which the Art Union (1842, page 77) considered "a noble and beautiful statue, satisfactory to the anatomist and most valuable to the lover of art. Mr. Carew is an artist of the rarest powers."

At the Great Exhibition of 1851 Carew showed an "Alto-relievo for a Temple in Sussex." Towards the end of his life he presented his statues of "Meleager" and "Diana" to the Royal Hibernian Academy. By that time he had become partially blind and he died on 30 November, 1868, and was buried in Kensal Green Cemetery. His son, F. Carew, exhibited at the Royal Academy in 1834.

(Report of case of Carew v. Burrell and other Executors of the late Earl of Egremont; Strickland's Dictionary of Irish Artists; Art Union, 1840, page 50.)

CARLINE, JOHN, the Elder, and John, the Younger, of Shrewsbury
Firm fl. 1780–1845

The elder Carline and his partner Tilly designed and built the bridge over the Rea brook at Coleham Head in 1771, and the Welsh Bridge at Shrewsbury between 1792 and 1795. They were also responsible for Montford Bridge, which was designed by Telford, and in Shrewsbury itself for St. Alkmund’s Church and Claremont Buildings. In 1788 Carline built the portico of Adderley Hall, Salop, for Sir Corbet Corbet, while father and son later erected Pelwall House, Market Drayton, between 1822 and 1828.

In 1817 the elder Carline executed the four couchant lions at the base of the column erected to the memory of Lord Hill at Shrewsbury (Gentleman’s Magazine, 1817, Part II, page 393). In the same year his son became a Freeman of the town. It was the younger Carline who exhibited at the Royal Academy in 1825 and who, in 1839, built Grinshill Church, Salop.

The firm was responsible for a large number of monuments, and, in 1815, ordered a figure of “Fame” from Sir Francis Chantrey (q.v.) for one which they were making for a Mrs. Hill (Chantrey’s ledger, Burlington House). Their monument to Edward Poore, 1817, in Salisbury Cathedral was designed by the Rev. Hugh Owen, according to the New Monthly Magazine (1817, page 563), which described it as “perhaps one of the most perfect specimens of florid Gothic in the Kingdom.”

In 1828 the younger Carline prepared a “most elegant and chaste design” for a monument to the Rev. J. B. Blakeway. This “noble and splendid” work was later carried out in Grinshill stone and erected in St. Mary’s, Shrewsbury (Gentleman’s Magazine, Part II, page 316). The epitaph on their monument to John Simpson (d. 1815) in St. Chad’s Church, Shrewsbury, declares that Simpson “superintended the building of St. Chad’s, the bridges of Bewdley, Craig Ellachie, Dunkeld and Bonar, and the aqueducts at Pontcysylte and Chirk, and the locks and basins of the Caledonian Canal.” Other works by them in this church commemorate Richard Scott, 1821; the Rev. George Scott, 1832; and William Hazedelne, 1840. The first two have beautifully carved details, and the last a portrait-bust.

MONUMENTS
1789 Llanbodwell, Salop Francis Cunliffe
1790 Kinlet, Salop Catherine Baldwyn
1790 North Lydbury, Salop Hester Bright

1814 Hodnet, Salop John Hill
1814 Market Drayton, Salop Charles Groby
1817 Battlefield, Salop John Corbet
CARLINE, THOMAS,
of Shrewsbury

b. 1800

Carline, who was the second son of John Carline the Elder (q.v.), attended the Royal Academy Schools in 1821, and in the same year won the Isis Silver Medal for a single figure from the Society of Arts. He exhibited at the Academy between 1825 and 1828, showing in 1826 a figure of a sleeping child, Henry, son of the Hon. Thomas Kenyon. This “interesting and expressive” work was “fortunate enough to obtain one of the best situations in the sculpture room,” according to the Gentleman’s Magazine (1826, Part II, page 589). The same critic also considered the relief of a funeral procession on Carline’s monument to Sir John Hill, 1826, at Prees, Salop, “admirably executed,” declaring that “never did sculpture tell its tale more forcibly.”

CARLINI, AUGOSTINO, R.A.
d. 1790

A native of Genoa, he settled in London as a young man and later became one of the Founding Members of the Royal Academy. He exhibited there between 1769 and 1787 and, in 1783, succeeded Moser as Keeper.

About 1760 Carlini made a statue of his friend Ward, the quack doctor and inventor of friar’s balsam (a nostrum which the sculptor assisted him to concoct). Ward, to advertise himself and his remedies, paid Carlini £200 a year simply to keep the statue in his studio and appear to work at it when visitors or patrons were about. After the doctor’s death his executors promised to continue this annuity, but they failed to do so, and “the figure lay for some time disregarded in a stable at Westminster” (New Monthly Magazine, 1816, page 418). It now stands in the entrance-hall of the Royal Society of Arts, to whom it belongs.

In 1783, Paul Sandby, R.A., wrote to James Gandon, the architect, that he had “had the pleasure of seeing the models which Carlini has made for you, and think they possess great merit” (C. F. Bell’s Annals of Thomas Banks, page 54). The models referred to were of eight statues for the north and south fronts of the Dublin Customs House; they were destroyed by fire and bombardment during the Irish Rebellion of 1916. From 1776 until 1778 the sculptor was making statuary for Somerset House, where his work included three colossal keystones for the Strand front, in the form of masks representing the Rivers Dee, Tyne and Severn. He also received £240 for two Portland-stone statues over 7 ft. high of “Justice” and “Prudence” for the same building (P.R.O. A.O.1/2495).

In 1768 Carlini executed in wax an “Emblematical Figure Representing Maritime Power and Riches,” and advertised in the Press that he could supply reproductions of it in plaster-of-Paris at six guineas each. About a year later he sold for ten guineas each a number of models he had made of an equestrian statue of George III. One of these he presented to the Royal Academy, another is at Windsor Castle, while a third was formerly at Audley End, Essex. His bust of the King, executed in 1773, is at Burlington House.

Carlini died unmarried on 15 August, 1790, in Carlisle, and administration of his will was granted to “Elizabeth Watton, spinster,” his maid-servant and sole heiress. A sale of his effects was held on 13 January of the following year, and among the models sold were those of a “Colossal Head of George III,” the “Old Duke of Cumberland,” “The Death of Wolfe” and “A Dog.”

His monuments are on a heroic scale, the finest being those to the Countess of Shelburne, 1771, at High Wycombe, Bucks, and to the Earl and Countess of Dorchester, 1775, at Milton Abbey, Dorset. He also signs the monument to his friend, Dr. Ward, 1774, once in Westminster Abbey. His monument with a life-size statue of Lady Bingley, 1771, in the private chapel at Bramham Park, Yorkshire, is unsigned, but the model for it was Lot 54 in the sale already mentioned. He submitted a design for Alderman Beckford’s monument in the Guildhall which was not accepted, though a fine engraving of it was made by Bartolozzi (Gentleman’s Magazine, 1819, Part I, page 43). He was again unsuccessful in 1784 when he sent in a model for a statue of Admiral Lord Rodney, which it was proposed to erect in Jamaica (Royal Academy Archives).

Carlini also seems to have been of an inventive turn of mind, for the Court Book of the Royal Academy has the following entry: “19 March, 1771. Resolved that the apparatus for the use of the Academy according to a Design delivered by Mr. Carlini be carried into execution and that Mr. Carlini be desired to order and superintend making the Machine.”

(J. T. Smith’s Nollekens and His Times, Vol. II; authorities cited in text.)
CARPENTER, AARON, 
of London
fl. 1762–1767

According to the London Magazine of 1762 (page 173), he showed in that year a "marble statue of Acteon" at the Society of Free Artists, a work not mentioned by Graves in his list of Exhibitors. Carpenter continued to exhibit until 1767, showing impressions of seals, etc.

CARPENTER, ANDREW. See 
Carpentière, Andries

CARPENTER, EDMUND

In 1688 he was employed by Sir John Brownlow, who was then building Belton. From the prices he received he almost certainly worked in wood. Payments to him include £26 for "a very rich chimney-piece in the withdrawing roome to the great parlor, done with a variety of fish and shells with birds, foliage, fruit and flowers"; £25 for "one rich chimney-piece with birds, fruits and flowers in the withdrawing roome in ye little parlor," and £18 for "one chimney-piece in the great parlor with fruit and flowers." (Archives, Lord Brownlow.)

CARPENTER, SAMUEL, 
of London
fl. 1712–1729

In 1712 he made the statue of Queen Anne, formerly on the front of the Moot Hall at Leeds, and now in the possession of the City Corporation. The statue was given by Alderman Milner and "was generally esteemed the best that was ever made, not excepting the celebrated one in St. Paul's Churchyard" (Whitaker's Ducatus Leodiensis, Vol. II, page 249).

In 1729 Carpenter executed the statues for the façade of Moulsham Hall, near Chelsmford, and also the "lyons over the great piers" (Accountbook of the first Earl Fitzwalter).

CARPENTER, SAMUEL, of York
b. 1660, d. 1713

He became free of the Masons' Company of York in 1684 and, in the following year, was made a Freeman of the city (York Corporation Archives). In 1702 he received £72 3s. 3d. for the "carving on the obelisk at Ripon" (Ripon Corporation Archives). Between 1705 and 1706 he was working at Castle Howard, where he was responsible for "a dragon" costing £10, two stone vases, and the very fine "satyr gate" in the garden.

For the exterior of the house Carpenter executed "thirty-six pilaster capitals of the Corinthian order and seventeen pilaster capitals for the West Wing." He also carved the shield on the south front, and a shield and cherubim over the middle window. His bill for carved stonework on the north and south fronts, including festoon and busts, came to £206. For the interior he made twenty-six capitals of the composite order for the great hall and six scallop shells in a passage (Castle Howard Archives).

In 1710 Carpenter was commissioned by Ralph Thoresby to execute a bust of the elder Thoresby for Leeds Parish Church, and a monument to Ralph's friend, Mr. Thomas, for St. John's Church in the same city, but both these works have long since disappeared (Atkinson's Ralph Thoresby, Vol. II). He signs the monument, with a lovely bust, to Lady Elizabeth Stapleton, 1683, at Snaith, Yorkshire; the contract for this is published in The Ancestor, Vol. III, page 161. He also made a cartouche tablet in St. Mary's, Bishopphill Senior, York, but here the date and the inscription are now illegible.

Carpenter died 27 June, 1713 and was buried in St. Lawrence's, York. His wife, Frances, died in 1731, aged sixty-nine, but for some reason was not buried with her husband, but in the church of St. Dennis in the same city.

CARPENTER, STEPHEN, 
of Blandford
fl. 1770–1775

Between 1770 and 1775 he was the master-mason responsible for building Milton Abbey in Dorset, a house designed by Sir William Chambers. Lord Milton seems to have been very dilatory in settling his accounts, for in 1774 Chambers was forced to write and inform him that "Carpenter has been with me and is much distressed for money to pay debts contracted" (British Museum, Ad. MS. 41136).

CARPENTIÈRE, ANDRIES
b. 167?, d. 1737

Carpentière, who anglicized his name to "Andrew Carpenter" soon after his arrival in England, first worked as principal assistant to John Nost (q.v.), but later set up for himself. Vertue (Walpole Society, Vol. III, page 83) says that "he was a man in his time esteemed for his skill and made many works for noblemen and others of distinction in stone and marble." In 1722 he began working at Canons for the Duke of Chandos, but later quarrelled with him and lost his patronage. According to Vertue (op. cit.) the trouble was caused by Carpenter building some
houses and an inn not far from the mansion and then putting up a statue as a sign in the middle of the road close to the main entrance. The Duke, very annoyed, ordered him to take the statue down, which he firmly refused to do.

Carpenter had started to make lead statues at his yard at Hyde Park Corner before 1722. This yard was situated more or less where No. 94, Piccadilly stands today. At first the venture was a success, but “he had much ado to hold up his head at last,” owing to being undersold and having to lower his prices (Vertue, op. cit.).

One of his earliest patrons was Lord Carlisle, to whom he sent a price list of his lead figures. They included the following:

From this price list Lord Carlisle ordered, in 1723, “Hercules of Farnese, Spartan Boys, sitting Venus, and Faunus,” paying £84. The cases to send these figures from London came to £9 7s. 9d. It took a man nine and a half days to make the cases and besides the wood twenty-one pounds of “spike” and a thousand “double-tennis” nails were used (Archives, Castle Howard).

Another patron was the Duke of Kent, and on 9 August, 1730, the Duchess wrote to her husband that “the carrier will be at Mr. Carpenter’s for the statues on Tuesday morning.” This almost certainly refers to the magnificent lead groups still in the gardens at Wrest Park, Bedfordshire. A later letter mentions that Carpenter was also making a “blackamoor” and a “gladiator” for Wrest (Archives, Lady Lucas and Dingwall).

Other works in lead executed by Carpenter include a head of Cicero in 1716 for Lord Ashburnham (Ashburnham Archives), and two flower-pots and four figures of “The Seasons” for the first Earl of Bristol in the same year (Archives, Ickworth Park). In 1720 he was working for two directors of the South Sea Company, supplying figures and flower-pots costing £128 for Mr. Francis Hawes, of Purley Hall, Berks, and vases for Mr. Robert Chester, of “Briggens,” Herts (Inventory of Directors of the South Sea Company). In the Bodleian (Gough, Maps, 46) is a drawing of a vase designed by Gibbs and executed by Carpenter for Wimpole in Cambridgeshire.

In the minute book for the building of St. Paul’s Cathedral is, “Feb. 13th, 1716/17. Ordered that Mr. Bird and Mr. Carpenter, statuaries, do proceed to make Statues for St. Paul’s according to the direction and agreement made with them by Mr. James.” There is, however, no trace of any payment to Carpenter, and Bird alone was probably employed (Wren Society, Vol. XVI, page 126).

Carpenter’s monuments are important, the finest of them commemorating the Earl and Countess of Warrington at Bowden, Cheshire. The work, erected in 1734 and costing £389, has a large sarcophagus in the centre, while at either end sit figures of “Learning” and “Truth.” In the same church is his large monument, 20 ft. high, to Langham and Henry Booth, 1727, with lovely portrait-medallions of the two youths. Other portrait-medallions appear on the monument to Montagu Drake, 1724, at Amersham, Bucks. According to the Sharedoes Archives, this cost £180 and was executed by Carpenter from a design by James Gibson. He also signs monuments to Sir John Fermor, 1722, at Sevenoaks, Kent; Sir John Thornycroft, 1725, at Bloxham, Oxon; and the Bertie family, c. 1725, at Thedlethorp All Saints, Lincolnshire.

Carpenter died in 1737 and, according to Vertue (op. cit.), was buried at St. George’s, Hanover Square. Vertue describes him as a “gross, heavy man,” and his son John as an “idle fellow.” This is probably true, for Carpenter in his Will cut him off with a shilling and left everything, including his property at Edgware, to his wife.

(Authorities cited in text; Archives, Earl of Stamford.)

CARR, JOSEPH, of London
fl. 1754–1768

Between 1754 and 1758 he built part of the
Horse Guards in Whitehall, where his work included "a marble frieze carved and polished with cables, flutes and tongues" (R.I.B.A. Library, MS. 725/18). He also signs the large architectural wall monument in coloured marbles to Francis Fawkes, 1754, at Otley, Yorks. In 1765 he was paid £18 for the ledger to Charles Monson in Broxbourne Church, Herts. The carving of the coat of arms came to £3 6s., and the cutting of 153 letters to £1 5s. 6d. (Archives, Lord Monson).

Carr became a bankrupt in 1768 and on 13 September a sale of his stock-in-trade was held at his yard at "Mill Bank, Westminster." Among the lots were a number of marble chimney-pieces. A note on the sale catalogue reads: "The business will be continued as usual by Joseph Carr, Junior, who begs the favour of his father's friends and customers."

A contemporary was William Carr, son of Edward Carr, "citizen of London and barber-surgeon," who was apprenticed to Henry Dainty in 1741 and became free in 1748.

CARRECK, or CARRICK,
WILLIAM, of Ashford

He signs a tablet to Captain Thomas Smart (d. 1815) at Ashford, Kent. A "Charles Carrick" of Canterbury showed a "looo table, inlaid with various coloured woods" at the Great Exhibition of 1851.

CARTER, BENJAMIN
d. 1766

He worked chiefly as a maker and carver of marble chimney-pieces sometimes in partnership with his brother, Thomas Carter (q.v.), and sometimes on his own account. Both partners sign the bills for the chimney-pieces they executed for 18, Cavendish Square (the house of Thomas Bridges) in 1757. Here they received £144 for a "Doric" and a "French" chimney-piece, the former having "columns and the ground of frieze of jasper, the rest statuary, the columns whole, the tablet lion and boys," and the latter "statuary astragal (sic), mantel and jambs, carved black marble coverings, veined slab, the rest of wood, carved as the drawing." The chimney-piece they supplied for the parlour of this house had a tablet of Cybele and cost £32 (Middlesex Record Office, 85/223).

On his own account Benjamin Carter made chimney-pieces for Longford Castle (1739), Stourhead (1759-1761), Bowood (1764), and Saltram, Devon (Archives of houses mentioned). In 1762 he carved a marble one for the second Earl of Ashburnham and sent down his workman, Robert Stavely, to set it up at Ashburnham Place, Sussex (Ashburnham Archives). He also supplied nine for Blair Castle, including one with a head of Apollo, the bill being paid after his death and receipted by his widow, Mary.

Carter also made for Stourhead a pedestal of coloured marbles costing £30 for the "Florence box," and another at £40 of "Sienna, Genoa green, and black marble," but these are no longer there and were presumably destroyed when so much of the house was burned down early in this century. In 1761 he made the eight altarelievos for the Pantheon at Stourhead, for which he received £268. The reliefs have always been attributed to Rysbrack, but the existence of the detailed bills in the archives of Hoare's Bank proves that they were executed by Carter.

In 1752 he made the model for the famous lion on Northumberland House in the Strand, which is now at Islworth (Gentleman's Magazine, Vol. 82, Part I, page 341), and, with his brother Thomas, signs the monuments to Sarah Currer, 1757, in Bath Abbey, and Colonel Townshend, 1759, in Westminster Abbey. His son was John Carter (1748-1817), the architect and draughtsman.

CARTER, CHARLES
fl. 1815-1820

His yard was in Dean Street, Soho. In 1816 he was paid £237 3s. 11d. by the Duke of Bridgewater for "stone carving," probably for a London house (Archives, Lord Brownlow).

CARTER, JOHN
fl. 1762-1780

He was "under twenty-two" when, in 1762, he won a premium from the Society of Arts. In 1765 he was a pupil of Henry Cheere (q.v.) and in that year gained another premium of fifteen guineas for a model of "A Slave Taking a Thorn from a Lion's Foot." The Minute Book of the Society of Arts states that he died before 1782.

CARTER, THOMAS
d. 1795

According to the European Magazine (1803, Vol. II, page 178), Carter as a young married man had his own yard in Shepherd's Market, and about 1729 received a loan of £100 from Jervase the artist, a kindness which enabled him to hire an assistant, buy marble and generally enlarge the business. The assistant he hired was L. F. Roubliaic, according to Mrs. Esdaile's biography of the sculptor, but there is always the possibility that Roubliaic worked for Carter's brother Benjamin (q.v.); we only know that he was apprenticed to a "Mr. Carter."

Although both brothers had their own yards,
they did a good deal of work together and Benjamin certainly had a considerable financial interest in Thomas's business. In 1766, the year of his brother's death, Thomas wrote to Sir Edward Knatchbull about the chimney-pieces he was making for Mersham in Kent and asked for an advance payment, on the ground that "the Executors of my late partner have advised me to settle all my accounts." The reply he received was the reverse of encouraging, for Sir Edward declared himself "a stranger as to what engagements you have entered upon concerning your partner," and added "you may have heard of buying a pig in a poke" (Archives, Lord Brabourne).

Like his brother, Carter was chiefly known as a maker of chimney-pieces. In 1746 he carved some for Welbeck Abbey and sent down two of his best workmen, Kay and Wildsmith, to set them up. While they were there they apparently had a quarrel, for their employer wrote to Mr. Thompson, Lady Oxford's agent, that "if it is not too much trouble to you, I would take it as a great favour of a line or two from you what you think may make the disturbance between Kay and Wildsmith, for at this time I have more than forty men under me and, thank God, without any disturbance in the least." Later in the year he wrote to Kay that he had "sent her Ladyship a drawing of a Gothic chimney-piece." This was accepted and two years later he was paid for "three Gothic chimney-pieces of several sorts of English marble" for the dining-room (£526), drawing-room (£281), and bedchamber (£249) respectively (Archives, Duke of Portland). In 1745 Carter had also supplied two chimney-pieces of "black-and-yellow marble" and "black-and-gold marble" for Mr. James West's house in Lincoln's Inn Fields (Archives, West of Alscoat Park), and in 1746 he made several for Moulsham Hall, Essex, including those for the north-west dressing-room, the west bedroom, and the "great room," the last named costing £201 (Fitzwalter Archives). In 1764 he made two chimney-pieces costing £46 and £53 respectively for Sir Richard Lyttleton's house in Piccadilly (Archives, Lord Brownlow).

Other houses for which he supplied chimney-pieces include Longford Castle in 1739 (£70); Milton Hall, near Peterborough, in 1750 (£23 19s.); Saltram, Devon, about 1760; Shardeloes, Bucks, in 1761, where he was paid £147 for one in the library; Bowood, in 1766, where he supplied the hall chimney-piece; Lansdowne House, Berkeley Square, in 1768, where he made one for the anteroom; and Mersham, Kent, in the same year, where he executed two large ones in Portland stone for the hall and another of marble for the drawing-room, which cost £155 (Archives of houses mentioned). He also worked for Carlton House about 1785 (Pyne's *Royal Residences*, Vol. III), and for Woburn Abbey in 1791, being required to furnish chimney-pieces in both cases (Archives, Woburn Abbey).

Carter also did a good deal of work for the architects, Henry Holland and Sir John Soane. Under Holland in 1777 he made a chimney-piece costing £70 for the museum at Bushbridge, the seat of Sir Thomas Barker, and others in the same year for General Smith, of Chilton, Hungerford, and for Mr. Nicholas Henny's house in St. James's Street, where he was paid £935. Under Soane he supplied chimney-pieces in 1782 for Lord Delaval in Hanover Square, and in 1791 for Messrs. Ransome, Morland and Hammersley, of Pall Mall, at a total cost of £444 (Archives, Soane Museum).

Other work executed by Carter included, in 1742, two alabaster tables for Lord Folkestone, and a large black-and-white marble cistern for bottles "to the order of Earl Fitzwalter." Twenty years later he made the scrolls in "open pilasters" for the archway of the north dining-room at Holkham (Archives, Earl of Leicester), and in 1763 Horace Walpole paid him £31 for "marbles" for the gallery at Strawberry Hill (Toynbee's *Strawberry Hill Accounts*).

Carter's monuments are important; indeed, that to Chaloner Chute in the tomb-house attached to the chapel of the Vyne in Hampshire is one of the noblest works of late eighteenth-century sculpture in England. This monument, or rather cenotaph, the model for which is in the Victoria and Albert Museum, was planned by John Chute, to the memory of his ancestor, Chaloner Chute, Speaker of the House of Commons in the Long Parliament. It was begun 1775–1776 and shows the Speaker, a life-size figure, reclining on a woven palet, his head resting on his right hand, his hat and a book by his left side.

The sarcophagus on which he lies is a most unusual work with its fluted Ionic columns dividing the panels, in which are coats of arms in elaborate cartouches. The design of the whole monument and its modelling are beyond praise, and without doubt owe much to the taste and guidance of John Chute, cited by his friend, Horace Walpole, in his essay on gardening as a leading example of the fact that architecture at that time owed as much to learned amateurs as to professionals.

John Chute died in 1776, when only part of the sarcophagus had been carried out, and Carter's bill to him (in the Vyne Archives) is chiefly concerned with the marble and some of the carving. It is dated 29 November, 1775; the cost of the
marble itself came to £186 1s. 6d., while among the charges for carving are £51 16s. for the "straps and closed beads," £16 3s. for "fluting" and £66 15s. for "moulded work." The cost of the slab of black marble for the inscription was only £4 9s. 3d. The total came to £335 19s. 11d., and a note on the bills states that the work so far carried out had been measured by a William Barker.

John was succeeded by his cousin, Thomas Lobb Chute, who decided to finish his predecessor's work, and Carter's next and final bill is to him. The chief item is for "carving the ornaments consisting of festoons and flowers and other fret in rich ornaments, with a figure of Chaloner Chute, £504." Minor payments include "five men one day packing a figure 12s. 6d.," and "carriage of the figure from London to the Wyne £1 11s. 6d." Three men were sent with the figure "to take care of it and unload it," and a mason who was paid six guineas stayed twenty-one days at the Wyne "putting up the monument and polishing it."

Part if not the whole monument must have come by canal, as there are payments of £4 19s. for "men's time packing and loading the several cases and putting in the barge," and two guineas for "carts and a wagon to carry the cases to the wharf." The total cost of the complete work and the marble paving of the floor of the tomb-house came to £930 17s. 9d. But it was not till 1783 that Carter was finally paid, though as early as 25 July, 1778, there is his receipt for £600.

What is so puzzling is that hitherto the monument has always been ascribed to either Banks (q.v.) or Bacon the Elder (q.v.). As early as 1789 a writer in The Topographer (Vol. I, page 60), gives an account of the Chapel at the Wyne which he states was at yet unfinished, though, "the altar tomb is placed there, and on it, recumbent, the figure of the Speaker in his robes by Bacon, from his picture by Vandyke, preserved here."

Fifteen years later, Brewer, in his Beauties of England and Wales (1804, Vol. VI, page 254), wrote that the figure of the Speaker "was scultured by Banks." It is difficult to see how two such conflicting yet incorrect statements could have been printed, and apparently never corrected, so shortly after the erection of the monument. It is practically certain that neither Bacon nor Banks ever worked for Carter in 1775–1776; indeed in those years Banks was in Rome and Bacon already too successful a sculptor to be working for another.

Another unsigned monument by Carter is that with its life-size reclining figure of Colonel Thomas Moore, 1735, at Great Bookham, Surrey, but evidence that he was, indeed, the sculptor is to be found in the North Archives (Bodleian, C.14, F.19). Here, in a list of "family pictures of William Moore, Esq., left to go with the estate and not yet delivered to Lord North," is included "a half-length picture of Colonel Moore left with Mr. Carter, the stone-mason who is making a monument."

In the Evelyn Archives (possession Hon. Sherman Stonor) is Carter's bill "For a marble monumental tablet over the family vault adjoining Wotton Church, £34 4s."

Monuments signed by Carter include those to Mary Carew, 1731, at Antony, Cornwall; Sir Cecil and Lady Wray, 1736 (with two busts), at Bramston, Lincs; the Hon. Catherine Southwell, 1760, at Henbury, Glos; Joseph Bosanquet, 1767, in Bath Abbey; Mrs. Elizabeth Dayrell, 1768, at Shudy Camps, Camps; and Ann Rodney, c. 1770, at Walton-on-Thames, Surrey. According to Hutchins's Dorset (Vol. I, page 249) the monument to Harvey Mildmay, 1784, at Sherborne, Dorset, is also Carter's work, while the Journals of the Irish Memorials Association (Vol. IX, page 419) attribute to him one in Co. Kildare, that to Speaker Connolly, at Kildrought. Both the Carters sign the monument to Lieut.-Colonel Roger Townsend, 1759, in Westminster Abbey, though the relief is the work of John Eckstein (q.v.), who was at that time their assistant.

Carter's yard was at 101, Piccadilly, and in 1777 he held a sale as he was "moving into another house." He does not, however, seem to have finally retired from business at that time, for his name still appears on bills sent out by the firm, over fourteen years later.

Carter, who was described by his apprentice, John Deare (q.v.), in 1776 as "a blustering fellow, but a good man" (J. T. Smith's Nollekens and His Times, Vol.II, page 236), died on 5 January, 1795. One of his Executors was "Mr. Edward Blore, of Exeter Street, Mason," and in his will he left the residue of his property to "my son, or reputed son, Thomas Carter, or Moss, of the Inner Temple Gentleman," a rather curious description. He left bequests to two daughters named "Sobieski" and "Clementina," a choice of names which seems to point to Jacobite sympathies on the part of the testator.

(Authorities cited in text.)

CARTWRIGHT, THOMAS, the Elder
b. c. 1617, d. 1702

He was born about 1617 and was apprenticed to David Chaloner in 1631; he did not, however, finish his time with Chaloner, but was turned over to Christopher Kingsfield in 1637. Cartwright
became Warden of the Masons' Company in 1671, and was twice Master, first in 1673 and again in 1694. As a mason-contractor he was employed on building, or repairs to, the Inner Temple in 1657 (Inderwick's Inner Temple Records), the Royal Exchange between 1668 and 1671 (Builder, 1846, page 2), and Moorgate in 1674 (Guildhall MS. 184).

After the Great Fire, Cartwright built, or helped to build, a number of City churches. At St. Bennet Fink his carved stonework included "four draperies and two festoons, 4 ft. long, £9," and "six capitals, £27"; at St. Antholin's, "eight capitals and two cherub-heads, £46," and "eight flamelbeaus on the outside of the spire, £36"; and at St. Mary-le-Bow, "ten Corinthian capitals, £8." In his work on the steeple of the last-named church he was assisted by John Thompson, receiving £250 for "four pinacles and carving," and £20 for "four urns with flames" (Bodleian, Rawlinson, MSS. 387). Robert Hooke in his diary (page 219) records how he "agreed with Cartwright for Bow tower for £2,500," and also mentions (page 183) that the latter made the statues on Bedlam Gate in 1675. In the following year he also carved statues of "Justice," "Mercy," "Truth" and "Liberty" for Newgate.

Between 1668 and 1670 Cartwright was the mason employed for the rebuilding of Drapers' Hall after the Great Fire. In 1669 he made the chimney-piece for the "Lady's chamber" and in the following year carved a pair of gate-pillars which so pleased the Company that they paid him £6, instead of the £4 for which he had asked.

In the Court Minute-book of that year it is recorded that "Mr. Thomas Cartwright (is) to have a lease of the land unbuilt upon by the late Mr. Thynne" (Archives, Drapers' Company). Cartwright was also employed as master-mason for the rebuilding of the Weavers' Hall, 1667–1669; the Haberdashers' Hall, 1669–1671; and the Tallow Chandlers' Hall, 1672–1673 (Companies' Archives). In 1673, in partnership with J. Young (q.v.), he was working at Mercers' Hall, where they received £150 for "stone and workmanship about the porch and columns," and a further payment of £350 later in the same year (Company's Court-book). Two years later, on his own account, he was the mason for building Sir William Turner's house in Warwick Lane (Guildhall Library, MS. 5107/1).

In 1667 Cartwright had supplied black-marble chimney-pieces for the Duke of York's Lodging, the Duke of Kendal's bedchamber and the Countess of Rocheford's lodging at Whitehall (P.R.O. Works 5/9), and in 1682 Lord Ailesbury paid him £30 for "two lions" and "for setting them up on the gate of Ailesbury House, Clerkenwell" (Archives, Marquess of Ailesbury).

From about 1680 till 1702 Cartwright was engaged on the building of St. Thomas's Hospital. According to the Minute-book of the Court of Governors it was decided on 11 November, 1681, that "the plan of a scheme or frontispiece to be made of Purbeck stone before the front of our hospital to the High Streete, prepared by direction of the said Committee, containing pillars and the Kings Armes and the effigies of King Edward the Sixth and fewer cripples to be carved in stone, was approved of and ordered to bee made accordingly. It is further ordered that Mr. Thomas Cartwright, mason, being the person that made the draft should be imploied in the performance of the work." Cartwright asked £190 as the work "could not well be done for less." The statues of the "lower cripples" are now outside the modern main entrance of the hospital, and the statue of Edward VI faces the river.

Cartwright was also the master-mason for building the parish church of St. Thomas at Southwark in 1700 and the hospital chapel—for the latter he carved in 1696 "2 large urns" and "a sun dyall with scroll's inriched with carving." By 1750, however, there is a minute of the Grand Committee that "one of the urns over the chapel is ready to fall," and the Treasurer was authorized to arrange for the removal of both the urns and the sundial.

Cartwright signs the very fine monument at Ledsham, Yorkshire, with its two reclining figures of Sir John and Lady Lewys. This cost £100, and the bill, dated 4 April, 1677, is in the ledger of Lewys's banker, Sir Robert Clayton (Guildhall Library). An earlier entry reads: "1676, July 21st: paid Mr. Thomas Cartwright, by order of Sir Stephen for the monument for Sir John Langham—£290." This magnificent work, with recumbent figures in white marble of Sir John and his wife, stands in Cottesbrooke Church, Northamptonshire. It is of great artistic importance and proves conclusively that its creator was one of the foremost sculptors of the seventeenth century. Cartwright also signs a tablet to John Polhill, 1689, at Burwash, Sussex.

(Authorities cited in text.)
father's work at St. Thomas's Hospital. He died on 15 November, 1711, and was buried in Rickmansworth Parish Church, where a stone, long since vanished, commemorated him and his wife, daughter of Roger Touchet, of Rickmansworth (Cussan's *Hertfordshire*, Vol. III, Part II, page 157).

Cartwright signs tablets to Edward Sulyard, 1692, at Runwell, Essex, and Benjamin Dodd, 1706, in Hackney Parish Church.

**CARTWRIGHT, THOMAS, the Third**

*d. 1740*

He was the son of Joseph Cartwright and presumably the grandson of Thomas Cartwright the Elder. His father, who had become free of the Masons' Company by patronym in 1673, died before 1702, the year in which Thomas himself (also by patronym) was admitted to the freedom of the Company. In 1733 Mr. Henry Hoare employed him at one of his houses, possibly Stourhead (Archives, Hoare's Bank), and in 1739 he made a chimney-piece costing £53 for Longford Castle (Archives, Earl of Radnor).

Thomas's son, Newman Cartwright, was apprenticed to his father in 1723 and was working with him in 1731, the year in which he became free (Court-book, Masons' Company). Thomas died in 1740 and was survived by his widow Elizabeth, who received a pension from the Masons' Company until her death in 1770 (Company Archives).

**CASS, CHRISTOPHER, the Elder**

*b. 1678, d. 1734*

He was apprenticed to Henry Parker in 1692, and in 1704 (three years after he had become free) was one of the chief masons employed under Edward Strong (q.v.) at Greenwich (Guildhall MS. 233). As a master-mason Cass built, or helped to build, the tower of Greenwich Church and the churches of St. George's, Hanover Square; St. Luke's, Old Street; St. John's, Westminster; St. Anne's, Limehouse; and St. Martin-in-the-Fields. On 16 December, 1719, he wrote to the Bishop of Carlisle that Mr. Tufnell, late mason to Westminster Abbey, having died, he offered himself for the post "having been bred in the buildings part of the Masons' Trade in ye most considerable Publick Buildings lately advanced, which I have conducted where I have been concerned so far as related to ye immediate executive part, and from that experience doubt not to do ye same work equally well at £20 pr. cent. cheaper than the Abbey have paid for ye same." Cass added that he had been "ye lowest Bidder among many competitors for ye Balistrades to St. Paul's which I have just finished" (Archives, Westminster Abbey). In 1733 (though the work was done in 1726) he received £1,623 for "the portico with eight pillars, entablature and pediment upon the same, and carving His Majesty's Arms thereon" (St. Martin-in-the-Fields, Parish Records).

For the University of Cambridge Cass built the south-east and north sides of the Senate House, where he was responsible for all the carved stonework, including the "shields with palm branches 20 ft. long" in the tympana of the two pediments and, in 1731, "the stone posts before ye theatre" (Vice-Chancellor's Accounts). In 1724 he was working at King's College and, three years later, at Trinity Hall (Willis and Clarke's *Architectural History of Cambridge*, Vol. I, page 503; Vol. III, page 46).

About 1719 he built "Briggens," a house in Hertfordshire, for Robert Chester, one of the directors of the South Sea Company. In 1720, when the "Bubble" burst and the directors were arrested and forced to give an account of their financial position, Chester wrote that he was "indebted to Christopher Cass, mason, for stone and marble used and work done in building my house in Hertfordshire, £292 3s. 7d., as by his accounts, which not being according to agreement, I cannot adjust it at present" (Inventory of the Estates of the Directors of the South Sea Company). Other houses where Cass was employed include Canons, the seat of the Duke of Chandos, in 1724 (Collins Baker's *Duke of Chandos*); the London house of the architect, Nicholas Hawksmoor, in 1727 (British Museum, Ad. MS. 27587); and the house in St. James's Square belonging to Lord Bristol, in 1732 (Diary of the first Earl of Bristol, Ickworth Park). The Court Book of the Masons' Company notes in 1708 that he was working at Woodstock, so it seems possible that he may have been employed on the building of Blenheim.

Cass, who was also master-mason to His Majesty's Ordnance, took Andrews Jelfe (q.v.) and Thomas Shepherd as partners at various times to assist him with his building work. He died in London and was buried in the cemetery of St. John's, Westminster, where his heavy granite monument, with its inscription "Chr. Cass, master-mason to his Maj. Ordnance. Dy'd Ap. 21, 1734," may still be seen. C. H. Smith (q.v.) is reported in the *Builder* (1851, page 215) as saying that this monument was the first work in England to be carried out in granite, and that "its mouldings though such as would now be considered rude in form and execution, were highly esteemed in his
(Mr. Smith’s) boyhood.” In his will Cass had originally expressed a wish to be buried in a vault beneath the portico of St. Martin-in-the-Fields, but substituted St. John’s burial-ground in a codicil. To Edward Strong (q.v.), “my friend and benefactor,” he left £50, declaring that he owed him what “I and my family, under the good providence of God, have.” To Andrews Jelfe (q.v.), whom he named his executor, he bequeathed one hundred guineas, and to his foreman, T. Gayfer (q.v.), £20 and “all his wearing apparel, linen and woollen of all kind.”

Cass’s widow survived him and died in 1742. Andrews Jelfe, writing in that year to William Dixon, tells him that “Mrs. Cass was buried last week. She had left all her part to Mr. Bright, a young lawyer, who married her daughter” (British Museum, op. cit.).

(Authorities mentioned in text.)

CASS, CHRISTOPHER, the Younger

_d. 1732_

He was the son of Christopher Cass the Elder (q.v.), to whom he was apprenticed in 1721 and assisted him in a number of works. Young Cass seems to have carved in marble, for his father bequeathed to his daughter (Sarah Gilbert) “a marble pedestal done by my late son, Christopher Cass.”

CASTLE, J., of Oxford

_fl. 1840–1852_

He exhibited a figure of Abel at the Royal Academy in 1849, and a font in Caen stone at the Great Exhibition two years later. He also executed in 1851 two statues on the façade of St. Mary’s Church, Oxford.

CATHERWOOD, THOMAS

_in 1806 the Marquess of Buckingham paid him one hundred guineas for a chimney-piece for the “Gothic” library at Stowe (Soane Notebooks)._

CATTERNS, JOSEPH

_fl. 1678–1684_

When a “General Search” was carried out by the Masons’ Company in 1678 there was found at “Mr. Tompson’s” (i.e., John Thompson, q.v.) “Joseph Katernes, not free, bound at Joyners Hall”—that is, a member of the Joiners’ Company. Catterns signs the lovely monument, his only known work, with medallion portraits of Sir John Finch and Sir Thomas Baines in the Chapel of Christ’s College, Cambridge; this was erected to their memory in 1684 by the second Earl of Nottingham.

CERACCHI, or CIRACHI, JOSEPH

_b. 1751, d. 1801_

He came to England from Rome in 1773 and worked for Carlini (q.v.) and also for the architect Robert Adam. For the latter he modelled a large bas-relief in composition of the “Sacrifice of Bacchus” for the back front of Mr. Desenfans’s house in Portland Place, while at Adams’s sale held on 22 May, 1818, Lot 1 was “a piece of foliage and various other models by Ceracchi,” and Lot 13 “figures sacrificing, a bas-relief in three parts designed by A. Zucchi, modelled by Ceracchi.” About 1777 the sculptor made the statue of the Hon. Mrs. Dawson Damer (q.v.) which is now in the British Museum and, in the following year, the figures of “Temperance” and “Fortitude” in Portland stone for the Strand front of Somerset House (P.R.O. A.O.1/2495). In 1779 his name was put forward as an Associate of the Royal Academy, but he only received four votes (Royal Academy Minute-book).

Ceracchi later left London for America and arrived in Philadelphia in 1791. Here he hoped to get a commission for a statue of “Liberty,” but the project fell through. He did, however, model busts of a number of prominent Americans, including Benjamin Franklin, now in the Pennsylvania Academy of Fine Arts; John Jay, in the Supreme Court at Washington; Thomas Jefferson, at Monticello, Virginia; George Washington, in the Metropolitan Museum, New York; and two of George Clinton, now in the Boston Athenaum and at the headquarters of the New York Historical Society respectively. His bust of Alexander Hamilton, now in the New York Public Library, was reproduced on the thirty-cent stamp by the United States Government in 1877. Another bust executed during his stay in America was that of Amerigo Vespucci, which is also in the possession of the New York Historical Society.

About 1795 Ceracchi returned to Rome and, after a short time, moved to Paris, where he joined the anti-Bonaparte faction and plotted to murder Napoleon. The conspiracy was discovered, however, and the sculptor was one of those arrested. He was condemned to death and guillotined in 1801, going to the scaffold, it is said, in a triumphal chariot of his own design. J. T. Smith (Nollekens and His Times, Vol. II, page 56) describes him as “a short thin man with a piercing black eye and a very blue beard.”

During his stay in England Ceracchi exhibited
busts at the Royal Academy between 1776 and 1779, including, in the latter year, those of Count Belgiosa and General Paoli. Other busts of his are those of Admiral Keppel (1777) and the Marquess of Granby (1778), both at Belvoir Castle; Napoleon I and George Washington in the Museum at Nantes; and Pope Pius VI in the Palace at Monaco. His marble bust of Sir Joshua Reynolds and the original terra-cotta from which it was modelled in 1778 are both at Burlington House, the former being signed "Cirachi." He also made a portrait of Dr. Priestly for Wedgwood.

In the catalogue of the Stowe Sale of 1848, Lot 126 to be sold on the thirty-sixth day was described as "a marble statue of Britannia by Ceracchi." Before the time came, however, it was discovered that the figure was made, not of marble, but of plaster, and it was consequently withdrawn.

(Information, Frick Art Reference Library, New York; authorities cited in text.)

CEUNOT, JOHN
b. c.1740, d. before 1782.

He was the son of the French sculptor John Ceunot, and in 1762 received a premium of seven guineas from the Society of Arts for a "model in clay of ornaments" (Archives, Royal Society of Arts). He exhibited a "piece of flowers" at the Free Society in the same year.

CHADWICK, WILLIAM,
of Pentonville
fl. 1808-1826

He was the master-mason employed for building the Board of Trade Office in Whitehall in 1825, and the hospital of St. Katherine, Regent's Park, in the following year (P.R.O. Works 5/119).

Chadwick signs tablets to Robert Hinde, c. 1808, and Robert Hinde the Younger, 1819, both at Hitchin, Herts; and to John Smith, 1821, in St. Giles-in-the-Fields.

CHALKLEY, EDWARD,
of Portsmouth

He signs a tablet to William Bowles, 1824, at Boarhunt, Hants.

CHALLIS, JOHN, of Braintree
fl. 1790-1820

In 1805 he was appointed by the Vicar of Great Waltham to supply tombstones for the parish (Parish Records). His tablets have pleasant classical details, and signed examples, all in Essex, include those to Sarah Jones, 1790, Bernard Seale, 1819, and Joseph Lucas, 1820, all at Braintree; the Rev. John Harrison, 1797, at Faulkbourne; and the Rev. Jeremy Pemberton, 1811, at Belchamp St. Paul's.

CHAMBERLAIN, R., of Newark

He signs a charming altar tomb with a well-carved urn in the churchyard of Winthorpe, Notts. The monument is in memory of Sarah Thompson, d. 1809, and her epitaph begins: "This monitor of human instability..." A charming, but unexpected, way to begin a funeral inscription.

CHAMBERS, ROBERT
b. 1710, d. 1784

Mendes da Costa, who collected notes on various "literati" between 1747 and 1788, mentions "Mr. Robert Chambers, a mason, who painted arms, flowers, fruit, Hebrew and other characters on marbles." He also states that Chambers, whom he calls "a very curious person," was "a Gloucestershire man and about seventy-four when he died," and adds that "he painted, or stained, on marble, several roses, exquisitely well for me, and the blazoned arms of the present Duke of Norfolk on a marble slab for his Grace" (Gentleman's Magazine, 1812, Part I, page 517).

In 1759 Chambers received a bounty of ten guineas from the Society of Arts for "staining marble," Vol. LI of Philosophical Transactions for the year 1760 contained an account of "experiments on several pieces of marble stained by Mr. Robert Chambers," though the exact method employed is not disclosed.

As da Costa records, Chambers was a Hebrew scholar; indeed, he had almost a mania for the language, even inscribing a Hebrew word on his monuments. Among the large number of works in stained marble which he exhibited at the Society of Free Artists between 1761 and 1783 were "the most sacred names in Hebrew," "the Hebrew alphabet," etc.

The memorial to John Howard, Earl of Stafford, 1762, in Westminster Abbey is signed "invented and stained by Robert Chambers." It is described by Brayley (Westminster Abbey, Vol. II, page 160) as a "white tablet stained with the arms and ancient badges of the families connected with the Howards," while the widowed Lady Stafford not only considered it "simple and noble, which is just what I wished, and what my Lord himself would have chosen for any friend," but also that "Chambers has executed it in perfection" (Nichols' Literary Anecdotes, Vol. VIII, page 107).

Chambers also signs monuments to Joseph Iles, 1749, at Minchinhampton, Glos; Peter Eaton,
1769, in Dover Parish Church, Kent; Richard Savage, 1772, at Boughton Monchelsea, Kent; and Sir John Evelyn, 1778, at Wotton, Surrey. His monument to Bishop Zachary Pearce was formerly in Bromley Parish Church, but was destroyed with the church in the Second World War. His bill (1087/22/73) for the monument to Colonel Molyneux, 1782, in St. Nicholas, Guildford, is in the Loseley Archives, Guildford Record Office.

CHAMMOLL, THOMAS
fl. 1660–1667

He worked as a mason at the Palaces of Whitehall and Westminster, and for the former building made three black-marble chimney-pieces in the Duke of York’s lodgings in 1667 (P.R.O. Works 5/9).

CHANDLER, SAMUEL
fl. 1721–1758

His chief signed monument is the towering mass of marble which commemorates Edmund Humfrey, 1727, at Retendon, Essex. This has a reclining figure of the dead man, while above him in niches stand life-size figures of his parents and grandparents; it is overpowering for a village church, but is nevertheless one of the most important early-eighteenth-century monuments in England.

Chandler, who lived at Wanstead, also signs a monument, with Corinthian pillars supporting a broken pediment, to William Taylor, 1741, at Broadway, Worcestershire. In 1730 he was paid for the stone tablet over the doorway of Walthamstow Workhouse, a building now used as a museum (Workhouse Archives).

CHANTREY, SIR FRANCIS LEGATT, R.A.
b. 1781, d. 1841

He was born on 7 April, 1781, at Norton, near Sheffield, the son of a carpenter who died when Francis was twelve years old. The boy began work with a grocer, but later, at his own request, was apprenticed to a Mr. Ramsay, a carver and gilder of Sheffield.

Raphael Smith, the mezzotint engraver, used to visit Ramsay’s shop and here he met young Chantrey, who interested him and to whom he gave lessons in drawing. The boy gradually became dissatisfied with wood-carving as a form of art and, when he was twenty-one, he paid his master £50 (all the money he had) to cancel his indentures, this in spite of the fact that he had only six more months to serve.

As soon as Chantrey was free, he turned to painting and began to paint portraits in Sheffield. In this way, and by borrowing from friends, he collected enough money to try his fortune in London, but, knowing that he could not hope to hold his own as a portrait-painter, he found work as assistant to a wood-carver. He then went to Ireland in the hope of finding employment, but caught a fever from which he nearly died and which left him completely bald. On his recovery he went back to London, resumed wood-carving and executed some figures which were at one period in the possession of Mr. Hope, the banker. He also made a table for Rogers, the poet.

Finding that there was no money in wood-carving, Chantrey again tried portrait-painting, and also began to model figures in clay in his spare moments. In 1805 the parishioners of Sheffield Parish Church commissioned him to execute a bust of their late vicar, the Rev. J. Wilkinson, but they had so little faith in his ability that they insisted on his completing the work under their supervision in Sheffield. Three years later he exhibited his first imaginative work, a head of Satan, at the Royal Academy. About the same time his friend, Mr. Tappin, the architect, introduced him to a Mr. Daniel Alexander, who commissioned him to make four colossal busts of the Admirals Duncan, Howe, Nelson and St. Vincent for Greenwich Hospital. Shortly afterwards he executed similar ones for Trinity House.

It was not until 1811, however, that Chantrey found fame with his bust of Horne Tooke, which he exhibited at the Academy in that year (the marble is now in the Fitzwilliam Museum, Cambridge). Many years later, when he was giving evidence in 1840 in the case of Carew v. Burrell (q.v. under “Carew”), the sculptor gave some details of his early life. He was reported as saying “that he had never worked for any other sculptor and had never had an hour’s instruction from any sculptor in his life; he established a studio as soon as he could afford it, that was eight years after he had entered the Metropolis, and during those eight years he never made five pounds in his profession. The bust by which he first got his reputation he made for nothing. It was a bust of Horne Tooke; it went to the exhibition in model, for neither Tooke nor he could afford to make it in marble. He got £12,000 of commissions by that bust at the exhibition.” He ended his evidence by remarking: “so you see how uncertain the rise of a sculptor is.”

This picturesque story is a little difficult to reconcile with certain facts. In 1806 Chantrey left
his lodgings in Charles Street and went to live with his uncle and aunt, a Mr. and Mrs. Wale, who were in service with Mr. D'Oyley of 24, Curzon Street; and there later Chantrey married his cousin, Mary Ann Wale. The D.N.B. says the marriage took place in 1807, while George Jones in his biography of the sculptor states that it was in 1811. In the writer's copy of Jones's book is a manuscript note by G. A. Sala (to whom the book had belonged) that the real year of the marriage was 1809. All authorities, however, agree that his wife brought Chantrey a fortune of £10,000 which had enabled him to "purchase a house and grounds on which he built two houses, a studio and offices, also to buy marble" (George Jones, R.A.'s Life of Sir Francis Chantrey, page 9). So it is rather hard to understand Chantrey's assertion that he could not afford marble for Tooke's bust.

In any case, Chantrey was now on the road to fame, and as his reputation grew greater so also did his prices. He started by asking eighty or one hundred guineas for a bust, but at the end of three years raised his fees to 120 and 150 guineas. By 1822 he was charging 200 guineas, and, when he made a bust of George IV the King insisted on paying 300 guineas for it.

In 1811 Stothard, the R.A., introduced Chantrey to Mr. Johnes, of Hafod, who commissioned him to execute a monument to his beloved only child, Marianne. This work (unfortunately destroyed when Hafod Church was burnt in 1932) was the sculptor's noblest monument and, like everything else connected with Mr. Johnes, was conceived on a heroic scale. It showed the dying girl lying on a couch attended by her sorrowing parents, while at her side lay all the objects she had loved in life—her palette and brushes, her lyre and a scroll bearing the words and music of her favourite song. When it was finished the monument was too large to be exhibited at the Academy, and it was many years before it finally reached Hafod. Chantrey noted in his ledger (now at Burlington House) that the price agreed upon was £3,150, but that he did not receive the final payment until 1835 (long after Johnes's own death), and that even then it was £231 out of pocket.

In 1817 Chantrey executed what has always been his most popular monument, that to the children of the Rev. W. Robinson, in Lichfield Cathedral (the well-known "Sleeping Children" who died in 1812). His personal preference was for his figure of Lady Frederica Stanhope in Cheltenham Church, while he considered that his finest statue and bust were those of James Watt, at Handsworth, and Sir Walter Scott respectively. Of the Scott bust the sculptor made two replicas, one for Sir Robert Peel, the other for the Duke of Wellington; the former fetched £2,250 at the sale of the Peel heirlooms in 1900.

In 1814 Chantrey went to Paris and, five years later, to Rome, where he visited the studios of Thorwaldsen and Canova and also purchased marble at Carrara. He exhibited at the Royal Academy, 1804-1842, becoming an Associate in 1815 and a full member in 1818. In 1835 he was knighted by William IV. He died suddenly of a spasmodic attack on 27 November, 1841, and was buried in his native village of Norton, beneath a tomb which he had himself prepared. An obelisk to his memory was later erected on the village green.

Chantrey left his fortune of £150,000 to his wife for life and, after her death, to the Royal Academy to found what is known as the Chantrey Bequest. In 1842 Lady Chantrey presented all his original models of busts, statues, etc., to the University of Oxford. The sculptor's ledger (which he bequeathed to the Academy) contains, not only a mass of business details, but also a few more personal notes in his own hand. From these may be quoted his remarks about Lord Ilchester, who had ordered a monument to his wife's memory in 1819 and had agreed to pay £1,100. Chantrey obviously knew how to make a client in great difficulty with this client, for he had records that "in consequence of extreme disappointment from Lord Ilchester's extraordinary behaviour, I have determined to disarm his Lordship of all possibility of complaint and to charge only £840 for executing the monument." From the ledger also comes the information that the five marble monuments erected in 1832 by the Marquess Camden to the memory of his family and ancestors in Sear Church, Kent, are the work of Chantrey, though, contrary to his usual practice, he did not sign them. N. N. Burnard (q.v.) told Caroline Fox that on Chantrey's death "Lady Chantrey came into the studio with a hammer and knocked off the noses of many completed busts, so that they might not be too common." (S. Baring-Gould, Cornish Characters, page 288.)

The sculptor also notes payments for a number of busts whose present whereabouts I have been unable to discover, including those of Lady Gertrude Sloane (1812), William Vaughan (1813), Mrs. Simson (1816), George Phillips (1817), J. H. Freere (1818), the Hon. Charles Wemyss (1818) and Lady Nugent (1819).

In the British Museum (E.G. 1911) is another ledger which gives various details of works executed by Chantrey. These include "four dolphins in lead for a fountain ordered by Mr. Simpson, Engineer" in 1815, and a tombstone in 1816 in memory of R. B. Sheridan for Westminster Abbey.
In 1818 there is an entry for another tombstone, this time for a Mr. Brenton, to be sent to the Cape of Good Hope, and, two years later, a wall-tablet commemorating Colonel Canning to be erected in the church at Waterloo, Belgium. Among the busts is mentioned one of Sir Spiridon Foresti of Zante which was made in 1816.

Though a man of little education, Chantrey possessed great native intelligence and sagacity which undoubtedly helped him to amass his large fortune. He built his own foundry in Eccleston Place, and here his bronze statues, including those of Sir Thomas Munro, Pitt, George IV and Wellington, were cast. His manners were rough and his language strong, but he never willingly hurt the feelings of others. He was an excellent host, gave good dinners and was devoted to shooting and fishing. The brace of woodcock which he killed with one shot at Holkham in 1834 have become legendary. He carved them in marble and presented the work to his host, Mr. Coke, afterwards the Earl of Leicester. The epigrams composed to celebrate the occasion were collected and published in 1857 under the title of "Winged Words on Chantrey's Woodcocks." Lord Jeffreys wrote:

"Their good and ill from the same source they drew,
Here shrined in marble by the hand that slew."

According to the *Georgian Era* (1834, page 179), Chantrey produced what was luckily "an unexecuted design" for a statue of Nelson, 130 ft. high, to be erected at Yarmouth on a pier projecting far out into the sea. The statue was to be illuminated at night and was to stand "on a pedestal made of the bows of vessels taken from the enemy." He also designed the Minerva seal for the Athenaeum Club.

(Holland's *Memorials of Sir Francis Chantrey; Art Union*, 1842, page 6; *Gentleman's Magazine*, 1844, page 99; *European Magazine*, 1822, page 3; *Builder*, 1863, pages 91 and 112; authorities cited in text.)

CHAPLING, J.
Probably a Norwich carver, he signs the monument of Sir Horatio (d. 1730) and Lady Pettus (d. 1746) at Rackheath, Norwich.

CHAPMAN, EDWARD
fl. 1696–1706
He was the son of Edward Chapman, mason, and in the Company's "search" carried out in 1696 was reported as working with his father. His yard was in Red Lion Square and in 1706 he was employing William Palmer (q.v.) as an assistant.

Chapman was the father-in-law of Francis Bird (q.v.), to whom he bequeathed an estate near Windsor (Walpole Society, Virtue Notebooks, Vol. III, page 48).

CHAPMAN, JOHN
In 1833 he exhibited "David With the Head of Goliath" at the British Institution.
CHAPMAN, JOSEPH, of Frome
fl. 1806-1832

His signed tablets are not very exciting and include those in Wiltshire to Thomas Tyler, 1809, Devizes; James Carpenter, 1824, Beckington; William Crumholme, 1830, Horningsham; and Thomas Latimer, 1832, Mere. In Somerset he signs two tablets at Midsummer Norton to John Parsons, 1806, and John Smith, 1829.

His son, Joseph Chapman the Younger, also a statuary, utterly destroyed in 1863 the house known as “King Ina’s Palace” at South Petherton, Somerset. Built by Sir Giles Daubeney in the reign of Henry VI, it was a magnificent and untouched example of a fifteenth-century manor-house till Mr. Chapman got possession of it and, having pulled most of the house down, rebuilt it in Cockney Gothic.

CHARDINI, P. J.
fl. 1842-1843

Between 1842 and 1843 he exhibited at the Royal Academy various busts and medallions, including those of the Duke of Wellington and the King of Holland, and also equestrian statuettes of Queen Victoria and the Prince Consort. His address in the latter year is given as Cleveland Street, Fitzroy Square.

CHARLES, WILLIAM,
of Nottingham
fl. 1720-1763

His tablets are usually carried out in the local slate and have well-carved armorial bearings. In Nottinghamshire they include those to Henry Fawks, 1730, in the churchyard of Stanford-on-Soar; the Rev. John Wood, 1752, and the Rev. Henry Wood, 1755, both at Wilford; and James Bryans, 1757, in the churchyard of Willoughby-on-the-Wolds. Charles’ gravestone to Ann Bonner, 1763, is in the churchyard of St. Nicholas, Deptford.

CHARLTON, WILLIAM,
of Cambridge and King’s Lynn

In the Ipswich Journal of 17 May, 1760, he advertised that he had taken a wharf and shop near Lady Bridge at Lynn Regis and that he could execute orders “both in the ancient and modern taste, viz. statuary, monuments, chimney-pieces, sconces, chandeliers, girandoles, etc.”

CHEERE, SIR HENRY, Bart.
b. 1703, d. 1781

He was the son of John Cheere, of Clapham (d. 1756) and his wife, Sarah (d. 1738), and was probably the pupil of John Nost (q.v.). He later may have joined with Henry Scheemakers (q.v.) for together they sign the great monument of the Duke of Ancaster, 1728, at Edenham, Lincolnshire. Faussett the antiquary, in a manuscript dated 1757 (in private possession), states that the monument to Hammond Twyman, 1727, at Westbere, Kent, is also the work of both sculptors, although it is only signed by Cheere.

Cheere’s yard was near St. Margaret’s, Westminster, and here he worked in marble, bronze, stone and lead. The three Portland-stone statues of “Law,” “Physic” and “Poetry” which he made for Queen’s College, Oxford, cost £135 each, according to the contract signed in 1734, which also stipulated that they were “to be cut out of ye solid stone and not pieced as those at ye end of ye west wing.” On 23 April, 1735, Sir Thomas Lee paid Henry Cheere £42 for a “Portland statue of King William” (Hartwell Archives). I am uncertain whether this statue was erected at Hartwell House or not; Admiral Smyth in his Aedes Hartwellianae (page 71) only mentions statues of Frederick, Prince of Wales and George II as being in the Park. Lipscombe in his Buckinghamshire (Vol. II, page 315) says that formerly there were many statues in the garden but they disappeared when “an improved taste began to prevail.” In the Vice-Chancellor’s Oxford accounts 1737/8 is a payment to Cheere of £223 7s. 10d. for two statues “for the theatre.” These are presumably those of Archbishop Sheldon and the Duke of Ormonde. In 1748 he received £137 for his life-size statue of Sir William Pole. This cost £25 12s. to send to Devonshire, and Cheere’s own man, Richard Breach, went down to set it up in Shute Church (Cambridge University Library, MS. 6292). In 1770 the sculptor executed the lead statue of the Duke of Cumberland for Cavendish Square. This no longer exists, for it was removed and melted down by order of the fifth Duke of Portland in 1868.

Cheere also carved chimney-pieces, and in 1739 supplied some for Ditchley, Oxon, the seat of the second Earl of Lichfield. These included one for the drawing-room with a “Bacchus Head” which cost a hundred guineas, and others for the little room within the Great Room (£100), the Velvet Room (£100) and the Tapestry Room (£84). From the bills it is clear that the designs in some cases were supplied by Henry Filitcroft, the architect (Dillon Archives). Cheere also executed chimney-pieces for Sir John Trevelyan, of Walling- ton, Northumberland, c. 1740; for Lord Folkestone at Longford Castle between 1741 and 1742, where he received £800 (Archives, Earl of Radnor); for the Duke of Manchester, for whom he made a
chimney-piece for the drawing-room at Kimbolton Castle costing £54 in 1747; for Kilwick Hall, Yorkshire (Archives of Lady Waechter de Grimston), in 1752; and for John Trotter of Soho Square (Beauties of England, 1815, Vol. X, Part IV, page 60). In 1746 he was paid over £200 by Sir James Dashwood for chimney-pieces for Kirtlington Park, Oxon (Dashwood Archives).

The rococo details of Cheere's monuments are often very similar to those of his chimney-pieces, but they must have been much admired in their day. The first Earl Verney in his will (dated 1752) left £200 "for erecting a monument to my late dear wife in Middle Claydon Church after the model of the monument set up in Westminster Abbey for Archbishop Boulter" which had been executed by Cheere, but his wishes never seem to have been carried out.

In 1749 Cheere was appointed Controller of Duties for the Free Fish Market in Westminster. In 1755 he was one of the committee of artists who met to discuss the scheme which was to result in the founding of the Royal Academy of Arts. He was knighted in 1760 when he presented a congratulatory address to George III from the County of Middlesex, and was created a baronet six years later.

He retired from business in 1770, and on 26 and 27 March in the same year a sale of the contents of his yard was held. Among the lots mentioned in the catalogue are reliefs in marble and Portland stone, tablets, for chimney-pieces, friezes, busts, models of monuments, etc., but as no details are given it is impossible to identify any of the models or busts with certainty. The only item of which any description at all is given is that of a model of a monument with a "perspective of Westminster Abbey." This, of course, is the monument of Dean Wilcocks in the Abbey.

Cheere died on 15 January, 1781, and was buried in the family vault at Clapham with his wife, Helen Randall, who had predeceased him on 25 October, 1769 (not 1760, as stated in D.N.B.), (Gentleman's Magazine, 1769, page 511). Lady Cheere was apparently an ill-educated and stupid woman, for there are a number of anecdotes about her and her gaucheries in eighteenth-century memoirs. At the sale of Sir Robert Ainslie, held by Mr. Christie on 10 March, 1809, two of the lots were Cheere's "small sitting figures of Vulcan and Venus." They fetched 40 guineas. (Archives, Messrs. Christie.)

(London Magazine, 1769, page 592; Notes and Queries, Fourth Series, Vol. VI, page 525; Registers of Clapham Parish Church; Archives of Queen's College, Oxford.)

CHEERE, JOHN
d. 1787

He was first in partnership with his brother, Sir Henry Cheere (q.v.), but took over John Nost's (q.v.) yard and his moulds for lead figures, etc., about 1739. The writer of Leaves in a Manuscript Diary (London, 1772) describes Cheere's place of business as follows: "I came out at the Lodge" (i.e., of the Green Park) "and stepped into Mr. Cheere's yard, which, on account of numberless figures in stone, lead and plaster you would swear was a country fair or market, made up of spruce squires, haymakers with rakes in their hands, shepherds and shepherdesses, bagpipers and pipers and fiddlers, Dutch skipers and English sailors enough to supply a first-rate man-of-war."

J. T. Smith in Streets of London (page 11) gives the following description of Cheere's yard: "The figures were cast in lead as large as life and frequently painted with an intention to resemble nature. They consisted of Punch, Harlequin, Columbine and other pantomimical characters; mowers whetting their scythes, haymakers resting on their rakes, gamekeepers in the act of shooting and Roman soldiers with firelocks, but above all that of an African, kneeling with a sundial on his head found the most extensive sale."

Cheere's works in lead include a figure of "Mars" made in 1752 for Hampton Court (P.R.O. A.O.1/2467); statues of "Augusta" and "Flora," 1759, and seven others of mythological subjects, 1768, all executed for Longford Castle (Archives, Earl of Radnor); and two great wyverns for Trevor, Bishop of Durham, for which he received £48 5s. in 1759 and which still adorn the brick gate-piers of the entrance to Glynne, Sussex (Archives, Brand of Glynne). For Bowood between 1762 and 1763 he made lead figures of "Apollo," "Venus," "Mercury," "Livia," "Augusta" and "Flora," and busts of Fortuna and Antinous; for Blenheim he supplied sphinxes for the bridge in 1773 (British Museum, MS. 41133), while he made four other large sphinxes for Somerset House five years later (P.R.O. A.O.1/2495). In 1774 Wedgewood bought from him busts of Shakespeare, Plato, Homer and Aristotle (Wedgewood Archives). The lead statues, the lion and the lioness, the sphinxes, etc., at Castle Hill, Devon, are also the work of Cheere, who tells Lord Clinton (the builder of the house) in an undated letter that he hopes "your Lordship will be so good as to excuse me not answering your letter sooner, for the man that made the drawings for you has been out of town so I was obliged to wait his return. He has been at Lord Burlington's and measured it" (a sphinx?) "again and it is just ten foot. I have sent it as he measured it and gave it to me" (Archives, Earl Fortescue).

In 1769 he made a lead statue of Shakespeare which was presented to the Corporation of Stratford on Avon by Garrick in the same year and was erected in a niche on the north side of the Town Hall.

Cheere also did a great deal of work for Stourhead. One of his figures (that of the "River God" in the grotto) has been for some reason perversely and consistently attributed to Rysbrack by every writer, but the bill for it, dated 7 August, 1751, and amounting to £98, is quite definitely Cheere's (Archives, Hoare's Bank). For Stourhead he also made in 1766 lead statues of "Pomona," "Minerva," "Urania," "Venus," "A Vestal," "Mercury," "Apollo" and "Bacchus." Ten years later he was paid for a bas-relief for the same house, but as it only cost ten guineas it was probably of plaster. In 1776 he received £104 and, in 1778, £97 for unspecified work for West Wycombe Park, possibly lead statues (Dashwood Archives).

In 1742 he made eight busts for Sir John Evelyn at Wotton, including Brutus and Seneca. In 1745 he made five more (Evelyn Archives). Cheere also made statues and busts in plaster as well as in lead. In 1743 he supplied eight busts to Earl Fitzwalter for Moulsham Hall, Essex, and, in 1753, made others for Mr. Henry Hoare's houses at Clapham and Barnes (Archives, Hoare's Bank). His plaster statues include one of "Flora" made in 1754 for Maisters' House, Hull (Country Life, 13 January, 1950), while he also executed life-size figures for Mr. Du Cane, of Boreham Hall, Essex, in 1756 (Essex County Archives D/DDC. 118), and four casts of classical figures costing £223 for the Pantheon at Stourhead in 1766.

In 1754, writing to a client in Yorkshire on the subject of plaster statues for Kilnwick Hall, Cheere explains there has been some delay because he has been "out of a new mold—I cast three of each which did not prove so white as I could wish for, but the fourth proved quite white and I finish't
them very neat.” He concludes that he has “sent the names of several other statues of the same size if you should want any more you may depend on having them in less than a month.” At the end of the letter he gives a list of stock statues and busts, including those of Homer, Virgil, Horace, Demosthenes, Socrates, Shakespeare, Chaucer, Milton, Dryden, Spencer, Locke, Newton, Tillotson and Boyle (Country Life, 13 January, 1950). In 1748 he made chimney-pieces for Kirtlington Park, Oxon (Dawsham Archives). In the Castle Howard Archives is his undated bill for two lead figures, a Dancing Faun £17 17s. and a Roman gladiator £14 14s.

The monument with a fine portrait-bust of James Lawes (d. 1733) in Halfway Church, Jamaica, is apparently the only signed one by Chenee.

The sculptor’s first wife, Theodosia Maria, came from the parish of St. George’s Hanover Square. She died on 1 May, 1767, “of a broken heart for the death of her father and only son” (Gentleman’s Magazine, 1767, page 280), and the widower married Mary Wilmot of Clapham, on 30 June of the following year (Gentleman’s Magazine, 1768, page 349). Cheere died in 1787 and in his will desired to be buried at Clapham with his first wife. To his nephew, Charles Cheere, he left “the leases of the house and grounds in Piccadilly which were granted to my brother Sir Henry Cheere” and “all the statues with the models, moulds, patterns.”

In 1788 Charles Cheere offered to the Royal Academy any figure they liked to choose from his uncle’s collection, and they accordingly selected one of “Susannah” (Royal Academy Archives). Samuel Whitbread purchased a number of the lead statues, including figures of “Pluto and Persephone,” “Samson,” “Daphne,” “The Four Seasons,” etc., for Southill Park, Bedfordshire, where they still remain. The figure of Shakespeare, however, he presented to Drury Lane Theatre; it formerly stood in the portico, but is now in the entrance hall.

(J. T. Smith’s Nollekens and His Times; Clapham Parish Registers; authorities cited in text.)

**CHENEY, BARTHOLOMEW**

He acted as assistant to Sir Robert Taylor (q.v.) and carved the figures of “Fame” and “Britannia” on his master’s monument to Captain Cornwall, 1742, in Westminster Abbey. Taylor paid him £4 15s. a week, according to J. T. Smith (Nollekens and His Times, Vol. I, page 151).

**CHENU, PETER FRANCIS**

b. 1760

He was born on 8 October, 1760, and attended the Royal Academy Schools in 1784. Here he won a Silver Medal in 1785, and in the following year was awarded the Gold Medal for his “Restoration of the Torso.” In 1810 he did decorative work for the building erected in St. James’s Park for the Grand National Jubilee of that year (P.R.O. Works 5/112).

Chenu exhibited at the Royal Academy, 1788-1822, and at the British Institution, 1811-1822, showing at the former a bust of Dr. Herschell in 1788 and models of candelabra, figures designed to hold lights, etc. His monuments are of unequal merit, some have extremely well-cut reliefs, while others are not nearly so successful. The relief on his tablet to Thomas Gorsuch (d. 1821) at Barkway, Herts, is almost comic. It shows Time, who is knocking down an obelisk, while he holds in one hand what appears to be a wine-jar bearing the words “All sink to re-ascent.” The sculptor exhibited the design for this at the Academy in 1822. He was alive in 1833 as in that year he exhibited a bronze figure of “Aurora” at the Suffolk Street Galleries.

Other monuments signed by Chenu include those to Walter Strickland, 1788, in Beverley Minster; Lord Pigot, c. 1795, and Sir Robert Pigot, 1796, both at Patshull, Staffs; James Andrew, 1796, at Barkway, Herts; Peter Smith, 1796, in Ely Cathedral; Charles Nairn, 1797, at Cranbrook, Kent; Henry Rice, 1797, in Dover Parish Church, Kent; John Beaufoy, 1809, at Upton Grey, Hanx; Mary Golding, 1809, at Ditton, Kent; Sir Thomas Style, Bart., 1813, at Wateringbury, Kent; and Mary Watten, 1817, at Woodchester, Glou.

A “D. Chenu,” who attended the Royal Academy Schools in 1794 and exhibited two busts in the same year, was presumably a relation.

**CHICHLEY, RICHARD**

fl. 1726-1730

Between 1726 and 1728 he and his partner, J. Wade (q.v.), carved the pediment of the west middle front of Greenwich Palace. Chichley was also responsible for the stone-carving of the South Pavilion of Queen Anne’s Court in 1730, receiving £98 for twelve faces of capitals, £20 for forty modillions and £9 for forty flowers.” In the same year he carved “two mask-heads over the chimney in the kitchen” of the South-west Pavilion (P.R.O. Ad. MS. 68/706-68/710).

**CHISLET, JOHN, of Beaminster**

fl. 1823-1830

According to the Gentleman’s Magazine of 1829 (Part II, page 478), he carved the “chaste and
elegant" monument erected in that year to Sir William Domett in Hawkchurch Church, Dorset. In the Pigot’s Directory for 1830 he describes himself as “Sculptor and Professor of Music.” He also signs a monument to Joseph Bishop, 1823, at Corcombe, Dorset.

CHITQUA, —
d. 1796

He was a Chinese modeller who arrived in England from Canton in August, 1769. According to the Gentleman’s Magazine (Vol. XLI, pages 237–238), he had obtained leave from his Government to go to Batavia, but instead took passage for Great Britain. He was described as “a middle aged man, of a proper stature; his face and hands of a copperish colour, is elegantly clothed in silk robes...and speaks the Lingua Franca mixt with broken English; is very sensible and a great observer. He is remarkably ingenious in forming small busts with a sort of China clay, many of which carry a striking likeness of the person they are designed to represent. He steals a likeness, and forms the busts from memory” (op. cit.).

In 1771 he decided to return to his country and embarked at Gravesend, but the sailors considered him a Jonah who would bring bad luck to the ship, and their treatment of him, coupled with the fact that he fell overboard and had been nearly drowned, induced him to beg the Captain to put him ashore at Deal. The Captain did so and also asked the pilot to see Chitqua to London, but on arrival in the City “a mob gathered round the hackney coach and began to abuse and beat the pilot, for having, as they supposed, kidnapped a foreigner” (op. cit.).

Chitqua finally left London in 1772 and returned to Canton, where he died in 1796. “The news of his death, and of his having been occasioned by his taking poison, was brought to Madras by ships that arrived there in December, 1796.” (Gentleman’s Magazine, Vol. LXVII, page 1,072.)

Chitqua is responsible for the model of Dr. Anthony Askew in the Royal College of Physicians. He exhibited at the Royal Academy in 1770. Chitqua’s portrait by J. H. Mortimer was exhibited at the Society of Artists in 1771.

CHUKE, MICHAEL,
of Kilkhampton, Cornwall
b. 1679, d. 1742

He was the son of Stephen Chuke, a London carver, who was employed on decorative work at Grenville, Lord Bath’s great house at Stowe, near Kilkhampton, and married and settled down in the village. As a boy Michael Chuke was sent to London and apprenticed to Grinling Gibbons (q.v.), but he returned home later and, like his father, went to work at Stowe, where he carved a pulpit and the cedar wainscoting in the chapel. When the house was pulled down in 1739 Lord Cobham bought the woodwork and moved it to the private chapel of Stowe in Buckinghamshire.

Chuks married Elizabeth Bradinton in 1713 and died in 1742. He was buried in Kilkhampton churchyard on 24 September of that year. His widow survived him for twenty years, dying at the age of seventy-eight on 1 November, 1762.

The Royal coat of arms in Kilkhampton Church, and those in the neighbouring churches of Marhamchurch, Launcells and Stratton, are all the work of Chuks. His monuments include those to John Warminter, 1700; Richard Westlake, 1704; John Courtis, 1705; and Sir Bevil Grenville, 1714, all in Kilkhampton Church, and he also made one in memory of his father in the churchyard (Rev. R. Dew’s Kilkhampton Church).

CIBBER, CAIUS GABRIEL
b. 1630, d. 1700

Cibber was born at Flensborg in Slesvig, the son of a cabinet-maker employed at the Danish Court, and went to Italy when he was about seventeen. Here he remained for several years and then moved on to the Netherlands. Towards the end of the Commonwealth he arrived in England, where he was employed by John Stone, the youngest son of Nicholas Stone, master-mason to Charles I. When his master died in 1667 Cibber started to work on his own and, in 1693, was appointed “sculptor in ordinary unto His Majesty” by William III.

Nothing is known of the sculptor’s first wife, but his second, whom he married in 1670, was an heiress and brought him a dowry of £6,000. She was Jane Colley, daughter of William Colley of Glaston, Rutland, and it was she who became the mother of Colley Cibber, the future actor, playwright and poet laureate. In spite of his wife’s fortune Cibber was always in financial difficulties. He was arrested for debt and confined in the King’s Bench at the time he was cutting the reliefs on the Monument, but continued his work from the prison, to which he was forced to return every night.

From 1687 until 1690 he worked for Lord Devonshire at Chatsworth and, in the former year, gave his new employer an account of the work he had previously done for Lord Kingston at Thoresby (a house afterwards burnt down in 1745). The memorandum, which is in Cibber’s
own handwriting, is pasted in the beginning of one of the Chatsworth building account-books and runs thus:

"The rates I had at my Lord Kingstone were as
follen.

"The two figures flat in the pediment each of
them having four tunn of stone in them. I had
seventy pounds for one & for both one hundred &
forty pounds.

"For one round statue, having a boy upon its
shoulders I had three score pounds.

"For four statues which were not wrought
round, I had forty-two pounds ten shilling per
statue.

"For two dogs I had eight pound apeice.

"For twelve Caesar's heads I have five pounds
per head.

"After this my Lord did pay for my board &
wine for me & my man & then I did two sphinx
at ten pounds a peice, having in them but three
quarters of a tunn.

"For two statues as big as the life I had thirty-
five pounds a peice & all charges born. And at this
rate I will doe my endeavour to serve any noble-
man in Freestone."

Cibber's work at Chatsworth included the altar
and figures of "Faith" and "Justice" for the
chapel, and statues of "Lucrece" and "Apollo"
which are now on the grand staircase. His original
drawings for the two last-named are in the posses-
sion of the writer. For the garden he made two
sphinxes, a triton for the fountain, a figure of
"Flora," etc.

In 1694 he began building the Danish Church in
Wellclose Square, the greater part of the cost
being borne by Christian V of Denmark, who
subscribed £4,600. The church, which was con-
secrated on 15 November, 1696, was demolished in
1869. In 1700 Cibber himself was buried there, in
the grave of his second wife who had died three
years before.

Cibber was not responsible for many monu-
ments, but one of them is undoubtedly one of the
finest in England. This commemorates Thomas
Sackville (d. 1677) at Withym in Sussex. The boy
lies on a sarcophagus, his left hand resting on a
skull, while on either side kneel life-size figures of
his parents, Lady Dorset in prayer, Lord Dorset
gazing at his son. The look of frozen sorrow on the
father's face makes this group one of the most
moving in England. According to the original
contract drawn up between the sculptor and the
boy's mother, the monument was to cost £350,
while the work was to be "substantial, rare and
artificially performed" to "ye well liking of Mr.
Peter Lilly, his Maty's painter, or any other artis-
who should be desired to give their judgment
thereof" (Phillips's History of the Sackville Family,

Cibber also executed two monuments for the
Earl of Rutland at Bottesford, Lincolnshire, one of
the eighth Earl and his Countess, the other of
Lord George Manners. In a letter written in 1682
to Mr. Herbert, his patron's secretary, on the
subject of these monuments, Cibber mentions
that the marble for them is to come from Lyme
Regis in Dorset. He also refers to repairs to the
church, remarking that "to make cedar seats for
groomes and footmen as well as in the quire is
werry redical," and offers to Lord Rutland two
half-finished stone figures of gladiators, larger than
life, which he had begun at Ketton (Historical
II, page 67). These may be the figures which are
still in the garden at Belvoir.

In the Isham archives at Lamport Hall is a
drawing by Cibber of a simple monument, con-
sisting of three panels, which was to cost £44. The
specification on the back, dated 12 March, 1670,
states that this work is to be "all brought safe to
Lamport in Northamptonshire and then to be set
up in a Chappell for Sir Justinian Isham before
ye 24th of June, 1670," but apparently the design
was not accepted and the monument was never
executed.

In the Court Minute-book of the Skinners' Com-
pany is the following entry dated December,
1641: "James Smith, the mason to the Company
recommended one Gabriel Cibart, a stone-cutter
of St. James's, for the setting of the statue of
Edward the third on the Exchange for this Com-
pany." In the following March another entry
records that the sculptor had asked £70 for work
and that he was invited to bring the model to the
Hall. Apparently the Company did not like it, or
perhaps considered his charges too high, for they
gave the commission to Edward Pierce (q.v.), who
agreed to make a statue for £60.

(Harald Faber's C. G. Cibber; Walpole Society,
Vertue Notebooks; Builder, 1862, page 835; Art
Journal, 1903.)

bridge
CLARK, T., of Bristol
b. 1764, d. 1829

Clark, who was assistant to Sir Richard Westmacott (q.v.) and the principal stone-carver employed during the building of Eaton Hall in Cheshire, also did a good deal of work in his native city. In 1821 he executed a "very elegant canopy in the perpendicular style" for the effigy (copied from the original dated 1629) of John Whitson, Mayor of Bristol, in St. Nicholas's Church. In the following year he made the tracery of the west window in the Lord Mayor's Chapel and, in 1823, received £40 for the decoration of the stone gallery in the same building. The window-tracery was removed from the chapel by Pearson the architect in 1890, and now stands in the grounds of a private house at Henbury, near Bristol. In 1825 Clark was paid a total sum of £160 6s. 4d. for carving the coat of arms on the front of Bristol Council House and for four marble chimney-pieces.

Clark signs a tablet to Mark Howell, 1810, at Long Ashton, Somerset. He died in 1829 and was buried in the Lord Mayor's Chapel in Bristol, where there is a monument to his memory.

(Roper's Effigies of Gloucestershire, page 134; City Archives.)

CLARKE, —, of Wigmore Street
fl. 1829–1845

Between 1829 and 1830 he was the master-mason responsible for the additions to Lambeth Palace, where the total sum paid to him (£8,315) included £335 for stone-carving (Cambridge University Library, MS. 3928).

Clarke signs two large and very ugly "Gothic" tablets to Lord Western, 1844, at Rivenhall, Essex, and to the Rev. William Way, 1845, at Denham, Bucks. He also signs a simpler work to Adolphus Meetkerke, 1841, at Rushden, Herts.

CLARKE, GEORGE,
of Birmingham
b. 1796, d. 1842

He was a pupil of Chantrey (q.v.) and set up for himself in Birmingham after leaving his master's studio. In 1829 he went to London and rented premises in Charles Street, Covent Garden, where he executed a colossal head of the Duke of Wellington, and busts of Dr. Miller, Stanfield the artist and Brahm the singer.

In 1832 Clarke became a bankrupt, and ten years later, on 12 March, 1842, he died very suddenly in the shop of a Birmingham chemist, leaving a family of nine children totally unprovided for. At the time of his death he was engaged
in the arduous task of casting the leaves for the capital of the Nelson Column in Trafalgar Square, but had only completed two of them.

Clarke exhibited at the Royal Academy, 1821-1839. He showed considerable promise as an artist and would probably have become eminent in his profession had he lived.

CLARKE, RICHARD, of Reading fl. 1811-1836

A popular provincial statuary who also had yards at Wallingford and Watlington. His work is in no way distinguished. Signed tablets by him include those to Richard Jervoise, 1811, at Shalstone, Bucks; Elizabeth Parker, 1812, and Henry Fludyer, 1817, both in St. Leonard’s Church, Wallingford; John Bushnell, 1816, at Blewberry, Berks; Samuel Rudge, 1817, at Wheatfield, Oxon; Henry Hopkins, 1828, at Basildon, Berks; Lady Caroline Kerr, 1829, at Arundel, Sussex; and John Beaufoy, 1836, at Upton Grey, Hants.

CLERUCI, CHARLES fl. 1769-1783

For Wentworth Woodhouse he made, in 1772, an inlaid coloured marble chimney-piece, and a white-marble hearth inlaid with ivy-leaves in 1783 (Wentworth Woodhouse Archives).

CLEVELY, —

Presumably a Gloucester statuary, he signs the large tablet in memory of Lucy Stokes, 1732, in the Cathedral.

CLIFFORD, RICHARD WILLIAM, of Stow-on-the-Wold fl. 1828-1834

There were several masons of this name in the neighbourhood of Stow, including Richard Clifford (1734-1797) and William Clifford of Bourton-on-the-Water (1747-1833), the latter being the mason employed by Warren Hastings to build Daylesford Church in 1816.
I am uncertain which of these was the father of
CLIFFORD, THEOPHILUS, of Marlow
fl. 1823-1842
He signs tablets at Hurley, Berks, to Commander Hippolyte da Costa, 1823, and at Bray, Bucks, to Mary Waghorne, 1826.

CLINT, SCIPIO
b. 1805, d. 1839
He was the son of George Clint, A.R.A., and was appointed medallist to William IV in 1831 and seal-engraver to Queen Victoria in 1838. Clint worked chiefly as a medallist and gem-engraver, but he did carve a few marble busts, including those of Margaret Watson and Mrs. Robert Graves, which he exhibited at the Royal Academy in 1835 and 1837 respectively. His busts of Peter Barlow and Olinthus Gregory, both shown in the former year, were formerly at the R.M.A., Woolwich, while that of the Very Rev. Dr. Wiseman was exhibited at the Liverpool Academy in 1837.

Clint also acted as secretary to a Roman Catholic society established to forward a Government plan of education. He died on 6 August, 1839, leaving four children. He had married at St. Clement Danes on 20 August, 1828, Miss Ann Anderson (Archives, Artists’ Annuity Fund).

CLOUD, R.
He signs a large tablet to John Knight, 1801, at Axminster, Devon.

CLUTTON, HENRY, of Framlingham
fl. 1830-1840
His monument to John Sheppard, 1830, at Campsey Ash, Suffolk, is an exact copy of one by Sir Richard Westmacott (q.v.) in the same church. Clutton also signs a tablet to George Edwards, 1839, at Framlingham, Suffolk.

COADE, MRS. ELEANOR
Firm fl. 1769-1820
There were other manufactories of artificial stone in London before Mrs. Coade set up hers at Lambeth. Lloyd’s Evening Post, 18-21 December, 1767, has a notice that Mr. Christie will sell by auction “all this year’s produce of the Artificial Stone Manufactury, consisting of about a hundred different subjects including antique bustos, figures, vases, tables, friezes, medallions and chimney-pieces, both antique and modern.” In the catalogue the manufacture is said to be at Goldstone Square, Whitechapel, and the warehouse at 18, Long Acre. Among the lots sold were a pair of medallions of Jupiter and Hercules, busts of Marcus Aurelius and Faustina, “a curious chimney-piece, French taste” and a model of flowers in wax by Voyez. Among the buyers was Lord Rockingham, who purchased “a pair of river gods, six key stones and a bust of Antoninus Pius.”

On 29 June, 1771, Messrs. Christie’s held another sale of objects in artificial stone, though neither the name of the vendor nor that of the manufacture is given. Among the lots were large medallions of Baron Montesquieu, chimney-pieces, keystones with masks, medallions of the twelve seasons and another of George III. Out of the eighty-eight lots sold, seventeen were purchased by Sir J. Delaval and these may have been taken to Seaton Delaval, Northumberland, as in the ruins of that house can still be seen the remains of terra-cotta chimney-pieces (Archives, Messrs. Christie).

About 1769 Mrs. Eleanor Coade, a native of Lyme Regis in Dorset, came to London and opened a manufactory for artificial stone at Pedlar’s Acre, Lambeth. The process is supposed to have been discovered either by her father or her husband, but in any case little use had been made of it commercially, until Mrs. Coade, a remarkable business woman, set about popularizing a material which, to quote one of her advertisements, had “a property peculiar to itself of resisting the frost and consequently of retaining that sharpness in which it excels every kind of stone sculpture.”

The venture was an instantaneous success and the works at Lambeth were kept busy turning out all manner of objects. Mr. George Coade died in 1769, but he never seems to have taken any part in the business, which was run by his wife and her cousin and partner, John Sealy (1749–1813) (q.v.). They were shrewd enough to engage only first-class modellers and designers for their products, and among the sculptors who worked for them at various times may be mentioned the elder Bacon, De Vaere, Rossi, Flaxman, Bubb and Banks. The architects, James Paine, James Johnson and S. Robinson, were three of the designers employed, and it was the last-named who made the sketches for the monument to
Edward Keeble. This lovely work is dated 1782 and takes the form of a sarcophagus with an angel standing at each corner. It still stands (although badly damaged) in the churchyard at Woodford, Essex.

From the firm’s price-lists, which they issued at frequent intervals, it is possible to see how inexpensive was their work. A figure of a Charity School child, more than 4 ft. high, was sixteen guineas, while a bust of Edward VI or Queen Elizabeth was only three. For a very little more one could buy portrait-busts of the Rev. Rowland Hill, Voltaire, the Abbé Raynal, Lord Chatham, Lord Nelson or Dr. Mead. The most expensive item in the 1784 catalogue was a River God at one hundred guineas, although a clock-case cost but five, and a garden-seat three and a half. Architectural items were equally reasonable. Ionic capitals were thirteen shillings each and a “frieze of griffins” ten shillings a foot. As can easily be imagined, the output from Lambeth was vast, and examples of Coade terra-cotta are to be found in Poland, Russia and the West Indies, while for North America the firm supplied Corinthian capitals to Boston, chimney-pieces, friezes and keystones to Washington, and ornamental details for the houses of William Bingham and John Dorsey. In 1784 Samuel Coade transferred “Bunter’s Castle,” Lyme Regis, to his niece, Mrs. Coade. The building (later known as “Belmont”) was redecorated by the firm, and here may still be seen the Coade coat of arms (which embodied a coat), carried out in their terra-cotta, while the north front has a profusion of enrichment in Coade stone.

In 1772 the firm made some gate-piers for Horace Walpole at Strawberry Hill. The bill came to £150, which Walpole considered excessive, and it was decided to settle the dispute by arbitration. Sir William Chambers, the architect, agreed to act for the aggrieved client, and Mr. Kemble Watley for Mrs. Coade. Chambers took a great deal of trouble in the course of the investigation, not only making a thorough examination of the works and the firm’s ledgers, but also talking with the workmen who made the piers. He finally signed the following certificate jointly with Mr. Watley: “Upon examination of the books, models, casts, moulds, etc., and upon questioning the men of the manufactory and inspecting into the nature of the work, we are of opinion that the piers made and erected at Twickenham for the Hon. Mr. Walpole cost Mrs. Coade £151 14s. 10d., exclusive of profit” (British Museum, Ad. MS. 41133).

In 1804 the firm made the model of a West Indianman which was placed over the entrance of the West India Docks. The “extraordinary dimensions and elegant execution” of the ship afforded “a very superb and handsome spectacle,” according to the Monthly Magazine of that year (page 75). About 1809 they executed the great west window of Exeter Cathedral from designs by John Carter (1748–1817), the architectural draughtsman (Gentleman’s Magazine, 1817, Part II, page 365).

Their most ambitious work, however, was the tympanum of the west pediment of Greenwich Palace, which was begun in 1810 and not finished until 1813. The relief, designed by Benjamin West, was 40 ft. long and the principal figures 8 or 9 ft. high. West wrote in the latter year that the horses alone had taken him a week to draw and that he had attended daily at the King’s Mews to study the anatomy of the animals there. He received £1,000 for the work and his employers £2,584 (Streatfeild’s Hundred of Blackheath, page 73).

By this time a second Eleanor Coade was the senior partner of the firm, for Mrs. Coade herself had died in 1796 at the age of eighty-eight and had been succeeded by her daughter. The latter continued in partnership with Sealy until his death in 1813, when she took as her partner another cousin, William Croggan (q.v.), who was soon in complete control. She was at that time over eighty and died in 1821 at the age of eighty-nine. The family were presumably Baptists by religion, for both she and her mother were buried in Bunhill Fields.

Mrs. Coade’s claims, however, have been amply justified by time, for many of the figures and frizes, monuments and statues, plaques and ornaments are as fresh today as when they first left Lambeth. At the sale of an “Eminent Publisher retiring from Business,” held by Mr. Christie on 24 February, 1809, two of the lots were Coade busts of Venus and Caracalla.

1793 Statues for Staircase
Marquess of Buckingham's house, Pall Mall (Soane Archives).

1795 Twelve statues, for
Dome of the Rotunda
Bank of England, £200
(Soane Archives)

1799 Twelve Statues for
Transfer Office
Bank of England, £252
(Soane Archives)

1799 Statue of Britannia
(designed by Rossi)
Liverpool Exchange

1800 "Justice"
Thetford Guildhall, Norfolk

1800 "Temperance" and
"Justice"
Hothfield Place, Kent

1800 Statues of the Virgin
and Child, St. George, and King
Edward
St. George's Chapel, Windsor, West Front

1801 "Europe," "Asia," "Africa" and "America"
Bank of England, £88 each (Soane Archives)

1808 Nelson
Montreal, Canada

1809 George III
Weymouth (see Hamilton, James)

1810 George III
Dunston Pillar, Notton, Lincoln

1811 George III
Portland Square, Bristol (destroyed, 1817)

1812 Captain George
Bettesworth
St. Michael Careways, Cornwall

1812 Two Egyptian Figures
For Bullocks Museum, Piccadilly

1816 Lord Hill
Shrewbury

1817 Britannia
On the Nelson Column at Yarmouth, Norfolk

1819 Caryatids and other decorations
New Church, St. Pancras (designed by Rossi)

VARIOUS

1771 Gothic Gateway
For Horace Walpole, Strawberry Hill

1771 Two chimney-pieces
Boreham House, Essex (Archives, Hoare's Bank)

1780 Reliefs on façade
Watermen's Hall, London (Company's Archives)

1782 Capitals of Portico, etc.
Gorhambury, Herts (£342, Hertford County Archives MS. XI. 71)

1783 Chimney-piece
Argyll House, Twickenham

1783 Fireplace in Lord Harborough's pew
Stapleford Church, Leicester

1784 Thirty-two capitals for pilasters
Greenwich Palace Chapel

1784 Death-mask of Dr. Johnson
(Gentleman's Magazine, 1796, page 298)

1787 Trophies of war for centre of screen; four naval and military trophies for end of screen; copies of six vases from collection of Sir William Hamilton

1787 Twenty-nine vases
Somerset House

1787 Reliefs of "Ceres" and "Erin"
Stratfield Saye

1788 Four "pannels of Tritons"
Admiralty, London (P.R.O., Ad. MS. 17/1)

1788 "Fortitude"
For Royal Pavilion, Brighton

1788 Reliefs of "Agriculture" and "Commerce"
Entrance-gates of Perdiswell Hall, Worcestershire

1788 Plaques in salon
Sledmere, York

1789 Six medallions of scenes from the life of St. Paul; four medallions of Prophets
Greenwich Palace Chapel

1789 Chimney-pots
Woburn Abbey

1789 Medallion of Elymas
Greenwich Palace Chapel (P.R.O., Ad. MS. 68/824)

1789 Font
Parish Church, Debden, Essex (European Magazine, 1789, page 4)

1789 Ornamental decoration
For Lord Aldborough's house, Dublin (Monthly Magazine, 1798, page 543)

1790 Four chimney-pieces; two medallions of Nereids and Dolphins
Fishmongers' Hall, London

1790 Font
Milton Abbey, Dorchester

1790 Duke of Richmond's Fountain
Merion Square, Dublin

Chelmsford Town Hall, Essex (£141, designed by J. Bacon the Elder)

1790 Four torchères
West Wycombe Park, Bucks

1790 Gothic screen
St. George's Chapel, Windsor

1790 Ten life-sized female figures designed as lamp-holders (usually known as "The Wise and Foolish Virgins")
Burghley House, Northants

1791 Ornamental work
Belview House, Co. Galway
1791 Porch (modelled on the Temple of Miletus)
For Mr. John Weyland, Woodeaton Manor, Oxon

1792 Screen and vaulting of Harvey Chapel
Langley Marish Parish Church, Bucks

1792 Font
Hafod, Cardigan

1793 Decorative details
For Mr. W. B. Simond's house, Reading
Pentonville Chapel (Londinium Redivivum, Vol. III, page 243)

1794 Vase
For James Temple of Stover (7 ft. 3 in. high)

1795 Pair of urns on entrance-gates
Coopers Hill, Ampt Hill, Beds

1796 Two Corinthian capitals (£16 16s.)
For Ffynone, Pembroke

1799 Urns on entrance-gates
Groome Park, Worcs

1799 Decorative Details
Henham Hall, Suffolk
At Mr. Crowther's, Isleworth (7 ft. high)

1800 Two Egyptian figures
Grocers' Hall, London (Company's Archives)

1800 Decorative work (£182)

1800 Pair of swans
Vintners' Hall, London

1800 Fountain in the dairy
Ashburnham Place, Sussex

1801 Relief of “Saxon Monarch instituting Trial by Jury”
Arundel Castle, Sussex

1801 Pair of Vases with classical reliefs
Garden of Cobham Hall, Kent

1802 Caryatids for dining-room, statues on façade, etc.
Sir John Soane's house, Pitzhanger Manor, Ealing Grove

1802 Royal Arms
Vintners' Hall, London

1804 Relief of a West Indianman
West India Dock

1804 Font
Foundling Hospital Chapel

1804 Royal Arms for drawing-room
Windsor Castle

1805? Reliefs on Dome
Ickworth Park, Suffolk (designed by Flaxman)

1808 Pallstrade
Moggerhanger House, Bedford

1808 Royal Arms (£21 10s.)
County Hall, Lewes

1809 Three large reliefs (£94 10s.)
County Hall, Lewes, Sussex (designed by James Johnson)

1810 Tympanum of west pediment
Greenwich Palace

1812 Two caryatids on façade (£40)
Sir John Soane's house, Lincoln's Inn Fields

1812 Capitals and friezes
Royal Palace, Rio de Janeiro

1813 Two large vases
Elvaston Castle, Derby

1815 British Lion and French Eagle
For Palmer's Exhibition, Pall Mall

1818 Ornamental details (£419)
Battle Abbey, Sussex

1819 Ornamental decoration
Union Assurance Office, Cornhill

? Large shield with twelve quarterings
Allington Parish Church, Lines

Eleanor Lovett

1787 Westminster Abbey
Edward Wortley Montagu

1788 Langley Marish, Bucks
David Harvey

1789 Bramber, Sussex
Thomas Green

1790 Roch, Pembroke
Rev. John Grant

1792 Battersea (Parish Church)
John Camden

1792 Keynsham, Somerset
Margaret Simpson

1793 Rochester (Cathedral)
Dame Ann Henniker (see "Banks, Thomas")

1793 Great Dunmow, Essex
Lady Henniker

1794 Ponteland, Northumberland
Richard Ogle

1796 Lawthiton, Cornwall
Richard Coffin

1797 Montserrat (St. Andrew's)
Emma Saunders

1797 Aston, Yorks
Rev. W. Mason

1798 Fen Stanton, Hunts
(medallion portrait)

1798 Wiston, Sussex
Francis Brown

1799 Laughame, Carmarthen
Sarah Goring

1799 Stamford (St. John's)
George Elliot

1799 Lambeth (Parish Church, churchyard)
John Booth

1800 Tonbridge, Kent
Robert Wilmot

1800 Lambeth (Parish Church)
Rev. Henry Harpman

1800 Lambeth (Parish Church, churchyard)
Charles Carsan

1800 St. James's, Hampstead Road
William Sealy

1801 Buckland, Berks
William Hillman

1801 Plymouth, Devon
Elizabeth Perfect

1801 Lee, nr. Lewisham (churchyard)
William Symons

1803 Great Dunmow, Essex
Sir John Call

1804 Bunhill Fields Cemetery
Lord Henniker

1804 Lambeth (Parish Church)
Henry Hunt

1804 James Bryan
One of his busts, that of General Scott, was reproduced in 1877 on the twenty-four-cent stamp of the United States, and another, of Edward Ratchford Williamson, M.D., is in the Fort Beausejour Museum, New Brunswick. The museum also has a bust of John Watts by "Thomas Coffee," who was probably the same artist.

COFFEE, WILLIAM
b. 1746, d. 1840

When in 1829 he applied to the A.G.B.I. for help he stated that he had "carved several coats of arms and figures about different parts of England; at Greenwich College Chapel he worked the apostles and prophets around the pulpit and reading desk, and also the angels under the communion table." He also stated that he was responsible for the Royal Arms at Windsor Castle, outside Hatchett's in Long Acre, figures and coats of arms for Lord Abergavenny, Lord Darnley, Lord Essex, the Duke of Buckingham, the Honourable Mr. Villiers, Squire Bedford, etc.

In 1831 he again applied for help, stating that "having lost his hearing he is now so feeble that he cannot earn one penny."

COFFEE, WILLIAM JOHN,
of London and Derby
fl. 1790–1846

Coffee was employed by Miss Coade (q.v.), but left Lambeth about 1792 after a disagreement with her manager and junior partner, John Sealy (q.v.) (Jewitt's Ceramic Art in Great Britain, Vol. I, page 141). He then went to Derby where he found work as a modeller at the china factory, being specially successful with figures of animals.

Coffee apparently did not stay long at the Derby works, but set up for himself in the town as a sculptor and worker in terra-cotta. In 1810 he made a statue of Aesculapius for the Derby Infirmary and also busts of Sir Richard Arkwright, Mr. Robertshaw, Daniel Parker and C. J. Fox; another, of William Strutt, is in the Derby Museum. His bust of Dr. Darwin, made of artificial stone and dated 1804, is in the Derby Art Gallery. "The materials of which it is composed not being liable to be injured by the properties of atmospheric air, it is admirably calculated to convey to posterity the image of one of the greatest physicians and philosophers of the age," according to the Monthly Magazine of that year (page 557).

The sculptor later emigrated to the United States, where he lived in New York from 1816 to 1826, and in Albany between 1827 and 1846. In America he also executed a number of busts,
including those of General Pinckney, now at the College of Charleston, South Carolina; Cornelia Randolph, in the possession of Mrs. Page Kirk; Thomas Jefferson, in the possession of Miss Olivia Taylor; Hugh Williamson, at the headquarters of the New York Historical Society; and Pierre van Cortlandt, in the New York Museum.

(Information from Derby Public Library and Frick Art Reference Library, New York.)

COFFIN, EDMOND, of Exeter
(fl. 1753–1767)

Coffin, who may have been a brother of Thomas Coffin of Exeter, Alderman and goldsmith, became a Freeman of his native city in 1769. In 1759 he received £116 for work at the Mayoralty House and was working at the Guildhall in 1767 (Exeter City Archives). He signs the large wall monument to Thomas Bolithoe, 1753, in St. Stephen’s, Exeter.

A “William Coffin,” son of Thomas the goldsmith, was apprenticed to William Barlow (q.v.) in 1755.

COFFIN, EDMUND, of London
(b. 1761)

He exhibited busts and wax portraits at the Royal Academy, 1783–1803, and also attended the Academy Schools in 1785, winning a Silver Medal ten years later.

Coffin’s wax portraits show great delicacy of treatment. A beautifully modelled example (a likeness of Louis XVI, dated 1793) is in the possession of the writer, while a wax model for a medal is in the Victoria and Albert Museum. He signs a large wall tablet at Milburne St. Andrew’s, Dorset, to John Cole, 1790.

COLOBOURNE, WILLIAM, of Lymington
(fl. 1819–1830)

He signs monuments to Charles St. Barbe, 1819, and John Nike, 1827, both at Lymington, Hants. His father, William Colbourne, a local statuary and mason, died in 1804 (Monthly Magazine, 1804, page 277).

COLE, J., of Stamford
(b. 1735, d. 1797)

Cole, whose death is noted in the Gentleman’s Magazine of 1797 (page 534), signs a tablet to the Rev. Richard Knowles, 1796, at Tinworth, Rutland.

A Robert Cole, son of Thomas Cole of Stamford, became a Freeman of the borough by birth in 1749 (Town Archives).

COLOBOURNE, or COLBOURNE, WILLIAM, of London
(fl. 1694–1727)

When the Masons’ Company made a “general search” in 1694 they found that “William Colbourn works at Mr. Nest’s (John Nost, q.v.), in the Haymarket, bound to Mr. Bumstead (John Bumpstead, q.v.), not yet free.” Colbourne, who also worked for William Kidwell (q.v.), signs a fine and important monument, in the form of a great urn in an architectural setting, to Jacob Holte, c. 1722, at Rochdale, Lancashire. His other signed monument to Jefferay Gilbert, 1726, in the Temple Church, was presumably destroyed when the building was bombed.

COLECOM, SAMUEL, of Merstham
(fl. 1812–1843)

His tablets and monuments are above the usual standard of the provincial mason. Signed examples in Surrey include those commemorating Mrs. Bury, 1812, at Nutfield; James Eldridge, 1817, in Bletchingley churchyard; Harriet Clements, 1831, at Reigate; Richard Dendy, 1832, at Leigh; and Sir E. Banks, 1838, in Chipstead churchyard. Colecom also signs tablets to General Robert Morse, 1824, in Marylebone Parish Church, and to Hilton Jolliffe, 1843, at Petersfield, Hants.

COLES, JOHN, of London
(fl. 1790–1833)

He was the son of John Coles, who had a yard at 21, Fleet Street in 1768. The younger Coles signs tablets to Maria le Geyt, 1795, in Canterbury Cathedral; the Rev. Thomas Marston, 1800, at Hatfield, Herts; the Rev. Thomas Marsham, 1817, at Kew, Surrey; and Mrs. Maitland, 1823, at Hartfield, Sussex. In his later works he was assisted by his son Thomas. In 1796–1797 John Coles was paid £216 for marble chimney-pieces for Henham Hall, Suffolk (Archives, Earl of Stratbrooke).

COLES, JOHN and JAMES, of Thrapston and Huntingdon

John: b. 1763, d. 1816
James: b. 1791, d. 1834

The Coles, father and son, sign tablets to Mrs. Creed, c. 1800, at Titchmarsh, Northants; the Rev. C. Sherard, 1803, at Glatton, Hunts; Edward Ashton, 1807, at Old Weston, Hunts; and George Maule, 1812, in St. Mary’s Church, Huntingdon.

They were buried at Islip, a village a mile from
Thrapston, where their tombstone is still to be seen in the churchyard.

**COLLETT, NICHOLAS**

fl. 1760-1765

Collett was a great friend of Thomas Gainsborough, and also of Waldron the actor, who used to call him a “Garrick of a carver.” He made a number of tablets illustrating incidents from Aesop’s fables, but his chief work was the decorative wood-carving on the State coach, which Sir William Chambers had designed for George III. He also executed a horse for “the late Mr. Hackett of Long Acre, as large as the life, for the purpose of showing the harness upon; and this he modelled from actual admeasurement, from one of the King of Hanover’s stud called Beauty. He also carved a portrait of the same animal for the armoury of the Tower of London” (*Builder*, 1854, page 72).

**COLLINGWOOD AND SONS,**

*of Grantham*

Firm fl. 1806-1836

They sign tablets, mostly with Hellenistic designs and all in Lincolnshire, to Margaret Brudenell, 1806, at Hougham; John Turney, 1823, at Sedgebrook; Maria Kelly, 1826, at Grantham; and Sir John Thorold, 1836, at Marston.

**COLLINGWOOD, H.**

*b. 1797, d. 1825*

He attended the Royal Academy Schools in 1820 and gained the Silver Medal two years later. He exhibited two unnumbered busts at the Academy in 1824 and died in the following year.

**COLLINS, JOB, of Warwick**

About 1750 he made a stone vase for Lady Luxborough, which she placed in her garden at Barrells, Warwickshire. He also carried out similar work for William Shenstone at the Leasowes (Letters of Lady Luxborough to William Shenstone).

**COLLINS, JOHN, of London**

fl. 1779-1786

He was the master-mason for building the Middlesex Sessions House, 1779-1782.

He exhibited a bust of Mr. Barrymore at the Royal Academy in 1806.

**COLLINS, WILLIAM,**

*of Driffield*

About 1731 he made the life-size lead statues of St. John of Beverley and King Athelstan at the entrance to the choir of Beverley Minster. Oliver (*History of Beverley*, page 320) says: “He was a clever man. His models of animals well managed. He was a native, either of Driffield or some village in its immediate neighbourhood, but for want of patronage he passed his days in obscurity and wretchedness and was frequently reduced to absolute indigence.”

**COLLINS, WILLIAM**

*b. 1721, d. 1793*

He was a pupil of Sir Henry Cheere (q.v.), and was much employed as a modeller of bas-reliefs and tablets for chimney-pieces. J. T. Smith describes these tablets as consisting of “pastoral scenes which were understood by the most common observer; such, for instance, as a shepherd-boy eating his dinner under an old stump of a tree, with his dog begging before him; shepherds and shepherdesses seated upon a bank surrounded by their flocks; anglers, reapers, etc.” (*Nollekens and His Times*, Vol. II, page 243). A chimney-piece by Collins with a tablet depicting “The Bear and the Beehives” is in one of the offices in Ancaster House, Lincoln’s Inn Fields. He also worked for Robert Adam, and two of his tablets, “Bacchus and Ariadne” and “Cupid,” were Lots 11 and 20 at the architect’s sale held in 1818.

About 1755 Collins made the altar-piece for St. Mary’s Church, Warwick, described by Hands in his Guide to the church (published c. 1770) as “a fine bas-relievo of the Salutation, under a Gothic canopy, the whole exceedingly well executed.” In the following year Collins executed a similar relief in plaster-of-paris for the chapel of Magdalene College, Cambridge, a work “reckoned well worth the observation of the curious,” according to the author of *Cambridge Depicta* (1764, page 77). It is now in the College library. The designer in both cases was the architect Lightoler.

In 1760 Collins was working at Harewood House, Yorkshire, making medallions of “Liberty” and “Britannia” on the right, and “Agriculture” and “Commerce” on the left wing of the building, besides figures of “Mars” and “Neptune” for the great hall (Hargraves’ *History of Knaresborough*, page 157). In the following year he went to Kedleston, where he executed the medallions on the main façade (Curzon Archives).

The sculpture in the pediment of Worksop, Nottinghamshire, is also the work of Collins and was carried out by him in 1765; it is illustrated in Paine’s *Plans* (Plate CII). In 1770 he made the relief in the pediment of Sandbeck Park, Yorkshire (Paine, op. cit., Vol. I, page 14). In 1767 Robert Adam, in a letter to Sir Rowland Wynn, for whom
he was designing a chimney-piece, tells him that
"Mr. Collins promised me to have the tablet for
the library chimney sent to my house, end of last
week, but has likewise disappointed me."
(Brockwell's *The Nestall Collection*, page 16.)

At the sale of a "statuary and mason, quitting business" held by Mr. Christie on 15 March, 1798, the following models in terra-cotta by Collins were sold: "a frieze for a chimney-piece, the subject Romulus and Remus" and "a tablet for a chimney-piece Tame and Isis, for the Margrave of Anspach."
(Archives, Messrs. Christie.)

Collins was one of the original members of the
Incorporated Society of Artists in Great Britain,
founded in 1759, and showed works at the Society's
exhibitions between 1760 and 1768. He died at his
home in Tothill Fields on 24 May, 1793, and was
buried in the old cemetery in King's Road,
Chelsea (Authorities cited in text).

**COMELLI, J. B.**
*fl. 1821–1837*

Comelli, who was a pupil of Canova and later
Professor of Sculpture to the University of Milan,
came to England about 1820 and rented a studio
at 1, Seymour Terrace. In the following year he
carved the altar (costing £1,000), columns, etc.,
for the Roman Catholic Chapel in Moorfields
(Britton and Pugin's *Public Buildings of London*,

His busts of the Duke of Gloucester, Lord
Grenville and Thomas Grenville were in the
Stowe sale of 1848; his undated bust of the last
named is in the British Museum, and he also
executed the fine one of Napoleon now in the
Junior United Service Club.

**CONN, CHRISTOPHER,**
The large architectural monument to Richard
Pryce (d. 1690), in the Abbey Church, Shrewsbury,
is signed "Conn arc. et profl." In 1708 he made
the altar-piece of St. Mary's, Shrewsbury.

**CONSTANCE, —**

In the account-book of the first Duke of Kent a
payment is made in 1726 to "Mr. Constance,
figure-maker," for two heads for Wrest Park,
Bedfordshire (Archives, Lady Lucas and Dingwall).

**CONTE, —**

He was an Italian sculptor living in London
when, in 1848, he made a marble statue of the
Marquess of Stafford in highland dress. Apparently
this was not an original work, but a copy of the
original bronze by a French sculptor (*Art Union*,
1848, page 343).

**COOKE, JAMES, of Gloucester**
*fl. 1800–1836*

He was the son of John Cooke, of Gloucester,
"parjiter," who had become a Freeman of that
city in 1770, and he signs a number of tablets in
the county, including those to Susanna Colchester,
1811, at Brockworth; Thomas Turner, 1820, at
Down Hatherley; Elizabeth Williams, 1823, at
Dursley; John Daylis, 1825, at Winchcombe;
Catherine Hodges, 1825, at Pauntley; and William
Wakeman, 1836, at Beckford. His tablets in
Worcestershire commemorate Lady Lyttleton, c.
1800, at Malvern, and the Agge family, 1824, at
Overbury; while two others in Herefordshire are
those to Anne Skipp, 1810, at Ledbury, and
George Little, 1826, at Goodrich.

Cooke's partner was James Millard, also of
Gloucester, and together they sign a number of
tablets (for these see under "Millard").

**COOKE, RICHARD, of London**
*fl. 1803–1810*

Between 1803 and 1809 he received £205 for
"marble work" at Cobham Hall, Kent. This
almost certainly included the two large alcoves at
each end of the dining-room (Archives, Earl of
Darnley).

**COOKE, ROBERT, of London**
*fl. 1780–1817*

In 1793 he received £39 17s. 6d. for a chimney-
piece for Salisbury Guildhall (City Archives) and,
six years later, made another for Lord Radnor
(Longford Castle Archives). Between 1807 and
1808 he did similar work at Longleat, where he was
paid £86 12s. (Archives, Marquess of Bath).

Cooke's monuments are important, one of his
finest commemorating Henry, second Earl of
Darlington (d. 1792), at Staindrop, Durham. This
has a high relief of Lord Darlington on his death-
bed, while in the background is a charming vignette
of Raby Castle. The monument to John
Meeaton, 1792, at Whitkirk, Yorks, has a model of
the Eddystone Lighthouse, while that to Mary
Styler, 1807, at Snottisham, Norfolk, takes the
form of an urn standing on a wreathed pillar.

Other signed monuments by Cooke include
those to Margaret Loveden, 1786; Elizabeth
Loveden, 1788; and the Rev. Robert Ready,
1791; all in Buscot Church, Berks; Edward Ives,
1786, at Titchfield, Hants; Miss Meade, 1790, in
St. Botolph's, Aldersgate; Elizabeth Richmond,
1795, at Thrope, Middlesex; Richard Millington,
1796, at Coln Roger, Glos; Robert Meade, 1796,
in Christ Church, Philadelphia, U.S.A.; Margaret,
AUGOSTINO CARLINI
George III, 1773, Burlington House.

SIR FRANCIS CHANTREY
Lady Frederica Stanhope, 1823, Chevening, Kent.
THOMAS CARTER
Colonel Thomas Moore, 1735, Great Bookham, Surrey.

THOMAS DUNN
Edward Colman, 1739, Brent Eleigh, Suffolk.
COOKE, THOMAS, of London
fl. 1796–1820
Cooke, whose yard was in Fitzroy Square and later in the New Road, signs a monument with a portrait-bust of Aaron Morgan, 1818, in Southwark Cathedral. An earlier one to Richard Stevens, 1796, at Frome, Somerset, has a relief of two Charity children and their school, which was endowed by the dead man.
Other monuments by Cooke include those commemorating William Selwin, 1800, at Hatfield Broad Oak, Essex; Walwyn Graves, 1813, at Mickleton, Glos; Samuel Weston, 1817, at Wyke Regis, Dorset; Viscountess Ranelagh, 1820, in Fulham Parish Church; and John Twenlow, 1820, in Finchley Parish Church.

COOLEY, WILLIAM, of Chelmsford
fl. 1732–1746
He was the son of Benjamin Cooley, a mason of Chelmsford, who helped to build part of Boreham Hall for Mr. Benjamin Hoare in 1736 (Archives, Hoare’s Bank). Between 1744 and 1746 the younger Cooley was employed by Earl Fitzwalter at Moulsham Hall, where he made a marble chimney-piece and also carried out various other works (Fitzwalter Archives).

COOPER, GEORGE, of Canterbury
fl. 1818–1851
His father was John Cooper, a builder of Canterbury, who added the aisles to Ashford Church in 1827. George Cooper signs a number of tablets in Kent, including those to Robert Deane, 1818, in Holy Cross, Canterbury; the Rev. Thomas de Lannay, 1830, at East Langdon; Mary Davies, 1832, at Cranbrook; and John Sutton, 1836, at Chatham. According to the Builder of 1851 (page 23), the tablet to George Neame erected in Sellinge Church in that year was from “the atelier of Mr. George Cooper and executed by H. J. Day, a student in the Royal Academy.”

COOPER, JOHN, of Maidenhead
fl. 1757–1777
Cooper, who married a Miss Emlyn in 1757, was possibly a son of Thomas Cooper, of Henley (q.v.). He was the master-mason for building the Town Hall at Maidenhead in 1777, and was also employed on repairs to Marlow Church (Churchwardens’ Accounts).

COOPER, THOMAS, of Henley
fl. 1740–1754
Cooper, who was later employed on repairs to Stonor Park, Oxon, in 1754, signs a large monument to William Sidney, 1740, at Turville, Bucks. The original bill for this is in the archives of Lord De L’Isle and Dudley.

COOPER, THOMAS, of London
At Burghley, the seat of Lord Exeter in Northamptonshire, is Cooper’s large bust of Queen Elizabeth, signed and dated 1838.

COOPER, WILLIAM
b. 1700, d. 1754
William Cooper was the son of John Cooper, a mason of the parish of St. James’s, Clerkenwell, who had been apprenticed to William Savory in 1685. He was apprenticed to his father in 1714, and became free of the Masons’ Company in 1722, although he had apparently already taken over the family yard at London Wall on the elder Cooper’s death about two years previously.
In 1720 Sir Harcourt Masters paid £150 to “Mr. William Cooper, the mason, in part for a monument to Mrs. Mary Masters in St. Paul’s Church at Canterbury” (Declared Accounts of the Directors of the South Sea Company). The monument is no longer in existence, but it must have been of some importance judging from the size of the part payment. Cooper’s death is noted in the Court-book of the Masons’ Company.

CORBETT and MARSHALL, of Bromley
They sign a large tablet to Susannah Hunter, 1797, in Lewisham Parish Church.

CORNMAN, H.
fl. 1799–1821
He was the son of P. Cornman (q.v.) and between 1799 and 1821 exhibited a large number of wax portraits and busts at the Royal Academy, including those of Lord Carlisle, Mr. Downs, Benjamin West, the Princess Charlotte, Lord Dudley and T. Valentine.

CORNMAN, P.
fl. 1788–1792
He was a wax-modeller who exhibited portraits in that material at the Royal Academy between 1788 and 1792.
COSTA, PIETRO, of Florence
fl. 1840–1880
Costa, who was chiefly known as a carver of monumental statues for cemeteries, was born in Genoa, but moved to Rome in 1848. He signs the monument to Thomas Waller, 1845, at Luton, Bedfordshire.

COSTOLI, ARISTODEME, of Florence
b. 1803, d. 1871
He was Professor of the Academy of Fine Arts in Florence, and in his work imitated the style of the fifteenth century. As a sculptor he was “skilful in design and in all the technique of his art, but before his work the heart remains placid and the pulse is not quickened” (Clement and Hutton’s Artists of the Nineteenth Century, Vol. I, page 162).

In 1845 Costoli exhibited “The Gladiator” at the Royal Academy, a figure whose “masterly modelling” the Art Union considered “worthy of the antique.” At the Great Exhibition of 1851 he showed a terra-cotta model of a dog which he had executed for the Rev. Mr. Sanford, of Nynhean, Somerset.

His figure of “A Wounded Gladiator,” signed and dated 1837, is at Corsham Court, Wilts; and he also signs large monuments in the florid Italian style of the period to Richard Jodrell, 1835, at Lewknor, Oxon; Mrs. Sanford, 1837, at Nynhean, Somerset; and Eliza, Lady Rendlesham, 1842, at Rendlesham, Suffolk.

COTTERILL, EDMUND
b. 1795
He attended the Royal Academy Schools in 1810 and exhibited at the Academy, 1822–1858; at the British Institution, 1832–1855; and at the Suffolk Street Galleries in 1829–1836, showing busts of Sir Edward Banks in 1832 and of Mr. R. S. Kirby in 1836. In 1829 he had exhibited a bas-relief of “Theseus and Hippodamia.”

The works he showed included small bronze equestrian statues of Queen Victoria, the Duke of Wellington, and Lord Anglesey, and an “alto-relieve, descriptive of the name of Buccleugh” (Literary Gazette, 1834, page 361).

COTTON, —, and HUMPHREYS

In 1773 the Syndics agreed with them for £64 to make the Doric columns for the Divinity Schools at Cambridge University (Vice-Chancellor’s Accounts).

COTTRELL, T.
fl. 1830–1832
He exhibited a “miniature model of Samuel Cottrell” at the Birmingham Society of Artists in 1830, and busts of Earl Grey and Lord Brougham two years later.

COULMAN, —, of London
fl. 1809–1818
Coulman, whose yard was in Portland Road, signs dull tablets to Porteus, Bishop of London, 1809, in Fulham Parish Church; James Hatsell, 1812, at Godstone, Surrey; Frances Hoskins, 1812, at Appleton, Berks; John and Elizabeth Ball, 1813, at Berry Pomeroy, Devon; and George Lovibond, 1818, at Hatfield Peveril, Essex.

COULTON, J., of Braithwell
He signs a large marble tablet to Joseph Tomlinson, 1792, at Tickhill, Yorks.

COX, HENRY, of Northampton
b. 1725, d. 1810
He was the son of Samuel Cox (q.v.), but for some reason did not become a Freeman of his native town until 1752 (Town Archives). His monuments and tablets have well-carved details and he makes an ingenious use of coloured marbles. Examples of his work occur very frequently in Northamptonshire churches, one of the most delightful being the tablet commemorating Dr. John Shipton, 1748, at Wollaston, Northants, which shows a number of books lying on a ledge, with a pot of ink and a most realistic quill. Other well-executed tablets in the county include those to George Palmer, 1723, Edmund Bateman, 1731, and Sarah Mansel, 1751, all in St. Giles’s Church, Northampton; Henry Chester, 1726, at East Haddon; Samuel Keynton, 1753, at Bugbrooke; George Evans, 1757, in St. Peter’s Church, Northampton; Sir Thomas Samwell, 1757, at Upton; Colonel James Money, 1760, at Pitsford; Henry Locock, 1761, and John Newcombe, 1763, both in All Saints’ Church, Northampton; Thomas Lucas, 1756, at Guilsborough.

Cox also signs a tablet to Robert Atkinson, 1756, at Ware, Herts.

COX, J. R., of Deptford
fl. 1822–1840
He was the son of John Cox, a mason who had been apprenticed to George Drewett in 1765 and who had set up for himself in Deptford after becoming free in 1774. The younger Cox was
master-mason to Woolwich Dockyard and he also signs a tablet to Elizabeth Dobson, 1838, in St. Paul’s Church, Deptford.

COX, SAMUEL, of Northampton
b. 1690, d. 1749

Cox was a native of Northampton, for he became a Freeman of the town “by birth” in 1715. He had previously been apprenticed to John Lumley, a “stone-cutter,” who had himself become a Freeman in 1703 “gratis,” in repayment of a debt owed to him by the Corporation.

Cox’s work is greatly superior to that turned out by his contemporary provincial statuaries. His monument at Abington, Northants, to William Thursby, 1730, has a life-size figure in barrister’s robes, while another in the same church to Downhall Thursby, 1733, has a portrait-bust. Cox died on 19 November, 1749, and was buried in St. Giles’s Church, Northampton, where there is a tablet to his memory in the sanctuary.

Other signed works by him in the county include those to Ann Woolston, 1726, and William Price, 1727, both in St. Giles’s Church, Northampton; Dorcas Sargeant, 1729, and Mrs. Sargeant and Mrs. Beckett, 1748, both in All Saints’ Church, Northampton; Richard Thursby, 1736, and Henry Lowth, 1737, both at Abington; and George Tompson, 1737, and Nicholas Jeffcutt, 1740, both in St. Peter’s Church, Northampton. He also signs tablets to William Ashton, 1722, at Kimbolton, Hunts; and to Mrs. Robb, 1733, at Milton Ernest, Beds.

COX, SAMUEL, the Younger,
of Northampton
b. 1767, d. 1851

He was a grandson of William Cox of Northampton (q.v.). Some of his monuments have eighteenth-century designs, though erected in the early nineteenth century. Cox signs tablets in Northamptonshire to John Portington, 1789, in All Saints’ Church, Northampton; William Mayo, 1800, at Great Brington; Margaret Fremeaux, 1802, at Kingsthorpe; Edward Swinfen, 1802, at Long Buckby; and John Parke, 1805, at Welton.

COX, WILLIAM,
of Northampton
b. 1717, d. 1793

He was born 29 June, 1717. In 1762 an advertisement in the Northampton Mercury shows that he worked in London. He made the marble chimney-pieces for the “Great Parlour” and the “Sprig’d Room” at Lamport Hall, Northants (Isham Archives). In 1787 a John Cox applied to William Cowper for some verses for his “Bill of Mortality” and was referred by the poet to William Cox, “a statuary and a first-rate maker of verses.” Cox (who was apparently a parish clerk) replied that he had already borrowed help from that source, but that William “was a gentleman of so much reading that the people of the town could not understand him” (Quarterly Review, 1857, page 13).

William Cox, who was buried in St. Giles’s Church in his native town, had a yard in Daventry as well as in Northampton. His tablets have delightful details and he frequently makes use of a pyramid with roccoco flaming lamps on either side.

MONUMENTS AND TABLETS

| 1745 | Orlingbury, Northants | Charles Sturges  |
| 1754 | Spratton, Northants | Thomas Malcher  |
| 1757 | Welton, Northants | Isaac Ashley  |
| 1761 | Orlingbury, Northants | Mary Young  |
| 1763 | Faxton, Northants | Mrs. Raynsford  |
| 1764 | Abington, Northants | J. H. Thursby  |
| 1765 | Northampton (All Saints) | Richard Backwell  |
| 1766 | Noseley, Leics | Sir Arthur Hesilrige  |
| 1766 | Spratton, Northants | Benjamin Okell  |
| 1769 | Welton, Northants | Mrs. Halford  |
| 1769 | Weston Favel, Northants | Thomas Maydwell  |
| 1769 | Geddington, Northants | Sir Charles Wake  |
| 1769 | Courtenhall, Northants |  |
| 1770 | Spratton, Northants | Mrs. Benyon  |
| 1770 | East Haddon, Northants | Clarke Adams  |
| 1774 | Yelvertoft, Northants | Thomas Wills  |
| 1774 | Northampton (All Saints) | Edward Whitten  |
| 1778 | Northampton (St. Peter’s) | Francis Brownsmit  |
| 1779 | Welton, Northants | John Wainwright  |
| 1785 | Northampton (St. Peter’s) | Thomas Treslove  |
| 1788 | Catworth, Hunts | Matthew Maddock  |
| 1792 | Soulbury, Bucks | Robert Lowndes  |

COX, WILLIAM  
fl. 1725–1750?

Cox, who may have worked at Deptford, signs two very fine, but unfortunately undated, portrait-busts of Thomas Bacon and William Horshonden. Turner (1678–1753). The first stands above the entrance to the Free School at Bermondsey, founded by Bacon c. 1710, though the bust is probably later in date. The second, an admirable work by a skilled hand, is in the Maidstone Museum. Turner was Recorder of Maidstone in 1747, but he would have been nearly seventy at that date, and the bust is of a younger man.
CRAKE, —, of Chelsea
fl. 1825-1834
He signs a number of tablets in St. Luke's Church, Chelsea, the two best being those to William Terwin, 1826, and Richard Lee, 1833.

CRAKE, MATTHIAS JOHN,
of London
b. 1805
In 1825 he attended the Royal Academy Schools on the recommendation of H. Sass, and won the Silver Isis Medal from the Society of Arts in the following year. In 1837 he was carrying out repairs to the Royal College of Physicians in Cockspur Street, for which he received £70. Crake signs tablets to Lady Harriet Capel, 1837, at Watford, Herts; and to John Payne, 1840, in St. Margaret's, Lothbury. He exhibited a bust of Mr. M. G. Dowling at the Society of British Artists in 1832.

CRAKE, MICHAEL, of London
fl. 1800-1825
Between 1815 and 1819 he was working at the Royal Pavilion, Brighton, where he received £643 for stonework. Three years later he was paid £244 for chimney-pieces executed for 7, Langham Place (Soane Archives).
Crake, whose yard was in Portland Road, produced a very large number of monuments and tablets, none of them particularly outstanding, though three of them, to Harriet Sweetland, 1813, in Exeter Cathedral; William Acton, 1814, at Stoulton, Worcs; and Grice Smith, 1816, at Youghal, Eire, have reliefs.
Other signed works by Crake include those to Sir William Green, c. 1811, at Plumstead, Kent; Mrs. Schreiber, 1801, at Laxton, Northants; Martha Pybus, 1802, at Cheam, Surrey; John Bye, 1809, in St. Giles-in-the-Fields; Walter Booth, 1810, at Goostrey, Cheshire; John Hallam, 1811, in St. George's Chapel, Windsor; Captain Charles Rand, 1812, in St. Michael's Church, Lewes, Sussex; Ann Butt, 1816, at Buntingford, Herts; Sir William Essington, 1816, at Wands-worth, Surrey; the Rev. John Hargreaves, 1818, at Burnley, Lancs; Sir Charles Price, 1818, at Richmond, Surrey; the Countess of Cardigan, 1823, at Navestock, Essex; and the Hon. Mary Denny, 1823, at Aldenham, Herts.

CRAMPHORN, WILLIAM
b. 1788
He attended the Royal Academy Schools in 1806, winning a Silver Medal in 1808, and exhibiting wax portraits at the Academy, 1807-1819. A note in the Academy Council Minute-book dated 1807 records that a model by Cramphorn, which he valued at seventeen guineas, had been stolen from the Exhibition Room. Four years later it was decided to pay him this sum, as there was no chance of the model ever being recovered.
He signs a monument with a fine relief to Mrs. Cumberbatch, 1818, in Paddington Parish Church.

CRASHLEY, or CHRASHLEY, —
fl. 1774-1777
Crashley, who had a "figure-shop" in Long Acre in 1774, exhibited a number of reliefs at the Society of Artists between 1775 and 1777, some of these being executed from models by J. Durant (q.v.).

CROAD, JOHN, of Plymouth
fl. 1756-1769
He signs two large architectural marble tablets in Cornwall to Sir John Trelawney, 1756, at Pelynt, and to the Rev. Samuel Deeble, 1761, at Sheviock. He was master-mason of the Ordnance at Plymouth.

CROGGAN, WILLIAM
fl. 1814-1840
Croggan was a cousin of Miss Eleanor Coade (q.v.) and became her partner in the artificial stone manufactory at Lambeth on the death of John Sealy (q.v.) in 1813. As she was then over eighty he was soon in complete control, and signs himself "W. Croggan, for Coade" in a letter to General Imhoff on the subject of the terra-cotta heads and corbels which they were supplying for the church Warren Hastings was building at Daylesford (British Museum, Ad. MS. 39902).
On Miss Coade's death in 1821 he purchased the business and continued at Lambeth until about 1836. During those years the output from the works was very large, and Croggan received £5,290 between 1826 and 1828 for decorative work at Buckingham Palace alone. Here he supplied six vases for the terrace and statues of "Neptune," "Commerce" and "Navigation" for the Grand Entrance in 1827 and, in the following year, statues from designs by Flaxman representing "Sculpture," "Architecture," "Painting" and "Geography," which cost £157 10s. each. Also in 1828 he made reliefs of "King Alfred Expelling the Danes" and "King Alfred Delivering the Laws" for the West Front of the Palace, and the capitals, pillars and trophies for the Quadrangle.
Other works in terra-cotta and artificial stone carried out by Croggan include the capitals of the
CROOME, JOHN, of Salisbury
fl. 1771-1796
In 1771 and again in 1773 he was working at Longford Castle (Longford Castle Archives). Between 1789 and 1796 he was the master-mason responsible for building Salisbury Guildhall, where he also executed the carved stonework (City Archives).

CROWE, M., of Norwich
He signs a tablet to William Crowe, 1778, in Lakenham Church, Norfolk.

CROWLEY, PETER LAWRENCE
b. 1824(?), d. 1860
There seems some confusion about the date of Crowley’s birth. When he joined the Royal Academy Schools on the recommendation of J. Loft (q.v.), and in 1844 exhibited “Edward I Presenting His Son to the Welsh” at Westminster Hall. The Art Union of that year (page 217) thought that the King was “a fine chivalrous figure, but rather easy than dignified in movement,” but the Literary Gazette (page 483) remarked that “the standing leg is several inches too short and we must confess until now our ignorance of His Majesty’s physical defect.”
In 1846 Crowley exhibited his figure of “The Drowned Leander” at the Royal Hibernian Academy. At the Royal Academy he showed various busts between 1847 and 1859, including those of T. H. Illidge (1850) and Sheridan Knowles (1859).

CRUTCHER, RICHARD
b. c. 1660, d. 1725
He was bound apprentice in 1674 to William King, citizen and mason, and six years later “by consent of both parties” was turned over to Edward Pierce (q.v.) for the remainder of his time. He became free of the Masons’ Company in 1681, Steward in 1691, Renter Warden in 1707, and Master in 1713. His yard was in Billiter Lane, and between 1716 and 1719 he was the mason responsible for the rebuilding of Bakers’ Hall (Company’s Archives).
Crutcher’s son Michael, who had become free in 1712 and worked as his father’s assistant, died in the latter’s lifetime. His business was apparently carried on by his widow, Mary, for in 1722 the Court-book of the Masons’ Company has the

CROOKE, or COOKE, RICHARD
d. 1697
Crooke was Warden of the Masons’ Company in 1667 and 1672 and Master in 1674. Between 1670 and 1673 he and his partner, John Shorthose (q.v.), received £1,300 for work at Ludgate and, in 1683, he built part of the Mathematical School at Christ’s Hospital, for which he was paid £396 (School Archives). In 1692 he was again at Christ’s Hospital, this time with his partner, Samuel Foulkes (q.v.), and together they built the Writing School, which was finished three years later at a total cost of £1,159.
Crooke was the master-mason for the rebuilding of the Grocers’ Hall from 1680 until 1682, while in 1688 he was responsible for part of the library of the Royal College of Physicians in Warwick Lane (College Archives). He apparently died in 1697, for in the account-book of the Grocers’ Company, under the date 1697-1698, is entered a payment to “Sarah Crooke, executrix to Richard Crooke.” Crooke’s son John succeeded him as mason to the Company, but only held the post for five years. (Wren Society Publications.)
following entry: “William Crutcher, son of Peter Crutcher, late of Mersham, Surrey, yeoman deceased. Late apprentice to Michael Crutcher, late citizen and mason deceased. By indenture dated 23 February, 1713 (his mistress Mary Crutcher, a widow, testifying for his services), was made free.”

In his will Richard Crutcher left most of his property to his two daughters, Mrs. Wilmot and Mrs. Saunders, and his silver to his grandson, Richard Crutcher. His only signed monument is the superb one at Betchingley, Surrey, to Sir Robert and Lady Clayton, which is not only the most important early-eighteenth-century monument in England but, according to Mr. Sacheverell Sitwell, “one of the most entirely satisfying works of art in the whole kingdom.” He considers: “The architectural composition in which the statues are framed is really and truly magnificent and one of the splendours of the age . . . in the Corinthian manner, that is, yet not Roman at all, and still less Italian, but only English and of Queen Anne’s reign” (Introduction to Mrs. Esdaile’s English Church Monuments, page 30).

CUMBERWORTH, —
d. 1852

He was born in America, the son of an English officer and a Frenchwoman, but was brought to Paris as an infant and later studied sculpture there under Pradier (1792–1852). In 1842 he won from the Paris Academy the prize which would have enabled him to study in Rome, but on the eve of his departure it was discovered that he was not a Frenchman, and therefore not eligible for the award.

As the son of an Englishman, Cumberworth then decided to send work to the Royal Academy in London in 1846, but unfortunately his group of “Paul and Virginia” arrived two days after the official receiving date and could not be accepted. It was, however, later reproduced in “Parian” china by Copeland and a large number of copies sold. The same firm also showed at the Great Exhibition of 1851 figures of “The Indian Fruit Girl” and “The Water-bearer” in statuary porcelain, both from models by Cumberworth.

(Art Journal, 1846, page 299; 1852, page 316.)

CUNDY, JAMES, of Pimlico
b. 1793, d. 1826

He was the second son of Thomas Cundy (1765–1825), an architect and builder, and attended the Royal Academy Schools in 1812. Cundy, who exhibited at the Royal Academy in 1817 and at the British Institution, 1817–1823, was employed as a designer and modeller by Rundell and Bridge the silversmiths, “and at the time of his death he was engaged in the design of one of the largest and most sumptuous vases ever made in England” (Gentleman’s Magazine, 1826, Part I, page 569).

He died on 2 May, 1826, from the effects of an accident in Regent Street, where he was struck by the shaft of a butcher’s cart which was being “driven at a furious rate from Piccadilly.” The driver was later convicted of manslaughter and imprisoned. (Op. cit.)

Tablets by Cundy include those to Leman Shulham, 1815, at Marlesford, Suffolk; George Tate, 1822, at Mitcham, Surrey; and Dr. Benjamin Tate, 1823, in the Chapel of Magdalen College, Oxford. The last named was designed by Buckler and was illustrated in the Gentleman’s Magazine of 1823 (Part I, page 133). He exhibited a statue of “Musidora” at the Suffolk Street Galleries in 1825.

CUNDY, SAMUEL
b. 1816, d. 1867

Samuel Cundy, son of James Cundy (q.v.), was the mason responsible for the repairs to Fulham Church carried out in 1845, and also built, in 1851, the staircase of Northumberland House, Charing Cross.

Under Mr. (afterwards Sir Giles) Scott he worked on repairs to various churches at St. Albans, including the Abbey Church and St. Stephen’s, while under the same architect he was allowed to restore the monument of Philippa of Hainault in Westminster Abbey. Large fragments of this, including two entire alabaster canopies, had been purchased from T. Gayfere (q.v.), the Abbey mason, about 1822, but were found and returned to the Dean by Cottingham the architect (Builder, 1852, page 33).

In 1845 Cundy made the large Gothic tomb of the first Lord Bateman in Kelmarsh churchyard, Northants, and ten years later the reredos in North Marston Church, Bucks. Tablets by him include those to William Gell, 1838, in Westminster Abbey; General Sir William Clinton, c. 1840, at Barkway, Herts; Frederick Anson, 1848, in St. Luke’s Church, Chelsea; and the tomb of Sir Michael Hicks Beach, 1855, at Coln St. Aldwyn, Glos.

CUNNINGHAM, PATRICK
d. 1774

Cunningham spent nearly all his life and did practically all his work in Ireland. He did not come to London until 1772, and two years later died there and was buried at Paddington. In 1773 he exhibited wax portraits and a bust in clay at the Society of Arts.

For details of his work in Ireland, see Strickland’s Dictionary of Irish Artists, Vol. I.
CURRIE, ANDREW
fl. 1830–1860

He was a self-taught Scottish sculptor and a native of Dumfries who carved a statue of Mungo Park for Selkirk in 1839. In 1860 he made a statue of James Hogg, “the Ettrick Shepherd,” which was erected on the banks of St. Mary’s Lake, at the head of the vale of Yarrow.

Currie also executed a sandstone figure of “Old Mortality” which he decided to raffle. The winner, a Dr. Sinclair, was killed in Chatham on the very day of the draw and his executors presented the work to the Observatory at Dumfries, where an octagonal temple was built to receive it.

Currie’s group entitled “Old Mortality Renewing the Inscription on the Gravestones of the Covenanters” was exhibited at Liverpool, and in 1840 the sculptor also showed “Edie Ochiltree and Douster Swivel” in London. His figures of “Dominic Sampson” and “Meg Merrilees” are, or were, in the grounds of Carlton House, near Kirkcudbright (Builder, 1851, page 30).

CURTIS, AUGUSTINE, the Elder, and AUGUSTINE, the Younger, of Norwich

Augustine the Elder, b. 1661, d. 1731
Augustine the Younger, b. 1701, d. 1732

The Curtises, father and son, sign the monument to Abigail Jenny, 1728, in St. John Maddermarket, Norwich. They died within a year of one another, and were both buried in the Church of St. Peter Mancroft. Blomefield’s Norfolk (Vol. II, page 631) describes their monument as “an unusual, but a well-looking composure, at the top is a shield, on which are the arms of Curtis, supported by a neat pillar, surmounting a piece of marble, cut in the form of a pyramid.” The epitaph refers to them as “carvers” and as “son and grandson of John and Frances Curtis, late of this city.”

CURTIS, F., of Bristol
fl. 1737–1743

Curtis’s monuments, which are large and important, somewhat resemble those of the contemporary London sculptor, Samuel Palmer (q.v.), for both placed a large acanthus leaf with out-turned leaves at the base of their monuments.

Signed works by Curtis commemorate Henry Walker, 1737, in the Lord Mayor’s Chapel, Bristol; Thomas Rouse, 1737, at Wotton-under-Edge, Glos; and Thomas and Catherine George, 1743, at Croscombe, Somerset.

CURTIS, LAURENTIO

In 1672 he made a marble chimney-piece for the banking-house built by Alderman (afterwards Sir Robert) Clayton in Old Jewry (Ledger of Sir Robert Clayton, Guildhall Library).

CUSHING, JOSHUA, of Norwich
b. 1775, d. 1824

He was the son of Samuel Cushing, a church-carver of Norwich, and became a Freeman of his native town in 1797. Ten years later he exhibited there a model in stone for a proposed monument to Lord Nelson. This took the form of a “hexagonal temple with three triumphal arches of entrance,” ornamented with a statue of the Admiral and “terminated with a hexagonal obelisk” (Gentleman’s Magazine, 1807, page 126).

Cushing died at Bury St. Edmunds in 1824. He was survived by his wife, whose death took place, at the age of sixty-nine, in the same town in 1850. He signs a few tablets in Norfolk, including those to John Kerrison, 1804, at Ranworth; John Baseley, 1806, in St. Saviour’s, Norwich; Charles Garneys, 1808, at Hadenham; and Harriet Stracey, 1817, at Rackheath.

CUSWORTH, JOHN
of Stoke Newington
fl. 1830–1842

His monument, or rather mausoleum, to Andrew Ducrow, the equestrian, erected in 1837, is a fantastic work in the Egyptian style, decorated with reliefs of horses, angels, sphinxes, etc. Ducrow had it built in his lifetime to contain the body of his first wife. He himself was buried in it in 1842, leaving in his will the sum of £800 further to “decorate” the tomb. Among the many strange and curious monuments which throng Kensal Green Cemetery this is by far the most bizarre. His address in 1830 is given as “Near the bridge,” Stoke Newington.
DAINTRY, or DAINTEE, JOHN
fl. 1760–1764

In 1760, when “under twenty-two” and an apprentice of T. Carter (q.v.), he won a premium from the Society of Arts for a model of birds and, in 1764, a further premium for a bas-relief in clay of “Mucius Scaevola Burning His Hand.” Carter later employed him to carve tablets for chimney-pieces.

DAMER, ANNE SEYMOUR
b. 1749, d. 1828

Mrs. Damer, who was the only child of Field-Marshal Conway and his wife, Lady Caroline Campbell, daughter of the 4th Duke of Argyll, showed artistic talent at an early age. The story goes that when she was still a child David Hume rebuked her for laughing at the work of an itinerant Italian plaster-modeller and told her she could not do the like, a remark which at once prompted her to go home and model a head in wax, a performance she afterwards repeated in stone. She later studied under Ceracchi (q.v.) and John Bacon, R.A. (q.v.), and in 1767 married John Damer, eldest son of Lord Milton (afterwards Earl of Dorchester). Her husband, who was heir to a great fortune, was unfortunately a hopeless spendthrift; in 1776 he committed suicide in a tavern in Covent Garden.

After his death his widow devoted herself to sculpture, a pursuit in which she was encouraged by her lifelong friend, Horace Walpole, who had a most exaggerated idea of her talents. In a letter to Sir Horace Mann in 1781 on the subject of Mrs. Damer’s intended visit to Naples he wrote enthusiastically: “In Italy she will be a prodigy. She models like Bernini, has excelled the moderns in the similitudes of her busts and has lately begun one in marble.”

Farington the painter, however, was not so impressed when he visited the Tuileries in 1802 and saw Mrs. Damer’s busts of Charles James Fox and Nelson, which she had presented to Napoleon, whom she greatly admired. He merely considered them “not very good likenesses but they might be known” (Farington Diary, Vol. II, page 20).

Horace Walpole, who died in 1797, bequeathed to Mrs. Damer his beloved Strawberry Hill for life and also a sum of £2,000 to keep it in repair. She lived there until 1811, when she parted with it, according to a provision in the will, to Lord Waldegrave. She died in Upper Brook Street on 28 May, 1828, and was buried at Sundridge, Kent. In her will she desired that her mallet, chisel and apron and the ashes of a favourite dog should be placed in her coffin. As a young woman she was, according to her portraits, good-looking, but Farington describes her in 1798 as “wearing a man’s hat and shoes and a jacket like a man, thus she walks about the field with a hocking stick” (Diary, Vol. I, page 232).

It is a little difficult to place Mrs. Damer as an artist. She was absurdly over-praised by Walpole, who went to the length of having the words “Non me Praxiteles fuit at Anna Damer” cut on the terracotta model of a fishing-eagle which she presented to him in 1787. Her detractors, on the other hand, whispered that she was assisted by “ghosts” and professional sculptors. Had she been of humble birth she might well have remained unnoticed. What was exceptional in the eighteenth century was, as Gould (Sketches of Eminent Artists, 1834) rather heavily said, that a woman of her beauty and rank should “disdain the frivolous and frequently vicious pursuits by which females in the higher circles of society are unhappily absorbed and occupy herself with studies of an intellectual character.”

Her best-known works are the Portland-stone heads of the Rivers Thame and Isis for Henley Bridge, which she executed in 1785. In 1792 she made a statue of Apollo for Drury Lane Theatre (destroyed in the fire of 1809) and in 1795 one of George III, which is now in the Registrar’s Office, Edinburgh. Her busts of her husband and herself are now at Drayton, Northants, while another self-portrait is in the British Museum. Other busts by her include those of Lady Melbourne; Miss Farren; Nelson (one version in the London Guildhall and another, dated 1816, at Windsor Castle); the Duchess of Argyll and Lady Caroline Conway (both in Sundridge Church, Kent); Sir Joseph Banks; the Duchess of Devonshire; Mrs. Freeman as “Isis” (in the Victoria and Albert Museum); the Duke of Richmond (a plaster-cast at Goodwood); Sir Humphry Davy; the Hon. Peniston Lambe; and Mrs. Siddons.

Other works by Mrs. Damer included “Two Sleeping Dogs,” now at Goodwood, Sussex; “Two Kittens,” at Came House, Dorset; and reliefs of “Antony and Cleopatra” and “Coriolanus” for Boydell’s Gallery. Of her few wax portraits, those of Lady Allesbury and the Emperor Augustus
were in the Strawberry Hill sale of 1842. Shortly before her death in 1828 she made a replica of her bust of Nelson, a work which in 1829 was presented by her kinsman, Sir Alexander Johnston, to the Rajah of Tanjore on his becoming the first Honorary Member of the Royal Asiatic Society (Literary Gazette, 1829, page 427).

Mrs. Damer exhibited at the Royal Academy, 1784–1818. There is a list of her works in Walpole’s Anecdotes of Painting (edited by Dallaway, Vol. IV, page xix).

(Percy Noble’s Anne Seymour Damer; Allan Cunningham, Lives of the Painters, Vol. III; authorities cited in text.)

DANCE, GILES
1713–1751
As a master-builder he was responsible in 1720 for Carshalton House, the home of Sir John Fellowes, one of the Directors of the South Sea Company (Inventory of the Directors). He signs a large architectural monument to Richard Dawes, 1712, at Wotton-under-Edge, Gloucestershire. Thomas Dance built Guy’s Hospital in 1733 (Hospital Archives).

A “G. Dance” was the master-mason in 1783 for building the mausoleum at Cobham Hall, Kent (Archives, Earl of Darnley).

DANIELL, M.
He signs a monument with a large, well-carved relief of “Hope” mourning over an urn to Mrs. Hare, 1801, at Stow Bardolph, Norfolk.

DARBÉY, JOSEPH, of Dudley
He signs a large tablet to Joseph Amphlett, 1821, at Enville, Staffordshire.

DARBY, THOMAS
fl. 1712–1746
From 1712 until 1724 he was one of the carvers employed at St. Anne’s, Limehouse, while he also worked at St. Mary Woolnoth, 1716–1727, and St. John Horsleydown, 1728–1733. In 1746 he was paid £161 for stone- and wood-carving at Welbeck Abbey, which included £39 for six stone Corinthian capitals (Archives of Welbeck Abbey).

A “John Darby,” who may be a relation, was the carver employed at Christ Church, Spitalfields, 1723–1729, and at St. Luke’s, Old Street, 1727–1733.

DAVID, CLAUDE
fl. 1706–1722
David, a Burgundian by birth, who came over to work in England, made a design for a fountain to be erected in Cheapside. This was apparently seen by Vertue who described it as having figures of River Gods, an equestrian statue of the Duke of Marlborough, while the whole structure was to be surmounted by a statue of Queen Anne (Walpole Society, Vertue, Vol. II, page 87). David must have been in England in 1706, as the first Lord Ashburnham on 16 November, 1706, writes to his architect, Captain Winde, from Amphill Park: “Monsieur La Guerre and Le Chevalier Davy have obliged me by a visit to this place, we had a good deal of discourse about matters relating to their several professions in knowledge, but we have adjourn’d the debate till we meete and see you in Towne.” In 1721 the sculptor tried to raise by subscription a sum of £2,500 for an equestrian statue of George I (to be executed by himself). The work was to be erected in the centre of St. James’s Square, but only £100 was collected and the plan had to be abandoned.

David’s monument to the Hon. Philip Carteret (d. 1710) in Westminster Abbey has a beautifully modelled figure of “Time” and is signed “Cldius David eques sculptor.” He also executed the “Prometheus Chained to a Rock” which is, or was, on the staircase of Narford Hall, Norfolk (Blomefield’s History of Norfolk, 1781, Vol. VI, page 64).

DAVID, PIERRE JEAN
(DAVID D’ANGERS)
b. 1788, d. 1856
David, who paid a visit to England in 1816, showed a bust of Jeremy Bentham at the Royal Academy in 1829, a work which was in the possession of Dr. Bowring in 1844 (illustrated Times, 1844, page 377).

Other busts of British clients by David (dates, where known, in brackets) include those of Lady Morgan (1830), Arthur O’Connor (1833), and Amelia Opie (1836). He also executed medallions of Lord Byron, Canning (1827), John Flaxman (1828), Sir John Franklin (1829), Amelia Opie (1829), Sir Sidney Smith (1830), Joseph Pentland (1832), Daniel O’Connor, Sir John Bowring (1832), George Pitt-Rivers (1834), John Wilkes (1834), James Watt, Sir John Ross (1836), Mrs. Somerville, and William Temple (1838).

DAVIES, —, of Chelsea
He signs a tablet to Countess Winterton, 1841, in St. James’s, Hampstead Road.

DAVIES, R., of Newcastle
fl. 1777–1800
Davies, who could possibly have been the father of R. G. Davies (q.v.), signs a tablet at
Grindon, Durham, to Thomas Peacock (d. 1762) and another, larger one to William Christopher, 1797, at Norton in the same county.

DAVIES, R. G.,
of Newcastle-upon-Tyne
fl. 1820–1857

He exhibited “Actaeon Devoured by His Hounds” at Westminster Hall in 1844, not apparently with great success, for the Literary Gazette (1844, page 482) remarked: “We wish the unfortunate hunter had been entirely devoured, so that we might have spared the sight of so disgusting a group.” The Illustrated London News of the same year (pages 188 and 326) published woodcuts of his newly erected monuments to Grace Darling in St. Cuthbert’s Chapel, Farne Islands, and to Luke Clennell in St. Andrew’s Church, Newcastle.

Other monuments signed by Davies include those to Robert Jopling, 1820, in St. Peter’s, Bywall; Margaret Clavering, 1821, and Francis Johnston, 1822, both in Newcastle Cathedral; Jane Gowland, 1821, at Bedale, Yorks; and to Elizabeth Woodfield, 1831, in Durham Cathedral.

Davies, who married at St. Andrew’s, Newcastle, in 1812, later took C. Tate (q.v.) into his studio. The latter died in 1841, leaving unfinished a statue of the Duke of Northumberland which was completed by his former master and erected at Tynemouth. It is not known when Davies left Newcastle, but by 1857 he had moved to Chester-le-Street in Durham.

DAVIES, SAMUEL

In 1759 he received £13 for a marble chimney-piece for Hoare’s Bank in Fleet Street (Bank Archives).

DAVIES, or DAVIS, THOMAS
fl. 1680–1712

In 1687 he made for Lord Melfort the cross which was set up in the Cross Bath at Bath (Wood’s Bath, Vol. II, page 259). In 1695 and 1696 he executed statues of “Faunus” and Mark Antony for Chatsworth, receiving £23 and £24 respectively (Chatsworth Building Accounts). Also in 1696 he carved seven marble chimney-pieces for Hampton Court (P.R.O. A.O. 297/2482).

In 1712 Davies was the master-mason employed for building Lord Ashburnham’s house in St. James’s Square (Ashburnham Archives). He also signed monuments to Humphrey Levis, 1681, in St. Mary-le-Bow, and Sir Thomas Hamner, 1689, in the Temple Church, but both of these have been destroyed by enemy action.

In 1700 he took his son Edward as an apprentice.

DAVIS, EDWARD
b. 1813, d. 1878

Davis, who was a native of Carmarthen, attended the Royal Academy Schools in 1833 and also trained in the studio of E. H. Baily (q.v.). In 1844 he exhibited “The Power of the Law” at Westminster Hall, a work which is now in the Assize Courts at Cambridge. It did not meet with a very enthusiastic reception at the time, for the Art Union considered it “heavy in character, coarse in execution,” while the Literary Gazette succinctly remarked: “Would that this gentleman had the power of doing something better.” Nor did the statue of the Duke of Rutland, executed in 1850 for Leicester, meet with more favourable criticism, for the Builder (1851, page 715) thought that “His Grace is made to appear positively intoxicated.”

In 1851 Davis made a statue of Sir William Nott for Carmarthen, and, in 1860, one of Wedgwood for Stoke-on-Trent. At the Great Exhibition of 1851 he showed a marble group entitled “Venus and Cupid” (now in the Salford Art Gallery), and at the International Exhibition of 1862 a figure of “Rebecca.”

Davis exhibited at the Royal Academy, 1834–1877. His busts of Daniel Maclise and John Constable, now at Burlington House, were commissioned by the Academy in 1870 and 1874. He died on 14 August, 1878.

BUSTS

1836 Charles Kemble
1837 William Tooke
1838 David Salomons
1838 F. Raincock
1843 Benjamin Aislabie
1849 Duchess of Kent
1850 Sir John Jervis
1850 Duke of Rutland
1857 George Guthrie
1857 William Rathbone
1862 Dr. E. Parkes
1867 Thomas Hood
1876 Thirwall, Bishop of St. David’s
1876 Sir Francis Ronalds

DAY, CHARLES, of Cambridge
In 1781 he was the master-mason responsible for building Cambridge Town Hall (Town Archives).

DAY, JOHN
In 1818, he built, from the designs of Sir John Soane, the mausoleum of Sir Francis Bourgeois, which was attached to the Dulwich Picture Gallery (Soane Notebooks).

DAY, JOSEPH C.
fl. 1835–1842
In 1835 and 1836 he exhibited reliefs at the Royal Academy, and in the following year won a Silver Isis Medal from the Society of Arts for a “Model of a Faun’s Head.” He was awarded another Silver Medal in 1842 for a figure of Moses, while his brother, F. S. Day, also received the Isis Medal in 1839 for a portrait-bust.

There seem to have been other contemporary artists named Day, for a Henry John Day (born in 1825) attended the Royal Academy School of Sculpture in 1844, and in 1851 was working as assistant to George Cooper of Canterbury (q.v.). There was also W. Day, who won the Academy Silver Medal in 1840 for a clay model of a group, but who never exhibited and of whom there is no further trace.

DAY, R., of Camberwell
fl. 1822–1851
As a very young man Day was in partnership with his father, D. Day, a mason who became bankrupt in 1822 (European Magazine, 1822, page 277). After this he worked on his own, and did a good deal of stone-carving for Buckingham Palace between 1827 and 1828. Here he made capitals for the building itself, “rockwork bases, cornices and balustrades” for the terraces, and “wreaths for the four pediments of the conservatory.” Nash refers to him in a letter as an “extraordinarily excellent workman” (P.R.O. Works 19/3).

Day exhibited at the Royal Academy, 1827–1841, showing models and designs of buildings. His chief monumental work is the mausoleum of Richard Budd, 1824, in the churchyard of St. Matthew, Brixton. Allen, in his History of Lambeth (1826, page 414), describes it as “the finest sepulchral monument in the open air in the metropolis and perhaps not equalled by any one in the kingdom.”

DAYMOND, J.
He was the son of William Daymond, a London statuary, and showed a vase of flowers in marble at the Great Exhibition of 1851.

DEAN, H.
In 1794 he exhibited at the Royal Academy a bas-relief illustrating the parable of “The Good Samaritan.”

DEANE, JOHN
d. 1706
Deane served as City Mason between 1696 and 1705 and, in 1701, was responsible for all the masonry work (including the stone cartouches, coats of arms, etc.), for the Emmanuel Hospital in Tothill Fields (City Corporation Records, Rep. 106). Just before his death he was working at the Guildhall, and at a meeting of the Building Committee it was reported that he had offered to “do the whole front of the porch and chapel both as to imagery and masonry work for £60.”

In 1703 he received £26 from Mr. Tufnell of Langley’s, Chelmsford, “for a marble monument and gravestone,” a work which I have so far been unable to trace (Account-book of Samuel Tufnell).

Deane’s widow, Mary, who carried on the business, received £400 in 1708 for work at the Guildhall, though part of this sum was owing to her husband at the time of his death (City Cash Account 1/25).

DEARE, JOHN
b. 1759, d. 1798
He was born in Liverpool on 26 October, 1759, the son of a jeweller, and displayed from childhood an interest in art. When he was only ten years old he cut from a lump of wood with a penknife a model of a skeleton, exact in every detail. At the age of sixteen he was apprenticed to Thomas Carter (q.v.), who employed him on carving tablets for chimney-pieces.

In 1777 Deare attended the Royal Academy Schools and, three years later, won the Gold Medal for a subject from “Paradise Lost,” being the youngest artist to whom that honour had so far been awarded. However, he still continued to work for Carter and carved a tablet so well that “the sculptors allow me to be the first young fellow in the kingdom and sometimes come with a model for me to do them the very great favour of giving it a touch,” as he wrote to his father in 1783. For John Cheere (q.v.) he modelled a figure of Cupid and he describes how, when he was working there, “Mr. Bacon came after me and wanted me to model him some figures for a monument, which I agreed to do at the rate of two guineas a week.”

Deare’s ardour and enthusiasm for his art was unbounded and he seldom went to bed before three in the morning. He was interested, not only
in anatomy, but also in facial expression as supplying the key to the human mind and its passions. He was especially fascinated by the faces of criminals and once actually prevailed upon the relatives of an executed man to lend him the body for a few hours. He then proceeded to cut off the head and took it into the wash-house behind Cheere's workshop, where he sat up all night making a cast of his grisly trophy.

Towards the end of 1783 Deare set up on his own, his first independent work being executed for George Goaling of Whitten Park, Middlesex. This was a bas-relief in plaster, 21 ft. long, for the pediment of the house and depicted “The Destruction of the Titans by Jupiter” (Brewer's Beauties of England, Vol. X, Part V, page 432).

In 1785 the Royal Academy sent him to Rome for three years. Almost as soon as he arrived in the city commissions of all kinds crowded in upon him, and it was with difficulty that he found time to execute each year a work for exhibition at the Academy, an obligation which, as a travelling student, he was bound to fulfill.

Among Deare's patrons were Lord Cloncurry and Sir Richard Worsley. For the former he made a small statue of "Faunus," "noticed by Canova in warm terms of commendation" (Brewer's Beauties of Ireland, Vol. II, page 77), and for the latter a relief of a "Marine Venus," while for Sir George Corbett he executed a group of "Edward and Eleanor," a cast of which is, or was, in the Royal Liverpool Institution. Other patrons were Lord Berwick, who paid £700 for a statue of Apollo; the Prince of Wales and Lord Bristol, for whom Deare carved chimney-pieces; and Mr. Penn, who purchased a relief of "Caesar Invading Britain" to stand over the chimney-piece at Stoke Poges House (Hakewill's Windsor, page 257). Another went to the picture-gallery of Northwick Park, Gloucestershire (Art Union, 1846, page 273), while a third (a lovely relief of "Venus") was bought in 1787 by Sir Cecil Byssoppe, who brought it home in triumph and set it at the head of the staircase of Parham Park, Sussex, where it still remains; it is now the property of the Hon. Clive Pearson. The sculptor also received commissions from Henry Blundell, Lady Webster and the Duke of Sussex.

By the time the three years had elapsed Deare had so much work that there was no necessity for him to return to England. He accordingly settled down in Rome and married into a Roman family in 1791. He died in his thirty-ninth year on 17 August, 1798, and was buried in the Protestant Cemetery near the pyramid of Caius Cestius. Several accounts were given of the cause of his death. One story alleged that he had died as the result of being imprisoned in a dungeon, where he had been thrown, an unwanted husband, by the amorous commander of the French troops then in Rome, while another had it that he had literally "caught his death of cold" by sleeping all night on a block of marble, in the hope that he would learn in a dream how to execute his greatest masterpiece.

DEARE, JOSEPH
b. 1803, d. 1835

Nephew of John Deare (q.v.), he attended the Royal Academy Schools in 1822, winning a Silver Medal in 1823 and the Gold Medal two years later for his group of "David and Goliath." The Society of Arts twice awarded him the Silver Isis Medal, for a model of "Bacchus" in 1823, and for a bas-relief in the following year.

About 1832 Deare went to Liverpool, where he had a studio in the old Excise Office in Hanover Street and where he worked both as a sculptor and as a portrait-painter. Late one night in 1835 he was trying to reach his studio by climbing a wall when he fell and died shortly afterwards from his injuries.

Deare exhibited at the Royal Academy, 1826-1832, showing a group of "Virginibus and Virginigia" (1831), and busts of Thomas Kearsey (1830), Francis Thomas (1831) and the Rev. H. S. Cotton (1832). At the Liverpool Academy he exhibited busts of Dr. Raffles, Charles Nicholson ("Professor of the Flute"), Dr. Gall and Master W. Patton in 1832, and others of John North, Thomas Rodick and Dr. Stewart Traill in 1834. His bust of Lord Brougham was formerly at the Crystal Palace. (J. T. Smith's Nollekens and His Times, Vol. II.)

DE CARLE, BENJAMIN,
of Norwich
b. 1788, d. 1864

Son of John De Carle, of Norwich (q.v.), he was assisted by his relation, Mary (1787-1848), as some of the payments for work which he executed are made to her. In 1829 they supplied a marble chimney-piece for the Norwich Branch of the Bank of England.

De Carle's tablets include two in Norfolk, to the Rev. Ligonier Treadway, 1834, at Gayton, and to William Killett, 1846, at Kenninghall; and two in Suffolk, to William Scott, 1831, at Mildenhall, and to Mary Gataker, 1839, at Worlington.
DE CARLE, JOHN, of Norwich
b. 1750, d. 1828

He was the son of a bricklayer named Robert De Carle, and in 1766 was apprenticed to John Ivory, of Norwich (q.v.). In 1774 he became a Freeman of his native city, and in 1783 built the Blackfriars Bridge there, carving the city arms in the centre.

De Carle was also employed on building, or rebuilding, various houses in the eastern counties from designs by Sir John Soane. These included Burnham Hall, Norfolk, for Lord Camelford in 1783; Earlham Hall, Bungay, Norfolk, for William Windham in 1785; Saxlingham Hall, Norfolk, for Archdeacon Gooch in 1786; and Letton Hall, Norfolk, for Mr. Dillingham in 1787 (Soane Archives).

In his later works he was assisted by his brother, Robert, who became a Freeman of Norwich in 1785, and in 1790 they were the masons responsible for alterations, costing £3,905, to Norwich Castle (City Archives). Two other members of the family who became Freemens of the city were John De Carle’s sons, James (who acted as his father’s assistant) and Charles, the elder in 1797, the younger in 1804.

De Carle signs tablets to the Duchess of Norfolk, 1791, in St. John Maddermarket, Norwich; William Wollaston, 1797, at Great Finborough, Suffolk; Edmund Tyrell, 1799, at Stowmarket, Suffolk; the Earl of Clermont, 1806, at Little Cressingham, Norfolk; and William Stevenson, 1821, in St. Stephen’s, Norwich.

DE CARLE, ROBERT
the Younger, of Bury St. Edmunds
fl. 1795–1842

The two De Carle families of Norwich and Bury St. Edmunds are impossible to disentangle. Robert of Bury may be either a grandson of Robert De Carle the Elder, a mason and architect of the town (1724–1796), or the son of Robert De Carle, the bricklayer of Norwich, and therefore brother of John De Carle (q.v.). Nor is the confusion lessened by the fact that the two monuments to George Stone, 1808, at Woodton, Suffolk, and Bedingham, Norfolk, are signed “R. De Carle and Son.” It is, however, quite certain that Robert De Carle, of Bury, built the obelisk in memory of Frederick, Earl of Bristol and Bishop of Derry, which was erected in Ickworth Park, Suffolk, in 1803.

De Carle also signs a number of large wall tablets, including those to Lieut.-Colonel Collier, 1814, in St. Mary’s, Bury St. Edmunds; Gertrude Dawson, 1820, at Bardwell, Suffolk; Sir James Affleck, 1833, at Dalham, Suffolk; George Weller-Poley, 1840, at Boxted, Suffolk; Emma Colvile, 1840, at Hawstead, Suffolk; and Lady Pilkington, 1841, at Debdon, Essex. His monument to the Robinson family, 1822, at Denestone, Suffolk, takes the form of a large altar-tomb in stone, marble and touch, the design being a copy of a sixteenth-century work.

DE CARLE, ROBERT BRETTEINGHAM
d. 1791

He was the son of Robert De Carle the Elder, architect and mason of Bury St. Edmunds (1724–1796), and exhibited wax portraits at the Royal Academy in 1785. His obituary in the Bury Post of 11 February, 1791, refers to him as “an eminent modeller whose skill was unrivalled.”

Matthew Brettingham (1699–1769) was superintendent in 1748 until 1764, and it seems possible that the elder De Carle may have worked under him, which would explain his choice of his son’s second name; indeed, the architect may have consented to stand godfather to the child.

DE COUCY, JACINTHE

De Coucy was an Italian who was brought to Britain by Sir Thomas Cullum to decorate his seat of Hawstead Hall in Suffolk, and he also signs his patron’s monument, dated 1675, in Hawstead Church. Gage in his Hundred of Thingoe (page 459) describes this as “plaster, painted in colours and full of ornament.”

DEEVE, THOMAS,
of Bury St. Edmunds
fl. 1705–1715

He signs box-tombs dated 1705 and 1715 in the churchyard of St. Gregory’s, Sudbury, Suffolk.

DEITERICH, GEORGE

A pupil of Sir Henry Cheere (q.v.), he won a premium in 1758 from the Society of Arts for a model in clay.

