जो जें वाण्छिल तो तें लाहो। प्राणिजात।

- ज्ञानेश्वर, १८-१७९६.

MAY THE DARKNESS OF SIN DISAPPEAR, AND
THE SUN OF TRUE RELIGION SHINE UPON
THE WORLD. MAY ALL THE DESIRES OF ALL
LIVING BEINGS BE FULFILLED.

- Jnaneshwari, XVIII-1796.
PREFACE

Jnanadeva was a great genius of Maharashtra in whom we find a rare combination of poetry, philosophy and deep religious experience. As a saint he is held in high respect among religious sects. As a poet he is appreciated among literary circles. His contribution to the solution of the persistent problems of philosophy is not, however, fully recognized. As a matter of fact this contribution is his great gift not only to Maharashtra but also to the mankind for whose welfare his heart yearned day and night. He has written all his works in his mother tongue—Marathi. It was but natural on the part of the the eastern or western scholars not acquainted with Marathi language, to neglect them. Some Marathi scholars have tried to explain his philosophical view point. But some of them have neglected his peculiar contribution while others have not brought forth its full significance. Therefore an attempt has been made in this work to present in English the philosophy of Jnanadeva in a systematic form and convey a clear impression of his lofty and integral idealism.

The chief works of Jnandeva are the Jnaneshwari, Amritanubhava and Abhangas or religious lyrics. The Jnaneshwari is his famous commentary on the Bhagawadgita. This classical work is selected by the famous world-organization Unesco for translation into English, French and Spanish languages for its international propagation. The Abhangas or religious lyrics of Jnanadeva are mainly the outpourings of his devotional heart though they also contain his religious and moral teachings as well as descriptions of his yogic experiences. The Amritanubhava, however, occupies a unique position. It is an independent work that clearly sets forth his philosophical point of view. The present work is mainly based upon the Amritanubhava.
The other works of Jnanadeva are also taken into consideration and they yield a more consistent world view when seen in the light of the Amritanubhava.

Jnanadeva's original contribution to the current of the idealistic thought in Indian philosophy is his theory of Chidvilas or the play of the Pure Intelligent Atman. The main target of his criticism is the theory of ignorance advocated by Shamkar. Though other thinkers like Ramanuja have criticised it before him, Jnanadeva has his own way. He stands on the same ground of the Advait of Shamkar and points out the discrepancies in the conception of ajnana or ignorance and also shows the lines of consistent developments. The rejection of the conception of ignorance results in the transformation of the conceptions of God, the individual self and the world. God is not the phenomenal appearance of the Absolute as Shamkar believes. He is the very Absolute and contains within Himself the principle and the explanation of plurality. The world is not caused by Maya or the mystery of ignorance but it is the expression of infinite Divine love and joy. So Shamkar's attitude leads to asceticism while Jnanadeva's angle of vision leads to the path of loving devotion and self-less activism.

According to Jnanadeva it is not the Maya but the power of the Lord that is responsible for the appearance of the world. This doctrine resembles to that of Kashmir Shaivism. But Jnanadeva does not stop here. He analysis the conception of power and comes to the conclusion that the power is the power of love. So the love of God becomes the central reality of which His power and wisdom are but aspects. Love is not the quality of God but God Himself out of which all the creation flows spontaneously. This infinite love is the deepest fact of the universe. There is a tender divine benediction over all things. So Jnanadeva says that God and his Love are the only
two inmates of the home of the universe and not even a blade of grass is created without their mutual help. (Amt I, 12-13)

To appreciate and fully realize in life this spring of Divine Love is Bhakti or the supreme devotion. It is called by Jnanadeva "Akritrim Bhakti" or natural devotion. As the temple, the deity and the worshippers can be hewn out of the same mountain–rock, so there can be the process of devotion even in the state of union with God. (Amt. IX, 41) As the Ganges united with the ocean plays upon its bosom, so the devotee united with God experiences the sweet flavour of devotion (Jnaneshwari, XVIII, 1188) "It is in love, and in nothing else that we find not only the supreme value of life but also the supreme reality of life and indeed of the universe" These words of McTaggart (quoted by Dr. T. M. Forsyth M. A. D. Phil. in his "God and The World" p. 146) well represent the view of Jnanadeva if we understand love to mean not merely a personal love felt by one individual for the other but its very spring that wells up in the heart of Divinity. So Jnanadeva called his work "Anubhavamrita" which means "The sweet Nectar of Experience"

Indian idealism proceeding from the Upanishadic philosopher Yajnavalkya finds its maturest expression in the writings of Jnanadeva. As such it deserves a place of honour in the history of Indian philosophy. His philosophic view point leads to activism in addition to supplying a sound theoretic foundation to Bhakti cult in Maharashtra. Such luminaries as Namdeva, Ekanatha and Tukarama drew their inspiration from this great spiritual fountainhead. Jnanadeva's philosophy of spirit has considerable historical importance but there are elements in it that have lasting and living universal significance. Hence the importance of its study cannot be overemphasised.
The present work is mainly based upon my thesis on "The philosophy of Amritanubhava" that was accepted by the University of Bombay for M. A. degree. Some suitable changes and additions are made and an English rendering of the whole of Amritanubhava is also appended.

Dr. R. D. Ranade M. A. D. Litt. kindly allowed me to make use of the English renderings of some verses of the Amritanubhava in his "Mysticism in Maharashtra". Prof. N. G. Damle M. A. sincerely guided me in writing my thesis upon which this work is based. Pri. S. V. Dandekar M. A. and Prof. D. D. Wadekar M. A. warmly appreciated my efforts and suggested the inclusion of the English rendering of the Amritanubhava. It is very difficult to translate the graceful and lively diction of the original work and I would be satisfied if my venture would convey at least its faint impression. Dr. V. A. Sukhatankar M. A. Ph. D., who happened to visit Pandharpur, expressed his deep sympathy for my work and encouraged me to publish it. All of them have laid me under deep obligation for which I express my heartfelt gratitude.

I offer my thanks to my friend Mr. M. Gopalacharya M. A. for discussing with me about Jnanadeva's criticism of Ajnanvada and helping me by clarifying some difficulties. My friends Mr. P. R. Mokashi M. A., Mr. P. V. Godbole M. A. LL.B. and Prof. Y. G. Dharurkar B. A. LL. B. M. Ed. assisted me by reading proofs and preparing an exhaustive index. I must thank them for their labour of love. I also thank Mr. K. N. Ghalsasi for the neat and nice printing inspite of many handicaps of a local press.

I cannot express in words what I owe to my revered spiritual teacher to whose memory this work is dedicated as my humble offering.

Pandharpur

CHAPTER I

THE AGE OF JNANADEVA

Political condition

Jnanadeva lived in the latter half of the thirteenth century A. D. Jnaneshwari was written in Shaka 1212 (1290 A. D.). The fact that the completion of the work took place in 1290 A. D is undisputed as it is mentioned at the end of the work itself. Similarly Jnanadeva mentions the name of ‘Shri Ramachandra’ i.e. King Ramadevarava of Yadava dynasty as ‘a just ruler who supported all arts and sciences’. Devagiri—the present Daulatabada— was the capital of the Yadava Kings. King Bhillama (1187–1191 A. D.) was the first sovereign of this Yadava dynasty. He put an end to the Chalukya rule and founded Devagiri. His son Jaitrapal, it is said, had Mukundaraja—the author of Paramamrita and Vivekasindhu—as his spiritual teacher. Jaitrapal’s son Singhan was a valorous king who conquered Malwa, Gujarat and Southern Maharashtra and annexed them to his kingdom. The town Shinganapur was founded by him and so is named after him. ‘Sangit Ratnakar,’ an authoritative Sanskrit work on Indian Music, was written by Sharangadhar during his reign. King Ramadevarava was the great-grandson of this Singhan. He ruled from 1271 to 1309 A. D. The famous Hemadri, the towering personality of the times, was his chief minister or Shrikaranadhipa. He was a great administrator as well as an able organizer. He compiled the encyclopaedic work named ‘Chaturvarga Chintamani’ which stands foremost among his other minor religious works. He is

1 Jnaneshwari XVIII-1810. 2 Jnaneshwari. XVIII-1804
said to have built many temples in a peculiar style called Hemadapanti and invented the Modi script in Marathi. Bopadeva, the famous grammarian, was a friend of Hemadri. Yadava period was really a golden period in the history of Maharashtra and "Devagiri formed a centre of learning, art and culture in the midst of Maharashtra attracting men of great attainments and scholarship from all parts of India. Astronomy, Astrology, Mathematics, Theology, Medicine and Statecraft received encouragement from the Yadavas." 3

King Ramadevarava was a just ruler, a great patron of learning and a devotee of the God of Pandharpur whose shrine he visited with reverence. His name stands in the inscription of Pandharpur temple where a list of those persons who endowed sums of money for the purpose of building, is found. 4 Ramadevarava, however, does not seem to be a brave king because in his reign Allauddin Khilji invaded his capital, defeated him and made him his subsidiary who had to pay a yearly tribute. But during Jnanadeva's life time Maharashtra was unmolested by foreign invasions and was enjoying all prosperity.

**Literary Condition**

If we look to the literary condition we see that it is Jnanadeva who has written the first original philosophical work in Marathi language. Mukundaraja, the author of

---

3 Paper by Mr. V. K. Bhave, read at The All India History Congress (1938).

4 The inscription is called Chauryansi inscription and its date is Shak 1195 (1273 A.D.) i.e. two years before Jnanadeva was born. It was first published by Mr. V. K. Rajwade 50 years ago. Dr. S. G. Tulpule of Poona University with the help of Pandharpur Samsodhan Mandal and Badve Committee has recently taken new prints of this inscription. He has found more than twenty-five important mistakes in Mr. Rajwade’s reading. His article appears in the Journal of Poona University (I. 1)
Paramamrit and Viveksindhulu, is called the first poet of Maharashtra. But his priority to Jnanadeva is doubtful. Writers like Mr. Ajagaonkar have tried to prove that he lived after Jnanadeva. Then again his works lack originality. Mukundaraja himself tells that he has followed Shāmkar in his work. So his works are in the main expository of Shāmkar’s philosophy. There is also Mahanubhava literature, but it is poetic and religious more than philosophical. There is no original philosophical point of view in it. It contains only a gross pluralism. Jnanadeva was a great poet as well as a great philosopher and his work is the first of its kind in Marathi literature.

Religious Condition

Though Maharashtra was enjoying secular prosperity its religious condition was far from being satisfactory. There was, as it were, a religious fermentation. Five centuries ago Shamkaracharya had attacked Vedic ritualism and advocated the doctrine of renunciation. Ramanuja had tried to reconcile both, but his influence was not so much felt in Maharashtra. The ritualism was fast disappearing but its place was taken by the worship of various deities. The inferior deities were also offered animal sacrifices. Jnanadeva describes a person worshipping inferior deities as the very incarnation of ignorance. He observes- ‘Like the foolish farmer giving up his old business and beginning something new every day, the man overpowered by ignorance installs new images of gods often and again, and

6 Viveksindhulu (VII-47). Though Jnanadeva has made a similar statement in his Jnaneshwari (XVIII-1723) and his difference from Shāmkar is not quite explicit in that work, we clearly see in his original works like Amritanubhava and Changadeva Pasasthi how he has got his peculiar angle of vision.
worships them with the same intensity. He becomes the disci-
ple of a Guru (a spiritual teacher) who is surrounded by
worldly pomp, gets himself initiated by him and is unwilling
to see any other person who has got real spiritual dignity. He
is cruel to every being, worships various stone images and has
no consistency of heart. Leaving the image of god in his house,
he wanders among the so called holy places performing the
rites of several deities on various occasions. On the eleventh
day of the month he worships Krishna and on the fourth
he worships Ganesha. On the fifth he performs the rites of
serpents and on the fourteenth those of goddess Durga. In the
first half of the month of Ashwin he worships goddess Chandi.
On Sunday he visits Bhairava and on Monday he runs with
Bela leaves in his hand, to Mahadeva. He does not keep quiet
even for a moment and is like a prostitute whose residence is
open to all, his mind is open to all kinds of worship and
hence he is the very incarnation of ignorance."  

Besides these deity-worships there were too many religious perfor-
mances current amongst the different strata of society. Hemadri
has described various such religious performances numbering
about two thousand. He describes five to ten performances
for a day and gives details about the deities to be propitiated.
He gives a list of various dishes to be prepared and offered
to the priests for gaining their favour. He also gives various
authoritative quotations from Shrutis, Smritis and Puranas.

Besides this degenerated form of Vedic Religion, there
were various sects like Jain, Lingayata and Mahanubhava trying
to get supremacy. Jnanadeva has criticised different views of
Ahimsa. Besides criticising Mimamsakas and Ayurvedics he

7 Jnaneshwari (XIII, 81-822)
8 Chaturvarga Chintamani-Vrikhand.
has also criticised Jainas. "Some people" he says, "drink water filtered through a piece of cloth as their religious duty. But many germs are destroyed in the very process of filtering. Some again eat uncooked food because they are afraid of injuring the germs. But in the very act of eating uncooked food, they do injury to themselves. "A non-injury is not a non-injury at all. It is like cutting the boughs of a tree and making a fence around it or like cutting one's hands to satisfy one's hunger. It is like putting down a temple in order to build a wall around it or like burning one's quilts to get warmth." Lingayata religion was promulgated by Basava in the 12th century A.D. and was attacking Jainism. Mahanubhava sect worshiped Krishna and Dattatraya. But it closely guarded its doctrines. Its works were written in the cryptic language not easy to decipher. Asceticism was its ideal and like Buddhism it advocated renunciation not for men alone but for women also. Because of their secrecy and extreme ascetic tendency Mahanubhava cult did not find favour with the saints of Maharashtra and we find its criticism in the works of Ekanatha and Tukarama.

Spiritual Lineage of Jnanadeva

The spiritual lineage of Jnanadeva can be traced to the two sources; 1 The Nath cult and 2 The Warakari or Bhakti cult of Pandharpur. The Nath lineage is described at the close of Jnaneshwari as follows, Shivâ-Shakti-Matsyendra-Gorakha-Gahini-Nivritti and Jnanadeva.10 Tryambakpant, the great grandfather of Jnanadeva, was initiated by Gorakhanath. Gorakhanath's disciple Gahininath initiated both Govindpant and Nirai-

9 Jnaneshwari (XIII; 230-235)
10 Jnaneshwri (XVIII; 1751-58)
the grandfather and grandmother of Jnanadeva. 11 He also initiated Jnanadeva’s brother Nivrittinath who in his turn was the initiator of Jnanadeva. Before Jnanadeva this spiritual wealth was a great secret known only to the teacher and his disciple. Jnanadeva wanted to distribute it to the public. So we find his request to his master to this effect in the closing words of Jnaneshwari. The history of these Nathas before Gorakhanath is not yet explored. These Nathas were a wandering sect of persons gifted with great yogic powers. Their regular place of residence is not known. Both Bengal and Maharashtra claim their residence. The hill named Matsyendragad and a tamarind tree called Gorakh-chincha are in the district of Satara. These are shown as sacred to Matsyendranath and Gorakhanath respectively. Nivrittinath was initiated by Gahininath at Brahmagiri near Nasik. He describes his master thus— “His heart was parched by renunciation but was cooled by Divine Love. He was wandering without being affected by pleasure or pain, without being attached to any worldly object and the Divine Bliss made his heart its constant abode. By his grace my family has become sanctified.” 12 Nivrittinath and his sister Muktabai had also the fortune of meeting Gorakhanath. 13 Historical evidence about the existence of Matsyendranath is not available, 14 but Gorakhanath has written some works that are published and hence we see that he was the great organizer of Nath cult which played an important part in the creation

14 Matsyendranath is regarded as the author of several works like Kauljinan-nirnaya. Those are found in the Nepal Darbar Pustakalaya. Dr Bagchi has published some of them.
and consolidation of Neo-Hinduism after the decline of Buddhism. Siddhsiddhant-Paddhati is his important and authoritative work that deals with philosophical problems such as the nature of Ultimate Reality, its relation with individual souls and the world. The work is written in Sanskrit partly in the form of aphorisms and partly in the form of verses and it must have greatly influenced the philosophy of Jnanadeva.

The Bhakti Cult of Pandharpur

The history of the Bhakti cult of Pandharpur is also uncertain. According to the tradition, Pundalika was the first great high-priest of the God of Pandharpur. The Pandurangashtaka of Shamkaracharya mentions the name of Pundalika for whom God appeared on the bank of Bhima. If these verses are composed by the first Shamkaracharya, we can say that Pundalika must have lived before eighth century A.D. But the authenticity of the verses is doubtful. Malu Sonar has written a work in Marathi called Malu-Taran where he has given a history of Pandharpur and if his account is reliable the date of Pundalika goes as far back as the first century A.D. But unfortunately the writer of the work is not reliable. However, the inscription on the Samadhi of Krishnaswami together with the idols of Vithal and Rukmini found in Alandi dated 1209 A.D. and inscription of Pandharpur dated 1287 and 1278 A.D. show that Pundalika and his God were enjoying wide reputation nearly for four or five centuries before Jnanadeva. Jnanadeva's father and grandfather were regular visitors to Pandharpur. This fact and his coming in contact with the great devotee Namadeva were of great importance in shaping his philosophy which became the foundation of the Bhakti cult in Maharashtra.
CHAPTER II

LIFE AND WORKS OF JNANADEVA

Sources of Jnanadeva's Biography.

The chief sources of Jnanadeva’s biography are the writings of Namadeva, Satyamalanath and Sachchidananda Baba. Namdava was his contemporary and his deep intimacy with Jnanadeva is wellknown. The other two were the disciples of Jnanadeva. The abhangas of Namadeva called Adi, Tirthavali and Samadhi contain the account of Jnanadeva’s ancestry and his whole life, his travels and entering Samadhi. Mr. Pangarkar has given an account of the other two biographies but unfortunately both of them are unpublished.¹ Later biographers are Mahipati, Nabhaji and Niranjana Madhava.

Ancestors of Jnanadeva

Jnanadeva's ancestors were Kulkarnis of Apegaon. Apegaon is situated on the bank of the river Godavari. It is eight miles from Paithan which was then famous for its Sanskrit learning. Hariharpant was the grand father of Jnanadeva’s great grand father Triambakpant. He was looking over the revenue affairs of Apegaon in Shaka 1060 (1138 A.D.) His grand son Triambakpant was a great devotee. He obtained spiritual initiation at the hands of Gorakhanath. Triambakpanta’s son Govindpant was also a devotee of Shri Vithal of Pandharpur. Govindpant and his wife Nirabai both were initiated by Gahininath. The pious couple gave birth to a child in their old age. It was named Vithal after the name of their beloved deity.

¹ L. R. Pangarkar मराठी वाङ्मयाचा इतिहास Vol I P. 499 501.
Vithalpant

Vithalpant was a clever boy. He learnt the Sacred Vedas, Sanskrit grammar and poetry. After finishing his studies, he took the permission of his parents and went on a pilgrimage to sacred places like Dwaraka, Pindarak and Saptashringi. When he arrived at Bhimashamkar and saw the source of the river Bhima he was reminded of Pandharpur which is situated on the bank of the same river. He made up his mind to go there. While on his way he halted at Alandi to see Siddheshwar. Alandi is situated on the bank of the river Indrayani. It is thirteen miles from Poona. Sidhopant, the then Kulkarni of Alandi, was glad to see the young scholar and he gave his daughter Rukmini to him in marriage. After some days the married couple with Sidhopanta’s family, visited Pandharpur and returned to Apegaon. Govindpant and Nirabai were glad to see all of them. Both of them, however, did not live long to enjoy this happiness and soon left their mortal bodies. After passing some years at Apegaon, Vithalpant and Rukmini left the town and went to stay at Alandi, according to Sidhopanta’s advice.

Vithalpanta’s heart yearned for self-realization and he thought of giving up his householder’s life. One day he left home, went to Benaras and became the disciple of a sannyasi. He renounced the world, became an ascetic and was named Chaitanyakshrama.

His spiritual teacher Ramashrama

Tradition says that the sannyasi whom Vithalpant approached was Ramananda. This Ramananda cannot be identified with Ramananda who was the follower of Ramanuja and the teacher of Kabir because he was not even a contemporary of Jnanadeva. In an unpublished manuscript of Namadeva’s
THE PHILOSOPHY OF JNANADEVA

Abhangas the name of Vithalpanta’s initiator is given as Ramashrama. It is told that Vithalpant, while staying at Benaras, heard the glory of renunciation in a discourse on the Gita delivered by Ramashrama and got himself initiated by him. Niloba in one of his Abhangas, says, that the name of Vithalpant’s teacher was Nrisimhashrama. We get the names of Ramadvaya and Nrisimhashrama among the wellknown writers on the Advait Vedant, who wrote Vedant-Kaumudi and Bheda-dhikkar, respectively. But one of them lived in the first half of the fourteenth century while the other in the sixteenth century A.D.

Mahipati in his biography of Jnanadeva mentions the name of Ramashrama and not of Ramananda. He is a later biographer and must have based his account on that of Namadeva. The importance of the name of Vithalpant’s teacher is that some writers want to show the relation of Jnanadeva with Ramanuja through the latter’s disciple Ramananda. But for the following reasons we cannot identify Ramananda with the teacher of Vithalpant:-

(1) Namadeva’s account of Jnanadeva should be taken to be the most reliable of all the accounts. He mentions the name of Ramashrama and not that of Ramananda.

2 Dr. K. M. Sen :- Medieval Mysticism of India p. 70. According to Dr. Sen Ramananda’s period is from 1370 to 1440 A. D.
3 Saraswati Mandir Library, Tangore, Manuscript No. 1801 quoted by Mr. Subandha in the Namdeva Magazine (Sept- 1943).
5 Dr. S. N. Dasagupta :- The History of Indian Philosophy, Volume II, p. 216
6 Bhakti-Vijaya. (VIII-118 ).
(2) All the biographers agree to the name Chaitanyashrama which Vithal assumed on his entering the ascetic order. Among the disciples of Ramananda we find the names like Anantananda and Bhavananda. He would have also named his new disciple Chaitanyananda instead of Chaitanyashrama.

(3) Both Namadeva and Mahipati say that Vithalpant, while at Benaras, heard discourses on the Gita by a monk who emphasized the path of renunciation. Now the tenor of the whole Shamkar-Bhashya on the Gita is that of emphasizing Sannyas (the path of renunciation) and of Ramanuj-Bhashya is that of laying stress on Bhakti-yoga (the path of devotion.) So the monk who expounded the Gita must have been a follower of Shamkar and not that of Ramanuja.

(4) Lastly, the period of Ramananda does not correspond to that of Vithalpant. According to Dr. Bhandarkar the period of Ramananda was about 1300 to 1411 A. D. 

Vithalpanta’s teacher, for the above reasons was Ramananda and not Ramananda. Namadeva refers to him as a Shripad in his Abhangas of Adi. (i.e. Jnanadeva’s ancestry).

Now this Shripada went on a pilgrimage and while on his way to Rameshwari visited Alandi. There he saw Vithalpanta’s wife Rukmini going round an Ashwattha tree. Her heart was

7 गीताशास्त्रस्य संकेतत्: प्रयोजनं परं निःश्रेयसं सहेतुकथ्य संसारस्याल्पतोपरम-लक्षणम् ..... गीता शाकरमाध्य प्रस्तावना.

गीता रामानुजमाध्य प्रस्तावना.

8 Dr. R. G. Bhandarkar: Vaishnavism, Shaivism and Minor Religious Systems, p. 94-95
pining for her husband. Seeing the very image of piety, Shripada’s heart was filled with paternal love. When Rukmini saw him, she came near and bowed to him with great reverence. He gave her his blessings saying ‘let pious sons be born to you.’ No sooner did he utter these words, than the Shripada saw tears rolling down the eyes of Rukmini. He made inquiries and knew the cause of her grief. She told him how her dear husband had forsaken her and had gone away. The Shripada at once remembered his new disciple. His heart told him that the new sannyasi in his hermitage was no other than Rukmini’s husband. He gave up the pilgrimage, returned to Benaras and after pressing inquiry knew that what his heart told him was true. He ordered Chaitanyashrama to give up sannyasa and accept the life of a householder again. So Chaitanyashrama became Vithalpant once again. He returned to Alandi and led the life of a householder according to the command of his spiritual teacher who had advised him to give up all fear because God would help him. 9 Rukmini’s joy knew no bounds but it lasted only for a few days.

The orthodox Brahmins of Alandi excommunicated Vithalpant. He was greatly harassed and even persecuted, but he did not utter a word against them. Twelve years elapsed and Rukmini gave birth to Nivrittinath in 1273 A. D. After two years Jnanadeva was born (1275 A. D.). Jnanadeva’s younger brother Sopan was born in 1277 A. D. and Muktabai, the youngest of all, was born in 1279 A. D.

Though there is a difference of opinion as regards the birth-dates, Mr. Pangarkar has given the Abhangas of Janabai Namadeva, Visoba Khechar and a passage from Sachchidanand

9 “अविचिक्कर्पणे न चरते भय | याति बाहे साहुः जगदीश” || नामदेवाचीमाही ||
Abg. 955
Baba's Jnaneshwar-Vijaya which support the above dates. 10 Jnanadeva passed away in 1206 A. D. and the fact is told by Namadeva, Chokhoba, Visoba, and Janabai. Jnanadeva's age was twenty two at that time as we find it in one of his Abhangas-
"वाल छावो वाबीस जनेने। तोडीली भवाब्बीची करणे।" This also supports the above dates.

His tragic end

Taking his children with him Vithalpant lived outside the town. All the four children were spiritual gems but the orthodox Brahmins of Alandi thought it a bad omen even to look at them. Dejected with these adverse circumstances Vithalpant, one day, decided to leave his home. He went to Triambakeshwar (a village near Nasik, situated in the vicinity of the source of the river Godavari) with his children. As they were going round Brahmagiri a mountain near Triambakeshwar—they met a tiger. Vithalpant hurried away with his children, but missed Nivrittinath who had entered a cave. In the same cave lived saint Gahininath who offered Nivrittinath his spiritual wealth. Thus misfortune was turned into a golden opportunity. Nivrittinath rejoined his father and young brothers. Returning to Alandi, Vithalpant asked the Brähmins about his atonement. They told him the remedy of giving up his life! For the sake of the happiness of his offspring Vithalpant left home one day, went to the sacred Ganges and ended his life by throwing himself in the holy river. A year after, his wife Rukmini leaving all her children under the protection of her eldest son, followed the example of her husband. Yet the orthodox Brahmins of Alandi were not appeased and did not

10 L. R. Pangarkar:- श्रीमणवेश्वर महाराज चरित्र आणि द्वदृष्ट विवेचन

(Third Edition, p. 40)
consider Vithalpant's children as purified. They wanted a certificate of atonement from the Pandits of Paithan. Nivrittinath along with Jnanadeva and others went to Paithan accordingly. There, all of them were ridiculed for their names indicative of their spiritual dignity. In the assembly the learned Pandits laughed at them as children of a sannyasi. But when they saw that Jnanadeva caused a passing buffalo to recite Vedas, they were silenced and gave them a certificate of purification. When all of them returned the buffalo followed them.

**Jnanadeva's Brilliant Career**

While returning to Alandi all of them halted at Newase—a small town on the bank of the river Pravara in the Ahamadnagar district. Jnaneshwari—the sweetest exposition of the Bhagavadgita—was written here. The pillar still stands near which sat Jnanadeva in front of his dear master Nivrittinath. Nectar like words oozed out of his lips and were taken down by Sachchidananda Baba. After the completion of Jnaneshwari Nivrittinath told Jnanadeva to compose an independent work and the Amritanubhava was written accordingly. While returning to Alandi the buffalo of Paithan gave up his life at Ale (in Poona District) where a tomb still stands and

a yearly, pilgrimage is held on the eleventh day of the latter half of the month of Chaitra. 13

Changadeva, a great yogi, came to see Jnanadeva. He had attained some yogic powers and was proud of them. But when he met Jnanadeva he gave up all his pride and became his humble disciple. Jnanadeva advised him in sixty five verses that are known as the Changadeva Pasasthi.

After passing some months in Alandi Jnanadeva, along with Nivrittinath and others, went to Pandharpur where he came in contact with the great devotee Namadeva. They became intimate friends. The great philosopher became a great devotee of God Vithal and the great apostle of the Warakari Cult. Jnanadeva took Namadeva with him and travelled up to Benaras visiting all the holy places in the Northern India and all the country resounded with their sweet kirtanas. They returned to Pandharpur and there was a great feast in which the contemporary saints like Goroba the potter, Sanvata the gardener, Chokhoba the untouchable, Parisa Bhagawat the Brahmin, and others took part. Then Jnanadeva expressed his wish to enter Samadhi and they all went to Alandi. There was a great religious festival. It was the eleventh day of the latter half of the month of Kartik. They all kept awake all night long singing the name of the Lord. Next day they all dined together. Then Nara, Vitha, Mahada, and Gonda—the four sons of Namadeva—swept clean the place of Samadhi. Namadeva besmeared the body of Jnanadeva with the sandle-paste, marked his forehead with the pigment of

13 येजनी उतरली आठारीये बनीं। पद्मु तथे स्वानीं शांत शाळं॥

Ibid., Abg. 964
musk, put on garlands of fragrant flowers, waved sacred lights and paid homage to the dearest of his heart. It was the thirteenth day of the second half of Kartik. Jnanadeva sat on the Asan. Jnaneshwari—his monumental work—was placed before him. His eyes were closed and while engrossed in Love Divine he entered Sanjivan Samadhi! The slab was placed on the door by Nivruttinath. With deep sorrow they remembered the sweet company of the great saint. Tears rolled down their eyes incessantly. The day is held sacred and thousands of pilgrims yearly visit Alandi to pay their respectful homage to Jnanadeva whom they regard as their spiritual father and mother.