DELAISTRE, N., of Paris
b. 1746, d. 1832

He was responsible for the lovely monument to Lord Boringdon, 1817, at Plympton St. Mary, Devon. Lord Morley, the boy’s father, had wished to employ an English sculptor and had asked four London artists to submit designs, but only Sir Richard Westmacott (q.v.) agreed to the proposal, the other three refusing to engage in what
they regarded as a competition. Lord Morley accordingly decided to look elsewhere and engaged Delaistre. The medallion which forms part of the monument was executed by the sculptor from a wax model of the child made by his mother.

(Some Account of Lord Boringdon's Accident, published 1818.)

DELL, J.

Between 1793 and 1797 he exhibited portraits in ivory and wax at the Royal Academy, the most interesting being a "portrait of an English sculptor in Rome in ivory," dated 1793. Dell's signed wax portrait of Robert Burns is on loan from Mrs. Bate at the Victoria and Albert Museum.

DELVEAUX, LAURENT

b. 1696, d. 1778

Born in the Low Countries, he came to London in 1717 and worked for a short time for F. Bird (q.v.) and F. Plumié (q.v.). He then joined Peter Scheemakers (q.v.), and together they carried out a number of works, including the "Apollo and Venus" at Stowe and the monuments of Sir Thomas Grantham, 1718, at Bicester, Oxon; Sir Samuel Ongley, 1726 (with a life-size standing figure) at Old Warden, Beds; and Dr. H. Chamberlen, 1728, in Westminster Abbey. Delveaux also carved the figure of "Time" for the Duke of Buckingham's monument in the Abbey, though the rest of the work was carried out by Scheemakers.

In 1724 he received £400 in three separate payments for the monument of the Earl of Rockingham at Rockingham, Northants. The first two payments are to Delveaux alone, the third being to "Delveaux and partner." In the same bill are payments to a "Mr. Moore" who received £31 for "surveying the work" and three guineas was given to Dr. Stanhope's servant for "transcribing the inscription" (Lincoln County Archives, Monson 28b/14/1).

In 1726 thirty works by the two partners were offered for sale at Covent Garden and, two years later, they went to Rome together. However, Delveaux only remained there two months and then left for Brussels where he was appointed sculptor to the Archduchess Marie Elizabeth of Austria. He revisited England for a short time in 1733 and then returned to the Continent. He died at Nivelle in 1778.

Among the chief works carried out by the sculptor on his own account during the eleven years he spent in England may be included the statue of George I for the Rolls Chapel in London, and a statue of "Hercules," "six foot high and finely done in marble" for Lord Castlemaine. This was Lot 267 on the fifth day of the Wanstead House sale of 1822, when it fetched £21 10s. 6d.

In the Sculpture Gallery at Woburn Abbey are statues of a "Crouching Venus," "David" and "Salmanis and Hermaphroditus," and a bust of Lucius Verus, all by Delveaux. According to the catalogue of 1822, his head of Caracalla was also in the gallery at that date. This was presumably the "bust of Caracalla cut in marble from the antique" which Vertue calls "a fine and just imitation" and notes that it was "done by him at Rome, 1732, and brought to England with him" (Walpole Society, Vertue, Vol. III, page 66). At Narford Hall, Norfolk, is the sculptor's statue of a "Sleeping Venus" which is described as "in female softness and delicacy . . . exceedingly beautiful" (Blomefield's Norfolk, Vol. VI, page 61).

Two vases by Delveaux, one with a relief of a Bacchanalian and the other with a heraldic subject, were also in the Wanstead House sale of 1822, where as Lots 371 and 372 they fetched £80 17s. and £78 15s. respectively. At West Wycombe Park are his groups of "The Four Seasons," which are said to have come from Nocton, Lincolnshire. His "Vertumnus and Pomona," and the terracotta model of the Abbey monument to Dr. Chamberlen already mentioned, are both in the Victoria and Albert Museum.

Models by Delveaux included in Scheemakers' sale of 1756 were "Head of Lucius Verus," "Faun and Goat," a group of "Papyrius and his Mother" and "The Calydonian Boar." Two models by the same sculptor, which were presented to the Royal Academy in 1769 by Lord Bessborough, may also have come from this sale (Royal Academy Archives).

At the sale of the Earl of Bessborough's collection at Roehampton, held by Mr. Christie on 7 April, 1801, one of the lots was "a bust of Lucius Verus, terra-cotta, modelled by Delveaux at the Villa Borghese" (Archives, Messrs. Christie).

(Georges Willame's Laurent Delveaux, published Brussels, 1914.)

DENER, JOHN, of Marston

b. 1646

Dener, who was called to give evidence in 1681 in the suit between Thomas Wood (q.v.) and Richard Frogley, told the court "that he served an apprenticeship of nine years to his father and during that time worked at Brazenose College Chapel" and "likewise at the Vestry and Vault of St. John's College and also at the Theater in Oxford." Under William Bird (q.v.), he had been
employed “at the making of the dorecase of the Divinity School in Oxford” and he had undertaken and finished the new stonework in the quadrangle of New College since he had become a master workman. He also stated that “now he is and hath been employed in the building of the Elaboratory within the University of Oxford” (Vice-Chancellor’s Court, 1681, Mich.).

DENHAM, JOSEPH, 
see Dinham, Joseph

DENMAN, MISS MARIA
b. 1776, d. 1861

She was born on 2 February, 1776, and baptized at St. Mary’s, Whitechapel, her parents being Ann and William Denman, of Mansell Street. She was the sister-in-law and adopted daughter of John Flaxman (q.v.), who at his death left her his casts, models, etc., which are now in the library of University College, London, though a number of them were damaged by enemy action.

In 1807 Miss Denman received a Silver Medal from the Society of Arts for the model of a Cupid’s head, which may be the plaster of “Cupid Bacchus,” now in the Soane Museum.

(British Museum, Ad. MS. 39791.)

DENMAN, THOMAS
b. 1787

Son of William and Ann Denman, of Mansell Street, London, and brother of Maria Denman (q.v.), he attended the Royal Academy Schools in 1807 and in the same year won the Lesser Silver Palette from the Society of Arts for a model of Antinous. In 1813 he gained a Silver Medal from the Royal Academy. He worked for many years in the studio of his brother-in-law, John Flaxman (q.v.), and on the latter’s death was commissioned to complete his unfinished works. These included the statue of the Marquess of Hastings for Calcot, and the monument to James Watson at Heston, Middlesex.

In 1829 Denman was employed on decorative work at Buckingham Palace, receiving £600. In 1833 he exhibited at the Royal Academy the sketch of a “Colossal Group executed for General Anderson’s Institution at Elgin.” In 1836 he showed a statue of Thomas Telford. He became a bankrupt in 1847.

Denman exhibited at the Royal Academy, 1815–1836, where, besides the works already mentioned, he also showed busts of John Flaxman (1830) and the Marquess of Hastings (1835). At the Birmingham Society of Artists in 1830 he showed “Menelaus Defending the Body of Patroclus”; he also exhibited at the British Institution, 1818–1827.

Denman was a prolific statuary, but most of his monuments and tablets are uninspired and dull, except when they borrow a Flaxman design. The list which follows is of the best of these.

DENT, ISAAC, of Rochester

He was the master-mason for building the Travellers' House at Rochester in 1771, and also carved the large urn on the central apex of the roof (Account-book, Travellers’ House).

DERMOTT, T. M.

A local statuary, he signs the large wall-tablet to John Postlethwaite, 1818, in the Parish Church
of Ashton-under-Lyne. This is decorated with masonic emblems, the number of Postlethwaite's Lodge, etc., and is one of the earliest monuments embodying such details that I have so far encountered.

DE VAERE, JOHN
b. 1755, d. 1830

He was born in France, his name being originally spelt "De Vaere," but he changed this slightly on coming to England. Here he attended the Royal Academy Schools in 1786, giving the date of his birth as 10 March, 1755. He also seems to have modelled for Wedgwood about this time, for the latter gave him ten guineas in 1787 towards the expenses of his journey to Rome.

While in Rome, de Vaere assisted Flaxman (q.v.) and with him executed a group of "The Fury of Athamas." On 15 March, 1788, the latter wrote to Byerly asking him to inform Wedgwood that "Mr. De-vaere has been at work with the utmost diligence ever since he has been here on the basis of the Borghese vase in which he has succeeded very well, but it will still take him some weeks to finish and after he has done, I also shall have something to do to it." "Mr. Wedgwood," Flaxman continued, "will easily conceive as this is new work to Mr. D. he must needs be slow at first especially as he takes so much pains. As a proof he follows his studies well he has already gained the Pope's first silver medal for a figure modelled at night in the Roman Academy" (Wedgwood Archives).

On his return to England in 1790, De Vaere went to work for Wedgwood at Etruria, where he succeeded H. Webber (q.v.) as one of the chief modellers. His original wax models for the medallions of the Admirals St. Vincent, Duncan and Nelson are now in the Etruria Museum. He left the firm after Wedgwood's death in 1795 and entered the employment of Mrs. Coade (q.v.), for whom he modelled in 1797 a large group for the cornice of the Pelican Life Insurance Office in Lombard Street. This work, which was illustrated in the European Magazine (Vol. 39, page 262), is now in the grounds of the Jeffrye Museum. He seems to have set up for himself about 1800, but left England for Flanders in 1810 and was appointed Professor of Sculpture to the Royal Academy of Ghent. His bust by P. J. Farmer (q.v.) was exhibited at the Royal Academy in 1826. De Vaere died four years later.

De Vaere exhibited at the Royal Academy, 1797-1809, where his works included "a candelabra in Coade artificial stone" (1798); a statue of "Apollo" (1800); and a design for a monument to General McPherson of Charlestown, South Carolina, who had been drowned off New York in 1806. His statue of "Mercury" was formerly in the collection of Mr. Hope of Deeplene.

Tablets signed by De Vaere commemorate the Countess of Kenmare, 1806, in St. Giles-in-the-Fields; William Drake, 1806, at Amersham, Bucks; Hannah Shirley, 1808, in Bristol Cathedral; and Edmund Irby, 1809, at Whiston, Northants.

(J. T. Smith's Nollekens and His Times; Meteyard's Wedgwood; authorities cited in text.)

DEVAL, JOHN, the Elder
b. 1701, d. 1774

He was the son of "George Deval, yeoman of Ensham, Oxon, deceased," and was bound apprentice in 1718 to Joshua Fletcher (q.v.). After he became free in 1727 he worked for Andrews Jelte (q.v.), but afterwards set up for himself and was later assisted by his son, John Deval the Younger (q.v.). Both father and son executed a good deal of work for the Crown, and were the chief masons for the Royal Palaces, the Tower of London, the Royal Mews, etc. In 1760 the elder Deval became Master of the Masons’ Company. He died in 1774 and was buried at Isleworth.

As a mason Deval was employed at St. Olave's, Southwark, in 1737; Kimbolton Castle in 1738; the Mansion House and Guy's Hospital in 1739; and Cornbury House, London, in 1744. Between 1742 and 1752 he was also the mason responsible for building the Foundling Hospital and its chapel. In 1747 he informed the Committee that, on the demolition of Canons, he had purchased for £24 10s. "two Venetian windows which would be fit for the chappell of this hospital" and that he was prepared to part with them at cost price. His offer, however, was regretfully refused on the ground that the windows were too large. Two years later he presented to the hospital a marble chimney-piece and a marble surround for a relief by Rysbrack, both of which are now in the office of the hospital in Brunswick Square (Archives, Foundling Hospital). In 1769 he was the mason for building Newgate Prison.

Besides the chimney-piece for the Foundling Hospital, Deval made in 1739 one costing £85 for Sir Richard Hoare of Stourhead, and others for the house at Clapham belonging to Mr. Arnold, a partner in Hoare's Bank (Bank Archives), and for Charles Lowndes of Chesham Bury, Bucks. In 1755 he made a chimney-piece for Christopher Tower of Weald Hall, Essex (Tower Archives), and in 1767 another for Sir Rowland Winn, of Nostell Priory, Yorkshire.
JOHN DEARE

"Venus," 1787, Parham Park, Sussex.

ANNE SEYMOUR DAMER

"Two Dogs," Goodwood, Sussex.
CLAUDE DAVID
Philip Carteret (died 1710), Westminster Abbey.

JOHN DEVAL THE YOUNGER
Thomas Spackman, 1786 Cliffe Pypard, Wiltshire.
Deval was working at Woburn in or before 1751, for in that year Horace Walpole visited the house and noticed that "the Hall has two reliefs by Duval" (Walpole Society, Vol. XVI, page 17). In 1756 also he made the chimney-pieces for the gallery and state-rooms (Bedford Archives). In 1738 he made marble tables for Lord Folkestone at Longford Castle (Archives, Earl of Radnor), while in 1756 he supplied a chimney-piece costing £289 to Lord Fitzwilliam for Milton Hall.

(Archives of houses, etc., mentioned in text.)

DEVAL, JOHN, the Younger
b. 1728, d. 1794

He was the son of John Deval the Elder (q.v.) and was admitted to the Masons' Company by patrimony in 1777. In 1784 he became Master of the Company, and in 1793 was joined in the business by his son, a third John Deval. Deval, who was also much employed by the Crown, succeeded his father as master-mason to the Royal Palaces, etc., on the latter's death in 1774.

As a mason-contractor, the younger Deval built the north and south fronts of Somerset House, 1777–1786; Coutts' Bank in the Strand, 1780–1789 (Bank Archives); the King's Bench Prison, 1780–1784, at a total cost of £4,590; the house for the Marshal of the Prison, 1781–1782, for £546; Argyll House, 1783; the Government building next the Admiralty, 1786–1791, for which he received £1,875; the Temple at Audley End, 1791, at a cost of £300 (Essex Records, D/DBY.A.222); and the new Guardroom at St. James's Palace, 1793.

He was also employed on additions, or repairs, to Cobham Hall, Kent, between 1776 and 1778 (Archives, Earl of Darnley); Audley End in 1785, where he was paid £790: and Carlton House, where he received, in 1788, £931 for chimney-pieces and statuary work (P.R.O. H.O. 73/18). Between 1784 and 1789 he rebuilt the Queen Mary block of Greenwich Palace after it had been destroyed by fire (P.R.O. Ad.MS. 68/813), and, in 1791 and 1792, carried out work at Woburn Abbey for a total sum of £1,653. In 1779 he was also responsible for the mausoleum of the Earls of Radnor in Britford churchyard, Wiltshire.

In addition to the work at Somerset House already mentioned, Deval carved "twenty-five faces of rich Corinthian capitals of columns" for £213 and, in 1786, made Portland stone chimney-pieces for the building. Two years later, when the Royal Chapel at Greenwich was being rebuilt after the fire, he executed all the marble-work. The £1,897 which he received included £64 for "591 feet of antique galoches of statuary in black marble," and £390 for "four circular flowers of statuary and black marble and two large flowers" and a marble doorcase. In the same year he was paid £73 for marble-work in Prince Edward's apartments in St. James's Palace. In 1791 he was paid £163 for carving the great Portland stone capital of the column erected at Colne Park, near Colchester.

Chimney-pieces executed by Deval, in addition to those at Carlton House and Somerset House, included one in the Long Parlor at Longford Castle, which cost £66 in 1780, and others for William Windham of Earsham Hall, Norfolk, in 1783; for Lord Berwick at Attingham Park, Salop, in 1785; for Bedford House, London, in 1787; and for the waiting-room in St. James's Palace in 1793.

Deval's most important monument commemorates Thomas Spackman, 1786, at Cliffe Pypard, Wiltshire. This exciting and arresting work is 18 ft. high and has for its chief feature a life-size figure of Spackman with one hand outstretched. At his feet lies a straw basket of carpenter's tools, while to left and right stand a boy and a girl, pupils of the Charity School he endowed out of the fortune he made as a carpenter. More emblems of his trade are in relief at the base of the monument. The excellence of this work, in its obscure village church, shows that Deval deserves greater recognition than he has had hitherto, for he was undoubtedly a fine artist in the best English tradition.

(Archives of houses, etc., mentioned in the text.)

DE VEAUX, or DE VAUX, JOHN
fl. 1821–1836

De Veaux, who also spells his name De Vaux, exhibited intaglio portraits at the Royal Academy between 1832 and 1834. His wax medallions of William IV and the Duke of York are in the National Portrait Gallery.

DEVIGNE, or DEVISNE
fl. 1706

He was employed by Mr. Thomas Coke of Melbourne Hall, Derbyshire, in 1706, carving the bases for lead figures and the "Vase of the Seasons," all made by John Nost (q.v.). Mr. Sergeant, Coke's Derbyshire agent, writing to his master, says: "Mr. Devigne will come about them (the pedestals) by next week. They are to be made from stone from the new quarry. Mr. Devigne and all the workmen think it will work as fine or finer than Donington." Mr. Coke paid Devigne, whom he refers to as "ye French carver," £27; his work included, besides the sculptured pedestals for the
great vase and the groups of amorini, two baskets of flowers and fruit, which still stand in front of Melbourne Hall. Devigne seems to have returned to France, as late in 1706 Sergeant writes to Mr. Coke: "Mr. Devigne desires to know if you have any more occasion for him, for he thinks to leave this country in a little time."

(Archives, Lady Lucas and Dingwall) he is described as a "figure-maker" when, in 1719, he was paid for plaster statues for Wrest Park, Bedfordshire. In the same year he also received £32 8s. from Lord Derby for statues for Knowsley (Derby Archives, 2005/5). According to J. T. Smith (The Streets of London), Dickinson's yard was on the site of Gloucester House, Piccadilly.

DICKINSON, G., of Newark

He signs a slate headstone with delightful decorative details and a relief of "Hope" to Elizabeth Dickinson, 1776, at Scrooby, Nottinghamshire.

DIEMAR, JOHN EMMANUEL

fl. 1761–1783

Diemar, whose address is given as "opposite the Lying-in Hospital, Westminster Bridge," was appointed one of the directors of the Society of Artists in 1769. He exhibited models in wax at the Free Society in 1761 and at the Society of Artists between 1768 and 1783.

DIEMAR, EMMANUEL

MATTHIAS

fl. 1768–1790

Presumably a brother of J. E. Diemar (q.v.), he exhibited wax models, mostly of flowers, at the Society of Artists, 1768–1790. A flower-piece in wax, signed by him, is in the Victoria and Albert Museum.

DIEVOT, A., of Mechelen

d. c. 1715

Dievot worked for Grinling Gibbons (q.v.) and, according to Vertue (Walpole Society, Vertue, Vol. I, page 61), he and Laurens Vandermeulen (q.v. "modelled and made" the statue of James II commissioned from their master. This assertion seems to be contradicted by Sir John Bramston in his autobiography (Camden Society, 1845), for he mentions that "on New Year's Day, 1686, a statue in brass was to be seen (placed the day before) in the yard at Whitehall made by Gibbons at the charge of Toby Rustick (sic) of the present King James II."

Vertue says that Deviot gave up "his business of carving" and left England in the "troubles of the Revolution," retiring to Antwerp and dying "at a good age" at Mechelen (Vertue, op. cit., page 106).
DINHAM, or DENHAM,
JOSEPH
b. 1803, d. 1854

He attended the Royal Academy Schools in 1820 and gained Silver Medals in 1821 and 1824. On leaving the schools he was for some time employed in the studio of Chantrey (q.v.) and then set up on his own. He exhibited at the Royal Academy, 1823–1832, where his busts included those of Harriet Gouldsmith (1825), E. H. Baily, R.A. (1826), Sir Richard Birnie (1827), Sir James Wigram (1849), and the Marquess of Hastings (1851). His “Sleeping Nymph” (1826) is, or was, at Blagdon, Northumberland, and he signs the monument of Elizabeth Mackenzie (d. 1840) at St. James’s, Bermondsey. Dinham died in December, 1854, leaving a widow and five children.

DIPPLE, —, of Richmond

He signs the monument of Mrs. Elizabeth Theobald, 1795, in Kew Parish Church. In 1808 the firm was known as “Dipple, Hudson and Dipple,” of Red Lion Street, Richmond, but by 1827 was owned by Henry Dipple of the same address.

DIXON, JOHN
fl. 1754–1766

He was born in St. Botolph-without-Aldgate, and in 1754 was apprenticed to Henry Gregory; he became free in 1761.

Dixons signs the monuments of Bishop Sherlock, 1764, in Fulham churchyard; the first and second Earls Waldegrave, 1765, at Navestock, Essex; and the Rev. Henry Trotter, 1766, at Graveley, Cambs.

A sale of a “Mr. Dixon, mason” (presumably John Dixon) was held at “his yard at Pedlars Acre, Lambeth,” on 13 December, 1766, and the two following days. Among the lots were models for tablets and monuments, various busts and figures, terra-cottas of Briseis and Agamemnon, and a large statue of Mercury. Also sold were four marble busts of Inigo Jones, Seneca, Dr. Stukely and Palladio, all by “Steff. Domine-Ceti” and “two vases in statuary marble inlaid with sienna.”

DIXON, JOSEPH

d. 1787

In 1760 he became free of the Masons’ Company “by virtue of an order of the Lord Mayor and Court of Aldermen” and in the same year began to build Blackfriars Bridge, which was completed in 1768. He was also the mason responsible for the bridge at Exeter (Gentleman’s Magazine, 1817, Part II, page 363), and in 1762 was employed on alterations to Woburn Abbey (Bedford Archives). As a mason-contractor under the architect Henry Holland, Dixon built, or altered, houses for Baron Atkinson at Putney, in 1767; for Sir Thomas Robinson at Chelsea, in 1769; for Philip Stephens at Fulham, in 1770; and for Mrs. Crawford in Hertford Street and Sir Samson Gideon in St. James’s Square. In 1769 he carved the dining-room chimney-piece, costing £48, for Lord Warwick’s house in the same Square, and also received £100 in that year for chimney-pieces for Colonel Scott, of Charlton, Kent (Notebook of Henry Holland, Soane Museum).

As an architect Dixon designed Battersea Church, built between 1775 and 1777, where he was buried “without a fee” in the crypt in 1787 (J. G. Taylor’s Our Lady of Battersea), nine years after he had been declared a bankrupt (London Magazine, 1778, page 190).

In 1764 one of his pupils was John Carter, who later made a name for himself as an architectural draughtsman, and who in 1768 began to make drawings for Henry Holland, the employer of his former master (Builder, 1850, page 303).

DOE, JOHN, of London
fl. 1722–1727

Chief assistant to Anthony Hart (q.v.), he carved a number of marble chimney-pieces for Dudley North, of Glenham Hall, Suffolk. His contract, dated March, 1722–1723, stated that “Mr. Doe shall do all the chimneys in the house at Glenham as Mr. North shall order at 5 shs. a foot, and the marble paving in ye middle of ye chapel at 2 shs. a foot.” The rooms for which chimney-pieces were made included “The Great Room,” “Roome next ye Chapell,” and the “Roome next ye Great stairs.” In 1727 Doe also carved the capitals of the gate piers. (North Archives.)

DORMAN, JOSEPH,
of Chelmsford
fl. 1801–1840

From 1801 until 1813 he acted as foreman to G. Wray, a mason of Chelmsford, but in the latter year set up for himself. He signs tablets to the Rev. William Harty, 1823, at Great Leighs, Essex, and to John Poole, 1839, at Bovinger in the same county.

D’ORSAY, COUNT ALFRED
b. 1801, d. 1852

It is difficult to assess d’Orsay’s work as a sculptor, for it has always been hinted that he employed “ghosts” to execute most of his work. The Art
Journal, in its obituary of Thomas Henry Nicholson (1870, page 204), states definitely that it was Nicholson who carved for the Count, and that he used to leave the studio when visitors were announced. The same article also mentions that he used to complain bitterly of his employer's attempts at modelling, which apparently took him weeks to correct. W. Behnes (q.v.), when in need of money, is also said to have assisted d'Orsay, but on the other hand, it is only fair to add that the latter's supporters always maintained, not only that he did all his work unaided, but that it equalled, if it did not surpass, the productions of professional sculptors.

D'Orsay exhibited at the Royal Academy, 1843-1848, and in the following year (when he and Lady Blessington left England) a number of his works were included in the sale held at Gore House. These were bronze busts of Lord Lyndhurst, Lord Brougham, the Emperor of Austria, and Count d'Orsay the elder; marble busts of Wellington, Sir F. Grant and Lady Blessington; bronze statuettes of Louis Napoleon (afterwards the Emperor Napoleon III), the Emperor of Russia, and Daniel O'Connell; a marble statuette of Jenny Lind; and equestrian statuettes of Wellington and Napoleon Bonaparte.

DOVELL, N., of Barnstaple
He signs a tablet to Augustus Willett, 1813, at Westleigh, Devon.

DOWYER, —
An entry made in 1726 in the private account book of the first Duke of Kent (Archives, Lady Lucas and Dingwall) reads: “Paid Dowyer, the carver, third payment, on account of Lord Harold’s monument, £40”; a fourth payment of £20 is later noted in the same book.

The monument referred to is in Filton Church, Bedfordshire, and consists of a life-size reclining figure on a sarcophagus. The workmanship is generally clumsy, the attitude of the figure is awkward and the head is too big for the body; in fact, the only features of the monument worth noting are the curious feet of the sarcophagus, which are in the form of eagle's claws. It seems strange that the Duke should have engaged so obscure and second-rate a sculptor to execute the monument to his deeply loved, only surviving son.

DRAPE, JOHN
In 1746 he was working at Welbeck Abbey, and with his partner, William Wilson, carved “a large ornament with festoons of fruit and flowers and a keystone with a lion's head in front” (Archives, Duke of Portland).

DRAWATER, JAMES
fl. 1766-1775
Drawater, who was described as “of St. Mary le Bonne, Middlesex, mason,” became a bankrupt in 1770 (London Magazine, 1770, page 112), but apparently continued in business, for he was the mason employed six years later on repairs to Sir John Griffin's London house (Essex Record Office, D./DBY.A.1./27). He also signs the tablet to Richard Canning, 1775, in St. Helen's, Ipswich. As a contractor he built two houses in Harrow Road in 1768 (Middlesex Building Affidavits).

His father could have been the “Barnwall Drawater, mason” employed in 1747 by the Hon. George Fox at his house in Cavendish Square (Archives, Bramham Park).

DREW, —, of London
He signs a tablet with charming details to Mrs. Lloyd, 1767, in Marylebone Chapel.

DREW, CHARLES, of Bedford
fl. 1791-1819.
Between 1808 and 1812 he was the mason responsible for building Moggenhanger House, Bedfordshire, from designs by Sir John Soane. He also worked as a stonemason and his tablets usually have carefully carved details. Examples of these in Bedfordshire include those to Henry Sharp, 1791, at Filton; William Edwards, 1800, at Arlesey; Carter Shavington, 1805, at Kempton; and John Osborn, 1814, at Campton. Drew also signs others in Buckinghamshire to Alexander Small, 1816, at Clifton-Reynes, and to John Higgins, 1819, at Weston Underwood.

(Soane Archives.)

DREW, THOMAS, of Bury St. Edmunds
In 1706 he made the black-marble monumental ledger of Isabella, Countess of Bristol, in Ickworth Church, Suffolk (Account-book, first Earl of Bristol).

DREWETT, WILLIAM, of Bristol
fl. 1789-1810
He apparently had various partners for, although he signs most of his monuments alone, others are signed “Jones, Dunn and Drewett” or “Dunn and Drewett.” His monument to Mary Teast, 1790, at Henbury, Glos, is about 14 ft. high and has a figure of “Hope,” while that of Sir Robert Mackworth, 1794, at Neath, Glamorgan, has a large draped sarcophagus.
Tablets signed by this firm include those commemorating Morgan Evans, 1789, at Lyndsey, Monmouth; Samuel Webb, 1799, at Wirkford, Shropshire; Hannah Hughes, 1799, in St. Mary Redcliffe, Bristol; Eleanor Kemesys, 1803, at Newport, Monmouth; William Wheeler, 1803, in St. Augustine's, Bristol; and John Lloyd, 1810, in Carmarthen Parish Church. In 1794 Drewett agreed with John Colby to build for £84 a Painwick-stone staircase for Fynone House, Pembroke, and to supply a marble chimney-piece for £5 17s. 6d. (Colby Archives).

DREWIT, HENRY
He was the son of Henry Drewit (or Druitt), who was apprenticed to John Cooper in 1721, and the grandson of Henry Druitt, "stone-carver" of Goodman's Fields. In 1763 he received a premium from the Society of Arts for an "ornamental tablet in clay."

DRUIT, JOSEPH, of London
fl. 1825-1827
His tablet to the Townsend family, erected in 1826, is at Godmanchester, Hunts. Druitt is listed as a "statuary" in the London Directory of 1827.

DU CHAIME, —
During the building of Castle Howard, Yorkshire, he received, in 1706, £53 for carved stonework (Castle Howard Archives).

DUCKETT, THOMAS, of Preston
b. 1804, d. 1878
He was a self-taught artist, the son of a farmer and a native of Preston, who first worked as an apprentice to a local plasterer. However, he soon changed his occupation for that of wood-carver to a firm of cabinet-makers, and later went to Liverpool where he was employed by Messrs. Franceys (q.v.), and exhibited a bust of the Rev. J. Dunn at the Liverpool Academy in 1828. From there he moved to Kendal and joined the firm of Webster (q.v.) of that town, ultimately becoming manager of their sculptural department. His first large work was the "St. George and the Dragon" in limestone for the pediment of Kendal Roman Catholic Church in New Road. Shortly afterwards he returned to Preston and lived there until his death in 1878.
Duckett did a good deal of work in his native town and in 1838 won a prize for a design for a statue of John Horrocks. In 1846 he executed the carved stonework on the front of the Literary and Philosophical Institute and, in 1851, made a statue of Sir Robert Peel in Westmorland limestone, the general effect of which was "injured by the incongruous character of the drapery of the lower limbs" (Hardwicke's History of Preston, 1838, page 434). He also carved a marble altar for St. Augustine's Church.
Duckett also made a group of two children over the entrance to an infants' school in Lancaster, and designed and executed in plaster a colossal seated statue of Sir Richard Arkwright. This was eventually demolished as no funds were available to carve it in marble. The sculptor competed for the statues of Peel for Bolton, and the Duke of Wellington for Leeds, but in neither case was his model selected.
Duckett's bust of Thomas German (1851) is in Preston Town Hall, and in the Art Gallery are those of T. B. Addison (1844), the Rev. Robert Harris (1845), Thomas German (1847), William Taylor (1852), John Addison (1861), Thomas Miller (1870) and Miles Myres (1874). His tablets to T. Lowndes (1854) and Thomas Hart (1861) are respectively in the churches of St. George and St. John. Outside Preston he signs tablets to Richard Gell (1841), at Walton-le-Dale, and Giles Thornton (1860), at Poulton-le-Fylde, Lancashire, while the large marble coat of arms of the Brockholes family in the same church is also his work. (Information, Preston Public Library.)

DUDLEY, CORNELIUS,
of Bristol
He signs the monument to Anna Maria, daughter of Morgan Lloyd, 1738, at Llangaddock, Carnarvon.

DUGDALE, THOMAS
fl. 1677–1678
In 1678 he carved in stone "four sculpture or figures" for the top of Sir Kenrick Eyton's house at Wrexham and, in the same year, executed the magnificent panelling of the long gallery at Chirk Castle. This is still in its original position, although the "fifteen capitals" previously made for the drawing-room by Dugdale in 1677 were removed during a Georgian restoration (Myddelton Archives).
He may be the same "Thomas Dugdale, of Liverpool, carver," whose will was proved in 1714.

DUNBAR, DAVID, the Elder,
of Carlisle
fl. 1815–1838
Dunbar was living in London in 1815, but two years later removed to Carlisle, where he
apparently spent the rest of his life. He exhibited at the Royal Academy, 1815–1823, and at the Northern Society's Exhibition at Leeds in 1826 showed a statue of Mr. W. Hey and a bust of "Isis," while two years later he showed figures of "A Sleeping Child" and "Love." In 1829 he exhibited "A Nymph" at the Birmingham Society of Artists.

Dunbar's statue of Robert Williamson (1835) is in Newcastle Cathedral and that of the Rev. Robert Gray (1838) at Sunderland. His bust of the Earl of Lonsdale (1834) was formerly at Lowther Castle. He also signs monuments to the Rev. Edward Stanley, 1834, at Workington, Cumberland; Robert Anderson, 1833, Carlisle Cathedral; Elizabeth Connell, 1825, St. Cuthbert's, Carlisle; and the Rev. Alexander Scott, with a portrait bust, at St. Michael's, Dumfries. In Carlisle Cathedral is the small sleeping figure of the artist's infant daughter who died in 1825, and a similar monument commemorates Edith Dunbar (also a daughter of the artist?) in St. Michael's, Dumfries.

DUNBAR, DAVID, the Younger

_d. 1866_

Son of David Dunbar the Elder (q.v.), he went to study in Rome, and on his return to England was employed by Sir Francis Chantrey (q.v.). He later went to Newcastle, where he lived for some years, but came back to London about 1840. In 1844 he exhibited a statue of Robert Burns in Westminster Hall, which "would have been very pleasing," according to the _Literary Gazette_ of that year (page 482), "had the execution been equal to the intention."

In 1850 Dunbar carved the recumbent figure of Miss Catherine Losh in Wrey Church, Cumberland, while in the following year he repaired some of the statues on the exterior of St. Mary's, Oxford.

He exhibited at the Royal Academy, 1840–1859, where his busts included one of Sir Martin Foulkes in 1844. He also made another of Alderman Wilson, which is now at Gateshead, but his most popular works were the medallions and busts (of which he executed a number of replicas) of Grace Darling and her father, William.

_(Builder, 1866, page 638; Art Journal, 1866, page 320.)_

DUNCKLEY, SAMUEL,

_of Warwick_

About 1757 John Sabin, the Parish Clerk of St. Mary's Collegiate Church, Warwick, wrote a "brief description" of the building, in which he mentioned that Dunckley, "a poor mason of Warwick," "designed, carved, built and finished that August Frontispiece in the Gothic Taste" in 1704. He is, of course, referring to the entrance to the Beauchamp Chapel in the south transept of the church.

DUNN, CHARLES, of Greenwich

_d. 1762_

He assisted his father, Thomas Dunn (q.v.), and, after the latter's death in 1746, carried on the family business. Under Dance the Elder he was the master-mason for building Shoreditch Parish Church, the foundation-stone of which was laid on 15 November, 1736 (_Gentleman's Magazine_, 1736, page 682).

In 1757 Dunn became a bankrupt (_London Magazine_, 1757, page 44), but a year later he was working with his partner, John Townsend—son of his father's old partner, John Townsends—of London (q.v.)—on repairs at Greenwich Palace (P.R.O. Ad. MS. 68/767). Dunn's death is recorded in the Court Minute-book of the Masons' Company.

DUNN, THOMAS

_b. c. 1676, d. 1746_

Apprenticed to David Farmer, of Southwark, in 1692, he became free in 1699 and was Renter-Warden of the Masons' Company in 1722. As a mason-contractor he was much employed by Nicholas Hawksmoor and built the churches of Spitalfields, 1723–1729, and St. Mary Woolnoth, 1716–1727, being assisted in both cases by his partner, Thomas Bray. In 1710 he was the mason for Clapham Church (Churchwardens' Accounts), and in 1729 built the church of Stratford-le-Bow.

Dunn did a considerable amount of work at Greenwich Palace, where he and his partner, John Townsend the Younger (q.v.), built the south, north, north-east and north-west pavilions of Queen Anne's Court between 1729 and 1731 (P.R.O. A.D. 68/708–710). In 1720 he had been appointed mason to the Grocers' Company (Company's Archives); in 1739 he was one of the mason-contractors for the Mansion House.

In 1729 he was paid £37 by "Mr. Hayes" for building a wall and balustrade for a house at Wimbledon. (Surrey Records 19/20/100.) This must have been a large work as the iron railings and gate cost £65.

As a statuary Dunn is of considerable importance. He signs two monuments, the first to Edward Peck, 1736, at Christ Church, Spitalfields, which has a fine portrait-bust; and the second to Edward Colman, 1739, at Brent Eleigh, Suffolk, which is a dramatic and important work with its
life-sized reclining figure in an elaborate architectural setting.

He also made a number of chimney-pieces, including fourteen for the north-west pavilion of Greenwich Hospital (P.R.O. A.D. 68/709); one of Dr. Mead’s apartments at the Royal College of Physicians in 1732 (Archives, Royal College of Physicians); and one in 1733 for Mr. Benjamin Hoare, of Boreham Hall, Essex, which cost £43 (Archives, Hoare’s Bank).

Dunn’s yard was in Blackman Street, Southwark. He died on 30 April, 1746 (Gentleman’s Magazine, 1746, page 272).

DURANT, JOHN
fl. 1757–1774

He was apprenticed to J. Wilton (q.v.) and later employed by Chrsashley or Crashley (q.v.). In 1757 he sent a model of “Marsyas” to the Society of Arts and in 1774 exhibited an alto-relievo of “Minerva Judging the Arts” at the Society of Artists.

DURANT, MISS SUSAN
d. 1873

She first studied sculpture in France under the Baron de Triqueti, but had then no intention of adopting it as a profession. However, she later changed her mind and was a frequent exhibitor at the Royal Academy from 1847 until her death. She was also one of Queen Victoria’s favourite sculptors, and not only made busts and medallions of the Royal Family, but was also permitted for a time to take Princess Louise, Duchess of Argyll, as a pupil in her studio. In 1856 and 1857 she assisted her old master, the Baron de Triqueti (1804–1874), to execute the monument of Leopold, King of the Belgians (uncle of the Queen), in St. George’s Chapel, Windsor, and carved for it a number of portrait-medallions.

In 1851 Miss Durant showed statues of “The Chief Mourner” and “Belisarius” at the Great Exhibition. In 1857 she lent her statue of “Robin Hood” to the exhibition of Art Treasures of the United Kingdom, held in Manchester, and in 1863 made a figure of “The Faithful Shepherdess” for the Mansion House. Her medallions of the Prince Consort and Queen Victoria, now at Windsor Castle, were executed in 1860 and 1866 respectively, and she also carved a bust of the Queen for the Inner Temple in 1872.

Miss Durant exhibited various works at the Royal Academy, 1847–1873, including “Negligent Watch-boy of the Vineyards Catching Locusts” in 1858 and “Ruth” in 1869, the former being described by the Art Journal as an “elaborate and very admirable composition.” Among her busts were those of Miss Allwood (1847), Daniel Harvey (1851), a self-portrait (1853), Mrs. Beecher Stowe (1857), Lady Killeen (1858) and the Baron de Triqueti (1864). She also exhibited at the British Institution in 1860. She died in Paris on 1 January, 1873.

DURHAM, JOSEPH
b. 1814, d. 1877

Durham, who was born in London and apprenticed to J. Francis (q.v.), worked in the studio of E. H. Baily (q.v.) after becoming free, and first exhibited at the Royal Academy in 1835.

In 1858 his model of “Britannia Presiding Over the Four Quarters of the Globe” was awarded the first prize in a competition to select a memorial for the Great Exhibition, and in 1863 he executed a statue of the Prince Consort. This was first erected in the gardens of the Royal Horticultural Society, but later placed on the front of the Albert Hall. In the following year came his group entitled “Santa Filomena,” which included a figure of Florence Nightingale, while in 1871 he made the memorial of the Building Committee for the Freemasons’ Hall. His statue of “Sunshine” was shown at the Exhibition of Art Treasures of the United Kingdom held in Manchester in 1857.

He also made a number of fountains, including those at St. Lawrence Jewry in 1866; Somerleyton Hall, Suffolk, in 1868; and Gloucester Gate, Regent’s Park, in 1878.

Durham exhibited no less than one hundred and twenty-eight works at the Royal Academy between 1835 and 1878, the last being shown after his death. He was elected an Associate of the Academy in 1868 and died in London after a long illness in 1877. His pair of statues, “Master Tom” and “Miss Ellie,” fetched 180 guineas at the sale of his works, held at Christie’s on 18 March of the following year, while a similar sum was paid for his group of “The Sirens and the Drowned Leander.” Other works of his were later sold at Christie’s, including “Go To Sleep!” at the Joseph Arden sale of 26 April, 1879; “The First Dip” at the Edward Brooke sale of 4 March, 1882; and “At the Spring” at the Joseph Harrison sale of 10 May, 1884. The prices in each case were 120 guineas, 200 guineas and 220 guineas respectively.

MONUMENTS
1861 Madras (Cathedral)
1874 Bushey, Herts (churchyard)

DURRANT, EUSTACE

He was apprenticed to G. Hart, of London, but set up for himself in Ipswich in 1735, announcing in the Ipswich Gazette that he made “monuments, gravestones, coats of arms and chimney-pieces of the newest fashion,” and that he was also prepared to make “designs for any manner of building at reasonable rates.”
EAMES, or EMES, M., of Exeter
fl. 1788–1812

Though his tablets feature rather too often the draped urn against a pyramid, he was a careful, if uninspired, craftsman. Towards the end of his career he went into partnership with W. Stephens (q.v.), and was succeeded in the business by his son, W. Eames, who signs a tablet to Elizabeth Penton, 1829, at Bampton, Devon.

Tablets signed by Eames in the same county include those to Richard Blake, 1788, at Farway; Rebecca Burrows, 1792, at Tawstock; Margaret Graham, 1794, at Littleham; Samuel Needham, 1797, at Dawlish; Egerton Filmore, 1799, at Lympstone; and William Holmes, 1812, at Shobroke. His tablet to Lady Charlotte Carr, 1801, is at Menheniot, Cornwall.

EARLE, JOHN, of Hull
b. 1799, d. 1863

Earle was born in Hull, where he seems to have spent most of his life and for which he executed a number of works. In 1830 he carved the relief of the “Sea and River Gods” for Smith’s Bank in Whitefriars Gate, and a statue of Dr. Alderton for the Mechanics’ Institute, while in the following year he made a relief of “Oceanus” for the Trinity Almshouses. He was also responsible for a number of monuments and tablets, the best commemorating the Etherington family, 1819, in North Ferriby Church, Yorkshire; a work executed in coloured marbles and having delightful decorative details. Other signed works by Earle in the same county include those to Henry Maister, 1812, in Holy Trinity, Hull; John Foster, 1816, and the Rev. Robert Todd, 1830, both at North Cave; George Gibson, 1821, at Sigglethorpe; and Mary Howard, 1838, at Sutton-on-Hull. He also made the tablets commemorating Harriot Abbey, 1810, at Aswarby, Lincolnshire, and the Rev. John Beevor, 1820, at Staunton-in-the-Vale, Nottinghamshire.

(Sheahan’s History of Hull.)

EARLE, THOMAS
b. 1810, d. 1876

He was born in Hull, the son of John Earle (q.v.), and in 1830 went to London, where he was employed by Chantrey (q.v.). In 1832 he attended the Royal Academy Schools, and in 1839 was awarded the Gold Medal for a group entitled “Hercules Rescuing Hesione.” He later returned to Chantrey and, when the latter died in 1841, finished the equestrian statue of George IV for Trafalgar Square, which had already been partially modelled.

In 1844 Earle exhibited at Westminster Hall “An Ancient Briton Protecting His Family,” a work much admired by the Literary Gazette (1844, page 483) which considered that nothing could “surpass the arrangement and composition of the female and children, the modelling of the young ones most exquisite and masterly.” At the same time Earle showed “Edward I Presenting the Prince of Wales,” and both groups were afterwards purchased by George Gee, of Hull. At a second exhibition, held at Westminster Hall in the following year, the sculptor showed “Sin Triumphant,” the idea of which was “original, but not very happily realized,” according to the Art Union (1845, page 258).

Earle exhibited at the Royal Academy, 1843–1873, and at the British Institution, 1843–1865, but many of his works were rejected, and it is said he died of a broken heart on hearing that his “Alexander the Great” (which had taken him three years to execute) had not been accepted by the Royal Academy. As a writer in The Times, (3 May, 1876) put it: “His death was a melancholy termination to the career of an artist who for nearly forty years had been before the public and most creditably.”

A number of Earle’s works were lost when Hull Central Museum was destroyed by enemy action in 1943. These included “Alexander Before Mounting Bucephalus” and “Genius Receiving the Award of Merit.” He is commemorated in Holy Trinity, Hull, by a large monument of his own workmanship, which has a fine relief of a mourning mother and daughter.

EARLEY, JOHN
In 1762, when "under twenty-two," he won a premium from the Society of Arts. He lived at Datchet and modelled a number of tablets for chimney-pieces (Archives, Society of Arts).

EARLEY, or EARLY, THOMAS
He was presumably a brother of John Earley (q.v.) and, when "under nineteen," won a premium from the Society of Artists for a model of "Neptune." He afterwards worked for Thomas Carter (q.v.).

EARLY, or EARLY, THOMAS
He was presumably a brother of John Earley (q.v.) and, when "under nineteen," won a premium from the Society of Artists for a model of "Neptune." He afterwards worked for Thomas Carter (q.v.).

EARLSMAN, RICHARD,
the Younger, of Salisbury
b. 1745, d. 1831

Son of Richard Earlsman the Elder (q.v.), he was also employed as a mason at Longford Castle between 1776 and 1792, and in 1796 was working as a stone-carver at Salisbury Cathedral. He died in 1831 and is buried in St. Martin's, Salisbury.

Earlsman signs a monument to Sir Alexander and Lady Powell, 1786, in St. Thomas's, Salisbury. Other signed works by him commemorate Samuel Foot, 1792, and Philip Pinchney, 1807, both at Berwick St. John, Wilts, and Edward Doyle, 1795, in All Saints, Colchester, Essex.

EASTON, CHARLES
d. 1786

Charles Easton, who was the son of Robert Easton (q.v.), became free of the Masons' Company by redemption in 1728, and was Upper Warden in 1753 and Master in the following year. He succeeded his father as mason to the Fishmongers' Company and later became City Mason in 1762. In this capacity he was employed on various repairs to the Mansion House between 1762 and 1777. His death in 1786 is noted in the Court Book of the Masons' Company.

In 1730 he was paid £50 for the monument, in Rochester Cathedral, to Richard Watts, which had a portrait-bust, a copy of an earlier work (Archives, Watts Charity, Rochester). He also signs monuments to Thomas Lewis (d. 1722) in All Hallows, Twickenham, and Richard Ansell (d. 1726) at Ickleworth, Herts.

EASTON, ROBERT
d. 1722

Easton, who was apprenticed to Charles Cotton, had a yard in Bow Street, Covent Garden, in 1708. He was mason to the Fishmongers' Company, for whom he executed in 1721 a marble statue of Mr. James Hulbert for their almshouses at Newington. The payments for this are entered in the accounts of the Prime Warden and the first one reads: "Paid Robert Easton in part for the effigie of Mr. Hulbert to be set up in the New Square £80." The second, made after Easton's death in 1722, is to "the widow Easton in full of the Company's agreement with her late husband.
for the marble effigies (sic) of the late Mr. Hulbert set up in the square £102 10s. In 1724 a "Mr. Skeat" was paid £7 for "ironwork set round the effigie" (Guildhall MS. 5561/3 and 5561/4).

The statue, a fine work showing Hulbert (who founded the Newington Almshouses) in contemporary costume, stood "on a pedestal in the centre of the enclosure," according to Walford's London (Vol. VI, page 258), which describes the buildings as "a neat and imposing little pile consisting of three courts with gardens behind, together with a dining-hall and chapel." In 1851, however, they were pulled down and the inmates taken to new accommodation at Wandsworth. The statue remained there until 1923, when it was removed to the Company's almshouses at Bray, where it still stands. At some period the lettering on the base and the sculptor's signature must have been re-cut, for the latter now appears as "Dastor."

Easton's widow, Mary, to whom the second payment for the figure was made, seems to have carried on the business after her husband's death, for a Robert Green was apprenticed to her in 1727.

EASTON, THOMAS
b. 1704

Son of Robert Easton (q.v.), and brother of Charles Easton (q.v.), he was bound to his father in 1718, but on the latter's death in 1722 finished his apprenticeship with Bartholomew Woolfe. He became free in 1724, his mother, "Mary Easton, widow, testifying for his service," and set up for himself "against the Weigh House, Little Eastcheap" (Archives, Masons' Company). He signs the monument to Sir Edward Betenson, 1733, at Chislehurst, Kent.

In 1756 Robert Easton, Thomas's son, was apprenticed, not to his father, but to Charles Easton, which seems as if the former were already dead. Robert became free of the Masons' Company in 1763.

ECKSTEIN, GEORGE PAUL
b. 1739, d. 1828

He was born at Poppenruth in Germany, but left for the Hague in 1760, and five years later came to London. Here he settled in Marylebone, and in 1770 married in Faversham Church a Miss Ann Mitchell of that parish. The two elder children of their family of twelve were born at Ospringe, in the same district, the others in London.

Eckstein, who died in London in 1828, exhibited at the Royal Academy, 1777-1802, showing various reliefs in marble and wax, and also models of animals. About 1775 he made two greyhounds in Portland stone for Ashburnham House in Dover Street. These were later moved to Ashburnham Place in Sussex, where they still remain.

ECKSTEIN, JOHN
b. 1735, d. 1818

Elder brother of G. P. Eckstein (q.v.), he visited England as a young man and remained there for seven years, winning a premium from the Society of Arts in 1761 for his relief of "The Death of Epaminondas," which he exhibited at the Society for the Encouragement of Arts in the following year (London Magazine, 1762, page 173). In 1764 he was awarded a further premium for a marble relief of "The Rape of Cassandra." During this period of his life Eckstein worked for Thomas Carter (q.v.), and together they made the monument of Lieut.-Colonel Roger Townshend (who had died in 1759) in Westminster Abbey, Eckstein being responsible for the relief, a work which Flaxman considered one of the best pieces of sculpture in the church.

In 1765 Eckstein accepted an invitation from Frederick the Great to go to Prussia, where he became the King's principal sculptor and executed numerous works at Potsdam and Sans Souci. He was next employed by the Duke of Mecklenburg, who in 1770 sent him to England on a special mission. Here he met with a most flattering reception and exhibited wax portraits both at the Royal Academy and the Society of Artists. On the conclusion of his mission he returned to the Grand Ducal Court at Ludwigs Lust and stayed there until 1774. He then went back to Prussia and remained at Potsdam until the death of Frederick the Great in 1786.

In 1794 Eckstein emigrated with his family to America and settled in Philadelphia, where he lived until 1818, and where in 1812 he exhibited a model of an equestrian statue of George Washington in Roman costume (Dunbar's History of the Arts in the United States, Vol. II, page 149). In 1818 he set out for Cuba, but died as soon as he had reached Havana. His last recorded work was a marble bust of Swedenborg.

John Deare, in a letter written in 1780 and quoted by J. T. Smith in Nollekens and His Times (Vol. II, page 238), refers to "a German," who had been employed by Carter and who had worked with Deare to make a proof sketch in clay in competition for the Gold Medal, offered annually by the Royal Academy for the best historical design. Deare goes on to say that the German "shamefully lost both in large model and sketch." Smith, in a footnote to this letter, says that "the German" was Eckstein. This is impossible.
Fifteen years earlier Eckstein had been in partnership with Carter (for both sign their names on the Townshend monument) and it seems quite incredible that in 1780 the former (who in any case was in Prussia) could have returned to England and be so forgotten that Carter’s apprentice did not even know his name. It is equally impossible that he should have failed so miserably in a test set for apprentices by the Academy where he had triumphantly exhibited twenty years before.

Graves, in his *Royal Academy Exhibitors*, says that John Eckstein exhibited portraits at the Academy, 1787–1802. This should be his son, also John, who died in 1838.

(The information given in the sketches of George Paul and John Eckstein is taken from a privately printed but undated history of the Eckstein family by Louisa V. Adlerstein, daughter of G. P. Eckstein.)

**EDMONDSO**, J.

He exhibited bas-reliefs at the Royal Academy, 1790–1792, his address being given as 14, Warwick Street, Golden Square.

**EDWARDS, ALEXANDER WILSON**, of Wrexham

fl. 1806–1820

He signs charting wall-tablets in coloured marbles to William Travers, 1806, at Gresford, Denbigh; to Christiana Smith, 1811, at Holt, in the same county; and to Susan Price, 1813, at Overton, Flint.

**EDWARDS, EDWARD**

b. 1803, d. 1827 (?)

He attended the Royal Academy Schools in 1820 and gained a Silver Medal a year later. In 1823 he received from the Society of Arts their Gold Isis Medal for a group of “Ulysses and Calypso,” while in 1824 he gained their large Silver Medal for another relief and the Silver Isis Medal for a bust.

Edwards exhibited at the Royal Academy 1825 and 1826, showing a bust and a relief of “David and Goliath.” After this date there is no further trace of him.

**EDWARDS, JOHN**

fl. 1719–1722

Probably a native of Wrexham, he received £25 in 1719 for the “capitals and urns upon ye stone pillars by ye iron gates” at Chirk Castle. The “iron gates” are the famous pair which originally stood at the entrance of the north court of the Castle, but which were moved in the nineteenth century to form the main entrance to the Park.

Two years later Edwards also made for Chirk the stone pedestals for John Nost’s (q.v.) lead figures of “Atlas” and “Hercules.” Both these figures once stood in the north court, but “Atlas” has long disappeared and “Hercules” (with his pedestal) has now been banished to a hill in the Park (Archives, Chirk Castle).

**EDWARDS, JOSEPH**

b. 1814, d. 1883

He was born at Merthyr Tydfil, the son of a stone-cutter, and went to London in 1835. In 1837 he joined the Royal Academy Schools on the recommendation of Chantrey (q.v.) and won a Silver Medal in the following year.

Edwards’s first important commission came in 1839 from the seventh Duke of Beaufort, who engaged him to execute the monument to the sixth Duke to be erected in Badminton Church. Both this work and the Hellenic altar in memory of Eleanor Estcourt (d. 1829) at Shipton Moyne, Gloucestershire, were carved by the sculptor from designs by T. H. Wyatt. In 1846 he made a statue of William Williams for Aberystwyth, and in 1866 the figure of “Religion” on the grave of Mrs. Vaughan in Highgate Cemetery. This last-named work was much admired in the Victoria era and was engraved for various periodicals.

Edwards showed three bas-reliefs at the Great Exhibition of 1851, where his work was praised by H. Weekees (q.v.), who wrote: “We have the highest possible respect for his talents; he rarely exhibits largely, but in all that he does there is a delicacy of feeling which indicates a refined mind. . . . We believe he is capable of great things and only requires to be brought forward more prominently to be appreciated as he deserves” (Treatise on the Fine Arts in the Great Exhibition, page 75). His relief of G. G. Ferrari (undated) is at Castle Howard.

At the Royal Academy he showed a number of busts between 1838 and 1878, including those of the Rev. John Guthrie (1845), Lord Raglan (1857), and Archdeacon Williams (1860). His bust of the Duke of Beaufort (1857) is at Badminton, those of Sir John Guest (1864) and G. T. Clerk (1873) are at Merthyr Tydfil, while that of Lord Palmerston (1867) is in Tiverton Town Hall.

A number of works by Edwards were engraved by the *Art Journal*, including “Religion Consoling Justice” (1856), “The Last Dream” (1858), “A Vision” (1864) and “The Spirit of Love and Truth” (1867). He died in London in 1883 and was buried in Kensal Green cemetery.
Signed monuments by Edwards include those to Lieut.-Colonel Henry Booth, 1841, at Northallerton, Yorks; Henry Smyth, 1848, at Berechurch, Essex; William Hawkins, 1854, in St. Botolph's, Colchester; Sir J. Bosanquet, 1856, at Dingestow, Monmouth; Charles Bosanquet, 1856, at Rock, Northumberland; Charles Warren, 1857, at Market Drayton, Salop; Mrs. Morley, 1858, at Newton, Montgomery; Miss Hutton, 1858, at North Otterington, Yorks; the Duchess of Beaufort, 1859, at Badminton, Glos; Mrs. Davis, 1860, at Tredgar, Monmouth; Lewis Morgan, 1861, at Graig, Glamorgan; George Virtue, 1870, in Walton-on-Thames cemetery; and the Rev. Evan Owen, 1870, at Bryncoced-Ivor, North Wales. (Chilcott's Bristol, page 311; various references Art Journal.)

**EGART, DANIEL**

*fl.* 1762–1763

In 1763 he received a premium from the Society of Arts for a relief in marble of “Iphigenia Released,” a work he had exhibited at the Society of Free Artists in the previous year, and of which he also made a replica in Portland stone.

**EGLINGTON, —, of Birmingham**

A large wall-tablet, about 10 ft. high with a pyramid and well-carved details, in the Parish Church of Aston, Birmingham, commemorates Edward Brandwood (*d.* 1731), and is signed “Eglington Snr. Birmingham.” The sculptor is presumably the father of the Samuel Eglington “mason” who received £37 18s. for work carried out in the same church between 1789 and 1790 (Churchwardens' Accounts).

A “Joseph Eglington” of Birmingham made an Italian marble chimney-piece for Arbury, Warwickshire, in 1794 (Newdigate Archives).

**EGLINGTON, JAMES, of Walsall**

Probably a descendant of Eglington, of Birmingham (q.v.), he signs a tablet to Joanna Goodall, 1790, in Walsall Parish Church, Staffs.

**ELDERTON, JAMES, of Southampton**

*fl.* 1807–1827

He signs tablets (both in Hampshire) to Anna Lintott, 1807, at Woolston, and to the Rev. Charles Phillipson, 1826, at Eling. He was succeeded by his son, Charles Harben Elderton.

**ELDREDGE, or ELDREDGE, WILLIAM, of King’s Lynn**

*b.* 1749, *d.* 1819

He was the son of Joseph Eldredge, a mason who had been apprenticed to John Fellowes (q.v.) in 1725. He signs tablets (all in Norfolk) to Francis Dalton, 1796, at West Bilney; Ann Lancaster, 1805, at Pentney; William Benezet, 1814, at Swaffham; and to the Rev. Horace Hammond, 1815, at South Wooton.

**ELLIOT, THOMAS, of Hull**

He signs a tablet at Lawford, Essex, to Edward Green, *d.* 1814.

**ELLIS, JOHN, of Portsea**

*fl.* 1803–1835

He signs tablets to Solomon Ferris, 1803, at Southwick, Hants, and to Sir Thomas McMahon, 1835, in Portsmouth Cathedral.

**ELLIS, WILLIAM**

*b.* 1824, *d.* 1882

He was born in Sheffield and studied under Edward Law (q.v.), but went to London about 1850, where he was associated with Alfred Stevens. He later returned to his native city and set up on his own account as a sculptor, but the venture failed and he died in 1882 of “exhaustion, disappointed and in poverty” (Odom’s Hallamshire Worthies).

Ellis’s busts in Sheffield include those of Thomas Sale (1874) in the Cathedral, William Overend (1875) and Alfred Stevens (1876) in the Art Gallery, and Arthur Roebuck (1881) in the Cutlers’ Hall. His bronze medallion of James Montgomery (1852) is also in the Art Gallery.

**ELSWORTH, JOHN, of York**

*fl.* 1703–1715

He and his partner, William Smith, were the chief masons for building Castle Howard between 1703 and 1714. They also built the bridge in the Park and the obelisk, receiving for these £80 and £168 respectively.

Their carved work at the house itself included the cornice and capitals of the cupola, “the south modillion cornice” for £137; vases on the north wing at £8 each; and some of the less important chimney-pieces (Archives, Castle Howard). (See also “Smith, William.”)

**EMETT, or EMMETT, WILLIAM**

*fl.* 1680–1700

He was probably born in 1641, for he was aged about thirty when as a “citizen and joiner” he married Jane Brown at St. Margaret’s Westminster, in 1671 (Wren Society, Vol. XIV, page
Engel exhibited at the Royal Academy, 1773–1786, showing a bust of Thomas Fluelling (1773) and portraits in wax. His wax portrait of Edward, Duke of Kent (1786), is in the National Portrait Gallery, while those of George III and Queen Charlotte are in the Royal Collection.

A "J. Engelheart," of Richmond, exhibited a wax portrait at the Academy in 1783.

ESSEX, CHARLES
fl. 1847–1853

He exhibited busts and medallions at the Royal Academy, 1847–1853, the busts, including those of Alfred Essex (1847); Captain Maconochie (1849); and William Essex, the painter (1852).

EVANS, E. F., of Derby
fl. 1797–1802

He was probably a son of Joseph Evans (q.v.), and his monuments in design and execution are better than those of the average provincial statuary of the time. Signed examples in Derbyshire include those to George Bansall, 1797, at Alfreton, and William Stevens, 1800, at Repton.

EVANS, ENEAS, of Derby
fl. 1761–1765

Evans, who may have been the father of Joseph Evans (q.v.), was working as assistant to J. Hall (q.v.) at Kedleston in 1761. In 1765 he made chimney-pieces of black and yellow marbles for some of the bedrooms (Curzon Archives).

EVANS, JOSEPH, of Derby

He signs a tablet with a finely fluted urn to Thomas Peach, 1776, at Dingley, Leicestershire.

EWINS, W.
fl. 1820–1825

In 1820 he was in Rome, where he carved ivory portraits of Canova and Pope Pius VII. Two years later he exhibited these, and other examples of his work in ivory, at the Royal Academy.

Ewins signs the monument to Owen Lewis, 1824, at Laugharne, Carmarthen; this has a fine relief of a mourning woman in the manner of Chantrey (q.v.).

EYKYN, ROGER,
of Wolverhampton
fl. 1747–1759

He signs a monument at Broseley, Salop, to Elizabeth Crompton, 1747, and a large undated one with a sarcophagus to George Weld at Willey in the same county.
FARROW, THOMAS, of Diss

fl. 1824-1842

He signs the monument to Lady Sophia Macdonald, 1824, at Quidenham, Norfolk, and another to Susanna Frere at Roydon, Norfolk. In 1842 he married a “Mrs. Maskett,” of Palgrave Place in the same county.

FATTSON, or FARKSON, BENJAMIN

fl. 1700-1722

Fattson, who was presented with the freedom of the Masons’ Company in 1701, was master-mason to Queen Anne and George I and was employed on repairs to several of the Royal Palaces (P.R.O., A.O.1, 2448). He signs the monument to the Rev. George Morton, 1722, in St. Margaret’s, Louth-

FELLOWS, JOHN,
of King’s Lynn

fl. 1714-1742

As a “free stone-mason” he became a Freeman of his native town in 1714, and between 1714 and 1717 built the library at the west end of the south aisle of St. Margaret’s Church, which was destroyed in 1874 (Town Archives).

In 1723 Fellows made the chimney-piece of black and grey marble (now in the smoking-room) for Rainham Hall, Norfolk. With John Parsons, of Wells, Norfolk, he built in 1742 the nave of St. Margaret’s Church, King’s Lynn, from designs by Matthew Brettingham. (Churchwardens’ Accounts.)

He signs monuments to Vokes Walsham, 1714, and John Dickinson, 1730, both at Woodstone, Hunts, and to Richard Dashwood, 1738, at Cockley Cley, Norfolk.
FELLOWS, WILLIAM, of King's Lynn
fl. 1721-1765

He was the son of John Fellows (q.v.) and was apprenticed to his father in 1721, becoming a Freeman of his native town in 1758. He signs monuments to William Browne (d. 1735) at Westacre, and to Christopher Adamson, 1765, at Wereham, Norfolk.

FENELLA, JOHN BAPTISTA

In the Dom. Entry Book, Car. II, Vol. IX, page 334, is a copy of the Royal Warrant (dated April, 1663) to John Baptist Fenella, "our sculptor," granting him "ye sum of £40 pr. ann. for and towards ye charge, and of providing a fit and necessary working-place, & other accommodations for ye performance of our service in his profession."

FENTIMAN, JOHN, of Stoke Newington

In 1789 he received £4,116 for building Lewes Prison (Town Records).

FICKER, —, of Piccadilly

He exhibited a tablet for a chimney-piece at the Free Society of Artists in 1765.

FIELD, JOHN, of Hampstead

He signs tablets in Hampstead Parish Church dated 1825 and 1833.

FILLANS, JAMES
b. 1808, d. 1832.

He was born at Wilsonstown, Lanarkshire, and was apprenticed in Paisley, first to the weaving trade and then to a stone-mason. He later moved to Glasgow, where, without studying under any master, he adopted sculpture as a profession, producing a number of successful busts and also carving the capitals of Glasgow Royal Exchange.

In 1835 he produced a small bust in wax of William Motherwell and also visited Paris, where he copied pictures in the Louvre. On his return to England in the following year he became acquainted with Allan Cunningham, whose bust he modelled and who introduced him to Chantrey (q.v.). The latter introduced Fillans to various patrons, including Archibald Oswald, and when Oswald was staying in Vienna the sculptor visited him there and executed his bust. From Vienna Fillans travelled in 1841 to Italy, where he spent some months. In 1848 he was living in Baker Street, London, and in the same year was entertained at Paisley on the occasion of the unveiling of his statue of Sir James Shaw at Kilmaurnock, being "invited to a public banquet" where "homage was rendered to him by all the leading persons of the town and neighbourhood" (Art Union, 1848, page 314).

Two years later Fillans returned to Glasgow, where he died on 27 September, 1852, of rheumatic fever, leaving a widow and eight children unprovided for. He was buried at Paisley, and the figure of "Grief," which he had designed for the grave of his father, was placed over his own. He exhibited at the Royal Academy, 1837-1850, and at the British Institution, 1847. At the Academy he showed busts of William Walkinshaw (1837), Mrs. Charles Tennant (1837), Allan Cunningham (1837), John Burnet (1840) and Robert Napier (1840). His busts of Archibald Campbell (1839) and Professor Wilson (1848) were executed for the County Hall, Paisley, and that of Colonel Mure (1848) for the County of Renfrew. He signs the monument to William Motherwell, 1851, at Glasgow Necropolis. (Art Journal, 1852, page 350; Building Chronicle, 1854, Vol. I, page 114; Gentleman's Magazine, 1852, Part II, page 654.)

FINES, C.
fl. 1833-1846

He exhibited wax portraits at the Royal Academy, 1833-1846, including those of E. Jesse and Mr. Chabot.

FIRMADGE, WILLIAM, of Leicester
fl. 1778-1809

He was a son of William Firmadge, "slater," and became a Freeman of Leicester in 1778. In 1809 he was Mayor of Leicester.

As a mason he built Leicester Gaol in 1792. His tablets have well-carved designs and he makes intelligent use of coloured marbles; his slate ledgers are equally good.

He signs tablets in Leicestershire to the Rev. Richard Wynne, 1778, at Gumley; to Henry Coleman, 1779, and to Mrs. Lee, 1792, both at Burton Overy; to John Rowland, 1790, at Enderby; to the Rev. Barton Shuttleworth, 1792, at Laughton; and to Anne Firmadge, 1793, at Scrapton. He also signs a tablet to William Kemp, 1787, at Belton, Rutland; and a ledger to Samuel Soames, 1792, at Rolleston, Staffordshire.

FISHER, JAMES, of Camberwell
b. 1682, d. 1722

The only signed work of his which I know is the
magnificent monument at Marholm, Northants, with its life-size standing figures of the First Earl Fitzwilliam and his wife, 1719.

The contract for this monument is in the Fitzwilliam (Milton) Collection of the Northamptonshire Record Society. It is endorsed: “Mr. Fisher the stone-cutter of Camberwell his bill and acquittance for making and setting up the monument at Marham Church and for the little monument at North Runcton Church in Norfolk.” For this monument the sculptor received £900, and for the one in Norfolk £24 10s.

The contract is dated 28 August, 1718, and besides giving a full specification of the monument, also states that when finished the work is to be conveyed by Fisher to some “wharf or stairs below London Bridge and shipped and put on board some vessel at his own cost and charges.” Fisher’s witnesses are Richard Dixon and Robert Harper.

The sculptor died on 30 March, 1722, and was buried in Camberwell churchyard, but the tombstone commemorating him has since been destroyed (Seymour’s London, Vol. II, page 833).

**FISHER, JOHN, and CHARLES, of York**

John Fisher: b. 1786  
Charles Fisher: b. 1789, d. 1861

They were sons of John Fisher the Younger (q.v.) and carried on the family business, but their tablets are inferior to those produced by their father and grandfather. Charles became a bankrupt in 1823 (European Magazine, 1823, Part II, page 284).

The Fishers sign a number of tablets, the best in Yorkshire being those to Robert Hotham, 1806, in St. Dennis’s, York; Mary Lister, 1809, in Bradford Cathedral; Julia Cooke, 1811, at Osbton; George Coates, 1821, in Ripon Cathedral; Simon Kettlewell, 1823, at Kirklington; the Earl of Mexborough, 1830, at Methley; and the Rev. James Geldart, 1839, at Kirk Deighton.

Other tablets executed by them commemorate Richard Prosser, 1809, in Durham Cathedral; John Hopwood, 1813, at Rochdale, Lancs; and Mary Fortescue, 1814, at Keton, Rutland. The tablet to Mary Wilks, 1817, at Sowerby, Yorks, is signed by Charles alone.

**FISHER, JOHN, the Elder, and JOHN, the Younger, of York**

John Fisher the Elder: b. 1736, d. 1804  
John Fisher the Younger: b. 1760 (?), d. 1839

In 1761 the elder Fisher exhibited at the Free Society of Artists a figure of “Our Saviour With the Cross” in white marble and “A Statue of Jupiter.” The former is now in the Lady Chapel of York Minster, and the latter in the museum of the Philosophical Society, York. These works attracted the attention of the Marquess of Rockingham, who persuaded the sculptor to settle in York, where he met with instantaneous success. In 1768 he carved for his patron, at Wentworth Woodhouse, chimney-pieces for a bedroom and dressing-room which cost £164 and £88 respectively, while in 1783 he made one in white marble for the Museum (Fitzwilliam Archives). According to Paterson’s Roads, the chimney-piece in the dining-room at Farnley Hall, Yorkshire, was of the “finest Italian marble and superbly executed by Fisher, of York.”

Fisher, who settled down in York, and later became a Freeman of the city, was chiefly known as a monumental sculptor. He was a fine artist, though his obituary in the Monthly Magazine (Vol. XVIII, page 173) is perhaps over-flattering when it says that “his merit as a sculptor ranked him high in the annals of the arts, and so long as the works of genius remain the objects of our admiration, the purity and classic originality of his design, as well as the spirit and elegant chastity of its execution prove the justice of his claim to eminence.”

Fisher was later assisted by his son John, whom he took as an apprentice in 1775. Apparently he was an unbusinesslike and not very satisfactory employer. In 1795 J. Carr, the architect, wrote from York to Benjamin Hall, Lord Fitzwilliam’s steward, on the subject of a monument in memory of Edmund Burke which Fisher was making for Lord Fitzwilliam. In the course of the letter the writer remarks that he wishes “you would apply to Nollekens just to have done the head, the rest might have been done here... All Fisher’s best men have left him. They cannot get their wages of him” (Fitzwilliam Archives).

The elder Fisher’s most important works are a figure which presumably personifies “Religion” on the monument to Sir Charles Sheffield, 1780, at Burton-on-Stather, Lincs, and the fine statue of Sir George Savile, 1784, in York Minster; though his monument to Sybil Wilson, 1773, in Lancaster Parish Church has a relief of great charm, which shows the child’s parents in classical costume mourning by her death-bed.

All the monuments executed by the Fishers, however, reach a very high standard of craftsmanship. Their use of coloured marbles is intelligent and sympathetic, while the frequent “Adam” details are beautifully carved. A number of their works feature a medallion-portrait, and that in memory of John Deatly, 1773, in the Lady Chapel of York Minster has a lovely figure of “Hygeia.” As all are signed “Fisher” or “Fishers,”
it is difficult to assign any particular monument to father or son, and their works are accordingly given together in the following list.
(Authorities cited in text; York City Archives.)

MONUMENTS
1766 Brayton, Yorks Robinson Morley
1769 Burton Agnes, Yorks Ann Cayley
1771 Ripon (Cathedral) G. Staines
1772 Exeter (St. Thomas’s) James Buller
1772 Whitby, Yorks Catherine Cholmley
1772 Clarborough, Notts Thomas Outybridge
1773 Masham, Yorks William Danby
1773 Chesterfield, Derby Godfrey Heathcote
1773 Harpham, Yorks Mary Darby
1776 Norton, Derby Richard Bagshaw
1777 York (St. Crux) Thomas Bowes
1778 Thirsk, Yorks Amelia Sparre
1780 York (St. Crux) Henry Waite
1780 Howden, Yorks John Dunn
1784 York (St. Michael’s) William Hutchinson
1784 Newcastle (Cathedral) Hannah Mosley
1784 Thorne, Yorks Edward Forster
1784 Stillington, Yorks Rev. John Varley
1785 York (Minster) Rev. George Anderson
1785 Otley, Yorks Mary Cooke
1786 York (Minster) Mary Pulleyen
1786 York (Minster) Sir Thomas Davenport
1786 Newbould, Yorks Sir Francis Fawkes (medallion portrait)
1786 Skipton, Yorks (medallion portrait)
1787 Howden, Yorks John Birtwhistle
1788 Swillington, Yorks Dr. Simpson
1789 Whalley, Lancs Mary Rawson
1791 Harewood, Yorks Sir W. Lowther
1791 Whitby, Yorks Elizabeth Whalley
1792 Harewood, Yorks The Fairfax family
1792 Allerton, Derby Nathaniel Cholmley
1792 Skipton, Yorks George Morewood
1792 Skipton, Yorks Walter Fawkes
1792 Rudby, Yorks Hon. George Cary
1792 Thornton-le-Street, Yorks Roger Talbot
1793 York (Minster) Pelsant Reeves
1794 York (Minster) Richard Wharton
1794 Richmond, Yorks Fowler Hicks
1794 Sand Hutton, Yorks Deborah Read
1795 Beverley (Minster) Henry Roxby
1796 Halifax (Parish Church) John Roysd
1799 Escrick, Yorks

1800 Lowther, Westmorland
1800 Brayton, Yorks
1805 Lowther, Westmorland
1809 York (Minster)
1809 Kendal, Westmorland
1811 Howden, Yorks
1814 Otley, Yorks

FISHER, M., of York
There is a large monument at Wath, Yorks, to Lady Graham (d. 1767) bearing a signature which appears to read “Mels Fisher York inven. et sculp.” The Fisher who was responsible for this work may have been related to John Fisher the Elder (q.v.), but I have been unable to discover anything about him.

FISHER, WILLIAM
b. 1777, d. 1815
In 1793 he was apprenticed to his father, John Fisher the Younger, of York (q.v.). He worked for a short time in the family firm and signs a few tablets with his brother Charles (q.v.).

In 1806 William Fisher left York and set up for himself in London. In the same year he submitted a model (which was rejected) for the Guildhall monument to Pitt and offered to complete the work for £5,700 (City Corporation Records, MS. 95.2). He exhibited at the Royal Academy, 1801–1811, showing reliefs of “A Greyhound Course” (1801) and “A Stag Chase” (1806), and various busts including those of Mr. Fothergill (1808), Miss Smith of Covent Garden Theatre (1808), and Sir Charles Turner (1811). His bust of Earl Fitzwilliam was formerly at Wentworth Woodhouse.

Fisher’s address is given as “15, Great Castle Street, Cavendish Square,” in the London Directory of 1809.

FITZGERALD, J.
At the British Museum there is a bust of W. S. Vaux, dated 1845, and signed by Fitzgerald, but he does not seem ever to have exhibited.

FLAXMAN, JOHN, the Elder
b. 1726, d. 1795
The elder Flaxman was born at Aston Clinton in Buckinghamshire, the son of Robert and Elizabeth Flaxman (British Museum, Ad. MS. 39791), and later earned his living by making and selling plaster casts and figures. He also worked as a modeller, and in this capacity was employed by Roubiliac (q.v.), Scheemakers (q.v.) and Wedgwood.

For the last named he produced a number of reliefs, etc., including in 1775 those of “Thalia,” “Terpsichore,” “Euterpe,” “Sappho,” “Hercules With the Lion,” “Hercules With the Boar,” “Bacchus,” “Ariadne,” “The Seasons,” “Jupiter,” “Juno,” “Minerva,” “Justice” and “Hope.” For Wedgwood he also supplied busts of Rousseau
and Sterne in 1781, and received £1 4s. for "moulding a bust of Dr. Fothergale," while in 1782 and 1784 he executed busts of Mrs. Siddons and "Hercules" respectively (Wedgwood Archives).

Flaxman also made busts of Milton and Pope and figures of "Flora" and "Zingara" for Mr. James West in 1767 (Archives, West of Alsot Park). In 1782 he supplied busts costing £20 for Wolverley House, Worcestershire (Knight MSS., Kidderminster Public Library), while his plastercasts of "Venus" and "Cupid" for Audley End were executed in 1794 (Essex Records, D/DBY.A 225). His bust of Handel in the same material is now at Windsor Castle.

Flaxman was living in York when his second son, John (q.v.), was born in 1755, but he returned to London six months later and opened a shop in New Street, Covent Garden.

(Authorities cited in text.)

FLAXMAN, JOHN, R.A.

b. 1755, d. 1826

He was born in York, the second son of John Flaxman the Elder (q.v.), but was taken to London by his parents when he was six months old. He was a puny child, so weak and ill-shaped that he could not walk without crutches; indeed, for some time he was not expected to live and it was not until he was about ten years old that his health began to improve.

From an early age the boy had spent his time in modelling and drawing figures in his father's shop, where he soon began to attract the attention of the customers. Some of his earliest friends were Romney the artist; Frederick Montagu, for whom he later modelled "The Death of Caesar in the Capitol" (Gentleman's Magazine, 1781, page 65); and a clergyman named Mathew, whose wife used to invite the sickly child to her house and read to him from translations of the early poets, while he made sketches to illustrate passages which took his fancy.

Flaxman's first commission came from a friend of the Mathews, a Mr. Crutchley, of Sunninghill Park, for whom he made six drawings in black chalk with figures about 2 ft. high. In 1766 and 1769 he was awarded premiums by the Society of Arts, and in the following year won their Gold Palette for modelling a statue of Garrick (Archives, Society of Arts). In 1770 also he joined the Academy Schools and gained a Silver Medal in 1771, but was defeated by Thomas Engleheart (q.v.) in the competition for the Gold Medal in 1772.

In 1775 Flaxman joined his father in working for Wedgwood, for whom he designed cameos and made wax models of classical friezes, portrait-medallions, etc. Examples of his friezes include "The Dancing Hours," in 1775; "The Muses," in 1777; "The Sacrifice to Ceres," in 1779; "Blind Man's Buff," "Sacrifice to Cupid" and "Psyche Bound and Attacked by Cupid," all in 1782; and "Hercules in the Garden of the Hesperides," in 1787. Among his portraits may be mentioned those of Sir Joseph Banks and Dr. Solander, both in 1777; the Duchess of Devonshire, Sir William Herschell and C. J. Fox, all in 1783; Captain Cook, Sir Joshua Reynolds, John Philip Kemble, Dr. Johnson, and Mrs. Siddons, all in 1784; and William Franklin, in 1785. (Information, Wedgwood Museum, Barlaston.) For a full discussion of the work Flaxman executed for Wedgwood, see W. G. Constable's John Flaxman (1927).

Flaxman also gave Wedgwood advice and assistance over the decoration of Etruria Hall. In a letter to his employer dated 12 November, 1781, he tells him that "as soon as Mr. Byerly" (Wedgwood's partner) "communicated your workmen's want of the drawings at large for the cornice and vestibule, I began them immediately to prevent delay; but as some of the mouldings will be enriched in a manner not very likely to be well executed by a Country Plaisterer from a drawing only, I will, if you please, send two or three patterns cut in plaister for eggs and darts, water-leaf, etc. You will probably," he continues, "have an ornamental frieze for the saloon, if that is not already determined on, I would recommend the Lions and Foliage you admired so much in the chimney-piece I was carving for Mr. Knight" (Wedgwood Archives).

In 1782 Flaxman married Miss Ann Denman, the daughter of a gunstock maker of Whitechapel, a match which met with no approval from that sturdy bachelor, Sir Joshua Reynolds, who remarked: "So, Flaxman, I am told you are married. If so, you are ruined for an artist." Two years later he received one hundred guineas "for a tomb to the memory of Rousseau in Portland stone erected on Mr. Fierville's estate near Stanmore" (Wedgwood Archives), and in 1787 left with his wife for Rome. In this venture they had Wedgwood's assistance, for he needed someone to supervise the work of the designers and modellers employed by his firm in Italy. On 29 September of the same year Flaxman wrote to Byerly that "the Duke of Bouillon made kind enquiries after you and desired me to tell you he wishes to see you at the Castle of Navarre on matters of business."

The young couple had originally intended to spend only two years in Rome, but for various reasons their stay was extended to seven. Flaxman's patrons at this time included Edward Knight of
Portland Place, Mr. Hope of Deepdene, and Hervey, Earl of Bristol and Bishop of Derry. For the last-named he carved a marble group entitled "The Fury of Athamas," a work which caused him a great deal of trouble; indeed, one of the reasons for his remaining so long in Italy was the difficulty in finishing it. The price originally fixed was £600, but the Earl was extremely unpunctual in his payments, and in the end the sculptor was considerably out of pocket over the transaction.

While he was in Rome, Flaxman also started work on his designs for monuments to the poet Collins and Lord Mansfield, the former for Chichester Cathedral, the latter for Westminster Abbey; but it was, however, as an illustrator, rather than as a sculptor or modeller, that he gained a reputation at this time. Mrs. Hare Naylor commissioned him to illustrate the *Iliad* and the *Odyssey*, Thomas Hope the works of Dante, and the Dowager Countess Spencer the tragedies of Aeschylus and, when all four series had been engraved in Rome by Thomas Piroli in 1793, Flaxman's fame was established throughout Europe, so that "he acquired a higher reputation than any artist of our country, excepting Sir Christopher Wren and Sir Joshua Reynolds" (Gentleman's Magazine, 1827, page 273).

In 1794 Flaxman decided to return to England, and on his way home was elected a member of the Academies of Florence and Carrara. On landing in this country, however, he found that he had to pay duty on all the models, etc., which he had brought with him from Rome, not only for his own use, but also for his friend Romney and other artists, and so warmly did he resent this imposition that he forthwith petitioned the Government to have the duties removed. This they agreed to do, and Flaxman later received a letter signed by all the English artists studying in Italy thanking him for his public-spirited action. Apparently this does not seem to have been his first attempt to get rid of the obnoxious duties, for among the Wedgwood archives there is a petition on the same subject (undated, but probably c. 1787) signed by Flaxman and his countrymen then in Rome and addressed to the Government.

On his return to England, Flaxman and his wife took a house in Buckingham Street, Fitzroy Square, and here he lived until his death, devoting himself chiefly to monumental sculpture and producing comparatively few statues and portrait-busts. In 1797 he was elected an Associate of the Royal Academy and, in 1800, a full member. In 1810 the Academy appointed him Professor of Sculpture and in that capacity he delivered a number of lectures which were published in book form after his death. In 1816 he became a member of the Academy of Painting and Sculpture in Rome. Four years later he suffered a heavy blow by the loss of his wife, to whom he was devoted, from which he never really recovered.

From George IV Flaxman received commissions to make drawings for sculpture for the exterior of Buckingham Palace and for the Marble Arch. The King's original idea for the Arch was that it should constitute a memorial to Nelson, and with this end in view the sculptor executed a seated figure of Britannia with spear and shield, the latter bearing a prominent head of the Admiral. This was finished when the King died, but had not yet been placed on the top of the Arch, and, as the rest of the plan never matured, it remained for some time in obscurity. It was later placed on the St. Martin's Lane end of the National Gallery, not, however, as Britannia, but as Minerva, the change being easily effected by chipping off the head of Nelson from the shield (Art Journal, 1868, page 51).

Flaxman died on 7 December, 1826, and was buried in the churchyard of St. Giles-in-the-Fields in the old St. Pancras Road, where the following inscription was placed on his tomb: "John Flaxman, R.A., Professor of Sculpture, whose mortal life was a constant preparation for a blessed immortality, his angelic spirit returned to the Divine Giver on 7 December, 1826, in the seventy-second year of his age." The unfinished works in his studio were completed by E. H. Baily (q.v.).

He left a comparatively small sum, his will being proved at about £4,000, the principal beneficiary being his sister-in-law, Miss Maria Denman (q.v.), who had looked after him since the death of his wife. In 1851 she presented all his models, casts, etc., to University College, London, where they were placed in what was ultimately known as the Flaxman Hall. Unfortunately many of them were damaged by enemy action in the Second World War. There are also a number of his models in the Soane Museum.

Allan Cunningham, who knew the sculptor towards the end of his life, gives the following description of him in *Lives of the Painters* (Vol. III): "He was small in stature, slim in form: he walked with something of a sidling gait and his hair dark and long was combed down carelessly on either side of his head... His forehead was fine: his large eyes seemed to emit light while he spoke: and the uncommon sweetness of his smile softened a certain proud expression of mouth and some coarseness of physiognomy. His dress was plain but not mean. He kept neither coach nor servants in livery and considered himself more the companion than the master of his men, treated them to a jaunt in the country and a dinner twice a year." A fellow Royal Academician said of Flaxman: "He
is inaccessible to either censure or praise; he is proud but not shy, but I wish he would bow so low to the lowly, his civility oppresses.

Sir Richard Westmacott, who became Professor of Sculpture at the Royal Academy on Flaxman’s death, said of him in a lecture that he was “the greatest of modern sculptors” and that he “not only had all the fine readings of the ancient Greeks, but united to it a readiness of invention and a simplicity of design truly astonishing.” Flaxman’s two small whole-length figures of “Raffaella and Michelangelo” [sic] were in Sir Thomas Lawrence’s sale held by Messrs. Christie on 17 June, 1830. They fetched £74 (Archives, Messrs. Christie).

Flaxman exhibited at the Academy, 1781–1827. His account-book dating from 1794 until 1810 is in the British Museum (Ad. MS. 39784), and from this, and from an article on it by Edward Croft Murray (Walpole Society, Vol. XXVIII), it has been possible to discover the actual date of erection of a number of the monuments in the following list.

(D.N.B.; Art Journal, 1867 and 1868; Builder, 1863, pages 37 and 60; Monthly Magazine, 1802, page 362; the brief memoir attached to Flaxman’s lectures, 1838; Gentleman’s Magazine, 1781, page 65; W. G. Constable’s John Flaxman; authorities cited in text.)

| STATUES | 1803 Rajah of Tanjore | Tanjore, India |
| 1812 Pitt | Glasgow |
| 1813 Sir Joshua Reynolds | St. Paul’s Cathedral |
| 1819 Sir John Moore | Glasgow |
| 1822 Burns | National Portrait Gallery, Edinburgh |
| 1823 Warren Hastings | India Office |
| 1826 Marquess of Hastings | Calcutta (finished by Denman) |
| 1826 John Kemble | Westminster Abbey (finished by Hinchcliffe and Denman) |
| ? Apollo | For Mr. Thomas Hope of Deepdene, Surrey |

| BUSTS | 1778 Self-portrait | Sold at Christie’s, J. W. Brett sale, 1864 (£161). Purchased for the Victoria and Albert Museum |
| 1798 Sir George Yonge | Terra-cotta |
| 1803 Josiah Wedgwood | Stoke-on-Trent Parish Church (£93 19s.) |
| 1805 John Hunter | Royal College of Surgeons |
| 1806 Second Earl of Guilford | Examinations Schools, Oxford |

| 1807 Pasquale di Paoli | Westminster Abbey Church (replica) |
| 1809 Matthew Boulton | Handsworth Parish Church (replica) |
| ? Nelson | Tew Park |
| ? Henry Howard | United Service Club |
| ? Pitt | Soane Museum |

| GROUPS | 1786 Venus and Cupid | For Mr. Knight, of Portland Place |
| 1790 Fury of Athamas | Ickworth House |
| 1791 Cephalus and Aurora | For Mr. Thomas Hope |
| 1821 St. Michael and Satan | Petworth |
| 1824 Pastoral Apollo | Petworth |

**FLAXMAN, WILLIAM**  

*b. 1753 (?) , d. 1795 (?)*  

Elder brother of John Flaxman (q.v.), he
exhibited a bas-relief of “Venus” at the Free Society in 1768, and also showed wax portraits at the Royal Academy, 1781–1793, including one of his famous brother in 1781. In the same year he received £30 10s. for “carving” at Wolverley House, Worcestershire (Knight MSS., Kidderminster Public Library).

FLETCHER, ANGUS
b. 1799, d. 1862
He was born in Edinburgh, where he began to study law, but later abandoned it in favour of sculpture. In 1825 he attended the Royal Academy Schools on the recommendation of Chantrey (q.v.), and exhibited at the Academy, 1831–1839, showing busts of the Duke of Argyll (1831); J. S. B. Morritt, of Rokeby (1834); and Charles Dickens (1839). At the Liverpool Academy he exhibited two busts of Felicia Hemans, the poetess, one in 1830 and the other in 1832. His bust of Mrs. Lawrence of Studley (1834) is in Ripon Town Hall.

Fletcher was a great friend of Charles Dickens, who used to call him “Mr. Kindheart.”

FLETCHER, JOSHUA, the Elder
d. 1737
Fletcher, who became free of the Masons’ Company on 20 April, 1699, was living at Woodstock in 1708, according to the list of members in the Company’s Court Book, and in 1716, as foreman to Henry Banks (q.v.), was one of the master-masons for building Blenheim Palace.

Between 1721 and 1723 he was the mason responsible for the erection of “the new church in George Street, London.” The Court Book of the Company also notes his death in 1737.

FLETCHER, JOSHUA, the Younger
d. 1749
Son of Joshua Fletcher the Elder (q.v.), he was apprenticed to his father in 1723 and was admitted to the Masons’ Company in 1730. In 1734 he was living in Grosvenor Square and in 1748 in Mount Street. In the Westminster Poll Book of the latter year he is described as a “statuary,” but I know of no works by him. His death is noted in the Court Book of the Masons’ Company.

FLETCHER, Z., of Stockton
He signs tablets, with nicely carved details, to Frances Brewster, 1818, at Greatham, Durham, and to Alice Barras, 1819, at Norton in the same county.

FLINTOFF, JOHN, of York
fl. 1813–1841
He signs tablets to John Eadon, 1828, at Snaith, Yorkshire, and to Mr. Richardson, 1829, at St. Michael-le-Belfry, York. In the York Directory for 1841 he is described as “sculptor.”

FLORY, JAMES
fl. 1663–1680
He was employed as a mason at St. Dunstan’s-in-the-East in 1671, and at St. Michael Bassishaw in 1680, carving for this church, besides other decorative details, the cherubim-heads at the east end. The payment for this work was made to his widow, Alice Flory, which indicates that he must have died in 1680 or shortly afterwards. Mrs. Flory also received the money for her husband’s work at St. Michael’s, Greenhithe, which included “ten windows with ornaments, £110” (Bodleian, Rawlinson MSS. 387).

Flory was mason to the Bakers’ Company from 1672 until his death (Company’s Archives). In 1676 he was paid £50 for paving in marble the chapel of Emmanuel College, Cambridge (Willis and Clarke’s Architectural History of Cambridge, Vol. II, page 707).

FOLEY, EDWARD ARLINGTON
b. 1814, d. 1874
He was the elder brother of J. H. Foley (q.v.), and was born in Dublin. At the age of twelve he joined the Royal Dublin Society’s Schools and, in the following year, was apprenticed to the Irish sculptor, John Smyth.

Though he was a good student, Foley found that his master could not provide him with work, and he therefore decided to try his luck in London without waiting to finish his apprenticeship. For some time he had little success there, but his fortunes improved when W. Behnes (q.v.) engaged him to carve a coat of arms, for he did this so well that the sculptor offered him permanent employment at a salary of £4 a week.

In 1844 Foley showed “Canute Reproving His Courtiers” at Westminster Hall, a work which won the approval of the Literary Gazette (1844, page 482), which considered that “in this sitting figure there is much sarcastic dignity and appropriate action.”

He exhibited at the Royal Academy, 1834–1873, where his busts included those of Mrs. Edward Tyrrell (1842), Professor Murphy (1851), Miss Catherine Hayes (1855), the Rev. David Laing (1860), and Douglas Jerrold (1862). Copies of the Laing bust—suitable “for a boudoir or drawing-room ornament”—were made by Overhead of
Haverstock Hill in the same year as the original appeared at the Academy (Art Journal, 1860, page 319). His bust of Samuel Lover, the artist (1839), is in the National Portrait Gallery.

Foley committed suicide on 10 May, 1874, being found drowned in the Regent's Canal.

(Strickland's Dictionary of Irish Artists; various references, Art Journal; Annals of Our Time, page 1152.)

FOLEY, JOHN HENRY, R.A.
b. 1818, d. 1874

He was born in Dublin on 24 May, 1818, the second son of a grocer named Jesse Foley who gave him very little education. However, fired by the example of his brother Edward (q.v.), the boy joined the Royal Dublin Society's Schools in 1831 and two years later won their principal medal for modelling and drawing. In 1834 he left Dublin and went to his brother in London. Here he entered the Royal Academy Schools and was later awarded a large Silver Medal.

In 1839 Foley exhibited "The Death of Abel" and "Innocence" at the Royal Academy, both works being favourably received. In the following year he was commissioned by Lord Ellesmere to carve in marble a group of "Ino and Bacchus," which was later engraved for the Art Journal. The editor's action in reproducing the figure of a semi-nude female, however, was much deplored by many readers, who considered that he would thereby "endanger the minds of the young."

"Youth at the Stream," which Foley showed at Westminster Hall in 1844, was an instantaneous success. The Art Union of that year (page 216) considered it the most beautiful work in the whole exhibition—"the head is modelled in fine taste and had such a figure been dug up in Rome, or near Naples, somewhat mutilated, it would have been pronounced a valuable specimen of classical art."

As a result the sculptor secured a commission to execute a statue of John Hampden for the Palace of Westminster.

Commissions for busts and statues now began to flow in and Foley soon found himself in the front rank of British contemporary sculptors. In 1849 he was elected an Associate and, in 1858, a full member of the Royal Academy. Three years later he became a member of the Royal Hibernian Academy and, in 1863, was similarly honoured by the Belgian Academy of Arts. He continued to send works to the Royal Academy until 1861, but never submitted anything after that date, owing to a difference of opinion with the Committee concerning the arrangement of the sculpture for the 1862 exhibition. He was a most conscientious and fastidious worker, spending as long as twelve years on his statue of "Outram," and "even after it had been cast he continued his work upon it and, where he thought his modelling defective, had pieces of bronze cast and let in" (Strickland's Dictionary of Irish Artists).

If Foley's finest work is the equestrian statue of Viscount Hardinge in Calcutta—which the Art Journal (1859, page 36) described as "a masterpiece of art, one that for grandeur of design, for truth of action and for power and beauty of execution, has scarcely, if at all, a parallel in the world"—his best-known one is the seated figure of the Prince Consort which forms the centre of the Albert Memorial. He received the commission for this after the death of Baron Marochetti, but never lived to finish it, and the work was completed by his pupil, G. F. Teniswood, who was also responsible for some of the chasing. The statue, which weighed ten tons, was not gilded until after it had been placed in position, this supplying the finishing touch to a monument which had cost £120,000 to erect, and which one critic described as "a confection of gingerbread which ought to be under a glass shade on a giant's mantelpiece."

As a designer of silver-work, Foley was responsible for the testimonial to Samuel Courtauld which was illustrated in the Art Journal of 1866 (page 28). He also designed the seal of the Confederate States of America.

Besides the figure of the Prince Consort, Foley was also responsible for the group representing "Asia" for the Albert Memorial, and it was while he was modelling this in the open air that he caught the chill which ultimately affected his lungs. He died after some years of ill health at "The Priory," his home in Hampstead, on 27 August, 1874, and was buried in the crypt of St. Paul's Cathedral on 5 September. In his will he left the bulk of his property to the Artists' Benevolent Fund, and his casts to Ireland, for the Schools of the Royal Dublin Society. According to the author of his obituary in the Art Journal (1874, page 306), "no sculptor living or dead has produced works more grand than the Lord Hardinge and Sir James Outram. There exists no statue more perfect than that of Oliver Goldsmith in which he has 'untoward' materials to deal with, and which is beyond question a triumph of genius over difficulties, such as I think is unparalleled in art of any period." The editor of the Art Journal (S. C. Hall) gives this picture of the sculptor: "Slight, but well-formed, the face long and sallow, pensive almost to melancholy; and I do not think he was outwardly of what is called a genial nature. He was not 'robust,' either in body or in mind; all his sentiments and sensations were graceful;
so in truth were his manners. His leisure was
'consumed by thought.' He seemed to me to be at
work when apparently doing nothing. He was
never idle, though his hands were at rest.'

Foley exhibited at the Royal Academy from
1839 until 1861, a number of his works also being
shown there in the year following his death. He
also exhibited at the British Institution, 1840-
1854. At the Jonathan Nield sale of 3 May, 1879,
at Christie's, his figures of "Winter" and
"Summer" fetched £273 and £183 respectively.
At the same room, on 29 May, 1880, his "Egeria,
the property of J. Banstead, fetched £178.
(Art Journal, 1849, page 49; W. Cosmo
Monkhouse's Works of J. H. Foley; authorities
mentioned in text.)

FORD, JOHN, the Elder, of Bath
b. 1711, d. 1767

He was the master-mason responsible for building
Bath Grammar School in 1752 and almost
certainly executed some of the earlier monuments
listed under his son, John Ford the Younger (q.v.).
The elder Ford was buried at Colerne in Wiltshire, where his epitaph declares that "his abilities and enterprise in business in a great measure contributed to the erection of the handsome buildings and streets" of Bath.

FORD, JOHN, the Younger, of Bath
b. 1736, d. 1803

Ford, who was the son of John Ford the Elder (q.v.), exhibited a marble bust of "Young Mr. Worlidge" at the Free Society in 1764. Three years later he was working as a "statuary" (presumably a carver of chimney-pieces) at the Royal Crescent in his native city. He died in 1803 and, like his father, was buried at Colerne, where a monument was erected to his memory.

His monuments are usually carried out in coloured marbles with large reliefs, a favourite design consisting of a female figure mourning by an urn with an obelisk or pyramid in the background. It may have been the sight of just such a work that inspired an anonymous correspondent to send a sonnet to the Gentleman's Magazine in 1787. The poem (which appeared on page 352) contains the following lines:

"Then, sculptor, sparing of thy marble graces,
Let thy taught chisel from my tombstone spurn
All dove-winged cherubs with fat baby faces,
And Christian faith squat by a Roman urn."

In the list of works given below some of the earlier ones are almost certainly by the elder Ford.

MONUMENTS
1746 Steeple Ashton, Wils Henry Long
1750 North Bradley, Wils Henry Long
1750 Seend, Wils George Husey
1755 Combe Hay, Somerset Robert Smith
1758 Wheathamstead, Thomas Garrard
Herts
1758 Castle Cary, Somerset John Russ
1759 Bathford, Somerset Elizabeth Phillips
1761 Wheathamstead, Sir Samuel Garrard
Herts
1763 Bromham, Wils John Andrew
1763 Bathampton, Somerset Charles Hussey
1770 Mickleton, Glos Morgan Graves
1770 North Stoke, Somerset The Ward Family
1771 Steeple Ashton, Wils Anne Wainhouse
1771 Frampton, Dorset John Browne
1772 Frampton, Dorset Robert Browne
1772 Jamaica (Cathedral) Charles Inman and Ralph Preston
1773 Batcombe, Somerset Thomas Coward
1773 Marlborough St. Elizabeth and Robert Peter's Clavering

FORREST, ANDREW HUME
b. 1813

In 1839 he attended the Royal Academy Schools on the recommendation of William Behnes (q.v.). At the Great Exhibition of 1851 he showed a work entitled "The Forsaken."

FORREST, ROBERT, of Lanark
b. 1790, d. 1852

He was an entirely self-taught sculptor who began life as a stone-mason in the quarries of Clydesdale. His first patron was a Colonel Gordon, who in 1817 lost his way when out shooting and by chance discovered the young man in an old quarry, carving figures of animals out of the local stone. Gordon was so impressed that he ordered a figure of "Bacchus" from the sculptor, and also recommended him to various friends, one of whom (a Mr. Robertson) commissioned him to execute a life-size figure of a Highland chieftain. Enough orders followed to justify Forrest adopting sculpture as a profession. He fixed on a quarry near Lanark for his studio, and here he executed figures of "Old Norval," "Falstaff" and "Rob Roy."

In 1830 he exhibited in Edinburgh equestrian groups of the Duke of Wellington, the Duke of Marlborough, Queen Mary and Lord Herries, and Robert the Bruce and the Monk. In course of time this exhibition became one of the most popular sights in the city, and before Forrest died he had executed thirty groups and statues for it.

His chief work was the statue of Sir William Wallace for Lanark. This is 7 ft. 6 in. high and somewhat unexpectedly shows the national hero of Scotland dressed in "a Roman costume with sword and buckler." The people of Lanark, however, were immensely pleased with it, and, on the day of the unveiling, carried the sculptor "in triumph through the streets, preceded by music and the banners of the different trades" (The Georgian Era, 1834, Vol. IV, page 180).

Other statues by Forrest (who died on 29 December, 1852) include a colossal one of Lord Melville (1822), in Edinburgh; John Knox (1825), in the Glasgow Necropolis; Mr. Ferguson, of Raith (1843); and the Duke of Wellington (1851), at Falkirk. The Melville statue was executed from a design by Chantrey (q.v.).

(MacVeigh's Scottish Family History, Vol. III, page 710; Swan's Views on the River Clyde.)

FOSS, WILLIAM, of Richmond, Yorks
fl. 1812-1822

He was probably the son of John Foss of
Richmond, who died in 1827 and whose tombstone in the churchyard describes him as "architect and Mayor and Alderman of this Borough."

The younger Fos signs pretty tablets in coloured marbles to Sophia Milbanke, 1818, and William Milbanke, 1821, both at Well, Yorks; Eleanor Milbanke, 1819, at Croft, Yorks; Thomas Colpitts, 1819, at Barnard Castle, Durham; and Henry Blegborough in Richmond Parish Church, Yorks.

FOSTER, EDWARD, of Hull

He signs a large wall-tablet with delicately carved details to William Bethell, 1799, at Rise, Yorks.

Foster, James, of Bristol

fl. 1795–1825

He was assistant to W. Paty (q.v.) and took over the yard on his master's death in 1801. Here he continued in business, executing (to quote his advertisement) "monuments and chimney-pieces in marble with peculiar grace and elegance."

Signed works by Foster include those to John Maxse, 1798, at Brislington, Somerset; Richard Oakley, 1801, at Carmarthen; and John Kernan, 1804, at Stanton Drew, Somerset. The tablet to Amelia Burges in St. Augustine's, Bristol, is signed "Foster and Walker." Foster was joined by his son, also James, in 1806, and together they built the upper and lower arcades, Bristol, in 1825.

FOX, CHARLES

d. 1834

In 1847 he received the Silver Isis Medal from the Society of Arts for a model of a group of children. At the Great Exhibition of 1851 he showed a model of a design in sculpture for a pediment, which had a relief representing "The Arts, Commerce and Manufactures promoted by the Great Exhibition." Two years later he executed a set of decorative panels for a building in North Street, Brighton.

Fox's brother Edward showed statuettes of Chaucer and Spenser at the Great Exhibition.

FOXHALL, EDWARD

fl. 1783–1794

He was the son of Martin Foxhall, and was responsible for decorative carving for various houses designed and built by his father's friend, Sir John Soane. In 1783 he received £1,069 for all the carved woodwork, etc., in Philip Yorke's house in New Cavendish Street, and ten years later was again employed by Yorke (now Earl of Hardwicke) at Wimpole in Cambridgeshire. Under Soane he also worked at Malvern Hall for Sir Henry Lewis in 1786, in Grosvenor Square for the Marquess of Abercorn in 1787, and in Pall Mall for Lady Louisa Manners in 1788. He also carved four Ionic capitals for the Marquess of Abercorn at Bentley Priory.

Other work by Foxhall included a chimneypiece for Burnham Hall, Norfolk, in 1783, while two years later he carved the snake round the base of the stone column erected to the memory of Edward and Julia Evelyn at Felbridge, near East Grinstead. This was taken down after the First World War and now stands at Lemmington in Northumberland.

(Soane Notebooks.)

FOY, —

In 1777 he sent a "Bust of an Artist" from Rome to the exhibition of the Society of Artists. He may be the Michael Foy who worked in Dublin and who received premiums from the Dublin Society for two out of the three bas-reliefs which he exhibited there between 1767 and 1770. A bas-relief of the head of "Durno, by Foy" was sold by Mr. Christie at the sale of the effects of Thomas Banks (q.v.), on 22 May, 1805 (Archives, Messrs. Christie).

FRANCEYS, SAMUEL, and F.,

of Liverpool

Samuel Franceys: b. 1762, d. 1829

There was a Samuel Franceys who was employed on decorative stucco-work at Melbourne Hall, Derbyshire, in 1760 who may belong to the same family, or, indeed, be the father or grandfather of the Liverpool statuaries (Archives, Marquis of Lothian).

The firm of Franceys, besides being the leading statuaries of Liverpool, also manufactured marble chimneypieces "in the Egyptian, Grecian, Gothic and modern taste," which they exhibited in their "marble-rooms," together with "various figures in marble, bronze and artificial stone to support dials and lamps" (The Stranger's Guide to Liverpool, 1812).

Their most distinguished apprentice was John Gibson (q.v.), who, while working for them, designed and carved a monument to Henry Blundell about 1813. The work was erected in Sefton Church, Lancashire, but it is signed by the firm and not by Gibson (Gregson's Fragments, page 224).

Samuel left the business in 1819 and the partnership was dissolved (European Magazine, 1819, page 282), his place being taken by W. Spence (q.v.). The reconstructed firm of Franceys and Spence
continued working until about 1844, many years after Samuel's own death, which took place on 20 May, 1829. He was buried in the graveyard of the Wesleyan Chapel in Brunswick Street, Liverpool.

The firm's most ambitious monument is the large stele at Garstang, Lancashire, with its figure of Alexander Butler (d. 1811) as a Roman warrior, with a sword in his hand. Another, to the Rev. Joseph Venables, 1810, at Oswestry, Salop, has a most curious life-size portrait silhouette of black marble inlaid on white. A third, commemorating the Rev. Josias Dawson (d. 1807), is also signed "John Foster del."

MONUMENTS BY S. AND F. FRANCYS
1783 Gresford, Denbigh
1800 Selattyn, Salop
1801 Chirk, Denbigh
1806 Rochdale (Parish Church)
1807 Chester (Cathedral)
1809 Rochdale (Parish Church)
1809 Penwortham, Lancs
1811 Llanbedr, Denbigh
1813 Stockport, Cheshire
1813 Manchester (St. Ann's)
1813 Burnley, Lancs
1813 Broughton, Staffs
1814 Davenham, Cheshire
1817 Audlem, Cheshire
1818 Chester (St. Peter's)

MONUMENTS BY FRANCYS AND SPENCE
1820 Congleton, Cheshire
1820 Ruabon, Denbigh
1823 Ruthin, Denbigh
1823 Hale, Denbigh
1827 Ormskirk, Lancs
1833 Colne, Lancs
1844 Sefton, Lancs

FRANCYS, B.
fl. 1842–1844

He exhibited busts of Queen Victoria (1842), and the Prince Consort (1844) at the Royal Academy.

FRANCIS, JAMES, of Clapham
b. c. 1751, d. 1833

As a mason he was working at Clapham Parish Church in 1802, and in the same year rebuilt the tower of St. Anne's, Soho (Churchwardens' Accounts).

He signs monuments to the Carpenter family, 1798, at Tavistock, Devon, and to Elizabeth Davidson, 1798, in St. George the Martyr, Southwark.

FRANCIS, JOHN
b. 1780, d. 1861

He was born in Lincolnshire on 3 September, 1780, and began life by training as a farmer in his native county. His decided talent for art, however, made his friends advise him to study it seriously, and he accordingly went up to London in 1810 to work under Chantrey (q.v.).

About 1815 Francis attracted the attention of Mr. Coke (afterwards Earl of Leicester) and he later carved a successful bust of his patron which he exhibited at the Royal Academy in 1820. Coke introduced him to various political friends, and in a short time he found himself the unofficial sculptor of the Whig party. He became a great favourite of William IV and also worked for the Duke of Sussex, making between 1830 and 1840 small (or cabinet) marble busts of the latter's family and political associates. On the Duke's death seventeen of these were sold at Christie's in 1843 and fetched prices varying between two guineas for George IV to five for Lord Melbourne. Others sold included those of Princess Augusta, the King of Prussia, Earl Spencer, Canning, Earl Grey, Fox, and Bathurst, Bishop of Norwich.

Francis's busts of the Duke of Sutherland and Lord Holland, both dated 1838, are at Buckingham Palace, together with one of the Duke of Saxe-Coburg which he modelled in 1846 "under the guidance of Prince Albert." Other busts executed by him include those of Leopold, Prince Royal of Belgium (1830); Lord John Russell (1838); Lord Holland (1838); Queen Louise of Belgium (1840); and the Duke of Saxe-Coburg and Gotha (1844), all at Windsor Castle; the Duke and Duchess of Saxe-Coburg, at Osborne; and the second Duke of Sutherland, at Sutton Place, Guildford. His statue of the Prince Consort exhibited at Westminster Hall in 1844 was, in expression, "deficient of intellectual life," according to the Art Union of that year.

Francis exhibited at the Royal Academy, 1820–1857. He had a large studio and numbered among his pupils the sculptors, J. Durham (q.v.) and M. Noble (q.v.). He married a relation of Lord Nelson and was the father of Mrs. Thornycroft (q.v.). He died on 30 August, 1861. (Art Journal, 1861, page 312.)
FRANCIS

1829 Great Oakley, Rutland Sir Richard Brooke
1835 Sudbury, Derby Lord and Lady Vernon
and 1837
1843 Colwich, Staffs Anne, Viscountess Anson

FRANCIS, MISS MARY.
See under Thornycroft, Mrs.

FRANKLIN, —,
of Stroud and Purton
fl. 1790-1822

His monuments and tablets are uninteresting, the best in Gloucestershire being those to Richard Aldridge, 1789, at Woodchester; Mary Naylor, 1790, in St. John's, Gloucester; William Carruthers, 1790, at Painswick; and William Hewer, 1792, at Cirencester. Other examples in Wiltshire commemorate John Bryant, 1802, and John Sadler, 1811, both at Purton; Richard Broome, 1803, at Cliffe Pypard; Henry Wilson, 1812, at Woottton Bassett; and William Stratton, 1822, at Brinkworth. He also signs tablets to Thomas Pearce, 1791, and Catherine Tarrant, 1807, both at Ashbury, Berks.

FRANKS, of Brentford

A "stone cutter," he was paid £14 by William Lowndes in 1700 for a "pair of Plints, a pair of Necks carved and Acornes to Sett up betweene the two gardens." These were for Winslow Hall, Bucks, designed by Sir Christopher Wren (Wren Society, Vol. XVII, page 62).

FREEBAIRN, RICHARD G.
b. 1797, d. 1825

He attended the Royal Academy Schools in 1814 and later studied in Rome, returning to England in 1821. He exhibited at the Royal Academy, 1818-1835, and at the British Institution, 1819. In 1822 he showed a bust of George III at the Academy. This must have been a most curious production, for it showed the late King "under his afflicting malady" (Literary Gazette, 1822, page 346).

Freebairn's most important work, carved just before his death in 1825, was a marble statue of "Psyche." The Literary Gazette of that year (page 428) considered that he had "wrought it with sufficient variation to entitle him to credit for a very successful work."

FREEMAN, WILLIAM
fl. 1824-1828

Between 1824 and 1828 he was employed on the building of the east wing of the British Museum, and received £100 for carving four 5-ft. Ionic capitals (P.R.O. Works 5/119-5/125).

FRIEND, or FREND, JOHN,
of Canterbury
fl. 1704-1747

In 1704 he was apprenticed to John Broxup of Canterbury, and was appointed chief mason to the Cathedral in 1731, a post he retained until 1747. Between 1734 and 1735 he repaired most of the tracery of the windows, a task for which he received £500 (Cathedral Library Archives). He also signs the architectural monuments to John Barrett and Paul Lukin, both of whom died in
1709, in St. Margaret's Church, Canterbury. These are well executed and typical of their period, with weeping cherubs on either side, etc.

In 1732 Francis made a sideboard with a marble slab for Lord Folkestone's house at Bifrons, in Kent (Longford Castle Archives).

Hutchins, in his History of Dorset (Vol. III, page 570), says that the monument to Thomas Chafin (d. 1691) in Chettle Church is "curiously sculptured and was made at Canterbury and erected in 1708," so it might be the work of Friend.

FULKES, SAMUEL
fl. 1664–1711

Under Wren he was responsible for a considerable amount of masonry work at St. Paul's Cathedral, where he executed shields and festoons, keystones and cherub-heads, Corinthian capitals, the great tribune at the west end, four scrolls in the library, the capitals on the north-west tower, the decorative work of the west portico and part of the great upper portico. The sum he finally received for masonry and carved work in connexion with the building amounted to no less than £23,115 (Wren Society's Publications).

Fulkes was also employed at St. Bride's, Fleet Street; All Hallows', Bread Street; and St. Mary Aldermanbury. For St. Swithin’s, Cannon Street, he made the font, costing £15; for St. Margaret Pattens, "three Corinthian capitals," for £39; while he received £40 for "eight freestone pillar-capitalss and five pilaster-capitals" for St. Margaret, Lothbury (Bodleian, Rawlinson MSS. 387).

In 1695 he was the master-mason for building Aske's Hospital at Hoxton, and on 28 May of that year the Minute-book of the Haberdashers' Company notes that Mr. Fulkes was ordered "to go on with the figures for the Great Gate." These apparently stood on the piers of one of the entrance-gates to the building and are described in Stow's London (Stryke Edition, 1720, page 212) as "two stone statues representing two of Aske's hospital men in full proportion." In the same year the sculptor was paid for "bassos, capitals and pineapples according to the modell" (Archives, Haberdashers' Company).

Fulkes's daughter married Edward Stanton (q.v.), and died in 1712 at the age of thirty-eight. The epitaph on her tomb in the churchyard of St. Andrew's, Holborn, is given by Le Neve in his Monumenta Anglicana (Vol. IV, page 104).

FURNISS, B. C.
fl. 1829–1833

He exhibited at the Royal Academy, 1829–1833, showing a bust of Lord Cosmo Russell and a medallion of W. Martin Coates.
GAFFIN, THOMAS, and EDWARD
Firm fl. 1805–1865

Edward Gaffin and his son Thomas were the most prolific statuaries of the first half of the last century. From their workshop in Regent Street poured forth an apparently unceasing flood of tame, dull and uninteresting monuments and memorial tablets. The number they produced must have run into thousands, the majority of which have a strong family likeness; unfortunately it was such a very plain family.

The firm, however, sometimes employed good designers, for the monument of John Willis, 1835, at Greatford, Worcestershire, has a lovely relief. It was, indeed, during the 1830s that their best work was produced, but the memorials become duller and plainer as the years go on, with the result that, stuck on the walls of aisle and chancel like postage-stamps, many of our parish churches have white-marble tablets with square, black-marble surrounds which look exactly like the mourning-cards of our grandparents. There follows a brief list of the best works of the firm.

MONUMENTS AND TABLETS
1814 South Weald, Essex  Sir Richard Neave
1819 Chichester (Cathedral)  Duke of Richmond
1827 Coltishall, Norfolk  Sophia St. John
1827 Langley Marish, Bucks  Jemima Harvey
1828 Stanstead Mountfitchet, Essex  William Torriano
1833 Christow, Devon  2nd Viscount
1834 Tyningham, Bucks  Exmouth
1834 Reading (St. Mary's)  Sarah Winfield
1836 St. Mellion, Cornwall  John Monck
1836 Bourne, Lincs  William Coryton
1837 Adlestrop, Glos  James Digby
1838 Ulcombe, Kent  Hon. Emily Wingfield
1840 Stanford-on-Soar, Notts  Lady Sarah
1843 Hartfield, Sussex  Wandesforde
1847 Wartling, Sussex  Caroline Dashwood
1849 Congleton, Cheshire  Admiral the Hon.
1863 Westminster Abbey  Jacob Henniker
1863 Westminster Abbey  Herbert Curteis
1863 Westminster Abbey  Sir Thomas Reade
1863 Westminster Abbey  Lord Clyde

GAHAGAN, C.
fl. 1825–1844

He assisted Flaxman (q.v.), who paid him three guineas a week (British Museum, Ad. MS. 39784), and he later exhibited busts at the Royal Academy between 1831 and 1836.

In 1844 Gahagan showed at Westminster Hall "An Allegorical Representation of the Union of the Three Kingdoms." The art critic of the Literary Gazette said of this production: "If the Union conferred as little benefit upon the Kingdom as this gentleman does upon the Arts, the dissolution were most devoutly to be wished for."

GAHAGAN, EDWIN
d. 1858

Like his kinsman, C. Gahagan (q.v.), he also exhibited at Westminster Hall in 1844, showing a statue of Newton, which the Art Journal thought possessed "marked merit and gives promise of future excellence." Even the Literary Gazette was kinder, mentioning their "pleasure when we come to speak of that which can be admired."

Gahagan exhibited at the Royal Academy, 1831–1837. His son Stephen, born in 1832, attended the Academy Schools in 1850 and showed a medallion portrait at Burlington House in 1857. Edwin died 5 July, 1858.

GAHAGAN, LAWRENCE
fl. 1756–1820

He was born in Ireland, and in 1756 won a premium from the Dublin Society "for a piece of sculpture," probably a statuette of Rubens. Shortly after this he went to London, where he changed his name from Geoghegan to Gahagan.

In 1777 he was awarded a premium by the Society of Arts for a relief 6 ft. high of "Alexander Exhorting His Troops." In 1801 he was employed on decorative work at Castle Howard (Castle Howard Archives), and in 1806 submitted a model for the proposed Guildhall monument to Pitt. His design was rejected, however, and he later wrote to the Committee that he had "made four applications at your office for my model, but could not obtain it until last Saturday and then in a very mutilated state" (City Corporation Records, MSS. 95.2).

Gahagan seems to have made a speciality of small bronze portrait-busts, and one, dated 1812, in the possession of the writer, is a charming, carefully modelled work. He exhibited at the Royal Academy, 1798–1817, and at the British Institution in 1809. At the Academy his busts included those of Admiral Sir Thomas Paisley (1798);
JOHN FLAXMAN

Earl Howe, 1803, St. Paul's Cathedral.
G. B. GUELFI
James Craggs, 1725, Westminster Abbey.

GRINLING GIBBONS
Part of the monument of John, Lord Coventry, 1690, Croome D’Alvotot, Worcestershire.

JOHN GIBSON
"Narcissus," 1838, Burlington House.
Nelson (1798), afterwards engraved in mezzotint by Barnard; William Pitt (1800); the Bishop of St. Pol de Leon (1809); Dr. Hawes (1809); and Sir Samuel Romilly (1816). Another bust of Nelson, shown in 1804, is now in the Bath Art Gallery, while a bronze one of Wellington, exhibited seven years later, is at Stratfield Saye.

Gahagan also signs monuments to the Hon. George Napier, 1804, in Redland Chapel, Bristol, and Joseph Baldwin, 1810, at Cholebury, Bucks.

In 1840 the contents of Chandos House, Bath (which had belonged to a Miss Fenton), were offered for sale and among the lots were a number of models, etc., catalogued as by Lawrence Gahagan, although some of them must have been the work of his son Lucius (q.v.). They included reliefs of “George IV presenting Peace to the Goddess of the Earth, in background equestrian figure of Wellington,” “The Death of Spencer Perceval,” and “A Missionary Preaching to the South Sea Islanders,” a figure of “William IV Seated in a Chair”; statues of Lady Hood, Princess Cariboo and Hannah Moore; and “A Large Model of the Murdered Figure of Maria Bagnew and Gillingham the Murderer.” Busts in the sale attributed to the same hand (some apparently small bronze portrait-busts or the terra-cotta models for them) included those of the Emperor Alexander I (the only portrait for which he sat when in England), Lord Byron, Sir Edward Parry, Gabriel Goldney (Mayor of Chippenham), Madame Catalini, General Blücher, the Marquess of Alburquerque, the Rev. — Jay, Mr. Tottenham and Mr. Trevor (Sale Catalogue, possession of author).

GAHAGAN, LUCIUS, of Bath
d. 1866

He was the son of Lawrence Gahagan (q.v.) and settled in Bath about 1820, where he lived in a house named “Lo Studio.” For Bath he carved in 1824 statues of “Commerce” and “Genius” for the facade of 9, Quiet Street, and the head of Garrick for the exterior of the Garrick Head Hotel in 1831. His bust of Caleb Parry is in the Art Gallery.

Other works by Gahagan included a bust of the Rev. J. Hyatt, which he showed at the Royal Academy in 1817, and a medallion plaque of Wellington dated 1832, which is now at Stratfield Saye. He also signs the monument to Viscountess Bridport, 1831, at Cricket St. Thomas, Somerset.

GAHAGAN, MISS SARAH
d. 1866

She was the daughter of Lawrence Gahagan (q.v.), and in 1817, the year she showed a bust of a child at the Royal Academy, was living in Bristol. Later on, however, she joined her brother Lucius (q.v.) at Bath.

GAHAGAN, SEBASTIAN
fl. 1800-1835

He was the brother of Lawrence Gahagan (q.v.) and was born in Dublin, but later went to work in England where he was employed by Nollekens (q.v.). He carved a number of his master’s works, including the statue of Pitt for Cambridge in 1809, but for this “Mr. Nollekens paid him, I am sorry to say, a miserably small sum,” says J. T. Smith (Nollekens and His Times, Vol. I, page 368). “I really think,” Smith continues, “those who now bask in the sunshine of Mr. Nollekens’ immense wealth should take into consideration the letter he addressed to the executors shortly after the death of his old master.”

Nollekens did leave Gahagan £100, but for some reason he did not receive it “till several years had elapsed, during which time he had undergone many serious vicissitudes of ill fortune” (op. cit., Vol. II, page 354). Apparently ill-luck continued to dog his footsteps, for in 1835 he was forced to apply for assistance to the Royal Academy, which granted him a small “charitable donation” (Archives, Royal Academy).

In 1809 Gahagan had received a premium from the Society of Arts for his group of “Samson Breaking his Bonds,” and three years later he made the statues of “Isis” and “Osiris” for the front of the Egyptian Hall in Piccadilly. His best-known work, however, is the statue of the Duke of Kent, erected in 1825 at the top of Portland Place “by the supporters of the numerous charities he so zealously and successfully patronized.”

Gahagan exhibited at the Royal Academy, 1802-1835, showing busts of Sir Thomas Picton (1816), George Cholmondeley (1822) and Sir Peter Laurie (1824). His bust of William Windham (1821) is at Felbrigg Hall, Norfolk, while another of Dr. Hutton (1832) is in the possession of the Newcastle Literary Society. According to Hutton’s obituary in the Gentleman’s Magazine (1823, Vol. I, page 232), “casts of his bust have been already obtained by many of Dr. Hutton’s friends, and still continue to be supplied by the sculptor, Mr. Gahagan, at his premises in King Street, Edgware Road.”

Gahagan’s most important monument, with its life-sized figures, commemorates Sir Thomas Picton, 1815, in St. Paul’s Cathedral. His monument to Dr. Charles Burney was unveiled in Westminster Abbey on 16 February, 1819, and he also signs tablets to Thomas Wyndham, 1814,
at St. Bride's, Glamorgan, and Archdeacon Thomas, 1820, in Bath Abbey. In 1815 he made a bust of Sir Thomas Picton for John Colby, of Ffynone, Pembroke (Colby Archives).

GAHAGAN, VINCENT
fl. 1804–1832
He was probably the brother of Lawrence (q.v.) and Sebastian Gahagan (q.v.) and settled in England before 1804. In 1811 the Count of Funchal, the Portuguese Ambassador, asked the Royal Academy to arrange a competition for a royal equestrian statue to be erected in Rio de Janeiro, and offered prizes of two hundred guineas each for the two best models and fifty guineas for the third.

The Academy took considerable trouble over the matter and asked a number of sculptors to submit models, although some of the best known did not trouble to do so. Long before the works were ready to be judged in 1815 the Ambassador began to repent of his bargain, but the Academy refused to allow him to go back on his word and awarded the two first prizes to C. Rossi (q.v.) and Vincent Gahagan. When they hurried round to show their models to the Count he was, or pretended to be, disappointed and wrote to the Academy that they were “but little worthy to be sent to his Court.” To this the Academy firmly replied that they were the best sent in and must therefore be accepted. The correspondence dragged on in a desultory way for a year or two and then ceased, but it is not clear whether the successful sculptors were ever paid for their trouble (Royal Academy Archives).

Gahagan exhibited at the Royal Academy, 1804–1833, and also showed an equestrian statue of the Duke of York at the British Gallery in 1832. The Literary Gazette (1832, page 170) considered it “both in feature and in figure an admirable resemblance of His Royal Highness,” but could not “praise the nag.”

Vincent died in 1832, being, as his widow stated in her application to the Artists’ General Benevolent Institution, “Frightfully destroyed at Pimlico by the falling of the statue of the Right Hon. George Canning while working on the statue.” Gahagan was, at the time of his death, employed by Sir Richard Westmacott (q.v.). He left a widow and six children totally unprovided for. It is curious how most writers, including J. T. Smith, have stated that it was Edwin Gahagan (q.v.) who was killed by the fall of the statue, but this is clearly impossible, as Edwin exhibited at Westminster Hall twelve years after his supposed death.

GALLAGHER, JOHN
b. 1805
He was born in Ireland and studied sculpture at the Schools of the Royal Dublin Society, where he won several prizes. Indeed, he showed so much promise that when William Behnes (q.v.), himself an old student of the Schools, offered to take two of the boys into his studio for instruction, Gallagher was one of the two chosen, the other being Panormo (q.v.).

Before going to Behnes, however, Gallagher first attended the Royal Academy Schools in 1824, gaining a Silver Medal in 1825, and entering the sculptor’s studio in the following year. He later went to Rome at the expense of the Dublin Society, but the promise of his early years does not seem to have been fulfilled, for very little more is heard of him.

He exhibited at the Royal Academy, 1834–1844, and at the Great Exhibition of 1851 showed a design for a fountain.

(Strickland’s Dictionary of Irish Artists; Royal Academy Archives.)

GARDENER,
—
His fine contemporary wax portrait of David Garrick is in the Royal Collection.

GARDENER,
or GARDNER, GEORGE,
of Tewkesbury
fl. 1793–1838
He signs tablets to John Hancock, 1793, and John Jones, 1813, both at Chastleton, Oxon; James Olive, 1826, at Twynings, Glos; and the Rev. Joseph Baugh, 1838, at Ripple, Worcs.

GARDENER, W. M.,
of Cheltenham
fl. 1812–1843
He signs monuments to William Hill, 1812, at Leigh, Glos; Charlotte Edwards, 1838, at Laugharne, Carmarthen; and Lieutenant-Colonel Cyprian Bridge, 1843, at Harwich, Essex.

GARDIE, LOUIS
fl. 1850–1854
He exhibited at the Royal Academy, 1850–1854, showing busts of H. Wilde (1850), Charles Wilkins (1853), and the Duke of Wellington (1854). In 1851 he executed a bust of the Marquess de la Rochejacquin, and also showed a bronze one of Sir Robert Peel at the Great Exhibition of the same year. His terra-cotta bust of John Speke is in the National Portrait Gallery.
GARLAND and FIELDWICK, of Camberwell
Firm fl. 1807–1847

In 1816 they were the masons responsible for building the porico of Camberwell Church. Their tablets are dull, except for one commemorating Joseph Newcomb, 1841, in Brixton Parish Church, which has a fine relief of a mourning woman.

Other monuments and tablets executed by the firm include those to Mary Walter, 1807, at Crayford, Kent; the Hichens family, 1815, at St. Ives, Cornwall; Ann Hedges, 1820, at Whitchurch, Bucks; Ellen Caldecott, 1828, at Shimpling, Suffolk; William Old, 1833, in St. Mary-at-Hill; and Captain Borlase, 1836, at Fareham, Hants. They also sign the large sarcophagus of William Morris, 1847, in the churchyard at Woodford, Essex.

A “Garland” signs the busts of John Dollond (1843) and an undated one of George Dollond, both in the possession of the Royal Society.

GARNERS, —, of London

He signs the monument to Hannah Pattison and her husband, 1835, at Witham, Essex. The Pattisons were drowned in a lake in Switzerland, and the relief shows the elder Mrs. Pattison welcoming her son and daughter-in-law to Heaven.

GARRARD, CHARLES
b. 1798

He was the son of George Garrard (q.v.) and attended the Royal Academy Schools in 1816, winning a Silver Medal two years later. He exhibited a number of busts at the Academy between 1816 and 1829, including those of Mr. Raymond, of Drury Lane Theatre (1818), J. Watts (1826) and Mr. Mitchell (1831). He also exhibited at the British Institution, 1824–1825. His bust of a girl is at Powderham Castle, Devon.

GARRARD, GEORGE
b. 1760, d. 1826

He was born on 31 May, 1760, and as a boy studied under Sawrey Gilpin, the painter and Royal Academician. In 1778 he joined the Academy Schools, and three years later had pictures of horses and dogs accepted for exhibition at Burlington House. He continued to show pictures of horses and other sporting subjects until about 1795, when he deserted painting for sculpture.

In his new profession Garrard soon became well known for his reliefs and accurate small-scale models of animals, particularly of dogs and cattle, which he executed both in plaster and bronze. There are large collections of such models at Woburn Abbey, Southill and Burghley, while others were made for Lord Petre and Sir John Soane.

He lived in George Street, where “he executed his sculptured imitations of animals, which he exhibited in his gallery, forming a collection of models that have raised him in this department to a competition with the greatest statuaries of Greece” (Ackerman’s View of London, 1816, page 49).

As a portrait-sculptor he must also have been considered competent, for he was one of the five artists invited by Cambridge University in 1806 to send in models for the proposed statue of Pitt (Cambridge Chronicle, 28 March, 1807). J. T. Smith, in his Book for a Rainy Day (page 289), mentions that he went to Garrick’s villa at Hampton in 1829, and in the temple there found a cast which Garrard had made of Roubiliac’s statue of Shakespeare. This, he continues, “was similar to the one he furnished the late Mr. Whitbread for the hall of Drury Lane Theatre.”

In 1814 Garrard proposed to erect a statue of Wellington, but the scheme fell through owing to lack of funds. Perhaps this was just as well, for the work was to be 48 ft. high, and was to show the Duke “in the costume of a Roman general, resting on his truncheon; the horse in the gallop, under which the Furies are represented sinking to the earth” (New Monthly Magazine, 1814, page 249).

Garrard exhibited at the Royal Academy, 1781–1826, and at the British Institution, 1806–1825, showing altogether over two hundred works. In 1800 he was elected an Associate of the Royal Academy. Three years previously he and his fellow-sculptors had petitioned Parliament to introduce a Bill to secure copyright in works of plastic art. Their efforts were successful and resulted in the passing of the Act of 1798 (38 Geo. III, c. 71) “for encouraging the art of making new models and casts of busts, and other things therein mentioned.”

Garrard died at Queen’s Building, Brompton, on the morning of Sunday, 8 October, 1826, while kneeling at prayer with his family. At the subsequent sale of his works one of the lots was a bust of Thomas Girtin, the well-known painter in water-colours, “taken from a cast made after death.” Apparently the sculptor left very little money, for his widow, a daughter of his old master, Sawrey Gilpin, was forced to write and ask the Royal Academy for assistance, “as she had been left in very necessitous circumstances.
and with a daughter, incapable from illness of doing anything for her subsistence." In reply the Academy granted her a pension of £45 a year and a donation of £50 (Royal Academy Archives). (D.N.B.; Authorities cited in text.)

**GARRATT, —**

*fl. 1710–1711*

He worked under William Townsend (q.v.), and between 1710 and 1711 carved the pediment on the west side of the quadrangle of Queen's College, Oxford (Hiscock's *A Christ Church Miscellany*, page 43).

**GARRETT, GEORGE, and JONATHAN, of Southampton**

They sign a large tablet to Anne Northage, 1832, at Itchen (Pear Tree Green), Hants

**GATES, HENRY**

*fl. 1684–1722*

He was the son of William Gates of Kingston-on-Thames and in 1684 was apprenticed to Thomas Broomhall (q.v.). He later became free of the Masons' Company and was living at Vauxhall in 1708, according to the list of members for that year. In 1722 he made a marble chimneypiece for Stourhead, Wiltshire (Hoare Archives).

**GATES, WILLIAM**

*fl. 1731–1761*

Son of Henry Gates (q.v.), he was apprenticed to his father in 1713 and became free in 1722. He was Renter Warden of the Masons' Company in 1760, and in the following year was living near Fishmongers' Hall. He signs a large monument to John Wise, 1746, at Totnes, Devon.

Gates' son, another William, was apprenticed to Samuel Stretton in 1740, and became free in 1747.

**GATLEY, ALFRED**

*b. 1816, d. 1863*

Gatley came from a family which had long been settled in Cheshire, where his father owned
quarries in the Kerridge hills. In 1837 he came to London with the help of friends and obtained work in the studio of E. H. Baily (q.v.). Two years later he joined the Royal Academy Schools, gaining a Silver Medal and exhibiting for the first time at the Academy in 1841.

In 1834 he left Baily to become assistant to M. L. Watson (q.v.), and in the same year showed his bust of "Hebe" at Burlington House, a work which was bought by the Art Union of London, who reproduced it in bronze for one of their prizes.

In 1832 Gatley went to Rome, where he met John Gibson (q.v.), whose enthusiasm for Greek art he shared. He does not seem to have been very successful in Italy, for practically his only patron was Mr. Christie Miller, who commissioned him to design a mausoleum which was to be erected near Edinburgh to the memory of Mr. W. H. Miller.

Of all Gatley's works the one which attracted the most attention was his bas-relief of "Pharaoh and His Hosts," shown at the International Exhibition of 1862. The Queen of August, 1863, considered it among "the noblest productions of modern art," while the Art Journal of the same year (page 181) declared that "there is not a sculptor in Europe who would not consider it an honour to have been its author." Gatley himself visited England for the last time in 1862, but to his great disappointment failed to sell any of the works he had sent to the Exhibition. He returned to Italy and died of dysentery in Rome on 28 June of the following year. He was buried there in the Protestant Cemetery, where a marble lion (one of his own works) was placed over his grave.

The Art Journal (1863, page 322), in its obituary of the sculptor, said of him that "he had a mind of singular independence. The style he chose," the article continued, admitted of no facile compromise of the classic with the pictorial. It descended not to seek an easily purchased popularity by softly blended forms after the manner of the Romantics. The school to which he belonged was stern and strict. The English public failed to comprehend the largeness of this manner."

Gatley's chief work, after the "Pharaoh," was "The Song of Miriam," which was also a commission from Mr. Christie Miller and which he began in 1855 but did not complete until just before his death. His group of "Greek Hero and the Bull" and his statue of "Echo" (1861) are both in the Salford Art Gallery. At the Royal Academy, where he exhibited between 1841 and 1853, he showed busts of Thomas Leigh of Lyme (1845), the Duke of Vittoria (1846), Mrs. Smith Barry (1847), William Hulton (1848) and A. J. Coffin (1852). In 1851 he executed a bust of Richard Hooker for the Inner Temple, while in 1862 (besides the relief already mentioned) he sent to the International Exhibition a statue of "Night" and four small marble figures of recumbent animals.

He signs tablets to Bridget Downes, 1840, at Pott Shrigley, and Thomas Legh, 1857, at Disley, both in Cheshire; and another, with a medallion portrait, to John Lowe, 1846, at Muttonram, Lancs; and a monument to Mary Legh, 1846, at Newton-in-Makerfield, Lancs.

(D.N.B.; Authorities cited in text.)

GAWEN, JOSEPH

b. 1825

He joined the Royal Academy Schools in 1847, on the recommendation of E. H. Baily, and exhibited at the Academy, 1850–1882. Here his works included busts of W. Blanchard Jerrold (1850), George Cruikshank (1868) and the Rev. Samuel Smith (1882).

GAY, M. L., of London
fl. 1818–1821

Gay, who was declared a bankrupt in 1818, signs a tablet to Mrs. Knipe, 1821, in Bath Abbey.

GAYFERE, THOMAS, the Elder, and THOMAS, the Younger

Thomas Gayfere the Elder: b. 1720, d. 1812
Thomas Gayfere the Younger: b. 1755, d. 1827

Thomas Gayfere the Elder was the eldest son of Thomas Gayfere, a mason of Wapping, and his wife, Mary Townsend of Burford (probably a member of the family of Oxford masons). Old Gayfere, who had been foreman to Christopher Cass (q.v.), moved to Westminster after the child's birth and remained in business there for many years. In 1748 he was described as "of Westminster, mason," when another son, Richard Gayfere, was apprenticed to a mason named George Mercer. In 1756 he built 18, Cavendish Square for Thomas Bridges (Middlesex Record Office 85/223), and in 1774 became Master of the Masons' Company.

In 1734 Thomas Gayfere the Elder was apprenticed, not to his father the Westminster mason, but to Andrews Jelfe (q.v.). He became free in 1741 and, about 1760, was appointed mason to Westminster Abbey. Between 1768 and 1769 he carried out repairs to Harefield Church, Middlesex, for which he received £53 (Newdigate Archives), while in 1773 he made the Portland-stone front of Horace Walpole's chapel at Strawberry Hill, and also the chimney-piece in the great north bedroom (Toynbee's Strawberry Hill Accounts, pages 156–157).
The elder Gayfere, who had lost his wife on 22 March, 1770, died on 4 April, 1812, and was buried on 10 April in the west cloisters of the Abbey. His estate, which was sworn at under £10,000, was administered by his only surviving child, Thomas Gayfere the Younger, who had been appointed master-mason of the Abbey jointly with his father on 7 December, 1802, and who had superintended the repairs to Henry VII's Chapel which were begun in 1809.

After his father's death Gayfere undertook the repair of the great rose window in 1814. He signs the Abbey monument to Mrs. Vincent, 1807, while other work executed by him in the neighbourhood was the restoration of the north front of Westminster Hall between 1810 and 1812. In the former year he was also employed at Somerset House (P.R.O., A.O. 1/2499).

Gayfere died on 20 October, 1827, and was buried at Newton-Solney in Derbyshire. His obituary in the Monthly Magazine of the following year (page 224) declared that "the faithfulness of his workmanship will be a lasting testimony to his abilities and it is by no means too great praise to aver that to no other individual could the interests of that edifice" (i.e., Westminster Abbey) "have been better entrusted. At its completion the antiquary rejoiced and the fears which had been long entertained gave way to feelings of gratification."

Owing to the fact that three generations of the family had the same Christian name, it is not very easy to disentangle their works, but it was probably the first Thomas Gayfere, assisted by his son (Thomas, the Elder), who was the mason for Westminster Bridge, which was opened in 1750.

(Chester's Westminster Abbey Registers; Brayley's Westminster Abbey, Vols. I and II; Authorities cited in text.)

GEERTS, CHARLES, of Louvain
b. 1807, d. 1835

Geert, a Belgian, was responsible for the modelling of the sculpture in the Byzantine Court at the Crystal Palace, where in 1856 an exhibition of sixty of his works was held (Art Journal, 1856, page 376).

He also signs the monument to Harriot Rushout, 1852, at Burford in Shropshire.

GEORGE, GEORGE
fl. 1762–1764

He was "under twenty-two" when in 1762 he gained a premium from the Society of Arts for a "model of ornaments," winning further premiums in the two following years.

George was apprenticed to John Wildsmith (q.v.), but was free by 1764 and working on his own account as an ornamental carver, probably of tablets for chimney-pieces.

(Archives, Society of Arts.)

GERAERTSEN, JAN
fl. 1688–1692

He was an assistant to C. G. Cibber (q.v.), and from 1688 until 1692 was employed at Chatsworth, making figures and statues for the fountains (Francis Thompson's A History of Chatsworth).

GHEYS, JAMES
b. 1749

Gheys was born on 6 August, 1749, the son of a statuary. In the following year his father asked the Barber Surgeons' Company for the skeleton "that used to hang up in the theatre," offering an "ornamental figure in plaster-of-Paris in exchange." A bargain was struck, and the Barber Surgeons received a head of Inigo Jones in return for their skeleton (Archives, Barber Surgeons' Company).

James Gheys attended the Royal Academy Schools in 1773 and in 1775 received a premium of fifteen guineas from the Society of Arts for a model of Lucretia. He exhibited at the Academy, 1774–1778.

The monument to R. Lort, died 1778, at Tenby, Pembrokeshire, is signed "Gheys, Marylebone," and it is, therefore, impossible to say whether the work is by James Gheys or his father.

GIANNELLI, J. B.
fl. 1777–1809

He was chiefly employed in making plaster busts, vases and statues, and in 1777 made a plaster-cast of a dog's head for Lord Shelburne. In the same year he exhibited at the Great Rooms by Exeter Exchange, London, showing figures of "Flora," "Hebe," "Mercury" and "Venus," and busts of King Alfred and Socrates, while his wife contributed "a dish of fruit in coloured wax."

In 1789 Gianneli executed four statues—"Isis, Flora, Antinous and a Discobalon"—for the great hall of Carlton House. Four years later he made vases for Lord Hardwicke, both for Wimpole in Cambridgeshire and for his patron's London house in New Cavendish Street. In 1794 he made a bust for Lord Abercorn at Bentley Priory, and in 1806 one for Lord Bridport. On 14 December, 1841, died Dominico Gianneli, a minor sculptor and perhaps a brother of J. G. Gianneli (q.v.). His daughter Rosa applied to the Artists' General
Benevolent Institution for assistance in the following year.

GIANNELLI, J. G.
fl. 1808–1829

He was the son of J. B. Giannelli (q.v.) and exhibited at the Royal Academy, 1809–1820, showing busts of J. C. Saunders, the oculist (1810); Mr. Baldwin (1812); and Dr. Wachul (1820).

His very fine bronze bust of Professor Porson, executed in 1809, is in the College library at Eton, and in 1814 he made “a very faithful bust” of John Nichols (Gentleman’s Magazine, 1826, Part II, page 502). Another in wax of an unknown man, signed and dated 1829, is in the Victoria and Albert Museum.

GIBBONS, GRINLING
b. 1648, d. 1720

Grinling Gibbons was the son of James Gibbons who was admitted to the freedom of the Drapers’ Company on 12 September, 1638. Grinling was born at Rotterdam in 1648, where his father continued to live until after 1659. James married about 1638–1639 Elizabeth Gorlings, or Gurlings, and it has been suggested that the singular Christian name Grinling is a corruption of his mother’s maiden name. Grinling was admitted by patronage to the Drapers’ Company in 1672. In 1704–1705 he became Renter-Warden, in 1712–1713 Second Master-Warden, and in 1714–1715 First Master-Warden. He stood for the Mastership in 1718, 1719 and 1720, but was not elected. (The Genealogists’ Magazine, Vol. V, 1929–1930, page 322); and Notes and Queries, (Vol. 161, page 56).

According to Vertue (Walpole Society, Vol. I, page 125) he “was born in Holland of English parents and came into England about nineteen years of age.” The young man then went to Yorkshire, where, Vertue continues, “he was first employed and afterwards came to London, settled with his family at Deptford and followed ship-carving. About that time the playhouse in Dorset Gardens, called the Duke’s House, being a-building, Mr. Betterton finding him an ingenious man, employed him to carve for him the ornaments and decorations of that house, particularly the capitals, cornices and eagles, with which Sir Peter Lilly was well pleased and inquiring after the artist that performed them, Mr. Gibbons by his means was recommended to King Charles II, who then had ordered the beautifying of the Palace of Windsor in which work he was employed.”

It is John Evelyn the diarist, however, who is usually given the credit for discovering Gibbons in the cottage at Deptford, which was close to Evelyn’s seat of Sayes Court. On 18 January, 1671, he notes in his diary how he found Gibbons carving in wood a copy of “The Crucifixion” of Tintoretto, which “for curiosity of handling, drawing and studious exactness, I had never before seen in all my travels. I questioned him why he worked in such an obscure and lonesome place: he told me it was that he might apply himself to his profession without interruption.”

Evelyn, who found the young man “very civil, sober and discreet in his discourse,” took his protégé to Whitehall on 1 March to show his carving to the King. His Majesty inspected it and then desired them to take it to the Queen, but they arrived at an unpropitious moment to find her closeted with a French peddling-woman from whom she was buying baubles. The latter, fearful that the sight of the carving might distract attention from her wares, began “to find fault with several things in it which she understood no more than an ass or a monkey,” and the Queen, therefore, refused to buy it. It was later sold for £80 to Sir George Vyner, a goldsmith and son of the Lord Mayor.

Undismayed, Evelyn next recommended Gibbons to Hugh May and Sir Christopher Wren and he was given employment on wood-carving at Windsor, where he made a chimney-piece “representing a festoon of many fishes, shells and other ornaments” (Walpole, Vertue, Vol. I, page 136).

Gibbons’ failure at Court, however, was not permanent, for Charles II, recognizing his genius, appointed him Master Carver in Wood to the Crown, a post he held until the reign of George I. It is, of course, chiefly as a wood-carver that he is remembered today, but this branch of his art is outside the scope of this book. Having once found fame, he proceeded to employ a number of skilled assistants, so that much of the work in wood, marble, stone and brass for which he received the pay, and later the credit, was, in fact, carried out by others. Wood seems to have been his favourite medium, for Vertue (op. cit.) says that “he was neither well-skilled or practised in marble or bronze, for which work he employed the best artists he could procure.”

On 23 March, 1682, Gibbons wrote to John Evelyn asking him to see Sir Joseph Williams again, “you would be pleased to speak to him that hee wold get me to carve his ladies sons house, my Lord Kildare, for I understand it will be very considerable.” Evelyn drafted a letter to Lord Kildare saying that Gibbons was “well known for what he had done at Windsor and other places,
he is the most excellent in his profession not only in England but in the whole world.” In his draft answer to Gibbons Evelyn says: “when we next meet we will consult about the monument to be erected at our church for Sir Richard Browne (Evelyn Archives). The monument referred to, which was a grey-marble tablet with cornice, urn and shield of arms, was erected in St. Nicholas’, Deptford, and it is to be hoped has survived the burning of the church during the Second World War.

In 1692 Gibbons carved a marble chimney-piece for Evelyn’s house at Wotton, receiving £18 (Evelyn Archives).

In 1683 Gibbons (with or without the help of collaborators) made a statue of Charles II for the Royal Exchange. The manuscript diary of Sir Edward Deering, Bart. (in private possession), notes on 11 July of that year that “the Hamburg Company were desirous to express their gratitude to the King and therefore intend to set up a marble statue for him in the midst of the Royal Exchange and this day the King was pleased to see the model of it as it is prepared by Mr. Gibbon, a most famous artist in carving and eminent also for working in marble.” The figure, which was to be 6 ft. 10 in. high, was to stand on a pedestal 8 ft. high, with eight marble steps upon the four faces of the marble pedestal. Ye front is to have the inscription and the other three sides ye arms of England, Scotland and Ireland.”

About two years later the sculptor also supplied statues of Edward VI, Queen Mary, James I and James II for the same building, but these were all damaged or destroyed in the fire of 1838. The figure of the Queen was ordered by the Mercers’ Company, and their Court Book records that Gibbons was to receive £50 for it and “that he is to finish the statue in three months from Thursday, being ye nineteenth of June, 1685” (Company’s Archives).

In 1672 Gibbons was made free of the Drapers’ Company and five years later he moved to Bow Street, Covent Garden. In 1701 the house collapsed, although no one was hurt, and it was in the new building erected on the same site that he died on 3 August, 1720. A week later he was buried in St. Paul’s, Covent Garden.

As far as I know he only signs one monument, that of Robert Cotton, 1697, at Conington, Cambridgeshire, though an inscription on the base of Miss Beaufoy’s monument, dated 1705, in Westminster Abbey, states that the work is by “Mr. Gibbons.” However, a number of bills or contracts survive relating to other monuments, and particulars of four of these are given below.

In the Coventry archives at Croome Court is the indenture, dated 30 April, 1690, between Gibbons and Margaret, Lady Coventry, for the tomb of her husband, John, Lord Coventry. This was to be made of the “best and purest white Italian marble” and was to consist of “three statues as big as life,” the central one to be “the semblance and perfect figure of Lord Coventry in all his Baron’s robes lying upon a tomb properly adorned, with his coronet tumbled at his feet, his right hand outstretched to catch at a starry crown presented towards him by the statue of Faith.” It was to be finished in a year and “the name of the said Grinling Gibbons to be engraved in some prominent place as the artificer of the said monument.” The sculptor entered into a bond of £500, though the monument was only to cost £215. On signing the indenture he was paid £107 10s. by Lady Coventry and in the end received a total sum of £322.

The appearance of Lord Coventry’s monument today would hardly meet with the approval of his widow or “the said Grinling Gibbons.” When the church at Croome D’Abbot, Worcestershire, was rebuilt the “starry crown presented towards him by the statue of Faith” disappeared altogether, while his own coronet, instead of being allowed to remain “tumbled at his feet,” was perched on his head in a most ludicrous way, for it was far too small to fit. Thus later restorers have not only turned a dramatic design into bathos, but have also provided a weapon for the detractors of English seventeenth-century sculpture.

One item in the contract was apparently omitted, for a careful search has failed to reveal the name of the sculptor engraved in any place, “prominent” or otherwise.

The contract between Sir Richard Newdigate and Gibbons, dated 22 July, 1693, is preserved in the family archives and is for a monument costing £10 to the memory of Henry Newdigate who had died more than seventy years before. The work, “5 ft. high and 3 ft. broad,” was to be erected in Ashtead Church, Surrey. Gibbons was also responsible for the memorial to Lady Newdigate, 1693, in Harefield Church, Middlesex, and his receipt for £170 and a letter he wrote to Sir Richard on the subject are still extant. The latter runs as follows: “I omly thanke you for your great faver and extromey pouallity I receiff the £50 wic I shall alwaeas akonilas as a pertickler faver. As for the grait I will not implie the Smich tii I hear your comands. I shoold thinck thiat it shoeld be of it self and goe round the monemint but howsoever I will send to my man hoe is not kom hoe to a gost akouft off both the monemints.” At the end of it the writer’s “wifhe beeg her sarvis to the Ladie and youer honred sealf.”
It must have been open to question whether Gibbons's correspondents understood him, for his spelling is atrocious, even by seventeenth-century standards. A possible reason for this may be the fact that he spent his early life in Holland and probably spoke and wrote Dutch more easily than English.

In the Fitzwilliam Museum is his drawing for a monument showing two linked cartouche tablets and endorsed "15th January, 1696 agreed for Monument in St. Paul's." On the back of the drawing is the name of Doctor Holder, for whom the monument was intended.

In 1717 he executed the monument of the Duke of Chandos and his wives for St. Lawrence, Whitechurch, Middlesex, a work often wrongly attributed to Andrew Carpenter (q.v.). Apparently the Duke thought the price was too heavy, for he wrote to Gibbons on 10 January, 1718, as follows: "Sir, I have ye favour of yours, and must own I think ye monument and statues to be excessive high, however Since you Say, you have never yet in any dealings you have had had any abatement made in your prices, I have directed Mr. Zollicofre to pay ye £350 remainder of ye bill. You'll forgive me if I can't but add that I believe there never was so much reason from ye workmanship to allow of an abatement in this case, from ye judgment of everyone who has seen ye figures." (Huntington Library, California, St. 57. Vol. 15, page 103).

In 1705–1706 he was paid £35 "for carving" by the third Earl of Carlisle. This was presumably for work at Castle Howard, and there was always a family tradition that the carving above the chimney-piece in a room west of the saloon (destroyed in the 1940 fire) was the work of Gibbons (Castle Howard Archives).

(D.N.B.; Allan Cunningham's Lives of the Painters; H. Avery Tipping's Grinling Gibbons; Notes and Queries, Fourth Series, Vols. III and IV; Archives, Christ's Hospital and St. Thomas's Hospital; Vice-Chancellor's Accounts, University of Cambridge; authorities cited in text.)

GIBBONS, JOHN, of Bristol

In 1743 he was working at Bristol Exchange, where he carved "two coats of arms" and "two Venetian window pedestals" (Bristol Archives, Exchange Building-Accounts).

GIBBS, SAMUEL, of Axminster

Firm fl. 1773–1821

His work is well above the average of the contemporary small-town statuary of the period.

He signs monuments and tablets in Dorset to Robert Coade, 1773, at Lyme Regis; to William Drake, 1775, Jane Steer, 1779, and John Ellard, 1816, all at Axminster; to Benjamin Studley, 1775, at Broad Windsor; to the Rev. Maurice Hopkins, 1819, at Stoke Abbott; and to Elizabeth Cozens, 1821, in St. Peter’s, Dorchester. In Somerset monuments by Gibbs include those to Christopher Jolliffe, 1799, at Kingsdown; and to Samuel Sparks, 1813, at Crewkerne.

GIBBS, W., of Basingstoke

fl. 1803–1842

His best work is the monument of Sarah Debarb, at Hurstbourne-Tarrant, Hants, which has a well-carved relief. Other monuments and tablets signed by him include those to Peter Waldo, 1803, at Worting, Hants; Thomas Mathew, 1814, at Upton Grey, Hants; Lady Ashley, 1824, at Eversley, Wilts; and John Ker, 1842, at Weyhill, Hants.

GIBSON, BENJAMIN

b. 1811, d. 1851

Youngest brother of John Gibson (q.v.), he was born in Liverpool in 1811. In 1837 he joined his brother in Rome, sending from there to the Liverpool Exhibition in 1840 a "Psyche borne off by the Zephyrs" (a copy of a work by his brother), and an original composition entitled "Shepherd Boy and Dog" (Gentleman’s Magazine, 1840, Part I, page 404). In 1848 he carved a "Bacchante Listening to Pan" for Mr. Lousanda; "Cupid Disguised as a Shepherd Boy"; "Innocence," for a Mr. W. Jackson, of Birkenhead; and a bas-relief of "A Wounded Amazon" (another copy of a work by his brother) for Mrs. Huskisson (Art Union, 1848, page 50).

Benjamin Gibson died at the Baths of Lucca on 13 August, 1851, and was buried in the Protestant Cemetery there. The monument over his grave is the work of his brother John, with whom he spent all the time he was in Italy, "assisting him in his professional engagements and contributing to his domestic circle an unvarying amiability of disposition and cheering and pleasing manners" (Gentleman’s Magazine, 1851, Part II, page 522).

He also wrote a number of articles on Italian antiquities for the Gentleman’s Magazine and for the Society of Antiquaries. His remarks on the Lycian Marbles were published by Sir Charles Fellows.

Gibson signs a few monuments, including those to Mrs. Clough, 1826, at Mold, Flint; to John Hodson, 1827, Standish, Lancs; and to Major Hilton, 1829, in Chester Cathedral. According to the Gentleman’s Magazine (1829, Part II, page 652), he was also responsible for the tablet to Matthew Gregson, 1829, in St. John’s, Liverpool.

(Authorities mentioned in text.)
GIBSON, JOHN, R.A.
b. 1790, d. 1866

Gibson was born near Conway, the son of a market-gardener, but his parents moved to Liverpool when he was nine years old and, when he was fourteen, apprenticed him to a firm of cabinet-makers. A year later the boy met F. A. Legé (q.v.), who was then working for Messrs. Francées (q.v.), the Liverpool statuaries. Legé had made a head of "Bacchus" which Gibson proceeded to copy, and he also carved a small marble head of "Mercury." These works so impressed Messrs. Francées that they offered to pay his employer £70 to cancel his indentures, and, after considerable difficulty, it was arranged that Gibson should become their apprentice. He soon attracted the attention of William Roscoe, of Liverpool, for whom he carved a bas-relief for a chimney-piece, but his first important independent work was the monument to Henry Blandell. This was erected in Selton Church, Lancashire, in 1813, and though signed by Gibson's firm was entirely executed by himself (Gregson Fragments of Lancashire, page 224).

In 1816 Gibson had work accepted by the Royal Academy, and in the following year went to London with introductions to Lord Brougham and to Christie, the well-known auctioneer. The latter introduced him to Mr. Watson Taylor, who commissioned, not only a bust of Roscoe, but also those of himself, his wife and all his children down to the baby, "a little thing of no shape at all." Four of these were included in the Erlestoke Park sale of 1832.

At the sale of Nollekens's effects held by Mr. Christie on 23 July, 1823, one of the lots was "Theseus & Centaur, modelled by Mr. Gibson in Mr. Nollekens's studio" (Archives, Messrs. Christie). This would seem to show that Gibson may have had some training under Nollekens.

Gibson, however, had set his heart on going to Italy, even "if he went there on foot," and on 20 October, 1817, he at last arrived in Rome. Here he was received with great kindness by Canova, who gave him instruction in his own studio and in the Academy of St. Luke, while he also received assistance from Thorwaldsen, who was living in Rome at that time. The young sculptor's first original work was a life-size figure of a "Sleeping Shepherd," and his first patron the Duke of Devonshire, for whom he carved "Mars and Cupid"; another early patron was the King of Bavaria. About 1822 Sir George Beaumont wrote to Sir Francis Chantrey (q.v.) from Rome that he had "given a commission to Gibson, he seems to me to have great merit and his composition will,

I think, please you. He is modest and assiduous with much taste," the writer added, "and I think will do England great credit" (Builder, 1866, page 77).

Gibson was now on the road to success and was urged by his friends to return to London, where they felt he would make more money. This, however, he steadfastly refused to do, for, as he wrote in a letter, "I thank God for every morning that opens my eyes in Rome." In 1833 he was elected an Associate and, five years later, a full member of the Royal Academy; he exhibited there from 1816 until 1864.

It was not until 1844 that he at last revisited England, for he had been commanded by Queen Victoria to execute a statue of herself. It was on this statue that he introduced the touches of colour of which he was so fond, and which he claimed had been the practice of the Greeks. In a letter written in 1846 he told a correspondent that "my eyes have now become so depraved and I cannot bear to see a statue without colour." Most art critics regarded such a departure with considerable suspicion, although the Roman Advertiser (July, 1847) did admit that "the application of colour is so delicate, the tone so subdued, that no effect of glaring contrast is produced, and the pale purity of the marble does not as a whole suffer from the partial tinting." Apparently Gibson's experiment with the Queen's statue was not his first effort in this direction, for as early as 1839 the Art Union (page 106) reported that he had gilded the narrow band on the head of the central figure in his group "Psyche Borne on the Shoulders of Two Youths," which had been commissioned by Prince Torlonia. This unorthodox proceeding deeply shocked the editor, who could "scarcely conceive it to be other than a dangerous departure from true art."

Gibson was living in Rome during the political troubles of 1847-1849, though he and his brother Benjamin (q.v.) did move for a short time to Lucca. In 1850 he again returned to England in order to model another statue of the Queen, this time for the Houses of Parliament, and took five years to complete the work. It was during this period that he began for Mr. Preston the celebrated statue known as "The Tinted Venus." The sculptor himself described it as "the most carefully laboured work I ever executed . . . I tinted the flesh like warm ivory scarcely red, the eyes blue, the hair blonde, and the net which contains the hair golden."

After this Gibson never revisited England, and he died in Rome on 27 January, 1866. He was buried in the English cemetery there, while French soldiers fired a volley over his grave, in recognition
of the fact that he had been granted the Legion of Honour. His friend, Lord Lytton, who composed the inscription on his tomb, had some years previously paid another tribute in the dedication of his book, *Zanoni*, when he alluded to Gibson as "the man whose noble ambition has never been deaved by the appetite for wealth or the appetite for praise; the sculptor whose love of Grecian art has never betrayed him into servility or plagiarism."

Gibson's life was one of great happiness, simplicity and purity; as he said of himself: "I worked on all my days happily and with ever new pleasure, avoiding evil and with a calm soul; making images, not for worship, but for the love of the beautiful." With his mind set entirely on his art, he was as guileless as a child and quite as helpless. He could not travel alone, for he not only lost his luggage and his ticket, but even forgot his destination and had a habit of alighting at the wrong station. "Pray, Sir, are you a foreigner?" a porter asked him on one occasion. "No," answered Gibson, "I am not a foreigner, I am a sculptor." As his pupil, the American sculptor, Miss Hosmer, succinctly remarked: "He is a god in his studio, but God help him out of it." In middle age he was "of prepossessing appearance, with greyish hair and a peculiarly grave, immovable expression of countenance," according to a visitor who saw him in 1854.

In his will Gibson left the bulk of his fortune of £32,000 and the contents of his studio to the Royal Academy, including marble statues or groups of "The Wounded Warrior," "Hebe," "Bacchus," "Narcissus" and "Venus." In the list of his works sold at Christie's, which is given below, the name of the sald, and in some cases the amount, have been added in brackets:

"The Hunter and the Wounded Fawn," 27 March, 1863 (Lord Herbert of Lea); "Bust of Helen," 1875 (H. de Burgh); "Wounded Amazon," 7 July, 1875 (Anonymous, 300 guineas); "Shepherd and Dog," 2 March, 1878 (Miss Webb, £65); "Venus," 20 March, 1880 (H. Roe, 280 guineas); "The Hunter," 29 May, 1880 (George Moore, £246); "The Tinted Venus," 28 July, 1890 (Walter Long, £1,837); and "Venus and Apple," 22 July, 1893 (R. G. Naylor, £918). At the sale of the Peel heirlooms held by Messrs. Robinson and Fisher on 10 May, 1900, Gibson's "Shepherd Boy" fetched 160 guineas.

**GIBSON, SOLOMON, of Liverpool**

* Born c. 1796, d. 1866

He was the younger brother of John Gibson (q.v.), and at the age of sixteen modelled a figure of "Mercury," his best-known work. Of this he made a number of replicas, including one which he presented to Sir Thomas Lawrence, who sent him a £10 note as "an encouragement."

Gibson exhibited at the Royal Academy in 1816 and 1822, while at the Liverpool Academy he showed in 1812 "Cupid and Psyche" and...
"Venus Lamenting the Death of Adonis," and busts of Miss Traill and Dr. T. S. Traill in 1822 and 1824 respectively. His marble bust of Mr. Rosson dates from 1822. He died in Paris on 29 January, 1866, two days after his brother John. He had heard of the latter's illness and had set out to join him in Rome, but never reached his destination.

Gibson signs a few monuments, including those to Pudsey Dawson, 1817, in St. George's, Liverpool; the Rev. Hope Eyton, 1824, at Mold, Flint; Scrope Colquitt, 1825, at Childwall, Lancs; John Hughes, 1830, at Llanfair, Denbigh; and Dr. John Davies, 1844, at Mallwyd, Montgomery. In St. Michael's Church, Charleston, South Carolina, U.S.A., is his tablet to General Charles Pinckney, 1825, and he also signs four others (with very inferior lettering) in Dudleyton Church, Salop. These are to Charles Morral, 1822; Mrs. Edwardes, 1825; William Challnor, 1825; and Mary Hilton, 1826.

As an architect he produced a plan for the restoration of Trajan's Forum when he was in Rome in 1829. This, the Literary Gazette (1829, page 649) considered, showed "great research and knowledge," but was "very defective in drawing and perspective."

In addition to his artistic work Gibson was also a classical scholar and had a good knowledge of ancient Welsh literature, a subject on which he wrote many papers. In spite of all these activities there was an "absence of purpose in the direction of his studies," and "he passed through life a strange and useless, though not a commonplace, man," according to the Dictionary of National Biography. His brother John supported him for many years and bought him an annuity of £100, which was probably the reason why he left him practically nothing in his will.

**GILBERT, JOHN, of Cambridge**

*fl.* 1824-1830.

His signed tablets are commonplace and include those to Mary Hurrell, 1824, at Newton, Camb; Josiah Neale, 1826, in St. Clement's, Cambridge; and the Rev. Thomas Kerrich, 1828, at Dersingham, Norfolk.

**GILBERT, JOHN, of Stamford**

*fl.* 1812-1837

There is, for some reason, no mention in the Stamford "Hall Books" of his ever having become a Freeman of the town. He was succeeded in the business by his son, Henry Gilbert, who carved the later tablets, but neither of them produced any outstanding work.

Tablets executed by the firm include those to Sally Mounsay, 1812, at Greystock, Cumberland; Mary Graham, 1816, at Belton, Rutland; John Bailey, 1822, at Thorney, Cambs; Susanna Pailli, 1822, at Yaxley, Hunts; Mrs. Bonney, 1824, at King'scliffe, Northants; William Belgrave, 1824, at Preston, Rutland; the Rev. Stephen Wright, 1824, at Castor, Northants; the Rev. Richard Lucas, 1827, at Great Casterton, Rutland; and Joseph Phillips, 1837, in St. Martin's Church, Stamford.

**GILES, —, of Wakefield**

He signs a classical wall-tablet to Samuel Haxley, 1834, at Brotherton, Yorks.

**GILL, JOHN, of London**

*fl.* 1808-1812

In 1808 he received £113 for marble chimney-pieces for the Bank of England (Soane Notebooks), and three years later was one of the principal masons for building Mr. Coutts's house in Stratton Street, Piccadilly (Archives, Coutts Bank).

**GILLIAM, JOHN**

*fl.* 1776-1798

As the junior partner of John Deval the Younger (q.v.) he was employed on building work at Somerset House between 1776 and 1795, though for the last year of that period he was in partnership with Thomas Wood (q.v.), Deval having died in 1794. Gilliam also worked on his own account for the same building, carving "three ox-skulls and drapery to the back of the keystones to the arches in the vestibule," while in 1777 he received £55 for "rich shells" above the windows of the principal floor. For the interior he supplied chimney-pieces in 1780 and again six years later (Shide Ledger, R.I.B.A. Library).

In 1782 he was the master-mason responsible for building the Fleet Prison, where he received a total sum of £2,211 (P.R.O., A.O.1/2495).

There were a number of other masons of this name, including some in Lincolnshire. A William Gilliam, of Welburn in that county, was apprenticed in 1718 to his father, Thomas Gilliam, mason. There was also a Joseph Gilliam, assistant to William Atkins (q.v.), who was sent down to Ashburnham Place, Sussex, in 1761 to set up a chimney-piece made by his master (Ashburnham Archives).

**GILLINGHAM, JAMES, of Winchester**

*fl.* 1814-1838

He signs tablets in Hampshire to Chaloner Ogle,
1814, in Winchester Cathedral; to John Terry, 1835, at Dummer; and to Sarah Wickham, 1838, at Wonston.

**GINN, JOHN**  
b. 1813

In 1830 he attended the Royal Academy Schools, to which he had been recommended by John Constable, R.A., and in the same year won the large Silver Medal from the Society of Arts for a model of a bust.

Ginn exhibited at the Academy in 1832 and 1833, showing “Psyche Borne by Zephyrs,” a bust, and a group of “Adam and Eve.” He showed a bust of Lord Brougham at the Suffolk Street Galleries in 1833.

**GOBLÉT, LEWIS ALEXANDER**  
b. 1764

He attended the Royal Academy Schools in 1792 and, after winning a Silver Medal two years later, became assistant to Nollekens (q.v.). He ultimately became the sculptor’s principal carver, though his master paid him only £24 for each bust he executed. He was also responsible for the figures on the monument to Mr. Coke and for the statue of “Religion” on the tomb of Mrs. Howard.

Goblet, who was present at his master’s deathbed, received under the latter’s will the working tools and all the marble in the sculptor’s yard, while his children, Henry and Louisa, were bequeathed £100 and £30 respectively. He seems at one time to have had a studio of his own, for his address is given as “20, Upper Marylebone Street” in the London Directory of 1809.

Goblet exhibited at the Royal Academy, 1799–1822, showing busts of Lord Nelson (1808), Madame Catalini (1808), Henry Goblet (1811), Nollekens (1816), the Duke of Norfolk (1817), the Rt. Hon. Mr. Ponsonby (1818), and Mr. Lonsdale, R.A. (1818). His bust of Dr. Burney, dated 1818, is in Westminster Abbey.

Monuments signed by Goblet commemorate the Rev. John Boucher, 1804, at Epsom, Surrey; and Dr. Charles Burney, 1818, in St. Paul’s, Deptford.

At the sale of Nollekens’s effects which was held by Mr. Christie on 3 July, 1823, the following works by Goblet were sold: “A Fawn,” a bust of Mr. Nollekens and a relief of “Joseph & Potiphar’s Wife.” (Archives, Messrs. Christie.)

(J. T. Smith, *Nollekens and His Times.*)

**GOODDARD, JAMES,**  
of King’s Lynn  
d. 1823

He signs a number of tablets in Norfolk, including those to Elizabeth Postlethwaite, 1794, at Dersingham; and to the Rev. William Atkinson, 1822, at Hillington.

**GOODFREY, WILLIAM,**  
of Abingdon  
f. 1811–1843

Probably son or grandson of William Godfrey, of Abingdon, who was apprenticed to Gilbert Burgess, of Oxford, and became a Freeman of that city in 1756. The younger Godfrey signs a number of tablets in Berkshire, including those to Mary Anthony, 1800, and Robert Sellwood, 1801, both at Appleton; Bernard Bedwell, 1811, Thomas Lintall, 1820, and Charles King, 1842, all in St. Helen’s, Abingdon; and Thomas Humfrey, 1836, at Blewberry.

**GOLDEN, JOHN,** of Holborn  
f. 1781–1808

His monuments are carried out in coloured marbles and frequently have charming “Adam” details. His yard was in Upper North Place, Gray’s Inn Road. Monuments and tablets signed by him include those to John Williamson, 1781, at Finningham, Suffolk; Henry Doughty, 1781, at Mapledurham, Oxon; John Badcock, 1784, at Paul, Cornwall; John Bates, 1785, at Beaconsfield, Bucks; John Carpenter, 1790, at Watford, Herts; Dorothy Filmer, 1793, at East Sutton, Kent; and Joseph Brooke, 1796, at Southfleet, Kent. In 1781 he carried out repairs to Mr. Wood’s house in Red Lion Square (Archives, Lord Brownlow).

**GOODLIFF, —,**  
A local statuary, he signs a wall-tablet to Francis Pochin, 1806, at Morcott, Rutland.

**GOODWIN, ROBERT,**  
of Stamford  
He signs a tablet to Samuel Allen, 1796, in St. John’s, Stamford, while his son, Robert Goodwin the Younger, signs one to William Pears, 1823, at Barnack, Northants.

Another member of this family of masons was James Goodwin, who died in 1803 at the age of forty-five.

**GOOLD, —,** of Swindon  
He signs a wall-tablet to Walter Brind, 1816, at Liddington, Wiltshire.

**GOSSET, ISAAC**  
b. 1713, d. 1799

Gosset, who was one of the best of the eighteenth-century wax-modellers, belonged to a family
which had fled from Normandy to Jersey at the
time of the revocation of the Edict of Nantes and
had later settled in London. He invented a com-
position of wax, and in this, according to his
obituary in the Gentleman's Magazine (1799, page
1,088), "he modelled portraits in the most
exquisite manner." "He was one of those ingenious
men," the article later declares, "so rarely met
with, who are at the same time equally amiable
and inoffensive. In the line of his art he may be
said to have been unique, as the inventor of the
inimitable materials with which he worked, and
of which the secret is in the possession of his son,
the learned and reverend Isaac Gosset, D.D.""

Gosset exhibited at the Society of Artists and
at the Free Society, 1760–1778. During his long
life he modelled likenesses of most of the famous
people of his time, his list of sitters including
George III; Queen Charlotte; Lord Thurlow;
the Duke of York; Lord North; Gideon Gosset;
Dr. Harris; David Garrick; General Wolfe; the
Duke of Sussex; the Prince Regent; Henry
Pelham; George Grenville; the Duke of Grafton;
Lord Bathurst; Louth, Bishop of London; Lord
Mynard; Trevor, Bishop of Durham; Francis
Hutcheson; the Earl of Mansfield; Mrs. Delany;
George Selwyn; General Conway; Thomas
Townshend; Lord Camden, and Sir Jeffery
Amherst.

There is a collection of his works in the small
drawing-room at Stourhead, Wiltshire, where
they have remained since they were purchased
by Henry Hoare between 1753 and 1755. At this
period Gosset does not seem to have been well
paid, for the Stourhead portraits only average £1
each (Stourhead Archives). He also worked for
Wedgwood, modelling for him likenesses of
George I, George II, William, Duke of Cumber-
land and Henry Dundas.

Horace Walpole had at Strawberry Hill
Gosset's portraits of Hoadley, Bishop of Win-
chester; Frederick, Prince of Wales; Lady Mary
Coke; and Charles Townshend, the last-named
being now in the National Portrait Gallery. In
the Newdigate Archives is the artist's bill for ten
guineas for wax portraits of Miss Conyers and
Miss Palmer, both executed in 1763. Four years
later Trevor, Bishop of Durham, paid him
£1 11s. 6d. for a portrait of the Duke of Newcastle
(Archives, Brand of Glynde). Gosset's portrait of
the Fourth Earl of Bristol is at Ickworth Park,
Suffolk.

Works by Gosset which are still extant include a
set of Roman Emperors in the possession of his
direct descendants; a portrait of General Maclean,
dated 1779, at Buxted Park, Sussex; and others
of Earl Granville and the Countess of Shelburne
at Bowood. At Hartlebury Castle, the palace of
the Bishop of Worcester, are those of Charles
Yorke, Prince Octavius, Bishop Hurd (dated
1778), Fisher Littleton, Lord Mansfield and Ralph
Allen.

His finest works, however, are in the library at
Windsor Castle, and include wax portraits of
George I; George, Prince of Wales; Ferdinand,
Duke of Brunswick; Edward, Duke of York; and
Frederick, Prince of Wales, and his wife, Princess
Augusta of Saxe-Gotha. Other likenesses of the
Royal Family, including George I; George II;
Queen Caroline; Frederick, Prince of Wales;
Princess Augusta, and the Duke of Cumberland,
are in the Schreiber Collection at the Victoria
and Albert Museum. At the National Portrait Gallery,
besides the portrait of Charles Townshend already
mentioned, there is another of Henry Seymour
Conway by the same artist.

(D.N.B.; Notes and Queries, Third Series, Vol.
VI, page 516; Strawberry Hill Sale Catalogue,
1842; information from Messrs. Wedgwood.)

GOSSET, MATTHEW
b. 1683, d. 1744

Uncle of Isaac Gosset, he was French by birth
but was naturalized after his family had fled from
Normandy. He was later one of the Gentlemen
of the Board of Pensioners of George II and, in 1728,
was elected a member of the Spalding Society.

Gosset, who made a number of wax portraits,
was also a statuary with a yard at St. Anne's,
Westminster, and here in 1714 he took as an
apprentice "Rodney, son of Joseph Stone" (P.R.O.,
I.R.1/3).

He died in 1744 and was buried at St. Maryle-
bone, where his marble monument bore "speci-
ments of his work," according to his epitaph,
which alludes to him as a "statuary," and also
adds "that he was well known for his superior
skill in the polite arts."

(Nichols's Literary Anecdotes, Vol. VI, page 83.)

GOTT, JOSEPH
b. 1786, d. 1860

He was born at Calverley, near Leeds, and
worked in John Flaxman's (q.v.) studio as an
apprentice for two or three years (British Museum,
Ad. MS. 39,784). In 1805 he joined the Royal
Academy Schools, where he won a Silver Medal in
1806 and the Gold Medal in 1807. In the following
year he was awarded the Greater Silver Palette by
the Society of Arts for an original plaster-cast of
"Samson," while in 1819 he received a second
Gold Medal from the Academy for his "Jacob
Wrestling with the Angel."
JOHN HUNT
Cilena l'Anson Bradley, 1726, Long Buckby, Northants.

RICHARD HAYWARD
Lord Botetourt, 1773, Williamsburg, Virginia, U.S.A.
PLATE XII

PETER HOLLINS
Mrs. Thompson, 1836, Malvern Priory.
One of Gott's patrons was Sir Thomas Lawrence, in whose sales on 17 June and on 7 July, 1830, were included the sculptor's models of a "Sleeping Venus," of a "Group of Four Figures, a Man, a Woman, and two Infants" and of "A Female at the Bath." Another was Benjamin Gott, of Armley House, Leeds, and it was he who sent Gott to Rome in 1824. Here the latter lived until his death, executing a number of works for Armley House and also a recumbent figure for the tomb of his benefactor, to whom, curiously enough, he was in no way related. In 1824 he also sent a group in plaster to the Academy, as he wished "to be considered for the vacant appointment of travelling student" (Royal Academy Archives).

Gott died in Rome in January, 1860, and was buried in the Protestant Cemetery. He exhibited at the Royal Academy, 1820–1848, and at the British Institution, 1821–1822, while he showed "Ruth Gleaning" at the Paris Exhibition of 1855. His group entitled "The Dying Spartacus" is in the Soane Museum, and in the Leeds Art Gallery are his busts of John Barran, Lord Airedale, and Mrs. Egerton, together with a seated statue of George Banks. His "Ragazzzo" fetched £129 at the Scholten sale held at Christie's on 25 April, 1885.

His monuments are nearly all fine, the best being one in memory of Thomas Lloyd, 1828, in Leeds Parish Church, which has a portrait-bust and an inscription-tablet flanked by two beautifully cut figures of officers in full regiments. The most surprising commemorates Colonel Edward Cheney of the Scots Greys, in Gaddesby Church, Leicestershire, and shows him (almost life-size) at the supreme hour of his life, when "four horses were killed under him and a fifth wounded and the command of the Regiment devolved upon him" at the Battle of Waterloo. The sculptor has chosen to portray the moment when the Colonel's horse (presumably his fifth) sinks beneath him with a bullet-wound in its throat, a disaster which does not appear to perturb him unduly, save that he has lost his shako, which lies with a broken strap among the down-trodden corn into which horse and rider are floundering. On the pedestal of the monument is a relief showing the Colonel defending the regimental colours, which a French officer is trying to seize.

The whole work gives the impression of being correct in every detail, and one feels that the Colonel himself must have directed every stroke of the chisel. The result is interesting from a documentary point of view, although artistically it leaves much to be desired. Nevertheless it has the almost fatal attraction which a second-class work sometimes exercises on the beholder, though he is forced to admit later that the whole effect was faintly comic.

(Taylor's Worthies of Leeds; various Sale Catalogues.)

</table>
On this occasion the Council gave him ten guineas, but when Grant wrote to them again later in the same year “stating his wretched situation,” they accompanied another donation of the same amount with a letter saying that he “was not to expect any relief in the future.”

This display of firmness seems to have made no impression, for Grant petitioned twice for help in 1809 and each time the Academy relented and gave him ten guineas.

GRAVENOR, or GRAVENER, JAMES

In 1763 he made the model of “four medallions” for the exterior of Kedleston. In the same year there is a payment of £54 to Joseph Hall of Derby (q.v.) for “carving two medallions” for the outside of the house, and this may refer to Gravenor’s work. It seems hardly likely that he could have modelled the great circular plaques on the exterior of the main front (which in any case were executed by William Collins, q.v.).

Gravenor was also paid £16 for “altering” four alabaster capitals and £5 9s. 6d. for “altering” figures in the drawing-room chimney-piece (Curzon Archives).

GRAY, — , of Weymouth

He signs tablet to Priscilla Awdry, 1814, at Wyke Regis, and to Robert Cope, 1818, at Weymouth.

GRAY, WILLIAM

b. 1818

In 1839 he attended the Royal Academy Schools, to which he had been recommended by William Behnes (q.v.), and in 1844 received a Silver Medal for a bust of the Rev. John Williams (“murdered by savages on the island of Acronagas”), which he had exhibited at the Academy three years previously.

Gray showed busts and paintings at the Academy from 1841 until 1857, and at the British Institution in 1848, the busts including those of Sir Robert Peel and Sir Augustus Clifford.

GREEN, — , of Warwick

He signs a tablet to John Knightley, 1814, at Offchurch, Warwick.

GREEN, ALEXANDER

b. c. 1670

He was the son of Richard Green of the County of Oxford, yeoman, and was apprenticed to Peter Powell, of London. In 1691 he became free and
in 1713 was employed with Thomas Davies (q.v.) on the building of Lord Ashburnham's house in St. James's Square (Ashburnham Archives).

**GREEN, HENRY**

Presumably a local mason, he built the very pretty little dovecote at Melbourne Hall, Derbyshire, in 1708 (Archives, Marquess of Lothian). The building has now been adapted as a monument room.

**GREEN, JOHN HIPPISLEY**

b. 1753

He was born on 30 June, 1753, the son of Jane Hippisley, afterwards Mrs. Green, the famous actress, who died in 1791.

Green, who attended the Royal Academy Schools in 1774 and gained a Silver Medal in 1780, was afterwards employed by Nollekens, "being among his best workmen," according to J. T. Smith. He exhibited at the Academy 1775-1820, but ceased to show sculpture after 1793 and confined himself to landscapes. Works in the former class included "Hercules and Omphale," 1775; a medallion of the Rev. J. Wesley, 1791; and "a design for a monument for a late comic actress to be erected in St. Paul's, Covent Garden," 1793 (J. T. Smith, Nollekens and His Times).

**GREEN, THOMAS,**

of Camberwell

b. c. 1659, d. c. 1730

He was bound apprentice to John Fitch in 1673, and later turned over to William Hind, becoming free in 1681. In 1694 he was journeyman to Thomas Cartwright the Elder (q.v.) and later to William Holland, but by 1697 had settled in Camberwell where he worked on his own account.

Camberwell which is one of the outstanding statues of the first quarter of the eighteenth century, and his monument at Redgrave, Suffolk, to Lord Justice Holt (d. 1709), with its seated figure flanked by Justice and Truth, is superb. Equally noble is the standing figure of Judge Powell (d. 1713) in Gloucester Cathedral. Grandiose, but rather overpowering, is his towering monument at Waldershare, Kent, to Sir Henry Furness, which rises like a wedding-cake tier by tier to the very ceiling of the chapel built to contain it. One cannot but have an affection, too, for Green's monument at Denton, Lincs, with its full-length figure of Richard Welby (d. 1704) in the square-cut coat and square-toed shoes of the period, while an unexpected touch is provided by the two cherubs who, flying down, place a heavenly crown on the top of his full-bottomed wig.

Other monuments signed by Green (or given by him to Le Neve for the latter's *Monumenta Anglicana*) include those to William Chew, 1712, at Dunstable, Beds; George Courthope, 1714, at Ticehurst, Sussex; Sir Peter Seaman, 1715 (a half figure), in St. Gregory's, Norwich; Maynard Colchester, 1715, at Westbury, Glos; Thomas Hall, 1715, in St. George's, Colegate, Norwich; and Bishop Cumberland, 1718, in Peterborough Cathedral.

He was also responsible for carving a number of coats of arms on barracks and other Government buildings. In April, 1717, he agreed for £26 to cut the Royal coat of arms on the Royal Foundry at Woolwich and in July of the same year agreed for the Duke of Marlborough's arms on the keystone beneath the King's arms for £7 (P.R.O., W.O. 47/30). The King's arms are still on the front of the foundry.

In the same year he was also responsible for the King's arms on the New Storehouse at Chatham, being paid £18 (P.R.O., op. cit.). There are other payments to Green in this year for work at Chatham and it seems fairly certain that he was responsible for the magnificent Royal Heraldry over the main gate of the dockyard. In November he was ordered to "set up" the Royal arms on St. Martin's Tower of the Tower of London.

In 1718 he was paid £34 for the Royal arms on the New Storehouse at Portsmouth and £50 for the King's Cypher and Crown on keystones which are to "put over the gate at the Gun Wharf" (P.R.O., W.O. 47/31). The storehouse and gate are no longer in existence.

**GREEN, W.**

fl. 1731-1737

He worked in the neighbourhood of Rotherham, Yorkshire, and signs a number of monuments which are usually carried out in stone. The designs are based on London work of the period, with cartouche inscription-tablets, architectural details, mourning cherubs, etc., but the carving is first-rate, far above the level of the ordinary provincial statue, while an unusual touch is also given to each monument by a curious and individual emblem in the centre of the gadrooned base. In the monument to John Spencer, 1732, at Cawthorne, Yorkshire, this takes the form of a skull, with a snake holding an apple in its mouth crawling out of one eye-socket, while a seated cherub with its arm resting on an hour-glass figures on the memorial to Thomas Beaumont, 1731, at Darton, in the same county.

Green only painted his signature on his works, with the result that, in some cases, it has become
so faded as to be almost indecipherable. Other
signed monuments by him in Yorkshire include
those to Richard Green, 1733, and Christiana
Spencer, 1737, both at Cawthorne, and to Lord
Darcy of Navan, 1733, at Gilling, near Richmond.

GREENSHIELDS, JOHN,
of Lanark
b. c. 1792, d. c. 1838

He was a mason by trade, but when he was
about thirty he was employed by Robert Forrest
(q.v.), who was working at that time on a statue of
Melville. This gave Greenshields an interest in
sculpture and he accordingly began to study and
to model in clay, though he had no idea that he
had any talent in this direction. His first work was
a figure of a dog carved in stone, and he also
modelled likenesses in clay of his father and
brother.

He next executed a small stone statue of Lord
Byron, while in 1827 he made a figure of Canning
and followed this with a colossal statue of the Duke
of York in 1828. "It is truly surprising what a
degree of dignity and grace has been given the
figure and how admirably the most minute parts
of the dress and decorations are executed"
(Leighton's Views on the River Clyde, 1830, page 24).
The statue was made for "Mr. Greenwood of
Charing Cross the Army Agent." It was cut "from
a block of freestone belonging to Mr. Lockhart of
Cambusnethan who has kindly permitted Mr.
Greenshields to have another for a statue of His
Majesty" (Naval and Military Magazines, Vol. IV,
page XLIII).

In 1834 Greenshields carved the statue of Prince
Charles Edward for Glenaladale, Inverness, and in
1835 made a figure of Sir Walter Scott for a Mr.
Cadell. His last work was a group of "The Jolly
Beggars," executed in 1836. His small-scale model
for a seated statue of Sir Walter Scott, 1832, is at
Powderham Castle, Devon.
(Authorities cited in text.)

GREENWAY,
BENJAMIN and DANIEL,
of Bath

They were presumably sons of Thomas
Greenway (q.v.), and worked as "marble and fre-
estone masons, carvers and vase-makers" for John
Wood the architect, when he was building the
Bristol Exchange in 1745.

Two years later Daniel Greenway married a Miss
Anne Winslow, of Bath.
(John Wood's A Description of the Exchange at
Bristol, 1745.)

GREENWAY, JOHN, of Bristol
fl. 1800–1833

He signs tablets in Somerset to Copplesstone
Bampfylde (d. 1791), at Kingston; Caleb Pointing,
1828, at Midsummer Norton; and Benjamin Millard,
1833, at Keynsham. His tablet to Samuel Prosset,
1818, is at Mathern, Monmouth.
The name of the firm is given as "John and
Olive Greenway" in a directory of 1830, and it is
the latter who signs a tablet to Elizabeth Palmer,
1830, at Paulton, Somerset.

GREENWAY, THOMAS, of Bath
fl. 1707–1720

John Wood, in his Essay Towards a Description of
Bath (1729, page 424), says that Thomas Greenway,
having built about 1720 in St. John's Court a
house "so profuse in ornament as to tempt the
King to Bath to make part of it his palace, particu-
larly applied himself to small ornaments in fre-
estone, such as crests, vases, fruits, etc., and several
that served their apprenticeship to him pursued
the business till they brought it to such a perfection
as to merit publick encouragement and render
their work a rising branch of the trade of Bath."

Earlier in the book (page 225) he also mentions
that Greenway, acting on the advice of Dr.
Oliver, made "a handsome bath" about 1707 "in
one of the rooms of a house built by him upon the
beach."

GREENWOOD, JOHN

In 1791 he received £116 for chimney-pieces
which he had made for Somerset House (P.R.O.,
A.O.1/2498).

GREGG, SIDNEY, of Ledbury
fl. 1824–1834

He signs tablets to Charlotte Ballard, 1824, and
John Spencer, 1834, both in Ledbury Parish
Church, Herefordshire.

GREY, —, and JOYNES,
of London

The firm's yard was in Park Lane and they sign
a tablet to Hester Manning (d. 1805) at Ormesby
St. Michael, Norfolk.

GRICE, ELIAS

In 1662 he made the octagon font for All Saints',
Derby (Cox's Churches of Derbyshire, Vol. IV, page
95).

GRICE, PHILIP
fl. 1671–1694

In 1671 the Minute-book of Blacknall's Charity
GRIGGS, at Abingdon, Berkshire, records that “Philip Grice should have seven pounds for setting up Mr. Blacknall’s statue, his wife and children, and if he did them well with gilt and good colors to their liking, he was then to have eight pounds.” For some reason, however, the monument was not set up until 1684, and in the same year Grice received £17 11s. from the Charity, perhaps because the work was on a larger scale than had been at first intended.

As Blacknall had died as early as 1625, a Jacobean design was chosen for the monument. He and his wife are shown kneeling en-à-cóis, while the two daughters kneel behind their mother.

GRIGGS, W.
fl. 1830–1840
Griggs, who was an assistant to Sir Richard Westmacott (q.v.), was called as a witness in the case of J. E. Carew (q.v.) v. the Executors of the Earl of Egremont.

He exhibited at the Royal Academy and at the British Institution, 1830–1835, showing a number of ideal works and a medallic portrait of the Hon. Charles FitzRoy. At the Suffolk Street Galleries he showed the figure of “An Archer” in 1835.

GRIMBALSTON, WILLIAM
fl. 1769–1778
He lived at “Silver Street opposite Great Pulteney Street,” and exhibited wax portraits at the Free Society, 1769–1778.

GRIMSLEY, THOMAS,
of London and Oxford
fl. 1827–1847
In 1829 he received £220 for “six sculptured vases” which he had executed for Buckingham Palace (P.R.O., Works 19/3). At Westminster Hall in 1844 he showed a figure of Cardinal Wolsey, which the Literary Gazette considered gave “more idea of the butcher’s son than of the great Cardinal,” and in the same year made for Oxford Town Hall a statue of Alderman Rowney, carved from a block of Caen stone weighing more than three tons (Gentleman’s Magazine, 1844, page 630).

Grimsley exhibited at the Royal Academy, 1827–1840, showing a number of works, including a bust of George IV in 1831. His bust of the Duke of Wellington, executed in the previous year, is at Stratfield Saye, while another of Christopher Codrington, dated 1843, is at Codrington College, Barbados.

He signs tablets to Viscountess Valentia, 1843, and the Rev. Robert Brown, 1847, both at Bletchington, Oxon.

GRINDROD, TIMOTHY,
of Liverpool
d. 1817
He originally came from Rochdale, but was in partnership with W. Hetherington (q.v.) at Liverpool when he built the New Exchange there in 1803. He also signs tablets with good details to John Cooper, 1797, and John Bankes, 1817, both at Runcorn, Cheshire.

Grindrod died himself in 1817. His widow, who only survived until the following year, is buried in the churchyard of St. Nicholas, Liverpool, while their son, Robert, who acted as his father’s assistant, died in 1820, aged about thirty-two (Liverpool City Archives).

GROVES, W.
b. 1809
He first exhibited at the Royal Academy in 1834, when he showed a statue of “Psyche,” “full of lively and appropriate expression,” according to the Literary Gazette, and three years later joined the Academy Schools on the recommendation of J. T. Smith.

Groves continued to exhibit at Burlington House until 1861, showing a bust of Charlotte Gaskell in 1857. His bust of John Abernethy is in St. Bartholomew’s Hospital.

He also signs a few tablets, including those to Samuel White, 1840, in Hampstead Parish Church; Hannah Cooper, 1843, in St. Michael’s, Cornhill; and Lieutenant Thomas Cubitt, 1848, at Catfield, Norfolk. In 1842 he sent to the Academy monuments which were to be erected at “St. Benet Finck, London,” and “Shouldham Church, Norfolk.”

GRUBB, EDWARD,
of Birmingham
b. 1740, d. 1816
He is said to have been born at Towcester, but early in life he moved to Stratford-on-Avon with his two brothers, one, Samuel, a stone-mason and carver, the other a tailor. Although Grubb himself trained, and later worked, as a stone-carver and statuary, he afterwards turned to portrait-painting, “and his numerous paintings on canvas, however coarse in execution, show his success in delineating the human face” (Warwickshire Worthies, page 303).

Before 1769 he left Stratford-on-Avon for Birmingham, where he rented from the Corporation a house near the top of Henley Street. In the same year he, and his brother Samuel, carved figures of a boy and girl for the front of the Birmingham Bluecoat School, taking “likenesses of
two children then residing in the establishment.” When the school moved to Harborne Hill in 1932 replicas of these statues were made for the exterior of the building, while the originals—“no despicable memorial of his ability”—were erected inside (op. cit.).

Grubb died at Stratford-on-Avon on 8 April, 1816 (Gentleman’s Magazine, 1816, Part I, page 475), his son George, who was also a portrait-painter, having predeceased him.

He signs a few monuments, those in Warwickshire commemorating the Earl of Carhampton, 1788, at Kingsbury; William Ash, 1789, and the Rev. Richard Riland, 1790, both at Sutton Coldfield; and Peter Judd, 1796, at Stratford-on-Avon. In Oxfordshire is his monument to Edward Taylor, 1797, at Steeple Aston.

GRUMBOLD, ROBERT,
of Cambridge
b. 1638, d. 1720

Grumbold, whom Nicholas Hawksmoore refers to as “our honest and skilful artificer” (Wren Society, Vol. XIX, page 105), was the master-mason responsible for a great deal of building at Cambridge during his long life. His works included, for Trinity College, the Library in 1676, and the repair of the great fountain, while at Clare Hall he built the New Hall in 1684, and at St. John’s College the bridge between 1696 and 1698 (Willis and Clarke’s Architectural History of Cambridge).

In 1687 and 1688 Grumbold was working for the Earl of Elgin at Houghton House, Ampthill, where he made chimney-pieces and a door-case for the great hall (Archives, Marquess of Ailesbury). Three years later he was at West Park, Bedfordshire, building the garden terrace with the stairs, coping, etc. In 1694 he received £69 for “a pair of stone peers with Wyverns on them,” and in 1695 made two fountains for the garden, for which he was paid £86 (Account-book of the tenth Earl of Kent; Archives, Lady Lucas and Dingwall).

Another member of the same family was John Grumbold who rebuilt the north aisle of Ely Cathedral between 1700 and 1702 (Wren Society, Vol. XIX, page 148).

GRUNDY, THOMAS
d. 1829

He became free of the Masons’ Company “by redemption” in 1802, and later, as a master-mason, worked under Sir John Soar.e on a number of buildings designed by that architect. With Nelson (q.v.) as his partner, Grundy was employed on the building of the Bank of England from 1807 until his death, executing, among other things, two veined-marble chimney-pieces for £48; 39 ft. of Vitruvian scrolls costing £79; fifty shells in Portland stone for £29; and four carved roses, ten carved flowers in the arch, and nine carved flowers enriched, for £10 10s., £20, and £36 respectively—all this being carried out between 1809 and 1812.

In 1818 and 1819 he was responsible for alterations to the houses of Lord St. Germans and Samuel Thornton in St. James’s Square, and also to Fife House, the home of Lord Liverpool, the Prime Minister. In 1821 he built four houses in Regent Street and, between 1827 and 1830, branches of the Bank of England at Bristol, Hull, Liverpool, Newcastle and Norwich.

Among other works which Grundy executed for Soane may be included the sarcophagus ordered for Sir Francis Bourgeois in 1807, to be erected in the mausoleum in the Charlotte Street graveyard, Portland Place. In 1825 Soane employed him at the New Courts of Judicature in Westminster, where he executed three marble chimney-pieces for £78; sixteen corbel-heads for £51; and twenty-four bosses and the cornice, costing £38 altogether (P.R.O., Works 5/125). In the following year, still under the same architect, he was working at Pelwall House, Market Drayton, Salop, where he made the black-and-gold chimney-piece in the dining-room, the statuary and gold chimney-piece in the small drawing-room, and the carved marble one in the large drawing-room for £49, £58, and £140, respectively.

In 1828 Grundy was employed by the Freemasons, for whose Hall in London he supplied four Ionic columns and capitals costing £50, and four veined-marble chimney-pieces for which he was paid £100 (Freemasons’ Archives).

In the Soane MSS. is Grundy’s bill dated 1818: “To the Executors of Signora Storace for a statuary marble wall-piece fixed in Lambeth Church, £30,” the lady referred to being Ann Storace who had died at the age of fifty-one in the previous year. She was the sister of Stephen Storace (1763–1796), whose monument in Marylebone Chapel is the work of Banks (q.v.). A careful search in Lambeth Church, however, has failed to discover Ann Storace’s tablet, and I can only conclude that it was destroyed when the building was restored later in the nineteenth century. It is referred to as a “neat marble tablet” in Allen’s History of Lambeth, published in 1836.

After Grundy’s death in 1829 his widow Jane carried on the business.

(Soane MSS.)

GRYLLS, —, of Devonport

He signs large wall-tablets to Gertrude Hawkins,
1823, at Saltash, Cornwall, and to John Newton, 1827, at Bridestowe, Devon.

GUELFI, or GUELPHI,
GIOVANNI BAPTISTA
fl. 1714-1734

Guelfi, who worked in Rome under Cavalier Camillo Rusconi, was brought to England about 1714 by Lord Burlington, by whom (according to Vertue) "he was much employed for many years in his house in London and made many statues for his villa at Chiswick, being much, continually almost, employed for him several years, also several busts he did" (Walpole Society, Vertue, Vol. III, page 73). Faulkner's Brentford, published in 1848 (page 412), mentions that Guelfi's statues of Venus and Mercury were then in the gallery of Chiswick House, together with two small heads by the same hand.

The sculptor was also employed by Lord Pomfret to restore the Arundel Marbles and his work is mentioned in a letter written in 1775 to Sir Roger Newdigate by Joseph Pickford (q.v.). Lady Pomfret had just presented the marbles to Oxford University and Pickford recalls that he "was at the placing and repairing of them with Signor Guelfi when first he came from Italy, as well as moving them lately to Towcester, and I know it will be attended with a great deal of trouble and expense before they are properly fixed" (Newdigate Archives).

There is considerable confusion about the authorship of the busts ordered by Queen Caroline for her Grotto or Hermitage at Richmond. The building was designed by Kent, and Vertue (Walpole Society, Vol. III, page 51), writing in 1731, has "four busts in stone to be made by Signr. Guelphi for the Queen's ... at Richmond. Sir I. Newton, Lock, Dr. Clarke and Mr. Woolaston." Two years later a writer in The Free Briton attributed the busts to Rysbrack, but his assertion is corrected in the issue of 6 September, which states that they "unfortunately happened to be the work of another, and as some think a much inferior, hand." Vertue, however, in 1736 definitely says that there are now to be six busts, Baco and Boyle being added, and that they "employ the hand of Rysbrack." What probably happened is that Guelfi received the commission but for some reason or other it was transferred to Rysbrack, though he certainly carved one of the busts—that of Dr. Clarke—as Rysbrack writing to Sir Edward Littleton in 1736 says he did not make "the bust of Dr. Clarke in the Hermitage; it was done by Mr. Guelphi, an Italian who is dead." Guelfi also executed a bust of Newton for Pope, who left it in his Will to Mr. Murray (afterwards Lord Mansfield), together with "the marble head of Homer by Bernini" (Gentleman's Magazine, 1744, page 313). The bust of Newton is now at Scone Palace.

Vertue (op. cit.) also says of Guelfi that Lord Burlington "much commended him to the nobility for an excellent sculptor" and "procured him many works." One of these commissions was for the monument to James Craggs erected in 1725 in Westminster Abbey, a "graceful and simple" production, according to Horace Walpole, but who also remarked that it showed Guelfi to be "a very indifferent sculptor."

In 1730 Guelfi made the monument, with its life-size figure of the Earl of Warwick, in St. Mary Abbots, Kensington, and the bill for this, dated 14 October of the same year, is now in the British Museum (MS., E.G.1973). About this time he was also responsible for the monument to Anne, Duchess of Richmond, at Deene, Northants. The terra-cotta model of the bust of the Duchess was formerly at Goodwood, but is now in the Victoria and Albert Museum.

In the Earl of Westmorland's archives (Northampton Record Society, Misc. Vol. I, folio 94) is the following entry: "March 26th, 1731. Paid Mr. Guelfi statuary upon signing the articles for a monument of my father Stringer and mother in pursuance of the order in my dear wife's last Will, to be set up in Kirkthorp Church; for the first payment £150." The sixth Lord Westmorland is here referring to the monument of Thomas and Katherine Stringer, the parents of his late wife, which is still in Kirkthorp Church, Yorkshire. On 16 April of the same year Lord Westmorland notes that he "paid Mr. Guelphi statuary as per agreement signed this day the first payment for Mr. Beaumont's monument £100." Richard Beaumont was Lady Westmorland's first husband, and his monument stands in Kirkheaton Church, near Leeds. Also about this time Guelfi made and signed a large monument commemorating T. Watson Wentworth in York Minster.

The sculptor left England in 1734, "after residing nearly twenty years," and returned to Italy, where he settled at Bologna. "It is thought that Lord Burlington parted with him very willingly," says Vertue (op. cit.). The same writer describes him as "a man of slow speech, much opiniated and as an Italian thoughtful nobody could be equal to himself in skill in this country. Yet," he adds, "all his works seem to the judicious very often defective, wanting spirit and grace."

H

HACKER, JAMES
fl. 1826–1839
In 1826 he won the Silver Palette from the Society of Arts for a bust. He exhibited at the Royal Academy, 1829–1839, showing in the latter year busts of Mr. Back and the Rev. Lancelot Sharpe.

HACKER, JOHN, of Canterbury
fl. 1803–1847
He is probably the son of James Hacker of Canterbury, mason, who in 1789 was paid £407 for building the market-place in Canterbury (City Archives). John signs a number of dull tablets in Kent, including those to the Rev. William Gregory, 1803, in Canterbury Cathedral; Robert Stains, 1806, in Holy Cross, Canterbury; and Vincent Wood, 1814, at Chilham. A tablet to William Price, 1826, at Allesley, Coventry, is signed “J. and C. Hacker fecit [sic]. London and Canterbury.”

HACKWOOD, JAMES
fl. 1770–1790
One of the best of the modellers employed by Wedgwood, he agreed with the firm on 11 November, 1778, to work for them for four years, his wages to be a guinea and a half a week and a house rent free. He modelled a large number of busts, cameo-portraits, etc. (Wedgwood Archives).

HAGBOLT, T., of London
b. 1773, d. 1849
His wax statuette of Lady Caroline Gordon, dated 1829, is in the Victoria and Albert Museum, while his bust of James Rennell (died 1830) is in Westminster Abbey.
Hagbold exhibited at the Royal Academy, 1826–1833, showing busts of the Hon. Lady Cust (1826) and the Rt. Hon. John Sullivan (1830), and a medallic portrait of William Tassie (1833).

HALFPENNY, WILLIAM, alias MICHAEL HOARE
fl. 1742–1785
Halfpenny was mason to Lincoln’s Inn between 1752 and 1785. In 1757 he made the sundial for the west end of the Garden Row, receiving £21. In 1782–1785 he built the north wing of the Stone Buildings (Archives, Lincoln’s Inn). Halfpenny was not only a mason, statuary, architect and carpenter, but is also chiefly remembered as a writer on architecture. His work in this connexion is, however, outside the scope of this book.
In May, 1742, he agreed to take over the building of Redland Chapel at Bristol and to oversee the workmen. He also undertook “to visit said work six days in evry week, and for evry day neglect I do agree to forfeit three shillings and sixpence and to measure all said work when required, both within and without” (Charlton and Milton’s History of Redland, page 67).
Halfpenny signs a very fine monument with portrait-busts and a medallion, to Mrs. Ann Dash, c. 1750, in Isleworth Parish Church.

HAINES, —
In 1743 he made the chimney-pieces for the “new hall and the eating room” of Hampden House, Buckinghamshire, and in the same year was responsible for the wood-carvings in the “alcove” (Archives, Earl of Buckinghamshire).

HAKEWILL, HENRY JAMES,
of London
b. 1813, d. 1834
He was born on 11 April, 1813, third son of James Hakewill (1778–1843), the architect, and studied under Richard Sass. In 1830 he joined the Royal Academy Schools and in the following year won a Silver Medal for a figure of “Apolino.”
In 1832 Hakewill made figures of the founders, Sir Richard and Lady Beaumont, for the almshouses at Cheshunt, Hertfordshire. In the same year he modelled a figure of Earl Grey, and a committee, under the chairmanship of Lord Duncannon, was formed to raise money to have it carved in marble and erected in Marylebone. The project, however, was later abandoned as there was not enough money forthcoming to carry it out.
Hakewill died of consumption on 13 March, 1834. His obituary in the Literary Gazette of the same year (page 249) stated that “in person he was tall and elegant and his face eminently beautiful, his manners and address were modest and unassuming but collected.” He exhibited at the Royal Academy, 1832–1834, showing a few busts, including one of Lord Brougham which he had modelled when his subject was dispensing justice in the Assize Court.
(Authority cited in text.)
HALL, JOSEPH, the Elder, of Derby
fl. 1745–1763

He was the master-mason for building Kedleston and was also responsible for nearly all the carved stone, alabaster and woodwork in the house. His most important contribution to it—the famous alabaster columns in the Great Hall—was made in 1760. For these he received 536L, while the material and carving of the capitals together came to another 648L. In the same year he was also paid 744L for building the portico and 186L for carving its capitals and pilasters.

In 1761 Hall went into a partnership for a short time with a Mr. Chambers, and together they built the east wing, but he was working on his own in 1763, when he was responsible for the west wing and for the main staircase. In the same year he received 54L for "two modillions on the south front," and he also carved "Corinthian modillions to the large cornice round the building" for 121L, the coat of arms on the pediment of the main lodge, a stone pedestal for a statue of Venus and piers for the churchyard gate.

For the interior of the house Hall made chimneypieces for Lord Scarsdale's dressing-room and Lady Scarsdale's bedroom, costing 21L and 37L respectively, while he received a further 100L for the alabaster Corinthian capitals in the drawing-room. (Archives, Lord Scarsdale.)

In 1745 Hall was paid 31 10s. for a marble chimneypiece for "The great dining room" at Melbourne Hall, Derbyshire (Archives, Marquess of Lothian).

HALL, JOSEPH, the Younger, of Derby
fl. 1819–1852

Hall, who was presumably a grandson of Joseph Hall the Elder (q.v.), succeeded Richard Browne (q.v.) in the Derby Marble and Spar Works. Glover, in his History of the County of Derby (Vol. II, page 606), says that Hall was "a person well qualified from his knowledge of mineralogy and long experience of the business to continue improving in taste and elegance the innumerable articles he manufactures." Apparently he was also a benefactor to his native town, for he built "swimming and other baths for the accommodation of the inhabitants" some time before 1830 (op. cit.).

He exhibited at the Royal Academy in 1838, showing "a fawn, the colour of the marble being entirely natural," and he also sent various ornamental items to the Great Exhibition of 1851. In the following year he repaired the effigy of Archbishop Sandys in Southwell Cathedral, Nottinghamshire (Archives, Lord Sandys).

Hall signs a number of monuments. Those to the Rev. George Robinson, 1837, at Tutbury, Staffs, and John Macaulay, 1840, at Repton, Derbyshire, have well-carved reliefs, while in the latter county he also signs others commemorating John Hope, 1819, in Derby Cathedral; Martha Twigge, 1827, at Bakewell; Josiah Cranmer, 1836, at Heanor; Walter Evans, 1839, at Darley Abbey; Shirley, Bishop of Sodor and Man, 1842, at Shirley; and the Earl of Leicester, 1844, at Longford (the bust in this case being the work of J. Francis). Hall signs monuments in Staffordshire to Thomas Grosvenor, 1831, at Leek; the Rev. John Mosley, 1834, at Rolleston; and Samuel Allsopp, 1838, in Burton-on-Trent Parish Church. Others executed by him include those in memory of Francis Launder, 1822, at Elton, Notts; Lady Welby, 1826, at Allington, Lincs; and Miss Linwood, 1845, in St. Margaret's, Leicester.

HAMILTON, DAVID, and SONS, of Glasgow
fl. 1816–1817

They sign monuments to Colonel Cadogan, 1816, in Glasgow Cathedral, and Colonel Cunynghame, 1817, at Kirkmichael, Ayrshire.

HAMILTON, J.

A tablet at Otterden, Kent, to Sibylla Wheler, 1844, is signed "J. Hamilton successor to Peter Rouw" (q.v.). Hamilton must have taken over the yard in Rouw's lifetime, as the latter did not die until 1852.

HAMILTON, JAMES, of Weymouth
fl. 1784–1816

In 1784 he designed and erected the obelisk to the memory of James Frampton at Moreton, Dorset (Gentleman's Magazine, 1787, page 49). In 1785 he was the mason for building Bridport Town Hall (Town Archives). In 1795 he rebuilt the south-east wall of the "Cobbe" at Lyme Regis (Town Archives), and in 1809 designed the statue of George III carried out in artificial stone by Coade and Sealy (q.v.) for Weymouth.

Hamilton also carved a monument which was erected in 1816 in Wyke Regis churchyard to commemorate the passengers and crew of the Alexander (New Monthly Magazine, 1816, page 81).
HAMLET, T.
A small bronze bust of the Duke of Sussex, signed by Hamlet and dated 1826, is at Omerbury Court, Worcestershire.

HAMLETT, J., of Stroud
His stone wall-tablet to Robert Griffin, 1835, at Eastington, Gloucestershire, repeats a design frequently used by W. Paty (q.v.).

HAMMOND, H.
fl. 1850–1852
He showed busts, etc., at the Royal Academy between 1850 and 1852, including one of Dr. Cholmondeley in the latter year. He also exhibited at the British Institution in 1851.

HAMMOND, or HAMON, WILLIAM
fl. 1670–1690
Between 1670 and 1679 Hammond was the mason employed for rebuilding the Vintners’ Hall, and in 1671 carved “twenty stone scutcheons with the Company’s arms for the Company’s houses” (Archives, Vintners’ Company). From 1674 until 1678 he was working at the Royal College of Physicians, where he received £210 for the gateway in 1675 (Archives, Royal College of Physicians). Robert Hooke has the following entry in his diary: “Back to Physicians’ College. Met Hammond. Disliked carvings” (Diary of Robert Hooke, page 157).

Hammond was also employed as a mason at the City churches of St. Michael’s, Crooked Lane, between 1684 and 1690; St. Anne and St. Agnes; and All Hallows the Great, where his carved stonework included “six pilasters with capitals, £107” (Bodleian, Rawlinson MSS. 387).

HAMSTON, J. S., of Kensington
He signs a Gothic tablet to John Torriano, 1832, in St. Mary Abbots, Kensington.

HANCOCK, JOHN
fl. 1703–1718
He was probably a York mason and his monuments (of which I have discovered only three examples) are on the grand scale, with life-size figures and architectural backgrounds. Though they may have a slight air of country clumsiness, they are nevertheless impressive witnesses to the high standard of craftsmanship attained by good provincial work in the first quarter of the eighteenth century.

Hancock’s monument to Joseph Mellish, 1703, at Blyth, Nottinghamshire, is about 18 ft. high, with a semi-reclining figure in contemporary costume. The second monument, to George Pashley, 1708, at Stainton, Yorkshire, is a large architectural work with a central urn, but the grandest of the three commemorates Sir Edward Blacket, 1718, in Ripon Cathedral. This work, with its architectural background, has a total height of nearly 24 ft. and, in addition to a reclining figure of Sir Edward himself, has also life-size figures of his two wives to left and right.

It was extremely difficult to find Hancock’s signature on any of these works; indeed, in the case of the Mellish monument I was only able to discover it by climbing a ladder, for it was tucked away at the top of the right-hand Corinthian pilaster supporting the carved pediment.

HANCOCK, JOHN, of London
b. 1825, d. 1869
He was born at Fulham and was largely a self-taught artist, although he studied for a short time at the Royal Academy Schools in 1842, exhibiting at the Academy “The Prodigal Son” in the following year.

In 1844 he showed a statue of Chaucer at Westminster Hall, which the Art Journal thought “not in good taste,” while the Literary Gazette considered that “Mephistopheles would have been a better title.” Two years later he made a portrait-medallion of Dante Gabriel Rossetti, while in 1853 he modelled the bronze relief of “Christ led to Crucifixion” for the Art Union of London.

Apparently Hancock’s best work was the plaster statue of “Beatrice” which he showed at the Great Exhibition of 1851 and later made in marble for the Baroness Burdett Couts. Henry Weekes in his treatise entitled Fine Arts at the Great Exhibition (page 65) asked: “Will he” (i.e., the visitor) “not stop before the beautiful spiritualized figure of Beatrice by Hancock and become for a moment as absorbed in expression as is the plaster itself?”

Hancock exhibited “Beatrice” again in Paris in 1855, showing at the same time another statue of “Maidenhood.” Of this a French critic said “the expression and movement in it are remarkable,” but also added that it was “covered by a thick coat of paint which is barbarous.” Another
distinguished French critic said that both statues “possessed what Gibson’s works require—life” (Builder, 1856, page 406).

At the Royal Academy of 1858 Hancock showed a bronze figure entitled “Ariel Released from the Tree” which the Art Journal considered to be “of infinite grace and lightness.”

He exhibited at the Royal Academy, 1843–1864. His statue of “Il Penseroso” (1857) is at Osborne, while another version of the same work (1864) is at the Mansion House.

In 1849 he carved a bas-relief of the “Entry into Jerusalem” for the Art Union and again in 1853 a companion work of “Christ led to Crucifixion” for the same society. He died on 17 October, 1869.

(Builder, 1870, page 44; authorities mentioned in text.)

HANSON, JOB, of Newbury
fl. 1829–1831

He signs tablets at Chalton, Hants, to the Rev. Henry Hall, 1829, and at Speen, Berks, to Mary Wyld, 1831.

HARDCASTLE, ROBERT
fl. 1739–1768

He became a bankrupt in 1739 and in the Westminster poll-book of 1748 is described as “mason of John Street, Westminster.” In the “List of Artists” in Mortimer’s Universal Directory of 1763, however, he appears as a “carver in wood and stone,” living on the “Surrey side of Westminster Bridge.” I know of no work by him.

HARDEN, T., of Burton-on-Trent

He signs a large classical tablet to George Hutchinson, 1818, at Thtubury, Staffs.

HARDENBERG, B. F., of London
fl. 1800–1823

Hardenberg executed a number of busts, including one of Prince Blücher for Carlton House in 1817, for which he received £150 (P.R.O., L.C.9/367). His busts of the Princess Charlotte (1818) and of Lord Ellenborough (1820) are in the Royal Collection, while another undated one in plaster of George IV is at Brynkinalt, Denbigh. His busts of three Roman Emperors, Nero, Vespasian and Claudius, executed between 1819 and 1820, were formerly at Kimbolton Castle, Huntingdonshire, and that of General Morgan (1821) is at Corsham, Wilts. His bust of the Second Earl of Liverpool is at Ickworth Park, Suffolk. He also made a bronze statuette of Wellington which is now at Stratfield Saye.

In 1800 Hardenberg exhibited at the Royal Academy “The Four Seasons Decorating an Urn, intended for the Centre of a Green Room.” In 1822 he took the death-mask of Stuart, Archbishop of Armagh (Gentleman’s Magazine, 1822, Part I, page 470), for whose monument at Luton, Bedfordshire, he was also responsible. He also signs one to Thomas Brooke, 1820, at Runcorn, Cheshire.

Hardenberg, whose studio was in Mount Street, went into partnership with P. Nicoli (q.v.) later in his career.

HARDING, CHARLES,
of Sudbury
fl. 1830–1837

He signs tablets in Suffolk to the Rev. John Bigg, c. 1830, at Glemsford; to Captain Rodney Sims, 1834, in St. Gregory’s, Sudbury; and to Walter Westropp, 1837, at Long Melford. His tablet to Mrs. Pemberton, 1834, is at Belchamp St. Paul, Essex.

Harding’s wife, Charlotte, died in 1831 at the age of forty-three.

HARDING, JAMES,
of Farnham
fl. 1816–1837

He signs four undistinguished tablets in Farnham Parish Church between 1816 and 1837.

HARDMAN and ILIFFE,
of Birmingham

According to the Gentleman’s Magazine (1842, Vol. I, page 266), they made the monument of the Rev. Samuel Hopkinson (d. 1841) at Hacconby, Lincolnshire.

HARDY, JAMES
b. c. 1655, d. c. 1721

Son of William Hardy, of Kirby, Northumberland, he was apprenticed to Robert Bridles, citizen and mason of London, in 1669, becoming free in 1676. Two years later he was acting as assistant to Jasper Latham (q.v.), but by 1696 he was a master-mason with an apprentice and journeyman. He was Steward of the Masons’ Company in 1691, Renter Warden in 1705, Upper Warden in 1707 and Master in 1711. His workshop was in Piccadilly.

Hardy never signs his monuments, but fortunately gave to his friend Le Neve a list of a few of his works for the latter’s Monumenta Anglicana. That he was considered to be one of the leading statuaries of the day is shown in a letter written in 1706 by the First Lord Ashburnham to his steward, Mr. Lanion, concerning statues for the “attick” of
Ampthill House. In it Lord Ashburnham remarks that he has "considered the papers in yours of the 26th and do find Mr. Hardy more reasonable in his demands than Mr. Nost. Perhaps you may yet happen upon some other more reasonable than Mr. Hardy, if not, you will please bring Hardy as much lower as you can and to strike a bargain with him to perform in a month or six weeks' time." (Ashburnham Archives.)

Unfortunately the writer never lived to finish his house, but it is obvious from his letters that it was to be on the grand scale. Considering that he intended to engage Tijou and La Guerre (the most important artists in England in their different fields) for the ironwork and frescoes respectively, it is plain that Hardy at that time had a high reputation as a stonemason.

Hardy either married very late in life or had a second wife, for a son—another James—was born in 1717. James Hardy the Younger was apprenticed to William Hale, citizen and mason, in 1731. In 1755, according to a Minute in the Court Book of the Masons' Company, he was summoned before the Lord Mayor "to show cause why he should not serve the office of Livery and Steward of the Company to which he had been duly elected."

The elder Hardy, whose yard was in Piccadilly, gave the following list of monuments to Le Neve: Sir Henry Puckering, 1700, at Warwick; Mrs. Graddock, 1704, at Berkhamsted, Herts; Mrs. Duncumb, 1705, at Horsham, Sussex; Viscount Kilmory, 1710, at Adderley, Salop; Alicia Stede, 1710, and Constance Stede, 1714, both at Harrietsham, Kent; Viscount Ikerrin, 1712, at Silchester, Hants; Thomas Maule, 1714, in Edmonton Parish Church; and Reynolds Calthorpe (with bust), 1714, at Elvetham, Hants.

**HARDY, JOHN**

He signs a marble sundial, dated 1800, with cherub-heads in the corners, on the south wall of the church at Horne, Surrey.

**HARDY, WILLIAM, of Norwich**

He signs the monument to James Watt, 1788, in St. John de Sepulchre, Norwich.

**HARGRAVE, JEREMIAH, of Hull**

He carved the very fine, large rococo relief in the pediment of Trinity House, Hull, in 1753 (account-books, Trinity House, Hull). Hadley, in his *History of Hull*, published in 1788, says that Hargrave was the father of Joseph Hargrave, "an ingenious artist, who designed the drawings in this book."

**HARGRAVES, ISAAC, of Lewes**

*fl. 1792–1796*

He signs a large wall-tablet with an oval inscription panel to Elizabeth Scrase, 1792, at Stanmer, Sussex.

**HARMER, JAMES, of London**

He exhibited a "sculptured frieze in plaster of Paris" at the Great Exhibition of 1851.

**HARMER, JONATHAN, of Heathfield**

*b. 1762, d. c. 1841*

He was the son of Jonathan Harmer the Elder, mason, and in 1796 went to America where he followed the same calling, working as a journeyman. On his father's death in 1800 Harmer returned to England and began the manufacture of small terra-cotta bas-reliefs, which he used principally in his monumental work, inserting them into the upper part of a tablet or tombstone. He also used them for the exterior decoration of houses and there was in existence a terra-cotta coat of arms of the Second Duke of Newcastle made by him.

Hamer's principal designs included a vase or basket of flowers, an urn with rams' heads, an angel, a basket of fruit, Charity, etc. The best examples of his work in situ are in the interior and churchyard of Cade Street Chapel, Sussex. Other examples can be found in the churches or churchyards of Hailsham, Mayfield, Wadhurst, Warbleton, Heathfield, etc., all in Sussex. There is also a collection of these bas-reliefs in the Sussex Archaeological Museum at Lewes.

(Lucas's *Heathfield Memorials*, pages 104–108.)

**HARMER, T., of Snettisham**

He signs a large wall-tablet in coloured marbles at Heacham, Norfolk, to Nicholas Styleman, 1830.

**HARPER, C.**

He signs a large wall-tablet with well-carved detail to George Gregory, 1785, at Harlaxton, Lincolnshire.

**HARPER, R., of London**

He exhibited busts of Lord Brougham and the Rev. Rowland Hill at the Society of British Artists in 1833.

**HARRIS, CHARLES, of the Strand, London**

*d. 1795 (?)*

His monuments have great charm, being in the best eighteenth-century tradition, with a lavish...
use of coloured marbles and reliefs. His most important work is that to the third and fourth Dukes of Ancaster at Edenham, Lincs, which has a life-size standing figure of the Third Duke in Roman costume, while the fourth Duke is seated, dressed in full peer’s robes and holding a medallion portrait of his wife.

In the archives of Stourhead is the account for Harris’s monument to Henry Hoare (d. 1787) which was erected at Stourton, Wilts, and cost £75. The final payment of £35 is made in 1795 to Elizabeth Harris, who is presumably the sculptor’s widow.

Harris signs monuments in Sussex to the Rev. Thomas Wrench, 1778, at Stedham; and to Sarah Peckham, 1784, and the Rev. George Farhill, 1790, both in Chichester Cathedral; in Surrey to Henry Allcroft, 1779, to Benjamin Tate, 1790, and Miss Sophia Tate, 1790, all at Mitcham; and to Lady Fletcher, 1791, at Cheam; in Berkshire to Frances Stonehouse, c. 1779, at Hungerford; to William Jennings, 1784, at Long Wittenham; and to Robert Palmer, 1787, at Hurst; and in Hampshire to George Dewer, 1786, at Knights’ Enham, and to Henry Lloyd, 1792, at Christchurch. He also signs a monument in Buckinghamshire to Barbara Reepington, 1775, at Stony Stratford, and another in Devon to Mrs. Tucker, 1788, at Kilmington.

HARRIS, CHARLES, of Wallingford

He signs a tablet at Hambledon, Bucks, to Richard Mason, 1776. In 1797 he took his son, another Charles, as his apprentice.

HARRIS, H., of Poole

In the Gentleman’s Magazine, 1825 (Part II, page 135), it is stated that the monument of Admiral Russell, recently erected at Canford Magna, Dorset, was carved by Harris and was “highly creditable to his abilities.”

HARRIS, JOSEPH, of Bath

fl. 1808–1836

Harris was one of the least successful of the Bath school of statuaries. His absurd monument to Henry Haffey, 1836, at Bathampton, Somerset, has, for its chief decoration, a marble copy of the large silver trophy presented to Haffey by the inhabitants of Jamaica.

Other signed monuments and tablets by him include those to John Butt, 1808, at Warminster, Wilts; Captain Maxwell, 1809, at Twyning, Glos; Josiah Patrick, 1818, at St. John in Bedwardine, Worcs; Emily Roe, 1819, at Walcot, Berks; the Rev. John Selwyn, 1823, in Salisbury Cathedral; and Adam Wrags, 1835, at Seend, Wilts.

HARRIS, SAMUEL, of Jacobstow

He signs a ledger with a fine coat of arms at Whitstone, Cornwall, to Thomas Cogcombe, 1712.

HARRISON, ELIZABETH, of Chester

fl. 1827–1835

Possibly the widow or daughter of Daniel Harrison who became a Freeman of Chester in 1801. She signs a Hellenic wall-monument at Bruera, Cheshire, to John Colley, 1835. With her partner, John Wright of Chester, she signs a similar one with good details to John Edgeworth, 1827, at Marchwiel, Flint.

HARRISON, JAMES, of Devizes

fl. 1811–1816

He signs tablets at Pewsey, Berks, to Thomas Pike, 1811, and at Bromham, Wilts, to Andrew Rolt, 1816.

HARRISON, RICHARD, of Buckingham

fl. 1817–1836

He signs tablets in Buckinghamshire to Mary Aubrey, 1817, at Middle Clayton; and to the Rev. John Dayrell, 1832, and to Richard Dayrell, 1836, both at Lillingstone Darent.

HARRISON, THOMAS

b. 1815, d. 1841

In 1836 he attended the Royal Academy Schools, to which he had been recommended by C. Rossi (q.v.). He exhibited busts at the Academy, 1838–1840, showing in the latter year one of Mrs. Hinton Baverstock, of Norwich. He died at Old Windsor in 1841.

HARRISON, WILLIAM, of Stamford

b. 1776

Harrison was apprenticed to John Cole, of Stamford, in 1790, becoming a Freeman of that town in 1797. In St. Martin’s, Stamford, are his tablets to Elizabeth Plumptree, 1806, and Thomas Truman, 1810, while he signs another at St. Mary’s (in the same town) to George Stevenson, 1808.
HARSTON, H.
fl. 1795–1811

Harston signs a small monument in Newark Parish Church to Garret Ordoyne, 1795. In 1811 the firm was known as “Harston, Marshall and Co.”

HART, ANTHONY
fl. 1686–1734

He was the son of Anthony Hart, citizen and brewer of London, and after serving an apprenticeship with Abraham Storey (q.v.) became free of the Masons’ Company in 1686.

Hart was chief assistant of John Nost (q.v.) and was working with him in 1708, as in that year he is described in the archives of the Masons’ Company as “working with Mr. Nost a carver at Hyde Park Corner.”

In 1723 his chief assistant, John Doe (q.v.), carved chimney-pieces for Dudley North of Glenham Hall, Suffolk. In 1727 North wrote to Hart: “I have at last examined Mr. Doe’s late bills and reduced the articles where they differ from my agreement with him.” North goes on to quote the contract and adds: “You have in some places charged more. I have with due help measured out all the chimney-pieces which I hope are very exactly done” (North Archives). In 1734 Hart was living at Cripplegate.

HART, JOSEPH
fl. 1724–1765

The son of Edward Hart, of Hackney, husbandman, he was apprenticed to John Annis (q.v.) in 1724. He signs the monument of Mrs. Mablettoft, 1765, at Weybridge, Surrey.

I have not been able to discover whether Hart was any relation of Clement Hart, who was apprenticed in 1719 to Thomas West, and who became Renter Warden of the Masons’ Company in 1751, the year of his death.

HARTLEY, HENRY ROBERT
fl. 1820–1827

HARTSHORNE, ROBERT,
of London
fl. 1715–1728

Hartshorne was an assistant of William and Edward Stanton (q.v.). His masterpiece is the noble monument of Sir Thomas Powys, 1720, at Thorpe Achurch, Northants, which is 20 ft. high and has an architectural setting of Corinthian columns, supporting a broken pediment. To left and right stand figures of Justice and Truth, while in the centre is the semi-reclining figure of Sir Thomas in his judge’s robes.

In the “Inventories of the Directors of the South Sea Company,” 1721, are bills for the sum of £149 owed by Sir John Fellowes to Hartshorne. These are either for work carried out at Sir John’s house at Carshalton, Surrey, or possibly for a monument erected in Carshalton Church. Between 1718 and 1727 Hartshorne made a number of chimney-pieces for Ditchley Park, Oxon (Dillon Archives).

Other signed monuments by him include those to John Rogers, 1715, in St. Mary’s, Leicester; Bishop Burnet, 1715, in St. James’s, Clerkenwell; and Mark Kirby, 1728, in Holy Trinity, Hull.

HARVEY, —, and SON,
of Stonehouse
Firm/fl. 1830–1850

They sign uninteresting tablets in Devonshire to Edward Hoclin, 1836, at Hartland; Charlotte Pierce, 1836, at Ipplen; and Catherine Butter, 1837, at Woodbury. Their tablet to Hugh Hockin, 1837, is at Stoke Climsland, Cornwall.

HARVEY, or HERVÉ, DANIEL,
of York
b. 1683, d. 1733

Harvey was born in France and anglicized his name soon after his arrival in England. He did a great deal of work at Castle Howard, carving four statues on the north front at £14 each in 1709. Three years later he was paid £89 “for sculpture.” In 1721 he carved for the avenue of Castle Howard stone vases and pedestals, the latter decorated with “frost work,” while the former must have been gilded as there are various payments for “gold for ye vase.” Between 1726 and 1727 he carved all the stonework for the Temple of the Winds at a total cost of £276. This included twenty-eight capitals (£56) and twelve vases (£21) (Castle Howard Archives).

In 1720 he made an agreement with the Earl of Strafford “to carve, perform and finish 4 capitals after ye Corinthian order which are to be fitted in just proportions to 4 marble columns which have already been shewn to the said Daniel Harvey.” The capitals, which were to be of Roche Abbey stone, were intended for the gallery at
Wentworth Castle, and Harvey was to receive £50 for the work (B.M. Ad. MS. 22241, folio 11). In 1725 he carved four more capitals, this time in wood, for the same house (op. cit., folio 29).

In 1730 Harvey made the monument of Hugh Ripley in Ripon Cathedral (Ripon, Mayor’s accounts). This was apparently a copy or restoration of the original, for the inscription on it read “the former monument having been defaced in the times of the Civil Wars, this new one was erected by the Corporation 1730.”

He died on 11 December, 1733, and was buried in St. Olave’s, York, where his epitaph describes him as “sculptor, architect etiam peritus, ingenio aser” (Drake’s York, Vol. I, page 260).

(Authorities mentioned in text.)

**HARVEY, FREDERICK, of Ipswich and Diss**

*fl. 1830–1840*

As a mason he built a house for a Major Walker at Lavington, Suffolk (Clerke’s *Ipswich*, page 377). He signed a tablet to Elizabeth Bunny, 1836, at Diss, Norfolk, and another to Sharan Shorting, 1836, at Brome, Suffolk.

**HARVEY, JOHN, the Elder, and JOHN, the Younger, of Bath**

Firm *fl. 1687–1740*

The Harveys of Bath seem to have followed a variety of callings, being architects, statuaries, painter-stainers and stone-cutters. As an architect, the elder Harvey built the first Pump Room in 1706, while his son was responsible in 1734 for the church of St. Michael extra Muros.

In 1687 the former was paid £270 for “carving” at Longleat. Unfortunately the bill gives no details of this work, but it may have been for the great fountain of which there is a drawing in the Longleat archives. In 1694 he was again at Longleat, carving “13 figures of boys” and “2 shields at the end of the walk.” In 1701 he made a fountain, being paid £6 for each figure of a boy (Archives, Marquess of Bath).

The younger Harvey carved the trophy of arms, etc., on the Lansdowne monument above Bath in 1720. According to Wood’s *Bath* (Vol. I, page 231), he pretended that Lord Lansdowne had never given him a penny for the work, for he was extremely mean and wanted an excuse for not paying his workmen, especially John Pitcher, the freestone mason. The latter, however, “he [i.e., Harvey] amused to the day of his death with a promise of payment as soon as he should receive his money from Lord Lansdowne, protesting he had not received a shilling when in truth he had

had the full value of the monument from him in three blocks or more of fine marble which his Lordship procured him from abroad.”

The Harveys sign monuments to John Tiley, 1703, in St. Mary Redcliffe, Bristol; to Elizabeth Incledon, 1717, at Barnstaple, Devon; and to Mary Coghill, 1733, in St. Peter’s, Marlborough.

**HARVEY, SAMUEL, of London**

*fl. 1762–1765*

Between 1762 and 1765 he executed three life-sized marble statues for the Society of Arts. These were “Ceres” (£52 10s.), “Bacchus and a Young Satyr” (£73 10s.) and “Victory” (£84). His address is given as Masham Street, Westminster.

(Archives, Royal Society of Arts.)

**HARWOOD, F.**

*fl. 1748–1769*

All his statues and busts which I have seen are either copies of, or based on, Greek and Roman originals, but they are none the less fine works. For Gordon Castle he carved in 1762 a bust of Marcus Aurelius and in 1765 a bust of “A Vestal.” He also supplied in the latter year statues of “Apollo” and a “Marine Venus.” These, together with the busts from Gordon Castle, were in 1950 at Messrs. Crowthers’ of Isleworth, who also had Harwood’s busts of Seneca (1763), Homer (1764) and Cicero (1768).

Other busts by Harwood include Faustina (1748) at Castle Ashby, and Caracalla (1762) at Finchcocks in Kent.

Harwood is probably the “F.H.” referred to by Nollekens in a letter (in his inimitable spelling), written from Rome to Thomas Banks (q.v.) in 1769, in which he says that “there is F.H. at Florence who is knocking the marble about like fevaw & belive he as got more work to do than any One Sculptor in England” (Whitley’s *Art in England*, 1821–1837, page 41).

**HASKOLL, J.**

*fl. 1824–1840*

In 1824 he was living in the Isle of Wight. He exhibited busts at the Royal Academy, 1824–1835, and at the Suffolk Street Galleries in 1832, including those of Algernon Jones (1831) and Augustus Perkins (1832). In 1835 he applied to the Artists’ General Benevolent Institution stating that “he had passed many years on the Continent and had made a bas-relief for a church in the Isle of Wight.” This bas-relief is probably part of the monument of Sir L. Worsley Holmes which was erected in Arreton Church and of which Haskoll exhibited the model at the Suffolk Street Galleries in 1829.
HASLEWOOD, RICHARD
While apprenticed to "Mouchet a Chaser" he received in 1762 a premium from the Society of Arts for "ornaments in clay."

HASWELL, GEORGE, of Chester
About 1840 he carved the coat of arms of the County of Cheshire surrounded with foliage on the pediment of the Chester Lunatic Asylum (Builder, 1850, page 94).

HATCHARD, JAMES
b. 1793
He attended the Royal Academy Schools in 1814, having previously exhibited at the Academy in 1811 a bust of "Mr. Hatchard, Architect," possibly his father.
He signs the monuments of Captain Thomas Fraser, 1823, at Cheekheaton, Oxon, and Sarah Smith, 1835, in Holy Trinity, Marylebone.

HATTON, EDWARD
fl. 1779–1785
Samuel Smiles in his Lives of the Engineers (Vol. II, page 311) quotes a letter from Thomas Telford written in 1785 when he was working as a journeyman-mason at Somerset House. Telford says of Hatton that: "He has been six years at Somerset House and is esteemed the finest workman in London and consequently in England. He works equally in stone and marble. He has excelled the professed carvers in cutting Corinthian capitals and other ornaments about the edifice. He may be half-a-dozen years older than myself at most. [Telford was then twenty-six.] He is honesty and good-nature itself and is adored by both his master and fellow-workmen."

HAVELEY, JOHN, of Woodstock
He signs a large marble tablet with a plain pediment at North Leigh, Oxon, to Edward Perrot, 1729.

HAWKE, J.
fl. 1777–1784
From 1777-1784 he was the master-mason and builder of Gorhambury in Hertfordshire. He received altogether £2,621, which sum included payment for all the carved stonework (Hertford County Archives, B.XI. 66).

HAWKE, WILLIAM
fl. 1789–1790
He was extensively employed during the rebuilding of Woburn Abbey, 1789–1790, receiving £900 for masonry and carved Portland stonework (Woburn Abbey Archives).

HAWKINS, B. W.
fl. 1847–1851
Hawkins exhibited at the Royal Academy, 1847–1849. In 1851 he showed at the Great Exhibition a group in bronze of "The European Bison," which the Zoological Society of London were to present to the Emperor of Russia.

HAWKINS, J. B.
fl. 1842–1844
He exhibited at the Royal Academy in 1842, and two years later showed the "Hesitation of Pandora" at Westminster Hall. This latter work the Literary Gazette (1844, page 466) called "an accurate copy of bad nature, or a cast filled up, cannot be worth anything."

HAWORTH, WILLIAM
b. 1759
Haworth was born on 21 June, 1759. He attended the Royal Academy Schools in 1777 and four years later exhibited at the Academy a terra-cotta bust of the Rev. Dr. Giffard.
His younger brother Henry (born on 14 September, 1760) also attended the Royal Academy Schools in 1779 (Academy Archives).

HAY, JAMES, the Elder, of Portsea
fl. 1782–1813
His most ambitious work was the monument "in a pyramidal form ornamented with marine trophies, arms and sculptured urns" which was erected in Portsea churchyard to the memory of Admiral Kempenfelt and the crew of the Royal George. This was unveiled in March, 1783, and a description of it, together with a plate, is given in the Gentleman's Magazine for that year (page 368).
According to the Monthly Magazine (1810, page 613), Hay was "an eminent naturalist and a fellow of the Linnaean Society."
He signs monuments in Hampshire to Mrs. Sarah Reid, 1783, in Fareham churchyard; to William Feilding, 1789, in Portsmouth Cathedral; to Catherine Moody, 1802, at Porchester; to Gavin Kemp, 1810, at Bishops Waltham; to James Norris, 1813, and Alexander Cameron, 1813, both at Warblington; and to David Renaud, 1813, at Havant.
HAY, JAMES, the Younger, of Portsea
b. 1772, d. 1810
Son of James Hay the Elder (q.v.), he first studied painting under Benjamin West, but later turned to sculpture and became a pupil of J. Flaxman (q.v.), studying anatomy under Sheldon and Brookes. At the time of his death at Portsea in 1810, Hay was acting as assistant to his father. According to his obituary in the Gentleman’s Magazine (1810, Part I, page 498) “his too intense applications to the various branches of science brought on a lingering disease which terminated by a premature death, the life and labours of a rising genius.”

The Monthly Magazine of the same year (page 613) also mentions “he left many drawings of the most remarkable antiquities in Hampshire; and a much greater number of almost the whole zoology of Great Britain, particularly a complete arrangement of all the shells, beautifully drawn and coloured from nature.”

I know of no independent works by him.

HAYDON, SAMUEL JAMES BOUVIERE
b. 1815, d. 1891
He was born at Heavitree, near Exeter, on 29 April, 1815, and, after being educated at Mount Radford School, was articled to a lawyer. He later began to practise on his own account in Exeter, but the love of art proved too strong and he abandoned the law and went to London, where he studied sculpture under E. H. Baily (q.v.). He apparently showed great promise in his new profession, for B. R. Haydon, the painter, wrote of him as “one capable of taking the place of Chantrey,” while Pyecroft in Art in Devonshire (page 58) says that his works were “so good that it is more the pity they are so few. It was not from want of genius, power or personal merit that he failed to make for himself a far greater name.”

Haydon exhibited at the Royal Academy, 1840–1876, and at the British Institution, 1847. At the former he showed groups of “Hermia and Helena” (1844), “Charity” (1862), and “Ophelia” (1865), and busts of Sir Henry Goldfinch (1842), John Dickens (1843), H. Bridges (1860) and Lady Mason (1864). In 1840 he executed the busts of Sir Robert Newman and Thomas Newman for Mamhead House, Devon, and nine years later those of the Earl of Radnor and Admiral the Hon. D. Bouverie for Longford Castle. His bust of the Rev. J. W. Gleadall is in the offices of the Foundling Hospital, while another in wax of an unknown man, signed and dated 1843, is now at the Victoria and Albert Museum.

(Haydon cited in text.)

HAYES, T., of Beverley
fl. 1832–1845
He signs a tablet to John Soane, 1832, in Beverley Minster, and a large Gothic wall-tablet to James Atkinson, 1845, in St. Helen’s, York.

HAYLER, HENRY
b. 1824
He joined the Royal Academy Schools in 1840, on the recommendation of Sir Richard Westmacott (q.v.). He exhibited at the Academy, 1849–1859, showing various works, including a cameo portrait of George Godwin in 1854.

HAYLEY, THOMAS ALPHONSO
b. 1780, d. 1800
Hayley, a young man of much ability, was the natural son of William Hayley the poet, and studied sculpture under John Flaxman (q.v.), and modelled busts of his master, Lord Thurlow and J. S. Clarke. He died when he was only twenty and was buried at Earitham in Sussex, where there is a monument to his memory carved and erected by Flaxman, with an epitaph composed by his father. Redgrave says that young Hayley’s death took place in 1810, but this is incorrect as the date on the monument is 2 May, 1800.

In 1823 appeared a life of William Hayley and his son edited by John Johnson. This consisted of two volumes of nearly a thousand pages and the Literary Gazette (1823, page 405) rightly remarked that “the Genius of Humbug never produced a more gross piece of absurdity.”

(Horsfield’s Sussex, Vol. II, page 62.)

HAYNES, WILLIAM,
of Bury St. Edmunds
In 1729 he made the tombstone or ledger of the Hon. Barbara Hervey at Ickworth Church (account-book of John, First Earl of Bristol).

HAYTER, SIR GEORGE
b. 1792, d. 1871
Hayter is chiefly remembered as a fashionable portrait-painter of the period, and his work as such is outside the scope of this book. As a sculptor he signs a marble bust of the sixth Duke of Devonshire (1858) at Chatsworth and also exhibited a figure of “Atalanta” at the
International Exhibition of 1862. These are, however, the only examples I know of works of sculpture executed by him.

HAYWARD, JOHN, of Lincoln fl. 1767-1787

In 1767 he built for Lord Monson the stables at Burton Hall, Lincolnshire. He was master-mason to Lincoln Cathedral and was in charge of the repairs carried out to that edifice. In 1787 he was paid £867 for the restoration of the west front and other parts of the Cathedral (Lincoln Cathedral Archives; Archives, Lord Monson).

HAYWARD, RICHARD
b. 1728, d. 1800

He was born at Bulkington in Warwickshire and apprenticed to Christopher Horsnail (q.v.), becoming free of the Masons’ Company in 1749. In 1752 he was Renter Warden of the Company, and in 1753 went to Rome, where he remained for about a year.

Hayward was a friend of Thomas Jenkins, who, on 30 March, 1755, wrote from Rome to Lord Dartmouth: “It is said your Lordship is about building a house at Westminster. If such a person as Mr. Hayward, sculptor, should be recommended to your Lordship, I believe I may venture to say that he is a deserving young man. I knew him sometime here and he behaved well” (H. M. C., Earl of Dartmouth).

Another friend was Charles Jennens, the patron of Handel, for whom he carried out various works at his seat at Gopsall in Leicestershire, including, in 1764, the reliefs and busts on the Ionic temple on the roof of which stood the statue of “Religion” by Roubiliac (q.v.) (Nichols’s Leicestershire, Vol. IV, page 858; Gentleman’s Magazine, 1791, page 305). According to Dodson’s London (Vol. V, page 96), “a Bacchanalian Boy, Bust of Aratus, and a Vestal,” all by Hayward, were to be seen at Jennens’s London house in Great Ormond Street in 1761.

In 1771 Hayward made a marble chimney-piece for Woburn Abbey (British Museum, Ad. MS. 41133). The bill for it was sent to the Duke of Bedford by Sir William Chambers, who remarked in his covering letter that he considered the charge reasonable, “as the work is well done and the chimney-piece very large.” In the following year the sculptor was at Blenheim, where he executed “terms” for the gallery (British Museum, Ad. MS. 41133), and in 1774 he was needed again, for the Duke of Marlborough wrote to Chambers that he wanted “much to have this fountain settled. You must let Hayward or one of his foremen meet you here and I’ll have the parts of the fountain put out ready for him to see” (British Museum, Ad. MS. 41136). This almost certainly refers to the famous Bernini fountain which was “set up” by the fourth Duke in the park at Blenheim and rescued by the ninth Duke, who had it repaired and erected in a place of honour on the terrace below the west front of the Palace.

In the Newdigate archives is Hayward’s bill for £70, dated 1776, for the monument to Lady Newdigate (d. 1765) in Harefield Church, Middlesex. For Arbury Park, Warwick, the Newdigates’ family seat, he made “two marble plinths for candelabras.”

Besides the Woburn chimney-piece, Hayward also made one for Kedleston in 1760 (Archives, Lord Scarsdale), and another for Ingres Abbey in Kent in 1771 (British Museum, Ad. MS. 41133). He also made a large number for Somerset House, beginning in 1778 with two for which he was paid £212 (P.R.O., A.O. 1/2497). In 1784 he made another two of statuary and Sicilian marble, costing £51 each, for the Stamp Office and the Board Room of the Salt Office at Somerset House, while six years later he received £262 for more chimney-pieces, one with “a frieze of Persia marble, three small oval and broad flutes” at £60, and another with a “long frieze carved with two oval flowers and three small figures” for £66. Others for Somerset House included one with “leaves and oval flowers in centre” costing £30; a second with “three medallions on frieze, vases on breaks” at £40; and a third with “a long tablet veneered with oriental alabaster and carved with waterlily leaves” (R.I.B.A. 335A).

To the church at Bulkington (his birthplace) Hayward presented a font carved by himself with an enchanting series of Bartolozzi-like reliefs and inscribed “this fragment of ancient Numidian marble was imported from Rome by Richard Hayward and given to this church in 1789.”

His statue of Lord Botetourt, erected in 1773 at Williamsburg, Virginia, is the oldest public statue in North America still in existence. Lord Botetourt, the most popular Governor the colony had ever had, died on 15 October, 1770, and on 20 July of the following year the House of Burgess unanimously decided to erect at the public expense an “elegant statue in marble” to his memory. They then chose one of their number, John Norton, to go to England and make arrangements with a suitable sculptor, and in this task he was given every assistance by the Duke of Beaufort, the dead man’s nephew. As there was no recent picture of Lord Botetourt in existence, the Duke produced a wax medallion by Isaac Gosset (q.v.) to be lent to the chosen sculptor and,
on 10 March, 1772, Norton wrote to a relative in Yorktown that he had “fixed on an artist to execute the statue for L. Botetourt since the Duke of Beaufort came to town, his name is Hayward and lives in Piccadilly. He’s to be finished in 12 months completely.” Norton continued, “with iron rails, packed, and to be put into a ship for £1,700.” Hayward kept to his bargain for the statue duly arrived in Virginia in May, 1773.

Hayward, who exhibited at the Society of Arts, 1761-1766, died on 11 August, 1800, in Half Moon Street. “His performances in the line of his profession dispersed throughout the kingdom show him to have been an admirable master of the old school,” according to his obituary in the Gentleman’s Magazine (1800, page 909).

His sister erected a monument to his memory at Bulkington, the epitaph of which reads, “the surviving sister of Richard and Mary Hayward placed this marble as a memorial of the taste and genius of one, of the virtue and affection of both.”

The best and most unusual of his signed monuments, all of which have delicate and carefully cut details, commemorates the Rev. Slaughter and Mrs. Clarke, 1772, at Theddington, Leicestershire. This has a standing figure of the Rev. Stephen in a flowing cassock, while his wife is shown seated with her arm resting on an urn.

Works by Hayward in Westminster Abbey are in memory of William Levinz, 1763; Susannah Davidson, 1767; Mrs. Pritchard, 1768; General Strode, 1776; John Roberts, 1776; and Sir James Oughton, 1780. Other signed monuments by him include those to Harriet Whitbread, 1769, at Cardington, Beds; Charles Jennens, 1773, at Nether Whitacre, Warwick; Mary Miles, 1781, at Nackington, Kent; John Hamilton, 1781, and George Ogden, 1788, both in Chester Cathedral; the Hayward family, 1781, at Bulkington, Warwick; and William Wyldbore, 1781, in St. John’s, Peterborough.

(Authorities cited in text; information from Williamsburg Library.)

HAYWARD, SAMUEL
of Lichfield
fl. 1799-1822

He signs unimportant tablets to Lieut.-Colonel Philip Bainbridge, 1793, at Ashbourne, Derby; William Booth, 1812, at Ecclesfield, Yorks; and the Rev. William Vyse, 1816, and Mercy Woodhouse, 1822, both in Lichfield Cathedral.

HAYWARD, WILLIAM
fl. 1820-1825

His yard was first at Fentonville and later in the Borough. He signs a large wall-monument with a draped urn to the Hon. Michael Nolan, 1822, at Bradwell, Essex.

HEAP, WILLIAM, of Manchester
fl. 1820-1830

He signs a tablet with well-carved details to the Rev. John Haughton, 1828, at Middleton, Lancs, and another to Holland Watson, 1819, at Congleton, Cheshire.

HEARNDEN, JOHN

In 1726 he repaired Aylesford Bridge, Kent. His bill for the work includes “erecting a pillar on and repairing Aylesford Bridge, cutting an oval to place ye marble inscription in, cutting ye old inscription anew, consisting of 43 letters.”

(Kent County Records.)

HEDGES, NATHANIEL
d. c. 1784

In 1772 the Court of Assistants of the Masons’ Company wrote him a letter to the effect that “not being free of this Company” he did “use and exercise the trade of masonry within the City of London or the liberties thereof.” He was directed to attend the next Court “in order to accept and take upon him the freedom and to become free of this Company” under a penalty of £10 (Courtbook, Masons’ Company).

Hedges was mason to the Stationers’ Company from 1738 until 1784, in which year he apparently died, for it is then the last payment is made to his widow. He was mason to Hoare’s Bank (1764-1775) and was employed by Henry Hoare at Stourhead in 1753 and 1757. He also worked for Richard Hoare at Boreham Hall, Essex, in 1767, for both houses executing chimney-pieces, etc. (Archives, Hoare’s Bank).

Hedges’ monuments are important; that of Moses Ashley, 1740, at Ashby St. Ledgers, Northants, has a fine portrait-bust, while the monument of Sir Thomas Denison, 1765, at harewood, Yorks, consists of a sarcophagus with curious rococo legs on which stands a bust of Sir Thomas.

Other signed monuments by him include those to Joseph Ashley, 1739, at Ashby St. Ledgers, Northants; to Ephraim Chambers, 1748, in the cloisters of Westminster Abbey; and to Heigham Bendish, 1746, in East Ham Parish Church.

HEFFERNAN, JAMES
b. 1788, d. 1847

He was born in Londonderry, the son of a marble-carver employed by the fourth Earl of
Bristol, who was also Bishop of Derry. According to Strickland's *Dictionary of Irish Artists*, the date of his birth was 1785, but Heffernan himself gave it as 1788 when he later joined the Royal Academy Schools.

When he was only eleven his father died and Lord Bristol apprenticed him to a Cork architect. This man also owned marble works and there the boy began to learn sculpture, being employed on cutting chimney-pieces and tombs.

Heffernan came to London when he was twenty-two and, after being employed by C. Rossi (q.v.) for a few months, entered Chantrey's (q.v.) studio. In the following year he attended the Royal Academy Schools, gaining Silver Medals in 1815 and 1817, and then went to study in Rome. On his return to England he might well have set up for himself, but was lured back to Chantrey's employ by promises which that sculptor never fulfilled, although he made every use of Heffernan. This fact was well known at the time, for a writer in the *Library of Fine Arts*, 1831 (page 432), regretting that Heffernan exhibited so few independent works at the Royal Academy, did not scruple to add that he "was wasting the summer of his life to increase the already overgrown reputation of another."

Heffernan remained with Chantrey until the latter's death in 1841 and afterwards completed some of the sculptor's unfinished works. His master had said he would leave him money, but this promise, like all the others, was never fulfilled. Heffernan returned to Cork about 1843 and died there of dysentery on 21 October, 1847.

Peter Cunningham said of him that "he was a consummate master in transferring a look from dull, dead clay to semi-transparent Carrara marble; he saw and caught and translated Chantrey into another material" (*Builder*, 1863, page 112). The Gentleman's Magazine (1842, Part I, page 163), in its obituary of Chantrey, said that "Heffernan has cut in marble almost every one of Chantrey's busts literally from the first to the last."

Heffernan exhibited at the Royal Academy, 1816-1830, and at the British Institution, 1817-1822. At the former he showed groups of "Musidor" (1822) and "Ino and Bacchus," and busts of J. Stark (1818); Miss E. W. Hill (1825); H. P. Briggs (1828) and James Morrah (1832). His bust of James Watt (1834) was exhibited at the Art Treasures Exhibition in Manchester in 1857, and is now in the possession of the Royal Society. His groups "Susannah at the Bath" (1825) and "Girl Caressing a Child" (1832) are at the Cork School of Art, and his medallion of Sir Francis Chantrey (1842) at the National Portrait Gallery in Edinburgh.

He signs monuments to Dr. McCarthy, 1808, in South Parish Church, Cork; to William Bennett, Bishop of Cloyne, 1823, in Cloyne Cathedral; to William Forrester, 1832, in All Saints, Leicester; and to Sir Francis Chantrey, 1842, at Norton, Sheffield.

(Authorities cited in text.)

**HELBY, JOSEPH**

*fl.* 1692-1700

He signs a very fine cartouche-tablet to Mrs. Papillon, 1692, at Acrise, Kent. The "mort" or skull at the base of it has a wreath of ivy-leaves, which is most unusual.

When the London Customs House was rebuilt in 1700 Helby received £45 8s. for carved work (P.R.O., T.11/4).

**HELLYER, ISAAC, of Dorchester and Weymouth**

*fl.* 1820-1834

He signs tablets in Dorset to Jane Love, 1820, at Weymouth; John Swaffield, 1825, at Wyke Regis; and Sarah Perkins, 1834, at Melbury Osmond.

**HENDERSON, J.**

*fl.* 1782-1797

He exhibited a number of wax portraits at the Royal Academy between 1782 and 1797, including one of "Mr. Morceau, Master of the Ceremonies at Cheltenham," in 1794. A portrait-bust of "Mr. Henderson, modeller in London, cut on a sardonyx," is mentioned by J. Tassie in his *Engraved Gems* (Vol. II, page 743).

**HENDERSON, ROBERT**

*fl.* 1820-1832

He exhibited bronze statuettes, models of animals, etc., at the Royal Academy, 1820-1832, and at the British Institution, 1825-1828. These included figures of the racehorses "Risk" and "Sober Robin," and statuettes of George IV and the Duke of York.

Henderson's bronze statuette of George III, signed and dated 1821, is in the Victoria and Albert Museum.

**HENNING, JOHN, the Elder**

*b.* 1771, *d.* 1851

He was born at Paisley on 2 May, 1771, the son of Samuel Henning, a carpenter and builder, and, by assisting his father, learnt to draw plans and elevations. In 1799 he went to an exhibition of
waxworks in his native town and became fired with the idea of making wax busts himself. His first sitter was one of his father's workmen, but the result was not particularly successful, and Henning would have given up his efforts had not the decline of his father's business forced him to seek some other means of livelihood.

In 1800 he therefore went to Glasgow and set up as a modeller of wax portraits. Here he was fortunate enough to attract the attention of the Duke of Hamilton, and the fact that the Duke not only was good-natured enough to sit for his own portrait, but also commissioned others of his wife and daughters, established Henning's reputation as an artist. He then moved on to Edinburgh, where he made likenesses of many of the leading inhabitants, including the Earl of Buchan, Sir William Forbes, Hector MacNeill and Mr. Allison. In 1803 he finally decided to settle in the city and to study at the Trustees' Academy. He also made a number of drawings, busts, and portraits in enamel and wax of various distinguished Scotsmen, including Sir Walter Scott, Graham, Jeffrey, Lord Frederick Campbell, the Earl of Lauderdale, the Duke of Gordon and Lord Glenbervie.

In 1811 Henning went to London, but was at first disappointed with the city and its inhabitants. Chance, however, led him to Burlington House where the sight of the Elgin Marbles greatly influenced his future career. On 19 October, two years later, he described the impression they made on him in a letter to Josiah Wedgwood, for whom he was working at the time. "Arriving in London," he said, "about the beginning of July, 1811, I had the good fortune to see the Athenian marbles and felt my mind transfixed with admiration of them. In hope of improving myself in art I began to draw from them. It struck me forcibly that from their superior excellence they might some time or other become such an object of public curiosity that models of them, while they might be very improving to myself, might become objects of pecuniary advantage" (Wedgwood Archives).

It took Henning twelve years to complete his models (with the missing portions restored) of the Parthenon and Phigaleian friezes, and a number of small plaster copies of these were later produced. He also executed large friezes based on them for the exterior of the Athenaeum Club in 1830. In 1838 he made a relief on the same theme round the staircase hall of the Royal College of Surgeons, while there is a similar one at Terling Place, Essex, which is also his work.

During his early years in London Henning made portraits and busts in wax or enamel of various notabilities, including the Duke of Wellington and the Princess of Wales. In some cases these were executed for Wedgwood, to whom he wrote on 13 September, 1813, about a medallion he had just made of the Princess Charlotte, "which I have cast as I do my other works in Enamel-paste." "Having," he continued, "shown H.R.H. a small bust in bronze metal she signified a wish to have one of her own head in the same style which I have nearly completed and intend making some casts of it in bronze, however I find of those who speak of taking casts of it that it will please more generally in bisque than in bronze" (Wedgwood Archives).

Henning also sent Wedgwood a list of his "medallion portraits done from life," which included likenesses of the Dukes of Gordon and Devonshire; the Marchioness of Lansdown; the Marquess of Douglas; Lords Archibald Hamilton, Frederick Campbell and Webb Seymour; the Earls of Lauderdale and Rosslyn; Viscount and Viscountess Hampden; Lord Glenbervie; Colonel Cadogan; Sir Samuel and Lady Romilly; Sir Humphry Davy; Thomas Telford; Henry Brougham; Francis Horner; Thomas Campbell; Mrs. Siddons; Sir William Forbes; the Rev. Sidney Smith; James Watt; and Miss Smith, of Drury Lane Theatre. He also added that he charged from seven to ten guineas for a wax portrait.

Between 1820 and 1822 Henning produced a series of small plaster copies of the Raphael cartoons, executed with amazing delicacy and sharpness. The originals were exhibited at Leeds in the year of their completion, while replicas are at the Palace, Bishops Auckland, and in the possession of the writer. In 1848 when he applied to the A.G.B.I. for assistance he stated that: "The nature of his principle property (the restoration of the frieze of the Parthenon and the Cartoons and Transfiguration of Raphael) rendering it easy of piracy, has been the total ruin of his work which occupied 12 years labour."

Henning, who in most of his later works was assisted by his elder son, John Henning the Younger (q.v.), was one of the founders of the Society of British Artists. He died in London on 8 April, 1851, and was buried in the St. Pancras cemetery at Finchley. His obituary in the Art Journal (1851, page 212) commented on "the multiplicity and attractive character of his works" which, it asserted, had "assisted in diffusing a taste for fine art."

He exhibited at the Royal Academy, 1821–1828; at the British Institution, 1816–1823; at the Edinburgh Society of Artists, 1808–1813; and at the Royal Scottish Academy, 1827–1829.

His medallions in the Scottish National Portrait Gallery include those of Lord Jeffrey, 1801; Ebenezer Macome, 1801; Rev. Alexander Carlyle,
HENNING, JOHN, the Younger
b. 1801, d. 1857

He was the eldest son of John Henning the Elder (q.v.) and received in 1816 the Silver Isis Medal from the Society of Arts for a relief of "The Good Samaritan." About 1825 he repaired the statue of Queen Anne outside St. Paul's Cathedral which had been damaged by hooligans.

Three years later, assisted by his father, and brother Samuel (q.v.), Henning produced his most famous and lovely work, the classical reliefs on Decimus Burton's triple screen at Hyde Park Corner. In 1836 he carved the reliefs of "Architecture, Painting and Sculpture" and "Wisdom, Astronomy and Mathematics" for the front of the Manchester Art Gallery (City Archives, R.M.I. Minute-Book), and in 1844 sent a statue of Lord Bacon and a group of "Boadicea" to the exhibition in Westminster Hall. The Literary Gazette (1844, page 466) was not particularly complimentary about either of these productions, for though they conceded that there was "much of spirited composition in the Queen," they also noticed that "the pelvis is large enough for the life-size," while Bacon's figure was dismissed as "poor," though the head was admitted to be "full of character."

In 1845 Henning executed the reliefs, etc., on the column erected at Holkham to the memory of the Earl of Leicester (Illustrated London News, Vol. VII, page 112), and in the same year the reliefs round the Colosseum, Regent's Park. In 1850 he made, for the Freeman's Orphan School in Brixton, reliefs based on Hogarth's pictures of the industrious and the idle apprentices. In the same year he made for Lord Northwick a "Homerica table," which was Lot 657 in the Northwick sale of 1859. The reliefs of "The Vintage" and "Music and Painting" were executed in 1852 for the drawing-room and the long parlour of the Mansion House (Illustrated London News, 30 October, 1852).

Henning showed a bust of "Achilles" at the Society of British Artists in 1825 and exhibited at the Royal Academy, 1828-1852, where his works included busts of his father and George Rigby in 1848 and 1849 respectively. At the Suffolk Street Galleries he showed busts of John Galt and Dr. Maltby in 1824 and one of Dr. James in 1834. His bust of Ann, Duchess of Bedford, is at Woburn Abbey, and that of the first Duke of Marlborough at Windsor Castle. His monument to Charles Heaton Ellis, 1857, is at Wyddial, Hertfordshire.

(Authorities cited in text.)

HENNING, SAMUEL
d. 1832

He was the younger son of John Henning the Elder and assisted his father both in the restoration of the Elgin Marbles and at Hyde Park and the Athenaeum. In 1818 he received a Silver Palette from the Society of Arts and he later exhibited at the Royal Academy, 1823-1831, and at the British Institution, 1825-1826, showing intaglios, gems, etc. He also carved "two tablets for the New Buckingham Gate" (presumably the Marble Arch?) (A.G.B.I. Archives).

J. T. Smith (Nollekens and His Times, Vol. I, page 256) gives an account of Henning's taking impressions of the best Italian medals in Flaxman's collection. From these he made casts which he sold "at a price accommodated to the limited resources of the economical student." He was also responsible for the sarcophagus of Duncan Sinclair, c. 1832?, in Kensal Green Cemetery.

Henning died of cholera on 2 November, 1832, apparently in poor circumstances, for his widow, Ann, was granted a pension by the Royal Academy which she continued to draw until 1851 (Royal Academy Archives). Mrs. Henning, in 1834, had a stall at the Soho Bazaar, selling "Patent candle lamps and bronze articles."

(Authorities cited in text.)

HENSHELL, WILLIAM,
of London

Henshall, whose studio was in Mortimer Street, signs a large tablet with an "Adam" semi-turn against a pyramid to Joseph Ashley, 1798, at Ashby St. Ledgers, Northamptonshire.
HEISON, W., of Kettering
fl. 1841–1843

He signs a pretty little tablet to Sir George Robinson, 1841, at Cranford St. John, Northamptonshire, and a plainer one to the Rev. William Layng, 1843, at Great Harroden in the same county.

HENWOOD, JOHN, of Plymouth
fl. 1815–1830

He signs a tablet in the shape of an anchor to Arthur Edgecumbe, 1815, at Milton Abbot, Devon.

HERRMAN, CARL, of Dresden
b. 1791, d. 1045

He signs a lovely stele to Charles Lucas, 1831, at Filby, Norfolk.

HETHERINGTON, WILLIAM,
of Liverpool
fl. 1803–1810

With his partner, G. Grindrod (q.v.), he built the New Exchange at Liverpool in 1803. He signs a tablet to Anne Walmley, 1808, at Runcorn, Cheshire.

HEWETSON, CHRISTOPHER
b. 1739, d. 1799

He was born in Ireland, the son of Christopher Hewetson, of Thomastown, Co. Kilkenny, but his talent for sculpture led his friends to send him to study in Rome. Here he executed, between 1772 and 1781, the magnificent monument of Dr. Baldwin for the Examination Hall of Trinity College, Dublin, a work for which he received £1,000. He died in Rome in 1799.

Hewetson exhibited at the Royal Academy, 1786–1790, showing a bust of Gavin Hamilton in 1786 and another of “A Nobleman” in 1790. His bust of the Duke of Gloucester, executed in 1772, is at Windsor Castle, while that of Pope Clement XIV, signed and dated 1776, is in the Victoria and Albert Museum.

(Notes and Queries, Tenth Series, Vol. VI, page 285; Strickland’s Dictionary of Irish Artists.)

HEWETT, —, of Camberwell

He signs a pretty wall-tablet in coloured marbles to Maria Hammond, 1820, in Brixton Parish Church, and also a sarcophagus of the same date to M. Bentley McLeod in the churchyard.

HEWLETT, —
fl. 1847–1856

He exhibited at the Royal Academy, 1847–1856, showing various works, including a bust of the Hon. M. Berkeley in 1847, and a medallion of Lord Macaulay in 1856.

HEWLETT, DANIEL,
of Gloucester
fl. 1808–1829

He signs tablets, dated 1808 and 1829 respectively, in the Gloucestershire village churches of Brockworth and Staunton.

HEWS, —

He signs a circular wall-tablet of good workmanship to Mary Figg, 1787, at Petersfield, Hampshire.

HIBBINS, THOMAS, and family,
of Stamford

There was a large family named Hibbins centred at Ketton in Rutland who worked as masons and stone-carvers for over two hundred years. The earliest of them I have been able to trace is William Hibbins, who became a Freeman of Stamford in 1686. Another William of a later generation was paid for work at the Town Hall in 1755 (Chamberlain’s Accounts) and was the father of Thomas Hibbins, Freeman of Stamford by patrimony in 1754.

This Thomas signs a tablet at Langtoft, Lincs, to Mrs. Handley, 1755, and yet another Thomas signs tablets in Ketton Church, 1834–1835. In the same churchyard William Hibbins, who died young, is commemorated by a tombstone decorated with the tools of the mason’s craft.

A member of this family was still working as a mason at the beginning of the present century.

HICKEY, JOHN
b. 1751, d. 1795

He was born in Dublin, the fourth son of Noah Hickey, a confectioner, and entered the Dublin Society’s Schools in 1764. Here he gained several prizes before he left to become a pupil of Richard Cranfield who worked as a carver in the city.

In 1776 Hickey went to England, where he joined the Royal Academy Schools, giving the date of his birth as 7 November, 1751 (not 1756, as stated by Strickland). Two years later he won the Academy Gold Medal for his relief of “The Slaughter of the Innocents.”

In 1782 it was proposed to erect in Dublin a monument to Henry Grattan, and Hickey applied for the commission. In this he was supported by Edmund Burke, who wrote from Whitehall to Lord Charlemont that: “it will be a
pleasure to you to know that at this time a young man of Ireland is here, who I really think, as far as my judgment goes, is fully equal to our best statuaries. If you employ him, you will encourage the rising arts in the decoration of the rising virtue of Ireland. . . . The young man's name who wishes to be employed is Hickey" (Historical Manuscripts Commission, Earl of Charlemont, Vol. I, page 61).

Though the project fell through and the monument was never erected, Burke still continued to do everything in his power for his fellow-countryman. Not only did he sit to him for two portrait-busts, but he also secured him the commission for the Abbey monument to Garrick. Hickey, however, died before he could begin the work and Burke wrote to Albany Wallis: "if poor Hickey had been spared to us, I should not have preferred any sculptor living to him" (Farington's Diary, Vol. I, page 86).

Another of Hickey's patrons was Lord Loughborough, of whom the sculptor made a bust in 1785. Loughborough, too, seems to have been anxious to help him, for in the same year he recommended him to Lord Berwick as a carver of chimney-pieces, adding in his letter that he had "employed Hickey on work of that nature with complete satisfaction." Here again Hickey was unfortunate, for Lord Berwick replied that he had already engaged another artist (Berwick Archives), but he did make a few chimney-pieces under Soane, including one costing £54 for Mr. Branthwayt of Norfolk in 1783, and another of black and veined marble in 1791 for Messrs. Ransom and Morland of Pall Mall (Soane Notebooks).

Hickey, who had been appointed sculptor to the Prince of Wales in 1786, died in Oxford Street on 12 January, 1795. Farington (op. cit.) attributed his death "to having lain in a damp bed," but Strickland (Dictionary of Irish Artists, page 482) asserts that "his intemperate habits hastened his end." He exhibited at the Royal Academy, 1777–1794, showing busts of Mrs. Siddons as "Cassandra" in 1786 and Mr. Thickness of St. Paul's School in 1792. One of his busts of Edmund Burke, already mentioned, was formerly at Wentworth Woodhouse and there is a replica of it in the British Museum. In 1788 he designed a colossal statue of "Time" supporting a clock for Carlton House.

Hickey's most important monuments, with their statues, busts and medallions, commemorate Henry Singleton, 1787, in St. Peter's Church, Drogheda, and David La Touche, 1790, at Delgany, Co. Wicklow, while his finest monument in England is that to Mrs. Hawkins, 1780, in St. Helen's Church, Abingdon. Other signed works by him include those to William Dowdeswell, 1775, at Bushley, Worcestershire; Samuel Foster, 1778, at Grantham, Lines; Lord Archer, 1778, at Tankworth, Warwickshire; Mary Child, 1782, in St. Nicholas's, Abingdon; General William Haviland, 1784, at Penn, Bucks; John Spencer, 1786, at Cawthorne, Yorks; Sir Richard Hoare, 1787, in Barnes Parish Church; John Story, 1787, at Leyton, Essex; Joseph Baker, 1789, in Chichester Cathedral; and Mrs. Burrell, 1789, in Beckenham Parish Church.

At a sale held by Mr. Christie on 15 March, 1798, of a "statuary and mason quitting business" two of the lots were "a large bas-relief of 'Herod's cruelty' for which the late Mr. Hickey obtained the gold medal of the Royal Academy" and a small marble statue "a tragic figure of Mrs. Siddons in the character of Cassandra after the original by Mr. Hickey in the collection of Earl Fitzwilliam." (Archives, Messrs. Christie.) (Authorities cited in text.)

HICKS, JOHN, of Newbury
b. 1726, d. 1768

He is possibly a son of Jonathan Hicks (q.v.) and signs monuments to the Rev. Joseph Wells, 1750, at Hungerford, Berks, and to the Sainsbury family, 1765, and Robert Hayward, 1768, both at Market Lavington, Wilts.

The younger Hicks is buried at Speen, Berkshire.

HICKS, JONATHAN
b. 1675, d. 1742

He was employed early in the eighteenth century at Bucklesbury House in Berkshire. He, too, is buried at Speen Church in the same county, where his monument in the chancel describes him as "Freemason and carver." This monument, a very fine cartouche tablet, is possibly his own work.

(Berkshire Archaeological Journal, Vol. 38, No. 2, pages 148–149.)

HILL, EDWARD, of Hill Street, Berkeley Square
d. 1799

In 1790 he received £719 for mason's work, including carved Portland stone, for Woburn Abbey, and in the two following years he and his partner, Thomas Oldfield, made a number of chimney-pieces for the building. For these they were paid a total sum of £449, which included £48 for the chimney-piece in the south-front
west bedroom and £35 for one in the eating-room
(Woburn Abbey Archives).
Hill died on 25 December, 1799 (Gentleman's
Magazine, 1799, page 1094). As contractors Hill
and Oldfield built houses in Sloane Street in 1789
(Middlesex Building Affidavits).

HILL, GEORGE, of London
fl. 1731–1747

In 1731 he made chimney-pieces for Mr.
Benjamin Hoare of Boreham Hall, Essex, while in
1744 he was employed by a Mr. Christopher
Arnold, a partner in Hoare's Bank, at his house
near London (Archives, Hoare's Bank). In 1747
he was paid four guineas for "festoons."
Hill figures as a "carver in wood and stone" in the
London Directory of 1740.

HILL, J., of Barnet
fl. 1818–1832

Between 1818 and 1832 he made three dull
tables in the Parish Church of Monken Hadleigh,
Hertfordshire.

HILL, JAMES, of London
fl. 1761–1770

In Mortimer's Universal Directory for 1763 he is
noted as "statuary in the Strand." He exhibited at
the Society of Artists, 1761–1770, showing bas-
reliefs of classical subjects, models in wax, etc.

HILL, JOHN, of Reading
fl. 1782–1788

In the Reading Mercury of 9 January, 1786, is an
advertisement of "John Hill, stone-mason, and
carver, on the High Bridge, London Street ... 
extects Monuments, chimney-pieces in different
kinds of coloured marbles in the most elegant and
modern taste—tomb and headstones, and all
kinds of ornaments in stone." In the voters' lists of
1782 his name is given as "John Flewell Hill,
stone-mason."

Hill signs a wall-tablet at Shinfield, Berks, to
Edward Waite, 1788. He also carved the font in
Basildon Church in the same county, which had
been designed by the Vicar, the Rev. George
Bellas.

HILL, THOMAS
d. 1713

He became freem of the Masons' Company in
1670, and later held the offices of Renter Warden
in 1694, Upper Warden in 1695, and Master in
1699. In 1708 his address is given as "Chelsea" in
the books of the Company.

Hill, who was several times employed at White-
hall, also worked at the Chelsea Royal Hospital,
1686–1702; St. Paul's Cathedral, 1686–1707;
Kensington Palace, 1689–1690; Greenwich Palace,
1698; and Hampton Court. At St. Paul's he and
his partner, Thomas Wise (q.v.), executed much
of the stone-carving, while for Kensington he,
and two other partners, John Thompson and
Richard Walters, supplied twenty-five marble
chimney-pieces and two hundred and twenty-one
of Portland stone (P.R.O., E.351/3466), payment
for these being made to them between 1689 and
1691.

It is impossible to give a full list of all the
carved and statuary work carried out by Hill and
his partners for the Royal Palaces and St. Paul's,
but they range from four stone troughs made in
1701 for the lions at the Tower to marble chimney-
pieces. At Whitehall they supplied one of
Egyptian marble for the apartment of "Duchess
Mazarin" in 1685 (P.R.O., Works 5/46), six others
for unspecified rooms in 1686, and one for Queen
Mary's bedroom in 1693 (P.R.O., Works 5/47).
In 1687 they made one for the Council Chamber
at Chelsea Hospital, while for Kensington, besides
the large number already mentioned, they
executed in 1697 one of dove marble for Lord
Albemarle's lodgings (P.R.O., Works 5/49).
Another of black and yellow marble was made for the
Presence Chamber at Hampton Court in
1700 (P.R.O., Works 5/50). Also for Hampton
Court, Hill made in 1699 "two large urns with
festoons and four mask faces" and the piers for
them to stand on.

Hill, who died in 1713, is mentioned in a letter
written by Sir John Vanbrugh to Lord Godolphin,
wherein Sir Christopher Wren is quoted as calling
him "a whimsical man and a piece of an astrologer
and would venture on nothing till he had con-
sulted the stars" (Wren Society, Vol. VII, page 140).

In 1681 he made for £8 a marble font for the
Church of St. Anne and St. Agnes (Church-
wardens' Accounts), and he also signs monumen-
to William Levinz, 1697, in St. John's
College, Oxford; Mrs. Frances Ball, 1704,
at Hampton, Middlesex; and Mr. Jordan, 1706, in
Barbados Cathedral.

Hill's son, Thomas Hill the Younger, was
apprenticed to him in 1695, but was later turned
over to William Stanton (q.v.). He became free
in 1702 and died in 1724.

Another Thomas Hill, son of William Hill,
"citizen and mason," was apprenticed to Edward
Maslin in 1710, but was later turned over to his
father; he became free in 1720. His son, another
Thomas, was apprenticed to J. Rose (q.v.) in 1737.
(Authorities cited in text.)
HILL, WILLIAM

Between 1656-1658 he built Brasenose College Chapel (College Archives).

HILLS, S.

He signs a large and elaborate Gothic monument, 15 ft. high, to Dugdale Dugdale (d. 1836) at Merewale, Warwickshire.

HINCHLIFE, or HINCHLIFF, JOHN, the Elder and JOHN, the Younger

John Hinchliffe the Elder: d. 1791
John Hinchliffe the Younger: b. c. 1760

The elder Hinchliffe was the son of John Hinchliffe, a barber of the parish of St. George's, Bloomsbury, and after being bound apprentice to Richard Buddle (d. 1796) was turned over to Lewis Cockran, citizen and mason, in 1748. He took up his freedom in 1755 and later became Master of the Masons' Company in 1790.

In 1774 Hinchliffe took his son, John Hinchliffe the Younger, as an apprentice. The latter, who afterwards assisted his father, was alive in 1801, for in that year his nephew Samuel, son of William Hinchliffe, was apprenticed to him.

The elder Hinchliffe exhibited at the Society of Artists in 1768 a "specimen of a new manner of ornamenting chimney-pieces, tables, etc., with scagliola inlaid with marble," while four years later he showed "a statuary marble table inlaid with scagliola."

His signed monument to Ann Herney, 1771, is in the triforium of Bristol Cathedral. This is a curious work, in the form of a large wreathed triumphal column. For Kensington churchyard he made in 1784 the mausoleum of the Earl of Bellamont, costing £159 3s. 8d., and also carved a sarcophagus for Miss Johnstone which had been designed by Soane (Soane Note-books).

The younger Hinchliffe's signed monuments and tablets include those to the Rev. Richard Southgate, 1795, in St. Giles-in-the-Fields; Mrs. Worral, 1795, at Wisbech, Cambs; and Milward Rowe, 1804, at Tillington, Sussex.

The family lived "at the King's Place Farm near the Baldfaced Stag, Epping Forest," and it was here that the elder Hinchliffe died in 1796. As a contractor Hinchliffe built houses in Tottenham Court Road (1777); Gower Street (1785) and Devonshire Place (1793) (Middlesex Building Affidavits).

HINCHLIFE, or HINCHLIFF, JOHN ELY

b. 1777, d. 1867

He was born in 1777, the son of William Hinchliffe, and in 1791 was apprenticed to John Hinchliffe the Elder (q.v.), who may have been his grandfather. In 1796 he became free of the Masons' Company by patronymy, but did not attend the Royal Academy Schools until 1808.

Two years previously he had entered the employment of John Flaxman (q.v.) and for the last twenty years of the sculptor's life acted as his faithful, devoted and confidential assistant. When Flaxman died in 1826 Hinchliffe helped to complete the unfinished works in the studio, including the statue of John Philip Kemble for Westminster Abbey.

He exhibited at the Royal Academy, 1814-1847, showing mostly designs for memorials and a few portrait-busts. His monuments are not, in spite of the years he spent with Flaxman, very inspired or exciting works, and are mostly in the neo-Hellenic tradition.

Hinchliffe, who was the father of John James Hinchliffe (1805-1875), the engraver, died in 1867. The Art Journal in its obituary (1868, page 48) said of him that: "in private life he had long enjoyed the sincere regard of a large number of friends who found in the integrity of his nature many of the highest social qualities."

Signed monuments and tablets by him include those to John Quantock, 1820, in Chichester Cathedral; John Pusey Edwards, 1822, in the Groverson Chapel; Sir Harry Goring, 1824, at Washington, Sussex; Joseph Watson, 1829, in Bermondsey Parish Church; James Smith, 1832, at Udmore, Sussex; Edward Biggs, 1833, in Barking Parish Church; Lord Gambier, 1833, at Iver, Bucks; Margaretta Ebanks, 1833, in Marylebone Parish Church; Mary Norris, 1836, at Taunton, Somerset; General Sir George Cooke, 1837, at Harefield, Middlesex; William Wickham, 1840, in York Minster; Mary Graves, 1843, in St. Margaret Pattens; and General Taylor, 1846, in Canterbury Cathedral.

(British Museum, Ad. MS. 39,784; authority cited in text.)

HIND, JOHN, of Swithland
fl. 1718-1761

Hind, who was one of the best of the Leicestershire slate-carvers, was apprenticed to William Haxford, a slater of Leicester, in 1718. He signs a large number of works in churchyards in the county, two of his best tombstones being those of Robert Hall, 1754, at St. Margaret's, Leicester, and the Armaton family, 1761, at Cosby, but his finest monument is that to Sir Joseph Danvers, 1745, at Swithland, which has large reliefs of an agricultural landscape, an African sea-port, etc.
He was succeeded by his son, who signs monuments to Edward Dawson, 1788, at Long Whatton, and George Doughty, 1792, at Mount Sorrel.

**HIORN, FRANCIS, of Warwick**

_b. 1744, d. 1789_

His family came from Great Tew in Oxfordshire, where they had been masons since the early seventeenth century, or perhaps earlier. Francis Hiorn, who was born in 1744, was the eldest son of William Hiorn (q.v.). In 1771 he built the gateway at Wroxton Abbey for Lord Guilford (Bodleian, North MSS, C.64), while he was also employed as a mason at St. Michael's, Coventry, in 1788 and at St. Mary's, Warwick, in the following year.

(Authority cited and information, Mr. H. M. Colvin.)

**HIORN, JOHN, of Warwick**

_fl. 1724–1727_

He was presumably a brother of William Hiorn (q.v.) and worked under Francis Smith (q.v.) between 1724 and 1727 on the building of Ditchley Park, Oxfordshire, for the second Earl of Lichfield (Dillon Archives). During the same period he was also employed under Smith at Ombersley, Worcestershire (Archives, Lord Sands).

**HIORN, WILLIAM, of Warwick**

_b. 1712, d. 1776_

He made a number of chimney-pieces, including one for a Mr. Weaver of Morvill Hall, Salop, in 1748, and seven marble ones for Edward Pitts of Kyre Wyard, Worcestershire, four years later (Ass. Art. Society's Report 28, 1905–1906, page 796). In 1751 he executed some carving at Arbury Park, Warwick, where he also made a chimney-piece for the dressing-room (Newdigate Archives).

Hiorn signs the monument to Thomas Crossfield, 1744, in Rugby Parish Church, while in 1751 he made one commemorating Edward Acton for Acton Scott Church, Salop. He received £100 for this work, which was carried out according to a design by William Baker.

He died in 1776 and is buried in St. Mary's, Warwick, where there is a tablet to his memory.

**HISCOCK, J. S., of Blandford**

_fl. 1805–1827_

Hiscock, who had a yard at Poole as well as one at Blandford, was declared a bankrupt in 1827 (New Monthly Magazine, 1827, page 360).

His best tablets, which are all in Dorset, commemorate Mary Wright, 1805, at Wareham; John Bastard, 1809, at Blandford; George Churchill, 1814, in St. Peter's, Dorchester; and Mary Slade, 1816, at Poole.

**HISCOCK, WILLIAM, of Christchurch**

_fl. 1798–1820_

In 1809 he was employed on repairs to Christchurch Priory, Hampshire. All his best tablets are there and include those to Augusta Bullock, 1798; Philip Norris, 1806; and J. Penleaze, 1818.

**HITCH, WILLIAM, of Hertford**

_b. 1793, d. 1832_

He signs tablets in Hertfordshire at Ware, between 1821 and 1829, and also at Datchworth in 1824.

**HOARE, PRINCE, of Bath**

_d. 1769_

He was probably born in Suffolk, and was the brother of William Hoare, R.A. Vertue, writing in January 1749/50, has the following paragraph about Hoare: "As soon as a young statuary came to England from Italy, where he had been to make his studies about seven or eight years, it was advertised in the newspapers that Prince Hoare, statuary, being at Bath, some of the citizens there had proposed by subscription to erect a statue of marble to the memory of Richd. Nash, Esq., who had for forty years past so much encouraged the interest and welfare of that place. This project, no doubt, was also much encouraged by his brother Hoare, an ingenious and well-esteemed painter of portraits, principally in crayons, who had great success in his way and much esteem for his skill and his conduct. This young statuary, his brother, was educated under Mr. Scheemaker, and in early days, growing a tall handsome agreeable person, and somewhat skill'd in music, bids fair for a great man (Walpole Society, Vertue, Vol. III, page 152). Hoare's statue of Beau Nash, which Vertue mentions here, was erected in the Pump Room at Bath, but does not seem to have been unveiled until about 1752.

A much earlier work by Hoare was a bust of Lord Chesterfield. This must have been executed before 1741, for on 15 February of that year Chesterfield wrote to the Bishop of Waterford that "Lady Chesterfield has sent you from Bristol a busto of your humble servant, cast from a marble one done by Mr. Hoare at Bath" (Chesterfield's Works, 1777, Vol. IV, page 241).

In 1759 Hoare made statues of "Helen," "Paris," "Diana" and "Venus" for Stourhead (Archives, Hoare's Bank). He was also employed at Corsham Court, Wiltshire, where, between
1760 and 1762, he made chimney-pieces, including those for the library and a bedroom. Three years later he supplied others, for which he received £75 (Methuen Archives). His “Copy of the Wild Boar at Florence” and “Bust of a Vestal” were made for Sir Robert Throckmorton, probably in 1754, for there are payments to him entered in Sir Robert’s account-book in that year, and these two works are specifically mentioned in the inventory, drawn up by the latter in 1788, of the contents of his houses at Buckland and Coughton.

Hoare also carved a few busts, including three in Bath of Ralph Allen (1757) at the Hospital; Richard Nash (1761) in the Guildhall; and Pope in the Art Gallery.

He died at Bath on 8 November, 1769 (London Magazine, 1769, page 593), having previously married on 4 May, 1751, an heiress—Miss Coulthurst, of Melksham, Wiltshire—with a fortune of £6,000 (Gentleman’s Magazine, 1751, page 284).

Hoare’s monuments, lavishly adorned with coloured marbles, are typical of the period, the finest of them commemorating Bishop Maddox, 1743, in Worcester Cathedral. This has a life-size female figure with a down-turned torch in her hand, while on the sarcophagus is a relief of “The Good Samaritan.” His monument to Pope, who died in 1744, was erected in Twickenham Parish Church in 1761 to the order of the poet’s friend, William Warburton.

Other signed monuments by Hoare include those to Jacob Selfe, 1730, at Melksham, Wilts; Mary Hilliard, 1745, at Kilmerdown, Somerset; John Long, 1746, at Hedington, Wilts; Lady Cobb, 1749, at Newton St. Loe, Somerset; Jacob Babclay, 1750, Weston, Wilts; the Eyles family, 1757, in Devizes Parish Church; Thomas Dawtrey, 1758, at Petworth, Sussex; Thomas Collins, 1761, in St. Leonard’s, Exeter; Anne Carey, 1762, at Steeple Aston, Wilts; and John, Lord Trevor, 1764, at Bromham, Beds.

HOBDAY, SAMUEL, of Evesham
He signs a tablet to Bernard Baldwyn, 1816, at Aston-sub-Edge, Gloucestershire.

HOBBSON, AARON, of Enfield
fl. 1826–1830
He signs a large wall-tablet to James Major, 1826, in Enfield Parish Church. His yard was in London Lane. He was also a dealer in “Welch black marble.”

HOCKLEY, DANIEL
He signs a large tablet to Thomas Wolfe, 1819, at Arkesden, Essex.

HOCKLEY, JOHN, of London
b. c. 1731
He was a son of Thomas Hockley, a tallow-chandler of Godalming, Surrey, and was apprenticed to Thomas Bull the Elder (q.v.) in 1745. Five years later, however, he was turned over to Thomas Bull the Younger (q.v.) and finally became free in 1752.

By 1760 Hockley had set up on his own and his address appears in the Court Book of the Masons’ Company as “Old Broad Street, opposite the Pay Office.” In 1774 he succeeded to the post of Assistant to the Company on the death of J. Deval (q.v.).

He signs large and curious monuments of an architectural type to Mrs. Gildart, 1758, and John Hayley, 1763, in the churchyards of Totteridge, Hertfordshire, and Hendon, Middlesex, respectively.

HODGES, WILLIAM
His father, William Hodges, became free of the Masons’ Company in 1734. The younger Hodges received a premium from the Society of Arts in 1759 for a clay model of birds.

HODGSON, J. of Driffield
He signs a large wall-tablet to William Scholecraft, 1805, at Hovingham, Yorkshire.

HOGAN, JOHN
b. 1800, d. 1858
He was born at Tallow, Co. Waterford, on 14 October, 1800, the son of a carpenter named John Hogan, and in 1816 was apprenticed to Thomas Deane, a builder and architect, for whom he worked as a carpenter and woodcarver. In 1823 he attracted the attention of W. P. Carey, the Irish engraver, who recognized his genius and resolved to help him.

Carey not only interested Lord de Tabley in his protégé, but also appealed for funds to allow him to study in Rome. A sum of £250 was collected and Hogan set out for Italy, where he remained, except for brief intervals, until 1848. He soon made a name for himself, and Thorwaldsen, when he was leaving the country, is supposed to have said: “My son, you are the best sculptor I leave after me in Rome.” In 1840 he was elected a member of the Society of “Virtuosi al Pantheon,” the first British subject to be so honoured since its foundation in 1500 (Art Union, 1840, page 41).

In 1845 Hogan sent from Rome a marble statue of Mr. Crawford, but unfortunately it was packed in tan and resembled an Egyptian mummy
HOLBERT, —

Holbert, who was assistant to John Nost (q.v.), carved a chimney-piece in purple marble for the long gallery at Hampton Court in 1701 (P.R.O., Works 5/52).

HOLDER, JAMES, of Emsworth
fl. 1818–1824

His best tablet, in a delightful neo-Hellenic style, commemorates John Campbell, 1818, at Westbourne, Sussex. He also signs others to Miles Monk, 1821, at Funtington in the same county, and to John Walker, 1824, at Warblington, Hampshire.

HOLDER, T., of Tewkesbury
fl. 1793–1820?

He signs a tablet to Thomas Hill (d. 1793) in All Saints Church, Evesham. Another to William Gedge, 1820, at Orpington, Kent, which may also be his work, is signed “T. Holder sculpt. John Mullins arc.”

HOLLINS, PETER
b. 1800, d. 1886

He was born on 1 May, 1800, in Great Hampton Street, Birmingham, the eldest son of W. Hollins (q.v.), and trained in his father's studio until about 1822, when he went to London to work under Chantrey (q.v.). On his return to Birmingham he assisted his father who was then working at Alton Towers, carving much of the ornamental work in the grounds.

Hollins's first independent work was the bust of Edward Grainger, referred to by Mr. Elkington in his letter to the Editor of Aris's Gazette, published in the issue of 20 December, 1824. After expressing surprise at its “masterly execution,” the writer added that “it certainly would not disgrace the chisel of the most experienced artist.” In 1828 the sculptor returned to London with his friend, Harry Room, a Birmingham portrait-painter, and together they shared a studio at 17, Old Bond Street. Here in 1833 Hollins held an exhibition of his works, which included a “Colossal Group of the Murder of the Innocents,” and busts of Thomas Bateman, William Macready, T. Telford, and the Hon. Mrs. Norton. In the same year the Annals of the Fine Arts said of him that: “there is not a young artist of the present day whose efforts deserve greater encouragement. Every subject undertaken by him is executed with great care and fidelity and in a most refined taste.”

Two years before this he had been awarded the “Sir Robert Lawley” Prize by the Birmingham Society of Arts for his group entitled “Conrad and Medora.”

In 1835 or 1836 Hollins visited Italy and, on his return, received various important commissions. In 1843 he went back to Birmingham and took over the family business on the death of his father, which occurred shortly afterwards. He exhibited at the Royal Academy, 1822–1871, and sent his “Murder of the Innocents” to the Great Exhibition of 1851. He died on 16 August, 1886, in the house in which he was born. About twelve years before his death he had been forced to give up work, being practically disabled by rheumatism, the result of working in wet clothes (Birmingham Daily Post, 18 August, 1886).

Hollins at his best was a very great artist and his monuments to Lady Bradford and Sophia Thompson are as fine as anything executed by Chantrey. Of the two, that commemorating Lady Bradford, 1842, at Weston, Salop, is the more beautiful; she is portrayed lying on her death-bed, while behind her is a large relief of angels receiving her into Heaven. The figure of Mrs. Thompson, 1838, in Malvern Priory, is superbly carved and shows her reclining on a couch. At first sight this monument appears to have been influenced by the work of Chantrey, but a closer examination soon proves its complete individuality.

Hollins's statue of Sir Rowland Hill, which he made for his native city, has had a chequered career. It was erected in 1868 in the Birmingham Exchange, but was removed to the new General Post Office in 1874, and again to newer Post Office headquarters in 1891. In 1940 it was taken down and sent away “for safety,” but has apparently been mislaid (information from Birmingham Public Library).
(Langford's *Modern Birmingham*, Vols. I and II; Authorities cited in text.)

**STATUES**
- 1825 Marques of Anglesey: Exhibited Royal Academy
- 1834 Daughter of Vincent Thompson: Exhibited Royal Academy
- 1840 Rev. Dr. Warnford: Warnford Lunatic Asylum, nr. Oxford

- 1870 Dudley, Worcs: John Badley

**HOLLINS, WILLIAM**

*b. 1763, d. 1843*

There seems to be a certain amount of confusion concerning the date of Hollins's birth. He was the son of John and Mary Hollins, of Shifnal,
Salop, and was born in 1754, according to the Dictionary of National Biography. Langford, in his Modern Birmingham (Vol. I, page 31) makes it ten years later, but both are wrong, for the date is given as 18 March, 1763, on Hollins's monument in the graveyard of St. Paul's Church, Birmingham.

Hollins was a self-taught artist who passed practically all his life in Birmingham. Here he carved the figures over the doorway of the Dispensary in Union Street and carried out the "Gothic" restoration of Handsworth Parish Church in 1820. With his son Peter (q.v.) he also prepared the south chapel for Chantrey's statue of James Watt.

As an architect he did a good deal of work in Birmingham, designing Soho House and the Institution for Promoting the Fine Arts. For Lord Shrewsbury's seat at Alton Towers he planned the garden-buildings and executed the stone-carving, and he was also, rather strangely, the architect of the Royal Mint in St. Peter'sburg. In 1806 he produced a design for the Birmingham memorial to Nelson. This was to consist of a pillar, 100 ft. high, based on "an appropriate building with two fronts suitable for a dispensary and a post-office," but fortunately the Selection Committee preferred the simpler design submitted by Westmacott (Birmingham Gazette, 9 July, 1806). In the following year Hollins designed the "Egyptian Conduit" in the Bull Ring.

Hollins exhibited at the Birmingham Society of Artists, 1827–1840, showing in 1827 "a medallion of James Watt" and "Thetis," and also busts of the Marquess of Anglesey and E. J. Littleton. In 1830 he exhibited a bust of George IV, and in 1840 a marble statue of Catherine Jenner. At the Royal Academy he showed busts of Archdeacon Outram (1821), the Earl of Shrewsbury (1822) and the Marquess of Anglesey (1822). He also modelled a number of wax portraits.

His monuments are not as fine as those of his son, although that to Alexander Forrester, 1817, in All Saints', Leicester, is a fine classical stele. He died on 12 January, 1843, and was buried under a granite obelisk in the churchyard of St. Paul's, Birmingham. A window in the south aisle of the same church commemorates him and his family. The stained glass is insignificant, but the sculptured marble surround is most arresting. The carving represents flowing foliage, which forms cartouches containing the names and dates of the various members of the family; on the right-hand side is a bust of William Hollins himself by his son Peter, who may be presumed to be responsible for the whole design. Hollins's wife, Catherine, died in 1831. They had another son named William, born on 20 December, 1788. He acted as assistant to his father and died on 22 August, 1831.

Hollins signs monuments to John Freer, 1808, in Handsworth Parish Church; to William Withering, 1808, at Edgbaston; to John Wainwright, 1810, at Dudley, Worcs; to Samuel Addison, 1817, at Wednesbury, Staffs; and to Mary Sayer, 1823, at Moseley, Worcs. His monuments to James Goddington, 1821, and Benjamin Spencer, 1823, are both at Aston, Birmingham; and those of Thomas Cooper, 1818, Edmund Outram, 1821, and David Owen, 1823, are all in Birmingham Cathedral.

HOLLY, J., of London
fl. 1820–1836

He seems to have had an unfortunate career, for he became a bankrupt in 1821 and again in 1828. He signs a neo-Hellenic tablet at Clerkenwell to Thomas Greatrex, 1824, while his tablet at Lutterworth, Warwick, to Henry Ryder, Bishop of Lichfield, 1836, has a medallion portrait.

HOLLOWAY, THOMAS
fl. 1773–1792

He exhibited at the Royal Academy from 1773 until 1792, showing wax portraits, pictures in oils and crayons, and engraved gems, the most interesting in the last category being a "portrait of the Rev. Mr. Wesley, impression of a seal from life" (1773).

HOLM, or HOLME, LAWRENCE ANDERSON
fl. 1760–1774

He came to Britain from Denmark some time before 1760, and in 1762 made the model of the State Coach which had been designed by Sir William Chambers (Builder, 1854, page 72). Two years later he was working as assistant to William Atkinson (q.v.), and also received a premium from the Society of Arts for a bas-relief in marble of "Hector Parting with his wife." Between 1765 and 1767 he was paid nearly £200 by the same society for two large statues in marble of "Oedipus Expounding the Riddle to the Sphinx" and "Sophonisba with a Cup of Poison" (Archives, Society of Arts).

In 1771 Holm received £408 for the decorative sculpture and the chimney-piece for the "Great Room near Exeter Exchange" which the Society of Artists were then building so that they could hold exhibitions in a place of their own (Archives, Society of Artists). Three years later the Vintners'
Company paid him £87 for “carving and gilding large figures” (Archives, Vintners’ Company), and shortly afterwards he apparently returned to Denmark.

Holm exhibited at the Society of Artists, 1761–1773, showing a number of works, including busts of Sir Edward Hulse and George Grenville in 1763 and 1768 respectively. He signs three monuments—to Thomas Prowse, 1767, and to Abigail Prowse, 1763, both at Axbridge, Somerset, and a third to Sir Edward Hulse, 1759, in the churchyard of Wilmington, Kent.

(Authorities cited in text.)

HOLMES, SARAH, of Brentford
fl. 1811–1835
Her work is dull and conventional and consists of a semi-urn in a similar design. She signs tablets in Middlesex to Herbert Swyer, 1811, at Isleworth; John Howard, 1818, in St. Laurence’s, Brentford; Thomas Smith, 1823, in Ealing Parish Church; and George Engleheart, 1833, at East Bedfont. Her tablet to Viscount Falkland, 1827, is at Rudby, Yorkshire.

HOLT, JOHN
He signs a tablet at Spratton, Northamptonshire, to Thomas Chapman, who died in 1826. He may perhaps be the same John Holt (born in 1808) who joined the Royal Academy Schools in 1830.

HONE, ALFRED
fl. 1836–1855
He may have been a son of the writer, William Hone (1780–1842), as Alfred exhibited his bust at the Suffolk Street Galleries in 1836. He exhibited at the Royal Academy, 1836–1852, showing a number of busts, including those of Joseph Parkes (1836); Thomas Slingsby Duncombe (1843); and T. Pollock (1852). His bust of Thomas Addison, executed in 1838, is at the Royal College of Physicians, and another of Mrs. Duppa, dating from the following year, at Sharsted Court, Kent.

HONEYBONE, —, of Shrivenham
He signs a tablet with a relief of “Faith” to Elizabeth Batson, 1808, at Ramsbury, Wilts.

HOOKEY, JOHN,
of Southampton
fl. 1792–1808
He was the son of G. Hookey, a mason of Southampton, whose widow died in 1802 (Monthly Magazine, 1802, page 1951). His large wall-tablets in coloured marbles are well above the average work of the provincial statuary of the period.

Hookey signs two tablets at Lymington, Hampshire, to Jeremiah Meylar, 1792, and James Allen, 1808. His tablet to John Stewart, 1796, is at North Stoneham in the same county.

HOOPER, JOHN
fl. 1761–1768
He was employed at Audley End, 1761–1764, not only as a mason, but also to execute a considerable amount of carved Gothic stonework (Essex Record Office, D/DBY. A243).
In 1762 Hooper built, from a design by Leadbitter, the temple in the park at Ditchley, Oxon, the seat of the Earl of Lichfield. He also carved all the stone columns, the capitals, pilasters, cornice, etc. In 1768 he built the lodge in the “New Park” at Ditchley (Dillon Archives).

HOPE, SAMUEL and J., of Manchester
fl. 1780–1801
Their monuments and tablets, which are well designed and quite ambitious works with well-carved details, include those to Anna Legh, c. 1780, at Rostherne, Cheshire; Mary Sayer, 1781, and John Caygill, 1787, both in Halifax Parish Church; Hugh Hall, 1788, at Bowden, Cheshire; John Glegg, 1789, at Goostrey, Cheshire; Margaret Toosey, 1795, at Stockport, Cheshire; Thomas Drinkwater, 1797, at Salford, Lancs; and James Brown, 1801, in the Parish Church of Ashton-under-Lyne. The later works are signed only by Samuel Hope.

HOPKINS, —, of Bath
He signs a square memorial with an oval inscription tablet to Ann Bathurst, 1804, at Lydney, Monmouthshire.

HOPKINS, JORDAN, of Swindon
He signs a tablet to John Stratton, 1718, at Brinkworth, Wilts.

HOPKINS,
WILLIAM ALEXANDER
fl. 1815
He attended the Royal Academy Schools in 1840 on the recommendation of Eastlake, and four years later exhibited at the Academy a bust of “the infant son of H. E. Kendall, Esq., Jnr.” After that date, however, all trace of him is lost.
HOPPER, HUMPHREY

b. 1767

He did not attend the Royal Academy Schools until 1801, gaining a Silver Medal in 1802 and the Gold Medal in the following year for a group of "The Death of Meleager."

Hopper was a competent, indeed occasionally a very good, sculptor, but he was at his very worst when given a commission for a large national monument. The responsibility seems to have paralysed his invention, as the lamentable mass of marble commissioned by the House of Commons to commemorate General Hay (1814) in St. Paul's Cathedral only too clearly shows. The figure of the falling General is merely absurd, while Smyth in his Genii of St. Paul's (Vol. II, page 76) notes that "the man upon whom Hay falls is naked" and goes on to remark rather pompously that "this is a most perverse licence, and what is more provoking, he seems to be placed as he is merely for the sake of a display of art and the effect of attitude. There is not an expression about him to indicate concern for the melancholy charge he happens to support."

Some of Hopper's smaller monuments, however, have charm and distinction and well-carved reliefs, although the majority of his later tablets are unfortunately poor works in spiky "Gothic." He also designed lamps, and one in the possession of Mr. Derek Sherborn is dated 25 December, 1820. It is in plaster, standing about 4 ft. high, and takes the form of a draped female figure with an eagle at her side, her right hand holding the lamp.

In 1812 Hopper made terra-cotta or plaster statues, apparently representing four of the Muses, for the Ballroom in the County Hall at Lewes, where they still remain, though now relegated to passages.

He exhibited at the Royal Academy, 1799–1834, showing busts of Dr. Thornton (1815); Lord Beresford (1815); Lord Hill (1815); John F. Johnstone (1817); C. C. Western (1825); and Wellingdon (1828). A plaster-cast of the last-named is in Lewes Town Hall.

HORSNAILE, CHRISTOPHER, the Elder

fl. 1700–1742

He became free of the Masons' Company in 1700 by service with Herbert Paine, and eight years later was living at "Blackfriars, at the Bell in Glasshouse Yard" (Archives, Masons' Company).
Horsnaile was a partner of Edward Stanton (q.v.) who, in his will (1734), leaves to "Mr. Christopher Horsnaile, my honest and industrious co-partner, £40." Together they had been appointed masons to Westminster Abbey in 1719-1720 and after his partner's death Horsnaile carried on by himself until 1739. The partners made a number of chimneypieces for Ditchley Park, Oxon, the seat of the second Earl of Lichfield, in 1725. These included one of "agate marble, consisting of architraves, moulded mantel and jambs," and, for the hall, one with a "Portland architrave and two terms of fine statuary marble, standing at each side, each term being 6 ft. high curiously carved." For the library in the following year they made two, one of black and yellow marble, which cost £60 and the other of purple marble. They also made "two fine agate tables" (Dillon Archives).

As a mason, Horsnaile was employed at Hoare's Bank, 1726-1738 (Bank Archives). In 1727 he was paid £17 16s. 6d. by Lord Folkestone for a chimney-piece for his London house (Archives, Earl of Radnor). In 1722 he had been employed at the Royal College of Physicians in Warwick Lane (College Archives), and in 1733 he rebuilt Bishopsgate, receiving £300 and an extra £80 for "the City arms in a shield, with a cap of maintenance and dragons to stand on the attic over the great arch" (Journal Committee City Lands, Vol. XXV, page 166, and Vol. XXVI, page 180). In the same year he was paid £214 for work at the dormitory of Westminster School.

Horsnaile was also mason to the Inner Temple from 1737 to 1742, repairing in 1737 the south side of the Temple Church, and in 1741 the front of the Hall for which he was paid £767 (Roberts' Inner Temple Records, Vol. IV). In 1737, in partnership with John Deval the Elder (q.v.), he rebuilt St. Olave's, Southwark, and also provided the "communion table" at a cost of sixteen guineas (Builder, 1844, page 253).

As a statuary Horsnaile is important. The finest monument made by him without the assistance of Stanton is that to Sir Jacob Garrard, 1730, at Langford, Norfolk, with its recumbent figure of the knight, while figures of his two sons stand to left and right. His other two independent works—those to William Rogers, 1731, at Dowdeswell, Glos, and to Sir John Philips, 1736, at Haverfordwest, Pembroke—both have portrait-busts. The monuments which he signs with Edward Stanton are all important works and are always signed with the latter's name first. The best is that to Thomas Vernon, 1721, at Hanbury, Worcs, which has a life-sized reclining effigy and standing figures of "Justice" and "Learning."

Another, to William East, 1726, at Witham, Essex, has a portrait-bust.

Other signed works by the partners include monuments to Bartholomew Layton, 1702, at Ringwood, Hants; Anne, Lady Hodgson, 1719, at Marston, Lincs; Robert Plyeddell, 1719, at Ampney Crucis, Glos; Alice, Lady Brownlow, 1721, and William Brownlow, 1726, both at Belton, Lincs; Thomas Renda, 1722, at Wallingford, Berks; George Cressiner, 1722, at Earl's Colne, Essex; Jacob Wishart, 1723, at Leatherhead, Surrey; Bishop Fleetwood, 1723, in Ely Cathedral; Sir John Sherard, 1724, and Sir Richard Sherard, 1730, both at North Witham, Lincs; Sir John Blencoe, 1726, at Marston St. Lawrence, Northants; Lady Benet, 1727, at Warminster, Sussex; and William Beaumont, 1718, at Great Dunmow, Essex.

HORSNAILE, CHRISTOPHER, the Younger
d. 1760

Son of Christopher Horsnaile the Elder (q.v.) he was apprenticed to his father in 1708 and became free on 8 January, 1719, the same day as William Stanton, son of his father's partner, Edward Stanton (q.v.)

The younger Horsnaile was given considerable employment at the Mansion House, to which he put some of the finishing touches, supplying all the chimneypieces on the lower floor at a total cost of £900. Apparently some of these were unsatisfactory, for Dance, architect of the building, wrote in his report of 1753 that "the slabs of the chimneypieces are not entire, but made out with some little pieces in the breaks thereof"; also that "the marble of two of the chimneypieces is pretty much stained and the carving but indifferently performed." Horsnaile was also paid for busts, but of these Dance says that "the bustos in all the rooms are but indifferent casts." Nor was this the only trouble over Horsnaile's work. There had been a previous discussion in 1752 about "the regalia at the front of the Mansion House." Horsnaile refused to alter anything, except the "handle of the sword," but a year later agreed that if Dance would redraw the shield, he would make the model. This was accordingly done and the new model laid before the Committee, who found, however, that "the mace had not relievo enough" and ordered Horsnaile to make it bolder "by raising the said mace three-quarters of its substance." He was also paid £88 for marble tables, but these apparently survived the scrutiny of both Dance and the Building Committee without mishap. In 1755 he was paid £450 for "fluting.
the pillars” (City Corporation Records, Mansion House Building Accounts).

Horsnaile was also employed by Mr. John Nicholl, father of Lady Carnarvon, at his house in Red Lion Square in 1748 (Chandos Archives, Middlesex Record Office). He died 21 January, 1760 (London Magazine, page 107). His son, another Christopher Horsnaile, became free in 1747 “by service with his father.”

HORSON, EZRA, and WARRINGTON, JOSEPH

In 1686 they were employed at Grimesthorpe, making windows, cornices, chimney-panels and a doorcase of hewn stone (Wentworth, Woodhouse Archives).

HORWELL, CHARLES

b. 1754

He was born on 1 April, 1754, and attended the Royal Academy Schools in 1777. Here he won a Silver Medal in 1784, while the Gold Medal was awarded to him four years later for his group of “Achilles’ Grief at the Death of Patroclus.” In 1787 he had gained the Silver Palette from the Society of Arts for a figure of “Psyche.” In 1796 he was employed on decorative work at the house of Lord Mornington in Park Lane (Soane Notebooks).

Horwell exhibited at the Royal Academy, 1785–1807, showing busts, designs for monuments, and tablets for chimney-pieces. He signs the monument to Christopher Anstey, 1805, in Westminster Abbey.

In 1809 his daughter married Richard Woodman, the engraver (Art Journal, 1860, page 47).

HOSKINS, JAMES
d. 1791

In 1772, with his partner, Samuel Euclid Oliver (q.v.), he made two statues for Marsham Hatch in Kent, one in plaster of “Apollo” for the parlour, and the other, a lead figure of “Mercury,” for the “mount” (Archives, Lord Brabourne).

In 1770 Hoskins and Oliver had started working for Wedgwood, for whom they modelled “16 round basso relievo’s, busts of Cicero and Horace, a relief of Ganymede and Bacchus,” as well as “a tail of a Dolphin” and “the rock for the Neptune.” By 1775 the firm had become “Hoskins and Grant” (See Grant, Benjamin) and supplied Wedgwood with busts of “Swift, Milton, Spenser, Chaucer, Addison, Pope, Locke, Dryden, Dr. Johnson, Ben Jonson, Sir William Reigley, Prior, Congreve, Fletcher, Beaumont, Bacon, Boyle, Harvey and Newton.” Four years later they made busts of “Garick and Sterne” (Wedgwood Archives).

Hoskins, who held the post of “moulder and caster in plaster” to the Royal Academy from its foundation until his death, made “casts of two lions” in 1773 for which the Academy paid him twenty guineas (Royal Academy Archives). In 1790 he supplied four enriched Etruscan vases and eight small bronze figures for the house of Lord Delaval in Portland Place (Soane Notebooks). He also executed a plaster bust of Robert Adam, the architect, which was Lot 10 at the latter’s sale, held on 22 May, 1818.

HOWARD, ISAAC

In 1699 he made brass figures of a “Tartar on horseback, a large Mercury and a head of Oliver Cromwell” for Thomas Coke, of Melbourne Hall, Derbyshire (Archives, Marquess of Lothian).

HOWE, J.
fl. 1829–1842

Between 1829 and 1842 he exhibited busts and medallic portraits at the Royal Academy, including those of a Mr. Gardener in 1829, and of Andrew Ducrow, the equestrian, in 1842.

HUGGINS, WILLIAM

b. 1756

He was born in March, 1756, and joined the Royal Academy Schools in 1773, winning a Silver Medal two years later. In 1790 he exhibited at the Academy a bas-relief of “Commerce Presenting Abundance from the Four Quarters of the World to Britannia” (Royal Academy Archives).

HUGH, J.

He signs a tablet to William Graffitt, 1799, at Laugharne, Carmarthen.

HUGHES, ROBERT BALL

b. 1804, d. 1868

He attended the Royal Academy Schools in 1818, giving the year of his birth as 1804—not 1806, as stated by the Art Journal in its obituary notice. In 1819 and 1822 he was awarded Silver Medals and, in 1823, the Academy Gold Medal for a bas-relief of “Pandora Brought to Earth by Mercury.” In 1820 he also received a Silver Medal from the Society of Arts for his copy of the Barbarini Faun. On leaving the Schools he entered the studio of E. H. Baily (q.v.), where he studied and worked for seven years.

In 1829 Hughes left England for New York and
remained in the United States until his death, which took place at Dorchester, near Boston, on 6 March, 1868. Soon after his arrival in the city he executed a marble statue of Alexander Hamilton for the Merchants' Exchange, a building which was burnt to the ground shortly afterwards. This was the first portrait-statue to be executed in America. and a small model of it is now in the Boston Athenæum, together with the sculptor's group of "Uncle Toby and the Widow Wadman."

Other works by Hughes include a bust of John Trumbull, now in the Yale Art Gallery, Newhaven, Connecticut, and the monument to Bishop Hobart in Trinity Church, New York. His seated statue of Nathaniel Bowditch, the navigator, was cast in bronze and was also the first of its kind to be made in the United States. It stands over Bowditch's grave in Mount Auburn Cemetery, Cambridge, Massachusetts, and is inscribed on the base "Executed by Ball Hughes, 1847" and "Recast by Gruet Jos. Fondeux." The original casting was so inferior that the family had to have it redone in Paris, which explains the double inscription.

Hughes exhibited at the Royal Academy, 1822–1828, showing various busts, including those of the Dukes of Wellington and Sussex in 1826, and a statue of "The Shepherd Boy" two years later. In 1851 he made a statue of "Oliver Twist" for the Duke of Devonshire.

(Lorado Taft's American Sculptors; Art Journal, 1868, page 128.)

HUGHES, THOMAS

b. 1809

In 1825 he received from the Society of Arts a large Silver Medal for a model of a bust, and in the same year joined the Royal Academy Schools on the recommendation of E. H. Baily (q.v.), in whose studio his brother, Robert Ball Hughes (q.v.), was then working.

The younger Hughes exhibited at the Royal Academy, 1826–1836, where his works included several busts. He also sent his figure of "Eve" to the Great Exhibition of 1851.

He showed a bust of Theodore von Holst at the Suffolk Street Galleries in 1829.

HULL, S., of Leicester

fl. 1818–1850

Hull's monuments, whether signed by himself alone or with his partner, Pollard, are nearly always neo-Hellenic in design, the best being one to Stephen Peet, 1834, at Mount Sorel, Leicestershire, which has a relief of a cherub with a downturned torch.

Other signed works by Hull include those to the Rev. Auley Macaulay, 1818, at Rothley, Leics; Henry Bickley, 1820, in the churchyard at Peckleton, Leics; George Pochin, 1831, at Barkby, Leics; James Swan, 1831, at Ridlington, Rutland; Mary Miles, 1837, and Mary Clare, 1838, both at Cosby, Leics; the Rev. Henry Sheild, 1840, at Preston, Rutland; and the Rev. Samuel Heyrich, 1840, at Brampton Ash, Leics. Monuments signed by Hull and Pollard (all in Leicestershire) commemorate Elizabeth Corrance, 1818, at Foxton; John Heyrick, 1822, in Leicester Cathedral; Colonel William Hulse, 1825, at Cossington; and Mary Wood, 1828, in St. Mary's Church, Leicester.

HUMPHERY, THOMAS, of London

fl. 1786–1815

Humphrey, who was apprenticed to William Vere (q.v.) in 1786, signs two tablets in memory of John Charrington, who died in 1815. One of these is in Stepney Parish Church, and the other at Aldenham, Hertfordshire.

HUNT, JOHN, of Northampton

fl. 1710–1744

Hunt was a pupil of Grinling Gibbons (q.v.) for Sir Justinian Isham, writing to his son in 1714 on the subject of a family monument, suggests that it should be entrusted to him, as "he is accounted a good workman, being apprenticed to Gibbons ye carver" (Isham Archives).

Hunt was the leading sculptor and statuary in Northamptonshire for many years. He became a Freeman of Northampton on 25 September, 1712, being admitted "gratis for carving King Charles's statue," the same statue which is now above the portico of All Saints' Church. (Town Archives.)

Two years previously he had carved the large triangular relief of Diana on the garden front of Hinwick House, Bedfordshire (Orlebar Archives). This shows the goddess in her chariot and is a spirited work, though perhaps a little rustic and naive in treatment.

His best piece of sculpture is the delightful alabaster bust of Cilena l'Anson Bradley, 1726, in Long Buckby Church, Northants, which is quite equal to London craftsmanship of the period. Baker in his Northamptonshire (Vol. I., page 236) states that there was a bust of Hunt himself (whom he wrongly alludes to as "Henry") at Upton Hall, Northants, in 1822. This apparently is no longer in existence. In the archives of General Norman of Bromley is the inventory dated 1714 of the contents of the house at Bromley, Kent, belonging to
Mr. William Emmett, the younger (nephew of William Emmett, q.v.)—among the objects in the hall is noted “a very good piece of carving done by Hunt.”

In the interior of the church at Normanton, Rutland, is the following inscription: “Built by Sir Gilbert Heathcote, 1764; William Cantrel, Rector; Mason, carpenter and joiner, Jon Hunt, Matw. Fancourt.” This is rather a puzzling statement for, according to other records, the church was built ten years earlier. When it was repaired in 1911 the inscription-stone was removed and the difference in dates may be due to careless recutting. I imagine, but am not certain, that the inscription refers to John Hunt, of Northampton.

Hunt was a popular statuary. His most important monument, that to Sir William and Lady Boughton, 1716, is at Newbold-on-Avon and has life-size standing figures of the baronet and his wife. Other signed monuments by him in Northamptonshire include those to Sophia Whitwell, 1711, at Oundle; Frances Stratford, 1717, and Edward Stratford, 1721, both at Overstone; Samuel Knight, 1721, at Wellingborough; William Wykes, 1721, at Hazelbeech; John Perkins, 1728, at Kislingbury; Rebecca Ivory, 1728, Benjamin Kidd, 1731, Anthony Eynead, 1741, and Dorcas Stratford, 1744, all in All Saints’, Northampton; Richard Cumberland, 1731, at Peakirk; Mary Shortgrave, 1732, and John Smith, 1742, both in St. Peter’s, Northampton; Thomas Peace, 1732, at Hardingstone; Elizabeth Trimmell, 1737, at Brockhall; William Watson, 1738, at Spratton; John Raynford, 1740, at Faxon; and Samuel Pennington, 1743, in St. Giles’, Northampton. He also signs two monuments in Bedfordshire—to Diana Orlebar, 1716, at Podington, and William Carter, 1728, at Turvey; and one in Warwickshire—to Sir John Shuckburgh, 1724, at Shuckburgh.

HUNT, WILLIAM, of London
fl. 1668–1718

Hunt, who was apprenticed to William Stanborow in 1668 and became free in 1677, made a sundial for Sir Charles Kemerys in 1692 for which he received ten guineas (Account-book of Sir Charles Kemerys, possession author).

He is presumably the William Hunt who was paid £30 in 1718 for “carving the stone door-case” of Aylesbury Free School, a building which is now the Aylesbury Museum (Free School Archives).

HUNTER, HUGH, of London
fl. 1782–1796

He signs large tablets with good detail to

In 1796 he built Cleveland House, London, for the Duke of Bridgewater, being responsible for all the carved stone-work, Portland stone chimney-pieces, etc. (Archives, Lord Brownlow).

HUNTINGDON, JOHN
fl. 1731–1740

Between 1737 and 1740 he was working at Lord North’s London house, his address being given as “Henrietta Street” (Bodleian, North MSS. C.58).

The large and imposing architectural monument to Miss Elizabeth Cromwell, 1731, at Hursley in Hampshire, is signed “G. Sampson, architect, John Huntingdon fecit.” Sampson was the architect of the first Bank of England, but I know of no other monumental work by Huntingdon.

HURLE, J., of Frome

He signs a tablet to Elizabeth Hooper, 1808, at Westbury, Wiltshire.

HURST, EDWARD
fl. 1698–1714

He made the large monument to Sir Gilbert Lort, 1698, in Westminster Abbey. This is now dismantled, but there is an illustration of it in Dart’s Westmonasterium (Vol. II, page 121).

Hurst signed the monument with portrait-busts of John and Mary Bohun and their daughter Mary, erected c. 1709 in Holy Trinity, Coventry. The monument to Elizabeth Saunderson, 1714, at Glentworth, Lincolnshire, is also signed.

HUSKINSON, or HUSKISSON, SAMUEL, of London
b. c. 1706

He was a son of William Huskinson, of Little Appleby, Leicestershire, and was apprenticed to Francis Commins, of London, in 1720, becoming free seven years later.

His monuments are large, architectural works, the most important being that to Catherine Michell, 1731, at Petersfield, Hants, which is about 14 ft. high. Huskinson also signs monuments to Ann Thirkell, 1738, at Kinsburn, Warwick, and to Hester Probert, 1742, at Denham, Bucks.

HUTCHINSON, EDMUND, of Spalding

He was a pupil of William Sandes, an architect, and carved in 1751 the monument of his master erected in Spalding Church (Nichols’ Literary Anecdotes, Vol. 6, page 72).
IBACK, JOSIAS
fl. 1679–1694

He made the equestrian bronze statue of
Charles II at Windsor Castle, and cut into one of
the horse's hoofs are the words "Josias Iback
Stadtt Blarensis 1679 Fudit." The words "Stadtt
Blarensis" are difficult to understand, but they may
mean that Iback came from Bever in Hanover (for
a discussion on this point, see Hope's Windsor

Sir Christopher Wren in a letter to the Bishop
of Oxford, written in 1682 on the subject of a
bronze statue for Tom Tower, Christ Church, tells
him that "the horse at Windsor was at first cut in
wood by a German and then cast by one Ibeck a
founder in London, but this is the dearer way, if
wee can find a good statuary for brasse it will be
t better" (Wren Society, Vol. V. page 22).

Iback's name appears in the list of Denizations
for 22 June, 1694 (Huguenot Society Publications,
Vol. XVIII, page 234).

INCE, ANTHONY

He was probably a Mansfield mason and signs a
tablet to Peter Bayston, 1753, at Tuxford, Notting-
hamshire. He may also be a son of that Thomas
Ince of Mansfield who, in partnership with James
Osborne (q.v.), was one of the master-masons for
building Welbeck Abbey in 1743 (Archives, Duke
of Portland).

IRELAND, SAMUEL, of London
fl. 1775–1805

He was the son of John Ireland, a carpenter of
Horsham, and in 1768 was apprenticed to William
Ireland (q.v.), who was probably a relation. In
1775 he became free and later set up on his own in
Cannon Street. In 1800 Ireland was working at
Vintners' Hall (Company's Archives), and five
years later became Master of the Masons' Com-
pany. He was mason to the Cordwainers Com-
pany from 1788–1798 and again from 1800–1805
(Company's Archives).

IRELAND, WILLIAM, of London
fl. 1764–1783

Ireland, who was a Freeman of the Masons'
Company, exhibited a figure of "The Young
Bacchus" at the Society of Artists in 1769. Graves,
in his Exhibitors at the Society of Artists, says that
Ireland also showed a number of pictures there
between 1764 and 1783, but I am uncertain
whether the artist and the sculptor were the same
person.

IREMONGER, THOMAS
fl. 1744–1751

In 1744 he was appointed master-mason for
building Hampden House, Buckinghamshire. In
1751 he built the "Gothic" porch, for which he
also executed the stone-carving (Archives, Earl of
Buckinghamshire).

IRESON, NATHANIEL,
of Wincanton
b. 1672, d. 1760

He was the master-builder appointed for the
erection of Redlynch House in Somerset, and from
1744 onwards was working in the same capacity
at Stourhead in Wiltshire (Stourhead Archives).
In 1748 he gave the altar-piece to Wincanton
Church (Phelps's Somerset, Vol. I, page 162),
while in the churchyard is the monument with a
life-size statue of himself, which he "executed in
his lifetime and kept it ready to be erected after his
death" (op. cit., page 167).

Ireson almost certainly carved the cartouche-
tablet in memory of his daughter, who died in
1723, which he erected in Stourton Church,
Wiltshire. He also signs a tablet to Robert
Kingston, 1748, in St. Cuthbert's, Wells.

ISBELL, JAMES, of Truro
fl. 1797–1837

He was the son of Robert Isbell (q.v.), and in
1837 carved the coat of arms on the Market
House at Penzance (Town Archives). He is repon-
sible for a number of monuments and tablets in
Cornwall, including those to John Wallis, 1797, at
Sheviocke; Silvanus Jenkins, 1802, at St. Michael
Penkevil; Grace Marrack, 1810, at Paul; Captain
John Haswell, 1811, at Mylor; and Captain James
Bull, 1821, at Falmouth. Also at St. Michael
Penkevil is his monument to Viscount Falmouth,
1808, which is inscribed "Falmouth invent. Isbell
sculpt."

ISBELL, ROBERT, of Stonehouse
fl. 1769–1824

His monuments are delicately carved, while a
favourite type of tablet is oval in shape and carried
out in coloured marbles. His most unusual work is
the monument to Joseph Sawle, 1769, at St.
Austell, which consists of a delightful black-and-white marble "Adam" urn set on a square base. The reliefs on some of his tablets somewhat resemble the work of T. King, of Bath (q.v.).

Isbell's signed monuments and tablets in Cornwall commemorate William Williams, 1785, at St. Ewe; Edmond Hearle, 1796, at St. Columb Major; Edward Bewes, 1806, and Sir Edward Buller, 1824, both at Duloe; Thomas Hall, 1806, at Lostwithiel; and Lieutenant Hawkey, 1809, at Liskeard. William Barlow, 1796, in St. Nicholas, Saltash; Sarah Traill, 1806, in St. Stephen's, Saltash. He also signs works in Devon to Admiral Cotton, 1794, at Plympton St. Maurice; Elizabeth Docton, 1801, at St. Budeaux; the Radcliffe family, 1805, at Tamerton Foliot; and Thomas Strod, 1817, at Plympton. The monument to Thomas Holliday, 1793, in Carmarthen Parish Church, is also his work.

IVORY, JOHN, of Norwich
d. 1805
He was apprenticed to Robert Page (q.v.) and became a Freeman of Norwich in 1752. His wife died in 1805 at the age of seventy-four "after fifty-five years of married life" (Monthly Magazine), 1805, Part I, page 413), and Ivory did not long survive her, dying "suddenly of a fit" in the same year. His stock was sold in October, 1806.

His monument to Thomas Moore, 1779, in Norwich Cathedral, has a portrait-relief and is signed in conjunction with J. de Carle (q.v.), as is that to Cyril Wyche, 1780, at Hockwold. Other monuments in Norwich signed by Ivory alone include those to the Rev. Thomas Scott, 1746, and John Dawson, 1756, both in the Old Meeting House; Charles Mackerell, 1747, in St. Stephen's; William Clarke, 1752, in St. George's; Thomas Hurnard, 1753, in St. Mary Costlany; and John Chambers, 1788, and Philip Lloyd, 1790, both in the Cathedral. Signed works by him in Norfolk commemorate Mary Statson, 1748, at Hingham; Elizabeth Wiggett, 1768, at South Pickenham; Clement Francis, 1792, at Aylesham; Ralph Caldwell, 1792, at Hilborough, and Mary Evans, 1798, at Sall.
J

JACKSON, —
fl. 1764–1770

He was the master-mason responsible for building Lord Petre’s seat, Thorndon Hall, Essex, between 1764 and 1770, and also executed the carved stonework of the capitals, etc. (Archives, Lord Petre).

JACKSON, BENJAMIN
d. 1719

He was a native of Grove, near Retford in Nottinghamshire, and in 1687 was appointed master-mason for the building of Chatsworth. Here he worked until 1699, when he was dismissed by the Duke of Devonshire who was dissatisfied with the slow progress of the work.

Among payments made to Jackson during this period were £25 for a marble chimney-piece for “The Queen of Scots’ closet,” £50 for four other chimney-pieces, and £60 for “four vases on ye east side.” In 1692 he also received £265 for carving the grotto (Chatsworth Archives).

After his dismissal Jackson went to London and was employed at Hampton Court, where he was paid £226 in 1700 for “the building and workmanship of the great basin in the Fountain Garden.” He also carved in the same year eighty-one capitals of Portland stone for Fountain Yard (P.R.O., Works 5/51). In 1702 he was working at Whitehall, where he made a white-and-veined marble chimney-piece for Sir John Stanley’s room, and also received £85 for “ten new Doric columns with capitals and bases for the same palace” (P.R.O., Works 5/53).

From 1702 to 1704 Jackson was working at Drayton, Northants, for Sir John Germain, building part of the house. He agreed “to finish ye front of ye house against ye coming into Drayton Hall with heads, vases and flames on pine Aples upon pedistalls in all points according to ye draft or designe drawn by Mr. Talman and to perform all his work, well rought, strong and fine” (Archives, Colonel Stopford-Sackville). His carved-stone work in the Inner Courtyard is beyond praise; how admirable is the cutting of the capitals, busts, vases, caryatids, heraldry, pineapples and trophy of arms which adorn and decorate the doorway and centre of the façade designed by Talman.

In 1701 Jackson had succeeded John Oliver (q.v.) as master-mason to William III and he continued to hold the appointment under Queen Anne. Apparently the Duke of Devonshire was not the only person to be dissatisfied with him, for Sir John Vanbrugh, writing to Lord Godolphin in 1704, is extremely outspoken on the subject. The letter was written to protest against Jackson’s doing the mason’s work for the greenhouse at Kensington, contrary to the Order of the Board of Works issued 1662–1663, and in it Vanbrugh says: “As for Jackson my Lord, besides this Crime, the highest the nature of his Office will admit of, I must acquaint your L’dship he is so villainous a Fellow and so Scandalous in every part of his Character; and that in the unanimous opinion of all Sorts of People he is known to; that he is indeed a disgrace to the Queen’s service and to everybody that is oblig’d to be concer’d with him.” (Knope and Jones’s The London Mason in the Seventeenth Century, page 37).

Jackson died in May, 1719, a wealthy man, though in his will he refers to money owed to him from the time of Queen Anne, who had died in 1714. He is buried in Hampton Parish Church (Authorities mentioned in text).

JACKSON, BENJAMIN, AND WILLIAM, OF READING

fl. 1805–1809

They sign two tablets, dated 1805 and 1809, at Shinfield, Berkshire.

JACKSON, EDWARD, OF DONCASTER

fl. 1769–1779

On 2 May, 1769, it was ordered that Jackson should “be admitted his freedom for his trouble in drawing a plan of the gaol and for his attendance to see the work properly executed.” In 1770 he made the cross for Doncaster market-place (Corporation Archives).

JACKSON, HENRY, OF LINCOLN

He signs a tablet in coloured marbles to George Wakefield, 1816, at East Stoke, Nottinghamshire.

JACKSON, ISAAC, OF LIVERPOOL

fl. 1831–1850

Jackson, who lived in Liverpool until about 1850, when he seems to have gone to Rome, exhibited in the former city from 1831, showing
busts of Admiral Murray (1831), John Johnson (1831), Charles Taylern (1832), Dr. Raffles (1832), the Rev. A. Campbell (1834), William Rathbone (1838), George Syers (1840) and J. Bostock (1841). He also showed a “copy of a Colossal Statue of W. Roscoe, Esq.,” in 1834, and an “Alto-relievo from the 137th Psalm” in 1840. Another bust, of the Rev. Thomas Raffles, is in the Walker Art Gallery.

At Manchester in 1833 Jackson exhibited statues of “Psyche” and “Narcissus,” while at the Royal Academy he showed busts of J. A. Paris and James Smith in 1836 and 1837 respectively.

JACKSON, JOHN
An Oxford craftsman, he made in 1659 the Royal coat of arms of Burford stone over the cloister door at Brazenose College, Oxford (College Archives). He was dead by 1664 as in the Vice-Chancellor’s accounts 1663/4 is a payment of £10 19s. 3d. to “Mrs. Jackson, the stone-cutter’s widow for work done by her husband.”

JACKSON, JOHN, of Oxford
fl. 1789–1797

JACKSON, PHILIP, of Edensor
In 1695 he received £446 for building the Bowing Green House at Chatsworth, this payment including the carved stonework and also “four potts standing upon ye front of ye battlement at forty shilling each” (Chatsworth Archives).

JACKSON, ROBERT
fl. 1840–1878
He was the chief assistant to John Thomas (q.v.) with whom he executed the statues, ornamental sculpture, etc., for the Houses of Parliament. In 1860 he was working in Rome, but was back in England three years later when he made a fountain for the south side of St. James’s Park and another erected in Regent’s Park near Gloucester Gate. The Art Journal (1863, page 167), however, disapproved of a spout in the shape of an animal’s head, remarking that “the association of ideas is far from agreeable.”

Also in 1863 Jackson executed the monument to Lieutenant Robert Anderson in Glasgow Cathedral (op. cit., page 157), and in 1865 made the statue of Lord Palmerston for Westminster Abbey.

He exhibited at the Royal Academy, 1851–1878, showing busts of Henry Gurney (1860), the Rt. Hon. F. W. Cowper (1862), Lord Cawdor (1874) and Henry Irving (1874). His bust of the Rev. Dr. Raffles (1860) is in Liverpool Public Library, and that of Lord Palmerston (1870) in the Speech Room at Harrow.

JACKSON, WILLIAM
b. 1820
He attended the Royal Academy Schools in 1844 and, in the same year, showed in Westminster Hall a statue of Newton, concerning which the Art Union remarked “the proportions of this figure do not appear to be sufficiently just and the drapery is mannered and untrue.”

Jackson exhibited at the Royal Academy, 1848–1854, and busts by him of General Napier and Lord Nelson were in the W. J. Broderip sale of 1859. In 1862 he made a chimney-piece for Dorchester House (Builder, 1862, page 574), and in 1875 a statue of Sir Robert Clifton for Nottingham. He signs the monument of the Rev. John Fawcett, 1851, in St. Cuthbert’s, Carlisle.

JACKSON, WILLIAM, of Melton Mowbray
fl. 1740–1744
He was the master-mason for the re-building of Melbourne Hall, Derbyshire, being paid £1,500 (Archives, Marquis of Lothian).

JAMES, C.
He exhibited “a portrait of a gentleman in wax” at the Royal Academy in 1792.

JAQUES, JOHN, the Elder, and JOHN, the Younger
Firm fl. 1781–1796
They carved a number of tablets for chimney-pieces and, in 1781–1782, made artificial ornaments for Inverary Castle.

The firm became bankrupt in 1795, but in the following year Jaques was working in Holborn, for he put an advertisement in Ari’s Birmingham Gazette on 28 November, offering to supply “chimney-pieces and composition ornaments of the newest designs, suitably adapted for rooms of every denomination, from the greatest elegance to the neatest simplicity.” The firm was employed at Cordwainers’ Hall in 1786 (Company Archives).

(R. S. Mylne, The King’s Master Masons, page 277.)
JARVIS, C., of Birmingham
fl. 1807–1837
He signs tablets at Packwood, Warwickshire, in 1830, and at Coleshill in the same county in 1832.

JEANS, —, of Edinburgh
fl. 1769–1771
He exhibited at the Free Society, 1769–1771, showing models in terra-cotta and clay. There are two statues of “Dacian Captives” signed by him in the portico of Penicuik House, Midlothian.

Jeans apparently studied in Rome at one period of his life, and was also an artist, as his signed drawing of John Brown (1752–1878) is in the Scottish National Portrait Gallery.

JELFE, ANDREWS
d. 1758
He was apprenticed to Edward Strong and became free of the Masons’ Company in 1711. Later he went into partnership with Christopher Cass (q.v.) and took over the business on the latter’s death in 1734.

In 1726 Jelte erected a sarcophagus to his family at South Weald, Essex, and ten years later made the black-marble tombstone of Nicholas Hawksmoor, the architect, in the churchyard of Shenley, Herts. In 1734 he made a sundial for Lord Godolphin at Gogmagog, Cambridgeshire, and in the following year carved a door-case for a Mr. Francis Sheppard. Another employer was Lord Macclesfield, for whom he worked at Sherborn Castle, and Sir John Evelyn for whom, in 1740, he built a house in St. James’s Square.

Jelte was a friend of Matthew Brettingham, the architect, and in 1742 carved a shield and festoon for Holkham where Brettingham was then working. In 1744 he made “two enriched pieces of frieze” for Houghton Hall, Norfolk.

As a mason Jelte is best known as the builder, in conjunction with his partner Tuffnell (q.v.), of Westminster Bridge.

He had apparently only one son, a naval officer, named Andrew. Writing to a friend in 1741, the elder Jelte says that: “My son Andrew wrote me from St. Helena. I am afraid he is a great distance from a Captain’s commission. It hath already cost me an incredible sum to carry him on in the Service” (British Museum, Ad. MS. 27587).

On his retirement Jelte bought a house at Bletchingley in Surrey.

Authority cited in text.

JELFE, WILLIAM
d. 1771
He was apprenticed to his uncle, Andrews Jelte (q.v.), in 1739, but did not become a member of the Masons’ Company until twenty years later. From 1750 until 1758 he and the elder Jelte were the masons for building the Horse Guards.

In 1753 William Jelte built a house at Clapham for Henry Hoare and in 1767 made the pavement for the Temple of Apollo at Hoare’s seat at Stourhead in Wiltshire (Archives, Hoare’s Bank). He was also stonemason to George III, and in that capacity was employed on the rebuilding of Greenwich Palace in 1770.

His death is noted in the London Magazine under the date 3 September, 1771. A sale of his “stock in trade” was held, 9 and 10 January, 1772.

JENKINS, JOHN
He signs a pretty tablet at Byford, Herefordshire, to Uvedale King, 1774.