The works of Jnanadeva

The works of Jnanadeva so far available are—

1  Jnaneshwari or Bhavarth-Dipika.
2  Amritanubhava.
3  Changadeva—Pasashthi.
4  Haripatha
5  Namana.
6  Miscellaneous Abhangas.

There is unanimity of opinion regarding the authorship of all these. There are also other works like the Yogavasishtha, Bhaktiraja, Panchikaran, Shukashtaka, Gayatritika, Uttargita, Prakritgita and Samas which are sometimes ascribed to Jnanadeva. But they do not appear to have come from the pen of the author of the Jnaneshwari.

Jnaneshwari

The Jnaneshwari is the *Magnum opus* of Jnanadeva’s brilliant career. It is his celebrated Marathi commentary on the Bhagavadgita. The Jnaneshwari is also called Jnanadevi and Bhavartha-Dipika i.e. a torch enlightening the import of the original text. Jnanadeva himself does not use any title. He describes his work as an ornament to the Gita, in the form of the Marathi version. \(^{15}\) The titles Jnaneshwari and Jnanadevi are used by Namadeva while Janabai suggests the other title i.e. Bhavartha-Dipika. \(^{16}\)

The Jnaneshwari was not written but delivered extemporaneously, chapter after chapter by Jnanadeva when he was merely a lad of fifteen and it is a wonderful miracle of his uncommon genius.

The ancient Indian scriptures were written in Sanskrit and were beyond the ken of the common people. Jnanadeva used Marathi language instead of Sanskrit. Out of a deep compassion he delivered the message of the Lord with his original interpretations, to the common masses in their own mother-tongue. There are seven hundred verses of the Gita while the number of the ovis in the Jnaneshwari is about nine thousand in which he tries to bring out fully the spirit of

\(^{15}\) तेघ महेशान्वयसंमूते। भीनिवृत्तीनाथ सुते।

— Namadevachi Gatha Abg. 2363
loving devotion that pervades the song of the Lord. Bhakti or loving devotion is the fruit of right knowledge and the spring of right actions. This is the message of the Gita and Jnanadeva proclaims it in words that are so sublime, so lucid and so enchanting. The object of the Jnaneshwari is to spread spiritual bliss, to eliminate the dearth of discrimination and to enable any aspirant to have the glimpse of Divine Knowledge. Jnaneshwari is the first greatest work in the Marathi language both from the point of view of a high literary excellence and of an elevating philosophy of life.

Instead of adopting the traditional method of dividing the Gita into three compartments, each consisting of six chapters, Jnanadeva gives his original views about the divisions. First three chapters, according to him, form the first division in which the way of action is described. Next eight chapters i.e. from 4 to 11 form the second division which describes the pathway of Bhakti or devotion. But it is the devotion through action. The third division consists of chapters 12 to 15 where the path of knowledge is described. Jnanadeva thinks that the Gita proper ends here. The

Ibid, XVI, 41, 46.
16th chapter discusses the qualities which help or hinder the growth of knowledge. Last two chapters are devoted to answer some incidental questions of Arjuna. Besides these answers the last chapter sums up the whole Gita. It is called by Jnanadeva ‘Kalasadhaya’ i.e. the pinnacle of the temple of the Gita.

Jnanadeva adopts the theory of Chidvilas which maintains that the universe is the expression of the Absolute Reality 20 His philosophy is the source of his exquisite poetry contained in the Jnaneshwari. The Shanta–Rasa or peaceful flavour predominates the whole work. 21 In the case of Jnanadeva this Shanta–Rasa does not mean merely a negative otherworldly sentiment, but it is identical with Bhakti–Rasa which is a positive feeling of deep devotion.

In describing a true devotee Jnanadeva says that he is united with God and yet serves Him. 22 So there is the union of Bhakta with his God and yet a separation from Him. This is the secret of Bhakti–yoga that is revealed in the Jnaneshwari. Prof. Patwardhan rightly says, ‘That the general drift of the teachings of Jnanadevi is to emphasize Upasana and Bhakti, service and love of God, not the identity of the Bhakta and his Lord, is to be inferred from the fact that Jnanadeva is

20 हें आंतबाहेर मिया कोंदें। जग निखिल माण्डेंचे बौदितें।

at his best, his spirit in the full swing of its pinions and his soul in sympathetic raptures in those portions of Jnanadevi that deal with the Bhaktiyoga system which maintains that salvation is to be attained by means of Bhakti or is Bhakti”

The Jnaneshwari is the gospel of thousands of Warakaris i. e. the devotees of Vithal who regularly visit Pandharpur. It forms the fountainhead at which the chief and more prominent exponents of Bhagawat-Dharma in Maharashtra like Ekanatha and Tukarama have drunk deep and received the inspiration to compose great works like the Ekanathi Bhagavata and the Gathas of Abhangas.

Amritanubhava

The Amritanubhava of Jnanadeva is the greatest philosophical work in Marathi literature. It is not based on any ancient authorities like the Upanishadas or Vedant-sutras. Jnanadeva relies upon his own religious experience and his original philosophical insight. He expounds his theory of Sphurtivada with a fine logical acumen as well as with a mastery and wealth of poetic imagery. He refutes the other theories like the dulism of Samkhya, the Subjective Idealism and the Nihilism of Baudhas and the Ajnanavada or the theory of ignorance supported by Shamkaracharya. The Ajnanavadi is his chief opponent. About one-third part of the Amritanubhava is devoted to the refutation of the theory of ignorance. The Amritanubhava ends in revealing the secret of Akritrima-Bhakti or natural devotion and forms the philosophical basis of the religion of Bhakti in Maharashtra.

23 Prof. W. B. Patwardhan:—Wilson Philological Lectures, Lecture III.
The Changadeva Pasashthi of Jnanadeva contains only sixty-five verses. They are addressed to Changadeva who was a Hathayogi. When Changadeva came in contact with Jnanadeva he realized the futility of his yogic powers. He gave up his Hatha-yoga and became Jnanadeva's disciple. This small work gives a clear exposition of the philosophy of Jnanadeva within a short compass.

Haripatha

The word Haripatha means remembering the name of the Lord Hari with intense affection. The Haripatha consists of twenty eight Abhangas. Jnanadeva describes in it the importance of the name of the Lord. The utterance of the name of God is the only royal road to meet Him. All the other means like yogic practices, performance of sacrifice, wandering from one holy place to other, and bathing in the sacred waters, are of no avail. The devotees of God feed upon the nectar of His name. There is neither time nor season for the utterance of God's name. The name of God is like a door of His temple. If any one stands for a moment at this door he goes beyond the four salutations. The Haripatha is the outcome of the natural devotion described in the Amritanubhava.

Namana

The Namana is the hymn in praise of the Lord of the universe. It contains one hundred and eight stanzas in the ovi metre. Describing the importance of the prayer, Jnanadeva says, "Prayer is the supreme end. It is the precious
secret. It is the Divine experience. Prayer is the faith in God, nay, it is God Himself.”

Miscellaneous Abhangas

The Abhangas are religious lyrics. About nine hundred Abhangas of Jnanadeva are available. They are written on various subjects such as the description of the lovely form of God Vithal, the sweetness of the name of the Lord, the advice to the aspirants, the greatness of the spiritual teacher, a criticism of religious superstitions and hypocrisy, the futility of asceticism and the supremacy of the path of devotion. There are some Abhangas of Jnanadeva, called ‘Virahini.’ The Virahini is a woman experiencing viraha or the pangs of separation from her lover. In these Abhangas the Lord of the Universe is depicted as the lover and His devotee as His beloved. Divine love is infinite and the finite individual who has tasted its sweetness is never satisfied. He wants to experience it again and again and always pines for fresh draughts. This sweet and the highest experience of a devotee is expressed in the Virahini Abhangas. It is the culmination of the Haripatha or uttering the name of the Lord with intense love.

CHAPTER III

THE AMRITANUBHAVA AND COMMENTATORS

The Date of Composition

According to Namadeva’s account the Amritanubhava was written as an independent work after the compilation of the Jnaneshwari. Prof. W. B. Patwardhan, however, has expressed another view in his Wilson Philological Lectures (1917). He thinks that the Amritanubhava is chronologically earlier than the Jnaneshwari. His main reasons are as follows:

(1) The Amritanubhava opens with Sanskrit verses invoking the writer’s spiritual teacher and the deity. This is according to the custom of Sanskrit writers. There are no such verses in the Jnaneshwari. Hence it seems that Jnanadeva was under the influence of Sanskrit writers while writing the Amritanubhava. The Jnaneshwari was written later on when the influence had waned.

(2) From the second opening Sanskrit verse it is clear that Jnanadeva has written his work following the teachings of Shamkar. The work shows no acquaintance with the other systems of Indian Philosophy. In the Jnaneshwari we find descriptions of other systems like Samkhya, Yoga, etc. Hence the Amritanubhava was composed earlier.

(3) Reference to Shiva only and not to Hari or Vishnu is made in the Amritanubhava but we find reference to all of them in the Jnaneshwari which shows that the Jnaneshwari was written when the author had become more liberal.
The language, the vocabulary and the imagery in the Amritanubhava appears so scanty, poor and monotonous when compared with that of Jnaneshwari. It may thus safely be concluded that the Amritanubhava preceded the Jnaneshwari.

But these objections against the priority of the Jnaneshwari to the Amritanubhava, are not convincing and can be answered thus.—

The opening Sanskrit verses do not indicate the imitation of Sanskrit authors by Jnane- shwari. He himself has told that the work was based upon his own experience and not on other ancient works. The name of the work shows the same thing. Moreover one Sanskrit verse is also found at the beginning of one of the manuscripts of the Jnaneshwari.¹

The word “Shamkari Vidya” in the second verse has been misunderstood to denote the teaching of Shamkara-charya. “Shamkari Vidya” means knowledge revealed by Shiva who is regarded as the primal spiritual teacher by Jnana- deva. In the Jnaneshwari the same knowledge is termed “Shambhavi Vidya” ² i.e. the knowledge revealed by Shambhu or God Shiva. The word “Shamkari” would also

¹ The manuscript found in possession of Mr. Vipra of Pandharapur has the following opening verse.

निवृत्तिसागरे रम्ये ज्ञानामृतसमुद्भवम्
शुरुः सोपण मागृण सेवितं मृत्युशांतम् ॥

The manuscript is said to have been written by the grandson of a disciple of Sachchidanandababa, the original writer of Jnaneshwari in Shaka 1275. But it is not clear whether the work is written in Shaka 1275 or 1875. A critical edition of the first chapter is published by Dr. R.G. Haré in 1947.

² Jnaneshwari, XV III–1757.
mean "leading to spiritual wellbeing" and it is interpreted this way by Ekanatha in his commentary on this verse.3

The absence of reference to other systems does not show that the author was not aquainted with them while writing the Amritanubhava. In fact he has criticised not only Ajnanvada but Shunyavada also. 4 As there are references in the Gita to various systems it was but natural that the commentator would also write upon these. There was no such necessity of expounding other systems while writing an independent work like the Amritanubhava.

(3) The Amritanubhava being a philosophical work it is but natural that names of several deities are not mentioned.

(4) For the same reason the style of the work is not so poetic and full of emotion as that of the Jnaneshwari. Still Jnanadeva has tried his best to make the exposition as lucid as possible by using various similies. The style of the work does not show the immaturity of the author. On the contrary it recalls the philosophical depth of Jnanadeva's composition.

Dr. Ranade is also of the same opinion. Referring to the Amritanubhava he says, "there is a direct reference in the Amritanubhava to the treatment of certain problems in the Jnaneshwari which makes Amritanubhava appear to come

3 "कल्याणप्रद सब्धाप्रसी । स्वागति स्वागती शांकरी ॥" एकनाथ

The full text of the Ekanatha’s commentary is not yet available. But the verses commenting the opening Sanskrit stanzas are quoted in ‘Jyotana’ an unpublished commentary on the Amritanubhava by Bhayya Kaka.

4 Ajnanvada is the doctrine of Ajnan or Ignorance. It holds that the appearance of the world is caused by Ajnan or Ignorance. It is supported by Shamkaracharya. Shunyavada is the doctrine of Shunya or Void. It regards the Ultimate Reality to be void. It is upheld by the Madhyamik school of Buddhistic philosophy.
later than the Jnaneshwari. He quotes in support of his statement the verse

बैठक गोविन् ज्ञानापी। सत्यसुधा बाळके भोग्य)। बस्ते कोड़े ॥

- अमृतानुभव ३५ ३१

and shows how it has a direct reference to the same problem treated in the Jnaneshwari on commenting the verses of the Bhagwadgita. अन्नसंगीत सब्जानां ज्ञानसंगीत चालंग. अ. १४, ६.

**Title and the Number of the Verses**

There are two current names of the work. they are — Anubhavamrita and Amritanubhava. The first title is mentioned in the work itself. The second is popularly used. There is, however, a negligible difference between the two and both denote the author’s intention of exposing the "Nature of the Ultimate Experience."

As for the number of verses Shivakalyan says that it is eight hundred. But we find eight hundred and four verses in the Niranayasagar edition with Shivakalyan’s commentary edited by Mr. Kunte. (Shaka 1810). Dhavalc’s edition is a mere reprint of it (1944 A. D.). Hence there is no change in the number. The editions of Joga and Sakhare have 806 and 807 verses respectively. Mr. Chandorkar states that he has found in a manuscript 25 verses that are not found in any other edition. Looking to the content of those additional

5 Dr. R. D. Ranade:— "Mysticism in Maharashtra" P. 35.
7 Shivakalyan:— Nityanandaikya-Dipika, X - 408
verses they come at the end of the work. They only describe its greatness and add nothing to its philosophy. No commentary of Shivakalyan upon these is found and the language is not so archaic as that of the Amritanubhava proper. Hence we can safely conclude that they are later interpolations.

Division of Chapters

The Amritanubhava is divided into ten chapters. In some old manuscripts there are no divisions. Hence it is probable that it had no chapters in its original form and some later commentator might have introduced the division. The third chapter begins with "Yayacheni", and the division between the 7th and the 8th chapters seems to be unnatural. These facts confirm the view that originally it had no chapter divisions.

Commentators of the Amritanubhava

The Amritanubhava being a difficult work it was but natural that several writers should write commentaries on it. No other Marathi work has enjoyed this previledge. The chief commentators are —

(1) Ekanatha (1533–1599 A.D.) — The oldest of the commentators is Ekanath. Unfortunately his commentary is not available as yet. But the evidence of its existence can be obtained from the quotations in the commentary by Bhayya Kaka Kibe. Kibe's commentary called "Jyostsna"

9 In the issue of the quarterly of Bharat Itihas Samshodhak Mandal (Volume, XXXII-No. 1-2) there is an article by Mr. Kanole in which he discusses the point of the arrangement of the Amritanubhava in ten chapters. He tries to establish that it was Shivakalyana who introduced this division.
quotes the verses of Ekanatha commenting on the opening five Sanskrit verses of the Amritanubhava. Mr. Bhave has also mentioned about the existence of this commentary in his history of Marathi Literature, but he has given no evidence.\footnote{10}

(2) \textit{Shivakalyan} :- The commentary of Shivakalyan is called Nityanandaikya-Dipika and was written in Shaka 1557 (1635 A.D.). Shivakalyan traces his spiritual lineage to Jnanadeva’s younger sister Muktabai. At the end of his commentary he has given the list of his spiritual ancestors. Muktabai-Vateshwar-Chakrapani-Vimalanand-Changa Keshav das-Janakraj-Nrisimha-Hridayanand-Vishweshwar-Keshavraj Haridas-Paramanand-Nityanand-Shivakalyan. Shivakalyan is the thirteenth person in the list and taking into consideration the period of three and a quarter centuries that passed between Muktabai (who passed away in 1297 A.D.) and Shivakalyan, the list is not improbable. Besides Nityanandaikya-Dipika Shivakalyan has also written a Marathi commentary on the tenth chapter of the Shrimad-Bhagawata. Shivakalyan has tried to interpret the stand point of Amritanubhava in the light of Samkshep-Sharirak (a work by the great advaitic philosopher Sarvajnatman). In his introduction he says that the Amritanubhava is written for those who have gone beyond the view points of Parinama (evolution) and Vivarta (illusion) and have attained the perfect vision.\footnote{11} The total number of Shivakalyan’s own verses is 6294.

\footnote{10} V. L. Bhave :- Maharashtra Sarwat (2nd Ed.). P. 48.

\footnote{11} Nityanandaikya-Dipika I – 158. Cf. Samkshep Sharirak Ch. II – 84.

The three view points are described thus:-

\begin{quote}
रिणामविदेशिमुपर्युक्तमुः पुरानम्। विनिवर्तित्वम् विनिवर्त्तमतिः
उपर्युक्तात्मपि पदरथिष्टिः। परिपूर्णदृष्टिमुपर्युक्ततां सः॥
\end{quote}

(3) Pralhadbuwa Badve (died 1718 A.D.) :- Pralhadbuwa has written Sanskrit verses on the Amritanubhava. These verses are not in the form of a commentary but a mere Sanskrit translation of the original. He has also written a few independent stanzas where he describes in a nutshell the gist of the Amritanubhava—i.e. tha self-illumination of the Reality which is beyond knowledge and ignorance and does not require the proofs of various Pramanas.\textsuperscript{12}

(4) Vireshwar Vallabha :- Vireshwar was the son of Narasinha Dikshit. He wrote his commentary on the Amritanubhava in 1717 Shaka (1795 A.D.) at Channpattan. He was a follower of Shamkar and interpreted the Amritanubhava accordingly. The commentary is not yet published.\textsuperscript{13}

(5) Vishwanath Kibe alias Bhayyakaka :- He has written a prose commentary in Marathi on the Amritanubhava in 1882 A.D. The commentary is called “Jyoinsa” and is yet in manuscript. The manuscript is written in Modi script and is in possession of Mr. M. S. Sanzgiri of Bombay. The author has shown how Jnanadeva differs from thinkers like Shamkar and Vidyaranya in not accepting illusion as the cause of the creation of the universe.

(6) Harihar :- The commentary is called Rashtra-Bhashya. It is not in print as yet. The manuscript is in

\textsuperscript{12} Anubhavamrit-Tatparyta in Bhakti-Sudha (Published by Badve Samiti Pandharpur-1930)

\textsuperscript{13} Ramadasi Samsodhan manuscript No. 1041 (Dhulia). One of the manuscript is also in possession of Shri Dhunda Maharaj Deogurkar.
possession of M. M. Prof. D. V. Potdar. Prof. Potdar believes that the work is written by one named Harihar. The date of composition is uncertain.

Special features of this commentary are:

1) The commentator has divided the work in four chapters and not in the usual ten. He has made the division in the fashion of the Brahmsutras and designated the chapters in the same way as Samanvaya, Avirodha, Sadhana, and Phala Adhyayas.

2) He mentions Jnanadeva as Paramhansa Parivrajakacharya.

3) The commentary is written partly in Sanskrit and partly in Marathi.

4) His exposition is from the point of view of Brahma-Vilas.

(7) Hansarajaswami: (1798 to 1855 A.D.)—He was a Rigvedi Brahmin staying at Parabhani on the bank of the Godavari. His commentary is in the form of Sam-ovi i.e. one verse in easy modern Marathi for each verse in the original work. Besides this commentary he has written works like a commentary on Shivagita called Vedeshwari, Kathakalpalata, Agamasar, a commentary upon Shamkar’s Sadachar and Laghu-Vakya-Vritti, a commentary on Ishopanishad etc.

(8) Niranjana Buwa: (1782 -1855 A.D.) —Niranjana was born at Kalamba in the Hyderabad State in 1782 A.D. His name was “Avadhuta”. It was changed into “Niranjana” by his guru Shri Raghunatha Swami. Niranjana was eager to
know the meaning of Amritanubhava. At the end of his commentary he tells us how he went to Alandi and weeping like a child prayed Jnanadeva. He saw Jnanadeva in his dream and was inspired to write his commentary. Besides this he has composed commentaries on the Jnaneshwari, Kenopnishad, Mandukyopanishad and Shamkar Bhashya. He has also written biographies of Raghunatha Swami and Keshava Chaitanya, the spiritual teacher of Tukarama. In the introduction of his commentary on the Amritanubhava Niranjana calls Brahman with Shakti as Shabal (i.e. inferior) Brahman. He says that the work is written for a Jivan Mukta (a liberated soul). Both the statements are contrary to the purport of Amritanubhava. Shiva with Shakti is not the inferior form of the Ultimate Reality. Both of them are described by Jnanadeva as Nirupadhik (without limitation). Then again the work is not addressed to a particular class but is written for all people as is stated by Jnanadeva himself in the concluding verses of Amritanubhava.

(9) Balashastri Huparikar:— His commentary called Tatparya—Bodhini was published in 1698 A.D. He was a disciple of Balakrishna who was again a disciple of Vishvanatha Kibe and so his commentary is based upon Kibe's commentary. At the close of his work Balashastri gives his spiritual lineage. Jnanadeva—Satyamalnath—Dinanath—Anantraj—Amalnath—Pralhad (Badve)—Bhumanand—Gopal—Vishvanath alias Bhayyakaka—Balkrishna—Balashastri Huparikar. (Tatparya—Bodhini p. 199). In this list we find the names of Pralhad Buva, the author of Sanskrit translation of Amritanubhava and Vishvanath, the author of "Jyotsna". Balkrishna is said to have written a commentary on the Changadeva Pasasthi.

(10) Jivamukta-Yati:— Jivamukta of Uran has written in Shaka 1841, a Sanskrit commentary partly in prose
and partly in verse. He says that the aim of Amritanubhava in refuting Mayavada is to establish the Ajatvada.14

Besides these there are various expository works on the Amritanubhava by different recent writers like Jog, Sakhare, Kene, Rajarambuwa Brahmachari and Dasganu. Mr. Khasnis has published an English translation under the title of "Elixir of Life". Baba Garde has translated Amritanubhava in Arya metre in modern Marathi.

The philosophy of Jnanadeva deserves a place of honour in the history of Indian Philosophy, but it has not received attention of prominent writers on the subject like Dr. Dastgupta and Dr. Radhakriahnan. In fact the philosophy of Jnanadeva is not a matter of mere antiquity and a dry skeleton of speculative game. It serves as a foundation of the super-structure of the Bhagwatism in Maharashtra—a living creed of more than ten lakhas of people. It is, however, a matter of regret that in the scholarly work of Dr. R. G. Bhandarkar on "Vaishnavism, Shaivism and minor religious systems" the significance of Jnanadeva’s work is not taken notice of. We find his name merely mentioned.15 Dr. Ray Choudhari’s "Early History of Vaishnava Sect" ends with Ramanuja. Dr. Kshitimohan Sen’s work on "Medieval Mysticism of India" mentions only the name of Jnanadeva16 and that too is absent in Dr. Dastgupta’s "Hindu Mysticism". Dr. Nicol

14 अस्मिन् ग्रंथे श्रीज्ञानराजेन मायावादबण्डनेन अजातसिद्धात उत्कृष्टरीत्या प्रतिपादित्त्वन्ति।—उपोद्घातः

15 Dr. R. G. Bhandarkar—Vaishnavism, Saivism and Minor religious Systems, p. 131.

16 Dr. Kshitimohan Sen—Medieval Mysticism of India, p. 56.
Macnicol has devoted a few pages in his "Indian Theism" but it is a very inadequate account.\textsuperscript{17}

There are two main reasons for this negligence. Firstly, Jnanadeva has written all his works in Marathi. It was but natural that the historians of Indian philosophy, who have based their works on Sanskrit literature, should not have mentioned his name. Dr. Dasgupta has confessed that he was not able to trace the entire course of the development of Indian Philosophy which includes the views of Vernacular writers.\textsuperscript{18} Dr. Radhakrishnan mentions the name of Jnanadeva only as one of the several commentators of the Bhagwadgita and says that "Jnaneshwar makes Patanjali's Yoga the aim of the teaching of the Gita".\textsuperscript{19} We find no account of his philosophy except this short reference in the whole body of the work. The second reason is that Maharashtrian writers have not furnished sufficient material to these writers by translating the complete works of Jnanadeva into English.\textsuperscript{20}

Prof. R. D. Ranade's "Mysticism in Maharashtra" is of great importance from this point of view. He has collected several extracts from the writings of Jnanadeva and arranged them so as to bring out metaphysical, ethical and mystical teachings of the great saint. He has devoted a special chapter

\textsuperscript{17} Dr. Nicol Macnicol— Indian Theism (1915) p. 120.

\textsuperscript{18} Dr. S. N. Dasgupta— Indian Idealism, p. 198.

\textsuperscript{19} Dr. Radhakrishnan— Indian Philosophy Vol. I, p. 531.

\textsuperscript{20} Rev. Edwards has given an English translation of the 18th chapter of Jnaneshwari in his "Jnaneshwar, the Outcast Brahmin". Mr. Manu Subhedar's translation is complete but not adequate. He has mainly relied on Mr. Moghe's versification of Jnaneshwari into current Marathi. Recently Shri. Bhagwat has published his English rendering of the Jnaneshwari which will be more useful to the English readers.
to Jnanadeva's Amritanubhava where he tells us how the "Sphurtivid" forms Jnanadeva's original contribution to philosophic thought. But the work of prof. Ranade is, as he himself has said, 'historico-analytical' in character and a synthetic work bringing out fully the philosophical significance is yet a desideratum. Dr. D. G. Londhe has written a short but valuable sketch of Jnanadeva's philosophy based upon the Amritanubhava. His conclusion about Jnanadeva's view is that it "can be best described as neither dualism nor monism but a dual monism". Prof. N. R. Phatak, Mr. Chapkhane, and Gulabrao Maharaj have also written on the philosophy of Jnanadeva in their various writings.

Besides various Marathi commentaries already referred to, several Marathi writers have attempted the task of explaining the philosophy of Jnanadeva from their own points of view. Among these there are three important writers - Mr. Pandurang Sharma, Prof. Dandekar and Dr. Pendse. Mr. Pandurang Sharma has written a series of articles in a Marathi monthly on a comparative study of Jnanadeva's philosophy. He compares Jnanadeva with Ramanuja and tries to show the points of similarity in their criticism of Mayavada. His conclusion is that Jnanadeva's philosophy differs from that of Shamkar and is in the line of Ramanuja.

Prof. S. V. Dandekar has written a Marathi work on the life and philosophy of Jnanadeva along with several

other articles. He designates the philosophy of Jnanadeva as a perfect monism (Purna–Advait) and tries to show that he is a more through going monist than Shamkar. According to him there is only a methodological difference and not a substantial one between Shamkar and Jnanadeva.

Dr. Pendse’s work on the philosophy of Jnanadeva is mainly based upon the Jnaneshwari though he devotes a separate chapter to the Amritanubhava. He tries to prove the identity of the views of Shamkar and Jnanadeva. Criticising his predecessors he concludes that Jnanadeva is no more than Shamkar diluted. Jnanadeva explained the philosophy of Shamkar, according to Dr. Pendse, in easy and poetic vernacular. Prof. R. D. Ranade in his valuable introduction to the work shows his agreement with the author’s view.

Mr. Pangarkar has devoted a special chapter to the Amritanubhava in his history of Marathi literature where he tells us about the criticism of illusionism by Jnanadeva and his great skill in propounding sphurtivada. Yet in another work he identifies the views of Jnanadeva with those of Shamkar.

The article of Mr. V. M. Potadar appeared in Jnaneshwar Darshan part II on the same topic where he expresses the same opinion and also shows the similarity of Jnanadeva’s philosophy with that of Yogavasistha.

26 Tattvajnan Mandir Trai-Masik–

30 Jnaneshwar Darshan part II – “Shri Jnaneshwar Maharaj Va Anubhava- mrit” by Mr. V. N. Potdar B. A. LL. B., P. 427.
It will be seen from the above list of various writers that the majority of them are inclined towards the view that Jnanadeva has merely followed the views of Shamkar and thus have underestimated the distinct individuality of Jnanadeva. So there is a need of re-examining his philosophy independently and to set in clear relief his views on the ultimate problems of life.
CHAPTER IV

METAPHYSICS – THE NATURE OF THE ULTIMATE REALITY.