JENKINSON, EDWARD
Possibly a son of Matthew Jenkinson (q.v.), he made a veined-marble chimney-piece for St. James’s Palace in 1796.

JENKINSON, MATTHEW
fl. 1790–1808
He was the mason for the Tower of London, Greenwich Palace, the King’s Mews, etc., in 1790, in which year he also built a colonnade at St. James’s Palace at a total cost of £398, including “all carved and moulded work.”

In 1808 Jenkinson was paid £148 for work at the Duke of Clarence’s apartments in St. James’s Palace and a further £26 for a marble chimney-piece.

JENNINGS, BENJAMIN,
the Elder, of Hereford
fl. 1830–1850
He was possibly a son of James Jennings, mason of Hereford, and in 1846 repaired the monument to Sir Thomas Vaughan at Kington in the same county (Builder, 1846, page 440).

Jennings signs tablets in Herefordshire to the Hon. Mrs. Dew, c. 1800, at Sellack; the Rev. John Clutton, 1830, and John Clutton, 1838, both in Hereford Cathedral; the Rev. Harry Williams, 1830, at Goodrich; John Collins, 1831, at Walford; Sir James Kyrle Money, 1843, at Much Marcle; and the Rev. George Woodhouse, 1846, at Leominster. None of these, however, are of any particular interest.
JENNINGS, BENJAMIN, 
the Younger, of Hereford 
d. 1875

He was the son of Benjamin Jennings the Elder (q.v.) and studied in Rome under Gibson (q.v.).

In 1849 and 1850 he exhibited at the Royal Academy, showing busts and a statue of "Cupid, the Birth of a Rose." This latter work gained immediate popularity and was illustrated in the Art Journal, as well as in books on contemporary sculpture. Jennings lent it to the Exhibition of Art Treasures of the United Kingdom, held at Manchester in 1857, and at a sale held after his death it was purchased (together with a "Head of a Madonna") by a gentleman from Gloucester. It is now in Hereford Museum. Jennings also exhibited at the Great Exhibition. He signs the monument of William Thompson, 1855, at Kirkgby, Westmorland. (Various references, Art Journal.)

JEWELL, THOMAS, the Elder, 
of Barnstable 
d. 1728

He signs a very lovely cartouche tablet at Tawstock, Devon, to Lady Rolle, 1705. This work, with its swags of flowers in the Grinling Gibbons manner, is almost worth of the master himself. Three other cartouche tablets in the same church are practically identical in design with the one to Lady Rolle, and are obviously also by Jewell. They commemorate Sir Boucher Wrey, 1696; Florence, Lady Wrey, 1726; and Peter Lovett, 1770; but on none of them, after very careful inspection, could I find a signature.

Neighbouring churches contain similar tablets. At Braunton, for example, there is a delightful cartouche to Margaret Allen, 1709, which has winged cherubs at the top.

JEWELL, THOMAS, the Younger, of Barnstable 
b. 1676, d. 1758

He was presumably a son of Thomas Jewell the Elder (q.v.) and became a Freeman of Exeter in 1734. He signs a large monument in Tawstock Church to Sir Henry Northcote, 1732, but the workmanship, which can only be called provincial, already shows a deterioration from the carefully carved details and delicate cutting of his father. The younger Jewell signs other tablets in Devon to Robert Hales, 1740, at Braunton, and to Richard Bennett, 1750, at Bishops Tawton.

He died at the age of eighty-two on 29 September, 1758, and his wife Joanna on 1 September, 1762, aged seventy-seven. These details come from a list in manuscript of the tombstones which were formerly in the churchyard of Barnstable Parish Church. According to this list, the tomb was situated in the south-eastern corner, but no trace of it remains today.

According to the Barnstable Parish Registers, there was a third Thomas Jewell, a mason and maker of tombstones, and presumably a son of the second Thomas. He became a Freeman of Exeter in 1761 (City Archives).

JOANES, JOHN, of Worthing 
He was presumably the son of Ralph Joanes (q.v.) and signs a neo-Hellenic tablet to Thomas Nash, 1814, in St. George's, Bloomsbury.

JOANES, RALPH, of Horsham 
fl. 1760–1801

In 1760 he was paid for repairs to Lewes Prison and in 1778–1779 he received £393 for building the Gaoler's House at Horsham, which was designed by Henry Joanes of Horsham, presumably a relative (Sussex County Archives).

He signs a box-tomb at Ifield, Sussex, to George Hutchinson, 1801. This rather curious work has relief panels of Christ with the woman of Samaria, and of angels bearing an urn heavenwards. On top of the tomb is an urn signed by Coade (q.v.).

Joanes also supplied stone to the Duke of Norfolk for his house at Horsham in 1787 (Horsham Archives).

JOHNSTON, JOHN, of Stamfordham 
fl. 1750–1777

He cut in stone a large number of life-size figures which were placed on the battlements of Alnwick Castle. These represented men "in the act of defense, wielding such arms as were then used; some of them are disposed with great propriety" (Mackenzie's Northumberland, Vol. I, page 450). Johnson began this work about 1750 and took twenty years to complete it.

JOHNSON, JOHN

In the Kimbolton Archives is a long agreement dated 1710, between the Earl of Manchester (afterwards the first Duke) and John Johnson
“free mason of London.” In it the latter agrees to a considerable amount of work at Kimbolton Castle, including the carving of decorative details and the ciphers and coronets, etc., on the keystones above the “windows of the inner court.”

JOHNSON, JOHN
He exhibited at the Royal Academy in 1773 “a tablet of the dining-room chimney-piece at the Jockey Club Room, Newmarket.” This showed “two centaurs running a race and whipping themselves,” and was described as “absurd” by Horace Walpole.

JOHNSON, MATTHEW WHARTON, of London
fl. 1820-1860
Johnson was a prolific but dull statuary whose work may be found all over England. His most successful monument commemorates Joseph Somes, 1845, in Stepney Parish Church, his worst, Augustus Cleveland, 1849, at Westleigh, Devon. The former has an amusing relief of merchant ships moored at a quay, the latter a relief of a woman lying prone at the foot of an impossible weeping-willow.

Other monuments signed by Johnson include those to the Rev. Holford Cotton, 1822, at Adderbury, Oxon; Sarah Holroyd, 1823, in Walthamstow Parish Church; Mrs. Hale, 1829, at Brede, Sussex; Elizabeth Price, 1829, at Llandovey, Brecon; Sir John Farnaby, 1831, at West Wickham, Kent; the Hon. Frederic Robinson, 1831, at Filton, Beds; Samuel Greg, 1834, at Wilmslow, Cheshire; the Rev. James Sedgwick, 1834, at Currey Rivel, Somerset; General Thornton, 1842, at Brockhall, Northants; Sir Francis Hammond, 1850, Whepstead, Suffolk; and Lord Carew, 1856, in Waterford Cathedral.

JOHNSTON, —, of Belfast
In 1845 he carved a statue of Sir Robert Gillespie for Comber, Ulster.

JOHNSTON, J., of Lichfield
fl. 1836-1845
In 1836 he exhibited a bust of John Rosson at the Liverpool Academy. He also signs a neo-Hellenic wall-tablet to Edward Gore, 1845, at Shenstone, Staffordshire.

JONES, HENRY, of Canterbury
fl. 1819-1847
His best monument commemorates William Hopson, 1819, at Milton Regis, Kent. This has figures of two cherubs, one holding a flaming heart in his hand, and is the latest example I know of imagery popular during the seventeenth and early eighteenth centuries, but which had gone out of fashion in the rest of England long before 1800.

Jones, who was the mason responsible for building Seasalter Church in Kent 1844 (Builder, 1844, page 460), signs other tablets in the same county to Hannah Woolley, 1819, at Smarden, and John McDivitt, 1839, at Bishopsbourne.

JONES, JAMES, of Abergavenny
He signs a large tablet with an open pediment to Mrs. Jenkings, 1781, at Abergavenny.

JONES, JAMES, of Bristol
fl. 1774-1794
He was the son of William Jones, a mason of Bristol, and became a Freeman of that city in 1774. In 1782 he received £18 from Lord Radnor for work carried out at Longford Castle (Archives, Earl of Radnor), and he also signs monuments to Sarah Exon, 1788, at Creech St. Michael, Somerset, and Peter Coates, 1794, at Stanton Drew in the same county.

Jones was first in partnership with Dunn and Tyley, and the firm signs the tablet to Ann Hillhouse, 1786, in the Church of St. Philip and St. Jacob, Bristol. By 1793, however, the name had been changed to Jones, Dunn and Dreyett, the Dunn in both cases being William Dunn, son of a mason of the same name, who had become a Freeman of Bristol on 11 March, 1768.

(Bristol City Archives.)

JONES, JOHN EDWARD
b. 1806, d. 1862
He was born in Dublin on 2 May, 1806, the son of Edward Jones, a miniature-painter, and was trained as an engineer. In this capacity he carried out many important works in Ireland, including the building of Waterford Bridge, and he later went to England to follow his profession in London. In 1840, however, he abandoned engineering for sculpture and made “within a marvellously short space of time wonderful progress in that art” (Literary Gazette, 1844, page 738).

Jones exhibited at the Royal Hibernian Academy, while at the Royal Academy, 1842-1862, he showed over one hundred works, mostly portrait-busts. These included likenesses of Louis Philippe (1844), M. Balfe (1846), the King of Holland (1848), Thomas Brassey (1850), the
Empress Eugenie (1852), Lord Clarendon (1852), the Duke of Cambridge (1853), Queen Victoria (1854), and Lord Palmerston (1861). The *Art Journal* of 1846 (page 189) considered that there were "few works of this kind which in severe eloquence are at all comparable" with the bust of Sir Henry Pottinger, exhibited in that year, while the bust of Signora Favanti was shown at the Louvre in 1845 and one of the Earl of Carlisle at the International Exhibition of 1862.

Other busts by Jones are those of Lord Denman (1834) at Lincoln's Inn, Daniel O'Connell (1843) in the National Gallery of Ireland, Sir William Magnay (1844) in the Palace of Versailles and Dr. Alderson (1847) in Hull Hospital. His undated bronze bust of Sir Robert Peel is in the Birmingham Art Gallery, and that of John Fitch, Jnr., in the Walker Art Gallery, Liverpool.

Other works by Jones include a group of "Children and Animals" which he sent to the Great Exhibition of 1851; a statue of Mr. Dargan, executed in 1853 and shown at the Industrial Exhibition in Dublin; and another of Sir Robert Ferguson made for Londonderry in 1862.

The sculptor died at Finglas, near Dublin, on 25 July of the same year. The *Art Journal* in its obituary (1862, page 207) described him as possessing "a kind, courteous and generous disposition," while "in wit, humour and vivacity he was a thorough Irishman." (Strickland's *Dictionary of Irish Artists*; Authorities cited in text.)

JONES, R., of Swindon
fl. 1778–1780

He signs a wall-tablet in coloured marbles to Thomas Cox, 1778, at Shrievengham, Berkshire. In 1780 he was working as a mason at Longford Castle (Archives, Earl of Radnor).

JONES, RICHARD, of Wapping
fl. 1718–1720

Between 1718 and 1720 he was working at St. Alphege, Greenwich, where he carved the stone capitals. An Oliver Jones, who may be a relation, was in 1773 apprenticed to his father, Richard Jones of Wapping, "citizen and mason" (Archives, Masons' Company).

JONES, ROBERT
d. 1722

He was employed from 1698 until his death twenty-four years later on stone and marble carving at Greenwich Palace, where he seems to have done all the important work of this kind. A full list of everything he did is too long to give here, but among the more important items were, in 1698, "a large ornament, being festoons of drapery and flowers on the west front of the new building" and "a large pediment in basso-relievo over the west entrance containing the King's Arms held up by genii with trophies and ornaments relating to marine affairs, 30 ft. long and 7 ft. 9 in. high." For the latter Jones received £80 (P.R.O., Ad. MS. 68/672).

In 1702 he made four large Ionic capitals "with large festoons hanging out of the scrolls cut with several sorts of shellfish containing eight sides at £20 a side," and also four large keystones, costing £44, "being riverheads dressed with flags and water-flowers." In the following year he was paid £20 for the two large spandrels in the cupola (P.R.O., Ad. MS. 68/676).

Jones continued his work at Greenwich until his death, carving capitals, columns, pilasters, scrolls, festoons, ornaments for chimney-pieces and coats of arms (P.R.O., Ad. MS. 68/677–699).

He died in 1722 and his will was proved on 9 May of the same year. He was a Captain in the City trained bands.

JONES, WATKIN D.
fl. 1846–1861

He was born at Merthyr in Wales, the son of the Parish Clerk. He exhibited at the Royal Academy, 1846–1859, showing various works, including a bust of T. E. Evans, the tragedian, in 1854.

JONES, WILLIAM
fl. 1840–1850

He was the brother of Watkin Jones (q.v.) and, after leaving Merthyr for London, found employment in the studio of Joseph Edwards (q.v.). In 1845 he made for, and exhibited at, the Eisteddfod (held that year at Aberavenny) a statue of "The Prince of the Bards" (*Illustrated London News*, 1845, page 265).

Jones exhibited at the Royal Academy, 1843–1847, where he showed, among other works, busts of Thomas Bevan, M.D. (1845); John Fothergill (1845) and Mohun Lall, Persian Secretary to the British Government (1846).

JOPLING, J., of Gateshead
Firm fl. 1780–1822

The death of Jopling's wife is noted in the *Monthly Magazine* of 1801 (page 362), and ten years later his son Isaac won a Silver Palette from the Society of Arts for a plaster-cast of "A Gladiator."
Isaac Jopling assisted his father and, indeed, signs some of the later monuments and tablets, which are pleasant, simple works with good details. Works executed by them in Durham include those commemorating Anne Williamson, 1782, Jacob Clavering, 1792, and John Carr, 1817, all at Whickham; Richard Brewster, 1797, at Greatham; Anne Musgrave, 1799, at Chester-le-Street; Richard Dawes, c. 1800, at Heworth; Margaret Maxwell, 1807, at Horsley Auckland; and the Hon. Mary Smith, 1820, and Thomas Headlam, 1821, both at Gateshead. There is also another tablet in Northumberland to Ralph Carr, 1806, at Ponteland.

JORDAN, JOHN
fl. 1699–1706

Probably a local mason, he was responsible for the stonework of the gardens of Melbourne Hall, Derbyshire, in 1699. His work included the pedestals, staircases, pillasters, etc. (Archives, Marquess of Lothian).

JOSEPH, SAMUEL
b. 1791, d. 1850

He was a pupil of Peter Rouw (q.v.) and attended the Royal Academy Schools in 1811, gaining a Silver Medal in the same year and another in 1812. Three years later he won the Gold Medal for a group entitled “Eye Supplicating Forgiveness.” In 1823 he went to Edinburgh, where in 1826 he became one of the foundation-members of the Royal Scottish Academy. J. M. Graham (British Literature and Art, page 448) described his busts as “superior to any examples of sculptural art that had been produced in Scotland previous to his practice.”

In 1828 Joseph returned to work in London, but he never received, either in his lifetime or posthumously, the credit he deserved. William Scott, in his English Schools of Sculpture, written in 1871, gives an engraving of Joseph’s statue of Wilberforce, but adds that “of the sculptor we are unable to give an account, and also unable to point out any other works of his, having looked in vain through the literary and artistic journals in the hope of finding at least an obituary notice.”

This statue of Wilberforce is the sculptor’s masterpiece. It was erected in Westminster Abbey in 1838 and, though much criticized at the time, is now generally agreed to be a magnificent work. There is also a plaster-cast of it in the chapel of St. John’s College, Cambridge. Joseph became bankrupt for £450 in 1848, and a forced sale of all his belongings was held.

Joseph exhibited at the Royal Academy, 1811–1846, and at the Royal Scottish Academy, 1827–1835. He died in London on 1 July, 1850 (Literary Gazette, 1850, page 508), leaving seven children and very little money. The Royal Academy granted a pension to his widow, which was continued until her death thirteen years later (Archives, Royal Academy). A wax portrait of Joseph was exhibited by T. Smith (q.v.) at the Royal Academy in 1828.

**MONUMENTS**

- 1800 Battersea (Parish Church)
- 1812 Otterden, Kent
- c. 1820 Otterden, Kent
- 1833 Great Brickhill, Bucks
- 1834 East Farleigh, Kent
K

KACHLER, H., of London
fl. 1837–1844

He exhibited at the Royal Academy, 1837–1844, where his works included busts of Miss Elphinstone (1839) and James Sheridan Knowles (1842).

KARN, GEORGE, of Chichester

He signs wall-tablets in Chichester Cathedral and at Warblington, Sussex, both dated 1830.

KELLOWS, JAMES, of Winchester
fl. 1830–1839

He may be a member of the same family as the "Kellow, stone-mason," who was employed at Salisbury Cathedral in 1785 (Cathedral Archives). In 1839 he made the monument to Sir Thomas Dyer in the churchyard of Ovington, Hampshire, which was of "highly creditable workmanship and designed by Owen Carter" (Gentleman’s Magazine, 1839, Part II, page 160).

Kellow also signs monuments in Winchester Cathedral to Sarah Rennell, 1830, and to the Earl of Banbury, 1834. Two others executed by him (both in Hampshire) are those commemorating William Nevill, 1831, at Titchfield, and Elizabeth Gomm, 1836, at Bramsdean.

KELLY, THOMAS, of Chester
fl. 1826–1833

In 1826 he was employed on the building of Chester Bridge (Hemingway’s Chester, Vol. I, page 373), and three years later was responsible for a "marble monument handsomely executed" to Lord Chancellor Ellesmere, which cost £100 and was erected at Dodleston, Cheshire (Gentleman’s Magazine, 1829, Part II, page 495).

Kelly also signs tablets to Ann Truslove, 1833, in St. John the Baptist’s, Chester, and to Mrs. Drake, 1829, at Thornton Le Moors, Cheshire.

KELSEY, CHARLES SAMUEL
b. 1820

He joined the Royal Academy Schools on the recommendation of W. Etty, R.A., in 1843 and won a Silver Medal two years later. In 1844 he exhibited figures of the Earl of Shrewsbury and the Venerable Bede at Westminster Hall. The former was described by the Literary Gazette as "a portrait of a suit of armour carefully put on," while the latter was considered "very heavy and unmeaning."

About this time Kelsey executed the large Gothic monument in memory of William Rolls (d. 1840) in St. George’s, Bloomsbury, and a tablet with a medallion-portrait of Henry Corbould (d. 1845), for Etchingham Church, Sussex. In 1846 he was awarded a Silver Medal by the Society of Arts for "a design for a ticket of admission to the Society’s Rooms" and two years later carved the sculpture above the doorway of the Royal Insurance Office in Liverpool (Builder, 1848, page 614). For Liverpool also he executed the decoration above the windows of St. George’s Hall in 1854 (Building Chronicle, 1854, page 84).

In 1868 Kelsey made two large stone figures of women for the entrance to Smithfield Market, while in 1870 he modelled and carved the tripod on top of the memorial column to Lord Carlisle at Castle Howard (Builder, 1870, page 349). The poor relief on the monument which replaced Temple Bar in the Strand is also by Kelsey and was executed in 1880. It shows Queen Victoria and the Prince of Wales attending St. Paul’s on 27 February, 1872, for the thanksgiving service after the Prince’s recovery from typhoid fever.

Kelsey exhibited at the Royal Academy, 1840–1877, showing in 1846 a statue of "A Greek Youth Examining His Sword," and a bas-relief of "Christ Blessing Little Children" and a marble relief of "Music" in 1877.

(Authorities cited in text.)

KELSEY, W. T., of Brompton
fl. 1830–1846

He signs two surprisingly good tablets at Flitton, Bedfordshire, one to Lady Grantham, 1830, which is a copy of an early eighteenth-century cartouche, the other to her sister, the Countess de Grey, 1833, which is also in the style of that period.

In 1846 Kelsey made two chimney-pieces of green Irish marble for Wyndham’s Club (Builder, 1846, page 477).

KEMPSTER, CHRISTOPHER
b. 1626, d. 1715

He was born at Burford, the son of William Kempster of that town, and went to London in 1659, becoming free of the Masons’ Company by redemption in 1670. He afterwards became Master of the Company in 1700.

In 1672 Kempster was working as assistant to
ROBERT HARTSHORNE
Sir Thomas Powys, 1720, Thorpe Achurch, Northamptonshire.

JOHN HANCOCK
Joseph Mellish, 1703, Blyth, Nottinghamshire.

CHRISTOPHER HORSNAILE THE ELDER
Sir Jacob Garrard, 1730, Langford, Norfolk.
SAMUEL JOSEPH
William Wilberforce, 1838, Westminster Abbey.
Edward Strong (q.v.) at St. Stephen's, Walbrook, and as a master-mason he was extensively employed under Sir Christopher Wren, who thought highly of him. For Wren he built the churches of St. James's, Garlickhithe, 1674–1687, where he was paid £20 or the font in 1683; St. Mary Somerset, 1686–1694, where his work included six cherub-heads in Portland stone and the keystones to the three outward doors; and St. Mary Abchurch in 1686, where he was responsible for the font and "seven pilaster-capitals and corbels." He was also one of the principal master-builders of St. Paul's Cathedral, where he worked from 1692 until 1709.

Outside London Kempster built the Market House at Abingdon for Wren between 1678 and 1681 and in the latter year he was working on Tom Tower at Christ Church, Oxford, where he was assisted by his son and namesake (W. G. Hiscock's A Christ Church Miscellany, page 232). Wren had previously written to the Bishop of Oxford in 1681 recommending Kempster as a "very able man, modest, honest and treatable and one that your masons will submit to work with because of his interest in the quarries at Burford." "Therefore," he added, "you will have the stone from him at first hand" (Wren Society, Vol. V, page 18).

Kempster later retired from business and went to live at Burford, his birthplace. His wife Joan had died in 1701 at the age of eighty-two, and his own death took place on 12 August, 1715. He was buried in the parish church, where his epitaph on a cartouche tablet describes him as "a person eminent in his profession and built several churches in the said City" (London) "and was many years employed in building the Cathedral and Dome of St. Paul's." A ledger in the church also commemorates his son John who died on 18 February, 1733, aged seventy-five, while two other sons were the Christopher mentioned above and William (1678–1717), who assisted his father in his later works, especially at St. Paul's.

Another distinguished mason of the same family was Kempster's brother, William, who became free of the Masons' Company by redemption in 1677. He was afterwards Renter Warden in 1700, Upper Warden in 1701 and Master of the Company in 1705. His death took place in 1707 (Wren Society's Publications; Bodleian, Rawlinson MSS. 387).

KENDALL, or KENDAL, EDWARD, of Exeter
d. 1796

Kendall, who was the mason responsible for building the Exeter Guildhall, 1776–1792, died on 28 November, 1796, "at an advanced age," according to the Gentleman's Magazine of that year (Part II, page 1059).

His monuments have charm and are usually carried out in coloured marbles. Examples of his work in Devon commemorate Paul Orchard, 1764, at Hartland; Edward Hanbury, 1767, at Dartmouth; Thomas Morrison, 1778, at Torrington; Mary Cross, 1785, at Cullompton; Mrs. Churchill, 1785, at Dawlish; Mary Heathfield, 1791, at Woodbury; Charlotte Morrison, 1791, at Alwington; and the Rev. John Newte, 1792, at Tiverton. He also signs monuments to Joseph Hunt, 1761, and Edward Hunt, 1787, both at Maker in Cornwall.

KENDALL, J., of Exeter
b. 1766, d. 1829

He was the son of Edward Kendall (q.v.) and also worked in his native city, rebuilding the south-west angle of the west front of the Cathedral and restoring the statues of Edward III and Alfred the Great in 1817 (Gentleman's Magazine, 1817, Part II, page 358). He also made the altar-piece for the Cathedral and published an essay on "The Principles of English Architecture" (Gentleman's Magazine, 1829, Part II, page 572). He died in October, 1829.

Kendall's monuments are less ambitious than those of his father though some of them have quite pleasant reliefs. He also has a rather curious individual trick of making the capitals of some of his pilasters in the form of rams' heads, a motif which he probably copied from the work of Robert Adam. His best monument, surrounded by a wreath of sibthorpsia, commemorates Humphrey Sibthorp, 1801, at Instow, Devon, while his tablets to Samuel Lyne, 1805, at Launceston, Cornwall, and Henry Brutton, 1816, at Cullompton, Devon, have pretty reliefs of a woman wreathing an urn and of a mourning youth respectively.

Other tablets in Devon signed by Kendall include those to Andrew Quicke, 1793, at Newton St. Cyres; Lord Hawarden, 1803, at Teigngrace; Thomas Galsworthy, 1805, at Hartland; James Rudman, 1805, in Exeter Cathedral; George Buck, 1805, at Bideford; Henry Downe, 1805, at Northam; the Cann family, 1807, at Spreyton; Elizabeth Marshall, 1809, at Barnstaple; William Matterface, 1814, at Dawlish; Richard Kingdom, 1816, at Holsworthy; the Rev. John Swete, 1821, at Kenton; and Mary Peal, 1825, at Littleham. Other works by him commemorate Lucretia Putt, 1813, at Trent, Somerset; Richard Ivyleafe, 1814, at Syston, Glos; and John Barker, 1819, at Wareham, Hants.
KENDRICK, JOSEPH
b. 1755

He was born on 4 June, 1755, and attended the Royal Academy Schools in 1771. He seems to have had some connexion with Wateringbury in Kent, for he signs the pedestal of the sundial in the churchyard. The dial itself is the work of Thomas Crow, a Wateringbury craftsman, one of whose children was christened "Kendrick."

Emma Kendrick the miniaturist (1788–1871) was Kendrick’s daughter. The Dictionary of National Biography states, however, that her father was Josephus Kendrick (q.v.), whereas he was in reality her younger brother.

The elder Kendrick seems to have moved from London to Portsea, for he signs a monument in Warblington Church, Hampshire, “J. Kendrick of Portsea.” This delightful work commemorates Elizabeth How, 1806, and has a pretty relief which resembles the work of Flaxman (q.v.).

Other monuments and tablets signed by Kendrick include those to Charles Style, 1774, at Wateringbury, Kent; Frances Champneys, 1800, at Boxley, Kent; Geoffery Hornby, 1801, Samelsbury, Lancs; William Bleamire, 1803, in Hampstead Parish Church; William St. Quintin, 1805, at Harpham, Yorks; and George Grigby, 1811, at Drinkstone, Suffolk.

KENDRICK, JOSEPHUS JOHN PINNIX
b. 1791, d. 1832

He was the son of Joseph Kendrick (q.v.) and joined the Royal Academy Schools in 1808, winning a Silver Medal in 1811, and the Gold Medal for his relief of “Adam and Eve Lamenting Over the Dead Body of Abel” in 1813. He had also received in 1811 the Silver Isis Medal from the Society of Arts for a plaster-cast of “A Gladiator,” a work which he exhibited two years later at Liverpool.

Kendrick was a competent minor sculptor, whose smaller monuments and bas-reliefs are harmless and even pleasing. A good example is the relief of the Battle of Copenhagen on the monument to Sir George Murray, 1819, in Chichester Cathedral, while there are delightful medallion-portraits on those of Sir Francis Molyneux, 1812, at Teversal, Nottinghamshire, and Lord and Lady Henniker, 1821, at Thornham Magna, Suffolk.

When he was chosen as the sculptor for the national monument to Sir William Myers, 1816, in St. Paul’s Cathedral, he attempted, however, a task far beyond his powers and produced one of the most unfortunate memorials in the whole building.

The design—one of complete bathos—shows Hercules and Minerva warmly shaking hands in front of a tomb surmounted by a bust of Myers. Nor is the monument to General Ross, c. 1820, in the same Cathedral, much happier. The sculptor described his design for it as “Valour lays an American flag on the tomb of the departed warrior, on which Britannia is recumbent in tears, while Fame is descending with a laurel to crown his bust.”

Kendrick exhibited at the Royal Academy, 1813–1829, showing in 1826 a statue of Sir James Leith “for Barbados.” This was presumably the statue which the inhabitants of Barbados had subscribed for; in 1819 Kendrick had written in to the Dean and Chapter of Westminster Abbey stating that the subscribers wished to erect the statue “immediately against the next column of the church to that where Mr. Addison’s stands being of the same dimensions.” He also showed busts of Fisher, Bishop of Salisbury (1813); the Hon. W. Lamb (1818); Lord Selsey (1825); and Lord Henniker (1825). His tablet to James Bindley, 1819, now destroyed, was the first monument which was allowed to be erected in the church of St. Mary-le-Strand. At the Suffolk Street Galleries he exhibited in 1828 the model of a “Proposed Statue of Carl Maria von Weber for St. Paul’s Cathedral.”

When he applied to the A.G.B.I. in 1831 asking for money “to enable him to complete some marble busts ordered by Lord Minto, Lord Selsey and gentlemen of the highest class of society,” he added that “his financial difficulty had arisen from gentlemen not honouring their accounts.” His widow, Frances, also applied for help on 24 March, 1832, saying that “the many disappointments which chequered his unfortunate career preying upon his mind caused his early decease.” She was granted a pension by the Royal Academy which continued until 1851. Kendrick had an only son who had been born in 1828 who emigrated to Australia in 1852. (Archives, Royal Academy and A.G.B.I. Archives.)

Signed monuments by Kendrick include those to Colonel Stables, 1815, at Great Hormead, Herts; Sir George Thomas, 1815, at Madehurst, Sussex; Lord Selsey, 1818, at Barkway, Herts; the third Earl Stanhope, 1816, at Chevening, Kent; Major-General Churchill, 1817, in Lewisham Parish Church; Thomas Clark, 1818, and George Pring, 1824, both in Hammersmith Parish Church; Sir Thomas Bloomfield, 1822, and Lady Bloomfield, 1826, both in Plumstead Parish Church; Martha Rudding, 1823, in Hampton Parish Church; Thomas Leverton, 1824, at Waltham Abbey, Essex; Janet Maude, 1824, in
Wakefield Cathedral; Henry Mash, 1825, in Stanstead Abbotts Parish Church; and Thomas Hardwick, 1829, in St. Laurence’s, Brentford.

KENNEDY, MRS. E.
In 1842 she exhibited at the Royal Academy an alto-relievo of “Scenes at a Fair in the North of Ireland.” The Art Union of that year gave it a long notice and described it as “a work of rare value.”

KENT, —, of London
He signs a large neo-Hellenic monument with a figure of “Hope” to Ann Elverson, 1840, at Oadby, Leicestershire.

KESSELS, of Denmark
_b. 1784, d. 1836_

The favourite pupil of Thorwaldsen, he carved the monument of Georgiana Naylor, _d. 1806_, which was erected in 1829 at Hurstmonceaux, Sussex. The first monument was lost at sea and the Hare family ordered another version from the sculptor.

KEYWORTH, WILLIAM DAY,
the Elder, of Hull
_b. 1817, d. 1897_

His father, a marble mason of Hull, moved to London in 1826 and worked in the studio of Sir Francis Chantrey (q.v.). In 1831 William Keyworth became a pupil of H. Weekes (q.v.) and studied under that sculptor for three years. He then returned with his father to Hull and set up on his own account.

Keyworth produced a number of works for his native town, including busts of William Woolley (1837) for Holy Trinity Church; George Lee (1838) for the Mechanics’ Institute; the Rev. Thomas Dykes (1840) for St. John’s Church; Dr. George Fielding (1848) for the Infirmary; and Henry Blundell (1860) for the Town Hall. He also made those of an Eskimo and his wife who were brought to Hull in a whaling-ship in 1845. He exhibited at the Royal Academy, 1837–1844, showing busts of Dr. Ayre (1837); the Rev. William Ellis (1839); and the Rev. Walter Hook (1844).

Keyworth later practised as an architect and also made casts of medieval architecture for the Great Exhibition of 1851. These were afterwards taken to the Crystal Palace. He died in 1897 and in his will left a number of works to his native town, but they were destroyed when Hull Central Museum was bombed in 1943.

Of Keyworth’s few monuments, those in Hull itself commemorate John Parker, 1841, in Holy Trinity; R. Craven, 1850, in Christ Church; Robert Roach, 1855, in St. James’s; and Robert Glossop, 1863, in St. Paul’s. He also signs others in Yorkshire to Joseph Sykes (with a medallion-portrait), 1857, at Kirk Ella, and Mary Heslewood, 1856, at Preston.

His son, William Day Keyworth the Younger, was born in Hull in 1843, but as a sculptor his work is outside the scope of this book.

(Information Hull Central Library; various references, _Art Journal._)

KIDWELL, ROBERT
_b. c. 1675, d. 1747_

Kidwell, who was apprenticed to his father William Kidwell (q.v.) in 1689, became free in 1703, and in 1716 was living in Channel Row, Westminster. In 1713 he was working as a mason at Lord Ashburnham’s house in St. James’s Square (Ashburnham Archives), and he was also employed at the London house of the Duke of Newcastle in 1738 and 1742, receiving £118 (British Museum, MS. 33,322), and at Canons, the seat of the Duke of Chandos. His death in 1747 is recorded in the Court Book of the Masons’ Company.

Kidwell had two sons, Oliver and Robert the Younger, who were apprenticed to him in 1713 and 1715 respectively. Oliver became free in 1723, was Warden of the Masons’ Company in 1734, and died in 1739. Robert had a son, Thomas, who was apprenticed to his grandfather in 1741. A Mary Kidwell, presumably a daughter-in-law of the elder Robert, applied successfully for financial assistance to the Masons’ Company in 1767 (Court Book, Masons’ Company).

KIDWELL, WILLIAM
_d. 1736_

Kidwell, whose yard was at “Westminster Hall Gate” in London, was a member of the Painter Stainers’ Company. Quite early in his life he went over to Ireland and was taken up by Sir John Perceval, who employed him to work the marble quarry on his estate in County Cork and to be in charge of the Irish workers. Perceval notes in his account book that in 1712 he had advanced Kidwell £2 15s. 6d. for “going to England for work.” In 1713 Kidwell was back in Ireland with a number of orders and made two marble chimney-pieces, also marble tables for his patron’s house at Duncarrey. In 1713 Kidwell made two chimney-pieces of Irish marble for “Mr. Southwell” and Perceval gave the same gentleman a present of a chimney-piece “of my own white marble” for his
KING, Charles, of London
fl. 1809–1840

He was probably a junior partner in the firm of King and Sons (q.v.), for in both cases the address of the yard is given as Chenies Street. In 1823 he was employed as a mason on repairs to the tower of St. Anne's, Soho (Westminster Public Library, A.2312).

King's tablets are dull, the best of them commemorating the Douce family, 1809, at West Malling, Kent. Others signed by him include those to John Martin, 1813, in Plumstead Parish Church; Joseph Kirkwood, 1815, in St. George's, Bloomsbury; John Wardle, 1825, at Wardington, Oxon; Pierre Clerc, 1825, in St. Pancras Parish Church; the Rev. Peregrine Bingham, 1826, at Berwick St. John, Wilts; William Micklefield, 1826, at West Tilbury, Essex; Sir William Rush, 1833, in Wimboldon Parish Church; and Peter Gilkes, 1833, in St. James's, Piccadilly.

KING, G. E., of Ware
fl. 1826

He signs a tablet to the Adams family, 1826, at Ware, Herts.

KING, H.

He exhibited a number of unnamed portrait-busts at the Royal Academy, 1828–1845.

KING, J., of York
fl. 1811–1840

He signs a large neo-Hellenic wall-tablet to

KING, Benjamin
fl. 1744–1783

In 1755 he was employed at Arbury Hall, Warwick, being paid £39 9s. 6d. for work in the library (Newdigate Archives). Between 1755 and 1758 he did all the stone-carving of the exterior and interior of the Warwick Shire Hall, for which he received £220.

Apparently there was some trouble about the carving of the pediment, for David Hixon (q.v.), the mason in charge, writing to the architect, Sanderson Miller, on 3 February, 1758, says:

"I was a little surprised one even as came in Mr. Lightholder and Mr. Lowe and desired I would get them up a scaffold to do the pediment, for that you had given them orders so to do, which I hope is not true. For as I shall be glad of yours and Mr. Prowes approbation in the disposition of ye ornaments, and what they should be, but own I shall be very sorry to have any other persons come to do the work, unless it cannot be done by the people who have been already concerned; and as I a little doubt the veracity of Mr. Lightholder, I ask my Lord Brooke, who said something of the kind had been shown to him, but that he thought it was doing Mr. King a great injury if it [i.e., the pediment] was executed by others" (Warwick County Records, A.C.C.R. 125/33).

KING and Sons, of London
Firm fl. 1775–1811

The firm's best monument commemorates Sir Robert and Lady Lawley, 1779, at Hints, Staffordshire. There is a charming relief on this work, and also on one in memory of Lord Calthorpe, 1798, at Edgbaston, near Birmingham.

The Kings also sign monuments to another Sir Robert Lawley, 1793, at Hints, Staffs; Frances Cattell, 1795, at Barford, Warwick; Sir John Croft, 1797, at Highworth, Wilts; and George Schultz, 1802, at Holton, Oxon.

House (King's Weston, near Bristol). By 1719 the works were in full swing and Perceval, who by now had become Earl of Egmont, had many customers, and chimney-pieces were made for Lord Barrymore, Lord St. George, Sir Richard Meade, Sir Matthew Deane, Lord Doneraile and Alderman Edward Hoare, while Mr. Floyd of Newcastle and Mr. Thornwell ordered marble monuments (British Museum, Ad. MSS. 46984 and 47047).

Kendrick apparently passed the rest of his life in Ireland though towards the end he removed to Dublin where he died in 1736. His will, in which he describes himself as "of the city of Dublin, stonecutter" was signed on 7 August of that year and proved on the following 13 September.

Kidwell's monuments in England are important. The finest, commemorating Sir Robert Bernard, c. 1690, at Brampton, Huntingdonshire, has a noble portrait-bust, while one to the Hon. Francis Coventry, 1699, in Mortlake Parish Church, is curiously designed with two male caryatids supporting a pediment. A very similar, though unsigned, monument to Sir Henry Coventry, 1686, is now at Croome in Worcestershire. It was originally erected in St. Martin-in-the-Fields, but was moved to his family church by the ninth Earl of Coventry. Kidwell also signs other monuments to John Harvey, 1700, in St. Mary-at-Hill, and Henry Herringman, 1703, at Cashalton, Surrey.

His works in Ireland (which are usually signed "of London") commemorate Mrs. Fry, 1698, in Waterford Cathedral; Boyle, Archbishop of Armagh, 1702, at Blessington, Co. Wicklow; Sir Donat O'Brien, 1717, at Kilnasooa, Co. Clare; and Viscount Duncannon, 1724, at Fiddown, Co. Kilkenny.
Marmaduke Hodgson, 1834, in Ripon Cathedral. In the same Cathedral there are various other tablets by him, but these are either insignificant or of the same design as the one already mentioned.

KING, THOMAS, and SONS, of Bath

Thomas King the Elder: b. 1741, d. 1804

Thomas King, the founder of the firm, was the son of Henry King, a clockmaker of St. Dunstan’s. He was apprenticed in 1752 to Charles Saunders, mason, of London, but settled in Bath soon after becoming free, dying there in 1804. He married a daughter of Thomas Paty (q.v.).

He is buried at Woolley, near Bath, where his epitaph says that he was “many years an eminent statuary in the parish of Walcot, and after sustaining a long and painful illness with exemplary fortitude and resignation, calmly departed this life 5 December, 1804, aged 63.”

King was also a wood-carver, for in Charles Morgan’s account-book (Tredgar Archives) there are various payments for picture-frames to “Mr. King, carver, of Lansdowne Road, Bath.” In 1810 the firm received £76 for marble chimney-pieces for Longleat, and two years later a further £28 for several of “Keinton stone” (Archives Marquess of Bath).

“King and Sons” lasted for nearly a hundred years and the firm was the most prolific and popular of all the West Country stuccateurs. Their monuments and tablets are to be found scattered, not only over all England, but in India and in the West Indies. It is true that there was a certain sameness of design and execution, but the work is always in good taste and I have yet to find an ugly or grotesque monument by them. Their early work is particularly good. The monuments of James Quin the actor, 1761, in Bath Abbey, and of Bishop Warburton, 1779, in Gloucester Cathedral, both have medallion portraits, while the great oval monument in coloured marbles to John Burgess, 1772, at North Molton, Devon, is well up to the level of the best London work of the period.

</table>

KING, WILLIAM
fl. 1769–1782

He exhibited at the Free Society, 1769–1782, showing reliefs and, in the latter year, “a monumental figure in marble.” His brother, G. King, also exhibited models at the Free Society, 1771–1776.

KING, WILLIAM, of Islington

He signs a large tablet with carefully cut details to Aeneas Barkly, 1836, in St. Mary’s, Holloway.

KING, WILLIAM, of Oxford

In 1734 he agreed with All Souls College to
build "the gate leading out of the North Quadrangle" and "also the Cloister on the south side." The carved stonework was to include the "arms of the benefactors upon the shields in the Gateway" (Archives, All Souls College, Oxford).

KINGWILL, WILLIAM, of Sidmouth

He signs a small monument with a relief of "Hope" to Charlotte Temperance, 1810, at Sidmouth, Devon.

KINSON, THOMAS A.

He signs a wall-tablet in coloured marbles with a charmingly carved design to Elizabeth Scarisbrick, 1797, in Holy Trinity, Hull.

KIRK, JOHN, of Dumfries

b. 1832

He joined the Royal Academy Schools in 1847, and two years later won a Silver Medal for the "Best Model from the Antique." In 1850 he was working at the Birmingham School of Design. Kirk exhibited at the Royal Academy, 1847-1854, and at the British Institution, 1849-1854, showing busts, etc., and a marble group entitled "Feeding-time" in 1853.

KIRK, JOSEPH ROBINSON

b. 1821, d. 1894

He was the fifth son of Thomas Kirk (q.v.) and studied in his father's studio. In 1840 he exhibited at the Royal Hibernian Academy, becoming an Associate five years later and a full member in 1854. He went to Rome in 1843, but remained there for only a year.

Most of Kirk's work is in Ireland and a full list is given in Strickland's Dictionary of Irish Artists. He exhibited at the R.A., 1846-1862, showing marble groups of "Ruth and Naomi" (1849) and of "St. John and the Virgin" (1862). His bust of Francis Burton (a copy of Chantrey's) is at Christ Church, Oxford.

KIRK, THOMAS

b. 1781, d. 1845

Kirk was born in Cork and studied at the Dublin Society's Schools. In 1808 he was chosen to execute the figure of Nelson for the column in Sackville Street, Dublin. Most of his life was spent in Ireland and his principal works are in that country; a list of these is given in Strickland's Dictionary of Irish Artists.

The most important work executed by Kirk in England is the statue of Sir Sidney Smith (1845) in the National Maritime Museum, Greenwich. He also made two statues for West Park in Bedfordshire, which Earl de Grey had ordered when Viceroy of Ireland. These were "The Young Champion" (1840) and "The Young Suppliant" (1843). His bust of the Duchess of Dorset (1818), a very pretty work, is at Knole, Kent, while that of Countess Talbot (1819) is in Ingestre Church, Staffordshire. A third bust, that of John Wilson Croker, executed in the same year, was formerly in the collection of Sir Robert Peel, but was sold with the other heirlooms in 1900.

Kirk exhibited at the Royal Academy, 1825-1839, and at the British Institution in 1840. At the Liverpool Academy of 1822 he showed busts of George IV and Thomas Moore.

KIRK, WILLIAM BOYNTON

b. 1824, d. 1900

The second son of Thomas Kirk (q.v.), he attended the Schools of the Royal Dublin Society in 1839 and later worked in his father's studio. In 1848 he went to England, where he remained for nine years, and it was while he was living at Worcester in 1851 that he designed the Shakespeare dessert-service for the famous china-works.

Kirk exhibited at the Royal Academy, 1848-1857, and at the Great Exhibition of 1851. His statue of "Iris Ascending," executed in 1844, is now at Marlborough House. In 1860 he entered the Church and later held livings at Birkenhead and Ashton-under-Lyne.

A list of Kirk's works in Ireland is given in Strickland's Dictionary of Irish Artists.

KIRKBRIDE, —, of Carlisle

fl. 1823-1838

Signs monuments to William Thurnham, 1823, in Carlisle Cathedral, to George Mounsey, 1838, in St. Cuthbert's, Carlisle, and Edward Grave, 1838, at Penrith, Cumberland.

KNAPP, JOHN, of London

fl. 1810-1830

Knapp, whose yard was in Foley Street, signs monuments to John de Coussmaker, c. 1810 (?), in Staines Parish Church; Gilbert Hare, 1820, in Marylebone Parish Church; and Sir Andrew Hammond, 1828, at Terrington St. Clement, Norfolk. His monument to Urban Vigors, 1815, also in Marylebone Parish Church, has a medallion-portrait.

KNIGHT, SAMUEL, of Exeter

fl. 1835-1841

In 1841 he made the altar-piece, altar-table and
pulpit for Bickleigh Church, Devon (Gentleman’s Magazine, 1841, Part I, page 87), and he was also responsible for carrying out decorative carving in Honiton Church when it was being rebuilt after a fire.

Knight signs a classical tablet to James Coleridge, 1836, at Ottery St. Mary, Devon.

KNIGHT, THOMAS, of London
b. 1637, d. 1680

Knight was appointed the City mason in 1666 and in 1670 received £260 “for stone workmanship in and about the Guildhall Chapel, Newgate and other places.” In the same year he and Joshua Marshall (q.v.) were responsible for the building of Temple Bar (City Corporation Records, 159/16), while between 1674 and 1675 he was paid £600 for further work at Newgate (P.R.O., E.101,475/2). In 1679 he cut the lettering on the Monument. Hooke notes on 10 April how “Knight cut wrong ’R’ for ‘P’ for the ‘Fish Street Pillar.’”

Knight died on 11 June, 1680, leaving a widow, Sarah, and one daughter. He was buried in Sanderstead Church, Surrey, under a “black coarse marble tomb,” the verses on which began as follows:

“Stay Reader here, and leave one groan
If not for my sake, for thy own.
Since impartial Death that mee
Hath overtaken, follows thee.
Hast thou wealth, strength, art and industry
Yet dye thou must, for those had I. . . .”
(Manning and Bray’s Surrey, Vol. II, page 576.)

KNOLTON, S.
He signs a large monument to Edward Austen,
c. 1750, at Bexley, Kent.

KNOWLES, THOMAS, of Oxford
d. 1826

Knowles was foreman to Stephen Townsend of Oxford, and took over his master’s yard in 1799. He later went into partnership with his son, Edward, in 1816, and it was the latter who received £135 for carving eagles and work on the pediment of Queen’s College, Oxford (College Archives).

The elder Knowles signs tablets to the Messrs. Mapleton, 1799, at Byfield, Northants; and Mr. Kipling, 1802, at Chilton, Bucks. Others executed by him in Oxfordshire include those to the Rev. W. Breeres, 1804, at Hampton Gay; Lady Elizabeth Spencer, 1812, and Lord Charles Spencer, 1820, both at Wheatfield; and William Fletcher, 1826, at Yarnton.
LAKE, J.
He signs a marble cartouche tablet to Gilbert White, 1728, at Selborne, Hants.

LAMB, FRANCIS
fl. 1749–1756
He signs a ledger to Edward Solomon, 1749, in Grantham Church, Lincolnshire, and a slate tombstone in the churchyard dated 1756.

LAMB, FREDERICK HERBERT
d. 1852
When his widow applied for assistance to the A.G.B.I. she stated that her husband had been employed by Hunt and Roskell, the silversmiths, and had modelled a number of original works for Queen Victoria, and also a bust of Mr. Fisk for General Goodfellow. Lamb also designed and executed the figure for the top of a flower stand, a work which gained the prize medal at the 1851 Exhibition. Mrs. Lamb also stated that her husband had exhibited at the Royal Academy, but I can find no trace of this in contemporary catalogues. Lamb died 31 October, 1852.

LAMBERT, JAMES
fl. 1761–1773
He exhibited a "Bust of a Gentleman" at the Society of Artists in 1763.

LANCASHIRE, FRANCIS, and SON, of Bath
Francis Lancashire: b. 1740, d. 1814
Francis Lancashire, who died in 1814, is referred to as "an ingenious statuary" in his obituary in the Gentleman's Magazine of that year (Part I, page 204). He was apparently assisted at one time by his elder brother, Richard (1736–1813), who was "formerly a statuary and a pupil of Mr. Prince Hoare" (Gentleman's Magazine, 1813, Part II, page 502). The business was carried on by Francis's son, William, who went into partnership with Tyley of Bristol (q.v.), and later with a Mr. Walker of the same city. Queen Charlotte paid a visit to the firm when she was staying in Bath in 1817.
Tablets executed by the Lancshires (which are not as good as those of their rivals, the Kings of Bath, q.v.) include those to Mrs. Tubb, 1790, at Ringwould, Kent; Mary Parсло, 1792, at Great Somerford, Wilts; John Scare, 1792, at Marsworth, Bucks; Elizabeth Curtis, 1793, Sydling, St. Nicholas, Dorset; John Dowson, 1797, at Grestock, Cumberland; Edward Read, 1798, at Gillingham, Dorset; the Earl of Cork, 1798, at Frome, Somerset; William Moody, 1798, at Steeple Langford, Wilts; John Gunning, 1798, at Cold Ashton, Glos; James Montagu, 1798, at Lacock, Wilts; Sir John Smyth, 1802, at Long Ashton, Somerset; the Rev. Charles Gatley, 1821, at St. Brides, Glamorgan; and the Rev. R. W. Howell, 1822, at Mere, Wilts.

LANCASHIRE, RICHARD
b. 1736, d. 1813
In 1763 he received twenty guineas for carving eight stone Ionic capitals for Ditchley, Oxfordshire (Dillon Archives). See Lancashire, Francis.

LANDER, F. M.
fl. 1840–1855
Of all his monuments in Kensal Green Cemetery, that commemorating General Sir William Casement, 1844, is the most extraordinary. This consists of a sarcophagus, over which is flung the General's cloak. On this lie his cocked hat, sword, etc., while the canopy above is supported at each corner by four heroic caryatids in the form of turbaned Indians wrapped in long cloaks. Fantastic as the tomb appears at first sight, it must be admitted that the details, especially the modelling of the figures of the Indians, are well carried out. One cannot, however, say as much of all Lander's work in the cemetery.

LANDRÉ, MARY
fl. 1769–1774
She was employed by Wedgwood, who paid her in 1769 for models of "6 passions or vices," "4 groups of boys," "3 female virtues," "Moses and the Serpent," "Joseph," and "Apolow and Dafnee" (sic). Five years later she received another payment from the firm for "12 signs of the Zodiac" and "4 boys in metal" (Wedgwood Archives).

LANE, JOHN
In 1722 the Rt. Hon. Thomas Coke of Melbourne Hall, Derby, paid him £6 6s. for "four solid vases like ye Earl of Burlington's porphry" (Archives Marquess of Lothian).
LANE, RICHARD JAMES
b. 1800, d. 1872

He is best known as an engraver and lithographer, but at one time he did try his hand at sculpture and executed, about 1835, a life-size seated statue of his brother, Edward, in Egyptian dress. His bust of this brother (c. 1833) is in the Bodleian, Oxford.

Lane acted as assistant to J. E. Carew (q.v.) and gave evidence for his master in the lawsuit of 1840.

LANE, WILLIAM, the Elder, and WILLIAM, the Younger, of Norwich
William Lane the Elder: b. 1729, d. 1798
William Lane the Younger: b. 1756, d. 1806

The elder Lane, who became a Freeman of Norwich in 1769, made chimney-pieces for Mr. Dillingham's house at Letton, Norfolk, in 1788 (Soane Notebooks). He and his wife died within a few days of one another in 1798, and the business was taken over by their son, William Lane the Younger (Monthly Magazine, 1798, page 234).

Lane signs monuments to Jeremiah Berry, 1767, at Acle, Norfolk, and to P. Browne, 1773, in St. Mary's, Bungay, Suffolk. Two tablets in Norwich churches are signed "Lane and Son." These commemorate William Foster, 1783, in St. Stephen's, and John Marks, 1784, in St. Simon and St. Jude's.

LANGLEY, BATTY
b. 1696, d. 1751

As a writer on architecture Langley is well known, but he was also the inventor (about 1731) of a kind of artificial stone. Vertue (Walpole Society, Vol. III, page 51) describes it as "a new invention of casting in stone or a hard composition, busts, statues, columns, etc., or any frieze or cornice work for building in imitation of free stone and said to be more durable." He also says that statues from 1 ft. to 7 ft. high could be supplied at prices varying according to size and adds: "These are made near Lambeth and sold by one Batty Langley, a bold-faced undertaker."

In the Daily Journal of 10 March, 1731, there is a notice referring to a "Mr. Langley, sculptor, at the stone warehouse at Bankside at the sign of the Hercules Head in Southwark." It will be noticed that Vertue says "Lambeth" and the advertisement "Bankside," but it hardly seems possible that two statues of the same name could have set up on the south bank of the Thames in the same year.

The only payments made to a Langley which I know of are in the Longford Castle account-books, where the following items are listed as having been supplied by him to Lord Folkestone: "1748: a sundial stone, £1 3s.; 1757: carving capitals, £10 15s. 6d.; 1758: stucco ornaments to ye Venetian seat, £7 7s.; 1758: for four shields on ye piers, £12 12s.; 1758: a carved head in ye passage, £4 12s. 6d." From the date of four of these five payments, it would seem that either Batty Langley's business was carried on after his death, or that there were, after all, two Langleys.

Batty Langley also did some building for the Duke of Kent at Wrest Park in 1735. In that year, in a long letter to his employer about the new brewery, he ends on a pathetic personal note: "This afternoon my dearest son Euclid, a child of about two years and a half age, the most manly child that nature ever form'd departed this life, as did my daughter Caroline, a child of one year old, on ye last Monday that I was at Wrest" (Archives, Lady Lucas and Dingwall).

LANGLEY, WILLIAM
W. H. Hamper in his edition (1826, page 145) of the diary of Sir William Dugdale (1605-1686), the Garter King of Arms, quotes the bill for Sir William's altar-tomb (erected in his lifetime) in Shustoke Church, Warwickshire: "Payd to Wm. Langley, 17 Feb., 1681, for worke done by him in making the monument in the chancell of Shustoke Church (excepting the tablet of marble, and the armes which were done at London), and setting it up, £3 12s."

In 1724 he was paid £12 8s. for the two large stone figures of a boy and girl on the front of the Charity School at Frome, Somerset (Churchwarden's Accounts). The statues, known as "Nancy Guy" and "Billy Ball," are still in situ.

LANGSTAFF, THOMAS
As "carver and mason of Edward Street, Marylebone," he became a bankrupt and a sale of the contents of his yard was held on 10 March, 1778. Among the lots were a number of chimney-pieces, including two "in green and Sienna marble" and one "very beautiful and highly finished, with dentals fitted with green, carved tablet, etc."

LARSON, WILLIAM
His equestrian statue of James II which he made for Newcastle was erected in 1685, but three years later was torn down by the mob and thrown into the Tyne. According to Brand's History of Newcastle (Vol. I, page 31), it was "cast in copper of the size of the famous equestrian statue of
Charles I at Charing Cross,” was “approved by Sir Christopher Wren and cost the town eight hundred pounds sterling.”

The statue was later taken up out of the river, melted down and cast into a peal of bells. A miniature copy of it is in the National Gallery of Ireland (Country Life, 1950, page 1007).

LATHAM, JASPER

_d. 1693_

Under Wren, Latham was the master-mason for building St. Mildred’s, Poultry, 1677–1679, where his carved stonework included a door with “scrolls, cherubim-heads, deathheads and bones.” He was also employed as one of the master-builders at St. Paul’s Cathedral where, between 1679 and 1690, he received over £10,000 for work which included carving “the great wreath of bay-leaves and berries” for the north side of the Cathedral, “four laurels with the arms of the Deanery,” “seventy-five faces of capitals, four festoons, 10 ft. long, etc. In 1682 he was paid £300 for carving the moulding of the flowers for the tribune windows. He also worked at Temple Bar in 1684 and at the Royal Exchange between 1691 and 1693.

In 1670 Latham built offices for Mr. Morris and Alderman (afterwards Sir Robert) Clayton in Austin Friars and Old Jewry, and two years later carried out the masonry work for Clayton’s banking-house in Hand Alley (Clayton ledgers, Guildhall Library). He also executed the stonework of Watlingford House for a Major Wildman, for which he was paid £200 in 1678.

According to Vertue (Walpole Society, Vol. I, page 129), Latham made, in 1672, the head of the equestrian statue of Charles II presented to the City of London by Sir Robert Vyner. This statue had a curious history. In all books on London it is stated that the Polish Ambassador to the Court of St. James’s ordered in Italy an equestrian statue of his master, John Sobieski, showing him trampling a Turk under his horse’s feet. When it was finished, however, the Ambassador could not pay for it, so Vyner, hearing of this, asked his agent at Leghorn to buy it and ship it to England, where on its arrival he engaged Latham to alter the head.

The real story, however, seems rather different. In 1737, when the building of the Mansion House was under consideration, the question arose of moving the statue, and a Mr. Huggins, agent of the Vyner family, wrote to the Corporation protesting against this suggestion. In his letter he made the following statement about Sir Robert’s gift: “The pedestal cost him upward of £700, besides the horse which he bought at Rome and the figure of King Charles II, which was there placed thereon in memory of that Restoration which is still commemorated in our liturgy; and on the day Sir Robert was sworn Lord Mayor of your City, I saw that conduit run with claret” (City Corporation Archives, Mansion House Committee Papers, Box 1).

From this letter it seems that only the horse was bought in Rome, so that the pedestal and the figure of Charles II may both be the work of Latham. In spite of Mr. Huggins’s protests, the statue was taken down and for forty years lay neglected in a yard. In 1779 it was given to a descendant of the donor, who took it to his country house at Gaukby, Lincolnshire; in 1885 it was moved to Newby Hall, near Ripon.

As a sculptor, however, Latham is best known for the magnificent monument to Archbishop Sheldon, 1683, in Croydon Parish Church, a work in which he was assisted by his partner, the obscure Boone. Unfortunately this was badly damaged when the church was destroyed by fire in 1869. He was also responsible for the monuments to Viscount Grandison, c. 1670, in Oxford Cathedral, and Thomas Brome, 1673, at Farnborough, Kent.

Latham was City mason from 1687 until his death, and, in 1689, Warden of the Masons’ Company. He died in 1693, for at the end of the year his widow received payments for work he had been carrying out at the Royal Exchange (City Corporation Archives, Gresham Committee). She also carried on the business and, until 1697, continued working for the Mercers’ Company, to whom her husband had been appointed mason in 1682.

Latham had been assisted by his son, Robert, at the Royal Exchange between 1691 and 1693, and the latter carried on the work for two years after his father’s death. For some obscure reason he later left England, and in 1713 was living at Port Mahon in Minorca (Court Book, Masons’ Company).

(bodleian, Rawlinson MSS. 387; Diary of Robert Hooke; Wren Society’s Publications; authorities cited in text.)

LAUGHTON, JOHN,
of Priors Cleeve

_b. 1711, d. 1754_

Several members of the Laughton family were masons by trade. John signs tombstones at Bretforton, Worcestershire, between 1741 and 1746, and at Welford-on-Avon, in Warwickshire, in 1750. His sons, William and Thomas Laughton, of Priors Cleeve, respectively sign tablets
to Thomas Vale, 1769, at Elmley Castle, Worcestershire, and to John Slatter, 1785, at Bidford, Warwickshire.

Another member of the same family was Thomas Laughton, statuariy and mason, who was born in 1790 and died in 1852.

**LAURIE, W.**  
fl. 1846–1849

He exhibited at the Royal Academy in 1846 a model of a monument to Lord Haddington, and in the following year a design for a memorial to Shakespeare.

Laurie was living at Downham Market, Norfolk, in 1849, the year in which he published a book of designs for Gothic tombstones.

**LAW, EDWARD, of Sheffield**  
b. 1798, d. 1838

He was born on 9 December, 1798, the fourth child of John Law of Sheffield and grandson of Thomas Law, a well-known silversmith of that town. Besides being a sculptor, Edward Law was a designer of some skill, working for Sheffield silversmiths and iron-founders. Among the objects he designed in 1825 was a bronze hexagonal stove with ormolu mountings for the Registrar's Office in Edinburgh. He was also one of the artists attached to the works of Hoole and Robson, where some years later Alfred Stevens was to be employed.

Law made a number of wax medallions between 1826 and 1827, including those of Shakespeare, Canning and William Wilson. He exhibited at the Royal Academy in 1829 and again in 1832, and died on 30 June, 1838.

Most of his work is to be found in Sheffield and includes busts of J. Rimington (1821) and Earl Fitzwilliam (1834), both in the Cutlers' Hall; Frank Stone (1826) and Edward Rawson (1826), both in the Weston Park Museum; Thomas Waterhouse (1831) at the University; Thomas Rawson (1827) at the Royal Infirmary; Thomas Holy (1832) in the Carver Street Chapel; Henry Overend (1832) in the possession of the Literary Society; and Thomas Watson (1834) in the Cathedral. His medallions of William Staniforth (1835) and John Law (1838) are at the Royal Infirmary and the Free Masons' Hall respectively, and he also signs the monuments of John Greaves (1828) in the Cathedral, and of Mrs. Beard Holy (1838) in the Carver Street Chapel. Another bust of Earl Fitzwilliam (1829) was formerly at Wentworth Woodhouse, Yorkshire.

(Information, Sheffield Public Library.)

**LAW, WILLIAM, of Camberwell**  
fl. 1775–1795

He signs large tablets in coloured marbles to Sarah Cotton, 1775, at Birchington, Kent, and to William Cody, 1795, in St. George-the-Martyr, Southwark.

**LAWLOR, JOHN**  
b. 1820, d. 1901

He was born in Dublin and attended the Royal Dublin Society's Schools, studying sculpture under J. Smyth. He came to England in 1845 and, under J. Thomas (q.v.), made a number of statues for the Houses of Parliament. On Thomas's recommendation he joined the Royal Academy Schools two years later, giving his age as twenty-four, although Strickland's *Dictionary of Irish Artists*, which gives the date of his birth as 1820, would make him three years older.

Lawlor was made an Associate of the Royal Hibernian Academy in 1861 and exhibited at the Royal Academy, 1848–1879, showing groups of "Boy and Dog" (1844), "The Mourners" (1848), and "The Wrestlers" (1867); a statue of Titania (1868); and busts of Dr. Gully (1853), T. Kennedy (1854) and C. Cattermole (1873). In 1879 he had a disagreement with the Committee and refused to send any more works after that date. He also exhibited at the British Institution, 1840–1851, and at the Great Exhibition of 1851 showed his group of "The Bathers" which won a prize medal. H. Weckes (q.v.), in his *Treatise on the Fine Arts in the Great Exhibition* (page 97), wrote of this work that Lawlor was "not surpassed by any in the whole exhibition for the modelling of female flesh." The group was later purchased by the Prince Consort for the Royal Collection.

Lawlor's best-known work is the group representing "Mechanics" which he executed in 1864 for the Albert Memorial, while some of the plaques at the corners of the Memorial are also by him. His statue of "Poetry" (1870) was formerly at Manley Park, Manchester, and he is represented in Ireland by statues of Patrick Sarsfield (1889) at Limerick, and Dr. Delaney (1890) at Cork. His "Blind Girl" (1875) was sold at Christie's in 1877, while his busts of "Clio" (1864), "Summer" (1864) and "Hermione" (1865) were sent by an anonymous owner to the same salerooms on 10 June, 1904.

In 1886 Lawlor went to America, but returned two years later and died in London, in 1901. "He was well known and popular in artistic and literary society in London. His tall handsome figure, his fund of witty anecdotes, his genial manner and his fine baritone voice making him a
LAWRENCE, RICHARD
fl. 1760–1795

He was working for the Royal Palaces as early as 1760, for he is mentioned in a letter written in that year to the Duke of Ancaster by George Murray (q.v.). The latter, who had just succeeded James Richards (q.v.) as Master Sculptor and Carver to the Crown, complained bitterly that “the care of the limetree work” (i.e., the Grinling Gibbons carvings, etc.) “at His Majesty’s Palace at Windsor” had been “taken from me without my knowledge, and given to one Lawrence a Carver who never had any Concern with His Majesty’s work on any Acct.” In another note Murray also states that Lawrence was receiving £50 a year which by right belonged to him (Archives, West of Alscot Park).

Later on Lawrence did a good deal of work at Greenwich Palace, where he carved large medallions and lions’ heads in 1770, and three years later received £101 for “ten and three-quarter faces of Corinthian capitals and six pilasters,” all the work being for the King Charles Building (P.R.O., Ad. MS. 68/876).

In 1784 Lawrence was entrusted with most of the stone-carving for the Chapel, which was being rebuilt after a disastrous fire. His work here included eight large mask-heads in Portland stone and eighty-three faces of Corinthian capitals for the exterior, while for the interior he executed “ten faces of very rich Corinthian capitals in stautuary marble to the eight columns at the East and West end of the Chapel at £96 15s. per capital,” and also “three hundred and twenty-one feet of large ogee carved in an antique ornament, very rich and sunk very deep” (P.R.O., Ad. MS. 68/813). Two years later he made “twenty-four faces of antique Ionic capitals in marble for the six columns to the organ gallery,” and finally, in 1787, “thirty-two cantilivers on the North side of the Chapel, the fronts and ends very rich and very rich foliage on the side,” costing £528 (P.R.O., Ad. MS. 68/819).

In 1778 Lawrence carved large ciphers and two large stars and garters for the Queen’s lodge at Windsor (P.R.O. Works 5/66). In the previous year he had begun to work at Somerset House, and continued there until 1791, carving in both wood and stone. Here his work included the Corinthian composite capitals in Portland stone for the back front, the east return building, and the west end of the main building. He also made “two large rich flowers in the soffit of the arch leading to the terrace” and “four goats’ heads over the windows of the principal floor” (P.R.O., A.O. 1/2495).

At Westminster Hall he carved, in 1785, a rather complicated stone console with “a shell in front with a cross and five birds, lions on the sides, and over the console a Gothic cornice with sweeps and strawberry-leaves” (P.R.O., 5/70).

Lawrence also worked at a number of private houses, including Manor House, Milton, Berks, 1764–1773 (Country Life, 24 December, 1948); Inverary Castle, 1781–1782; and the Marquess of Buckingham’s London house in Pall Mall, 1795. In 1791 he carved part of the column erected in that year at Colne Park, Essex, by Philip Hills (Soane Notebooks, Soane Museum).

LAWRENCE, RICHARD
fl. 1815–1840

He exhibited models of horses at the British Institution in 1815 and 1816, while in the former year the Royal Academy purchased a cast of his “restoration of a horse’s head from Lord Elgin’s marbles” (Royal Academy Archives).

He signs a monument to J. Alexander, 1839, at Broadstairs, Kent.

LAWSON, —

In 1692 he was paid £16 for a statue of Diana for Chatsworth (Chatsworth building accountbook).

LEA, WILLIAM
b. 1776

He attended the Royal Academy Schools in 1797, having exhibited a “Model of Cupid” at the Academy three years previously.

LEADER, G.
fl. 1792–1804

He exhibited wax portraits at the Royal Academy, 1792–1804, the most interesting being those of the artists, George Stubbs (1792) and Paul Sandby (1792), and that of Admiral Bligh (1801).

LEADER, P. H.

He exhibited “models in wax” at the Royal Academy in 1797. His signed boxwood portrait-
LEARMOUTH

In 1836 he exhibited at the Royal Academy busts of Master D. Hanbury and of Murray, Bishop of Rochester.

LEDSHAM, EDWARD

Ledsham, who was probably a Llanfair craftsman, received £10 12s. in 1679 for carving the great stone coat of arms above the hall door at Chirk Castle, Denbigh (Myddelton Archives).

LEE, JOHN, of Odiham

fl. 1797-1842

He signs a number of tablets in Hampshire, the best of which commemorate William Burgess, 1797, and Mrs. Nichols, 1821, both in Odiham Parish Church; and Richard Harrison, 1812, at South Warnstow.

LEE, WALTER, of London

fl. 1716-1754

He was the son of a mason named Walter Lee and was apprenticed to his father in 1716. In 1724 he became free and later set up his yard in Oxford Road. As a mason he built a house in Marylebone for Thomas Warren in 1731 (Inventory of Directors of the South Sea Company), while about three years later he was working at Canons (Baker's Duke of Chandos, page 199). In 1740-1741 he was paid £114 for work at Canons for the second Duke of Chandos (Ipswich Public Library, S.I./2/100).

In 1742 Lee agreed to build Marylebone Chapel for £1,000 (Archives, West of Alscot Park), and he also seems to have been responsible for a tablet erected there in memory of James Gibbs the architect, who died in 1754. The latter stated in his will that he wished to be buried at Marylebone and "that a small monument of marble, to be made by Mr. Walter Lee, mason, to be put up against the wall within the said church" (European Magazine, 1789, page 169).

Lee was succeeded in the business by his son, George, who was apprenticed to him in 1740, became a member of the Masons' Company in 1757, and died in 1767. In the year before his death, his son, another Walter, had been bound apprentice to him.

LEGÉ, F. A.

b. 1779, d. 1837

About 1800 he was working for Messrs. Franceys (q.v.) of Liverpool and five years later carved the Royal coat of arms on the Union News Room in that city (The Stranger in Liverpool, 1815, page 76). In 1814 he exhibited in Edinburgh a colossal figure of "Satan." Apparently this work was not received with favour, for the Scots Magazine (1815, page 334) reported that "some intrusive Goth has dared to mutilate it."

When Legé came to London he was employed by Chantrey (q.v.) for whom he cut in marble the famous monument of the "Sleeping Children" which Sir Francis had already modelled. After the latter's death it was said by a number of people that Legé was responsible for the design of this monument, as well as for the carving, but this is, of course, absurd (Notes and Queries, 1850, page 94).

Legé exhibited at the Royal Academy, 1814-1825, showing a statue of "Psyche" (1824) and busts of Sir Francis Chantrey (1815); C. H. Smith, the sculptor (1822); and John Crossley (1825). His bust of the Rev. Robert Hawker (1829) was formerly in St. Andrew's Church, Plymouth.

His small marble figure of a lady reclining on a couch (signed and dated 1828) is in private possession. This enchanting and delicate work might at first sight be taken for contemporary French sculpture, for it has all the charm of that country. On closer examination, however, it shows that curious virginal English frigidity which seems to add to its beauty.

Legé's son, George, received a large Silver Medal from the Society of Arts in 1826, but does not seem ever to have exhibited, and died before his father. Legé himself died on 4 April, 1837, leaving two children, Ann, a governess in Russia, and Frederick, a private soldier (Archives, Artists' Annuity Fund).

LEGREW, JAMES

b. 1804, d. 1857

He was the son of the Vicar of Caterham and showed an aptitude for sculpture as a child, when he modelled figures of animals. His father placed him with Chantrey (q.v.) and in 1822 he joined the Royal Academy Schools, having in the same year been awarded the Silver Palette by the Society of Arts. In 1824 he won a Silver Medal at the Academy, and in 1829 the Gold Medal for a group entitled "Cassandra Dragged from the Altar." In 1830 he went to Rome and studied there for some years. On his return to England, he opened a studio in Pimlico.

In 1844 Legrew showed at Westminster Hall "The Last Prayer of Ajax" and "Milton Reciting to His Daughters." The former of the Literary Gazette considered "finely proportioned, but yet the propriety of its attitude is liable to question," while it
thought the latter “too smooth and yet an extremely pleasing performance.” In 1850 the sculptor made a font for Morden Church in Surrey, and in the following year sent his group “The Murder of the Innocents” to the Great Exhibition.

Legrew exhibited at the Royal Academy, 1826-1857, and at the British Institution, 1829-1836. At the Academy he showed, among other works, a group entitled “Musidora” (1850) and busts of Prince George of Cumberland (1832); Mrs. George Smith, of Sandstead Park (1833), W. Skelton (1837), the Bishop of Peterborough (1838); and Sir B. Freere (1857). His “Cupid,” executed in 1839, was exhibited at the Birmingham Society of Artists, while a cast of his “Samson,” dated 1843, was formerly at the Crystal Palace.

Legrew’s taste was purely classical, but his work never met with the encouragement it deserved. He was a man of many attainments besides sculpture, and his linguistic ability was remarkable, not only in French, German and Italian, but also in Latin, Greek, Hebrew and Syrian. As a writer he published a work on *The Ancient Sculpture of the Jews* in 1855, and also a short life of Flaxman. Unfortunately towards the end of his life he became prone to delusions, a weakness which was aggravated by the deaths of his father and brother, and which ultimately led him to commit suicide at Kensington on 15 September, 1857.

His monuments in Surrey include those to Henry Hoare, 1828, at Morden; Robert Wright, 1832, in Wilmington Parish Church; George Smith, 1836, at Sandstead; and the Rev. J. Kendrick at Bletchingley. He also signs others to Edward Cranston, 1841, at East Grinstead, Sussex, and to Bishop Allen, 1845, with a life-size recumbent figure, in Ely Cathedral.

(Art Journal, 1857, page 348; various references, Builder.)

LEGETERN, or LOGTERIN, J. V.

† 1685-1708

He made the life-size statues of “Hera,” “Apollo,” “Artemis” and “Diana” for the quadrangle of Woburn Abbey (Bedford Archives).

LEIFCHILD, HENRY STORMOUTH

b. 1823, d. 1884

He was the son of William Gerard Leifchild and studied in the sculpture galleries of the British Museum and at the Royal Academy Schools, which he joined in 1844 on the recommendation of F. S. Cary. In 1848 he went to Rome and remained there studying for three years.

Leifchild’s model won the competition for the Guards’ Memorial at Chelsea Hospital, and he also designed the mortuary chapel near the entrance gates of Warriston Cemetery, Edinburgh, which contains his recumbent effigy of Mr. Robertson. At the Great Exhibition of 1851 he showed a group entitled “Rispah Watching Over the Dead Bodies of Her Sons,” while to the Royal Academy, 1844-1882, he sent, among other works, busts of A. J. Scott (1851); the Rev. J. Leifchild (1852) and Mrs. Danson (1876). A bust of George Wilson, shown in 1871, is now in Manchester Town Hall, while his heroic seated figure of “Erinna,” dated 1860, is at Holloway College.

After Leifchild’s death on 11 November, 1884, his widow presented the models of his more important works to Nottingham Museum, but the only one remaining today is the “Jacob and the Angel,” all the rest having been destroyed by a curator before 1929. Among these were a group of “Athene Repressing the Fury of Achilles,” a figure of “Lot’s Wife,” and a design for a memorial to Lord Byron. (Magazine of Art, 1891; information, Nottingham Public Library.)

LE MASON, —, of Paris and London

Le Mason, who was an Academician of France, in 1790 exhibited at the Royal Academy a bust of Sir William Chambers, the architect, and medallions of the latter’s two daughters.

In the same year the sculptor was paid twenty-five guineas by the Duke of Bedford for two bas-reliefs, 3 ft. in diameter, for the exterior of the sculpture gallery at Woburn. These represented respectively “Spring sacrificing flowers presented to her by Zephyr” and “Summer leaning on a sheaf of corn and receiving flowers from a child.” Le Mason, in a letter to the Duke, explained that he could not charge less than twenty-five guineas for the pair, “seeing that I shall have to pay for fresh fruit and flowers and other indispensable articles” (Woburn Abbey Archives).

LE PIPER, FRANCIS

† 1698

He is chiefly known as a painter, but Buckridge in his article on Le Piper in An Essay Towards An English School (published 1706) has “in the latter part of his life he apply’d himself to the Study and Practice of Modelling in wax, in bassorelievo, in which he did abundance of things with good success. He often said he wish’d he had thought of it sooner, for that sort of work suited
better with his genius than any. Had he lived longer he would have arriv’d to a great Perfection in it.”

LESOW, or LESSO, WILLIAM  
*d. 1738  
He was mason to St. Thomas’s Hospital from 1729 till his death in 1738. In 1734 he received £229 for the masonry of “the new building.” William died in 1738 and the yard was carried on by his widow, Ursula, till her death in 1741 (Hospital Archives). Lesow was also working on the building of Guy’s Hospital at the time of his death (Guy’s Archives).

LESTER, EDWARD, of Dorchester  
*fl. 1827–1837  

LEVEROTTI, G.  
He exhibited a marble bust of a daughter of Lord Burgersh at the Royal Academy in 1838.

LEVERSUCH, RICHARD  
*fl. 1709–1725  
From 1709 until 1718 he was one of the principal masons for building Queen’s College, Oxford (College Archives). His monument to Robert Pescod, 1725, is in Winchester Cathedral.

Leversuch was succeeded by his son, Thomas, who became a bankrupt in 1755 (London Magazine, 1755, page 301).

LEWETT, —  
He signs a tablet, with arched pediment, urn and flaming lamps, to William Clarke, 1727, at Warminster, Wilt.

LEWIS, JOHN, and FAMILY, of Gloucester and Cheltenham  
Firm *fl. 1796–1860  
The firm seems to have had its first premises in Gloucester, for the monuments are signed “John Lewis, of Gloucester” until about 1820. The founder was succeeded by a “C. Lewis,” who was presumably his son, and this C. Lewis, in his turn, was followed by his son, another John, who has the designation “sculptor” after his name in contemporary directories. It was this second John Lewis who, in 1847, erected and carved the column at Southam, set up by Lord Ellenborough to com-

memorate the achievements of the British forces in India (Builder, 1847, page 29).

Tablets by the firm are in no way outstanding in design, rarely showing anything more ambitious than the conventional figure of a mourning widow or a fluted semi-urn against a pyramid. They are very frequent in Gloucestershire and its neighbouring counties, the best including those to Richard Morgan, 1796, at Lydney, Monmouth; Henry Parry, 1802, in Monmouth Parish Church; General Barnes, 1810, at Queenhill, Worcs; John Maggs, 1816, at Winchcombe, Glo; Richard Orlebar, 1819, at Podington, Beds; John Rose, 1821, and Peter Hunt, 1824, both in Cheltenham Parish Church; Robert Phillips, 1822, at Lugwardine, Hereford; and Henry Campbell, 1823, at Charlton Kings, Glo. Their monument at Poulton-le-Fylde, Lancs, to the Rev. Richard Buck, 1845, is copied from a design by Flaxman (q.v.).

LEYLAND, JOSEPH BENTLEY, of Halifax  
*b. 1811, d. 1851  
He was born at Halifax on 31 March, 1811, the second son of Robert Leyland, a distinguished naturalist. At the age of sixteen he began modelling, and attracted the attention of a wealthy collector, Mr. Christopher Rawson, who allowed the young man to study his collection of ancient Greek marbles.

Leyland’s first independent work was a model of a greyhound which he showed at Manchester in 1833. In the following year he exhibited there a colossal statue of “Spartacus,” and also sent a head of Satan to Leeds. These works were noticed by Mr. Illidge, a portrait-painter, and he advised the sculptor to try his fortune in London. Leyland acted on this advice and, while in London, studied anatomy under R. B. Haydon, who thought very highly of his work and declared him to be a genius.

The sculptor’s most famous work is a group of African bloodhounds, executed in 1846. Landseer considered it “the noblest modern work of its kind,” while the Art Journal thought it was “certainly not surpassed by any sculpture of modern times.” The group, together with a “Thracian Falconer,” also by Leyland, is now in the Salford Museum. He also executed for his native city a statue of “Kilmery the Sinless Maiden” in 1840, and another of “An Anglo-Saxon Chief” erected in 1851, the year in which he died, at Halifax on 26 January.

Leyland signs monuments in Halifax to Bishop Ferrar, 1848, in the Parish Church, and to Mr.
and Mrs. Rawson, 1848, in Trinity Church. In Yorkshire he made the monument of James Fawthrop, 1843, at Thornton, and the recumbent figure of Dr. Beckwith, 1845, in York Minster. (Art Journal, 1851, page 140.)

**LINES, W. R., of Birmingham**

*b. 1801, d. 1846*

Lines, who was the second son of Samuel Lines of Birmingham (1778–1863), the well-known drawing-master, showed a figure of “Belisarius” at the Birmingham Society of Artists in 1827, following this two years later with busts of Mr. Thomas Hill and “An Infant Son of Mr. Rice Harris.” He died on 27 July, 1846 (Birmingham Gazette, 3 August, 1846).

His brother Edward also exhibited at Birmingham at this time, showing figures of “Eve” in 1827 and “Musidoras” in 1829.

**LINTON, W., of London**

*fl. 1680–1720*

He may be the son of William Linton of Norwich (q.v.). He signs the fine large monument to John Offley (d. 1678) in St. Pancras Old Church, and the architectural one in memory of Elizabeth Scrope, 1719, in Lincoln Cathedral. Another work by him is the monument of Anthony Sparrow, 1685, Bishop’s Palace Chapel, Norwich.

**LINTON, W., of Norwich**

*fl. 1666–1684*

Signs a tablet to Edmond Hobart, 1666, at Holt, Norfolk. Another work by him, now destroyed, was the cartouche tablet to John Hall in the Church of St. Nicholas, Yarmouth.

**LITTLE, J. S.**

In 1843 he exhibited a bust of “The Late Tyrone Power” at the Royal Academy.

**LOADMAN, MARK, of London**

*fl. 1761–1772*

Between 1761 and 1767 he received nearly £4,000 for mason’s work at Audley End, a sum which included £855 for the bridge which he built in 1763 (Essex Records, D/DBY.243).

Loadman was declared a bankrupt in 1772, his address at the time being given as Lamb’s Conduit Street, Holborn (London Magazine, 1772, page 346).

**LOCATELLI, JOHN BAPTIST**

* b.c. 1735, d. 1805*

He was born in Verona about 1735, and worked there and also in Venice and Milan, many of his patrons being Englishmen making the Grand Tour. For the Cathedral of his native city he made statues of “Faith” and “Hope,” and he also executed one of Pietro D’Abano for Padua.

About 1775 Locatelli went to London, but was in financial difficulties five years later, when the Royal Academy granted him £50 (Royal Academy Archives). According to J. T. Smith (Nollekens and His Times, Vol. II, page 61), Nollekens went to Harrogate for his health in 1780 and left Locatelli and his pupil, C. Rossi (q.v.), to carve the medallions on the façade of the Middlesex Sessions Hall, which had already been modelled by himself. In 1781 Locatelli received £64 for a “richly carved” chimney-piece for Somerset House (P.R.O., A.O.1/2495), while a year or so later he made a statue of “Venus” for the garden of Dr. Lettson at Camberwell (European Magazine, 1803, page 430). He also worked for Robert Adam, to whose design he executed a chimney-piece for Harewood House. At that architect’s sale, held on 22 May, 1818, one of the lots was “six terra-cotta medallions of boys, modelled by Locatelli.”

The sculptor later became a protégé of Lord Orford, who commissioned a colossal group of “Theseus and Hercules.” The two figures when completed looked, according to Nollekens, like “the dried skins of two brick-makers stuffed with clotted flock from an old mattress,” but Locatelli nevertheless had the effrontery to ask £2,400 for the work, a price which his patron firmly refused to pay. In 1788 it was examined by a jury of experts, including six sculptors, who reduced the charge to £1,350 (J. T. Smith, op. cit., Vol. II, page 59).

Locatelli also worked for Mrs. Coade (q.v.), for Hughson (London, Vol. IV, page 545) described “a female figure lying on a couch as large as life, modelled by Locatelli from nature” which was to be seen in the firm’s showrooms at Lambeth. This may be a terra-cotta cast for the sculptor’s original marble figure now at Stratfield Saye, or for the plaster reclining figure of Signora Bacelli at Knole. The former is signed on the head-band, the latter not signed at all, but all the same it is very possibly Locatelli’s work, for he exhibited a head of the lady (then mistress of the Duke of Dorset and later of the Earl of Pembroke) at the Royal Academy of 1781, and the Knole figure only dates from a year or so later. In addition, the treatment is very similar to that of the signed work at Stratfield Saye. In 1796 Locatelli left England and settled in Milan, where he was patronized by Napoleon, who granted him a pension for life. At an anonymous sale held by Mr. Christie on 23 January, 1807, one of the lots was “a capital and well-known marble of exquisite sculpture of

EDWARD MARSHALL
Lady Culpeper, 1638, Hollingbourne, Kent.
the "Cumbent Venus" by the celebrated artist Locatelli. This could be the figure now at Stratfield Saye.

At the sale by Mr. Christie of a "Man of Fashion" held on 14 May, 1793, there were sold two life-size statues of Apollo and Mercury by Locatelli. They were carved out of "Orco stone" and a note in the catalogue has "it is supposed that these are the only specimens in England of this fine stone which was discovered about twenty years ago in the Veronese State." Both lots were however passed (Archives, Messrs. Christie).

(Authorities cited in text.)

LOCHEE, JOHN CHARLES
b. 1751

He was born on 4 November, 1751, and joined the Royal Academy Schools in 1772, giving his name as "Joannes Carolus Locchee," though he soon anglicized it. In the same year he was awarded a Silver Medal by the Academy, and four years later won a premium of thirty guineas from the Society of Arts for a "Model of an Infant Representing Statuary."

In 1787 Lochee was employed by Wedgwood, modelling plaques from the gems etc., at Stowe, and also medallion-portraits of the Princes Augustus, Adolphus and Ernest; the Princess de Ligne; William Pitt; Count Pinto, the Portuguese Ambassador; the Marchioness of Buckingham; Lord Hood; the Hon. Keith Elphinstone; Dr. Deman, "the famous midwife"; Mr. Dennis O'Kelly, "famous on the turf"; and the Duke of Brunswick (Archives, Wedgwood Museum).

Two of the medallions, those of Pitt and Count Pinto, are referred to in letters in the Wedgwood Archives. Apparently the sculptor was given permission to take the portrait of Pitt, for the Prime Minister's secretary wrote to Wedgwood on 16 November, 1787, to ask "what time it would be convenient for Mr. Lochee to call in Downing Street," while Lochee himself refers to the one of the Count in an appallingly misspelt letter dated 3 December of the same year, and directed to "Mr. Boyle at Mr. Wedgwood's." "I forgot to mention in my lettre," he says, "that I have been to the portugaiso ambassador this morning which is know wiser satisfied with the Likeness, but dont like to have it dress to much in the fashion so have been-oblige to altered the hair."

Another letter from Charles Peart (q.v.), written on 26 March, 1788, to Mr. Byerley, Wedgwood's agent, tells him "Mr. Waldin the artist at Stowe wishes me to inform you that Mr. Lochee last November applied to him from Mr. Wedgwood for the portrait of the Marquis of Buckingham which Mr. W. obtained and gave Mr. Lochee every assistance possible and gave him also the Marquis's mask in Plaister" (Wedgwood Archives).

A number of the busts which the sculptor had modelled for Wedgwood, including those of Mrs. Barnell, Princess de Lamballe and Count O'Kelly, were afterwards engraved as gems or cameos (Tassie's Engraved Gems, 1791).

In 1787 Lochee made a bust of the Duke of York which is now in the Royal Collection (another version is in the possession of Lord Sherwood), and in 1790 one of the Prince of Wales for the Society of Arts. For this he was awarded a silver medallion, and an engraving of it forms the frontispiece of Volume X of the Society's Transactions.

He exhibited at the Royal Academy, 1776-1790, showing busts of Prince Charles of Mecklenburg (1787); Prince Edward (1787); Dr. Herschell (1788); Prince William Henry (1788); and R. B. Sheridan (1790). He was declared a bankrupt in 1795 (Universal Magazine, 1795, page 238).

LOCKWOOD, JOSEPH,
of Doncaster
b. 1759, d. 1837

He became a Freeman of Doncaster on 21 November, 1794, on payment of twenty guineas. In 1807 he was elected to the Town Council and later was twice chosen Mayor (Corporation Archives). He died 14 February, 1837. His son, also Joseph, became a Freeman of Doncaster on 5 January, 1808.

Most of his tablets are neo-Hellenic in design, but that of Samuel Tooker, 1819, in Rotherham Parish Church, has a relief of fases.

Other tablets in Yorkshire by Lockwood include those to John Nevile, 1804, at Badsworth; Charles Thelusson, 1820, at Brodswell; John Crosham, 1823, at Barnby-on-Don; Gilbert Hill, 1827, at Bawtry; Bartholomew Hodgetts, 1830, at Barnsley; and John Yarborough, 1836, at Campsell. He also signs tablets to the Rev. Thomas Denton, c. 1800, at Ashstead, Surrey; and to John Woodruff, c. 1800, and Thomas Peacock, 1827, both at Crowle, Lincolnshire.

LODGE, WILLIAM,
of Birmingham

His tablet commemorating Charles Richards, 1806, is in St. Paul's Church, Birmingham. His widow, Ann Lodge, signs tablets to Daniel Mathews, 1822, at Hagley, Worcesters, and to William Clere, 1823, at Quat, Salop.
LOFT, JAMES
fl. 1820–1867

He was born at Hull about 1800, and at the age of twenty went to London, where he became a pupil of Chantrey (q.v.). He exhibited at the Royal Academy, 1825–1867, showing among other works busts of W. Graham (1831), J. Knight (1854), Sir Charles Napier (1855) and Sir E. Lyons (1856). In 1833 he made a statue of Daniel Sykes for the Mechanics’ Institute in his native town.

Loft signs monuments to Samuel Russell, 1834, in Shepperton Parish Church; the Rev. John Scott, 1835 (with a medallion-portrait), in St. Mary’s, Hull; and Major Mills, 1838, in St. Mary’s, Bedford.

(Information, Hull Public Library.)

LONG, MRS.

In 1747 the Gentleman’s Magazine (page 599) published an article on marble-staining and the practice of this art by W. Bird, of Oxford (q.v.). The author alleged that the art was not a lost one, “for we have lately been informed that the wife of Mr. Long, stone-cutter at Bow Bridge, Essex, performs it in a very curious manner.”

LONG, HENRY

He was apparently a worker in terra-cotta, for in 1690 he received £6 5s. for “a large vase of earth wrought with handles and festoons, painted and gilt,” for Kensington Palace (P.R.O., E.351/3466).

LONG, MARK, and FAMILY,
of Taunton
Firm fl. 1790–1845

The firm was founded by Mark Long, who was later joined by his wife, Maria. On Mark’s death, his widow and son, Robert, carried on the business, the latter ultimately becoming the sole proprietor. It is for this reason that tablets made by the firm are signed either “M. Long,” “M. and M. Long,” or “R. Long.” It was Robert Long who made the font for Trinity Church, Taunton, in 1842 (Gentleman’s Magazine, May, 1842, Part II, page 190).

The firm’s tablets include those to John Tripp, c. 1790, and Elizabeth Corfield, 1811, both in St. James’s, Taunton; George Hart, 1813, and William Frauncis, 1815, both in Taunton Parish Church; the Rev. Thomas Tucker, 1809, at Kingsdon, Som., Bridge Hamilton, 1824, at Broomfield, Somerset; and Hooker Bartelot, 1838, at Bishop’s Hull in the same county.

LONGLEY, THOMAS,
of Canterbury
Firm fl. 1802–1845

Longley was the best of the nineteenth-century Canterbury statuaries, and in 1802 succeeded Thomas White (q.v.) as master-mason of the Cathedral. He may also be the “Longley” who was employed on carving in the library of Lambeth Palace in 1829 (Cambridge University MS. 3928). His monument to Major Cairns, 1815, in Canterbury Cathedral is also signed by a “Robert and Mary Rushbrook,” who may have designed it.

After Longley’s death he was succeeded in the business by his son, John. Among the firm’s monuments and tablets in Kent are those to Edward Brydges, 1809, at Wootton; Lady Sondes, 1818, and Christopher Milles, 1822, both at Nackington; William Hougham, 1828, in St. Martin’s, Canterbury; Charlotte Hannam, 1831, at Minster; and Lord Sondes, 1836, at Sheidwich. They provided another monument to Lady Sondes, also dated 1818, at Rockingham in Northamptonshire.

LOSCOMB, —, of Reading

He signs a large wall-tablet to Sarah Terry, 1818, at Warfield, Berks.

LOUGH, JOHN GRAHAM
b. 1798, d. 1876

According to the Parish Register of Shotley, Northumberland, he was born in January, 1798, the third son of William Lough of Aycliff, Co. Durham, and his wife, Barbara Clementson, of Dalton, Northumberland, but Lough himself always seemed very uncertain about his age. When he joined the Royal Academy Schools in 1826 he gave it as twenty-three, and a year later, in an interview with the Literary Gazette, declared he had been born in 1803. The Dictionary of National Biography, however, gives the year of his birth as 1806.

Lough’s father was a farmer near Hexham, and the boy was first apprenticed to a stonemason at Shotley Field. He later went to Newcastle-on-Tyne, where he found work as an ornamental sculptor and where he carved the decorations on the building of the Literary and Philosophical Society. In 1825 he persuaded the captain of a collier to give him a free passage and made his way to London by sea. Here he joined the Royal Academy Schools in 1826 on the recommendation of J. T. Smith, and made such rapid progress that in the same year he received a commission from the Duchess of Buckingham for a bust. In 1827 he
was able to hold his first exhibition, which proved an instantaneous success.

Lough suffered all his life from being absurdly over-praised by one section of the Press and unfairly criticized by another, the extremes being represented by the Literary Gazette and the Art Journal. For example, when he held his first exhibition the Literary Gazette hailed him as an "extraordinary genius," whose works were of "perfectly miraculous power, productions as only the most exalted and powerful genius could conceive and execute." The Art Journal, on the other hand, described his group of "The Mourners," shown at Westminster Hall in 1844, as "maudlin sentimentality rarely outdone by the most drivelling essays," although the Literary Gazette considered that "nineteen out of twenty people would prefer it to any other work in the exhibition" and were "surprised that the artist is not among those to whom honour has been done by the Commission."

When the Art Journal heard that Lough had been given the commission for the statue of the Prince Consort at the Royal Exchange, their remark that there could be "no doubt of it being a failure" was mild compared with the abuse that greeted his model of the companion statue of the Queen, which he sent to the Royal Academy in 1845. This was damned out of hand as "an odiously coarse production, in which not one feature of the Queen is recognizable," while "for a public work" it was considered "a common disgrace, nothing so vulgar, worthless and unartist-like has ever been seen within these walls." When the unfortunate statue was erected the editor declared that its "gross vulgarity" exceeded "that of the worst production that ever has been publicly exhibited."

Lough, though attacked by the Press, was fortunate in his patrons, among whom may be numbered the Duke of Sutherland, Earl Grey and Sir Matthew Ridley. For the last-named he executed a large number of works, both for Blagdon in Northumberland and for the London house in Carlton House Terrace, which contained his ten marble statues representing characters from Shakespeare (later presented to the Corporation of Newcastle). At Blagdon, Lough made an even larger number of figures, busts, groups, etc., the best of these being the "Milo" and the four statues on the bridge near the house. The former was later placed by Sir Edwin Lutyens in the ornamental water on the west side of the building, and not only gains enormously in this new setting, but also proves that Lough was, at his best, a great sculptor.

Lough, who spent from 1835 until 1839 studying in Italy, exhibited at the Royal Academy, 1826-1863, and at the British Institution, 1833-1863. He sent his much-criticized group of "The Mourners" to the Great Exhibition of 1851.

He died on 8 April, 1876, and the Art Journal made rather tardy amends in its obituary which declared that "in private life no artist has been more largely esteemed and respected. His personal friends," the article continued, "were numerous, including many of the most famous men and women of the age in science, art and letters. There frequently assembled at his house persons not only high in rank, but renowned for intellectual and social worth; their regard for the man was great, as was their admiration of his genius as an artist. Few men have lived who will be more regretted by a very large circle."

Lough married a sister of Sir James Paget, the surgeon, who after her husband's death gave his models, etc., to the Corporation of Newcastle. They were first placed in Elswick Hall, but have since been distributed to other museums and buildings in the city.

(Art Journal, 1876, page 203; various references, Art Union, Builder and Literary Gazette.)

LOVE, NICHOLAS
fl. 1754–1773
He signs the large wall-monument in coloured marbles to John Frederick, 1773, at Wellingborough, Northants. In 1754 Henry Campion paid him £100 for repairing his London house, and in 1757 a further £80 (Archives, Campion of Danny, Sussex).

LOVELL, JAMES
fl. 1752–1778
He was a protégé of Horace Walpole's. In 1752 he made chimney-pieces for the state dining-room and the state bedroom at Stowe, and also "two cupids with branches in their hands" (Anon., Guide to Stowe, 1827). He made another chimney-piece for Hagley Hall, Worcestershire (Anon., Guide to Hagley, 1828). In 1767 he was paid £52 for two chimney-pieces for Sir Richard Lyttelton's house in Cavendish Square (Archives, Lord Brownlow).

Lovell's most important monument is that to Earl Fitzwalter, 1756, in Chelmsford Cathedral, a large and magnificent architectural work, with a white-marble urn set in an alcove of green marble. In 1760 he made the tablet to the memory of General Wolfe in Westerham Church, Kent (Gentleman's Magazine, 1760, page 201), and he also signs the monument to Thomas Trotman, 1777, at Bucknell, Oxon, and to the Montagu family 1756, Horton, Northants.

Lovell's yard was first situated "near Cavendish Square," but he later moved to Marylebone. He became a bankrupt in 1768 (London Magazine, 1768, page 711).

LOVETT, THOMAS, of Bath
fl. 1766–1795
Lovett, who was afterwards declared a bankrupt in 1795 (Universal Magazine, May, 1795, page 380), signs a wall-monument to Charles Shoare, 1766, at Warminster, Wiltshire.

LUCAS, RICHARD COCKLE
b. 1800, d. 1883
He was born at Salisbury on 24 October, 1800, and at the age of twelve was apprenticed to his uncle, who worked as a cutler in Winchester. Here he learnt to carve knife-handles and, finding that he had an aptitude in this direction, decided to adopt sculpture as a profession.

Lucas accordingly joined the Royal Academy Schools in 1828, on the recommendation of Sir Richard Westmacott (q.v.), and won Silver Medals in that year and in 1829, the latter for an architectural drawing of the "Elevation of a
Banqueting-House.” In 1844 he exhibited groups of “Canute” and “Lilla and Edwin” at Westminster Hall. Though the Literary Gazette could give “no great praise” to the first of these works, it nevertheless considered that the second “embodies original ideas, is ably treated, and the group of the three figures tells well in several points of view.”

In 1845 Lucas made a model of the Parthenon in its original state, which was 12 ft. in length and 6 ft. in width, while the sculptures were moulded in wax. This was purchased by the Trustees of the British Museum (Builder, 1845, page 598) and proved so successful that they ordered the sculptor to produce a second model, showing the building “immediately after the explosion of 1687” (op. cit., page 619).

Lucas was at his best in his smaller works, and his wax portraits and ivory carvings have great merit. A collection of the latter and also of small statuettes by him are in the Bethnal Green Museum, while his wax relief of “Leda and the Swan” is in the Victoria and Albert Museum.

A great deal of controversy has raged round the famous bust of “Flora” which was purchased by the Kaiser Friedrich Museum at Berlin and certified by Dr. Bode to be an authentic work by Leonardo da Vinci. The Burlington Magazine, however, set out to prove that the bust was modelled by Lucas from a picture attributed to Leonardo. The sculptor’s son, Albert Dürer Lucas, supported them in this theory, but the matter has never been satisfactorily settled.

Lucas exhibited at the Royal Academy, 1829–1839, and at the Great Exhibition of 1851 showed ivory carvings and imitation bronzes. In 1854 he built himself a house at Chilworth, near Romsey, of which he wrote an account entitled “An Artist’s Dream Realized; being a Residence designed and built by R. C. Lucas, Sculptor, 1854.” Here he died of paralysis on 18 May, 1883.

Lucas was “a man of great originality and conversational powers, and a prolific writer in the periodical Press” (D.N.B.). He was a friend of Lord Palmerston, who obtained for him a Civil List Pension of £150 in 1865.

He signs two monuments, one (with a recumbent figure) to Count de Salis, 1836, at Harlington, Middlesex, and the other to the Hon. Charles Welbore-Ellis, 1855, in Harrow School Chapel. (Authorities mentioned in text.)

LUFKIN, GEORGE and HENRY, of Colchester
fl. 1812–1855

As a monumental sculptor George Lufkin produced a number of tablets, the best being those to William Hawkins, 1812, at St. Leonard-at-Hythe, Essex, and to Thomas Wallford, 1833, at Birdbrook in the same county. At one time he was
in partnership with Slyth (q.v.), and together they sign a monument at Halstead, Essex, to John Manistre, 1826.

The elder Lufkin was succeeded by his son, Henry, who, in 1855, made the altar-piece of St. James’s, Colchester (Builder, 1855, page 417), and also signs a number of tablets in Essex. These are all extremely dull, the least unattractive being those to the Rev. Peter Wright, 1839, at Mark’s Tey; the Rev. Josias Robinson, 1843, at Alresford; and the Rev. Edward Green, 1844, at Lawford.

LUMLEY, JOHN,
of Northampton
d. 1721

Between 1706 and 1708 he made marble and stone urns for Lord Ashburnham’s house at Ampthill in Bedfordshire. In 1707 the owner, in a letter to his neighbour in the county, Sir John Chester, writes: “Being informed you are about causing some works of marble to be done, I take the liberty to recommend to you Mr. John Lumley of Northampton, as a sound and very able workman” (Letter-book of the First Lord Ashburnham). On 7 November, 1706, Lord Ashburnham had written to Lumley: “Pray send the draffe of the great door and Pediment as agreed with the valuations” (op. cit.).

LUPTON, GEORGE
b. 1792

He was born in 1792 (Archives, Artists’ Annuity Fund).

He was the underpaid assistant of Nollekens (q.v.) and in 1809 was sent down to Cambridge to erect his master’s statue of Pitt. For this the University paid £1,000 of which Lupton received only £12 for “the working expenses” of the pedestal. He seems to have set up for himself before Nollekens’ death, but nevertheless received £100 under the sculptor’s will (J. T. Smith, Nollekens and His Time, Vol. I, page 369).

Lupton’s tablets, which are not very distinguished, include those to John Eligé, 1814, at Nutfield, Surrey; Elizabeth Blake, c. 1815, at Swanton Abbots, Norfolk; Lettice Patten, 1817, in Marylebone Parish Church; Sarah Combe, 1817, at Wincanton, Somerset; General Charles Reynolds, 1819, and Isabella Bartlett, 1821, both in St. John’s Wood Chapel; Drake Clerk, 1821, at Winchelsea, Sussex; the Hon. Mrs. George Montagu, 1821, at Bishopsbourne, Kent; John Pepper, 1822, at Great Dunmow, Essex; Andrew Crawford, 1824, in Winchester Cathedral; John Lloyd, 1826, at Cowden, Kent; and Mary Tritton, 1827, at Beddington, Surrey.

LYDYARD, WILLIAM,
of Keynsham

He signs a large marble tablet to the Holbeach family, 1732, at Whitchurch, Somerset.

LYON, EDWIN, of Liverpool
d. 1837

He was a native of Liverpool and in 1827 exhibited “Diomed Going to Meet the Council of the Grecians” at the British Institution, while at the Liverpool Academy he showed a number of wax busts, including those of Mr. Alexander Moses and Mr. George Moses in 1827; John Yates and Dr. Traill, in 1828; and Richard Butler, Joseph Lyon, Mrs. H. Leigh, John Leigh, Miss Eliza Leigh and the Rev. H. McNeile in 1837.

By 1834 Lyon was living in Dublin, and two years later was elected an Associate of the Royal Hibernian Academy. His wax bust of Mrs. Francis Beethoven, executed in 1835, is in the Victoria and Albert Museum, while another of Sir William Cusack-Smith, dated 1837, is in the possession of the author.

(Strickland’s Dictionary of Irish Artists.)
MACBRIDE, JOHN
ALEXANDER PATTERSON,
of Liverpool
b. 1819, d. 1890

Son of Archibald MacBride of Campbeltown, Argyll, he was trained under William Spence (q.v.), and went to London about 1841. In 1844 he exhibited a group entitled “Margaret of Anjou and Her Son” at Westminster Hall. The Literary Gazette considered Margaret “a virago” and her son “a poor attenuated, impudent lad,” but Samuel Joseph (q.v.) was so impressed by the work that he took the sculptor into his studio as a pupil without charging his usual fee of five hundred guineas.

MacBride later became Joseph’s chief assistant, but returned to Liverpool about 1852, where he became an enthusiastic supporter of the Pre-Raphaelite School. As Secretary of the Liverpool Academy, he was instrumental in awarding the annual prize of fifty guineas on two occasions to Holman Hunt and Millais.

MacBride’s works included a statue of Dr. Adam Clarke for Portrush; statues of “The Four Seasons” for Sir John Gerrard; and busts of Philip Bailey (now Scottish National Portrait Gallery); Sir William Brown; Michael Whitby; Field-Marshal Lord Combermere; Dr. Raffles, for Great George Street Chapel, Liverpool; John Laird (1863), for Birkenhead Hospital; Colonel Peter Thomson; Sir A. B. Walker; and John Miller. He also carved the tablet in memory of Dr. Stevenson, 1854, in St. Mary’s Church, Birkenhead. His last work was a statuette of H. M. Stanley, replicas of which were made by Messrs. Minton of Stoke-on-Trent.

MacBride exhibited at the Royal Academy, 1848-1853, and at the Liverpool Academy showed busts of C. M. Seddon in 1835, and the Rev. John Parke two years later. Models of his “Lady Godiva” were awarded by the Liverpool Art Union as one of their prizes in 1850. He died on 10 April, 1890. (Liverpool Daily Post, 11 April, 1890).

MACCARTHY, JOHN JAMES
ALEXANDER
b. 1776

In 1851 when he applied to the A.G.B.I. for assistance he gave the following account of himself.

In 1805 he held a lieutenantcy in the 1st Royal Regiment “expecting to prosecute the Army as a profession, but an increase of twins to the family” just as he was embarking for Cadiz induced his Colonel, the Duke of Kent, to send for him to Kensington Palace. Here in the course of conversation the Duke discovered MacCarthy’s flair for art, and advised him to abandon the Army and turn to sculpture and painting. MacCarthy, according to his own account, painted pictures of the patron and George III and “modelled many subjects from the marbles at Christ Church College.”

John had a large family, most of whom were artists.

One son was Sexon John James MacCarthy (b. 1807), who carved a model of William IV’s horse “Beauty,” and whose wife exhibited at the Royal Academy, 1853-1858.

Two of John’s daughters, the Misses Amelia and Gertrude MacCarthy, exhibited at the Royal Academy, 1838-1843, showing busts, etc.

MACCARTHY, HAMILTON and
CARLTON, or CARLETON

Hamilton MacCarthy: b. 1809
Carlton MacCarthy: b. 1817

Sons of John James Alexander MacCarthy (q.v.), the brothers collaborated in executing a good deal of their work, for example their “St. George and the Dragon,” exhibited at Westminster Hall in 1844. This the Art Union considered “on the whole a most spirited work” which exhibited “many of the finest points of sculpture,” while the Literary Gazette described it as “a bold equestrian group and deserving of much praise.”

The MacCarrthys produced a great many models of horses and other animals; indeed, their address is given as Tattersalls in 1846. They appear to have been very successful at modelling racehorses and were employed by various owners, including Colonel Copeland, Lord William Beresford, Lady Dallas and Count Bathiany.

They exhibited at the Manchester Institution in 1846 “A Red Deer,” “A Horse in a Lasso” and “A Figure of Charles XII,” while for the Great Exhibition of 1851 they produced an inkstand embodying figures of animals, “the base on which the stag stands” being “ingeniously designed as an envelope-box.”

Hamilton MacCarthy exhibited independent work at the Royal Academy and British Institu-
tion, 1838–1867, while Carlton continued to show work until 1869. The former produced a number of busts towards the end of his life, including those of Mrs. Capron (1851), Mrs. Rae (1864) and Rev. Edward Irving (1867). His wife exhibited at the Royal Academy in 1857, while their son, Hamilton P. MacCarthy, was also a sculptor who modelled a number of busts, including those of Lord Derby (1871) and Wellington (1872) for the Merchant Taylors Company. He did not, however, begin to exhibit until after 1851, so his work is outside the scope of this book.

**MACCARTHY, S.**

He exhibited a small bust of the Duke of Wellington at the Royal Academy in 1839.

**MACDONALD, LAWRENCE**

*b. 1799, d. 1878*

He was born at Gask in Perthshire, on 15 February, 1799, and began to carve in stone at an early age while serving his apprenticeship to a local mason named Thomas Gibson. Macdonald's first recorded work, a statue of a boy supporting a vase on his head, dates from this period and is now in the garden at Moncreiffe, in Perthshire.

In 1822 he went to Edinburgh, where he entered the Trustees' Academy and later in the same year went to study in Rome, becoming one of the founders of the British Academy of Arts in that city. Four years later he returned to Edinburgh where he showed classical groups, a figure of "The Youthful Slinger," and a number of busts, including one of Charles Kemble. The *Literary Gazette* (1831, page 187) which described it as "as fine and energetic a head as ever was modelled," also considered that "Mr. Macdonald is one of the most distinguished ornaments of the British School of Sculpture." The year after this criticism was written the sculptor was back in Rome and here he remained almost continuously until his death on 4 March, 1878.

He was one of the most popular portrait-sculptors of his day. Indeed, a correspondent, writing to the *Art Journal* from Rome in 1851, describes his studio as "the peerage done into marble, a plaster galaxy of rank and fashion, row after row in room after room of noble and illustrious persons appear. All who ever figured in the Court Journal are here, looking as classical as drapery and hair-dressing can make them. Yet a patent family likeness pervades them all, a universal type reminding me of a bad dinner tasting as if every dish had been cooked in the same pot, insipid and unappetising, very." This criticism of Macdonald's work is not unfair, for though his

earlier busts of women are made to look charming by the style of hairdressing fashionable at that time, he so consistently flattered his sitters that they all appear too noble, too handsome and too distinguished to be true. His most successful statue is that of the Countess of Winchelsea, in Eastwell Church, Kent, which shows the lady reclining, like Madame Recamier, on a day-bed. The work is graceful and charming and, though not carved until 1850, has all the distinction and elegance of the Regency.

Macdonald exhibited at the Royal Academy, 1828–1857, at the British Institution, 1832, at the Scottish Academy, 1827–1865, and at the Great Exhibition of 1851. At the Exhibition of Art Treasures of the United Kingdom held in Manchester in 1857 Lord Ward showed three of the sculptor's works in his possession, namely "A Bacchante," "Eurydice" and "Arethusa," while the Hon. A. D. Willoughby contributed another entitled "Venus."

MacDowell exhibited his "Girl at Prayer" at Westminster Hall in 1844. A replica of this work, which the Literary Gazette had described as "touching, simple and beautiful," is at Brynkinalt, Denbigh. Two years later he became a Royal Academician, having been elected an Associate as early as 1831. He exhibited at the Academy, 1822-1870, and at the Great Exhibition of 1851 showed a figure of "Early Sorrow." This apparently made a deep impression on H. Weeke (q.v.), for in his Treatise on the Fine Art in the Great Exhibition (page 65), he wrote: "MacDowell is an artist that England may well be proud of. He makes his appeal to our best and noblest feelings and while he continues to strike the chord of these, his reputation is safe."

J. M. Graham, however, does not rate the sculptor's talents nearly so highly, for in British Literature and Art he declares that "without any very elevated sentiment or feeling, MacDowell's works in poetic sculpture were mostly devoted to the representation of the female form. They were not equal to the masterpieces of Baily or Wyatt, but sufficiently attractive to the popular eye."

MacDowell signs two monuments; those to Catherine Spurway, 1845, at Milverton, Somerset, and to the Marchioness of Dunglass, 1855, in the Castle Chapel at Bahrain. In 1857 two owners lent works by him to the Exhibition of Art Treasures held in Manchester, Mr. G. W. Beaumont sending "Prayer" and "Virginius," and Mr. S. Ashton "The Summer Reverie" and "The Student."

MacDowell died in London on 9 December, 1870. On 7 July, 1877, his "Eve" was sold by an anonymous owner at Christie's for £189, while on 26 April, two years later, his "Daydream" went for £178 at the Joseph Arden sale. This later work appeared again at the Charles Seeley sale of 9 May, 1896, where it only fetched one hundred guineas (Archives, Messrs. Christie).

(D.N.B.; Strickland's Dictionary of Irish Artists; Art Journal, 1850, page 8; ibid., 1871, page 41.)

MACDONELL, FRANCIS
fl. 1843-1852
A deaf-and-dumb artist, he studied at the Royal Dublin Society's School, and exhibited at the Royal Academy, 1846-1852.

MACDOWELL, PATRICK, R.A.
b. 1799, d. 1870
He was born in Belfast on 12 August, 1799, and while still young lost his father, who died leaving very little money. In 1807 MacDowell was sent to a school kept by an engraver named Gordon, but four years later accompanied his mother to England where she had relations. They settled in Hampshire, and in 1813 the boy was apprenticed to a London coach-maker, but did not serve his full term as his master went bankrupt in 1817.

At that time MacDowell was lodging at the house of the sculptor P. Chenu (q.v.) and it was probably for this reason that he began to take an interest in modelling. His small figure of "Venus Holding a Mirror" so delighted Chenu that he purchased it, and by 1822 MacDowell was so advanced in his studies that he had a bust accepted for exhibition by the Royal Academy.

It was not until 1830, however, that he began, on the recommendation of John Constable, R.A., to attend the Academy Schools, but, once there, he made such rapid progress that only two years later he had a well-merited and secure reputation as a sculptor. One of his first patrons was Mr. T. W. Beaumont, at whose expense he went to study in Rome for eight months. He was also assisted by Sir Francis Chantrey (q.v.) and by Sir James Tennent, executing portrait-busts of the latter and of his wife.

MACKENZIE, ALEXANDER,
of London
fl. 1777-1790

He exhibited wax portraits at the Royal Academy, 1777-1790, and at the Free Society in 1782 and 1783. In 1789 he showed a “Bust of a Nobleman.”

MAGNUS, —, of London
He signs a tablet to Henry Bunbury, 1811, at Great Barton, Suffolk.

MAINE, or MAYNE, JONATHAN
fl. 1680-1709

From 1696-1709 he was extensively employed at St. Paul’s Cathedral, working both in wood and stone, and was paid £5 “for carving the capital of a composite Pilaster in Free Stone for the Inside of the Dome” and £13 for “carving the Bishops Coat of arms and Mitre with Mantling and other Ornaments under a window on the Outside of the Consistory” (Wren Society, Vol. XV, page 72). In 1706 he received £54 for “3 round Composite Capitals” and £48 for “two large Shields with Cherubims Heads and Drapery.” For the four vases on the pediment he was allowed £6 (op. cit., page 138). For the interior of the Cathedral he was in 1703 responsible for 346 ft. of carved stone cornice above the Whispering Gallery, and two years later 631 ft. of “freeze” under the windows. (Op. cit., pages 99 and 129).

Maine was employed at a number of City churches and carved the font for St. Clement’s, Eastcheap. He also worked at Eton and Christ’s Hospital.

(Wren Society; Malcolm’s Londinium Redivivum, Vol. III.)

MACE, FREDERICK, of London
b. 1802

He attended the Royal Academy Schools in 1818 and exhibited at the Academy, 1820-1840, showing busts and a bas-relief executed for the library of the Duke of Leeds. In 1820 he was awarded the Silver Isis from the Society of Arts and a year later received their large Silver Medal for a “Bacchanalian Figure.”

Mace signs monuments to the Rev. Thomas Chute, 1827, at South Pickenham, Norfolk, and to Thomas Keeton, 1840, in St. Thomas’s Church, Bermondsey.

MAINWARING, DANIEL,
of Carmarthen
fl. 1809-1831

The monument at Rudbaxton, Pembroke, commemorating Sir Thomas Picton who fell at Waterloo in 1815, is by Mainwaring, as is also the one to the same General erected at Carmarthen 1826-1827. This “in its general design, particularly the shaft and entablature, resembles Trajan’s Pillar in Rome,” according to the Gentleman’s Magazine (1828, Part II, page 265).

Mainwaring’s work is above the usual provincial average, his monument to Admiral Laughrane, 1819, at Laughrane, Carmarthen,
having delightful “Adam” details. He signs others to Thomas Jones, 1810, and Sir James Williams, 1829, both in Carmarthen Parish Church, and to the Rev. Charles Bowen, 1820, at Kidwelly in the same county.

His son John, who succeeded him in the business, signs a tablet to Henry Laurence, 1834, also in Carmarthen Parish Church.

MALCOT, or MALCOTT, JOHN, the Elder

d. 1766

He was described as the son of “William Malcott, deceased of St. James’s Westminster, carpenter” when in 1730 he was apprenticed to Robert Taylor the Elder (q.v.). He became free seven years later, but seems to have remained with his master as an assistant, and later worked under the latter’s son, Sir Robert Taylor (Archives, Masons’ Company).

Malcott was mason to the Royal College of Physicians in Warwick Lane from 1743 until 1766, the year of his death (Archives, Royal College of Physicians). In 1765 he was elected Renter Warden of the Masons’ Company, but had to decline the post owing to ill-health.

Malcott’s son, another John, was apprenticed to him in 1757, and in 1765 was admitted to the freedom of the Masons’ Company by service with his father. In the following year he took the latter’s place as mason to the Royal College of Physicians.

MALCOTT, or MALCOT, JOHN, the Younger

b. c. 1777

Son of the second John Malcott, and grandson of John Malcott the Elder (q.v.), he was apprenticed to Samuel Ireland in 1792 and became free in 1799.

He followed the family tradition by being appointed mason to the Royal College of Physicians, and was also the principal mason for building the National Gallery and the new Post Office. For the latter he carved 160 ft. of “egg and tongue, highly relieved on Grecian moulding,” and also 147 ft. of “antique Grecian leaf and dart, high relieved,” receiving a total of £203 for the work. In 1802 he and “E. Malcott” (presumably a brother) were appointed masons to the Ironmongers’ Company. Malcott also worked at Stationers’ Hall in 1820 and at St. Bartholomew’s Hospital in 1835. His son, John Rowles Malcott, was apprenticed to him in 1823.

After the dismissal of Burnell (q.v.) in 1841, the Malcotts took his place as masons for the restora-

tion of the Temple Church. The firm was still in existence in 1862, for in that year they sign a tablet in that church to the memory of Allen Laing. In 1851 they made the font for St. James’s, Clerkenwell. The Builder of 1845 (page 78) refers to the elder Malcott as a “practical mason who has been engaged for fifty years repairing old Churches and raising new buildings.” As a contractor he built houses in Chelsea in 1804 (Middlesex building affidavits).

Malcott’s monuments and tablets are mostly dull, although the best of them, to Sir Wharton Amcotts, 1807, at East Retford, Notts, is really rather a charming work. The tablet to William Hawes, 1811, in Islington Parish Church is illustrated in the Gentleman’s Magazine of 1811 (Part I, page 313), which describes the sculptor as “an ingenious young artist.” The same magazine (1821, page 505) also shows Malcott’s tablet to Dr. Wells, formerly in St. Bride’s, Fleet Street.

Other monuments and tablets by the same sculptor include those to Edward Pryce, 1807, in St. Stephen’s, Walbrook; Clement Kynnersley, 1815, at Cheam, Surrey; Catherine Langstaff, 1820, in St. Martin’s, Ludgate; James Carr, 1821, at Cheshunt, Herts; Benjamin Hawes, 1822, and Philip Green, 1823, both in St. Magnus-the-Martyr; Margaret Donovan, 1826, at Crowhurst, Surrey; Thomas Dalton, 1827, at Milton-by-Gravesend, Kent; Nathaniel Proctor, 1831, at Rye, Sussex; and Sarah Raven, 1837, in Streatham Parish Church.

(Archives of Companies, etc., cited in text.)

MAN, EDWARD

According to Streatfeild’s Hundred of Blackheath (page 68), Man made in 1752 the very fine stone globes on the gate-piers at Greenwich Palace.

MANNING, CHARLES

b. 1776, d. 1812

Brother of Samuel Manning the Elder (q.v.), he attended the Royal Academy Schools in 1794, gaining a Silver Medal three years later. From 1801 until his death in 1812 he exhibited a number of busts at the Academy, including those of Dr. Jenner and J. Bacon the Younger (q.v.).

Charles Manning was responsible for the national monument in St. Paul’s to Captain George Hardinge, 1808. This has been falsely attributed by some writers to his more prolific brother Samuel; it is by no means a masterpiece, but is nevertheless a far better work than that sculptor ever produced. Charles also signs the monument erected in the Cathedral in 1810 to the memory of Major-General Mackenzie and Brigadier-General
Langwerth, both of whom had fallen at Talavera in the previous year.

(Royal Academy Archives.)

MANNING, JOHN, the Elder
_d._ 1747

There were a good many masons and statuaries named Manning, all of whom appear to have been related to one another in various degrees. The two earliest members of this family whom I have been able to trace are Bryan and Christopher Manning, the former one of the chief masons for the additions to Whitehall Palace, 1685–1687, the latter carving the stone pinnacles for the south end of Westminster Hall in 1681. A William Manning, son of John Manning of Ketton, Rutland, mason, was apprenticed to John Young in 1683.

John Manning the Elder was best known as a maker of lead figures, although his obituary in the Gentleman's Magazine of 1747 (page 545) refers to him as “an ingenious statuary near Hyde Park Corner” (96, Piccadilly now stands on the site of his yard). In 1720 he made for Capt. Gough of Gough Park, Mx., lead statues of “Neptune” “Mercury” and “Fame,” also “Two Boars” and “Two Vases.” (Lawrence Weaver: English Leadwork, page 194.)

His son, John Manning the Younger, worked as a mason and stone-carver at St. Bartholomew's Hospital from 1752 until 1758. He also subscribed to the Vitruvius Britannicus in 1767.

MANNING, JOSHUA
_b._ 1810

He was the son of Samuel Manning the Elder (q.v.) and attended the Royal Academy Schools in 1830, having been recommended by J. Ward, R.A.

In the same year he received the Gold Isis Medal from the Society of Arts for an original model of a group. He exhibited at the Academy two years later, but all trace of him is lost after that date. Son of John Manning of Newman Street (1753-1845).

MANNING, SAMUEL, the Elder
_b._ 1788, _d._ 1842

He studied under J. Bacon the Younger (q.v.) and later became his partner.

Manning exhibited at the Royal Academy, 1806–1843, showing busts of Colonel Addenbrooke (1819), Princess Charlotte (1820), John Wesley (1825), Miss Hunter (1839), and the Rev. Charles Manning (1843). His bust of the Rev. Isaac Saunders (1838) was made for Blackfriars Church.

All Manning's monumental work, whether signed by himself alone or with Bacon (see under “Bacon and Manning”), is dull and uninspired and specimens of it are only too prevalent in England, for he had a very large practice. Monuments and tablets by him include those to Thomas Davies, 1818, in St. Mary's, Madras; Sir Jacob Astley, 1818, Melton Constable, Norfolk; John Addenbrooke, 1821, at Esher, Surrey; Sir John Prideaux, 1826, at Farway, Devon; Samuel Twyford, 1826, at Trotton, Sussex; the Rev. William Vivian, 1830, at Bushey, Herts; Octavia Harvey, 1833, at Gillingham, Kent; John Wilson, 1835, at Southborough, Kent; Samuel Smith, 1835, at Watton, Herts; the Rev. Isaac Saunders, 1836, in St. Andrew-by-the-Wardrobe; Robert Field, 1836, in the Chapel of Sidney Sussex College, Cambridge; Lancelot Haslome, 1838, in the Wesley Chapel, City Road; and George Tyrwhitt Drake, 1840, at Amersham, Bucks. His best monumental work is that to Charles Grant, 1823, in St. George's, Bloomsbury, which was erected by the East India Company and shows the dying man supported by Faith.

MANNING, SAMUEL, the Younger
_b._ 1816, _d._ 1865

He was the son of Samuel Manning the Elder (q.v.) and was trained in the studio of John Bacon the Younger (q.v.), his father's partner. In 1831 he won a large Silver Medal from the Society of Arts for a model of a bust, and three years later was awarded the Gold Medal for his figure of “Prometheus Chained.”

This work was acclaimed as a magnificent achievement by the critics, but their prophecy of a brilliant future for the sculptor was not fulfilled, for he never again produced anything so fine. In 1847 the Art Union remarked that “so far a promise of future excellence affords matter for surprise that such a work should not have been followed by others of equal merit,” but relented slightly by adding “that hopes are not always realized is more a default on the side of patrons than on that of artists.” In 1851 “Prometheus Chained” was shown at the Great Exhibition.

Manning married on 13 August, 1846, at Marylebone, Honoria, daughter of Captain James William, of Stoke Damerel, Devon. He exhibited at the Royal Academy, 1831–1858, showing busts of John Manning (1845), John Bacon (1846), Samuel Manning (1847), Thomas Hawkins (1849), the Rev. John Wesley (1851), Samuel Rogers (1852), Lord Bloomfield (1853), and Dr. Hastings (1857).

His statue of Wesley, dated 1849, was executed or the Theological Institute at Richmond, Surrey,
and his bust of the Rev. Charles Simeon is in the University Library at Cambridge.

Manning signs monuments to Francis Ede, 1849, at Sawbridgeworth, Herts; Edward Weller, 1850, at Amersham, Bucks; Sir John Edwards, Machynlleth, Wales; Sir Felix Booth, 1850, at Catsby, Hunts; Sophia and Ellen Metcalfe, 1858, at Hawstead, Suffolk; Frances Thornton, 1862, at Blunham, Beds; and Elizabeth Trecothick, 1860, at Addington, Surrey. The memorial dated 1860 to the Officers and Men of the Shropshire Regiment in St. Chad’s Church, Shrewsbury, is also his work.

MAPLETOFT, RICHARD, of London
fl. 1699–1702

Described as a “stonecutter.” He was paid £398 for work when Winslow Hall, Bucks, was built by Sir Christopher Wren for Mr. William Lowdnes (Wren Society, Vol. XVII, page 55).

MARCELIII, GIUSEPPE, of Rome

In the Parish Church of Wotton-under-Edge, Gloucestershire, is a monument with a lovely life-size figure of a youth, who leans on an urn and carries a down-turned torch in his hand. This commemorates William Taswell, 1775, and is signed “Giuseppe Marcelli, Scultore Romano.” Local tradition insists that the monument was captured in a French ship by Mr. Taswell himself, who brought it home in triumph and kept it in readiness to be set up in the church after his death. A more probable and less romantic version of the story is that the figure was ordered direct from the sculptor by Mr. Taswell or his heir.

MARCHANT, NATHANIEL, R.A.
b. 1739, d. 1816

Marchant, who was born in Sussex and studied under Edward Burch (q.v.), is chiefly remembered as an engraver of gems and cameos. His work in this capacity is, of course, outside the scope of this book, but he did produce a few models in wax as well, though I have so far been unable to trace them.

He was held in high esteem during his lifetime and held various appointments, including those of assistant engraver to the Mint, gem sculptor to the Prince of Wales and the Duke of Gloucester, engraver to the King, and chief engraver of stamps. He became an Associate of the Royal Academy in 1791, and a full member in 1809. He exhibited at the Academy, 1781–1811, showing a large number of gems, cameos, intaglios, etc., and also busts of “Andromache” and Lord Downe in 1791 and 1810 respectively, and a model in wax of “A Nymph” in 1792.

Marchant also exhibited at the Society of Artists, 1765–1774, and was a member of the Academies of Venice and Stockholm. He died in Somerset Place, London, on 24 March, 1816, leaving to the Royal Academy three plaster busts, which he particularly requested in his will should “not be painted over with any colour but be suffered to remain as they are now.” The diploma awarded to him by the Academy of Vienna in 1796 is now at Burlington House.

He was buried at Stoke Poges, where the tablet to his memory, carved by his executor, J. Flaxman (q.v.), stated that “his skill and industry as a Gem Engraver had supplied the place of patronage by enabling him to remove to Italy and cultivate an art to which his genius strongly inclined him.” The epitaph also stated that the sculptor was buried at Stoke Poges owing to his friendship with Mr. John Penn, “the owner of the adjoining Mansion House.” Marchant left £24,000 at his death.

(Lipscombe History of Buckingham, Vol. IV, page 565; Farrington’s Diary, Vol. VIII, pages 62 and 118 and Royal Academy Archives.)

MARES, HENRY
b. 1813

In 1831 he joined the Royal Academy Schools on the recommendation of C. H. Smith (q.v.), and exhibited sculpture and pictures at the Academy, 1839–1851. His figure described as “part of a monument erected in the artist’s ground at Kensal Green” was shown in 1840.

Four years later Mares exhibited at Westminster Hall a group entitled “Charles 1 Parting With His Children,” the modelling of which the Art Union considered “extremely careless and coarse.” The Literary Gazette went further when it remarked that the work was “perhaps the most curious sculpture ever perpetrated, the thin monarch with his quaint countenance and the young lady who seems to be tempting by a wink that it is not real but fun, are thoroughly grotesque.”

The sculptor also signs the monument to the Rev. John Marshall, 1847, in Huddersfield Parish Church, Yorkshire.

MARMAN, JOHN, of Guildford

A Guildford statuary, he was paid £27 14s. in 1760 for the monument of James More Molyneux, which was erected in the north aisle of Haslemere Church, Surrey (Loseley Archives 1087/1796).
There was also a “Henry Marman” who was employed on marble chimney-pieces at Loseley House in 1782.

MARS, W., of Yarm
He signs a large Hellenic monument to Mary Langley, 1835, at Greatham, Durham.

MARSH, —, of Ross
The fine monument erected in 1776 to the “Man of Ross,” John Kyrle, in the Parish Church, is signed “Marsh of Ross.” It is executed in coloured marbles with a medallion portrait, and is so good that it gives the impression of being London, rather than local, work. Unfortunately all the town archives have now disappeared, so it is quite impossible to discover whether Marsh was a local sculptor or not. There is, however, always the possibility that he was merely a local stonemason who was only responsible for setting up a monument ordered from London.

MARSH, T., of London
fl. 1820–1842
His memorials, though pleasant, are not very distinguished. The best are to Barbara Murphy, 1822, in Paddington Parish Church, which takes the form of an amphora set in a niche, and to Hannah Allcroft, 1830, in St. Peter’s, Worcester, which has the figure of a mourning woman.

Marsh also signs monuments to Brampton Dillingham, 1820, at Cranworth, Norfolk; James Wildman, 1827, at Much Hadham, Herts; John Cope, 1825, in St. Paul’s, Birmingham; Jacob Bosanquet, 1828, at Broxbourne, Herts; William Vawdrey, 1833, at Gwinear, Cornwall; the Browne family, 1840, at Esher, Surrey; Captain William Tucker, 1842, at East Wickham, Kent; and Rebecca Cotton, 1844, at Adderbury, Oxon.

MARSHALL and GRAY,
of London
The firm, whose studio was in Mortimer Street, signs a large wall-tablet to John Manning, 1804, in St. Stephen’s, Norwich. The design takes the form of a semi-urn (the handles formed of writhing snakes) set against a pyramid.

MARSHALL, EDWARD
b. 1596, d. 1675
Marshall, who worked under Nicholas Stone, became free of the Masons’ Company in 1626 and of the Livery in 1631–1632. His yard was in Fetter Lane, and he was not only twice Master of the Masons’ Company but was also appointed Master-Mason to the Crown in 1660.

He died on 10 December, 1675, and was buried at St. Dunstan’s-in-the-West, where his epitaph stated that he had had fourteen children “whereof Joshua the eldest only survived him.” “He was loyal to his King,” the inscription continues, “useful in his Parish, charitable to the poor while he was living and left several memorials of it at his death.”

Marshall’s monuments are of the first importance, the finest perhaps being the noble recumbent effigy of Lady Culpeper, 1638, at Hollingbourne, Kent. He also engraved memorial brasses, and signs a magnificent one with portraits of Sir Edward and Lady Filmer, 1638, at East Sutton in the same county. In 1656 he was working at the Vyne, Hampshire; here he built the portico to the garden front of the house, being paid £13 for carving the capitals of the pillars and £11 for those of the pilasters. For the interior of the house he made two chimney-pieces of white marble and six of Portland stone (£101) and another of “Italian rauce” (£20). For the coat of arms above the portico Marshall received £3. (Archives, Sir Charles Chute.)

(Builders, 1869, page 270; Le Neve, Monumenta Anglicana; D.N.B.)

MARSHALL, JOSHUA
b. 1629, d. 1678
Marshall, who was the eldest son of Edward Marshall (q.v.), was Warden of the Masons’ Company in 1666 and Master in 1670. He also succeeded to his father’s appointment of Master-
Mason to the Crown, and in this capacity carried out a great deal of work at the Royal Palaces.

Between 1664 and 1667 he made a number of chimney-pieces for Whitehall, including one of stone "wrought after the Italian fashion" for the Duke of York's closet, and one of "white and Egyptian marble for Mad. Steward's (sic) lodging" (British Museum, Harleian 1618). Other chimney-pieces supplied for the Palace were for the two for the Duke of Monmouth's bedchamber and closet, one of Egyptian marble for the Queen's new closet (P.R.O., Works 5/6), one of white marble costing £17 5s. for the Countess of Castlemaine's lodging (P.R.O., Works 5/10), and one for Miss Howard's lodging at fifteen guineas (P.R.O., Works 5/9) Also in the Public Record Office in his contract for £16, dated 1668, for a chimney-piece for the same building (Works 5/145). This was to be "of clean white marble for the Queen's little bedchamber, 3 ft. 10 ins. wide and 3 ft. 4 ins. high in the clear, the marble 9 ins. in breadth and 6 ins. in thickness, according to the moulds given."

He also worked at Whitehall as a mason, receiving £465 for "ye front next ye Thames" in 1666 (P.R.O., Works 5/7), while between 1666 and 1667 he was employed at Greenwich Palace. Here he carved capitals (at £18 each) and pilasters for the north side, and made a white-marble chimney-piece costing £33 (P.R.O., E.331/3438). When working at the Customs House in 1671 he also carved a black-marble chimney-piece for the Council Chamber (P.R.O., A.O.1/2492).

Marshall received £1,500 as master-mason for the Monument (P.R.O., E.101/475/2) and also rebuilt, or helped to rebuild, several of the City churches after the Great Fire, among them being St. Mary, Aldermanbury; St. Stephen, Coleman Street; St. Peter, Cornhill; and St. Mary-at-Hill. For the tower of St. Clement Danes he was paid £2,525 (Westminster Public Library, MS. B.13/A. 47), while at St. Bride's, Fleet Street, his work included ten cherubim-heads and twelve shields. He was also employed at St. Swithun's, but died before the building was finished and the payments were made to his widow and executors, Henry Phillips and John Oliver (Bodleian, Rawlinson MSS., B.387). On 27 August, 1667, Joshua Marshall sent in an estimate for £592 10s. for repairs to Rochester Cathedral (Cathedral Archives, D. 236).

In 1675 he made the pedestal for the statue of Charles I at Charing Cross. The total cost of this was £230, which included £40 for "the two shields, arms and trophies" (P.R.O., Works 5/145).

Marshall died on 6 April, 1678, leaving a widow, Catherine, daughter of John George, and two children, Ann and Edward, the only survivors of their family of five. He was buried in St. Dunstan's-in-the-West, and in his will left £200 to the Masons' Company, the interest on which they were to use to provide pensions for needy widows of their members.

Marshall was one of the greatest statuaries of the seventeenth century, his finest work being the great monument to Lord and Lady Noel, 1664, at Chipping Campden, Gloucestershire. The design of macabre swathed figures in grave-clothes revealed by the open doors of the tomb is repeated in a very similar, though unsigned, monument to Sir Geoffrey and Lady Palmer, 1673, at East Carlton, Northamptonshire.

Sir John Cullum, writing in 1774 to Gough the antiquary, says of Marshall's signed monument to Richard Brownlow, 1638, at Belton, Lincolnshire, that "the bust is most excellently done: there is great life in the countenance, and the hands as well as the drapery are finely executed: in short it would be no discredit to any of our most modern artists" (Nichols's Literary Anecdotes, Vol. VIII, page 674). The monument to Sir William Thorold, 1649, formerly in St. Giles-in-the-Fields, was also signed by Marshall (Miscellanea Genealogica et Heraldica, Third Series, Vol. V, page 300), while in the same church still remains, though much mutilated, another commemorating Lady Frances Knivetom and Lady Anne Holbourne, 1663. This is mentioned in the latter's will, where she records that she has "agreed with one Mr. Marshall a stone-cutter in Shoe Lane" to execute it for £120, and that her own effigy, like that of Lady Frances, was to be shown in a winding-sheet. In the Vestry Minutes of St. Dunstan's-in-the-East is a note made in 1671 that the Churchwardens are to pay Marshall for the monument "made by him in commemoration of the Lady Dame Dyonis Williamson and her predecessors and to get the same as cheap as they can" (Wren Society, Vol. XIX, page 18).

In 1676 in the archives of Cleave's Almshouses, Kingston, Surrey, is a note of the payment of £8 to Marshall for a stone monument to William Cleave. There is also a further payment of 11s. for "drinke and victuals for Mr. Marshall's men att the setting upp the monument." According to Manning & Bray's Surrey, Vol. I, page 373, the monument was a ledger stone in Kingston Parish Church.

In 1670 Marshall also made the stone coat of arms (still in position) for the centre of the almshouses.

Other monuments signed by Marshall include those to John Whatton, 1656, in Leicester Cathedral; Elizabeth Sherard, 1658, at North Witham...
Lincolnshire; Henry Hammond, 1660, at Hampton Lovett, Worcestershire; Bishop Warner, 1666, in Rochester Cathedral; and Sir John Turnour, 1659, at Kirkleatham, Yorkshire. As Master-Mason to the Crown he also made in 1678 the monument in Westminster Abbey to Edward V and Richard, Duke of York, murdered in the Tower in 1483.

(Authorities cited in text.)

**MARSHALL, T. and G., of Deptford**

fl. 1790–1832

In the late eighteenth and early nineteenth centuries there was a school of minor statuaries at Deptford which included among its members Edward Pierce (q.v.) and the Marshalls.

This firm, whose earlier tablets have delightful details, signs memorials to William Board, 1790, at Lindfield, Sussex; the Rayley family, c. 1790, in the churchyard of Lee in Kent; Harriot Kruse, 1809, in Lewisham Parish Church; Oliver Stapleton, 1811, in Ealing Parish Church; Elizabeth Bland, 1816, in Isleworth Parish Church; Countess Winterton, 1831, at Westerham, Kent; and Stephen Groombridge, 1832, at Goudhurst, Kent.

**MARSHALL, W., of London**

fl. 1817–1830

Marshall signs tablets to Captain Fothergill, 1817, at St. Paul's Walden, Hertfordshire; Sir John Silvester, 1822, at Chingford, Essex; and to Dr. John Shaw, 1828, in Magdalen College Chapel, Oxford, the last-named being illustrated in the Gentleman's Magazine (1828, Part I, page 209).

He had yards in Westminster and Regent Street, and though he was declared a bankrupt in 1821 (New Monthly Magazine, 1821, page 84) continued working for some years after that date.

**MARSHALL, WILLIAM CALDER, R.A.**

b. 1813, d. 1894

He was born and educated in Edinburgh, but came to London in 1834. Here he studied under Chantrey (q.v.) and Baily (q.v.), and also joined the Royal Academy Schools, winning a Silver Medal in 1835. In the following year he went to study in Rome, but returned to England in 1839 and settled in London. In 1841 he gained a Gold Medal from Manchester for his "Bacchus and Ino," and in 1844 sent statues of Chaucer and "Eve" to Westminster Hall. The former was greatly admired by the Literary Gazette, which considered that it stood "pre-eminently above any other contribution."

Marshall received a number of commissions from the Art Union. Models in plaster of his "Rebecca" and "The Girl With the Broken Pitcher" were awarded to their prize-winners, a reproduction of his "First Whisper of Love" was chosen by the £300 prize-winner in 1845, while the sculptor himself won a premium of £500 for his "Dancing Girl Reposing."

In 1857 Marshall won the first prize of £700 for his design for a national monument to the Duke of Wellington, but, in spite of this, only carved a series of bas-reliefs in the chapel at St. Paul's, the memorial itself being entrusted—perhaps fortunately—to Alfred Stevens.

Marshall exhibited at the Royal Academy, 1835–1891, at the British Institution, 1839–1857, and at the Royal Scottish Academy, 1836–1891. The last-named elected him an Associate in 1842, while in 1844 he became an Associate and in 1852 a full member of the Royal Academy. In 1857 he lent his "Ophelia" to the Exhibition of Art Treasures of the United Kingdom held in Manchester, while his "Sabrina" was sent by G. Moore, "Paul and Virginia" by the Earl of Ellesmere, and "Little Red Ridinghood" and "The Broken Pitcher" by F. Bennoch. The sculptor, who was nominated a Chevalier of the Legion of Honour in 1878, died in Ebury Street on 16 June, 1894.

Among other works by Marshall may be mentioned the sculpture on Bolton Town Hall, which he executed in 1870 (Art Journal, 1870, page 43), and he also signs a few monuments, including those to Mary Blacklock, 1852, in St. Michael's, Charleston, U.S.A.; Mrs. Adams, 1857, at Newport, Salop; and Lady John Manners, 1861, and Louisa Foljambe, 1871, at Tickhill, Yorks; the two last-named monuments both have recumbent figures.

Marshall was not a great sculptor. C. B. Scott said of him that he was "a man with some resources of a tangible Philistine sort, but with no more poetry, or fancy, or classic perceptions than a cow. One wonders how this sensible commonplace person has ever attempted to realize any ideals or to touch a modelling-tool; or how when he did attempt it, he had ever succeeded so far as he had."

(Men of Our Times, 1867; D.N.B.; Art Journal, 1894, page 286; various references Art Union, Art Journal and Builder.)

**STATUES**

1837 Hebe

National Gallery, Edinburgh
MARTEN, JOHN, of Tenterden
b. 1728, d. 1814

He executed good provincial work in a pleasantly typical eighteenth-century style, his tablets in coloured marbles having the usual semi-urn set against a pyramid with flaming lamps. He signs monuments to the Rev. Matthew Wallace, 1771, at Tenterden, Kent; to Arnold Nebitt, 1779, at Icklesham, Sussex; and one to Thomas Holford, 1798, at Rye, in the same county.

Marten, who was married four times, is buried in Tenterden churchyard.

MARTIN, GEORGE, of Highgate
fl. 1827–1835

He signs the monument of the poet S. T. Coleridge, 1834, in Highgate Parish Church.

MARTIN, JOHN
d. 1691

He was the mason employed for rebuilding Brewers' Hall, 1669–1673 (Archives, Brewers' Company). He was buried in the graveyard of St. Mary's, Whitechapel, together with his wife, Mary (who had died in 1683), and ten of their children (Seymour's London, Vol. II, page 709).

MASON, JOHN
fl. 1827–1840

Mason, who lived at Twickenham, was awarded the Silver Isis Medal by the Society of Arts in 1827, and the large Silver Medal in the following year for a bust from life. He exhibited busts at the Royal Academy, 1827–1833, including those of two sons of Captain Probyn. A plaster copy of his bust of Mr. McKinsel, dated 1830, is at Brynkinalt, Denbigh.

He signs memorial tablets to Marie Espinasse, 1837, in Twickenham Parish Church, and to Elizabeth Palmer, 1838, at Sunbury, Middlesex.

MASON, JOHN, of London
fl. 1702–1726

He worked as an assistant to William Stanton (q.v.) and was later employed at various periods between 1702 and 1713 as a mason and stonemason at Stonyhurst, Lancashire, where he was paid £1 a week (Account-books, Stonyhurst College). In 1704 he carved "a unicorn's head and a helmet" at the top of the stone stairs in the main court.

In 1726 he was employed by Edward Stanton (q.v.), who sent him down to Ditchley, in
MASON, ROBERT, of London
fl. 1678–1690
In 1678 he agreed with Richard Newdigate of Arbury, Warwickshire, that he "should well and finely carve the frontispiece of a Grotto according to a draught signed with both their hands," a work for which he was to receive £16 (Newdigate Archives).
His son, Robert Mason the younger, became free of the Masons' Company by patrimony in 1696.

MASSART, or MASSARET, J.,
of Paris
He is described as "sculptor in bas-relief to the Dauphin," and showed reliefs in alabaster at the Royal Academy in 1773 and 1774, and at the Society of Artists in the latter year.

MATHEWS, —,
of Plymouth
fl. 1832–1837
He signs tablets to John Shearm, 1832, at Kilkhampton, Cornwall, and to Thomas Bond, 1837, at St. Martin's, in the same county.

MATZURA, P. J.
Matzura, whose address is given as 7, Chapel Street (Annals of the Fine Arts, 1817), exhibited a bust of Captain Hehl at the Royal Academy in 1816.

MAUGE, —,
of Bath
fl. 1768–1793
He signs a large wall-monument in coloured marbles to James Long, 1768, at Urchfont, Wiltshire, and a smaller one to Robert and Kerrenhappuch Bluett, 1783, at Holcombe, Devon.

MAY, GEORGE,
of Romsey, Hants
He exhibited wax portraits at the Free Society of Artists in 1767. A Thomas May, also of Romsey, had exhibited a wax portrait at the Free Society in the previous year.

MEATYARD, M., of Blandford
fl. 1762–1774
He signs large tablets of good workmanship to Mary Russell, 1773, at Wimborne, Dorset, and to Sir William Phipard, 1774, at Poole, in the same county.

MEDCALF, T., of Liverpool
In 1838 he exhibited at the Liverpool Academy busts of W. Dawson, John Finch, Miss Dawson and T. Metcalf.

MELLIAN, C. MAXIMILIAN
fl. 1763–1764
He exhibited a bas-relief in metal at the Free Society in 1763 and another in the following year. One of these was described as representing "Venus and Cupid Being Offered a Coral by a Marine Deity."

MELLING, —
In 1833 a Mr. Melling held an exhibition of sculpture in London, showing among other works his "Comic Group of Falstaff, Mistress Doll and Bardolph." He excuses this artistic excursion in a foreword to his catalogue, asking: "Why should the chisel lead a melancholy life? Why should gravity have it all its own way?"
The Literary Gazette (1833, page 265), in its review of the exhibition, said that the sculptor "had not polluted his humour with vulgarity," but as he never exhibited at the Royal Academy and nothing more is known of him it is to be feared that he was more comic than successful.

MERCER, GEORGE
fl. 1740–1780
He was a subscriber to Kent's Designs of Inigo Jones and was employed at Longford Castle in 1740. In 1677 he made chimney-pieces for Milton Hall, Berks, receiving a total of £144 for the work (Archives of houses named).
Among the Hartwell archives is Mercer's estimate, dated 1740, for £95 for paving the hall at Hartwell Park, Bucks for Sir Thomas Lee. Mercer agreed to pay "Water carriage to Edgeworth and Wharfe and his Honour to pay land carriage after." Mercer's address is given as "near Cavendish Square."

MERRETT, THOMAS HENRY
b. 1823
He entered the Royal Academy Schools in 1841, being recommended by W. Behnes (q.v.), and
showed a relief of the “Combat Between the Centaurs and Lapithae” at the Academy three years later. He afterwards settled at Romford in Essex.

MERRIFIELD, THOMAS
b. 1797, d. 1833
He attended the Royal Academy Schools in 1815 and exhibited busts, wax portraits, models, etc., at the Academy from that year until 1822. He gained the Silver Medal from the Society of Arts in 1817, and the Gold Isis Medal in 1818, the latter for an original model of a figure. He died 1 May, 1833, leaving a widow, Charlotte, and three children (Archives, Artists’ Amnity Fund).

MERRYMAN, JAMES, of Windsor
fl. 1805-1833
He was the son of John Merryman (q.v.) and in 1805 built the “new Gothic portico” designed by Wyatt on the south side of St. George’s Chapel, receiving £249 for the work (Hope’s Windsor Castle, Vol. II, page 408).
He also signs tablets to William Bonson, 1830, at Upton, Bucks; to Louisa Legli, 1833, in Windsor Parish Church; and to the Rev. Joseph Morris, 1833, at Feltham, Middlesex.

MERRYMAN, JOHN, of Windsor
b. 1733, d. 1800
He was presumably the son of John Merryman of Windsor, mason, who built Baylies, Stoke Poges, for the Hon. Francis Godolphin in 1735 (Archives, Duke of Leeds).
The younger John was employed at St. George’s Chapel from 1785 until 1792, doing mason’s work and stone-carving both for the interior and exterior. His obituary in the Reading Mercury of 22 March, 1800, calls him a “stone-cutter and sculptor.” He was buried at Stoke Poges.

MESSER, J., of Exeter
He signs a tablet with excellently carved details to Thomas Hore, 1765, at Spreyton, Devon.

MICALI, —, of Leghorn
His monument to Rear-Admiral Robert Reynolds (d. 1811) at St. Clement, Cornwall, has a medallion-portrait and, below it, a relief of a young soldier pointing to a memorial on which is depicted a naval battle. The work is, rather curiously, signed “Micali direxit Liburni 1816” instead of the more usual “fecit.”

MICHENDEN, THOMAS
In 1718 he was paid £47 by Mr. Samuel Tufnell for carving “a architrave, arches in nib’d and gag’d work” at Langley, Essex (Accountbook, Samuel Tufnell, of Langley).

MIDDLETON, CHARLES
fl. 1762-1772
He exhibited at the Society of Artists, 1762-1772, where his works included a model of a tablet for a chimney-piece.

MIDDLETON, JOHN,
of Towcester
fl. 1759-1767
He signs the large ambitious monument to John Daye, 1767, at Church Stowe, Northamptonshire, and also a smaller one to Mary Hodges, 1705, at Towcester.
Middleton was probably the father of “John Middleton of Towcester, mason,” who died in 1805 at the age of fifty-six (Monthly Magazine, 1805, Part I, page 191).

MILLARD, JAMES, of Gloucester
fl. 1790-1821
His monuments, like most of those executed by the Gloucester school of statuaries, are of excellent workmanship. Signed examples in the county include those to John James, 1790, at Eastington; Sarah Hawker, 1793, at Kings Stanley; Sir John Guise, 1794, and Anne Rudge, 1802, both in Gloucester Cathedral; Sir Howe Hicks, 1801, at Witcombe; and John Jones, 1801, at Brockworth. The monument to Thomas Smith, 1793, at Much Marcle, Hereford, is also his work.
Millard later went into partnership with James Cooke (q.v.), and together they sign five monuments in Gloucester Cathedral, to Mrs. Head, 1804; John Pitt, M.P., 1805; Sir Charles Hotham, 1811; Mrs. Stanford, 1812; and Joshua North, 1821, respectively. They made one in memory of Mrs. O’Malley, 1815, in Cheltenham Parish Church.

MILLER, FELIX MARTIN
b. 1820
Miller, who had been left fatherless at an early age, was brought up at the London Orphan School and joined the Royal Academy Schools in 1842, on the recommendation of H. Wekes (q.v.). At the exhibition of suggested works of art for the Houses of Parliament, held three years later, he showed “The Dying Briton” and “Orphans,” the latter group being subsequently carved in marble and set up in the London Orphan Asylum.
Miller exhibited at the Royal Academy, 1842-
1880, and at the British Institution, 1847–1866, showing busts of Dr. Livingstone (1857) and S. T. Coleridge (1862), and no less than three versions of "Emily and the White Doe of Rylstone." What must have been a singularly unfortunate work was a model of "The Lover Overtasked," which could be adapted for a rose-stand, though the Art Union thought it would serve even better as an inkstand.

At the Great Exhibition of 1851 the sculptor showed bas-reliefs of "Tithania," "The Spirit of Calm" and "Lycidas," while he sent the "Indian Siesta" to the International Exhibition of 1872. His statue of "The Archer" was bought for New South Wales, but was later destroyed in a fire in Sydney. His reliefs of "Cruising Among the Water-lilies" (1868) and "Ariel" (1870) were illustrated in the Art Journal of 1872 and 1873 respectively. In 1853 he carved the reredos for St. Barnabas' Church, Homerton, and in 1869 made the monument to Edward Jordan for Kingston Cathedral, Jamaica.

J. Foley, R.A. (q.v.), thought very highly of Miller and commissioned more than one of his works in marble, including "Tithania Asleep" in 1853. When Foley died the Art Journal (1874, page 306) wrote that the great artist was the principal patron of his struggling brother-artist, and added that Miller was "one of the few sculptors whose genius is manifest and who has produced works, chiefly bas-reliefs, that are unsurpassed by any productions of their class in modern art. It is his evil fortune to obtain much praise with little success or recompense."

(Authorities cited in text.)

MILLER, GEORGE, of Bedford

He signs a small wall-monument in the form of a sarcophagus to Philip Sanson, 1833, at Sharnbrook, Bedfordshire. A Samuel Miller of Bedford, "free-mason," was the master-mason employed in 1710 for building Hinwick House in the same county (Orlebar Archives).

MILLER, WILLIAM, and BOUCOCK, GEORGE

fl. 1787–1790

In the archives of Wansfieh Church, Essex, is the contract drawn up between the parishioners and these two masons of "St. Martin's, Ludgate," for building the church. They later received £9,000 for the work, which they carried out between 1787 and 1790.

MILLIGAN, J., of London

fl. 1817–1834

Milligan exhibited busts at the Royal Academy, 1817–1824, including those of Sir J. Cotterell (1821) and Lady Mary Brownlow (1824).

He also signs a number of monuments, the best being one to the Rev. John Currey, 1824, at Dartford, Kent, which has a charming portrait-relief of a clergyman in a wig. Others commemorate Robert and Mary Wright, 1825, at Middle Claydon, Bucks; Neville Cameron, 1833, in Madras Cathedral; and Sophia Jervis, 1834, at Woking, Surrey.

MILLIGAN, W., of London

fl. 1845–1850

In 1850 he carved for Portsmouth the statues of Nelson and Wellington which had been commissioned by Lord Frederick FitzClarence. These do not seem to have been particularly successful, for the Builder of that year (page 243) commented on the "tasteless mistake" that had been made of "placing the Duke's foot on the Gaillac cock," and later added (page 317) that "the impression of looking at them is one of discomfort."

Milligan also executed a bust of Nelson which realized £73 at the sale of the Peel heirlooms in 1900. Another fine work of his is the bust of Mary Queen of Scots, at The Vyne, near Basingstoke.

MILLS, RICHARD, of Cirencester

fl. 1812–1839

He signs a monument to William Adams, 1812, at Cricklade, Wilts, while others in Gloucestershire commemorate Daniel Mills, 1814, at Misserden; William Hall, 1824, at Bibury; and John Poole, 1839, at Bourton-on-the-Water.

Mills is presumably the son of J. Mills, of Cirencester, who signs the tablet to John Howes, 1806, at Winson, in the same county.

MILLWARD, CHARLES, of Hereford

fl. 1761–1788

Millward, who became a Freeman of Hereford in 1761, signs the wall-tablet with an "Adam" semi-urn to Henry Davies, 1788, at Bredwardine, in the same county.

MILNES, THOMAS

b. 1813

In 1841 he joined the Royal Academy Schools on the recommendation of E. H. Baily (q.v.), and three years later exhibited at Westminster Hall a group entitled "The Death of Harold at the Battle of Hastings," called by the Literary Gazette "the strangest collection of short trunks and con-
sumptive legs ever congregated together." In 1847 he was paid seven hundred guineas for the marble statue of Nelson erected at Norwich, and in the following year executed one of Wellington for the Tower of London, a work which was moved to the Royal Arsenal at Woolwich in 1863. In 1853 he carved a statue of Dr. Charlesworth for Lincoln Lunatic Asylum.

In 1854 Milnes made figures of a child and of a horse for the tomb of Alfred Cooke in Kensal Green Cemetery, and in 1857 a bust of William Rivers for Greenwich. In 1869 he carved four lions for the Mechanics' Institute at Saltaire.

He exhibited at the Royal Academy, 1842–1866, showing busts of Sir Michael Gibbs (1845), John Gurney (1848), William Martin (1848), Nelson (1850) and Thomas Wormald (1866). At the Great Exhibition of 1851 he showed a design for a monument to Lord George Bentinck, and at the International Exhibition of 1862 sent "Samson Slaying the Lion."

(Various references, Art Journal and Builder.)

MITCHARD, JOHN, of Salisbury
fl. 1812–1816

He signs tablets to Charles Pole, 1812, at Barford St. Martin, Wiltshire, and to Harriet Jukes, 1816, at Tisbury, in the same county.

MITCHELL, EDWARD
fl. 1672–1716

Mitchell, who was Master of the Masons’ Company in 1692, had a yard at St Anne’s, Westminster. In 1716–1717, John, son of "Joseph Kerridge of Ramsey, Hunts, inn-keeper," was apprenticed to him (P.R.O., I.R. 1/4).

When Mrs. Esdaile made her survey of the monuments in the Temple Church she found a bracket signed "N. Mitchell." She considered that the "N" stood for "Ned," and that the bracket had formed part of the monument to Sir William Morton, 1672—a work which had, at some earlier period, been taken down and stored in the triforium of the Church (Esdaile's Temple Church Monuments).

MITCHELL, GEORGE
b. 1815

He joined the Royal Academy Schools in 1835 and won a Silver Medal four years later. In 1836 he exhibited at the Academy "Hector Casting a Stone at Ajax."

MITCHELL, WILLIAM
d. 1762

In 1762 he won a premium of ten guineas from the Society of Arts for a bas-relief in clay of "Coriolanus and Volumnia." According to the Register of the Society, he died in the same year.

MITLEY, CHARLES, of York
b. 1705, d. 1758

In 1736 he was working at Castle Howard (Castle Howard Archives), and three years later made a statue of George II for the Market House at York. When the building was later pulled down the statue was moved to the Guildhall, but it has now disappeared.

Mitley, who became a Freeman of York in 1745, made with his partner Harvey in 1755 the monument, with its standing figure of Mrs. Ramsden, at Adlingfleet, Yorkshire. He also signs a tablet to Frances Graham, 1731, in Holy Trinity, Goodramgate, York; while another to Catherine and Christiana North, 1734, in the Belfry Church, is signed by him and another partner, E. Raper (q.v.).

Mitley died on 26 August, 1758, and was buried in St. Cuthbert's, York, where there is a cartouchetablet to his memory (Drake's York, Vol. II, page 60).

MOCOCK, THOMAS, of Leyton

He signs an altar-tomb surmounted by an oval urn to Frances Sherburne, 1819, in the churchyard of Leyton Parish Church, Essex.

MOLE, LEONARD,
of Worcester
fl. 1770–1781

In 1763 he was apprenticed to his father, Leonard Mole, the Elder, mason and bricklayer, who had become a Freeman of Worcester in 1740.

The younger Mole signs a large architectural wall-tablet to Mrs. Bodledge, 1781, in All Saints' Church, Evesham.

MONNOT, PETER STEPHEN,
of Rome
b. 1657, d. 1733

Monnot was employed by the fifth Earl of Exeter, for whom he carved a number of works which are now at Burghley. These include busts of the Earl and Countess, and of William Cecil, the Earl's brother; charming little figures of the "Sleeping Child" and the "Waking Child"; and a most lovely relief of the Virgin and Child, which is dated 1700.

On the death of Lord Exeter, in the same year, his widow commissioned Monnot to execute a huge monument with life-sized figures for St.
Martin's, Stamford. The work was finished in 1704 and set up in the church by W. Palmer (q.v.), who may also have carved the inscription. A note in the archives at Burghley, however, says that the monument was brought from Rome "among other exquisite works of art by the Earl himself," but this, for various reasons, seems improbable.

**MONTI, RAFFAELLE**

*b. 1818, d. 1881*

He was born in Milan and studied under his father, Gaetano Monti, of Ravenna, and also at the Imperial Academy, which awarded him a Gold Medal for a group entitled "Alexander Taming Bucephalus."

After exhibiting a group of "Ajax Defending the Body of Patroclus" in 1838, Monti was invited to Vienna, where he secured a number of patrons. He returned to Milan in 1842 and, after working there for four years, went to England in 1846. In 1847 he was back in Italy, where he joined the Popular Party and, as one of the chief officers of the National Guard, was sent on a mission to King Charles Albert. After the disastrous campaign of 1848 he fled to England and lived there until his death in 1881.

In 1854 he modelled for the Crystal Palace a replica of the sculpture in the pediment of the Parthenon (*Building Chronicle*, 1854, page 188), and in the following year made six colossal figures for the upper terrace and two fountains for the north nave. In 1857 he was responsible for the interior decoration of the great hall at Mentmore, Buckinghamshire (*Builder*, 1857, page 741), and in 1858 for the reliefs over the proscenium arch of Covent Garden Opera House (*Builder*, 1858, page 947).

As a sculptor, Monti was fond of executing statues and busts which, though worked in solid marble, appeared to be covered by a transparent veil, an art brought to perfection about 1730 by an Italian, Antonio Corradini (*d. 1752*), who may also have been the originator of the idea. Statues of this type by Monti include "The Veiled Vestal" (1847), commissioned by the Duke of Devonshire, and "A Veiled Woman" (1850), now in the Wallace Collection. Other statues of his are "Eve" (1850) and "The Fisher Girls" (1851), made respectively for H. W. Eaton and Mrs. Ogil Hunt; "Truth Unveiling Herself" (1853), the model for which was formerly in the Crystal Palace; and an undated "Venus" now in the Birmingham Art Gallery. His finest work, however, is the equestrian statue of the Marquess of Londonderry in hussar uniform, executed for Durham in 1858. In 1869 he modelled the "Perseus" silver vase for H. E. Surtees.

Monti died on 16 October, 1881. He exhibited at the Royal Academy, 1854–1860, and showed "The Sleep of Sorrow and the Dream of Joy" and "The Reading Girl" at the International Exhibition of 1862. He also signs the monument with a recumbent figure of Lady de Mauley, 1848, at Hatherop, Gloucestershire, and another to William Poyntz, 1848, at Easebourne, Sussex. (*Men of Our Times*, 1867; *Art Journal*, 1881; authorities cited in text.)

**MOODY, ROBERT**

*b. 1807*

He joined the Royal Academy Schools in 1830, on the recommendation of Sir T. Tyrwhitt, Bart., and exhibited busts at the Academy, including those of the Duke of Wellington and Lords Shaftesbury and Eldon, between 1836 and 1844. His bust of Viscount Melbourne, dated 1838, is in the Royal Collection.

**MOON, CHRISTOPHER**

He signs a large wall-tablet to Thomas Ogden, 1766, in Manchester Cathedral.

**MOON, L., of Godalming**

*fl. 1824–1845*

He signs tablets to William Sadler (*d. 1824*) at Chiddingfold, Surrey, and to Francis Annesley (*d. 1845*) at Shalford, in the same county.

**MOORE, CHRISTOPHER**

*b. 1790, d. 1863*

He was born in Dublin and when he was thirty came to London, exhibiting at the Royal Academy, and also at Brighton, his "Combat between the Archangel Michael and Satan," a work which he had already shown in Ireland.

He attended the Academy Schools in 1821 and soon established a practice in London, thereafter making it his permanent home, though he paid frequent visits to Ireland. He was elected a Member of the Royal Hibernian Academy in 1846 and died in Dublin on 17 March, 1863.

Moore also modelled a number of wax portraits and carved the lovely recumbent figure of a dead child, Isabella Cooper, in Gausthur Church, Somerset, 1835. He was successful with portrait busts—"they were well modelled and expressive likenesses; but his powers were unequal to larger or more important works, and in his statues and figure subjects he was not successful; his grotesque effigy of Thomas Moore, in College Street, Dublin, is an unfortunate memorial to the poet." (*Strickland's Dictionary of Irish Artists.*)
He exhibited at the Royal Academy, 1821–1860, and at the British Institution, 1821–1834. At the Birmingham Society of Artists he showed busts of T. S. Goodenough (1838), Lord Stanley (1839) and Lord Morpeth (1839). For a list of his works in Ireland, see Strickland (op. cit.).

BUSTS

1823 Miss Grace Croft Possession Edward Croft-Murray, Esq. 
1826 Duke of Sussex Exhibited Royal Academy 
1828 Lord Nugent Exhibited Newcastle Academy

1853 Cardinal Wiseman Exhibited Leeds 
1853 Earl of Derby For Lord Skelmersdale 

MOORE, JOHN, the Younger

f. 1767–1788

Son of J. F. Moore (q.v.), he assisted his father and with him signs the monument to J. Hanway, 1786, in Westminster Abbey.

The younger Moore exhibited at the Free Society, 1767–1775, showing models of animals and marble medallions of Queen Anne, George II and George III.

MOORE, JOHN FRANCIS
d. 1809

Moore, who was born in Hanover, came to Britain about 1760, and six years later presented to the Society of Arts a relief of "Britannia reviver of Antique, prompter to Modern Art." In his day he seems to have been a popular artist, but has been unfairly treated by later writers. For example, Redgrave in his dictionary mentions only two of his works and adds that "neither of these says much for his ability." This is unjust, for Moore's statue of William Beckford, Lord Mayor in 1767, is a dramatic essay in baroque which gives ample proof of the sculptor's talents. The work stood for many years at Fonthill, but was presented by the Lord Mayor's son, the notorious "Vathek" Beckford, to the Ironmongers' Company in 1833, and in their possession it still remains.

Beckford's monument in the Guildhall, dated 1772, is also the work of Moore. This is engraved with the abrupt speech with which the Lord Mayor is said to have astonished George III and which, according to Horace Walpole, "made the King uncertain whether to sit still and silent or to pick up his robes and hurry into his private room."

The speech (which was written by Horne Tooke) was, however, never really delivered.

Moore made a number of chimney-pieces for Audley End in 1761, including those for the north room, the Fish room and the gallery, while three years later he received £111 for one with Doric columns for the library. His work in this capacity seems to have attracted the attention of Monsieur Grosley, author of A Tour of London, published in 1772. In this work the Frenchman mentions having seen "at Mr. Moore's a piece of sculpture as remarkable on account of its high finishing as the oddness of the idea upon which it was executed. It was a chimney-piece of white marble for a country house belonging to Mr. Beckford, then Lord Mayor of London," the writer continues, "All the most remarkable deaths in the Iliad were represented in corresponding groups, the figures protuberant and almost starting from the marble; and these groups were intermixed with figures in basso-relievo representing the deaths of less consequence."

Moore's monuments are also far from contemptible, for they are well carved and a brilliant use is made of coloured marbles. The Beckford monument of 1772 has already been mentioned, but the most ambitious example of the sculptor's
work is the huge group at Ettington, Warwick. This is dated 1775, and has a reclining figure of Mr. Shirley, flanked by standing figures of Lord and Lady Ferrers. Moore’s statue of Mrs. Macaulay was unveiled in St. Stephen’s, Walbrook, on 8 September, 1778, but was banished from the church shortly afterwards. The reason for its removal, however, had nothing to do with the sculptor, but was due to the extraordinary inscription carved on the base of the work by the eccentric rector, Thomas Wilson (who had ordered the figure), which gave the greatest offence to his parishioners. A later monument, with a spirited and exciting relief, commemorates Lord Hawke, 1781, the victor of Quiberon Bay, at North Stoneham, Hampshire.

Towards the end of his life (and presumably after the death of his son, John, q.v.) Moore went into partnership with a “J. Smith,” and together they sign a number of monuments. As the latter signs with only his initial, and as there were three contemporary statuaries—James, Joachim and Joseph—who were all “J. Smith,” it is impossible to be more specific, though I am inclined to think that the “J.” stands for “James.” Monuments signed by the partners commemorate Maria and John Chichester, 1791, at Arlington, Devon; Joseph Blunt, 1793, at Maple Durham, Oxon; Thomas Wildman, 1795, in Twickenham Parish Church; and Peter Oliver, 1795, in Marylebone Chapel.

Moore exhibited at the Free Society, 1766–1776, showing tablets for chimney-pieces, medallions, busts, etc., and also a marble statue of “Apollo” in 1769. His bust of Sir John Rushout, executed in the same year, is now in Worcester Infirmary. His death took place on 21 January, 1809, at Wells Street, Oxford Street. (European Magazine, 1809, page 83; White’s History of Walbrook Ward, page 387; authority cited in text.)

MONUMENTS

MOORE, T., of Normanton

He signs a wall-tablet with a terra-cotta urn at Smalley, Derby, to Anthony Woodward, 1803.

MORE, J.

Probably a local worker, he signs a cartouche tablet at Warblington, Hants, to Thomas Sone, 1767. This, with its cherub-heads, wreaths and flowers, is a good copy, in stone, of a typical early eighteenth-century marble cartouche.

MOREHOUSE, —, of Dover

d. 1811

He signs an oval tablet at Stanford, Kent, to William Smythe, who died in 1768, although the tablet was not erected until 1791.

According to the Gentleman’s Magazine (1811, Part II, page 589), Morehouse “dropped down in the market-place, Dover, and instantly expired, while going to his ordinary work.”

MOREHOUSE, JAMES, of Greenwich

He was employed as master-mason at Greenwich Palace from 1759 until 1761 (P.R.O., Ad. 68/767). His son, James Morehouse the younger, was apprenticed to Moses Waite in 1756, becoming free of the Masons’ Company by redemption in 1760 and joining his father in the following year. I am uncertain whether it is the father or the son who signs the large wall-monument to Robert Austen, 1759, at Shalford, Surrey.
MORFIT or MORPHITT
fl. 1717–1721
In 1717 he made the font of Church Minshull, Cheshire, and in 1721 that of Holmes Chapel, also in the same county (Raymond Richards, Old Cheshire Churches).

MORGAN, E., of Llandaff
fl. 1791–1822
He signs a number of tablets between 1791 and 1822 in churches in Monmouthshire and Glamorganshire. The tablet to Henry Beauchamp, 1817, at Gwennap, Cornwall, is also his work.

MORGAN, W., of Exhall
He signs a large Hellenic tablet with well-cut details to Anne Brooks, 1839, at Exhall, Warwick.

MORILL, —
fl. 1775–1802
He was probably a Reading statuary and signs large wall-tablets in Berkshire to Elizabeth Shaw, 1775, at Kintbury; to Admiral Fowke, 1784, at Shaw; and to Mary Hartley, 1786, at Bucklebury.

MORISON, DAVID
fl. 1821–1850
In 1826 he was appointed “miniature modeller” to the Duke and Duchess of Gloucester, the Duchess of Cambridge and the Princess Augusta. He exhibited at the Royal Academy, 1821–1850, showing mostly miniature medallion portraits.
Morison’s wax bust of George IV is in private possession, and he also executed the four wax portraits of the Abadon family which are now on loan from Mrs. Bate at the Victoria and Albert Museum.

MORLEY, MARTIN
fl. 1653–1669
In 1669 he received £45 for the monument to Thomas Windham erected in Felbrigg Church, Norfolk (Archives, Felbrigg Hall). He had become a Freeman of Norwich in 1653.

MORRIS, JOHN, of Lewes
fl. 1750–1775
His father, Arthur Morris, builder of Lewes Bridge in 1727 (Sussex Archaeological Collections, Vol. LXX, page 222), and son of Arthur Morris, a mason of that town, applied to become a “foreign member” of the London Masons’ Company in 1712, and was admitted on payment of £1 16s. (Archives, Masons’ Company). Between 1738 and 1743 the trustees of the Duke of Newcastle paid “Arthur Morris, Stonecutter,” £592, this sum was probably for the building of the Duke’s house in Lewes (British Museum, Ad. MSS. 33, 321).
John Morris did a great deal of work for Trevor, Bishop of Durham, at Glynde in Sussex. Between 1755 and 1760 he was the mason for building the east front of the house, also executing all the carved stonework and making a chimney-piece for the library. About the same time he built the stables, and a little later (1764–1765) the chapel, which had been designed by Sir Thomas Robinson (Archives, Brand of Glynde). From 1757 until 1761 he was employed on the rebuilding of Ashburnham Place, in the same county (Ashburnham Archives). In 1761–1763 he was paid £646 for building Lewes Sessions House, a charming building with a cupola. In 1786 he received £100 for rebuilding Riverhall Bridge (Town Archives).
He signs a wall monument to Mary Lushington, 1775, in Eastbourne Parish Church.

MORSE, S. F. B.
fl. 1813–1815
In 1813 he received the lesser Gold Medal from the Society of Arts for an original cast of “The Dying Hercules” and exhibited this work at the Royal Academy in the same year.
Morse, who was also a painter, showed pictures at the Academy in 1814 and 1815, but no other works of sculpture.

MORSSE, SYMON
In 1671 he made a marble chimney-piece, costing £31 17s., for the banking-house built by Alderman (afterwards Sir Robert) Clayton and his partner, Mr. Morris, in Old Jewry (Ledger of Sir Robert Clayton, Guildhall Library).

MORTIN, ELLIS, of Leicester
fl. 1785–1825
As “a stranger” but as a “stone mason and builder” he became a freeman of Leicester in 1799. His son Robert was apprenticed to William Firmadge (q.v.) in 1800, but was assigned to his father in 1804. Two other sons, Thomas and John, apprentices of their father, became freemen of Leicester in 1816 and 1824 respectively. Mortin signs a tablet to Jonathan Foster, died 1785, at Aylestone, Leics.

MOSS, W., of Canterbury
fl. 1780–1825
He signs a number of tablets in Kent, of which
the best are those to Elizabeth Denne, 1780, at Littlebourne, and to John Foote, 1800, at Bishopsbourne.

MOSSMAN, GEORGE
b. 1823, d. 1863

George Mossman, son of William (q.v.), and younger brother of John Mossman (q.v.), was born in Edinburgh, but was taken to Glasgow when still a child and later studied there under his father. When he was twenty-one he went to London and joined the Royal Academy Schools on the recommendation of William Behnes (q.v.). He worked in the latter's studio and also in that of J. Foley (q.v.), who thought highly of his powers, but apparently “the earnest night and day application with which he pursued the study of his art told seriously upon an organization never very robust” (Art Journal, 1864, page 12).

Mossman, who exhibited at the Royal Academy in 1846, later returned to Glasgow and shared a studio with his brother John, but died in 1863 at the age of forty. He left unfinished a life-size figure of “Hope,” “a noble statue, giving evidence of true genius” (op. cit.). His statue of Alexander Wilson had been executed for Paisley in the previous year, while just before his death he had been given a commission for a monument to John Galt, which was to have been erected in Greenock Cemetery.

MOSSMAN, JOHN G.
b. 1817, d. 1890

He was the eldest son of William Mossman (q.v.), and studied under his father in Glasgow, where he spent practically all his life. Most of his works are to be found in Scotland, and of these his native city has a very large share, including the statues of Peel (1853), Livingstone (1876), Thomas Campbell (1877), Provost Lumsden, and Norman Macleod (1881), and the busts of William Connal (1856), Alexander Thomson (1877) and “Rosalind” (1879) in the Kelvingrove Art Gallery. In 1854 he made the monument to Henry Montet in the Glasgow Necropolis (Building Chronicle, 1854, page 200), and in 1872 cast the bronze figure of “The Lady of the Lake” for the Loch Katrine fountain in West End Park. His statue of the Rev. Patrick Brewster, dated 1863, is in Paisley Cemetery, and in the same year he made a bust of the Duke of Hamilton for the Hamilton Monument at Caddow.

Mossman exhibited at the Royal Academy, 1868–1879, and at the Royal Scottish Academy, 1840–1886, showing a number of busts, including those of James Lumsden (1840); Principal Cunningham (1863); Norman Macleod (1868); and Sir Michael Shaw Stewart (1880). He was elected an Honorary Member of the Royal Scottish Academy in 1885. His bust of Henry Bell (1874) is in the National Portrait Gallery, Edinburgh.

MOSSMAN, WILLIAM
b. 1793, d. 1851

He was a pupil of Sir Francis Chantrey (q.v.) and practised for a time in London, but soon returned to his native city of Glasgow, where he spent the rest of his life.

In 1842 Mossman was employed by Blore the architect on “sculpture” for Glasgow Cathedral (Cambridge University Library, MS. 3955), and in 1848 he made a Gothic monument to Lord Cathcart in Paisley Abbey.

(Roger’s Monuments of Scotland.)

MOUNTSTEVEN, ELEY GEORGE
b. 1781–1791

He was born in the county of Meath and went to London in 1781. Here he exhibited at the Royal Academy between 1782 and 1791, showing wax portraits, including those of Barrington, Bishop of Salisbury; the Prince of Wales; the Duke of Orleans; and Sir Joshua Reynolds. He was also employed by Wedgwood, for whom he modelled portraits of Sir Eyre Coote and of Lord and Lady Auckland in 1788. His wax portrait of Benjamin West, dated 1791, is in private possession, while an undated one of John Henderson is in the Victoria and Albert Museum.

In 1791 Mountstevens left England for the Continent, where he died. “He was supposed to have brought this inferior department of statuary art” (i.e., wax modelling) “to a higher degree of perfection than ever it had attained before” (Walsh’s History of Dublin, 1818, page 1187).

MOYER, HUMFREY
d. 1661

Moyer, who was apprenticed to Thomas Kingfield and became free in 1627, was an assistant of Nicholas Stone. With Stone he carved the famous monument of Dr. Donne with its shrouded figure—one of the few which survived when Old St. Paul's was destroyed in the Great Fire. He signs a monument to the Coston family, 1637, at Greenford, Middlesex.

"Remembrancer" Smith, in his obituarics, has an entry “5 September, 1661, Mr. Moyer, stonecutter in Little Britain, buried.” He had previously
noted the death of Mrs. Moyer on 11 November, 1659.

MULLANE, W.
fl. 1820-1840

One of the “New Road” statuaries, his tablets are ordinary and dull. The best are those to Robert Mackintosh, 1824, in St. Pancras Parish Church; Elizabeth Gulston, 1826, at West Clandon, Surrey; William Dawson, 1830, in Hammersmith Parish Church; Miss Belcher, 1832, in St. Martin’s, Ludgate; and the Rev. Ellis Burroughs, 1838, at Stratton, Norfolk.

MUNDEN, CHARLES,
of Windsor
fl. 1761-1777

As a mason he was employed at Windsor Castle from 1772 until 1777. He signs a large tablet in coloured marbles to Ann Bidleson, 1762, at Bray, Berks. This has good details and is above the level of the ordinary provincial statuary’s work.

MUNRO, ALEXANDER
b. 1825, d. 1871

His father was a stone-mason employed on the Duke of Sutherland’s property in Scotland, and his artistic abilities were brought to the notice of Harriet, Duchess of Sutherland, wife of the second Duke, who assisted him in his education. In 1848 she brought the young man to London and introduced him to Sir Charles Barry, who employed him on the sculptured works intended for the Houses of Parliament, which were then being built.

Munro soon turned to portrait-sculpture and produced a number of busts. Redgrave says of his works that they were of “true genius and feeling and graceful and spirited, but sketchy in their execution.” It was, however, as a sculptor of children that he excelled, and his groups of “The Ingram Children” (1853), “The Catharine Hardy Children” (1859), “The Matheson Children” (1861) and “The Crompton Roberts Children” (1865) were all exhibited at the Royal Academy, while other child groups include “The Gladstone Children” (1856) at Hawarden, and “The Hardy Children” in Chilham Church, Kent. Here he showed “that refinement of sentiment and aesthetic feeling for grace and beauty which was nature to him” (Graham’s British Literature and Art).

Munro suffered from a disease of the lungs and towards the end of his life had to leave Great Britain and live at Cannes, where he died on 1 January, 1871. His obituary in the Art Journal of that year (page 79) said that “few artists ever numbered a larger, more various or more deeply attached circle of friends, by whom his memory will always be cherished as among the purest, sweetest and most lovable of men.”

He exhibited at the Royal Academy, 1849-1870, the British Institution, 1850-1863, and at the Great Exhibition of 1851. His original plaster model for “The Sleeping Child” is in the Birmingham Art Gallery, and among his miscellaneous works may be mentioned the well-known fountain in Berkeley Square, executed in 1865, and the “Boy and Dolphin” fountain by Grosvenor Gate, Hyde Park, made about the same time. He also carved chimney-pieces for the Duke of Sutherland at Dunrobin Castle in 1849.

ever, £50 was being deducted as payment for Lawrence, while in addition "my patent will cost me eighty pounds."

In 1760 Murray was paid £70 for work carried out at Ashburnham Place, Sussex, but he must have died in the following year, for the last payment, amounting to £95, was made to his executors by Lord Ashburnham in February, 1762 (Ashburnham Archives).

MUSCHAMP, W., of Liverpool
He signs a large wall-tablet, with a relief of "The Good Samaritan," to the Rev. David Simpson, 1799, in Christ Church, Macclesfield.

MUSCO, SALVATOR
fl. 1678–1700
In 1678 he was working for a "Mr. Sybert" (presumably C. G. Cibber, q.v.), for in that year a "general search" was made by the Masons' Company, and an entry in their Court Book included "Salvator Musco, Italian," among "Sybert's" assistants.

In 1698 Musco received £10 for carving the coat of arms on the north front of Burley-on-the-Hill (Pearl Finch's *History of Burley-on-the-Hill*), the seat of the Earl of Nottingham. A little later he was probably employed at Great Park, Ampthill; for the owner, Lord Ashburnham, mentions in a letter that he is thinking of employing the carver then working for Lord Nottingham. Indeed, most of the craftsmen at Burley seem to have entered Lord Ashburnham's employment as soon as they were free (Ashburnham Archives).

Musco's son, Joseph, was apprenticed to John Young (q.v.) in 1695, but was "turned over" to Thomas Stayner (q.v.) two years later.

MYERS, —
According to the *Gentleman's Magazine* of 1810 (Part II, page 203), Myers was responsible for "a very elegant monument of pyramidal form" erected in that year in "the new burying ground" at Calcutta to the memory of the Hon. John Hyde, who had died in 1796.
NADAULD, —  
fl. 1699-1710

Francis Thompson, in his History of Chatsworth (page 36), says that "Nadauld, whose descendants continued to live at Ashford near Bakewell until quite recent years, was one of the Earl of Devonshire's numerous Huguenot protégés." It was apparently about 1700 that he replaced Cibber (q.v.) as sculptor of stone figures at Chatsworth.

In 1702 Nadauld was paid £150 for "the ornaments in the Great Frise & carving ornaments on each side of the two windows over the entrance of the West Front & carving 4 ciphers & coronets upon 4 keystones in ye middle windows of ye West Front." Between 1700 and 1703 he carved the frost work on the grotto and the chimney-piece in the gallery; figures of "Mars," "Fortitude" and "Prudence" of Roche Abbey stone for the Inner Court (£36), and statues at £22 each of "Cleopatra," "Amphitrite," "Antonius," "Two Rivers," "Pallas" "Pharsis" and "Two Muses"; also the "figures of Fluvius and 2 dolphins & 2 vases for ye cascade." In the latter year he carved busts for the coping of the court and in 1704 received £24 for carving the figures in the niches on the west stairs and £60 for "carving the ornaments for the two galleries on each side of the inner court."

From 1709-1710 Nadauld was working at Castle Howard, receiving £56 for "four statues" and £42 for "three figures" for the north front. In the interior of the house he carved the cornices in the saloon and also the two keystones in the Great Hall.

In 1704 he made the mural monument in Westminster Abbey to Lady Eland, granddaughter of the French Protestant Marquise de la Tour de Gouvenet.

(Building Accounts, Chatsworth and Castle Howard.)

NAPPER, GEORGE, of London  
b. 1754, d. 1840

In 1828 when he applied to the A.G.B.I. he stated that he had worked "for the late Mr. John Bacon for forty years" and had also worked under J. E. Carew (q.v.) and W. Behnes (q.v.). Napper then apparently set up in business in Manchester and executed a number of monuments, including those to Mrs. Trafford, 1813, in Manchester Cathedral; the Rev. Samuel Bennett, 1823, at Hatfield Peverel, Essex; Master Astley, at Duckfield, Cheshire; the Rev. Mr. Lock, at Newcastle, Co. Limerick; Archdeacon Cocker, at Glannmire, Cork; besides several for the West Indies. I have seen the first two mentioned monuments which have the usual contemporary classical details, but do not say much for Mr. Napper's powers as a sculptor.

NEALE, GEORGE, of Grantham  
fl. 1811-1830

Neale seems to have had several partners, for tablets are signed "Neale and Wilson," and "Neale and Johnston." His best tablets are those to Beaumont Leesom, 1822, in Grantham Parish Church, and to James Faithfull, 1823, at Eastwell, Lincs.

Neale was succeeded in the firm by his son Joseph, who had a Mr. Dunn as his partner.

NEDOS, —  
fl. 1705-1707

He was employed at Castle Howard in 1705, being paid £63 6s. for the "Tritons and Lions" and £6 10s. for the "Trophies," both for the south front. He was also paid £12 10s. for the "Trophies on the North Metop." In the following year he was paid £90 for carved stonework on the cupola, which included a "Frieze of Trophies" and "Four Keystones." He was also responsible for the "Frieze of Trophies" on the north front. It has been suggested that "Nedos" is a mis-spelling for "Nadauld" (q.v.), but the writing on the bill is quite clear.

NELSON, GEORGE  
fl. 1830-1872

He was a relation of Thomas and James Nelson, of Carlisle (q.v.), and as a young man became assistant to M. L. Watson (q.v.), who was also a native of Cumberland.

At Watson's death in 1847 Nelson executed in marble those works which his master had only modelled in clay. These included the great group of Lords Eldon and Stowell, the statue of Flaxman and the monument to the 50th Regiment. The latter was erected in Canterbury Cathedral in the following year and was signed "George Nelson from a sketch by the late M. L. Watson." Nelson
also exhibited a model of this work at the Great Exhibition of 1851.

His best-known original work was a statue of "Musidora," which was frequently engraved for Victorian art magazines. He exhibited at the Royal Academy, 1837–1869, showing among other things a bust of Lord Western and statues entitled "The Bather" and "The Captive." He also carved the recumbent figure in 1872 for the monument of Lord Stanley of Alderley. Other monuments signed by him include James M'Loughlan, 1848, St. Michael's, Dumfries; and Thomas Sheffield, 1853, and Thomas Elliot, 1859, both in Carlisle Cathedral.

(Various references Art Journal and Builder.)

NELSON, JAMES

_d._ c. 1811

One of the chief master-masons of his day, he received a great deal of employment from the architects Henry Holland and Sir John Soane. Under the former in 1767 he was working at Lord Bristol's house in St. James's Square, carving decorative details in Portland stone, and three years later making a chimney-piece. In 1769 he made a marble chimney-piece for Lord Guildford's London house and in 1784 marble tables for Sir Philip Yorke. In 1787 he was employed on the building of Fonthill (Builder, 1850, page 113).

In 1789 and 1790 Nelson was the master-mason for the building of, or repairs to, the houses of the Countess of Pembroke at Richmond, Sir Henry Peters in Park Street, and the Earl of Hardwicke in New Cavendish Street. Between 1792 and 1794 he was the master-mason for the rebuilding of Lord Hardwicke's seat at Wimpole, and also carved chimney-pieces for the house.

Between 1786 and 1796 he made a chimney-piece ("ornamented with flowers" and costing £32) for Peter Thelusson at Philpot Lane, and others for Sir Alexander Hood at Cricket St. Thomas, for William Pitt at Holwood, and for the London houses of Lady Pembroke and Lord Buckingham in Charles Street and Pall Mall respectively. In 1791 he carved the stonework for the Temple at Audley End (Essex Records D/DBY/ A.222).

Nelson's most important commission was the building of the Bank of England under Sir John Soane, where he was employed from 1791 until 1811. During the last five years he had Thomas Grundy (q.v.) as his partner. The statuary and carved work executed by him at the Bank included in 1793 an enriched marble chimney-piece for the centre room and another for the room adjoining, costing £75 and £43 respectively. In 1795 he received £72 for "ninety foot of enriched flute and dart," and in the following year eighteen guineas for "four antique angular honey suckles with enriched faces on each." In 1801 his carved stonework for the exterior and interior of the building ranged from two antique caducei at £20, two swags of laurel wreaths and ribbons at £25, and one large drop of oak-leaves at £32, to a marble chimney-piece "with antique flowers" at £48.

In the years which followed Nelson worked unceasingly at the Bank, and the ledgers of Sir John Soane contain long lists of payments to him for capitals, friezes, Vitruvian scrolls, swags and lion-masks, besides a number of chimney-pieces. He also carved monuments designed by Soane, including one to Mrs. Bosanquet, erected in Leytonstone Parish Church in 1807 at a cost of £326, and another to the order of the Marquess of Abercorn in 1796, which I have so far failed to identify.

(Soane Note-books.)

NELSON, JOHN, of Shrewsbury

_b._ 1726, _d._ 1812

In 1777 he made the two lions outside the Lion Inn, Wyle Cop, Shrewsbury, and in 1795 a statue of Sir Rowland Hill for Hawkstone Park, Salop. His two sphinxes, also for Hawkstone, date from about the same time, while in 1796 he executed a statue of Roger de Montgomery for Shrewsbury Castle. This was subsequently removed from the Castle and stored in a basement, but some years later fell on a boy and broke his leg. It was thereafter relegated to the Corporation yard, whence, as might have been foreseen, it disappeared.

Nelson died on 17 April, 1812, and the Gentleman's Magazine of that year (Part I, page 492) said in its obituary of him that "his eminent abilities as a statuary will be long remembered in Shropshire and the neighbouring counties." The article continues that he, "having had a liberal education and possessing a fund of lively anecdote, was a very pleasant companion," and ends with some lines "to the worthy and aged Nelson," in which he is asked why he has not carved a bust of himself. The question is answered in another verse, the two last lines running as follows:

"In busts to others' merits raised
He has his own declared."

The Salopian Journal remarked on the same occasion that Nelson's "moral worth excited the esteem of all acquainted with him."

One of Nelson's account-books, giving details of his monumental work, etc., is now in Shrewsbury School Library. He signs monuments in Shropshire to Beatrice Peck, 1767, at Market Drayton;
M. Dorsett, 1779, at Llangedwyn; Sir Rowland Hill, 1784, at Hodnet; the Rev. Richard Lloyd, 1785, in St. Mary's, Shrewsbury; Thomas Prostam, 1788, in St. Julian's, Shrewsbury; Scarlett Lloyd, 1790, at Fitz; the Rev. Robert Jeffreys, 1800, at Baschurch; Mrs. Gardner, 1800, at High Ercall; Ann Corser, 1801, at Whitchurch; and Elizabeth Jones, 1801, at Oswestry. The monuments to Jane Vernon, 1799, in Chester Cathedral, and William Davies, 1800, in Montgomery Parish Church, are also the work of Nelson, while he signs others in Wales to the Rev. John Fletcher, 1777, at Bangor; David Davis, 1790, at Llanfair; and Thomas Hamner, 1794, at Overton.

(Authorities cited in text.)

NELSON, JOHN HENRY
b. 1800, d. 1847

He was an Irishman, born in Sligo, who began his artistic career by painting portraits. These attracted the attention of two wealthy Irish landowners, Colonel Lloyd and Mr. Wynne, who in 1833 sent him to study in Paris. After spending four years there Nelson went to England and thence to Wales, where he painted a number of portraits. From Wales he moved to Bristol and about 1838 returned to Dublin.

It was not until 1844 that Nelson turned his attention to sculpture. In 1846 he produced a statue of “Venus Attiring,” which he took to England in the following year, exhibiting it first at the Egyptian Hall in London, and later in Manchester. It was while he was in Manchester that he died, on 26 December, 1847, leaving a widow and four children totally unprovided for.

Of his “Venus Attiring” the Builder (1848, page 53) remarked that it had “cost him two years of unremitting toil,” while the Art Union (1848, page 52) wrote that “the great talent displayed in the execution of his figure attracted the notice of many patrons of art who expressed much interest in the future prospects of the sculptor.”

(Strickland’s Dictionary of Irish Artists.)

NELSON, THOMAS, and JAMES
fl. 1829–1858

The Nelsons were brothers and joint owners of the Carlisle marble works, where they produced monumental tablets, chimney-pieces, etc. One of their advertisements in the Builder (1848, page 515) stated that “experienced workmen could be sent to any part of the kingdom to fix work at a reasonable rate.”

They sign tablets to John Canning, c. 1830, at Ilmington, Warwick, and to the Rev. Christopher Hodgson, 1849, at Marholm, in the Isle of Ely.

In 1857 they carved various decorative details for the mausoleum built by Lord Lonsdale at Lowther.

NEWMAN, JAMES, of Sidmouth

He signs a large wall-tablet at Ottery St. Mary, Devon, to Thomas Hopkins, 1817.

NICHOLL, A., of London

He signs a large wall-monument of good workmanship to John Hopkins, 1793, at Harwell, Berkshire.

NICHOLL, WILLIAM GRINSELL
b. 1796, d. 1871

He attended the Royal Academy Schools in 1822, and in 1827 received £80 for carved stonework on the exterior of the Customs House in London (P.R.O., Works 5/119).

About 1830 Nicholl was employed by the architect Basevi to carry out his designs in marble, the most important of these being sculpture for the Fitzwilliam Museum in Cambridge. In 1837 Nicholl accordingly carved the capitals, frieze and other decorative details and in the following year executed the sculpture in the pediment, the latter from a design by Eastlake. In 1839 he made the four lions at the foot of the staircase (Architectural History of Cambridge, Vol. III, page 210).

In 1838 he was responsible for the bas-reliefs above the windows of the Oxford and Cambridge Club in London, designed by Smirke, and in 1846, while working at Oxford, executed all the decorative carving on the exterior of the Taylor Institute (Builder, 1846, page 505). Two years previously he had exhibited a model of a statue of Captain Cook at Westminster Hall; this seems to have received scant attention, being referred to by the Literary Gazette as “a tame, crabbed looking person.”

It was not, however, until 1850, when Cockerell selected him to carve the pediment of St. George’s Hall, Liverpool, that Nicholl became well known to the public, and five years later he made the four recumbent lions for the exterior of the same building. After his death his friend, Henry Baker, in a letter to the Builder (1871, page 1002), described this particular period of the sculptor’s life as follows: “When I first became acquainted with Nicholl he had, I think, never lost his courage, but patrons to sculptors are few and far between and I suspect that his progress was little better than a struggle for dear life until one day Cockerell, R.A., found him out, happily for both, one requiring most important work to be done, and well done, under his own eye, and the other
sighing at once for fame and money, apparently so distant.”

Other works by Nicholl include busts of H. Sass (1820) and Archdeacon Law (1827), the latter in Chatham Parish Church; and the alabaster reredos for Waltham Abbey executed in 1862 (Builder, 1862, page 499) and the alabaster lectern made four years later for Worcester College Chapel, Oxford; and the statues of Lords Cornwallis and Clive (1867) for the India Office. He signs monuments to Sir John Hippisley, 1825, in the Temple Church; to John Turner, 1829, at Cold Overton, Leics.; to Henry Wootton, 1830, at Minster, Kent; to Sir George Don, 1832, in the Garrison Church, Gibraltar (from a design by Basevi); to Joseph Bonsor, 1835, at Great Bookham, Surrey; to Elizabeth Morley, 1837, in Walthamstow Parish Church; to Richard Stevenson, 1837, in Trinity College Chapel, Cambridge; and to the Rev. J. Murray, 1862 (with a recumbent effigy), in St. Andrew’s, Well Street.

Nicholl exhibited at the Royal Academy, 1822-1861. He died at Acton on 8 December, 1871.

(Authorities cited in text.)

NICHOLSON, GEORGE,
of Durham
b. 1726, d. 1804

Ogle in his Diary says that “there lives in Bow Lane one George Nicholson who built the New Bridge, when to create a job for himself he made Dr. Sharp and the Dean and Prebends believe he could greatly add to the beauty of the Church (i.e., Durham Cathedral) by new chiselling it over on the outside and that he could add to the beauty of the ancient window by means of his own genius.”

Nicholl did indeed persuade the Bishop and in 1799 was allowed to destroy the ancient tracery in the cloisters and replace it by his own poor and meaningless work. He also carved the sculpture of the Dun Cow on the Cathedral and was even permitted to remove the figures over the great window of the north transept, said to represent Friars Fossor and Castell, one the original builder and the other the restorer of the window. These he had the temerity to replace by full-length figures, executed by himself, of Bishop Pudsey and of a Prior in his chair.

At the time of his death in 1804 Nicholson was sword-bearer to the Provincial Grand Lodge of Freemasons, County Durham.

(Boyle’s Durham, pages 207-209; Universal Magazine, 1804, page 573.)

NICHOLSON, —, and WOOD, —, of Newark

They sign a Hellenic wall-monument at East Stoke, Nottinghamshire, to the Hon. Lady Bromley, 1839.

NICHOLSON, THOMAS HENRY
d. 1870

He was first a modeller and later became a draughtsman on wood. As a young man he distinguished himself particularly in the modelling of horses, and when William Behnes (q.v.) was engaged on his group of Lady Godiva he required the services of an artist who had had experience of modelling animals, and Nicholson was recommended to him. The result of his association was a complete success. Count D’Orsay (q.v.), visiting Behnes’ studio, was so struck by the modelling of a horse in the group that he engaged Nicholson to work for him. This partnership was unfortunate, for Nicholson, after D’Orsay’s death, maintained that he did all the work and the Count took all the credit.

How much work each did will never now be known. Nicholson claimed that he completely modelled the statuettes, that when a visitor came to the Count’s studio at Gore House he was hustled out of the room and that D’Orsay never acknowledged his assistance in any way. On the other hand, D’Orsay was undoubtedly an artist of considerable merit, and it seems unlikely that he would have foisted on to the public the work of another sculptor and called it his own. One of their most successful works was an equestrian statuette of the Great Napoleon, and Prince Louis Napoleon, then an exile in London, and a great friend of the Count, used to come to Gore House to give advice and to make suggestions about the details of the uniforms, etc. Later, as Emperor of the French, he remembered Nicholson and asked him to come and work for him in Paris; the offer was declined, as a year after the break up of Gore House, and D’Orsay’s flight to France, Nicholson entirely abandoned modelling and devoted the rest of his life to drawing on wood.

The Art Journal, 1870 (page 204), in its obituary of Nicholson, says that “he was known only to a limited circle of artists and literary men, and so reserved were his habits of life that he seemed to shrink from public recognition. His reserve and retired habits militated against the acquisition of that reputation which he ought to have enjoyed.”

Nicholson exhibited in the Royal Academy, 1838-1843, showing various models and sketches for historical groups. He died at Portland, Hants. (Authority mentioned in text.)

J. M. RYSBRACK
Mr. and Mrs. Knight, 1733, Gosfield, Essex.

JOSEPH NOLLEKENS
George III, 1773, Royal Society.
NICOLI, FREDERICO,  
of London  
fl. 1817-1820

His studio was in Mount Street, next door to that of Sir Richard Westmacott (q.v.). He exhibited at the Royal Academy in 1818 and 1819, showing in the former year a bust of the Princess Charlotte which was formerly in the Temple at Claremont. In 1819 he showed marble busts of Prince Leopold and Marshal Blücher; the latter, dated 1817, and a very fine work, is now at Windsor Castle.

Nicoli's undated bust of C. J. Fox is now in the National Maritime Museum at Greenwich.

NIXON, RICHARD  
fl. 1790-1738

From 1730 until 1738 he was the chief mason for the building of Lamport Hall, Northamptonshire. His work there also included the chimney-piece for the Front Hall and a dial for a pedestal (Isham Archives, Lamport Hall).

NIXON, SAMUEL  
b. 1803, d. 1854

He does not appear to have attended the Royal Academy Schools, nor to have studied under any master, although he first exhibited at the Academy at the age of twenty-three. In 1838 Nixon carved the statue of Richard Valpy for St. Lawrence's Church, Reading, out of Roche Abbey stone. The work was designed by Edward Charles Hakewill. (Reading Mercury, Saturday, 15 December, 1838.)

In 1840 he was employed by P. Hardwick, R.A., the architect of the Goldsmiths' Hall, to carve the decorative sculpture on the exterior of the building. This work is of great merit and includes the noble trophies of arms on the main front (Company's Archives). Four years later Nixon was selected to execute the colossal statue of William IV for King William Street in the City. The tender was for £2,200, but the material chosen was granite, and as the sculptor's obituary says (Gentleman's Magazine, 1854, page 406): "It is well known he and others considered he was not only inadequately remunerated, but that even his expenses were not paid. The statue was sculptured in Scotch granite, a material difficult to work and the expenses attending the conscientious execution of the contract severely crippled the artist." The work was given rather a mixed reception, the Builder (1845, page 26) considering it "coarse and clumsy and not likely to advance the reputation of the sculptor." It was later removed from its original position and is now at Greenwich.

Nixon was later much employed in executing monumental sculpture both for England and Canada. Some of these works are, to say the least of it, unfortunate, for he was always ready to accede to the whims and eccentricities of his patrons, to the detriment of his reputation. He defended this dangerous habit, according to the Art Journal (1854, page 230), by declaring "that a man had no right, artist though he might be, to enforce his own views to the subversion of those entertained by his patrons."

Nixon was employed by Blashfield (q.v.), for whom he designed the Shakespeare vase. Other works by him include statues of John Carpenter (1844) at the City of London School, and Sir John Crosby (1845) for Crosby Hall. In 1840 he executed figures of "The Four Seasons" for Goldsmiths' Hall, and four years later showed "The British Warrior" at Westminster Hall. His busts include those of the Rev. George Hatch (1837) for St. Matthew's, Friday Street; the Rev. William Rodber (1843) at St. Mary-at-Hill; and John Carpenter (1845) at the City of London School.

He signs monuments to Philip Lucas, 1830, in Hackney Parish Church; to the Gillespie family, 1833, in St. John's Wood Chapel; to Samuel Whiteway, 1847, at Kingssteignton, Devon; to John Marshall, 1840, in Shoreditch Parish Church; and to the Rev. William Parker, 1843, in St. Ethelburgha's, Bishopsgate.

Nixon exhibited at the Royal Academy, 1826-1846, at the British Institution, 1831-1832, and at the Great Exhibition of 1851. He died at Kennington on 2 August, 1854. His nephew, "Mr. Nixon, Jun.," carved the capitals of the columns of St. Barnabas, Homerton, in 1845 (Godwin, Buildings and Monuments, page 24).

(Authorities cited in text.)

NIXSON, or NIXON, PAUL,  
of Carlisle  
fl. 1823-1825

In 1823 he carved the busts of Wren, West and Chantrey on the pediment of the Academy of Arts at Carlisle. In 1825 he was paid £130 10s. for marble chimney-pieces for the Council House, Bristol (City Archives). His monument to William Giles (d. 1814) is in Carlisle Cathedral.

NOAKES, —, and PEARCE, E.,  
of London  
fl. 1800-1820

Like the majority of the New Road statuaries, their work is of little interest and the designs of their tablets uninspiring. Their best works are those to Robert Usherwood, 1809, at Whitby,
Yorks; Sarah Ridehalgh, 1814, at Eccles, Cheshire; and Mrs. Falconbridge, 1816, in St. James’s, Garlickhithe.

**NOBLE, MATTHEW**

* b. 1818, d. 1876

He was born at Hackness in Yorkshire, and as a young man went to London, where he studied sculpture under John Francis (q.v.). He first exhibited at the Royal Academy in 1845, but the work which brought his name prominently before the public was the Wellington monument erected in Manchester in 1856. The commission for its execution had been awarded as the result of a competition, and the decision of the judges in favour of Noble—still a comparatively young and unknown man—aroused a considerable amount of ill-feeling and angry discussion, especially on the part of his fellow-artists. The statue, however, proved a success, and Noble soon became one of the most popular sculptors of his day.

Noble exhibited at the Royal Academy between 1845 and 1876, but died on 23 June in the latter year and was buried in Brompton Cemetery. He was of a delicate constitution, but his end appears to have been hastened by the death of his son, who was killed in a railway accident, while another son, who had shown great promise as a sculptor, had died two years before.

The *Art Journal* (1876, page 275), in its obituary of him, said that it seemed ‘surprising to those who knew him personally that he should have lived even the comparatively short period of his life, and yet more that he should have been able to continue his labours. Few men,” the writer continued, “have been more esteemed and regarded, not alone for his great ability, the manifestations of talent that very closely approximated to genius, but for rare qualities of mind and heart. Generous in his acts and in his sympathies, amiable in his disposition, his nature was essentially kind and good. He was a gentleman of high rectitude, irreproachable in all the relations of life.”

According to the sculptor’s own wish, the unfinished works in his studio were completed by J. Edwards (q.v.), who had been his friend and assistant for twenty years. A number of his works were copied in “Parian” by Copeland, and his large bust of Queen Victoria (1856) in this ware is in the Bristol Art Gallery. His widow presented a collection of his models to the town of Newcastle and they were placed in Elswick Hall.

NOLLEKENS, JOSEPH, R.A.
b. 1737, d. 1823

He was the second son of Joseph Francis Nollekens (1702–1747), a painter commonly known as "Old Nollekens," and when young "was more remarkable for his fondness for ringing St. James's Church bells than for any more laudable exertion," according to a writer in the *European Magazine* (1788, page 385). This period of irresponsibility does not seem to have lasted long, for in 1750 the boy was apprenticed to Peter Scheemakers (q.v.), and "during that time abandoned his habits of dissipation and became very industrious and attentive in his profession" (op. cit.).

In 1759 Nollekens was awarded a premium by the Society of Arts for a drawing from plaster, and in 1760 their first premium for a model in clay of "Jeptha's Rash Vow." In the same year he went to Rome, sending from there two years later a marble relief of "Timocles Conducted before Alexander," which won him a prize of fifty guineas from the Society of Arts. Shortly after this he modelled a bust of David Garrick and, a little later, one of Laurence Sterne.

While he was in Rome he also began to deal in antique fragments, terra-cottas, etc., which he restored and then sold to English collectors. In 1770, however, he decided to return to London, but when passing through Paris found his father's brother "who had been reduced by misfortune" and "not only relieved his present wants, but settled on him a yearly stipend for the rest of his life" (op. cit.).

Nollekens' reputation as a sculptor had preceded him, and once he had set up his studio in Mortimer Street he began to receive commissions from the fashionable society of London. In fact he soon became to contemporary sculpture what Reynolds was to painting. In 1771 he made chimney-pieces for Harewood House, Yorkshire, and in 1773 a relief of "Cupid and Psyche" which is now at Burlington House. Four years later he received one hundred guineas for five keystones in Portland stone for the back of the front of Somerset House (R.I.B.A. Library, 335.A.).

Nollekens also seems to have worked in plaster, for in 1775 he was paid £280 "for modelling and casting the several figures in basso-relievo of the Great Hall" of Drapers' Hall (Court Book, Company's Archives). According to the *Gentleman's Magazine* (1778, page 585), the plaster-work consisted of two ceilings which he executed from designs by Richardson. For the Cordwainers' Hall he carved an urn and tablet to the memory of John Came (Allen's *London*, Vol. III, page 172), while in 1780 he was responsible for the ornaments, etc., on the exterior of the Middlesex Sessions House, receiving £100. In 1793 he took a mould from the bust of Shakespeare in Stratford-on-Avon Church, from which "he made a mask and then a model" (*Historical Manuscripts Commission*, Earl of Charlemont, Vol. II, page 221).

In probably what is the most candid, pitiless and uncomplimentary biography in the English language, *Nollekens and His Times*, J. T. Smith, the sculptor's pupil, friend and disappointed executor, gives a picture of a grasping miser—or rather two misers, for Mrs. Nollekens, if anything, outdid her husband in parsimony. Yet unkind and biased as the book obviously is, it is nevertheless of the greatest value to all students of English sculpture, for not only does it paint a full-length portrait of Nollekens himself, but also gives in the second volume invaluable biographies, anecdotes and other details of contemporary artists, including a number of sculptors. Smith also recorded remarks made by Nollekens about sculptors he could remember in his youth, so that the whole book provides one of the most important sources of information on eighteenth-century English art in existence.

In all editions of Smith's book there is a list of the statues, busts and monuments executed by Nollekens. Curiously enough, this seems to omit a number of works, while others it does mention have since disappeared. The list given in the following pages is of those works of which I have personal knowledge.

The sculptor's "stock pieces" were the busts of Pitt and Fox, but I have quoted only one example of each, as it is difficult to know which is the original. Of the Pitt bust, based on a mask taken immediately after death, Nollekens is said to have sold seventy-four replicas at £120 each. He also made replicas of the mask itself, but in this case the original is in the possession of Earl Stanhope.

Nollekens, who exhibited at the Royal Academy, 1771–1816, was elected an Associate of the Academy in the former year, and a full member in 1772. His wife, Mary, the second daughter of a magistrate named Saunders Welch, predeceased him in 1817, and he himself died on 23 April, 1823, and was buried in Old Paddington churchyard. All his adult life had been passed in working and saving money, and he left behind him a fortune of £200,000.

On July 3, 1823, Mr. Christie held a sale of the contents of his studio and house. Casts of a number of his busts were sold, including those of Mr. Aufrère, Sir M. Sibbes, Lord Brownlow, General Fitzpatrick, Lord Erskine, Lord St. Helens, Lord Mansfield, Mr. Busk, Mr. Holford, Marquis of
NOLLEKENS

Donegal, Lord Petre, Lord George Cavendish, Sir W. W. Wynne, Mr. Le Merchant, Lord Dillon, Lord Leitrim, Lord Brooke, Mr. Justice and Mrs. Welch (Mrs. Nollekens's parents), Mr. Carr of York, Lord Cowper, Earl of Mulgrave, Egremont and Aberdeen, Dr. Baillie, Duchess of Argyll, Duke of Gordon, Mrs. Pelham, Lady Hartley, Mrs. Arkwright, Mr. Stonehewer, Miss Symmons, Lord Bessborough, Lord Rous, Gally Knight, Admiral Colpys, Mrs. Maddocks, Duke of Bolton, Mr. Mathias, Mr. Gregory, Mrs. Braddyll, Miss Le Clerc, Lady St. Aubin and Mrs. Knight.

At the sale of David Garrick, held by Mr. Christie on 23 June, 1823, two of the lots were a terra-cotta of "a wounded infant borne on a Dolphin" and a marble "recumbent female figure" both by Nollekens (Archives of Mrsrs. Christie).

Nollekens' original model for the monument to Lord Robert Manners was sold at Christie's on 4 July, 1823, while in the Victoria and Albert Museum are a number of his terra-cotta sketches, including one of Mrs. Howard, of Corby, his monumental masterpiece. Others in the Museum are "A Hero and Victory," "Venus and Adonis," "Juno Promuba," and "Modesty"; there is also his terra-cotta of "The Judgment of Paris," lent by Mrs. M. Pott.

At the Peter Norton sale held by Christie's on 11 January, 1869, the following terra-cottas by Nollekens were sold: "A Group of Adam and Eve," "Laocoön," "The Graces," "Venus at the Bath," "A Dancing Nymph" and "Susannah and the Elders."

1818 Abingdon (St. Helen's)  Clement Saxton

NORMAN, SAMUEL
fl. 1760–1778

In 1760 Norman was responsible for the enrichment of the walls and cornices, etc., of the state rooms at Woburn Abbey (Gladys Scott Thomson's Family Background, page 60).

In the list of artists given in Mortimer's London Directory for 1763 he is described as "sculptor and carver to Their Majesties and surveyor of the curious carvings in Windsor Castle." He was also, according to a bill-heading, "cabinet-maker and carver at the Royal Tapestry Manufactory in Soho Square."

NORRIS, —

In 1677 Robert Hooke "agreed for seven chimney-pieces for £80" for Montagu House with Norris (Diary of Robert Hooke, page 301, edited Robinson and Adams). A George Norris was employed on stone-carving work at Lord Ashburnham's house in St. James's Square in 1713 (Ashburnham Archives).

NORRIS, WILLIAM

In 1788 he was the builder of the Freemasons' Tavern, being responsible for the stone-carving (Freemasons' Archives). About the same time he became a partner of Daniel Pindar (q.v.).

NOST, or OST, JOHN van
d. 1729

Nost was an inhabitant of Mechelen and came to England, where Quellin (q.v.) employed him as foreman. After his master's death Nost married Quellin's widow and, as Vertue says, "became a master of reputation and left behind him a good fortune."

His yard was in the Haymarket and there he manufactured lead figures, urns, etc., and carved statues, monuments and chimney-pieces. His large school of assistants included Andrew Carpenter (q.v.).

One of Nost's earliest patrons was Thomas Coke, of Melbourne Hall, Vice-Chamberlain to Queen Anne, and the original of Pope's "Sir Plume." On 1 July, 1699, Nost writes to his patron: "I have set up two models of boys but they were not to my mind, and having had some extraordinary reasons which called me out of town and which have been a great hindrance to my business; but I will now with all speed dispatch your boys with all the care." This letter presumably
refers to the pairs of amorini still at Melbourne. Nost was paid for one such pair in 1706, receiving £10 10s. for “for two boys after Flamingo, modelled apurpose and cast in a hard metal.” In 1700 Nost made a number of other figures for the gardens, including Perseus (£25), Andromeda (£20), and Mercury and Syca (Psyche) £50 the pair. Other payments to him include £10 “for a boy and swan for a fountain, the swan in proportion to the boy, no bigger than the young Triton”; £6 9s. for “a young Triton with a brass pipe in the middle,” while a “duck and swan as big as ye life” came to £8. The two most important figures were the two kneeling slaves, “an Indian and a blackamore,” which came to £30 and which, with nearly all the other figures mentioned above, still adorn the gardens at Melbourne.

Nost’s grandest work at Melbourne and for which he received £100 in 1705 is the great “Vase of the Seasons,” still standing in the garden where the long grass walks meet. It shows how high a standard of craftsmanship could be reached by the worker in lead. The vase is supported by four monkeys, the upper part bears four heads, emblematical of the seasons, while the middle is decorated with a masque of children playing and swinging; the basket which surmounts all is rich with fruit and flowers. For Melbourne Hall itself Nost made a number of chimney-pieces, including in 1701 one of “rich purple marble, with freeze and cornish and pallasaters of white marble.” Six years later he made less important ones for the “Pendilum room, the Closett and stone-room.”

Coke also employed Nost in London, paying him in 1699 £50 for a chimney-piece for his London house in St. James’s Place, and in 1704 Nost received £8 10s. for a “marble basin with a brass socket and wooden pedestal” for Coke’s apartments in St. James’s Palace (Archives, Marquess of Lothian).

At Melbourne Hall also is Nost’s copy of Serlio’s Five Books of Architecture, Englished by Robert Peake, published in 1611 and bought by the sculptor in 1696, and later purchased by Coke for £15s. at the sale of Nost’s effects. There is also among the Melbourne Hall Archives an estimate for lead figures which is interesting as showing the prices Nost asked. They include “The Sabine Rape, £90”; “Hercules and Centoure, £70,” and “Hercules and Anteus, £80.” Though Nost wrote to his patron that he had “made as nice a calculation as can be and find it cannot be done under the prises that is rated above,” Coke found them too expensive.

Nost was the sculptor of the statues on the pediment of Buckingham House, which must have been very well known to Londoners and are mentioned in all early eighteenth-century guide-books to the capital. These statues, according to the New View of London (1708), were cast in metal and represented “Apollo, Equity, Liberty, Mercury, Secret Truth and the Four Seasons.” Lord Ashburnham, writing to Brian Fairfax the younger in 1706, asked him to find out what Nost had charged for the “statues for the attic of the Duke of Buckingham’s London house.” Fairfax replied that they had cost £27 each. In a later letter Lord Ashburnham complained that Nost had raised his charges, which were now so excessive that the writer would have to find some other statuary for his house at Ampthill (Letter-book of the First Lord Ashburnham).

Nost did a good deal of carving, etc., for the Royal Palaces. In 1701–1702 his bill for work at Hampton Court included “several drawings of the King’s statue for the marble fountain, £2. A model in clay for a fountain, four mermaids, each sitting on a dolphin and four shells between them and four dolphins in the middle, supporting a large shell, £10. For casting same in metal, £10” (P.R.O., Works 5/32). An alternative model for the fountain consisted of “four figures of young men each sitting on a dolphin and four swans between them, a pedestal of four scrowles in the middle and a Mercury on top of it.” About the same time Nost was restoring “a little Venus of marble” at Hampton Court, receiving £10 for “half a foot and putting half a foot to the other leg, a hand, a nose and mending several parts” (P.R.O., Works 5/32). He also made “a blackamoor kneeling, 5 foot high, and holding a sundial, £30” (P.R.O., Works 5/32), for the same Palace. Similar figures are to be found at Dunham Massey, Cheshire, and Okeover, Derby.

Also for Hampton Court, Nost made in 1700 four panels of Portland stone, 3 ft. 11 in. by 3 ft., “for ye new piers next the road fronting the long gravel walk, two carved with the King’s coat of arms, two with laurel branches, sword, sceptre and crown.” Later he made “six boys cast in hard metal, 3 ft. 4 ins. high to stand on top of the said piers, baskets of fruit, flowers and festoons about them” (P.R.O., Works 5/51). These were followed in 1701 by “a statue of Bacchus in hard metal, 6 ft. 2 ins. high” and “two marble pedestals for sundials, the plinth of black marble, carved with four cyphers and eight leaves in the manner of a capital.” Pedestals for various statues included those of a Gladiator, Diana, Hercules and Apollo, while a more ambitious work costing £86 were the “great vauess” and the carving of “eight panels and the pedestals of the said two vauess with emblems relating thereunto” (P.R.O., Works 5/32).
For the interior of the Palace, Nost made in 1700 "two fine great marble tables" and a purple marble chimney-piece with "a frieze of the triumph of Venus and mask-heads each side cast in brass." This, which was for the King's Gallery, cost the very large sum of £235, while for the dove-coloured one in the Queen's Gallery the sculptor was only paid £30 (P.R.O., Works 5/52).

Nost was also employed at many of the great houses. For Canons, in 1722, he made vases for the south and east fronts of the house, and with C. Burchard (q.v.) an equestrian statue of George I. He worked at Chatsworth, where in 1698 he was paid £30 for "figures of a boy and a girl," at Stourdhead, and at Boreham in Essex, while lead garden statues and groups by him are to be found at Rousham, Oxon; Seaton Delaval, Northumberland; and Chirk Castle, Denbigh (Archives of houses named).

Between 1703–1710 he was paid nearly £100 for lead figures for Castle Howard; these are presumably the ones which still stand in the South Garden (Castle Howard Archives).

Between 1705 and 1716 he made a number of statues for Sir Nicholas Shireburn at Stonyhurst, including "a Pegasus and Fame for ye fountain in ye high parterre," Diana on horseback, and groups of infants, representing Peace, Abundance, etc. In all Nost received £662 for this work, but the majority of the statues were later removed by the Duchess of Norfolk to Worksop and have presumably perished (Stonyhurst Archives). Two other patrons for whom he made lead figures were Humphrey Mildmay, of Moulsoll Hall, Essex, in 1717, and the Duke of Kent in 1725. For the latter's garden at Wrest Park, Bedfordshire, he made two large vases and eight heads (Archives, Lady Lucas and Dingwall).

In 1720 three vases were ordered from Nost at a total cost of £80 for the Printing House at Oxford, but for some reason or other they do not seem ever to have been carried out.

In 1723 the sculptor agreed with the Ironmongers' Company to make a statue of "Sir Robert Geffery, six foot high in hard metal in a workmanlike manner, and to fix ye same in ye place provided for it at the Company's almshouses at Shoreditch, with ye proper ornaments of a Lord Mayor, and to give the Company a modell thereof in hard metal, neatly completed, all at £40" (Company's Archives). The statue is now at Nottingham and a replica of it has been placed over the door of the almshouses.

Other statues by Nost included those of William III and Queen Mary (c. 1700), presented to the Royal Exchange by the City of London; Venus (1702), now at Umberslade, Warwick; George I (1717), for Essex Bridge, Dublin, which is now at the Barber Institute, Birmingham; Queen Mary (1720), at University College, Oxford; George I (1726), which was made for Grosvenor Square, but disappeared about 1838; and George II, executed for the Duke of Chandos' seat at Canons. When the contents of that house were sold the statue was purchased by an anonymous bidder, who had it erected in Golden Square on 14 March, 1753.

Nost undoubtedly made a number of very important monuments, though many attributed to him in various books and articles cannot be definitely established as his work. The only signed monument by him which I know of, that to the Earl of Bristol, 1698, is at Sherborne, Dorset. The bill for his magnificent baroque monument of the Duke of Queensberry, 1711, at Durisdeer, Dumfries, is in the archives of the Duke of Buccleuch.

Both the monument and its setting are among the most exciting and unexpected things I know. The monument stands in the Mortuary Chapel attached to, and coeval with, the Queen Anne Church, built by the Duke in a small and remote Lowland village. In the centre of the Chapel there towers above the Douglas Vault a great baldacchino, of pure-white marble, its domed canopy carved with angels' heads, and supported by four superb, twisted, white-marble Corinthian columns, wreathed with bay and based on those in the Raphael cartoons. Against the south wall is the tomb itself, with the life-size figures of the Duke and his wife, perfectly preserved. Queensberry, with his eyes open, lies on his side, his head resting on his hand, and gazing down at his Duchess, whose eyes are closed in death, for she had predeceased her husband by two years. It seems not improbable that the monument was ordered, and indeed erected before, the Duke's death, for the cutting of the inscription commemorating his death is by a different hand to that which, in more florid prose, remembers his Duchess.

Nost was also responsible for the very fine standing figure of Sir Hugh Wyndham (d. 1683), at Silton, Dorset. Captain William Wynde, the architect, writing to Lady Bridgeman on 23 July, 1692, informs her that "Mr. Noste's chief carver has gone to ye country to set up ye monument to Judge Wyndham and will not be hear this fortnight." In a letter to Sir John Bridgeman dated 16 January, 1698, Wynde tells him that "laste weeke I was with Mr. Noste who shoued me a table of Italian marble for ye Duke of Devonshire, of ye same peece I tend one for your ladye" (Archives, Earl of Bradford).

Nost died on 26 April, 1729, and a sale of his effects was later held by his widow. An advertise-
ment in the Guardian (No. 60, 20 May, 1731) informed the public that there remained "several extraordinary fine things belonging to the late famous sculptor Mr. John Nost, fine inlaid marble tables, marble chimney-pieces, figures, etc.," and that Mrs. Nost "designing to go beyond seas, will dispose of them at reasonable rates at her house near Hyde Park where attendance will be daily given."

(Authorities cited in text.)

NOST, JOHN van, the Younger
d. 1787

He was the nephew of John van Nost the Elder (q.v.), under whom he worked and, according to Vertue (Walpole Society, Vol. IV, page 35), "drove on the business, but never studied, nor did himself anything tolerable." About 1750 he settled in Dublin, where he found plenty of work and, having no rivals, soon enjoyed an almost complete monopoly of sculptural work in Ireland.

In 1753 he was commissioned by the Corporation of Dublin to make a statue of George II, and returned to London in order that the King might go to him for sittings. In the following year he was back in Dublin, and the statue, completed in 1756, was erected in the centre of St. Stephen's Green on 2 January, 1758 (Gentleman's Magazine, 1758, page 41).

In 1765 Nost went to England again, this time to make a model of George III for a statue which was subsequently set up in Dublin City Hall. In 1776 he made his last journey to London, where ill health forced him to remain for four years, and it was during this period that he exhibited a bust of the King at the Royal Academy in 1779. He returned to Dublin in 1780 and died there in 1787.

I know of no works by him in England, but a very full list of his works in Ireland is given in Strickland's Dictionary of Irish Artists. To this I would, however, add the statue of George, Earl of Bristol (c. 1778), at Down Hill, Northern Ireland; a bust of George III (1764), afterwards bought at David Garrick's sale (23 June, 1823) by a "Mr. Core"; and a monument to Viscount Loftus (1768) at New Ross, Co. Wexford.

Nost also took a mask of Garrick, from which he executed a bust. The mask later came into the possession of Charles Mathews, the comedian, while endless copies of the bust were afterwards put on the market; indeed, Macklin, the actor, said to Nollekens that one "was in every barber's shop-window, as a block for wigs" (J. T. Smith's Nollekens and His Times, Vol. II, page 207).

NOWELL, PHILIP
fl. 1806–1838

From 1806 until 1818 he was the master-mason under Wyatt for the additions to Longleat (Archives, Marquess of Bath), and in 1824 and 1825 was extensively employed as a mason during the restoration of Windsor Castle. His work here included carving various Gothic details, and in the two years he received over £9,300 (P.R.O., Works 5/235 and 19–30/1).

Nowell was also the mason for the building of the Duke of York's column, for which he was paid £15,760 (Architectural Magazine, 1834, page 192).

In 1828 he was employed on the restoration of, and additions to, Apsley House, receiving £7,624; while ten years later he was again working for the Duke of Wellington as master-mason for the alterations to Stratfield Saye, where he was assisted by his son, Philip Nowell the Younger (Archives, Duke of Wellington).

NURSEY, —

Presumably a Norfolk stonemason, though I have so far failed to find his name in any contemporary directory. He signs a large wall-tablet with excellent details to the Hon. Charlotte Windham, 1827, at Earsham, Norfolk; and another to the Rev. Richard Dreyer, 1838, at Thwaite in the same county.

NUTCHER, J., of Swathling
fl. 1754–1762

Though Nutter lived in a small Hampshire town, his two signed monuments are of considerable importance. At Bursledon, in Hampshire, is his monument (erected in 1754) to Philemon Ewer, who, according to his epitaph, "during the late war with Spain built seven large ships of war" and was "an ingenious artist and an excellent workman." At the base of the monument is a high relief of a man-of-war in full sail.

Nutter's other monument is to Anne Woodroffe (d. 1762), at Seale, in the same county. This is about 9 ft. high and has a curious design, embodying two cornucopias from each of which springs a rose-tree in full bloom. The mantling of the coat of arms is elaborate and well-carved.

NUTT, JOHN, of Birmingham
fl. 1810–1837

He signs tablets at Sutton Coldfield, Warwick, to Will Pearson, 1810, and in St. Martin's, Birmingham, to Edward Bower, 1814. His large wall-tablet to Richard Craddock, 1837, at Eccleshall, Staffs, has two flaming lamps on each side of a pyramid.
OLDFIELD, —,  
and TURNER, —, of London
fl. 1800–1811

The “Mr. Oldfield of London” who was employed to execute carved stonework at Castle Howard in 1801 (Castle Howard Archives) was probably the senior partner of Oldfield and Turner, and in 1810 the firm made two chimney-pieces for Coventry House, Piccadilly, costing £36 and £35 respectively. The first of these, in “Porto Veneri” marble, was for the “back parlour,” while the second, of “dove-grey marble,” was for the “eating-room” (Archives, Earl of Coventry).

In Cheltenham Parish Church is their large monument to Sir William Myers, 1811, a work 15 ft. in height. The design shows “Fame” pointing to a column inscribed with the word “Albueria,” while behind it are flags and military trophies.

OLDFIELD, C., of Ashford, Derby

He signs a very attractive classical monument to William Burgoyne, 1835, at Sutton, Bedfordshire, a work in the form of a small sarcophagus with a medallion-portrait of Burgoyne in the centre.

OLIVER, JOHN
b. 1616, d. 1701

He was one of Wren’s assistants, and in February, 1667, was appointed a member of the Commission entrusted with the rebuilding of London after the Great Fire of the previous year. He later became Assistant Surveyor of St. Paul’s Cathedral, Surveyor to the Dean, and also a member of the Court of Christ’s Hospital (Various references, Wren Society).

On 2 March, 1685-1686, Oliver was appointed Master-Mason to the Crown (Wren Society, Vol. XVIII, page 146), and in this capacity was working at Kensington Palace in 1697 (P.R.O., E.351/3466). Four years later he received £215 “for embossing and casting the imperial supporters, the Lion and Unicorn, in hard metal and two imperial shields with the Royal Garter about each of them for the gate of the Royal Palace at Hampton Court” (P.R.O., Works 5/52).

Oliver, who with Henry Phillips had been Executor of Joshua Marshall (q.v.), died in 1701. In his will he left bequests to his daughter, Grace Shaw, and her children, a legacy to Christ’s Hospital, and desired to be buried under the choir of St. Paul’s Cathedral.

OLIVER, SAMUEL EUCLID
fl. 1769–1774

He exhibited in 1769 “a portrait of a nobleman in wax” at the Royal Academy. In 1770 he was in partnership with James Hoskins (q.v.), but may have died in 1774, as in that year Hoskins took another partner, Benjamin Grant (q.v.).

OLIVER, SANDERS
b. c. 1719

He was apprenticed to Thomas Bull (q.v.) in 1733, and between 1748 and 1750 was the mason responsible for building Ironmongers’ Hall (Company’s Archives). In 1761 he carved the ornamental stonework for the Scotch meeting-house at London Wall (Guildhall MS. 4976).

In 1772 Oliver received a communication from the Court of Assistants of the Masons’ Company which informed him “that not being free of the Company he did use and exercise the trade of masonry within the City of London or the Liberties thereof,” he must attend the next meeting of the Court and take up his freedom, or pay a fine of £10.

His monuments, which are of good workmanship, include those to George Baker, 1765, at Mayfield, Sussex, and the Deschamps family, 1776, in St. Stephen’s, Walbrook. Another, to Joseph Innes, 1779, in Lewisham Parish Church, has a portrait-bust.

OLIVIERI, DOMINICK ANDREW, or
OLIVERI, of London
fl. 1820–1833

Olivieri’s bust of William Pitt, based on the original work by Nollekens (q.v.), is in the National Portrait Gallery, and in the Thomas Robson sale of 1835 his three undated busts of George IV, the Duke of York and Washington were sold. His studio was in Berkeley Street, Lambeth. He exhibited busts of E. R. Colville and Miss Malcolm in 1833 at the Suffolk Street Galleries.

OLVERS, JACOB and THOMAS,
of Falmouth
fl. 1811–1837

They sign tablets to John Pellwe, 1811, and to James Burke, 1812, at Mylor, Cornwall, and a large
Hellenic wall-monument to the Rev. Lewis Mathias, 1837, in Falmouth Parish Church.

OSBORNE, JAMES, of Bristol
fl. 1729–1767
He became a Freeman of Bristol in 1729 on his marriage with Anne, daughter of George Britten, woolcomber. He signs a tablet to John Hast, 1763, in St. James's Church in that city, and two large wall-tablets of superior workmanship at Chard, Somerset, to Humphrey Ash and John Eveleigh, both of whom died in 1767.
(Bristol City Archives.)

OSBORNE, JAMES, of Mansfield
fl. 1743–1768
In 1743 he was in partnership with Thomas Ince, and with him was responsible for a great deal of building at Welbeck, Osborne being paid £93 in 1751 for work in the Great Hall. By 1757 he was working on his own, but later payments, amounting to £2,380, were made between 1767 and 1768 to him and his partner, Matthew Porter, for building the bridge (Welbeck Abbey Archives).

OSBORNE, JOHN, of Bath
d. c. 1838
He taught himself to model in clay, and later, with the help of a farmer, was able to go to London, where he worked in Bacon's (q.v.) studio. After many vicissitudes he settled in Bath and, about 1835, carved a figure of the Goddess of Sculpture and a colossal head of Jupiter, both in Bath stone. Of the latter, which weighed six tons and took the sculptor several years to complete, Walter Savage Landor wrote in a private letter: "Nothing of Michael Angelo's is nobler and nothing of Thorwaldsen's finer."

At his death Osborne left his widow destitute, her only asset being the Jupiter. This was purchased from her for £100 by the Corporation of Bath, but was left lying neglected until 1861, when Mr. Alderman Bush of Bath rescued both it and the Goddess of Sculpture and placed them in Victoria Park. At the same time he employed an architect named Wilson to design the pedestals for both works, which were later executed by Mr. H. Treasure.

Osborne signs tablets to Thomas Baines, 1821, at Queenhill, Worcestershire, and to Ann Tetherly, 1831, at Northam, Devon.

Granville, in his Spas of England (1841, page 424), refers to Osborne as follows: "Born in penury—a mere shepherd's boy—he died in misery—an admired genius and a statutory worthy of a place among the ablest chisels of either ancient or modern times."

OSBORNE, JOHN, of Oxford
d. c. 1785
There was a family of masons named Osborne at Oxford who were associated with the city for many years. The first of these, John Osborne the Elder, was apprenticed to William Townsend in 1706 and was presumably the father of John Osborne the Younger, who died about 1785. The latter signs tablets to the Rev. David Price, 1771, at Stockton, Wilts, and to Francis Emmett, 1784, at Great Milton, Oxon. In the account-books of St. John's College, Oxford, there is a payment made to him in 1780 for carving a chimney-piece.
John Osborne the Younger had two sons. The elder, William, became a Freeman of his native city in 1775, while the second (and much younger) son, John Hodges Osborne, was apprenticed in 1787 to his mother, Jane, who had been carrying on the business since the death of her husband
(City Archives.)

OSGOOD, RICHARD
fl. 1691–1715
In 1691 he made a "large Caesar's head" for the guard-room at Kensington Palace (P.R.O., E.351/3467). In 1696 he supplied two leaden ducks for the garden at Chatsworth and three leaden figures for "ye neeches in ye Bowling Green House," while two years later he also made a head and a bas-relief for which he received £32 (Devonshire Archives).

In 1700 Osgood was employed in mending statues at Hampton Court, and was paid £72 for "casting two new legs and two new arms of copper and the great part of the drapery and a new quiver of arrows for the Diana that stands in the Quadrangle Court and burning altogether and mending several other parts. For rifling and cleaning the figure with aquafort to make it look bright all alike." For the Hercules which had "been melted and broke by ye fire at Whitehall" he cast new feet, part of the legs, hands and the lion's skin. In the same year he was paid £40 for "casting a large piece of drapery of the great statue of Antinous" (P.R.O., Works 5/51). In 1701 he was still working at Hampton Court, supplying at £20 each twelve large vases, 4 ft. 3 in. high, "with flutes and gadurnes (sic) and other ornaments," for the top of the two pavilions by the bowling-green.

In 1704 Osborne was employed by Colonel Child, making for him a "pair of shield boys, three antique Roman heads, two pairs of large flower-pots and eight vases," while two years later
Child purchased from him "two large Roman heads and bustos of hard metal and eight large vases" (Archives, Child's Bank).

In 1709 Osborne was back at Hampton Court, where he supplied "two new wings for the statue of Victory and two new trumpets for the statue of Fame" (P.R.O., A.O.1.2447). His last recorded work was for the same Palace, where in 1715 he was ordered to "model and cast in hard metal two large sea-horses and two large Tritons to spout the water in the great basin or fountain in Bushey Park at Hampton Court." For this he was paid £180.

OSMOND, WILLIAM,
of Salisbury
b. 1791, d. 1875

He was appointed mason to Salisbury Cathedral about 1818, and in the two following years made new pinnacles for the south-east and north-east corners of the tower. In 1843 he was paid for "columns and capitals for the south walk of the cloister" (Cathedral Archives).

Osmond was a friend of A. Welby Pugin, and there are copies of a number of letters written by that architect to him in Benjamin Ferrey's Life of Pugin. One, dated 1844, and written when Pugin was making a tour of France, ends: "Leave your blisters, leave your Doric porticos, leave all and follow me." Ferrey is careful to explain in a footnote that "blister" was the term used by Pugin to describe the tablets which Osmond "was in the habit of affixing to the walls of churches as memorials." Osmond was certainly influenced by Pugin and it is interesting to walk round Salisbury Cathedral and see how the style of his monuments swings violently from the classical to the Gothic. The most ambitious is that to Bishop Burgess, 1835, which is a copy of a fifteenth-century altar-tomb, while the majority of his later "blisters" are in the spikiest Gothic style.

Osmond is commemorated by a tablet in the cloisters of Salisbury Cathedral which records that he "was many years a lay-preacher and mason to this Cathedral." In the latter post he was succeeded by his son, William Osmond the Younger, who died in 1890 at the age of sixty-nine, and who was responsible, among other works, for the carving of the stone decorations of Sidney Herbert's Byzantine church at Wilton in 1845.

The elder Osmond made a slate sun-dial for Thruxton Church, Hampshire, in 1820. His monuments in Salisbury include those to Sarah Hayter (1822), John Jacob (1828), Bishop Fisher (1828), Wadham Wyndham (1835), Henry Hinxman (1841) and James Cobb (1858), all in the Cathedral; and to the Long family (1824), and the Rev. Herbert Hawes (1838), in the churches of St. Thomas and St. Edmund respectively. Elsewhere in Wiltshire he signs monuments to John Lampard (1824), at Barford St. Martin; Thomas King (1825), at Alvediston; the Rev. James Shuckburgh (1833), at Downton; William Locke (1835), at Scend; and Earl Nelson (1839), at Standlynn. Other memorials executed by him include those to Anne Kennicott (1830), in Windsor Parish Church; Henry Eyre (1830), in Winchester Cathedral; Lady Miles (1834), at Yateley, Hants; the Rev. Daniel Williams (1833), at Woolston, Hants; and Henrietta Thornycroft (1844), at Bodenham, Hereford.

OUGHIBRIDGE, T.
fl. 1751–1756

At Hatfield, Yorks, is a large stone monument, 12 ft. high, decorated with rather crude carving of cherubs' heads, flowers, etc., to the memory of William Oughtibridge (d. 1756). This is signed "T. Oughtibridge, Engraver," a signature also found on a cartouche tablet in the same church to Thomas Johnson, 1751.

OUTRIDGE, A., of Petersfield

He signs a large wall-monument in coloured marbles to William Mitford (1777), at Tillington, Sussex. An Elizabeth Outridge signs a tablet to Harriet Godbold (1823), at Greatham, in the same county.

OWEN, T., of Liverpool
fl. 1812–1813

He was an assistant of G. Bullock (q.v.) and exhibited, at the Liverpool Academy of 1812, "Cupid Sleeping." A year later he also showed figures of "Pan" and "Music."
PAGE, —, of Horsham  
1803–1816

He signs a wall-monument with a semi-urn against a rounded background to Henry Napper, 1803, at Wisborough Green, Sussex, and an oval tablet to Smith Whittby, 1816, at West Chiltington in the same county.

PAGE, GEORGE  
d. 1853

In 1831 he received a Silver Medal from the Society of Arts for a model of a bust. He exhibited at the Royal Academy, 1841–1849, showing ideal works and a statuette of a child, and also showed models at the Society of British Artists in 1846. He became insane in 1852 and was placed in Colney Hatch, where he died in August, 1853 (Archives, Artists' Annuity Fund).

PAGE, ROBERT, of Norwich  
d. 1778

Page is the best of the Norfolk statuaries and his monuments are important; indeed, his skilful use of coloured marbles, his details of rococo shields and groups of angels' heads make his work very similar, and in fact almost equal, to the contemporary monuments of Sir Henry Cheere (q.v.).

His monument to Nathaniel Micklewait, 1757, at Sprowston, Norfolk, has a fine portrait-bust, while he signs others in the county to Elizabeth Segrave, 1727, at Gateley; Mrs. Pell, 1732, at Dersingham; Sir Philip Astley, 1739, Melton Constable; Robert Daye, 1740, at Scoleton; Elizabeth Browne, 1741, at Colton; Bussy Greene, 1744, at Catton; Sir Jacob Astley, 1760, Melton Constable. In Norwich itself works by him commemorate John Moore, 1725, in the Cathedral; Mary Lubbock, 1729, in St. George Colegate; Edward Coleburne, 1730, in St. Peter Mancroft; Robert Bene, 1730, in St. Martin at Oak; Robert Snell, 1738, in St. Giles; and Thomas Crowe, 1751, in St. Andrew’s. Page died in 1778 and was buried in St. John Timberhill, Norwich.

PAGET, JAMES  
†. 1720–1725

Between 1720 and 1725 he was building a house for the Master of the Rolls which had been designed by Colin Campbell and was situated next to the Rolls Chapel in Chancery Lane. Besides being generally responsible for the construction, he also carved the great door-case, Ionic capitals, lions' heads, masks and chimney-pieces (P.R.O., A.O. 407/2494).

PAINE, JAMES  
† 1745, d. 1829

He was the son of James Paine the architect (1725–1789) and was born in June, 1745 (Farnington Diary, Vol. VIII, page 26), and studied at St. Martin's Lane Academy. In 1764 he went to Rome for the first time, and though he was back in England by 1769, in 1774 he was again in Rome, this time accompanied by his wife. He seems to have remained in Italy for at least nine years, for as a subscriber to various books he gives his address as “Rome” up till 1783. By 1788, however, he had returned to London.

Paine exhibited sculpture and pictures at the Society of Artists, 1761–1773, where his work included a bust of Sir John Fielding. The most important of his monuments is that to William Powell, “one of the patentees of the Theatre Royal, Covent Garden,” in Bristol Cathedral. This large work, dated 1769, is almost 17 ft. high and has a figure of “Fame” holding a medallion. Other works signed by Paine commemorate Lady Sondes, 1777, at Rockingham, Northants, and Sarah Proby, 1783, in Chatham Parish Church.

The drawing for the Sondes monument is in the Victoria and Albert Museum (D. 1551), and here, too, are drawings by Paine for monuments to Thomas Richardson (D. 1548) and Thomas Hurst (D. 1907). I have so far failed to trace these monuments, though, of course, it is quite possible that they were never erected.

Paine was well known as a maker of chimney-pieces, and also in the Victoria and Albert Museum are a number of his designs for these (D. 1540–1547), including two for a chimney-piece for the saloon at Brockett Hall, Hertfordshire, a magnificent work dated 1772, with a note in the artist's hand that the frieze is to represent "The Rape of Europa." There is also a drawing for a chimney-piece for "The Grove, Isle of Wight" (1775), and two undated ones for "Mr. Lloyd Baxendale" and "Lord Clifford, Ugbrooke, Devon." He also carved a chimney-piece for Lady Middleton of Peper Harrow in 1773.

When Sir William Chambers was building a
house for William Errington near Hexham, in Northumberland, he submitted some chimney-piece designs, but these apparently were not accepted and Mr. Errington instead expressed a wish for a special type of chimney-piece designed by Paine. In a letter written on 24 December, 1769, Sir William replied: "With regard to the chimney-piece you wish to substitute, I cannot give designs for them without breaking through an established rule they are the invention of Mr. Paine and he must be applied to for them. He lives in Salisbury Street by the Strand and will not only furnish you with the design, but likewise with the chimney-piece and he keeps statuary for the purpose" (British Museum Ad. MS. 41133).

On 12 March, 1830, Mr. Christie held a sale of the pictures, casts, books, etc., "the property of J. Paine, Esq., architect, deceased." Among the lots sold were the account-books of the sculptor, Nicholas Stone. These had originally belonged to Vertue and are now in the Sir John Soane Museum (Archives, Messrs. Christie).

PAINE, W., of Stratford-on-Avon
He was the son of a William Paine, of Stratford-on-Avon, mason, who died in 1800. In 1816 the younger Paine made eight chimney-pieces for the Judge's Lodging at Warwick (Warwick County Records, Class 24 [36]).

PALMER, BENJAMIN
fl. 1739-1778
After the death of his father, William Palmer (q.v.), in 1739, he took over the yard in Gray's Inn. In Eland's "Purveyor Letters" there is an entertaining series written by Mr. Henry Purefoy and Benjamin Palmer, concerning a most unsatisfactory purple-marble chimney-piece which William had supplied just before he died. In the end Benjamin had to take the blame for this and agree to its return.

His most ambitious work is the statue of Sir William Harpur over the old Grammar School at Bedford. He carved this in 1768 and at the same time made a monument with medallion portraits to the memory of Sir William and his wife, which was erected in St. Paul's Church, Bedford. For this and the statue he was paid a total sum of £200 (Bedford School MS. Account-book).

As a statuary Palmer is not as good as his father, and his monuments, though large, are not particularly distinguished. That to Arthur O'Keefe, 1756, in Westminster Abbey, has a portrait-bust, as has that to Sir Thomas Gage, 1742, at Hengrave, Suffolk.

Palmer signs monuments to Frances Legh, c. 1740, in Warrington Parish Church; Stephen Master, 1741, at Daventry, Northants; Thomas Master, 1742, in Westminster Abbey; John Willis, 1744, at Malmesbury, Wilts; Arthur Bevan, 1749, at Laugharne, Carmarthen; Lord Stourton, 1753, in Cheam Old Parish Church; William Rose, 1753, at East Retford, Notts; Henry Uthwatt, 1757, at Latham, Bucks; Robert Johnson, 1769, and the Rev. Louis Monoux, 1771, both at Sandy, Beds; Margaret Sparhauke, 1770, at Graveley, Herts; and William Middleton, 1772, at Grantham, Lincs.

Palmer retired in 1778, and a sale of his stock was held on 7 and 8 July in that year.

PALMER, J., of Manchester
He signs a Hellenic wall-tablet to John Baldwin, 1817, at Bowden, Cheshire.

PALMER, NATHANIEL
fl. 1829-1846
He exhibited at the Royal Academy, 1829-1844, showing various works, including busts of the Rev. Rowland Hill (1829) and Sir Robert Peel (1838).

His figure of Charles I, shown at Westminster Hall in 1844, was described by the acid Art Critic of the Literary Gazette as "a poor thing, as if the King was going to dance a crotante." In 1846 he applied for assistance to the Artists' General Benevolent Institution owing to "acute inflammation of the eyes."

PALMER, WILLIAM
b. 1673, d. 1739
He was the son of William Palmer, "late of St. Giles-in-the-Fields, coachman," and was apprenticed in 1687 to James Hardy (q.v.), but for some reason was turned over to Josiah Tully a few years later. In 1694 he became free and returned to work for Hardy, but by 1696 had left him and was serving under John Nost (q.v.). He may have worked for Thomas Hill (q.v.), as in November, 1704, Sir John Vanburgh, writing to Lord Godolphin about the misdemeanours of Thomas Hill, then master mason for the building of the Orangery at Kensington Palace, says, "I ask'd one of his (i.e. Hill) foreman who they work'd for, but he tould me One Palmer whom his master had made his Deputy" (Wren Society, Vol. VII, page 140).

Palmer gave a list of monuments he had "set up" to Le Neve for inclusion in the latter's Monumenta Anglicana. The phrase in all but one instance means "carved," the exception being the monument to the Earl and Countess of Exeter, which was ordered by the Countess from Pierre Monnot (q.v.) and executed by that sculptor in
Rome. In this case Palmer was only the mason who fitted the parts together and erected them in St. Martin's Church, Stamford, though he may also have carved the inscription. Mrs. Esaia (Antiquaries' Journal, Vol. XXII), however, argued that "the only possible conclusion to be derived from this fact is that Palmer went to Rome," where she supposed him to have worked as Monkton's assistant and to have cut the epitaph before the monument left Italy. On the other hand, it seems equally possible that he did whatever was necessary in England.

Palmer was certainly not abroad in 1706, for in that year Lord Ashburnham gave him an order for three marble chimney-pieces, two for his house at Ampthill in Bedfordshire, and one for the staircase-hall at Ashburnham House, Westminster. Palmer was then apparently not working on his own, for Lord Ashburnham refers to him as "chief man to Mr. Chapman, the marble-setter of Red Lion Square" (Ashburnham Archives). However, by 1710, he had his own yard in the Square, having by that time probably succeeded to, or perhaps purchased, Chapman's. In 1719 he made a chimney-piece for Knowsley in Lancashire (Derby Archives, 2005/1), while from 1718 until his death he held the post of mason to Lincoln's Inn, receiving £300 between 1730 and 1733 for work in connexion with the Chapel, Hall, etc. (Benchers' Archives).

Between 1727 and 1738 Palmer was working for Lord Folkestone at his London house, also in Red Lion Square (Archives, Earl of Radnor). In 1738 he made chimney-pieces for Mr. Edward Trotman of Shelswell and, in the following year, one for Mr. Henry Purefoy of Shalstone, Buckinghamshire (Eland's, Purefoy Letters, Vol. I, page 53, et seq.). He died towards the end of 1739, for Mr. Purefoy pays the bill for his chimney-piece to "Mrs. Anne Palmer," and Lord Folkestone's last payment in that year is made to "Mrs. Palmer, the mason's widow."

Palmer's monumental masterpiece is the very remarkable figure of the Hon. Margaret Watson, 1713, at Rockingham, Northamptonshire, a standing draped statue in the attitude of the Venus de Medici, a skull at her feet, and above her a canopy and a draped curtain which is bunched and tied back. The work is unsigned, but is included in the list which the sculptor gave to Le Neve. Other monuments by him, either signed or in that list, are those commemorating Anne Crispe (with a bust), 1708, at Birchington, Kent; Sir Roger Meredith, 1712, at Leeds, Kent; Richard Walburge, 1715, at Barholme, Lincs; Anne Gelthorpe, 1716, at Hillington, Norfolk; Elizabeth Hatten, 1724, Lincoln Cathedral; Richard Vaughan, 1724, in Carmarthen Parish Church; Mrs. Ann Crofts, 1727, at Little Saxham, Suffolk; William Chambers, 1728, Great Offley, Herts; Constantine Phipps, 1728, at White Waltham, Berks; John Barham, 1730, at Wadhurst, Sussex; William Games, 1731, at Upton, Northants; Mrs. Stepney, 1733, and Lady Stepney, 1733, both at Llanelly, Carmarthen; Gilbert Browne, 1737, at North Mimms, Herts; James Fortrye, 1737, at Northfleet, Kent; and Stephen Everard, 1738, at Faversham, Kent.

**PAMPALONI, LUIGI**

*b. 1791, d. 1847*

He was born in Florence and first attracted attention in 1827 when he executed a monumental group for a Polish lady. This represented a little girl sleeping and a boy with clasped hands and upturned face kneeling by her side. The figure of the boy, under the name of the "Praying Samuel," had a world-wide popularity and plaster copies of it were sold in immense numbers.

Pampaloni's best-known works in Italy are the figures of Arnolfo dei Lapi and Brunelleschi on the eastern side of the Cathedral in Florence. In England he signs the monument to Mrs. Gooch at Benacre, Suffolk, which was erected in 1840 and has a relief of an angel bearing the mother and her child heavenwards.

**PANORMO, CONSTANTINE**

*b. 1805, d. 1852*

Son of Francis Panormo, a professor of music, Constantine was born in London and, as a boy, went to Ireland, where he studied at the Royal Dublin Society's Schools and distinguished himself by gaining numerous prizes. In 1824 W. Behnes (q.v.), who had himself been a pupil at the school, offered to take two boys and instruct them for two years at £60 a year each. The Royal Dublin Society accepted the offer and sent over Panormo and Gallagher (q.v.). As Behnes's pupil, Panormo attended the Royal Academy Schools, gaining Silver Medals in 1825 and 1826. In the former years he also received the large Silver Medal of the Society of Arts for an entire figure.

The Royal Dublin Society then sent Panormo to study in Rome, but he was back in London in 1833, and by 1837 had returned to Dublin, where in 1842 he was elected an Associate of the Royal Hibernian Academy. In 1844 he sent a group of the "Liberation of Caractacus" to Westminster Hall and, two years later, finished the statue of George IV which the Dublin Society had ordered from Behnes, but which that sculptor had never been able to complete, owing to various financial difficulties.
NICHOLAS READ

Part of the monument of Admiral Tyrrell, 1766, Westminster Abbey.
PLATE XX

J. C. F. ROSSI
Lord Heathfield, 1825, St. Paul's Cathedral.

L. F. ROUBILIAC
Panormo exhibited at the Royal Academy in 1833 and 1834 and at the Royal Hibernian Academy in 1837–1849. At the former his works included busts of Sir Edward Antrobus, Lady Mary Leslie and Sir Richard Jodrell; for a list of his works in Ireland, see Strickland's Dictionary of Irish Artists.

(New Monthly Magazine, 1826, page 11; Literary Gazette, 1844, page 483; Strickland's Dictionary of Irish Artists.)

PANZETTA, JOSEPH

fl. 1789–1830

When he applied to the A.G.B.I. in 1830, Panzetta stated that he had been a pupil “of Mr. Joseph Wilton, who was also his godfather, and of J. B. Cipriani, and after a long residence in Italy for improvement returned to London in 1787.” Panzetta then proceeded to give a list of his principal works, which included “A Monument in Westminster Abbey to Sir Archibald Campbell,” “Vases for Somerset House,” and “The Lions on the Terrace” (also for Somerset House), and the statue of Archbishop Tillotson in Yorkshire; “these were done for Mr. Wilton.” Panzetta also said that he had “done in Portland stone for Mr. Banks” the relief in front of the Shakespeare Gallery in Pall Mall. He also claimed that he was responsible for the figures of Hercules and Justice on the Union Insurance Office. Panzetta worked for Mrs. Coade (q.v.) and her successors for twenty-six years, modelling the statue of George III at Lincoln Heath and a figure of Britannia at Plymouth. Other works carried out by him for Coade include the bas-relief in the pediment of Greenwich Hospital, which he executed in 1806, in collaboration with John Bacon the Younger (q.v.) (European Magazine, 1806, page 288). In 1817 he modelled the statue of Lord Hill which was supplied by the Coade works for the column at Shrewsbury (Gentleman's Magazine, 1817, Part II, page 393).

Panzetta exhibited at the Royal Academy, 1789–1810, showing bas-reliefs, ideal works, designs for monuments, etc.

If all that Panzetta said was true it would appear that he did the work and more famous sculptors got the credit and the cash; but what is more likely is that he merely carved in stone or marble the works which others had modelled and designed.

PAPERA, B.

As “Mr. Papera figure-maker” he supplied busts to Lord Bridport in 1802 (Soane Archives), while in the same year Wedgwood paid him for busts of Mrs. Siddons, Lord Nelson and Mrs. Deamour (Mrs. Dawson Damer ?), and also for “one vase with lamp” (Wedgwood Archives).

PAPERA, JAMES PHILIP

fl. 1829–1851

He was presumably the son of B. Papera (q.v.), and exhibited busts at the Royal Academy from 1829 until 1831. Twenty years later, when living at Cambridge, he sent to the Great Exhibition either statues or busts of Queen Elizabeth, Rubens, Cromwell, Charles I and Sir Robert Peel. A Louisa Papera is noted in the London Directory of 1828 as “figure maker” of 16, Marylebone Street.

PAPWORTH, EDGAR GEORGE

b. 1809, d. 1866

He was the only son of T. Papworth (q.v.), was born on 20 August, 1809, and at an early age became a pupil of E. H. Baily (q.v.). In 1826 he joined the Royal Academy Schools, gaining Silver Medals in 1829 and 1831 and a Gold Medal in 1833 for a group entitled “Ulysses Receiving the Scarf from Leacothea.” In 1827 he had been awarded the Silver Palette by the Society of Arts for a bas-relief.

Papworth was elected to the Academy Traveling Scholarship in 1834 and went to Rome, but owing to ill health was forced to return to England after three years’ study. In 1841 he exhibited “Poor Little Nell” at Birmingham and, three years later, showed at Westminster Hall a “Sleeping Girl” and “A Statue of Lord Brougham.” Of the latter the Art Journal wrote: “it is a rough and unfinished statue, very easy, very good and very like.” In 1848 he executed a stone figure of Minerva for the Royal Polytechnic in Regent Street (Builder, 1848, page 174).

In a competition held in 1857 to select the designer of the proposed Wellington monument in St. Paul’s Cathedral, Papworth’s model was awarded the third prize of £300. He also worked as a silver-designer and made the centre-piece presented “by the slave population of Jamaica” to the Marquess of Sligo in 1839.

Papworth married Caroline, daughter of his first master, E. H. Baily, and their son, another E. G. Papworth, was born in 1832. He also adopted sculpture as a profession, joining the Royal Academy Schools in 1848 and exhibiting at the Academy, 1852–1882. His “Startled Nymph,” commissioned by J. Neeld, M.P., was lent to the Exhibition of Art Treasures of the United Kingdom held at Manchester in 1857; it is also
illustrated in the Art Journal of the previous year (page 250).

In his latter years the elder Papworth’s careless-
ness and extravagance led to his becoming finan-
cially embarrassed. He died on 26 September,
1866, and was buried in Highgate Cemetery.

He exhibited at the Royal Academy, 1832–1860,
at the British Institution in 1840 and at the Great
Exhibition of 1851. At the Academy his works
included a group entitled “The Young Emigrant”
(1861), and busts of Rowland Hill (1833), Dr.
Latham (1857) and Sir Richard and Lady Burton
(1865). His group of “Cupid and Psyche” was
exhibited at the Birmingham Society of Artists
in 1841, while others executed by him were: “The
Moabitish Maiden” (1850), for the Prince
Consort; “Martino” (1854) and “A Nymph of
Diana” (1854), for the Crystal Palace; “Ruth”
(1855), for Osborne; and “A Boy With a Bird’s-
nest” (1857), for a Mr. Joyce of Tulse Hill.

Papworth’s bust of William Murdock (1839) is
in the Birmingham Art Gallery; an undated one
of Sir Henry de la Beche is in the Geological Museum,
while those of Admiral Blake (1860), Locke (1862)
and Captain Speke (1865) are in the Shire Hall,
Taunton. He signs monuments to Alfred Tebbitt,
1838, in St. George’s, Bermondsey; Thomas
White, 1841, at Wethersfield, Essex; and John
Mitchel, 1846, at Mancetter, Warwick. He also
executed the one erected in Bunhill Fields in 1862
to commemorate John Bunyan.

(Various references, Art Journal and Builder.)

PAPWORTH, THOMAS
b. 1773, d. 1814

Son of John Papworth (1750–1799), master-
plasterer to the Royal Palaces, Thomas continued
his father’s work and was the owner of the last
stucco and plastering business carried on in London
on a large scale.

He exhibited at the Royal Academy, 1794–1815,
showing designs for ceilings, sketches of candela-
bras, and a number of busts, including those of
Miss Mellon the actress, and of his brother, J. B.
Papworth, the architect.

PARBURY, GEORGE
fl. 1760–1791

In the books of the Society of Arts he is des-
cribed as “under twenty-two” and “son of the
Keeper of the Royal Academy” when he won a
premium from the Society for a “Model of Birds in
Clay” in 1760. Next year he won a further
premium, and a note in the list of the Society’s
prize-winners says that he later became a “metal-
chaser.”

Parbury exhibited wax portraits, models, etc.
(chiefly of classical subjects), at the Society of
Artists, 1764–1771, and at the Royal Academy,
1772–1791.

PARK, PATRIC
b. 1811, d. 1855

Both his father, Matthew Park, and his grand-
father were statuaries and masons in Glasgow,
and at the age of fourteen he was himself appren-
ticed to Mr. Connell, a mason. His master was at
that time building Hamilton Palace, and here
young Park, after working for two years as a stone-
cutter, was entrusted with the carving of the coat
of arms above the main entrance. In 1828 he was
employed by the architect Gillespie to carve
decorative details at Murthly Castle.

In 1831 Park went to Rome and, after studying
for two years under Thorwaldsen, returned home
and began his career as a sculptor. In 1839 he sub-
mited a fearsome design for the Nelson memorial,
consisting of a heroic statue of the Admiral, sup-
ported by two figures representing “Manhood Mourning
Nelson’s Death” and “Honour Con-
soled by the Glory and Triumphs of Nelson,”
while as a crowning absurdity Nelson was shown
grasping his sword by the blade. Two years after
this he moved from Glasgow to Edinburgh, and in
1845 sent a figure of a “Greek Huntsman” to the
exhibition held to select suitable works of art for
the new Houses of Parliament.

In 1846 a statue of “Modesty Unveiled” was
entered by Park for the Art Union competition, but
he was not allowed to exhibit it and wrote furious
letters of protest to the Press. The Art Union,
however, justified their action on the ground that
the work was “an offensive portraiture of a model,
coarse in more than average degree; the lower
limbs massive and ungraceful, the upper part of
the figure exaggerated and sensual,” and con-
cluded firmly that they considered it “utterly
deficient of every particle of beauty and elegance.”

In 1850 Park formed the project of erecting a
gigantic figure of Wallace on the hills near Edin-
burgh and prepared a model which stood 15 ft.
high and required ten tons of clay. Lack of
encouragement, however, led him to abandon the
idea and he “destroyed with his own mallet the
model he had so laboriously made” (Builder,
1866, page 733). Two years later he moved to
Manchester, and on 16 August, 1855, died at
Warrington railway station, where he had burst a
blood-vessel in trying to help a porter to lift a
heavy trunk.

Park was elected an Associate of the Royal
Scottish Academy in 1849 and a full member two
years later. He exhibited there, 1839–1855, at the Royal Academy, 1836–1855, and at the British Institution, 1837–1854. Among the works shown were statues of "Eliza" (1843) and "Alexander" (1845); and busts of the Duke of Newcastle (1836), Thomas Campbell (1839), John Landseer (1839), R. B. Haydon (1839), Charles Dickens (1842), the Earl of Dundonald (1848), and Sir Harry Smith (1848). His busts of Sir Archibald Alison (undated), Lord Jeffrey (1840), D. O. Hill (1842), James Jardine (1842) and Professor Simpson (1850) are in the Scottish National Portrait Gallery; those of James Oswald (1842) and Adam Smith (1845) are in the Glasgow Art Gallery; while undated ones of James Hutton and Sir James Hall are in the Geological Museum in London.

Other busts by Park include those of Mr. Huggins (1846) at Huggins College, Gravesend; Sir Charles Napier (1833), executed for Napoleon III; the Rev. Henry Grey (1853), at New College, Edinburgh; Sir John Potter (1854), at the Manchester Free Library; Napoleon III (1855), at the Victoria and Albert Museum; "A Scotch Lassie," National Gallery, Edinburgh; and undated ones of Charles Barry at the Reform Club, and Sir William Fairbairn at the Royal Society. He was also responsible for the statues of Michael Sadler (1837) and Charles Tennant (1841) in Leeds Parish Church and Glasgow Necropolis respectively, while he signs the monuments of Andrew Skene, 1836, in the New Calvin Cemetery, Edinburgh, and Jane Richardson, 1839, at Siggletorhne, Yorkshire.

From the foregoing list it will be seen that Park was especially in demand as a sculptor of busts, a type of work at which he was at his best. Graham wrote in British Literature and Art (page 449) that "Park's appreciation of beauty in subjects of a more ideal kind was not equalled to his appreciation of character in portrait-busts," while the Building Chronicle (1855, page 236) considered that "all his works were marked by a vigorous originality, a grace of style and a delicate beauty of finish which few ever equalled."

(Scottish Family History, Vol. II, page 276; authorities cited in text.)

PARKER, G. G., of Bath

In the possession of the writer is his wax bust of Lord Raglan, signed and dated 1835.

PARKER, RICHARD, of London

fl. 1769–1774

Parker, whose studio was in the Strand, was also employed by Wedgwood, and in the firm's archives there is an undated letter (written about 1769) from William Cox, the London agent, in which he informs Wedgwood that "Mr. Parker has cast the medallions off in the best manner him and I could well contrive. I should be glad of your notes respecting the propriety or Deserts of the Performance."

Parker apparently specialized in making casts, for the bill he sent in to Wedgwood has the following printed heading: "Mr. Parker having obtained from Joseph Wilton Esq. statuary to His Majesty various moulds of bas-reliefs and busto's made upon his original models, has the honour to acquaint the nobility and gentry that they may be accommodated with casts at the shortest notice. N.B. Those original casts can be had at no other place and although it may happen that some figure makers may clandestinely make moulds of any of those casts, they can produce at best but an impression void of every original touch" (Wedgwood Archives). In 1774 he was again working for Wedgwood, modelling "A Zingara, a Vestal and a Pug-dog" (Metyard's Wedgwood, Vol. I, page 326).

At Ashburnham Place was a set of library busts by Parker based on works by well-known sculptors such as Roubiliac and Rysbrack. The set, which includes likenesses of Locke, Milton, Congreve, Prior, Inigo Jones, etc., is almost similar to one in the possession of Lord Trevor, at Brynkinalt, Denbigh.

PARKER, SAMUEL, of London

fl. 1820–1831

In 1822 he received eight hundred guineas for the chimney-piece for the saloon of the Royal Pavilion at Brighton. This is described by Brayley in his History of the Royal Pavilion (1838) as follows: "A sumptuous chimney-piece of statuary marble with enrichments of ormolu in each jamb, within a niche stands a Chinese figure; those figures, which are of metal, are highly painted and varnished and the dresses are finely pencilled." This is now in the yellow drawing-room at Buckingham Palace, a building where Parker was also employed and where, in 1829, he received £2,000 for statuary work (P.R.O., Works 19/3).

At the Great Exhibition of 1851 a Mr. Peachey showed a bronze bust of Sir Thomas Lawrence by Parker which was "made in London from a model produced at great cost and afterwards destroyed" (Catalogue of the Great Exhibition, Vol. II, page 841). Parker's small bronze busts of Lord Brougham (1831) and William IV (1831) are in the Scottish National Portrait Gallery.
PARKER, THEODORE
He was probably the father of Richard Parker (q.v.) and, like him, also worked for Wedgwood. In 1769 he modelled "statues of Flora, Seres (sic), Spenser, Hercules, Juno, Prudence, Milton, Shakespeare, a boy (on) a couch and three dogs" (Wedgwood Archives).

PARKINSON, ROBERT, of Newmarket
fl. 1820–1840
He was the son of William Parkinson, a "staturary and mason" of Newmarket, and in 1833 married a Miss Jemima Well, a dressmaker of Grosvenor Square. He signs a tablet to John Isaacson, 1830, at Burwell, Cambridgeshire.

PARR, R.
According to Hutchins’s History of Dorset (Vol. III, page 679), he signed the monument "with a pediment supported by two Corinthian pillars" to the Douch family, 1675, at Stalbridge, in that county.

PARS, ALBERT
fl. 1759–1767
He was the son of a silver-chaser, and in 1759, 1764 and 1765 received premiums for models in wax from the Society of Arts, while in 1767 a further award was made to him for a bronze cast.

Pars was the brother of William Pars, A.R.A., the portrait-painter, and of Henry Pars, the draughtsman and director of the well-known Art School in St. Martin’s Lane.

PARSONS, —
fl. 1718–1720
He was probably a Gloucestershire mason and his monuments are excellent copies of contemporary London work. He signs two charming cartouches tablets in that county to Anne Millen-champ, 1719, at Long Newton, and to Deborah Roche, 1720, at Tetbury, while his monument to Ferdinando Gorges, 1718, at Ashley, Wiltshire, has an inscription-tablet in the form of a heavy fringed curtain.

PARSONS, LATTER, of Lewes
Firm fl. 1788–1860
He took over the yard of R. Morris, of Lewes (q.v.), and as a mason built the County Hall in that town in 1808 (Town Archives).

Parsons' monuments and tablets, based on London work, are in excellent taste, that to Robert Durrant, 1799, at Framfield, Sussex, being in the manner of the younger Bacon, while a cartouche tablet to George Beckham, 1788, at Salehurst in the same county, is far above the ordinary provincial level in design and workmanship.

Parsons was later joined by his son, C. Parsons, who is responsible for some of the later tablets, and their yard in Eastgate, Lewes, continues to this day. The firm is no longer owned by the family, but its monuments are in the best manner and style, and worthy carry on the Parsons tradition, as the very dignified ledger to Viscount Gort, unveiled in 1950 in Penshurst Church, shows.

Other memorials and tablets executed by the Parsons in Sussex include those to William Chambers, 1808, at East Blatchington; William Constable, 1810, at Burwash; Odiarde Hooper, 1819, at Beckley; Richard Stone, 1824, at Mayfield; Mary Wright, 1831, at Framfield; the Rev. James Capper, 1835, at Wilmington; Ida Beauclerk, 1832, at Cowfold; and the Bishop of Sierra Leone, 1857, at Upper Dicker.

PARSONS, ROBERT, of Bath
b. 1717, d. 1790
In 1744 he was employed by the elder Wood as "a free stone-mason and one of the house-carvers" for the building of the Bristol Exchange, but he was chiefly known for his garden vases and ornaments carved from Bath stone, which he sent all over England.

In 1747 he carried out work of this kind for Lord Fitzwalter at Moulsham Hall, Essex; between 1745 and 1751 Henry Hoare paid him £110 for vases for Stourhead; and in 1759 and again ten years later he supplied others to Lord Folkestone. The two vases made in 1759 are still in the garden of Longford Castle, while a dozen more, made for Castle Hill, Devon, are also in situ. These particular vases cost £2 15s. each, and in Lord Fortescue’s archives is Parson’s original drawing for one of them. In 1766 he made six vases for the front of Corsham Court (Archives of Houses named).

In Parsons’ manuscript Commonplace Book (now in private possession) is an account of how he went in 1764 to see Ralph Allen on the day before the latter’s death, in order to show him designs for tombstone and memorials. Parsons, therefore, is presumably responsible for the pyramid in Claverton churchyard under which Allen lies buried.

Parsons became a Baptist minister about 1768, but "from the congregation he received no remuneration for his services and never relinquished his business as a stone-carver. He was
removed to the Eternal World, February, 1790, and was buried in the Baptist Chapel at Walcot” (Memoirs of the Rev. John Porter). His obituary in the Bath Chronicle states that “for forty (sic) years he had been Pastor of the Baptist Congregation in Garrard Street, and it is to his disinterested zeal that the Society owed its origin and establishment.” He published in 1772 Letters of the Rev. Mr. Fletcher of Madely on the differences subsisting between him and the Hon. and Rev. Mr. Shirley.

As a monumental mason Parsons was in partnership with Ford (q.v.), and together they sign a monument at Bucklebury, Berkshire, to Winchcombe Parker, 1747.

PARSONS, THOMAS, of Bath
b. 1744, d. 1813

He was the son of Robert Parsons (q.v.) and, like his father, a carver of stone vases and chimney-pieces. His book of designs is in the possession of the Bath Municipal Library and shows that he copied his vases from drawings by Hoare, Cipriani, Kent, Wedgwood, Mrs. Coade, etc. He made the famous vase for Mrs. (afterwards Lady) Miller into which verses were dropped by the wits of Bath. These she would pick out and read to her assembled guests, an amusement which terminated on the unfortunate day when a most indeleate ode polluted the urn.

Like his father, too, Thomas Parsons was a Baptist minister, and his published works include Effusions of Paternal Affection on the Death of a Lovely Daughter (1799) and High Church Claims Exposed (1808).

PASCO, JOSEPH
fl. 1754-1766

He lived at Hackney, where he carried out repairs to the Parish Church in 1754, and in 1765 was elected a churchwarden (Simpson’s Memorials of St. John at Hackney).

Pasco signs monuments in Essex to Mrs. Anne Meade, 1758, at Great Easton, and to Samuel Bosanquet, 1765, in Leyton Parish Church.

PASSEY, J., of Tillingdon

He signs a stone wall-tablet which is painted to represent coloured marble, to Elizabeth Weaver, 1821, at Mansoll Lacy, Hereford.

PATENT MARBLE WORKS,
THE

Firm est. 1809

Their yard was in Westminster and they seem to have been mass producers of chimney-pieces and monuments, most of the latter being extremely dull and frequently ugly. One or two trained designers of taste must have been employed, however, for the firm occasionally turned out a good monument, and their best can be favourably compared with the work of contemporary sculptors. This is especially true of the fine, indeed noble, relief of three daughters mourning at a parent’s tomb on the memorial to Thomas Bennion, 1840, at Overton, Flint. Other examples of their monumental work include those to Admiral Windham, 1833, at Felbrigg, Norfolk; Mary Mackinnon, 1833, in St. Mary Abbots, Kensington; James Seton, 1834, at Byculla, India; Phyllis Shirley, 1836, at Eton College, Warwick; John Holford, 1836, in St. John’s Wood Chapel; Arthur Annesley, 1841, at Betchington, Oxon; Francis Stewart-Mackenzie, 1844, in St. George’s, Grenada, West Indies; Ann Burmester, 1848, in Holy Trinity, Tunbridge Wells; and Colonel Joseph Bradshaw, 1850, at Duffield, Derby.

In 1829 the firm received £122 for marble chimney-pieces for Lambeth Palace (Cambridge University Library MS. 3928). At the time of the Great Exhibition of 1851 the works were owned by a Mr. Thomas Hartley, who showed “a design for a Gothic monument.”

PATERSO, ROBERT,
of Galloway
b. 1712, d. 1801

Paterson, whose history and wayward mode of life suggested to Sir Walter Scott the novel of Old Mortality, was the son of a free stone-mason and stone-cutter and followed in his father’s footsteps.

In his time he carved hundreds of headstones for churchyards in Galloway and Wigtownshire, and many years after his death Messrs. Black, Scott’s publishers, erected a tombstone to his memory in Caerlaverock churchyard in 1855.

Paterson had a son, Walter (1749-1812), who was also a stone-engraver.

(Ramage’s Drumlanrig and the Douglasses.)

PATIENCE, THOMAS,
of London
fl. 1798-1801

Son of Joseph Patience, architect, he exhibited at the Royal Academy in 1798 a bust and a bas-relief for a monument to the memory of his father, which was afterwards erected in the church of All Hallows, London Wall. In 1800 he showed two figures “designed for holding lights,” and in the following year was declared a bankrupt (Universal Magazine, 1801, page 381).
PATTEN, C. T., of Bristol

According to the Gentleman's Magazine of 1796 (page 841), it was Patten who was responsible for "the very handsome marble monument" erected in Hardwick Church, Buckinghamshire, to the memory of the Rev. George Bridle, who had died in 1792.

PATTEN, FRANCIS, of Rochester
fl. 1791-1821

His father, Francis Smith Patten, was made a Freeman of Rochester by purchase in 1761, and became free of the Masons' Company in 1773. Patten himself, who became a Freeman of his native city by patrimony in 1791, was four times Mayor between 1812 and 1821 (Archives, City of Rochester).

With his partner, T. Brisley (q.v.), he built the cloisters at Cobham Hall, in Kent (Archives, Earl of Darnley), and he also signs a tablet to Thomas Brenchley, 1818, at Bredgar, in the same county.

PATTISON, JAMES and SAMUEL, of Manchester
Firm fl. 1790-1840

James Pattison was first in partnership with a Daniel Mathison, but the firm was declared bankrupt in 1792 (Universal Magazine, 1792, page 397), and after his discharge he took as partner his son Samuel.

Besides their monumental work, they also advertised themselves in 1840 as "manufacturers of marble mantelpieces." They sign Hellenic tablets to the Rev. Thomas Whitaker, 1818, at Bowden, Cheshire; to Thomas Wilkinson, 1832, at Middleton, Lancs; and to William Greenwood, 1834, at Burnley, in the same county.

PATY, JAMES, the Elder, of Bristol
fl. 1721-1746

He was not born in Bristol, for he paid £15 4s. 6d. on 15 April, 1721, to be admitted a Freeman of that city. In the following year, however, he was well established, taking Samuel Phillips, son of Maurice Phillips of Bursley, clothier, as an apprentice. In 1728 he carved the two "Jacks" on the tower of Christ Church, Bristol.

Paty's monument to Sir William Pendarves, 1726, at Camborne, Cornwall, is a large, important work, with a fine medallion head and shoulders of Sir William in armour and wig. He also signs a monument in St. Mary Redcliffe, Bristol, to the Rev. Richard Sandford, 1721. Paty was the principal mason and carver for Bristol Library, in King Street, 1739-1741. His will was proved 25 February, 1747.

(Bristol City Archives.)

PATY, JAMES, the Younger, of Bristol
b. c. 1746

He was presumably a son of James Paty (q.v.), and was apprenticed to Thomas Kilby on 23 February, 1760, becoming a Freeman of his native city on 9 March, 1768.

Paty signs a monument with a medallion-portrait of James Foy, 1771, in the church of St. Philip and St. Jacob, Bristol, while other works by him in the city commemorate John Rich, 1761, in St. Thomas's; Francis Colston, 1763, in All Saints; and Thomas Holmes, 1772, in Christ Church. He also signs the monuments of Francis Davis, 1766, at Chestrow, Monmouth, and of Henry Allen, 1767, in Monmouth Parish Church.

He was probably the brother of John Paty, of Bristol, who was born on 10 December, 1754, attended the Royal Academy Schools as a student of sculpture in 1772, and became a Freeman of Bristol on 7 December, 1778. There is also another "John Paty, architect," who became a Freeman on 22 April, 1789, on his marriage with Elizabeth, daughter of William Perry, of Bristol, "mariner."

PATY, THOMAS, of Bristol
b. 1718, d. 1789

He was employed by Wood as an "ornament-carver" during the building of the Royal Exchange at Bristol in 1744 (Wood's Exchange of Bristol), while between 1740 and 1747 he executed all the stone and wood-carving, both inside and out, for the Redland Chapel in the same city. In 1755, when the font was presented to the Chapel by John Cossins, its patron and builder, it was stated that this had been "designed and made by Mr. Thomas Paty, who is generally esteemed one of the best carvers in England, either in wood or stone, by whom all the rest of ye ornaments in the Chapel were designed and carved" (Archives, Redland Chapel, possession Messrs. Osborne, Ward and Co., Bristol). The most elaborate of these carvings are "the ornaments of the chancel and pulpit in limetree," for which he received £106 8s. in 1743. The work is admirable and quite equal to anything turned out by contemporary London craftsmen.

Paty was also the "freestone mason and carver" employed during the building of St. George's
Church, Kingswood, near Bristol, between 1752 and 1756 (Bristol City Archives), while in 1768 Mr. Henry Hoare engaged him to dismantle the famous Bristol Cross and to move it to Stourhead (Hoare Archives). In the Tredgar Archives is his letter to Mr. Charles Morgan, dated 1787, about a tablet to be erected to Mrs. Parry. He encloses a sketch of the work (an oval tablet with an urn in high relief) and informs Mr. Morgan that the price "will be £12, inclusive of the inscription and packing-case, letters will be 1½d. each, but if the urn and part under it should be thought too plain it may be ornamented so as to make the monument look much better, which may be done from thirty shillings to five guineas."

Paty was best known as an architect, indeed the *European Magazine* of 1789 (page 424) refers to him only as such in its obituary notice. As a statuary he executed his most important work in memory of William Hilliard, who died in 1735. The monument, which is nearly 20 ft. high, stands in the Lord Mayor's Chapel, Bristol, and consists of a fine portrait-bust standing on a sarcophagus, while below is a tomb or cave with an arched entrance.

Other monuments signed by Paty include those to George Locke, 1735, at Frome, Somerset; John Price, 1736, and Walter Jeoffrey, 1748, both in Brecon Cathedral; George Hussey, 1741, at Seend, Wilt.; John Nelmes, 1742, at Woolton-under-Edge, Glos; the Hon. Rothesia Barrington, 1745, at Shrivenham, Berks; Edward Gore, 1748, at Barrow Gurney, Somerset; Mary Garlick, 1749, at Douling, Somerset; Edward Southwell, 1755, at Henbury, Glos; William Rees, 1763, at Laugharne, Carmarthen; Judith Alleyne, 1763, in Bristol Cathedral; Thomas Bedingfield, 1764, in St. Mary's, Bury St. Edmunds, Suffolk; Mrs. Twyford, 1765, at Kelmerdon, Somerset; William Paston, 1769, at Horton, Glos; the Rev. John Rodgers, 1773, at Brixton Deverill, Wilt.; Mrs. Hallings, 1775, at Ledbury, Hereford; the Morgan family, 1779, at Chepstow, Monmouth; M. Davis, 1783, at Abbots Leigh, Somerset; and John Morgan, 1784, in Carmarthen Parish Church. Paty died 4 May, 1789. His obituary in the *Bristol Journal* of 9 May refers to him as an architect "whose extensive virtues, professional abilities and strict integrity, will in this city ever be rever'd."

**PAYE, RICHARD MORTON**

*fl. 1773–1802*

He exhibited wax models and a cast at the Royal Academy, 1773–1779. He continued to send works to the Academy until 1802, but in these later years only showed paintings.

**PAYNE, —, of St. Ives, Hunts**

He signs a tablet with an urn and cherub-heads to Robert Underwood, 1792, at Boxworth, Hunts.

**PAYTON, JOHN MORRIS, of Bristol**

*fl. 1832–1842*

He signs monuments to Sarah Major, 1836, at Hungerford, Berks; to James Williams, 1838, at Mathern, Monmouth; and to John Purnell, 1839, at Camerton, Somerset.
PEACOCK, WILLIAM, of London
In 1810 he was paid £150 for "mason's and statuary work" at the New Mint (P.R.O., A.O.1/2500).

PEARCE, EDWARD, of London
He signs the arresting monument of the Duchess of Gloucester, 1848, in Kensal Green Cemetery. This consists of a sarcophagus with finely carved detail, set on a plain podium built of large blocks of stone.

PEARCE, or PIERCE, EDWARD d. 1695
His father was Edward Pearce, a painter-stainer employed on the decorative paintings at Somerset House, St. Paul's Church in Covent Garden, and Belvoir. The elder Pearce died at Bottesford in 1658, while working for Lord Rutland, and was buried in the village churchyard.

Edward Pearce the younger was possibly apprenticed to Edward Bird, an artist whom Wren employed to execute painted decoration in the City churches. As a wood-carver Pearce worked for Sir Charles Wolseley at Wolseley Hall. He was apparently most successful, for, according to Plot (Natural History of Staffordshire, 1686, page 383), "of all the joiner's work I have met with in this County there is none comparable to that of the new dining-room of Sir Charles Wolseley at Wolseley, the carved work thereof is also very good, both done by one Pearce." He was also responsible for all the wood-carving in the Church of St. Lawrence Jewry (unhappily destroyed by enemy action in 1940), while he received £4 for "carving a wooden dragon for ye model for ye vane of copper of St. Mary-le-Bow" (Bodleian, Rawlinson, B.387).

As a stone and marble-carver, Pearce made the font for St. Matthew, Friday Street, in 1685 (Guildhall MS. 3543), besides executing all the carved woodwork (London and Middlesex Archaeological Society, Vol. 3, page 378). Two years later he was paid for stone-carving (probably the shield-of-arms in the pediment) at the Bishop's Palace, Lichfield (Ecclesiastical Commissioners' MS. No. 123,828). He had carried out more work of the same kind in 1683, when he carved the coat of arms and pediment for Lord Craven's seat of Combe Abbey (Bodleian MS. Gough, Warwick 1).

Pearce was also employed at the Guildhall, receiving, between 1670 and 1673, £300 for "work in front of the Guildhall." On 16 May in the latter year he received a further £250 for "work about the Guildhall and the public cistern in Pancras Lane" and, on 20 November, £112 in consideration of the same work (Guildhall MS. 184 SR/1/2). About 1690 he made four chimney-pieces for Castle Bromwich Hall, Warwick (Archives, Earl of Bradford).

Under Wren he built, or was employed at, the churches of St. Swithin, Cannon Street; St. Benet Fink; and St. Andrew, Holborn, where he received a total sum of £4,050 (Guildhall MS. 4256). He also worked at St. Paul's and, with his partner, Shorthose (q.v.), built St. Clement Danes between 1680 and 1681 (Wren Society, Vol. X, page 108).

For the City Companies he worked at the Cooper's Hall, 1671–1672 (Guildhall MS. 5606/4), and at the Grocers' Hall, 1680–1684, receiving there a total of £305. The final payment of £13 was made in 1698 to "John Pearce, executor of Edward Pearce (Archives, Grocers' Company).

Between 1689 and 1695 Pearce was employed at Hampton Court and Whitehall, executing seats for the latter and also "carving work done about ye fountain in ye Privy Garden," which included shells, festoons and scrolls.

Other decorative and architectural work carried out by him included the gates at Horseheath, Cambridgeshire, for Lady Aldington, in 1670 (R. T. Gunther's Sir Roger Pratt, page 130); "roses, festoons and other work about ye gates" at Clare College, Cambridge (Willis and Clark's Architectural History of Cambridge, Vol. I, page 104); the bronze dragons on the Monument, and the famous vases for Hampton Court. For these his bill runs as follows: "To Edward Pearce, more for a great vauze of white marble, all the figures enrich with leaves, and festoons of shells, and pedestal of Portland stone, £250. More for a white great marble urne with divers figures and other ornaments, £475 10s." (P.R.O., A.O.2482). The first "vauze," which has a relief of Amphitrite and the Nereids, now stands without its pedestal on the terrace at Windsor Castle. Apparently both were left unfinished at Pearce's death, for in 1700 a payment was made to John Nost (q.v.) "for fluting ye foot of ye vases that came from Mr. Pearce and polishing the plinth and moulding atop" (P.R.O., Works 5/51).

In 1685 Pearce made a statue of Queen Elizabeth for the Royal Exchange, the expense being borne by the Fishmongers' Company. He was also employed by the Skinners' for a similar purpose, for an entry in their Court Book, dated 1 October, 1685, reads: "At this Court Mr. Peirse appeared and informed the Court that the statue of Edward III was by him set up for the Company in the Exchange and finished—whereupon it is ordered
that £60 be paid unto him by the Renter Warden” (Company’s Archives). For the Goldsmiths’ Company he made a statue of Henry V for which he received the same sum (Company’s Archives). He had in the previous years made the statue of Sir Thomas Gresham for the same building and he also carved a wooden statue of Sir William Walworth for the Hall of the Fishmongers’ Company. About 1690 he made the dial originally erected at Seven Dials, but which is now at Weybridge.

Busts by Pearce include those of Milton (c. 1656) at Christ’s College, Cambridge; an undated terracotta one of Cromwell in the National Portrait Gallery, and another in bronze (1672) at the London Museum; Christopher Wren (c. 1673), at the Ashmolean Museum, Oxford; Baldwin Hamey (1680), at the Royal College of Physicians; and Thomas Evans (1680), in the possession of the Painter-Stainers’ Company. He is also said to be responsible for the magnificent monument erected about 1690 to the memory of Lord and Lady Maynard, at Little Easton, Essex (Gentleman’s Magazine, 1818, page 596).

Besides all his other work Pearce also found time to be a collector, his partner in this activity being a Mr. Manby. A notice in the London Gazette (No. 3156, 30 January–3 February, 1695/6) runs: “On Tuesday the 4th instant will be sold by auction at 4 in the afternoon Mr. Pearce, carver, and Mr. Manby, painter, their curious collection of books, drawings, prints, models and plaster figures.”

Pearce married a widow named Anne Smith in 1651 and died in 1695. His death must have taken place early in the year, for probate of his will was granted on 27 April, according to the calendar of the Probate Court which still survives. The will itself, however, which was entered in the Register of Wills, Probate Court, Archdeaconry of Middlesex, “Vol. VII, Folio 2, Rector,” no longer survives, for the volume was lost prior to 1858. Vertue is incorrect when he states that Pearce lived in Surrey Street and was buried in St. Mary-le-Strand, for he was buried in the neighbouring church of St. Clement Danes, and, according to the rate-books, lived in Arundel Street.

He must have had a very high reputation among his contemporaries, judging from a letter dated 1711 in the archives of the Marquess of Bath at Longleat. In it the writer, John Talman, describes to his father, William Talman, a party he had given in Rome, including the decoration of the room in which the entertainment was held. He mentions that around the walls were painted heads of famous Italian and English artists—Palladio, Raphael and Bonaroti, on the one side, and Inigo Jones, Fuller and Pearce on the other. In the Soane Museum, British Museum and Ashmolean are a number of drawings for monuments formerly attributed to William Talman, but now identified by Mr. Howard Colvin as the work of Pearce. Two of these drawings were thought, by the late Mrs. Esdaile, to be the designs for the monuments to Lord and Lady Irvine at Whitkirk, Yorks, and to Mr. and Mrs. Withers at Arkesden, Essex.

(Mrs. Poole’s Edward Pearce; Walpole Society, Vol. XI; Diary of Robert Hooke; Account-book, Royal College of Physicians; Authorities cited in text.)

PEARCE, J., of Frampton
Fl. 1795–1812

He signs a large tablet with delicate details to John Cox, 1795, at Stone, Gloucestershire, and a charming one with a relief of a violin and an open music-book to Thomas Sinderby, 1812, at Westbury, in the same county.

PEARCE, THOMAS

According to the London Magazine of 1752 (page 575), Pearce executed in that year the Portland stone sculpture in the pediment of the Naval Hospital at Haslar. The relief, 48 ft. long and 11 ft. high, had in the centre a large Royal coat of arms with figures of “Navigation” and “Trade” to left and right, while there were also various subsidiary figures and emblems, including “a sea-bird bringing an eel in its mouth to a sailor in distress.” One could think of a great many things a ship-wrecked mariner would have infinitely preferred.

PEARCE, W. H., of Truro
Fl. 1826–1851

In 1848 he made, to the order of the Prince Consort, two columns of serpentine and a pedestal of steatite, with a porphyry and jasper base, for Osborne House (Builder, 1848, page 416). Pearce’s monuments and tablets are mostly neo-Hellenic, and signed examples of his work in Cornwall commemorative Frances Bettesworth, 1821, at St. Michael Carhayes; Susannah Bayntun, 1826, at Mylor; Jonathan Passingham, 1833, and Colonel Pasmore, 1837, both at Helston; Benjamin Sampson, 1840, at Gwennap; the Earl of Falmouth, 1841, at St. Michael Penkevil. Another, to Thomas Teague, 1837, which is at Redruth, in the same county, has a medallion-portrait.
PEART, CHARLES

b. 1759, d. 1798

He was born at English Newton, Monmouth, on 22 December, 1759, and entered the Royal Academy Schools as a student in 1781. In the following year he was awarded the Gold Medal for a group entitled “Hercules and Omphale.”

On leaving the Schools, Peart worked as assistant to Lochee (q.v.) and also modelled portraits for Wedgwood, including those of Sir William Chambers, two sons of George III, Hastings, Elliot and Lord Hillsborough in 1787. In the following year he wrote to Wedgwood from Stowe that he was “obliged to work 14 hours in a day which puts it out of my power to attend to anything else” (Wedgwood Archives).

In 1792 he carved the fine statue of Henry V for Monmouth, and three years later made a chimney-piece costing £51 16s. for the Marquess of Buckingham’s house in Pall Mall (Soane MSS.). He exhibited at the Royal Academy, 1778-1798, showing wax-portraits, models, and busts of Sir Samuel Marshall and of “a nobleman, deceased,” He died in 1798, and his widow, Elizabeth, was granted a small pension by the Academy in the following year.

Peart’s signed monuments include those to Lt-Colonel Joseph Moorhouse, 1791, in St. Mary’s, Madras, and John Finch, 1791, at Dudley, Worcestershire.

(Heath’s Monmouth.)

PEATTS, —, of Nottingham

He signs a large wall-tablet to the Rev. William Wild, 1827, at Costock, in that county.

PECK, HENRY WILLIAM

fl. 1816-1821

In 1816, while living at Shoreditch, Peck won a Silver Medal from the Society of Arts for a plaster-cast of “Adam and Eve,” a work he showed at the Royal Academy a year later. He continued exhibiting at the Academy up till 1820 and also sent work to the British Institution from 1819 until 1821. In the former year his address is given as Hoxton.

PECK, J., of Loughborough

fl. 1770-1805

He signs a number of architectural tablets, the best being those to Benjamin Brookes, 1770, and the Rev. Francis Wilcox, 1798, both at Loughborough, Leics; Elizabeth Cropper, 1800, at Bunny, Notts; and the Rev. T. Hastings, 1804, at West Leake, Notts.

PECK, JOHN, of Bishop’s Stortford

d. 1834

He signs a wall-tablet to the Rev. Robert Tooke (d. 1776), at Lambourne, Essex. The date of his death is given by the Essex and Herts Mercury as 18 April, 1834.

PEDLEY, JOSEPH, of Warwick

b. 1677

As a young man he lived in Rostecr, in Staffordshire, but settled in Birmingham in 1703, and about four years later was employed on the rebuilding of King Edward’s Grammar School. The Dugdale Society (Vol. XII, page 93) quotes his deposition (made in 1713 when he was thirty-six) as to the mason’s work he carried out there. He was apparently paid by instalments, and received in all a sum of £268.

In 1710 Pedley agreed to execute the stonework for St. Philip’s Church, Birmingham, for “2½d. a foot and the mouldings at 7d. a foot, but if the Commissioners did find that 7d. per foot for the said mouldings be not enough, they to give something more.” The Commissioners did decide that 7d. was insufficient, and three years later agreed to pay an extra “six-and-thirty pounds in consideration of the hard bargain made.”

According to William Shenstone, Pedley “was a great sufferer by undertaking Birmingham New Church, which was, I think, a design of ye late Groom Porter” (i.e., Thomas Archer); “certain it is he has been a great sufferer by the Groom Porter himself, concerning which he relates a story not much to ye Groom Porter’s honour” (Majorie Williams’ Letters of William Shenstone).

In 1749 Pedley made stone urns for Lady Luxborough’s garden at Barrells, Warwick, and in the same year was employed by Shenstone to build two “Gothick” turrets for his house, the Leasowes.

PEISLEY, BARTHOLOMIEWS, the Younger, of Oxford

d. 1715

His father, Bartholomew Peisley the Elder, must have been born in 1620, for when he gave evidence in 1681 in a lawsuit between Thomas Wood (q.v.) and Richard Frogley, carpenter, he stated that “he was aged sixty-one and that he had erected a stone house in St. Giles’s parish wherein Squire Bateman lately lived” (Vice-Chancellor’s Archives, 1681, Mich.).

The younger Peisley was master-mason of Trinity College, Oxford, in 1691 (Wood’s Life
and Times, Vol. III, page 364). In 1708 he was working at Blenheim, where he carved capitals of columns. In his will, a copy of which is in the volume of Henry Joyes’ papers in the British Museum (Ad. MS. 24327), Peisley left £400 to his daughter Elizabeth, and his property in Oxford to his son Bartholomew (q.v.). To his son-in-law, Henry Joyes the surveyor, he left £300, “to be paid within twelve months next, after the debt of £1,200 due to me for works done at Blenheim House at Woodstock shall be paid to my Executor, or as soon as £300 of that debt shall be paid him.” Apparently most of the craftsmen employed at Blenheim found it difficult to get their money, for Joyes himself, writing to a Mr. Small in 1748, complained of his “hard fate of not being paid the amounts remaining due to me,” adding “but the temper of the Duchess of Marlborough was such and I really know not for what or why, she would do everything that she could to prevent my being paid” (British Museum, op. cit.).

PEISLEY, BARTHOLOMEW, the Third
b. c. 1683, d. 1727

A mason like his father, he built the Great Bridge at Blenheim in partnership with William Townsend (q.v.), and in 1723 was paid £350 for the marble door-cases of the gallery of that house. Peisley died in 1727 and was buried in St. Giles’, Oxford.

PEPPER, W.

A Lincolnshire statuary, he signs a wall-tablet to Richard Quinsey, 1767, at Rippingale, in that county.

PEPPER, W., the Elder, of Brighton
fl. 1830–1854

In 1846 Pepper made the model for the delightful fountain with its three intertwined dolphins which stands on the Steine at Brighton (Gentleman’s Magazine, 1846, Part II, page 193). He exhibited busts at the Royal Academy, 1846–1854, and there is also one by him of F. W. Robertson, dated 1853, in the Bodleian at Oxford. His bust of William Seymour (1850) is in Brighton Town Hall.

His signed tablets include those to the Lidbetter children, 1831, and Mary Marla, 1838, both at Bramber, Sussex, while in Brighton Parish Church is his large monument with a relief-bust of J. Allen, 1851, and a charming miniature Gothic work to Mrs. Crozier, with a small figure of a woman mourning by an urn.

PEPPER, W., the Younger, of Brighton
b. 1831

Son of W. Pepper the Elder (q.v.), he joined the Royal Academy Schools in 1852, and exhibited busts at the Academy, 1851–1868. His bust of Lewis Slight, 1865, is in Brighton Town Hall.

His best monument, to Luke Flood (d. 1857), in St. Luke’s, Chelsea, has a relief of a deadbed scene, while he signs others to the Rev. Richard Wake, at Courteenhall, Northamptonshire, and to William King, 1864, in St. George’s, Brighton.

The “J. Pepper” who signs an undated bust of Sir Walter Scott in the Brighton Art Gallery was, I imagine, a member of the same family.

PERCIVALL, —, and RICKETTS, —, of Birmingham
fl. 1790–1800

They sign a large wall-tablet of simple, but good, design to Mary Scott, 1793, at Walsall, Staffordshire, and a smaller one to William Wakefield, 1798, at Curdworth, Warwick.

PERCY, FRANCIS
fl. 1676–1687

Between 1676 and 1679 he was working at Trinity College, Cambridge, where he cut capitals, festoons, shields and “thirteen great heads” (Wren Society, Vol. V, page 39). He was in Cambridge again in 1687, when he carved the College coat of arms above the hall door of Clare Hall (Willis and Clarke’s Architectural History of Cambridge, Vol. I, page 107).

PERCY, JOHN FRANCIS
b. 1801

He was born in Dublin, the son of Edward H. G. Percy, who was described as an “artist,” and entered the Dublin Society’s Schools in 1816. He later exhibited in Ireland and also showed works at the Royal Academy from 1827 until 1839. His wax-relief of “Bacchus and Ariadne,” dated 1827, was exhibited at Burlington House in the following year and is now in the Bethnal Green Museum.

Percy also worked as a designer and modeller of silver, and was employed in this capacity about 1835 by Messrs. Elkington, of London.

PERCY, SAMUEL
d. 1820

He was a native of Dublin and was trained at the Dublin Society’s Schools, first exhibiting in
Ireland in 1772. About 1785 he came to London, where he lived, save for a few brief visits to Ireland, for the rest of his life. In 1806 he sent in a model for the City competition for the Guildhall monument to Nelson, offering to carry out the work for £4,000, but his design was not accepted (City Corporation Records, MSS. 95.2).

Percy’s obituary in the *Annals of the Fine Arts* (1821, page 177) says that he died “of an apoplectic fit while finishing a portrait of Prince Leopold,” and adds that “he was well known for his exquisite models in miniature size.” He was, indeed, one of the best, if not the best, of the English wax-modellers, and exhibited many works at the Royal Academy between 1786 and 1804.

Percy’s portraits of the Royal Family include those of George III and Queen Charlotte (1795), at Windsor Castle; Princess Charlotte (1814), at the National Portrait Gallery; and the Princess of Wales (1817) and Princess Charlotte (1817), in the Brighton Art Gallery. Other examples of his work are the wax scenes of “The Death of Voltaire” and “The Three Musicians,” and the portraits of Lady Barrington and Sir Arthur Paget, all in the Victoria and Albert Museum; while the portrait of Sir Charles Morgan (1785) is at Tredegar Park, Monmouth.

An exhibition of his work was held at the Egyptian Hall where the works shown included a group of figures representing the progress of Inebriety, Frederick the Great in his last illness, a Blind Beggar and a dead Christ.

At the Alton Towers sale in 1857 over a hundred of his works were auctioned, including a full-length of Queen Caroline, and a set of “six groups of rustic figures” which, according to the catalogue, were “modelled and coloured with wonderful truth to nature.” The *Connoisseur* of August, 1934, illustrated his wax portraits of Lady Menteith and Lord Rockingham.

On 31 January, 1800, Mr. Christie held a sale of his wax portraits and groups. Among the former were those of General Haveland, Admiral Roddam, Henderson, the actor, Lord Kenyon, Judge Butler, Tom Paine, Lord Thurlow, Duke of Richmond, Emperor and Empress of Russia (taken in 1798), Louis XVI, Judge Wilson, Judge Eyre, Lord Rommey, Count Strueneez, the Duke of Leeds, etc. The forty-eight lots realised £172. (Archives, Messrs. Christie.)

A portrait of Percy was Lot 495 at the sale of the contents of Alton Towers, 10 July, 1857.

**PERRY, JOHN, of Hackney**

*fl. 1797–1803*

In 1797 he built the New Lodge, Hyde Park, which had been designed by Soane (Soane MSS.), Perry, who was succeeded in the business by his son, Joseph William, signs a large tablet to Zipporah Sierra, 1803, in St. Albans Cathedral.

**PEYMAN, HENRY PRINCE, of Abingdon**

*fl. 1825–1851*

At the Great Exhibition of 1851 he showed “a font executed in marble,” which may be the font now in St. Helen’s Church, Abingdon.

His signed monuments include those to Thomas Herbert, 1825, at Faringdon, Berks; and to Richard Galloway, 1825, and the Rev. John Cleobury, 1841, both in St. Helen’s, Abingdon.

**PHILIP, JOHN BIRNIE**

*b. 1824, d. 1875*

Philip, who at the age of seventeen had entered the Government School of Design at Somerset House, was first employed on ornamental sculpture for the Houses of Parliament. However, he was soon able to start working on his own, and he rapidly became one of the most popular and prolific of mid-Victorian sculptors.

In 1852 he carved the arch of Caen stone erected in Welshpool Church over E. Richardson’s (q.v.) recumbent figure of Lord Powis (*Gentleman’s Magazine*, 1832, Part I, page 492). He was also employed at a number of churches, carving the reredos for Tamworth Parish Church in 1853, for Ely Cathedral in 1854, for St. George’s Chapel, Windsor, in 1863 (the model for this is in Chelsea Public Library), and for Lichfield Cathedral in 1864. The relief of “Michael and Satan” in the tympanum of St. Michael’s, Cornhill, was executed by him in 1857 and the four colossal statues of the Evangelists on the tower in 1858.

Philip’s best-known work, however, is the frieze on the podium of the Albert Memorial, which represents the great architects and sculptors of the world. The eighty-seven figures contained in these two reliefs are admirably carved and grouped and, as the *Art Journal* of 1874 remarked, “he has so arranged the figures as to present a series of distinct groups, yet all forming one harmonious whole. There is not a single figure which will not repay close examination, while each leads the eye to a given point of special interest. All give evidence of close study, beauty of composition, and great artistic ability.” Also for the memorial he modelled the bronze statues of “Geometry,” “Geology,” “Physiology” and “Philosophy,” the canopy over Foley’s (q.v.) figure of the Prince Consort, and the eight angels at the base of the cross which crowns the summit.

Other works executed by Philip include the
cornice in the morning-room at Caen Wood Towers; decorative sculpture at Crewe Hall, including the reredos in the private chapel; the capitals of the columns on Blackfriars Bridge; and the sculpture on the New Post Office at St. Martin's-le-Grand, the rebuilt Parish Church at Doncaster, and the restored Chapter House of Salisbury Cathedral. He also carved in 1838 the figures on the very ugly Peterhead granite Westminster column in Broad Sanctuary, designed by Sir Gilbert Scott. The St. George on the top, however, is the work, not of Philip, but of Clayton—who with his partner, Bell, is perhaps better known as a designer of stained-glass windows (Art Journal, 1861, page 159).

In addition to the statues for St. Michael's, Cornhill, Philip was also responsible for those of Richard Oastler (1866), at Bradford; Lord Elgin (1869) and Colonel Baird (1870), both at Calcutta; the Rev. Robert Hall (1870), at Leicester; and Colonel Akroyd (1875), at Halifax. In 1867 he made a number of statues representing various races of the Indian Empire for the India Office and, two years later, eight figures of Kings and Queens of England for the Royal Gallery at the Palace of Westminster. In 1870 and 1875 respectively he made others for the façade of Burlington House and for the front of the Foreign Office.

Just before his death Philip completed in plaster a statue of Sir Joshua Reynolds, which was formerly in Chelsea Town Hall, but was destroyed in 1940 by enemy action. The figure of "Peace" on the fountain in Smithfield Market was carved by him in 1873.

Philip was a popular monumental artist and executed a number of recumbent effigies. These include those of Earl Somers, 1854, at Eastnor, Hereford; Queen Katherine Parr, 1859, in the chapel of Sudley Castle, the Rev. W. H. Mill, 1860, in Ely Cathedral; and Lord and Lady Herbert of Lea, 1864, in Wilton Church. Other monuments by him include those to the first Duke of Wellington, 1854, in St. Nicholas', Brighton; the Elston family, 1857, in the churchyard of Christ Church, Doncaster; Sir Charles Hotham, 1858, in Melbourne, Australia; the Duchess of Gloucester, 1859, in Westminster Abbey; Countess Canning, 1864, at Calcutta; and Lord Elgin, 1868, in Calcutta Cathedral.

He exhibited at the Royal Academy from 1850 until 1875, and died of bronchitis at Merton Villa, King's Road, Chelsea, on 2 March of the latter year. He was buried in Bromfield Cemetery. Philip married Francis Black and one of his daughters became the wife of James A. M. Whistler, the painter.

(Various references, Builder, Art Journal, etc.)

PHILLIPS, JOHN, of Haverfordwest
ft. 1796–1823

He signs a marble wall monument with Corinthian pillars, draped peers' robes, coronet, etc., to Lord Milford, 1823, in Haverfordwest Church, Pembroke. In 1796 he made a black-marble chimney-piece for Ffynone House, Pembroke (Colby Archives).

PHILLIPS, ROBERT

Almost certainly a local statuary. He signs the monument to Sir John Phillips, Bart., 1764, in Haverfordwest Church. This work, with its Corinthian pillars and recessed pilasters of the same order, supporting a broken pediment, has considerable merit.

PHILLIPSON, —
da. 1785

On 12 December, 1785, Mr. Christie held a sale of the stock in trade of "Mr. Phillipson, statuary, deceased, of Great Castle Street, Cavendish Square." Among the lots sold was a bas-relief of the Forge of Vulcan, a bronze bust of a satyr, a bas-relief of the Marriage of Tobias, figures of Shakespeare, Milton and Newton, and busts of Lord Holland, Lord Ligonier and Garrick (Archives, Messrs. Christie).

PHYFFERS, THEODORE
ft. 1840–1872

A native of Louvain and a pupil of Charles Geerts, Phyffers was invited in 1844 by Sir Charles Barry to come to London and execute woodcarvings for the Houses of Parliament.

He then settled in England and later modelled the sculpture for the Byzantine Court of the Crystal Palace, also executing many of the ecclesiastical sculptures for the same building. His work for various churches included the decorative stone-carving at Harleston; the reredos for St. Marie, Sheffield; the lectern of Corsham stone at Birlingham; a series of reliefs, including the reredos in the private chapel, for the Jesuit Church in Farm Street, London; and statues of the Virgin and St. John for the exterior of the Roman Catholic Church of St. Mary, Rugby. For Carlisle Cathedral he restored the hammer-beam roof, for Salisbury the sculpture on the Chapter House, while for Canterbury he made the statues on the south porch in 1865.

Phyffers exhibited at the Royal Academy, 1850–1864, and at the British Institution in 1854, his bust of Alfred Rothschild being shown at the
Academy in 1863. His group entitled “Wounded at Scutari” was executed in 1858 for Florence Nightingale’s friend, Mrs. Bracebridge, while his medallion of Sir Charles Napier, dated 1863, is at Landport. Four years later he made a statue of Sir Henry Ward for Kandy, Ceylon, and statues of Warren Hastings, Lord Teignmouth and four panels representing incidents in Indian history for the India Office. In 1859 he made a monument in the crypt of the Chapel at St. Augustine’s, Canterbury, and in 1863 the Chesapeake Memorial at Portsmouth.

(Various references Builder, and Art Journal, especially 1858, page 48.)

**PHYSICK, CHARLES**

*b. 1810*

He was a brother of Robert Physick (q.v.), and in 1831 attended the Royal Academy Schools, to which he had been recommended by S. Joseph (q.v.).

He exhibited at the Academy “A Study in Marble” in 1832, and two years later showed “A Girl Fondling a Rabbit” at the British Institution. In 1842 he carved the font of St. Paul’s, Knightsbridge.

**PHYSICK, EDWARD**

*fl. 1810–1842*

He exhibited at the Royal Academy, 1810–1842, and at the British Institution, 1824–1838, showing busts of Miss Freeman, H. G. Clough, George IV, Lt.-General Gordon and Lord Kingston.

Physick’s earlier monuments are influenced by the neo-Hellenic school and many have well-designed and delicately chiselled reliefs. Perhaps his best work commemorates Captain Allen, 1841, at Tenby, Pembroke; this shows a seated mourning youth, on his shoulders a banner, whose folds fall behind him.

Other monuments signed by Physick include those to Lt.-General Thomas Trent, 1825, in St. Pancras Parish Church; Margaret Vaughan, 1826, at Little Gaddesden, Herts; James Bushel, 1826; Robert Fullerton, 1830; Lt.-General Gordon, 1832; and Richard Goodwin, 1836, all in Marylebone Parish Church; Mrs. Vaughan, 1828, at Sandal Magna, Yorks; Lady Grant, 1830, at Leigh, Glos; Mrs. Darnell, 1831, at Thrupston, Northants; Mrs. Woodall, 1831, in St. Mary’s, Scarborough; the Rev. Isaac King, 1832, in High Wycombe Parish Church; Nathaniel Peach, 1835, at Ketteringham, Norfolk; Michael Sheepley, 1837, and Susanna Sheepley, 1840, both at Carshalton, Surrey; the Rev. Charles Wood, 1838, at Drayton Beauchamp, Bucks; General Sir Henry King, 1839, at Winkfield, Berks; and Magens Dorrien Magens, 1849, at Brightlingsea, Essex.

**PHYSICK, EDWARD GUSTAVUS**

*fl. 1823–1871*

He was the son of Edward Physick (q.v.) and, in 1823, received a large Silver Medal from the Society of Arts for figures of “Telemachus” and “Narcissus,” winning the same medal in the following year for the model of a group. In 1825 he won the Gold Isis Medal and, in 1826, the large Gold Medal.

In 1844 Physick showed his “Timidity” at Westminster Hall, of which the Literary Gazette remarked that they were “quite willing to give every praise for the creditable modelling of the figure, though reluctant to say as much for the drapery.” In the following year he exhibited “Female and Child” at the Society of British Artists. To the Birmingham Society of Artists in 1839 he sent “Maternal Playfulness” and, in 1850, a “Head in Marble of the Dying Saviour,” a work also seen at the Great Exhibition in the following year.

Physick carved, in 1854, the group above the portico of the Female Orphan School in St. John’s Wood. He exhibited at the Royal Academy, 1822–1871, and at the British Institution, 1834–1866.

His monuments include those to Charles Manners-Sutton, 1845, at Addington, Surrey; James Brook, 1847, at Meltham Mills, Yorks; Thomas Brook, 1850, at Goodrich, Hereford; Christopher Pemberton, 1852, at Newton, Camb.; Thomas Brown, 1852, at Brent Eleigh, Suffolk; Sir John Tullock, 1860, in Kensal Green Cemetery; Captain Colby, 1853, at Manordivvy, Cardigan; and Lt.-Colonel Louis Bazalgette, 1866, in St. Mary’s, Warwick.

**PHYSICK, EDWARD JAMES**

*b. 1829*

Son of Edward Gustavus Physick (q.v.), he attended the Royal Academy Schools in 1847 on the recommendation of E. H. Baily (q.v.), and, in the same year, received a large Silver Medal from the Society of Arts for a figure of “Mercury.” In 1850 he won the Royal Academy Gold Medal for a bas-relief of “The Rape of Proserpine,” showing this work at the Great Exhibition in 1851.

Physick exhibited at the Academy, 1848–1863, and at the British Institution, 1849–1855. At the former he showed, among other things, busts of W. Westall, A.R.A., and R. B. Haydon, the latter for Philadelphia.
His monuments include those to Louisa Eardly, 1852, at Little Berkhamsted, Herts; Archibald Cleveland, 1854, at Westleigh, Devon; the children of Lord Paulet, 1857, at Hinton St. George, Somerset; Admiral Grace, 1859, in Kensal Green Cemetery; Edward Kemp, 1859, at East Hoathly, Sussex; Charles Vernon, 1863, at Wherstead, Suffolk; Mrs. Chichester, 1863, at Arlington, Devon; Mary Bolton, 1868, in the churchyard at Instow, Devon; and Blanch Astley, 1870, at Melton Constable, Norfolk.

PHYSICK, EDWARD WILLIAM
fl. 1830–1844

Son of Edward Physick (q.v.), he exhibited at the Royal Academy, 1830–1844, showing a bust of the Duke of Wellington and various designs for monuments, including, in 1839, the one to Lady Janet Grant erected in Cheltenham Parish Church. Other monuments and tablets signed by him include those to Benjamin Bond, 1834, in St. John's Wood Chapel; Richard Goodwin, 1836, in Marylebone Parish Church; Lieut-Colonel By, 1836, and Mrs. By, 1838, both at Frant, Sussex; Miss Vaughan, 1838, at Sandal Magna, Yorks; and Margaret Bowes, 1842, in Tooting Parish Church.

PHYSICK, ROBERT
b. 1815

Brother of Charles Physick (q.v.), he attended the Royal Academy Schools in 1837 on the recommendation of Thomas Maisey, and there won a Silver Medal three years later. He exhibited at the British Institution, 1836–1840, and at the Academy, 1837–1856, showing busts of Sir Lewis Grant (1833) and Sir John Barrow (1854), among other works. His bust of Peel (1850) is in the possession of the Merchant Taylors Company, and that of Wellington (1852) in the Royal United Services Museum.

Physick's signed monuments include those to the Hon. Esther Ashburnham, 1848, at Frant, Sussex; John Laxon, 1848, at Ormesby St. Margaret, Norfolk; Sir James Kempt, 1850, in Kensal Green Cemetery; and Edward Jones, 1853, at Bayford, Herts.

PICKFORD, JOSEPH
fl. 1714–1762

In 1714 he was apparently working with G. B. Guelphi (q.v.), but later set up for himself at Hyde Park Corner. He is chiefly known as a carver of chimney-pieces, making in 1738 one for the drawing-room of Earl Fitzwalter's house in Pall Mall and, four years later, two for the dining-room of the house in Berkeley Square designed for Lady Isabella Finch by William Kent (R.I.B.A., MS. 728–3). In 1743 Pickford was the mason for building the Rt. Hon. Henry Pelham's house in Arlington Street. Here he also received £126 for the "rich marble column chimney-piece" in the "Great Room" and £48 for carving a frieze with festoons of fruit and flowers (op. cit.). In 1738–1739 the Duke of Newcastle paid him £160 for work at Claremont (British Museum Ad. MSS. 33, 321).

In 1762 he supplied a chimney-piece for the second Earl of Ashburnham at Ashburnham Place, Sussex, sending down his workman, William Stoney, to fix it up in the dressing-room (Ashburnham Archives).

From a letter in the archives of Lord Falmouth, Pickford apparently made other chimney-pieces for Lord Duncannon and Admiral Boscawen, but he is best known for his work at Holkham, in Norfolk, where he was employed for nearly twenty years, not only carving chimney-pieces for most of the principal rooms, but the alabaster columns and capitals for the Great Hall, marble friezes, etc.

He also executed a number of monuments, the best being that of Sir John and Lady Bendish, c. 1740, at Steeple Bumpstead, Essex, which has medallion-portraits. He signs this, as well as the tablet to George Pyke, 1738, at Birdbrook, in the same county, jointly with his partner, W. Atkinson (q.v.). About 1740 he made the two busts to be added to the monument of Richard Hopkins (d. 1707) which stood at that time in St. Michael's Church, Coventry. These were of Hopkins' eldest son, Richard, a Member of Parliament and one of the Lords Commissioners of the Admiralty, and of his daughter-in-law, Anna Maria, widow of another son, Edward.

Two more of Pickford's monuments are those to the Roberts family, 1740, at Cranbrook, Kent, and to William Hanger, 1755, at Farningham, in the same county.

PICKMAN, W.
fl. 1825–1844

He exhibited at the Royal Academy, 1825–1844, where his works included a medallic portrait of J. C. Hobhouse (1825), a bust of Sir Francis Burdett (1833), and a medallion in wax of Mr. McKenzie, of Edinburgh (1841). At the Suffolk Street Galleries he showed wax busts of George IV and the Duke of York in 1828.

PIDDINGTON, JOHN, of Oxford
b. 1682, d. 1716

There were a number of statuaries and masons
of this name who worked at Oxford during the seventeenth and eighteenth centuries. The first of them, Richard, son of Humphrey Piddington, of Stanton St. John, was probably the “Piddington” who was in partnership with William Badger in 1639, and was paid £32 10s. for “paving the passage of the Congregation House and pitching the gutters” (Wood’s Life and Times, Vol. IV, page 55).

Between 1657 and 1661 an Anthony Piddington was employed at Oriel (College accounts). He became a Freeman of the city in 1664 and had a son, Richard, whom he took as his apprentice. Richard, who died in 1724, built with his partner, George Smith, the south building of New College in 1700. He seems to have been of some importance, for in 1718 Richard Curtin, son of a baker of Oxford of that name, was apprenticed to him (P.R.O., I.R. 1/6).

John Piddington, the subject of this biography, was Richard Piddington’s elder son and was apprenticed to his father in 1698. He signs the monument with a portrait-bust to George Blackall, 1709, at Great Haseley, Oxon, and a tablet to ThomasCoghillandfamily,1709,atBletchington, in the same county. Another tablet by him commemorates Edmund Fettiplace, 1710, at Kingston Bagpuize, Berkshire.

Richard Piddington the Younger, second son of Richard Piddington, was apprenticed to his father in 1715 and died in 1732. The last of the family was John Piddington’s son, another John, who, according to the Royal Magazine of 1764, was transported for seven years for stealing the club box of the Oxford Benefit Society.

PIERACHINI, PIETRO
fl. 1835-1839

He exhibited at the Liverpool Academy, 1835-1839, showing busts of Signor de Val (1835), William Roscoe (1836), William Ewart (1836), Thomas Gresham (1836), Queen Victoria (1838) and George Tyrer (1839).

PIERCE, or PEIRCE, EDWARD, of Deptford
fl. 1770-1790

Pierce was a competent minor statuary who made use of “Adam” details in some of his works. Monuments and tablets by him in Kent include those to James Hawley, 1777, at Leybourne; George Collard, 1782, in St. Martin’s, Dover; and William Hardyman, 1784, in Farningham churchyard. He also signs others in Sussex to John Mittell, c. 1780, at East Hoathly; John Staples, 1789, at East Grinstead; and Charles Brown, 1789, at Frant. In 1778 he was paid £210 for a monument designed by George Gibson, which was erected in Widford Churchyard, Essex, to the memory of Viscountess Falkland.

PIERCE, ROBERT, of Exeter
fl. 1803-1819

Three tablets signed by him in Devon are those to Peter Middleton, 1803, at Littleham, in coloured marbles; James Bell, 1805, in Exeter Cathedral, with a relief of a mourning woman; and William Burn, 1814, in Holy Trinity, Exeter, with a trophy of arms.

PINCAT, or PINGOT, DANIEL
d. 1797

In 1767 he is described as “artificial-stone manufacturer in Goulston Square, Whitechapel,” and in that year exhibited at the Free Society “an antique bas-relief in artificial stone.”

As Mrs. Coade (q.v.) did not open her factory at Lambeth until 1769, it seems that she and Pinca t independently revived this lost art. However, by 1771 he was working for her, and in the same year he exhibited at the Society of Artists a copy of the Borghese Vase in artificial stone. A note in the catalogue states that, though it was contrary to the laws of the Society to admit any copies, yet “desirous of giving every encouragement in their power to merit and ingenuity, they have permitted the above to stand in the vestibule leading to their room in consideration of its being a very fine performance.” Pinca t died in 1797 and was buried in Bunhill Fields.

PINDER, DANIEL
fl. 1766-1804

Between 1766 and 1798 he was mason to the Ironmongers’ Company, and received similar appointments with the Royal College of Physicians and the Vintners’ Company in 1768 and 1769. Three years later, however, he and William Pinder (q.v.) were summoned by the Court of Assistants of the Masons’ Company to take up their freedoms or to pay a fine of £10.

In 1782 Daniel Pinder became mason to the Stationers’ Company, and in the following year received £202 for masonry work in connexion with the statue of Lord Chatham in the Guildhall (Corporation of London Records, MS. 55.28). About 1784 he took William Norris (q.v.) into partnership, and from 1788 to 1790 they together rebuilt, under Dance, the south front of the Guildhall, being paid £900 (Journal City Lands, Vol. 81). In 1791 the firm was paid £129 for repairs to the steps of Surgeons’ Hall.
In 1794, under Sir John Soane, they carried out repairs to Peter Thellusson’s house in Philpot Lane. They were also masons to Child’s Bank from 1785 until 1804, while in 1798 their bill for mason’s work carried out during the rebuilding of East India House amounted to £6,770 (India Office Archives).

Pinder and his partner sign the large monument to Richard Sorbell, erected in 1784 at Great Warley, Essex.

(Archives of Companies, etc., mentioned in text; Soane Note-books.)

PINGO, WILLIAM
d. 1784

Son of William Pinder, Merchant Taylor and citizen of London, he was apprenticed in 1719 to Thomas Broomhall. In 1766 he made the chimney-piece for the vestry of St. Matthew’s, Friday Street (Guildhall MS. 3543), and he also signs monuments to John Seale, 1777, at Cornworthy, Devon, and Daniel Sandford, 1779, at Castle Hedingham, Essex. He died in Falcon Square on 11 October, 1784 (Gentleman’s Magazine, 1784, page 798). A sale of his stock-in-trade was held on 26 and 27 April, 1785.

Pinder had two sons, Samuel and William. The former was apprenticed to Thomas Bull (q.v.) in 1754, but was turned over to William Bull on his master’s death two years later. The latter assisted his father, but was declared a bankrupt in 1789.

PINGO, —
fl. 1769–1800

His Christian name is unknown, but it is possible that he may be the John Pingo, son of Lewis Pingo (q.v.), who exhibited wax models, etc., at the Free Society, 1765–1774.

Pingo was employed as a modeller by Wedgwood, for whom he made a portrait of George III, and in 1769 medallions of the Battles of Plassey and Pondicherry (Meteyard’s Wedgwood, Vol. I, page 441). In 1800 his wife, Theodosia, wrote to the firm as follows: “My husband who has long laboured under a severe illness being now reduced to that state as not to be able to attend any longer to business and myself and family destitute, Mr. Silvester who’s knowledge and diligence are well known has obligingly engaged to give every assistance in conducting the business on my account” (Wedgwood Archives). “Mr. Silvester” is presumably the modeller of that name (q.v.) who exhibited at the Royal Academy in 1788. Redgrave states that it was Thomas Pingo who worked for Wedgwood, but as he died in 1776 this is obviously a mistake.

PINGO, LEWIS
b. 1743, d. 1830

Third son of Thomas Pingo, the medallist, he joined the Royal Academy Schools in 1770, having already been awarded premiums for medallions by the Society of Arts in 1759 and 1760. In 1776 he succeeded his father as an assistant engraver at the Mint, and three years later was appointed chief engraver, a post he held until 1815.

Pingo exhibited medals and wax portraits at the Society of Artists and at the Free Society, the wax portraits including likenesses of the King of Poland, Dr. Mead, Admiral Keppel and Lord Sandwich. He died at Camberwell on 26 August, 1830.

(Gentleman’s Magazine, 1830, Part II, page 283.)

PINK, JAMES, of Lincoln
d. 1810

He either came from Bath or was working there before he settled in Lincoln, where he was employed on carving the ornaments of the altar-piece in the Cathedral in 1769. He later added the screen on each side of the altar-piece, and his signature is carved on the stonework of the south-west corner of the reredos.

Pink was also responsible for the small figures on the rood-loft, and repaired a great deal of the stone-carving both inside and outside the Cathedral. He had hoped to be appointed cathedral mason, but “being a Disenter in religion eclipsed all his merits and he was rejected.” He died in 1810 and was buried in the cemetery of the Old Baptist Chapel at Lincoln.

(Lincoln Diocesan Magazine, Vol. LXIII, page 212.)

PINK, W., of London
fl. 1828–1844

He exhibited busts at the Royal Academy, 1828–1844, including those of Mr. J. Pink and Mr. T. Wright in 1828 and 1829 respectively.

PIPER, THOMAS, the Elder
d. 1794

Son of William Piper, of Hampton, Middlesex, butcher, he was apprenticed to Charles Easton in 1767, becoming free in 1774, though he continued to work with Easton.

Piper was the chief mason for building the Fishmongers’ Hall from 1788 until his death, executing also the carved stonework and supplying marble chimney-pieces. The work was completed for the Company by Piper’s widow, Elizabeth,
who took over the business (Archives, Fishmongers' Company). In 1799 and 1800 she carried out orders for marble chimney-pieces for the Mote, Maidstone, then being rebuilt by Lord Romney (Account-book for building the Mote, Maidstone Museum).

PIPER, THOMAS, the Younger, and Son
Firm f/ 1800–1850
Son of Thomas Piper the Elder (q.v.), he took over the family business from his mother about 1800, and was also appointed to his father's post as mason to the Fishmongers' Company (Company Archives).

Thomas's son, another Thomas, was bound apprentice to him in 1813, becoming a partner in the firm soon after he had gained his freedom in 1820. Father and son were the masons for rebuilding the Customs House, 1825–1827 (P.R.O., Works 5/119 and 5/123), and also for the restoration of the steeple of St. Anthonie's, Budge Row, in 1829.

The third Thomas Piper's son, William, was apprenticed to him in 1833. It is this Thomas Piper who, I imagine, is responsible for the firm's later monuments. They include those to Sir Gulling Smith, 1805, at Monken Hadleigh, Herts; the Rev. Charles Wakeman, 1822, at Bocking, Essex; Charles De Maurier, 1823, at Henley, Oxon; the Russell family, 1841, in the churchyard of Sanderstead Parish Church; and the Williams family, 1849, in St. Magnus the Martyr, London Bridge.

PISTELL, WILLIAM, of London
f/ 1814–1844
One of the "New Road staturiers," many of his tablets, like those of his fellow-workers in the same street, are dull and obvious, though his monument to Maria Parratt, 1844, at Effingham, Surrey, has a very fine relief of a mother mourning at her daughter's deathbed, rather in the manner of Chantrey.

In its way the relief on Pinstell's monument to Joseph Priestley, 1817, in Bradford Cathedral, is well carved and entertaining. This shows "navvies" excavating a canal down which a string of barges passes, while his monument to Colonel Ludow, 1821, in the Old Cathedral, Calcutta, consists of a sarcophagus, with a mourning woman on one side and a soldier with arms reversed on the other.

Other monuments and tablets signed by him include those to William Lee, 1814, at Alton, Hants; Major Balfour, 1817, in Marylebone Parish Church; Jonathan Hammond, 1819, at Penshurst, Kent; Theodosia Crawley, 1820, at Luton, Beds; William Hickman, 1821, at Marlow, Bucks; the Rev. Edward Balm, 1822, and William Phillips, 1826, both in St. Pancras Parish Church; George Nassau, 1823, at Easton, Suffolk; John Cranston, 1823, at East Grinstead, Sussex; Richard Cray, 1825, in Ealing Parish Church; Robert Denn, 1828, at Shipham, Norfolk; and James Burnet, 1840, at Chippenham, Wilts.

As a decorative carver he was employed by the Duke of Bridgewater at Ashridge Park, 1814–1817, receiving £180 (Archives, Lord Brownlow).

In 1808 he was paid £65 for chimney-pieces for the Royal Naval Asylum at Greenwich (P.R.O., Adm. 80/110).

PISTRUCCI, BENEDETTO
b. 1784, d. 1855
A Roman by birth, he settled in London in 1815 and started work at the Mint, where he modelled "St. George and the Dragon" for the gold coinage. In 1828 he was appointed chief medallist.

Pistrucci's chief works consist of carved cameos and designs for coins and medals, including those commemorating the Coronations of George IV and Queen Victoria. His wax medallion of Matthew Boulton is in the British Museum, and among his few busts may be mentioned one of Pozzo di Borgo and another of the Duke of Wellington, executed in 1832, which is now at Stratfield Saye. A copy of it, bought in 1836, is in the United Service Club, and a replica at the United Service Museum. Waagen, who saw the original in the sculptor's studio, considered it "by far the more like and the best I have seen and the more remarkable as the production of an artist accustomed to work on a very small scale" (Art Treasures in Great Britain, Vol. II, page 333).

In 1839 Pistrucci was one of those who competed for the commission to execute the memorial to Nelson, his model taking the form of a trident "with three graceful recumbent female figures on the base." The Literary Gazette (1839, page 393) was rightly appalled at the idea of "a monument all prongs and handles" standing like a great fork in the middle of Trafalgar Square, and the judges luckily seem to have been of the same opinion. Two years later Pistrucci, with various other sculptors, was invited to submit a model for the statue of Wellington to be erected in Glasgow.

He died at Flora Lodge, near Windsor, of inflammation of the lungs, on 16 September, 1855. In its obituary the Art Journal (1856, page 27) remarked on the fact that he had been commissioned to execute the medal for Waterloo, but
“George III died, still nothing certain was heard about it; George IV died, and collectors were still impatient; William IV died, and Mr. Hamilton assured us that it was in hand, would be a glorious work and well worth waiting for. Then came the Mint Commission of 1848, and it was not forthcoming. The medallist himself is now gone, but yet we hear nothing of his final and chief work.”

(Wellesley’s *Iconography of the First Duke of Wellington*; Authorities cited in text.)

**PITCHES, WILLIAM**

Probably a local craftsman, he was master-mason for the University Schools at Cambridge in 1732, carving “two heads, corbels” and other decorative details (Vice-Chancellor’s accounts).

**PITTS, JOSEPH**

*fl.* 1830–1870

Son of William Pitts (q.v.), he was awarded the Silver Isis Medal for a bust by the Society of Artists in 1831, and five years later won the Silver Medal for a group of figures in bas-relief.

Pitts showed various busts, including those of Wellington, the Prince Consort, George Stephenson and Miss Symes, at the Royal Academy between 1842 and 1846. The bust of Stephenson, executed in the latter year, is now in the National Portrait Gallery.

**PITTS, WILLIAM**

*b.* 1790, *d.* 1840

He was apprenticed to his father, John Pitts, a silver-chaser, of Leicester, and in 1812 won the Gold Isis Medal of the Society of Arts for modelling two warriors. The first work to bring him fame was his chasing of the greater portion of the Wellington Shield, designed by Stothard, and he afterwards chased the shield of Achilles, from a design by Flaxman (q.v.). About the same time he made a silver model for Lord Arden of Le Soeur’s equestrian statue of Charles I, while he later modelled the shields of Hercules and Aeneas. Indeed, between 1830 and 1840 he designed or modelled almost all the candelabra, épergnes and plate made for presentation, his works ranging from the vast masonic tribute presented to the Duke of Sussex, to the cup given to Charles Kemble on his retirement from the stage.

In 1829 Pitts contracted to carve reliefs for Buckingham Palace for the sum of £450, his guarantor being his father (P.R.O., Works 19/3). Here he worked for two years, carving reliefs of “Eloquence” for the picture-gallery, “Pleasure” for the blue drawing-room, “Harmony” for the music-room, “Peace and War” for the guardroom, and, in 1831, twelve panels with reliefs of children for the white drawing-room. Unfortunately he did not find it easy to obtain payment for this work, and, as he had married at the early age of nineteen and was seldom free from financial troubles, he was forced on 4 September, 1831, to write to the Lords of the Treasury that “my circumstances compel me to inform you that unless I receive further cash on account of my bill for work done at the Palace, which has been officially passed, I and my family will be ruined” (P.R.O., T. 1/3489). He had every reason to complain, for, out of £700 owing to him, he had only received £150.

In 1833 a model (now at Stratfield Saye) of the Duke of York’s column was presented to the Duke of Wellington, the figure at the top being modelled by Pitts. Other works by him include reliefs of “Prosperine” and “The Nuptials of Pithous and Hippodamia,” made in 1829 for Mr. Simons of Regent’s Park; a carving of “St. Martin and the Beggar,” dated 1831, for the pediment of St. Martin-in-the-Fields; and a relief of “The Muses between Greek and British Poets,” executed eight years later for the Library Institution at Leicester. He also made three bas-reliefs for Sir W. A. Cooper, of Isleworth House, and three others entitled “The Triumph of Innocence,” “Flora with the Seasons,” and “The Pledges of Virtue,” for George Harrison of Carlton Gardens.

Pitts exhibited at the Royal Academy, 1823–1840, and at the British Institution, 1824–1834. He also modelled a few busts, among them likenesses of Captain Fitzherbert, of Swinerton, and Sir W. Horne. As a statuary he was responsible for the monuments to David Ricardo, 1823, in the churchyard of Hardenuish, Wilts; Matty Chilton, 1828, in St. Giles-in-the-Fields; John Farhill, 1830, in Chichester Cathedral; Charles Young, 1830, Upper Chapel, Eton; Sir John Honywood, 1832, at Elmstead, Kent; Miss Wainwright, 1835, at Sandgate, Kent; and Charles Irby, 1836, at Morningthorpe, Norfolk.

He must have been an extremely versatile artist, for he also painted pictures and designed china, including a Davenport service ordered by William IV. In drawing and modelling he was ambidextrous and sometimes even used both hands at the same time.

Pitts died on 16 April, 1840. “A rash engagement, relative to a laborious and expensive work” which he had entered into, “preyed on his mind, and caused him to commit suicide by taking laudanum,” according to the *Gentleman’s Magazine* (1840, Part I, page 661), which also stated that
“in subjects of pure classical taste he stood unrivalled and his talents were highly appreciated” by Flaxman, Westmacott and Chantrey. He left a widow and five children totally unprovided for, and a fund was opened, sponsored by Chantrey, G. Jones, R.A., and Storr and Mortimer, the silversmiths, to raise money for their support. In 1842 Mrs. Pitts also received a charitable donation of £30 from the Royal Academy. Of Pitts’s children, Thomas (b. 1815) and James (b. 1821) assisted their father. Joseph is noticed separately.

(Art Union, 1840, page 101; Clifford Smith’s Buckingham Palace; authorities cited in text.)

PLATT, JOHN, of Rotherham

b. 1728, d. 1810

He was born at Thrybergh, near Rotherham, “on Saturday, 9th March, 1727/8, about 10 o’clock at night” (Parish Register), the son of George Platt (1700-1743), who, about two years later, went to Rotherham to help his elder brother, the architect of St. Paul’s, Sheffield.

On 8 September, 1762, John Platt agreed for £45 to “execute the carved work in ye pediment of the grand portico at Wentworth Castle new front, according to the model.” In the same year he undertook to make for £110 the chimney-pieces in “My Lord’s own room, My Lord and Lady’s bedchamber, the library, My Lady’s own room and the parlour on the third floor.” Later he made another for the new dining-room (British Museum, Ad. MS. 22241). In 1776 he was responsible for the marble staircase at Aston Hall, Yorks, executing the one at Clifton Hall, near Rotherham, six years later.

Platt signs monuments to the Hopkins family, c. 1748, at Gainsborough, Linca; and to Mrs. Catherine Buck (1778), Lieut.-Colonel Downes (1785), and Robert Cutforthay (1799), all in Rotherham Parish Church. The Downes monument has an urn of “blue john.”

In his Journal (now in private possession) are notes on other monuments for which he was responsible and the extracts given below are taken from it. “August Ist, 1767: Putting up ye monument in Sheffield Church over Mrs. Bamford.” In 1769 he erected monuments at Sprotboro to Mr. Copley, and at Leeds to Mr. Wolrich on 24 April and 1 December respectively, while on 13 April, 1778, he “altered ye drawing for ye monument in Wortley Chapel for Lady Bute.” In 1783 he “fixed up at Sheffield Mr. Birk’s monument” and also “got an order for a monument to put up in Ecclesfield Church to Miss Freeman.” In December, 1790, he “set up a large monument for Mr. Foljambe of Aldwark over Esq. Hewett” (John Hewett, née Thornhaugh, was Francis Foljambe’s father-in-law), while three years later he “agreed for ye monument set up in Tankersley Church in memory of the late Rev. Mr. Francis Hall, £60.”

In the late eighteenth century Platt took over the marble-works of Henry Watson (q.v.) at Ashford, in Derbyshire. These had been established about 1740 and were the first of their kind in England (Brewer’s Beauties of England, Vol. III, page 484). In 1778 he sent in an estimate for repaving Lincoln Cathedral in black, Derbyshire grey and bird’s-eye marbles. The Committee considered it “an ingenious design” which would have a “striking effect,” but that “the execution of it would be very expensive” (Lincoln Cathedral Archives).

Platt died at Halifax and was buried in Rotherham churchyard. His tombstone could still be seen until 1950, when it was removed during “improvements.” His will was proved by his son and daughter, George and Elizabeth.

Platt left three other sons, and was anxious that all four should follow his profession, though none, in fact, did so. John, the eldest (1763–1832), was sent to study architecture under F. Atkinson, of York, but abandoned it to join the Navy; Charles (1770–1817), articled to R. Westmacott the Elder (q.v.), and George (1779–1850), placed with an architect named Rawdon of York, both later entered the Army; while the third son, William (1775–1811), served his time with P. W. Tomkins, engraver to the King, and later set up in business in Golden Square.

(Information supplied by Mr. John D. Potts, of Ecclesfield; authorities cited in text.)

PLOWS, T., of Hertford

fl. 1763–1795

He signs tablets of careful workmanship to Margaret Lewin, 1763, and Elizabeth Hutton, 1769, at Broxbourne, Herts, and another to Matthew Martin, 1765, at Hunsdon, in the same county.