Limitations of Pramanas

Before considering Jnanadeva’s view of Ultimate Reality, it is necessary to take up the problem of Pramanas or the means of ascertaining right knowledge, which occupies an important position in the history of Indian philosophy. Every one of the great Indian philosophers is rightly fond of discussing the different Pramanas first, and then to propound his views in the light of that discussion. Different schools of Indian Philosophy emphasise or accept different Pramanas or the sources of valid knowledge. Opinions about the nature and the number of these Pramanas differ. Though the maximum number of Pramanas is ten, six of them are common. These are:— (1) Pratyaksha or sense-perception (2) Anumana or Inference (3) Shabda or Verbal testimony of sacred texts like the Shrutis (4) Upaman or analogy (5) Arthapatti or Presumption and (6) Anupalabdhi or Non-apprehension. The materialists like Charvakas accept perception as the only source of valid knowledge. In addition to perception, Jainas admit inference and testimony while Naiyayikas add comparison or analogy also to the first three sources. The Mimamsakas of Prabakar school admit first five sources while those of Kumaril school admit all the six sources as valid.

Vedant Philosophy includes different schools like monism of Shamkar, qualified monism of Ramanuja, dualism of Madhva and pure monism of Vallabha. All the schools emphasise
the third Pramana i. e. the testimony of the Vedas. Shamkar regards word or testimony as the only Pramana which is philosophically valid while the others have only empirical value. Only Vedant Texts reveal the true and ultimate nature of the Reality while all the other sources of knowledge are useful in our ordinary life which is based upon super-imposition (Adhyas).\textsuperscript{1} Ramanuja, Madhva and Vallabha reject Shamkar’s theory of super-imposition and Nescience. Hence the sources of knowledge like perception and inference play more important role in their systems. These sources, however, have their limited provinces which they cannot transcend. What these Pramanas reveal about cosmos is real but they are powerless in determining the nature of the ultimate Reality or the Supreme Being. The only authority which tells us about the Great Being is the sacred scriptures. The Upanishadas, the Bhagavadgita and the Bramhsutras are called Prasthan-trayi and these are regarded as the supreme authority regarding the nature of Brahman or the Ultimate Reality. Besides these Ramanuja regards the Pancharatra Agama and the Prabandhas of the Alvars as authoritative texts.\textsuperscript{2} Along with the Vedas, Madhva accepts the authority of some Puranas, Pancharatra

\textbf{1} तमेतमविद्याव्यवस्थात्मानात्मात्मनोरितराध्ययं पुरस्कृत्य सवें प्रमाणप्रमेय–

व्यवहारा: लौकिकतः प्रवृत्तः।

(It is in the wake of this mutual superimposition of the self and the not-self, which is designated Nescience, that there proceed all empirical usages of the world relating to valid knowledge and the means there of.)

— Brahmasutra – Bhashyam, Introduction.

\textbf{2} “As the Pancharatra is the word of God leading to the supreme spiritual goal of godliness, it is as valid as the Veda. The highest proof of the existence of God is the experience of God by godly men. The Alvars liki the Vedic Rishis, had a direct experience of God and they invite humanity to share in the joy of their divine life” — Prof. P. N. Shrinivasachari M. A. – The Philosophy of Vishishtadvaita, Introduction, p. XXXI.
Agamas, the Mula Ramayana and the epic Mahabharata. 3
"The Vedas, the words of Lord Shri Krishna, the Sutras composed by Vyas, the Samadhibhasha (the Bhagawat) of Vyas" are the four authorities of Vallabha. 4 Though all the above philosophers i.e. Shamkar, Ramanuja, Madhva and Vallabha consider Prasthan-trayi as the supreme authority, their interpretations differ widely and we see the phenomena of monism, dualism and other schools founded on the same sacred works. Though the foundational texts are the same the view of every Acharya about the ultimate problems is different and their conceptions about God, self and the universe do not agree.

The above mentioned philosophers mainly rely upon the sacred scriptures. But Jnanadeva does not give so much importance to these and relies on his own experience. He says, 'And it is not because Shiva or Shri Krishna has spoken this, that we are making our statement. It would have been the same thing if they had not spoken.' 5 Different Pramanas also are of no use in revealing the nature of the ultimate Reality. According to Jnanadeva Reality is self-evident and self-illuminating and hence does not require to be proved by other means. The so called valid sources of knowledge are themselves illuminated by this Reality. We see different objects in the light of the Sun but those objects do not reveal the Sun itself. In the same way various proofs presuppose

the self-luminous Reality and do not prove its existence.\(^6\) The light that enlightens all other things does not require any other thing for its perception. \(^7\) "It is the person who lights the candle and not the candle that creates the person." \(^8\)

Ancient Indian philosophers took up the four Mahavakyas (important sacred texts) like "Thou art that" (Tatvamasi), "I am Brahman" (Aham Brahmasmi), "This self is Brahman" (Ayamatma Brahma), "Knowledge is Brahman" (Prajnanam-Brahma), \(^9\) and tried to interpret them according to their own views. With great skill they all try to show how these sacred texts conform to their own doctrines. Some times they have tortured the texts to such a length that they have squeezed a meaning which is quite opposite to the one they indicate. e. g. Madhva, while explaining the meaning of "Tatvamasi" says that instead of reading Tatvamasi (That thou art) it should be read as 'Atatvamasi (Thou art not that). \(^{10}\) Jnanadeva, however, does not build his philosophical structure on the so called revealed words He strikes at the very root and criticises the efficacy of the "word" itself to reveal the nature of the ultimate Reality. The word is of great use in our daily life. It shows us what we ought to do and what we ought to

\(^{10}\) Madhava's commentary on Chchandogyopanishad VI 7-8
avoid. It also is useful in reminding the things that are forgotten.\textsuperscript{11} But though useful in this way it cannot be brought forth as a proof of the ultimate Reality which being self-evident and self-existent needs no proof by word. “The Absolute does not prove itself by any means of proof, nor allows itself to be disproved. It is self-evident, beyond proof or disproof. It is therefore, groundless to believe that the word can gain greatness by enabling the Atman to experience itself.”\textsuperscript{12}

It is said that the Nescience or Avidya suppresses the nature of Reality and the word has got the power to destroy the darkness of Nescience. But what is the nature of this Nescience itself? The word Avidya itself shows that it is that which does not exist.\textsuperscript{13} So to destroy a thing which does not exist is like breaking the horn of a hare or like plucking the sky flower.\textsuperscript{14} The word is futile both ways. It can neither destroy ignorance because ignorance does not exist, nor reveal the Reality which requires no aid of any other thing because of its self-luminosity. The word is, therefore, useless like a lamp, lit up in broad day-light, which does not destroy the

darkness which is not there, nor light the Sun who is self-effulgent.\textsuperscript{15}

In this way the so called gateways of knowledge like perception, inference etc. are not necessary to prove the existence of Reality. Not even sacred words are required for this purpose. These words may point to Reality but cannot be regarded as its proof.

The Conception of Sat, Chit and Ananda

Reality is often designated as Sat, Chit and Ananda—Existence, Consciousness and Bliss.\textsuperscript{16} Though this is a working conception it is metaphysically inadequate. Jnanadeva has shown this in the fifth chapter of Amritanubhava. Existence, Consciousness and Bliss cannot be real designations of the ultimate Substance. “The poisonousness of a poison is nothing to itself”.\textsuperscript{17} These are the modes of our apprehension and not the Thing-in-itself. Though there seems to be a triad of Existence, Consciousness and Bliss they denote only one Reality. As Iustre. hardness and yellowness together constitute gold, or as viscoscity, sweetness and fluidity together constitute nectar, or whiteness, fragrance and softness is only camphor,
so the triad of Existence, Consciousness and Bliss is nothing but one Reality.¹⁸

Moreover these three terms are used by Shruti for telling what the Reality is not and not for indicating what it is. The Reality is called Sat or existence in order to tell that it is not Asat or non-existent. Similarly the words Chit (consciousness) and Ananda (Bliss) are used in order to point out that Reality is not Jada (material) and Dukkha (pain). Hence the word Sachchidananda does not define Reality but is used to differentiate it from the opposites.¹⁹

In fact, Reality is beyond knowledge and ignorance. Just as the sun is not illuminated by another light or covered by darkness, in the same way, Reality is not brightened by knowledge nor darkened by ignorance. If we say that Reality knows itself that would imply that it was ignorant of itself for some time, because knowledge is always relative to ignorance. Again both existence and non-existence being relative conceptions, they cannot be applied to it.²⁰

Shamkar, while explaining the already quoted passage of Taittiriyopanishad, says that the words Satya, Jnana and Anant are used to differentiate the Brahman from their opposites.

²⁰ तैसे असणे भाणि नसणे। हैं नाहीं जवा होणे। ||

Ibid, IV, 25 also 16, 17, 22, 23
But to say that Ultimate Reality is beyond existence and non-existence, beyond consciousness and ignorance, beyond bliss and misery, does not mean that it is a void or a Nihil, as the Madhyamik school of Buddhistic Philosophy maintains. Nagarjun was the propounder of Nihilism and his philosophy is neither idealism, nor realism nor absolutism but blank phenomenalism which only accepts the phenomenal world as it is but without any kind of essence, ground or Reality behind it.\(^2\)

Jnanadeva refutes the doctrine of Nihilism and maintains that though Ultimate Reality cannot be called existent or non-existent, it does not mean that there is nothing existing except a void. If it is said that there is nothing but void, there must be some one to say to whom this conviction comes. If the extinguisher of the lamp is extinguished along with the lamp, who will understand that the lamp is extinguished? If, during sleep, the person who sleeps gives up life, then who will, on awaking, remember the happiness of a sound sleep? A jar is visible when intact and equally visible when it is broken. Now when it does not exist it does not mean that the person who sees the non-existence of a jar also does not exist. In the same way that which perceives void does not become void itself. Suppose a man is asleep in a lonely forest where there is no human being. Now he is neither perceived by others nor by himself. But it cannot be maintained on that account that he is not there, or if a black man stands in pitch darkness he does not see himself nor others also can see him. But we cannot say that he is not there. Similarly though the words ‘being’ or ‘non-being’ do not apply to Ultimate Reality we cannot say that it is nothing or void. The sky is

\(^2\) Dr. S. N. Dasgupta, Indian Idealism, P. 79.
not visible to others and seems a vacuum but it stands in its own purity. In a dry lake with a subterranean spring the water is not visible outside but it is still there inside. So Reality though beyond being and non-being is there in its own glory. We say that the ground is with a jar when there is a jar and without a jar when there is no jar. But the presence or the absence of the jar does not affect the existence of the ground itself. So Reality is pure Knowledge which is beyond relative knowledge and ignorance.

To summarise, the terms Sat, Chit and Ananda do not describe the nature of Ultimate Reality. They only show the negation of their opposites and are not positively applicable. In this way Reality is beyond Sat, Chit and Anand but it does not mean that it is a Nihil.

The Nature of Ultimate Reality.

If Ultimate Reality is beyond Sat, Chit and Anand, what is its nature? Is it knowable or unknowable? Can we tell something positive about it? The answer of Jnanadeva is in the affirmative. The knowledge of Ultimate Reality is possible and it can be described positively. Of course this knowledge is not like the knowledge of some external object but it is

In the Jnaneshwari the self refuting character of Nihilism is described by comparing it to a naturally broken tusk in one of the hands of God Genesh एके हाती दंतु जो स्वभावता शब्दितु। तो वौद्धमतसंबंधित। वातिकांचा।

I, 12.
like an immediate experience. Ultimate Reality is Pure Consciousness — the substratum of subject — object relation. It is the Experience which manifests itself into the manifold objects in the world. This pure Knowledge or Consciousness is self-evident and self-established. No other proof is required to prove its existence not because it is a blind assumption or a working hypothesis but it is the presupposition of all proofs.

Now this self-illuminating Reality and its self-awareness form as it were a twin which gives birth to the whole universe. These two, though distinguishable, are inseparable. The Ultimate Twin in the form of Knowledge and Its self-cognition are called by Jnanadeva, God and Goddess. These two are without limitation (nirupadhik) and parents of the universe. The epithet "without limitation" is most important. Shivakalyan, in his commentary, has brought out the full significance of this word. The God and Goddess, though the words are two, they mean the same Reality and are not two different entities. These are the creators of the universe and they are without limitation. Now here we see a contradiction and two objections can be raised against this statement. First, if the Reality is one why the two names are used? It is superfluous to do so. Secondly, how these two are without limitation? But these objections will be answered if we look

23 Amritanubhava I-1, and Shrivakalyanas commentary on it.
into the real nature of the two viz. God and Goddess. The Supreme Reality is Pure Consciousness (Nikhal Drinmatra). Though it cannot be called Sat, Chit and Ananda in a relative sense, we can say so in a transcendent sense. Hence Reality is Pure Existence, Pure Knowledge and Pure Bliss. This is the positive description of Reality. Pure Existence is ever present to itself and hence it is Pure consciousness. The Existence and Consciousness are inseparable and hence It is Pure Bliss. The knower and the known are not two opposite and separate entities. The one Reality experiences itself naturally and hence there is the eternal union in the Pure Existence which is Pure Knowledge and its self-cognition and hence there is the eternal and spontaneous Bliss. As the ocean, assuming the form of garlands of waves, enjoys itself, so Reality naturally manifests itself in the two forms and experiences its own delight. When one knows oneself it cannot be said that there are two beings, one the knower and the other the known. In the same way the words God and Goddess do not point to two different realities, but they are two aspects of the same Experience. Hence we can safely use the two names. Moreover the two i.e. God and Goddess do not delimit or distort each other; and hence they are called Nirupadhik (without limitation). The two are inseparably united, causing not a degradation of the Absolute into the finite existence but the manifestation of the richness of the Absolute in the form of the finite universe.

God and Goddess or Purush and Prakriti.

The conception of Purush and Prakriti occupies an important position in the history of Indian Philosophy. Various schools have various conceptions about the two and these conceptions differentiate them from each other. Jnanadeva's
conception of Purush and Prakriti is a peculiar one and has an important bearing upon his whole philosophy.

The author of the "Jyotsna"—a commentary upon the Amritanubhava has tried to show similarities of Jnanadeva’s view of God and Goddess or Purush and Prakriti with some passages in the Upanishadas. He mentions the Brahadaranyaka, Kena and Svetasvetar Upanishadas. In the Brahadaranyaka Upanishad we get the passage "In the beginning this universe was self alone in the shape of a person (Purush). Looking round, he saw nothing but his self....He felt no delight.... He wished for a second. He was as large as man and wife closely embraced. He then made his self fall into two and thence arose husband and wife. Therefore, Yajnyavalkya said, "we two are thus (each of us) like half of a shell,". Therefore the space which was there is filled by the wife. He embraced her and human beings were born."²⁴ In the Kenopanishad a story is told to describe the power of Brahman. Once upon a time there was a fight between Gods and demons and the Gods won the victory. This was due to the power of the Brahman in them, but the Gods thought that they alone won the battle. Hence the Brahman, in order to remove their arrogance, presented himself before them in the form of a Yaksha (spirit). The Gods, being wonderstruck, sent Agni (fire) to him but he could not even burn a small blade of grass before the Brahman. Similarly when Vayu (wind) was sent, he also could not blow away that blade. Lastly when Indra went before the Yaksha, he saw not a Yaksha but a beautiful damsel in his place. She told Indra about the power of Brahman and it was through this power that Gods were

²⁴ Brihadaranyakopanishad, I, 4–3.
able to gain victory. Here the Brahman’s assuming the form of a beautiful celestial damsel (Uma Haimavati) appears to be similar to Jnanadeva’s conception of God and Goddess. Again, in the Svetasvetara Upanishad, it is said—“Know then Prakriti is Maya and the great Lord the Mayin. The whole world is filled with what are his members.” Prakriti is identified with Maya which is also described as the snares of the Godhead inside which all beings are entangled.

Now, if the above passages referred to by the author of “Jyotsna” are closely examined, it will be seen that the passage in the Brahadaranyak has cosmological import and not metaphysical. It tries to explain how the duality of sex is generated from the Atman and does not describe its real nature and as Prof. Ranade has pointed out, it yet leaves the inorganic generation entirely unexplained. Jnanadeva’s God and Goddess are parents of the whole universe containing both organic and inorganic nature. Again, in the same chapter of the Brihadaranyak, it is suggested that the Brahman was alone and hence without delight. So It created the world. It was not strong enough and so It created the four castes. This lack of delight and strength are not found in Jnanadeva’s conception of the Ultimate Reality which overflows with delight and manifests itself in the form of the world.

The parable in the Kenopanishad is told to describe the power of the Godhead over the various deities and the celestial damsel does not represent the eternal aspect of Reality like the Goddess of Jnanadeva. She is only brought forth to

25 Kenopanishad. Ch. III.
26 Svetashvetaropnishad. IV – 10.
27 Prof. R.D. Ranade :- A Constructive Survey of Upanishadic Philosophy P. 94.
proclaim the great power of Brahman and represents the philosophical wisdom which consists in knowing that all physical as well as mental power is to be regarded merely as the manifestation of the power of Brahman.

The description of Prakriti in the Svetasvatara Upanishad is more akin to the Maya of Shamkar than to the Goddess of Jnanadeva. Though Prakriti is described as the creative power of God, that power is identified with Maya— the magic power of God, Who is a great magician that has caught in his meshes (which is no other than Maya) various individuals. In this way the Prakriti or Maya is one who misleads the individual soul, while the Goddess of Jnanadeva is the affectionate mother of the universe.

Jnanadeva’s view of God and Goddess, as expressed in his Amritanubhava, is quite distinct from the Samkhya view of Purusha and Prakriti or the Vedantic doctrine of Brahman and Maya. According to Samakhya system, Purusha and Prakriti are two separate entities that are eternal, and cannot be united. One of them i.e. The Purusha is a sentient, passive spectator, while the other i.e. The Prakriti is material. While Purusha watches her she dances before him and evolves the whole world out of herself. Though Purusha is only a spectator, “he seems to see, to combine, to rejoice, to suffer and to will, does so by misapprehension only, like a spectator who is carried away by his sympathies for Hecuba, but who in the end dries his tears and stops his sighs, leaves the theatre of the world, breathes the fresh air of the night.” Vedant (as interpreted by Shamkar.) tries to escape this duality; but

28 Svetashvetar Upanishad, III-1.
29 Max Mullar—Six Systems of Indian Philosophy p. 295.
instead of Prakriti it brings forth Maya or Avidya. This Avidya or Nescience veils and distorts the Brahman and causes the appearance of this world which is no more than an illusion. Avidya itself is of illusive nature and cannot be called existing or non-existing. Both the views, the views of Samkhya and of Vedant (of Shamkar), are inadequate. Samkhya has the drawback of assuming two eternal principles, and of regarding matter evolving out of itself. There cannot be two Ultimate Realities as they will be limited by each other’s existence and hence spoil their absoluteness. Similarly material substance cannot create the world and if it can, it cannot be called material. The Vedantic view is also, marred by the assumption of Avidya which seems to overpower even Brahman—the Ultimate Reality. Jnanadeva has refuted this doctrine of Avidya in the seventh chapter of Amritanubhava and we shall see his skilful refutation while dealing with his cosmological views.

Discarding both the views Jnanadeva described the sweet intimacy of the God and Goddess. Jnanadeva himself has not used the words Purusha and Prakriti because of the old associations. He has not used the word Brahman also, to denote Ultimate Reality. His words are “the Self”, “The Substance” or ‘God’. The word “Brahman” has certain associations and hence he seems to have discarded it. The problem about Ultimate Substance is one of the persistent problems of philosophy, and at the beginning of the Amritanubhava, Jnanadeva deals with it in his own way. While offering his customary salutation to the God and Goddess, he says, “I bow down to the two parents of the universe, who are beginningless and without limitation.” Apparently it seems that he admits

---

80 ऐसी है निरह्पाविके | जगाचि जिये जनके | ते बंबली मिया मूळीके | देवोदेवी || Amritanubhava, I-1.
two cosmic substances. But his further description brings out clearly their unique nature. He says that the Lover himself has become the Beloved of his heart and their love is so deep and intense that they swallow each other and again emit. So these two are but aspects of One and the same Substance. The two complete each other and can not remain without each other. "Oh! how sweet is their union of love! The expanse of the whole universe is insufficient for their play although they reside happily even in a tiny atom. Each is the very life of the other so that not even a blade of grass is created without their mutual help. Though they appear as two, there is only one Divinity, just as the word is one though the lips are two, or the fragrance is the same though flowers are two. The sound is one though sticks are two, the light is the same though there are two eyes. So this eternal couple is eternally testing the sweet nectar in the form of their sweet union. They are inseparable like sugar and sweetness, camphor and fragrance. Shiva is always accompanied by Shakti like wind and motion, gold and lustre, musk and fragrance, fire and warmth."  

So in the words of Spinoza we can say that the Ultimate fact is "God loves Himself".

So the God and Goddess are one and the same. Both are identical with the Supreme Being behind the world. For realising Himself the Supreme Being assumes the two forms which, however, are inseparable like light and refulgence, moon and light. Both are responsible for the origination of the

world and both of them fill up macrocosm as well as the microcosm. Both of them merge themselves into one form, or if they please they allow the two forms to emerge out of themselves. The unity, intimacy and inseparability of the God and Goddess will be clearly understood when we bear in mind the identity of God with the pure Consciousness and that of Goddess with its self-cognition. Jnanadeva calls It elsewhere “Svasamvedya” Atmarupa, the self-cognizing Ultimate Reality.  

Jnanadeva describes in his Changdeva Pasasththi how the same Reality manifests itself in the triad of knowledge, known and the known. Though they appear as three, there is only one Reality which Jnanadeva calls “Samvitti” – Pure Knowledge. It is nothing but Reality perceiving itself. Similar descriptions are also found in the Jnaneshwari.

CHAPTER V

COSMOLOGY – THE NATURE OF THE WORLD

Epistemological Method of Jnanadeva

Jnanadeva is a spiritual monist. He regards Ultimate Reality as One and spiritual. Spirit is pure consciousness—the substratum of knower and the known. His view so far resembles that of Shamkar, who regards Ultimate Reality as Pure Consciousness without subjective and objective relation (Nirvisshaya Jnana). However, the resemblance ends with this common starting point, and their views are widely divergent when they come to deal with the triad of Knowledge, Knower, and the Known or perception, perceiver and the perceived. Jnanadeva has clearly stated his views on this matter in his Changadeva Pasasthi and Amritanubhava. His enquiry begins with the nature and relation of these three things and his method may be adequately called epistemological. He does not emphasise the problem how the world was created or what the stages of its gradual evolution were. According to him the triad of Knowledge, The Known and the Knower is the origin of the universe and so the nature of these three becomes an important topic in his philosophy.

Shamkar maintains that the subjective and objective relation is illusory and is due to Avidya or Nescience. The world also is no more than an appearance though it has reality for practical purpose (Vyavaharik Satta). His philosophy has rightly been summed up as “Brahman satyam Jagatmaya Jivo Brahmiava naparah” – (Brahman alone is real,

1 Shamkar; Brahmastra Bhashya – Introduction.
world is illusory and there is identity between the soul and the Brahman. Jnanadeva admits the reality of Brahman but rejects the falsity of the world. He clearly states in Changadev Pasasthi "Therefore, I do not understand when it is said that the origin of the perceived and of one who perceives is Nescience. On the other hand, they are the natural expressions of Reality." ²

Refutation of Mayavada

In order to defend his position Jnanadeva had to refute the theory of Avidya or Nescience and we find the whole of the seventh chapter of Amritanubhava to have been devoted to this refutation. This chapter is written elaborately and forms more than a third part of the whole work. Out of eight hundred and seven verses of the whole book Jnanadeva devotes two hundred and ninety five verses to this chapter on "Ajnana-Khandan". This "Inquiry into the nature of Ignorance" is the most important part of the philosophy of Jnanadeva. He refutes the Ajnavavada from various points of view, with great logical skill and gives various illustrations to support his refutation.

The concept of Maya is of great importance in the history of Indian Philosophy as it determines the world-view of its propounders or its opponents. Jnanadeva has refuted the doctrine of Ajnan which is identical with Maya of Shamkar. He has clearly declared that the entity which is called Maya by Vedantins is nothing but ignorance. ³

² म्हुणोति अविद्यानिमित्ते। दृष्ट्य दृष्ट्यत्वं वत्ते। तेन मी नेनें,—वाहव। ऐसंति अर्से। Changadeva Pasasthi.
³ बेदावती हयेते माया। असेः म्हुणिज्ञ प्राज्ञर्वा। असो किंती बोलो बाया। अज्ञान हैं। Jnaneshwari XIV, 71.
When a philosopher asserts that Reality is Being which is one without second, he has to explain the appearance of many or the process of becoming in the universe. Some philosophers deny the one and some many. Some deny being while others deny becoming. Plato in Greece, his seniors the Upanishadic Sages in India and their followers like Shamkar, denied the Reality of all movement. The Buddhists, on the other hand, as well as the crypto-Buddhists such as the Yogavasisthins pinned their faith on the mere flowing nature of all our experiences and things represented by them. So Shamkar, while porpoinding the One Absolute, had to account for its appearances. He had to explain the relation of Reality to appearances which he does with the help of his theory of Maya. Though the theory of Maya is found in its fullfledged form in Shamkar we find the germs of the Mayavada in Upanishadas. In the Ishopanishad we find the conception of "Real's face being covered over with a golden vessel. In the Brihadaranyakopanishad there is a prayer to God to carry the devotee from Not-being to Being. The passages like "Brahman is one without second". "Here the many do not exist" imply that the Brahman is the only Reality while all the appearances are false. The extreme case of Mayavada is found in Gaudapada’s doctrine of Ajatvada – the doctrine of Non-creation. While enumerating different views regarding the world he says, "some people regard the world as the greatness of God, others as His creation, others as a dream, others as an illusion, others regard it merely as the Will of God, still others the object of His enjoyment, while some people call it the plaything of God, and yet others regard it as God's nature." Gaudapada's own opinion is that the universe was not created at all.\footnote{Gaudapad – Mandukyakarika II-32.} Some times he seems to incline towards those
that regard the universe as an illusion. Shamkar, however, is definite about his world-view based upon his theory of Maya or Adhyas (super-imposition).

Shamkar distinguishes between Vyavaharika Satta (empirical reality) and Paramarthika Satta (transcendental ideality). The world has only empirical reality. The appearance of the world is caused by Maya or Avidya (cosmic ignorance). Shamkar makes distinction between the two. This cosmic ignorance not only veils Reality, but distorts it and causes the appearance of manifold things in the universe. It is an innate error which is beginningless, positive, and indeterminable, though it can be removed by Jnana (Knowledge). Shamkar does not try to prove Maya but accepts it as indisputable.\(^5\) It some how obscures the Pure Consciousness, divides the Absolute and distorts it in the form of the world of difference. The rope appears as a snake, or a conch-shell appears as a piece of silver. So the Pure Brahman appears as the world through illusion. The cause of this illusion cannot be explained, as the concept of causality itself is the effect of the illusion. The Avidya is indefinable. It cannot be called real nor unreal, nor both. It is not real, because it is sublated in the state of liberation. It is not unreal since it is perceived. It can not be both, because to say so would be self-contradictory. Accord to Shamkar the world is a Parinama (effect) of the Avidya or Maya, while it is a Vivarta (perversion) of Brahman. The world resides in Brahman as the illusion of a snake is said to reside in the rope.

Shamkar's doctrines of Maya, which maintains the phe-
nomenality of God, man and nature and asserts the Reality

\(^5\) Dr. S. N. Dasgupta – History of Indian Philosophy Vol. I, p. 435.
of Pure Consciousness only, raised a great protest against himself. All the other schools of Vedant viz Vishishtadwait (qualified monism), Dwait (dualism), Shuddhadwait (pure monism), Dwaitadwait (non-dualism in dualism) have tried to refute it from their own points of view. Jnanadeva's view of Absolute Reality is different from that of Shamkar as well as from the views of the above mentioned schools of Vedant. He has also criticised the doctrine of Maya from his own point of view. In order to appreciate his criticism we shall first have to see, in brief, how other philosophers have refuted it.

Ramanuja

Ramanuja's refutation is known as Saptavidha Anupapatti or the sevenfold inadmissibility. The seven charges are as follow:

1. Ashraya Anupapatti: Avidya has no Ashraya or basis. The seat of Avidya should be either Jiva or Brahman. It cannot be Jiva, because Jiva itself is a fictitious product of Avidya. It cannot be Brahman, for it is self-illumined and can never be enveloped by Avidya.

2. Tirodhan Anupapatti: There cannot be a tirodhan or obscuration of Brahman. If Brahman, which is of the nature of Pure self-illumination, is said to be hidden by Avidya, it means the destruction of the very nature of Brahman.

3. Swarup Anupapatti: It relates to the understanding of Swarup or Nature of Avidya. If the defect of Avidya is real it cannot be destroyed. There will be two Realities and consequently monism will fail. If it is unreal, how is it brought

6 Ramanuja:— Shri Bhashya, p. 178.
about? If it is brought about by another defect we can ask the same question about that defect, and there will be an endless regression (anavastha). If it is held that the defect is the very essence of intuition of Brahman, the Brahman being eternal, the defect also will be eternal and there will be no emancipation.

4. Anirvacaniya Anupapatti:— The nature of Avidya cannot be logically determined. It is neither real nor unreal. To say a thing is indefinable is illogical.

5. Pramana Anupapatti:— Avidya is not testified by any means of knowledge (Pramanas) such as perception, inference and revelation.

6. Nivartak Anupapatti:— It is the criticism of the theory of the sublation of Avidya. Ajnana cannot be sublated or dispelled by Jnana, as Jnana itself is the product of Ajnana.

7. Nivritti Anupapatti:— Avidya is a concrete Reality. The sorrows that are experienced by it are not false. So mere knowledge would not be useful to destroy Avidya, but there is the necessity of God’s grace. According to Ramanuja, Jiva is a Prakara (mode) of Brahman. So the knowledge, that Jiva and Brahman are identical, is not a true knowledge but a false cognition which, instead of relieving man from the bondage of Nescience, tightens the knot.

So Ramanuja shows that the concept of Avidya is entirely contradictory to the non-duality of Brahman and his nature as pure consciousness. The concept of Avidya itself is unintelligible and is incapable of being used as a principle of explanation. Avidya is not only logically inexplicable but it cannot be also proved as a fact of experience.
Other philosophers like Madhva, Nimbark and Vallabha have also criticised the doctrine of Ajnana in the same way. Though all of them have different views about the nature of Ultimate Reality, they all agree in rejecting Advaitin’s conception of Avidya.

Madhwa

The Advaitin’s conception of Ignorance is refuted by Madhwa on the following grounds.\(^7\)

1. Omniscience of the Absolute is incompatible with ignorance. If at any time Omniscience becomes clouded by ignorance, it would cease to be Omniscience.

2. It is said that though there is identity between the Absolute and the finite, the latter has been alienated from the Absolute by the separating mischief of Upadhi. So, while Brahman is Omniscient, Jiva, under the influence of Upadhi, has ignorance. To this, we may ask, whether the Upadhi is real or imaginary. If it is held to be real, there will be two realities, which is contradictory to the doctrine of monism. If the Upadhi is held to be belonging to the realm of illusion and its origin held to be in ignorance, there would be the fallacy of *regress ad infinitum*. The Upadhi, credited with the power of ignorance, would itself be the effect of ignorance and there would be the fallacy of Ananyashraya i.e. vicious reciprocity of causality.

3. If it is said that Upadhi creates the difference that produces ignorance, there is the distortion of factual evidence. Really speaking, Upadhi does not create difference *de novo*.

---

\(^7\) Madhwhacharya:- Upadhi Khandan with Jaytirtha’s Commentary; St. 1-3.
COSMOLOGY

It only reveals the difference which is already there. Hence the difference is not illusory, and is, therefore, not the cause of ignorance.

Nimbark

Nimbark is the champion of Bheda-bheda-vada i.e. the theory of the Absolute as Unity-in-difference. He refutes the theory of Avidya in the following way.\(^8\)

(1) An illusion is possible in a locus only when it has some specific as well as general characters. But, if the Brahman is absolutely qualitiless, it is impossible that it should be the locus of any illusion.

(2) It is difficult to explain how Ajnana should have any support or object. Therefore illusion itself becomes inexplicable. Brahman being of the nature of pure knowledge, can hardly be supposed to be the support or the object of Ajnana. Jiva also, being itself the product of Ajnana, cannot be regarded as its support.

(3) Since Brahman is of the nature of pure illumination and ajnana is darkness, the former cannot legitimately be regarded as the supporter of darkness.

(4) Ajnana is devoid of consciousness, and cannot, therefore, be regarded as the agent of the operation that results in the formation of illusion.

(5) The false appearance of Brahman as a diverse undesirable phenomenon is inexplicable. If the Brahman is

---

8 Shrinivasa:– commentary on Nimberka’s Vedant-Parijat-Saurabh; I-I.
always conscious and independent, it cannot be admitted to allow itself to suffer through undesirable states.

(6) If Ajnana is regarded as an existent unity, there is the change to dualism, if it is regarded as non-existent, it cannot hide the nature of Brahman.

(7) If the Brahman is self-luminous, how can it be hidden and how can there be any illusion about it? If the conch-shell shines forth by its own nature, there cannot be any misconception of its nature as a piece of silver.

(8) If the nature of Brahman is admitted to be hidden by Ajnana, the question arises whether Ajnana hides it as a whole or in part. In the former case the world would be absolutely blind and dark; in the latter, it is not possible because the Brahman is a homogenous entity and has no parts.

Vallabha

Vallabha's stand point is Shuddhadwait—Pure monism. According to him Maya is not Nescience as Shamkar maintains but it is the power of the Lord. The author of Shuddhawait—martand criticises the conception of nescience as follows

(1) Is nescience caused or uncaused? If it is caused, then it must have some originator and that originator must be Brahman, as Shruti has declared. The Brahman of Shamkar is, however, without attributes, and if it is taken to be the originator, it becomes "Savishesh" i. e. with attributes.

9 Giridhar:—Shuddhadwait—Martand; p. 23, 25.
(2) Now if the nescience is taken to be uncaused there will be two uncaused substances i.e. Brahman and Maya, and that will destroy the very foundation of Adwaitism.

(3) To hold that Nescience is neither being nor non-being, is inadvisable, for an object must either exist or not exist. It cannot be both at one and the same time.

(4) Nescience is held by advaitins as beginningless but not eternal. But this is mere contradiction. Beginninglessness and endlessness are inseparable concomitants.

(5) It is said that Maya is natural to Brahman. But how is pure knowledge turned into that whose nature is nescience?

(6) That Nescience has a temporary existence, is also inadmissible because one cannot point out when it comes into existence and when it ceases to exist.

Jnanadeva

According to Jnanadeva, knowledge and ignorance are both relative terms. The Ultimate Reality is pure knowledge. Hence the so called knowledge and ignorance are mere words without corresponding existence. They are like gardens in a picture, where we cannot smell the painted flowers or taste the various fruits. Now it is said that though ignorance is not real for all time, it exists for some time at least before its destruction by knowledge, and hence its total absence cannot be maintained. Jnanadeva, in his introduction to the chapter VII of Amritanubhava, answers this

10 एवं श्यामकृष्णने | बाणीं जनाने भजने | सच्चमें वने | चिन्तनीचीं जासों ||

Amritanubhava; VI-102.
objection by saying, that if the existence of ignorance is taken for granted before the rise of knowledge, that existence of ignorance does not even become the object of hearing, i.e. nothing can be said about the nature of ignorance because that description itself would not be made without the help of knowledge. The existence of ignorance is illusory like the light of a glow-worm. Though that light appears in the darkness, it does not enlighten and dispell the darkness. Hence, it is not worth the name of a light. In the same way ignorance appears like ignorance but really it is not so because it is not experienced. The thing which cannot be experienced, cannot be called as existing. A dream may be real in the state of dreaming, but its falsity does not diminish on that account. So the imaginary ignorance may have importance in imagination, but not in the real world. The horses in the clouds cannot be used for practical purpose nor the ornaments produced by an enchanter can be really used as one’s adornings. So the ignorance does not exist from the beginning and hence, though we think about it, the result will not be anything different. If we assume that ignorance is dispelled as soon as knowledge arises, it means that though ignorance appears to be extinguished, it re-appears in the form of knowledge. Hence that knowledge is nothing but ignorance in another form. Ignorance being false, the knowledge that dispells it, is also false. Hence, both ignorance and knowledge that destroys it, are fictions of the mind.  

With this introduction Jnanadeva sets in search of ignorance and puts forth following arguments.

11 एन्हूँ तरी अज्ञाना | जै ज्ञानाथो नसे कोभना | तै तरी काना | खालिच ददे || Ibid: VII–1, also 2–7.
COSMOLOGY

(I) Ignorance has no foundation, is unknowable and ineffective.

(a) If Ignorance exists it must exist in some substratum either full of knowledge or full of ignorance. The first alternative is not possible, because it is the nature of ignorance to nullify knowledge and make its substratum ignorant. Second alternative, also, does not hold. If ignorance were in the beginning no manifestation would have been possible. Manifestation, on the other hand, is quite current with every one. Hence the alternative is invalid.\(^\text{12}\)

(b) Ajnana or ignorance is not possible. But, taken for granted its possibility, can it be known? Ignorance cannot know itself since it is non-sentient. If ignorance befools a person how can he know ignorance itself?\(^\text{13}\)

(c) Suppose that ignorance is possible and also, it can be known. In that case we will have to say that it is non-effective, because it does not nullify knowledge according to its own nature. The clouds do not really eclipse the Sun, who shows them. Sleep does not extinguish the life of the sleeper who experiences its happiness.\(^\text{14}\)

(d) If it is assumed that ignorance is effective, it cannot be known i.e. if the ignorance could eclipse the knowledge, there would be all ignorance and none to tell its existence.\(^\text{15}\)

\(^{12}\) Ibid; VII, 8–11.
\(^{13}\) Ibid; VII, 12–14.
\(^{14}\) Ibid; VII, 15–16.
\(^{15}\) तैसं विज्ञान बरसे जेवें। तेंच जरी विज्ञान आते। तरी विज्ञान विज्ञानाते। नेनतां गेले॥। Ibid; VII–17.
(II) Ignorance can neither co-exist with knowledge nor can it exist independently.

(a) The knowledge which distinguishes ignorance cannot be itself ignorance. That which is called ignorance is a kind of knowledge. Hence the word ignorance is meaningless. It cannot be called a cataract that does not impair eye-sight. It cannot be a fire that does not burn. We cannot call it darkness when we see everything before us clearly. The sleep would not be worthy of its designation if it does not do away with our awakening. Night cannot be called night if it does not dispell day-light. Similarly, the ignorance that co-exists with Atman, yet does not conceal its knowledge, cannot be called ignorance.16

(b) The same thing is proved by an appeal to the fact i.e. a thing cannot co-exist with another thing which is destroyed by it. Sleep and wakefulness, forgetfulness and memory, cold and heat, death and life cannot co-exist. In the same way ignorance that is densely dark and Atman which is the mine of effulgence cannot exist together.17

(c) Ignorance can never co-exist with knowledge. The thing in question co-exists with knowledge. Therefore it can never be ignorance.18

(d) Ignorance cannot exist independently, just as a disease cannot exist independent of any patient.19 Hence,

16 Ibid; VII, 18–24.
18 ज्ञानमेन्द्री विरोधी । मद्योदि नुसेवि इसे संबंधी ॥ Ibid; VII–34.
19 वेगड़ी तरी सिद्धी । जायेंचिना ॥ Ibid; VII, 85–36.
ignorance cannot remain with knowledge nor without it, just like a fish made of salt, though it becomes alive, would not live in water nor outside water.\(^{20}\)

(e) No relation can exist between Atman and Ignorance, as no relation can exist between a rope and a snake. Rope cannot bind the serpent.

(III) *Ignorance cannot be proved by any Pramana.*

(a) The Pramanas like perception, inference etc., are not ignorance itself, but they are the results of Ignorance, just like a creeper is the result of a seed, dream is the result of sleep and the appearance of a double moon is the effect of something wrong in the eye-sight. So the triad of Knower, The Known and Knowledge (Pramata, Prameya and Pramana) is the result of Ignorance. Hence the Pramanas are not entitled to be called Pramanas, because they do not spring from knowledge but from Ignorance.\(^{21}\)

(b) If the identity of cause and effect is assumed all the things in the world would be non-different from ignorance, and hence they cannot prove its existence. Both ways we cannot prove ignorance, and existence of Ignorance cannot be admitted for want of authoritative evidence. Ignorance neither produces any effect nor is it fit to be the cause of any effect. Hence it is unreal.\(^{22}\)

\(^{20}\) खण्डाच्या मासोऽऽ जग्य हौस जिवुळ्ळी मत जग्य ना वेगळी न जिये जेवी || Ibid; VII, 38-39.

\(^{21}\) Ibid; VII, 42-47.

\(^{22}\) Ibid; VII, 48-56.
(IV) Ignorance cannot dwell in Atman in its Pure state.

(a) It can be maintained, that Ignorance dwells in Atman in its pure state, as fire dwells in the wood before churning. But this is not possible since even the word Atman has no room in that pure state, much less there would be room for ignorance. It would be as futile as removing the burnt part of the wick before the lamp is lighted, or to cleanse the mirror which is not yet made.23

(b) To say, that Ignorance existed in Atman when he was neither a being nor non-being, would be tantamount to saying that the non-entity of a jar was broken into thousand pieces.24

(c) One, who seeks to prove Ignorance in pure intelligence, seeks to defeat his own purpose just like the person seeking to prove the existence of darkness in broad day-light. He is self-stultified.25

(d) And if it is not sought to be proved, its existence stands self-condemned.26

(V) Ignorance cannot be proved with reference to the manifestation of the Objective World.

(a) Objection:— Though it is difficult to call Atman by name, there is spread out this wide world, and not only

23 Ibid; VII, 58-64.
25 कां सूर्य कौणा कांडे । अंधाराते ॥ ७५ । तैसा चिन्मानी चौंढया । भलेत्ते अभजानच शांया । चेतत्ता तरी पवारा । येजील काङ्खी ॥ ७५॥
26 Ibid; VII, 72-73.
it is spread out but is directly seen in front of us. It is true that Ignorance is not visible, but we cannot doubt its existence which we can easily apprehend by inference from the vast expanse of the visible world. If there is one moon in the sky and it appears as two, we infer that there is a disease of eye-sight. Trees are fresh and green and though we do not see the source of water, still we infer that their roots are taking water which exists deep under the soil. So the existence of the ignorance is known from the visible world, as the cause from the effect. Then again, though a man who is asleep is not conscious of the sleep which goes away at the time of awakening, still, the sleep can be inferred from the dreams. In the same way Atman is pure and yet there is the appearance of the world. So we can infer that Ignorance exists.\(^2\) Ignorance corresponds with sleep, and dream with the worldly appearance.

(b) Answer:—The argument, that the existence of Ignorance must be known by the process of mediate inference by reference to the vast expanse of the objective world, can be opposed with a counter-argument,—that the very existence of the objective world, far from being the outcome of Ignorance, speaks volumes for the existence of a counter-entity, which is diametrically opposite in character, to the Ignorance in question. And one is not required to seek far to prove the existence of Knowledge, as its existence has got self-credentials. To call knowledge ignorance is as absurd as to call a thing dark collyrium which makes all the other things bright and whiter than the moon. It is like saying that water performs the function of fire and ambrosia produces poison. Where we see in front of us Knowledge pervading all the

\(^2\) Ibid; VII, 88-94.
wordly activity, how can the flood of Ignorance would come there?  

(VI) If Ignorance has the Power of Presentation, It Cannot be Called Ignorance.

Though it is maintained that Ignorance presents the multiple existence to the perverted human eye, still unconsciously and inspite of himself the Ajnanvadi has as good as admitted that Ignorance has the power of presentation. Solid human experience shows that Ignorance cannot have the power of presentation. On the other hand, it is Knowledge which has been universally characterised with that power. Since that characteristic is admitted in a particular thing, it is immaterial to us if you call that particular thing by a different name. Just as the so called Anjana (collyrium), which shows the treasure-trove, does not cease to have its peculiar power simply for its being called Anjana. The name Anjan, i.e. a black pigment, does not prevent us from seeing the treasure. In the same way the gold figure of Goddess Ambika, though it is resplendent with lustre, is ungrudgingly called Kalika which signifies Parvati associated with a dark colour.

As a matter of fact it is the light of the Absolute Sun that enlightens everything from Shiva to the clod of the earth, that causes the existence of worldly knowledge and gives birth to all insight. Who would try to point it out as Ignorance

28 अगमा ऐसिया झानातिं | अज्ञान म्हणें केउतें | काय दिवो करी तयातिं | अंगाहुन्निपे || ९.५. तेसा जाणणयाचा वेष्ठरु | जैवं मासला समोहु | तेघ आणजे पूरु | अज्ञानाचा ||१००. Ibid; VII, 95-100.
except a wretched person trying to shroud the Sun in a cloth of darkness. \footnote{29}

(VII) Ajnanavadin’s Mal-apropism

Ajnanavadi describes Jnana, not with the word Jnana but with the word Ajnan i.e. “A” simply prefixed to the proper word Jnana without any particular meaning of its own. This verges on mal-apropism. Delimiting Atman by calling Ignorance is as fruitless as confining the fire in a lac-box. Just as fire reduces to ashes the lac-box and blazes aslame as usual, in the same way, the Atman breaks through the crustation of words of Ajnanavadin and flourishes self-luminous as it is habituated to.

Ajnanavadi gains nothing by his wrong way of argumentation, but commits two sins—one, of misnaming a thing and the other, of utter falsehood by means of ascribing to the purest thing the most despicable name which signifies a filthy attribute. If pearls can be prepared out of water and a lamp lit with the help of a burnt cow-dung, then alone you can attribute Ignorance to Pure intelligence. \footnote{30}

(VIII) Though Ignorance is supposed to be born out of knowledge, it vanishes at its very birth.

Even granting that there was Ignorance in the beginning, Knowledge must have put an end to it. Hence there can be

\footnote{29} ऐसा निरूपमावरी | आपुडेल्ये विनात्सवरी | जातमा राणवरी | आपुडेले ठायी | २६८. वे-हवी शिवोत्ति पृथ्वीवरी | तत्त्वाच्या बानेपरी | जयाच्या रविमकरी | उजाळ्या येती | २७२. \cite{Ibid}; VII, 267-72.

\footnote{30} हे कोणे निकम्मे | दाबऱ्ये अज्ञानाचन बोटे | ना तरं सूर्यो मोटे | बाधिना निके | २७४. \cite{Ibid}; VII, 274-86.
no talk of Ignorance. Knowledge cannot give birth to Ignorance, but suppose that it did so, still, at its very birth, Ignorance would die away in the presence of knowledge and there would remain Knowledge only. So it is useless to discuss about ignorance also from this point of view.\(^3\)\(^1\)

\[(IX)\] The Support of the Shruti.

We have already seen that Jnanadeva does not rely upon the Sacred Scriptures for his thesis. However, in one verse, he says that the Vedas also say, "This world is illuminated by His light."\(^3\)\(^2\) After putting forth all the arguments, this quotation comes at the end of the chapter. It shows that his reliance is only secondary. The verse which is quoted occurs thrice in different Upanishadas.\(^3\)\(^3\) It tells us that Brahman is "the light of lights".

There no sun shines, no moon, nor glimmering star,  
Nor yonder lightening, the fire of earth is quenched;  
From him, who alone shines, all else borrows its  
brightness,

The whole world bursts into splendor at his shining.\(^3\)\(^4\)

It is to be noted that Shamkar interpreters the above passage to denote the Reality of Brahman and falsity of the world.\(^3\)\(^5\)

\(^{31}\) ना ज्ञानी अज्ञान जालेन । ते होताच्य अज्ञान गेलेन । पुढति ज्ञान एकलेन ।  
अज्ञान नाही ॥  
Ibid; VII, 287.

\(^{32}\) विमाति यस्य भास ा । सबंभिं हा ऐसा । भृति काय चायता । बेकर देती ॥  
Ibid; VII, 290.

\(^{33}\) Kathopanishad, V-15; Svetasvatarop, VI-14; Mundakop, II-2-10.

\(^{34}\) Duessen: Philosophy of the Upanishadas: p. 137.

\(^{35}\) Shamkar Bhashya on Mundakop, II-2, 10-11.
But Jnanadeva quotes the verse to support his theory of the world as the delightful expression of the Reality and not its illusory appearance.

(X) Atman would never meet Ignorance though he purposely tries to do so.

The non-existent Ignorance cannot be in any causal relation with the expanse of things, just as darkness will have no connection whatsoever with the Sun, even though the Sun retires to its abode. The Sun will not come into contact with darkness though it retires to its abode, in the same way Atman will never come in contact with ignorance though he would offer to take the help of Ignorance in fashioning the world.  

It will be seen from the various criticisms given above that Madhva, Nimbark and Vallabha are almost following the same line of criticism followed by Ramanuja. Shri. Pandurang sharma in his articles on Jnaneshwar and other philosophers, has tried to show similarities between Ramanuja's various Anupapattis and the points of criticism adopted by Jnanadeva. Dr. Pendse has critically examined the view of Pandurang-sharma and his conclusions are as follow.  

(1) The verses VII–10, 11 cited by Pandurang sharma, as similar to Ramanuja's Ashrayanupatti, have only a partial similarity. Jnanadeva omits the part of "Jiva's impossibility of being the locus of Avidya" which Ramanuja maintains

\[36\] अभाज न को वाहो | पाठ्य ठेलियाही || परी तमाचा विसुरा । न जोडेचि

\[37\] दिनकरा । राजीचिया घरा । गेलियाही || Amritanubhava; VII, 293–94.

\[37\] Dr. Pendse–Shri Jnaneshwaranche Tatvajnans; ch. VII, p. 300–310.
(2) In the case of Tirodhananupapatti, Jnanadeva does not mention the name Tirodhan, but the criticism of Ramanuja is included in Jnanadeva's criticism of the locus of Avidya. Though there is no similarity in expression, the purport is similar. So there is a partial similarity also in this case.

(3) Swarupanupapatti—Here Pandurang sharma cites the verses VII–5, 23, 35. Now these verses are instances of first two Anupapattis. Only the last line of 35th verse which means "Ajnan cannot be proved independently," bears some resemblance, but the lines of argument followed by Ramanuja and Jnanadeva are different. Hence here also there is a partial likeness.

(4) Anirvachaniyatvanupapatti—VII–36,89,40 are quoted as its instances but these can be included under Ashrayanupapatti and Anupapatti of perception. Jnanadeva acknowledges that Nescience is Anirvachaniya; Ramanuja does not agree with him on this point. Hence there is no similarity between the two thinkers.

(5) Pramananupapatti:—Ramanuja criticises the view of Advaitin who says that Ajnana being positive, is the object of Anupalabdhi Pramana and shows that we cannot experience the positivity of Ajnana, while Jnanadeva shows all the Pramanas as invalid because they spring from nescience (as his opponent says).

(6) Anumananupapatti:—Same is the case as above. Dr. Pendse shows a point of similarity which is not noted by Pandurang sharma. That is the argument from the appearance of the world. Ramanuja has not refuted the point while Jnanadeva has done it. Hence the similarity is not complete.
Dr. Pendse also shows how other refutations are also dissimilar. But while doing so he tries to show similarities of Jnanadeva and Shamkar which are not well-founded. He says that both Shamkar and Jnanadeva regard nescience as non-existent and hence Jnanadeva’s Amrītanubhava is nothing but an elaborate exposition of the Adhyasa-bhashya of Shamkar.\(^3\)\(^8\) He quotes as his support two verses—VII–38 and VI–39. The first verse has the illustration of rope and serpent. But this illustration is given only to show that no relation can exist between Atman and Ignorance and not as Shankarites usually give to show the illusory nature of the world. In the second verse Jnanadeva says that to call nescience as Anir-vacchaniya is as much as to say that it does not exist and by the very name it proves its non-existence. Shamkar also says, in his Adhyas-bhashya, that Adhyasa which is called Avidya is false. But Avidya is false from the point of view of those that have attained liberation, and not from the point of view of worldly people who are Ignorant; and all the categories of knowledge, knower and the known which pervade wordly appearance are the outcome of nescience.\(^3\)\(^9\)

Now we have seen how Jnanadeva has criticised the point of Ajnana existing before the rise of knowledge, in his introduction to the Ajnana Khandan.\(^4\)\(^0\) Then again, he has clearly stated that the manifestation of the world is not due to nescience but it is the expression of pure intelligence and hence the triad of Knower, Knowledge and the Known does not spring from Ignorance, but is enlightened by the Atman.

\(^3\)\(^8\) Ibid, p. 312.

\(^3\)\(^9\) तत्तमविद्वाक्यमातमात्मात्मनोरितरास्यास पुरस्कृत्य सवं प्रमाणप्रमेयव्यव-
हारा लोकिका वैदिकाश्च प्रवृत्ता:...प्रमणसूत्र शांकर माध्य, उपोद्धात,

\(^4\)\(^0\) Amrītanubhava; VII, 1–8.
To Shamkar, the world is the outcome of Avidya, while to Jnanadeva, it is "Chidvilas."—The play of the Absolute. Shamkar posits Ajnana between Atman and the world, while Jnanadeva, in his refutation, shows its futility and considers it unnecessary and perverse because Atman itself vibrates in the form of the Universe.\footnote{1}

So Dr. Pendse has not interpreted the facts fairly when he has tried to identify the views of Jnanadeva and Shamkar. We can agree with him in so far as he says that Jnanadeva has not followed Ramanuja. In fact, though Ramanuja was a predecessor of Jnanadeva, the criticism about the locus of Avidya is such as can be independently suggested by the works of Advaitins themselves, amongst whom there is a difference of opinion on this point. The followers of the old school like Sarvajnatmamuni, Prakashatman and Anandabodh maintain that Avidya is located in the Absolute Consciousness, while Vachaspati and his school hold that it is located in the Jiva-Consciousness. Jnanadeva has refuted the very existence of Avidya in his elaborate, subtle and skilful argument against the theory of Ajnana. He has taken great pains to show that the conception of Ignorance, as existing and causing the manifestation of the world, is logically absurd as well as distorts the facts of experience. Here we get the negative aspect of Jnanadeva's cosmological view. It tells us what the world is not and warns us not to underestimate its content. It strikes at the root of Mayavada or Avidyavada of Shamkar which regards world as caused by Nescience and hence illusory.

\footnote{1} \textit{तत्सा जाणणेयचा वेदनाहूँ जे र च माखला समीकृः तेव ाणिजे पूः ाणाचा \textit{1००.}}
\textit{यालागी वस्तुमभा \textit{वस्तुचि पावे शोभा असे लाभा \textit{वस्तुचिया \textit{2९२.}}} \textit{Ibid; VII, 100-291.}}
Nature of the world—Expression of Divine Love and Joy.

a) *Atman is beyond description.*

While stating that the cause of the manifestation of the universe cannot be Ignorance, Jnanadeva describes the nature of Atman. Atman is not proved by any other means but his existence is self-established. He is beyond existence and non-existence. But he is not void on that account. He sees without seeing anything. Though some try to establish his non-existence, he bears it calmly. In any state, even in deep sleep, his omniscience is not affected. The Veda cannot apprehend him, the Sun cannot show him, and the Sky cannot pervade him. Ego-consciousness cannot catch him. Intellect knows everything except him. Mind cannot imagine his being and various sense organs can not taste how sweet he is. But his perfection is such as it swallows this incomprehensibility as well as its one-ness. 42

b) *World as the sport of Atman.*

Setting aside all these difficulties of indescribability, the doors of illumination are opened for the glorious display of Atman who becomes the Knower and the Known without being transformed. Visions upon Visions are displayed, but all of them rest upon one Pure Intelligence. The Atman is so intoxicated by the glorious spectacle of creation that it does not wish to see the same scene in the mirror of the objective universe. Every moment He wears, as if, new and beautiful apparels. He expands Himself and shines forth as the world.

42 कोण कोणा भेंटे । ब्रह्म कै सी पूने । ऐस्यासग गेटः । आटोमि गेली ॥

122. Ibid; VII, 103-33.
The Observer, in the guise of the objects, comes to visit Himself. The thread of unity is not the least disturbed. As water sports with itself under the guise of waves, the Atman plays with Itself by becoming the process of the universe and feels happy. No difference is created in the fire when it wears the garland of flames. The Sun cannot be held to be separated from its rays when it is thickly surrounded by them. The unity of the Moon is not disturbed even when enveloped by its light. The lotus is still a lotus even though it blooms into a thousand petals. The king Sahasrarjuna has thousand hands but he does not become one thousand and one persons. Even when there are spread on a loom a number of threads, there is found in them nothing but thread. Though in the residence of speech there is a meeting of crore of words, still it is all speech. Similarly there is no difference in the Atman when he presents Himself either as the seer of the world, or as the world that He sees, for it is all the Atman Himself. If a lump of sugar is broken to pieces it is nothing but sugar.\textsuperscript{43}

c) No parallel can be found to this sport.

If the seed of a Banyan tree had been able to produce the full-grown tree without breaking itself, then it would have been possible to illustrate how the Atman expands itself into the manifold world without disturbing its unity.\textsuperscript{44} The Atman is incomparable in its richness or glory. It could have

\textsuperscript{43}एवं हि सांकेत | जेण्य साधन एकिकेत | उपहली कबाड़ | प्रकाशाची ||
\text{र०३४.} पाणी कलोञ्जाचिनि मिसें | आपणपेक बेल्हावें जैसें | वस्तु वस्तूतवे खेतो ये तैसें | सुखे बाहे || र०३५. | Ibid; VII, 123-143

\textsuperscript{44}न पुट्टा बीज कथिका | माजी विस्तारे वदु अतिका | तरी अद्वैत फाका |
उपमा आचि || | Ibid; VII, 149.
been compared with the sun if his rays had not gone out of
him. Cotton cannot come out and produce cloth without the
bursting of cotton-boll. A gold bar cannot be turned into
ornaments without changing itself. Water cannot pass from
one place to another without surpassing the obstacles. So
Atman cannot be compared with these. There is, therefore,
no parallel to the sport of Atman and all that we can say
about it is, it is like itself.45

So in the evolution and involution of the world the
self-illumination of the Atman is not changed and there is no
other cause present except him. The process of the universe
is nothing but Atman’s love for Himself and we have already
seen how Jnanadeva has described the sweet union of God
and Goddess which gives birth to the offspring in the form
of the Universe. God and Goddess are one and it is as much
as to say that God loves Himself. The whole Universe is
not an enchanting deception of Avidya, but the expression of
that Supreme Love.