PLOWS, WILLIAM ABBEY,

of York

b. 1789, d. 1865

Son of Benjamin Plows, marble-mason (1775–1824), he was apprenticed to his father in 1806. At the Great Exhibition of 1851 he showed a “sarcophagus with a Gothic canopy, marble tables and a figure of David carved in stone.”

He, or his father, was responsible for monuments and tablets in Yorkshire, including those to
Morley Wharrey, 1797, John Audis, 1809, and Nicholas Smith, 1815, all at Selby; to Richard Spofforth, 1824, at Howden; to Mary Clayton, 1828, at Kippax; to Sergeant-Major Polety, 1829, and Samuel Woodhead, 1834, both in All Saints', York; to the Rev. James Andrew, 1843, at Whiby; and to Seth Stables, 1848, at Pocklington. The large wall monument to John Strangways, 1840, at Well, in the same county, is signed by "T." Plows.

PLUMÈRE, FRANÇOIS, or PIERRE DENIS
b. 1688, d. 1721

Plumière was an Antwerp sculptor, whose Christian name, according to Vertue, was Francis, although Thieme-Becker, in his "Künstler Lexikon," calls him Pierre Denis. He came to London at the suggestion of Lord Cadogan, bringing his family and workmen with him, but died of consumption in Westminster soon after his arrival.

Plumière, who was the master of P. Scheemakers (q.v.) and L. Delvaux (q.v.), executed the model for the monument of the Duke of Buckingham in Westminster Abbey. He also made casts of "Time" and "Truth" in the style of Michael Angelo, and statues for Lord Cadogan and the Earl of Castlemaine.

In Rysbrack's sale in 1766, Lot 68 was a "Figure of Hercules by Plumiere," while at the Cassiobury Park sale of June, 1922, Lot 1174 was a "Reclining Venus," signed and dated 1717, by "D. Plumier." At Winslow Hall, Aylesbury, is a very fine pair of urns, also dated 1717, signed "D. Plumiere," so if Thieme-Becker is correct in calling the sculptor Pierre Denis he must have signed his works with his second initial. There does not, however, seem to be any evidence for Vertue's calling him Francis.

(Walpole Society, Vertue Notebook, Vols. I and III.)

PLUMLEY, THOMAS
b. 1824

He attended the Royal Academy Schools in 1842 on the recommendation of Sir Richard Westmacott (q.v.), and two years later exhibited at Westminster Hall statues of Chaucer and Sir Thomas More, which the Literary Gazette considered "but feeble things."

Plumley exhibited at the Royal Academy in 1863, and in the following year carved eighteen heads for the interior and exterior of the Parish Church of Wootton St. Lawrence, Hampshire (Churchwardens' Accounts).

PLURA, GIOVANNI BATTISTA
d. 1756

In 1752 he was at Bath, where he carved five busts and the City Arms for the Grammar School. Contemporary letters in private possession suggest that it was Plura who was responsible for modelling the statue of Beau Nash in the Pump Room, although the credit for this has always been given to Prince Hoare (q.v.).

PLURA, GIUSEPPE
b. 1753

He was the son of Giovani Plura (q.v.) and joined the Royal Academy Schools in 1773. He exhibited at the Academy, 1782-1786, showing a "Bust of a Nobleman" in 1782, and one of "the Abbé Grant at Rome" four years later. He also modelled a few wax portraits, including a self-portrait which is now in the Victoria and Albert Museum.

POLLARD, —, of Quorn

He signs a wall-tablet to Benjamin Clarke, 1765, at Hardingstone, Northamptonshire.

POOLE, T. R.
fl. 1791-1809

He was "modeller to the Prince of Wales" and exhibited at the Royal Academy in 1799 and 1800, showing wax portraits, including one of Sir James Saunderson.

Other portraits in wax by Poole of the Rev. William Borrow, the Rev. Robert Aspland, the Rev. Rowland Hill and the Rev. Thomas Toller are on loan to the Victoria and Albert Museum. Another, of the Prince Regent (1804), is in the Royal Collection, while those of Edmund Burke (1791), George IV and Frederick, Duke of York, are at the National Portrait Gallery.

PORTER, THOMAS, of London
fl. 1814-1830

He signs tablets to Maurice Budgett, 1814, at Cheddar, Somerset; to George Parry, 1821, at Haverfordwest, Pembroke; and to Jacob Jones, 1830, at Wesley's Chapel, City Road.

POWELL, ROBERT, of Bristol

In 1705 he received £7 for the marble chimney-piece for Bristol Council House (City Archives).

POWELL, T., of Leominster

He signs a large wall-tablet with good details to Eleanor Morgan, 1763, at Boddenham, Hereford.
POWELL, WILLIAM, of Hampton
fl. 1731
His father, Thomas Powell, of Hampton, who died in 1714, was mason for Hampton Court during the reign of William and Mary.

William Powell, who was a pupil of Sir Henry Cheere (q.v.), signs the very fine monument at Hampton, Middlesex, to Mrs. Susannah Thomas (d. 1731), although it is possible that most of the carving was actually done by his master, who allowed him to take the credit for it. Mr. Howard Colvin informs me that this important work, with its two life-size figures, was almost certainly designed by the architect, Thomas Archer, who was one of the executors of Mrs. Thornton’s will.

Powell had a son, James, who was apprenticed in 1743 to William Perkins, citizen and mason of London. Other masons of the same name, who may also have been members of this family, are John Powell, who in 1743 received the balance owing to his late master, Robert Taylor the Elder, for work done at the Royal College of Physicians; Joseph Powell, apprenticed to Robert Wright in 1700; and Roger Powell, apprenticed in 1717 to John Harris.

POWLEY, JOHN
He signs the monument of Sir Andrew Fountaine (d. 1753) at Narford, Norfolk. The bust on this monument, however, seems to be based on Rouilliac’s terra-cotta of Sir Andrew, and may or may not be the work of Powley.

POWNALL, JOHN, of Liverpool
He exhibited in 1815 a “Bust of a Lady” at the Liverpool Academy.

POYNTON, EDWARD, of Nottingham
fl. 1722–1726
The inscription on the lead foundation-plate at Sutton Scarsdale House (now a ruin) reads: “This house was begun to be rebuilt in the year 1724 by order of the Rt. Honourable Nicholas, Earl of Scarsdale, Francis Smith, of Warwick, gentleman, Architect, Edward Poynton, of Nottingham, gentleman, carver.” This means that Poynton was responsible, not only for carving the Corinthian capitals of the front, but also for the magnificent Leake coat of arms in the tympanum of the pediment.

As a statuary Poynton signs the large monument at West Stockwith, Nottinghamshire, to William Huntingdon, 1722, whom the epitaph describes as a “ship carpenter.” Huntingdon is shown in life-size effigy, reclining on one elbow and holding in his hand a sheet of paper bearing the drawing of a ship. His second monument, at Bunny in the same county, has a miniature kneeling figure of Dame Anne Parkyns, who died in 1725.

POZZI, FRANCESCO, of Florence
b. 1790, d. 1844
At the Vine in Hampshire is his bust of “The Youthful Hercules,” signed and dated 1832, and he also signs the monument with a relief of “Charity,” erected in 1833 to Anne Harper at Davenham, Cheshire.

Pozzi’s best-known works in Italy are the colossal statue of Ferdinand III at Leghorn, and the Farinata degli Ubeati at the Uffizi in Florence.

PRATT, J., of Nottingham
He signs a tablet to John Entwistle, 1817, at Rempstone, Nottinghamshire.

PREECE, J., of London
fl. 1821–1822
In 1821 he received the Silver Palette from the Society of Arts for a copy of the Laocoön, and, in the following year, the Silver Isis Medal for a copy of a group. I have, however, found no evidence that Preece ever exhibited.

PREECE, JOHN, of Hereford
fl. 1809–1815
He became a Freeman of Hereford in 1814 and signs tablets in the county to Evan Lloyd, 1809, at Weobley; Nicholas Mason, 1811, at Bodenham; Joseph Clarke, 1812, at Walford; and William Money, 1815, at Much Marcle.

PRESTAGE, —
fl. 1754–1761
In 1754 he was employed by the Duke of Chandos both at Winchendon House and at Grosvenor Square, receiving £82 for the work done (Stowe Archives). In 1761 Lord Rockingham paid him £63 for two marble centaurs (Wentworth Woodhouse Archives).

PRICE, JOHN
In 1715 he carved the font of St. Mary-at-the-Wall, Colchester (Essex Archaeological Society, Vol. XXIII, Part II, page 319).
PRICE, THOMAS, of Ruthyn

In 1727 he made a Welsh-marble chimney-piece for Chirk Castle, Denbigh (Chirk Castle accounts).

PRITCHARD,

THOMAS FARNOLLS

d. 1777

He may be the Thomas Pritchard, son of "Thomas Pritchard and Hester Wilding, his wife," who was born in 1718 and baptized at St. Chad's Church, Shrewsbury. He was the architect for the rebuilding of St. Julian's, Shrewsbury, and in 1769 was called in to advise on the rebuilding of Kinmerley Church, the state of which was causing anxiety. In the churchwardens' accounts is a payment to "Mr. Pritchard for coming over and drawing the Plan for ye Church."

In 1776 Pritchard sent in a design for an iron bridge at Coalbrookdale, and though his project was never carried out, owing to his death, he was nevertheless the first person to suggest building such a bridge in England. In 1765 he had sent in plans for repairing and widening the English Bridge at Shrewsbury, and was appointed Surveyor of the works a year later. For various reasons his temporary bridge was not a success and in 1768 he was superseded by John Gwynn, R.A.

Pritchard married, in 1751, Elinor Russell of the parish of St. Mary's, Shrewsbury. She died in 1768 and her husband in 1777, the latter being buried in St. Julian's, where a monument commemorates them and three of their children who died young.

Pritchard's monuments, in coloured marbles, are of the school of Henry Cheere (q.v.). They include those to Ann Wilkinson, 1756, at Wrexham, Denbigh; the Rev. John Lloyd, 1758, and Mary Morhall, 1765, both in St. Mary's, Shrewsbury; and Richard Corbet, 1770, at Moreton Corbet, Salop.

(A. W. Ward's Bridges of Shrewsbury; information supplied by Librarian, Shrewsbury Public Library.)

PRIVETT, WILLIAM,
of Chilmark

fl. 1739–1770

He was employed at Stourhead, not only erecting, but also carving the stone details of many of the buildings in the garden and grounds. These included the grotto in 1740; the obelisk in 1748, for which he was paid £349; and the bridge a year later. In 1753 he built the Temple of Hercules and in 1755 the Palladian Temple, at a cost of £300 and £226 respectively. He was also responsible for some of the masonry at Stourhead House (Hoare Archives).

For Lord Folkestone, at Longford Castle, Privett made, in 1742, the "balustrade on ye walk" and "ye obelisk and ye pedestal." In 1743 he built the summer-house known as the "Flintery" and, in 1757, received £52 for "ye logio" and £50 for "ye piers." In 1769 he carved the four columns supporting the cupola under which was placed Rysbrack's statue of "Fame" (Longford Castle Archives).

In 1743 "William and Robert Privett and Mr. Moore" were paid for their "bill of stonework done at Longleat in 1739" (Archives, Marquess of Bath), and in 1767 Privett received £100 for repairs to Britford Church (Longford Castle Archives).

PROCTOR, THOMAS

b. 1753, d. 1794

He was born at Settle, in Yorkshire, on 22 April, 1753, and was first apprenticed to a tobacconist in Manchester. In 1777 he went to London, where he entered the Royal Academy Schools and at first concentrated on painting. In 1782 he won a premium from the Society of Arts, following up this success by gaining the Academy's Silver Medal in 1793 and the Gold Medal a year later, all the awards being given for pictures.

It was not until 1785 that Proctor turned his attention to modelling and in that year produced his "Ixon," which was so highly praised by Benjamin West that it was purchased by Sir Abraham Hume. Horace Walpole was equally enthusiastic, writing to Sir Horace Mann about "Proctor, who is marvellous. He has gained the prizes in drawing, painting and sculpture; and now exhibits a model in terra-cotta of 'Ixon' less than life, which is a prodigy of anatomy, with all the freedom of nature." (Letters of Horace Walpole, ed. Cunningham, Vol. VIII, page 551.)

Encouraged by his success, Proctor spent twelve months on producing a larger work entitled "Diomedes Devoured by His Horses." This attracted a great deal of attention at the Royal Academy, but failed to find a purchaser, though the sculptor asked only fifty guineas for it. Bitterly disappointed, Proctor destroyed the group in a fit of despondency and turned again to painting. However, in 1792 he tried once more, showing "Pirithous Destroyed by Cerberus," which was also acquired by Hume.

In the following year the Academy selected Proctor as the student to be sent to Rome, but
since 1790 he had exhibited without giving any address, and the President, Benjamin West, found him living in great privation in a miserable attic by Clare Market. West told the unfortunate man the good news and did all he could to relieve him, but the excitement was too much for Proctor. A few days later he broke a blood-vessel in the night and only lived a few hours. He was buried in Hampstead churchyard on 13 July, 1794.

A writer to the New Monthly Magazine (1816, page 423) says that "Proctor as a sculptor will ever be classed among the first, if not regarded as the very first, that ever appeared in this country. His Ixion is justly considered the finest piece of work ever produced by a Briton."

Nollekens, on the other hand, considered that Proctor "had less merit as a modeller than as a painter," but it is possible that this opinion might have been dictated by professional jealousy. Sir Richard Westmacott, when Professor of Sculpture at the Royal Academy, borrowed the "Ixion" and the "Pirithous Destroyed by Cerberus" from Hume and told his students in a lecture that they were works "of true genius and worthy of their deepest attention."

PROSPERI, CHRISTOPHER
fl. 1800–1815

His groups of "Venus and Cupid" and "Bacchus and Ariadne" were bought by, or presented to, the Duke of Wellington about 1812 and are now at Stratfield Saye. His bust of the Duke of Sussex (1811), a very fine work, is at Woburn Abbey, while another of the Duke of York was at Holland House.

Proserpi exhibited at the Royal Academy, 1810–1816, where his busts included those of Vestris, Lord Downe, Henry Hope, Miss Horatia Nelson and Lord Blandford. He signs a tablet to Edward Grant, 1812, at Lichborough, Northants.

PROST, V., of Dijon

His original signed drawings for the trophies of armour on the main gates of Petworth House are in the Wyndham archives at Petworth. These superb baroque trophies consist of great cuirasses and plumed helms and of their kind are almost without equal in England. As the house was built c. 1680–1690 the trophies are probably contemporary.

PULFORD, WILLIAM

Son of William Pulford the Elder, mason, he signs a tablet in coloured marbles to William Kemp, 1836, at Belton, Rutland.

PULHAM, JAMES
fl. 1800–1850

He was born at Woodbridge, Suffolk. He was first employed by a local bricklayer and plasterer called William Lockwood and succeeded so well that in a short time he became head foreman. Pulham was chiefly employed in the plastering side of the business modelling architectural details, but having acquired a book of prints called Bowles' Passions of the Soul he began to model grotesque faces and masks from it, which were used as keystones, etc., on various buildings. During the Napoleonic era Woodbridge was a military station, and a local architect called George Thompson, in 1806, designed a building known as "The Castle" both as a club for the officers and as a Lodge for the Woodbridge freemasons, and Pulham was employed to make in Roman cement all the details and also two statues which stood on the roof, while for the grotto in the garden he cast in the same material various busts and figures. In 1814 Pulham also made for a building called the "Little Castle" a statue of "Old Time," Pulham's employer, William Lockwood, had invented a kind of artificial stone which he called "Portland Stone Cement," and in 1816 moved to London where he opened a business in Tottenham called "The New Portland Stone Cement Agency." This was an instantaneous success, and Pulham, who was joined by his brother Obadiah, was kept busy modelling for his employer. Among the works carried out by them were the façade, with columns 40 ft. high, of the Female Orphan Asylum; the sign of the "Black Bull" at Holborn, and numerous Royal coats of arms, inn signs, and other architectural details, chiefly in the classical style, both for London and the country. In 1825 the brothers made busts of Alfred the Great and William Penn and groups of Adam and Eve and Romeo and Juliet.

James Pulham remained for many years with Lockwood, after which he seems to have set up on his own and patented a material called "Pulhamite" which probably was very similar to that discovered by Lockwood. His chief work in this medium was the laying out of the garden at Highnam Court, Glos, for Mr. T. Gambier-Parry. The use of "Portland Stone Cement" (which was quite different from "Portland Cement") seems to have died out in the middle of the last century. His bust by L. A. Goblet (q.v.) was exhibited at the Royal Academy in 1820.

(Lockwood, Woodbridge in the Olden Times, privately printed 1889; private information.)
QUELLIN, or QUELING,
ARNOLD
b. 1653, d. 1686

Sons of the famous Antwerp statuary, Artus Quellin, Arnold and his brother came to England, where the former proceeded to settle. The latter, however, went on to Copenhagen and, according to Vertue, "got great employment there and at Danzig and Hamburg, and, in about ten years' time, made his fortune, returned to Antwerp and there died, left a widow an Englishwoman who married another husband and ran it all out."

Vertue describes Arnold Quellin as "a tall well-shaped man" who "wore his own hair and lived in an old great house in Tower Street and there died in the prime of his days aged about thirty-three." His foreman was John Nost (q.v.), who later married his master's widow.

Quellin's greatest work was the altar-piece which he carried out in partnership with Grinling Gibbons for James II's Roman Catholic Chapel at Whitehall, Wren being responsible for the design. The bill for it (P.R.O., Works 5/54) runs as follows: "For the great altar-piece of white marble, veined, wrought according to a design and contract, finding all materials and workmanship, £1,800. Deduct one square white-marble pillar £14 18s.; more to them for two marble columns under the throne, fluted, with capitals and bases, £90. Total £1,875 2s."

This altar-piece with its "columns of purple Rance" and "statues and other sculpture" was taken down in 1694–1696 and sent to Hampton Court, where it remained in store until 1706, when Queen Anne presented it to Westminster Abbey, though when it was erected there it was deprived of its two chief figures. About 1820 a new altar-piece was set up in the Abbey and the old one was given to Walter King, Bishop of Rochester, who had it placed in Burnham Church in Somerset, of which he was also Vicar. In the Victorian era it was decided that a huge white Italianate altar-piece, which incidentally blocked the east window, was quite unsuitable for a Gothic church and it was unfortunately dismantled. Only a few fragments, including two statues of angels and panels with figures of cherubs, exist today.

Like Pearce (q.v.), Quellin was also employed by City Companies to carve statues for presentation to the Royal Exchange. In all he made five: Henry VI for the Armourers, Edward IV for the Ironmongers (1685), Edward V for the Leather-sellers, Henry VII for the Tallow Chandlers and Charles II for the Grocers. For the Royal College of Physicians he made statues of Charles II and Sir John Cutler in 1683, receiving £20 for each figure (College Archives). These statues are now at the Guildhall. In the same year he carved another and finer one of Cutler for the Grocers' Company, in whose Hall it still remains (Company Archives). He was also responsible for some garden ornaments for Carlton, County Kildare (Country Life, November, 1936).

The only monument which can be attributed to him with any certainty is the famous one in Westminster Abbey to Thomas Thynne, of Longleat, with its dramatic relief of "Tom of ten thousand's" murder in Pall Mall in 1682. This may be the one referred to in one of the Longleat account-books which has an entry: "1684. Paid Mr. Quellin in part for a monument." He also made another monument for the Thynne family, apparently that of the Duchess of Somerset, at Great Bedwyn, Wilts. In Lord Bath's archives is a letter from Quellin to Lord Weymouth, dated 8 October, 1685, which runs as follows: "My Lord, I have taken care to send down a man to set up Your Honour's monument which will be very careful in doing it, he is one that doeth all my business in this country and I do not doubt that he will give Your Honour content. This is all from Your Honour's humble servant to command, Arnold Quilling." It may be noticed how Quellin himself spells his name. Apparently some of his English employers had great difficulty with it, probably because of the pronunciation. In the Ironmongers' account-book it is given as "Collynes," while the Grocers, on the other hand, spell it "Collon." It is quite possible that the man sent down to set up Lord Weymouth's monument was the sculptor's foreman, John Nost.

In Rysbrack's sale on 24 and 25 January, 1760, the following works by Quellin were sold: Lot 37, "a basso-relievo of a pediment of the Stadhuis at Amsterdam"; Lots 44, 45 and 46, bas-reliefs of Mercury, Saturn and Jupiter; and Lot 61, a bas-relief of "The Judgment of Solomon."

In the Stowe sale of 1848, Lot 85 on the thirty-sixth day was "a set of four exquisite small marble figures of the Seoas by A. Quelinus." The Duke of Buckingham had given Well of Bond Street £250 for them, but at the sale they only cost "Mark Phillips, Esq.," £89.

(Authorities cited in text.)
RACKSTROW, BENJAMIN

_d._ 1772

His museum at 197, Fleet Street was one of the sights of eighteenth-century London; for a sign it had the head of Sir Isaac Newton painted on a board, while inside were exhibited natural and artificial curiosities and anatomical figures (Timbs' _Curiosities of London_, page 599).

Rackstrow made "three bustos and a group" in 1748 for Arbury, in Warwickshire (Newdigate Archives, Arbury), and in 1750 received £3 13s. for two busts supplied to the Ironmongers' Company. A year later he was also paid six guineas for "a figure of King Edward VI," but this is no longer in the Company's possession (Company's Archives).

In 1763 he exhibited at the Free Society "a figure of a Gentleman, sitting; as large as life," and busts of the Marquess of Granby and Mr. Frye. His pupil, Mrs. Clark, showed in the same year "a cucumber vine; in composition."

RADBURN, STEPHEN,
of London

fl. 1820–1836

Radburn, whose studio was at 44, South Audley Street, signs tablets to Sir William Smyth, 1823, at Thedon Mount, Essex; James Sutherland, 1826, in Marylebone Parish Church; and John Butcher, 1835, in Paddington Parish Church.

RADCLIFF, —, of Nottingham

fl. 1758–1770

He signs a monument with mourning cherubs to Philip Bainbridge, 1769, at Lockington, Leicestershire, and a headstone to Elizabeth Cumberland, 1758, at Wilford, Nottinghamshire.

On Radcliff's death his yard was taken over by William Stretton (q.v.).

RAGGETT, HENRY,
of Weymouth

fl. 1819–1840

He signs a wall-tablet to John Ruddock, 1819, in Weymouth Parish Church, and another to William Williams, 1839, at Little Bredy, Dorset.

RANDALL, CHARLES,
of London

fl. 1808–1828

One of the "New Road statuaries," his tablets are neither better nor worse than those of his neighbours in the same street. His best work, which has a relief of two women mourning by an urn, commemorates Edmund Howard, 1827, in Marylebone Parish Church.

Other tablets signed by Randall include those to William Young, 1807, in Battersea Parish Church; John Field, 1815, at Barton, Beds; Robert Robinson, 1822, Denston, Suffolk; James Payn, 1822, at Cookham, Berks; Lady Smyth, 1826, at Berechurch, Essex; and Walter Meller, 1826, at Tuxford, Notts.

In 1808 he was paid £30 8s. 2d. for chimney-pieces for the Royal Naval Asylum at Greenwich (P.R.O., Adm. 80/110).

RANDLE, JOHN, of Gloucester

In the Gloucester County Archives (D. 177) is the agreement dated 1709 between John Randle of Gloucester, stone-cutter, and John Diggs of Newent. In it Randle promises to make "a free-stone monument, full 6 feet high and 3 feet wide in which said monument there shall be fixed and placed in a workmanlike manner a good white oval marble table," and also to supply a ledger of "Pryor Cleeve blew stone." Diggs, on his part, agrees to "provide, entertain and accomodate" Randall, his servants and workmen, with "good meat and drink and lodging" during the whole time they are "erecting fixing up and painting" the monument.

RAPER, EDWARD, of York

fl. 1724–1738

Son of Edward Raper of Leyburn, York, he was apprenticed to George White of York in 1724 (City Archives). Between 1736 and 1738 he was working at Castle Howard, where he did most of the decorative stonework for the mausoleum. This included eight capitals for the interior, £64; the entablature, £30; modelling in the panels and the dome, £27; sixteen cherubim-heads, £11; forty-eight "flooroones," £25; and one hundred and forty-four roses in the panels of the dome, £28 (Castle Howard Archives).

With his partner, Charles Milley (q.v.), Raper signs a tablet to Catherine and Christiana North, 1734, in St. Michael-le-Belfry, York.

RATHBONE, RICHARD

fl. 1784–1787

In 1784 he carved in wood the pediment in the
centre of the north front of Somerset House. This was 34 ft. long and 7 ft. high and showed two seahorses with a figure of Amphitrite supporting naval arms, Rathbone receiving £87 for the work. Two years later he cut for the same building in Portland stone “twelve flowers in soffit of arches leading to the terrace” for £66, and also received £151 for sixteen faces of composite capitals in Portland stone for the south front of the loggia.

In 1789, at a cost of £140, he carved in Portland stone an ornament over the arch next the terrace, at the west end of the main building. This was 16 ft. long and 10 ft. 6 in. high, while the keystone consisted of a head of Neptune with dolphins, seaweed, naval arms, swags of laurel leaves, crown, etc., “the greatest part carved all round.”

In the following year he was paid £30 for an “ornament” in Portland stone, “carved with large bows of ribbons, swags and drops of laurel leaves,” for the water-front of the lodge.

(Somerset House Building-accounts, R.I.B.A. Library, MS, 335A.)

RAWLINGS, —, of Box
fl. 1760–1786

There was a West Country family of stone-masons and carvers of this name, the first member of whom I have found any record being a “Mr. Rawlings, freemason,” who was paid in 1716 “for stone and work about my Lady Dutschess’s monument at Great Bedwin,” the monument in question being that of the 2nd Duchess of Somerset (Longeat Archives).

It is probably this man’s son who signs the monuments of Edward Baily, 1760, at Bradford-on-Avon, Wilts; Stephen Brown, 1780, at South Wraxall, Somerset; and Robert Fisher, 1786, at Bathampton, in the same county. These are excellent copies in local stone of contemporary marble works by London statuaries, and Rawlings makes good use of the swags, draperies, flaming lamps and winged cherubs so typical of the period.

RAWLINGS, JOHN, of Bruton
He signs a wall-monument with a draped urn to George Prince, 1817, at Bruton, Somerset.

RAWLINGS, JOHN, of Maidstone
He made the ledger-stone of William Horsmonden Turner (d. 1753) in Maidstone Parish Church. The bill for this is in Maidstone Museum.

RAWLINGS, SAMUEL, of Shepton Mallet
fl. 1822–1827
He signs tablets in Somerset to the Rev. William Provis, 1822, at Shepton Mallet; Sarah Lock, 1823, in Wells Cathedral; and Mary Jellard, 1827, at Milborne Port.

RAWLINS, NATHANIEL
fl. 1678–1707

In 1678, when the Masons’ Company made a “General Search,” Rawlins (who had become free of the Haberdashers’ Company in 1670) was noted as working with Thomas Strong (q.v.). In the “Search” of 1694 he was working with Edward Strong, and about a year previously had succeeded Jasper Latham (q.v.) as one of the master-masons of St. Paul’s Cathedral. Here he was employed until 1707 and carried out stone-carving in addition to mason’s work, receiving a total sum of £15,751.

RAWLINS, THOMAS, of Norwich
fl. 1747–1781

He was the son of Thomas Rawlins the Elder, a Norwich mason and statuary. He was trained in London, and became a Freeman of Norwich in 1747 (City Archives). In 1774 he was the mason responsible for the Gothic porch of St. Andrew’s Hall, Norwich.

Rawlins as a monumental mason is in the front rank of the Norfolk statuaries, his only rival being R. Page (q.v.). His monuments in coloured marbles have delightful and delicately carved details, the best being that of Sir Thomas Churchman, 1781, in St. Giles Church, Norwich. This has a medallion portrait and a relief of “Fame Overthrowing Time” and compares favourably with the work of any London sculptor of the period. It is possible, indeed almost certain, that some of the earlier monuments given below were executed by Thomas Rawlins the Elder. They are all in Norfolk and include those to Edward Cooper, 1744, Bungay; Philip Stannard, 1747, in St. Giles, Norwich; William Rolfe, 1754, in Norwich Cathedral; William Rant, 1754, at Mendham; John Custance, 1756, and H. Custance, 1757, both in St. Andrew’s, Norwich; John Drake, 1759, at Wymondham; Richard Oram, 1762, Smallburgh; Timothy Balderstone, 1764, in St. George Colegate, Norwich; William Stone, 1765, at Woodton; William Woodcocks, St. Swithin’s, Norwich.

The younger Rawlins was also the author of Familiar Dialogues on Architecture.

(Norfolk, Anon., 1829, Vol. II, page 1194.)

READ, NICHOLAS
b. c. 1733, d. 1787

While Read was a pupil at St. Martin’s Lane
Academy his father, knowing Rouibiiaic's great reputation, determined to get that sculptor to accept his son as a pupil. Rouibiiaic, however, when he first settled in England, had "determined never to take an apprentice," but the elder Read persisted and at last "prevailed with Mr. Rouibiiaic to take him into his house to instruct him in drawing and modelling."

"Some few weeks after, Mr. Rouibiiaic, working on a very fine bust of which he was particularly nice and would not permit anyone but himself to touch it, our young artist was daring enough in the absence of his master to attempt to finish, which he either nearly or quite accomplished."

When Rouibiiaic returned he was so delighted with what Read had done that "from that moment he in his turn became a solicitor to Read's father to take him apprentice and they continued inseparable friends ever after and all distinction was lost in the affection he bore him" (Read's obituary, Gentleman's Magazine, 1787, Part II, page 644).

Vertue (Walpole Society, Vol. III, page 152) refers to Read as: "A young man, an apprentice of Mr. Rubbiloc, statuary, by a drawing I have seen of him; an academy figure shows great skill and fire and spirit extraordinary."

Read, while still apprenticed to Rouibiiaic, gained in 1762 a premium of one hundred guineas from the Society of Arts for a "life-sized figure in marble of Actaeon and his dog." Two years later he won a further premium of £147 for a "life-sized figure of Diana by a rock," these being the largest awards for sculpture hitherto granted by the Society. (Society's Archives.)

He assisted Rouibiiaic during the latter's lifetime, carving many of his works, including the skeleton on the famous monument of Lady Elizabeth Nightingale in Westminster Abbey; and, on his master's death, took over his studio at 66, St. Martin's Lane. J. T. Smith called Read "the most deficient in talent of all Rouibiiaic's pupils," while Nollekens, who disliked him, said that his figure of Admiral Tyrrell in Westminster Abbey looked "for all the world as if he was hanging from a gallows with a rope round his neck," a criticism probably coloured by the fact that the two men were rival sculptors.

In any case, Admiral Tyrrell's monument (1766), known from its swelling clouds as the "pancake monument," has been as virulently attacked by some writers as it has been absurdly over-praised by others. It was cruelly mutilated in the nineteenth century and it is now difficult, if not impossible, to form a true estimate of its worth. The relief, however, remains, and, as Mrs. Esdaile says, "in all the annals of sculpture was ever a ship so marvellously represented? The sails, the rigging, the port-holes, the poop and its balcony, the rich carving above, all these are technically among the most amazing things in English art." (Esdaile's Rouibiiaic, page 214.)

The Tyrrell monument having been dismembered, the most important of Read's untouched works is the huge mass of marble commemorating Nicholas Magens, 1779, at Brightlingsea, Essex, with its vast figure of "Fame" and its emblems of trade—bales of merchandise, anchor and rope, globe and bursting cornucopia, pouring forth a flood of fruits of the earth intermixed with golden guineas—while, above, angels tumble in heavy swirling clouds, defying all the laws of gravity.

Read died on 11 July, 1787. According to the Gentleman's Magazine, "his faculties were, from his great studies, impaired at a time of life when other men's are in their prime, and he became totally deprived of reason a short time before his death." After he died a sale of his effects was held, the more important lots being "a small monument complete," "a basso-relievo," "five plaster-casts of busts," and a "carved statuary tablet." He exhibited at the Society of Artists and at the Free Society, 1764-1780.

John Cheere (q.v.), who died in the same year, left Read in his will five guineas to buy a mourning-ring.

Other monuments executed by Read include those to Francis Hooper (with a bust), 1763, in Trinity College Chapel, Cambridge; James Kendall, c. 1765, at West Horsley, Surrey; Elizabeth and Stephen Niblett, 1766, at All Souls College, Oxford; Sir Thomas Morgan, 1767, at Kinnersley, Hereford; Mrs. Anne Simons, 1769, at Lechlade, Glos; the Duchess of Northumberland, 1776, in Westminster Abbey (from a design by Adam); the Rev. George Legh, 1776, in Halifax Parish Church; and James Poole, 1785, at Budworth, Cheshire.

REEVE, —

Possibly a Wiltshire stone-carver, he signs wall-tablets in that county of quite good workmanship to Lionel Seaman, 1760, at Upton Scudamore, and to Alice Wayte, 1768, at Dauntsey.

REEVE, STEPHEN

b. 1662, d. 1724

There was a family of craftsmen in Gloucestershire named Reeve during the seventeenth and eighteenth centuries. Members of it include Francis (1639-1715), described as "mason and carver," who is buried in St. Nicholas's Church, Gloucester; his son Joseph (1669-1716), also a
carver, who is buried in the same church; and
Stephen, who is buried in the church of St. John
the Baptist, Gloucester, and who signs a large
monument to Beata Johnson, 1722, at Barnwood,
just outside that city (Fosbrooke’s Gloucester, page
317, 369).

Reeves of a later generation were Joseph, “son
of Joseph Reeve, stonecutter,” who became free in
1751, and his two brothers, Nathaniel and Francis,
who gained their freedom in 1761 and 1768
respectively (Corporation records).

REEVES and SONS, of Bath
Firm fl. 1778-1860

The firm was founded by William Reeves, who
was succeeded by his son Charles, the latter, for a
short period only, taking a Mr. Holland into
partnership about 1825. Like the Kings of the
same city, the firm was an extremely busy one and
their tablets run into hundreds. Unfortunately
they had a number of stock designs which they
repeated almost incessantly and they relied almost
entirely for decoration on the conventional
weeping-willow or draped urn.

In 1824 and 1833 the firm made marble chimney-
pieces for Stourhead, and in the latter year were
also paid for shields for the gate piers of the
same house. For these the material used was Bath
stone, carved with the arms of Colt and Hoare
(Hoare Archives).

Monuments and tablets signed by the Reeves
in Somerset include those to Robert Perfect, 1778,
and Moulton Messiter, 1786, both at Wincanton;
Elizabeth Jeane, 1788, at Broomfield; Elizabeth
Moffat, 1791, John Ballfour, 1791, and Anne,
Lady Cosby, 1817, all in Bath Abbey; Harry
Atwood, 1814, at Batheaston; Ann Gunning, 1817,
and Langridge; Archdeacon Turner, 1817, and
Fridiwyde Broderip, 1825, both in Wells Cathed-
ral; Alexander Luders, 1819, at Widcombe; and
Admiral Holloway, 1826; in St. Cuthbert’s, Wells.
Others executed by them outside the county
include those to Captain Stokes, 1786, at Yate,
Glos; John Long, 1797, at Corhampton, Hants;
the Rev. Edward Escourt, 1802, at Long Newton,
Glos; Charles Cox, 1808, at Kemble, Glos; Mary
Goodden, 1812, at Over Compton, Dorset; Lady
Spencer Wilson, 1818, at Charlton, near Green-
wich; Stephen Ram, 1821, at South Stoneham,
Hants; the Hon. Mrs. Long Wellesley, 1825, at
Draycot Cerne, Wilts; James Wickens, 1827, in
Salisbury Cathedral; and Sir Henry Mathias,
1832, at Haverfordwest, Pembroke. The firm also
sent their work abroad and examples of it are to
be found in Jamaica Cathedral, to Dr. Lee, 1822,
and John Milward, 1822; at Byculla, in India, to
Lt.-Colonel Edward Woods, 1840; in St. Peter’s
Church, Colombo, to Augustus Marshall, 1841;
and in Christ Church, Barbados, to Bishop
Coleridge, 1849.

REGNART, CHARLES,
of London
b. 1759, d. 1844

Son of Philip Regnart (q.v.), he was born at
Bristol and married a Miss Hunter of Hexham,
by whom he had an only son, Charles, born in
1796. After his first wife died he married his cook,
and she is presumably the “Jane Regnart” to
whom the Royal Academy made a charitable gift
in 1850 (Private information and Royal Academy
Archives).

Regnart, who was buried in the Hampstead
Road Cemetery, was an extremely competent
monumental mason, whose work is to be found all
over England. His masterpiece is the altar-tomb
at Farthinghoe, Northants, to George Rush, 1806.
Though nearly all recumbent figures of the
Georgian era show the dead person in youth or
in the prime of life, the sculpture shows Rush as
an old, old man, thin and emaciated, clad in a
loose robe with slippers on his feet and his Bible
in his hand. He is at the point of death, and his
closing eyes gaze towards Heaven. This effigy is,
indeed, one of the most remarkable and unusual
executed in England during the early nineteenth
century, and Regnart exhibited a model of it and
the tomb on which it rests at the Royal Academy
in 1806. Regnart died 19 November, 1844.

RENNIE, GEORGE
b. 1802, d. 1860

He was born in Haddingtonshire, son of George Rennie the agriculturist (1749–1828), and nephew of John Rennie the engineer, and as a young man went to Rome to study sculpture. He first exhibited at the Royal Academy in 1828 (the year of his return to England), and in 1834 carved a series of bas-reliefs for the Dividend Office of the Bank of England, works which included representations of “Mercury,” “Britannia,” “Ceres,” “The Thames,” “Industry,” “Calculation,” etc.

In 1836 Rennie suggested to Sir William Ewart the formation of the Parliamentary Committee which led to the establishment of the School of Design at Somerset House, and he also assisted Joseph Hume in his efforts to obtain for the public freedom of access to all monuments and works of art in public buildings and museums. In 1841 he decided to enter Parliament, and was returned in the Liberal interest by Ipswich. Six years later he became Governor of the Falkland Islands, where he was an unsuccessful success. He died in London on 22 March, 1860.

Rennie’s best-known sculpture is “The Archer,” a statue executed in 1826 and now at the Athenæum Club. The New Monthly Magazine of that year (page 256) considered that the figure showed an “admirable knowledge of anatomy,” though it was forced to express surprise “in contemplating the excellencies of ‘The Archer’ to find that the very inferior statue of ‘The Gleaner’ is from the chisel of the same artist.” The latter was exhibited at the Royal Academy in 1828, and from that year until 1837 Rennie continued to send works to Burlington House. These included groups of “Cupid and Hymen” and “The Conchologists” in 1831 and 1832 respectively, busts of John Rennie and Thorwaldsen in 1831, and a bust of David Wilkie in 1833. Another of William Jolliffe, dated 1832, is at Amerdown, in Somerset, while his statue of Lord Harris, executed three years later, is in Throwley Church, Kent. A figure of “Mars” and a bust of Alexander, both undated, are at Chatsworth.

It is interesting to remember that Rennie was one of the first artists to conceive the idea of bringing “Cleopatra’s Needle” to London, for according to the design and plan he submitted for the competition in 1839 it was to be erected in Trafalgar Square as the main feature of the national monument to Nelson.

(Athenæum, 31 March, 1860.)
REVITT, J., of Biggleswade, and Linford
fl. 1802–1803
He signs tablets to Mrs. Pigott, 1802, at Henlow, Bedfordshire, and to Robert Callinson, 1803, at Newport Pagnell, Buckinghamshire.

REX, —, of Salisbury
According to the Builder of 1848 (page 306), he made, about 1846, the ornamental figures "surmounting the pillars at the gate entrance to Wilton House."

REYNOLDS, GEORGE
In 1764, when "under twenty-two and apprenticed to Mr. Fest," he was awarded a premium of five guineas by the Society of Arts for a "model in clay of ornaments" (Archives, Society of Arts).

RHODES, ROBERT, of Leeds
fl. 1757–1802
Rhodes, who was apprenticed in 1757 to John Carr, an architect of York (City Archives), signs a large wall-tablet of various coloured marbles to Thomas Close, 1802, in Leeds Parish Church. He was succeeded in the business by his son Edward, who was working from 1817 until 1834.
A "John Rhodes" was one of the contractors for building St. Mary's Church, Bridgnorth, in 1792 (Archives, Lord Sandys).

RICE, —, of Brompton
fl. 1820–1840

RICE, W., of Barnstaple
He signs a wall-tablet with pilasters supporting a plain pediment to Mary Chichester, 1760, at Georgeham, Devon.

RICHARDS, J., of Exeter
fl. 1814–1830
He signs tablets in Devon to John Saltern, 1814, at Buckland Brewer; George Barbor, 1817, at Fremington; James Haynes, 1824, at Hartbury; and Hannah Beard, 1830, at Lifton.

RICHARDS, JAMES
b. 1671, d. 1759
In 1722, after the death of Grinling Gibbons (q.v.), George I appointed Richards by Letters Patent to "the Place & Office of Our Master Sculptor & Master Carver in Wood as well in All and singular Our Palaces Castles Honors Forts Houses and Buildings whatsoever wherein Wee now are or at any time whatsoever shall or are Accustomed to make Our Abode or to Abide as also all other Our Works whatsoever or where-soever in any wise belonging to or touching or concerning the said Art of Sculpture or Carving in Wood." In addition to "the Fee or Wages of Eighteen Pence by the day," Richards was to receive "All and all manner of Fees Profits Rights Allowances Liberties Commodities and Advantages whatsoever to the said Office or Place belonging or any wise appertaining in as large and ample manner, as—Gibbons Gent, deceased," and also "One Robe yearly," to be taken "out of Our Great Wardrobe against the Feast of the Birth of Our Lord Jesus Christ by the hands of the Master Keeper or other Officer of Our said Wardrobe" (Copy in Archives of West of Alscot Park).

In this capacity Richards carved ornaments on the chimney-pieces at Kensington Palace (Wren Society, Vol. VII, page 194), while in 1750 and 1751 he executed the carved stonework (including pineapples, fases, etc.) for the Horse Guards (R.I.B.A. Library, MS. 725/18).

He was also employed as a carver at Westminster School during the building of the New Dormitory between 1730 and 1733 (Wren Society, Vol. XI, page 44).

RICHARDS, L., of Hereford
He signs a large wall monument to Gilbert Abrahall (d. 1723), at Ross-on-Wye, Hereford. This architectural work (which was erected in 1728) is about 8 ft. high and has a semicircular pediment supported by four Corinthian pilasters, and is above the usual provincial standard.

RICHARDSON,
CHRISTOPHER, of Doncaster
b. 1709, d. 1781
From 1748 until 1751 he was carving chimney-pieces for Welbeck Abbey, the most important being a Gothic one in Roach Abbey stone for the Great Hall, for which he was paid £44. He had previously, in 1747, been responsible for the carving of the "Alcove Room," and in 1750 he made a chimney-piece for the "daylight" room, also carving "six stags' heads" in wood. Seven years later he supplied a white veined-marble chimney-piece costing £42 for an unidentified room in the same house (Archives, Duke of Portland).

In 1756 Richardson executed the statue of
“Liberty” on top of the column in Gibside Park, County Durham (Boyles’ Durham, page 597), and a year later was working at Alnwick and Berwick-on-Tweed.

At Berwick he cut the arms of the town on the Town Hall, taking the place of a Mr. Charles Littaneer who had originally been engaged to do the work. The account of this transaction given below is taken from minutes in the Guildbook dated 18 February and 22 March, 1757.

The first reads: “Works Committee. Called before them Mr. Charles Littaneer the carver and endeavoured to know from him the lowest price he could carve the Town Arms upon stone and also upon wood.” After an interval of over a month the Committee then “reported that they did not approve of the model Mr. Littaneer made of the Corporation Arms and as Mr. Christopher Richardson, of Doncaster, carver, a person of known character who is now carving at Alnwick Castle, for the Rt. Hon. the Earl of Northumberland and at other parts of the north, has offered to carve our Arms with the ornaments as drawn by Mr. Gibson in his best style on stone which the Guild has seen and approved of, £42 (the stone being fixed up at Corporation expense). The Committee is authorized to employ him.”

From 1756 until 1762 Richardson was working at Wentworth Woodhouse (Wentworth Woodhouse Archives), and two years later he was again at Welbeck, where he ornamented a cupola over the chapel clock. He died November, 1781, and was buried at Doncaster, his wife Sarah having predeceased him on 19 July, 1771, aged 56 (Registers, Doncaster Parish Church; information from Mr. H. M. Colvin; authorities cited in text).

RICHARDSON, EDWARD
b. 1812, d. 1869

In 1832 he attended the Royal Academy Schools on the recommendation of Sir Francis Chantrey (q.v.), and ten years later was allowed to restore the effigies of the Knights Templar in the Temple Church. The result of his work raised a chorus of disapproval, and he was refused admission to the Society of Antiquaries, while Augustus Hare called him “a charlatan who has planed down the effigies.”

In 1844 Richardson sent his statue of John Gower to Westminster Hall, thereby causing the art critic of the Literary Gazette to remark that “men do strange things and how a man could be audacious enough to send such an abortion as this to a competition, must astonish everyone.” In the same year, and again in 1846, he was working in Chichester Cathedral restoring first the monu-
bent effigy), at Bandon, Ireland; the Marquess of Ormonde, 1860 (with a recumbent effigy), in Kilkenny Cathedral; the Officers and Men of the Duke of Cornwall’s Light Infantry, 1861, in Exeter Cathedral; the Officers and Men of the 51st Regiment, 1863, in York Minster; and Sir Richard Shakespear, 1867, in St. Anne’s Church, Indore. Richardson died on 17 May, 1869, at Milbury Terrace, Marylebone.

(Various references Builder, Art Journal and Gentleman’s Magazine, especially 1850, Part I, page 619.)

**Richter, John Augustus**

*fl. 1764–1794*

A native of Dresden, he came over to England before 1770. He was the senior partner in the firm of Richter and Bartoli, “Scagliolists,” of Newport Street, and was employed by Horace Walpole at Strawberry Hill in 1774, where he made the mosaic work for the shrine of Capaccio (Toynebee’s Strawberry Hill Accounts). This was purchased in the Strawberry Hill sale of 1842 by Sidney Herbert, who used some of the columns for the church he was then building at Wilton. Richter also made the marble chimney-piece for the round drawing-room at Strawberry Hill, for the design for this being taken from the tomb of Edward the Confessor. About 1764 he made scagliola columns in imitation of porphyry, for the saloon at Holland House, Kingsgate, Kent (Ireland’s *Kent*, Vol. I, page 526). He married Mary Haig and was the father of Henry Richter (1772–1857), the portrait painter. In 1794 father and son produced an edition of Milton’s *Paradise Lost*, illustrated with engravings.

In 1777 the firm received £158 from Sir Rowland Wynn for, as their bill puts it, “two statuary tables inlaid of scagliola according to Messrs. Adams design for Hostel at 75 shillings each” (Brockwell’s *The Hostel Collection*). They must have had a good reputation, for Sir William Chambers, in a letter written in 1773 to Mr. Kay, a master-builder in Edinburgh, said that they were the best makers of scagliola in London, and could “imitate almost any sort of marble and also make very beautiful ornaments” (British Museum Ad. MS. 41133).

About 1780 Richter made the chimney-piece for the state bed-dressing-room at Burghley. He apparently took a Mr. Hodgson as partner about two years later, for they exhibited together at the Free Society various “drawings in scagliola in a new manner.” Independently Richter showed chimney-pieces at the Free Society in 1782 and 1783.

**Ricketts, John, of Bath**

*fl. 1787–1796*

He was presumably a member of the Gloucester family of statuaries and masons, and though his tablets are not outstanding, they have quite carefully carved details. He became a bankrupt in 1795 (*Universal Magazine*, 1793, page 471), but continued to work after that date.

Signed works by Ricketts in Gloucestershire include those commemorating Ann Trotman, 1787, at Winchcombe; Charles Barrow (with a portrait-medallion), 1789, at Minsterworth; Anne Cresswell, 1791, at Bibury; and John Scott, 1795, at Longborough. Two others in Berkshire are in memory of Jane Crosse, 1791, at Compton, and Thomas Crosse, 1795, at Kinbury.

**Ricketts, John, the Elder, of Gloucester**

*d. 1734*

He first lived in Cheltenham, but had moved to Gloucester by 1710, for in that year he petitioned the Corporation to be made a Freeman of the city and offered to execute a stone statue of Queen Anne in return. His proposition was agreed to, and he duly became a Freeman of Gloucester on 11 September, 1711, receiving in the following year £23 in part payment for his statue. This first stood in Southgate, near the Wheat Market, but was removed in 1782 to the park of Mr. John Pitt. In 1839, however, it returned to the city and was erected on College Green, near the Cathedral (Gloucester Corporation Archives; Gentleman’s Magazine, 1839, Vol. I, page 631).

Ricketts signs monuments in Gloucestershire to William Guise, 1716, at Elmore, and to William Lisle, 1723, in the Cathedral; the latter is an important work, with a fine bust. He may also have worked at Bristol, for in 1711 and 1712 a “Mr. Ricketts” was one of the chief masons for building All Saints Church in that city.

He died on 16 July, 1734, and in his will (proved on 31 January of the following year) left his effects to his son Thomas and also mentioned a son named William. His eldest son, James Ricketts, became a Freeman of Gloucester in 1734, but does not seem to have worked in the family business.

**Ricketts, John, the Younger, Thomas, the Elder, and Thomas, the Younger, of Gloucester**

*Firm fl. 1729–1795*

John Ricketts was a younger son and apprentice of his father, John Ricketts the Elder (q.v.),
and became a freeman of Gloucester on 23 May, 1741 (Gloucester Corporation Archives). Vertue, who visited the city in 1729, wrote of a "Mr. Rickett, stone-carver at Gloucester, a son—a hopeful young man" (Walpole Society, Vol. XX, page 61). This is presumably a reference to John Ricketts the Younger, the member of the family who was also responsible for the stone-carving on Gloucester "Tolsey" or Guildhall, which included the City Arms on the north and south fronts and "the city regalia and other ornaments on the east front pediment" (Corporation Archives). He exhibited a statue of William Beckford at the Free Society in 1771.

Ricketts' monuments are above the average provincial level. That commemorating Sir Thomas Snell, 1754, at Upton St. Leonards, Gloucestershire, is a large architectural work, while those of Lady Strachan, 1770, in Gloucester Cathedral, and Elizabeth Charlett, 1746, at Fladbury, Worcestershire, have a portrait medallion and a bust respectively.

John Ricketts' successor was his son Thomas, grandson of the founder of the firm, which was later taken over by a member of the fourth generation, Thomas Ricketts the Younger, son of the elder Thomas.

In the accompanying list of monuments executed by the firm the earlier ones are the work of John Ricketts the Younger. They include those to the Rev. Prideaux Sutton, 1748, at Bredon, Worcs; Robert Thomas, 1756, at St. Bride's Major, Glamorgan; Ellis, Bishop of St. David's, 1761, and James Benson, 1785, both in Gloucester Cathedral; Sarah Boucher, 1762, at Barnsley, Glos; Sir William Osbaldeston, 1765, at Chadlington, Oxon; the Williams family, 1767, at Llantwit, Glamorgan; Samuel Sheppard, 1770, at Minchinhampton, Glos; Mrs. Prinn, 1771, and John Whitehouse, 1797, both at Charlton Kings, Glos; Captain Dansey, 1775, at Little Hereford, Hereford; Admiral Sayer, 1776, at Sandford St. Martin, Oxon; Henry Perrot, 1778, at North Leigh, Oxon; Elizabeth Coxe, 1783, at Kemble, Glos; and Mrs. Warren, 1792, in Worcester Cathedral.

RING, JAMES, of Reading
fl. 1751-1766

He signs tablets of white and coloured marbles to Thomas Shaw, 1751, at Bramley, Hants; and to John Baker, 1760, and Nathaniel Butler, 1766, both at Farnham, Surrey.

Ring was dead by 1774, the year in which his son, Moses, was apprenticed to Thomas Burnell (q.v.) (Archives, Masons' Company).

RINGWOOD, R.
fl. 1835-1843

He exhibited busts and medallions at the Royal Academy, 1835-1843, including those of "a noble lord and lady" and "an artist." His studio was at 26, Albany Street.

RIPPINGILLE, EDWARD VILLIERS
b. 1798, d. 1859

He is chiefly known as a painter, but he exhibited two works of sculpture, "Head of a Sleeping Child" and "Sympathy," at the Birmingham Society of Artists in 1829.

RITCHIE, ALEXANDER HANDYSIDE
b. 1804, d. 1870

He was born at Musselburgh, near Edinburgh, the son of James Ritchie, a brickmaker, and after studying architecture turned to sculpture. He then went to Rome, where he became a pupil of Thorwaldsen, and in 1844 exhibited "Sophronia and Olninda at the Stake" in Westminster Hall. The Literary Gazette was sparing in its praise of this group, remarking that "while some parts have had great care bestowed upon them, there are others, for instance the drapery about the foot, as slovenly as any we have ever witnessed."

Ritchie was elected an Associate of the Royal Scottish Academy in 1846. In the same year he carved the figures for the tympanum of the Commercial Bank in Glasgow which were highly praised by the Art Union (1846, page 284). The critic was particularly impressed by the three figures of children, considering not only "that they would do credit to the chisel of any sculptor," but also that Ritchie himself "must be a man of fine sympathies and of gentle nature, as well as high genius, who can represent the innocence of childhood so successfully."

Ritchie was also responsible in Edinburgh for the ornamental figures on the Commercial and British Linen Banks, for a group of children (1848) for the Western Bank, and for decorative details on the office of the Life Association of Scotland (1859). In London he was employed under J. Thomas (q.v.) on decorative sculpture for the Houses of Parliament.

He exhibited at the Royal Academy, 1830-1868, and at the Royal Scottish Academy, 1825-1869, showing, among other works, busts of Sir John Hope (1825), Thorwaldsen (1830), the Countess of Lincoln (1837), the Marquess of Huntley (1838), James Callender (1843), Sir David Milne (1846)
and Sir Charles Eastlake (1866). He also carved the busts of the Rev. Charles Finlater (1836), for Newlands Church; Dr. Andrew Thomson (1837), for the Presbyterian Hall, Edinburgh; and the Rev. George Lee (1838), for the Mechanics' Institute, Hull; while those of George Kemp (1845) and David Stow (1852) are in the Scottish National Portrait Gallery and the Kelvingrove Art Gallery respectively.

Ritchie also executed a number of statues, including those of Sir Walter Scott (1839), at Selkirk; Mr. Ferguson of Raith (1843), at Dirlton, Haddington; Prince Charles Edward Stuart (1844), for the Scott Memorial in Edinburgh; Eustace de Vesci and William de Mowbray (1848), at the House of Lords; Queen Victoria (1851), at Holyrood Palace; Peel (1852), at Montrose; Dr. Moir (1853), at Musselburgh; Hugh Miller (1858), at Cromarty; and Wallace (1858), at Stirling. He also made a number of statues in 1845 for the New Physicians' Hall in Edinburgh, and, in 1858, those of Knox, Melville, Henderson, Renwick, and Ebenezer Erskine for Stirling Cemetery. His group of the Rev. David Dickson blessing children (1844) is outside St. Cuthbert's, Edinburgh.

His monument to Charles Marjoribanks, 1836, is at Coldstream, and his tablet to the Rev. John Patterson, 1838, in Falkirk Church. For the Hamilton Palace Mausoleum he carried out a pair of lions in 1852, and heads of "Time," "Death" and "Eternity" in 1863.

(D.N.B.; various references Builder, Art Union and Art Journal.)

RITCHIE, JOHN
b. 1809, d. 1850

He was the brother of Alexander Handyside Ritchie (q.v.), and studied sculpture at home, producing a few models which attracted but little notice. He later became Alexander's assistant when the latter returned from Rome.

In 1840 John Ritchie exhibited at the Royal Academy a group entitled "The Deluge" which he had modelled in clay in 1832. Some years later this was brought to the notice of a Mr. Davidson, of London, who was so impressed that he commissioned the sculptor to execute the group in marble and so gave him the chance to fulfil his long-cherished wish to visit Rome. Ritchie left Scotland for Italy in September, 1850, and began work on his arrival. Soon afterwards he went with some friends on a visit to Ostia, but neglected to observe all the usual precautions against malaria and died on 30 November, 1850, of the disease after a few days' illness.

His chief works in Scotland are the statue of Scott at Glasgow, and the figure of the Last Minstrel (1844) made for the Scott Memorial in Edinburgh. He exhibited the statue of Scott, together with one of Lord Byron, in Bond Street in 1833, while his marble statue of "A Poetess" was shown after his death at the Great Exhibition of 1851 (Art Journal, 1851, page 44).

RIVERS, CHARLES AUGUSTUS
b. 1811

In 1830 he attended the Royal Academy Schools on the recommendation of E. H. Baily (q.v.), and in the following year won the large Silver Medal from the Society of Arts for an original model of a group. In 1837 he also received a Silver Medal from the Academy.

Rivers exhibited at Westminster Hall in 1844 figures of Richard I and John Rennie. The former the Literary Gazette declared to be "of small merit," although the Builder considered it a "work of animation." There is a cabinet statue of Benjamin Babington by Rivers at the Royal College of Physicians.

The sculptor also exhibited at the Royal Academy, 1831-1847, showing a large number of busts, including those of Sir Thomas Lawrence (1833), Sir W. Blizard (1835), Madame Malibran (1837), Queen Victoria (1838), Miss Helen Faucit (1841) and John Bright (1847). At the Suffolk Street Galleries he showed a bust of Mrs. Fry in 1832.

ROACH, A.

He exhibited at the Royal Academy a figure of "Lady Godiva" in 1830.

ROBERTS, —, of Exeter

He signs a wall-tablet with a relief of a mourning woman to Elizabeth Gartside, 1813, at Topsham, Devon.

ROBERTS, C., of Sheffield
fl. 1800-1809

He signs the monument of Mary Mort, 1800, in St. James's Church, Sheffield, and a tombstone with finely cut military emblems commemorating Richard Walker, a trumpeter (d. 1800), in the churchyard of the Cathedral (Holland's Our Old Churchyard). He also executed the capitals of the eight pillars supporting the pulpit in Carver Street Chapel, Sheffield.

ROBINS, or ROBBINS,
FRANCIS, of Bath
fl. 1755-1794

He may belong to the same family as George
Robins, a mason of Bristol, whose son Samuel, also a mason of that city, became free in 1739.

Francis Robins was declared a bankrupt in 1770, being described at the time as "statuary, mason and penant man." His best work, the monument to Sir Boucher Wray, 1784, at Tawstock, Devon, takes the form of a large square pedestal surmounted by an urn, and he signs others commemorating Charles Biggs, 1755, at Backwell, Somerset; the Rev. Henry Lockett, 1778, at Crowcombe, Somerset; Anne Acton, 1780, at Camborne, Cornwall; and Sir James Long, 1794, at Draycot Cerne, Wilts. The "E. Robins" who signs the monument of Henry Dickanson, 1796, at Bathampton, Somerset, is presumably a son (Universal Magazine, 1770, page 335).

ROBINSON, —, of Saffron Walden

According to the Gentleman's Magazine of 1791 (Part I, page 780), he designed and executed the memorial tablet at Ashdon, Essex, to the Rev. Nathaniel Salter, who died in that year.

ROBINSON, CHARLES B., of Liverpool
b. 1806, d. 1894

At the Liverpool Academy of 1836 he showed a bust of Nicholas Robinson, and in 1843 a bas-relief of "A Greek Warrior and His Horse" at the Royal Hibernian Academy. In 1844 he sent a statue of William IV to the exhibition in Westminster Hall, and in the two following years showed busts of William Lowe, W. Hodgson and T. Tobin at the Royal Manchester Institution.

Robinson also signs the monument to John Hodgkinson, 1836, in Prescot Church, Lancashire.

ROBINSON, JOHN

In 1834 he exhibited "Venus, a bas-relief in marble" at the exhibition of the Royal Northern Society held at Leeds.

ROBINSON, JOHN, of London

He was employed at the Board of Trade Buildings in 1825, where he carved, among other details, two capitals costing £90. In the same year a new building was being erected to house the offices of the Privy Council, and here Robinson received £400 for ten Corinthian capitals and £152 for the "enrichment in the architrave" (P.R.O., Works 5/125).

ROBINSON, L., of Barnstaple
fl. 1801–1802

He signs tablets in Devon to Elizabeth Hale, 1801, at South Molton, and to Samuel Chappell, 1802, at Fremington.

ROBINSON, LEWIS
fl. 1763–1764

He was "under twenty-two and an apprentice of Mr. Grepel, of Rathbone Place" when in 1763 he won a premium from the Society of Arts for a "model of ornaments in clay." According to a manuscript note in the Records of the Society, he was working on his own in the following year.

ROBINSON, T., of Chudleigh
fl. 1805–1809

He signs pretty wall-tablets in coloured marbles to Robert Sutton, 1805, at Littleham, Devon, and to Edward Kershaw, 1809, at Dawlish, in the same county.

ROBINSON, THOMAS, of Oxford
fl. 1675–1709

He was possibly a son of that Thomas Robinson, of Oxford, who was employed on the building of the north side of Christ Church quadrangle in 1641, and was also a master-mason for the Sheldonian between 1664 and 1669 (Hiscock's A Christ Church Miscellany).

There are a number of payments to Robinson in the Vice-Chancellor's accounts. In 1670 he was paid £40 10s. 8d. for "ye winter house for ye Physic Garden" and in 1671–1672 received £23 5s. 2d. for mason's work at the Printing House. In 1674–1676 he was paid £100 for "stone works and setting up of 40 Pinnacles about St Marie's church at £2 10s. per Pinnacle." In 1684–1685 he was paid £110 for "ye conduit at Carfax," and in 1693–1694 £122 for work at "the Physick Garden." In 1681 he and Christopher Kempster (q.v.) were master-masons for building Tom Tower.

Other works carried out by Robinson at Oxford were in connexion with the conduit at Carfax in 1686, for which he received £110; the Physic Gardens in 1692; and the Divinity School ten years later. In 1709 he was one of the master-masons for building Queen's College (Wood's Life and Times, Vol. IV).

ROBINSON, WILLIAM
fl. 1729–1758

Presumably a Yorkshire mason, he built the mausoleum at Castle Howard between 1729 and 1737, his bill for this including carved stonework. Robinson, who was later joined by his son, Christopher, also received £109 for building the
steps to the south front of Castle Howard. In 1753–1758 he was the mason for building the “New Wing” to the house (Castle Howard Archives).

ROGERS, —, of Tavistock

He signs a wall-tablet, with a relief of a seated mourning woman, to John Carpenter, 1813, in the church at Tavistock, Devon.

ROGERS, PHILIP, of Swansea

ROGERSOON, W., of London

ft. 1794–1800

Rogerson, whose yard was in Gerrard Street, was declared a bankrupt in 1800. His monument to George Madocks, 1794, at Gresford, Flint, has a fine portrait-bust, and he signs others to Captain James Thresher, 1794, at Fareham, Hants; John Bull, 1794, in St. Thomas’s Church, Lewes; and the Keane family, 1796, in Barbados Cathedral.

ROPER, WILLIAM, of Preston

In 1782 he built an obelisk, 33 ft. high, which stood in the old Market Place at Preston until 1853, when it was taken down (Borough Archives). His son, R. Roper, signs a tablet to Edward Buckley, 1816, at Penwortham, Lancashire.

ROSE, JOSEPH, the Elder

ft. 1721–1735

He was born about 1696, the son of John Rose, a gunsmith of High Wycombe, Buckinghamshire. In 1710 he was apprenticed to James Paget (q.v.) and became free in 1721.

Rose’s two signed monuments—grand and imposing works with life-size reclining figures and elaborate architectural settings—place the sculptor in the front rank of early eighteenth-century statuaries. The first, to Sir John Packington, 1727, at Hampton Lovett, Worcestershire, has a reclining figure in contemporary costume, while from an arched pediment behind falls a curtain inscribed with the epitaph. The second, to Richard Ladbroke, 1730, at Reigate, Surrey, is described as follows in the Topographer of 1798 (Vol. III, page 274): “The base is ornamented with skulls, bones, etc. Between the two very lofty variegated marble pillars of the composite order, is the figure of an elderly man, in a reclining posture, supporting himself by his right arm, and in his left hand is a celestial crown; on one side is Justice and on the other Truth,—both as large as life; above are two angels with trumpets and palm-branches, and in the centre is a resplendent sun. On a pyramid which forms part of the background is the inscription.”

Rose’s yard was at Cow Lane, West Smithfield; he was declared a bankrupt in 1735 (London Magazine, 1735, page 100).

ROSE, JOSEPH, the Younger

b. 1744

He was the third generation of his family to be called Joseph, his grandfather being Joseph Rose the Elder (q.v.), and his father that Joseph who became a freeman of the Masons’ Company in 1733.

In 1765 Rose was awarded a premium of ten guineas by the Society of Arts, in whose journal it is stated that he was then living with his father “opposite Portland Chapel, Cavendish Square.” He joined the Royal Academy Schools in 1770, but went to Italy in the same year. From Rome he sent a bas-relief to the Academy, and in 1771 exhibited “A Sacrifice to Hymen.”

ROSS, H.

ft. 1851–1867

He showed wax statuettes of Wellington and Peel at the Great Exhibition of 1851, and at the International Exhibition of 1862 a group entitled “Home Sweet Home.”

Ross exhibited at the Royal Academy, 1858–1867, showing busts, and also a model of a marble figure for a church at Clapham. His colossal bust of Wellington was formerly at the Crystal Palace.

ROSETTER, JAMES MARMADUKE, of the Borough

ft. 1777–1800

Son of “Thomas Rosseter, Gentleman, of the Bank of England,” he was apprenticed to Robert Clemens in 1777, becoming free in 1784. Seven years later he took his son, Richard Baker Rosseter, as an apprentice, and his name continues to appear in local directories until 1818.

It is the elder Rosseter who signs a large wall-tablet to Anthony Hall, 1799, in St. George the Martyr, Southwark.

ROSSI, FREDERICK ORTON

b. 1812, d. 1851

He was a son of J. C. F. Rossi (q.v.) by his second wife, and in 1830 was awarded the Silver
He later joined the firm of Coade (q.v.) at Lambeth, where he gained considerable experience in the art of modelling in terra-cotta. During his later career as a sculptor he frequently worked in this medium; indeed, according to the Gentleman's Magazine (1827, Part II, page 395), he invented a composition of terra-cotta which "it is hoped will rival in firmness and durability the same description of material of the ancients." In 1781 he first attended the Royal Academy Schools and three years later won a Gold Medal for a group entitled "Venus Conducting Helen to Paris."

In 1785 Rossi won the Academy Travelling Studentship and went to Rome for three years. Here he carved a marble relief for the Academy Exhibition, but after its arrival at Burlington House he received a letter from the Council informing him that they were "of opinion that his time would be more properly employed in modelling than in working in marble" (Royal Academy Archives). Notwithstanding this admonition, he also made a marble statue of "Mercury" for Lord King (Art Union, 1839, page 22).

Soon after his return to London the sculptor went into partnership with J. Bingley (q.v.). It was to this episode in his career that he referred when he told Joseph Farington "that he became a partner with a mason-sculptor in John Street by which he lost much money" (Farington Diary, Vol. III, page 94). In 1796 the partners made the terra-cotta statues of "Music" and "Dancing" for the Assembly Rooms at Leicester. In 1790 Rossi had been paid £240 for "modelling, moulding, casting in plaster and executing in Portland stone two colossal lions 10 ft. 3 in. long erected at the western water-gate" of Somerset House (R.I.B.A. Library MS. 335A), and four years later he won a premium of fifty guineas from the Society of Arts for his group of "King Edward I and Queen Eleanor." In 1798 he was elected an Associate of the Royal Academy, becoming a full member in 1802.

During his lifetime Rossi was a popular sculptor and as such was selected to design and execute several of the national monuments in St. Paul's Cathedral. In this he was not particularly successful and his work aroused a good deal of adverse criticism. Flaxman said of his monument to Captains Moss and Riou that "it was rather mason's work than that of a sculptor," while Farington added that "Rossi had by employing ordinary men at low wages got much money by it, but had greatly suffered in reputation" (op. cit., Vol. III, page 238). The diarist also noted the opinion of N. Marchant that the monuments were "very badly designed and executed. Rossi

ROSSI,
JOHN CHARLES FELIX, R.A.
b. 1762, d. 1839

He was born on 8 March, 1762, at Nottingham, the son of an Italian from Sienna who practised medicine. As a young man Rossi studied sculpture under Locatelli (q.v.) and, at the expiration of his apprenticeship, remained with his master for a short time at the meagre wage of eighteen shillings a week. In 1788 he was working at the Derby China Works and in 1789 was with Vulliamy the clock-maker.
could do nothing without Smirke's designs” (op. cit., Vol. III, page 182).

In 1806 Rossi sent in a design for the Guildhall monument to Pitt, but to his chagrin the commission was awarded to his pupil, Bubb (q.v.). Rather tactlessly the Committee then wrote to the sculptor asking him for his opinion of Bubb. In his reply Rossi confessed he had received their letter with “considerable mortification” but continued that his “resentment gradually changed into a settled contempt for civic taste and civic liberality.” Of the unfortunate Bubb he coldly remarked that “the young man concerning whose abilities they are now anxious to be informed it is true was a pupil of mine, but not having been employed during his continuance with me upon anything by which he could acquire any practical skill in the execution of such works as the one proposed, and as I have had no communication with him or knowledge of his progress since he left me, I cannot conceive myself authorized to give any opinion as to the executive ability of Mr. Bubb” (City Corporation Records, MS. 95.2).

In 1816 King Christophe of Hayti invited Rossi to come out to the island and execute sculpture for the palaces which the King was then building. Rossi was tempted by this offer for, according to Farington, he had “of late been very unfortunate, being without a professional commission for a year and a half past” (op. cit., Vol. VIII, page 76). However, the terms of the contract seemed so vague and uncertain that he decided to remain in England. Curiously enough, one of his sons, A. C. Rossi, later emigrated to the Barbados and set up as a monumental mason. Here he executed a number of tablets between 1819 and 1830, including those to Jane Edwards, 1819, A. M. Clinton, 1820, H. J. Lorraine, 1821, and J. W. Fletcher, 1824, all in Barbados Cathedral.

In 1819 Rossi and another son, Henry (q.v.), entered into a contract to execute the terra-cotta decorations of the new church of St. Pancras for £4,300, their chief contribution consisting of the four colossal female caryatids which form so prominent a feature on the north side of the building. Each figure bears in one hand a cew and in the other an inverted torch—the latter a symbol of death, for between them are the folding iron doors leading to the catacombs. Inwood, the architect of the church, obtained permission to take complete casts of the caryatids of the Erechtheum in Athens, and these were then copied by Rossi in terra-cotta. The figures were made in pieces and then cemented round the cast-iron pillars which are the real supporters of the

In 1797 Rossi had been appointed sculptor to the Prince of Wales, afterwards George IV, a post he held until the latter's death in 1830, when he became sculptor in ordinary to William IV. His bust of the Prince was apparently very successful, for Farington quotes Flaxman as saying that “it was worth all that Nollekens had done” (op. cit., Vol. III, page 55). For Buckingham Palace he carried out a good deal of work in artificial stone, receiving £500 in 1827 and £1,766 two years later (P.R.O., Works 19/3 and 5/119). Two friezes executed in this material depicted “The Progress of Navigation” and “The Seasons,” the latter pleasing “George IV so much that he directed Mr. Nash, the architect, to give Rossi any part of the sculpture he wanted” (Gentleman's Magazine, 1839, Part I, page 548).

Rossi exhibited at the Royal Academy, 1782-1834, and at the British Institution, 1806-1834. In 1835 a sale of the contents of his studio was held by Robins the auctioneer and a list of the more important lots sold is given below, the sum paid in each case following in brackets: “Eve at the Fountain, recumbent figure slightly less than natural size” (200 guineas); “Parental Affection, a Father Protecting His Child from a Wolf” (£19 18s. 6d.)—a terra-cotta model, now in the Soane Museum; “Marble Bust of Nelson” (45 guineas); “Marble Statue of Mercury” (£190); “Group of Zephyrus and Aurora” (£150); “The Poet Thomson in His Study, Marble Statue, lifesized” (£320, bought by Sir Robert Peel); “Bronze Equestrian Figure of Wellington Attended by Fame and Victory, 32 inches high” (£96 guineas); and a “Marble Chimney-piece, 4 foot high with bronze group of Shepherds and Nymphs” (180 guineas).

B. R. Haydon, the painter, says in his autobiography that he lodged with Rossi in 1817. He calls him “a singular man” who “had made by commissions £10,000, but he had such an appetite for bricks and mortar he would let no tenant repair his house.” After the sculptor’s death on 21 February, 1839, the Art Union (1839, page 221), however, wrote that “our Nobility have no space for masses of hewn stone and Mr. Rossi found but few patrons . . . and he bequeathed to his family nothing but his fame.” The family was, in truth, an extremely large one, for Rossi had married twice and had had eight children by each wife. Indeed, in 1834 he had been forced to write to the Royal Academy stating his great distress and urging the Council to afford him immediate assistance,” and in 1835 had been granted the pension of a superannuated member—one
hundred guineas a year. In 1842 the Academy made a gift of £10 to his widow, and in the following year one of £20 to his unmarried daughter (Royal Academy Archives).

Admiral Lord Rodney
Rouéliac, Louis François
b. 1705 (?), d. 1762

He was born at Lyons and was apprenticed to
Permoser (1651–1732), who was then living at
Dresden as sculptor to the Elector of Saxony.
He later became assistant to Nicholas Coustou,
and in 1730 received the second Grand Prix for a
group (now lost) representing “Daniel Saving
Susannah when she was Condemned to Death.”

Rouéliac seems to have come to England about
1732 and here he was employed by either Benjamin
(q.v.) or Thomas Carter (q.v.). The foundation
of his fortune, however, was laid by a lucky chance.
When returning from Vauxhall one evening he
came upon a pocket-book containing bank-notes
and valuable papers and, having discovered that it
was the property of Sir Edward Walpole, returned
it to its owner. Walpole was so struck by the young
man’s honesty and also by the specimens of sculp-
ture shown to him that he promised his patronage.
He kept his word by introducing Rouéliac to Sir
Henry Cheere (q.v.), who thereupon engaged him
as an assistant.

In 1735 Rouéliac married Catherine Helot and
two years later received his first independent
commission—the famous statue of Handel for
Vauxhall Gardens, the original terra-cotta of
which is in the Fitzwilliam Museum, Cambridge.
He received three hundred guineas for it (a large
sum for a practically unknown sculptor), and it
proved so overwhelming a success that in a year
he was able to set up for himself in a studio in St.
Martin’s Lane. Here he executed commissions for
busts and also carved a number of monuments for
country churches, but it was not until 1748 that he
received an order for a monument for Westminster
Abbey, that of the Duke of Argyll and Greenwich.
This work, Vertue considered, not only showed
“the greatness of his genius in his invention,
design and execution, in every part equal, if not
superior, to any others,” but also outshone “for
nobleness and skill all those before done by the
best sculptors this fifty years past” (Walpole

A year or so later Rouéliac was employed for a
short period as a modeller at the Chelsea china
factory, and in 1752 he married for the second
time, his first wife having died before 1751. How-
ever, he was soon a widower again, for his bride
(Elizabeth Crosby, of Deptford, a considerable
heiress) appears to have died shortly after their
marriage. Towards the end of 1752 he travelled to
Italy in the company of various other artists,
visited Rome, and in Florence was joined by J.
Wilton (q.v.).

Rouéliac, who in 1745 had been appointed
lecturer on sculpture at the St. Martin’s Lane
Academy, became in 1755 a member of the Com-
mittee formed to bring the works of English artists
to the notice of the public. About five years later
he married again, his third wife being Nicole
Reignier. He died on 11 January, 1762, and was
buried in the graveyard of St. Martin-in-the-
Fields.

Rouéliac was probably the greatest sculptor
to work in England during the eighteenth century.
His busts are unsurpassed, for he had the seeing
eye, as well as the skilled hand. Sir Joshua
Reynolds remembered the sculptor’s comments
when he was making a bust of Pope from life and
how he observed “that the poet’s countenance was
that of a person who had been much afflicted with
headaches and he should have known the fact
from the contracted appearance of the skin above
the eyebrows, though he had not otherwise been
apprised of it” (Prior’s Life of Malone, page 429).
Vertue (op. cit., page 162) probably gave the best
description of Rouéliac’s work when he said that
“his models of statues, monuments, busts are very
curious and excellent, with great skill and variety.
His inventions very copious and free—picturesque
—so light and easy—as painting.”

At the sculptor’s sale, held from 12–15 May in
the year of his death, a number of his casts and
models were purchased by Dr. Matthew Maty
and presented on 28 May following to the British
Museum. The details of this gift were as follows:
“Socrates, Plato, Demosthenes, Tully from the
antique; Marcus Aurelius from a cast brought
from Rome; Charles I, Oliver Cromwell and
Shakespeare, models in terra-cotta; Milton, Pope,
Dr. Mead, Mr. Folkes, Lord Chesterfield, casts in plaster; Ray Willoughby, Dr. Barrow and Dr. Bentley, original models in terracotta, from which the marble busts in Trinity College, Cambridge, were executed.”

Mrs. Esdaile, in her outstanding and important Life of Roubiliac, gives a very full list of all his works. In the briefest one which follows, I have only noted those which I have myself seen and found signed, or which are indisputably the work of the sculptor. I have ignored those which are attributed to him by Mrs. Esdaile on perhaps not absolutely unimpeachable evidence.

His most famous monument, of course, is that to Lady Elizabeth Nightingale in Westminster Abbey. It has been attacked as theatrical and over-dramatic, but the late Lord Mamhead told the writer that Lady Elizabeth was frightened by a sudden flash of lightning when walking on the terrace at Mamhead, Devon, on 17 August, 1731, and that the sudden shock caused the premature birth of her child and her own death—a story which throws light on the sculptor’s design of the skeleton Death with his pointed dart striking his victim down. The inscription on the monument (which was not erected until thirty years later) gives the date of Lady Elizabeth’s death as 1734, a curious blunder, for the actual date is not in question and, as additional proof, her husband’s will, signed 25 October, 1731, directs that he is to be buried near her in the Abbey.

Since Mrs. Esdaile’s book was written, a few other facts about the sculptor’s works, etc., have come to light.

At the sale of — Phillipson (q.v.), one of the lots sold was “a bust of Time by Roubiliac” (Archives, Messrs. Christie). At Mr. Christie’s sale of the property of “A Gentleman” held on 25 April, 1804, one of the principal lots was “Bust of Shakespeare by Roubiliac. This delightful work of sculpture was executed by that distinguished artist himself from the celebrated painting then belonging to Mr. Keek, and since then to the Chandos family. He never parted with his fine performance, but it remained with him till the time of his death.” The work fetched 170 guineas. On 29 March, 1805, Christie held a sale for a “Man of Fashion.” One of the lots was “Tarquin and Lucretia, a singularly fine model in terracotta by the celebrated Roubiliac, undoubted, with glass shade.” At the same sale were his terracotta models for busts of Handel and Pope.

At the sale of a “Mr. Jackson” held by Mr. Christie on 22 July, 1807, Lot 88 was “Roubiliac’s model of the Nightingale monument.” (Archives, Messrs. Christie.) The model of Hogarth’s dog “Trump” was Lot 238 in James Brindley’s sale in 1819, and was bought by someone giving his name as “Triphook.” At the Shugborough Hall sale of 1842 the following busts were sold as by Roubiliac (the amount each fetched and the name of the purchaser being given in brackets): Shakespeare (36 guineas, Lord Derby); Locke (62 guineas, Colnaghi); Demosthenes (27 guineas, Woodin); Homer (30 guineas, Colonel Anson); and Mark Anthony (25 guineas, Brown). In the sale of the Peel heirlooms, held by Robinson and Fisher on 10 May, 1900, were included the sculptor’s busts of Pope (£535); Racine (£178); Molière (£325); Voltaire (£267); and Rousseau (£110). Roubiliac’s terra-cotta statuette of Shakespeare, dated 1757, is in the Victoria and Albert Museum, while at Kimbolton Castle was a signed bust of Cromwell, but in my opinion this is a later copy based on a lost original.

(Mrs. Esdaile’s Life of Roubiliac; authorities cited in text.)

ROUCH, ARTHUR
b. 1779, d. 1839

He exhibited wax models, etc., at the Royal Academy, 1818-1833, and at the British Institution, 1821-1832. One of these showed a “Providential Escape in Hunting the Tiger of a European who was torn from the Back of an Elephant and carried several Miles by the ferocious Animal.” As a widower he married at St. James’s, Clerkenwell, on 12 December, 1833, Frances Moore, a widow. Rouch died 11 August, 1839 (Archives, Artists Annuity Fund).

ROUW, HENRY
fl. 1795–1834

Son of Peter Rouw the Elder (q.v.), and brother of Peter Rouw the Younger (q.v.), he is presumably the Henry Rouw who exhibited paintings at the Royal Academy from 1796 until 1803.

As a statuary Henry was not the equal of his brother. His best works are the monuments to Jane Akers, 1804, at Yalding, Kent, and to the brothers Colonel Aubrey and Captain Thomas Aubrey, 1806, in Paddington Parish Church. The former has a relief of an angel bearing a child heavenwards, while the latter has a figure of Victory standing by a sarcophagus on which are medallion portraits of the two officers.

Other monuments signed by Henry Rouw include those to Mrs. Gazeley, 1795, in Hornsey Parish Church; Rev. R. Henning, 1798, Great Canford, Dorset; Mary Burton, 1801, at North Cave, Yorks; Eleazar Davey, 1803, at Yoxford, Suffolk; Elizabeth and Joanna Cure, 1804, at Bovinger, Essex; Diana Miller, 1805, in Exeter Cathedral; Charles Purvis, 1808, at Darsham,
Suffolk; Edward Pocock, 1813, in Twickenham Parish Church; James Hill, 1814, at Uppingham, Rutland; the Rev. George Burvill, 1819, at Charing, Kent; Elizabeth Fowke, 1820, at Chelsworth, Suffolk; and John Fuller, 1834, at Brightling, Sussex.

**ROUW, PETER, the Elder**

*fl. 1787–1793*

Between 1787 and 1793 he exhibited wax portraits and a figure for a chimney-piece at the Royal Academy. The former included those of A. Carlini, R.A., and Lord Fife.

**ROUW, PETER, the Younger**

*b. 1770, d. 1852*

He was born on 17 April, 1770, the son of Peter Rouw the Elder, and attended the Royal Academy Schools in 1788. The younger Rouw and his work link the two centuries, for he exhibited at the Academy in 1794 and lived long enough to send a collection of his wax portraits to the Great Exhibition of 1851.

In 1807 he was appointed “sculptor-modeller of gems to H.R.H. the Prince of Wales.” In 1816 he received £23 for carving the tablet designed by Soane recording the history of Daylesford Church which had been rebuilt by Warren Hastings; the bill for this work is in the Soane Museum.

Rouw’s monuments are in the classic style; they are all well carved and a number of them have medallion portraits. He was a most versatile artist, for besides working as a statuary, modelling wax portraits and cutting gems and cameos, he also designed medals, including one of Wilberforce. In 1823 he showed at the Royal Academy “a device proposed for an Indian coinage from a design by John Flaxman, R.A.”

Between 1825 and 1829 Rouw executed a series of bronze busts for Sir John Thorold’s library at Syston Hall. His wax portraits of James Watt (1802) and William Pitt (1809) are at the National Portrait Gallery, while others at the Victoria and Albert Museum are of C. J. Fox (1806), the Prince Regent (1812), Thomas Sheldon (1812), Matthew Boulton (1814), Lucien Bonaparte (1814), Wellington (1818) and the Princess Charlotte (1818).

Rouw was a friend of Nollekens (q.v.), who left him £100 and a slab of marble in his will, while Mrs. Rouw received a legacy of £20. In 1842 Rouw seems to have been in financial difficulties, for the Royal Academy granted him £30 as a “charitable gift” (Royal Academy Archives). He died at Pentonville on 9 December, 1852, having lost the sight of one eye in 1840.

</table>
ROWE, SIMON, of Exeter
fl. 1840-1850
His work seems to have been confined to Devonshire, where in 1842 he executed all the ornamental stonework for Exwick Chapel (Gentleman's Magazine, 1842, Part II, page 523) and in the following year the font for Exeter Cathedral (Builder, 1843, page 372). The font and pulpit for Holy Trinity, Barnstaple, were carved by him in 1845 (Gentleman's Magazine, 1845, Part II, page 186), and in 1846 he carried out the freestone work at Heavitree Church, near Exeter (Builder, 1846, page 393).

ROYAL, THOMAS
He exhibited wax portraits at the Society of Artists, 1770–1776. His address is given as "At Mr. Brown, hairdresser, in St. Clement's churchyard."

ROYCE, N., of Bury St. Edmunds
He signs the large and important monument to Jacob Harvey, 1723, at Cockfield, Suffolk. This is nearly 18 ft. high and has, as its central feature, a sarcophagus on which is set a well-carved bust of a young man, clad in a coat and scarf and wearing his own hair. The setting is architectural, with Corinthian pillars and pilasters of variegated marble supporting a heavy triangular pediment with a large coat of arms at the apex.
It is curious that there is no trace of his name in the apprentices' or Freemans' lists of Bury St. Edmunds, nor do I know any other work by him, yet Harvey's monument shows that Royce was a skilled and competent statuary.

RUSH, —, or RUST, of Norwich
He signs a large wall-tablet to Isaac Preston, 1708, at Beeston St. Lawrence, Norfolk. This is an ambitious work, 9 ft. high, with an urn surmounting a curved pediment and flaming lamps to left and right. The coat of arms at the base has elaborate mantling.

RUSHWORTH, —, of Beverley
He signs a large wall-tablet to Anna Fox, 1811, at Etton, Yorkshire.

RUSSELL, T. H.
b. 1809
He lived in Birmingham, where he showed "Achilles" and a "Bust of a Lady" at the exhibition of the Society of Artists held in 1829. In 1832 he joined the Royal Academy Schools, exhibiting "Innocence" at the Academy in the same year.

RYLEY, —
According to Augustus Hare (Walks in London, Vol. I, page 285), he executed the monument erected in St. Peter's, Cornhill, to the memory of the seven children of Mr. and Mrs. Woodmason, who in 1782 were burnt to death in their beds in their father's house in Leadenhall Street.

RYLEY, E.
fl. 1833–1837
He exhibited various busts at the Royal Academy, 1833–1837, including those of George Birkbeck, Daniel Harvey, M.P., and Andrew Amos, the last-named being for University College. In 1836 he showed a bust of the Rev. J. Yates at the Liverpool Academy.

RYSBRACK, JOHN MICHAEL
b. 1694, d. 1770
His father, Peter Rysbrack, was a landscape painter and etcher of Antwerp who apparently worked in England, until the outcry against Catholics following the "discovery" of the Popish Plot forced him to leave the country and settle in Paris. He later returned to his native city, where he died in 1728, aged eighty.
Rysbrack himself was trained as a sculptor under Van der Voort. Vertue has the following entry in his notebook under the date October, 1720: "Came into England Michael Rysbracht, statuary (son of . . . Rysbracht of Antwerp, an excellent landscapes painter), his models in clay are very excellent and shows him to be a great Master, tho young (about 26 years old); he is of Antwerp and there and at Brussels has lived till he came to England. He was recommended to Mr. Gibbs, architect" (Walpole Society, Vertue, Vol. I, page 76).
Vertue considered that Gibbs underpaid his assistant, and gave as an instance the monument to Prior in Westminster Abbey, which Gibbs designed and for which Rysbrack carved the figures, though the bust is by Coysevox. "He [Gibbs] will give him no more than £35 for each statue to be cut in marble," he remarks, "while others have above £100, and Gibbs is to have of my Lord Harley upwards of £100 for each of these statues. Many other things of this kind he has done by him. 'Tis an unreasonable gripeing usage to a most ingenious artist (in his way) far more merit than Gibbs will ever be mr. (master) of." (Op. cit., Vol. III, page 17.)
However, Rysbrack was fortunate enough to make a bust of Lord Nottingham which attracted a good deal of attention, and the indefatigable Vertue, when he visited his studio in 1732, found
over sixty busts of historic and contemporary notabilities, ranging from Palladio, Cromwell, Spenser and the Black Prince, to Tillmans, the Dukes of Argyll and Kent, and Mr. Dahl the portrait-painter (op. cit., Vol. III, page 56). Many of these cannot be identified, though "Mr. John Straughan, surveyor of Bristol," may be one of a pair in Redland Chapel, Bristol, the builder of which was John Cossins, for whom Strachan had designed the neighbouring Redland Court.

Rysbrack was the acknowledged head of his profession, and reigned unchallenged until P. Scheemakers (q.v.) carved his statue of Shakespeare for Westminster Abbey. This, Vertue says, established the latter’s reputation, “but at the same time obliterated in some degree that of Rysbrack insomuch that he feels the effects in a decline of business.” In addition, Rysbrack’s lowest fee for a bust was thirty-five guineas, while Scheemakers “wd and dos for near ten gns. less; but that is the difference every one can distinguish tho in point of skill, likeness, etc., there is difference sufficient to those who know better” (op. cit., Vol. III, page 116).

Rysbrack’s famous statue of Hercules, now at Stourhead, was begun in 1747, according to Vertue (though not paid for till 1757). The sculptor found “himself somewhat at leisure, business not being so brisk (as had been with him some years before). He therefore set himself about a Model of Hercules” (op. cit., Vol. III, page 121). Walpole says the statue was “compiled from various parts and limbs of seven or eight of the strongest and best made men in London, chiefly the bruisers and boxers of the then flourishing amphitheatre for boxing; the sculptor selecting the parts which were most truly formed in each.” Vertue later says it took the sculptor “the study and labour of five years to complete.”

Rysbrack retired from business in 1765, and on 8 January, 1770, died at Vere Street, Oxford Street (where he had lived for many years), and was buried in Marylebone churchyard. His will was proved 26 January, 1770. A three-day sale of his prints and drawings was held by Messrs. Christie, 7-9 February, 1774.

In an undated sale catalogue of the effects of "A Person of Note Abroad" (c. 1735), auctioneer Mr. Miller, the following lots are described as being by Rysbrack: "Marble basso-relievoos of his late Majesty King George and Inigo Jones, two basso-relievoes after the antique, two models of boys."

In Rysbrack’s own sale, held by Langford on 24 and 25 January in the year after his retirement, part of his collection of models, drawings, etc., were auctioned, and among the models of monu-

ments sold were those of Mr. Knight, Chief Baron Ward, William Young, the Duke of Beaufort, and Sir John Dutton. Other sales followed in 1767 and 1770. At the first Mr. Hoare bought five terracotta bas-reliefs, now at Stourhead, while Lord Radnor paid £59 for a statue of "Fame," which is now at Longford Castle.

One of the earlier notices relating to Rysbrack in the Press appeared in the Free Briton on 16 August, 1733, and runs as follows: “I do not wonder to see Rysbrack encouraged by so many of the British nobility. It hath been allowed in his praise that he never undertook any great work but with an industry which far exceeded his reward, and always showed that he wrought more for Reputation than any other Recompense.” Later in the same article the writer says: "I know not whether Rysbrack be Whigg or Tory. I know him to be a good statuary and believe him to be an honest man, an impartial sculptor. If he hath made a bust of Sir Robert Walpole, he hath made a monument for the late Daniel Pulteney.”

In the Gentleman’s Magazine of 1735 (30 June) the following paragraph occurs: “Her Majesty has ordered Mr. Risbrack to make the busts in marble of all the Kings of England from William the Conqueror in order to be placed in her new buildings in the gardens at Richmond,” while the London Magazine states in the same year (page 390) that he is carving statues of the Black Prince and King Alfred for the “octagon in the garden of the Princess of Wales in Pall Mall.” According to Pyne’s Royal Residences (Vol. III, page 2), the figures were later to be found at Old Carlton House. (See Guelfi, G. B.)

In the accounts of the trust estates of the Earl and Countess of Oxford with Sir Francis Child is a payment to Rysbrack, dated August, 1740, of £63 13s. 6d. and another of £47 7s. 4d. on 9 July, 1741, while in the "schedule of debts" of Lord and Lady Oxford there is a note of a bill of the sculptor’s amounting to £191 ls. (Archives, West of Alsnot Park). Some of these payments must be almost certainly for the busts of Lady Margaret Harley and an infant son of Lord and Lady Oxford, both of which are now at Welbeck Abbey.

Writing to Sir Edward Littleton in 1756, Rysbrack says that he is making two marble chimney-pieces for the saloon of the Duke of Bedford “with Women, Thernes, Ornamented with festoons of Fruit and Flowers, and Friezes with Corncupias of Fruit and Flowers, and a Ram’s Head in each, Ornamented with Flowers as rich as can be.” Rysbrack also says that he is making a chimney-piece for the Earl of Hopetoun “near 10 feet long, and 6 feet and near 10 inches high, with Women, Thernes, cloathed with
In the Newdigate Archives is Rysbrack's bill for £132, dated 1732, for "the monument and bust of Sir Richard Newdigate" erected in Harefield Church, Middlesex, while at Barkway, Hertfordshire, is his monument to Admiral Sir John Jennings. Apparently the original idea of the Admiral's son, George, had been to set up a memorial in Westminster Abbey, and in 1743 he wrote to Mr. West asking him to see Rysbrack about it. The size of this work as first contemplated meant asking Lady Oxford's permission to remove "part of the rail" round the monument to her father the Duke of Newcastle, and it was probably because she refused that the whole project had to be abandoned. (Archives, West of Alscot.)

There are a number of the sculptor's sketches and designs for monuments in the Victoria and Albert Museum, including those of Sir Watkins Williams Wynn, Lord Foley, Admiral Vernon, Sir Edward Prideaux, Nicholas Rowe, Earl Stanhope, Milton, Viscountess Folkestone and Brian Duppa.

Horace Walpole thought very highly of Rysbrack and described him in *Anecdotes of Painting* as "the greatest master the islands have seen since Le Sueur." This is perhaps rather exaggerated praise, although the sculptor's work was, as Vertue said, "beautifully and masterly done, admired by all artists and lovers of art."

Rysbrack's fellow artists seem to have collected his works, as at the sale by Messrs. Christie, 3 and 4 April, 1770, of Peter Vanina, "figure-maker of Dover Street," two of the lots were "Judgment of Hercules, by Rysbrack, a bassorelievo," and a "Bust of Virgil." Again at the sale of Edward Stevens, architect, on 7 February, 1776, a number of Rysbrack's works were sold, including "the original terra-cotta by Rysbrack of the Duke of Marlborough taking prisoner the Marshall Tallard"; a bust of Milton in terra-cotta and "boys in terra-cotta, the original design for the Great Saloon at Bedford House."

The sale of Joseph Vanhaecken, "drapery painter," was held by Langford in Covent Garden in 1751 on 11 February, and the following fourteen evenings. Original works by Rysbrack included "Head of Proserpine," "King William on Horseback," busts of "Palladio, Inigo Jones and Bacchus," "Two terms" and "original models of Rubens, Van Dyck and Fiamingo." At the sale of George Vertue on 17 May, 1757, lot 27 was a "small head of Milton, finely modell'd by Mr. Rysbrack in an oval frame."

At the sale of Matthew Nulty on 27 March, 1783, Lot 88 was "a fine bust of Gibbs by Rysbrack," and in the same year at the great sale of the contents of Sir Gregory Page's house at
Blackheath, which began on 23 April, Lots 50−53 on the fifth day were nine unnamed marble busts, "very capital sculpture by Rysbrack." An MS. note in the catalogue gives the name of the purchaser of all the busts as "Lloyd." At the sale of Thomas Hudson of Twickenham on 25 February, 1785, two lots by Rysbrack were a plaster cast of King William on Horseback and two terracotta angels from the Duke of Marlborough's monument at Blenheim. Three years later when Mr. Christie sold the belongings of Mr. Lyde Brown on 30 May, 1788, one of the items was "the original terracotta model for the great bas relief on the Duke of Marlborough's monument at Blenheim" (Archives, Messrs. Christie). At the sale of "An Eminent Publisher retiring from Business" held by Mr. Christie on 24 February, 1809, one of the lots was a "marble bust of John Hadley by Rysbrack." (Archives, Messrs. Christie, Information from Mrs. M. Webb; authorities cited in text.)

S

SABIN, THOMAS, of Ashby-de-la-Zouch
d. 1702

He was the mason for building Sir John Moore’s School at Appleby, Leicestershire, in 1697, where he was also responsible for all the carved stonework (Wren Society, Vol. XI, page 100).

ST. GEORGE, JOSEPH

At the exhibition of the works of Scottish artists held in Edinburgh in 1815 he showed a bust of Wellington. It was favourably noticed by the Scottish Magazine of that year (page 100) as being “freely modelled and the drapery very well cast.” The critic also added that “this young artist appears to be making rapid advancement and to feel his art.”

SALE, A.

He signs an altar-tomb to the Rev. John Jeffreys, 1824, in the churchyard of Barnes Parish Church, Surrey.

SALISBURY, JOHN, of London

Although I know of no work by him, his name is in Pigot’s London Directory of 1827 as “statuary of Highgate.” In the churchyard of West Malling, Kent, is the tombstone of Elizabeth, “wife of John Salisbury, statuary in this town and formerly both of Exeter,” who died in 1832 at the age of forty.

SALT, JAMES

He signs a tablet to Richard Roberts, 1738, at Pelynt, Cornwall. This is a small, architectural work with broken pediment and urn, and with a coat of arms at the base.

SAMS, THOMAS, of Piccadilly
fl. 1810–1837

His yard was in Down Street and in 1810 he was the mason for the rebuilding of Coventry House, Piccadilly, also receiving sixty guineas for “five veined marble chimney-pieces” (Archives, Earl of Coventry).

Sams’ tablets, which are classical in design, include those to Charles Pieschell, 1821, and August Pieschell, 1822, in St. John’s Wood Chapel; and to Thomas Hunter, 1831, and Frances Lincoln, 1836, both in Holy Trinity, Brompton.

SANDERS, J. J.
fl. 1812–1846

He was the son of “J. Sanders, a mason,” but as there are several craftsmen with this name and initial who might fill the bill, it is impossible to be more specific. There is, for example, a Joseph Sanders who joined the Royal Academy as “a sculptor” in 1775, but against whose name is an entry “to be discharged” (Royal Academy Archives); while a James Sanders, son of Joseph Sanders, goldsmith of Maiden Lane, was apprenticed to Samuel Newton in 1754 and became free in 1762.

J. J. Sanders was the mason who carried out repairs to St. John’s Church, Westminster, in 1812 (Churchwardens’ Accounts). In 1846 he carved the tablet to the memory of Mr. John Lydeker which was placed in the Royal Exchange (Illustrated London News, 1846, page 208). His monuments and tablets are dull and uninteresting, the best being that to Walter Strickland, 1839, at Standlake, Oxon.

Other tablets signed by Sanders include those to Thomas Dampier, 1812, in Eton College Chapel; Henry Whitfield, 1813, at Rickmansworth, Herts; Thomas Gibson, 1822, at Shelford, Surrey; Mary Cullum, 1830, at Hasted, Suffolk; Christina Kidd, 1831, at Hartfield, Sussex; Mariana Broucker, 1833, at Cranborne, Dorset; Emma Faulkner, 1833, at Whiteparish, Dorset; Catherine Filmer, 1834, at East Sutton, Kent; Frances Strickland, 1836, at Standlake, Oxon; Major Keighly, 1837, at Idlicote, Warwick; and Evan Roberts, 1837, in St. Matthew’s, Brixton.

SANDS, WILLIAM, of Spalding
d. 1751

He signs a tablet at Crowland Abbey to Elizabeth Cox, 1735. Sands himself was buried in Spalding Church, where a monument to his memory was erected by his pupil, Edward Hutchinson, but this disappeared when the church was restored.

SANGIOVANNI, BENEDETTO, of London
fl. 1827–1847

He exhibited at the Royal Academy, 1827–1847, showing models of animals and various works of a romantic nature, including statuettes of bandit chiefs and brigands of Calabria.
In 1844 the *Art Union* (page 97) described him as “an Italian gentleman who has been compelled by circumstances to adopt as a ‘business’ the occupation which he long followed as an accomplishment.” In the following year Sangiovanni exhibited his “Contadina of the Province of Salerno” at the Academy, which the same journal (1845, page 78) described as “perfect in costume and character and modelled with the utmost nicety of execution.”

**SANSBY, R., of Hull**

*fl.* 1815–1831

He signs three large wall-tablets at North Cave, Yorkshire, to Captain Barnard, 1815, Henry Barnard, 1815, and Sarah Barnard, 1831. The monument to Captain Barnard, who fell at Waterloo, has a well-cut trophy of arms.

**SANTLER, RICHARD**

*b.* 1761

He was born on 28 September, 1761, and attended the Royal Academy Schools in 1780, winning a Silver Medal two years later.

Santler exhibited wax portraits at the Royal Academy, 1785–1787, including those of George III and the Princess Royal.

**SAUNDERS, F.**

In Hereford Town Hall is his bust of Nelson, signed and dated 1842.

**SAUNDERS, P., of Windsor**

He signs a large wall-tablet to William Cook, 1828, at Horton, Middlesex.

**SAUNDERS, RICHARD**

*fl.* 1696–1715

Saunders, who was apprenticed to Samuel Taylor in 1687 and became free in 1696, later lived in King Street, Cheapside. He did a great deal of work for the Corporation of the City of London and also served as Captain in the City Trained Bands. In 1705 his name occurs in the minutes of the Committee appointed to undertake repairs to the Guildhall, where it is recorded that “Captain Saunders appeared again about the carving work to be done on the front of the chapel. He proposes to finish all the imagery, scrolls, pediments, arms, etc., for £45.” He is later mentioned as carving “dragons,” and in the end seems to have received a total sum of £72 (City Corporation Records MS. 117/3).

Saunders’ most famous works were the statues of Gog and Magog, carved in fir-wood, which stood in the Guildhall until they were destroyed by enemy action in the Second World War. The figures were ordered on 17 December, 1709, and though it is generally supposed that the Stationers’ Company presented them to the City, an entry in the City Cash Account (1/27) in 1713 seems to indicate that it was the Corporation who paid for them. The entry reads as follows: “Richard Saunders in full of his bill for making and carving the Giants and other work in the Guildhall and his time and expenses in and about the same by order of the Committee for repairing the Guildhall, £65.” In 1711 he had also received £25 for “carving about the City eighteen-oared barge” (op. cit.).

In 1710 Saunders was employed by Lord Ashburnham, who paid him £68 for work in connexion with the house then building in St. James’s Square, and a further £10 for carving four years later (Accounts of the first Earl of Ashburnham).

**SAUNDERS, SAMUEL**

*d.* 1743

He was presumably a brother of Richard Saunders (q.v.), and like him worked for Lord Ashburnham, who employed him at Ashburnham House, Westminster, in 1708 (Ashburnham Archives).

Saunders, who in 1717 took as an apprentice Thomas, son of Thomas Thompson of Waltham Abbey, Essex (P.R.O., I.R.1/6), was Renter Warden of the Masons’ Company in 1721 and Master five years later. He was also an officer in the City Trained Bands, and his death as “Colonel Saunders” is noted in the Court Book of the Company in 1743 (Archives, Masons’ Company).

**SAUNDERS, WILLIAM**

*fl.* 1748–1754

In the Westminster Poll-Book of 1748 his address is given as Windmill Street. In 1754 he was working as a mason on repairs to Coutts’ Bank in the Strand (Bank Archives).

Saunders must have died before 1767, for in that year his widow and son William were noted as living in St. Pancras when the latter was apprenticed to John Hinchliff. He became free in 1774 (Archives, Masons’ Company).

**SCHADOW, RUDOLPH**

*b.* 1786, *d.* 1822

Son of the famous German sculptor, J. G. Schadow, he signs the monument erected in 1819 at Wimborne St. Giles, Dorset, to the memory of Barbara, Countess of Shaftesbury, who had died eight years previously.
Scheemakers, Henry

D. 1748

He was the brother of Peter Scheemakers (q.v.) and was born in Antwerp. Some time after 1720 he came to England and went into partnership with Henry Cheere (q.v.). Together they were responsible for the vast monument to the first Duke of Ancaster at Edenham, Lincolnshire, with its architectural background and life-size figure of the Duke in Roman costume. Fausett the antiquary, writing in 1757, says that the cartouche tablet at Westbere, Kent, to Hammond Twyman, 1727, is also the joint work of Cheere and Scheemakers (Fausett Archives, private possession); it is, however, only signed by the former.

Henry Scheemakers left England about 1733 and, after living in Paris, died in Antwerp in 1748. According to Vertue, he was a small man, even shorter than his brother.

His three signed monuments, all of importance, commemorate Richard Graves, 1729, at Mickleton, Glos; Sir Francis and Lady Page, 1730, at Steeple Aston, Oxon; and John Bradbury, 1731, at Wyckens Bonant, Essex. The first of these has a medallion portrait, the second reclining figures of Sir Francis and his wife—he in his judge's robes, she, on a lower stage, looking up at him. The Bradbury monument is most surprising and unusual, and far excels in delicacy and refinement of carving anything executed by the sculptor's more famous brother. It has a baroque frame and a bas-relief of a youth in classical drapery, while the cherub-heads in the clouds above him are particularly striking.

Scheemakers, Peter

B. 1691, d. 1781

He was the son of Peter Scheemakers the Elder (1640–1713), a sculptor of Antwerp, and first worked as a journeyman in Copenhagen, where illness reduced him to poverty. He was, however, determined to study sculpture in Rome, and as he had no money for travel, realized his ambition by walking to Italy. After a short stay in Rome he went to London, and was employed by Francis Bird (q.v.) and Plunière (q.v.). During this period he became friends with his fellow-workman, L. Delvaux (q.v.), and together they executed various monuments (listed under "Delvaux, L.").

In 1728 Scheemakers, with Delvaux and the painter Angels, revisited Italy and remained there for several years. According to Vertue, he was "very assiduous in his studies in Rome" and "the number of models, busts, etc., so neatly and curiously finish, besides others works shows his great application to study, which in some measure surprised the Italian sculptors and other artists from England who do not usually use so much diligence in their studies nowadayes. Among the number of these models I well remember," Vertue continues, "the Faunus, the Young Bacchus, the Centaur with Cupid on his Back, the Venus Crouching, the Venus and Cockle-shell, the Gladiator, the Flora, and the Ceres; the Hermaphrodite and Woman one groupe, they well deserve to be made of more durable matter than clay" (Walpole Society, Vol. III, page 45).

When Scheemakers returned to England he brought with him, not only the models in clay, but also two or three marble statues copied from the antique. These were all carefully examined by Vertue, who declared his conviction that "no one master heretofore had brought so many complete works in that perfection of their own studies into England."

The sculptor first settled in St. Martin's Lane, whence he moved first to Old Palace Yard and then, in 1741, to Vine Street. His most successful work was the statue of Shakespeare in Westminster Abbey which, as Vertue said, "was so much spoke of in all conversations and in publick print" that it "effectually established his credit and reputation and at the same time oblitered in some degree that of Rysbrake." Both artists Vertue considered to be "certainly ingenious men," but "Rysbrake has long been at the top of fortune's wheel here, whilst the other has been (with the great labour, polish and finishing of his works gains upon the minds of most people) labouring below and broken with great fatigue to rise. At length, by this takeing object Shakespeare (the publick favourite of all English playwrites), tossd this sculptor above on the summit of the wheel and so became the admiration of the publick, immediately brought him into considerable employments of profit and honour and joyed to that some subtilitys nature had given to Scheemaker in the management of his affairs, boldness and also alyways underworking the other's price, added to his success" (op. cit., Vol. III, page 116).

Praise, however, seems to have turned Scheemakers' head and he was apparently very rude to Lord Oxford. Vertue records the incident and adds "this little fellow [Scheemaker] since he had done Shakespear mont. [monument] thinks himself above all others, and tells several such bold-faced stories of his own assurance without reserve, and the truth is when he says I am a little impudent fellow, no matter, I can't help it" (op. cit., Vol. III, page 108).

On 10 December, 1753, a sale was held of the sculptor's prints and drawings for, according to the catalogue, he "intended to retire from business."
Three years later, on 10 and 11 March, 1756, a further sale of his "models, marbles and pictures" was held at Langford's auction-room in the Great Piazza, Covent Garden. Lots in the earlier sale included "two models of lions in the Villa Medici," "Cupid on a Sphinx," and busts of "Flora," Cicero and Caracalla, while at the second auction were sold the model for the statue of Edward VI, busts of Locke, Dryden and Inigo Jones, and heads of a "Vestal Virgin" and "Zingara," both of which were purchased by Lord Radnor. The highest sums—£43 and £69 respectively—were paid for a statue of Shakespeare and a group of "The Laocoon," the latter being bought by Lord Lincoln. Yet another sale was held in 1757, but it is uncertain in which of the three were included the sketch-books with drawings, figures, etc. These were at one time in the possession of J. Nollekens (q.v.) and some of them are now in the library at Burlington House.

In spite of his declared intention to retire, however, Scheemakers continued working in England until 1771, when he finally settled in Antwerp, dying there on 12 September, ten years later. According to Nollekens, he grew so fat at the end of his life "that when he was kneeling down to say his prayers he placed his legs under him with his hands" (J. T. Smith's Nollekens and His Times, Vol. II, page 40).

Scheemakers' busts of Milton, Spenser, Shakespeare and Dryden were presented by Frederick, Prince of Wales, to Pope who, in his turn, bequeathed them to the first Lord Lyttelton. In 1857 the sculptor's busts of Swift and Milton were in the possession of the Rt. Hon. H. Labouchère.

According to Pyne (Royal Residences, Vol. II), Old Carlton House "possessed several massive chimney-pieces sculptured by Scheemakers, which were carefully removed by a Frenchman called Gaubier, and probably now decorate other mansions."

Of the sculptor's many monuments, those commemorating Charles Wathen, 1721, Anne Colleton, 1741, and Francis Sherwood, 1744, were destroyed or damaged when All Hallows, Barking, was burnt out during the Second World War, while a similar fate has presumably overtaken his monument to Dr. Richard Mead, 1754, in the Temple Church.

Mead during his life was a patron of Scheemakers, as at the Doctor's sale, held in 1755 on 11 March and following days, the sculptor's busts of Shakespeare, Milton, Pope and Alexander and a statue of Zingara were among the lots auctioned. At the sale of the collection of the Earl of Beasborough held by Mr. Christie on 7 April, 1801, one of the lots was "a beautiful small copy of Laco in terra-cotta, modelled by the late Mr. Scheemaker," (Archives, Messrs. Christie). At the sale of Nollekens' effects held by Mr. Christie on 3 July, 1823, two of the lots were "Piping Faun" and "Saturn and Child" by Scheemakers.

(Authorities cited in text; Sale catalogues, British Museum; Archives, Earl of Radnor.)

For Charles Jennens

1766 Head of a Girl
For Charles Jennens (for both see Dodsley's London, Vol. V, page 96)

? James Usher
Trinity College, Dublin

? Six members of the Shirley family
Staunton Harold, Leics

? Milton, Spenser, Dryden and Shakespeare
Hagley Hall, Worcs

? Viscount Cobham
Victoria and Albert Museum

? Antoninus Pius
Rousham, Oxon

? Ceres
Rousham, Oxon

VARIUS

1733 Chimney-piece of "statuary marble with mask and carved egg and anchor"
For Drawing-room, Moulsham Hall, Essex (£28 12s.) (Fitzwalter Archives)

1736 Chimney-piece
St. Thomas' Hospital (£16 16s.) (Hospital Archives)

1747 Chimney-piece
King Edward's School, Birmingham (School Archives)

1764 Chimney-piece
For Picture Gallery, Corsham Court, Wilts (£225) (Methuen Archives)

1765 (Relief) Et in Arcadia ego
Shugborough (Methuen Archives)

1765 Chimney-piece
For Red Drawing-room, Corsham Court, Wilts (Methuen Archives)

? Chimney-piece
For Green Damask Drawing-room, Ditchley, Oxon

? Chimney-piece
For Velvet Bedchamber, Ditchley, Oxon (for these see England Displayed, Vol. I, page 269)

? Two vases with reliefs of the Sacrifices of Apollo and the Sacrifice of Iphigenia
For Wanstead House (they were Lots 369 and 370 in the Wanstead sale, 1822, and were purchased for Leigh Court, Somerset, for £84 and £78 15s. respectively)

? Relief of "Alexander Visiting Darius"
Stowe (Lipscomb's Bucks, Vol. III, page 89)

? Relief on pediment
Temple of Concord and Victory, Stowe

1740 Westminster Abbey
Lord Aubrey

Beauclerk
SCHEEMAKERS

b. 1740, d. 1808

He was born in July, 1740, the son of Peter Scheemakers (q.v.) and worked in his father's studio, although he did attend the Royal Academy Schools for a short period in 1772.

In 1769 he received £42 from Lord Radnor for a "basso-relievo" for Longford Castle (Archives, Earl of Radnor) and in 1775 was paid £72 by the Drapers' Company for "executing the ornaments in the pediment of the Company's Hall in Portland stone from the design of the Company's surveyor Mr. John Gorham" (Court-Book, Drapers' Company). In 1777 he was working at Coshill, Berks, while in 1779 and 1780 he supplied chimney-pieces at a total cost of £118 for West Wycombe Park (Dashwood Archives). He seems also to have carved a number of tablets for chimney-pieces.

Scheemakers was apparently an architect as well as a sculptor, for in 1779 Lord Le Desprenger engaged him to design the portico for the Parsonage House at Mereworth, Kent. In the same year he executed busts of his patron and of Admiral Keppel. He exhibited at the Free Society, 1756-1783, and at the Royal Academy, 1780-1804, showing models for monuments and a bust of General Honywood (1782). His terra-cotta figure of "Orion" is in the Victoria and Albert Museum.

Scheemakers, who was a Roman Catholic, died on 15 July, 1808, and was buried in St. Pancras churchyard; the inscription on his tombstone (Cansick's Epitaphs, Vol. I, page 164), shows that he spelt his name "Sheemakers," and that his wife Barbara, who died at the age of sixty-three, survived him by two years and was buried in the same grave.

As a statuary, he worked in collaboration with James Stuart (1713-1788), and the latter is responsible for the design of several of the more important monuments. These include those to the fourth Earl of Shaftesbury, 1771, at Wimborne St. Giles, Dorset; Thomas Steavens, c. 1773, at Preston on-Stour, Glos; Ralph Freeman (with medallion portraits), c. 1773, at Braughing, Herts; Mrs. Mary Cocks, 1779, and the Rev. John Cocks, 1793, both at Eastnor, Hereford; and Thomas Bentley, 1780, in Chiswick Parish Church.

Scheemakers' best independent monument is the enchanting one to the memory of Mrs. Russell, 1786, at Powick, Worcestershire, which has a relief of a mother teaching her child music. Others executed by him include those to Jemmet Raymond (with busts), 1773, at Kintbury, Berks; Joseph Cocks, 1777, at Eastnor, Hereford; the Rev. William Langhorn, 1778, at Folkestone, Kent (the bill for this is in the Longford Castle archives); the Archbishop of Cashel, 1779, in Kilkenney Cathedral; Charles Fortescue, 1779, in St. Peter's Droitwich; Sir John Honywood, 1781, at Elmstead, Kent; Lord Faversham, 1784, at Downham, Wilts; Mrs. Cocks and Mrs. Neale, 1785, at North Minns, Herts; William Hendley, 1785, at Oatham, Kent; the Hon. and Rev. George.
SCHROWDER

Talbot, 1786, at Guiting, Glos (Gentleman’s Magazine, 1786, Part I, page 439); Lady Mary Wortley Montagu, 1789, in Lichfield Cathedral; Sir William Fagg, 1792, at Chantham, Kent; and Thomas and Catherine Wilson, undated, in Holy Trinity, Bungay.

Mr. Christie held a sale of his effects on 21 May, 1805—a number of plaster casts of the sculptor’s busts were sold including those of “Mr. Robertson, Admiral Keppel, General Honeywood, Dr. James, Filmer Honeywood and Lord Le Despencer”—also sold was the model of his monument to Mrs. Ogilvy. (Archives, Messrs. Christie.)

SCHROWDER, BENJAMIN

b. 1757, d. 1826

Schrowder, who was supposed to be a descendant, on his mother’s side, of the poet Milton, was born at Winchelsea on 15 November, 1757. In 1772 he joined the Royal Academy Schools and in 1781 exhibited various wax portraits at the Academy.

He later settled in Dublin, where he assisted Edward Smyth to carve the keystone (representing Irish rivers) for the new Customs House (Strickland’s Dictionary of Irish Artists).

SCOTT, J., of Penzance

fl. 1813–1825

His tablets are carefully carved and carried out. Examples of his work in Cornwall include those commemorating James Pascoe, 1813, and Philothea Thompson, 1825, both at Gulval; William Nicholls, 1815, at Madrom; and Mary Harrison, 1820, and John Rogers, 1821, both at Helston.

SCOTT, JOHN

fl. 1760–1765

He was “under twenty-two and a pupil of Mr. Cuenot” when in 1760 he received a premium from the Society of Arts for a “model of birds.” For the next four years he won further prizes from the Society for models of ornaments, festoons of flowers, etc. He exhibited at the Free Society, 1761–1762.

SCOTT, ROBERT

fl. 1742–1762

He was a son of Thomas Scott the Younger (q.v.) and became free of the Masons’ Company by patrimony in 1742. Three years later he was working as a mason at the Hampstead house of Mr. Christopher Arnold, one of the partners in Hoare’s Bank (Bank archives).

In 1748 Scott made the monument of Mr. John Nichol, father of the Marchioness of Carnarvon, which was erected in a church near London, possibly Colney. The bill for this is in the Stowe archives. In 1762 Scott took his son Edward as an apprentice.

SCOTT, THOMAS, the Elder

b. c. 1678, d. c. 1723

He was apprenticed to Anthony Leonard in 1692 and became free of the Masons’ Company in 1703. In 1714 he was appointed mason to the Inner Temple, receiving in the same year the sum of £80 for repairing the garden wall. Between 1719 and 1721 he carried out repairs to Hoare’s Bank (Bank archives).

In 1722 Scott’s son William was apprenticed to him, but he probably died in the following year, as his son Thomas is described as the “son of the late Thomas Scott” in 1724.

SCOTT, THOMAS, the Younger

b. c. 1703, d. 1757

Son of Thomas Scott the Elder (q.v.), he was apprenticed to John Lucas in 1717, and became free of the Masons’ Company in 1724. Between 1730 and 1742 he was mason to the Inner Temple, an appointment which had also been held by his father. Here his work included the circular steps “at the great gate of the Great Garden” in 1729 and, in 1741, “the Portland stone obelisks and posts” on the terrace (“Inderwick’s Inner Temple Records”). He also sings the large monument to John Elliston, 1741, at Gestingthorpe, Essex.

Scott was Master of the Masons’ Company in 1745, and his death in 1757 is noted in their Court Book. He had two sons, Robert and John, who became free “by patrimony” in 1742 and 1753 respectively, while a James Scott became free in 1758 “by service with Thomas Scott” (Archives, Masons’ Company).

SCOULAR, WILLIAM

d. 1854

He studied under Mr. John Graham at the Trustees’ Academy in Edinburgh and, about 1814, travelled to London, where he became a pupil of Sir Richard Westmacott (q.v.). In 1816 Scoolar received a Silver Medal from the Society of Arts for a statue of “Faunus” and, in 1820, the Isis Gold Medal for a group of “Brutus and His Son.” He had already gained the Royal Academy Gold Medal in 1817 for a relief of “The Judgment of Paris.” In 1825 he won the Academy Travelling Scholarship and went to study in Rome, remaining for some years in the city, though the
SCURRY

SEAGER, PETER, of Coventry fl. 1816–1830

He may be the son of the Seager of Rugby who signs a wall-tablet to Thomas Benn, 1788, at Clifton, Warwick.

Seager himself signs tablets in the same county to Thomas Lant, 1816, at Berkswell; Frances Prince, 1825, at Solihull; Edward Wise, 1826, and Edward Hobson, 1830, both in St. Paul's Church, Birmingham; and George Yates, 1828, at Aston, near Birmingham. At Watford, Northants, is his tablet to Richard Abbey, 1821.

SEALEY, THOMAS

He was employed as a marble mason under Wyatt at the rebuilding of Longleat in 1810 (Archives, Marquess of Bath). He signs the monument with a relief of “Hope” to Mrs. Kent, 1810, in Paddington Parish Church.

SEALY, JOHN b. 1749, d. 1813

Sealy, who was a cousin of Mrs. Coade (q.v.) on her father’s side, became her partner in the terracotta manufactory at Lambeth (for a list of their works, see under “Coade and Sealy”). His son and namesake exhibited at the British Institution in 1809 and at the Royal Academy in 1810 and 1811, and died 1817, aged twenty-eight; while another son, Thomas, employed at Lambeth, died on 7 January, 1804, as the result of an accident. He was only twenty when “passing through Pedlar’s Acre in the evening, it being very dark, he unfortunately ran against a short post which, striking him, occasioned his death” (Universal Magazine, 1804, page 70).

The elder John Sealy (who died 22 October, 1813), and his wife Elizabeth, who predeceased him in 1807, are both buried at Lambeth, where a large monument in Coade artificial stone covers the family vault in the churchyard.

SEARES, DANIEL, of Maidstone fl. 1810–1830

Seares, whose yard was in Stone Street, signs a few tablets in Kent, the best being one of Mrs. Crispe, 1825, at Sutton Valence.

SEARS, —

Of “9 Strand, London,” he signs a large marble tablet to the Dugdale family, 1828, in Handsworth Parish Church, every letter of the long inscription it bears being cast in bronze.
SEDDON, C. M., of Liverpool
fl. 1824–1858

Seddon exhibited at the Liverpool Academy, showing a bust of Richard Jones in 1824 and a medallion of Sir Walter Scott in 1837. He also signs a large monument with a relief of a mourning widow to Richard Phillips, 1824, at St. Martin’s, Salop.

SEDERBACH,
VICTOR ALEXANDER

Apparently a worker in terra-cotta, as J. Talbot, writing to his architect, Sanderson Miller, in January, 1756, about his improvements to Laycock Abbey, Wilts, says: “The Foreigner who has been here ever since May has executed his Performance in a very Workmanlike manner and your Niches are filled by a set of Inhabitants worthy such Repositories. I presume you are acquainted with the method of making Models for Statues. He proceeds on the same principles, only Bakes them afterwards, by which means they become of a Red Colour and ring like a Garden Pot... I fancy Lord Shelburn will employ him on his arrival at London, where he goes next week; however, as so many of your friends are Connoisseurs, I would advise them seeing his Performances, which are both Easy and not Expensive. His name is sonorous, no less than Victor Alexander Sederbach and yet lodges at one King’s a grocer in Green Street, near Castle Street, Leicester Fields. I am sorry he did not show all his Performances to the Gentleman you sent a note by, but on asking the Reason, was told that someone the day before had broke a Figure, which made him extremely Captious.” (An Eighteenth Century Correspondence, edited by Lilian Dickins and Mary Stanton, page 308.)

The work carried out by Sederbach may have been in the old Refectory, as J. Britton, writing in 1812 (Beauties of Wiltshire, Vol. III, page 242), states that “at the sides are small niches, containing a number of small statues and busts in terra-cotta, allusive to the history of the monastery.”

SEELEY, JOHN
b. 1789

Seeley, who joined the Royal Academy Schools in 1808, later went into partnership about 1840 with Felix Austin (q.v.), and together they carried out various monumental works (for a list of these, see under “Austin”).

Like his partner, Seeley chose good designers for his works, and like him, too, dealt in terra-cotta, although he called his material “artificial limestone.” He executed a number of fountains, including those for Tottenham Park, the seat of the Marquess of Ailesbury; the dairy at Blenheim; and the market at Birkenhead. Another, for the Marquess of Hertford, was designed by Smirke, while two at Brighton—in Queen’s Park and the Steyne—were made from the designs of Barry and Papworth respectively (Builder, 1851, page 474).

Seeley signs tablets to Anna Forster, 1829, at Walsall, Staffordshire, and to John Gosling, 1848, in St. John’s Wood Chapel.

SEEST, CHRISTIAN CARLSEN
fl. 1734–1757

He left his native country of Denmark in 1734, being described on his passport as “sculptor-apprentice.” He travelled to Germany, Holland and other countries and was in Paris in the 1740s and in London from 1750–1757. Presumably he had been there earlier as Vertue (Walpole Society, Vol. III, page 154) says “a bust, a modell done of my own portrait, a head only, by one who was workman to Mr. Rubiliac (bust done Michaelmas, 1750). This man came from Denmark and had been some years in... and Holland, but first in England and lately has returned to England again. Now constantly works for Mr. Rubiliac, his name is Siste. He is an ingenious man, draws very well and modells in good taste.” As far as I know the bust of Vertue has disappeared. Seest also worked for Rubiliac on the statue of Sir Isaac Newton for Trinity College, Cambridge.

On 16 September, 1748, Seest was appointed Danish Court Sculptor. From London he had sent drawings for monuments, etc., to the Danish King, Frederick V, and a bust of that monarch, probably his work, is at Ledreborg Castle.

(Weibach’s Kunstnerleksikon, Vol. III.)

SELLERS, JOSEPH, of Stoke

He signs a wall-tablet at Bunbury, Cheshire, to Thomas Acton, who died in 1803.

SEPHTON, DANIEL,
of Manchester
b. 1714, d. 1759

Sephon, who was the son of Henry Sephton (q.v.), was the best of the eighteenth-century Manchester statuaries. His monument to William Wright, 1753, at Stockport, Cheshire, is a large architectural work, nearly 20 ft. high, with a portrait-bust, while the side consoles are delicately carved with beetles, butterflies, etc. He signs other monuments to Sarah Jarvis, 1748, in Chester Cathedral; Francis Massy, 1748, in Warrington Parish Church; Francis Price, 1749, at Overton, Flint; and Thomas Barron, 1751, at Prescot, Lancs.
Sephton died on 11 January, 1759, and was commemorated on the same tablet as his father in Walton Church, the epitaph describing him as "eminent in carving." His wife survived him and died in 1770.

SEPHTON, HENRY, of Manchester
b. 1686, d. 1756

He was one of the principal masons for building Knowsley (Earl of Derby’s Archives, DDK. 2002/1-7) and also signs a cartouche tablet, with excellent detail, to Robert Scarisbrick, 1737, at Ormskirk, Lancashire.

Sephton died on 2 June, 1756, and was buried in Walton Church, Liverpool, but the monument to his memory was presumably lost when the church was destroyed by enemy action. His epitaph, however, described him as an “architect” and stated that his wife, Esther, died in 1759.

SERVANT, —

According to the catalogue of the Society of Free Artists, published in 1762 and now in the library of the Victoria and Albert Museum, Servant exhibited in that year a “Statue of Ceres in white marble.” This work is ignored by Graves in his Exhibitors at the Society of Artists and Free Society, though he does mention a “— Servant” exhibiting pictures in 1764.

SETTLE, JOHN
fl. 1679-1692

According to Brayley’s Westminster Abbey (Vol. II, page 234), Settle signed the monument to Sir Lumley Robinson, 1684, which was originally situated between the “third and fourth pillars from the cloyster gates westward,” but which now lies dismantled in the triformium. The work, which is illustrated in Dart’s Westmonasterium (Part II, No. 117), is described as follows in an anonymous guide to the Abbey, published about 1840: “The columns are supported by Death’s heads, and the arms upon the base by a cherub. On the top is a vase and rising to the pediments, enrichments of laurel branches, etc.”

Settle also signed the monument to Albert Faber, 1685, in St. Dunstan’s-in-the-West. In 1679 he had received £214 for work in the Mercers’ Chapel (Archives, Mercers’ Company).

SHARLAND, JOHN, of Torquay
fl. 1823-1835

His tablets are mostly neo-Hellenic, the best being those to the Viscountess Kilcousie, 1823, at Tormohun, Devon; Elizabeth Hague, 1830, at Barrow Gurney, Somerset; and the Rev. John Edwards, 1834, at Berry Pomeroy, Devon.

SHARMAN, EDWARD, of Peterborough
b. 1773, d. 1805

His obituary in the Gentleman’s Magazine (1805, page 686) says of him that “his goodness of heart was rarely equaled and his natural genius was far above his opportunity of cultivating it.”

Sharmans’s monuments and tablets are good provincial work, the best being that to George Pochin, 1798, at Bourne, Lincs, which has a relief of a mourning woman. Other signed works by him include those to the Judd family, 1791, in St. Martin’s, Stamford; William Whitsbee, 1796, at Peakirk, Northants; and George Digby, 1797, at Bourne, Lincs.

SHARP, GEORGE, of Gloucester

He signs a wall-tablet with naval trophies at St. Magnus, London Bridge, to John Sharp, 1822.

SHARP, THOMAS
b. 1805

He attended the Royal Academy Schools in 1831, on the recommendation of Sir Francis Chantrey (q.v.) and gained a Silver Medal three years later. He had already exhibited at the Academy his “Boy and the Lizard” in 1831, a figure which was praised in the Library of Fine Arts (1831, page 431). In the course of the article the writer drew attention to the fact that “it was probably in utter unconsciousness of his own power” that the sculptor “had chosen a piece of marble so veiny and imperfect as to offend the eye; thus, while we see all around abominations in the purest white marble, here is a work that would have done credit to almost any artist carved in the most objectionable material, and consequently scarcely noticed.” The work was purchased by Lady Colbourne who, in 1855, lent it to the Exhibition of English Art held in Paris.

Sharp exhibited at the Royal Academy, 1830–1869, and at the British Institution, 1831–1861, showing among other things a statue of David in 1835, and busts of Lord Augustus FitzClarence (1832), the Rev. J. Reynolds (1863) and the Earl of Lauderdale (1869). There is a bust executed by him of Lord Palmerston at Broadlands, dated 1844, and a statue of the same statesman at Southampton, dated 1868. Two of the sculptor’s groups, “Christ’s Charge to Peter” and “Non Angli sed Angeli” were shown respectively at the
Great Exhibition of 1851 and the International Exhibition of 1862. He sings two monuments, that of Anne Hardinge, c. 1830, at Crowhurst, Sussex, and of Elizabeth Grape, 1832, in Windsor Parish Church. Sharp was also a silver-chaser and showed a silver medallion of St. Martin in 1835, and a Shakespeare cup in 1842.

**SHARPE, EDWARD**, of Stamford fl. 1714–1749

He became a Freeman of Stamford in 1714 on payment of £4. His large monument to Sir Brownlow Sherrard, 1736, is at North Witham, Lincolnshire, and takes the form of a sarcophagus with lion-clawed feet, while behind it stands a pyramid.

Sharpe’s son, another Edward, was apprenticed to him and later became a Freeman of Stamford in 1749. The business must have been a considerable one, for two earlier apprentices, Thomas Burbridge and William Bolland, had both become Freemen of the town in 1732 (Stamford Archives).

**SHARPE, P.**

Apparently a local artist, he exhibited at the Liverpool Academy in 1813 a “Bust of Master Betty in Ahmed.”

**SHAW, DANIEL**, of King’s Lynn fl. 1628–1675

In 1628 he became a Freeman of King’s Lynn and later executed a certain amount of work for that town. In 1660 he carved the Town Arms on the schoolhouse and seven years later made figures of a unicorn and of a boy. The latter was probably for the exterior of a Charity School, and in this case the sculptor also provided the stone. In 1675 he carved a stone lion for the Town Cross (Chamberlain’s Accounts, King’s Lynn Archives).

**SHAW, J.**, of Reading fl. 1815–1837

He signs tablets in Berkshire to the Hon. Henry Bennett, 1815, at Easthampstead, and to Martha Fisher, 1837, at Basildon.

**SHAW, JAMES** fl. 1776–1787

He exhibited wax models at the Royal Academy from 1776 until 1787.

**SHEFFIELD, WILLIAM**

In 1758 when “under twenty-two and apprenticed to Mr. Wildsmith” (q.v.) he was awarded a premium by the Society of Arts for a “Model of Birds,” receiving a further premium in the following year.

**SHENTON, HULL and POLLARD,** of Leicester Firm fl. 1807–1828

The best of their tablets (all in Leicestershire) are those to Katherine Aynsworth, 1807, at Sileby; Thomas Smith, 1812, at Bitteswell; Ann Parkinson, 1818, at Cosby; and Charles Packe, 1828, at Prestwold. The last of these, however, is only signed “Hull and Pollard.”

**SHENTON, HENRY CHAWNER** b. 1825, d. 1846

He came of a family of artists, his father being Henry Shenton (1803–1866), the engraver, and his uncle Luke Clennell, the artist, while his maternal grandfather was Charles Warren, the line-engraver.

Young Shenton was a pupil of Behnes (q.v.) and attended the Royal Academy Schools in 1843. In the same year he showed a group of “Christ and Mary” at the Academy and in 1844 received a Silver Medal from the Society of Arts for a model of “Sabina.” Also in 1844 he exhibited his “Burial of the Princes in the Tower” at Westminster Hall, following this with a figure of Archbishop Cranmer in 1845, and a relief of “The Penitent” at the Academy in the same year.

Apparently Shenton worked under very difficult conditions, for his first group was “modelled in a stable with a roof so low that the ground had to be dug away to the depth of several feet, while the only light came through a narrow window in the wall; to the damps and chill of this fireless workroom his friends attribute the first insinuation of that disease which has laid the sculptor in an early grave” (Athenaeum, 1846, page 72). His death took place on 7 February, 1846.

(Authority cited in text.)

**SHEPHERD, EDWARD,** of Plymouth fl. 1818–1832

In 1818 he made a “variegated pavement composed of 1,238 pieces of marble further enriched by 102 brass figures” for the Duke of Bedford’s Temple of the Graces at Woburn (New Monthly Magazine, 1818, page 173). In 1826 he executed a fountain of black-and-white Devon marble for the Emperor of Brazil, a vast work 25 ft. high and weighing 18 tons (Gentleman’s Magazine, 1826, Part II, page 78).
Shepherd's tablets are dull, the best in Cornwall being those to Sally Graham, 1818, at Saltash; Joseph Ede, 1823, at Liskeard; and Jane Michel, 1824, at Lostwithiel. Others in Devon are to James Glencross, 1825, at St. Budeaux; Richard King, 1829, at Tamerton Foliot; and the Rev. W. Manley, 1832, at Stoke Fleming.

**SHEPHERD, VINCENT**  
_b. 1750, d. 1812_  
He was architect to the Duke of Northumberland and also carried out a considerable amount of stone-carving for his patron. In the choir of Alnwick Church he executed a piece of Gothic trellis work, which for elegance of fancy and superiority of workmanship has seldom been equalled and perhaps never excelled (Gentleman's Magazine, 1812, page 601). He died at Alnwick in 1812.

**SHERWOOD, JAMES, of Derby**  
_fl. 1800–1821_  
His best work is the delightful monument in Derby Cathedral to Thomas Swanwick, 1814, who had been a schoolmaster for thirty years. The monument, which was erected by Swanwick's pupils, has a relief of a master teaching a small boy who is seated on a pile of books, while above are terrestrial and celestial globes. Sherwood signs other monuments to William Mills, 1802, at Leek, Staffs; Thomasine Buxton, 1809, at Tissington, Derby; and the Rev. James Falconer, 1821, in Lichfield Cathedral.

**SHORTHOSE, JOHN**  
_d. 1704_  
Son of Thomas Shorthose, citizen and mason, he came on the Livery in 1662 and later received £130 for work at the Guildhall and Sessions House (P.R.O., E.101. 475/2). With his partner, Robert Mortimer, he was the master-mason for the rebuilding of the Coopers' Hall, 1668–1672 (Company's Archives). Shorthose was also employed under Wren on several of the City churches. He was the mason-contractor for building St. Olave's, Jewry, where his work included "roses, cherubim, festoons and the shield over the steeple door," and in the same capacity he, and his partner John Crooke, built Christ Church, Newgate. Here they received £130 for ten composite capitals, £20 for four pineapples, and £36 for four urns for the steeple (Bodleian, Rawlinson, B.387). In 1680 he was the master-mason with Edward Pearce (q.v.) for St. Clement Danes (Wren Society, Vol. X, page 108).

Shorthose was Warden of the Masons' Company in 1676 and 1681, and Master in 1686. He married Mary, daughter of Humphrey Moyer (q.v.). She died 1706.

**SHOUT, BENJAMIN and ROBERT**  
_Firm fl. 1778–1823_  
Benjamin Shout and his son Robert made a few busts and a large number of monuments. In 1806 they made the plaster busts for Lord Bridport's library which had been designed by Soane, and in 1827 they executed others for Salters' Hall; these, however, were destroyed when the Hall was burnt in 1940. Their bust of an unknown man, in the possession of the writer, shows careful modelling.

In 1819 the firm made casts of Canova's "Hebe," "Venus," "Paris" and "Perseus" (Annals of the Fine Arts, 1819, page 632), a type of work for which they were apparently well known, for Shelley writes of Leigh Hunt's studio, that "His room no doubt is still adorned with many a cast from Shout."

The early monuments and tablets carried out by the firm are well carved, but the later ones are dull, the unadventurous designs rarely going beyond reliefs of widows mourning by urns, or figures of "Religion" pointing heavenwards. The family yard was in Holborn and in 1809 Robert took as an apprentice his son, Charles Lutwyche Shout.

The firm's monuments and tablets include those to John Webber, 1778, at Bampton, Devon; Frances Lester, 1778, at Poole, Dorset; Charles Bushby, 1789, at Arundel, Sussex; Captain Baldon Swiney, 1790, at Hartfield, Sussex; Mrs. Lomax, 1793, and Elizabeth Cooper, 1793, both at Sleaford, Lincs; Thomas Knight, 1794, and Harriett Knatchbull, 1794, both at Godmersham, Kent; Mrs. Burrows, 1795, at Chalk, Kent; William Carter, 1799, in St. Dunstan's, Canterbury; Elizabeth Pinnell, 1800, at Fittleworth, Sussex; Alexander Hoskins, 1800, Melling, Lancs; the Rev. Stephen Barrett, 1801, at Hothfield, Kent; Sarah Jeaffreson, 1804, at Dullingham, Cambs; Sir Matthew Blakiston, 1806, at Lymington, Hants; John Hinde, 1806, at Milton Regis, Kent; Sir Wolstan Dixie, 1807, at Market Bosworth, Leics; Harriet Stewart, 1807, in Portsmouth Cathedral; Sir William Yeo, 1808, at Wiveliscombe, Somerset; Mary Croft, 1808, at Dullingham, Cambs; Samuel Johnson, 1809, at St. Ives, Hunts; Thomas Cockayne, 1809, at Ickleworth, Herts; John Stapleton, 1809, at Ottery St. Mary, Devon; Grace Sutton, 1814, at Stockton,
Durham; William Bennet, 1820, in Emmanuel College Chapel, Cambridge; Martin Wilshere, 1821, at Welwyn, Herts; and Olive Western, 1826, at Rivenhall, Essex.

SHOUT, WILLIAM, of York
fl. 1720-1750

In 1720 and 1721 he built the north and south gateways at Castle Howard. For the house he carved vases and cartouches, while for the grounds he erected the fluted obelisk which formerly stood by the south front, but which has now disappeared (Castle Howard Archives).

In 1749 he built a small temple in the grounds of Hovingham Hall, Yorks, for Thomas Worsley (Archives, Sir William Worsley, Bart.).

SHOUT, WILLIAM, of York
b. 1760, d. 1836

Son of Henry Shout, of York, he was appointed master-mason to the Minster before 1800, and here he renewed and recut the figures of the west end in 1813.

Shout was buried at Huntington, near York, where his epitaph states that “for forty years with credit to himself and satisfaction to his employers he conducted the repairs and restoration of York Minster.”

SHROPSHIRE, JOHN

He signs a large architectural tablet with excellently cut details to John Smallwood, 1771, at Market Drayton, Salop.

SIBSON, HENRY
fl. 1826-1863

In 1844 he exhibited statues of Marlborough and Bacon at Westminster Hall. The Literary Gazette called them “pretty pieces of costume,” while the Art Union remarked that though there was “life and movement” in the figure of Marlborough, “whatever merit it possessed was annihilated by the heavy and graceless boots.”

Sibson exhibited at the Royal Academy, 1826-1863. At the Great Exhibition of 1851 he showed a recumbent life-size figure with the odd title of the “Dying Shipwrecked Sea Boy.”

SIDNELL, MICHAEL, of Bristol
fl. 1714-1745

Sidnell was an architect as well as a statuary, and his monuments are consequently architectural in design; he also makes much use of heraldic shields and coats of arms. His best work, commemorating James Lyde, 1738, is at Stanton Drew, Somerset, and stands about 12 ft. high, with Doric pilasters supporting a broken pediment.

Other monuments signed by him include those to Henry Grinsteed, 1714, at Yatton, Somerset; Cornelius Lyde, 1717, and Anna Maria Lyde, 1729, at Stanton Drew, Somerset; Captain Jacob Knight, 1720, at Westbury, Glos; Anne Luttrell, 1731, at Dunster, Somerset; Christopher Devonshire, 1731, at Alderley, Glos; Charles Pearson, 1732, at Bredon, Worcs, and Anthony Ellesdon, 1737, Charmouth, Dorset. Examples of his work in Bristol are to be found in the churches of St. Stephen’s, to John Frankland, 1731; St. James’s, to Thomas Edwards, 1733; St. Michael’s, to Robert Earle, 1736; and St. Augustine’s, to Freeman Partridge, 1738, while he also signs the great monument to Edward Colston, 1729, in All Saints’. In this case, however, the semi-recumbent figure is known to be the work of Rysbrack (q.v.), so it seems possible that Sidnell either executed the architectural part of the monument, or else erected it when it was sent down from London.

In 1742 the sculptor became a bankrupt (London Magazine, 1742, page 518), but he seems to have continued to work. Between 1743 and 1745 he was the architect responsible for building Westbury Court, Gloucestershire, for Maynard Colchester, and is described at that time as “of the City of Bristol, master-workman and architect” (Archives, Sir Francis Colchester-Wemyss).

A “Daniel Sidnell of Bristol, stonemason,” became free of that city on 18 June, 1739, on his marriage with “Sarah, daughter of James Tanner, weaver, deceased,” while a “J. Sidnell” was working under Thomas Paty (q.v.) in 1744 at Redland Chapel, Bristol.

SIEVIER, ROBERT WILLIAM
b. 1794, d. 1865

Sievier, who was born in London on 24 July, 1794, decided to become an engraver in 1812 when the Society of Arts awarded him a Silver Medal for a pen-and-ink drawing. After studying first under John Young and later under Edward Scriven, he joined the Royal Academy Schools in 1818; shortly after this he began engraving portraits and produced a number of works of considerable merit.

In 1823 Sievier turned his attention to sculpture, and in the following year Lord Chancellor Eldon sat to him for a bust. His gift of “rapidly improving his great facility of seizing the likeness and characteristic expression of his sitters, led many persons of distinction to his studio,” but his success in two separate branches of art did not satisfy him, and in 1840 he became interested in science. He was soon
absorbed in his new pursuit to the neglect of his artistic work and "built a large manufactory for the production of elastic fabrics, made great improvement in the manufactory of carpets, was associated with the original india-rubber works and rendered good early service to electric telegraphy." He was, however, a great artist, and it is sad to think that he did not take to sculpture until he was thirty and that he abandoned it before he was fifty.

Sievier exhibited at the Royal Academy, 1822-1844, and at the British Institution, 1825-1831, showing at the Academy (among other works) a group entitled "Musidora" (1831), and busts of the Countess of Sheffield (1829) and Lord Brougham (1831). His statue of Dr. Jenner (1825) is in Gloucester Cathedral and that of Charles Dibdin at Greenwich, while for the Foundling Hospital he executed one of Sir William Curtis and a statuette of Captain Coram. The latter, which is dated 1833, is now in the office of the Hospital in Brunswick Square. Of his groups, "Boy with Tortoise" (1826) is in private possession, and "Two Bacchantes" at Chatsworth; he also carved one of his few chimney-pieces for the dining-room of the same house (Handbook to Chatsworth, 1846). In 1829 he made a statue of "Undine" for the conservatory at the Colosseum (Literary Gazette, 1829, page 43).

In addition to the busts already mentioned, Sievier also executed those of Sir John Silvester (1823) and Richard Clarke (1829) for the Guildhall, the latter being destroyed by enemy action on 29 September, 1940; John Latham (1824) and John Abernethy (1828), both in St. Bartholomew's Hospital; the Earl of Eldon (1824) at St. Giles, Dorset; (a plaster bust of the same sitter, dated 1827, is at Windsor Castle); Sir George Paul (1825) in Gloucester Cathedral; Earl Harcourt (1828) and the Prince Consort (1842), both at Windsor Castle; Sir Thomas Lawrence (1830) in the Soane Museum. Turton, Bishop of Ely (1831), in the Divinity School, Cambridge; the Rev. James Lyon (1836) at Prestwich, Lancashire; and Sir William Bolland (?) at Trinity College, Cambridge.

Sievier's monuments have great charm and delicacy of carving; his designs are unusual, while his early training as an engraver enabled him to cut scenic bas-reliefs and to set a whole scene in a small space. The monument to Robert Cheesher, 1831, at Peckleton, Leicestershire, has, for example, a relief of a graveyard, each altar-tomb and stone minutely shown, shadowed by weeping-willows. The pedestal of Lord Harcourt's statue, 1832, in St. George's Chapel, Windsor, has four battle-scenes, while the monument to the Rev. James Lyon, 1836, at Prestwich, Lancashire, shows him at the altar-rail of his church, administering the Communion to his flock.

Other monuments signed by Sievier include those to Andrew French, 1825, in Madras Cathedral; Jacob Dearden, 1825, at Rochdale, Lancashire; Sir George Aderson, 1826, in Paddington Parish Church; the Countess of Cardigan, 1826, at Deene, Northants; Isabella Fairlie, 1830, in Marylebone Parish Church; Earl Harcourt, 1832, at Stanton Harcourt, Oxon; Earl Harcourt, 1832, at Clewer, Bucks; John Saint John Long, 1834, in Kensal Green Cemetery; Lieutenant Michael Smith, 1834, in Holy Trinity, Marylebone; Thomas Simpson, 1835, in St. Matthew's, Brixton; Ann Sykes, 1835, St. John's, Islington; Mary Barnard, 1836, at Wolverstone, Suffolk; William Blathwayt, 1839, at Dyreham, Glos; Elizabeth Mott, 1842, at Banstead, Surrey; and Charles Bridge, 1843, at Harwich, Essex.

Sievier died on 28 April, 1865, and is buried in Kensal Green Cemetery. His son, Robert Moore Sievier, born in 1827, studied sculpture at the Royal Academy Schools in 1845. (Redgrave's Dictionary of Artists; various references Art Journal.)

SILVESTER, —
fl. 1788-1800

He exhibited at the Royal Academy in 1788 busts of Lord Hood, the Duke of York, Lord Rodney and John Wesley. The last-named is possibly the bust now in the National Portrait Gallery (see under "Pingo").

SIMMONDS, —, of Swindon

He signs a curious monument, erected in 1802 at Lambourne, Berks, to the memory of the three children of John and Maria Fortescue. This consists of a pyramid against which stand miniature statuettes about nine inches high of the three children in contemporary costume. Simmonds also signs a tablet to Joseph Walker, 1803, at Bampton, Oxon.

SIMPSON, —, of London Bridge Firm fl. 1799-1817

He was mason to the Skinners' Company, 1801-1804, but apparently died before 1808, as in that year a Mary Simpson of the same address, presumably his widow, was paid for repairs to the Fishmongers' Hall.

Simpson's two signed monuments, to Miles Stringer, 1799, in St. Magnus, London Bridge, and Mrs. Thomas White, 1805, in St. James, Garlickhithe, are pleasant and well-carved works.
ABRAHAM STOREY

Lord and Lady Crofts, c. 1678, Little Saxham, Suffolk.
R. W. Sievier
Earl Harcourt, 1832, Stanton Harcourt, Oxon.

William Stanton
Sir John and Lady Brownlow, c. 1679, Belton, Lincs.

Thomas Scheemakers
Part of the monument of Ralph Freman, c. 1773, Braughing, Hertfordshire.
SINGLETON, ROBERT, of Bury St. Edmunds and Norwich
fl. 1706-1740

In 1737 he received thirty guineas from the 1st Earl of Bristol for the coat of arms on the front of the latter’s house at Bury St. Edmunds, and two years later made a chimney-piece for Ickworth (Account-book of the 1st Earl of Bristol).

As a monumental sculptor, Singleton takes high rank. His monument to Colonel Soames, 1706, at West Dereham, Norfolk, is an exciting and remarkable work, with a standing life-sized figure of the Colonel in armour, his helmet at his feet and his right hand holding his great military cloak, which billows out and falls in folds behind him. The cartouche tablet to Richard Manty, 1720, in St. Martin’s at Palace, Norwich, is a delightful work, while that to Thomas Pindar, 1721, at St. George Colegate in the same city, has a large figure of a cherub, an hour-glass in his hand and with his head resting on a skull.

Singleton also signs tablets to Sir Dudley Cullum, 1720, at Hawstead, Suffolk, and to Mary Bateman, 1721, in St. Gregory’s, Norwich. About 1729 he went into partnership with George Bottomley (q.v.) and they carved a few monuments together (for these see under “Bottomley”).

SINGLETON, THOMAS, of Bury St. Edmunds
d. 1792

Son of Robert Singleton (q.v.), he was employed by Mr. Ambrose Crowley in 1753 on repairs to Barking Hall, Suffolk (Ashburnham Archives). In 1775 he worked under Robert Adam at Bury St. Edmunds, where he built the Town Hall and was also responsible for carving the delightful reliefs on the exterior (Bury St. Edmunds Town Archives). In 1789, under Soane, he repaired the Mansion House in the same town (Soane Note-book).

Singleton, who had been a widower since 1788, died in 1792, leaving his daughter Sarah as his executrix. According to his obituary in the Bury Post (24 October, 1792), he was at an advanced age at the time of his death and had served as one of the Burgesses of the Common Council. The writer added that “few men have passed through a long life of active business more distinguished for ingenuity and integrity.”

His monuments and tablets, which are not nearly as good as his father’s, include those to the Rev. Thomas Knight, 1740, at Bluntsburn, Hunts; Simon Kerrich, 1748, at Harleston, Norfolk; Valentine Muntree, 1750, at Horringer, Suffolk; and the Lake family (undated) at Goudhurst, Kent.

SKAE, PETER
b. 1808

He attended the Royal Academy School in 1826 and later became an assistant of H. Hopper (q.v.). He is responsible for a few inferior busts.

SKELTON, MATTHEW, of York
b. 1772, d. 1844

One of the least distinguished of the York statuaries, the majority of his tablets are neo-Hellenic in design. In Yorkshire the best of these are to Joseph Emmot, 1820, at Keighley; Francis Edmunds, 1825, at Worsborough; Elizabeth Alexander, 1832, at Halifax; James Brooke, 1837 at Barwick in Elmet; Thomas Blund, 1840, at Kippax; Francis Duffield, 1841, in Bradford Cathedral; and Christopher Oldfield, 1843, in York Minster. He also signs a tablet to Ann Sleigh, 1835, at Stockton, Durham.

SKIKELTHORPE, L., of Abridge
He signs a wall-tablet in Wimbledon Parish Church to Emma Grosvenor, 1842.

SKUTT, WILLIAM, of York
fl. 1719-1722

He was employed as a master-mason in 1719 at Castle Howard. He also carved pedestals and vases for the bowling green and a number of chimney-pieces for the house (Castle Howard Archives). Skutt is probably a mis-spelling of Shout (q.v.).

SLATER, J. R.

He exhibited at the Royal Academy, showing busts of J. McRone and Harrison Ainsworth in 1834 and 1836 respectively.

SLATER, PETER, of Edinburgh
b. 1809

He attended the Royal Academy Schools in 1831 on the recommendation of W. Collins, R.A. In 1844 he exhibited at Westminster Hall “‘Canute Reproving his Flatterers,” a work which caused the Literary Gazette to observe tartly “we must decline being one,” while the Art Union thought “the general execution is coarse.”

In 1853 Slater made the statue of James Watt for Adams Square, Edinburgh, but this was not an original work, being a copy of one by Chantrey (q.v.). His statue of George Heriot was executed
in the following year and was placed on the south-west niche of the Scott monument in Princes Street, while the monument of Dr. Carson, 1855, in St. Giles, is also his work.

Slater exhibited at the Royal Academy, 1846-1870, showing mainly busts of Scottish worthies.

SLINGSBY, JOHN

*d.* 1808

He was the son of that Thomas Slingsby who had been master-mason at Windsor Castle and in 1778 (the year of his retirement or death) had carved the stonework of the portico of the north front (P.R.O., Works 5/66). John in his turn became master-mason and held the post for twenty years.

During the remodelling of the Castle he was responsible for a considerable amount of mason's and stonecarver's work. In 1781 he made a chimney-piece for the Prince of Wales's room, and in 1794 received £200 for the carved-stone moulding of the windows in the picture gallery.

Under Wyattville he was naturally much employed, working on the Royal tomb-house in 1800 and in 1805. At this time he was paid over £4,000, a sum which included £28 for a marble reeded chimney-piece; £25 for one of dove-grey marble; and £20 for another with pilasters of red marble.

After Slingsby's death in 1808 the business was carried on by his widow, Hannah, who in that year received £60 for a "red-marble chimney-piece with pilasters for the library."

(Hope's *Windsor Castle*; P.R.O., Works 5/67.)

SLYTH, ISAAC, of Colchester

*d.* 1800

He was in partnership with Messrs. Roper and Doughty, of Ipswich, but became a bankrupt a few months after he had left the firm in 1799. He died on 24 December, 1800 (*Monthly Magazine*, 1801, page 93). Slyth was succeeded by his son James, who in 1812 advertised in the *Cheilmsford Chronicle* that he had "imported some very beautiful Italian marble and laid in a quantity of the newly discovered British marble," and also that he had a "quantity of chimney-pieces fitted up for inspection." The same paper reported James Slyth's death on 12 June, 1816, the obituary stating that his widow intended to "carry on the business for her children's benefit."

Since that time there have been several generations of the family who followed the same trade; indeed, the firm lasted into this century; but none of their tablets or gravestones ever rose above a low provincial level.

SMALLMAN, J.

He signs a large wall tablet with an arched pediment surmounted by an urn to Thomas Smyth, 1780, at Much Wenlock, Salop.

SMART, JAMES, of Guildford

fl. 1800-1835

Between 1802 and 1804 he was the master-mason for building Albury House, near Guildford, which had been designed for Samuel Thornton by Soane (Soane Archives).

Smart signs tablets in Surrey to William Smith, 1826 (with a relief), at Stoke-by-Guildford; Colonel Berkeley, 1826, at Wotton; and Colonel Charles Somerset, 1835, at Old Woking.

SMITH, —, of Stamford

fl. 1828-1837

His tablets are mostly neo-Hellenic, the best being those to Francis Waters, 1828, at Rippingale, Lincolnshire; George Parker, 1831, at Eddenhall, Lincoln; Emma Mason, 1837, at King's Cliffe, Northants; and the Rev. William Hardyman, 1837, at North Luffenham, Rutland.

SMITH, BERNARD

*b.* 1820

He attended the Royal Academy Schools in 1840 and exhibited at the Academy, 1842-1851. Here he showed busts and medallion portraits, including those of Sir James Ross (1844); Edward Doubleday (1845); Rowland Hill (1845); William Rathbone (1847); and Christopher Rawdon (1847).

SMITH, CHARLES HARRIOTT

*b.* 1792, *d.* 1864

He was born in London on 1 February, 1792, the son of Joseph Smith (q.v.) of Portland Road, and was taken from school at the age of twelve to work in his father's yard. He was later befriended by Bonomi, the architect, at whose suggestion he joined the Royal Academy Schools in 1814, and here he won the Gold Medal for architecture three years later. A remarkable feature of his career is the fact that he passed through all the Schools of the Academy by drawings of the human figure—apparently the only student ever to do so.

Smith next turned his attention to architectural sculpture and carved the Corinthian capitals and other ornaments for University College, the
National Gallery and the Royal Exchange (Builder, 1850, page 305). He also did decorative carving at Bridgewater House in 1848, for which he received £1,349 (Archives, Earl of Ellesmere), while four years later he was responsible for the ornamental work on the façade of Dorchester House, Park Lane (Builder, 1852, page 550). His carving of the capital of Nelson's Column in Trafalgar Square dates from 1850 (Builder, 1850, page 169).

When Sir Charles Barry was appointed to build the new Houses of Parliament he felt it would be difficult to find enough stone of good quality for so vast an undertaking. He therefore proposed to the Government that a Royal Commission should be appointed to visit, not only possible quarries, but also the ancient cathedrals and castles of Britain, in order to discover which type of stone had best stood the test of time. C. H. Smith was one of the four members of this Commission whose “report won the admiration of the profession as a great addition to professional knowledge,” while he himself “secured the lasting goodwill and esteem of his colleagues by his zeal, intelligence and cheerful co-operation.”

He exhibited at the Royal Academy, 1809-1823, showing architectural designs and in 1824 a bust of “The Hon. and Rev. E. J. Turnour.” His undated statue in Portland stone of the Farnese Hercules is at the Geological Museum.

Smith also took an interest in science and wrote a number of papers on a variety of subjects. He said of himself that he was “a strange mongrel of art, science, literature and business.” When he died on 21 October, 1864, the Builder in its obituary (page 802) quoted a remark made by one of his former workmen on hearing of his death: “He never grasped for money, he did for knowledge which he held fast but nevertheless gave away abundantly.”

As a monumental sculptor, Smith was influenced by Winkelmann and neo-Hellenism. One of his most beautiful designs, which he repeated several times, is of an Attic plumed helmet in high relief, with a great Homeric shield below it and crossed swords behind. A strictly classical work, without a hint of any emblem of Christianity.

His signed monuments include those to Giles Earle, 1811, and Nathaniel Crichton, 1814, both at Hendon, Middlesex; Robert Cotton, 1821, at Reigate, Surrey; Lt.-Colonel FitzGerald, 1821, Rebecca Phipps, 1830, Henry Moreton-Dyer, 1841, and Countess Beauchamp, 1846, all in Marylebone Parish Church; Elizabeth Peters, 1822, and John Francis, 1824, both at Badby, Warwick; Lt.-General George Deare, 1823, in St. John's Wood Chapel; Charles Higginson, 1824, in Madras Cathedral; Margaret Randall, 1824, at Erith, Kent; the Stuckey family, 1824, at Langport, Somerset; the Rev. Charles Tower, 1825, at South Weald, Essex; William Sleigh, 1825, at Stockton, Durham; Georgina Chamier, 1826, at Stoke next Guildford, Surrey; Anthony Parker, 1827, at Churchgate Street, Essex; the Rev. Edward Meyrick, 1839, at Rambury, Wilts; Richard Alsager, 1841, at Tooting, Surrey; the Rev. Francis Goode, 1842, in Clapham Parish Church; A. R. Freebairn, 1847, in Highgate Cemetery; John Pereira, 1853, in Kensal Green Cemetery; John Garden, 1855, at Ringsfield, Suffolk; and Henry Hickman, 1855, at Newnham, Northants.

SMITH, CHARLES R.

b. 1799

He was the son of James Smith (q.v.) and attended the Royal Academy Schools in 1816, winning the Silver Medal in 1821. From the Society of Arts he had received the Silver Isis Medal for an original model in 1817, and the Gold Isis Medal for a group of two figures four years later; finally, in 1822, he was awarded the Large Gold Medal for his group, “The Fight for the Body of Patroclus.”

Smith's chief work was a series of heroic figures of English Kings and Queens and the notable personages of their reigns, which he executed for Sir Robert Newman between 1838 and 1842. These are in Caen stone and still line the long corridor at Mamhead Park, Devon. In 1841 he made for Lord Lansdowne the life-size figures of Michelangelo and Raphael which now stand in niches by the front door of Bowood.

In 1852 he made a pair of bronze stags costing £52 for the front of Pynes, near Exeter, and in the same year he was paid £43 for a fountain for the gardens (Archives, Earl of Iddesleigh). Smith is also responsible for the great fountain of St. George and the Dragon at Holkham, Norfolk.

Smith exhibited at the Royal Academy, 1820-1840, and at the British Institution, 1829-1833, showing busts of Mr. Ricci (1820); Edward Goldsmith (1827); Colonel Dalrymple (1830); George Campbell, of New York (1831); and Winthrop Mackworth Praed (1841). In the latter year he also made a bust of the Rev. Thomas Gisborne for Durham University.

Of his monuments the most important are the life-sized figure of the Rev. Thomas Whitaker, 1822, at Whalley, Yorks, and the semi-recumbent effigy of Jacob Britton, 1839, in Durham Cathedral, both of which are carved in stone. He signs others to Major Sayer, 1823, at Clare, Suffolk; George
Holroyd, 1827, at Reigate, Surrey; James Hudson, 1827, at Newtown-by-Sittingbourne, Kent; William Williams, 1828, in Chichester Cathedral; Elizabeth Rose, 1829, at Carlston, Surrey; the Countess of Clonmel, 1829, in Marylebone Parish Church; Mary Walker, 1830, at Sand Hutton, Yorks; the Rev. Thomas Stephens, 1832, and Jane Farquhar, 1834, both in St. John's Wood Chapel; the Rev. Hugh Bailye, 1835, at Hanbury, Staffs; and Margaret Joliffe, 1839, Worth, Sussex.

SMITH, EDWIN, of Sheffield
b. 1810, d. 1889

He was born in Sheffield, the son of an engraver named James Smith. At first he studied sculpture locally, and it was not until 1836 that he went to London to join the Royal Academy Schools on the recommendation of E. Hawkins. About four years later he returned to his native city and set up there as a sculptor.

In 1846 Smith made a model of Jerusalem, on the scale of eighteen inches to a mile, which was exhibited in London and later purchased by Lord Fitzwilliam. He also executed busts for various buildings in Sheffield, including those of James Silk Buckingham (1834), James Montgomery (1843), William Jeffcock (1845), and Samuel Hadfield (1854), all in the Cutlers' Hall. For the Cathedral and the Bluecoat School he made busts of Thomas Sutton, dated 1853 and 1861 respectively, while in the Royal Infirmary is one of the Rev. James Wilkinson (1839), and also one of his few wax medallions, that of William Young (1837).

Smith's monuments to Charles Favell, 1846, in St. Paul's, Sheffield, and Samuel Gillett, 1862, at Norton, Derbyshire, have medallion portraits. In 1841 he carved the monument in Rotherham Parish Church erected to the memory of "fifty young persons who awfully perished at the launching of a vessel at Masborough, 5 July, 1841." Other signed works commemorate Frederick Wilkinson, 1845, at Newcastle-under-Lyme; William Bagshawe, 1851, at Norton, Derby; Elizabeth Peel, 1851, at Wellow, Notts; and Margaret Coward, 1854, in Rotherham Parish Church.

SMITH, FRANCIS, of Warwick
b. 1672, d. 1738

He was born on 4 January, 1671/2, the third son of Francis Smith the Elder, of Warwick, "bricklayer," and with his elder brother William rebuilt the tower and nave of St. Mary's Church, Warwick, after the fire of 1694. In 1702 he married Anne Lea, a native of the same town.

Smith, who was the master-mason for building the Court House at Warwick in 1724, also designed and built a number of houses in Shropshire, Derbyshire and Northamptonshire. In Worcestershire he worked between 1723 and 1727 for Samuel Sandys as the master-mason (and presumably the architect) of Ombersley Court, and there are a number of receipts for payments made to him for this work among Lord Sandys' Archives. The first, dated 4 December, 1723, reads: "Received then of Samuel Sands, Esq. at several times by ye hands of Mr. Cooks, the sum of four hundred pounds towards building Ombersley by us William Smith and Francis Smith." This is the only receipt signed by both brothers, for William died on 12 August, 1724, and Francis continued the work alone. The house took four years to complete, and receipts still extant show that he received £632 in 1723, £170 in 1724, £570 in 1725, and £260 in 1726, while a final payment of £100 was made in 1730. He was also almost certainly responsible for the chimneypieces.

In 1732 Smith supplied two chimney-pieces for Lamport Hall, Northamptonshire, one of dove-grey marble and the other "of various coloured marbles with a cornice and two side-scrolls," which cost £38 10s. Four years later he received £87 for the monument in Lamport Church to Sir Justinian Isham, who had died in 1730 (Isham Archives). This is an architectural work with Corinthian pillars supporting an open pediment. (Archives of houses mentioned in text.)

SMITH, FREDERICK WILLIAM
b. 1797, d. 1835

He was born in Pimlico, the second son of Anker Smith the engraver (1759–1819), and joined the Royal Academy Schools in 1815. In the following year he was awarded the Silver Isis Medal by the Society of Arts for an alto-relievo of "The Death of Pallas," and in 1821 received the Academy Gold Medal for a group entitled "Haemon and Antigone." In 1823 Smith showed his bust of Allan Cunningham at the Academy. Flaxman, who was arranging the works of art at Somerset House, said on seeing it that he would "give this bust the best place in the exhibition, for in sentiment it surpasses any head I have seen here for some years."

Smith was the first pupil of Sir Francis Chantrey (q.v.) and later remained with his master as one of his chief assistants. He showed various works at the Royal Academy between
1818 and 1828, including busts of Chantrey, Keats and Brunell; the first-named, dated 1826, is now at Burlington House. The sculptor’s death took place at Shrewsbury on 18 January, 1835.

In the church of St. Margaret’s, Lothbury, is a marble bust of Alderman Boydell, signed “Banks del. F. Smith sc.” The original model for this was exhibited at the Academy by Banks as early as 1791, although Smith did not carve it in marble until 1820. It was then erected in St. Olave’s, Jewry, in accordance with instructions given in the will of Mrs. Nichol, Boydell’s niece, but when that church was destroyed was removed to St. Margaret’s.

(Atheneum, 1835, page 75; Builder, 1863, page 112.)

SMITH, GEORGE
fl. 1820–1823

About 1820 he carved “a new entablature, balustrade, bassi-relievi, and statues” for the principal entrance of the Royal Exchange (Elmes’ Metropolitan Improvements, Vol. I, page 158). Three years later he made the altar-piece for St. Michael’s Church, Queenhithe (op. cit.).

SMITH, H. A.
fl. 1827–1844

He exhibited at the Royal Academy, 1827–1844, showing among other works a bust and a wax portrait of Mrs. Marsh.

As Charles Smith (q.v.) and H. A. Smith are noted as living at the same address, they were presumably father and son, in which case the latter was the brother of Raymond Smith (q.v.).

SMITH, J., of Rye
fl. 1815–1852

Smith’s tablets are based on minor works by John Bacon the Younger (q.v.), but considering he lived and worked in a small Sussex town they are surprisingly good and well above the average of the contemporary provincial sculptor. The best, all in Sussex, are those to Sarah Woodham, 1822, William Woodham, 1826, and Thomas Langford, 1845, all at Udimore; and to the Rev. John Lettice, 1832, at Peasmarsh.

In 1851 Smith and his son built the delightful and romantic Gothic railway station at Battle, in the same county. In 1815 he had made a few chimney-pieces for Battle Abbey (Archives, Mrs. Harbord, of Battle Abbey).

SMITH, JAMES
b. 1775, d. 1815

He was a pupil of Locatelli (q.v.) and attended the Royal Academy Schools in 1795, winning the Gold Medal two years later for his group of “Venus Wounded by Diomede.” When he left the Schools he was first employed by C. Rossi (q.v.), but later became an assistant of Flaxman (q.v.), with whom he remained for eight years, and for whom he worked upon the figure of Lord Mansfield in Westminster Abbey (Farington Diary, Vol. III, page 229). He also assisted Mrs. Damer (q.v.) in many of her works.

Smith’s chief work, indeed almost his only important independent work, is the cenotaph of Lord Nelson in the Guildhall, an inferior mass of marble which cost £4,442 7s. 4d. and was unveiled in 1810. A number of models were submitted for this memorial, but the choice ultimately lay between those of C. Rossi and Smith. The final voting at the Common Council was thirty-two for Smith and twenty-seven for Rossi, but the votes were cast not so much on the artistic merits of the two designs, but rather in an attempt to spite Boydell and the Court of Aldermen who favoured Rossi. The latter, however, subsequently acquitted Smith of any part in this affair, telling Farington (op. cit., Vol. III, page 212) that he (Smith) “was a quiet man and not likely to have carried a point by intrigue.” Smith later found it difficult to get the Corporation to pay him for the cenotaph, and wrote: “I am drained of all the money I had the honour of last receiving from the Corporation and I am now really left destitute of means to provide for the remaining sums that must be paid by the latter end of the present month” (City Records, MS. 95.2).