हाचि यथा। २६६। Ibid; VII, 262–266.
CHAPTER VI

THE NATURE OF JIVA.

Importance of the Problem

The nature of Jiva or the individual self is one of the main problems of Philosophy. The nature of God, man and the world are three outstanding problems and the value of any philosophy depends upon their satisfactory solution. The goal of a philosophical thinking is not merely an intellectual solution of a question but to guide man through weal and woe by showing him the beacon-light of his true nature, by pointing out his real dignity and status in the whole universe and his relation with the Supreme Being. "Man, Know thy self" was the watchword of the teaching of Socrates. Only Knowledge of the self was worth the name of Knowledge with the Upanishadic thinkers. Every other kind of Knowledge was a sign of poverty of the soul who did not know itself. A man may be versed in all sciences, may know the constituents of the atoms and the stars, may know all the fine arts, yet if he does not know himself it is all a vain parody. Hence the test of the supreme philosophy is that of giving man the knowledge of his own self.

Various Conceptions of Jiva.

Various systems have, however, various conceptions of the Jiva or the individual soul. Though the nature of the self forms one of the persistent problems of philosophy it is also one of the most difficult problems and hence when we turn to the various answers to this question by different systems of philosophy, we find their bewildering variety. Charyvakas
consider consciousness as the function of the physical body and hence identify the soul with it. The Yogachara school of Buddhists acknowledge the aggregate of ideas but deny their unifying principle in the form of the soul. The pluralistic realists like Naiyayikas regard the soul as a substance of which knowledge is an attribute and not the essence. The Samkhya philosophy regards the self as pure, continuous, immutable consciousness and tries to explain the experience of activity and alterations of personality by stating that these are due to the false identification of the self with the Prakriti.

Different exponents of Vedant philosophy have different conceptions.

Shamkar: He analyses the nature of the self and separates its noumenal and phenomenal aspects. The noumenal aspect is its consciousness without which there would be no sense of "I" or egoism. Ultimately the self is identical with Brahman and at the dawn of true knowledge its self-hood vanishes. The empirical portion of the self is contributed by Maya. Hence the self has the spiritual element as well as physical and psychical adjuncts. These are all illusory and only the spirit is real.¹

Ramanuja: He regards the soul as the self-conscious atom different from its physical, psychical and vital functioning. Relation between Brahman and Jiva is not that of the reality and appearance but that of the soul and its body. As the soul controls, supports, and utilises its body for its own ends, in the same way Ishwar controls supports and utilises the selves for His purpose. The soul has very intimate and organic relation with Ishwar and is inseparable from Him.

¹ Dr. P. T. Raju - Thought and Reality, p. 69.
Madhwa:— He sets forth a scheme of fivefold difference of which first and foremost is the difference between Jiva and Ishwar. There are vital differences between the two. God is ever free from samsara, all-knowing and all-powerful creator of the universe, while Jiva is comparatively ignorant, dependent and bound to the samsara. These limitations really pertain to the soul and not merely due to our misapprehension. Some of these, like comparative ignorance and dependence, persist even in liberation.  

Nimbark:— He maintains that individual souls are infinite in number and atomic in size. All-pervading knowledge being their attribute, they can cognize various sensations in different parts of their bodies. The individual souls are, in one sense, different from God and in another sense, constituent parts of Him. Though atomic and partless in their nature they are completely pervaded by God through His all-pervading nature. They are bound with the beginningless girdle of Karma but are emancipated through the grace of God. In emancipation they feel themselves like one with Him and abide in Him as a part of His energy.

Vallabha:— He regards Jiva as an emanation of Brahman and as atomic. It has no separate existence. The finite centres of consciousness and inert existence emanate from Brahman out of His innate desire of self-expression. Consciousness and bliss are absent in the inert while in a Jiva bliss only is absent.

2 B. N. Krishnamurti A. Madhwa’s Theistic Realism, p. 6-7.
3 Dr. S. N. Dasgupta:— History of Indian Philosophy Vol. II p. 413-414.
4 Dr. M. N. Sarkar:— Vedantism, p. 44.
Jnanadeva's Conception of the Jiva or Finite self.

Jnanadeva's conception of the finite self is different and at the same time more clear and dignified than those of the other Indian philosophers. Finite self, though each has its different content, is an experiencing subject and partakes the nature of the Infinite or the Ultimate Reality. It is not a mere appearance, as Advaitins like Shamkar maintain, that ultimately dissolves in the Absolute. The relation of the Absolute and the finite self is also peculiar. Ramanuja says that this relation is that of "Aprathak-siddhi" and not that of "Samavaya." It is the internal relation and not external. He uses the analogy of the soul and its body to denote this intimate relation. So the soul of souls controls and sustains them and in this way there exists a vital relation between the two. Still we feel a gap in this view and according to Jnanadeva the relation between them is more intimate and inseparable than Ramanuja would imagine.

We have already seen how Jnanadeva describes the Absolute as splitting itself into subject and object and experiencing Itself. Now the subjective aspect differentiates between so many finite selves through which the Reality enjoys Its own wealth. So the real nature of an individual is experiencing of the Being. While describing the real status of the individual, Jnanadeva makes the point clear by using various beautiful similies. He says, "There is as it were fragrance became a nose and smelt itself, or sound became ear and heard itself, or the mirror became the eye to see itself. Air by its own motion became a fan, or the head became the Champaka flower to decorate itself. The tongue became the taste, the lotus became the Sun, Chakora bird became the Moon, flowers became the bees, the damsel became the youth,
or the sleeper became the bed. The sprout of the mango tree became the Cuckoo, or the limbs became the Malayabreeze." In this way Jnanadeva describes how the enjoyer and the enjoyed, the seer and the seen are merged in one Absolute. But this merging does not mean extinction. It implies that amid this diversity the Unity of Experience is not broken like "the Shevanti flower that remains one though it blooms into thousand petals." 

So the finite self expresses the innate nature of the Ultimate Reality to manifest Itself through duality. "Unity comes of its own accord in the court-yard of duality and as diversity increases the unity is deepened." The relation between the individual self and the Absolute is not imaginary as Shamkar believes, nor physical as Ramanuja would have it. It is also not of a mere dependence as Madhwa puts forth. There is no negative relation due to the absence of bliss in the self as Vallabha thinks. It is not fragmentary as Nimberk imagines. According to Jnanadeva, the relation is more intimate and natural. The finiteness of the individual does not mean that it is a degradation of Reality but it implies that the Reality determines itself in order to realize itself in various forms. So the end of life is not emancipation (Mukti) but to realize this real dignity and act up to its real worth. God-realization means understanding how God realizes Himself through one's being and this is the secret of natural devotion, before which Yoga and Knowledge grow pale like the Moon in broad day-light.

CHAPTER VII

BHAKTI OR GOD-REALIZATION.

The conception of Bhakti has played an important role in the religious history of India. It has also dominated the various schools of philosophy. So before we propound Jnanadeva’s view it will be useful to trace its history from the earlier Vedic period down to the age of Jnanadeva.

Vedic Age

In the Hymns of the Rigveda, natural powers are regarded as so many deities. Sayana has classified them in three divisions. (1) Celestial deities e. g. Varun, Sun, Ushas etc. (2) Intermundane-deities e. g. Indra and Maruts. (3) Terrestrial deities e. g. Agni and Soma. There is a polytheistic as well as a Henotheistic tendency and these Gods are worshipped for the sake of worldly benefits such as wealth, offspring, cattles, victory in the struggles, as well as for the heavenly happiness. Of all these Gods Varuna and Indra are more prominent. Varuna is the upholder of moral and physical order. The rivers keep their bound, the ocean does not oversweep, the Sun and the Moon follow their courses at his behest. He commands the regularity of the noumena. He is omniscient, knows the hearts of men and people cannot escape him. Hepunishes sinners but forgives those that repent. So Dr. Radhakrishnan aptly remarks that the theism of the Vaishnavas and the Bhagawatas with its emphasis on Bhakti is to be traced to the Vedic worship of Varun with its consciousness of sin and trust in divine forgiveness. Indra is regarded as the national and war-god. The position of Agni is different. He

\[1\] Dr. Radhakrishnan:—History of Indian Philosophy Vol. I p. 78.
is a great friend of men and mediates between God and man. Vedic sages talk to him as with a dear companion and ask him the blessings which a kind father bestows upon his dear children. So in these Vedic hymns we breath an atmosphere of hearts full of devotion though it has not found the right direction and its adequate philosophical background. Gradually, however, there is a change in this atmosphere and those simple hymns are used for the purpose of various sacrifices. The word acquires more significance than the underlying emotion. Even the Gods pale into insignificance before the power of sacrifice. It is not the grace of God that is powerful but the various sacrificial rites and the hymns recited as prescribed in the Brahmanas or ritualistic manuals.

Side by side there is also a tendency of scepticism about the existence of so many Gods. The existence of even Indra is doubted. Thoughts were expressed about one Substance underlying various divinities. At the end of the Rigveda we find something like agnostic atmosphere in the famous Nasadiya Sukta.

The Upanishadas

In the Vedic age itself the polytheism was giving way to monotheism. The same tendency is carried out in the Upanishadas. The supreme God—head, however, is not some cosmic outward force but formes the very basis of human life. He is the inward Atman who manifests Itself in the

2 Ranade & Belwalkar - History of Indian Philosophy: Creative Period, p. 409.
3 Rigveda VIII–89.
5 Ibid; X, 129.
form of subjective and objective worlds. Atman is identical with Brahman to whom all the Gods were subordinated. Agni has no power to burn a blade of grass nor Vayu has any strength to blow it without the help of Brahman.⁶

The age of the Upanishadas was the age of speculation and hence there are no prayers for material prosperity but there are meditations of the One Spirit,⁷ who is worshipped for leading one from unreal to the real, from darkness to light, from death to immortality.⁸ Nachiket, whom Yama offers a boon of wealth, offspring, celestial damsels with chariots and musical instruments, does not accept these transitory blessings but insists on knowing the real nature of Atman. He is convinced that man is not really satisfied unless he is in possession of this highest knowledge.⁹ This Self-knowledge is not obtained by any other means but by the grace of Atman Itself. "The Self cannot be realized by the study of the Vedas, nor by intelligence, nor by deep learning. It can be realized by him only whom it chooses or favours. To him the Self reveals its own nature."ⁱ⁰ The doctrine of grace finds its clearest expression in this verse. There is an atmosphere of personal warmth and affection when the great philosopher Yajñavalkya propounds the doctrine of Atman and says that the husband, wife, sons and other objects of love are not dear for their own sake, but they are dear for the love of Atman.¹¹ So Atman is the true object of love. Every lover of any wordly object is unconsciously a lover of Atman. Hence by self-analysis he should find the true nature of this love and the Atman.

6 Kenopanishad, ch. III.
7 Chhandogya Upanishada III-14.
8 Brihadaranyak Upanishada I-3-27.
9 Kath Upanishada ch I.
11 Brihadaranyak Up. II, 4, 1-5.
The word Bhakti occurs for the first time in the Upanishadas.\(^{12}\) The doctrine of grace and self-surrender is emphasised in the Svetashvetaraparishad, and Brahman is described as of the nature of bliss and the source of all human joys, in the Taittiriya and Brihadaranyak Upanishadas.

The Upanishadas do not teach a set theory of philosophy. There are various suggestions at truth and "the bubbling up of the thoughts of numerous sages of antiquity, each of whom tried to express as naively, as simply and as directly as possible, the thoughts which were uppermost in his mind."\(^{13}\) For this reason, we find in them the roots of the later day systems of philosophy. In this way we also find in the Upanishadic doctrine of divine immanence and of Atman's nature of bliss, the germs of the later day philosophy of Bhakti-yoga.

Muktikopanishada gives a list of 108 Upanishadas out of which only thirteen are major and others are minor. Works that were composed to support Yoga, Shaivism, Vaishnavism, Shaktism and Vedantism. In the Kalisantaranopanishad Lord's name is extolled as capable of removing all sins.\(^{14}\)

The Bhagavadgita

The Doctrine of Bhakti is found explicitly stated in the Bhagavadgita. In the Upanishadas different Upasanas or meditations upon things like mind, person in the sun or moon, food, vital breath—thinking them to be Brahman—are prescribed.\(^{15}\) In the chapter X of the Bhagavadgita various Vibhutis

---

15 Taittiriya Up. III, 2–6; Chhandogya Up. VII.
or excellent forms of God are described. God is the self-dwelling in all beings that are born. He is Vishnu among Adityas, the radiant Sun among various forms of light, the moon among nightly luminaries.\footnote{16} Everything that is potent prosperous or forceful springs from a portion of his splendour.\footnote{17} In the next chapter Arjuna is described to have seen the vision of His splendour in its fullness. He sees the Virat form of God—the form in which Arjuna Himself is swallowed up. In the beginning of the chapter XII we see him asking who were superior among the worshippers of the Personal and the Impersonal.\footnote{18} Krishna tells him that both of them reach the same goal but the path of those that follow the impersonal aspect of God is strewn with great difficulties.\footnote{19} Thus the Gita recommends the Path of Bhakti or approach to the Reality through love and devotion, as superior and at the same time without any risk, for the God Himself is ready to help his devotee at every step. At the end of the Gita Arjuna is advised to set aside all the other means of salvation and surrender himself with all his heart to God who abides in the hearts of all things and moves them so that he will be liberated from all the sins by His Grace. This is the secret that the Lord wishes to disclose to his dear disciple.\footnote{20}

With all the catholicy of the Gita we find there also the advice not to disclose its teachings to an unbeliever.\footnote{21} Then again, though God is described as Purushottam who only is fit to be worshipped, those that worship lower deities
also reach the same goal. In this way the Gita has indirectly encouraged these lower forms of worship.

The philosophical background of the Gita seems to be indefinite and this indefiniteness is the source of various interpretations of it by different commentators like Shamkar, Ramanuja and others. God is the ultimate Reality according to the Gita, but when we come to the descriptions about His nature we find that He is described both ways. He is described as personal as well as impersonal, the actor as well as the spectator, transcendent as well as immanent.

In the chapter XIII we find the conception of the impersonal. God is omnipresent. He is Nirguna. He moves and moves not, is near and far off. We have passages where the Personal God is described under Vedantic and Samkhya influence. Under Vedantic influence we find three kinds of Purushas-Kshara, Akshara and Uttama Purusha i.e. mutable beings of the world, the immutable self inside us and the supernal God. Here God as well as nature also is personified. Under Samkhya influence there is the description of two Prakritis i.e. Apara or nature and Para or Selves, and one Purusha who is God. We also find a third kind of description in the Ch. XIII of a Purush, a Prikriti and a Para Purush or Paramatma who is above them.

God is described both as an actor and a spectator. In the Ch. XVIII it is said that he who sees the God as doer, does not see the reality. Also in Ch. V "God only looks

22 Ibid; IX, 23.
23 Ibid; XV, 16–17.
24 Ibid; VII, 4–5.
25 Ibid; XVIII, 16.
on and leaves all things to nature". On the other hand in the Ch. XVIII God is described as the supreme doer, the great potter of the universe parallel to Plato’s God as "demi-urge" at work on his "spindle".

Then again God is described as transcendent and immanent. In the Ch. XIII it is said that just as the sky is untainted by any other things, similarly God is not contaminated. On the other hand we get in Ch VII, "All these things are woven on me as pearls on a thread....I am the seed of all beings." Because of these two kinds of descriptions we find that the same Gita is interpreted by Holtsman as pantheistic and by Garbe as theistic out and out.

As regards Bhakti, though the Gita praises it so much, it is not regarded as the Alpha and Omega of spiritual life but as means to liberation or Moksha. The same state is described as Nistraigunya or beyond three gunas. Naishkarmya or purposeless action and Sthitaprajna or equanimous intellect. The sum and substance of Gita, then, is that intense devotion brings God’s grace and by God’s grace an individual gets liberation.

The Bhagawata

"The Gita is universally accepted as the true guide; the Shrimat Bhagwata is accepted only by Bhaktas. The latter (Bhaktas)....consider the Gita as only the seed from which the other book the Shrimat Bhagawata, has sprung. Indeed, where the Gita ends, the Bhagawata begins." So says a

26 Ibid; V, 14.
27 Ibid; XVIII, 61.
28 Ibid; VII, 7.
29 Ibid; XVIII, 54-56, 66.
biographer of the famous Vaishnava Saint Chaitanya. Not only Bhagawata begins where the Gita ends but it gives more prominence to Bhakti than the Gita. Disinterested action and knowledge without the presence of devotion to the Lord are worthless. Bhakti is the supreme goal of life. A true Bhakta does not desire heavenly pleasures, kingdom on earth, different Yogic powers—nay not even Moksha. All these pale into insignificance before the bliss he enjoys. So Bhakti is superior even to Moksha or liberation. Sinners like Ajamil and even dumb animals like the elephant Gajendra are entitled to the path of Bhakti and we find in the Bhagawat their life stories along with those of great devotees like Pralhad, Dhruva, Uddhava and Cowherds and Maidens of Brindavan.

Along with this tendency in the Bhagawata to give supremacy to Bhakti we find that it inclines sometimes to extreme asceticism represented by men like Jad-Bharat and Kadaryu. These people with their utter disregard of their bodies, are more like extreme Jain ascetics than true devotees. Then again the author of the Bhagawata seems doubtful about the supreme significance of Bhakti when he says that the path of action is suitable for the worldly minded, the path of knowledge is for those who have aversion to the pleasures of the world, while the path of devotion is for those that are not inclined to both the extremes.

31 नैष्कम्यमृथ्युतमाधववर्जितम्। न शोभै ज्ञानमलं निरंजनम्॥
   Bhagawat; I, 5-12.
32 स वै तुर्वः परो धर्मः यतो महत्तिरं योक्ते॥
   Ibid; I, 2-5.
33 Ibid; II, 14-14.
34 Ibid; XI, 20-7-8.
It is to be noted that the Chatusloki Bhagawata is regarded as the quint-essence of the Bhagawata. God has told Brahma the great secret in four stanzas. This secret ought to contain the secret of devotion but we find there the teaching of ‘Anvyaya–Vyatirek–Jnana,’ though, the commentator Shridhar interpretes the meaning of “Secret” as “Devotion” and Vishwanath Chakravarti–another great commentator who was a follower of the Chaitanya sect interpretes it as “Loving devotion” (Prem–Bhakti).

The Shandilya Sutras

Though nothing is definitely known about the priority among the two sutras–the sutras of Shandilya and those of Narada–we can infer from some internal evidence the priority of the Shandilya Sutras. Narada Sutras mention Shandilya Sutras but not vice versa. Unlike Narada, Shandilya discusses the philosophic background of Bhakti. Carpenter rightly says, “The Sutras of Shandilya interpreted by Svapneshwar occupy a middle position between the philosophies of Shamkar and Ramanuja. With the former, Svapneshwar declares at the outset the ultimate identity of the soul and Brahman. With the latter, he vindicates the Reality of the world.” According to Shandilya, Brahman is Pure consciousness and Maya is the power of Brahman and not a mere illusion. Both are real and eternal and both are necessary and inter-dependent causes of the world. As regards the conception of Jiva and its relation with Brahman Shandilya mentions the views of other

36 Narada Sutras :– 18
37 Carpenter :– Theism in Mediaeval India p. 419.
38 Shandilya Sutras :– 85–86.
39 Ibid; 39 and Commentary.
two thinkers viz. Kashyapa and Badarayan. The former maintains the absolute difference between Jiva and Brahman, while the latter considers both as identical. Shandilya himself rejects both the views and tries to reconcile them by holding that the Jiva and Brahman are distinct from each other and yet one in essence. The finite soul is potentially infinite while Brahman is actually infinite. The finite soul is capable of attaining the state of Brahman. Therefore they are identical in essence, though they are actually different from each other.40

Unlike Shamkar Shandilya holds that the empirical life of the Jiva (Samsara) is not due to ignorance (Ajnana) but to the absence of devotion (Abhakti) and so Bhakti and not Jnana is the means of liberation.41

The Narada Bhakti-Sutras

The author of these sutras is God-intoxicated. Instead of raising and discussing the questions about the nature of Brahman, Jiva and Jagat he goes straight into the heart of Bhakti and describes its nature, means and effects. He also explains the criterion of Bhakti and its relation with Yoga, Jnana and Karma.

While defining Bhakti, Narada mentions the definitions of other authors. According to Vyas, Bhakti is the worship of God, according to Garga it is narrating God’s exploits, while Shandilya defines it as meditation on the self. Narada himself defines it as the highest Love for God, a surrender of all actions to Him and agony in His forgetfulness.42 Narada

40 Ibid; 29-31.
41 Ibid; 98.
42 Narada Bhakti Sutra, 16-19.
regards Bhakti as superior to action, knowledge and meditation. Devotion is not a means of knowledge. Knowledge does not lead to devotion. They are not interdependent on each other. Devotion is the fruit of itself. So the most important point which Narada emphasizes is that Devotion is not a means to something else e.g. liberation but it is an end in itself.\textsuperscript{43} However, he does not try to base his doctrine on a philosophical foundation.

Renunciation of worldly objects and their contact, incessant prayer, hearing and singing of the Lord's qualities, The grace of saints and God are the means of devotion.\textsuperscript{44} Narada describes the devotees who are solely attached to God in these words. "With their throats choked and tears running down their cheeks they talk lovingly with each other. They sanctify not only their family but the whole world. Sacred waters are holy because of their contact. Among the devotees of God there is no distinction of birth, learning, appearance, family, wealth, religious observances and the like, since they all belong to Him\textsuperscript{45}

Narada's conception of Bhakti is more elevated than that of Shandilya. But Narada has propounded the renunciation as a means of devotion and also advises Karma-Sanyas—giving up of actions, which is against the tenets of Bhakti school of Maharashtra.

The Bhakti-Mimamsa-Sutras

The author of these Sutras published by M. M. Gopinatha Kaviraj\textsuperscript{46} is unknown. The date of their composition

\textsuperscript{43} Ibid; 25–30.
\textsuperscript{44} Narada Bhakti Sutra, 34–40.
\textsuperscript{45} Ibid, 67–73.
\textsuperscript{46} Saraswati Bhawan Studies Vol. II Edited by Dr. Ganganath Zha and M. M. Gopinath Kaviraj.
is also uncertain and hence it can not be ascertained whether the work is really one of those associated with the name of the acharyas whose references are often met with in Sanskrit literature. But it belongs to a school of thought distinct from these of Shandilya and Narada.

In these Sutras Bhakti is regarded as a kind of Ulhas of the mind. It is of the nature of Rasa, is eternal and hence the end in itself. Here we find a conception different from one that is found in some of the old Alankar treatises like Mammat and others who regard Bhakti as a Bhava and not a Rasa. The result of Bhakti is the attraction of God (Ishwara-vashikara) and not the cessation of evil (Anaratha-nivritti), not even Jivanmukti. The highest object of human striving should not be Moksha or liberation but Bhakti itself. The effort towards the absence of misery or freedom from pain are regarded as enlightened forms of selfishness. So the view of the author of Bhakti Mimansa Sutras is more allied to that of Narada than to that of Shandilya. M. M. Gopinath Kaviraj rightly observes, "The rejection of Moksha as the supreme end of human aspirations, follows as a necessary corollary from the conception of Bhakti as in itself the highest form of Bliss higher indeed—so it is boldly declared—than Brahmananda which is revealed in Moksha."

Jnanadeva's Conception of Bhakti

The commonsense view of Bhakti is that it is a wholehearted devotion to God. Though God is the object of such

47 Bhakti Mimansa Sutra 1–1–2. भक्तिमिंसस उल्लास विवेचः ।
48 Ibid; 4–1–16.
49 भक्तिरेख परमपुरुषार्थः मोक्षस्वाद्युपुरुषार्थवादिति तु मागवतः । Ibid; 4–1–7.
50 Saraswati Bhavan Studies Vol. II :— "A New Bhakti Sutra; " p. 69.
a devotion, the feeling of devotion itself is not objective but subjective. So Bhakti amounts ultimately to a kind of subjective feeling. We have already seen how the conception of Bhakti has evolved from Vedic times to the sutras of Narada and Bhakti-Mimansa and how it is regarded as an end in itself and not a means to something else, by these later authors. Narada regards Bhakti as the highest love for God and the author of the Bhakti-Mimansa-Sutras regards it as of the nature of Rasa or the Highest form of Bliss. But after all if it is a subjective sentiment its objective value is doubtful.

Jnanadeva’s conception of Bhakti as propounded in his Amritanubhava is more fundamental and has an intrinsic or absolute value. To him Bhakti is not some external mode of approach to Reality or God, but it forms the very essence of

Reality which is self-experiencing (Swasamvedya) and self-illuminating (Swaprakash). Now this self-experiencing is nothing but Bhakti or Love of God towards Himself. The Goddess described in the chapter I of Amritanubhava is nothing but this Bhakti which is not only inseperable but forms the very core of Divinity. The whole world, animate as well as inanimate, is Its manifestation. "What is termed Swasamvitti (self-illumination) by philosophers and Shakti (Dynamic power) by Shaivas is nothing but Bhakti from our point of view." Bhakti is not an act of devotion but the very nature of God.

According to Jnanadeva, the Absolute of philosophy and God of religion are identical. The Ultimate Reality is Pure consciousness, Love and Creative Energy. It is the nature of Love to express itself and creation is nothing but this expression. This Love is not something material. It is a living spirit and hence, self conscious and self-realizing. So in the words of Prof. Bergson, "Divine Love is not a thing of God; it is God Himself."\(^5\) In this way God can be said to be a person. Bergson makes this point clear in these illuminating words—"It is upon this point (i.e. Love is God Himself and not a thing of Him) that the philosopher must fasten who holds God to be a person and yet wishes to avoid anything like a gross assimilation with man."\(^3\) "To call God a person is not a sign of anthropomorphism, because He is not an image of the human being who is himself God's image. Webb tells us that

\(^{52}\) Bergson—Two sources of Morality and Religion. p. 216.
\(^{53}\) Ibid; p. 216.

Prof. Bergson's position in this work is made clear by Dr. Radhakrishnan. He says, "In his latest work on the Two Sources of Morality and Religion, Bergson argues that the principle of life in general which inward intuition reveals, is to be defined as Love and is God Himself." (Contemporary Indian Philosophy p. 280.)
the personality attributed to God is different from man’s personality, for the relation of man to man in social experience is one of mutual exclusion whereas the relation of man and God in religious experience is one of mutual inclusion.\textsuperscript{54} \textsuperscript{6} But Jnanadeva’s view of the relation of the Absolute person and finite soul is more deep and the relation is not merely that of mutual inclusion i.e. the finite self dwelling in God as a separate self, but the existence of that self means the very manifestation of God whose essence is Love.

To experience this Love is the goal and the final fulfilment of life. Before this ideal even the ideal of Jivan-Mukti pales into insignificance. Bhakti (realization of divine Love) and not Mukti (liberation from the worldly bondage) is the culmination of spiritual experience. Plurality in the world is not merely an illusory appearance to be discarded, but it is the manifestation or expression of the Absolute playfulness. Hence a liberated soul is devoid of that bliss which a devotee living in the world enjoys.\textsuperscript{55} Every object in the world is significant to a devotee. It is not a mere object of sensual enjoyment as a materialist thinks, but is the expression of divine Love which is also the very source of his life. If Moksha or Liberation is the fourth Purushartha (value of life), Bhakti is the fifth i.e. the highest.\textsuperscript{56}

So Jnanadeva has fully brought out the objective significance of Bhakti. It is the highest value not only from our

\textsuperscript{54} Dr. Rudolf Metz—A Hundred Years of British Philosophy p. 410.

Ibid; IX, 192.
human standpoint, but also from the point of the Absolute Experience. Hence here the highest value and reality coincide. According to Jnanadeva, the sense of numena is not the core of religious experience as Dr. Otto maintains in his “The Idea of the Holy,” \(^{57}\) but it is the sense and appreciation of Divine Love that forms the very stuff of religion. “The Holy” of Dr. Otto, by its supernatural power evokes a feeling of awe, wonder and humility but “The God” of Jnanadeva evokes a feeling of intimacy and Love. Then again Otto’s Holy is the object of religious experience in the sense of something other than the individual who experiences it while the God of Jnanadeva is the object of religious consciousness not like something other but He is the true self of him who feels his loving presence.

**Difference between Jnanadeva and other Acharyas**

The conception of Bhakti, according to Shamkar, is that of the meditation upon one’s supreme Self. \(^{58}\) Ramanuja takes it to be a continuous meditation accompanied by the practice of eight Yoga-processes. \(^{59}\) Bhakti leads to Mukti, The alternative path to it being Prapatti or self surrendering. \(^{60}\) According to Madhwa, Bhakti is a method of service and is the perception of Hari. Vallabha thinks Pushtibhakti as supreme. The frame of mind generated by such kind of devotion is the desire of the attainment of God to the exclusion of every

thing else. The fruit of this devotion is an admission to Goloka where one can participate in the eternal sport of Krishna.\textsuperscript{61} The first three Acharyas regard Bhakti as a means to Mukti, though their conceptions of Mukti differ from one another. Vallabha rejects four kinds of Mukti and considers Bhakti as superior to all. But this Pushti Bhakti has its fruit in the ideal world where God's Divine sport goes on eternally.

The conception of Jnanadeva differs from that of all these Acharyas. He does not think Bhakti as a means to Mukti and though he rejects the ideal of Mukti, the realization of Bhakti does not require the renouncing of this world. It can be realized in this very life. God's eternal play is not going in some ideal plain, as Vallabha believes, but it is going on in this very world. The world is nothing but the manifestation of God's eternal sport.

CHAPTER VIII

INFLUENCES ON THE PHILOSOPHY OF JNANADEVA

The Upanishadas

Jnanadeva does not base his Amritanubhava upon the sacred scriptures but upon his own experience along with its logical defence. There is only one quotation from Shruti\(^1\) and that too comes after he has logically refuted Ajnanavadins, to state that the Shruti or the sacred scriptures also say the same thing. The verse quoted is, as we have already seen, "Vibhati Yasya Bhasa Sarva Midam etc." We have also seen how Jnanadeva differs from Shamkar in interpreting it. Shamkar, as usual, interpretes it on the basis of

\(^1\) In the Jnaneswari Jnanadeva describes the ten upanishadas as the flowers, with the noble fragrance of wisdom, decorating the crwn of the deity. उपरी दलेपनियये। जिये स्तार जानुकरुंढे। तिये कुसुम मुखुंडसुगंधे। शोभती मधी। I; 18 While Commenting on the 48th verse in the second chapter of the Gita, he says that the Vedas are covered by three guunas. The upanishadas, therefore, are Satvik or full of wisdom and the portion of the Veda, dealing with rituals, is full of egoistic tendencies. तिर्थी गुणों आवृत। हे वेद जाण निर्माण। म्हणोनि उपनिषदादि समस्त। सातिवक। ते॥ येर रजटमातंक। जेथ तिर्थिपिजे कर्मादिक। II; 256-57. In the 18th chapter of Jnaneswari, while describing how the temple of the Gita was erected, Jnanadeva compares the upanishadas to a plateau on the jewel-mountain of the Vedas which was quarried by the clever artist Vyas. व्या शहे सूत्री बली। तेये निगमरत्नाच्छी। उपनिषदार्थाची माळी। माणी खांडिची। XVIII-35

In the Abhaugas Jnanadeva says that God is the inner core of the upanishadas उपनिषदाचा गाम। Ag. 52 In the Haripatha he says, "My Lord is all-powerful and the Upanishadas cannot comprehend Him" ज्ञानदेव म्हणे हूरी माळा समर्थ। न कर्खेचि अर्थ उपनिषद।
his theory of illusion while Jnanadeva quotes it in support of his view that the world is the manifestation of Ultimate Reality and not the out come of Maya or Ajnana. In the last chapter of Amritanubhava there is a reference to the ten Upanishadas but it is only to state that all of them do not say anything more than what is contained in his own composition. “So my expression” says Jnanadeva “is the deepest silence like the picture of a crocodile drawn on the surface of water.” The same is the case with the Upanishadas.

The Upanishadas declare that Atman is beyond the reach of thought and speech. “That from which our speech turns back along with mind, being unable to comprehend its fulness, is the Ultimate Reality.” “Of that to which the eye is unable to go, which neither speech nor mind is able to reach—what conception can we have, except that it is beyond all that is known and beyond all that is unknown?” In the

2 विभाति वस्तु भासा । सर्वभिं त्वा ऐसा । शृवति काय वायसा । देकर देती ॥

Amritanubhava, VII-290.

According to Shamkar the gist of the verse in the Upanishadas is (Shamkar’s Commentary on Mundak, 2-2-10.)

यत्रअन्तर्गतिः ज्वैनिरद्विन्मुः तदेव सत्यं सर्वं तद्विकारे वाचारं र्मणं विकारो नामधेयमात्मभूतंमान्नूतमितरतुं ॥

Jnanadeva’s own view is—

प्रकाश तौ प्रकाश कै । यस्सी न चुके पेिै चुकी । मृणोनि जग अस्की ॥

वस्तुप्रभा ॥ Amritanubhava VII, 279.

- This is immediately supported by the above verse which again is followed by—

यालागी वस्तुप्रभा । वस्तुव्यः पावे शोभा । जात असे लाभा । वस्तुव्यः ॥

वाचून वस्तु यथा । आपणाप्रकाशावा । अज्ञान हेतु वाया । अवचैिच ॥

6 Ib. VII, 291, 292.

3 Ibid; X, 18.
5 Taittiriiya Upanishada II, 4.
6 Kenaopani.shhad I, 3.
same strain Jnanadeva says that Atman is not illuminated by the Sun who illumines all the other things, is not enveloped by the sky which envelops everything, is not embraced by egoism. The understanding, the mind or the senses fail to grasp the Atman who baffles all descriptions by means of words. As soon as thought reaches the Atman it disappears like a great warrior who wins success for his master by sacrificing his life.

We find another side to the same subject in the Upanishadas. Atman is unknowable because he is the eternal subject who knows. "How could the Eternal knower be an object of knowledge" asks the great philosopher Yajnyavalkya. "Who can know him, who Himself knows," says Svetasvatara Upanishada. Jnanadeva also describes Atman as the eternal subject who knows himself though he is not an object of others' knowledge. With Yajnyavalkya he agrees that self-consciousness is the Ultimate fact of experience. The Ultimate Reality or Atman is self-conscious (Swasamvedya) and his unity is not lost even if he comes to pervade the whole universe. There is no second line drawn thereby.

The Yogavasishtha

According to Dr. Pendse there are striking similarities between the Yogavasishtha and Amritanubhava. Hence he

7 Amritanubhava; VII, 107-122.
8 Ibid; V, 57.
9 Brihadaranyak Up. II, 4-14.
10 Svetasvatar Up. III, 19.
11 Amritanubhava; VI, 87. 89 with Shivkalyana’s Commentary.
12 Ibid; VI, 13-93.
13 Ibid; V, 146.
14 Dr. Pendse–Shri Jnaneshwarnche Tadvajnana Ch. VIII
opines that Jnanadeva must have based his work on the Yoga Vasishtha. Probably he might have written a work on the Yoga Vasishtha of which the Amritanubhava forms a chapter. His reasons for the adoption of this view are as follow:—

a) The name of Jnanadeva’s work i.e. Anubhavamrit seems to be suggested by stanzas in the Yogavasistha (St, 6-10-70 and 71).

b) Similarity of the description of Shunya in both the works.

c) Similarity of the view about the illusory nature of the world.

d) Similar descriptions of Shiva and Shakti.

e) The Sphurtivada of Jnanadeva is not his original contribution as Prof. Ranade believes. It is found in the Yogavasishtha from which Jnanadeva must have borrowed.

Dr. Pendse also thinks that he gets support in drawing the conclusion about the identity of Shamkar’s Philosophy with that of Jnanadeva from the fact that both of them base their philosophical doctrines on the Yogavasistha.

Dr. Pendse’s view cannot be accepted for the following reasons:—

a) Jnanadeva himself has told that he does not base his work on some authority like that of Shiva or Shrikrishna. He is expounding his own experience and hence adopts the title Anubhavamrit significantly. So mere similarity of words like Anubhava and Amrit in certain verses of Yogavasishtha do not prove that Jnanadeva has borrowed his title.
b) Both Jnanadeva and the author of the Yogavasishtha have designated the Ultimate Reality as "Shunya" to denote its absolute nature. But the Absolute of Yogavasishtha is the ground of the world appearance which is essenceless like a mirage while Jnanadeva's Absolute manifests itself in the form of the world in which It is immanent.

c) With regard to the world-appearance the standpoint of the Yogavasishtha is that of "Ajatavada." The world is not only illusory but has also not even come into being. It is utterly non-existent. Jnanadeva, on the other hand, considers the world as Chidvilas and not something which has no existence but appears to exist through our ignorance.

d) The Prakriti in the Yogavasishtha is the creative impulse out of which waves of worldly appearance arise. This creative power is called by various names, Spanda-Shakti, Samkalpa-Shakti, Jaganmaya and Prakriti. Now this Shakti is nearer to Shamkar's Maya than to Jnanadeva's Goddess who is nothing but God's Love towards Himself.

e) There is a difference between the conception of the Shakti in the Yogavasishtha and of the Goddess in the Amritanubhava. In the same way the word Sphurti also has not the same meaning in both the works. Both Shakti and Goddess are Sphurtis of One Reality but in a different sense as stated

15 Yogavasishtha: 3-7-20.

16 Yogavasishtha $\frac{6}{2}$ - 85-14.
above and hence Prof. Ranade is right in his statement about Jnanadeva’s original contribution of Sphurtivada.

It is clear from the above criticism that Jnanadeva has written his work independently and does not base it, like Shamkar, upon Yogavasishtha. Hence we cannot draw any conclusion from this about the identity of the views of Jnanadeva and Shamkar as Dr. Pendse tries to do. There is a work on the Yogavasishtha in Marathi Ovi metre published by Mr. Chandorkar and its authorship is attributed to Jnanadeva but the very language of it is so rough, modern and prosaic that even Dr. Pendse denies its authenticity.

Besides these there are some points to be noted in connexion with the different standpoints of the two works. The author of the Yogavasishtha has written his work for a certain class of readers. He tells us that the proper person to study this work, is he who has become aware of his bondage and longs to be free, who is no longer in utter ignorance, but has not yet attained wisdom (Y. V. 1–2–1). Jnanadeva, on the other hand, proclaims that he has received the spiritual dish from his spiritual teacher so that all should enjoy and participate its sweetness. (Amt. X–1–6). The cause of all suffering, according to the Yogavasishtha, is trishna or desire for worldly objects. Jnanadeva does not despise worldly objects. He tells us that a true devotee is aware of their real nature, i.e. they are the expressions of Divine Love, and enjoys them in a spirit of worship. Liberation is the goal of Yogavasishtha which advises tranquility, contentment, company of the

17 Dr. B. L. Atreyā M. A. D. Litt – The Yogavasishtha and its Philosophy, p. 39.
18 कृत्यान्तिय चाष्ट्राणि करित विषयसेवा इन्हाना भूत्य-समुद्र-कालोवा। भवतीत्वा घरीं।। ओम. ७.
wise and reflection as the four gate keepers of liberation (Moksha-Dwarpalak).\textsuperscript{19} Jnanadeva has criticised the conception of liberation and bondage and sets forth the ideal of Bhakti.

According to the author of the Yogavasishthha, the world as such never existed in the past, nor exists now, nor will exist hereafter. Yet there is the appearance of a wonderful creation and it has to be explained somehow. The answer given by the Yogavasishthha is that the course of appearing events takes place merely by accident (Kakataliayoga).\textsuperscript{20} Jnanadeva, on the other hand, does not regard the world as appearing accidently but regards it as the expression of the very nature of God or Ultimate Reality.

**The Shivasutras**

Shivasutras are the fountain-head of Kashmir Shaivism. They are said to be revealed to Vasugupta by God Shiva Himself. The time of Vasugupta is ascertained as the end of the 8th century or the beginning of the 9th. Jnanadeva was acquainted with these Sutras and he refers to one of them in his Amritanubhava (III-16). The Sutra “Jnanam Bandhah” which literally means “Knowledge is a bondage” occurs twice in the Shivasutras (1-2 and 3-2) and the commentator Kshemendra interprets “Jnanam” as the perverted knowledge which imposes not–self upon self and vice versa.\textsuperscript{21}

\textsuperscript{19} Dr. Atreya – The Yogavasishthha and its Philosophy p. 48.
\textsuperscript{20} Dr. S. N. Dasgupta – A History of Indian Philosophy Vol. II, p. 239.
\textsuperscript{21} Shiva Sutra Vimarshini – p. 13.
Jnanadeva has interpreted “Jnana” in a different sense. In the third chapter of Amritanubhava he is criticising the conception of Moksha. The conception of bondage itself is wrong. Hence if bondage is unreal, freedom is also unreal. Hence, the knowledge (Jnana) which regards this unreal freedom as real is bondage and here he passingly refers to the above Sutra.

( In the course of revealing the Shiva Sutras, Sadashiva has said that knowledge is a bondage.)

Looking to the philosophy of Kashmir Shaivism as revealed in the Shivasutras with its commentary, and other later works, we find that Jnanadeva’s views in the Amritanubhava about the ultimate questions are similar to those in Kashmir Shaivism. In the Shiva Sutras the Ultimate Reality is the Chaitanya or Shiva. It is self-illuminating and requires no other proof. Shakti is its inseparable aspect and universe is nothing but the manifestation of this Shakti. It has no other basis or ingredient like Maya or Ajnan in it. Jnanadeva’s description of Shiva and Shakti is similar. Both are Ultimate principles, of the same nature, inseparable and both give birth to the universe.

Kashmir Shaivism assumes 36 principles or Tatvas. Jnanadeva does not give the figure or a detailed list of these, but mentions them as “From Shiva to the Earth” and says

---

22 Amritanubhava III, 16.
23 Shiva Sutra I, 1. चैतन्यमात्मा.
24 Shiva Sutra – Vimarshini, p. 9
26 Amritanubhava I, 1.
that they are illuminated by the Ultimate Reality. \(^{27}\) Jnanadeva uses the simile of moon and its light to show the relation of Shiva and the universe. The same simile is used by the author of Shivasutra-vimarshini.\(^ {28}\)

Kashmir Shaivism differs from the Adwaitins who support the theory of Vivartavada which regards appearances of names and forms as real under no circumstances, because these are not existent in the supreme Reality. The theory of Kashmir Shaivism is called "Abhasavada" or "Swatantryavada" and regards appearances as real in the sense that they are aspects of the ultimate Reality "The appearances, therefore, are not the forms of some indescribable (Sadasadbhyam Anirvachaniya) Maya, but real (Sat) in essence." \(^ {29}\) Jnanadeva agrees to the latter view and rejects the former.

Shakti (power) is Para Samvit (the supreme knowledge) as well. Jnanadeva recognises this and says that a Jnani calls it Svasamvitti and a Shaiva calls it Shakti but it is also Bhakti (Love). So what Shaivas call the energy of Shiva is also His Love towards Himself. It is "Praneshwari" (Beloved) and hence Universe is not only the manifestation of the power of the supreme being, but it is also the expression of the Supreme Love. \(^ {30}\) So, though Jnanadeva has endorsed the Shaiva view of Shiva and Shakti, he fully brings out the

---

28 Ibid; VII,– 138; Cf. Shivasutra Vimarshini p. 88.
30 Dr. K. C. Pandey calls this theory of Abhasavada the realistic idealism and explains it thus – "The world of experience is real because it is a manifestation of the All-inclusive Universal Consciousness or Self; it is ideal, because it is nothing but an experience of the self and has its being in the Self exactly as our own ideas have within us" – Abhinavagupta–An Historical & Philosophical study. p. 196.
30 Jnaneshwari XVIII – 1113, 89. Amt, I–2, 12.
nature of Shakti and shows that this Shakti is not only the creative Power but also the creative Love which is the impetus to the world’s manifestation.

Gorakhanath

The relation of Jnanadeva with Nath-cult is well-known. At the end of Jnaneshwari, he gives his spiritual lineage beginning from God Shamkar. The historical figures, however, are from Matsyendranath. Gorakhanath was his disciple. In the Amritanubhava no names of these Nath-Yogis are mentioned. But it is interesting to notice the similarities between the philosophical background of the Nath-cult as found in the works of Matsyendranath and Gorakhanath, and that of Jnanadeva’s Amritanubhava.

Mr. Bhingarkar, in his biography of Jnanadeva, quotes some verses from Matsyendrasamhita where it is told that the universe arises out of the power (Chit-shakti) of Brahman. This shows his divergence from the Mayavada of Shamkar. Again there is a Sanskrit work called Siddha-Siddhant-Paddhati published by Shri Purnath of Haridwar with learned commentaries in Sanskrit and Hindi. The author of this work was Gorakhanath as we see from the first verse. In this work we get not only the account of the religious discipline of the Nath-cult but also its philosophical foundation.

According to Gorakhnath, the Ultimate Reality is Shakti, Yukta Shiva-Shiva accompanied by Shakti. Shakti,

31 Quoted by Dr. Pendse in his Shri Jnaneshwaranche Tatvajnan p. 408.
however, is not some outword force but it is the power inherent in the Supreme spirit. Hence both Shiva and Shakti are inseparable and eternally united. "At the heart of Shiva there is Shakti and at the heart of Shakti there is Shiva. See no difference between them as between the moon and its light."\textsuperscript{33} There are similar descriptions in Jnanadeva’s Amritanubhava. Instead of Moon and Its light we get there the instance of Sun and its light.\textsuperscript{34} Again there is the similar description of the inseperability of the two.\textsuperscript{35}

Gorakhanath does not regard the Supreme power that gives birth to the world as Maya or Ingorance. Vedantic Maya is neither real nor unreal. It is an incomprehensible entity, while the Supreme energy of the Absolute is the dynamic aspect of His noumenal consciousness. The power has the tendency of self-expansion as well as self-contraction and these constitute the cosmic order.\textsuperscript{36} Hence the cosmos is not illusory but the real expression of the Absolute Energy.

The Absolute spirit, according to Gorakhanath, conceived as being, is Shiva and conceived as becoming is Shakti. The conception of Shiva divorced from Shakti is incomplete and the conception of Shakti divorced of Shiva is meaningless. Shiva with his own Shakti, which is non-different from Himself, is the sole ground and the true self of all the phenomenal existence.\textsuperscript{37}

\textsuperscript{33} शिवस्यार्थंशत्रं शक्तिः शक्तिर्मयंशिवं शिवं: अंतरं नैव जानीयताः चंद्रचंद्रि-कपोलिचि 11
\textsuperscript{34} Amritanubhava I, 25.
\textsuperscript{35} Ibid; I, 41.
\textsuperscript{36} Cf. Amritanubhava, VII–257.
In this way the philosophical background of Gorakhanath as propounded in his Siddha-Siddhant-Paddhati is similar to that of Amritanubhava. Gorakhanath lays stress on the Power-aspect and hence his philosophy culminates in the path of Yoga, while in the Amritanubhava the Power or Shakti is also the Love of Supreme towards Himself. Jnanadeva has stressed this aspect of Reality which he considers to be Its essence. So His philosophy culminates in the path of Bhakti before which the eight-fold Yoga pales into insignificance like the Moon in a broad day-light. 38

Shamkar

Jnanadeva had great reverence for Shamkar. In his Jnaneshwari he says that he is merely following the footsteps of the great Bhashyakar (i.e. commentator). It does not mean that he slavishly imitated Shamkar. The statement is expressive of his humility and though sometimes he follows Shamkar, he has his own way of expounding the Gita. In the Amritanubhava there is no mention of Shamkar and he has his own line of philosophic thinking. We are reminded of Aristotle's remark about Plato that though Plato was dear to him, truth was dearer to him than Plato. In the same way though Jnanadeva paid great homage to Shamkar, he had to criticise his theory of Mayavad which he found to be logically untenable as well as contradicting experience. Though Amritanubhava does not mention the name of Shamkar, we find there some traces of Shamkar's influence as well as an elaborate criticism of his point of view.

This influence is seen when we see how Jnanadeva describes the Ultimate Reality as self-established, beyond all

38 Amritanubhava IX, -26, 59-60.
the proofs because it is their own presupposition and beyond all conceptual constructions. Shamkar has expressed the same idea in his commentary on the Vedant Sutras. Jnanadeva has criticised the doctrine of nihilism in the same way as Shamkar.

In spite of these similarities there are fundamental differences between the two philosophers. Both are Absolutists but their conceptions about the nature of the Absolute differ. Shamkar's Absolute is undifferentiated consciousness (Nirvishesh Chinmatra) while Jnanadeva's Absolute is the perfect consciousness (Bhariva Jnanamatra). Shamkar's Absolute is static and unchanging and the multiplicity of the world is in truth nothing but an illusory appearance on that substratum, while Jnanadeva's Absolute is dynamic and expresses Itself in the form of becoming or the process of the Universe. According to Shamkar the triad of Knower, Knowledge and the Known is merely an illusion while Jnanadeva thinks it to be the very nature of Reality or Experience.

The God of Shamkar is a limitation of Brahman and hence Ultimately unreal, while Jnanadeva's God is without limitation and is the real expression of the Absolute. The Maya of Shankar is nothing but limitation itself, but the Goddess of Jnanadeva is without limitation and is not a limiting power but the essential aspect of the Absolute.

39 Amritanubhava V, 16-17; VI, 94; VII, 117.
40 Brahm-Sutra, Shamkar Bhashya on II-3-7.
According to Shamkar the Jiva or the empirical ego is an appearance to be finally dissolved in the Absolute while to Jnanadeva it forms as it were a focus through which the Absolute enjoys itself. 42

42 Pringle Pattison:— Idea of God— "The intelligent being is rather to be regarded as the organ through which the Universe beholds and enjoys itself" p. 211. Instead of "Universe" we may substitute "God" in the case of Jnanadeva.
CHAPTER IX

AMRITANUBHAVA AND OTHER WORKS OF JNANADEVA

Changadeva-Pasasthi and Amritanubhava

Changadeva-Pasasthi is a small work of Jnanadeva containing 65 verses addressed to Changadeva who was famous for his Yogic powers. Though small in size the work is most important as it contains a clear cut view of Jnanadeva’s attitude to the Ultimate problems of philosophy. And it is truly said that what Jnanadeva has told in nine thousand verses of Jnaneshwari and in eight hundred verses of Amritanubhava, is contained in sixty five verses of Changadeva-Pasasthi. In this way Pasasthi can be called a quint-essence of the philosophy of Jnanadeva.

There are, however, two main points absent in the Pasasthi which we find in his other works. First, there is the absence of a logical argumentation or the refutation of opposite views. In the Amritanubhava the greater part of the work is devoted to the refutation of Ajnana, while in the Pasasthi there is a summary statement about the absurdity of those who regard “Avidya” as the cause of the world.¹ The second is the absence of any statement about the nature of Bhakti which we find both in the Jnaneshwari and Amritanubhava. Hence the Pasasthi in itself is not sufficient to convey the view point of Jnanadeva completely.

The Ultimate Reality is described in the Pasasthi in the same way as in the Amritanubhava. “Nothing can be

¹ Changadeva Pasassthi, 8.
said about it. It cannot be known in any way (that does not mean, however, that it does not exist). It is the pure existence or Being. Eye is unable to see itself though it has the power of seeing other objects. In the same way it is powerless in the matter of self-knowledge. It is knowledge itself where there is no room for ignorance. But being knowledge itself it cannot be said to be an object to itself. Therefore if any thing has to be spoken about it, it should be in the form of silence."² His existence, appearance and enjoyment do not depend on anything else.³

The main object of Pasasthi is to state that the triad of knower, knowledge and the known is the manifestation of one Samvitti (consciousness). Hence the world is not caused by Avidya, but it is the natural manifestation of Reality. God is not hidden by His manifestation. His splendour is not diminished on that account. "Gold itself becomes an ornament without diminishing its quality. In the same way He Himself has become the world without losing anything. Though there are aggregates of tiny particles of clay, their material nature is not annihilated. In the same way He is not concealed by His own vibrations in the form of the universe. Moon is not covered by its rays; fire does not become something else though it appears in the form of flames. I do not, therefore, understand the meaning of saying that the manifestation of the subject and the object are caused by Avidya. On the contrary they are the natural expressions of One Reality."⁴

So the relation between the Reality and the cosmos is not like that between a rope and a serpent. Reality is not the

² Ibid; 30–33, Cf. Amritanubhava VII, 103; IV, 37, 18, 22; VI, 87–88.
³ Ibid; 36, Cf. Amritanubhava VII, 104.
ground of an illusion in the form of the world but it is the very stuff of the Universe. "Though we call cloth by its name it is nothing but thread. The earthen pot is nothing but earth. So the Pure-Consciousness (Samvitti) which is above the subjective and objective conditions, manifests itself in the form of subject and object. The pure Gold exists in the form of an ornament or a person appears in the form of an aggregate of several organs. In the same way all the objects from Shiva to the earth are simultaneous illuminations of one Samvitti. Though the sugar appears in the form of several lumps its sweetness is not divided, in the same manner, the one Samvitti is not divided though there are so many objects in the universe. The same Samvitti manifests Itself in the form of the knower, knowledge and the known."

The Unity of Samvitti is not broken. "In a bundle of thread there is nothing but thread inside and outside. So in the threefold manifestation there are no three separate entities. Nothing but one's own complexion is seen in a mirror. Hence the seeing seems to be without any purpose. So the one Samvitti appears threefold without loosing its Uniqueness."

Jnaneshwari and Amritanubhava

Though Jnaneshwari is a commentary on the Gita and Amritanubhava is an independent work both of them reveal the same metaphysical stand-point. Jnanadeva describes the Ultimate Reality or the Absolute Existence in Jnaneshwari in the following manner: "The Absolute Being is sound without being heard, fragrance without being scented, joy

---

5 Ibid; p. 9-12; 14, 18.
without being experienced. What is behind it is before it; what is before it is behind it; which itself unseen, sees without there being any object to be seen; which is knowledge without being either knower or the known; which is neither effect nor cause, which is neither second nor one; which is alone to itself.”

So the Ultimate Reality is Pure Knowledge or spirit. It is the presupposition of all proofs, and experiences itself.

Amritanubhava describes the cosmos as a sport of the Absolute. It is not something that hides Reality but manifests it. In the same way Jnanadeva says in his Jnaneshwari that the world is related to God as waves are related to the sea, limbs to the body and branches to a tree or flames to a fire. The lustre of a jewel does not hide it. In the same manner this world does not hide God. Gold does not loose itself though several ornaments are made. Lotus when bloomed is the same lotus. As it is not necessary to destroy petals in order to see a lotus, it is also not necessary to set aside the world in order to have a vision of God because everything is His manifestation.

Some times, while describing the relation of the world to God or Ultimate Reality, Jnanadeva uses the similes of Vivartvada e. g. of rope and snake, in Jnaneshwari. That does not mean, however, that he follows Maya-Vada. He also uses the similes of Parinamvada e. g. milk and curds or a seed and a tree. That also does not mean that he follows Samkhya system. He has used both kinds of similes but he has also shown that these are insufficient to point out the relation

---

7 Jnaneshwari XV, 72–79.
between God and the Universe by using the similes like Sun and its rays which illustrate his own view of "Chidvilas" (Play of the pure consciousness).\(^{10}\)

There is a description of Ajnan or Nescience in some passages of Jnaneshwari and hence there is a difference of opinion as regards Jnanadeva’s philosophical point of view as expressed in the Jnaneshwari. Out of humility Jnanadeva says at the end of the work that he has followed the footsteps of his predecessors like Vyas and Shamkar in writing his commentary. Hence some critics urge that Jnanadeva’s metaphysical conceptions are identical with those of the great Vedantist Shamkar. Jnanadeva had a great reverence for Shamkar no doubt, but that does not mean that he did nothing but blindly followed him. Though Jnanadeva expresses his humility he is also conscious of his own intellectual powers and of the grace of his own spiritual teacher, for he says in the same passage that by the grace of Shri Guru, every breath of his would become a new treatise.\(^{11}\)

The passages where we find the description of Ajnan or Maya, are those where Jnanadeva is explaining Vedantic standpoint, just as he has explained Samkhya view of Prakriti in the 13th chapter of Jnaneshwari.\(^{12}\) He says that what the Samkhyas call Prakriti is called Maya by Vedantins.\(^{13}\) Jnanadeva’s Goddess is different from both Maya of Vedantin and Prakriti of Samkhyas. The contradiction of Jnaneshwari to Amritanubhava, on account of the description of Ajnan in the former is only apparent and not real. The description of

\(^{10}\) Ibid; IX, 64–88.
\(^{11}\) Ibid; XVIII, 1735.
\(^{12}\) Ibid; XIII, 960–1025.
\(^{13}\) Ibid; XIV, 70.
Ajnan is only an exposition of Vedantic standpoint and does not show that Jnanadeva himself was an Ajnan vadin. How can he be an Ajnan-vadin like Shamkar whose view he has refuted in his Amritanubhava and when there are passages in the Jnaneshwari itself, describing the universe as the manifestation of the supreme being?

Again it might be said that these two works written one after another, show the evolution of the author's thought. While writing Jnaneshwari Jnanadeva was an Ajnanvadin; afterwards his thought gained maturity and he gave up his old conception, nay not only that, but he refuted them in his Amritanubhava. But this view is also not tenable. In the first place, Jnanadeva's span of life was brief i.e. of twenty two years. Jnaneshwari was written when he was only sixteen years old. Then there remain only six years during which Amritanubhava, Pasasthi, Haripath and other devotional lyrics were composed. So the duration of the composition of Jnaneshwari and Amritanubhava is not a long one. Jnaneshwari is also a work of maturity as Jnanadeva himself says that the work reveals the majesty of the grace of his Guru.\footnote{Ibid; XVIII, 1751.} So both of them are works of maturity and the idea of the evolution of thinking is not acceptable.