In 1813 Mrs. Siddons sat to him for her bust. An advertisement which appeared in the Press at the time stated that “Mr. Smith sculptor having been honoured by Mrs. Siddons with several sittings has just finished a full-sized bust of that inimitable actress,” and announced that the bust, “which is the only one of Mrs. Siddons modelled from the life,” could be inspected at her house. This bust was exhibited at the Royal Academy and afterwards placed in the Green Room of Drury Lane Theatre. A replica of it was at Guy’s Cliff, Warwick. A year later the sculptor exhibited a bust of Robert Southey at the Academy.

Smith signs tablets to the Hon. G. F. Lake, 1808, in Westminster Abbey; to Caroline Shuckburgh, 1809, at Shuckburgh, Warwick; and to Thomas Barwis, 1815, in Wandsworth Parish Church. He also designed the monument of General le Marchant for St. Paul’s Cathedral, but died before he could begin to carve it in marble and the work was executed by Rossi, who, however, sent Mrs. Smith a present of £200.

Smith died on 28 April, 1815, at the age of
forty-three, according to his obituary in the *Gentleman's Magazine* (1815, Part I, page 567), but he really seems to have been three years younger, for the Royal Academy Register records that he was born in 1775.

(Gentleman's Magazine, 1819, Part I, page 43, and 1839, Part I, page 547.)

**SMITH, JOACHIM**  
*B. 1758–1803*

In 1758, when "under twenty-two years of age" and an "untaught designer and modeller," he received a premium of ten guineas from the Society of Arts for a wax portrait. A later note in the records of the same Society states that Smith had "invented a composition in which colours being mixed up to the various tints and shades of human features, was rendered fit, from the fine texture and intimate commixion of the ingredients to model portraits in miniature to a degree of delicacy," and adds that "the invention is now being carried on in an improved practice by the discoverer in Berners Street, near Middlesex Hospital."

In 1763 Smith made a model, about four inches long, of the infant Prince of Wales, showing "him naked lying on a couch of crimson velvet," according to the *London Magazine* of that year (page 56), which described the work at length and noted that "this amazing piece of art is done with a composition of wax in natural colours." His wax portraits of the Prince and of Frederick, Duke of York (1766), are in the Royal Collection.

In 1773 Smith began to model wax portraits which were copied and produced by Wedgwood and Bentley in white biscuit-ware, and later in white terra-cotta. Among these were likenesses of John Bradley, Wedgwood, Thomas Bentley, Dr. Foster, and Lady Charlotte Finch and her daughter. On 8 February, 1775, he wrote to Wedgwood that "the many accidents I have had with several moulds as well as with some of the models has been attended with a considerable loss of time and deprived me of the possibility of sending you anything for some months past. But there is a difficulty which naturally awaits on everything in its infancy—which with a little indulgence I hope to get the better of" (Wedgwood Archives). His wax portrait of Viscount Fitzmaurice is at Bowood.

Smith became a director of the Free Society of Artists in 1772, and Treasurer four years later. He exhibited wax portraits at the Society of Artists, 1760–1783, and wax portraits and busts at the Royal Academy, 1781–1803. A number of his portraits, including those of the Duke and Duchess of Gloucester, Mrs. Fitzherbert, and Governor and Mrs. Johnstone, were used as models by gem-cutters and cameo-engravers.

**SMITH, JOHN**, of Darnich

According to the *Gentleman's Magazine* of 1817 (Part I, page 621), he carved the colossal statue of Wallace erected at Dryburgh in that year by Lord Buchan.

**SMITH, JOSEPH**  
*B. 1792–1800*

His large monument to Lady Chapman, 1800, at Barkway, Hertfordshire, has as its predominant feature a sarcophagus surmounted by an urn.

**SMITH, LEONARD**, of York  
*B. 1725–1733*

In 1725 he and his partner, James Disney, repaired the Barr Wall at York, and in 1729 Smith, on his own account, carved a chimney-piece for York Guildhall (City Archives). In the same year he was appointed master-mason for building the Assembly Rooms, but was discharged for "being negligent" early in 1731.

His successor, however, was even more unsatisfactory, and within the year Smith was reinstated and ordered to set up the portico and to carve its capitals “according to my Lord Burlington’s designs,” while in 1733 he made the chimney-piece for the “circular room” (Minute-book, York Assembly Rooms).

**SMITH, NATHANIEL**  
*b. c. 1741, d. after 1800*

He was born at Eltham Palace, the son of a Shropshire clothier, and with his playfellow, Joseph Nollekens (q.v.), went to Shipley’s Academy in the Strand to study drawing. On 7 August, 1755, he was apprenticed to L. F. Roubliaq (q.v.) and assisted his master on some of the latter’s monuments in Westminster Abbey.

Between 1758 and 1762 Smith was awarded six premiums by the Society of Arts. His prize-winning “Model of Animals” (1760) was formerly in the possession of Lord Maynard, while “The Continence of Scipio,” which was successful in the following year, was later owned by Lord Rockingham. In 1762 he exhibited at the “Society for the Encouragement of the Arts” a relief of “The Meeting between Coriolanus and Volumnia” (London Magazine, 1762, page 174).

After Roubliaq’s death Smith became the assistant of J. Wilton (q.v.) and carved the figures on the latter’s cenotaph of General Wolfe in
Westminster Abbey, a work which took him three years to complete, according to J. T. Smith, the sculptor's son (Nollekens and His Times, Vol. II, page 110). The author also asserts that his father executed a great deal of the sculpture on Somerset House for which Wilton received the money.

About 1788 the elder Smith became the principal assistant of Nollekens, and therefore spent most of his life working for other sculptors. Apparently his only independent works were the heads of three "River Gods" (designed by Cipriani) for Somerset House, and the signed monument to Sir Merrick Burrell, 1787, with its fine medallion portrait, at West Grinstead, Sussex.

Smith exhibited at the Society of Free Artists, 1761-1763. His terra-cotta model for a statue of the Earl of Chatham was Lot 1097 in Mr. Peter Norton's sale at Christie's in 1869.

Smith's wife, who was a Miss Tarr and a Quakeress, died in 1779. (Gentleman's Magazine, 1833, Part I, page 641; authorities cited in text.)

SMITH, RAYMOND
fl. 1842-1876

He is presumably the son of Charles Smith (q.v.), and carried on his father's work, completing the series of statues for Manhean.

In 1842 he carved a figure of "A Falconer" for Mr. Bulkeley of Flete, and this, together with a statue of Raphael, he exhibited in Westminster Hall two years later. (In the catalogue of the exhibition the Raphael is attributed to him, although by a coincidence Charles Smith had executed a similar figure for Lord Lansdowne in 1841.) Both works were well received by the critics, the Literary Gazette considering that the "Falconer" was "taught and full of pictorial character," while the Art Union thought that the Raphael had "much merit." In 1851 the sculptor showed a statue of Lady Danberry at the Great Exhibition.

In 1852 Smith modelled reliefs of "Peace" and "War" for Bylaugh Hall, Norfolk (Builder, 1852, page 517), and in the same year made two large groups for Eaton Hall, one showing the "Gros Veneur," or head-huntsman, of the Norman Duke seated on horseback and accompanied by four dogs, the other representing the "Death of the Stag." For the garden he made statues of Odo, Bishop of Bayeux, Sir Robert de Grosvenor, Engulphus de Aqula and Joan of Eaton (Builder, 1852, page 595), and in 1856 carved a large fountain in Portland stone with a group of "St. George and the Dragon." A "large column of water" was apparently thrown up by the dragon, which was "in the agonies of death" (Art Journal, 1856, page 383). About 1854 he had made two Egyptian lions, also in Portland stone, for the terrace of Sir Augustus Clifford's house, Westfield, Isle of Wight (Description of Westfield, privately printed, 1862). In 1865 he executed the figures of "The Principal Races of the Indian Empire" for the façade of the India Office.

Smith also made a number of monuments, the most important being the recumbent figure of Grace Darling, which was placed over her grave at Bamburgh, Northumberland, in 1846, and that to Winthrop Mackworth Praed (d. 1839) in Kensal Green Cemetery, which has a medallion portrait. Tablets signed by him include those to the Rev. Baptist Turner, 1836, at Denton, Lincs; William St. Croix, 1842, in the Cloisters of St. George's Chapel, Windsor; Countess Cadogan, 1845, in St. Luke's, Chelsea; Henry Baring, 1848, at Felbrigg, Norfolk; and Thomas Tryon, 1872, at Bulwich, Northants.

Graves, in his Exhibitors at the Royal Academy, includes, not only a "Raymond Smith," but a "C. Raymond Smith." This, however, seems incorrect and I have therefore attributed all exhibited works to Raymond.

(Authorities cited in text.)

SMITH, ROBERT ORMERIC
b. 1819

He attended the Royal Academy Schools in 1838, but afterwards lived chiefly in Rome, whence he sent a bust of Theophilus Smith to the Academy in 1855. His statue of "Rebekah" (then in the possession of T. Agnew, Esq.) was shown at the Exhibition of Art Treasures of the United Kingdom held in Manchester in 1857.

SMITH, THOMAS
b. 1800

Son of James Smith (q.v.), and younger brother of Charles R. Smith (q.v.), he attended the Royal Academy Schools in 1817 and won a large Silver Medal in 1822 from the Society of Arts for a group entitled "Oedipus and Antigone." In 1830 he was appointed "Modeller of Wax Medallion Portraits" to William IV.

Smith, who exhibited at the Academy, 1827-1852, and at the British Institution, 1829-1831, also had a considerable practice as a monumental sculptor. His best works are the tablets to Robert Bevan, 1837, at Monmouth, and Eliza Russell, 1838, at North Ockendon, Essex, both of which have medallion portraits. His monuments to Sir Thomas Salusbury, 1835, at Great Offley, Herts, and to Sir Edward Banks, 1835, at Chipstead,
Surrey, have busts, while the latter also has reliefs of Waterloo, Southwark and London Bridges, all built by Banks. Other monuments executed by Smith are those to Lady Elizabeth Russell, 1828, at North Ockendon, Essex; Gilbert Jolliffe, 1833 (with a replica at Merstham, Surrey), at Worth, Sussex; Whitlock Nicholl, 1838, in Wimbsedon Parish Church; and Nicholas Mori, 1839, in Kensal Green Cemetery.

SMITH, W.
A "W. Smith" was the master-mason for building St. George's Church, Liverpool, in 1715 (City Archives).

SMITH, W.
Probably a Durham artist, he signs the altar-tomb with a life-size recumbent figure of Michael Matthen, 1689, at Whitburn, in that county. The figure is carved in stone and shows Matthen in contemporary costume with a book in his hand.

SMITH, WILLIAM, of Warwick
b. 1705, d. 1747
Son of Francis Smith, of Warwick (q.v.), he built the Georgian front of Thame Park, and in 1737 was appointed joint mason with William Townesend (q.v.) for building the Radcliffe Library, Oxford.
In 1737 he also made a dove-grey marble chimney-piece for Lamport Hall, Northants (Isham Archives).

SMITH, WILLIAM
b. 1808
He attended the Royal Academy Schools in 1826 on the recommendation of J. Wood, winning Silver Medals in the following year and again in 1830. His bust of Sir Francis Chantrey (1826) is at Burlington House.

SMITH, WILLIAM, and ELSWORTH, JOHN, of York
fl. 1703-1719
They were the principal masons for building Castle Howard from 1703 onwards, receiving as much as £4,034 in 1705. Another partner was Major or Mauger Smith, perhaps the son of William Smith, who, by 1710, is not mentioned in the bills. The younger Smith and Elsworth were also responsible for a good deal of carved stonework, including in 1715 vases for the mulberry garden, for the gateway of the Back Court and for those on the "circular corridor." They were also paid for "angular" vases for the North Wing (Castle Howard Archives).

SMITH, WILLIAM
He may be the William Smith, son of Samuel Smith, of Rochester, who was apprenticed in 1765 to Thomas Vidgeon. Three years later he was "by order of the Lord Mayor and Court of Aldermen discharged from the said Thomas Vidgeon," who had "neglected to enroll him," and was apprenticed instead to George Freshwater. Smith's new master, however, "turned him out of his service and refused to receive him therein again," so that he had finally to finish his apprenticeship with John Wynne (Court Book, Masons' Company).
A William Smith signs the large architectural tablet with a broken pediment and flaming lamps to Ralph Manning (d. 1769), at Westerham, Kent.

SMITH, WILLIAM
b. c. 1758
Son of John Smith, of Dunchurch, Warwick, he was apprenticed to Thomas Beard (q.v.) in 1772 and became free of the Masons' Company in 1785. His yard was in Jermyn Street, and he signs a very pretty tablet to Matthew Armstrong, 1801, at St. Magnus, London Bridge.

SMOUT, or SMOOTE, JOHN
fl. 1704-1715
He was chiefly a carver of marble chimney-pieces, and in 1704 made five for the rooms in the west front at Chatsworth (Archives, Duke of Devonshire). About 1706 he became master-mason to the Royal Palaces and supplied a marble and Portland-stone chimney-piece for Whitehall and another in Reigate and Portland stone for the Palace of Westminster (P.R.O., E.351/3312). Smout provided other chimney-pieces for the Tower of London and Denmark House in 1709, and for St. James's Palace in 1710. In the latter year he also made two veined-marble tables for the Queen's closet at Newmarket Palace, and in 1715 the "great marble basin" in Bushy Park (P.R.O., A.O.1.2248/149).
In 1708 he built a "New Summerhouse at the lower end of the Garden" at Kensington Palace. This, according to the Wren Society's Publications (Vol. VII, page 189), is probably the famous alcove now removed to the Fountain Garden at the head of the Serpentine.
In 1712 he was paid for Purbeck paving at the lodging of Rt. Hon. Thos. Coke, Vice-Chamberlain to Queen Anne at St. James's Palace (Archives, Marquis of Lothian).
SMYTHE, JAMES, of Woodbridge
b. 1771, d. 1836
He signs a pretty architectural tablet, with an urn and cockle-shells to left and right, at Grundisburgh, Suffolk, to John Higgs, 1816. Smythe's widow, Ann, died a few weeks after her husband.

SOANES, JOSEPH
He was an assistant of J. F. Moore (q.v.) and in 1764 made marble chimney-pieces for Audley End (Essex Record Office, D./DBY. 243).

SOWARD, JOHN
fl. 1802–1838
He was possibly a son of George Soward, who, according to the Westminster Poll Book of 1748, had a mason's yard in Chapel Street and who carried out considerable repairs to St. Anne's, Soho, in 1761 (Westminster Public Library, A.2312).

John Soward's yard was in Tottenham Court Road. His monuments and tablets are not very exciting, his best works being the large altar-tomb of Eliza Harris, 1802, in Hillingdon churchyard, Middlesex, and the tablet to Lady Sondes, 1818, at Norton, Kent, which has a well-carved relief of two angels guiding the deceased to heaven. Other tablets executed by him include those to Shadrach Brise, 1810, at Cavendish, Suffolk; the Rev. Joseph Jefferson, 1821, at Witham, Essex; Charlotte Prendergrass, 1821, in St. Giles-in-the-Fields; James Spawforth, 1824, at Horbury, Yorks; Mrs. Pedley, 1827, at Everton, Beds; Anne Burley, 1831, at Basing, Hants; Miss Livermore, 1831, in Hackney Parish Church; and James Sparrow, 1838, at Gosfield, Essex, which is signed "J. Soward and Son."

Soward was also a herald-painter and in 1831 he executed the two hatchments of the 4th Earl of Darnley, one for Cobham Hall and the other for his London house (Archives, Earl of Darnley).

SPANG, MICHAEL HENRY
d. 1762
He was a native of Denmark who came over to England about 1756, and two years later received a premium of thirty guineas for modelling the "seal of the Society of Arts used for letters" from a design by Cipriani.

In 1759 Spang made the chimney-pieces for the four principal rooms at Kedleston at a total cost of £990 (Kedleston Archives). In 1760 he carved the dolphins and prows of ships on the stone screen of the Whitehall entrance to the Admiralty, and in the same year executed three statues for the front of Lord Spencer's house in St. James's Park (Timba's Curiosities of London).

His monument to James Thomson, who died in 1748, was erected in Westminster Abbey about 1760. It has a life-size figure of Thomson and enchanting reliefs of the four seasons, commemorating his most famous poem.

Spang exhibited at the Society of Artists, 1760–1762. His bronzed terra-cotta statuette of Hogarth is in the Victoria and Albert Museum, and at the sale of the effects of G. M. Moser, R.A., held on 21 May, 1783, Lot 19 was "Spang's anatomy figure in bronze, restored by Mr. Moser."

The sculptor left little or no money at his death. A sale of his belongings was held at Little Stanhope Street on 21 December, 1762. Among the lots were various models and a marble bust. In 1768 the Society of Artists had to provide eleven guineas in order to apprentice his son, Henry, to a peruke-maker (Archives, Society of Artists). Spang's widow, Mary, married a Mr. Brown shortly after the death of her first husband, but on the recommendation of Sir William Chambers drew a pension from the Royal Academy from 1769 until her death in 1785 (Royal Academy Archives).

(Archives, Society of Arts; authorities cited in text.)

SPANGEN, RICHARD, of Camberwell
In the writer's possession is a letter from Spangen, dated 19 December, 1749, addressed to a Mr. Hooper of Hailsham, Sussex, and enclosing three drawings for monumental tablets.

Spangen writes that "the enclosed sketches I have made according to your direction, the expense will be about what you mention; they are drawn to a small scale but when executed will be about 8 ft. high and breadth proportionate. Materials to be of the best white and veined and statuary marble," he continues, "the inscription to be engraved and painted black, and the coat of arms in proper colours and executed in a workmanlike manner." I do not know if Mr. Hooper ever ordered one of these monuments, but there is certainly no sign of any work resembling them in Hailsham Church today.

He may be the same as the "Mr. Spangor" who made the monument of Lord Trevor at Bromham, Beds, in 1732. The Rev. Benjamin Rogers, whose diary is quoted in Harvey's Hundred of Willey, has "Some of the marble cost Mr. Spangor the Statuary in the block in Italy 18s. per foot, which stood him in 26s. per foot when brought to London, this was black with yellow veins."
SPARROW, GEORGE, of Stamford
fl. 1782–1811

Sparrow, who was possibly a son of James Sparrow (q.v.), signs tablets to Thomas Smith, 1782, and Mrs. Thompson, 1805, both in St. George’s, Stamford; Henry Sheld, 1792, at Preston, Rutland; Mary Arundell, 1802, at Irnham, Lincs; and George Hill, 1808, at Rothwell, Northants. His best monuments, however, are both at Rockingham, Northamptonshire, and commemorate the first and second Lords Sondes, who died in 1795 and 1806 respectively.

SPARROW, JAMES, of Stamford
b. c. 1716

According to the town archives, he was born about 1716, at Radcliffe-on-Trent. He signs slate headstones to Ann Hall, 1744, Granby, Notts, and to John and Mary Langston, 1753, in Grantham churchyard, Lincolnshire; and to Henry Green, 1776, at Flintham, Nottinghamshire.

SPENCE, BENJAMIN EDWARD
b. 1822, d. 1866

He was born in Liverpool, the son of William Spence (q.v.), and in 1846 was awarded the Heywood Silver Medal by the Royal Manchester Institution for his model of “The Death of the Duke of York at Agincourt.” Two years previously he had exhibited this work at Westminster Hall, when the Builder described it as an “exquisite specimen of artistic feeling.” The Literary Gazette, on the other hand, considered it “very laboured” and also complained that “the figure of the Duke of York is naked.”

Spence’s father was an old friend and fellow-student of John Gibson (q.v.), who in 1846 persuaded him to send his son to Italy. Young Spence accordingly went to Rome, where he entered the studio of R. J. Wyatt (q.v.), and also received considerable help from Gibson himself. It was Spence who later carved, just before his own death, the monument erected over Gibson’s grave in the Protestant cemetery in Rome.

When Wyatt died Spence completed his unfinished works and also took over the studio, indeed he spent nearly all his working life in Italy, only going to England about once a year to visit the Royal Academy Exhibition. He exhibited at the Academy, 1849–1866.

Spence died on 21 October, 1866, while on a visit to Leghorn. The Art Journal of the same year (page 364) said in its obituary that “Mr. Spence, though not a great sculptor attained a highly honourable position among the artists of our time. His works are characterized by great purity of feeling and general elegance of expression rather than by much originality of design or vigorous treatment.”

Spence signs the monument of Lieutenant James Marshall, 1855, in Leeds Parish Church. He also made a few busts, including those of Mr. and Mrs. Brasse which were formerly at Normanhurst Court, Sussex. At the Exhibition of Art Treasures of the United Kingdom, held at Manchester in 1857, Spence’s statue of “The Favourite” was lent by H. N. Sandbach and “Psyche” by W. Jackson. Other works of his in the exhibition were the four figures of “The Seasons” and “Girl at the Fountain,” the property of John Pender and Thomas Critchley respectively.

In 1870 Messrs. Christie held a sale in London of works from Spence’s studio in Rome. The Art Journal (1870, page 221), reporting the results, said that “the sale only confirms what we have frequently had occasion to remark, that there is little or no taste for, and less desire to acquire, ideal sculpture on the part of our patrons in art. Portraits, statues and busts are as plentiful as blackberries, they gratify one’s vanity, or may proclaim our good deeds, and English sculptors manage to live by them, but imaginative works are but little more than drugs in the market. We feel ashamed to note down the prices paid for Spence’s examples.” The chief works sold (the names of the buyers and the prices paid being in brackets) were “Sabrina” (Bowring, 210 guineas); “Oberon and Titania” and “Highland Mary” (Vokins, 200 and 121 guineas respectively); and “Flora Macdonald” and “Psyche” (Agnew, 173 guineas for the two). A total sum of £1,425 was paid for nineteen works. On 10 February, 1894, at the R. C. Naylor sale at Christie’s, “Venus and Cupid” by Spence fetched 300 guineas.

(Art Journal, 1849, page 95; Graham’s British Literature and Art, page 457; authorities cited in text.)

STATUES, etc.

SPENCE, WILLIAM
b. 1793, d. 1849

He was born in Chester in 1793 and showed artistic talent at an early age. He later went to Liverpool to study under Mr. Pether, a woodcarver and teacher of drawing, and while he was there formed a friendship with John Gibson (q.v.), who was then working for the firm of Francéys (q.v.). Gibson persuaded his employers to agree to give Spence a trial, his confidence in his friend soon being justified, for the young man quickly distinguished himself both as a modeller and designer.

Spence exhibited "Young Hymen" at the Liverpool Academy in 1812 and "Cupid Riding on a Dolphin" and a bust of William Roscoe in the following year. The bust attracted considerable attention and the sitter and his friends were anxious to send the sculptor to Rome, but Spence preferred to remain in Liverpool with Messrs. Francéys. He later became a partner in the firm and also held the appointment of Professor of Drawing at the Liverpool Academy for many years.

Spence exhibited at the Royal Academy, 1821–1844, at Manchester, where he showed figures of "A Greek Soldier" and "Pegasus" in 1832, and at the Liverpool Academy from 1812 until the year of his death. Here (besides those already mentioned) his works included a statue of William Roscoe (1832) and busts of Thomas Leyland (1822), John Gladstone (1824); Benjamin Heywood (1824); Mr. Secretary Canning (1824); William Hope (1827); John Foster (1827); George Canning (1828)—called "stiff and priggish" by the Saturday Advertiser; J. B. Hollinshead (1828); Robert Preston (1834); Lord Sandon (1836); and Sir Walter Scott (1837). His busts of Foster and George Canning are now in the Walker Art Gallery, Liverpool. In 1844 he sent his "Caractacus Before Claudius Caesar" to the exhibition held in Westminster Hall. The Literary Gazette described this work as "a group of idiotic beggars," although the Builder thought it "fine."

One of Spence's patrons was Benjamin Hicks, of Myton Hall, Yorkshire, who commissioned from him a portrait-bust, medallions of Scott, Shakespeare and Roscoe, and a delightful marble relief of three Cupids, all of which are illustrated in the privately printed Catalogue of Myton Hall (1893).

As a monumental sculptor Spence is dull, his best monuments being those to the Rev. James Archer, 1832, at Middleton, Lancs, with a lifesize figure of "Faith," and to John Goe, 1830, in St. James's Cemetery Chapel, Liverpool, which has a well-carved relief. Tablets executed by him include those to Rachel Roe, 1819, in Christ Church, Macclesfield; Edward Rowland, 1828, at Ruabon, Denbigh; Mary Williams, 1829, at Corwen, Denbigh; Margarette Golightly, 1831, and Anne Goodwin, 1842, both at Gresford, Denbigh; John and Henry Fletcher, 1834, at Overton, Flint; Michael Heathcote, 1835, at Ormskirk, Lancs; Catherine Shuffebotham, 1836, at Betley, Staffs; Harriet Vyse, 1836, at Holmes Chapel, Cheshire; Sarah Vawdrey, 1837, at Middlewich, Cheshire; Margaret Hoskins, 1838, Melling, Lancs; Elizabeth Latham, 1839, at Sandbach, Cheshire; Thomas Parker, 1842, at Colne, Lancs; Milborne Tynte, 1845, at Goathurst, Somerset; and Henry Swetenham, Astbury, Cheshire. The monument of Joseph Bradbury, 1845, in Huddersfield Parish Church, is signed "Spence and Sons."

(Gentleman's Magazine, 1849, Part II, page 435; Art Journal, 1849, page 75.)

SPENCER, EDWARD, and RICHARD, of Chester
f. 1775–1800

The Spencers of Chester were a family of masons, the first being Richard, whose son and apprentice, Thomas, became a Freeman in 1738–1739. On 3 September, 1770, and 7 April, 1784, respectively, Edward and Richard, sons of Thomas, in their turn became Freemen of Chester (Archives, Mason's Company of Chester).

Their monuments and tablets are typical of the period, the "Adam" details being carried out in coloured marbles. The best are those to Samuel Manning, 1775, at Wrenbury, Staffs; Priscilla Laurence, 1788, in St. Mary's, Chester; Sidney
Lee, 1788, in St. John’s, Chester; the Spencer family, 1790, in Chester Cathedral; and Sir Robert Townshend, 1790, at Gresford, Denbigh.

**SPILL, THOMAS**

In 1697 he carved a marble chimney-piece for Kensington Palace (P.R.O., E.351/3466).

**SPILLER, JOHN**

b. 1763, d. 1794

Spiller was a brother of James Spiller the architect, and was born on 23 December, 1763. He attended the Royal Academy Schools in 1781 and later became a pupil of J. Bacon, R.A. (q.v.).

His best-known work was the statue of Charles II, executed in 1793, which occupied the centre of the Piazza of the Royal Exchange and escaped the fire of 1838. In 1792 he made two chimney-pieces for the Earl of Hardwicke at Wimpole Hall, one of “enriched veined marble, £40,” and the other of “enriched statuary marble, £35” (bills in private possession). He also carved the monument of Phillip Chauncy, erected in the Mercers’ Hall in 1791 (Gentleman’s Magazine, 1794, page 592).

He died at Croydon 17 May, 1794 of consumption, his wife, who is said to have been very beautiful, dying of the same disease a few months later. The elder Disraeli said of him that “the energy of his labour and the strong excitement of his feelings had already made fatal inroads on his constitution and he only lived to finish his statue of Charles II.”

(Malcom’s Londonium Redisivum, Vol. II, page 442; Builder, 1868, page 415.)

**SPILLER, ROBERT**

fl. 1794–1827

A younger brother of John Spiller (q.v.), he was much employed by various architects for chimney-pieces and ornamental details. Under Soane he made a chimney-piece for Mr. Thomas Lewis’s house at Palmer’s Green in 1794; one for Lord Hardwicke at Wimpole in 1796; and three others in marble for the Bank of England in 1799, at a cost of £102. He also made a marble chimney-piece costing £46 for Lord Eliot’s house at Down Ampney in the same year, while in 1801 he supplied one at £42 6s. 6d. for Albury House, Surrey, which was then being built by Soane for Mr. Samuel Thornton.

In 1803 Spiller built the Portland-stone obelisk at Reading for Mr. Edward Simeon, receiving £310 for the work, while in the same year Mr. Cartwright paid him £109 for chimney-pieces at Aynho Park. Other chimney-pieces made by him were for Bushy Park and for Lord Le Despencer’s London house.

When Dance rebuilt the Royal College of Surgeons in 1807, Spiller was the master-mason and was also responsible for all the carved work and the chimney-pieces. Ten years later he made the “termes” for the busts of Sir E. Home and Sir W. Blizard for the same building, and finally in 1827 received £58 19s. 6d. for the chimney-piece in the library. He also worked as Dance’s master-mason during the rebuilding of Ashburnham Place, Sussex, 1815–1818, besides providing some of the smaller chimney-pieces.

(Soane’s Notebooks, Soane Museum; Archives of the Royal College of Surgeons; Archives at Ashburnham Place.)

**SPITTLE,** —

Probably a Leicester statuary, he signs a tablet at Hungerton, in that county, to John Goodhall, 1828.

**SPRATT, WILLIAM**

b. c. 1709

Son of William Spratt of Stepney, Middlesex, he was apprenticed to Thomas Stayner (q.v.) in 1723, becoming free in 1730.

He signs the fine architectural monument to Mrs. Mary Dawkins, 1741, at South Mimms Herts.

**SPRINGALL, ROBERT**

of Bletchington

b. 1625

In a lawsuit between Thomas Wood (q.v.) and Richard Froglery, a carpenter, in 1681, Springall gave evidence. He said that he was “fifty-six years old; that he had worked as a master workman in Windsor Castle where for twenty weeks he had the command over twenty workmen; that he had worked for the late Duke of Richmond and now for the Lord Privy Seal at Bletchington, and likewise for Esquire Coghill there, for Chancellor Hyde at Cornbury, for Sir Thomas Chamberlaine at Northbrooke, Esquire Dormer at Rowsam, and for Mr. Carter at Brill” (Oxford, Vice-Chancellor’s Archives, 1681, Mich.).

**SQUIRE, RICHARD,**

of Worcester

b. 1700, d. 1786

In 1724 he was paid for repairing the statue of King Charles I on the front of the Worcester Guildhall (City Archives). In 1758 he made a marble table and a freestone font for the church at Upton-on-Severn (Churchwardens’ accounts). Squire was one of the best of the Worcestershire
STATAFFORD, Francis, of Norwich
fl. 1740-1744

His architectural monuments are well carved, the most interesting being to Mrs. Hodgson, 1743, at Dersingham, Norfolk, which has a central Corinthian column standing in front of a pyramid.

Other works signed by Stafford in the same county commemorate John Baron, 1739, at Saxlingham Nethergate; Robert Wiggott, c. 1740, at Guist; Ann Holmes, 1740, at Wymondham; and T. Gurdon, 1744, at Cranworth.

STAFFORD, T., of Norwich
b. 1728, d. 1796

He was the son of Francis Stafford (q.v.), and signs tablets in Norfolk to Fysher Colman, 1758, at Great Ellingham; Hannah Curteis, 1760, at Aylisham; and Robert Cremer, 1778, at Wymondham.

Stafford later went into partnership with G. Athow (q.v.), and together they sign tablets in the same county to Abraham Robertson, 1777, in St. Swithin’s, Norwich; Bartholomew Dey, 1780, at Wicklewood; Robert Plumptre, 1788, in Norwich Cathedral; and William Fell, 1795, at Horsham St. Faith.

STAIG, —, of London
fl. 1826-1830

Staig, whose yard was in the Old Kent Road, signs the neo-Hellenic monument with a relief of a mourning angel to Sarah Drew, 1826, in Streatham Parish Church, and a wall-tablet to Beriah Drew, 1829, in Bermondsey Parish Church.

STAINEs, WILLIAM, SIR
b. 1731, d. 1807

In 1774, when “a stone-mason and pavior,” he designed and built the church of St. Alphage, Cripplegate, a work for which he received £1,350, “the parish deeming the expense of an architect unnecessary” (Allen’s History of London, Vol. III, page 473).

Staines, who was an Alderman of the City of London (1793-1807), is described in the directory of 1787 as “statuary of 23 Barbican.” He was also mason to the Royal Exchange, receiving nearly £1,700 between 1768 and 1772. In 1784 he rebuilt the Barbican Chapel, Cripplegate. Staines died 10 September, 1807.

STANBorough, WILLIAM
d. 1695

STANLEY, CHARLES
b. 1703, d. 1761

Simon Carl Stanley, to give him his baptismal name, was born in Copenhagen of British parents on 12 December, 1703, and in 1718 he was apprenticed to Strumberg, the Danish stuccoist.

He came to England in 1727, and during the time he spent in England executed two most important monuments. The first of these, to Thomas Maynard, 1742, at Hoxne, Suffolk, is nearly 18 ft. high, with a life-size statue of Maynard in Roman dress, his left arm resting on an urn, while his right hand holds a book. The base of the pedestal which supports the urn is decorated with charming reliefs of “Justice,” “Charity,” “Faith,” etc.

Stanley’s second work, the huge monument commemorating Lord Maynard and his ancestors, at Little Easton, Essex, is on an even grander scale and was erected in 1746. This shows Lord
Maynard in semi-Roman dress leaning upon an urn, while around him are busts and medallions of his family and forebears; on the base of the monument is a large relief.

While in England Stanley also worked as a decorator in plaster at Compton Place in Sussex, Langley Park in Norfolk, and other houses, but his work in this capacity is, of course, outside the scope of this book. In the year that his second monument was finished he was invited by Frederick V to return to Denmark as court sculptor, a post he held until his death on 17 February, 1761.

Stanley was an artist of varied talent, for while in Denmark he designed not only monuments and garden statues, but ceilings, stoves, picture-frames and china. He was also well-read in history, translated various books (which he illustrated himself) and was keenly interested in music.

His first wife, an Englishwoman named Anna Allen, whom he married in 1730, died five years later, and in 1737 he married Margarethe Margreth Lindemann, who survived him, dying in 1763. His son by his second wife, Carl Frederick Stanley, was born in Westminster in 1738 and returned to Denmark with his father. He adopted sculpture as a profession, studying in Copenhagen, Paris and Rome, and in 1777 adopted Danish nationality and was elected a member of the Royal Danish Academy. He died in Copenhagen in 1813.

(Information from Director, Frederiksborg Castle, Denmark.)

**STANLEY, ROWLES**

He signs the monument of William Knight, 1786, at Stroud, Glos. This is a very pretty work, which takes the form of a medallion-portrait hanging against a pyramid.

**STANTON, EDWARD**

b. 1681, d. 1734

He and his brother Thomas were apprenticed to their father, William Stanton (q.v.), and were admitted by patrony to the Masons’ Company in 1702. During the next few years Edward made several chimney-pieces for Aynho Park, Northamptonshire, including in 1704 one for “ye south-west chamber,” and in 1707 another for “ye closet over ye white parlour” (Cartwright Archives). In the following year he received £13 for a marble chimney-piece for an unidentified room in the same house. He made a chimney-piece for Knowsley, Lancashire, in 1724 (Derby Archives).

In 1707 Stanton had also been working at the Temple Church, receiving £127 (Inderwick’s Inner Temple Records, Vol. III, page 406), and in 1709 he was employed by Sir Nicholas Shireburn at Stonyhurst, where he carved “ye crest at ye head of ye hall stairs” for £6, and his patron’s arms on the almshouses at Cartington for a further £10 (Stonyhurst College Archives). In 1711 he was paid £273 for work he had carried out at the Guildhall and £520 for building “Three Cranes stairs” (City Cash Account 1/27). In 1721 he was working at Leicester House, London (Archives, Lord De L’Isle and Dudley), while between 1726 and 1730 he was the mason responsible for building the New Dormitory at Westminster School (Wren Society, Vol. XI, page 43).

In 1720 Stanton was appointed Mason to Westminster Abbey, a post he held until his death. His chief work as Abbey Mason was rebuilding the north front. Indeed, between 1720 and 1723 he received no less than £6,038. He was responsible for all the carved stonework, including the Capitals, Pinnacles, Cherubim Heads, etc., and in 1722 he was paid for carving “The College Arms” and “Two Portcullis and Chains.” On 11 October, 1722, Stanton acquainted the sub-commissioners “That He had entered into an Agreement in writing with the Lord Bishop of Rochester for doing repairs of the Church and had given a bond in penalty of £2,000” (Westminster Abbey Archives).

Stanton was Warden of the Masons’ Company in 1713 and 1716, and Master in 1719. He married three times, his first wife being a daughter of Samuel Fulkes (q.v.), and his third the daughter of Robert Churchill, mason and bricklayer. He died in 1734, and in his will (proved on 20 June of the same year) desired to be buried “by daylight in the north churchyard of St. Andrew’s, Holborn, towards the enginehouse door.”

He was one of the most prolific of English statuaries, as can be seen from the long list of works (ranging from life-sized effigies to cartouche tablets and ledgers) which he gave his friend Le Neve for the latter’s “Monumenta Anglicana.”

Stanton’s brother Thomas spent nearly all his life in Italy. In 1734 he was living at Leghorn and in 1742 was removed from his post of Assistant to the Masons’ Company, “having been one of the Court of Assistants of the Company for forty years and has very seldom attended them, and in the last twelve years has not been to any” (Archives, Masons’ Company). Another brother, William, was made Beadle of the Company and died in 1753, when his widow was granted a pension.

Thomas’s son, another Edward Stanton who had become a linen-draper in Fleet Street at the Golden Key, petitioned the Company in 1755 for the return of his Livery fine of £5, “on account of his
necessities and indigent circumstances," a request which was refused. A year later he lodged a similar petition, but this was again turned down. Another member of the family, also William, had a mason's yard “near Bloomsbury Church” in 1763, while a "Mrs. Stanton, widow," was a pensioner of the Company until her death in 1785. (Esdaile, Archaeological Journal, Vol. LXXXV, pages 149–169; Esdaile, Antiquaries' Journal, Vol. XXII; authorities cited in text.)

STANTON, JAMES, of London
He signs a tablet to Theodosia Richards, 1810, at Sidmouth, Devon.

STANTON, THOMAS
b. 1610, d. 1674
He was an uncle of William Stanton (q.v.) and was apprenticed to Christopher Kingsfield. He became free in 1631 and was Master of the Masons’ Company in 1660.
Stanton's finest work is the monument to Dame Jane Bacon, at Culford, Suffolk, the agreement for which is published in the Report of the Historical Manuscripts Commission on the collection of the Earl of Verulam (page 54). The monument, which was erected in 1654, was to cost £300 and was to be executed “according to the best skill of a stone-cutter, inlaid in marble and black marble without the addition of any other stone whatsoever.”

Other signed works by Stanton include those commemorating Judith Combe, 1649, at Stratford-upon-Avon, Warwick; Jane Robinson, 1665, at Pangbourne, Berks; and Sir Thomas Lyttelton, 1666, in Worcester Cathedral.

STANTON, WILLIAM
b. 1639, d. 1705
His father was Edward Stanton, who died in 1686 and may possibly be the craftsman who made the chimneys at the Royal Exchange (Builder, 1846, page 2), while his uncle was the stonemason, Thomas Stanton (q.v.).

In 1686 he was employed by Sir John Brownlow as the master-mason for building Belton, receiving a total of £5,091. Some of his bills are still in existence and show that he received £30 for “five cornishes with freezes to ten chimney-pieces”; £100 for paving the hall and staircase, while for the “cornish in ye withdrawing-room” he was paid £8 and £26 for “two scollop shells.” He also made a number of chimneypieces, receiving £50 for six which are not described. For Belton Church he made the monument of Sir John and Lady Brownlow which cost £100. This large work has columns supporting a broken pediment and in the centre are half-figures of Sir John and his wife, set on a slab of black Belgian marble (Archives, Lord Brownlow).

William Stanton, who is the greatest sculptor of the three Stantons of Holborn, became free of
the Masons’ Company in 1663. In 1678 he received £10 for the monument in Chirk Church (now fixed to a pillar) commemorating Dr. Walter Balcanqual (Chirk Castle Archives), and two years later was paid £20 for “making and erecting the pillars in the Cloister of the Inner Temple (Inderwick’s Inner Temple Records, Vol. III, page 157).

In the archives of Lord Monson is the bill: “Rec’d John Archer, Esq., in full for a monument and grave stone set up in the parish church of Coopersale in Essex the sume of thirty pounds and all other accounts by me”—7 July, 1683. This refers both to the monument which is on the east wall of the chancel and the gravestone in the floor of the aisle in memory of John Archer (d. 1682) in Theydon Garnon Church, Essex.

In 1699 Stanton executed the monument to Lady Isham in Lamport Church, Northants. The agreement in the Isham Archives reads as follows: “It is agreed by Sir M. Dayrell on behalf of Sir Just Isham on the one part and William Stanton, Stone-Cutter of the other part that the sd Will Stanton shall make the pillars of the Monument, Twisted pillars of the best Dove Colourd Marble and the Trusses underneath the sd pillars likewise of the best dove colourd Marble and it is agreed that the large plate for the inscription shall be full 2 Inches and half thick of the best white marble & the said William Stanton for the fashion of the said twisted pillars is to have foure pds over and above the former bargain Witnesse the hand of the said Will stanton this 16th day of Febr 1699.”

The monument cost £64 and, in a later letter, Stanton says he is sending it down by wagon with his man, John Summers, who will set it up.

Two years later Stanton was working at Stonyhurst, where Sir Nicholas Shireburn paid him £4 16s. for “Reigate stone lions,” and £160 in 1703 for the monument to Richard Shireburn. This lovely work is in Mitton Church and has a pathetic figure of the last of the Shireburns, a boy of nine, who starts back in fear from a skull and crossbones. It has been incorrectly attributed by most writers to Edward Stanton (q.v.). Also in 1703 Stanton made the lions and eagles on the court stairs at Stonyhurst for £30, while the front-door shield cost the same sum.

In the Elford Hall MS. (now in the Birmingham Reference Library) is Stanton’s receipt, dated 24 September, 1703, for £35 paid by Lady Diana Howard for a “monument set up for Mr. Howard in Ashtead Church.” The work referred to commemorates Thomas Howard, who died in 1701, and is to be found in the chancel of Ashtead Church, Surrey.

In 1704 Stanton began carving the fine monument to the fourth Earl of Leicester in Penshurst Church, Kent, but died before finishing it. For some reason it was completed, not by his son Edward, but by William Woodman (q.v.), as the bill at Penshurst Place shows (Sidney Archives). Stanton also made the bust of Hugh Saxey on the Saxey Hospital at Bruton, Somerset.

In 1688 and 1689 he was Master of the Masons’ Company, but when asked to serve again in the following year wrote a refusal on 24 June, adding that he would “be willing to submit to what fine the Company shall think fit.” His wife, Dorothy, survived him and died in 1707 at the age of sixty-seven. She was called “a prudent tender wife and mother” on the family gravestone, formerly at St. Andrew’s, Holborn.

STAVELEY, —, of Woodstock
He signs a monument to Edward Perrott, 1731, at North Leigh, Oxon.

STAVELEY, CHRISTOPHER, of Melton Mowbray
b. 1727, d. 1801

Staveley, who married Dorothy Loasby in 1741 (who died 23 September, 1780, aged fifty-two), was the builder in 1783 of Stapleford Church, and also executed some good architectural monuments with excellent lettering. The best are at Grantham, Lincolnshire, and include works commemorating the Rev. Richard Stevens, 1751, Randolph Clarke, 1751, and Jane Stevens, 1771, all in the Parish Church, while in the churchyard are the altar-tombs of Richard Huthwaite, 1752, and Joseph Osbourn, 1772, and the tombstones of James Rubins, 1761, and Mary Blower, 1781, the last with a charming relief of “Charity.” A “Stephen Staveley” signs a slate monument to John Hopkinson, 1728, Hickling, Notts, and was also employed at Melbourne Hall, Derbyshire, in 1740 (Archives, Marquess of Lothian). Christopher died 31 January, 1801.

(Monthly Magazine, 1801, page 189.)

STAYNER, or STAINER, —, of Warwick
b. c. 1668, d. 1731

A “Mr. Stayner, carver,” was paid in 1730 for the coat of arms on the front of the Court House at Warwick, and in 1751 was still living in the town.

STAYNER, or STAINER, THOMAS
b. c. 1668, d. 1731

He was the son of Thomas Stayner, “late of St. Giles-in-the-Fields, mason,” and was apprenticed to Michael Todd in 1682, becoming free in 1690. By 1694 he had two apprentices, one of them his brother Anthony. Stayner must have married very young, for his son, another Thomas, was apprenticed to him as early as 1702 and became free in 1709.

Stayner made rapid progress in the Masons’ Company, for he was an Assistant in the year after he became free, Renter Warden in 1703, Upper Warden in 1706, and Master in 1709. In the Court Book of the Company in 1720 there is, however, the following curious entry: “Ordered that Mr. Thomas Stainer, a member of this Court be summoned to appear at the next Court to show cause why he should not be discharged from being an assistant for the misdemeanour by him committed in affronting the Master Warden and Company at the public dinner on the Lord Mayor’s Day last.” Stayner appeared before the Court and “purged his offence” by a payment of 6s. 8d.

In 1697 Stayner was living in Goodmans Fields, but by 1715 he had moved to Bow Bridge in Essex, where he died in 1731. In his will he left his property to his son Thomas, who was still living there in 1750 (Court Book, Masons’ Company).

As a sculptor Stayner is of great importance. His earliest monument is the signed altar-tomb with recumbent effigies of Richard and Anne Winwood, 1691, at Quainton, Bucks. Much later comes his most ambitious work, the remarkable monument, with its two standing figures, to Dr. Turner, 1714, at Stowe-Nine Churches, Northants. This is followed in 1717 by that of Sir Henry Bendyshe at Steeple Bumpstead, Essex, with twisted barley-sugar columns and a reclining effigy of Sir Henry with a babe beside him. In 1723 he made the architectural tablet, also with twisted columns, to Lady Goselin, at Morningthorpe, Norfolk, and two years later the monument to Mr. Henry Hoare in St. Dunstan-in-the-West, the bill for which is in the archives of Hoare’s Bank. In the Delme-Radcilffe Archives (Hertford County Records, D.E.3574) is Stayner’s contract with Ralph Radcliffe, dated 31 August, 1721, for the monument to Sir Edward Radcliffe which was to be erected in Hitchin Church.

On 13 February, 1727, Mr. Rice Williams wrote to Samuel Sandys, M.P., from Pyrgo informing him that “upon inquiry I found that Mr. Stayner, a stone-cutter upon Bowbridge was the person who lay’d the stone upon Mrs. Cheek in Pyrgo Chapel.” The writer continues: “He called upon me this morning and I came with him hither in case you and Mr. Archer approve of it. The dimensions of the stone are six foot six inches by three foot two inches, so that the whole stone will be near twenty foot, which at ten shillings a foot, a penny a letter for cutting and about three pounds for the coat of arms brings the whole to about 14 pounds if you have the same sort of stone with (sic) Mrs. Cheek. . . . If you please to stop on Bow Bridge you may talk with this Mr. Stayner yourselves and I think he may be brought a little lower in his prices” (Archives, Lord Sandys). The letter refers to the ledger stone in Pyrgo Chapel, Essex, for Samuel’s mother-in-law, Lady Tipping, who was herself a daughter of Thomas Cheek of Pyrgo. Both monuments were formerly in the private chapel attached to the house.

In the declared accounts of the directors of the
STEAD, SAMUEL, of Ludlow
He signs a large wall-tablet to Thomas Green, 1828, at Ashford Bowdler, Salop.

STEAD, WILLIAM, of York
fl. 1773-1815
He was apprenticed to Joseph Atkinson, of York (q.v.), and became free in 1773. He signs tablets in the county to Henry Bubb, 1792, in Holy Trinity, York; Samuel Lister, 1793, and Charles Sharp, 1804, both in Bradford Cathedral; James Lord, 1799, at Sowerby; and William Markham, 1815, at Aberford. He also executed the tablet to Mary Boucher, 1791, at Chesterfield, Derbyshire.

STEELL, SIR JOHN
b. 1804, d. 1891
He was the son of John Steell, a carver and gilder, and was born in Aberdeen on 18 September, 1804. His family moved to Edinburgh about a year after his birth, and at the age of fourteen he was apprenticed to a wood-carver and also studied at the Trustees' Academy.

On the expiration of his apprenticeship Steell decided to become a sculptor, and with this end in view went to Rome, where he lived and studied for several years. In 1827 he carved a colossal statue in wood for the North British Fire and Insurance Corporation, and in 1833 modelled the group entitled "Alexander Taming Bucephalus," which at once attracted attention. In 1829 he had become a member of the Royal Scottish Academy, and in 1838 was appointed sculptor to the Queen in Scotland.

Sir Francis Chantrey (q.v.) urged Steell to come to London, but he preferred to remain in his native country and devote himself to the improvement of Scottish art. He therefore spent the rest of his life in Scotland, and his seated figure of Sir Walter Scott in Princes Street, Edinburgh, is said to be the first marble statue ever commissioned in that country from a native artist. He was also the first to introduce artistic bronze casting into Scotland, and built at his own expense a foundry, so that not only his works, but those of other artists, could be reproduced in metal.

Steell was knighted on the occasion of the inauguration of his statue of the Prince Consort by Queen Victoria in 1876. He exhibited at the Royal Scottish Academy, 1827-1880, and at the Royal Academy, 1837-1876. In 1868 he carved a group for the tymanum of the Bank of Montreal in Canada, and executed another of the parable of "The Ten Virgins" for the Standard Assurance Office, Dublin. He died on 15 September, 1891, and was buried in the Old Calton Cemetery.

STEGGLES, WILLIAM, of Bury St. Edmunds
b. 1767, d. 1859

Steggles signs tablets in Suffolk to the Rev. Beriah Brook, 1809, at Stansfield, and to James Oakes, 1829, in St. Mary’s, Bury St. Edmunds; he also executed a ledger to Thomas Robins, 1834, at Isleham, Cambridgeshire. He was assisted in the business by his son, William Henry Steggles, who died in 1843 at the age of thirty-one.

STEPHAN, PIERRE

In the Wedgwood Archives is a letter from Stephan to Josiah Wedgwood, written from Wirksworth and dated 9 May, 1774. In it Stephan says: "I was informed some time agoe by several persons (particularly Mr. Gardiner of Derby the architect) that you gave great encouragements to Artists in Modelling branch, at which time I was then engag’d with Mr. Duesbury of Derby and since then with the china factory at Wirksworth, both which I am now disengaged from and have some thought of going to London, but first take the liberty of informing you that if I could meet with agreeable Employment and that encouragement my work may deserve, I should be glad to have an Opportunity of being Employ’d by persons of taste and merits (sic) which I hear is the Character of your Manufactory, but at the same time should chuse to have some part of my Employment in London on account of having a greater Opportunity of improving my Ideas in the art of Modelling; but hope you will be so kind as to favour me with a line as soon as possible as I shall leave this Plase in a fortnight or three weeks at the farthest. N.B. I work in figures, vases, or any sort of Useful as Business may require."

Stephan was later employed by Wedgwood and modelled for him a variety of things, including two wax models of "Hope" and "The Conquer’d Province." Wedgwood, however, does not seem to have thought much of these, for he wrote to Bentley in 1774 that "the drapery is hard and unfinished and the characters of the faces are those of common mortals of the lower class."

STEPHENS,
EDWARD BOWRING
b. 1815, d. 1882

He was born in Exeter on 10 December, 1815, the son of James Stephens, a native of that city. He first studied art under John Glendall, a landscape painter (1790-1865), but his master saw that his real interest was in sculpture, and persuaded the elder Stephens to allow his son to go to London and work under E. H. Baily (q.v.).

In 1836, the year in which he joined the Royal Academy Schools, Stephens won a Silver Medal from the Society of Arts for a model of a figure. In 1837 he was awarded the Academy Silver Medal for his original model of "Ajax Defying the Gods," and in the following year executed his first commission, a bust of Miss Blanche Sheffield. In 1839 he went to Italy, where he remained for two years, and on his return to Exeter in 1841 he carved the statue of Lord Rolle.

In 1842 Stephens moved to London, where he again attended the Academy Schools and gained the Gold Medal for his relief entitled "The Battle of the Centaurs and Lapithae." In 1844 he exhibited his "Hagar and Ishmael" at Westminster Hall, a work praised by the Art Union, which considered it possessed "very high merit and does credit to one of the most rising sculptors of the day, one whom we confidently expect to see
placed in the highest seat the profession supplies.” In 1845, the year in which Stephens sent his “Pastoral Apollo” to Westminster Hall, he was employed on decorating the Summer Pavilion in the grounds of Buckingham Palace. Here he made two reliefs of “The Attendant Spirit Disguised as Thrysis” and “The Lady from Comus.” In 1846 he also carved a marble chimney-piece for the same building.

In 1857 Stephens made a marble sarcophagus for Lord Lonsdale’s Mausoleum at Lowther and, two years later, the bronze relief of Balaclava for the memorial to Colonel Morris on Hatherleigh Down in Devonshire. He became an Associate of the Royal Academy in 1864, although at the time it was believed that his election was the result of his name having been confused with that of Alfred Stevens, the sculptor of the Wellington monument in St. Paul’s. In 1868 he carved a relief of the “Raising of the Widow’s Son” for Kenton Church, Devon.

Stephens exhibited at the Academy, 1838–1883, and at the British Institution, 1838–1853. In 1857 he lent his “Preparing for the Chase” to the Exhibition of Art Treasures held in Manchester. He died of bronchitis on 9 November, 1882. “He was one of those genuine, unpretending, honest beings that are always appreciated. He took the greatest interest in his native city and county. He was kind-hearted and liberal; was always among the first, often the first, to help a brother artist in difficulty, or to render justice when justice was due but not accorded” (Pycroft’s *Art in Devonshire*, page 140).

### STEPHENS, JOSEPH, the Elder, and JOSEPH, the Younger, of Worcester

**Joseph Stephens the Elder:** b. 1773, d. 1834
**Joseph Stephens the Younger:** b. 1808

Joseph Stephens the Elder was the son of William Stephens (q.v.), but his monuments and tablets have little of the charm of those designed and carved by his father. He died on 14 July, 1834, and was buried in St. Andrew’s Church, Worcester. His wife, Elizabeth, predeceased him, dying on 13 August, 1809, at the age of thirty-six.

Joseph Stephens the Younger was born in 1808 and attended the Royal Academy Schools, on the
recommendation of Chantrey (q.v.), in 1828. In the
following year he received a large Silver
Medal from the Society of Arts for a bust, and in
1830 exhibited at the Birmingham Society of
Artists a model of a monument for St. Nicholas' Church, Worcester. He exhibited busts at the
Royal Academy, 1833–1852; in 1853 he took casts
of the monuments in Worcester Cathedral for the
sculpture gallery at the Crystal Palace.

Both father and son were prolific statuaries. The
elder Stephens's best work commemorates Joseph
Roberts, 1806, at Saintbury, Glos, and has a relief of
"Hope" standing by an altar. Good tablets by
his son are those to Frances Brace, 1840, at
Leominster, Hereford, and Edward Corles, 1866,
in Worcester Cathedral, both of which have well-
carved reliefs. Other tablets executed by the firm
in Worcestershire include those to Catherine
Yarndel, 1800, at Malvern; Captain Norbury, 1800,
at Dodderhill; Mrs. Palmer, 1808, at
Spechley; the Rev. Slade Nash, 1823, in St.
Peter's, Droitwich; the seventh Earl of Coventry,
1831, and the eighth Earl of Coventry, 1843, both
at Croome; Jane Perrott, 1835, at Fladbury;
Viscount Valentia, 1841, at Upper Arley; and
Lady Winnington, 1854, at Stanford. Others to
R. Wilkes, 1824, at Enville, Staffs, and Edward
Wallwyn, 1831, at Much Marcle, Hereford, are
also their work.

STEPHENS,
WILLIAM HUMPHRIES,
of Worcester

b. 1737

He was the son of Joseph Stephens, a stonecutter,
and was apprenticed to his father in 1751,
becoming free in 1760. Early in his career he was
in partnership with a Mr. Bott, and tablets belonging
to this period are signed with both their names,
including one to Richard Canwardine, 1763, at St.
John in Bedwardine, Worcestershire. Later
Stephens was joined by his son Joseph (q.v.) when
the latter became free. The tablet to the Rev.
Hudson Boyce (d. 1786) at Fladbury in the same
county, which is signed "Stephens and Co.," is
probably their joint work. Another William
Stephens, who may have been a relation, was one of
the master-masons responsible for building
Omberiesley, near Worcester, 1724–1727 (Archives,
Lord Sandys).

William Stephens is the best of the Worcester
school of statuaries. His tablets, with their various-
coloured marbles and well-carved details, are a
delight to the eye and are models of eighteenth-
century good taste. In Worcester itself his
monuments and tablets include those to Robert
Woodward, 1780, Mary Astley, 1782, Mary Hall,
1794, and Bishop Hurd, 1808, all in the Cathedral;
Patience Turner, 1786, and John Williams, 1793,
both in All Saints' Church; and Joseph Berwick,
1798, in St. Nicholas' Church. Works by him in
Worcestershire commemorate Thomas Parker,
1751, at Longden; Thomas Dunn, 1777, in All
Saints, Evesham; Arthur Charlett, 1779, at
Fladbury; the Rev. James Gyles, 1792, at Powick;
and the Rev. George Martin, 1796, at Overbury.
Others in Gloucestershire include those to William
Hankins, 1771, at Dymock; Robert Bateson, 1779,
at Bourton-on-the-Water: Mary Clarke, 1792,
and Richard Clarke, 1796, both in Gloucester
Cathedral; and Daniel Ellis, both 1797, at Elmore.
Other signed monumental works by Stephens
include those to Mrs. Sarah Hall, 1780, at
Ledbury, Hereford; William Bach, 1785, at
Leominster, Hereford; Jonathan Green, 1792,
at Ashford Bowdler, Salop; and Lord Somers,
1808, at Eastnor, Hereford.

(STEPHENS Corporation Archives.)

STEPHENS, WILLIAM and
JOSEPH, of Exeter

f. 1810–1833

Their tablets are the usual provincial produc-
tions of the period, the best being one commemor-
ating Sir Boucher Wray, 1826, at Tawstock,
Devon, which has well-carved classical details.
Others executed by the firm include those to the
Rev. William Hole, 1822, at Swimbridge, Devon;
and the Hawkesley family, c. 1830, and Samuel
Wills, 1833, both at Crewkerne, Somerset.

STEPHENSON, WILLIAM,
of Liverpool

f. 1752–1756

In 1752 it was decided to add a bas-relief to the
pediment of Liverpool Town Hall and the Council
engaged Stephenson to carry out the work. On its
completion, however, they were not at all satisfied
and offered the sculptor eighty guineas, instead of
the larger sum which they had originally men-
tioned.

In 1756 Stephenson petitioned the Council for a
further £20, but they refused his request, considering
that the relief was "ill-executed" and that
"Mr. Stephenson had been already paid more
than he deserved and that they would pay him no
more" (City Archives).

STEWART, JAMES

In 1767 he exhibited "A Marble Bust of a Lady"
at the Free Society.
STEWART, JOHN GUISE

*d. 1844

His widow, Mary Ann, applied to the A.G.B.I. after her husband's death. She stated that Stewart had worked for W. G. Nicholl (q.v.), Samuel Nixon (q.v.) and "Mr. Smith of New Road." Stewart exhibited a "Group of Flowers in Wax" in 1844. He died on 20 June, 1844, leaving, besides his widow, four children.

STEWART, RICHARD

*d. 1847

He applied to the A.G.B.I. in 1846 and stated that he had left Dublin in 1843 to come to London, bringing with him his work "King John Signing Magna Charta," but he failed to sell this work or indeed to find employment in London. Stewart also stated that he had executed "several works at Windsor under Sir Jeffery Wyatville," and had made stone figures for the Duchess of Leinster. He had also given instructions in modelling to the "Countess of Verulam, Earl of Auckland and many others of the Nobility." As a specimen of his work he sent to the A.G.B.I. a model "of a work designed to be set up in Lloyd's Coffee Room, Royal Exchange." Stewart died in April, 1847, leaving a widow, Jane.

STEWART, ROBERT

fl. 1777-1784

He exhibited at the Society of Artists, showing wax portraits, and also medallions of Lord Thurlow and the Duchess of Devonshire.

On 27 March, 1784, Mr. Christie held the sale of "Mr. Stewart, statuary and mason, quitting business, at his house, No. 14, on the west side of Princes Street, near Great George Street, Westminster." Among the lots were, "50 drawings for tablets, tombs, etc." and "drawings for chimney-pieces." Four marble chimney-pieces by Stewart were also sold.

A "Stewart" signs a fine monument to Bishop Preston, 1787, at Ferns, Co. Wexford.

STIRLING, EDWIN

b. 1819, d. 1867

He was born at Dryburgh, in Scotland, on 27 July, 1819, and when quite a child modelled some clay figures which were shown to Sir David Erskine, who lived in the neighbourhood. Erskine was so impressed by the boy's work that he had him apprenticed to a stone-carver at Darnick, and after he had become free Stirling went to Edinburgh to study at the School of Art.

He later settled in Liverpool, where he first worked for an architectural carver named Canavan, and afterwards became his partner. In 1857 he executed most of the decorative carving on the offices of the Liverpool and London Insurance Company in Liverpool (Builder, 1857, page 40), and he was also responsible for the statues on the south front of Horton Hall, Cheshire (Art Journal, 1867, page 84), and for the memorial to the Prince Consort erected at Hastings in 1863.

Stirling died on 6 January, 1867, and was buried in Liverpool Necropolis, where a monument commemorates him and his infant son.

(Information, Liverpool Public Library.)

STOREY, ABRAHAM

d. c. 1696

He was admitted to the livery of the Masons' Company in 1662, and in the same year was employed on repairs to St. James's Palace. By 1669 he was apparently his own master, for he sent in a tender for the masonry work for Brewers' Hall, then about to be rebuilt after the Great Fire (Archives, Brewers' Company).

In 1672 he received £15 for a marble chimney-piece for Wrest Park, in Bedfordshire (Archives, Lady Lucas and Dingwall), while two years later he was paid for work at the Royal College of Physicians. As a master-mason under Wren he built the Church of St. Edmund the King, 1677-1679, receiving £2,884 (Bodleian, Rawlinson, B.387). He was Warden of the Masons' Company in 1673 and 1677, and Master in 1680.

Storey's monuments are of great importance, his finest being one commemorating Lord and Lady Crofts at Little Saxham, Suffolk, which was erected about 1678. This has a life-sized, semirecumbent figure of Lord Crofts in full peer's robes, while his wife reclines on a lower table (Gage's Hundred of Things, page 159). He signs the large, elaborate architectural monument to Sir Thomas Hewitt, who died in 1662, at Sawbridgeworth, Hertfordshire.

STOREY, GEORGE, of Norwich

fl. 1733-1759

Andrews Jelte (q.v.), who was working at Holkham from 1742 until 1743, wrote in the latter year to Brettingham the architect that "after I had parted with you at Norwich, I talked to George Storey, who I don't like and will have no further dealings with" (British Museum, Ad. MS. 27587).

Storey signs monuments to Thomas and Mary Till, 1733, in St. Peter Mancroft, Norwich, and John Newdigate, 1743, Holt, Norfolk; also a
larger one to D. Durrant, 1759, at Scottow, Norfolk. This a clumsy work, 18 ft. high, consisting of a pyramid with an urn at the apex, and is only impressive because of its size.

An Andrew Storey, who may have been a son of George Storey, was apprenticed to Robert Page (q.v.) in 1774.

STOREY, WILLIAM, of London
fl. 1800–1826

Storey, whose yard was in Mount Street, carried out repairs in 1805 to Lord Radnor’s house at 6, Grosvenor Street (Archives, Longford Castle). Two years later he was the master-mason for building Mr. Coutts’s house at the corner of Stratton Street and Piccadilly, and here he also supplied marble chimney-pieces (Archives, Coutts Bank).

His tablets are mostly classical, the best being those to John Croft, 1805, at Woodbridge, Suffolk; Mrs. Wilkes, 1806, in the Grosvenor Chapel; Hugh Dive, 1812, and Solomon Knobel, 1817, both in Paddington Parish Church; Colonel William Kelly, 1818, at Chilton Foliat, Berks; Sarah Hugford, 1822, at Tonbridge, Kent; Elizabeth de Beauvoir, 1822, at Basildon, Berks; and Hugh Shortridge, 1823, at Great Bookham, Surrey.

STOTHARD, ALFRED JOSEPH
b. 1793, d. 1864

Alfred Stothard, who was the son of Thomas Stothard, R.A. (1755–1824), in 1828 contracted to supply four bas-reliefs for Buckingham Palace from designs by his father, each relief being about 20 ft. long with the figures about half the size of life. The designs were published in book form in 1829 (Literary Gazette, 1829, page 555), and in the same year the sculptor received £584 for the work (P.R.O., Works 19/3).

Stothard exhibited medallic portraits at the Royal Academy, 1821–1845, and his wax portrait of an unknown clergyman is now on loan from Mrs. Bate to the Victoria and Albert Museum. His monuments to Charles Lane, 1827, at Arundel, Sussex, and to Richard Collins, 1831, at Fareham, Hants, both have medallion portraits. The original design for the former is now in the possession of the writer, while that for the latter was exhibited at the Royal Academy in 1832. Stothard also signs a tablet to D. Rhudd, 1819, at East Bergholt, Suffolk.

STOTHARD, HENRY
b. 1795, d. 1847

Henry Stothard was born in 1795 (Archives, Artists’ Annuity Fund), and was the third son of Thomas Stothard, R.A., and a brother of Alfred Stothard (q.v.), was a pupil of Flaxman (q.v.) and attended the Royal Academy Schools in 1811. In 1813 he won a Silver Medal at the Academy, but later became incapacitated through paralysis and was forced to give up sculpture. The influence of Queen Adelaide secured him admission to the Charterhouse, where he died on 26 February, 1847.

His younger brother, Robert Thomas Stothard, who was born in 1797, also attended the Academy modelling school in 1823.

(Authority cited in text.)

STOWERS, CHARLES
fl. 1810–1821

He was the son of Thomas Stowers, a painter who exhibited landscapes at the Royal Academy, 1778–1811. The younger Stowers also showed works at the Academy from 1811 until 1821, including busts of “A Nobleman” and of “W. Bromet, M.D.” He signs three undistinguished tablets to Mary Hughes, 1810, at Merstham, Surrey; Elizabeth Randolph, 1811, in Walcot Church, Bath; and Mary Glendinning, 1817, at Lympstone, Devon. In 1819 he was paid £177 8s. for the tablet erected in Lincoln’s Inn Chapel to the memory of Spencer Perceval (Inn Archives).

STRETTON, WILLIAM, of Nottingham
b. 1755, d. 1828

He was the son of Samuel Stretton (1731–1811), a builder of Nottingham, who erected Colwick Hall in 1776 and the grandstand on Nottingham racecourse in the following year. In 1778 the younger Stretton took over Radcliffe’s (q.v.) yard at Nottingham, and advertised in the local press that he made “monuments, chimney-pieces, marble sideboards, Indian inkstands, etc.”

About 1787 he joined his father, and together they were responsible for a number of buildings, including Arkwright’s cotton-mill at Hockley in 1790 and the Park Gateway for Lord Middleton at Wollaton Hall. In Nottingham itself they built the Assembly Rooms in 1790 (the architect being Carr of York), the seven-arched bridge over the Trent in 1796, and the barracks from 1792 until 1799, the last named at a total cost of £20,000. On his own account William Stretton built the church of St. James’s, Standard Hill, Nottinghamshire. He also rebuilt the Nottingham Exchange in 1815, besides being responsible for all the carved stone-work.

He signs the well-executed wall-monument, with
roundels of “blue john” at its base, to Mary Bainbridge, 1779, at Lockington, Leicestershire. According to the “Stretton Manuscripts” he was also responsible for tablets in Nottinghamshire to John Lindley, 1797, at Skegby; Jane Francis, 1787, and Mary Williamson, both at Ruddington; while at Nuthall he executed “two tablets to the memory of the present and late Rectors.”

Stretton was also an antiquary and collector. His obituary in the Nottingham Journal stated that in him “antiquarians had lost a fund of general and useful knowledge.”

(Stretton Manuscripts privately printed, Nottingham, 1910.)

STRONG, EDWARD, the Elder
b. c. 1652, d. 1724

Clutterbuck, in his History of Hertfordshire (Vol. I, page 187), gives a copy of an MS. history of the Strong family written by Edward Strong. From this it appears that the writer’s grandfather, Timothy Strong, was born in Wiltshire, but settled at Little Barrington, in Gloucestershire, and there became a quarry-owner. About 1630 he built the south front of Cornbury House, Oxon, and died about 1636. Timothy had one son, Valentine, who married Anne, daughter of Edward Margetts, of Charlbury, Oxon, about 1631 or 1632. Valentine first assisted his father, and later, about 1640, built a house for William Whitmore at Slaughter, Gloucestershire. Between 1651 and 1653 he built Sherborne for Sir John Dutton. He died in 1662 while erecting a house for Andrew Barker at Fairfax, Gloucestershire, and was buried in Fairfax churchyard.

Edward Strong, one of Valentine’s sons, became free of the Masons’ Company by redemption in 1680. In the following year he became mason-contractor for building the churches of St. Bennet’s, Paul’s Wharf, and St. Austin-by-St. Paul’s, on the death of his brother, Thomas Strong (q.v.), who had left them unfinished.

On his own account Edward Strong was responsible for the masonry of St. Mildred’s, Bread Street; St. Mary Magdalen’s, Old Fish Street; St. Clement’s, Eastcheap, and St. Michael Royal; but his most important work was concerned with the building of St. Paul’s, where, in 1694, sixty-five of his masons were employed. During all this period he was paid for carved stonework, though presumably the actual carving was done by his assistants. The payments include “fourteen spandril flowers, 18 guineas,” at St. Mary Magdalen’s, and £24 “for carving ye vine and two pineapples” at St. Mildred’s. At St. Clement’s, Eastcheap, he received payment for “two death’s heads,” and at St. Michael Royal for “cherubim heads and keystones.” Photographs of his carved stonework at St. Paul’s are among the publications of the Wren Society.

Between 1682 and 1686 Strong was working at Winchester Palace, where he was paid for making “pilasters and columns” and for “ornaments on several pilasters and carving ye tops of ye capitals” (P.R.O., E.351/3460). In 1688 he made a chimneypiece of Egyptian marble for the Queen’s withdrawing-room at the Palace of Whitehall (P.R.O., Works 5/42). He was employed at Greenwich Palace from 1698 (P.R.O., Admiralty Records); and from 1705 until 1712, with his son, Edward Strong the Younger, was the contractor for Blenheim Palace, being responsible for a great deal of carved stonework. In 1715 the Strongs were working for the Duke of Chandos at Canons, where they built the north front of the house (Baker’s James Bridges, First Duke of Chandos, page 123). Strong also received £25 in 1707 “for the pedestal for the dial in the great garden steps” of the Inner Temple (Inner Temple Records, Vol. III, page 406). In 1717 he took as an apprentice, John “son of John Strong of Fainton near Burford.”

Strong died on 8 February, 1723–24, and was buried in St. Peter’s Church, St. Albans, where there is a monument with a bust to his memory. His long epitaph states that he worked at St. Paul’s “even from its foundations to laying the last stone,” and adds that, with Wren and Compton, Bishop of London, “he shared the felicity of seeing both the beginning and finishing of that stupendous fabric.” He married Martha, sister of Ephraim Beauchamp (q.v.).

(Knoop and Jones’s London Masons of the Seventeenth Century; Wren Society, various volumes; Builder, 1862, page 563, and 1864, page 500; Bodleian, Rawlinson MS. 387.)

STRONG, EDWARD, the Younger
b. 1676, d. 1741

He was apprenticed to his father, Edward Strong the Elder (q.v.), in 1691, and in 1698 became free of the Masons’ Company. In the same year he went abroad and travelled through France, Italy and Holland with Christopher Wren, son of the architect.

Strong, who worked as his father’s assistant or partner at Greenwich and Blenheim, was also with him at St. Paul’s, where in 1706 he began to build the lantern on his own account. According to the Strong family MS. quoted in Clutterbuck’s History of Hertfordshire (Vol. I, page 168), he was the mason responsible for the towers of St.
Vedast's, Foster Lane; St. Stephen's, Walbrook; and St. James's, Garlickhithe; besides rebuilding the tower of St. Michael's, Cornhill, and the upper part of the tower of St. Christopher's, Threadneedle Street. The same source also records that he executed "the ornaments or lantmon upon the square tower of Christ Church, London, and the stonework of Dr. Draper's house in Surrey."

In 1712 Strong was working at Marlborough House (Malcolm's Londinium Redivivum, Vol. IV, page 317), while five years later he was the master-mason for building the Queen's House at Greenwich (P.R.O., Ad. MS. 68/874). Here, in 1719, he received £217 for the west colonnade of the Palace, and £14 for the "doorcase the south side of the officers' hall" (P.R.O., Ad. MS. 68/875). In 1712 he was paid £728 for masonry-work at the Chapter House of St. Paul's (Notes and Queries, fifth Series, Vol. X, page 463).

He also worked with Edward Tufnell (q.v.) and with him built the churches of St. Alphege, Greenwich, 1712-1714 (where they were responsible for the four delightful stone altars, with cherubs and festoons, standing in front of the portico); St. Anne's, Limehouse, 1712-1724; St. Paul's, Deptford, 1712-1730; St. John's, Westminster, 1714-1728; and St. George's, Wapping, 1715-1723 (P.R.O., A.O.1.437/2).

Strong had married Susanna Roberts in 1699, and left four daughters on his death in 1741, the eldest—Susannah, wife of Sir John Strange, the Master of the Rolls—being his heiress. He died 10 October, 1741, his will being proved in the same month.

(Knoop and Jones's The London Mason in the Seventeenth Century; R.I.B.A. Library, MS. 726.54.)

STRONG, THOMAS

d. 1681

Eldest son of Valentine Strong, and brother of Edward Strong the Elder (q.v.), he completed the house which his father had been building for Mr. Barker at Fairford at the time of his death in 1662. In the following year he built the stables at Cornbury for the Earl of Clarendon, and about 1665 was responsible, under Wren, for the "Lodging for Scholars" at Trinity College, Oxford (Clutterbuck’s History of Hertfordshire, Vol. I, page 167).

In 1667 Strong went up to London to help with the rebuilding of the City devastated by the Great Fire in the previous year. "He also took up masons with him to London to work with him, to serve the City in what they wanted in his way of trade, and continued there in that employment many years till most of the houses and halls were built" (op. cit.). With his partner, C. Kempster (q.v.), he was the contractor for St. Stephen's, Walbrook, in 1672, where they were paid £122 for sixteen Corinthian capitals and £1 10s. for the "mask-head to the west door" (Bodleian, Rawlinson MS. 387), though Strong alone was responsible for the font (White’s History of Walbrook Ward, page 376).

Strong also built the churches of St. Bennet and St. Austin, besides doing a great deal of work at St. Paul's. In 1681 he contracted to carve for the Cathedral the "great capitals of the pilasters for £15 a face," and in the same year received £60 for "ten festoons between the impost capitals" and £120 for "carving twenty-seven great pannels in the soffets of the two arches of the nave of the Church." For the north-west vestry he was paid £294 for "forty-nine faces of impost capitals," and £7 for "one festoon in the spall of the vestry looking to the dome."

In 1675 Strong "built a front of stone betwixt the wings of Lord Craven's house at Hempstead Marshall, in Berkshire (Clutterbuck's History of Hertfordshire, Vol. I, page 168). He died unmarried at about midsummer, 1681, leaving "all his employment to his brother Edward, whom he made his sole executor" (op. cit.).

(STUBBINGTON, JAMES,

of Bishops Waltham

fl. 1748-1753)

He signs an architectural tablet about 7 ft. high, with an urn at the apex of a triangular pediment, to Mrs. James Wright, 1753, at Bishops Waltham. He was also responsible for the tablet to Edward Wynn, 1748, at Southwick, Hampshire.

STURDY, WILLIAM,

of Romford

fl. 1825-1841

He signs tablets at Dagenham, Essex, to William Ford, 1825, with a relief of two charity children playing by a tombstone; to William Stone, 1839, with a well-carved relief of a woman mourning by an urn; and a classical one to the Faneshawe family, dated 1841.

Sturdy may possibly be the son of the "Mr. Sturdy a mason of Romford" who died in 1800 (Monthly Magazine, 1800, page 199).

SUMMERS, CHARLES

b. 1827, d. 1878

He was born on 27 July at East Charlton,
Somerset, the son of a mason named George Summers, and was erecting a monument at Weston-super-Mare when he attracted the attention of Henry Weekes (q.v.), who took him into his studio. Summers also had lessons from M. L. Watson (q.v.), and after the latter’s death helped to complete the colossal group of Lord Eldon and Lord Stowell which is now in the library of University College, Oxford. In 1851 he was awarded, not only the Royal Academy Silver Medal, but the Gold Medal as well, this for a group entitled “Mercy Interceding for the Vanquished.” He was apparently the first student of sculpture to win both prizes simultaneously, and he also received a grant of £500 to enable him to continue his studies in Rome.

For some unknown reason, however, Summers suddenly abandoned the brilliant career that lay before him, and in 1853 went to Australia to dig for gold. Here he had little success and later found employment as a modeller for the Houses of Parliament which were then being built in Melbourne. In 1866 he returned to England, and in the following year went to Rome, where he spent most of the rest of his life. He died in Paris on 30 November, 1878, and was buried in the Protestant Cemetery in Rome.

Summers exhibited at the Royal Academy, 1849–1876, showing in 1871 a bust of Professor Owen, while to the Great Exhibition of 1851 he sent the figure of “A Boy Playing with a Shell.” His undated statue of “Rebecca” is in the Exeter Art Gallery, an undated bust of Henry Weekes, R.A., is at Burlington House, and a bust of Bishop Perry (1876) is in the Speech-Room at Harrow School. He also signs the monument with a recumbent figure of Mrs. MacLeay, 1870, at Godstone, Surrey.

Summers’ work for Australia included statues of Shakespeare (1863); Burke and Wills (1872), which cost £4,000; and the Prince and Princess of Wales (1876), all for Melbourne, the last named being in the Public Library. In the city’s Art Gallery is his bust of the Duke of Edinburgh (1873), while he also executed statues of Linceus and Hypermnestra for Sydney in 1875, but these were destroyed in the fire of 1883.

(D.N.B.; Builder, 1852, page 23.)

SWINTON, ARCHIBALD, of Cambridge
He signs a wall-tablet to John Whitechurch, 1728, at Harlton, Cambs.

SWINTON, STEPHEN
b. c. 1618, d. c. 1669
He was apprenticed to Guy Glandinning in 1632 and was Warden of the Masons’ Company in 1660 and 1664, becoming Master in the following year. In 1664 he was the mason responsible for building Clarendon House in Piccadilly and a year later he and his partner, Thomas Wise (q.v.), were working at Greenwich Palace, where they executed a certain amount of carved stonework, including in 1667 “a carved capital of a pilaster,
£13" for the "south end towards the park" (P.R.O., Works 5/9). Switzer had himself been sent to Portland in 1660 to select suitable stone for building the Palace (P.R.O., A.O.1, 2487/357).

He may have been the father of that Stephen Switzer who was one of the apprentices of Thomas Burman (q.v.) and was left 40s. under his master's will.

(Knoop and Jones's *The London Mason in the Seventeenth Century.*)

**SYMONDS, THOMAS,**
**of Hereford**

*fl. 1753–1788*

Symonds, who became a freeman of Hereford in 1753, was an excellent provincial statuary. His large monument to Thomas Symons, 1760, at Sellack, Hereford, has a fine medallion portrait, while that to Anne Somerset, 1764, at Pauntley, Glos, is an impressive architectural work with a sarcophagus set against a pyramid.

Other monuments and tablets executed in Herefordshire by Symonds include those to John Davies, 1752, at Bullingham; Isabella Davies, 1760, at Kingsland; William Bach, 1766, and William Tolderly, 1789, both at Leominster; the Rev. Josiah Smart, 1769, at Bodenham; Edmund Brydges, 1772, at Tyberton; William Barnesley, 1773, at Eardisley; Edward Monnington, 1775, at Sarnesfield; John Woodcock, 1781, at Byford; and Mary Trahern, 1788, at Lugwardine.
TAIRONA, CHEVALIER G.
fl. 1815–1820

He exhibited various works at the Royal Academy, 1815–1820, among them a model for a monument and a bas-relief of "Victory Presenting two Dying British Heroes to Britannia."

TARRANT, —, of Swindon

He signs a large stone wall-tablet to Frances Tyrell, 1782, at Harwell, Berkshire.

TATE, CHRISTOPHER J. A.,
of Newcastle-on-Tyne
b. 1812, d. 1841

He was apprenticed to R. G. Davies of Newcastle (q.v.), and after he became free worked as assistant to David Dunbar the Younger (q.v.). After a few years in the latter's studio, he decided to set up for himself as a sculptor and produced first a "Dying Christ Suitable for Catholic Chapels," and later a statue of "Blind Willie."

Tate then turned his attention to busts, and carved, among others, likenesses of the Duke of Northumberland, Sheridan Knowles, Lord Byron and H. Phillips, the singer. Apparently he met with some success, for the *Gentleman's Magazine* in its obituary (1841, Part II, page 102) considered that "for execution, precision and arrangement" they could "scarcely be surpassed." The same article also mentioned his "Judgment of Paris" and "Musidora" which, the writer thought, "would have done credit to an artist of greater experience."

In 1838 the sculptor carved the very fine Royal coat of arms in the pediment of the theatre at Newcastle. At the time of his death he was working on a statue of the Duke of Northumberland, to be erected in front of the Master Mariners' Asylum at Tynemouth, but the figure had to be completed by his former master, R. G. Davies.

Tate, who was a consumptive, went to Malta in an attempt to regain his health, but sailed for home when he realized that his end was near. He died on 22 March, 1841, soon after his ship reached London, his widow and children being left totally unprovided for. According to the obituary notice already quoted, "his store of information was inexhaustible and whatever the subject under discussion, Mr. Tate was always able to take a prominent part."

(Local Records of Newcastle, 1832–1857, page 138; Magazine of Art, 1894, page 258.)

TATE, W. K., of London
fl. 1828–1834

He exhibited at the Royal Academy in 1828 and 1829, showing a number of busts, including those of the Hon. George Agar-Ellis and Major Bridgeman. His small bronze bust of Henry Philip Hope, dated 1834, is in the possession of the writer.

TATHAM, FREDERICK
b. 1805, d. 1878

Eldest son of Charles Heathcote Tatham (1772–1842), the architect, he received a Silver Palette from the Society of Arts in 1824, but it was not until 1833 that he joined the Royal Academy Schools on the recommendation of J. Phillips, R.A. He exhibited at the Academy, 1825–1836, and at the British Institution, 1828–1829, showing various busts, including those of Lord Eldon (now in the National Portrait Gallery), John Colley, the Hon. George Neville, Edward Irving and Edward Walpole. His bust of Charles Tatham, dated 1837, is at Lord Northampton's Almshouses, Greenwich.

Graves, in his *Exhibitors at the Royal Academy*, says that Tatham also showed miniatures at the Academy until 1834. He was the close friend of William Blake and his wife (see Gilchrist's *Life of Blake*). In 1829 he made a statue of Lord Eldon for the Eldon Schools, Vauxhall.
TATHAM, BENJAMIN and WILLIAM, of Folkingham
fl. 1811-1839
They sign tablets to Mary Eastland, 1811, at Folkingham, Lincolnshire, and to George Wakefield, 1839, at East Stoke, Nottinghamshire.

TAUNTON and BROWN
They sign a large oval tablet with a relief of "Religion" seated by an urn to John Barnfather, 1793, in St. Giles-in-the-Fields.

TAYLOR, H.
b. 1805
He joined the Royal Academy Schools in 1825, and in 1843, when living in Dover Street, showed a model of a horse at the Academy.

TAYLOR, MICHAEL, of York
b. 1760, d. 1846
He was born at Felton in Northumberland and became a Freeman of York in 1803. From 1802 until 1810 he did a large amount of stone-carving at York Minster, including figures of Percy and Vavasour for the central doorway in 1802 and a statue of Henry VI for the organ-screen in 1810. From 1814 to 1818 he was working on repairs to Skelton Church, Yorkshire, where he was responsible for all the stone-carving. A writer to the Builder (1846, page 317) who saw him just before he died, describes him as "a man well skilled in Gothic art and accustomed to it from boyhood."

Taylor also produced a large number of monuments and tablets, the best being those to the Duke of Kingston, c. 1806, at Holme Pierrepont, Notts, which has a relief of a mourning woman; to the Rev. Henry Goodriche, 1801, which has charming swags of flowers, and to Sir Walter Vavasour, 1810. The two last-named are both at Sutton-in-the-Forest, Yorkshire, the former in the Parish Church, the latter in the Roman Catholic Chapel.

Other tablets executed by Taylor in Yorkshire, commemorate Susanna Lloyd, 1797, at Swillington; John Lea, 1800, at Sowerby; James Saunders, 1803, in All Saints', York; Christopher Oxley, 1803, and Thomas Kilvington, 1809, both in Ripon Cathedral; Lady Mary Hore, c. 1804, and the Hon. Dorothy Langley, 1824, both in York Minster; Emily Cleaver, 1806, at Nunington; Samuel Waterhouse, 1807, at Halifax; the Rev. William Comber, 1810, at Stonegrave; John Babley, 1820, and Countess Harcourt, 1833, both at Masham; John Raper, 1824, at Aberford; Thomas Norcliffe, 1828, at Langdon; and Thomas Eadon, 1835, at Selby.

TAYLOR, ROBERT
b. c. 1690, d. 1742
He was apprenticed to Richard Garbut, "citizen and mason," and became free in 1712. In 1722 he was working for the Ironmongers' Company and two years later he carved a chimney-piece, costing £40, for Stourhead. In 1732 he received £150 and in 1733 £98 for unidentified works in the same house, probably chimney-pieces, although Taylor might have had something to do with the building of Alfred's Tower in the grounds, or with the carving of King Alfred's statue (Archives, Hoare's Bank). In 1732 also he made a chimney-piece for Masons Hall, while from the Grocers' Company he received £69 for decorative carving undertaken in 1735-1736. For the Barber Surgeons he seems to have acted as master-mason when their theatre was rebuilt from designs by Lord Burlington.

From 1725 until 1739 Taylor was the mason for the Royal College of Physicians and was also responsible for a good deal of the building of St. Bartholomew's Hospital between 1728 and 1740. Here his decorative work included carving "leaves at the bottom of the scrolls" and a chimney-piece for which he was paid £62 in 1730. Two years previously he had rented "two tenements in Duck Lane" from the Governors of the Hospital.

As a statuary Taylor is important. His masterpiece is the magnificent monument with its reclining figure of Thomas Deacon, 1721, in Peterborough Cathedral. Others signed by him include those to Michael Askel, 1713, at Chaddesley, Warwick; Mrs. Jane Brewer, 1716, at West Farleigh, Kent; the Raymond family, 1720, at Belchamp Walter, Essex; Sir John Garrard, c. 1720, at Wheathampstead, Herts; Abraham Hill, 1721, Sutton-at-Hone, Kent; Francis Barrell, 1724, in Rochester Cathedral; Sir Nathaniel Napier, 1725, at Minterne Magna, Dorset; Lady Pennyman, 1727, at Stainton, Yorks; John Fisher, c. 1730, at Hayes, Middlesex; and Robert Chester, 1732, at Hunsdon, Herts.

Taylor, who was also a Captain in the City Trained Bands, made a large fortune out of his business, but wasted it by living extravagantly in a house in Essex and died leaving little except debts. His death is noted in the Court Book of the Masons' Company. (Builder, 1846, page 505; Archives of City Companies, etc., mentioned in text.)
TAYLOR, SIR ROBERT
b. 1714, d. 1788

The son of Robert Taylor, d. 1742 (q.v.), he was apprenticed to Henry Cheere (q.v.). On becoming free young Taylor went to study in Rome, but he had only been a short time in Italy when he heard that his father was ill and decided to return home. Europe was then at war and, finding it almost impossible to get a passport, Taylor disguised himself as a Franciscan monk and so passed safely through the enemy’s lines. He was very proud of this exploit, and kept the habit he had worn until the day of his death, often showing it to his friends and telling the story of his adventures.

When he arrived in England Taylor found that his father had died heavily in debt, and the young man decided to set up as a statuary on his own account, although he once told a friend many years later that he had only eighteen pence in his pocket at the time. However, some assistance from the Godfrey family of Woodford in Essex, together with his own efforts, soon started him on his successful career and by 1744 he had made such a name for himself that he was entrusted with the Abbey monument to Captain Cornwall, for which Parliament had voted a sum of money. In the same year he became free of the Masons' Company by patrimony.

Taylor later carved the figure of Britannia in the centre of the principal façade of the old Bank of England, and the sculpture in the pediment of the Mansion House, for which he received £420. Roubiliac (q.v.) and Cheere (q.v.) had also sent in models for this work, but when Lord Burlington was asked to select the winning design he refused, observing acidly that "any sculptor would do well enough for such a building as that." According to Taylor’s obituary in the Gentleman’s Magazine (1788, page 930), his practice on this and other occasions was "to hive out his heads from the block and except for some few finishing touches, to leave the rest to his workmen."

As a mason Taylor carried out repairs to Mr. Du Cane’s house in St. James’s Square in 1750, when he received £267 (Essex Records, D/DDCA. 18). In the same year he was paid £131 by Lord Folkestone for chimney-pieces, etc., at Longford (Longford Castle Archives).

About 1753 Taylor practically abandoned sculpture for architecture, but his work as an architect is, of course, outside the scope of this book. He was Sheriff of London, 1782–1783, when he was knighted. He died on 27 September, 1788, from a chill caught at the funeral of his friend Sir Charles Asgill, and was buried on 9 October, in a vault near the north-east corner of St. Martin-in-the-Fields. A cenotaph was later erected in Westminster Abbey which records that his “works entitle him to a distinguished rank in the first Class of British architects. He was eminently useful to the Public as an active and impartial Magistrate.”

Taylor was a hard-working man who “never slept after four in the morning. When he had a journey to make, he did it in the night and thus never, but in a carriage, slept at all.” Unlike his father, he died extremely well off, leaving the bulk of his large fortune of £180,000 to his son Michael Angelo for life, and then to the University of Oxford to endow a foundation for teaching modern European languages.

Taylor’s finest monumental work is the statue in Grendon Church, Warwick, of Miss Mary Chetwyynd, who died in 1750 at the age of ninety-one. His monuments commemorating Robert Shippen, 1745, in Brasenose College Chapel, Oxford; Christopher and John Emmott, 1746, at Colne, Lancs; William Phipps, 1748, at Westbury, Wilts; and Lieut.-General Joshua Guest, 1752, in Westminster Abbey, all have portrait-busts, while that to his early patrons the Godfrey family in Woodford churchyard takes the form of a large marble column with a Corinthian capital. Other works signed by him include those to Thomas Marsh, 1739, at Wemswold, Kent; Sir James Pennyman, 1745, at Stainton, Yorks; Thomas Panwell, 1749, at Tonbridge, Kent; Daniel Adey, 1752, at Wotton-under-Edge, Glos; Charles Pyott, 1753, in St. Martin’s, Canterbury; Elizabeth Townsend, 1754, at Thorpe, Middlesex; the Rev. Alexander Young, 1755, at Wickham-breaux, Kent; Richard Emmott, 1761, at Colne, Lancs; and Edmund Auberry, 1767, at Pinner, Middlesex.

(Buildler, 1846, page 505; authorities cited in text.)

TAYLOR, ROBERT,
of Melton Mowbray
fl. 1706–1710

As a mason he was employed to rebuild Melbourne Hall, Derbyshire, in 1708 for Thomas Coke, but apparently had difficulty in getting paid, as he writes to Coke: “I was fain to hire many men when your Honour was down and I have paid them as far as I am able and I desire you to consider my condition and relieve me, as I have not neglected your business night nor day, but have left all business to serve you. I beg you to send me an order as speedily as you can” (Archives, Marquess of Lothian). While working at Melbourne, Taylor seems to have taken his son, Robert Taylor, the younger, into partnership, as various bills are made out to them both.
TAYLOR, THOMAS,
of Nottingham
fl. 1738-1745

As a carver in "marble, stone and wood" he was employed at Welbeck Abbey from 1743 until 1745. Here he executed ornamental work, including a carved stone doorcase and two chimney-pieces, one for the alcove room costing £41 and another at £127. The latter must have been of some importance, for the decoration consisted of "lions' heads, snakes, two shields and two columns and capitals" (Archives, Welbeck Abbey).

Taylor signs a large monument with a medallion portrait of Sir John Bennett, c. 1740, at Melton Mowbray, Leicestershire.

TAYLOR, THOMAS,
of Stratford-on-Avon

He signs a tablet to Robert Middleton, 1833, at Snitterfield, Warwick. An "E. Taylor of Stratford-on-Avon" signs a tablet to Philip Wren, 1829, at Wroxall in the same county.

TAYLOR, W. H., of Birmingham

In 1830 he showed a model of George IV at the Birmingham Society of Artists. A "Mr. Taylor of Birmingham"—a different person according to the catalogue—exhibited at the same time a "Model of James Watt."

TAYLOR, WILLIAM, of London

He signs a wall-tablet to Mrs. Slingsby, 1837, in All Saints, St. Pancras.

TEASDALE, JOHN, the Elder,
and JOHN, the Younger

John Teasdale the Younger: b. 1777

The elder Teasdale was born at Greystoke in Cumberland and in 1780 was brought to the notice of the Duke of Norfolk, who had him trained under a London sculptor. About ten years later he began work as "a sculptor of ornaments in marble" at Arundel Castle, which was then being rebuilt, and here he was responsible for much of the ornamental work (Dallaway's Western Sussex, Vol. II, Part I, page 162).

John Teasdale the Younger attended the Royal Academy Schools in 1801. He and his father were two of the chief stone-carvers employed during the restoration of King Henry VII's Chapel in Westminster Abbey in 1809 (Brayley's Westminster Abbey, Vol. I, Part II, page 26). A Michael Teasdale, who may have been a relation, was awarded a Silver Palette for sculpture by the Society of Arts in 1823. He later settled in Bath and is described as "a sculptor" in the directory of 1842.

TEMPLETON, GEORGE
fl. 1811-1847

He was born in Liverpool, and was living there in Olive Street when he exhibited a figure of "Venus Rising From the Sea" at the Liverpool Academy in 1811.

In 1844 Templeton exhibited at Westminster Hall a figure of St. John the Divine, which the Literary Gazette considered "exactly like Westall's 'Spirit of the Storm.'" and the Art Union "poor and faulty to a degree."

The sculptor (whose initials are incorrectly given in Grave's Exhibitors at the Royal Academy) showed a marble bust there in 1847.

TEMPLETOWN, LADY
b. 1747, d. 1823

She was Elizabeth, daughter of Shuckburgh Boughton of Poston, Co. Hereford, and married in 1769 Clotworthy Upton, who was created Lord Templetown in 1776. Lady Templetown made a number of designs for Wedgwood between 1783 and 1787. Her busts of the first Marquess of Bristol (her son-in-law) and Lady Augusta Seymour are at Ickworth Park, Suffolk. (Wedgwood Archives; Art Journal, 1864, page 256.)

TENERANI, PIETRO
b. 1789, d. 1870

Tenerani, who was born near Carrara and worked under Thorwaldsen, exhibited at the Royal Academy a marble statue of "Psyche" in 1846, and a bust of Lady Arbuthnot in 1834. His bust of Prince Woronzow is at Wilton, and his statue of "Flora," dated 1848, in the Royal Collection. In Castle Ashby Church, Northamptonshire, is his monument to Margaret, Marchioness of Northampton, 1830, a work which has a charming relief, although his heroic angel commemorating the second Marquess, 1866, in the same church is rather overpowering.

Tenerani was an indefatigable sculptor and produced a vast number of works. He was General Director of the museums and galleries of Rome, and six years after he died a special museum was opened in that city containing more than four hundred and fifty of his statues, groups, busts, etc. (Men of Our Times, 1869).

TERNOUTH, JOHN
b. 1795, d. 1849

He attended the Royal Academy Schools in
1820, gaining a Silver Medal two years later. In 1844 he exhibited at Westminster Hall a statue of "A Penitent," described variously by the Literary Gazette as "being very carelessly done and wanting in feeling" and by the Art Union as "treated in a spirit which appeals to our sympathies."

In 1847 Ternouth carved figures of St. George and Britannia flanking a shield for the centre of the east front of Buckingham Palace (Clifford Smith's Buckingham Palace, page 55). His best-known work is the great bronze relief of the Battle of Copenhagen at the base of the Nelson Column in Trafalgar Square. He exhibited at the Royal Academy, 1819–1849, where he showed a number of busts, including those of John Cam Hobhouse (1825); Sir Francis Burdett (1827); Sir John Tyrell (1829); Viscount Melbourne (1837); Sir Ronald Ferguson (1839); Lord John Russell (1841); and Lord Bridport (1842). His bust of John Ireland, Dean of Westminster, is in the Abbey, while those of Peter Fraser (1828) and John Kaye, Bishop of Lincoln (1834), are at Christ's College, Cambridge, and Brasenose College, Oxford, respectively. His statues include those of Dean Shipley (1829) in St. Asaph's Cathedral; the Duke of Atholl (1835) at Dunkeld; and General Conway (1844) in Madras Cathedral.

Apparently Ternouth produced very little work toward the end of his life, and a report went round that he had died. This he hastened to correct and the Athenaeum of 14 November, 1846, reported that "Mr. Ternouth has written to say he is not dead and we give him the benefit of the assertion."

Ternouth's monuments are uninteresting, the symbolism being hackneyed, obvious and uninspired; for example, the monument of Frances Popham, 1839, at Chilton Foliat, Bucks, has a relief of a hand breaking a lily. His most ambitious work commemorates Henry Davidson, 1827, in the parish church of Kingston-on-Thames, which has a life-size seated figure in high relief. Another, to the Bennett family, 1821, in St. Mary Abbots, Kensington, has a well-carved relief of an angel ascending to heaven. Other signed works by him include those to William Kinnersly, 1823, at Ashley, Staffs; Sir John Filmer, Bart., 1824, at East Sutton, Kent; Lady Tyrell, 1825, at Boreham, Essex; Admiral Sir James Morris, 1830, at Marlow, Bucks; Jean Miller, 1831, in the Colonnade at Kensal Green Cemetery; Colonel Mark Wilks, 1831, in the Grosvenor Chapel; the Rev. Henry Ridley, 1823, at Hambleden, Bucks; Elizabeth Arbuthnot, 1834, at Ockley, Surrey; Jeremiah and Rose Milles, 1835, at Sawbridgeworth, Herts; Pelham Warren, 1835, at Worting, Hants; John Phillips, 1836, at Wotten Warren, Warwick; Sir Peter and Lady Warburton, 1837, at Budworth, Cheshire; Susannah Newton, 1837, at Great Hallingbury, Essex; the Rev. William Heath, 1838, in St. George's, Grenada; Marianne Maurice, 1840, in St. Peter's, Marlborough; Thomas Lane, 1844, in Madras Cathedral; Prudence Lamb (d. 1843, monument erected 1848), at Meeth, Devon, and Lady Madden, 1849, at Jacobstowe in the same county.

THEAKSTON,
CHARLES DELATRE
b. 1804

Theakston, who may have been a son of Joseph Theakston (q.v.), attended the Royal Academy Schools in 1820, and in the following year received the Silver Isis Medal from the Society of Arts for a copy of the "Laocoon." In 1825 he exhibited a bust of Edward Hind at the Academy, and in 1831 a cabinet statue of the Duke of Wellington.

J. H. Theakston, who was possibly a relative, showed a bust at the Academy in 1832.

THEAKSTON,
CHRISTOPHER, of Doncaster
fl. 1762–1783

He was an apprentice, and later an assistant, of C. Richardson (q.v.) and together they were employed at Wentworth Woodhouse in 1762 (Fitzwilliam Archives). On 6 July, 1774, Theakston became a Freeman of Doncaster and in the same year carved the figure of "Justice" for Newark Town Hall. On 14 February, 1765, he married Harriet Richardson, daughter of his former master. She died 19 January, 1808, aged 61. In 1773 Theakston, now working on his own account, received £73 for two chimney-pieces for the front hall of Nostell, Yorks (Brockwell's The Nostell Collection, page 19). Ten years later he was again engaged at Wentworth Woodhouse. He signs a monument to William Bilbie, 1777, at Blidworth, Notts.

(Doncaster and Newark Corporation Archives.)

THEAKSTON, JOSEPH
b. 1772, d. 1842

His father, John Theakston of St. Michael's, Spurriggiate, York, died when young Theakston was a child and his mother, Sarah Theakston, apprenticed him in 1786 to John Fisher (q.v.). He became free in 1794 and shortly afterwards went to London, where he entered the studio of John Bacon the Elder (q.v.). He later worked as assistant both to John Flaxman (q.v.) and E. H.
EDWARD STANTON
Sir Francis Russell, 1705, Strensham, Worcestershire.

THOMAS STAYNER
Dr. Turner, 1714, Stowe-Nine-Churches, Northants.

CHARLES R. SMITH
Rev. Thomas Whitaker, 1822, Whalley, Yorkshire.
WILLIAM TYLER
Samuel Vassall, 1766, King's Chapel, Boston, U.S.A.

JOHN WALSH
Bust of Lady Lechmere, part of the monument to Sir Thomas Robinson and his wife, the Dowager Lady Lechmere, c. 1778, Westminster Abbey.

HENRY WEEKES
Robert Southey, 1843, Westminster Abbey.
Baily (q.v.), but spent the last twenty-four years of his life in the employment of Sir Francis Chantrey (q.v.), carving most of the drapery, etc., for the latter's statues and groups.

In 1821 the English Chronicle of 20 December reported that the iron railings in Westminster Abbey "which obstructed the view of the monuments in this beautiful edifice are now removed preparatory to Mr. Theakston the sculptor beginning his Herculean task of cleaning and restoring them." In that year also he executed a statue of Mr. S. Watson for Weymouth Guildhall, which was followed by another of the Duke of Sutherland for Golspie, Sutherland, in 1838.

In 1829 Theakston received £1,000 for the sculptured-marble chimney-piece and clock-frame in the grand hall of Buckingham Palace. This is perhaps the most imposing chimney-piece in the building, with its winged female figures supporting a roundel fitted with a clock, the whole being surmounted by a bust of George IV (P.R.O., Works 19/3). He exhibited at the Royal Academy, 1809-1837, and at the British Institution, 1813-1819, showing busts of R. Walker (1813); Mr. Schwanfelder, "animal painter to H.R.H. the Prince Regent" (1818); and Queen Victoria (1830); also a number of models and sketches for monuments to national heroes.

Theakston died on 14 April, 1842, and was buried in Kensal Green Cemetery. Peter Cunningham, who knew him well, wrote in the Builder of 1863 (page 112) that he was "a fine, venerable, kind-hearted man, ever prompt with a kind word and a kind smile," and that in his work with Chantrey "he was a consummate master in making marble convey the qualities and surfaces of silks and satins, velvets and ermines." His obituary in the Gentleman's Magazine (1842, Part I, page 672) said of him that "he was, perhaps, the ablest drapery or ornamental carver of his time, as he was certainly the most rapid. When he began to carve a statue he knew perfectly well what was required of him and cut away the superfluous marble at once. He had not to try again and again, like most artists, and by frequent touching and retouching accomplish his object."

Theakston's monuments are mostly Hellenistic. The one commemorating William Davey, 1827, at Redruth, Cornwall, has a medallion portrait, while another to the Rev. Roger Carus Wilson, 1839, in Preston Parish Church has a relief of the five churches in that city which were built through Wilson's efforts.

Other signed monuments by Theakston include those to Reymundo Putt, 1812, at Gittisham, Devon; Sir William Herschell, 1822, at Upton, Bucks; Anthony Hamond, 1822, Westacre, Norfolk; Robert Dorner, 1823, at Budbrooke, Warwick; Peter Elsley, 1825, and Bishop Lloyd, 1829, both in Oxford Cathedral; Lady Sophia Heathcote, 1825, at Normanton, Rutland; Thomas Hethrington, 1825, in Walthamstow Parish Church; Bishop Heber, 1826, in St. Peter's, Colombo; Mary Inglis, 1827, at Wartling, Sussex; Sophia Matlock, 1828, at Bramley, Surrey; Archbishop Manns Sutton, 1828, at Addington, Surrey; Georgiana Serold-Pearce, 1828, and Ann Pearce, 1835, both at Cherry Hinton, Cambs; Frances Goring, 1830, at Wiston, Sussex; John Christie, 1831, at Broxbourne, Herts; Marmaduke Ramsay, 1831, in Jesus College Chapel, Cambridge; the Rev. Charles Platt, 1833, at Forthampton, Glos; Frederick Page, 1834, at Speen, Berks; and Anne Wynter, 1839, at Lanlivery, Cornwall.

(York Apprentice Books; British Museum Ad. MS. 39, 784; Builder, 1863, page 113; authorities cited in text.)

THEED, WILLIAM, the Elder
b. 1764, d. 1817

He was the son of a wig-maker in Wych Street and entered the Royal Academy Schools in 1786. He began his career as a painter, and exhibited both portraits and classical subjects at the Academy from 1789 until 1805. About 1791 he went to Rome where he remained for four or five years.

In 1799 Theed began to model for Messrs. Wedgwood, and in the archives of the firm there is a letter to him dated 26 December of that year by the younger Wedgwood. In it the writer considers that "upon further consideration it appears very desirable that we should know each other better before we bind ourselves to one another for three years. You will be better able to understand what are our wants and expectations, and we should have a probability of their being fulfilled." The letter continues: "To induce you till this is done is to break up your former connexion and might eventually be an act of cruelty. After this fair, open and deliberate understanding has taken place we shall come together with a greater certainty of mutual satisfaction." The matter was settled and Theed worked for the Wedgwoods until 1804, when he left them for Messrs. Rundell and Bridge, for whom he designed gold and silver plate until his death in 1817. In 1811, however, he was again employed by Wedgwoods and modelled for them a portrait of Thomas Byerley.

Theed was elected a Royal Academician in 1813, depositing as his Diploma Work a "Bacchanalian Group in bronze," which has since
disappeared from Burlington House. His work which is best known to Londoners is the spirited group of "Hercules Capturing the Thracian Horses" on the pediment of the Royal Mews facing Buckingham Palace Road. Other works executed by him include the group entitled "The Prodigal Son" which was formerly in the possession of Lord Yarborough and is now in the Usher Art Gallery, Lincoln, and another in 1812 of "Thetis Returning from Vulcan with Arms for Achilles" which is in the Royal Collection. His fine monument of Thomas Westalling, 1814, with its portrait-bust and relief of "Charity, Teaching Children" is in the parish church of Ross-on-Wye, Herefordshire.

After his death in 1817, Theed's widow (née Rougeot) applied to the Royal Academy for a pension and was granted £50, but she died in the following year (Academy Archives).

(Sanby's *Royal Academy of Arts*, Vol. I, page 382.)

THEED, WILLIAM, the Younger

b. 1804, d. 1891

The younger Theed was born at Trentham in Staffordshire, the son of William Theed (q.v.) who was then working for Wedgwood, and a Frenchwoman named Rougeot, whom his father had married in Naples in 1794. He attended the Royal Academy Schools and also worked for five years in the studio of E. H. Baily (q.v.). In 1820 he won the Silver Palette from the Society of Arts for a figure of Hercules and, two years later, their Silver Isis Medal.

In 1826 Theed went to Rome and studied under Thorwaldsen, Gibson and Wyatt, sending over several busts to the exhibitions of the Royal Academy. In 1844 the Prince Consort asked John Gibson (q.v.) to send him designs by English sculptors working in Rome for marble statues to be placed in Osborne House, which had been recently acquired by the Queen. Two designs by Theed were accepted and in 1848 he returned to London. Here he soon received a large number of commissions, chiefly for public statues. He was also chosen by Queen Victoria to take the death-mask of the Prince Consort in 1861.

Between 1853 and 1859 Theed made a series of twelve bas-reliefs for the Prince's chambers at the Palace of Westminster. In 1856 he made a "series of variegated marble pedestals and busts of classic form" for the State Rooms of Buckingham Palace (*Art Journal*, 1856, page 192), two reliefs for the banqueting-room, and others of "The Birth of Venus" and "Venus Bringing Armour to Achilles" for the dining-room gallery. He also carved four classical busts for the Palace in the same year. In 1858 he made models of seated figures representing "Morning" and "Evening" for Queen's Gate, Hyde Park, but for some reason they were never cut in marble.

In 1865 he designed a statue of the Prince Consort which was executed in terracotta for the Bishops Waltham Infirmary, and in the following year modelled the figures for the baptismal silver group presented to Prince Victor by his grandmother, Queen Victoria.

In 1867 Theed carved the reredos for St. John's Church, Croydon, and in 1872 he exhibited at the International Exhibition reliefs of the "Four Acts of Mercy" which he had made some years previously for the monument of the Duchess of Gloucester in St. George's Chapel, Windsor. On the window-sill of the parish church of Churchgate Street, Essex, is the figure of a dead child signed by Theed and dated 1862; his bust of an unknown man signed "W. Theed fecit Roma 1848" is at St. George's Hospital.

Theed exhibited at the Royal Academy, 1824–1885; at the British Institution, 1852 and 1853; and at the Great Exhibition of 1851, where he showed a statue of "Prometheus." His "Rebekah," then in the possession of S. Ashton, was shown at the Exhibition of Art Treasures held in Manchester in 1857, while the sculptor himself lent his "Narcissus" and "Ruth." His "Prodigal's Return" was in Miss Webb's sale held at Christie's on 3 March, 1878, when it realized £143. Theed died 9 September, 1891.

(D.N.B.; *Art Journal*, 1891, page 352; various references *Builder* and *Art Journal*.)

THEWS, —
He signs a large and ambitious wall-tablet at Hascombe, Surrey, to William Diddesfold, 1785.

THOM, JAMES
b. 1802, d. 1850

He was born at Lochlee on 17 April, 1802, and as a boy was apprenticed to a builder at Kilmarnock who employed him on ornamental carving. Though he never had any lessons, Thom executed a bust of Burns in 1827, and when this was widely praised determined on a more ambitious work. Without so much as a preliminary sketch, he proceeded to hew out of the local grey-stone life-size figures of "Tam O'Shanter" and "Souter Johnnie." The statues were at once secured for the Burns monument at
Alloway and were then sent on tour. A large sum was raised by charging a shilling for admission, the net profit amounting to nearly £2,000 after all expenses had been paid. In 1829 the figures came to London where the critics at once hailed them as inaugurating a new era in sculpture. Emboldened by his success, Thom showed two new works in London in 1834, but these did not meet with such a favourable reception.

Two years later the sculptor set off to America in pursuit of his agent, a fellow Scotsman, who had gone over to exhibit some of his works, but who had kept all the proceeds. Thom at last tracked the man down in Newark, New Jersey, where he forced him to disgorge most of the embezzled money; he then decided to stay and work in America and accordingly settled down in Newark. It was he who discovered the quarries at Little Falls, which later furnished stone for a number of important buildings. One of these was Trinity Church in New York, for which Thom did most of the Gothic stone carving, although he left before the building was completed, owing to a disagreement with the architect. Having amassed a considerable fortune, he bought a farm at Ramapo, Rockland County. He died in New York on 17 April, 1850.

Besides the two statues which first attracted attention (replicas of which are at Beauport Park in Sussex), Thom’s other works in Scotland include a group entitled “Old Mortality” at Maxwelltown in Dumfries, and a statue of Wallace at Ayr, of which he executed a replica for Lord Grey’s seat of Kinfauns Castle, Perth. At Burns’ cottage at Alloway are the figures of “The Landlord” and “The Landlady.” Of these he also made several replicas, including those for Lord Cassillis, who had them sent to his house near London “where his Lordship intends to have them placed in a building representing an old Scotch ale-house” (Swan’s Views of the River Clyde, page 158).

Thom’s works in America include a statue of Burns, another replica of his “Old Mortality” group for Laurel Hill Cemetery, Philadelphia, and various ornamental pieces for gardens.

THOM, ROBERT, of Glasgow
b. 1805, d. 1895

According to the Art Union of 1839 (page 153), he was the sculptor of the monument erected in that year at Drumclog to commemorate the victory of the Scottish Covenanters over the forces of Graham of Claverhouse. It is described as being 23 ft. high and in the Gothic style. Robert was the brother of James Thom (q.v.), and as a boy was apprenticed to Howie and Brown, builders, of Kilmarnock.

THOMAS, —, of Exmouth
ft. 1814–1817

He signs a large wall-tablet to the Heathfield family, 1816, at Cullompton, Devon. His tablet to Charles Fanshawe, 1814, was formerly in the Temple Church, but was destroyed by enemy action.

THOMAS, C., of Sherborne
b. 1742, d. 1805

He signs wall-tablets to John Gaisford, 1775, at Axbridge, Somerset, and to Thomas Pearson, 1785, at Queen Camel in the same county. According to Hutchins’ Dorset (Vol. IV, page 124), he signed a monument to the Rev. William Preston, 1785, at Bradford Abbas, but this no longer exists.

Thomas was succeeded in the business by his son, J. Thomas, who repaired the monuments of the Williams family at Wotton Glenville, Dorset, in 1805 (Monthly Magazine, 1805, Part I, page 197), and also signs a tablet to the Rev. William Owen, 1830, at Castleton in the same county.

THOMAS, JOHN
b. 1813, d. 1862

Thomas was born at Chalford, Gloucestershire, and was left an orphan at the age of thirteen. He became the apprentice of a stone-mason in a neighbouring village, but on the expiration of his term went to Birmingham, where he had a brother practising as an architect. Soon after his arrival he secured a contract for erecting a Gothic monument in Huntingdon and this work was later brought to the notice of Sir Charles Barry, then building Birmingham Grammar School. Barry was so impressed by Thomas’s talent that he at once engaged him to execute all the ornamental and carved-stone and wood work at the school, a task which took him three years to complete.

When his work for Barry had ended, Thomas was employed by the architect Blore to carve coats of arms and heraldic devices for Crewe Hall and Capelthorne Hall which the latter was then building. After this he went to various towns on the new North Midland Railway to execute appropriate coats of arms on the stations in course of erection. Meanwhile Barry had not forgotten him, and, as soon as the building of the Houses of Parliament was far enough advanced, engaged him to superintend the stone-carving in
the entire structure. Thomas, whose industry must have been amazing, was himself responsible for a prodigious amount of work, including the statues on the north and south fronts, the panels with the arms of the Kings and Queens of England from William the Conqueror to Queen Victoria, the statues and bosses for the Victoria Tower and the bosses in St. Stephen's Hall. He later made the bronze statues of Stephen Langton, Archbishop of Canterbury, and William, Earl of Salisbury, for the House of Lords.

In 1845 he carved the statue of St. Michael and a pulpit for Sowton Church, Devon; in 1846 he made a font for Bolton-le-Moors, and in 1847 another for St. John's, Westminster. In 1848 the Prince Consort commissioned him to execute two large reliefs of "Peace" and "War" for Buckingham Palace, and in the same year he carved the two lions, each measuring 25 ft. in length and weighing 80 tons, for the Britannia Bridge, Menai Straits. In 1849 he supplied a chimney-piece for Mr. Brunel's "Shakespeare room," a series of bas-reliefs for Euston Station of the chief cities and towns connected with the North-Western Railway, and a group in high relief of "Britannia Supported by Science and Industry" for the same building.

Before 1850 Thomas had executed architectural sculpture for the National Bank in Glasgow, the Imperial Fire Office in London and the Bristol Law Courts. The life-size wooden figures of British Judges, etc., which he carved for the dining-hall of Lincoln's Inn also date from about the same time. In 1850 he restored a chimney-piece in the Royal Pavilion at Brighton and carved decorative details for Bridgewater House. In the following year he made the High Cross at Bristol.

It is impossible to give here all the sculpture executed by Thomas during the last twelve years of his life, but among his numerous works may be mentioned the fountain, etc., at Preston Hall, Maidstone (1851); decorative sculpture at Windsor railway station and statues on St. Martin's Church, Birmingham (1853); decorative work at the Crystal Palace (1854); sculpture on the façade of the Free Trade Hall, Manchester; a bronze bas-relief of "Ariel" for Balmoral; and a statue of the Duke of Sussex, presented by the sculptor to the Royal Free Hospital in London (1856); a statue of "Rachel," now in the Bethnal Green Museum; all the decorative sculpture for the Fine Arts Academy at Bristol (1857); the frieze round the United Service Club, London, and sculpture on the West of England Bank, Bristol (1858); a statue of Thomas Attwood at Birmingham (1859); and a fountain at Maidstone (1863). Other works carried out by him during those years were the coats of arms on the funeral car of the Duke of Wellington; the pediment and figures for the Great Western Hotel, Paddington; the great fountain at Castle Howard; sculptural decoration for the Sultan's Palace at Constantinople; and decorative sculpture on the piers of the entrance gates of Buckingham Palace. In 1861 he made the figures and vases for the new works at the Serpentine, Hyde Park.

In Edinburgh Thomas was responsible for the carving on the Life Assurance Building, a group for the Masonic Hall, and a fountain at Holyrood. At Glasgow he designed the mausoleum erected in 1854 by Mr. John Holsworth and also carved for it groups of "Faith," "Hope" and "Charity." In 1859 he made a chimney-piece for the same patron.

At the time of his death the sculptor was working on a chimney-piece for Windsor Castle, which had been ordered by the Prince Consort. It must have been rather a peculiar work, for it is described as having "bas-reliefs from the Midsummer Night's Dream, busts of two children, and a figure of Little Red Ridinghood." About the same time he finished another chimney-piece, also with reliefs from A Midsummer Night's Dream, for Mr. Lucas the contractor.

Thomas's ideal works include "Musidora"; "Una and the Lion" (reproduced in Parian china); "Lady Godiva" (the model for which is in Maidstone Museum); "A Naiad" for Queen Victoria; and "Boadicea" for Sir Morton Peto. Of his portrait statues, those of Sir Hugh Myddelton, for Islington, and Joseph Sturge, for Birmingham, were both unfinished at the time of his death. He also carved in 1845 the statue of Queen Victoria on the south end of Lincoln's Inn Library; it is, however, practically impossible to see this as it is a hundred feet above the pavement.

Thomas made a bust of the Prince Consort for the Birmingham Midland Institute, while others by him include those of three Royal Academicians, D. Maclise, J. Philip and W. Frith; the last-named, which was executed in ivory, is now in the Tate Gallery. His monuments include those to Lieutenant Richard Creed, 1841, in Westminster Abbey; Dr. Arnold, 1844, in Rugby School Chapel; and John Brooks, 1851, at Prestwich, near Manchester. His last work was the colossal Shakespeare monument for the International Exhibition of 1862. The difficulties he encountered over its admission to the Fine Art Gallery of the Exhibition hastened his end.

Incredible though it may seem, Thomas also worked as an architect and prepared designs for
the National Bank of Glasgow; the Royal Dairy at Windsor; the Regent’s Park Chapel; Headington House, Oxford; and the Print Room at Windsor Castle. For Sir Morton Peto he designed Somerleyton Hall and also executed a considerable amount of decorative carving for the house.

Thomas exhibited at the Royal Academy, 1842–1861, at the British Institution, 1850, and at the Great Exhibition of 1851, where he showed various works, including a statue of “Rosamunda” and a fountain. He died on 9 April, 1862.

THOMAS, JOHN EVAN

b. 1809, d. 1873

He was born at Brecon, the eldest son of John Thomas of Castle Street and his wife, Jane Evans, of Aberedw, Radnor. At a very early age he began to show an interest in sculpture, carving fruit and flowers in stone, and his father accordingly sent him to London to study under Sir Francis Chantrey (q.v.). Thomas later studied on the Continent and in 1844 exhibited at Westminster Hall his model for the statue of the second Lord Londonderry. This had a mixed reception from the critics, the Literary Gazette considering that it was “without intellect in the head and without dignity in the attitude,” while the Art Union pronounced that it had “very considerable merit.” The statue was later executed in marble and placed in Westminster Abbey in 1850. In 1848 Thomas carved the statues of Henri de Londres, Archbishop of Dublin, and William, Earl of Pembroke, for the House of Lords; in the same year he won the premium for sculpture at the Abercavenny Eisteddfod.

At the Great Exhibition of 1851 (of which he was one of the original guarantors) Thomas showed the model of his colossal statue of the Marquess of Bute, which was carried out in marble and erected in Cardiff later in the same year. He also exhibited “Science Unveiling Ignorance,” the original model for which is now in the Cardiff City Hall. Two years later he repaired the ancient monuments of the Heritages in Cardiff Church.

About 1857 the sculptor left London, although he still kept his studio in Pimlico, and for the rest of his life lived mostly in Brecknockshire where he filled the office of High Sheriff in 1868. He had a considerable practice as a monumental sculptor, several of his works have well-cut medallion portraits, while his monument to the Rev. Thomas Watkins (d. 1829) in Brecon Cathedral, has a lovely relief of two angels watching by a death-bed. The mausoleum of the Pearce family, 1856, in Llanospiddid churchyard is also his work.

Thomas exhibited at the Royal Academy, 1838–1870, showing a large number of works, chiefly portrait busts. He died on 3 October, 1873, and was buried in Brompton Cemetery.

THOMAS, WILLIAM MEREDYTH  
b. 1819, d. 1877

Like his older brother, J. E. Thomas (q.v.), he was born at Brecon and studied under Sir Francis Chantrey (q.v.). The younger Thomas exhibited at the Royal Academy, 1839-1871, where his works included busts and a bas-relief of “Ariel.” At Westminster Hall in 1844 he showed a statue of Prince Henry which the Literary Gazette called a “feeble and unsightly production.” Other works by him include “The Racket Player,” “Sabrina Rising from the Severn,” “The Welsh Harper” and “The Lament of Llewellyn Over his Dog Gelert.”

For over thirty years Thomas acted as his brother’s assistant, and on the latter’s death in 1873 completed the unfinished sculpture in the studio. Thomas himself died four years later and is buried in the family vault in Brompton Cemetery. (Poole’s Brecknockshire, page 323.)

THOMASON, SIR EDWARD  
b. 1769, d. 1849

He was a Birmingham manufacturer and inventor and is best known for his jewellery, medals, coins, gilt and painted buttons, and tokens in gold, silver and bronze. He also produced a number of works of art, including facsimiles in bronze of the Warwick Vase which took seven years to complete.

For the city of Birmingham Thomas cast the life-size statue of George IV, which was acknowledged to be an excellent likeness “by all who have witnessed the progress of the model, standing as it does in all the majesty of Truth and exhibiting a noble specimen of the near approach of art to the stamp of nature”—to quote a contemporary report. Unfortunately this remarkable work has disappeared and was probably melted down by the ungrateful citizens of Birmingham. It may perhaps have been this statue which Thomas sent to Westminster Hall in 1844 and which was dismissed by the Literary Gazette (1844, page 466) as “Brummagem and contemptible.” He also made a bronze bust of the Duke of Wellington, which his widow presented to the “Cavalry of England” and which is now in the Cavalry Barracks at Canterbury.

In 1845 Thomas wrote his Memoirs, an amazing two-volume production, consisting mainly of descriptions and illustrations of the orders, medals and presents he had received from foreign sovereigns. (Gentleman’s Magazine, 1849, Part II, page 430; Information, Birmingham City Library.)

THOMPSON, CHARLES and WILLIAM  
Firm ft. 1800-1845

Thompson, who was later assisted by his son William, had his studio in Osnaburgh Street. The productions of the firm are typical of their period, with heavily draped urns, branches of cypress and reliefs of weeping widows. Monuments and tablets by them include those to Josias Du Pre, 1800, at Beaconsfield, Bucks; George Cuthbert, c. 1800, in Portsmouth Cathedral; John Prettejohn, 1803, in St. George’s, Barbados; Dorothy Twopenny, 1822, at Tunstall, Kent; Martha Lovibond, 1828, at Hatfield Peveril, Essex; Amelia Barnett, 1828, at Great Hornead, Herts; Sir Richard King, 1834, at Eastchurch, Kent; Lady Duckworth, 1837, in Paddington Parish Church; and Charles King, 1841, at Sutton, Surrey. In 1845 he provided casts of classical figures for the Colosseum, in Regent’s Park.

THOMPSON, or TOMPSON, JOHN  
d. 1700

Thompson, who was apprenticed to Francis Clarke and became free in 1667, was the contractor, under Wren, for several of the City churches and was also paid for carved decorative stonework. With George Dowderswell he built St. Magnus, where he received £24 for eight Ionic capitals and £32 for two Portland stone scrolls, 10 ft. long and 6 ft. broad; and with Thomas Cartwright (q.v.) the tower of St. Mary-le-Bow, where his work included four pinacles and carving costing £250, and four urns with flames, £20 (Bodleian, Rawlinson MS. B.387). In 1665 he was paid £600 for repairs to the chapel of Lincoln’s Inn (Inn Archives). In 1686 he was the master-mason under W. Stanton (q.v.), for building Belton.

On his own account Thompson built All Hallows’, Lombard Street, where the ornaments of the frieze cost £10; St. Bartholomew by the Exchange, where he carved eight cherub-heads for £6; and St. Dionis Backchurch, where he executed four great festoons on the east front costing £15 (op. cit.). In 1683 he was employed at Winchester Palace, and in 1691 carried out work at a total cost of £1,308 in the gardens of Hampton Court. In 1685 he was paid £600 for rebuilding Lincoln’s Inn Chapel (Inn Archives).

From 1688 until 1700 Thompson was working at St. Paul’s, his most important contribution to the building being the great doorcase at the west end of the Cathedral, though he also received £60 for “four large festoones on each side of the two windows in the tower” and £100 for setting “ye
the National Bank of Glasgow; the Royal Dairy at Windsor; the Regent’s Park Chapel; Headington House, Oxford; and the Print Room at Windsor Castle. For Sir Morton Peto he designed Somerleyton Hall and also executed a considerable amount of decorative carving for the house.

Thomas exhibited at the Royal Academy, 1842–1861, at the British Institution, 1850, and at the Great Exhibition of 1851, where he showed various works, including a statue of “Rosamunda” and a fountain. He died on 9 April, 1862.

THOMAS, JOHN EVAN
b. 1809, d. 1873

He was born at Brecon, the eldest son of John Thomas of Castle Street and his wife, Jane Evans, of Aberedw, Radnor. At a very early age he began to show an interest in sculpture, carving fruit and flowers in stone, and his father accordingly sent him to London to study under Sir Francis Chantrey (q.v.). Thomas later studied on the Continent and in 1844 exhibited at Westminster Hall his model for the statue of the second Lord Londonderry. This had a mixed reception from the critics, the Literary Gazette considering that it was “without intellect in the head and without dignity in the attitude,” while the Art Union pronounced that it had “very considerable merit.” The statue was later executed in marble and placed in Westminster Abbey in 1850. In 1848 Thomas carved the statues of Henri de Lorraine, Archbishop of Dublin, and William, Earl of Pembroke, for the House of Lords; in the same year he won the premium for sculpture at the Abercavenny Eisteddfod.

At the Great Exhibition of 1851 (of which he was one of the original guarantors) Thomas showed the model of his colossal statue of the Marquess of Bute, which was carried out in marble and erected in Cardiff later in the same year. He also exhibited “Science Unveiling Ignorance,” the original model for which is now in the Cardiff City Hall. Two years later he repaired the ancient monuments of the Herbets in Cardiff Church.

About 1857 the sculptor left London, although he still kept his studio in Pimlico, and for the rest of his life lived mostly in Brecknockshire where he filled the office of High Sheriff in 1868. He had a considerable practice as a monumental sculptor, several of his works have well-cut medallion portraits, while his monument to the Rev. Thomas Watkins (d. 1829) in Brecon Cathedral, has a lovely relief of two angels watching by a deathbed. The mausoleum of the Pearce family, 1856, in Llanspyddid churchyard is also his work.

In 1845 Thomason wrote his Memoirs, an amazing two-volume production, consisting mainly of descriptions and illustrations of the orders, medals and presents he had received from foreign sovereigns.

(Gentleman’s Magazine, 1849, Part II, page 430; Information, Birmingham City Library.)

THOMPSON, CHARLES and WILLIAM  
Firm fl. 1800-1845

Thompson, who was later assisted by his son William, had his studio in Osnaburgh Street. The productions of the firm are typical of their period, with heavily draped urns, branches of cypress and reliefs of weeping widows. Monuments and tablets by them include those to Josias Du Pre, 1800, at Beaconsfield, Bucks; George Cuthbert, c. 1800, in Portsmouth Cathedral; John Prettejohn, 1803, in St. George’s, Barbados; Dorothy Twopenny, 1822, at Tunstall, Kent; Martha Lovibond, 1828, at Hatfield Peveril, Essex; Amelia Barnett, 1828, at Great Hornead, Herts; Sir Richard King, 1834, at Eastchurch, Kent; Lady Duckworth, 1837, in Paddington Parish Church; and Charles King, 1841, at Sutton, Surrey. In 1845 he provided casts of classical figures for the Colosseum, in Regent’s Park.

THOMPSON, or TOMPSON, JOHN  
d. 1700

Thompson, who was apprenticed to Francis Clarke and became free in 1667, was the contractor, under Wren, for several of the City churches and was also paid for carved decorative stonework. With George Dowderswell he built St. Magnus, where he received £24 for eight Ionic capitals and £32 for two Portland stone scrolls, 10 ft. long and 6 ft. broad; and with Thomas Cartwright (q.v.) the tower of St. Mary-le-Bow, where his work included four pinacles and carving costing £250, and four urns with flames, £20 (Bodleian, Rawlinson MS. B.387). In 1685 he was paid £600 for repairs to the chapel of Lincoln’s Inn (Inn Archives). In 1686 he was the master-mason under W. Stanton (q.v.), for building Belton.

On his own account Thompson built All Hallows’, Lombard Street, where the ornaments of the frieze cost £10; St. Bartholomew by the Exchange, where he carved eight cherub-heads for £6; and St. Dionis Backchurch, where he executed four great festoons on the east front costing £15 (op. cit.). In 1683 he was employed at Winchester Palace, and in 1691 carried out work at a total cost of £1,308 in the gardens of Hampton Court. In 1685 he was paid £600 for rebuilding Lincoln’s Inn Chapel (Inn Archives).

From 1688 until 1700 Thompson was working at St. Paul’s, his most important contribution to the building being the great doorcase at the west end of the Cathedral, though he also received £60 for “four large festoons on each side of the two windows in the tower” and £100 for setting “ye
great tribute over the west end of the chappell and
carving ye same.”
Thompson was Master of the Masons’ Company
in 1700, but, according to the Court Book of the
Company, died during his year of office.
(Various references, Wren Society’s publications;
Archives, Lord Brownlow.)

THOMPSON, JOHN, of Lichfield
He signs a wall-tablet to John Fern, 1801, in St.
Chad’s, Lichfield. He may be the same
“Thompson” who signs a charmingly carved
tombstone, with a relief of a dove bearing an olive-
branch, to Jane Bannister, 1780, at Hanbury,
Staffordshire.

THOMPSON, MARY
fl. 1843-1852
She exhibited busts, etc., at the Royal Academy,
1843-1852, and at the British Institution in 1849.

THOMPSON, WILLIAM,
of Birmingham
fl. 1785-1811
He signs a tablet about 12 ft. high in coloured
marbles to Gilbert Walmesley, 1785, in Lichfield
Cathedral. Other works by him commemorate
Rebecca Grice, 1790, and Sobieski Brookshaw,
1811, both in Birmingham Cathedral; Jane
Simpson, 1802, at Dudley, Worcestershire; Thomas
Brooke, 1802, at Aston, Birmingham; and the Rev.
Richard Yates, 1805, at Solihull, Birmingham.

THORNE, —
He signs the large wall-monument to William
Burhill, 1703, at Debden, Essex, which has an
inscription-panel in the form of a heavy, gold-
fringed curtain bunched at the corner. The large
acanthus leaf at the base of the monument is
boldly carved.

THORNTHWAITE, JOHN
fl. 1772-1776
Son of Andrew Thornthwaite, an architect, he
exhibited wax portraits, including one of the
Duke of Gloucester, at the Society of Artists,
1772-1776.

THORNTON, HERBERT,
of Gainsborough
He signs a wall-tablet with pretty details to
Gervase Cole, 1792, at Kettlethorpe, Lincoln-
shire.

THORNycROFT, MARY
b. 1814, d. 1895
She was born at Thornham, Norfolk, the
dughter of the sculptor, John Francis (q.v.), and
was trained in her father’s studio. She first
exhibited at the Royal Academy in 1833 at the
age of twenty-one, and four years later showed
“The Orphan Flowergirl,” described by the Art
Union as “sweetly conceived, delicately arranged,
and executed with much knowledge, skill and
ability.” In 1840 she married the sculptor,
Thomas Thornycroft (q.v.), and together they
went to Italy, where they lived and worked for
some years in Rome.
The first work which Mrs. Thornycroft
exhibited under her married name was a bust of
John Lander, the African traveller, but it was her
model of “A Sleeping Child” which impressed
John Gibson (q.v.). Indeed, he was so much
struck by it, that when Queen Victoria asked him
to suggest a suitable sculptor to model portraits of
her children he at once recommended Mary
Thornycroft, who returned to London and was
engaged by the Queen. The work took the form of
life-size statues of the Royal children, the four
elest representing “The Seasons.” These were a
great success and engravings of them appeared in
most art publications of the period. One stern
tetotaller, however, was much distressed by the
fact that Prince Alfred, who personified “Autumn,”
was shown holding a bunch of grapes. “To connect
childhood with intoxicating wine is repugnant to
our feelings,” he wrote.

Mrs. Thornycroft also executed a number of
busts of the Royal Family, including those of the
Duchess of Gloucester; Queen Victoria (1840);
the Prince of Wales (1846); the Duchess of Kent
(1847); the Princess Royal (1858); Princess Alice
(1861); Princess Louise (1870); Prince Albert of
Schleswig-Holstein (1870); Princess Helena (1874);
and the Duchess of Edinburgh (1876). These, and
the statues previously referred to, are all in the
Royal Collection.
In 1863 she was allowed to make the first bust
of Alexandra, Princess of Wales, and copies of this
work in “Parian” porcelain were one of the Art
Union’s prizes for 1864. In 1877 she carved
statues of the Princesses Victoria, Maud and
Louise, daughters of the Prince and Princess of
Wales. Her statue of “The Skipping-Rope” is at
Osborne, and her bust of Lady Peel was at
Avington Park, Hants.
Mary Thornycroft assisted her husband in so
many of his works that it is difficult to distinguish
her own independent productions, though one of
them is almost certainly the recumbent figure of
THORNYCROFT, THOMAS
b. 1815, d. 1885

He was born in Cheshire and educated at Congleton Grammar School. As a young man he was apprenticed to a local surgeon, but soon discovered that he was unfitted for the work and that his real interest lay in art. His mother accordingly sent him to London to study under John Francis (q.v.) and it was here that he met and married the sculptor’s daughter, Mary, in 1840.

Thornycroft exhibited at Westminster Hall in 1844 “The Jealousy of Medea” which the Literary Gazette called “a Juno-like matron exhibiting forcibly her insulted mind.” In 1848 he carved statues of Henry, Earl of Hereford, and Roger, Earl of Norfolk, for the House of Lords, and in 1849 he was appointed to be one of the sculptors of “Medea” which is now in the Royal Collection. At the Great Exhibition of 1851 he showed an “Equestrian Statue of Queen Victoria” and in 1857 executed the recumbent figure of the child John Hamilton-Martin (d. 1851), which is now in Ledbury Church, Hereford.

In 1857 he made the statue for Wolverhampton of G. B. Thornycroft, the first mayor of that town, and in 1858 his work included a statue of Lady Anna Chandos-Pole. In 1864 came the equestrian statue of the Prince Consort for Halifax and a year later the group of “Commerce” for the Albert Memorial, while another statue of the Prince Consort, this time for Wolverhampton, followed in 1866. In 1867 the sculptor, assisted by his wife, executed two statues of James I and Charles I for the Houses of Parliament. These are now in the Sessions House, Old Bailey.

In 1868 and 1870 Thornycroft made statues of the Prince Consort and Queen Victoria for Liverpool, the two works costing £10,000. In 1869 his statue of the second Marquess of Westminster was erected in Chester, but the frost of the following winter loosened a large piece let into the left shoulder, which not only spoilt its appearance, but also annoyed the inhabitants, who had understood that the work was carved from a single block of marble (Art Journal, 1870, page 86). Another unfortunate error was the abbreviation of the word “second,” so that the inscription read “2d Marquess of Westminster,” a title which the Builder rightly considered open to misconception (1869, page 414). In 1875 his statue of Lord Mayo was sent to Calcutta.

Thornycroft’s best-known work in London is the great group of Boadicea at the northern end of Westminster Bridge. He began work on this in the 1850s and in the early stages received much encouragement from the Prince Consort, who wished to see it placed on the central arch of the entrance to Hyde Park, but the model occupied the sculptor for fifteen years and the Prince was dead before it was finished. After Thornycroft’s own death it was presented to the nation by his son, Sir John Thornycroft, and a sum of money was raised to have it cast in bronze. The group was not, however, unveiled until 1902. In 1875 Thornycroft made the Poets’ Fountain, a work in which he was assisted by another son, Sir Hamo Thornycroft (1850–1925), who carved the figures of Shakespeare, “Comedy” and “Fame.” This fountain formerly stood at the junction of Park Lane and Hamilton Place, but was damaged in the Second World War and later removed. In 1836 he made the monument of William Dickinson at Twycross, Leics.

Thomas Thornycroft died on 30 August, 1885, and was buried at Chiswick. He exhibited at the Royal Academy, 1836–1874, and at the British Institution, 1840–1860.

(D.N.B.; various references, Art Journal.)

THORPE, JOHN, of Bakewell
fl. 1706–1728

He was much employed by Thomas Coke of Melbourne Hall, Derbyshire. In 1706 Mr. Sergeant, Coke’s Derbyshire agent, wrote to his master in London: “John Thorpe has brought three chimney-pieces from Bakewell.” Two years later Coke agreed with Thorpe for “two moulded chimney-pieces of ye grey marble, ye same size and moulding as ye black chimney-piece in ye stone-room.” In 1723 Thorpe received £11 6s. 9d. for another chimney-piece which was apparently for Coke’s London house in St. James’s Place, as Coke writes to Mr. Sergeant that it is to be “carefully put up and to be sent by water to London directed to me” (Archives, Marquess of Lothian).

In 1712 Thorpe was working at Castle Howard, where he made a chimney-piece for the saloon costing £23 and another for the “bewetto” at £37. He was also paid for a double door-case for the dining-room and another of marble for the drawing-room (Archives, Castle Howard). In 1721 he supplied marble for the building of Knowsley (Lancashire County Archives, D.D.K. 2002/1).

In 1727 he was employed by Lord Bingley at Bramham Park, Yorkshire. Here the steward
addressed him as "Mr. Thorpe, marble-cutter," and informed him that: "My Lord will pay your bill if you will come hither on the five and twentieth day of September, but you must be punctual to your time because you cannot have your money before and within three or four days after My Lord goes to London" (Lane-Fox Archives).

**THORWALDSEN, BERTEL**

*b. 1770, d. 1843*

The famous Danish sculptor was living in Rome from 1797 until 1838 and it was during this period that he executed a number of busts for English patrons. The sitters included Lord Dover (1817), the second Duke of Sutherland (1818), Lord Pembroke (1819), Lord Taunton (1828), Lord Wriothesley Russell (1829), Sir Walter Scott (1832), Lord de Dunstanville, Lord Valleytort, Lord and Lady Breadalbane, William Haldiman, Colonel Thomas Bonar, the three daughters of Lord Lucan, and Thomas Divett, M.P. Sir George Barlow, Bart., who died in 1847, left instructions in his will that his bust by Thorwaldsen should descend with the title as an heirloom.

Besides the busts Thorwaldsen also carved "A Shepherd" (1817) for Lord Cowley; "Mercury" (1818) for Lord Ashburton; "Venus" (1824) for Lord Lucan; a vase with bas-reliefs (1825) for Lord Taunton, and a bas-relief of "Charity" for the Marquess of Lansdowne. A number of these have since been purchased by the Thorwaldsen Museum and are now in Copenhagen. The sculptor's famous statue of Lord Byron was finished in 1829, but Dean Ireland refused to allow it to be erected in Westminster Abbey and it lay in the vaults of the Customs House until 1842. In that year it was again offered to the Abbey, but was refused by Dean Turton, and in 1843 it was finally placed in the Library of Trinity College, Cambridge.

Thorwaldsen also signs three monuments in England: those of Charles and Ann Garrard, 1832, at Wheathampstead, Herts; Lady Lawley, 1828, at Escrick, Yorks, and the Earl of Newburgh, 1814, in the Roman Catholic Church at Slindon, Sussex.

**THURPP, FREDERICK**

*b. 1812, d. 1895*

He was born on 20 June, 1812, the youngest son of Joseph Thrupp of Paddington Green, and attended the academy of Henry Sass in Bloomsbury, where he studied modelling and drawing. In 1829 he won a Silver Medal from the Society of Arts for a drawing, and a year later attended the Royal Academy Schools. In 1837 he went to Rome for five years. In 1844 he showed in Westminster Hall two groups entitled "A Hindu Throwing a Javelin" and "Arethusa"; his "Hunter Returning Home With a Child on His Back" appeared at another exhibition at Westminster in the following year.

In 1846 a competition was held to choose a sculptor for the statue of Sir Gowell Buxton which was to be erected in Westminster Abbey. One of the five judges was G. Richmond, R.A., a personal friend of Thrupp, so when the latter received the commission it was rumoured in artistic circles that undue influence had been brought to bear to get his model chosen, especially as it does not seem to have been a very outstanding performance. The *Art Union* (1846, page 264), indeed, called it "the worst statue of all" and added that "it is such proceedings as these which disgust our best artists with competitions."

In 1848 Thrupp executed statues of Robert, Earl of Oxford, and Robert FitzWalter for the House of Lords, and five years later "Timon of Athens" for the Mansion House. In 1854 he finished his statue of Wordsworth for Westminster Abbey, the face being modelled from the death-mask of the poet taken by Chantrey. This commission aroused almost as much ill-feeling as the one for the Buxton statue, and Thrupp was again accused of securing it through influence. The *Art Journal* (1851, page 222) remarked on "the sudden removal of Mr. Thrupp's model as soon as the decision was declared without the other competitors having had an opportunity of seeing it" and also noted that "after the decision it is said the successful artist had been recommended to amend his design." The writer was forced to the conclusion that "there must have been some lack of fair play when the successful artist is not successful enough to show his design."

In 1853 the sculptor had made a bas-relief for St. Martin's Hall, Long Acre, and in 1868 he executed a pair of bronze doors ornamented with ten subjects from the *Pilgrim's Progress* for the same building; these are now in the Bunyan Chapel at Bedford. Another pair of doors with bronze panels illustrating George Herbert's poems are also his work. They were placed in the Divinity School at Cambridge in 1888. He was also responsible for the reredos of St. Clement's Church, York, the monument to Lady Coleridge at Ottery St. Mary, Devon, and the recumbent effigy of Canon Pearson, 1883, at Sonning, Berks.

Thrupp exhibited at the Royal Academy, 1832-1880, at the British Institution, 1837-1862, and at the Birmingham Society of Artists, where in 1849 he showed a figure of "Ariel" and a small
marble statue of the Magdalen. At the Great Exhibition of 1851 he showed “The Maid and the Mischievous Boy,” and at the International Exhibition of 1862 “Nymph and Cupid” and a relief of “Hamadryads” which the Art Journal (1862, page 230) called “one of the most classic and correct bas-reliefs in the Exhibition.” He lent his “Boy and the Butterfly” to the Exhibition of Art Treasures held in Manchester in 1857.

Thrupp died on 21 March, 1895, and was buried at Torquay. In the previous year he had given the works in marble and plaster in his studio to the City of Winchester and they had been placed in the ancient Abbey building adjoining the Guildhall. In 1911, however, they were returned to the sculptor’s family, who then presented them to the Torquay Corporation.

(Various references, Art Journal and Builder.)

THURLOW, THOMAS, of Saxmundham
b. 1813, d. 1899

He was the son of a mason named John Thurlow (1785–1850) and was born at Saxmundham in Suffolk, a county in which he spent all his life and where most of his work is to be found. In 1847 he made a bust of the poet Crabbe for Aldeburgh Church, and in 1873 executed the reredos for his own parish church of Saxmundham.

Thurlow’s largest work, in Kelsale Church, is the statue of Samuel Clouting, 1852, which, with its beaky nose and almost military type of cloak, bears a curious resemblance to the Duke of Wellington. Other monuments and tablets by him in Suffolk include those to Sir Charles Blois, 1840, at Yoxford; Robert King, 1842 (with a medallion portrait), at Winterton; William Shuldham, 1850, at Marlesford; Sir Thomas Gooch, 1851 (with a relief of “Faith, Hope and Charity”), at Benacre; Susanna Mayhew, 1853, and John Crampin, 1869, both at Saxmundham; and Richard Garrett, 1866 (with a bust), at Leiston.

Thurlow exhibited at the Royal Academy, 1846–1872, and at the British Institution, 1841. He died in 1899 and is buried in Saxmundham churchyard.

TILNEY, J., of York
fl. 1822–1841

His tablets are mostly neo-Hellenic in design, the best (all in Yorkshire) being those to Toft Richardson, 1827, at Riccall; Isabella Serjeantson, 1834, at Snaith; Henry Sidgwick, 1835, at Brompton; John Todd, 1837, in St. Michael-le-Belfry, York; and Harriet Carr, 1841, at Horbury.

Tilney took his son Charles as an apprentice in 1833.

TILSTON, JOHN, of Chester
b. 1671, d. 1723

Son of Modland Tilston, of Gresford, Denbigh, he was apprenticed to Thomas Davies, of Chester, and became a Freeman of that city in 1695. Tilston, who carved the statue of Queen Anne for the front of Chester Exchange, died in 1723 and was buried in the south aisle of St. John’s Church.

His grandson, John Tilston, was also a carver and became free of the Masons’ Company of Chester in 1732.

(Archives, City of Chester.)

TIMBRELL, HENRY
b. 1806, d. 1849

He was born in Dublin, the son of James Timbrell, “Clerk in the Ordnance.” He studied under the Irish sculptor, John Smyth. In 1825 he entered the Schools of the Royal Dublin Society and after winning various prizes and exhibiting at the Royal Hibernian Academy, 1827–1829, went to London in 1830. Here he entered the studio of E. H. Baily (q.v.), but apparently did not stay there long, for when he put down his name for the Royal Academy Schools, to which he had been recommended by T. Denman (q.v.), he gave his address as “40, Via Laurina, Rome.”

Timbrell attended the Academy Schools, where he won the Gold Medal for a group entitled “Mezentius Tying the Living to the Dead.” In 1843 his “Hércules Throwing Lycas into the Sea” gained him the Travelling Scholarship and he accordingly made a second journey to Rome. When he had been there nearly two years he executed a life-size marble group of a mother teaching two children which he sent in to the Royal Academy, but the ship carrying the work was wrecked on its way to England and the group almost completely ruined.

Timbrell died of pleurisy in Rome on 10 April, 1849, leaving unfinished statues of Richard, Earl of Clare, and William, Earl of Aumale, for the House of Lords and another of “The Lamp of the Ganges” for Queen Victoria. Had he lived there is little doubt that he would have reached the highest rank in his profession. John Gibson (q.v.) admired his work and recommended him to the Queen, who commissioned the statue already mentioned for Osborne. During his second stay in Rome he also executed two bas-reliefs for the garden house of Buckingham Palace.

Timbrell exhibited at the Royal Academy, 1833–1843, at the British Institution, 1843, and at
Westminster Hall, 1844, where he showed his “Hercules.” He married, on 3 February, 1838, at St. Pancras, Miss Susan Flather (Archives, Artists’ Annuity Fund).

(Art Journal, 1849, page 198; and 1855, page 260.)

TIMBRELL, JAMES C.
b. 1807, d. 1850

He was a younger brother of Henry Timbrell (q.v.) and entered the Schools of the Royal Dublin Society in 1825, where he studied painting. Five years later he went to London, but it was not until 1848 that he turned his attention to sculpture, showing in that year “a bas-relief, part of a monument to be erected in marble” at the Royal Academy.

Timbrell died at Portsmouth on 5 January, 1850. He apparently left very little money, for his widow was given a grant of £10 by the Royal Academy shortly after his death (Royal Academy Archives).

TINKLER, —, of Derby

He signs a ledger, with a coat of arms at the top, to the Herrick family, 1759, at Barrow-on-Soar, Leicestershire.

TOGNOLI, GIOVANNI, of Rome
b. 1786, d. 1862

He was drawing-master to Canova and made the font (which he signs) at Escrick, Yorkshire, in 1844. This is a charming work, in the form of two angels supporting a bowl.

TOLLEMACHE, WILLIAM
d. 1817

Tollemache studied at the Royal Academy Schools, where in 1805 he won the Gold Medal for his group entitled “Prometheus Chained to the Rock.” In 1813 his bronze cast of “Venus” gained him a Silver Medal and a premium of twenty guineas from the Society of Arts. He exhibited at the Academy, 1812–1814, and at the British Institution, 1814–1816, showing various small models to be cast in bronze. His signed monument commemorating Amelia Gooch (d. 1807) is at Beaconsfield, Bucks.

In the year of Tollemache’s death his widow wrote to the Academy “stating her great distress and petitioning for assistance.” The Committee awarded her a grant of ten pounds (Minute-book, Royal Academy). She had, as Harriot Gilchrist, married Tollemache at St. James’s, Westminster, on 21 August, 1804. She died in Liverpool on 28 October, 1841 (Archives, Artists’ Annuity Fund).

TOLMIE, JAMES
d. 1866

As an ornamental stone-carver, he was employed at the Whitehall Club, New City Club, Inns of Court Hotel and the hotel at Buxton. He was also responsible for some of the carving of the Prince Consort’s mausoleum.

Tolmie died at Lambeth, leaving unfinished two statues for the interior of St. George’s Hall, Bradford.

(Art Journal, 1867, page 56.)

TOMBLING, JOHN, of London
fl. 1794–1817

He may possibly have been a son of the “Mr. Robert Tombling, mason,” who worked at Corsham Court, Wiltshire, on various occasions between 1769 and 1786 (Archives, Lord Methuen).

John Tombling’s studio was in Mount Street and under Soane he was employed at Lord Delaval’s house in Hanover Square. He also worked for the Duke of Leeds, for whose house in St. James’s Square he made in 1795 “three marble tables with moulded edges” (Sir John Soane’s Account-book, Soane Museum). He signs a Hellenic wall-tablet to Mrs. Faran, 1803, in the Grosvenor Chapel. As a mason he worked at Lord Brownlow’s house in Hill Street in 1794 (Archives, Lord Brownlow).

TOMLINSON, J., of Uxbridge
fl. 1806–1819

Most of his monuments and tablets are in the Regency style, although that commemorating Mary Auberry, 1813, at Pinner, Middlesex, is a copy of the monument by Sir Robert Taylor erected in 1767 to Edmund Auberry in the same church. Other monumental works by Tomlinson include those to Mrs. Barry, 1806, at East Bedfont, Middlesex; Lt.-Colonel Hilliard, 1811, at Cowley, Middlesex; Henry Pye, 1813, at Pinner, Middlesex; and Arabella Popple, 1819, at Burnham, Bucks.

TOMLINSON, R.
b. 1779

He joined the Royal Academy Schools in 1798 and won a Silver Medal in 1805. From 1806 until 1810 he exhibited at the Academy, showing busts, including a fine marble one of William Beckwith, dated 1807, which is now in the office of the Foundling Hospital in Brunswick Square.
Tomlinson’s relief of a shipwreck (which he also showed at the Academy) afterwards formed part of his monument erected at Itchen (Pear Tree Green), Hampshire, to the memory of Captain Robert Scott, commander of H.M.S. Boreas, which went down off Guernsey in 1807.

TOMSON, EDWARD and THOMAS, of Cambridge
Edward Tomson: b. 1773, d. 1829
Thomas Tomson: b. 1775, d. 1849

In 1803 Edward Tomson carved the pedestal, designed by Flaxman, for a Greek statue of "Ceres," which had been presented to Cambridge by Messrs. Clarke and Cripps (Monthly Magazine, 1803, Part II, page 87). In 1815 he was employed in the University on masonry work at Clare Hall.

He was also assisted by his brothers Thomas and Lewis (1783–1832) and it was the former who was working under Soane at Caius College in 1792. He later altered the west front of Clare Hall in 1815, and ten years later built Gisborne Court at Peterhouse (Willis and Clarke’s Architectural History of Cambridge, Vol. I, pages 111 and 39).

Edward Tomson’s best monumental work is the large wall-tablet in coloured marbles to Joseph Clarke (d. 1790) at Wethersfield, Essex; he also executed those of Charles Matthews, 1811, in St. Benet’s Church, Cambridge, and of Sir Thomas Hatton, 1812, at Long Stanton, Cambridgeshire.

With his brother Thomas he signs a tablet to Samuel Knight, 1806, at Milton in the same county.

Thomas on his own account signs tablets to Thomas Sennett, 1819, at Newton, Cambs; George Maltby, 1820, at Buckden, Hunts; Thomas Marten, 1821, at Stow-cum-Quy, Cambs; Mary Jennyns, 1832, at Bottisham, Cambs; and Charlotte Gibbons, 1833, at West Wratting, Suffolk.

Edward Tomson died in 1829, and was buried in St. Botolph’s Church, Cambridge, the business being carried on by Thomas and his sons.

An “Edward Tomson, stone cutter” (presumably an ancestor) was paid £5 3s. 10d. in 1754 for repairing the Market Cross at Cambridge (City Sessions Book).

TOVELL, GEORGE and ROBERT, of Ipswich
Robert Tovell: b. 1778, d. 1840

They were sons of Edward Tovell, stone-mason, and they sign a good many tablets in Suffolk, though none of these is outstanding. The best executed by George commemorate George Booth, 1821, in St. Clement’s, Elizabeth Trotman, 1821, in St. Peter’s, and Elizabeth Cobbold, 1824, in St. Mary-at-Tower, Ipswich; and James Ellis, 1832, at Hunston.

Robert’s tablets include those to Robert Green, 1818, at Debenham, and the Rev. John Longe, 1834, at Coddenham. His wife, Sarah Thurston, also of Ipswich, whom he married in 1812, died in 1831 at the age of thirty-seven. Another Robert Tovell, “stonemason,” died 27 October, 1786, and was buried at St. Margaret’s, Ipswich.

TOVEY, WILLIAM
b. 1771

In 1725 Tovey became a member of the Masons’ Company “by virtue of an order of the Court of the Lord Mayor and Aldermen.” In 1749 he sent in an estimate for £1,203 for the mason’s work for the principal storey at the Mansion House, but was turned down in favour of Christopher Horsnaile (q.v.), who offered to do it for £900.

Tovey, who was mason to the Ironmongers’ Company from 1758 until 1767 (Company’s Archives), left a widow (or perhaps a daughter) named Sarah when he died in 1771 (Court-book, Masons’ Company). She proceeded to carry on the business in partnership with a Mary Wheeler and their firm carried out mason’s work at Skippers’ Hall in 1773. This is the only example I know of in the eighteenth century of two women being partners and running a mason’s business.

TOWNE, JOSEPH
b. 1808, d. 1879

He was born at Royston on 25 November, 1808, and at the age of seventeen made a model of a human skeleton for Guy’s Hospital. This was so delicate and well-executed a piece of work that the Governors offered the young man the post of anatomical modeller to the hospital, a position he held for fifty-three years. During that time he won an international reputation and received orders for models from countries all over the world, including America, Russia and Australia. In 1826 he was awarded a medal by the Society of Arts and, ten years later, he made a bust of Sir Astley Cooper, for which Sir Astley’s medical students paid £400.

In 1837 Towne made a small equestrian statue of the Duke of Kent for Queen Victoria and, a year later, another of Wellington, which is now in Gwy’s Hospital. In 1836 he had carved a bust of Nelson and in 1842 he executed one of Wellington, both of which are in the Junior United Service Club. His bust of Bishop Otter, dated 1844, was placed in Chichester Cathedral in 1861. In 1841
he made a bas-relief of "Christ Healing the Blind" which was erected in the Clothworkers' Hall. In Guy's Hospital are his busts of William Babington, 1834; Thomas Addison, 1852; and Sir Astley Paston Cooper, 1841. The last named has a large pedestal with a fine relief, also carved by Towne, of three youths carrying a sick man.

Towne exhibited at the Royal Academy, 1834–1866, showing a marble statue of Wellington in 1835. He signed the tablet to Randal Jackson, 1837, formerly in the Temple Church.

Thomas Hodgkin, in a lecture on Towne and his anatomical models, said of him that "he was an artist, who had the signal merit of having both created his art for himself and arrived at such a proficiency in it that his works, already numerous, rival, if not surpass, those of the best and most distinguished masters of Florence and Bologna."

Towne died 25 June, 1879.

(Data from Gentleman's Magazine, 1842, Part I, page 639; Builder, 1861, page 696.)

TOWNESEND, GEORGE,
of Bristol
_d._ 1719

He was the eldest son of John Townsend the Elder of Oxford (q.v.) and became a Freeman of Bristol on 8 July, 1706, on his marriage with Margaret, widow of Malachi Harford. In 1709 he drew a "frontispiece" for the Bristol Council House, having already carved a chimney-piece for the same building in 1705 (City Archives). In 1716 he completed the tower of All Saints' Church, Bristol, and is, therefore, presumably responsible for the carving of the charming urns and vases (Churchwardens' Accounts).

Townsend signs a monument to Sir Hugh Smyth, who died in 1680 (although the monument was erected later), and another to Lady Smyth, who died in 1715, both in Long Ashton Church, Somerset. The design in each case is more or less the same and consists of Corinthian pilasters, supporting a pediment on which recline mourning cherubs. The coats of arms, swags and other details are well carved.

TOWNESEND, JOHN, the Elder,
of Oxford
_b._ 1648, _d._ 1728

He was the son of Thomas Townsend of Oxford and was apprenticed to Bartholomew Peisley in 1664. From 1688 until 1712 he was the college mason of Queen's, but retired in the latter year and was succeeded by his son William (q.v.). He was also the father of George Townsend of Bristol (q.v.) and John Townsend of London (q.v.).

The elder Townsend, who was one of the masons for building Blenheim in 1709, was elected Mayor of Oxford in 1682, and again in 1720. Apparently he was not a popular character, for Hearne in his Collections (Vol. VII, page 171), recording the election, also adds the Mayor was "commonly called 'Old Pincher' from his pinching his workmen." When Townsend died on 23 May, 1728, Hearne writes (Vol. X, page 15): "Yesterday died of a dropsy old Mr. Townsend of Oxford, mason. He was near four-score, a strong hearty man till of late. He was good for nothing."

TOWNESEND, JOHN,
the Younger, of London
_d._ 1742

Son of John Townsend the Elder of Oxford (q.v.), his yard was in London at St. Paul's Wharf, and from 1714 until 1717 he and his brother William were the mason contractors for building the church of St. Mary-le-Strand. In 1738 "Mr. John Townsend, citizen and haberdasher, Mr. Christopher Horsnaile and Mr. Robert Taylor, citizens and masons, did jointly propose to perform the mason's work of the Mansion House" (City Corporation Records, Mansion House Committee Papers, Box 1).

John Townsend's death is noted in the London Magazine of April, 1742, as follows: "Died, Mr. John Townsend, one of the Common Council men for Castle Baynard Ward and brother to the late Mr. Townsend of Oxford, well known for his many noble structures in that place." An Edward Townsend, who may be a relation, became free in 1721, was Steward of the Masons' Company in 1727 and Master in 1738.

TOWNESEND, JOHN,
the Younger, of Oxford
_d._ 1746

He was the son of William (q.v.) and the grandson of John Townsend the Elder of Oxford (q.v.), and in 1737 received £1,900 for mason's work at Queen's College. This sum included £25 for the carving in the pediment and other payments for "two lions and two unicorn-heads, large gilliflower in the centre of the arch, sixty-four octagon panels and carving a flower in the middle of each" (Bodleian, Rawlinson, D.912, Folio 528). Also for the College, he carved in 1745 the console round the niche where the statue of Queen Philippa stood (College Archives).

In 1739 Townsend succeeded his father as
college mason of Christ Church and as one of the mason-contractors for the Radcliffe Camera, though he had already been a "stone-carver" there since work on the building had begun two years previously. Here his payments for stone-carving included £384 for thirty-two Corinthian capitals; £32 for eight festoons between columns; £105 for forty-five Ionic capitals; £60 for forty-eight roses; £120 for "carving ye compartments"; and £187 for "twenty obseques and lamps round the Library" (Building Account, Radcliffe Library, Bodleian).

In 1742 he made a chimney-piece for the Hall of St. John's College, and in the following year made the screen, which had been designed by Gibbs and cost £120 (College Archives).

Townsend signs monuments to John Stamp, 1728, at Wantage, Berkshire, and to John Clark, 1740, at Fighledean, Wiltshire.

TOWNESEND, JOHN, the Third
d. 1784

In 1746 Townsend was working at Welbeck (Archives, Duke of Portland). In 1757 he made a marble shield for Mrs. Sarah Holmes to be added to the monument to her husband in the Chapel of St. John's College, and in the following year he carved two pots of flowers for the College garden gate (St. John's College Archives).

In Oxford itself he signs the monuments of Henrietta, Countess of Pomfret, 1761, in St. Mary's, and of Henry Bowles, 1765, in New College Chapel. His monument to Richard Wykeham, 1768, is at Swalccliffe in the same county.

I am uncertain of his exact relationship to the other Townsends of Oxford and London, though he could be the "John Townsend son of Christopher Townsend of Stepney, mariner," who was apprenticed on 30 October, 1704, to Edward Edwards and became free in 1711.

TOWNESEND, WILLIAM,
of Oxford
b. c. 1669, d. 1739

Son of John Townsend the Elder (q.v.), he was apprenticed to his father and was college mason of Christ Church in 1704. In 1707 he received £15 for work at Carfax (Vice-Chancellor's Accounts), and two years later began to build the west side of the front quadrange of Queen's College, the Chapel and Hall following in 1714. His bills for stone-carving included £36 for eighteen Corinthian capitals in 1716; £3 for four cherubim-heads for two niches in the Chapel; and £18 for two lions. In 1718 he made the grand entablature between the Hall and the Chapel, and in the following year received £293 for the marble altar-piece. Later, in 1733, he was paid £1,045 for the cupola (Queen's College Archives).

About 1721 Townsend and Bartholomew Peisle the Younger (q.v.) were working at Blenheim, and the former received a letter from the Duchess of Marlborough telling him that she thought herself "very happy (sic) that I have got two so able and honest men to carry on my build-ings as you and Mr. Peisley."

In the same year he built the famous bridge at Blenheim and also the triumphal arch. Hawksmoor, writing to him on 14 November, 1722, informs him that "when Bat. Peasley (sic) was in Town I gave him the designs of the Gate for Woodstocke Park together with the mouldings and cornices of the same."

Townsend was also responsible for the marble work in the Chapel, and in 1727 executed the memorial column in the Park, which had been designed by Flitcroft. The cutting of the long inscription caused trouble, and in 1730 the Duchess wrote to him complaining of the inferior quality of the marble he had used, and remarking that she could not "help wondering that you could not see the Fault when you were in Town, who are so much used to marble. I hope," she continued, "you will take effectual care that there is no more Blonders made—For it will be a most terrible thing, if there is, to me; who have so long set my heart upon this pillar's being well per-formed." (Birmingham and Midland Institute, Transactions, 1884–1885.)

In 1712 Townsend had begun to erect the Clarendon Building, receiving £2,000 in 1712 and 1713 (Archives, All Souls College). He also did a considerable amount of work at All Souls, beginning in 1719 when the Chapel was "beautified" and he was paid £85 for his share of the work. In 1729 he agreed to build the Hall, buttery, kitchen, etc., for £2,500, and his carved stonework included the magnificent screen in the Hall, "4 coats of arms on the South side," and "the shield between the two pincacles" (Archives, All Souls College). He was also employed at many of the other Colleges in Oxford; indeed Hearne (Collections, Vol. VII, page 171) describes John Townsend the Elder on his election as Mayor in 1720 as "father to Townsend who hath a hand in all the buildings in Oxford and gets a vast deal of money that way."

Between 1721 and 1725 Townsend was employed at Radley House, Berkshire, where he was responsible for a good deal of the carved stonework. In 1737 he was again working in Oxford, where he and William Smith, of Warwick
Richard Trubshaw (1689–1745), the mason who built Bangor steeple in 1726. Charles Trubshaw trained in London under P. Scheemakers (q.v.), but later returned to Stafford where he set up for himself. He made a good many marble chimney-pieces for houses in the neighbourhood, including those for Mr. Sneyd, of Keele Hall, Lord Ward at Himley, Mr. Talbot at Hoarcross, and for the Raven Inn at Shrewsbury.

In 1765 Rysbrack made a figure of a goat for Sir Edward Littleton, but the plinth and one of the animal’s horns were broken on the way from London to Teddseley. Rysbrack, in a letter to Sir Edward, written on 30 November of the same year, assured him that he need not “be uneasy about the goat, because when Mr. Trubshaw has mended it, it will be just the same as it was before” (Littleton Archives).

Trubshaw signs a large wall-monument to Acton Moseley, 1745, at Enville, Staffordshire.

(Susannah Trubshaw’s Family Records; Eva Whitehouse’s History of Haywood.)

TRUBSHAW, JAMES
b. 1777, d. 1853

Trubshaw, who was a son of James Trubshaw the Elder (1746–1808) and a grandson of Charles Cope Trubshaw (q.v.), studied sculpture in London under Sir Richard Westmacott (q.v.), who afterwards found him a post as foreman of the masons then building Fonthill Abbey. He was later employed at Windsor Castle and also at Buckingham Palace, where he fixed the grand staircase.

Trubshaw subsequently returned to Stafford, and it was during this period that he built Iam Hall for Mr. Watts Russell, Weston House in Warwickshire and, in 1827, the bridge over the Dee at Chester, which, when finished, had the largest arch in Europe.

He was apparently a man of great physical strength and when he was working at Iam Hall his employer, Mr. Watts Russell, matched him in a race with the young Russells’ tutor. On being told that his opponent was a weedy creature, Trubshaw offered to run with Sir Francis Chantrey (q.v.) on his back, the latter being a guest of the family at the time. This was agreed to and, in spite of so great a handicap, he won the race.

Trubshaw signs various wall-tablets in Staffordshire, including those to John Collins, 1820, at Hints; John Sparrow, 1821, at Colwich; and Ralph Moreton, 1834, at Wolstanton. The tablet to the Hales family, 1841, in Stoke-on-Trent Parish Church is signed “J. and C. Trubshaw.”

(Susannah Trubshaw’s Family Records.)
TRUeman, Edward, of Worcester
ft. 1800-1815

He signs a wall-tablet to Ann Wickens, 1812, in All Saints' Church, Worcester. His son, George Clewer Trueman, was apprenticed to him and became free in 1807.

TUFFNEL, JOHN and EDWARD
John: b. 1643, d. 1697
Edward: b. 1678, d. 1719

John Tuffnel and his son Edward were members of a family of masons and master-builders. The elder Tuffnel, born in 1643, may have been the son of Edward Tuffnel and Catherine Moorecooke, of Christ Church, Newgate, London, who were married at St. Martin-in-the-Fields on 8 October, 1638. In 1671 “John Tuffenell” was paid 15s. for the sundial (still in position) on Cleave’s Almhouses, Kingston, Surrey (Archives, Cleave’s Almhouses).