The same conception of Bhakti, which is found in the Amritanubhava, is expressed in the Jnaneshwari. Bhakti is not merely a pathway to God, an external means of attaining God–Realization, but it is the very nature of God or Ultimate Reality. Bhakti is Divine Life.\footnote{Ibid; XVIII, 1117.} To regard appearances in this world as separate existences is a sign of ignorance. As a
matter of fact God is experiencing Himself through Bhakti i.e. Knower and the Known (Appearances) are the two aspects of the same Divine Experience. To apprehend this Divine Love is the highest achievement of Human Life and he who has achieved this is a true Bhakta. Jnanadeva has depicted beautifully the life of such a devotee who, becoming one with the Lord, enjoys Him. The sweet unitive experience of the devotee can be compared to the waters of the Ganges that mingle with the ocean and yet play upon its bosom. When a mirror is placed before another mirror the beauty of the perception is enhanced. Similarly there is the enhancement of Divine Love in the heart of the devotee. Again his experience can be compared to that of a person looking at his fair complexion in a mirror. The person’s eyesight discards the glass of the mirror and perceives the reflection. No sooner the reflection is perceived the man gives it up and enjoys the pure daylight of his own simple existence. So the devotee enjoys Divine Joy without duality. He enjoys as a damsel enjoys her youth. The ripples of water on every side kiss the water. Light everywhere delights in the Sun and space pervades the sky. Without actions he worships God as ornaments worship gold, the fragranceworships the sandalwood, the moon light worships the moon. Though there is no action there is Bhakti in non-duality.

Some one might object the possibility of enjoyment in such a way and say that it is impossible to enjoy a thing by becoming one with it and hence Bhakti in non-duality is also impossible. Jnanadeva definitely answers the objection by stating that it is possible to enjoy God only by uniting with

16 Ibid; AVIII, 1128.
AMRITANUBHAVA AND OTHER WORKS

Him. If one does not become united with Him one cannot enjoy Him. Just as a royal dignity cannot be enjoyed unless one's having a royal personality, so in the same manner Divine sweetness cannot be enjoyed without union with God. 18

Amritanubhava and Abhangas

The Abhangas of Jnanadeva express the same metaphysical standpoint as that of the Amritanubhava. The Ultimate Reality is described as Pure consciousness that manifests itself as a subject as well as an object. 19 It is self-established and requires no other proof. 20 God is the Ultimate Being. There is no other besides Him. Every becoming is his manifestation. 21 He is cosmic as well as acosmic. 22 He is beyond our conception and is enjoying Himself. 23

The Universe is nothing but his manifestation. It is as if his ornamant. 24 It is His play. 25 In one of His Abhangas Jnanadeva regards the whole Universe as a Lingam and gives a sublime description of it. He says that the basin of the Lingam is the heaven and whose water line is the ocean. It is as fixed as Shesha and is the support of three worlds. Clouds pour water on it and it is worshipped by flowers in the form

18 Ibid; XVIII, 1142-46.
19 पार्श्वां पार्श्वाण्यामाजि स्वयंचि विस्तारलालि की देख्याचि होवुनि अंगे। सहजिसिंह तें तू आपणये पायी। Gatha of Jnanadeva, Abg; 351.
20 Gatha of Jnanadeva, Abg; 332.

of stars. Moon is the fruit offered to it, and Sun is the light waved before it and the individual self is offered as an oblation.\(^\text{26}\) So God pervades the whole Universe as well as transcends it.\(^\text{27}\)

Amritanubhava and Virahinis

Virahinis are, as we have already seen (P. 22), the religious lyrics where Jnanadeva has expressed the pangs of his love-lorn heart. In the Amritanubhava he puts forth the theory of Chidvilas upon which he bases his conception of natural devotion (Akritrim Bhakti). Virahini is the mature fruit of this devotion. Writers like Dr. Ranade believe that this विरहाब्लव (love-lornness) is a degenerated form of the attitude of submission.\(^\text{28}\) But this interpretation is misleading. Jnanadeva himself warns us not to look upon this experience as insignificant. In one of his Virahinis he says; “I am waiting alone and my heart is burning with love. This condition should not be considered as a trifling matter.”\(^\text{29}\) In the same Virahini he compares this state with the soil which is dried and thirsty after sweet showers.\(^\text{30}\) So this experience of the Virahini is the sweetest of the religious experiences where deep calls unto deep and the devotee is drinking the droughts of Love Divine in the form of his yearnings.\(^\text{31}\) The Viraha is

CHAPTER X

DIFFERENT INTERPRETATIONS OF JNANADEVA'S PHILOSOPHY—A CRITICAL SURVEY

Jnanadeva’s philosophy is differently interpreted by various scholars among whom important names are those of Dr. Pendse, Prof. Ranade, Prof. Dandekar and Shri. Pandurang Sharma. All of them have deeply studied the works of Jnanadeva. Each of them, however, has his bias which colours his interpretation and leads him to adopt his peculiar point of view. Hence it is important to know their interpretations and to see whether they rightly bring out the spirit of the philosophy of Jnanadeva.

Dr. Pendse in his "Shri Jnaneswaramche Tatvajnana" (Philosophy of Shri Jnaneswar) has devoted a special chapter to the Amritanubhava.\(^1\) He tries to identify the metaphysical standpoint of Jnanadeva with that of Shamkar. According to his estimate Amritanubhava is like a detailed exposition of Shamkar’s Adhyas-Bhashya (Introductory portion of Shamar’s commentary on the Brahm-Sutra).\(^2\) The positions of Shamkar and Jnanadeva, however, are different in dealing with the triad of Knower, Knowledge, and the Known. Shamkar regards this triad as due to Super-imposition or Avidya. Jnanadeva, on the other hand, disproves the existence of Avidya and the cause of the trio is not an imaginary ignorance but the Pure consciousness itself.\(^3\)

1 Dr. Pendse—Jnaneswaranche Tatvajnana Ch. VI.
2 Ibid; p. 312.
3 Amritanubhava, VII, 131-133, 146, 162 etc.
According to Dr. Pendse, Jnanadeva and Shamkar both regard Ultimate Reality as one Pure Consciousness and both of them admit Unreality of the world. Sometimes Jnanadeva speaks as if the world is the real expression of the Absolute.

How are these contradictory views to be reconciled? Dr. Pendse tries to solve this riddle by the method of Anvaya–Vyatirek (affirmation and negation). These are the two ways of prpounding the same thing i.e. Reality of Brahman and Unreality of the world. To say that everything is Brahman is equal to say that Brahman transcends everything. "Sarvam Khalvidam Brahma" and "Neti Neti" mean the same thing. Jnanadeva in his Amritanubhava mainly employs the Anvaya (affirmative) method while Shamkar uses Vyatirek (negative) method prominently. Sometimes Shamkar also uses the affirmative method. The purpose of both these methods, according to Dr. Pendse, is that the negative method takes for granted ignorant people's conception about the world and refutes it while the affirmative method uses the standpoint of one who has attained Knowledge. Thus Amritanubhava is rightly called "Siddhanuvad"—utterances of one who has attained the highest stage of life.

Dr. Pendse's solution seems to have been suggested by Shamkar's own solution of the difficulty found in the interpretation of different Upanishadic texts. Some passages in the Upanishadas describe Brahman as acosmic while others as cosmic. Both these descriptions, according to Shamkar, mean the same thing. Brahman, from the empirical standpoint is cosmic, while from the transcendent standpoint is acosmic.

4 Dr. Pendse — Shri Jnaneshwramche Tatavijnana p. 441.
5 Ibid; p. 199.
6 Amritanubhava, X, 12.
7 Prof. Hiriyanna — Outlines of Indian Philosophy; p. 61–62.
In this way Shamkar tries to synthesise Upanishadic teachings. The same kind of synthesis, in the case of Jnanadeva, is fallacious. It is true that both Jnanadeva and Shamkar say that the world is unreal. But their meaning of the word "unreal" is not the same. Hence "Atman or Spirit" which is regarded by both as ultimately real does not convey the same thing.

Dr. Dasgupta has discussed the question of the cardinal principle of Idealism in his "Indian Idealism." The cardinal principle of Idealism is the spirituality of the real. There are different varieties of Idealism according to the meaning attached to the word "Spirituality". The proposition "Reality is Spiritual" has for its corollary the proposition that the external world of our perceptions is in some sense illusory. This discussion helps us to make clear the positions of Shamkar and Jnanadeva. Both are Idealists. Both regard the Ultimate Reality as spiritual. Both regard the world as in some sense unreal. The question arises about the meaning of the spirit and Unreality, understood by these two thinkers. According to Shamkar, spirit or Atman is pure consciousness which is static and unchanging. It is pure being and has no room for becoming. The unchanging has no room for change. Hence it is but natural that he regards the world which is ever changing and ever active as the product of ignorance or Avidya. This is the meaning of his conception of the unreality. Therefore he employs mainly Vyatirek or negative method and though at times he seems to adopt Anvaya or affirmative one, he always means by affirmation nothing more than negation e.g. to say that "all is Brahman" (Sarvam Khalvidam

8 Dr. Dasgupta - Indian Idealism - "Upanishadic Idealism" Ch. II.
9 Ibid; p. 27.
Brahm) means nothing more than that "All is not. Only Brahman is."

The spirit or Atman of Jnanadeva is dynamic. It expresses itself in the form of the world. 'The world is ever changing' means that the Absolute is ever manifesting itself spontaneously in novel forms. Hence the world is called "Chidvilas" (the playfulness of the Absolute). The unreality of the world in the case of Jnanadeva bears a different meaning. The world is unreal means that it has no meaning apart from the Atman or the Absolute in whom it finds its full significance and ground. It has no separate existence. In another sense the world is real. It is real in the sense of being a real manifestation of the Absolute. Hence Jnanadeva seems to adopt the affirmative method. Though he sometimes uses the negative method, his negation means an affirmation. Though he sometimes uses the conception of Maya, he only conveys the sense of Chidvilas.

This doctrine of the play of the Absolute can be easily misconstrued. Dr. P. T. Raju in his "Thought and Reality" has identified "Lila" of the Upanishadas with "Maya" of Shamkar. "Lila" according to him is something inexplicable. So the world is "Lila" (play) of the Absolute means it is inexplicable i.e. Anirvachaniya. Maya is Anirvachaniya (inexplicable). So "Lila" is Maya. But to explain the play of the Absolute in this fashion is nothing but playing upon words without taking into consideration the underlying significance. In the same way Dr. Pendse also misses the significance of Jnanadeva's positive statements and construes them as negative ones in the light of Shamkar's method of explanation.

10 Amritanubhava, VII, 289. जग असकी वस्तुप्रभा।
11 Dr. P. T. Raju - Thought & Reality, p. 274.
To sum up, the unreality of the world in the case of Shamkar means that the world is the effect of ignorance or Avidya, while in the case of Jnanadeva it means that the world is not some independent entity apart from the Atman. It is the experience of the Atman beholding Itself.  

Dr. Pendse himself is conscious of differences between Shamkar and Jnanadeva. He admits that the main points where they differ are that Jnanadeva identifies God and the Absolute, Jnana (knowledge) and Bhakti (Devotion), while Shamkar regards these as different. Absolutism and Monotheism are regarded by Jnanadeva as one and the same while Shamkar denies it. Jnanadeva sets forth Bhakti as the direct pathway to Moksha while to Shamkar it is only indirectly that Bhakti is useful and the final emancipation is attained only through the pathway of Jnana or knowledge. Inspite of his admitting this difference, Dr. Pendse wrongly insists upon the identity of the views of both the thinkers. He also admits that Shamkar lays stress on Sannyas (renunciation) while Jnanadeva on Bhakti or Loving devotion. Dr. Pendse does not go deeper into the matter to inquire the root cause of this emphasis.

The reason of this difference, which Dr. Pendse admits, is no other than the difference in the conceptions of Atman or Ultimate Reality held by both the philosophers. Hence the conception of one naturally leads to the ideal of renunciation while that of other ends in the ideal of Loving Devotion. Their conceptions of Moksha also differ. Dr. Pendse fails to

12 Amritanubhava, VII, 280.
शसी है भाँचराजे । भापणापे जेणे तेजे । भापणाचे देखूजे ।
13. Dr. Pendse; Shri Jnaneshwarancho Tatvajnan p. 448.
notice this. Jnanadeva's Moksha or final emancipation finds room for action and devotion while that of Shamkar debars them.

Prof. S V. Dandekar has written a learned article on "Jnanadeva's Philosophy." He terms Jnanadeva's Advaita as Purna (complete) Advaita or Monism pure and simple. He rightly contrasts his teachings with other Acharyas like Ramanuja and Vallabha. Both of these Acharyas, though agreeing in not accepting Shamkar's conception of Avidya, have different philosophical backgrounds. Ramanuja calls himself a qualified monist but as a matter of fact, he is a dualist because of his triparite division of one Reality into God, man and the world. Vallabhacharya's philosophy is called pure monism but his point of view also is not similar to that of Jnanadeva. He regards Vasudeva's son Krishna as the Highest God and advocates what is called Pushti-marga, the goal of which is to offer to your Guru your body, mind and wealth. Jnanadeva, on the other hand, is a devotee of the same-Krishna, but his Bhakti is related to that supreme spirit which transcends Guru, place and time, as shown by him in his Amritanubhava.

For these reasons Shamkar is nearer to Jnanadeva than Ramanuja or Vallabha. The circumstances in which Shamkar lived were different from those of Jnanadeva. He had to refute Buddhists, Mimansakas and Samkhyas. His work, therefore, is mainly polemic in character. He had to use the conception of Ajnan. Shamkar and Jnanadeva, both of them, are non-dualists though they use different methods of proving

15. Shri Jnaneshwar Darshan vol. II, p. 8-26
their theory. One proves Advaita by accepting Ajnan while the other proves it by rejecting it; so it can be said, according to Prof. Dandekar, that Jnanadeva revived the philosophy of Shamkar in an independent way.

But by maintaining that there is only a methodological difference between the two, Prof. Dandekar does not do full justice to the concrete character of Jnanadeva's monism. Shamkar's monism is abstract. So the difference between the theories of these two philosophers is not one of method only. It is more fundamental. Prof. Dandekar also compares Jnanadeva with Goudapada and tries to show that because of his criticism of Ajnana Jnanadeva reverts to Ajatavada of Goudapada who maintains that the world is never produced at all. Its appearance is due to our imagination. But Ajatavada of Goudapada and Chidvilas of Jnanadeva are not the same. According to Goudapada there is no world at all, while Jnanadeva says that there is the world, though it is not independent. It is the real manifestation of the Absolute as the rays of the sun are its manifestations.

A special chapter is devoted to the Amritanubhava 'one of the greatest philosophical work in Marathi literature,' in Prof. R. D. Ranade's "Mysticism in Maharashta."

17. Prof. R. D. Ranade—Mysticism in Maharashta p. 140.
18. Prof. R. D. Ranade—Mysticism in Maharashta p 158.
19. Ibid. p. 179.
should not suppose that he (Jnanadeva) did not believe Maya-vada in its ethical and mystical aspects. Prof. Ranade acknowledges that Jnanadeva has shaken the metaphysical foundation of Maya-vada by his arguments against Ajnan-vada in the VII th chapter of Amritanubhava. Once this is admitted it cannot be said that Jnanadeva believed Maya-vada in its ethical and mystical aspects. If he had done so he would have preached the path of renunciation and not of Bhakti which does not require the giving up of the worldly life. In the first chapter of Amritanubhava Jnanadeva describes Goddess instead of Maya. When Jnanadeva sometimes speaks about the unreality of the world it is to be understood that he wants to bring to our notice that the world has a deeper significance than we know. It is the expression of the spirit and to be experienced as such. So what is Maya to a believer in abstract monism is the expression of divine love to a Bhakta. Hence Jnanadeva says in the Jnaneshwari that to a devotee the water of Maya disappears on the very bank.

Though Shri. Huparikar Shastri has constrained the philosophy of Jnanadeva with that of Shamkar and Vidyaranya in his writings, it was Pandurang Sharma who drew the attention to this point by his forcible argument and deep erudition. He wrote many articles in the Chitramaya Jagat—a marathi monthly—on the philosophy of Jnanadeva as expounded in his Amritanubhava. He rightly showed that though each thinker uses the same words they have different meaning according to their points of view. Hence we should not confound their perspectives and identify the views of the philosophers like Shamkar and Jnanadeva by their verbal

20. Jnaneshwari VII. 79.

तथा ऐलीः चढी सरले, । मायाजठः ॥
semblance. Jnanadeva has his own view and his statements should be interpreted accordingly. Otherwise contradiction would result.

Shri Pandurang Shrama has made a noteworthy contribution to the study of Amritanubhava but he does not make clear the meaning in which Jnanadeva regards the world as real. Instead of fully bringing out the significance of Jnanadeva’s positive contribution and making explicit the implications of the conception of chidvilas, he tries to enter into the question of the influences of other schools of thought like those of Kashmir Shaivism, Pancharatra and Ramanuja, on Jnanadeva.

It cannot be said, on account of some similarities, that Jnanadeva borrowed his refutation, as Shri Pandurang Sharma maintains, from Shri Bhashya of Ramanuja. His philosophical background is different and it is possible that he should have criticized in independently. The conceptions of Radha and Krishna are not found in the Amritanubava, hence it is futile to look, as Shri. Pandurang Sharma does, to the Pancharatra as the source of God and Goddess of Jnanadeva. As for Kashmir–Shaivism, some influence of these works is likely because Jnanadeva mentions Shivasutras. However Jnanadeva goes deeper into the nature of Shakti mentioned in Shaivism where it is treated as the energy of the Supreme Shiva. To Jnanadeva it is not a mere energy but also the Love Divine which manifests the multiple universe.

In this way it will be seen that Dr. Pendse has misinterpreted Jnanadeva’s standpoint. Prof. Dandekar and Prof. Ranade give only half hearted consent to its originality. Pandurang Sharma, though he tries to show the originality, does not look deeper into its valuable implications that laid the foundation of Bhakti cult in Maharashtra.
CHAPTER XI

JNANADEVA AND SOME WESTERN PHILOSOPHERS

The philosophy of Jnanadeva can be compared to some western philosophers. A philosopher may be born in the West or East he has before him some persistent problems to be solved, the problems that affect the whole of mankind. A comparative study of different thinkers is useful in clarifying and appreciating the solutions of various problems by them. Hence we would do well to compare the views of Jnanadeva to those of some prominent thinkers of the west.

Plotinus and Jnanadeva

Plotinus (204–269 A.D.) was the leader of Neo-Platonism that arose during the last period of Greek philosophy and had great influence upon the growth of the later Christian theology. The philosophy of Plotinus is the culmination of Greek philosophy. The founder of Neo-Platonism was Ammonius Saccas. But no works were written by him. Plotinus was his disciple. He passed his eleven years in the company of his teacher and studied his doctrines. In 248 A.D. He went to Rome where he founded a school and presided over it until his death. The composition of his work began in his fiftieth year and they were not published during his lifetime. Porphyry, his famous disciple, wrote his master’s Biography, arranged and published the writings of Plotinus. These are called Enneades. There are six Enneades each being a group of nine treatises. Plotinus was a mystic as well as a philosopher. Porphyry tells us that his master had experienced mystic
trances four times during his lifetime. He was greatly influenced by Yogic and Buddhistic systems of Indian philosophy. According to Dean Inge Plotinus holds a more undisputed place than Plato in the history of Mysticism.¹

Generally there is a tendency among mystics to enjoy their contact with Divine and not to discuss philosophical problems. It does not, however, mean that "there is a radical difference between the metaphysician and saint"² as Baron Von Hugel says. Both Jnanadeva and Plotinus were great mystics and both of them have written philosophical works.

The philosophical thinking of Plotinus is spun round the triad of the One, the Nous and the world-soul. Plotinus begins from the One The One is God. He is good. He is infinite He is the Ultimate source of all being and knowledge but He himself is outside all being and knowledge. God is the Absolute to whom thought or will cannot be predicated. Even self-consciousness cannot be attributed to him. He is the source of the world. Plotinus does not accept the idea of creation or evolution. He uses the word "Emanation". "Being perfect by reason of neither seeking, nor possessing nor needing anything, the one overflows as it were and what overflows forms another hypostasis."³ The idea of emanation is akin to Jnanadeva’s conception of sphurtivada. There is again a striking similarity between Jnanadeva and Plotinus in using the similes for describing the relation between the world and the One. "We are to think of it as a radiance proceeding from the One abiding in its changelessness, just as the light about and surrounding the sun is eternally generated

¹ Dean Inge- Christian Mysticain p. 91
² Baron von Hugel—Eternal Life p. 85
³ Bakewell—source Book in Ancient Philosophy P. 401.
without any change or motion in the solar substance." 4 Jnanadeva uses the same simile of the sun and its beams in the Jnaneshwari and again tells us how this simile is also inadequate to describe the relation between the world and the Reality, in his Amritanubhava. 5 The rays of the sun go out of it but the world does not go out somewhere from their ground.

Both Jnanadeva and Plotinus are monists. Both regard God-realization as the supreme end of human life. The description of the One as beyound thought and existence is akin to that of Jnanadeva who says that the Ultimate Reality is beyound Sat, Chit and Ananda. 6 Again Plotinus describes the One as happiness and he explains “The one seeks nothing in order that it may exist or be happy nor yet anything to support it. Since it is the cause of all else, owes its own existence to nothing else. For the same reason why should its happiness be an object external to itself? It follows that happiness is not an attribute of the One. The One is happiness." 7 In the same way Jnanadeva tells us that if the Ultimate Reality is called Being (Satta), Knowledge (Prakash) and Happiness (Sukha), it does not mean that these are three different parts. Though the words are different they denote the same Reality.

4. Ibid P. 402.
5 Jnaneshwari XIV, 384.
   तेजाचं तेजीनं निवाला । तेजीचं असे लागला ।

   स्न्योगनं बोधसंपत्ति । उपमा नोहे ।
   एवंसचिवदानंद । आत्माहं ऐसा शाद । अनुवाचायावृत्ती सिद्ध । वाचकृष्णकः ।
"Beauty, hardness and yellowness—These combined express one thing—gold. Liquidity, sweetness, indicate one nector."

To sum up, the two philosophers agree in holding (a) The ultimate Reality is one, (b) The world is "emanation" or "Sphurti" of the One and (c) The mystic experience is the highest end of life. There are certain differences between the two. These are as follow. :-

1) The theory of emanation, put forth by Plotinus, lays stress upon the simile of rays. As the rays go farther from the sun of Reality they become dimmer and dimmer until at last there is nothing but darkness. This darkness is what we call matter. Jnanadeva does not hold such a negative conception of matter. Matter or everything knowable is nothing but "Sphurti". Every particle of matter is surcharged with it. Hence he describes that "God and Goddess live happily even in a tiny atom."

2) The highest mystic experience, according to Plotinus is "a flight of the alone to the Alone." He means by flight different stages of contemplation culminating in the experience

8. Amt. 1–2

9 Amt. VII, 245

10 Amt. I, 11

11 Benjamin Rand—The classical Moralists (Selection): "This, therefore, is the life of the Gods, and of divine and happy men, a liberation from all terrestrial concerns a life unaccompanied with human pleasures, and a flight of the alone to the alone P. 175.
of ecstasy. This ecstasy is akin to the path of Dhyan or meditation. In the case of Jnanadeva, he himself was a great Yogi as well as a great Bhakta. He had experienced both the states and by comparing the two he found that Yogic Samadhi pales into insignificance before the loving devotion. In the presence of spontaneous Divine Love, Yoga is like the Moon in a broad day light.\textsuperscript{12} So, though both Jnanadeva and Plotinus are mystics, the types of their mysticism are different. One is devotional while the other is contemplative.

3) The ideal of Plotinus being ecstasy, he inclines towards giving up the worldly life. It is said that he limited his sleep and food to the minimum and fasted every second day to realize the Cynical ideal of freedom from needs.\textsuperscript{13} He recognizes that sensual beauty can lead us to supersensual. “But the whole of his ethics is dominated by the idea that the basis of all evil for the soul is its combination with the body and that every activity has more value the less it brings us into contact with the world of the sensual.”\textsuperscript{14} Plotinus regards this world as a shadowy copy of the supersensual world which is true and real. His ethical teaching is consistent with his own conception. Jnanadeva, on the other hand, regards this world as the expression of Divine Love. So he does not repudiate worldly life. Instead of escaping from the world he teaches us to experience God’s presence in every object. Bhakti is superior to Mukti and so he says:— “His (Bhakta’s) enjoyment of objects

\textsuperscript{12} Amt, IX, 26, 50,
\textsuperscript{13} Zeller- Outlines of The History of Greek Philosophy P. 292.
\textsuperscript{14} Ibid P. 296
surpasses even the salvation and in the abode of Bhakti the devotee and the object of the devotion are intermingled."

Spinoza and Jnanadeva

It was Novalis, "One of the lights of early Romantic School" who first designated Spinoza a God-intoxicated man. The views of Spinoza were against orthodox religion- the Judaism in which he was born- and he was excommunicated. He was considered as a dangerous atheist and his great book "Ethic" was not published during his life time. These incidents in the life of Spinoza remind us of similar events in the life of Jnanadeva. Orthodoxy excommunicated Jnanadeva because his father sinned against their superstitions by accepting a householder's life after Sannyas. His monumental work like Jnaneshwari was practically unknown until Ekanath investigated the manuscript and proclaimed its greatness after three centuries.

To Spinoza philosophy was not merely a way of thinking but a way of life. Descartes, the father of Western modern philosophy, was inspired by intellectual curiosity. Spinoza was in search of a permanent object of love which will give him everlasting happiness. He resorted to the rational thinking not as a speculative game but as a means to a perfect life. The name 'Ethic' is significant from this point of view. Jnanadeva has also the same goal. The name "Amritanubhava" itself suggests that it shows the pathway to the experience of unending bliss.

15. Amt. IX, 37.
16. Spinoza (Selections) : "On the Improvement of Understanding P. 1
Spinoza and Jnanadeva both are monists. Spinoza calls Ultimate Reality "the substance"\textsuperscript{18} while Jnanadeva calls it "Vastu".\textsuperscript{19} Spinoza identifies "substance" with God. The Vastu of Jnanadeva and God are the same. The culmination of Spinoza's philosophy is in "the intellectual love of God"\textsuperscript{20} while Jnanadeva's philosophy ends in "Natural Devotion"\textsuperscript{21} (Akritrim Bhakti). Both regard, 'God loving Himself,' as the Ultimate fact.

In spite of these similarities there are some notable differences. Spinoza uses geometrical method in the exposition of his theory. The substance or God is the ground of the world. The world necessarily follows from the substance as the conclusion of a Syllogism follows from the premisses. The conception of Jnanadeva is more flexible than that of Spinoza. The world is not such a rigid necessity but is the playful expression of the abundance in the Absolute.\textsuperscript{22} Then again if we examine Spinoza's conception of the intellectual Love of God and God's Love towards Himself, we find that it differs from the conception of Jnandeva, which is more positive. To Spionza the intellectual Love is more like a joy of resignation. "The philosopher cannot help loving God; at least, he cannot but feel perfectly contented, peaceful and resigned in contemplating Him. This complete acquiescence of the thinker in the supreme law, this reconciliation of the soul with the necessities of life, this entire devotion to the nature of things is what Spinoza,

\textsuperscript{18} Ethic - Part I, prop. XI.
\textsuperscript{19} Amt. VI, 94. VII, 110, 135, 163, Cf. p. 28.
\textsuperscript{20} Ethic Part V prop. XXXIII.
\textsuperscript{21} Amt. IX, 60.
\textsuperscript{22} Amt. VII, 186.
by accommodation, without doubt, calls the intellectual Love of God, the source of eternal happiness. To Jnanadeva, God is the ocean of Love as we find in the description of the first chapter in the Amritanubhava, and human life is meant for tasting this ambrosia of Experience.

Bradley and Jnanadeva

The Philosophy of Jnanadeva can be compared to that of Bradley— the modern Absolute Idealist. Both of them regard Experience as the Ultimate Reality and try to determine its nature by analysing it. In his "Appearance and Reality" Bradley starts with a critical examination of the various ways of accepting Reality. Primary qualities, secondary qualities, time, space, -all are examined and found to be self-contradictory. Although this critique of Bradley discredits most of the categories of commonsense and philosophy, and compels us to relegate them to "appearance" as distinguished from Reality, the result is not wholly negative. Bradley positively discovered that "Ultimate Reality is such that it does not contradict itself." It is self-consistent. Secondly it must contain appearances. Thirdly, Reality must be one and fourthly it is sentient Experience. "There is no being of fact that outside of that which is commonly called psychical existence." There is but One Reality and Its being consists in Experience.

24 Gatha of Jnanadeva Abg
बापरकमादेवीवर हुदयोचा जाणुनि।अनुभव सोरसु केला।
25 Bradley - Appearance and Reality p. 120.
26 Ibid p. 127.
27 Ibid p. 403
बुद्धि बोध्या सोके।ते येवदी वस्तु चुकेत्त
So behind the destructive criticism of Bradley there is a vision of Reality as a harmonious undivided whole of experience. The experience is a whole which is not merely reason or thought but also feeling and willing, all of which remain merged in one undifferentiated Absolute. Both Bradley and Jnanadeva maintain that thought cannot grasp the nature of the Absolute. 28 Jnanadeva tells us that the Reality is non-duality whose nature is to manifest itself in duality. 29 To Bradley this duality or appearances are fragmentary and full of contradictions. Jnanadeva looks to these appearances from a different angle of vision. Unity enjoys its own reflection in duality. So according to him, the status of duality or diverse phenomena is more significant than Bradley believes. Shāmkar regards diversity as illusory, Bradley gives it more prominence and says that Reality appears through appearances. Jnanadeva goes a step further and brings out fully their real significance. Every appearance, according to him, is surcharged with divine immance.