John was the master-mason at Westminster Abbey for twenty-three years and was also employed on repairs to St. Margaret’s, Westminster, in 1674 and again later. He died on 18 February, 1697, and was buried “near the east end of the south Cloister” of the Abbey. His wife, Dorothy Smythe, whom he had married in 1672/3, afterwards became the wife of a Mr. Noble and died in 1720.

Edward Tuffnel, who succeeded his father as Abbey mason, was baptized at St. Margaret’s, Westminster, on 21 February, 1678, and in 1697 married Anne Browne, “daughter and coheir of Samuel Browne of St. Margaret’s, Westminster, Gent.”

He worked at the Abbey as master-mason for twenty-two years and during that time, according to his epitaph, restored and re-decorated the south and east sides of the building. In 1702 he received £12 15s. for masonry work when the Royal vault in Henry VII’s Chapel was opened to receive the coffin of William III (P.R.O., Works 5/53).

He died on 2 September, 1719, and, like his father, was buried in the cloisters, where a large monument with a portrait-bust (presumably the work of his brother Samuel) was erected to his memory. His widow remarried in 1721 a merchant named Thomas Mytton, of St. Leonard’s, Shore-ditch, and died seven years later.

(J. L. Chester’s Westminster Abbey Registers.)

TUFFNEL, SAMUEL
d. 1765

Son of Edward (q.v.), he was the master-mason for building St. John’s, Horsleydown, from 1728 until 1733. He also made marble chimney-pieces, including one for Lord Derby’s new house at Knowsley, Lancashire, in 1719 (Derby Archives), and another (designed by Nicholas Dubois) for Stanmer Park, Sussex, in 1725 (Newcastle Archives).

In 1737 William, and in 1743 Samuel, became directors of the Westminster Fire Company (Company’s Archives).

Samuel Tuffnel signs a number of monuments, usually architectural in character, including those to Henry Phillips, 1714, at Aylesbury, Bucks; Newdigate Owsey, 1714, at Leyton, Essex; Bishop George Hooper, 1727, and Abigail Hooper, 1728, both in Wells Cathedral; and Francis Wilkinson, 1728, at Feltham, Middlesex. His monument to the Cart family was formerly in St. Mary-le-Bow, but was destroyed when the church was bombed in 1940. According to Allen’s London (Vol. III, page 437), this was “a plain sarcophagus surmounted by a well-executed bust of the deceased in the undress costume which marks the likeness of Thomson and other poets. At the back of the bust are four Corinthian Columns, sustaining a broken elliptical pediment. On the base is J. Potter arch. S. Tuffnell sculp.”

Edward and Samuel Tuffnel had another brother, William (1680-1733), who worked as a master-builder and bricklayer for the New River Company.

The family seem to have had the right to be buried in the Abbey, for as late as 1832 Ann White, Samuel’s granddaughter, was buried in the west cloister, and her grave was reopened in 1839 on the death of her daughter, Emmeline-Eliza (J. L. Chester, Westminster Abbey Registers).

TURNbull, ROBERT
ft. 1748-1750

About 1750 he built the grotto and circular Corinthian temple at Ascot Park, Berks. “The carving with which he has enriched the Corinthian Temple and a Gothic seat at no great distance from it gives very sufficient proof of his skill and ingenuity” (Hakewill’s Windsor, page 293).

Turnbull’s yard was in Brick Street, Piccadilly (Westminster Poll Book, 1748).

TURNER, Joseph, of Chester
d. 1807

He was admitted a Freeman of Chester by Order of Assembly on 22 October, 1774, and in 1782 became a Sheriff of the city. In the same year he was the architect for building Bridge Gate (Hemingway’s Chester, Vol. I, page 369).
He was an alderman of Chester and died on 6 February, 1807. He was buried at Harwaden Church, Flintshire, where there is a tablet to his memory, which records that "the many splendid and Publick Works in which he was concerned in the counties of Flint, Denby and Chester, will be a lasting memorial of his taste and abilities as an architect."

Turner's monuments are mostly architectural in character, the most imposing being that commemorating Sir Lynch Cotton, 1777, at Wrenbury, Stafford, which has a large urn set against a pyramid. Other signed monuments by him include those to Charles Legh, 1785, at Prestbury, Cheshire; J. Harrison, 1789, at Aldford, Cheshire; George Hawkshaw, 1792, in Chester Cathedral; Susanna Price, 1796, at Llangollen, Denbighshire; and John Hughes, 1798, at Ruthen, Denbigh.

(Chester Corporation Archives.)

**TURNER, THOMAS,** of London

He signs a Hellenic wall-tablet to Elizabeth Peters, 1837, in St. Luke's, Chelsea. His yard was in Somerset Place, Whitechapel.

**TURNER, WILLIAM,** of London

fl. 1804–1820

He exhibited busts at the Royal Academy, 1804–1819, including those of J. Shaw (1815) and Mrs. Phillips, of Tean Hall (1819). In the latter year he received £42 12s. for a veined-marble chimney-piece for the Bank of England (Soane Account-books).

Turner signs a Hellenic wall-tablet carried out in coloured marbles to the Countess of Mount Edgcumbe, 1806, at Maker, Cornwall, and a smaller one to Anne Grant, 1814, at Farnborough, Hants.

**TURNERELLI, PETER**

*b. 1774, d. 1839*

He was born in Dublin, the son of James Tognarelli, an Italian modeller and figure-maker, and an Irishwoman. He first studied in a Roman Catholic seminary with a view to entering the priesthood, but in 1793 followed his family to London and decided to train there as a sculptor. He first worked in the studio of P. F. Chenu (q.v.) and also joined the Royal Academy Schools, his name in the admission-book being spelt "Taguarelli." In 1799 he won a Silver Medal from the Academy.

Turnerelli's first patron was the second Lord Heathfield, for whom he made a bust of Sir Francis Drake modelled on a painting. This was so successful that he received a further commission for a bust of his employer's father, the famous defender of Gibraltar. Sir Thomas Lawrence also took an interest in the sculptor and recommended him to the Princess of Wales, who engaged him to teach her modelling. Shortly after this, Turnerelli was appointed teacher and sculptor to the Queen and the Princesses and consequently was frequently at Windsor. He held the post for three years and, at the end of that time, became Sculptor-in-Ordinary to the Royal Family. He was also offered a knighthood, which he declined.

His work for the Royal Family naturally led to the sculptor being given permission to make the Jubilee bust of George III in 1810. The work was an instantaneous success and he received orders for eighty copies in marble from the nobility of England and the Colonies. In 1816 he went to France, where Louis XVIII sat to him for a bust at the Tuileries. In the same year he was paid £472 10s. by the Prince Regent for busts of Wellington, Platoff and Bühler, which were intended for Carlton House (P.R.O., L.C. 9/367). Apparently Turnerelli had already made a bust of Wellington, for Farington in his diary (Vol. VII, page 194) mentions that "Nollekens complained much of the conduct of Turnerelli, the sculptor, who, he said, had copied his (Nollekens') bust of Lord Wellington and now sold it as his own performance."

Shortly afterwards Turnerelli went to Ireland, where he made his famous bust of Grattan in eleven hours. It was this work which Canova, when on a visit to London, described as the best modern bust he had seen in England. He next received commissions for a "nuptial bust" of the Princess Charlotte and also for one of her future husband, Prince Leopold. The latter sat to him in the Pavilion at Brighton and was so anxious to see the work completed that he even found time for a sitting on his wedding morning.

Between 1828 and 1830 Turnerelli paid several visits to Ireland. Here he modelled the bust of Daniel O'Connell, which was so popular that ten thousand plaster copies of it are supposed to have been sold. He also made a white-marble altar for Marlborough Street Church, Dublin.

As a sculptor of busts, Turnerelli was the first to portray his subjects in contemporary dress instead of in conventional classic costume, an innovation suggested to him by Benjamin West when they were instructing the Royal Family at Windsor. On the accession of George IV he was again offered a knighthood, and again declined it. He died in London on 18 March, 1839, and was buried in the graveyard of St. John's Wood Chapel. His first wife was Margaret Tracy, a claimant of the Tracy peerage (d. 1835), and his
second, whom he married at St. Thomas's, Dublin, on 28 December, 1835, Mary O'Connor. By his first marriage he had a son, Peter Turnerelli (1813–1890) (see D.N.B.).

According to his obituary in the Gentleman's Magazine (1839, Part I, page 548), Turnerelli was also “a charming singer with a voice of singular quality and sweetness.” He exhibited at the Royal Academy, 1802–1838, showing no less than one hundred and eight works, including “Caro, a favourite Venetian greyhound for the Countess of Breadalbane” (1811), and “Sacrifice, being part of a work to be executed for Spetchley Hall, near Worcester, the seat of R. Berkeley, Esq.” (1813).

His work as a monumental sculptor is very uneven; for example, his tablet to Lady Nelson, 1831, at Littleham, Devon, is more like the work of a “New Road statuary” than of a distinguished sculptor.

(European Magazine, 1821, Part I, page 387, etc.; Strickland’s Dictionary of Irish Artists; Archives, Artists' Annuity Fund.)

**TYLER, WILLIAM, R.A.**

*d. 1801*

In 1762 it was decided to erect a statue of
George III in the Royal Exchange and Tyler accordingly wrote to the Committee begging "leave to offer himself as a candidate to execute the statue of the King." In his letter he described himself as "the son and grandson of a citizen and many years student under the late Mr. Roulliac" (City Records, MS. 167.13).

In 1765 he became a director of the Society of Artists, and on the foundation of the Royal Academy in 1768 he was nominated one of the original forty members and later Auditor.

In 1772 he made a marble chimney-piece for Milton Hall, near Peterborough, from a design by Sir William Chambers. The latter, when enclosing Tyler's bill for £282 in a letter to Lord Fitzwilliam, suggests that: "If it is convenient to your Lordship, Mr. Tyler will, I believe, be very thankful for the money as he told me in confidence he was as poor as could be" (British Museum, Ad. MS. 41133). Three years later the sculptor was paid for repairing the monument of Sir Richard Hoare in St. Dunstan-in-the-East (Archives, Hoare's Bank). In 1765 he was paid £37 6s. 6d. for the monument of Sir Wyndham Knatchbull, which was erected in Mersham Church, Kent (Archives, Lord Brabourne).

The Dictionary of National Biography, in its short and sterile notice of Tyler, says that in sculpture "he displayed no great ability," an unjust criticism, for his busts are extremely well modelled and his monuments have great charm. Two good examples of these commemorate Lord Ashbrook, 1780, at Shellingford, Berks, and Saville Cust, 1772, in St. George's, Stamford. The design for the former, two cherubs draping an urn with a floral swag, was later copied by Nollekens; while the latter features an heroic urn of yellow and red breccia set in a white-marble curtained niche. The sculptor was apparently at one time in partnership with his former pupil, Robert Ashton, for they sign together monuments to Elizabeth Yorke, 1779, at Marchwiel, Flint; William Pym, 1788, at Sandy, Bedfordshire; and William Franks, 1790, in the parish church of Kentish Town. (See also Ashton, Robert.)

Tyler exhibited at the Society of Artists, 1760-1768, and at the Royal Academy, 1769-1786, showing a number of architectural designs and various busts, including one of Bishop Pearce (1777). He died in his house in Caroline Street, Bedford Square, on 6 September, 1801.

TYLEY, JAMES, and THOMAS, and Sons, of Bristol
Firm fl. 1792-1864

The "Tyley of Colerne" who signs a tablet at Corsham, Wiltshire, to John Leir, 1784, may be related to this Bristol family of staturies and masons, of whom the elder, Thomas, signs a tablet, with a relief of a mourning woman, to John Tucker, 1792, at St. Dogwell's, Pembroke.

A younger Thomas Tyley won a Silver Isis Medal in 1811 from the Society of Arts for a group entitled "Christ Healing the Sick." In 1830 he carved the dove on the pediment of Trinity Church, Clifton (Chilcott's Bristol, page 273), and in 1839 made a statue for Clifton of Sir Charles Wetherell (Gentleman's Magazine, 1846, Part II, page 430). Another member of this generation was
James Tyley the Younger, who was apprenticed to
John Dunn on 14 March, 1807.

The firm was still active in 1864, for in that
year it received a commission from Mr. R. A.
Kingslake for busts of Bishop Ken and the Rev.
Henry Byam for a proposed sculpture gallery of
British worthies (Builder, 1864, page 783).

Monuments and tablets executed by the Tyleys
are very frequent in the West Country, the best
being that to Major William Gore, 1814, in
Bristol Cathedral, which has a medallion portrait
between two figures of officers in full regimentals.
Their later works in the Cathedral are inferior by
comparison and include a tablet with a relief of a
dead child commemorating Georgiana Worrall,
1832, and the monuments of Elizabeth Cookson,
1852 (with a fantastic rococo frame), and John
Eagles, 1855 (with a medallion portrait).

UNWINS, T., of Liverpool

He exhibited at the Liverpool Academy in 1831,
showing a bust of Nathaniel Philips.
VALENTINE, J., of Birmingham
He exhibited a bust of the Rev. E. Dales at the Birmingham Society of Artists in 1829.

VALORY, —, of Rome
He carved the statue of Catherine, Lady Walpole (d. 1737), first wife of Sir Robert Walpole, the Prime Minister, which her son Horace erected in Westminster Abbey in 1754, although it had been executed some years previously. The pedestal of the statue was the work of J. M. Rysbrack (q.v.) (Letters of Horace Walpole, ed. Cunningham, Vol. I, page 3xxiv).

VAN DER HAGEN, —, of Shrewsbury
fl. 1767–1786
He was presumably the son of Alexander van der Hagen (q.v.) and about 1767 settled in Shrewsbury, where he soon succeeded in establishing himself as a monumental sculptor. His most important works (both with medallion portraits) commemorate Maria Lloyd, 1780, at Corwen, Merioneth, and William Vaughan, 1786, at Llanddwywe in the same county, while his large wall-monument to Richard Lyster (d. 1766) at Alderbury, Salop, is exactly like, and very nearly equal to, the work of Sir Henry Cheere (q.v.).

Other signed works by van der Hagen include those to Thomas Jenkins, 1767, in the Abbey Church, Shrewsbury; John Corser, 1770, in the parish church of Moreton Say, Salop, and Sir John Markham, 1778, in the churchyard; Mrs. Hanmer, c. 1770, and Owen Wynne, 1780, both at Overton, Flint; Margaret Vaughan, 1772, at Llanddwywe, Merioneth; Thomas Trevor, 1778, at Oswestry, Salop; and Lewis Nanney, 1779, at Dolgelley, Merioneth.

VAN DER HAGEN, ALEXANDER
d. c. 1775
According to Vertue (Walpole Society, Vol. III, page 135), van der Hagen worked for Rysbrack (q.v.) and “has done several head portraits in ivory very well, but not meeting with proper encouragement, did not continue.” In 1763 he received £63 for carving two figures in Hopton stone for Kedleston Hall, but apparently this was too much, for a note on the bill made by Robert Adam, the designer of the house, states that the amount should have been only £50 (Curzon Archives). In 1767 Lord Radnor paid him £7 for a bust of King Alfred (Longford Castle Archives).

Van der Hagen exhibited a marble bas-relief at the Free Society in 1766, and an ivory bust of the Duke of Cumberland in the following year. He seems to have fallen on hard times, for from 1769 until 1775 he received a small pension from the Royal Academy. In the latter year he presumably died and the payments were continued to his widow until her own death in 1781 (Royal Academy Archives).

VAN DER MEULEN,
JOHN FERDINAND
fl. 1765–1780
In 1765 he received a premium of fifty guineas from the Society of Arts for a bas-relief in marble of the “Supplication of Volumnia to her Son Coriolanus.” In 1767 he won a further premium of thirty guineas for a bas-relief in clay of “Abimelech Restoring Sarah to Abraham,” and exhibited both these works at the Society of Artists in the same year. In 1768 he sent in a model for the statue of Sir William Harpur to be erected at Bedford School, but was unsuccessful and the commission was given to B. Palmer (q.v.). (School Archives.)

Van der Meulen exhibited at the Free Society, 1767–1780, and at the Society of Artists, 1778–1780, showing a number of tablets for chimney-pieces, wax portraits, etc. His son exhibited marble busts and wax portraits at the Society of Artists and also at the Free Society between 1772 and 1780.

VAN DER MEULEN, LAURENS
b. 1645, d. 1719
He was a statuary of Malines who came over to England and worked under Grinling Gibbons. In the P.R.O. (Domestic Entry Book, Car. II, Vol. LI, page 77) is the “License to Forainers employed at Windsor to remaine here wth. out molestation” dated 16 November, 1678. Among the names mentioned are “Laurence Vandermulen and Antony Verhencce servants to Mr. Grinling Gibbons, the carver.” Another assistant of Gibbons was Dievot (q.v.) and, according to Vertue (Walpole Society, Vol. I, page 61), Van der Meulen was employed with him on the bronze statue of James II which had been ordered from their master.
Nothing further seems to be known of Van der Meulen's work in England and in 1691 he left the country for Mechelen.

VAN DER STEIN, JOHN
fl. 1678-1700

In 1678 he was working at Windsor Castle where he received £197 for carver's work for the Royal Throne; this included “Three large figures called Slaves, £90,” “a figure called Justice, £20,” and “two figures called Fame, £60.” He was also paid “for drawing and making of several designs, models and figures in clay for ye pedestall under His Majesty’s statue and for carving ye stone eagles that the brasse dyall is set upon” (Hope's Windsor Castle, Vol. I, page 318). In the P.R.O. (Domestic Entry Book, Car. II, Vol. LI, page 77) is the “License to Forainers employed at Windsor to remaine here wth. out molestation”—it is dated 16 November, 1678—among the names mentioned are “John Vanderstaine, stone-carver; John Oates and Arnold Luellan, his servants; and— Gocisen, his housekeeper.”

About 1692 van der Stein went to Oxford and was employed at the Physick Garden, where his work included in 1695 “cutting the Earle of Danby’s statue £7 12s.” (Vice-Chancellor's Accounts). In the previous year he had been paid £26 10s. for unidentified work in the same place (op. cit.). A year or so later he was at Queen's College, where he received £4 for the models of Aristotle and Plato and a similar sum for those of Socrates and Seneca. In 1694 he was paid for “fretwork in the New Library,” and about 1696 for carving the eight statues on the west front of the building, and also for “two eagles and eight keystones” (Archives, Queen's College).

VANGELDER,
PETER MATHIAS
b. 1739, d. 1809

He was born in Amsterdam, and as a young man came over to England where he entered the employment of Thomas Carter (q.v.). John Deare (q.v.), who later worked for Carter himself, wrote to his father in 1776 that “Vangelder who cut that large figure in our shop and is considered one of the best hands in London at foliace, was seven years in saving a thousand pounds by keeping men at work at his own house, while he got two guineas a week at Mr. Carter’s” (J. R. Smith's Nollekens and His Times, Vol. II, page 237).

It was not until 1769 that Vangelder attended the Royal Academy Schools, gaining a Silver Medal in the same year and winning the Gold Medal in 1771 for his bas-relief entitled “The Choice of Hercules.” In 1778 he was paid twenty guineas for a chimney-piece for the Drapers’ Hall (Company's Archives) and about the same time made two chimney-pieces for Sir John Rushout, who was at that time improving his family seat of Northwick Hall in Gloucestershire (Gentleman's Magazine, 1793, page 298).

From 1789 until 1792 Vangelder was working at the Fishmongers' Hall, receiving £296 for work which included four Portland stone capitals for the colonnade, £60; carving in wood the King's Arms over the Master's chair, £38; and “two boys holding two dolphins, £24” (Company's Archives). In 1794 he made a marble plaque for the library at Audley End (Essex Records, D/DBY A.225), and in 1800 was paid £370 for a chimney-piece for the Grocers' Hall (Company's Archives). In 1809 he made another chimney-piece, this time for the house of Mr. Coutts in Stratton Street, Piccadilly, but died in the same year and the money was paid to his Executors in 1810. As a contractor he built houses in Bedford Square (1781), Riding House Lane (1786) and Devonshire Place (1793) (Middlesex Building Affidavits).

Vangelder had a considerable practice as a statuary, his finest work being the tablet to Mrs. Frampton in Moreton Church, Dorset. This, with its lovely frame of wild and garden flowers, is one of the most enchanting works of art in any English church. Hutchins, in his History of Dorset (Vol. II, page 146), says that it is “esteemed by connoisseurs one of the completest pieces of sculpture in this Kingdom” and rightly remarks on the “exquisite art” of the carving.

A number of monuments carried out by Vangelder were designed by Robert Adam, the most magnificent being that to the Duchess of Montagu (d. 1771) at Warkton, Northants, which is really more like a stage set, with its background and semicircular apse. Others are to Major André in Westminster Abbey and Robert Child, 1782, at Heston, Middlesex. André was hanged as a spy in America in 1780, and his tomb bears a finely carved relief of Washington receiving the petition in which the prisoner vainly asked for a soldier's death; the Child monument has well-executed candelabra on either side of a pyramid.

Other signed works by Vangelder include those to the Rev. John Fulham, 1778, at Compton, Surrey; Henry Read, 1786, and Frances Read, 1801, both at Ramsbury, Wilt's; Mrs. Newland, 1786, at Havant, Hants; Lady Orde, 1796, at Hanwell, Middlesex; Henry Southby, 1797, at Buckland, Berks; Lord Northwick, 1800, at Blockley, Glos; John Fleming, 1802, at North Stoneham, Hants; Robert Davies, 1802, and Richard Puleston, 1804, both at Wrexham,

Vangelder died on 3 September, 1809, in Upper Norton Street (Gentleman’s Magazine, 1809, Part II, page 392). His widow survived him, dying on 6 March, 1814, at Upper George Street, Portman Square (ibid., 1814, Part II, page 414).

(Archives, Messrs. Coutts; authorities cited in text.)

**VANINA, or VANNINI, PETER**

_4th. 1761-1770_

In 1761 he made two “statues” (probably of plaster) for Trevor, Bishop of Durham. These were for the Bishop’s house at Glynde in Sussex, but they are now no longer in existence (Archives, Mr. Humphrey Brand of Glynde).

On 3 and 4 April, 1770, Mr. Christie held two sales of Vanina’s stock-in-trade at the latter’s house in Dover Street on the occasion “of his going abroad.” Among the lots sold were busts of Prior, Congreve, Milton, Raleigh and the Duke of Cumberland; equestrian statues of Louis XIV and William III; a relief of the “Virgin Mary Visiting St. Elizabeth” and “original statues” of Apollo, Venus de Medici, Mercury, Antinous, Brutus and Celeste. At a further sale on 3 July, 1770, Flaxman the Elder (q.v.) purchased a statue of Flora and busts of Venus and Tiberius (Archives, Messrs. Christie).

Also sold were statuettes of Rubens and Vandyck, which are probably copies of those by Rysbrack. Vanina certainly worked for that sculptor, as writing to Sir Edward Littleton in 1758 Rysbrack says that he has “Enquired of Mr. Vannini, the Caster in Plaster of Paris (Whom I Employ when I want) what the Expense of a Mould off of your Honours Bust, and each Cast out of it; it being a thing entirely out of my way” (Mrs. Esdaile—*The Art of Rysbrack in Terra-cotta*).

**VAN PENNEN, THEODORE**

In May, 1725, he made two statues for the Duke of Chandos’s house at Canons (Collins-Baker’s _The First Duke of Chandos_, page 142).

**VANPOOK, —, of Brussels**

He made the noble monument, with its magnificent relief, to Anne Petrie (d. 1787) in Lewisham Parish Church. This was sent over from Brussels about 1790 and was erected on the north side of the organ. The sculptor engaged to fix it in position was Thomas Banks (q.v.), who, five years later, was himself responsible for a companion monument to Mrs. Margaret Petrie, placed on the south side of the organ in the same church.

**VAN SPANGEN**

_4th. 1800-1828_

Van Spangen was a Dutchman who started a terra-cotta manufactory at Bow in competition with Coade and Sealy (q.v.). Here he made in 1801 statues of “Faith,” “Hope” and “Charity” for the Freemasons’ Charity School in St. George’s Fields, Southwark, the last-named for the top of the building, the others for niches in two of the sides (European Magazine, 1801, page 205).

The firm later became van Spangen, Powell and Co., and manufactured terra-cotta keystones, ornamental moulded panels, tombstones, statues, etc. It went out of business about 1828.

A van Spangen made the font (designed by Gibbs) for Dulwich College in 1729 (Young’s _History of Dulwich College_, Vol. II, page 346).

**VARDY, JOHN**

Vardy signed the tomb of Bishop Sherlock (d. 1761) in Fulham churchyard, which was visited by Cole, the antiquary, in 1764, shortly after its erection. Apparently it did not meet with his approval, for he described it as a “very clumsy and heavy altar-tomb of Portland stone and black marble on which is placed a most monstrous and awkward kind of sarcophagus, in no sort of taste or in the very worst” (Feret’s _Fulham Old and New_, Vol. I, page 297).

**VARDY, THOMAS**

_4th. 1755-1773_

In 1755 Vardy offered to do all the carving of the “Great Hall” of the Mansion House for £450, but his estimate was not accepted (City Corporation Records, Mansion House Building Accounts). In 1767 he carved two tablets for chimney-pieces for Hill Park, then being built for Lord Hillsborough by Henry Holland, the architect (Holland’s account-book, Soane Museum). He also made several chimney-pieces for Cobham Hall in Kent, including a very pretty one for the blue damask room in 1773 (Archives, Earl of Darnley).

**VASSALLI,** —

In 1723 Sir John Dutton paid “Sig. Vassali” £20 9s. for fourteen busts (Archives, Lord Sherborne). He is presumably the “Francis Vassalli” who was responsible for the plaster-work at Sutton Scarsdale, Derbyshire, in the following year.
VEALE, —, of Plympton St. Mary
He signs the monument to John Harrys, 1725, at Plymstock, Devon.

VEALE, JOHN RICHARD, of Plymouth
fl. 1747–1774
The most notable features of his large architectural monuments in every case are the elaborate and well-carved shield and coat of arms at the base. Signed examples of his work commemorate Adrian Swete, 1747, at Ermington, Devon; John Clarke, 1749, at St. Dominick, Cornwall; and Thomas Saltern, 1753, at Parkham, Devon.

VERE, WILLIAM, of Stratford-by-Bow
fl. 1775–1790
Son of Thomas Vere, a corn-factor of Barking, he was apprenticed to Thomas Vidgeon in 1762 and became free in 1775. Ten years later he was appointed Steward of the Masons' Company, but asked to be allowed to refuse the office as he had met with an accident and had hurt his leg. The Court, however, would not accept this excuse and ordered their Clerk to write “peremptorily to him to attend.”
Vere signs a large monument to Samuel Freke, 1790, at Henham, Essex. This work is 12 ft. high and consists of a pyramid, in front of which stands a large urn with a well-carved relief of an East Indiaman in full sail.

VERNON, JOHN
In 1713 the Earl of Strafford paid Vernon for carving a pair of stone griffins. No place is mentioned, but it seems almost certain that these were intended for Wentworth Woodhouse (British Museum, Ad. MS. 22,257).

VERSCHAFFEN, or VERSCHAFFELT, —
fl. 1765–1767
He was described as “Chief Sculptor to His Serene Highness the Elector Palatine” when, in 1765, he exhibited a large marble relief at the Free Society. Two years later Lord Rockingham paid him £52 for busts of Homer and Mithridates (Archives, Wentworth Woodhouse).

VICK, —
fl. 1807–1825
He signs tablets in Herefordshire, both with well-carved details, to Lacon Lambe, 1807, at Dilwyn, and to Thomas Woodward, 1822, at Ledbury.

VIDLER, JOHN, of Battle
There was a family of this name who, for several generations, were the leading masons in Battle, Sussex. In 1780 John Vidler was paid £300 for building the Webster family vault in Battle churchyard. He was succeeded by his son, Thomas, who, between 1811 and 1818, was responsible for all the alterations and additions to Battle Abbey, and also in 1817 for building the stables. Vidler was paid £1,950 by Sir Godfrey Webster in the first year or two, but after that found it impossible to extract any more money from his patron; as late as 1827 he was writing to the Webster lawyer in London trying to get his claim settled. Vidler appears also to have been an architect, as in the same letter he stresses that his claim on Sir Godfrey also included “superintending the whole of the works at Battle Abbey from the year 1812 and drawing all plans and working drawings.” Vidler was succeeded by his son, John (Archives, Mrs. Harbord of Battle Abbey). In 1775 “Messrs. Inskip and Vidler” repaired the House of Correction at Battle, Sussex (County Archives, Lewes).

VIDLER, JOHN, of Westminster
fl. 1796–1804
He was variously employed at Richmond Palace in 1796, and also carved the capitals of the piers for the gateway into the Botanic Gardens. In 1804 he claimed £1,255 for work carried out at the White Lodge, Richmond (P.R.O., Works, 19.25/9).
He may be the same “Vidler” who signs the very pretty monument, with a medallion portrait of William Lowndes (d. 1775), at Astwood, Bucks.

VIDLER, MAJOR, of Hastings
fl. 1823–1839
He signs a series of rather dull tablets, all of which are in Sussex, to Edmund Cartwright, 1823, at Battle; Elizabeth Barnoun, 1826, in All Saints', Hastings; and Richard Greenland, 1839, at Winchelsea.

VIERPYL, SIMON
b. c. 1725, d. 1810
Vierpyl was born in London and, after studying under Peter Scheemakers (q.v.), went to Rome about 1750. Here he met Lord Charlemont, who employed him to make copies of the antique statues in the art galleries and private collections of the city, while for the Rev. Edward Murphy,
Charlemont’s tutor and travelling-companion, he made in terra-cotta twenty-two statues and seventy-eight busts of Roman emperors. About 1774 Murphy wrote to Vierpyl, asking various questions about the value, etc., of these works. The sculptor, in his reply, asserted that he was “certain that no eminent artist will hereafter stand four years, winter and summer, as I have done, in the chilling Capitoline museum to model so many busts and statues with his own hand.” A later Lord Charlemont afterwards presented this series to the Royal Irish Academy in 1868.

Vierpyl, after his first patron had left Rome, still continued to work for him, and also executed commissions for Lord Huntingdon and Lord Brudenell, carving for the latter a bust of Pythagoras.

In 1756 he went to Ireland and was again employed by Lord Charlemont, this time on the decoration of the Casino for the latter’s seat, “Marino,” designed by Sir William Chambers. A statue of a “Dying Gladiator” by Vierpyl is, or was, at Wilton (Kennedy’s Description of Wilton, 1769, page 38); for a list of his other works in Ireland, see Strickland’s Dictionary of Irish Artists. (Historical Manuscripts Commission, Earl of Charlemont, Vol. I.)

VINE, JAMES, and THOMAS

Thomas: b. 1788, d. 1840
James: b. 1798, d. 1831

They were the sons of “Mr. Vine, of Bury, mason,” who died in 1827 at the age of seventy; together they sign the monument to Sir Thomas Cullum, 1830, in Hawstead Parish Church, Suffolk. (Their obituaries are noted in the Bury Post.)

VINER, C., of Bath
fl. 1780-1806

His monuments, although quite well carried out, are not particularly interesting, the best being that commemorating Lady Dundonald, 1779, at Weston, Somerset, which is a large work in coloured marbles.

Other signed tablets in Somerset executed by Viner include those to Robert Coe, 1788, at Walcot, Bath; Theophilus Ponting, 1791, at Norton St. Philip; Charlotte Wicker, 1795, at Weston; and John Taylor, 1806, at Newton St. Loe.

In the Throckmorton archives at Coughton Court is the diary of Sir Charles Throckmorton which contains the following entry: “14 April, 1795. Agreed with Mr. Viner, of Morford Street, Bath, to erect a marble monument in the Abbey Church of Bath to the memory of Mr. Metcalfe according to the draught given in, for £15.” (Country Life, 25 May, 1951.)

VOUSDEN, SAMUEL,
of Clapham
fl. 1827-1838

He signs a few Hellenic tablets, of which the three best (all in Greater London) are those to William Charrington, 1832, and Thomas Withington, 1838, both in Streatham Parish Church; and Katherine Cancellor, 1823, in St. Matthew’s, Brixton.

VOYEZ, JOHN
fl. 1765-1773

In 1768 Voyez was offered employment by Wedgwood, who apparently had great hopes of him, for he wrote to his partner, Bentley, that he had “hired a modeller for three years, the best I am told in London. He served his time with a silversmith, has worked several years at a china works, has been two or three years carving in wood and marble for Mr. Adam the famous architect, is a perfect master of the antique style in ornaments, vases, etc., and works with equal facility in clay, wax, wood or stone.”

Wedgwood treated Voyez extremely well, paying his debts in London and transporting him and his wife to Burslem. Voyez, indeed, seemed sensible of this, for when he wrote to Wedgwood’s London agent, Mr. Cox, on 19 August, 1768, he spoke of “Mr. Wedgwood’s exceeding genteel behaviour to me, who, on my arrival here, entertained us in his own house until our house was gotten ready which was by the usuall diligence or rather delays of joiner Show kept back longer than it otherwise might have been.”

In spite of this good beginning, Voyez was in trouble in less than a year and was sentenced to three months’ imprisonment at the Stafford Assizes. Even then Wedgwood was not free of him, for he later set up as a modeller of inferior seals and cameos, which he sold as from the Wedgwood factory, even going so far as to forge the name of the firm on the back of his productions. Cox, writing to Bentley in June, 1769, indignantly informs him that “I have not seen Mr. Voyez and have desired our people to keep him out of here if he should dare to call when I am out.”

Voyez exhibited intaglios, etc., at the Free Society in 1772, when he described himself as “a carver and manufacturer of composition at Cowbridge, near Newcastle, Stafs.” A number of his works are in the Bristol Art Gallery.

(Wedgwood Archives.)
WADDILOVE, T.
He signs a large wall-tablet with an “Adam” urn and well-carved detail, to Martha Tate, 1795, at Mitcham, Surrey.

WADE, JOSEPH
fl. 1726–1740
From 1726 until 1728 he was in partnership with Bartholomew Chichley (q.v.), and in the following year was employed on his own at Greenwich Palace, receiving £101 for decorative work on the South Pavilion of Queen Anne’s Court. This sum included £8 a face for Corinthian capitals; £21 10s. for forty-three “Modillions”; and £3 each for two scrolls, carved to a depth of 2 ft. (P.R.O., Ad. 68/708).
A John Wade was the carver of the doorway of St. Michael’s Church, Cornhill, in 1717.

WAKE, J. HALL
He acted as foreman to Henry Wood (q.v.) and in 1792 was working at Woburn, where he was paid £100 for stone-carving (Woburn Archives).

WALDIN, or WALLDIN, SAMUEL, of Winchester
b. c. 1730, d. 1804
He was the son of Samuel Waldin, a farmer of Winchester, and was apprenticed to John Blake in 1744, although he did not trouble to take up his freedom until thirty years later. In 1781 he was employed on repair work at Winchester Palace, and he also signs the monument of Robert Eyre (d. 1770) in the Cathedral.
On Waldin’s death his son, Samuel Waldin the Younger, took over the business (Monthly Magazine, 1804, Part II, page 370).

WALKER, —, of Kendal
fl. 1825–1841
He signs a large tablet with a relief of “Hope” to Thomas Parkin, 1825, at Ecclesfield, Yorks, and another, with a relief of mourning soldiers, to Captain Considine, 1841, in Chester Cathedral.
The monument of Nathaniel Bowen (d. 1839) in St. Michael’s Church, Charleston, South Carolina, is signed “Walker” and is said to be the work of an English statuary.

WALKER, A. E.
He exhibited a medallic portrait at the Royal Academy in 1830. In 1841 a Mrs. Theresa Snell Walker showed at the Academy two models of Australian subjects.

WALKER, R., of Bristol
fl. 1830–1836
He signs an ambitious monument to Lucy Palmer, 1834, at Brixton, Devon, which has a life-size figure of a woman kneeling by an urn. The tablet at Cold Ashton, Glos, to Elizabeth Kater, 1835, is also his work.
An “R. Walker” of Bath signs the monument to John Rundall, 1852, in St. Mary’s Church, Madras.

WALLIS, JAMES, of Newark
b. 1748, d. 1824
He was apprenticed to Christopher Staveley (q.v.) in 1761, and later set up for himself as an “architect and marble and stone-mason” in Newark. His monuments and tablets are neat and pleasant works, mostly in coloured marbles, the best being that to Richard Fydel, 1780, in Boston Parish Church, Lincolnshire, which has a medallion portrait. Other signed works by him in Nottinghamshire commemorate Thomas and Mary Kelham, c. 1770, at Great Gonerby; Gilbert Charlton, c. 1770, at Staunton-in-the-Vale; Joseph Sykes, 1778, at Balderton; the Rev. John Ferrand, 1779, at Messingham; Francis Foss, 1792, at Everton; the Rev. Thomas Wakefield, 1798, at East Stoke; and Margaret Spragg, 1803, and Thomas Spragg, 1814, both in Newark Parish Church. The monument to the Rev. B. Clarkham, 1798, at Sleeford, Lincs, is also his work.
Wallis later went into partnership with R. Marshall and together they sign tablets to George Smith, 1806, at Fulbeck, Lincs; Elizabeth Withers, 1817, at Barnby, Notts; Mary Boucher, 1819, at Coddington, Notts; and William Underwood, 1820, at Melton Mowbray, Leics. On Wallis’s death on 6 January, 1824, his partner erected a large tomb to his memory in Newark churchyard; he also carried on the business, and signs wall-tablets to Slingsby Duncombe, 1831, at Langford, Notts, and James and Mary Dyson, 1843, in Newark Parish Church.
WALLIS, JOHN
fl. 1789-1791

As a mason and stone-carver he was employed at Carlton House from 1789 until 1790 (P.R.O., H.O. 73/24). In the following year he received £89 for marble chimney-pieces for some of the bedrooms at Woburn Abbey (Bedford Archives).

WALMSLEY, JOHN, of Liverpool

He signs a tablet to John Plumb, 1796, at Aughton, Lancs. His yard was in Berry Street.

WALSH and DUNBAR, of Leeds
Firm fl. 1816-1840

The firm produced heavy, unexciting monuments and tablets at their yard in Park Row, the best being those to Charles Brackenbury, 1816, at Scremby, Lincs; John Allcock, 1824, at South Kirby, Yorks; Anne Lindley, 1825, at Whitkirk, Yorks; Sir John Beckett, 1826, at Torrington, Lincs; and John Ramsden, 1836, at Brotherton, Yorks.

There was also a firm in Leeds named "Walsh and Lee" which flourished 1830-1860, and had a yard in Waterloo Road. Their best works (all in Yorkshire) include a large Gothic monument to Sir John Ramsden, Bart., 1839, at Brotherton; tablets to John Stanley, 1844, and Thomas Pearson Crossland, 1845, both in Huddersfield Parish Church; and a Hellenic wall-monument to John Wilkinson, 1850, at Barwick-in-Elmet. They were also responsible for the Crimean War memorial in Leeds Parish Church.

WALSH, JOHN
fl. 1757-1778

He was an apprentice and pupil of T. Carter (q.v.), and in 1775, when living in South Street, Berkeley Square, became free of the Masons' Company by redemption. In 1757 he exhibited a model (based on a work by Scheemakers) of a "Dying Gladiator" at the Society of Arts and showed it again four years later at the Free Society. Also in 1761 he received a premium of five guineas from the Society of Arts for a model in clay copied from a cast in the Duke of Richmond's Gallery.

Walsh later set up for himself as a carver of chimney-pieces and was apparently employed by a Mr. Errington, whose new house at Hexham in Northumberland was designed by Sir William Chambers. The latter, writing to Errington about the interior decoration in 1762, says that he believes "Mr. Walsh's proposals about the chimney-pieces are reasonable and if he will send me the size of the tablet, I will make a drawing. In a day or two I shall have the drawings done for your other two chimney-pieces, and I will send for Mr. Walsh to hear his proposals. I think he will execute them very well" (British Museum, Ad. MS. 41133). In 1764 Trevor, Bishop of Durham paid Walsh £26 for carving his coat of arms in Portland stone. This was placed on the exterior of the Chapel at Glynde, Sussex, which had been designed by Sir Thomas Robinson in the same year. (Archives, Brand of Glynde.)

Walsh signs a number of architectural monuments of some importance, the best being that commemorating Sir Thomas Robinson (the architect already mentioned) and his wife, the Dowager Lady Lechmere. This was erected in Westminster Abbey about 1778 and has two portrait-busts. Other signed monuments by Walsh include those to Thomas Amphlett, 1763, at Enville, Staffs; Joseph Percival, 1764, in St. Michael's, Bristol; Sir Ralph Asheton, 1765, at Middleton, Lancs; Henry, Earl of Stamford, 1768, at Enville, Staffs; Pratt Mawbey, 1770, at Chertsey, Surrey; Sir John Rous, 1771, at Wangford, Suffolk; and Stephen Soame, 1771, at Little Thurlow, Suffolk. The last-named has a portrait-medallion of Mrs. Soame and her child.

WALSHA, GEORGE,
of Wakefield
fl. 1814-1818

He signs a number of tablets in Yorkshire, the best being those commemorating George Clerk, 1814, at Barnsley, and Thomas Cotton, 1816, at Darton.

WALTERS, RICHARD
fl. 1690-1701

In 1691 Walters, together with his partners, Thomas Hill (q.v.) and John Thompson (q.v.), received £2,321 for various works which they had carried out at Kensington Palace. This included ninety-six chimney-pieces in Portland stone, and twenty-five chimney-pieces, three tables and "a cisterne," all in marble (Wren Society's Publications, Vol. VII, page 177).

In 1701 Walters was paid £14 for another marble chimney-piece, this time for "my Lord's bedchamber" at Powys House (P.R.O., Works 5/51).

WALTON, FREDERICK,
of Staines
b. 1799, d. 1834

Two monumental works by Walton in Surrey.
are the large wall-tablet to Henry Wood, 1827, at Chertsey and a square Hellenistic tomb with an urn to Alexander Urquhart, 1829, in Long Ditton churchyard.

Walton himself is buried in the churchyard of Kingston-upon-Thames under a tomb of his own design, for the inscription states that beneath it lies "Frederick Walton, by whom this tomb was composed and erected." His wife, Charlotte, survived him and died in 1839.

WARD, ROBERT, of Liverpool
fl. 1827–1829
He was living in Harford Street when in 1827 he exhibited busts of William Huskisson and General Gascoyne at the Liverpool Academy. Two years later he showed busts of Dr. Birkbeck and the Rev. E. Hull.

WARD, W., of Scarborough
He signs a wall-tablet to E. Musham, 1820, at Burton Agnes, Yorkshire.

WARREN, JOSIAH, of Southampton
fl. 1808–1828
Warren seems to have started business in Southampton, but later moved to Wareham, in Dorset, where he signs a tablet to John Card, 1822. He signs others to Eliza Stewart, 1808, at North Stoneham, Hants, and Sarah Wilt, 1814, at East Stoke, Dorset.

WARREN, WILLIAM, of Hitchin
fl. 1790–1828
In 1826 he was employed by Countess de Grey at Wrest Park in Bedfordshire, where he received £90 for repairing the statues and £75 for carving and erecting the stone piers for the gates. Two years later he made vases, columns and statues in Portland stone for the Bowling Green House in the garden (Wrest Archives).

Warren signs a large wall-tablet to the Wilshire family, c. 1790, at Welwyn, Herts, and another with a sculptured urn to Catherine Price, 1820, at Knebworth in the same county.

WATERWORTH, THOMAS, the Elder, and THOMAS, the Younger, of Doncaster
Thomas, the Elder, b. 1753, d. 1829
Thomas, the Younger, b. 1788, d. 1835

Thomas, the Elder, was the son of Thomas Waterworth of Sutton-on-Derwent who had married in 1740 Rebecca Whittal and who had died in 1755, aged 54, and was buried at Hemingborough, Yorks.

The elder Waterworth was responsible for all the decorative stone-carving of the mausoleum which was erected in 1788 at Wentworth Woodhouse by Lord Rockingham (Fitzwilliam Archives). He also signs a monument, with a portrait-bust, to William Dixon, 1783, at Loversall, Yorks, and another to the Rev. John Simpson, 1784, at Babworth, Notts.

It is presumably the younger Waterworth who signs the monument at Tuxford, Notts, to Captain Charles White, 1814, which has a relief of the graves of the Captain and his brother-officers at Bayonne.

The firm is also responsible for a tablet to John Jarrett, 1800, at Bradford, Yorks, and for the monument commemorating Lord Effingham, 1816, at Rotherham, in the same county. The elder Waterworth married Harriet, daughter of Christopher Richardson (q.v.), who may well have been his master; she had been previously married to Christopher Theakston (q.v.). The younger Waterworth died 21 December, 1835, aged 47, and was buried at Doncaster. His widow died 11 September, 1837, aged 42.

(Doncaster Corporation Archives.)

WATKINS, HENRY, of Newport
fl. 1835–1832
At the Great Exhibition of 1851 he showed a marble group entitled "The Death of Llewlyn, the last Prince of Wales." The large wall-tablet to Martha Davies, 1838, in Newport Church, Monmouthshire, is also his work.

Watkins either died or left Newport in 1852, for his name ceases to appear in local directories after that date.

WATKINS, JOHN, of Ringwood
fl. 1801–1812
He signs the architectural monument about 8 ft. high to James Mowbray, 1801, in Ringwood Church, Hampshire. This, with its "Adam" urn and gadrooned base, is an extremely competent piece of carving for a local craftsman. Watkins is also responsible for the circular wall-tablet to the Hackman family, 1811, in the same church.

WATKINS, JOHN
He was presumably a local carver and signs a tablet to Catherine and James Davies, 1780, at Lyonshall, Herefordshire.
WATSON, HENRY
b. 1714, d. 1786

He was born at Heanor, Derbyshire, and according to Glover (Derbyshire, Vol. II, page 260) was the son of Samuel Watson (q.v.), although Francis Thompson (History of Chatsworth, page 115) suggests that he was the elder Watson's grandson or great-nephew. I am, however, inclined to agree with Glover, whose information came from White Watson (q.v.), the last member of the family.

In 1749 Henry Watson was working at Welbeck Abbey, where he made a marble chimney-piece, costing £65 10s., for the "North-East Room" (Portland Archives). In 1779 he laid the tessellated floor of black-and-white marble squares in the Painted Hall at Chatsworth (Francis Thompson, op. cit., page 115).

At Welbeck, Chatsworth, and the Derby County Library are a number of Watson's original drawings for monuments and other works, with brief notes in his own handwriting. The monumental drawings include a cartouche tablet for a Mr. Turnbull to be erected in Bedworth Church, dated 1733 (I have been unable to identify this village); a monument, dated 1736, at Didsbury, near Manchester, apparently commemorating Sir John Bland; and another undated one to a "Mr. Murgatroyd" in Dewsbury Church; also a tablet, dated 1740, to be erected at Wakefield to a "Mr. Fairfax"; and a sketch of an undated monument to "Mr. Bagshaw's family in Norton Church."

A design, dated 1738, for a carved wooden chimney-piece with a pediment is annotated: "This design was made by Mr. Leoni, the ornaments I performed in wood for Peter Bold, Esq.," and there are other sketches of vases carried out in "blue John" for "Mrs. Legge of Grindle-smith Gate, Nottingham."

WATSON, JAMES, the Elder, and JAMES, the Younger, of Norwich
Firm fl. 1793–1851

The elder Watson's tablets are quite well carved, but in no way outstanding, the best being those to Elizabeth Clarke, 1793, and Peter Stoughton, 1805, both at East Dereham, Norfolk.

The firm was later carried on by James Watson the Younger, whose work is competent. His tablets in Norwich include those to the Rev. John Warren, 1824, at Tacolneston; Thomas Talbot, 1832, at Wymondham; George Smith, 1841, at Mattishall; Samuel Stone, 1848, in St. Andrew's, Norwich; and Lord Berners, 1851, at Ashwell-thorpe. He also signs a tablet to the Rev. Bartholo-

mew Riston, 1835, in Lowestoft Parish Church, Suffolk.

Watson's wife, Susan, died in 1830.

WATSON, JOHN
fl. 1808–1829

He did a considerable amount of work at the Royal Palace at Greenwich, building the "New Helpless Ward" in 1808 and the Infirmary four years later. Here he was responsible for all the carved stonework and the marble chimney-pieces, including one of "veined marble" costing £20 16s., and another of "black marble" at £16 4s. Between 1812 and 1814 he completed the west front of King Charles's Building, and in 1815 received £7,000 for "new offices, eastward of Greenwich Palace."

In 1825 Watson built the Out Pension Office at St. Mary Axe, and in 1828–1829 the Royal Hospital Schools at Greenwich. (P.R.O., Ad. 882–Ad. 887.)

WATSON,
MUSGRAVE LEWTHWAITE
b. 1804, d. 1847

He was born on 24 January, 1804, near Carlisle, and was educated at the village school. From an early age he showed artistic talent, carving in wood and engraving on metal; indeed, he wished to take up art as a profession, but his father decided that he should practise law and articulated him to a solicitor in Carlisle. Here Watson remained for two years, but fortunately his employer, a Major Mounsey, had a good collection of pictures and the young man was given every opportunity to study them, so that his time was not entirely wasted.

On the death of his father in 1823 Watson left Carlisle and went to London, where he sought the advice of Flaxman. On the latter’s recommendation he entered the Royal Academy Schools and at the same time became a pupil of R. Sievier (q.v.). This arrangement did not last long, for Watson soon set out for Italy (again acting on Flaxman’s advice) and remained there for three years.

In 1828 he returned to London and then revisited Carlisle, where he carved a bust of the naturalist, J. Heysham, which was shown in the same year at the Carlisle Exhibition of Painting and Sculpture. However, he was soon back in London and took a studio near the British Museum. Here he produced various poetical works, including compositions from Homer, Chaucer and Spenser.

In 1833 Sir Francis Chantrey (q.v.) engaged
Watson as a modeller and employed him on the monument of Mrs. Digby which was later erected in Worcester Cathedral. The association did not last, for Watson very soon asked for a rise in wages and left when his request was refused, in spite of the fact that Allan Cunningham, who superintended Chantrey's studio, had given it his support.

Watson next worked for W. Behnes (q.v.) and E. H. Baily (q.v.), modelling for the former the figure (but not the head) of the statue of Dr. Babington for St. Paul's Cathedral. About this time he was also employed by W. Croggan (q.v.) at the terra-cotta works at Lambeth. Here he designed and modelled friezes for the Wyndham family, statues of "Aesculapius" and "Hygeia" for a hall in Liverpool, and groups for Dublin.

By 1842 he was more or less independent and working on his own account, and in that year carved the frieze on the façade of Moxhay's "Hall of Commerce" in Threadneedle Street. Shortly afterwards he received the commission for what was to prove his greatest work, the colossal group of the brothers, Lord Eldon and Lord Stowell. The second Lord Eldon had originally intended to entrust the work to Chantrey, but after the latter's death was persuaded by Allan Cunningham to allow Watson to model it. The sculptor soon had a number of orders for other works, so the group was not finished when he died and it was left to his pupil and friend, G. Nelson (q.v.), assisted by Charles Summers (q.v.), to complete it. It is now in the Library of University College, Oxford, and is undoubtedly one of the most important portrait groups of the nineteenth century.

In 1844 Watson exhibited a relief of "Death and Sleep Bearing off the Body of Sarpedon," at the Royal Academy. This was acclaimed by all the art critics of the time, and from contemporary engravings appears to have been a work of great beauty. Among his other works were statues of Flaxman (1843), for University College, London; Queen Elizabeth (1844), for the Royal Exchange; the Earl of Lonsdale (1845) and Major Aglionby (1845), both for Carlisle; and "Hebe" and "Iris" (1847), for the gates at Bowood. His terra-cotta relief entitled "Little Children Come Unto Me" was executed in 1845 for Little Holland House, and two years later he made the font for Ryde Church in the Isle of Wight. The bronze relief of the Battle of St. Vincent, at the base of the Nelson Column in Trafalgar Square, was unfinished at the time of his death. His four monuments are those of his friend, Allan Cunningham, 1843, one in Kensal Green Cemetery and another in St. Michael's, Dumfries; the Rev. W. Fletcher (with a bust), 1847, at Dalston, Cumberland; and Dr. Cameron, 1847, in the Chapel Royal, Savoy; the last-named was, however, destroyed by fire in 1864.

Watson died of heart disease at his home, 13, Upper Gloucester Place, on 28 October, 1847, and was buried in Highgate cemetery. Had he lived he would assuredly have been one of the greater sculptors of the nineteenth century. In Carlisle Cathedral is a tablet to his memory with a portrait relief and the inscription that he was "second son of Thomas Watson of the Bogs Sebergham." The epitaph ends: "The elegance, simplicity and purity of his works are sufficient to impose all that by his death, art has lost one of her most gifted exponents."

He appears, in his biography by Lonsdale, to have been temperamental and difficult to deal with, quarrelling with his patrons and employers and "wanting in equanimity"; one day falling "the victim of doubts, depressions and despondency," the next rising "with hopes and lofty aspirations." Nor, according to the same author, were "his domestic arrangements of a nature to give him a place in society," for he lived "with a young female, the daughter of a publican in Carlisle, but never married her."

On 14 September, 1848, a sale of sketches, casts, etc., was held in Watson's studio. Shortly before his death the sculptor had apparently destroyed a number of works which did not satisfy him, but among the lots sold were two sketches in plaster of Sir David Wilkie and "A Study of the Mother of Lord Brougham," neither of which seems ever to have been carved in marble.

Eight years after Watson's death an open letter on the selection of artists for public monuments was addressed to Sir Benjamin Hall, Chief Commissioner of Works, and signed by all the leading British sculptors of the time. This contained the following paragraph: "A sculptor of the name of Watson recently died. He was an industrious artist, and a competitor for most of the public monuments erected in his day. He never attained a commission, but the rejected models which he exhibited on such occasions are now sought for with avidity and studied by living artists."

(Lonsdale's Life of Watson; Art Union, 1848, page 27; Art Journal, 1856, page 379.)

WATSON, R., of Dartford
f. 1802–1822

His best work is the large wall-tablet to George Sharp, 1810, at Stone, Kent, which has a relief of a wreathed urn on a column; another tablet in the same church, to Thomas Heathcote, 1802, has good details and a coat of arms engraved on brass.
Other signed works by Watson commemorate Enoch Holden, 1809, at Crayford, Kent; and Lady Gordon, 1811, and Miss Pritchard, 1818, both at West Tilbury, Essex.

**WATSON, SAMUEL**

b. 1663, d. 1715

He was born at Heanor in Derbyshire and, according to a statement made by his grandson, White Watson (q.v.), to the Rev. Daniel Lysons early in the last century, was "a pupil of Charles Oakey, carver, in the parish of St. Martin's in the fields" (Lysons's *Derbyshire*, page 153).

Watson is chiefly remembered for the immense amount of work he did at Chatsworth, for he first went there when he was twenty-six and was still doing carving for the house at his death in 1715. In 1698 he received £20 for two large festoons and for carving two pedestals in the garden, while a year later his bill was for "carving basons in Willow Tree grove, two vauses on ye peers at ye bird-house and carving two dragons."

Also among the Chatsworth Archives is the agreement between Watson and the Earl of Devonshire for stone-carving on the west front of the house. This is dated 2 September, 1701, and stipulates that he is to receive £4 10s. for each column capital and £3 for each pilaster capital; £4 each for the ornaments over the windows; £1 each for "serpents in a twisted knot"; and 12s. a head for "lyons heads in the cornish." In the same year he was paid for fourteen mask-heads in the terrace wall; for "two flower pots set upon ye two peers going to ye bowling-green"; and for eight urns for the Hall front.

Other works carried out by Watson at Chatsworth include the cornice, doorcase and niches on the west staircase, the coat of arms on the west front (for which he received £55 in 1704), and "ten terms in the garden" in 1711.

In 1706 he wrote to Thomas Coke, of Melbourne Hall, Derbyshire: "I have according to your order sent you two designs of vases, which I take to be something after ye manner your worship spoke of att Melborn; but if you would have any alteration in either of them as to cartouches instead of festoons or in any other part, be pleased to give me your directions which shall be observed to my uttermost power" (Archives, Marquess of Lothian). There are still in the gardens of Melbourne a number of stone vases which could be the work of Watson.

Watson even found time to execute a number of monuments, and in the Chatsworth Archives is a payment of £17 made to him in 1698 for "cutting a monument in alabaster for His Grace the Duke of Newcastle," while a book containing original drawings and sketches for monuments, etc., made by him and his family is now in the library of the Derby County Council. It is not possible to identify the majority of these sketches with complete certainty, but one is undoubtedly the preliminary drawing for the monument at Tamworth, Staffordshire, which commemorates John Ferrers and his son Humphrey. This is an interesting discovery, for the monument with its kneeling baroque figures is one of the most dramatic in England.

Watson died on 31 March, 1715, and was buried at Heanor, where the epitaph on his monument reads:

"Watson is gone, whose skilful art display'd
To the very life whatever nature made.
View but his wonderous works on
Chatsworth Hall
Which are so gaz'd at and admir'd by all."

**WATSON, WHITE**

b. 1760, d. 1835

Grandson of Samuel (q.v.) and nephew of Henry Watson (q.v.), he carved the Manners coat of arms in Hopton stone, which was formerly in front of the Rutland Arms Inn at Bakewell. In 1792 he made the font and, a year later, a sundial, for Bakewell Church.

Watson's most important monumental work is the semi-Corinthian column, 15 ft. high, with a central inscription-tablet in the form of a parchment, which commemorates Sir Sitwell Sitwell, 1811, in Eckington Church, Derby. Signed tablets by him in the same county include those to Richard Roe, 1795, and the Rev. Richard Chapman, 1816, both at Bakewell; John Sutton, 1803, at Heanor; and Emma Sambell, 1821, at Bradley. He also signs others to Richard Jackson, 1799, at Sandbach, Cheshire; Frances Kirkby, 1823, at Broadwater, Sussex, and Thomas Rawson, 1826, at Ecclesfield, Yorks.

**WAUDBY, JOHN**, of Hull

fl. 1830-1850

His tablets are mostly heavy and clumsy works in the Hellenic manner. The best (all in Yorkshire) are those to Joseph Egginton, 1830, at Kirk Ella; Henry Bell, 1839, at Eastrington; Charlotte Willoughby, 1845, and Henry Willoughby, 1849, both at Birdsall; and Robert Dunn, 1847, at Howden.
R. J. WYATT
Part of the monument of Ellen Legh, 1831, Winwick, Lancashire.
JOSEPH WILTON
Admiral Holmes, 1761, Westminster Abbey.
WEALD, WILLIAM, of Wolverhampton

He signs a small monument, with a well-carved relief of an angel leading a woman to heaven, to Sarah Riley, 1835, at Bilston, Staffordshire.

WEARING, JOHN, of London

He was a London mason employed at Chatsworth, where in 1699 he was paid £20 "in part for mason's worke done in finishing the marble fountaine and stairs," and £55 "for finishing the staircase in the west court and fountaine in the inner court and steps in the gatehouse" (Chatsworth Archives).

WEBB, EDWARD WILLIAM

b. 1811

He attended the Royal Academy Schools in 1829 and won a Silver Medal four years later. An "R. D. Webb," of 12, Charles Street, was awarded a Silver Palette by the Society of Arts for figures in 1826 and a Silver Isis Medal in 1827. Neither of these artists seems to have exhibited at the Academy, nor is any further trace of them to be found.

WEBB, T.

fl. 1776–1786

Webb, who was presumably a local statuary, signs two monuments in Tetbury Church, Gloucestershire. The first, with a marble portrait-bust, commemorates Sir William Romney (d. 1611), and was erected c. 1776, while the second, to Joseph Wickes (d. 1786), has an urn and a draped pyramid.

WEBBER, HENRY

b. 1754, d. 1826

He was born in July, 1754, the son of Abraham Webber, a Swiss sculptor, who had settled in England at the age of twenty-four and married an Englishwoman named Maria Quandt.

Henry Webber, who was a pupil of J. Bacon the Elder (q.v.), attended the Royal Academy Schools in 1772 and won a Silver Medal two years later. In 1776 he was awarded the Gold Medal by a unanimous vote for a relief of "The Judgment of Midas," a work now in the Soane Museum (Royal Academy Archives).

In 1784 Sir Joshua Reynolds and Sir William Chambers recommended Webber to Wedgwood, with whom he signed a seven-year contract on 17 January, 1785, and who appointed him head of the ornamental department at Etruria. In a letter he wrote to Byerley, Wedgwood's London agent, in 1786, Webber tells him that he "left London, as it is said many people do England, in too great a hurry even to pay their debts." He modelled a number of reliefs, vases, chimney-pieces for Wedgwood, and in 1787 the firm sent him to Rome to make drawings of the works of art in the Capitoline Museum, the terms of their agreement making it clear that Webber was there "for the purpose of making models, drawings and other improvements in the art of modelling and designing for the benefit of the said Josiah Wedgwood." He later travelled home via Switzerland and Paris with his employer's eldest son, who had also been in Rome at that time.

On his return to England in 1789 Webber was employed on the Barberini, or Portland, vase and also modelled bas-reliefs from the sketches he had made while in Italy. Although he only seems to have been paid twelve guineas a month, he nevertheless remained at Etruria until Wedgwood's death.

In 1795, on the sudden death of J. Hickey (q.v.), the sculptor originally chosen for the work, Webber was given the commission for the monument to David Garrick to be erected in Westminster Abbey. This was unveiled in May, 1797, and in general met with only qualified praise, although the Universal Magazine (1797, Part II, page 73) did consider it worthy of the sculptor's "improved talents" and also that it afforded "a happy earnest of what in future may be expected from them."

The monument is the "Harlequin figure" which Charles Lamb describes in the following passage: "Taking a turn the other day in the Abbey I was struck with the affected attitude of a figure which I do not remember to have seen before, and which upon examination proved to be a whole length of the celebrated Mr. Garrick. Though I would not go so far, with some good Catholics abroad, as to shut players altogether out of consecrated ground, yet I own I was not a little scandalized at the introduction of theatrical 'airs and gestures into a place set apart to remind us of the saddest realities."

Webber's other signed monument commemorates Henry Askew in the Cathedral of Newcastle-on-Tyne and was erected in 1801. He exhibited at the Society of Artists, 1773, and at the Royal Academy, 1775–1779. His model in clay of "Hercules Holding Cerberus" is also in the Soane Museum.

Webber died on 7 August, 1826, and on the following day a Captain William Small wrote to Josiah Wedgwood the Younger begging "leave to communicate to you the death of my friend, Mr. Henry Webber. He died at three o'clock yesterday.
at Mrs. Kincade's, 11, South Crescent, Bedford Square. I went to Messrs. Coutts and find by his will that you are one of the Executors." The letter is signed "William Small, Captain late 37th Regiment, a very old friend of Mr. Webber's." (Wedgwood Archives; Redgrave's Dictionary of Artists; Brayley's Westminster Abbey, Vol. II, page 253; authorities mentioned in text.)

WEBSTER, —, of Lichfield

His monument to John Perrott, 1802, at Brewood, Staffordshire, has a pyramid, from which hangs a coat of arms.

WEBSTER, FRANCIS, and SONS, of Kendal

Firm fl. 1790-1850

According to local directories, the firm started business before 1790 as "Webster and Howe, Builders and Marble-cutters," but by 1811 the sole proprietor was "Francis Webster, Stonemason." Before 1828 the name was changed again to "Francis Webster and Sons, Sculptors," and in 1829 to "George and Francis Webster, Sculptors" (presumably on the death of the senior partner).

The Websters made a number of chimney-pieces in the local Westmorland marble, including one for the Union News-room at Liverpool in 1801 (Anon, History of Liverpool, 1810, page 347), and in 1826 another for Sir Charles Ibbetson (private information).

Their monuments and tablets follow the usual trend of Hellenic and Gothic taste of the time; a late one, commemorating James Thompson, 1850, at Clitheroe, Lancs, has a portrait-bust. They sign other monumental works to Nicholas Halsted, 1808, at Burnley, Lancs; Thomas Hinde, 1819, and Frances Parke, 1822, both in Lancaster Parish Church; Thomas Ireland, 1817, and Anne Moffett, 1828, both in Kendal; William Steele, 1822, at Market Drayton, Salop; William St. Clare, 1822, and William Pritchard, 1829, both in Preston Parish Church; the Rev. Christopher Goodwill, 1822, in Richmond Parish Church, Yorks; Strethill Harrison, 1823, at Holmes Chapel, Cheshire; Elizabeth Rawstorne, 1823, at Penwortham, Lancs; Countess of Lonsdale, 1824, Lowther; Elizabeth Crawshay, 1825, in Llandaff Cathedral; Richard Hankins, 1829, at Ledbury, Herefordshire; Richard Orford, 1830, at Prestbury, Cheshire; Rev. Thomas Watson, 1833, Edenhall, Cumberland; William and Mary Sugden, 1834, at Keighley, Yorks; Richard Haydon, 1837, at Boughton, Oxon; Philip Bedingfield, 1841, at Northallerton, Yorks; and Lady Gardener, 1842, at Whalley, Yorks.

In Kirkby Lonsdale Church, Westmorland, is a charming classical monument (by Webster?) to "Jane, wife of Francis Webster, architect, and daughter of George Slater of Spital, yeoman, died 26 August, 1805, aged 34."

WEEKES, HENRY, R.A.

b. 1807, d. 1877

He was born at Canterbury, the only son of Capon Weekes, a bank clerk, and was educated at the King's School. In 1822 he was apprenticed to William Behnes (q.v.), and in the following year joined the Royal Academy Schools, where he won a Silver Medal in 1826.

In 1827 Weekes became one of Chantrey's (q.v.) assistants and received a legacy of £1,000 on his employer's death. He then took over the sculptor's studio in Buckingham Palace Road and completed many of the unfinished works, including the equestrian statue of Wellington outside the Royal Exchange. His first independent commission for a bust was for one of Lord Harris, and in 1838 he made another of Queen Victoria, the first to be executed after her accession to the throne. He is, indeed, chiefly known as a portrait-sculptor and his busts have considerable merit. He did, however, find time for other work, including, in 1829, the marble column for a sundial erected on the "Dane John" Hill, Canterbury, and in 1869 a chimney-piece for Crewe Hall.

Weekes exhibited at the Royal Academy, 1828-1877, and at the British Institution, 1850-1866. He was elected an Associate of the Academy in 1850 and a full member in 1862, when he deposited as his Diploma work a bust of Henry Green, the Academy Professor of Anatomy. In 1869 he joined the staff himself as Professor of Sculpture.

At the International Exhibition of 1862 Weekes showed his figure of "The Young Naturalist," while two years later he executed the group which represents "Manufactures" at one of the corners of the Albert Memorial. In the possession of his descendant, Mrs. Van Maurik, are a number of his busts, including those of his father, Capon Weekes (1851); Mrs. Catherine Pfeil; Mary Weekes (afterwards Mrs. Knight); Caroline Weekes (afterwards Mrs. Collard); Sir William Arbuthnot; and Lord Hammond (1873).

He also had a considerable practice as a monumental sculptor, his best-known work being the group commemorating Shelley in the Priory Church at Christchurch, Hampshire. This was erected in 1854 by Sir Francis Shelley, son of the poet, and shows the drowned man lying amid pieces of broken rock, as if just washed ashore,
while his wife supports his head and gazes intently into his face. At the former Royal Female Orphan Asylum at Beddington, Surrey, is Weekes tablet to the Duke of Cambridge, President of the institution, which was erected about 1850. This is a charming work, with the inscription tablet flanked by weeping female orphans and surrounded by a profile relief of the Duke himself.

Weekes also figured as an art critic, and his essay on the Fine Arts Section of the Great Exhibition of 1851 won him a Gold Medal in the following year. He finally retired in 1876 and went to live at Ramsgate, but died on 28 June, 1877. At the sale of his remaining works held by Messrs. Christie on 29 May, 1880, his figure of a “Sleeping Child” fetched £152. The Introduction to his Lectures on Art which were published in the same year, describes him as “about the middle height, his head large, the forehead high and square, features rugged and irregular but thoughtful and expressive.”

**WEIGALL, HENRY**

*fl. 1800 (?), d. 1883*

Weigall executed several busts of the Duke of Wellington. The first—a small bronze work of which a number of replicas were made—dates from 1829, while in 1851 came the life-size bust, also in bronze, which the sculptor exhibited at the Royal Academy two years later. In the catalogue this is described as “done from sittings.” It was, indeed, the last bust for which the Duke sat, the sittings being given on 6, 9 and 11 August, and 18 November, 1851. A replica is now at the United Service Club, and another, dated 1864, in the Birmingham Art Gallery (Wellesley’s “Iconography of the First Duke of Wellington”).

Weigall showed a relief of Canning at the Royal Hibernian Academy in 1829, and a bust of James Stewart, the historical engraver, at the Suffolk Street Galleries three years later. He exhibited at the Royal Academy, 1837–1854, where his busts included those of Sir Harris Nicholas (1837), Thomas Carlyle (1848), Samuel Warren (1849), Sir David Davies (1849) and Viscount Mandeville (1850). His bust of S. Jarratt (1848) is in the University Museum at Oxford, and one of the 6th Earl of Shaftesbury is at St. Giles, Dorset. At the Crystal Palace were his busts of Carlyle and Warren, together with that of William Yarrell, the naturalist (Handbook to the Crystal Palace, 1854).

**WELLS, THOMAS**

*fl. 1786–1791*

His studio was in Holborn and he exhibited wax portraits at the Royal Academy, 1786–1791.

**WESSEL, GERHARD GEORGE**

*b. 1744, d. 1811*

He was born in Hollenstede and studied in Berlin before he came to England in 1773, under the patronage of George III. On his arrival he entered the Royal Academy Schools and gained a Silver Medal three years later. He exhibited at the Academy, 1781–1787, showing wax portraits and a figure of “Argus” in terra-cotta.

In 1787 Wessel left England for Osnabrück, and in the following year the decorative artist Vernonia wrote to the Hofmarschall, Count von Münster, that “Her Royal Highness has just told me to inform you that she has sent from London to Osnabrück a very accomplished sculptor named Wessel; he has worked for fourteen years in London, but is a native of Osnabrück and prefers to work here.”

Wessel was employed under Vernonia, but his chief collaborator was the architect Hollenberg. He carried out a good deal of work at the Royal Palace in Osnabrück, then belonging to the English Crown, and various reliefs and wax portraits by him are now in the local museum.

(Information, Director of Osnabrück Museum.)
WESTMACOTT, CHARLES MOLLOY
fl. 1820–1846

He was the illegitimate son of Sir Richard Westmacott (q.v.), his mother being Susan Molloy, a widow and landlady of the “Bull and Horns” at Fulham. Charles was educated at Eton and Oxford and is best known as the author of the English Spy and editor of The Age and Records of the Fine Arts. In 1822 he exhibited a bust of J. P. Kemble at the Royal Academy.

WESTMACOTT, GEORGE
fl. 1799–1827

He was a brother of Sir Richard Westmacott (q.v.) and exhibited busts, etc., at the Royal Academy, 1799–1820. He also seems to have assisted his brother Henry (q.v.), for the payments for the base of the “Achilles” statue in Hyde Park are made to them jointly.

Another of the Westmacott brothers was Thomas, who died on 3 December, 1798, three weeks after receiving the Royal Academy Silver Medal for Architecture (Gentleman’s Magazine, 1798, page 1153).

WESTMACOTT, HENRY
b. 1784, d. 1861

Henry Westmacott, thirteenth child of Richard Westmacott (q.v.), was employed at Kensington Palace, and in 1808 received £1,399 for work carried out in the apartments of the Princess of Wales. This included four chimney-pieces, the most important, “of statuary marble with circular reeded profiles, moulded cornice and panelled frieze,” costing £100, while the one for the music-room cost £40. Two others were “of spar marble inlaid with mouldings and ornaments of statuary marble in the frieze” (£50), and of “bardiglio” marble respectively. In the following year he received a further £222 for chimney-pieces, which included £86 for two in marble “with circular reeded profiles and bronze metal columns.” Three years later he was again at Kensington, this time supplying seven chimney-pieces for £267. (P.R.O. Works, 5/97–5/101.)

Between 1806 and 1810 Henry Westmacott was paid £173 for work in connexion with Nelson’s tomb in St. Paul’s. As a mason he was employed at Somerset House in 1810 and at the Fleet Prison two years later. In 1814 he was at Greenwich Palace, where he received £450 for six Corinthian capitals of Portland stone and £990 for eighteen pilaster capitals, all for the front of King Charles’s Quadrangle (P.R.O., Ad. 68/884). In 1816 he was working at Cobham Hall, Kent, carrying out repairs to the pyramid of the mausoleum at a total cost of more than £500 (Archives, Earl of Darnley). Two years later he was at Lord Carrington’s house at Whitehall (Soane Notebook), and in 1822 was working at Brighton Pavilion, receiving £32 for a marble plinth and £448 for a marble chimney-piece in the following year. In 1825 he built part of the Royal Mews at Pimlico and was also employed at Buckingham Palace. In 1823 he and his brother George (q.v.) had been paid £801 for the base of the “Achilles” statue in Hyde Park, the statue itself being the work of Sir Richard Westmacott.

About 1830 Henry Westmacott moved to Edinburgh and exhibited at the Royal Scottish Academy, 1830–1836, where his busts included those of Paganini, Sir Walter Scott and General Jackson, President of the United States. In 1836 he showed “a model of a cenotaph in granite, surmounted by a bust in marble, in memory of the Bard of Abbotsford, to be erected by subscription in New York.” He also exhibited at the Royal Academy, 1833–1835, and at the Liverpool Academy in 1831 showed busts of a “Young Midshipman of the East India Company’s Service, The Duke of Kent, Dr. Valpy and a deceased artist,” the last three being in wax. His bust of Scott was Lot 59 in the J. M. Oppenheim sale at Christie’s in 1864. Henry married firstly at St. George’s, Hanover Square, on 1 May, 1810, Eliza Brodie Stewart, daughter of the Town Clerk of Montrose. By her he had five sons and four daughters. He married secondly at St. Clement Danes on 8 December, 1827, Hannah Wilkinson Rowe, a descendant of Nicholas Rowe (1673–1718), the Poet Laureate.

His monuments and tablets are competent, but not outstanding, the best being that to Lord William Gordon, 1824, at Whitkirk, Yorks, which has a delightful small full-length relief of Lord William in Highland dress. At the Scottish Academy of 1832 he exhibited the model of “a marble medallion erected by the inhabitants of St. Elizabeth, West Indies, to Andrew Miller, Esq.”

WESTMACOTT,
JAMES SHERWOOD
b. 1823, d. 1888 (?)

He was born 27 August, 1823 (Archives, Artists’ Annuity Fund), and was the son of Henry Westmacott (q.v.) by his first marriage. He studied sculpture with Sir Richard, and in 1844 exhibited at Westminster Hall figures of “Alfred the Great” and “Richard I Planting the Standard of England on the Walls of Acre.” The Literary Gazette considered that both these works evinced “much knowledge of the figure and spirit of execution,” while the German art critic, Dr. Forster, thought that the “Alfred” was “one of the most eminent works of the Exhibition.”

In 1845 Westmacott won a Gold Medal from the Royal Academy of Dresden for a figure of “Victory,” which he exhibited at Burlington House in the following year. In 1848 he made the statues of Geoffrey, Earl of Gloucester, and Saher, Earl of Winchester, for the House of Lords (the latter being subsequently shown at the Great Exhibition of 1851). In 1849 he went to Rome, and shortly afterwards executed the figure of “Satan Overthrown” for Mr. Theophilus Burnand; replicas of this work (in the form of bronze statuettes) were produced in large numbers by Messrs. Elkington in 1853. In 1855 Westmacott showed his marble figure of “The Peri at the Gates of Paradise” at the Paris Exhibition. This later became very popular and was illustrated in the Art Journal and other periodicals of the time.

In 1850 he made the font for St. Mary’s, Stoke Newington, and in 1863 carved the figure of Alexander, now in the Mansion House. Two years later he executed a statue of Bomanjee Hormasjee for the Coorla Spinning Company of Bombay. In 1868 he carved the rederos for Little Wolston Church, Buckinghamshire, and in the following year the statues of Galen, Cicero and Aristotle for the façade of the Civil Service Commission buildings in Burlington Gardens. He also modelled all the figures for the rederos of Newcastle Cathedral. In 1870 came his figure of “The Guardian Angel,” commissioned by Mr. Burnand of Lowndes Square.

Westmacott exhibited at the Royal Academy, 1846–1885, and at the British Institution, 1852–1867, where his busts included those of George Barnard (1854), the Marquess of Anglesey (1858) and J. Langton Down (1883). His “Fountain Nymph” is illustrated in the Art Journal of 1861 (page 216). He signs the monuments of Sir Gilbert East, 1866, at Hurley, Berkshire; to Owen Wethered, 1862, and Martha Wethered, 1867, both at Marlow, in the same county; and John Francis Bassett, 1869, at Illogan, Cornwall. The altar-tomb of the Rev. George Vanbrugh, 1856, at Aughton, Lancashire, is also his work. He probably died in 1888.

(Various references Art Journal and Builder; private information.)

WESTMACOTT, RICHARD,
the Elder
b. 1747, d. 1808

Westmacott was educated at Brasenose College, Oxford, but “gave up all pursuit of the learned professions early in life and took to the business of a statuary” (Gentleman’s Magazine, 1856, Part II).

He married Sarah, daughter of John Vardy (d. 1765), the architect.

Although he worked chiefly as a monumental sculptor, he also made a number of chimney-pieces, and in 1777 published a series of twenty engraved designs for chimney-pieces with classic
ornaments. In 1778 he made a magnificent one, with life-size figures of a shepherd boy and a dancing girl, for the music-room at Cobham Hall, Kent (Archives, Earl of Darnley), and in 1780 supplied one for Corsham Court. A year later he laid down the marble floor in the Methuen Chapel in the aisle of North Wraxall Church, Somerset (Methuen Archives).

Other chimney-pieces executed by Westmacott included one for the state bedroom at Warwick Castle (Anon, *History of Warwick*, 1815, page 193), and an unspecified number for Gorhambury, Herts, where he was paid £89 (Hertford County Archives, B.XI.66). In 1788 he received £260 for chimney-pieces for the Admiralty, including one of "rich statuary marble" adorned with "basso-relievo, tablet, rich swags of fruit and foliage," costing £84, and another of "rich statuary marble with Siena columns and carved frieze, £63" (P.R.O., Ad. 171). Two years later the Duke of Bedford paid him £37 for one of marble for Woburn Abbey (Bedford Archives). In 1796 he was granted the Royal Appointment of Mason for Kensington Palace.

Westmacott also designed chimney-piece tablets for Wedgwood, and one of these with "birds in a nest and with festoons of flowers" fetched £98 at the Sibson sale at Christies in 1877. It was he, not George Westmacott, as stated by Graves, who exhibited a "model of a boy for a monument" at the Society of Artists in 1775. He became a bankrupt in 1803 (Monthly Magazine, 1803, Part II, page 58), and died five years later.

Westmacott's most important monument was erected in 1791 in Sherborne Church, Gloucestershire, to the memory of James Dutton, who had died in 1778. This is nearly 18 ft. high and has a life-size figure of an angel with outspread wings who tramples underfoot a prostrate figure of Death, represented by a realistic and macabre skeleton.

In addition to the monuments he made independently, Westmacott also executed others designed by James Wyatt, the architect; together they sign those commemorating William, Viscount Barrington, 1793, at Shrewsbury, Berks; Henry, tenth Earl of Pembroke, 1794, at Wilton, Wilts; John Oglander, 1794, at New College, Oxford; and Margaret May, 1796, at Hale, Hants.

**WESTMACOTT, SIR RICHARD, R.A.**

b. 1775, d. 1856

He was born in 1775, the son of Richard Westmacott the Elder (q.v.), and studied under his father. In 1793 he went to Rome, where he became a pupil of Canova. Here he made such rapid progress that he was not only elected a Member of the Academy of Florence in 1795, but also won the first Gold Medal of the Academy of St. Luke
(offered by the Pope) for a bas-relief of "Joseph and His Brethren" on 28 May in the same year. In 1797 he returned to England, after an adventurous journey, during which he fell into the hands of Italian bandits, who robbed him of everything he possessed and wounded him in the shoulder.

On his arrival Westmacott set up for himself in a studio near his father, and in 1798 married Dorothy, daughter of Dr. Wilkinson of Jamaica. He soon had a large practice of his own, which in course of time became second only to that of Chantrey; indeed, as early as 1803 Farington notes that he had commissions amounting to £16,000. Besides his monumental and other work, he also made a number of chimney-pieces, including one in 1805 in dove-grey marble for the Queen's drawing-room at Windsor, and two large ones, costing £140, which had been designed by Wyatt for Carlton House (P.R.O., Works 5/94). Two years later he received £192 for four chimney-pieces of grey marble, two for the drawing-room and two for the saloon of the Duke of York's apartments in Kensington Palace (P.R.O., Works 5/96). Like his father, he was also employed at Cobham Hall, Kent, where he was paid £275, a sum which probably included payments for chimney-pieces, in 1804. (Archives, Earl of Darnley.)

For the chimney-piece in the music-room of the Royal Pavilion at Brighton, Westmacott received no less than £1,244. This is described by Parry (Coast of Sussex, page 128) as "having a really noble effect, the projecting sweep of cornice is supported on the wing of an expanding dragon and the massive, though short, oriental columns with statuary carved capitals and still larger bases of inverted lotus are in the best possible style." In fact, the writer considered it "by far the most stately in the Pavilion."

In 1816 Westmacott made copies in plaster-of-Paris for the Phigalian Marbles for the Royal Academy (Academy Archives), and two years later the relief on the Temple of Liberty at Woburn Abbey and the chimney-piece for the inner library (Woburn Archives). In 1828 he carved reliefs for the north side of the Marble Arch and also executed two others of "The Death of Nelson" and "The Meeting of Wellington and Blücher," for the parapet. These, however, were never used until 1832, when Blücher placed them in the attic storey of the grand entrance to Buckingham Palace.

The Waterloo Vase which now stands in the Palace Gardens is also the work of Westmacott. The blocks of marble from which it is made had originally been seen by Napoleon when he was passing through Tuscany on his way to the Russian campaign, and he had ordered them to be preserved so that a trophy commemorating his anticipated victory could be carved from them. After the Emperor's downfall the Grand Duke of Tuscany presented the blocks to George IV, who commissioned Westmacott to make them into a vase to commemorate Waterloo. When it was finished the vase weighed twenty tons and, as it was far too heavy for the Waterloo Gallery at Windsor, the King ordered it to be placed in the National Gallery (Gentleman's Magazine, 1836, page 186). It was not placed in its present position until 1906. The reliefs on it show George IV on his throne and Napoleon dismounted from his horse, while the rest of the space is filled with allegorical figures (Naval and Military Magazine, 1828, pages 368-373).

In 1825 he carved the monument, erected on the bank of the Tiber, near Rome, to the memory of Rosa Bathurst, unfortunate daughter of an unfortunate father; for, as the epitaph says, she "was accidentally drowned in the Tiber on the 16th March, 1824, whilst on a riding party, owing to the swollen state of the river and her spirited horse taking fright. She was the daughter of Benjamin Bathurst, whose disappearance when on a special mission to Vienna some years since was as tragical as it is unaccountable, no positive account of his death ever having been received by his distracted wife." The truth of the disappearance of Mr. Bathurst at Perleberg, in Brandenbourg, in 1809 has never been solved.

Westmacott's last work of importance was the group of sculpture in the pediment of the British Museum. Here he was persuaded to follow the fashion of the day by introducing a slight touch of colour, and so tinted the tympanum blue and gilded some of the ornaments.

He exhibited at the Royal Academy, 1797-1839, and was elected an Associate in 1805 and a full member in 1811. In 1827 he succeeded Flaxman (q.v.) as Academy Professor of Sculpture; ten years later he was knighted.

Westmacott died on 1 September, 1856, and was buried at Chastleton, Oxon, where his third son was Rector. The Art Journal, in its obituary, sums up his work by saying that "if he never reached the highest point of grandeur or beauty, he was always chaste, dignified and impressive." Canova (q.v.), however, said of Westmacott's figure of the negro on the Abbey monument to C. J. Fox that neither in England nor out of England had he seen any work which surpassed it.

WESTMACOTT, RICHARD, the Younger, R.A.
b. 1799, d. 1872

He was indeed learned in art and accepted as an authority on all matters connected with it."

As a monumental sculptor Westmacott produced competent, though uninspired, work. His best is perhaps the recumbent figure of the fifteen-year-old Eton boy, Charles Packe (d. 1842), in Prestwold Church, Leicestershire.  
(Builder, 1872, page 380; authorities cited in text.)

WESTON, —

In 1704 Browne Willis, the antiquary, when he was at Bletchley, paid "Weston the carver for new cutting over the Lord Grey's monument, £3." Weston was also paid for "two black marble stones laid over the bodies of Thomas Willis, Esq. and Alice his wife and cutting the arms and inscription" (Records of Bucks, Vol. XII, page 246).

The monument recut was that commemorating Lord Grey of Wilton, who died in 1447. The armorials on the tombs of Mr. and Mrs. Willis are surprisingly well carved.

WESTON, —, of Exeter
fl. 1696-1733

In spite of the fact that Weston was one of the most remarkable of the provincial statuaries, a careful search through the archives of his native city has revealed no trace of either his apprenticeship or freedom. All his monuments are important and have an extraordinary range, both in style and execution. Most of them are well up to the best provincial standards of the early eighteenth century, but four equal, if they do not surpass, the finest contemporary London productions.

The monuments in question are those which commemorate John Kelland, 1712, at Ashprington, Devon; Jonathan and Elizabeth Ivie, 1717, in St. Petrock's Church, Exeter; Francis Pengelley, 1722, Whitchurch, Devon; and Henry Scobell, 1729, at St. Blazey, Cornwall. Each is distinguished by having on the base the most remarkable relief of the Last Judgment, in which the figures have all the grace and movement of the Italian Renaissance, while the design anticipates the work of William Blake. The Ivie monument, originally a much larger work, was first erected in St. Kerrian's, Exeter, but when the church was pulled down the relief only was moved to its present position. According to Cresswell (Churches of Exeter, page 147), it was signed by Weston; the architectural surround was probably similar to those of the Kelland and Scobell monuments which still exist. Of these the former is architectural in design, about 10 ft. high, and consists of a large pediment surmounted by an urn, with a cartouche inscription-tablet below. The latter is more elaborate, standing about 12 ft. high, with Corinthian pillars supporting a curved pediment with reclining angels on either side; beneath is a fringed inscription-tablet under a baldacchino. The tablet to Francis Pengelley is also an architectural composition, though flanking the monument are symbolic figures of Learning and Justice.

Other signed monuments by Weston in Devonshire include an architectural work commemorat-
ing Roger Vavasour, 1696, at Dartmouth; another, with a portrait-bust and an enchanting relief of a ship at the base, to Benjamin Dollen, 1700, in Exeter Cathedral; a life-size kneeling figure of Philip Hooper in robes and wig, dated 1715, in St. Martin's Church, Exeter; and a fine cartouche tablet to the Rev. John Newte, 1715, at Tiverton.

Two more elaborate examples of his monumental work commemorate Edward Hobbs, 1718, at Gerrans, Cornwall, and Joseph Taylor, 1733, at Denbury, Devon. The first has a central baldacchino from which hang curtains, raised on either side by female figures to reveal the inscription tablet they are holding; at the base is a shield with a mixture of spades, scythes, coronets and crowns turned upside down, skull and cross-bones, etc. The second is in memory of a sailor, and has a medallion-portrait, naval trophies in the shape of an anchor, sextant, chart and globe, and medals of Queen Anne and George I. At the base is a fine relief of Taylor’s ship engaging four triremes, probably Moorish pirates. At Honiton Clyst, in the same county, is a fragment of what must once have been an important monument by Weston, but all that now remains are two mourning cherubs, a coat of arms, and the sculptor’s signature beneath. This may be part of the “elegant marble monument” to Francis Weller, mentioned by Polwhele in his Devonshire (Part II, page 199).

WHEEGER, JOHN, of Beaulieu

He signs a neo-Hellenic wall-tablet to Lady Cope, 1806, at Eversley, Hampshire. He also signs tablets at South Wanborough, Hants.

WHITE, C., of London

He signs a monument with a relief to John Hooper, 1808, at Shoreham, Sussex.

WHITE, SIMON, of Oxford
fl. 1656–1669

He was the principal stone-carver for the library and chapel at Brasenose College, Oxford, 1656–1658; and is also described as a “carver” for “marbles” when he received a payment of £30 from the College in 1665. A year later he was paid a further £52 for “laying the marbles” (E. W. Allfrey’s Brasenose Quatercentenary Monographs, No. 3, pages 20–22). In 1669 White received £3 for a “marble altar,” which was placed with the Arundel Marbles (Wood’s Life and Times, Vol. IV, page 69).

WHITE, THOMAS,
of Canterbury
fl. 1764–1801

From 1764 until 1801 he was the master-mason of Canterbury Cathedral, and in 1791 carried out extensive repairs, receiving £271 for his work on “Bell Harry” ( Treasurer’s Accounts, Cathedral Library). In the previous year he had been paid £890 for rebuilding Brookland Church.

WHITE, THOMAS,
of Worcester
b. c. 1674, d. 1748

He was a native of Worcester, but seems to have gone to London as a boy and to have been apprenticed to a statuary in Piccadilly. He must have returned to Worcester about 1709, for in that year the City Chamber “ordered that Thomas White be and is admitted a Freeman of this City, making a handsome effigie of the Queen to ye well-liking of the Mayor and Aldermen for the time being, but that he be not sworne before the effigie be done.” This is the statue of Queen Anne now in the centre of the façade of the Guildhall. Three years later White received £10 for “carving and beautifying the statue of Charles I,” but this probably only means that he recut the old statue.

Between 1721 and 1724 White was working at Worcester Guildhall, which dates from this time. Here he was responsible for most of the decorative carving; the great trophy of arms in the pediment is signed by him and dated 1722. Green, in his History of Worcester (Vol. II, page 89), says that White was also responsible for the figure of Britannia on a house in the city, the bust of George II on Edgar’s Tower, and another of Bishop Hough at the east end of All Saints’ Church. He apparently “lived in easy circumstances” and is said to have died a bachelor.

In his Will, White left to Worcester Infirmary “all and every sum of money that shall appear to be due to me at the time of my decease from the Corporation . . . on account of the annuity due to me.” This “annuity” had been granted to him by the Corporation in 1724 in recognition of his work at the Guildhall.

White also worked as a statuary. His most important monument is that to Admiral Skynner, 1725, at Ledbury, Herefordshire, with its life-sized busts. Other signed monuments and tablets by him include those to Adam Cave, 1698, in All Saints, Evesham; Mrs. Nanfan, 1704, at Birtsmorton, Wores; Sir John Turton, 1707, at Alrewas, Staffs; Bishop Thomas, c. 1710, and Henrietta Wrottesley, 1720, both in Worcester Cathedral; Sir John Bridgeman, 1719, and Roger
Mathews, 1746, both at Llanbedwell, Salop; the Rev. Josiah Foster, 1727, at Aston, Birmingham; Mary Lyster, 1730, in St. Mary's, Shrewsbury; John Holte, 1735, at Ripple, Wors; George Peyton, 1742, in Tewkesbury Abbey; and John Brydges, 1742, at Bosbury, Hereford. He must have had a yard in Shrewsbury as well as in Worcester, for the monuments at Llanbedwell are signed "of Salop," although the drawings in the archives of the Earl of Bradford are signed "of Worcester." (Rev. Buchanan-Dunlop's Thomas White; Worcestershire Archaeological Society, 1943; Worcester City Archives.)

WHITEHEAD, JAMES, of London fl. 1817-1828

In 1817 he was paid £123 for marble chimney-pieces at Battle Abbey (Archives, Mrs. Harbord, of Battle Abbey).

His studio was in the New Road, and he signs a tablet to Lieutenant-General William St. Leger, 1818, in Marylebone Parish Church. A "John Whitehead of the New Road," who is presumably a relation (although the "John" may be a misprint for "James"), received a Silver Palette from the Society of Arts in 1814 for a plaster-cast of "Aeneas Flying from Troy." A "W. Whitehead of London" signs the monument of the Hon. George Fox-Strangways, 1859, at Farley, Hants, and "J. and M. Whitehead" sign a tablet, with the figure of a mourning woman, in Kentish Town Parish Church.

WHITEMALL, WILLIAM, of London fl. 1805-1843

From 1807 until 1812 he was making chimney-pieces for Longleat, receiving £182 from the Marquess of Bath (Longleat Archives). In the latter year he did similar work at Omsbys Court, Worcestershire (Archives, Lord Sandys).

As a monumental statuary Whitelaw was prolific, but most of his works are dull. His monument to Lord St. Vincent, 1823, at Stone, Staffs, has a portrait-bust, and he signs others commemorating Mrs. Forrester, 1805, in All Saints', Leicester; Richard Sowdon, 1816, in St. Mary's, Reading; Frederick Pitcher, 1816, in St. James's, Hampstead Road; Robert Powney, 1817, in Marylebone Parish Church; Edward Tew, 1817, in Upper Chapel, Eton College; Thomas Taylor, 1818, at Debden, Essex; Lady Bayly, 1818, Stoke d'Abernon, Surrey; James Grave, 1820, at Baldock, Herts; Hon. Samuel Ongley, 1822, at Sandy, Beds (and also in Christ Church, Dublin); Sir Thomas Reid, 1824, St. Michael's, Dumfries; General Sir Edward Howorth, 1827, at Banstead, Surrey; Charles Gordon, 1829, at Berkhamsted, Herts; the Rev. John Templer, 1832, at Teigngrace, Devon; Edward Jacob, 1837, at Faversham, Kent; and Lucy Monoux, at Evershot, Beds.

WHITING, JOHN, of Northampton fl. 1806-1840

He settled in Northampton and became a Freeman of that borough by purchase on 15 March, 1806. His monumental work is scattered over Northamptonshire and the neighbouring counties and is mostly very uninteresting. His tablet to William Kerr, 1824, in the Church of the Holy Sepulchre, Northampton, has a relief of the County Hospital at the top; while that to Thomas Samwell, 1835, at Upton, Northants, has a well-cut relief of a mourning woman.

Whiting also signs works in the same county commemorating Katherine Thornton, 1807, at Brockhall; Daniel Knightley, 1808, and Benjamin Laver, 1810, both at Hardingstone; Robert Fleetwood, 1810, in St. Peter's, Northampton; John Yates, 1824, at Brackley; the Rev. E. Isham, 1814, and Sir Justinian Isham, 1818, both at Lamport; and Mary Hayne, 1838, at Spratton. Others by him include those to Thomas Foster, 1821, at Newport Pagnall, Bucks; Mary Dawson, 1829, at Clapham, Beds; and Joseph Brookes, 1840, at Clifton-Keynes, Bucks.

WHITING, ROBERT, of Cambridge

He signs a large wall-tablet to Thomas Price at Astwell in Northants. This is undated, but, from its style, was probably erected about 1790.

WHITTLE, BENJAMIN, of Liverpool

He signs a large wall-tablet with an urn, coat of arms, etc., to the Rev. W. Keyt, 1816, at Runcorn, Cheshire.

WHITTON, ROBERT, of Ripon fl. 1830-1841

He signs two large Hellenic tablets with well-cut details to Edward and Frederick Oxsley, 1830, and to John Small, 1834, both in Ripon Cathedral.

WICKSTEAD, or WICKSTEED, JAMES fl. 1779-1824

He exhibited engraved gems, etc., at the Royal
Academy, 1779–1824, and at the Suffolk Street Galleries showed a bas-relief of “Mary Magdalen Anointing Christ’s Feet” in 1824.

WILD, H.
Probably a Manchester mason, he signs a wall-tablet to George Clarke, 1777, at Stockport, Cheshire.

WILDING, R.
He was presumably a Shrewsbury artist and signs a curious monumental tablet to Thomas Jones, 1714, in St. Alkmund’s, Shrewsbury. This takes the form of a brass plate with a long inscription, while above are three repoussé coats of arms very well cast in bronze.

WILDSMITH, JOHN
fl. 1757–1769
He may have been an apprentice of Thomas Carter (q.v.). As “mason and carver” he became a bankrupt in 1769, and on 31 July and 1 August of the same year a sale of his stock-in-trade was held at his yard “near St. James’s Church, Piccadilly.” Among the marble chimney-piece tablets sold were those of “Diana,” “Shepherd and Wolf” and “Boys and Sheep.” Another lot was “3 marble boxes inlaid with different sorts of marble.” In 1763 he was paid £90 for chimney-pieces for Sir Richard Littleton’s house in Piccadilly (Archives, Lord Brownlow).

WILKES, —, of Birmingham
fl. 1830–1838
He signs monuments commemorating Abraham Spooner, 1830, and the Countess of Rose, 1838, both at Elmdon, Warwickshire.

WILKINS, —, of Beaminster
fl. 1830–1840
He signs a few tablets in Dorset, the best commemorating Captain Bowles, 1837, at Netherbury, which has military trophies. The large, heavy monument to Edmund Hall, 1839, at Broadwindsor, in the same county, has a relief of a dragoon and his horse, and is also the work of Wilkins.

WILLEMS, or WILLIAMS, JOSEPH
d. 1766
He was born in Brussels and about the middle of the eighteenth century came over to England, where he worked as a modeller in the Chelsea china factory. In Mortimer’s Universal Directory for 1763 (Part I, page 19) he is described as “Willems, Joseph, Modeller, at the Brussels Coffee-house, Chelsea. This artist teaches drawing, modelling and has modelled for the Chelsea china factory for many years.” Willems, who anglicized his name to “Williams,” exhibited at the Society of Artists, 1761–1766, where his works included a bust of Mr. Martinelli (1761), an emblematic figure of “Honour” (1763), a bust of “A Gentleman” (1764), and models of “Charity” and “Sincerity” in 1765 and 1766 respectively.
Willems left England in 1766 and settled in Tournai, where he died on 1 November of the same year.
(W. H. Tapp’s Joseph Willems; Connoisseur, April, 1938, page 176.)

WILLIAMS, —, of Brighton
fl. 1803–1808
He signs a few tablets in Sussex, the best being those to John Ingram, 1803, at Chailey, and John Payne, 1805, at Patcham, the latter carried out in coloured marbles.

WILLIAMS, —, of Plymouth
fl. 1808–1818
Of his three tablets in Egg Buckland Church, Devon, the best commemorates William Harris, 1816.

WILLIAMS, EDWARD,
of Cowbridge
b. 1746, d. 1826
He signs an undated oval wall-tablet to Anthony Jones at Llantwit, Glamorgan; this was erected about 1800 and is exactly like the contemporary work of T. King of Bath (q.v.). He is best known as a poet and antiquary (see D.N.B.).

WILLIAMS, EMANUEL
He became a bankrupt as “mason and carver of Tooley Street, Southwark,” in 1778. On 18 and 19 January in the following year a sale of his stock-in-trade was held; the lots auctioned included a great deal of marble, chimney-pieces, monuments, tablets, etc., and it would seem as if Williams must have had a considerable business. Between 1774–1777 he built the west wing of Guy’s Hospital (£1,425), and in 1777–1778 the centre building (£1,474) (Hospital Archives).

WILLIAMS, HUGH, of Holyhead
According to the Cambrian Magazine (Vol. III,
— WESTON
Part of the monument of Jonathan and Elizabeth Ivie, 1717, St. Petrock's Church, Exeter.
RICHARD WESTMACOTT THE ELDER
James Dutton, 1791, Sherborne, Gloucestershire.
a tablet with naval trophies at the base to Nathaniel Bruton, 1815, at Stockton, Durham.

WILLOUGHBY, W., of Howden
He signs a large wall-tablet with careful and well-cut details to John and Ann Whitaker, 1798, at Howden, Yorks.

WILSON, DANIEL WILLIAM,
of London
fl. 1824–1834
His yard was at Bath Place, New Road. His best monuments are to Elizabeth Bainbridge, 1824, at Chobham, Surrey, and to Mary Sikes, 1828, at Balderton, Notts; the former has a relief of a seated mourning woman in the manner of John Bacon the Younger (q.v.), while the latter has figures of Hope and Faith. Other signed works by Wilson include those to Francis Peach, 1832, at Ketteringham, Norfolk, and Benjamin Burton, 1834, in Marylebone Parish Church. He also signs a small tablet to Lord Colchester, 1829, in the Parish Church of East Grinstead, Sussex.

WILSON, —, of Wellingborough
According to the Gentleman’s Magazine of 1799 (page 939), he made the monumental tablet to Mrs. Roberts (d. 1781) at Finedon, Northants.

WILSON, J. T.
fl. 1837–1838
He exhibited medallion portraits in marble at the Royal Academy in 1837, and showed a bust of Sir Robert Inglis, Bart., in the following year.

WILSON, SIR WILLIAM
b. 1641, d. 1710
He was the son of a Leicester baker and in 1670 was working as a carver at Sudbury Hall, Derbyshire (then being rebuilt by George Vernon), where he was responsible for the elaborate sculpture of the entrance-porch (Country Life, 15, 22, 29 June, 1935). In or about 1671 he made the Wilbraham family monument in Weston Church, Staffordshire, for Lady Elizabeth Wilbraham, who recorded the agreement in her copy of Palladio, now in the possession of the Earl of Bradford (see Wren Society, Vol. XI, page 109).
About nine years later Wilson made the equestrian statue of the Duke of Newcastle which was placed over the door of the north-east front of Nottingham Castle. The work was supposed to have been carved from a single block of stone, but when the castle was sacked by rioters in 1831 they took away with them as a trophy one of the
horse's legs, which was then discovered to be made of wood.

Deering, the historian of Nottingham, who is quoted by Throsby (Town of Nottingham, 1795, page 26), says that Wilson "was an ingenious artist of whom it was remarkable that after this performance (i.e., the statue of the Duke) he was for a time spoiled for a statuary because a Leicestershire widow lady, the Lady Pudsey, who was possessed of a very large jointure, falling deeply in love with him, got him knighted and married him. But he living up to the extent of his apron-string estate and his lady dying before him, Sir William returned to his former occupation and the public recovered the loss of an eminent artist." Wilson married Mrs. (not "Lady") Jane Pudsey, widow of Henry Pudsey, of Langley Hall, Warwick. About 1677 the sculptor had made the monument (with two busts) of Pudsey for Sutton Coldfield Church, Warwick, so that it is possible he first met his future wife when discussing the form this memorial should take.

A writer in the Gentleman's Magazine (1761, page 401) rather over-praises this monument when he describes the curtains, which are drawn back to disclose the busts, as being "so well designed in their folds and executed with such an easy flowing of the drapery as would not have disgraced a Roubilac.

About 1680 Wilson probably made the statue of Charles II for the exterior of Lichfield Cathedral. In 1701 he executed the statue of Sir John Moore at Appleby School, Leicester, receiving £50 and another £5 for the coat of arms on the exterior of the School (Historical Manuscripts Commission, Tenth Report, Appendix Part IV, Captain Stewart's MS., page 139). In 1707 he made a statuette of Edward VI, costing £25, for Birmingham Grammar School (Nicholas Carlisle's Endowed Grammar Schools, 1818, Vol. 2, page 644). As an architect he was responsible for part of St. Mary's Church, Warwick, and in September, 1700, was also paid for "carving work" and in 1706 a further payment was made to him for "carving church windows." In the following year is Wilson's receipt for £10 and "for the Marble Monuments on which the two brass figures are fixt in the Church of St. Maryes in Warwick over against the South Isle in the sd. Church." (P.R.O., c.104/97.)

Owing to his wife's efforts, Wilson was knighted at Whitehall on 8 March, 1681/82. He died on 3 June, 1710, and is commemorated by a tablet in Sutton Coldfield Church. According to a work entitled The History of Sutton Coldfield by an Impartial Hand (London, 1762), Wilson's lowly birth so offended his wife's relations that they refused to contemplate his being buried in the same vault with her. Wilson was aware of this and, when a friend commiserated with him, facetiously replied that he was not worried, for he would be buried outside the church, directly opposite the Pudsey vault. Then, he said, "there will be only a single stone wall betwixt us, and as I am stonemason there will be no kind of labour or difficulty in cutting my road through the wall to my old bedfellow."

WILTON, JOSEPH, R.A.

b. 1722, d. 1803

He was born in London on 16 July, 1722, the son of a worker in ornamental plaster who had a large manufactory near Charing Cross. The elder Wilton was responsible, among other works, for the ceilings at the Foundling Hospital (Builder, 1859, page 849), and it was in his father's studio that the young man received his first grounding in decorative art. He had, however, a strong natural inclination towards sculpture, and although his father wished him to become a civil engineer he ultimately got his own way and became a pupil of L. Delvaux (q.v.), at Nivelle, in Brabant.

From Nivelle Wilton went in 1744 to study at the Academy in Paris then directed by J. B. Pigalle (1714-1785). Here he learnt to work in marble and won a Silver Medal. In 1752 he set out with L. F. Roubilac (q.v.) to study in Rome, and three years later received the "Jubilee" Gold Medal from Pope Benedict XIV.

While he was in Rome Wilton met his first patron, William Locke of Norbury, and the two soon became inseparable, travelling about Italy together in a search for antiquities. Later he moved to Florence and worked there for four years, receiving a number of orders for marble copies of statues from the antique. He was apparently already making a name for himself, for Horace Walpole, writing to Sir Horace Mann in 1753, refers to a remark made by the latter in a previous letter about Wilton's being "mentioned with encomiums" (Letters of Horace Walpole, edited by Cunningham, Vol. II, page 358).

In 1755 Wilton returned to England, in company with Sir William Chambers, the architect, Cipriani, the decorative painter, and Capitoldi, the sculptor (q.v.). He settled in his father's house in London and soon had a large number of commissions. Three years later he and Cipriani were appointed directors of the gallery of painting and sculpture opened for the use of students by the Third Duke of Richmond at Whitehall. Wilton
was also appointed coach-carver to the King and was responsible for some of the designs and carving of the State Coach used by George III at his Coronation; in 1764 he was appointed "Sculptor to His Majesty."

On his father's death he inherited a very considerable fortune and lived in a sumptuous, indeed extravagant, manner, with a house in town, another in the country, and "a family coach, a phaeton, and numerous saddle-horses for himself and his sons, to whom he gave a University education" (J. R. Smith's *Nollekens and His Times*, Vol. II, page 105).

Wilton was paid for a great deal of decorative carving at Somerset House, though Smith, who is not always reliable, says that John Atkins (q.v.) and Nathaniel Smith (q.v.) "modelled and carved the whole of them for Wilton, immediately from the drawings, he never having put a tool to them" (op. cit., Vol. II, page 110). Whether this is the truth or not, Wilton was credited with a long list of works, including, in 1776, "six relieved high finished colossal heads cut in Portland stone, £126"; in 1778, four colossal statues of "Europe, Asia, Africa and America, erected on the attic of the inner front of the Royal Academy"; and, in 1780, chimney-pieces for the principal rooms at a total cost of £1,097, which included payments for two with "enriched tablets of griffins and urns" for the Royal Academy Council Room. In the following year he supplied "two semi-circular niches in Portland stone," and in 1784 and 1786 respectively received further sums of £940 and £835 for chimney-pieces. In 1788 he made chimney-pieces for the rooms allotted to the Treasurer of the Navy in Somerset House. One intended for the "eating-room" had a tablet carved with a head of "Flora" and cost £60, while two others, for the drawing-room and withdrawing-room, cost £55 each. In 1787 he had made "eight large vases with Tritons and other emblematical figures and ornamented with festoons and trophies allusive to different offices" for which he received £640, and in 1790 he was paid £200 for two colossal lions in Portland stone, each 10 ft. 3 in. in length, which were to be placed on the eastern watergate of the great terrace (R.I.B.A. Library, MS. 335A; P.R.O., A.O.1/2495-2498).

Wilton also produced a number of richly carved chimney-pieces for various mansions, including Blenheim, where he supplied one, designed by Sir William Chambers, for the dressing-room of the Duchess of Marlborough in 1772 (British Museum, Ad. MS. 41133); Sandbeck Park, the seat of Lord Scarborough (Miller's *Doncaster*, page 311); Kirkleatham, Yorkshire (*England Displayed*, Vol. II, page 158); and about 1770 one for Peper Harrow House, Surrey, with a tablet to "Bacchus and Tiger." Some of the houses for which he worked had been built, or altered, by his friend Chambers, and it was from the latter's design that he made keystones for the bridge at Woburn Abbey in 1771 (British Museum, Ad. MS. 41133). In the same year he executed the monument to the Earl and Countess of Mountrath for Westminster Abbey. This was also from a design by Chambers, who later wrote asking for the £50 owing to him for the work, remarking that he would "be glad to have my share, being now in want of the needful" (British Museum, Ad. MS. 41133).

One of Wilton's most lavish patrons was Lord Charlemont, a man of great culture, of whom Henry Grattan said that "the very rabble grew civilized as it approached his person." He employed Wilton to carve a variety of objects, both for his house in Dublin and for his lovely seaside villa "Marino." One of the most elaborate was a table in lapis-lazuli which cost £150. This was apparently more than he had anticipated, for Wilton, writing to him on 17 May, 1773, says: "I wish it had been in my power to have made the table come less expensive, as it has far exceeded my first computation" (*Historical Manuscripts Commission*, Earl of Charlemont, Vol. I, page 314).

One of the sculptor's finest, though least known, works is the statue of Archbishop Tillotson in Soverby Church, Yorkshire. The figure in its alcove has a curious air of bravura rather out of keeping with its subject and, of all Wilton's productions, reflects most clearly the influence of his foreign training. According to the inscription, it was erected to the memory of the primate by his two great-nieces, but the original model (still in the possession of the Stansfeld family) is inscribed: "To George Stansfeld, Esq., under whose direction the marble statue of Archbishop Tillotson was executed and erected in Soverby Church, this model in sincerest gratitude is respectfully dedicated by Joseph Wilton, R.A., Statuary to the King and Keeper of His Majesty's Royal Academy in London. The Year of Our Lord MDCCCVI."

Wilton was also responsible for two statues of George III, one of lead and the other of marble. The first, which was modelled by A. Beaupré (q.v.) under Wilton's direction, showed the King on horseback, and formerly stood in Berkeley Square. The second, which was ordered for the Royal Exchange by the City Corporation, received so much adverse criticism when it was unveiled in 1764 that the sculptor felt bound to explain why he did not retaliate. He accordingly wrote to the Committee which had commissioned the statue, saying that though "some gentlemen
were very earnest that I should publish a defence against the criticisms which have been wantonly made upon it," yet "on mature deliberation such appeal to the public seems to me neither reasonable nor necessary," giving as his reason that "an altercation with thousands of people who understand nothing of the matter might not only endanger my reputation, but would naturally give occasion to careless and malicious pens to work my ruin by construing away the best meaning by the usual arts of equivocation" (City Corporation MS. 167.13). The offending statue was badly damaged when the Royal Exchange was burned in 1838 and it was later sold for £11 15s.

In 1766 Wilton made a statue of George II, which is now in the Senate House, Cambridge. In the same year his statue of the elder Pitt was erected in New York; this was mutilated during the War of Independence and is now the property of the New York Historical Society. A second statue of Pitt, executed for Cork Town Hall, is in the Crawford School of Science and Art, Emmet Place, Cork. Copies of classical statues made by Wilton include the "Venus de Medici," for Lord Charlemont; "Venus" and "Apollo," for Lord Pembroke, both of which are now at Wilton; "Flora" and "Bacchus," for Lord Tilney, which were formerly at Wanstead; "Apollo" and "Isis," for Lord Rockingham (1762); and the "Apollo Belvedere," for the Duke of Richmond (1758).

According to Nichols' Literary Anecdotes (Vol. VIII, page 679), Wilton made the bust of Richard Gipps in West Harling Church, Norfolk. The same authority (page 637) quotes a letter from the Rev. E. Tyson, Vicar of Lambourne, Essex, written to Gough the antiquary on 15 November, 1778, in which Tyson says that "one of the most elegant modern monuments I ever saw was last week put up in my church to (John) Lockwood—a figure of Hope leaning on an antique urn in alto-relievo by Wilton." The sculptor also submitted a design for the monument to Thomas Guy and was paid thirty guineas for his model, although the commission was given to Bacon (Archives, Guy's Hospital).

Two very fine unidentified marble busts, signed by Wilton and dated 1766, were bought at the Duke of Newcastle's sale at Clumber and are now in the Fitzwilliam Museum, Cambridge. According to Throsby (Leicestershire, Vol. I, page 173), who wrote in 1791, Wilton's bust of Cromwell was at that time at Castle Donington in the possession of Lord Rawdon, and it was the carving of this bust which "had secured the artist an honourable employment under his present Majesty."

Wilton was one of the original foundation-members of the Royal Academy and exhibited there from 1769 until 1783. Finding that the taste for ornamental and monumental sculpture was declining, and also that his extravagant mode of living had caused him to exceed his income, he decided in 1786 to sell his premises and property by public auction and to retire into private life. In June, 1793, he was declared a bankrupt (Universal Magazine, 1793, Vol. I, page 472), but seems to have paid off his creditors very quickly. Three years previously he had been appointed Keeper of the Royal Academy and held the post until his death, which took place on 25 November, 1803. He was buried at Wanstead.

Allan Cunningham gives the following picture of Wilton: "Tall, portly and personable, a perfect gentleman in manners, a warm friend and an agreeable companion. He went always dressed in the extremity of fashion, with a gold-headed cane and a bag-wig plentifully be-powdered" (Lives of the Painters, 1830, Vol. III, page 80). Redgrave, in his Dictionary of Artists, considers the sculptor's "works are skilfully executed and boldly correct—sometimes graceful. His groups are crowded in their composition, yet not without grandeur of conception."

At a sale "of a man of fashion" held on 2 June, 1779, by Mr. Christie, the following lots by Wilton were sold; busts of Laocoon, Homer, Caracalla, Faustine, Sir Isaac Newton, Lepidus, Alexander, Julius Caesar, and a statue of Hermaphroditus. At the sale of the property of "a gentleman brought from his seat in Norfolk" on 16 February, 1781, held by Mr. Christie, one of the lots was "a bust of Alexander, very capital, from the antique, executed at Rome from the original by Wilton" (Archives, Messrs. Christie). At the Earl of Bessborough's sale of the contents of his house at Roehampton, held by Mr. Christie on 7 April, 1801, Wilton's statues of Apollo and Venus fetched £130 and £105 respectively. (Archives, Messrs. Christie).

Sir Archibald Campbell

WINBURY, —
fl. 1690–1710

He either carved the statue of Charles I at Worcester or re-cut an earlier one, the entries in the City Archives being not quite clear on this point. In 1690 there is an order that Mr. Alderman Haines "doe agree with Winbury the stone-cutter for the takinge downe of the King's picture and settinge it up againe," while in the audit of accounts for that year there is a payment of £5 to Winbury for "work done to and settinge up the King's picture." In 1710 he received a further payment for putting a new hand on the statue (Worcester City Archives).

WINCHESTER, WILLIAM
b. c. 1715, d. 1772

Son of Henry Winchester of Wimbledon, he was apprenticed to Thomas Dunn (q.v.) in 1729 and became free in 1739. According to the Court Book of the Masons' Company, he died in 1772.

Winchester signs a large monument to James Adams, 1765, on one of the outside walls of Stifford Church in Essex, a work illustrated in Palin's Stifford and Its Neighbourhood (1872).

WINDOVER, or WENDOVER, J.,
of Andover
fl. 1810–1830

He signs a large wall-tablet with fluted pilasters supporting a plain pediment to John Carter, 1810, at Kingsclere, Berkshire, and a smaller one to the Rev. John Blair, 1830, at Whitchurch, Hampshire. He was later assisted by his son, James Wendover the Younger.

WINFIELD, JAMES, of Leicester
fl. 1790–1800

Winfield was one of the best of the Leicestershire slate-workers and his productions are frequently found in that county. They include signed tablets to Lucretia King, 1795, at Barrow-on-Soar, and to Langley Bankes, 1796, at Loughborough.

WING, JOHN, of Bedford
fl. 1785–1813

He is presumably the son of the "Mr. Wing, architect of Leicester," who died at Bedford in 1794 (Gentleman's Magazine, 1794, Part II, page 675). He was employed as a mason during the rebuilding of Woburn Abbey, 1789–1792, receiving nearly £5,000 for masonry and carved stonework and also erected the main entrance-lodge and the stables (Bedford Archives).
Wing's tablets are architectural and occasionally have well-carved details carried out in coloured marbles. Examples in Bedfordshire include those commemorating Henry Palmer, 1786, at Northill; Robert Battisson, 1788, and the Rev. John Crowe, 1794, both in Bedford Parish Church; George Edwards, 1797, and Richard Raynsford, 1800, both at Henlow; Martha Monoux, 1803, at Sandy; and William Wright, 1807, at Aspley Guise. The signed tablet to Mrs. Bull (d. 1794), at Godmanchester, Hunts, is also his work.

The younger Wing also designed and built Bedford bridge between 1811 and 1813.

WINSER, EDWARD,
of Newton Abbot
fl. 1810–1817

He signs two tablets at Townstal, Devon, one to the Banfill family, 1810, and the other to William Banfill, 1817.

WIRMADGE, —, of Leicester

He was a worker in slate, and signs a slab, with a well-carved figure of “Hope” at the top, to Henry Payne, 1786, at Market Bosworth, Leicestershire.

WISE, THOMAS, the Elder
_d. 1686_

He was admitted to the freedom of the Masons' Company by redemption in 1672 and became Master in 1681. He also held the post of Master Mason to the Crown. In 1664 he was working at Greenwich with Stephen Switzer (q.v.). In 1681 he was engaged at the Tower of London, where he received £13 for a white-marble chimney-piece for Lord Alington's apartment (P.R.O., Works 5/36).

For “King Charles's new building” at Whitehall, Wise made marble chimney-pieces in 1682 (P.R.O., Works 5/37) and, in the following year, one of black-and-yellow marble for the “eating-room.” In 1684 he supplied another of white marble for the Duke of Grafton's lodging in the Palace (P.R.O., Works 5/38), and in 1685 he made the arch on the great staircase, carving the keystone and a wreath of laurel above the oval window. He was working at Whitehall up till the time of his death, for the last payments in 1686 (including that for the “rancce-marble” chimney-piece for the “Duchess Mazarin's lodging”) are made to his executors (P.R.O., Works 5/54).

Wise also worked under Wren during the building of the City churches, receiving payments for carved stonework which included four Ionic capitals for St. Michael's, Wood Street; the four urns at the corners of the steeple of St. Nicholas Cole Abbey; and two palm branches for St. Benet Grace (Bodleian, Rawlinson, 387). He was also employed at St. Paul's, and his various contracts for work in the Cathedral (including one for carving the great capitals) are given in the _Wren Society's Publications_, Vol. XVI. In 1685 he was paid £50 for the “Neece” for the statue of Charles II on Southwark Town Hall. (Rentals of the Bridge House, Corporation of London Record Office.)

WISE, THOMAS, the Younger
_fl. 1670–1706_

He was the son of Thomas Wise the Elder (q.v.) and did a great deal of work as a mason-contractor at St. Paul's with his partner, T. Hill (q.v.). Between them they received £24,509, while the carved stonework executed by Wise included scrolls, festoons, capitals at £15 a face, “window scroWes" at £6 each, and the keystone of the great window on the inside of the portico. Shields carved by him for the Cathedral are illustrated in the _Wren Society's Publications_, Vol. XV, Plate 64. Wise, who was Master of the Mason's Company in 1695, was also a “merchant of Portland stone,” and in this capacity supplied stone for the new buildings at Hampton Court.

(Various references, _Wren Society's Publications._)

WISE, WILLIAM
_fl. 1673–1703_

He was the second son of Thomas Wise the Elder (q.v.) and was apprenticed to his father in 1673, becoming free in 1680. He was Renter Warden of the Masons' Company in 1695, Upper Warden in 1696 and Master in 1703.

In 1683 he and his partner, Samuel Fulkes (q.v.), were working as masons at Winchester Palace (_Wren Society_, Vol. VII, page 36).

WITTHENBURY, JAMES,
of Worcester

In A. Tindal Hart's _Life of Lloyd, Bishop of Worcester_, is printed (page 258) the contract between the bishop's widow and Withenbury for a monument to her husband. The monument was to be of marble, to cost £140, to be finished by 1 August, 1718, to be erected in Fladbury Church, Worcs, and to consist of a half figure of the bishop in an architectural setting. At the restoration in 1865 of Fladbury Church the monument was unfortunately dismembered.
WITHERS, ROBERT
He signs a wall-tablet, with a draped urn in front of a pyramid, to William Davison, 1777, at Milverton, Somerset.

WOLFE, or WOOLFE,
BARTHOLOMEW
b. c. 1654, d. 1720
He was the son of Bartholomew Woolfe, of Bromley, Kent, yeoman, and was apprenticed to John Palmer in 1668, becoming free in 1675. He later became one of the leading City masons and worked for several of the City Companies, including the Fishmongers.

Wolfe died in 1720, for his executors received the payment for work done at the Fishmongers’ Hall during the latter part of that year (Prime Warden’s Accounts).

WOOD, GEORGE, of Gloucester
fl. 1785–1828
His best work is the monument to Charles George, 1807, at Rodmorton, Gloucestershire, which has a pretty relief of a mourning widow standing by an urn, while her little daughter clutches at her skirt. Other signed works by him in the county include those to John de la Bere, 1785, and Alexander Jaffray, 1818, both in Cheltenham Parish Church; Dr. John Bosworth, 1785, at Tortworth; John Smyth, 1809, in Gloucester Cathedral; Edward Rogers, 1810, at Dowdeswell; Martha Taylor, 1817, at Charlton Kings; Capel Molynex, 1821, at Prestbury; and Lady Robert Somerset, 1823, and the Duchess of Beaufort, 1828, both at Badminton. At Stanton, Worcestershire, is his monument to Reginald Wynn, 1819.

Wood, who also had a yard at Cheltenham, became a bankrupt in 1820 (European Magazine, 1820, page 561).

WOOD, H.
Wood, who was presumably a Yorkshire craftsman, signs a large tombstone in the churchyard of Wentworth, Yorkshire. This has a well-cut angel’s head at the top and commemorates Hannah Jennet, 1769, “late Housekeeper to the Most Hon. the Marquis of Rockingham.”

WOOD, HENRY, of Bristol
fl. 1801–1830
He is described as “architect and statuary of London” in 1801, when he bought the yard and business of Thomas Paty, of Bristol (q.v.), and may presumably be a son of Henry Wood the Elder (q.v.) of London.

Wood’s monuments and tablets, which are quite pleasant, must have been much admired in his day, for they are not only found all over England, but also in Ireland and the West Indies. The best commemorates Charles Tottenham (d. 1795), at New Ross, Co. Wexford, and has a relief showing three sons mourning by a medallion portrait of their father.

Other signed memorial works by Wood include those to Catherine Smith, 1801, and M. J. Ward, 1829, both in Barbados Cathedral; William Clarkson, 1802, at Alvington, Monmouth; Mrs. Tottenham, 1806, at New Ross, Co. Wexford; the Rev. Thomas Pentycross, 1808, at Wallingford, Berks; Thomas Browne, 1811, at Church Stoke, Salop; Thomas Taylor, 1815, at Marlow, Bucks; Clement Tudway, 1815, in St. Cuthbert’s, Wells; Francis Smith, 1815, at Shepton Mallet, Somerset; Frances and Lucy Ireland, 1816, in Christ Church, Bristol; Arabella Schaw, 1819, in St. Mary Redcliffe, Bristol; Richard Turville, 1820, at Ewenny, Glamorgan; Richard Goodlad, 1821, at Droxford, Hants; Sir Hugh Smyth, Long Ashton, Somerset; and Gertrude Allen, 1825, at Jeffreyston, Pembroke.

Wood’s son, Henry Wood the Younger, signs tablets to General Kinsey, 1837, at Abercynon, Monmouth; Lant Carpenter (with a medallion portrait), 1840, in Lewins Mead Chapel, Bristol; and S. M. Alleyne, 1847, in St. Thomas’s, Barbados.

WOOD, HENRY, the Elder,
of London
fl. 1771–1801
Wood worked under Henry Holland, the architect, at Lord Clive’s house at Claremont, 1771–1772, carving four Corinthian capitals for the columns and six for the pilasters. He also made six lions’ heads in the frieze on the portico, as well as “two thermes” and three masks of satyrs (Notebook of Henry Holland, Soane Museum). In 1775 he was employed by Lord Craven at Benham, where he carved six Ionic capitals for the pilasters on the front of the house.

Between 1783 and 1789 Wood was at Carlton House, supplying a chimney-piece for the bow room costing £80, and another, “very highly finished” for the lower eating-room at £42 10s. He was also paid £35 for a “rich stone in veined marble for the lower octagon” and also for the carved stonework of the riding-house. The total sum he received during this period amounted to £1,050 (P.R.O., H.O.73/24).
In 1789 he went to Woburn Abbey, where he worked for two years. In 1790 he built the balustrade to the south front of the house, and in 1791 the quadrangle, as well as an entrance-lodge. Between 1790 and 1792 he received nearly £1,600 for stone and wood-carving and other work at Woburn. In 1796 he was paid £34 2s. by the Duke of Bridgewater for two French marble chimney-pieces for Cleveland House, London (Archives, Duke of Bedford and Lord Brownlow).

In 1801 he received £423 for marble chimney-pieces for the Mote, which was then being built near Maidstone for Lord Romney (Romney Archives, Maidstone Museum).

WOOD, JOSEPH

He signs a large architectural wall-tablet, about 8 ft. high, to Catherine Hornby, 1772, at Blyth, Notts. The work is in stone and marble with Doric pilasters supporting a plain pediment surmounted by an urn, while flaming lamps stand to left and right.

WOOD, LANCELOT EDWARD, of Chelsea
fl. 1804-1829

In 1809 he received £22 for “a veined-marble chimney-piece with reeded pilasters” and, three years later, £30 for another with a “water-leaf design,” both being for Hampton Court (P.R.O., Works 5/99).

Wood’s tablets are competent but dull, the best being those which commemorate Lady Caroline Leigh, 1804, at Adlestrop, Glos; Josiah Tead, 1807, Bridport, Dorset; John Manfield, 1808, at Portisham, Dorset; Levett Ibbetson, 1809, at Castor, Northants; George Gregory, 1822, at Harlaxton, Lincs; and Bishop Richard Beadon, 1824, in Wells Cathedral. His yard was in the King’s Road.

WOOD, THOMAS, of Bingham
b. 1760, d. 1841

He carved a number of tombstones in Nottinghamshire and examples of his work can be seen at Bingham (1794), Whaton (1815) and Lowdham (1785, 1799, 1820, 1826). Wood was buried at Bingham, where his epitaph describes him as “well-known for more than a century as an ingenious carver of tombs and gravestones.”

WOOD, T., of Hereford
fl. 1787-1800

He signs tablets in Herefordshire, the best being those to Elizabeth Allen, 1787, at Kinnersley, and Thomas Lane, 1799, at Leominster. He may possibly be the Thomas Wood, son of John Wood, “citizen and mason of London,” who was apprenticed to his father in 1774, but did not take out his freedom until 1796.

An “R. Wood” of Leominster signs a tablet to J. Phillips, 1826, at Dilwyn, in the same county.

WOOD, THOMAS, of Oxford
b. 1646, d. c. 1695

In 1676 Wood was paid “for the anticks and other worke about Adam Brome's Chapel” in St. Mary’s, Oxford, and three years later was engaged by Richard Frogley, a carpenter of the city, to do the mason’s work for the Bishop of Oxford’s new palace at Cuddesdon, which Frogley had contracted to build. Besides doing the stonework of the walls, etc., Wood also supplied the door-case of Burford stone in front of the house, but he was unable to get his money, and in 1680 brought an action against his employer. In the course of the evidence it appeared that Frogley had also commissioned a stone chimney-piece from Wood for “Esquire Lentall’s” house at Hasely (Archives, Vice-Chancellor’s Court, Misc. 1681). In the Vice-Chancellor’s accounts are also payments of £87 19s. 2d. in 1675-1676 for “laying ye marbles in St. Maire’s Church, which marble was the gift of Dr. Ralph Bathurst, Vice-Chancellor.” In the following year there is a payment of £1 10s. 0d. for “cutting Orlic College Arms in Adam Brome’s Chapel.”

From 1679 until 1683 Wood was the mason responsible for building the Ashmolean, receiving nearly £2,000; in 1682 he was paid for a “stained marble” chimney-piece (Vice-Chancellor’s Accounts), and in 1693 received £10 for setting up “at Water Eaton for the Lord Lovelace a white marble chimney-piece” (British Museum, Ad. MS. 22,188).

In 1671 he carved the tablet commemorating Mr. John Myddelton for the cloisters of Brasenose College (Chirk Castle Archives), and in 1680 made the monument erected to F. Junius in St. George’s Chapel, Windsor, at the charge of the University (Vice-Chancellor’s Accounts, 1680).

Wood was described as “aged twenty-two” and “of St. Peter’s in the East, Oxford, Sculptor,” when, in 1668, he took out a licence to marry Alice Beach, of Patchall, Herefordshire, at St. Margaret’s, Westminster. (Wood’s Life and Times, Vol. IV.)

WOOD, THOMAS, of London
b. c. 1760

He was the son of John Wood, mason, “of
Woodall, C., of Carlisle

He signs a tablet with a portrait relief to William Hildebrand, 1832, in Carlisle Cathedral.

Woodall, John

fl. 1702–1731

Woodall was assistant to Benjamin Jackson (q.v.) during the building of Drayton Hall, Northamptonshire, and signs receipts for payments and probably himself was responsible for some of the carved work (Archives, Colonel Stopford-Sackville).

Woodall worked as a master at several of the Royal Palaces and in 1715 carved a marble chimney-piece for the Countess of Schulemburg's apartment at St. James's Palace (P.R.O., A.O.1, 3448/149). He was also the master responsible for the repairs to Hicks Hall (the Middlesex Sessions House) from 1723 until 1728 (Parliamentary Report, 1731).

In the Earl of Westmoreland's archives there is a letter from John Fane, of Mereworth, written in 1730 to Lord Westmoreland about a matter to which they had been giving some thought, namely, a sculptor for the monument to Lady Westmoreland. "It is but just come into my head," he says, "and I will send by the next post to Mr. Woodall my mason, the same draught and order him to make an estimate of it."

Woodall may well be the "Mr. Woodhill Master Mason to George I" who died on 4 September, 1735 (Gentleman's Magazine, 1735, page 559).

Woodington, William Frederick

b. 1806, d. 1893

He was born on 10 February, 1806, at Sutton Coldfield, in Warwickshire, but was brought to London at an early age and about 1820 was apprenticed to R. W. Sievier (q.v.), who was then working as an engraver. In the same year he gained a Silver Medal from the Society of Arts, but in 1823 decided to follow his master in abandoning engraving in favour of sculpture.

In his new profession Woodington apparently worked for Croggan (q.v.), who succeeded Coade (q.v.) as a manufacturer of artificial stone. In 1851 the latter's trade-card and a sheet of paper inscribed "Mr. Woodington, sculptor, 24 May, 1837, Princess Victoria's birthday," were found in a bottle inside the artificial stone lion which for many years had stood on top of a brewery on the South Bank, but which was taken down when the building was demolished to make way for the Festival Hall (The Times, 9 March, 1951).

In 1844 Woodington exhibited "The Deluge" and "Milton Dictating to his Daughters" at Westminster Hall. The Literary Gazette of that year (page 466) considered them "able groups, designed with much skill and beautifully executed. The mother and son in the first are finely imagined, and there is a calm earnestness in Milton and a sweet simplicity in the daughters which are extremely pleasing." Four years later the sculptor made statues of William, Earl of Arundel, and Hubert, Earl of Kent, for the House of Lords, while in 1850 came the work for which he is best known—the great bronze relief of the Battle of the Nile at the base of the Nelson Column in Trafalgar Square.

In 1846 he had executed a bust of George III, based on a work by John Bacon, R.A. (q.v.), for the Upper School at Eton, while ten years later he made a colossal one of Sir Joseph Paxton for the Crystal Palace and a statue of James Steel for Carlisle. His bust of Patrick Macdowell, R.A., dated 1862, is now at Burlington House.

The second premium of £500 for the Wellington memorial was won by Woodington, and in 1861 he carved the reliefs for the Consistory Chapel in St. Paul's, where the monument (executed by Alfred Stevens) was placed. In 1867 he made statues of Columbus, Galileo, Drake, Cook, Raleigh and Mercator for the new Liverpool Exchange, and was later responsible for the sculpture in the pediment, which represented "Wisdom sending forth her Messengers to the Nations of the Earth." In 1870 he was chosen to execute statues of Plato, Archimedes and Justinian for the Civil Service Commission Buildings in Burlington Gardens.

Woodington also worked as a painter as well as a sculptor, and showed a number of pictures at the Royal Academy. In 1851 he was appointed Curator of the School of Sculpture, and in 1876
became an Associate of the Academy. He exhibited there, 1825–1882, and at the British Institution, 1827–1832. He died on 24 December, 1893, and was buried in Norwood Cemetery. (Art Journal, 1894, page 60; various references Builder and Art Journal.)

WOODLEY, —, of Torquay
fl. 1840–1866

He not only made monuments in his yard at St. Mary Church, near Torquay, but also carried on a flourishing business in local marbles, manufacturing "columns, vases, chimney-pieces and a variety of other ornamental articles" (Art Journal, 1856, page 4).

Woodley signs a number of minor monuments and tablets, the most important commemorating Mary Blossome, 1840, at Dursley, Gloucestershire. This has a relief of a woman leaning on a broken column, the Corinthian capital of which lies at her feet.

WOODMAN, WILLIAM,
the Elder
b. c. 1654, d. 1731 (?)

Woodman was first apprenticed to Francis Devonshire, citizen and haberdasher, in 1668, but later decided to be a mason and was turned over to William Matthews, becoming free in 1678. In 1687 he built the "resurrection gate" of St. Giles-in-the-Fields, the remarkable wooden carving being executed by an unknown artist named Love (Notes and Queries, Third Series, Vol. V, page 67). In 1689 he became an Assistant in the Masons' Company and was afterwards Renter Warden in 1703 and Master in 1708.

In 1704 Woodman put the finishing touches to the fine monument to the 4th Earl of Leicester in Penshurst Church, Kent, which had been left incomplete at the death of William Stanton (q.v.). He was also employed at the Dowager Lady Leicester's house in London, where he made a marble cistern (Sidney Archives). In 1705 he and his son, William Woodman the Younger, built a house for Lord Ashburnham at Brockborough Park (Ashburnham Archives).

As a monumental statuary, Woodman did extremely important work, his masterpiece being the signed monument to Lord and Lady Newhaven, 1728, at Drayton Beauchamp, Bucks. Here Lord Newhaven, in his Peer's robes, reclines on a sarcophagus, while his wife (a superbly carved figure) sits for ever at his feet, gazing at her husband. This remarkable work in its little-visited church is one of the most outstanding monuments in England, and deserves to be better known and appreciated.

Woodman also signs monuments to Edward Mansell (d. 1681) and Monck, Bishop of Hereford (d. 1661, monument erected 1723), both in Westminster Abbey; and to John Nicholas, 1711, in Winchester Cathedral. Woodman's cartouche tablet to Elizabeth Calnent, 1715, is in Maidstone Parish Church, Kent.

In the Court Book of the Masons' Company there is a curious minute made in 1719 which desires Woodman to visit a certain Mr. Robinson "who alleges to have discovered an art to glaze cornerstones for chimneys and prevail with him if he can to produce a specimen to the Company of one of these stones 4 ft. long, and then this Court will further consider of the proposition by him made to the Company."

WOODMAN, WILLIAM,
the Younger
fl. 1713–1741

He was the son of William Woodman the Elder (q.v.) and carried on the family business after the death of his father. He signs the monument with a life-size standing figure of Daniel Dobson (d. 1741), at Cheshunt, Herts. In 1713 he and his father made the marble pavement for the chancel of Whitchurch Church, Salop, but it was not till many years later that Woodman the Younger sent in his account for £46; writing to Alexander Duncombe in October, 1733, he explained that "being under an extrem gufl of the Gout, I could not go to render the bill and was forc'd to send one of my Dautrs who this day rec'd the money" (Bridgewater Archives).

WOODRUFF, FRANCIS
b. c. 1657

Son of John Woodruff, citizen and mason, he was apprenticed to his father in 1671, but on the latter's death was turned over to William Hammond and became free in 1679. The younger Woodruff must have died after 1693, for in that year he received £31 for carving work at Brewers' Hall (Archives, Brewers' Company).

In the account-book of Sir Charles Kemeys, Bart. (in the possession of the writer), is a payment to Francis Woodruff for a chimney-piece for an unnamed house. He also signs an architectural monument to Edward Cotton, 1682, at Wokingham, Berks.

There are several other masons and carvers of this name, including Edward Woodruff of Oxford and John Woodruff of Windsor. The former was to be admitted a Freeman of Oxford in 1667 without fine if he could "in a workmanlike manner cut or carve the King's Arms or such
other signes for the use of the City as the Mayor
or his brethren shall direct" (Oxford Council
6), while the latter was paid £23 by Lord We-
mouth for work at his house in Old Windsor
(Longleat Archives). John Woodruff died in 1728
and was buried in Windsor Parish Church, the
family business being carried on by his son, John.
There is a letter dated 1743 to the younger
Woodruff from Thomas Gayfere the Younger
(q.v.) reminding him that he owes Andrews Jelfe
(Gayfere’s master) money. “My master imagines,”
he writes, “that it may have slipt your memory, so
desires you would order ye payment and send him
word by next post” (British Museum, Ad. MS. 27,
587).

WOODS, T., of Titchfield
He signs a large wall-tablet to G. A. Thomas,
1804, at Wickham, Hants.

WOODWARD, —, of Bakewell
He signs a large tablet at Wortley, Yorks, to
Benjamin Newton, 1818.

WOODWARD, EDWARD,
of Chipping Campden
b. c. 1697, d. 1766

His father was Thomas Woodward of Chipping
Campden, who built the tower of Blockley
Church in 1728 (Gentleman’s Magazine, 1793, page
297) and died in 1748 at the age of seventy-six.

Edward Woodward, who was working at
Ardicot Park, Gloucestershire, from 1751 until
1765 (West Archives), also signs a number of
monuments and tablets, including those to Edward
Croft (d. 1711) at Blockley, Glos; John Graves,
1719, at Mickleton, Glos; Robert Martin, 1720,
at Peppard, Glos; and John Brandis, 1724, at
Alderley, Warwick. They are usually architectural
works, with standing cherubs, etc., although
the one commemorating his grandfather, Thomas
Woodward (d. 1716), at Mickleton, is a cartouche
tablet.

Edward Woodward died in 1766 and was
buried in the churchyard of Chipping Campden
under a tomb which he had built himself. His
son Richard (fl. 1723–1755) built St. Anne’s
Church, Bewley, in 1745, while another son,
Edward, carried on the family business, but
became a bankrupt in 1777 (London Magazine,
1777, page 51).

A John Woodward was paid for cutting stone
for the University Schools, Cambridge, in 1728.
Eight years previously he executed the carved
woodwork for the “Dome Room,” receiving £4
“for two pillar cappatalls, very large, after the
Corinthian order” and £24 for six similar double
pilasters (Vice-Chancellor’s Accounts).

(H. M. Colvin, Architectural Review, 1948.)

WOOLES, WILLIAM
b. 1804, d. 1835

He was the son of William Woole, a surveyor
in Bristol, and as a boy came to London, where
he entered the studio of E. H. Baily (q.v.). In 1827
he won a Gold Medal from the Society of Arts for
an original model of a historical group, and two
years later joined the Royal Academy Schools,
gaining Silver Medals in 1830 and 1833.

Woole exhibited at the Suffolk Street Galleries
in 1832 and at the Academy, 1830–1833, showing
busts and medallic portraits. He died on 4 May,
1835.

(Gentleman’s Magazine, 1835, Part I, page 667.)

WOOLNER, THOMAS, R.A.
b. 1825, d. 1892

Woolner was born at Hadleigh, in Suffolk, on
17 December, 1825, and from an early age showed
a decided talent for art. He first went to school in
Ipswich, but his father later received an appoint-
ment in the Post Office and the family then moved
to London, where the boy was sent to study under
Behnes the painter. The arrangement was soon
terminated by the latter’s death, but young
Woolner had made so good an impression that
William Behnes the sculptor (q.v.), brother of his
late master, offered to take him into his studio
without a premium, only stipulating that when he
was sufficiently advanced he should work for a
short time without wages, and afterwards, during
his term, for rather less than the ordinary rate of pay.

When four years had elapsed it was on Behnes’
suggestion that Woolner joined the Royal Academy
Schools in 1842, though he still continued to
carve for his master. In 1843 he sent a group
entitled “Eleanor Sucking Poison from Prince
Edward’s Wounds” to the Academy, and in the
following year exhibited a group of “The Death
of Boadicea” at Westminster Hall. This work was
“produced under extraordinary disadvantages,”
according to the Literary Gazette (1844, page 483),
which accepted it “as an earnest of better things.”
In 1845 Woolner won the Silver Medal from the
Society of Arts for a bas-relief entitled “Affection.”
Two years later he met Rosetti and through him
became one of the Pre-Raphaelite Brotherhood,
which he joined as sculptor-member.

In 1849 Woolner exhibited “Titania and the
Indian Boy” at the British Institution, but its
reception did not encourage him to continue with
idealistic sculpture and he turned instead to making medallion portraits. In 1850 he modelled one of Mrs. Coventry Patmore, wife of the poet. This was apparently a great success, for Patmore wrote in a letter: “The more I look at your medallion of my wife, the more I admire it, and the more I feel the great obligation you have put me under in doing it.” In the following year Woolner made a medallion of Carlyle and, having already carved a medallion of Wordsworth, entered for the competition held to choose the sculptor for the poet’s memorial. This he fully expected to win, but his model was rejected and this rebuff, coupled with an unfortunate love-affair, made him decide that there was no future in sculpture and that he must seek his fortune elsewhere. In 1852 he set sail from Gravesend, bound for the Australian goldfields, and among the Pre-Raphaelites who went to see him off was Ford Madox-Brown, whose noble picture “The Last of England” was inspired by seeing the emigrants on the ship.

Woolner, however, soon discovered that it was not easy to make money in the goldfields and started to work as a sculptor in Australia. He opened a studio in Melbourne and made a number of medallions of notabilities of the time, including the Governor-General, Sir Charles FitzRoy.

In 1854 he returned to England, where his fellow Pre-Raphaelites were able to assist him, for their work was now accepted in artistic circles. The turning-point in his career came with his bust of Tennyson and the portrait-medallion of Carlyle, both executed in the year following his return, while in 1856 he made an equally popular medallion of Browning. This is now in the Birmingham Art Gallery, while a plaster-cast of the Carlyle medallion is in the National Portrait Gallery. In 1858 Woolner modelled four figures in alto-relievo for the pulpit of Llandaff Cathedral, and later came his bust of Cardinal Newman and the Gladstone monument for the Bodleian, with three fine bas-reliefs from the Iliad inserted into the base of the pedestal.

In 1871 he exhibited a bust of Dickens at the Royal Academy, based on the death-mask he had taken at Gadshill, and in the same year he made four bas-reliefs of “The Acts of Mercy” for the fountain in memory of Mrs. George Moore, erected at Wigton. In 1872 he executed the memorial to Sir John Simeon for Newport, Isle of Wight, and in 1880 he made a medallion of Joseph Chamberlain for the fountain outside Birmingham City Hall. For Birmingham also he made a statue of George Dawson, but this was later taken down and is now housed in the City Library.

Woolner exhibited at the Royal Academy, 1843–1893. He was elected an Associate of the Academy in 1871 and a full member three years later, when he deposited as his Diploma work a relief entitled “Achilles and Pallas Shouting From the Trenches.” In 1877 he was appointed Professor of Sculpture on the death of Weekes (q.v.), but never lectured, and resigned in 1879. His last work was “The Housemaid,” a life-size figure of a servant-girl wringing out the cloth with which she washes the doorstep. After his death this was cast in bronze and exhibited at the Academy in 1893.

Woolner died on 7 October, 1892, and was buried in Hendon churchyard. According to his obituary in The Times “his workmanship was as thorough as his study, his time and labour were freely expended in the pursuit of perfection, without regard to the pecuniary considerations that too often take precedence of all else. . . . In life, as in art, he was the uncompromising foe of sham, of claptrap and of superficiality.”

(Amy Woolner’s Thomas Woolner, Life and Letters; Art Journal, 1894).

WRIGHT,  

In 1680 he received £120 from the Duke of Newcastle for chimney-pieces in cedar-wood, and was also paid £52 for others in marble for Nottingham Castle (Throsby's *Nottingham*, page 22).

A "William Wright," possibly the same man, was apprenticed to John Shorthose (q.v.) and became free in 1672.

WRIGHT, JOHN, of Chester  
fl. 1820–1830

As a mason he was responsible for building St. Bridget's Church, Chester, in 1827, executing the work "in a superior style of elegance" (Hemmingway's *Chester*, Vol. II, page 116).

His monuments are Hellenistic in design and uninspiring in workmanship, although Hemmingway (op. cit., page 118), calls the tablet to the Shaw family, 1829, in St. Bridget's Church "a beautifully executed work." Other signed tablets by Wright in Chester include those to Margaret Hallon, 1824, in the Cathedral, and Simeon Leet, 1826, in St. Oswald's Church.
WYATT, EDWARD

b. 1757, d. 1833

Wyatt, who had a shop at 360, Oxford Street, chiefly worked as a wood-carver and gilder, and in this capacity was employed at Windsor Castle for many years, repairing cabinet work, picture-frames, etc. In 1808 he carved a “rich prize” for the Queen’s Audience Chamber “emblematically describing two of the Elements, Land and Water.” He was also responsible for most of the wood-carving at Carlton House.

As a worker in stone, Wyatt was paid in 1808 for “carving for the entrance-gate to St. James’s Park in six panels, and nine lion-heads and a rich pattern of twenty-four flowers” (P.R.O., Works 5/98). In 1815 he was paid £200 for carving at Ashridge Park (Archives, Lord Brownlow). He died in 1833 and was buried at Merton in Surrey, a district in which he owned property.

WYATT, JAMES

b. 1808, d. 1893

Wyatt, who was a son of M. C. Wyatt (q.v.), exhibited a statue of Richard Coeur de Lion at Westminster Hall in 1844. The Literary Gazette of that year (page 482) described the work as “a bold and spirited horse and rider, the former amazingly life-like, the action of the King just and appropriate,” while the Builder (1844, page 367) considered it to be “of considerable beauty.”

At the Great Exhibition of 1851 Wyatt showed a model of a quadriga designed for a triumphal arch, and equestrian statues of Queen Victoria and the Prince Consort. The Times said of the Prince’s horse that it was “admirably modelled and comes nearer to life than any which quite recent art has produced,” and the statue was later purchased by the owner of the Coliseum, who displayed it outside the building. Wyatt also carved an equestrian statuette of Viscount Hardinge and a group of figures for the Bank of Scotland in Edinburgh.

He exhibited at the Royal Academy, 1838–1844, showing various works, including a marble statue entitled “Lila Asleep.” He assisted his father on many occasions and, after the latter’s death, completed the unfinished sculpture in the studio.

WYATT, MATHEW COTES

b. 1777, d. 1862

Youngest son of James Wyatt (1746–1813), the architect, he was educated at Eton and obtained employment at Windsor Castle when he was quite young, owing to his father’s position as Surveyor General. He decorated thirty-three ceilings in the Castle and was also commissioned to paint twenty-eight full-length figures of various Knights of the Garter from the time of Edward I for the Robing Room; for this he received £1,173 (P.R.O., Works 5/103). Wyatt soon became a favourite of the King and Queen and received from the latter the present of a large silver teacup.

His first public commission was for the Nelson Monument to be erected in the quadrangle of the Mansion House in Liverpool. He designed the work in 1813, although most of the modelling was carried out by Sir Richard Westmacott (q.v.) (Builder, 1866, page 335), and he also executed mural paintings for the Liverpool Town Hall.

In 1816 Wyatt was employed on decorative work at the Royal Mint (P.R.O., Works 5/112), and four years later he designed and carved the famous cenotaph to the Princess Charlotte in St. George’s Chapel, Windsor. This work, which was paid for by subscription limited to a shilling, was over-praised at the time of its unveiling in 1824, but has been unnecessarily attacked during the present century. It is only fair to the sculptor to remember that the monument is now seen in a hard, clear light, whereas his original design provided for yellow glass in the side windows, so as to cast a golden glow over the marble. Indeed, the writer can remember the coloured glass being in position in 1912, when he was a boy at Eton.

Wyatt’s next work was the statue of George III in Cockspur Street. Here the pendulum swung the other way, for the statue when erected was the target of the critics who objected, not only to the King’s pigtail, but also to the fact that the work had not been the subject of an open competition, but had been given to Wyatt in 1822 by a Committee of which Lord Liverpool was Chairman. Today the statue and the pigtail are regarded with affection by all Londoners and it was one of the two statues removed to the country for safety during the Second World War.

Wyatt’s original design, which took him twelve months of “intense exertion” to create, consisted of the King standing in a quadriga accompanied by “Fame” and “Victory,” while “Faction,” represented by a hydra-headed monster, “is levelled in the dust” (Gentleman’s Magazine, 1822, Part I, which also gives a Plate). As nothing like enough money was forthcoming for this grandiose scheme, the Committee luckily decided to be content with an equestrian statue, but owing to various delays it was not until 1836 that it was ready to be unveiled.

The site chosen in the first instance was Waterloo Place, but it was then discovered that this meant that the Duke of York on his column
would be turning his back on his royal father. A site in Cockspur Street was next decided upon, but on the eve of the statue's erection the Chairman of the Committee (now Lord Kenyon) put a mysterious notice in the Press, stating that "a calamitous event had caused them (the Committee) extreme mortification and the artist employed severe loss and distress," adding that "the calamity had been produced by some unaccountable accident or by some malicious design, the motive for which we do not pretend to assign or ascribe to any person in particular."

"Malicious design" was apparently the root of the trouble for, in a speech at the unveiling, Sir Frederick Trench said that "the mischief was not accidental, it could not be accidental; this was confirmed by the most scientific men of the country."

The statue having been repaired, a further difficulty arose when Mr. Williams of the firm of Ransom and Co., Bankers, considered "that an injury would be done to his premises" by its erection opposite his bank and made an affidavit to this effect in the Vice-Chancellor's court. It was only after "two months of tedious and expensive litigation" that the Lord Chancellor removed the injunction, and even then Mr. Williams had the last word, for he firmly shut his bank and drew all the blinds "as if for public mourning" on the day that the statue (then "a gorgeous gold colour") was unveiled by the Duke of Cumberland (Literary Gazette, 1836, page 507).

Wyatt did a great deal of work for the Duke of Rutland, his most important commission being for the monument to the Duchess. This was unveiled in the mausoleum at Belvoir Castle in 1828 and shows the Duchess rising from the tomb with extended arms, her face turned towards the clouds in which are seen four cherubs, representing the children who predeceased her. The group, like the one at Windsor, depends largely for its effect on the lighting, which in this case comes through stained-glass windows placed above, and on either side of, the monument and is thus "judiciously contrived so not to be obvious to the visitor" (Eller's Belvoir Castle, page 252). Wyatt painted the ceiling of the "Elizabeth saloon" at Belvoir and carved the marble statue of the Duchess which it contains. He also made a side-table of the same material for a punch-bowl "covered in appearance with a table-napkin, the folds of which are so accurately represented in the marble as to require a close inspection to convince the observer of the solidity of the material" (op. cit., page 315).

In 1834 Wyatt held an exhibition of his works, the pièce de résistance being the figure of the Newfoundland dog "Bashaw," belonging to Lord Dudley, which had taken the sculptor three years to complete and was carried out in various coloured marbles. The catalogue describes it as being "the most elaborate of a quadruped ever produced by ancient or modern art." Certainly no expense was spared; even the eye of the dog was "with great fidelity copied by the insertion of a gem in colour and lustre almost equalling nature," while the pedestal on which the figure stood was of black marble "with panels decorated with festoons of fruit, imitated in gems" (Literary Gazette, 1834, page 120). "Bashaw" was auctioned by Messrs. Christie at the Dudley sale of 1887, but was bought in.

A certain amount of drama was undoubtedly attached to several of Wyatt's works, and in this category must be included the group of "St. George and the Dragon," commissioned by George IV. It had been originally intended for St. George's Hall, Windsor, but only the horse and dragon had been modelled at the time of the King's death, and the group was left on the sculptor's hands incomplete. In this state it was cast in bronze and shown at the Great Exhibition, where it failed to find a purchaser. In 1865, however, James Wyatt (q.v.), the sculptor's son, sold it to the Second Duke of Wellington for £750 and it was placed in the gardens of Apsley House. In 1950 the Seventh Duke had the group brought to Stratfield Saye and erected in front of the building.

Wyatt's last work probably raised the bitterest storm of opposition and was the target of more ridicule than any other statue ever erected in London. It was a statue of Wellington designed for the top of Decimus Burton's arch at Hyde Park Corner. The idea had originally been suggested by the Court of Common Council and a Committee was formed which collected a large sum of money (stated by one paper to amount to nearly £30,000) for the purpose. Wyatt, assisted by his son James (q.v.) worked on it from 1838 until 1846, when it was cast in bronze. The result was an equestrian statue nearly 30 ft. high, showing the Duke with a huge Roman nose and with his right hand stiffly pointing a baton between his horse's ears. The huge mass was hauled into position with considerable difficulty and then the storm broke. The Press had already disapproved when a wooden model had been tried out on the arch in 1839, but now they attacked in full force. Nobody had a good word for the statue; even the mild Mr. Burton thought it would ruin his arch, while the Institute of Architects protested, questions were asked in Parliament and newspapers of every shade of political opinion were
filled with angry letters. Even Punch joined in the fray, publishing jokes and cartoons ridiculing "The Arch Duke." Lord Morpeth, Chief Commissioner of Works, however, stood firm and in course of time the agitation lessened, although it never completely died down. In 1883 the unwanted statue was removed from the arch and banished to Caesar’s Camp on the sandy, scrubby heaths of Surrey, where it now stands on a small hillock in a copse, the Duke's baton ever pointing over Copenhagen's head.

Wyatt also carved an equestrian statuette in ivory of Lord Anglesey, and two small bronze portraits of horses in high relief for George IV. His bust of the Duchess of Rutland (1826) is at Castle Howard, while one of George III, which stood for many years in the Board Room of the Treasury, has now been lent to the British Embassy at Lisbon. His undated bust of the Princess Charlotte is in private possession and is a replica of the one sent to her husband, Prince Leopold, shortly after her death.

Besides the two monuments already mentioned, Wyatt signs those to the Rt. Hon. Isaac Corry, 1813, at Newry, Co. Down; to Charlotte Pigott, 1823, at Quainton, Bucks; and to Richard Thompson, c. 1834, at Escrick, Yorks.

He exhibited at the Royal Academy, 1800-1814, and at the British Institution, 1808-1822. He died at his home in the Harrow Road, London, on 3 January, 1862, and was buried in Highgate Cemetery.

(Information, Miss E. Wyatt; Art Journal, 1862, page 86; Country Life, 25 May and 15 June, 1951; authorities cited in text.)

WYATT, RICHARD JAMES
b. 1795, d. 1850

He was born on 3 May, 1795, the son of Edward Wyatt (q.v.) and a cousin of M. C. Wyatt (q.v.). In 1809 he was apprenticed to J. C. F. Rossi (q.v.) and three years later joined the Royal Academy Schools, where he won a Silver Medal in 1815.

Wyatt first exhibited at the Academy in 1818 and shortly afterwards met Sir Thomas Lawrence who was impressed by the young sculptor's work and took an interest in him. When Canova came over to England, Lawrence introduced him to his protégé and the Italian was interested enough to promise Wyatt his protection and permission to work in his studio should he ever go to Italy.

Nothing would now satisfy Wyatt except a chance to work in Rome. He first travelled to Paris, where he studied for a short time under the distinguished Italian sculptor Bozio, and finally arrived in Rome in 1821. Here he found that Canova had not forgotten him and that there was a place for him in the studio. Wyatt became very devoted to his master and remained with him until he (Canova) died. He then worked for a short time in Thorwaldsen's studio and finally decided to set up on his own account, but was for a long time completely neglected and did not get his first commission for five years.

Once he had gained recognition, however, he soon became one of the most sought-after sculptors in Rome and his ideal statues and groups were eagerly purchased by English and foreign visitors to the city. A visitor to Rome in 1829 records in the Literary Gazette (page 476) that among the works in Wyatt's studio there were a statue for Sir Matthew Ridley, monuments to the memory of Lady Barrington and Mrs. Buller and a group for Sir Robert Lawley. Among his patrons was the Duke of Devonshire, for whom he executed one of his best-known and most frequently illustrated works, the statue of Musidora, which is now at Chatsworth. For Lord Charles Townesend he made a statue of a "Girl at the Bath"; for Earl de Grey two figures of nympha, still at Wrest Park, Bedfordshire; while for Miss Webb he carved "Ino and Bacchus," and for Lord Otho Fitzgerald "Cupid and Psyche." These two works fetched £199 and £106 respectively when they were sold at Christie's on 2 May, 1878, and 10 May, 1884. The statue of "Glyceria," now at Eaton Hall, was executed for Lord Grosvenor, and a "Bacchante and Child" for Sir Robert Peel.

Wyatt, who was an extremely hard worker, was in his studio from dawn until long after midnight, and the longer he lived in Rome, the more he adored the city. Indeed he only revisited England once, in 1841, when he was given a commission by Queen Victoria for a statue of "Penelope," now in the Royal Collection. He lived a very retired life, his only interest being his work, but all who did meet him spoke highly of his character. The end of his life was clouded by unhappiness. During the attack on Rome a shell struck his studio and burst only four feet from him. This, coupled with the fact that he was told to leave the studio, preyed on his mind, and the woman who came to clean his rooms found him one day lying on the floor in an apoplectic fit. He died a few hours later, on the morning of 28 May, 1850.

Wyatt was highly thought of by his contemporaries, and a very large number of tributes were paid to his work in the Press. His friend, John Gibson (q.v.), said that he had "acquired the
purest style and his statues were highly finished. Female figures were his forte and he was clever in composition and the harmony of lines. No sculptor in England has produced female statues to be compared to those by Wyatt” (Eastlake’s Life of Gibson, page 130). A writer in the Gentleman’s Magazine (1850, page 99) considered that he had “surpassed all living artists in representing the pure and delicate beauty of the female form.”

Wyatt carved a few busts, including those of Sir Thomas and Lady Cullum, now in the Public Library at Bury St. Edmunds, and one of George Lushington, a cast of which is at Raby Castle, Durham. His busts of Lady Sydney and Lord Anglesey were exhibited at the Royal Academy.

As a monumental sculptor, he was responsible for a fine relief to Mrs. Buller, 1831, in Poltimore Church, Devon; an even finer one to Ellen Legh, 1831, at Winwick, Lancs; and a third, erected by Mrs. Cook, widow of the circumnavigator, to members of her family in Merton Church, Surrey, in 1832. He also signs the classical monument to Elizabeth Bayley, 1838, at Meopham, Kent.

Ideal works by Wyatt not already mentioned are “Girl With a Kid” which was in the Manley Hall sale of 1875; “Hebe,” sold at Christie’s in June, 1885; “Flora,” shown at the Great Exhibition of 1851; a “Shepherd Boy,” for the Duke of Sutherland; “Nymph Leaving the Bath” (1847), for Lord Canning; “Venus and Cupid” (1847), for Mr. Holford; and “Glycera” (1848), in the Royal Collection.

At the time of his death a number of unfinished works were left in his studio and were completed by J. Gibson (q.v.) and B. E. Spence (q.v.). These included “A Huntsman of Diana,” for Queen Victoria; “A Nymph Taking a Thorn out of a Greyhound’s Foot,” for Lord Charles Townend; and “A Nymph Bathing,” for Mr. Foot, of Read Hall, Lancs.

Gibson carved the medallion-bust placed over Wyatt’s grave in Rome and also composed the rather unfortunate inscription which reads more like a testimonial to the sculptor’s attainments than a Christian epitaph: “His works were universally admired for their purity of taste, grace and truth of nature. The productions of his genius adorn the Royal Palaces of England, St. Petersburg and Naples, as well as the residences of the nobility and gentry of his own country” (Art Journal, 1851, page 232).

Wyatt, Edward William
b. 1811, d. 1885

He was the son of Thomas Wyon (1761–1830), chief engraver of the Seals, and joined the Royal Academy Schools in 1829, on the recommendation of E. H. Baily (q.v.). Two years later he exhibited a bust of General Maitland at the Academy, following this with another of Sir George Chetwynd in 1833. His busts of Shakespeare and Milton, both dated 1850, are now in the Birmingham Art Gallery.

At the Great Exhibition of 1851 Wyon showed “A Tazza Modelled from a Greek Design for the Art Union of London.” In the following year he made a bust of Wellington for Wedgwood for reproduction in “Parian”; other models executed for the firm included “Titania,” “Oberon,”
“Hope,” and “The Nubian Water-Carrier.” In 1853 he made a statuette of Lord Dalhousie for the Nepalese Ambassador (Illustrated London News, 22 January, 1853). Wyon is represented by several statues in London. In 1866 he made one in bronze of Richard Green, having already executed in 1863 a bust of the shipowner and philanthropist, which is now at Kenrick Manor, Worcestershire. The statue, erected at Poplar, is of considerable merit, and shows Green sitting in an armchair caressing a Newfoundland dog, whose head rests on his knee. In 1869 the sculptor carved statues of Galileo, Goethe and La Place for the Civil Service Commission Building in Burlington Gardens; his statue of “Britomartis” is at the Mansion House.

When the Drapers’ Hall was rebuilt in 1866 Wyon was chosen to carry out all the decorative carving. This included a series of reliefs in the inner courtyard and two statues of Edward III and Queen Philippa for the façade; these were placed in position in 1871. In 1874 he executed two heroic caryatids for the main first-floor entrance of the Fitzwilliam Museum, Cambridge.

Wyon exhibited at the Royal Academy, 1831–1876, showing nearly one hundred works. Among his portrait-busts were those of W. C. Ross, the miniaturist (1840); the Duchess of Sutherland (1853); Robert Stephenson (1855), now in possession of the Newcastle Literary Society; Dr. Livingstone (1858); Joseph Locke, M.P. (1859); I. K. Brunel (1862); Sir Joseph Paxton (1864); Robert Napier (1867), now in the Glasgow Art Gallery; and Henry Bessemer (1868). At the Birmingham Society of Artists he showed busts of the Rev. W. Orme (1830); General Maitland (1832); Sir George Chetwynd (1835); a wax portrait of Baron Blome (1835); and a medallion portrait of Sir Edward Lyttton-Bulwer (1838). His wax portraits of William Wordsworth (1835) and Robert Southey (1835) are now in the National Portrait Gallery, while a cast of his bust of John Wichcords (1860) is in the Maidstone Museum.

Wyon’s delightful monument to Caroline Stevens (d. 1840) is in Bradfield Church, Berks. It was designed by H. Corbould and takes the form of a copper relief showing Mrs. Stevens kneeling in prayer. Other monuments by Wyon commemorate the Rev. Watts Wilkinson, 1844, in St. Margaret’s, Sothbury, and the Rev. Josiah Pratt, 1846, in St. Stephen’s, Coleman Street. In 1853 he cast two bronze plaques, one showing the Rev. Frederick Robertson preaching, and the other teaching in a Mechanics’ Institute; these were commissioned as part of the monument to Robertson erected in Brighton Cemetery.

(Various references, Art Journal and Builder.)
YATES, D., of Leicester
fl. 1830–1840
He signs two undistinguished tablets to John Pares, 1831, at Scraptoft, Leicestershire, and to Thomas Whiting, 1836, at Peckleton in the same county.

YATES, J., of Hereford
fl. 1801–1812
He signs a large Hellenic wall-monument at Burghill, Herefordshire, to Thomas Farrington, 1801, and a tablet to William Hardwick, 1811, at Madley in the same county. There is also a small tablet to John Berrow, 1809, at Burghill, which is signed by "T. Yates, Junior."

YEOMANS, T., of Boddenham
fl. 1797–1830
A village mason, he signs a number of stone wall-tablets in Wellington Church, Herefordshire. These are dated between 1797 and 1830 and are of pleasant, though rather crude, workmanship.

Yeomans was succeeded in the business by his son Richard, who signs other tablets in the same church.

YOUNG, J.
He signs a monument to William Tabburn, 1788, in Portsmouth Cathedral.

YOUNG, J., of Ewell
fl. 1814–1832
He signs a large wall-tablet with carefully cut details to Sir George Glyn, Bart., 1814, at Ewell, Surrey, and another smaller one to William Payne, 1832, at Sutton, in the same county.

YOUNG, JOHN
d. 1695
Having been "made sinisterly free of ye Weavers," Young was taken and presented for disfranchisement together with his master in 1635/6. He made his peace with the Masons' Company and agreed to pay £5 for his translation from the Weavers (Knoop and Jones' *The London Mason in the Seventeenth Century*, page 31).

In 1638 Young was working at the Inner Temple, receiving £140 for repairs to the Temple Church, and a further £400 for building the Temple Bridge two years later; in 1655 he was paid for work "about the Garden Gate and Stairs" (Inderwick's *Inner Temple Records*, Vol. II). In 1652, and again in 1655, he was Warden of the Masons' Company and was appointed Master in 1657.

From 1665 Young and his partner, Joshua Marshall (q.v.), were working at Greenhill Palace, building first the north end and later the east front (P.R.O., A.O.1 2482/357). Between 1665 and 1667 they were also responsible for a great deal of carved stonework at the Palace, receiving, for example, £15 for each Corinthian capital (P.R.O., Works 5/9). In the latter year Young built the "ballastraides and rails" of the Pavilion on his own account.

From 1667 until 1675 he was the master-mason for building the Mercers' Hall and chapel, although for part of the time he was assisted by T. Cartwright the Elder (q.v.). In 1669 he made the Great Gateway, and in the following year the Court Minute Book records a payment of £50 to "John Young and his sonne Nicholas Young for ye figures of Faith, Hope and Charity." When the Hall was rebuilt in 1678 the gateway and its figures were bought for Swanage and now form the front of the Town Hall.

In 1670 Young was working at St. Dunstan's-in-the-East (Wren Society, Vol. XIX, page 18). In 1675 he was employed at Bethlehem Hospital, for Robert Hooke notes in his diary on 1 April of that year that he had "signed Young's bills for carvings" (Diary of Robert Hooke, page 156).

Young had two sons, Nicholas (q.v.) and John, both of whom followed their father's craft. The latter became free of the Masons' Company by patrimony in 1671, and was Warden in 1686 and 1687. In 1695 he was Master of the Company, but died during his year of office. In 1684 Mr. Thomas Thynne paid him £15 for a marble chimney-piece (Longleat Archives).

YOUNG, NICHOLAS
fl. 1663–1686
Nicholas Young, who was admitted to the Masons' Company in 1662/3, was the son of John Young the Elder (q.v.), with whom he worked as assistant or partner. Inderwick (Inner Temple Records, Vol. II, page 21) quotes an agreement dated 1 August, 1663, between Sir Heneage Finch,
Treasurer of the Inner Temple, and "John Young and Nicholas Young his son, Citizens and Freemasons" for repairs to the Temple Bridge, while the Court Book of the Mercers' Company notes a payment of £50 to "John Young and his sonne Nicholas" in 1670.

Under Wren, Nicholas Young was employed as a master-builder at several of the City churches, including St. Andrew-by-the-Wardrobe and St. Michael's, Cornhill. He also executed a certain amount of stone-carving, making a festoon, 18 ft. long, for the front of St. George's, Botolph Lane, and four pillars costing £120 for St. Martin's, Ludgate Hill (Wren Society, Vol. XIX). He was Warden of the Masons' Company in 1674 and Master in 1682. Nicholas's finest work is the bust of Gideon De Laune in the possession of the Apothecaries' Company.

**YOUNG, WILLIAM**

The *Daily Post* of 23 April, 1731, refers to him as "that ingenious statuary at the Eagle and Rock, near Hyde Park Corner." He may be the "Mr. Young" to whom Henry Hoare paid six guineas on 20 December of the same year (Archives, Hoare's Bank).