Bradley recognises the feeling aspect of the Absolute but he does not say anything more than that the Absolute must also be emotionally satisfying, that there must be the absence of pain and a balance of pleasure. Jnanadeva, on the other hand, brings out fully the implication of this side of the Absolute and shows how Love is its very essence.

Again the philosophy of Jnanadeva is the outcome of a profound religious experience. Bradley had no close or vital relation with religious matter and what he says about it is the product of an "arm-chair thinking." 30

CHAPTER XII

JNANADEVA'S PLACE IN THE HISTORY OF INDIAN PHILOSOPHY

Nagligence of Jnanadeva's philosophy.

The various historians of Indian Philosophy like Dr. Radhakrishnan and Dr. Dasgupta do not mention Jnanadeva because they have relied upon Sanskrit works only. Jnanadeva has written all his works in Marathi and hence his name is neglected by these writers. The significance of any philosophical system does not depend upon the language in which it is couched but upon the vitality of its meaning. Jnanadeva has purposely written in Marathi. In a democratic spirit he wished that his message should be understood by a Pandit as well as a layman. He was proud of his mother tongue and said that his Marathi words are more sweet than Sanskrit words.\(^1\) It is not the expression of a vain glory but a real utterance. Both Jnaneshwari and Amritanubhava are written in Ovi meter. Jnanadeva’s Ovi is incomparable. Prof. Patwardhan is thrilled by its beauty and cadence. He says:— “With Jnanadeva the Ovi trips, it dances, it whirs, ...... it takes long jumps, it halts and sweeps along, evolves a hundred and one graces of movement at the master’s command. In the music of sound too it reveals a mysterious capacity of manifold evolution.”\(^2\) The Amritanubhava is a purely philosophical work and hence these literary excellences are found there in a lesser degree than in

---

2. Prof. W. B. Patwardhan— "Wilson Philological Lectures"— quoted in Prof. R. D. Ranade’s "Mysticism in Maharashtra" p. 36.
the Jnaneshwari. Still we find there beautiful similes and literary graces through which the author has tried his best to make the subject as interesting and as lively as possible.

The culmination of Indian idealism

The dominant note of Indian philosophy is idealistic. This idealism has its source in the Upanishadas. Aruni and his disciple Yajnavalkya were the prominent teachers of Idealistic monism. The cardinal principle of the idealism is the spirituality of the Real. Yajnavalkya interpreted Spirit or Atman as the Pure Intelligence—the ontological substratum of all existence as well as the epistemological nucleus of all knowledge. Later on Shamkar accepted the same interpretation but regarded the manifestations of the Pure Intelligence as illusions. His Idealism was Absolute but one sided. Kashmir Shaivism tried to correct this defect and regarded Maya as the power or the dynamic aspect of the Ultimate Reality. Jnanadeva has endorsed both the aspects of the Absolute i.e. Knowledge and Power but introduces a new element in his theory. He draws attention to another—more vital aspect of the Absolute. That aspect is the emotional one. The Absolute is not mere knowledge and will but affection or love, The Absolute is a person in a higher sense. He is the Shiva, the blessed Divine who loves to manifest Himself as the knower and the known. In this way the Whole is the Experience saturated with Love Divine. Thus Idealism of Jnanadeva is the mature fruit of Upanishadic Idealism and deserves an important place in the history of Indian Idealism.

4. Dr. M. N. Sarkar - Hindu Mysticism- (Studies in Vaishnavism and Tantricism) "Hegel speaks of Absolute Life as the eternal play of Love with itself " p. 159
Ethical teaching

The ethical teachings of Jnanadeva are in consonance with his metaphysics. The world, being divine manifestation, is not to be despised. Hence Jnanadeva does not teach the gospel of renunciation. One should not give up one's duties but should do them in a spirit of worship. Every act should be performed in an attitude of prayer. The world is neither something heneous nor the object of mere sensual enjoyment. Every object is surcharged with divine significance. The Ideal man of Jnanadeva is One whose heart overflows with divine Love at the sight of any object in the world.
Religion of love

The religious implications of Jnanadeva’s philosophy are also of great importance. With him the God of religion and the Absolute of Philosophy are identical. The ideal of life is not Moksha or liberation but Bhakti or the realization of Love Divine in this very life. Rituals or Yogic practices are of no use. Our life is not something sinful or a degradation of the Absolute but the medium through which Divine Love experiences itself. To know this, to remember this with longing is the way of intermingling our little self with the Divine. This is the highest summum bonum of life which is within the reach of any human being. No barriers of caste or creed, time and space hinder his way. In this way the Philosophy of Jnanadeva is the bed rock on which the lofty and noble temple of Bhakti cult in Maharashtra is erected.

Influence on later writers.

The influence of Jnanadeva upon the writers in the later period was profound. Namadeva was his contemporary who was greatly influenced by Jnanadeva’s philosophy as was the latter by his devotion. The Abhangas of Namadeva bear

8 योग याग विधि येषें नोहे सिद्धी ।
वायाचि उपाचि तं सिद्धम् ॥ Haripatha 5 ॥

तैसा पाग तथा भोगा । अवधारी जो ॥ Jnaneshwari XVIII, 1138,
10. Amt. IX, -29.
testimony to his assimilation of the philosophy of Chidvilas. In one of the religious lyrics Namadeva says:—"He (God) gave birth to Himself out of his own sweetwill." 11 Ekanatha was a great devotee of Jnanadeva who carried out the same line of teaching. His famous commentary upon the eleventh chapter of Shri Bhagawat Puran bears the stamp of Jnaneshwari and his "Hastamalak" and "Swatmsukha" show the influence of the Amritanubhava. 12 Tukaram who is rightly regarded as the pinnacle of the temple of Bhagwata Dharma has absorbed Jnanadeva's teachings and explained them in his own way, e. g. he seems to have summarised the whole chapter of the Amritanubhava on the refutation of Ajnana in one of the line of his Abhangas, where he says, "People look out for darkness taking a torch in their hand. How strange is their notion that they will meet darkness in this way." 13

No influence of Jnanadeva is found upon Ramadasa who was more orthodox and accepted Shamkar's Mayavada. The name of Jnanadeva is not even mentioned in his works. An indirect reference is found in his Dasbodha, 14 where he describes the miracle of the movement of an inanimate object. This, certainly, refers to Jnanadeva who is said to have performed the miracle by his Yogic powers, of moving wall, when Changadeva had come to see him. Ramadasa is not showing his respect to Jnanadeva but rather is inclined to belittle him.

11. आपलीच आबडी घरली बेठिया आपणांते व्याले रे.।—नामदेव
आबडी घरोनी आलेली आकार।केला हा पतारा बाजसाठी।।—तुकाराम

13. दीप बेडनिया बुंबडी अंबार,। मेटे हा विचार बघटित।—तुकाराम

The universal significance of Jnanadeva's philosophy

We have so far dealt at some length with the salient features of Jnanadeva's philosophy. We have seen how 'Chidvilas' theory propounded by him is his notable contribution to Indian Philosophy by a scheme of Idealism which must always remain one of the greatest achievements of human mind. The blend of Bhakti, Jnana and Karma was adumbrated by Jnanadeva into a consistent and an all embracing philosophy. It stressed the feeling aspect in philosophy without the loss of intellectual heights attained by philosophers who laid stress purely on the aspect of Jnana. It is interesting to note that this blend had its natural effects in liberating the conative forces which were so far inhibited by the over emphasis on purely Jnana aspect of Reality. This new outlook was also responsible for an entire change in the attitude towards the worldly things. World, the existence of which no person could deny or refuse to take into account, whose living and active presence was equally felt and experienced by both the learned and unlearned and which had the capacity to stir the highest emotions and stimulate the passions of deepest die, was required to be regarded as a mere appearance. This the common man could not do. Naturally philosophic thought became alien and strange to him and philosophy became the pursuit of a few. This in turn made philosophy more and more unrealistic. The philosophic thought was in the main moving in the grooves of Shamkar's Philosophy. Jnanadeva tried to change this course of thought.

The dynamic aspect of Jnanadeva's philosophy consists in his recognition of feeling aspect in philosophy pari passu with the aspect of Jnana and Shakti. This dynamic nature is further accentuated by his adoption of a healthy, positive and realistic
outlook of looking towards the objects in the world. For him the world is not a mirage or a cobweb of human imagination. According to his teachings God takes delight in manifesting in and realizing Himself through the infinite variety of forms of existence. Every form of existence, therefore, becomes at once endowed with the wealth and beauty of the Infinite. Again the relation of the ultimate Reality or God with our finite-selves is one of deep sympathy and love. God is regarded as the embodiment of love. Hence to know him is to love Him, and this love is the inspiration of noble deeds and the highest social service. So the philosophy of Jnanadeva has not only a considerable historical importance but there are also elements in it that have a lasting universal significance.
THE AMRITANUBHAVA

( An English Rendering )
The Invocatory Sanskrit Verses

1 I take shelter in the deity, who is well-known as the glorious Nivrittinatha, who is indestructible, indescribable, the bliss itself, unborn and imperishable.

2 I pay my homage to the very Divine Wisdom who showers blessings, who is known in the world as Guru (the spiritual teacher), whose command is ever victorius and who overflows with compassion.

3 Shiva and Shakti are identical but frequently appear as two. So it is not possible to know whose half part is united with that of the other.

4 I bow to the parents of the worlds, who reveal their essential unity to each other, so that I may understand the same.

5 I respectfully salute the Perfect Shambhu who is the cause of the beginning, preservation and the end of the world, who is the manifestation of the beginning, middle and the end and who is the dissolution of the three.
CHAPTER I

The union of Shiva and Shakti

1 Thus I have paid my homage to the God and Goddess who are limitless primal parents of the universe.

2 On the charming spot, the Lover Himself, out of overflowing love, becomes the Beloved who is made up of the same flesh and who eats the same food.

3 Out of deep longing they swallow each other and again emit each other because they like to be two.

4 They are neither completely identical nor completely different. We do not know their real nature.

5 How strong is their desire to enjoy themselves! They become one through it and never allow their unity to be disturbed even in jest.

6 They are so afraid of their separation that though they have given birth to the child in the form of the universe, their duality is not disturbed.

7 Even though they perceive the animate and inanimate nature emanating from them, they do not allow any third object to touch them.

8 They are seated on the same ground (existence) and they wear the same ornament of light (knowledge). From time immemorial they dwell happily in union.

9 The difference itself, that tried to discover duality for enjoying it, was abashed to see their intimacy and merged itself in their sweet union.

10 It is through God that the other is Goddess and without her the Lord is no where. As a matter of fact their existence is due to each other.
11 Oh! How sweet is their union! The great world is too small for them to live in, while they live happily ever in the smallest particle.

12 They treat each other as their very life and they do not create even a blade of grass without their mutual help.

13 These are the only two inmates of the home of the universe. When the Lord goes to sleep, the mistress remains awake and herself plays the part of the both.

14 If either of them happens to wake up, the whole house is swallowed up and nothing is left behind.

15 Each became half part of the whole for the process of diversity. Both are trying to melt their forms into one.

16 Both of them are objects to each other. Both are subjects to each other. Both are happy in each other's company.

17 Shiva alone lives happily in the nominally different forms of male and female. The whole universe is due to the coupling of the half part of each.

18 Two lutes produce one musical note. The flowers are two but the fragrance is one. Though lamps are two the light is one.

19 Two lips utter but one word and two eyes give but one vision. In the same way the two (Shiva and Shakti) create one world.

20 So the eternal couple manifesting duality is enjoying the dish of the same flavour.

21 The chaste and well devoted Shakti cannot live without her Lord. Without her the all-doer has no existence
22 The two cannot be distinguished because the appearance of her Lord is due to her while her existence is due to him.

23 We cannot distinguish sugar and sweetness, camphor and fragrance.

24 While trying to gather the rays we get hold of the flame itself. We get Shiva while trying to catch hold of her essence.

25 The sun shines on account of his lustre, but the essence of luster is nothing but the sun. So the One Supreme Beauty shines swallowing all the difference.

26 An object is the cause of its reflection. The reflection is the cause of the inference of the object. (The one object appears as an object and its reflection) In the same way the one Reality shines as two.

27 The essence of all void became Purusha through her, while the Shakti got her peculiar existence through the Lord.

28 Shiva Himself formed His beloved without whom Shiva loses his own personality.

29 Her form is the cause of God and His glory manifested in the process of the world. But Her form itself is created by Him out of Himself.

30 Blushing at her formless husband and her own graceful form, she adorned him with the ornament of names and forms as great as the universe.

31 There was scarcity even of unity. But she, the fortunate one, playfully presented the rich manifold of the world.
32 She manifested the glory of her Lord by melting her own body, while by contracting himself he made her wellknown.

33 He assumes the form of a seer through his love to see her. If he fails to see her he throws himself away.

34 He assumes the form of the universe through her importunities and he is left naked without her.

35 He is so subtle that he is not visible though manifest. He assumed the form of the universe through her grace.

36 The Shiva awakened by her, is satisfied when he eats the dishes in the form of the objects that are perceived as well as one who serves him.

37 When her husband is asleep she gave birth to all the things living and non-living. When she takes rest the husband himself vanishes.

38 When the husband hides himself, he is not discovered without her. Both of them are like mirrors to each other.

39 Shiva enjoys his own bliss by embracing her. Though he is all enjoyer he enjoys nothing without her.

40 She is his form while her beauty is due to him who is her lover. They are enjoying the feast by intermingling with each other.

41 Shiva and Shakti make up one whole just like air and its motion, gold and its lustre.

42 Shakti is inseparable from Shiva just like the musk and its fragrance, fire and its heat.

43 If night and day would go to the abode of the sun, both of them would vanish. In the same way their duality would vanish in their real essence.
As a matter of fact, Shiva and Shakti (because of their duality) are antagonistic to the state from which the sprout of Pranawa (the letter Om) springs.

Jnanadeva says, "I show my respect to the couple of Shiva and Shakti who by swallowing the sweet dish of name and form, enlighten the underlying essence."

By embracing each other both of them merge in one unity, just as the darkness of night is transformed into light at the break of day.

Para with Vaikhari remains silent in the process of discovering their real nature, just as the ocean merges along with the Ganges in the water of Pralaya.

The air with its motion merged in the sky. The sun with its lustre is merged in the light of Pralaya times.

In the same way while trying to see them, the seer and his sight vanish. I pay homage to the inmates of the universe again and again.

Both of them are like a stream where not only the knower cannot drink its water in the form of the known but also throws himself away.

Under these circumstances if I remain separate to pay my homage, it would be a meaningless verbal separation.

But my salutation is like that of an ornament which is not different from gold and yet worships it.

When the word 'tongue' is uttered by the tongue, is there any difference between the word and the object meant by it.

The Ocean and the Ganges intermingle and though their names are different, would there be any difference in their waters?
The Sun shows in himself the object as well as the subject of illumination, yet he does not lose his singleness.

If the moonshine enlightens the surface of the moon, or a lamp is enmeshed in its rays, is there any degradation?

When the lustre of a pearl plays upon it, its beauty and purity is enhanced.

Is Pranava (the letter Om) divided into different parts because it contains three components? Or is the letter ‘N’ divided into three parts because it is formed of three lines.

If the capital of unity is not lessened and the advantage of gracefulness is obtained, why should not water smell the buds of flower in the form of its own ripples?

Therefore, without differentiating Shiva and Shakti, I proceed to bow to them in this manner.

By giving up the mirror, the image merges in its object. A ripple vanishes when the air is still.

A man comes to his own as soon he wakes from his sleep. In the same way I have bowed to the God and Goddess by giving up my ego.

The salt giving up itself becomes the ocean, so giving up my ego I am united with Shiva and Shakti.

I have paid my homage to Shiva and Shakti by uniting with them just as the inner empty space of the plantain tree is united with the outward one.
CHAPTER II

Paying Homage to Shri Nivrittinatha

1. Now (I bow to him) who is the spring to the garden of spiritual endeavours, an auspicious thread of Divine Command and though formless the very incarnation of compassion.

2. He, who mercifully runs to help the Pure Consciousness who is experiencing the selfhood by wandering in the wilderness of Avidya.

3. I bow to the spiritual teacher Nivritti, who by killing the elephant in the form of Maya, offers him the dish of the pearls taken from its temple.

4. By whose glance the bondage is turned into liberation and the knower realizes himself.

5. He makes no difference between great and small in distributing the gold of liberation, He is the cause of the knower's vision.

6. As for his powers, he surpasses even the greatness of Shiva. He is like a mirror in which Atman sees his own bliss.

7. It is through his grace that the scattered digits of the Moon of spiritual knowledge are brought together to form the play of full moon night.

8. All the efforts of the spiritual aspirant cease as soon as he meets him (the spiritual teacher.) He is like a sea where the Ganges in the form of activity ceases to flow.

9. In his absence the seer wears the lovely ornament of appearance. All the diversity disappears as soon as he appears.
The darkness of Avidya is transformed into the blessed daylight of self-knowledge at the touch of the Sun of his grace.

By the water of his grace the individual self becomes so pure that he regards even the state of Shiva as impure and does not allow himself to be touched by it.

He gave up his greatness to save his disciple yet his real greatness does not forsake him.

There was no happiness in being alone. So the Pure consciousness sees Itself assuming the forms of a teacher and a disciple.

By the sprinkling of whose grace the poison of Avidya is turned into the nectar of infinite knowledge.

His insight swallows the knower himself as soon as it embraces the knowable. Still it does not become impure.

With his help the individual self attains the status of Brahman while if he is indifferent the Brahman becomes more insignificant than a blade of grass.

Those who faithfully endeavour and regard his will as all in all, gain the ripe fruit of their efforts.

Unless the spring of his graceful glance touch the garden of the Vedas, the aspirant does not get his own fruit in his hand.

By casting his glance he causes the appearance to recede and vanish. Though his conquest is great he does not call it his own.

He has attained the greatness of a spiritual teacher through the unworthiness (of his disciple). He is so fortunate as to destroy that which does not exist!

He is like a solid substance which saves any one from drowning in the water that does not exist, and the individual thus saved remains no where.
22 The ordinary sky (ether) with its component parts cannot equal Him who is like a spiritual sky that is ever full.

23 The moon with her cool rays is formed out of his light. The brilliance of the Sun is due to a ray of his light.

24 He is like an astrologer to whom even Shiva, who is tired of assuming the form of an individual self, asks for the auspicious moment to regain his own status.

25 He is like the moon whose manifest form is not diminished by wearing the apparel of her own light that enhances her lustre.

26 Though manifest he is not seen. He is light and yet does not illuminate. He exists and yet is no where.

27 How many groups of inferences should I put forth by using the words 'He' and 'Who'? He does not answer to any mode of proof (i.e. He is beyond various proofs.)

28 He is indescribable in words which become silent in his oneness that tolerates no duality.

29 The object of valid knowledge reveals itself when all kinds of Pramanas (means of valid knowledge) cease to exist. His liking for non-existence is wonderful.

30 If we wish to have a little glimpse of Him at any time, the seeing itself is a pollution in His Kingdom.

31 Under these circumstances how can I enter His kingdom by praising or talking about Him. He has merged his name by assuming it.

32 The Atman (Shri Guru) does not proceed towards Himself. How can he recede also? However he does not give up the illusory screen of his name (i.e. Nivritti).

33 How can he destroy anything if there is nothing to be destroyed? How he can be called Nivritti?
When did the Sun perceive the darkness? Yet he is called the enemy of darkness.

That which is illusory becomes real, that which is inanimate becomes animate and impossible events become possible through his wonderful sport.

(Oh Shriguru), Thou showest the appearences through thy wonderful power and rejects them because they are mere appearences. Thou art beyond appearences and art not the object of any kind of perception.

Ah! Sadguru! How should I treat thee who art so mysterious? Thou doest not allow thyself to be determined by any conception.

Thou hast raised so many names and forms and hast destroyed them through the force of thy power, yet thou art not satisfied.

Thou doest not allow thy friendly relation to any one without sacrificing his individuality. It is not proper to say that the servant looses himself and becomes a master.

If we try to apply Him a particular designation he does not even bear the name Atman. As a matter of fact He does not like to become any particular object.

There is no night to the Sun; the salt is dissolved in water; sleep vanishes when the person wakes up.

The objects of camphor do not remain in the presence of fire. In the same way the name and form vanish in his presence.

When I try to bow him, he does not remain before me as the object of my salutation. He is not persuaded by any mode of difference.

The sun does not cause its own rising. So He does not become the object to my salutation.

By whatever means no one can place himself in front of him. In the same manner he has taken away his state of being the object of worship.
46 No reflection is seen in the mirror of the sky. In the same way he is not the object of salutation.

47 Let him not be an object of worship. Why should I feel it as something uncanny? But he does not leave any trace of the person who goes to salute Him.

48 When the outer end of the hem of any garment is unloosened the inner hem is unloosened without any effort.

49 Or, as the reflection vanishes along with the relative objectivity of the original object, so the personality of one who salutes is taken away by him along with his own state of being the object of respect.

50 The sight is of no use where there is no form. We are placed in such a state by the grace of His feet.

51 The burning flame of a lamp is sustained by the combination of the wick and oil. It cannot be sustained by a piece of camphor.

52 As soon as the two (i.e., the camphor and flame) are united both of them vanish simultaneously.

53 In the same way as soon as I see Him both the worshipper and the object of worship vanish like dreams in the state of waking.

54 In short, by using these words I have done away with the duality and paid the respectful homage to my dear companion in the form of shri Guru.

55 Oh! How wonderful is his friendship. He has made conspicuous the duality of the master and the disciple where there is no room even for oneness.

56 How is his intimate relation to himself without the existence of any other? He is not and does not become different from Himself.

57 He becomes as great as the sky including within Himself the whole universe. He bears the night in the form of non-existence.
58 The ocean is the ground of fulfilment yet it is difficult
to be fulfilled. So in the residence of Guru contradic-
tions live happily.

59 There is no intimacy between light and darkness. yet
both of them become one in the sun.

60 Difference arises even if we call it one. How can it be
differentiated in various forms? Will the contradictory
things contradict themselves?

61 Therefore, the words master and disciple mean but
one Reality and the master alone lives in both the forms.

62 Both gold and an ornament abide in the same gold or
the moon and its light abide in the same moon

63 Or, the camphor and its fragrance are nothing but com-
phor, sugar and its sweetness are nothing but sugar.

64 So, though master and his disciple appear as two, the
master alone enjoys himself under the guise of the two.

65 The face, knowing itself, reconizes that it alone is reflected
in the mirror and is itself the original object.

66 The person who is asleep in the place where there no
one else, is alone without any doubt. He is both the
awakened and the awakener.

67 Just as, in the above instance, the awakener and the
awakened one are the same, so in this case it is he who
gets knowledge as well as he who imparts it. In this
way he upholds the relation of the master and his
disciple

68 If without the aid of a mirror, the eye could enjoy
its own meeting, I would be able to describe this sport
of Guru.

69 Thus He is nourishing the deep intimacy without cau-
sing duality or disturbing unity.
Nivritti is His name; Nivritti is his splendour. Nivritti is the the glory of His kingdom.

This Nivritti is not like the word Nivritti which is used in opposing the action and understanding the state of non-action.

The so called Nivritti is brought forth by Pravritti which sacrifices itself just as the night by sacrificing itself brings forth the day light. He is not like this Nivritti

He is pure and supreme sovereign and not like a jewel whose lustre shines with the help of the other substance.

When the moon pervades the whole sky by spreading its light, the beauty of her own disk is enhanced by herself.

So Nivritti Himself is the cause of his being Nivritti. He is like a flower turned into a nose to smell its fragrance.

Is it required to search for mirrors if the eyesight is able to turn back and see the fairness of the complexion?

When the night is gone and the day comes to light is it necessary for the sun to try to become himself?

He is not like an object of knowledge requiring various proofs. He is Guru without any doubt.

In this way I have paid my homage to the holy feet of Guru whose actionlessness is absolute without the slightest touch of action.

Now, Jnanadeva says that by this salutation to Shri Guru he has discharged the debts of four kinds of speech (Para, Pashyanti, Madhyama and Vaikhari)
CHAPTER III

Discharging the Debt of Speech

1. The sleep of the Atman is dispelled by their (i.e. of four kinds of speech) calling aloud, but the debt is not fully discharged because the awaking itself is a kind of sleep.

2. As a matter of fact the four, i.e. Para and others, useful for the salvation of the individual self. With the distruction of Avidya these are also destroyed.

3. As hands and feet disappear along with the death of the body or as the subtle senses depart along with the mind or as the rays disappear with the sun.

4. Or again as the dream vanishes before the sleep comes to an end, so these (four kinds of speech) disappear along with Avidya (with whom they are intimately connected.)

5. The iron that is burnt lives as Rasayana or as the burnt fuel lives as fire.

6. Salt is dissolved in water but lives as taste, sleep is destroyed but lives in the form of wakefulness.

7. So, though the four kinds of speech are destroyed with Avidya, they come to life in the form of the knowledge of Reality.

8. These should light the lamp of knowledge by sacrificing themselves but this knowledge is a futile exertion.

9. The sleep, when it comes, shows dreams and when it is gone, makes the individual conscious of himself. It is sleep that causes both.

10. In the same way when living, Avidya is the cause of false knowledge and when dead, it arises in the form of real knowledge.
But whether living or dead this Avidya entangles the individual by binding him with the so called freedom or bondage.

If the freedom itself is a kind of bondage why the word freedom should be applied to it?

A child is satisfied by the death of a bug-bear. It does not even exist for others. So how should they believe its death?

Can we call him wise who deplores the loss of breaking the jar which does not exist?

Therefore, if the bondage is unreal, how can freedom arise. But Avidya makes room for it by its self-destruction.

And Sadasiva, in his Shiva-sutras, has said that knowledge itself is a bondage.

It is not that we accept this because it is said by Shiva or Shrivallabha (Krishna). It can be understood even if they had not said.

The wise one of Vaikunth i.e. Shri Krishna has elaborately explained how the quality of Satwa binds one with the bonds of knowledge.

If the Atman, which is pure knowledge itself, requires the help of another knowledge, would it not be like the Sun thinking about the help of the other light.

The Atman’s state of being knowledge itself becomes meaningless if its greatness is due to the knowledge other than itself. If one lamp desires another lamp to enlighten it, it is as if it has lost itself.

Would it happen that a person ignorant of his own presence, would wander over various contries in search of himself?

How can a person would say that he was very glad to remember himself after so many days?
So if the Atman, who is pure knowledge himself, thinks that He has real knowledge of himself and says, "I am He", it would be a bondage.

Such knowledge, which is bondage, is very undesirable because the original knowledge itself is merged and gives rise to the so called freedom.

Therefore the four kinds of speech, which are ornaments of four bodies, vanish along with the Avidya when the egoism of the individual self is destroyed.

When Avidya, being dejected, enters the fire of knowledge along with her organs, the ashes of understanding only remain.

When the camphor is dissolved in water it is not visible but remains as the fragrance in water.

When the ashes are besmeared to the body its particles are brushed away but it remains in the form of a white luster.

The waters of a stream that has ceased to flow does not remain in the form of a current but it exists in the form of the moisture in the soil.

At the noontide the shadow of a person is not visible but it remains under his feet.

So the understanding, that swallows every thing other than itself, is merged in the Ultimate Reality but remains in its own form.

The four kinds of speech are unable to discharge this debt fully even by their self-sacrifice. I have discharged it by bowing my head to the sacred feet of Guru.

When the Para, Pashyanti, Madhyama and Bharati—the four kinds of speech are destroyed, they cling to the knowledge which is a kind of ignorance.
CHAPTER IV

Knowledge and Ignorance

1 Now by destroying the ignorance, knowledge reigns supreme like the wakefulness that destroys sleep.

2 Or a face enjoys the knowledge of its own identity which was already in existence but was due to its looking into a mirror.

3 In the same way the knowledge causes the understanding of the identity of the world and the self. But it is like piercing the knife with the another knife.

4 Just as a person who entering into a cottage, sets it on fire, and burns himself with the cottage or as a thief who enters into a sack and fastens himself in it, gets bound himself.

5 Or as the fire in its effort to burn camphor burns itself, so the knowledge attains the same condition by destroying the ignorance.

6 When the support of ignorance goes away the knowledge spreads to the extent of destroying itself.

7 When the wick of a lamp is almost burnt to the end, the flame is seen more bright. But this brightness is nothing but the extinction of the light.

8 Who knows whether there is the rise or fall of the breast of a woman or whether it is the blooming or fading of a jasmine bud. (They are so instantaneous)

9 The rise of a ripple is but its calming down, the flashing of the lightning is its disappearing.

10 In the same way knowledge drinks the water of ignorance and grows large to the extent of its own complete annihilation.

11 Just as the deluge of Pralaya engulfs both space and water and does not allow any thing to remain aloof.
12 Or when the disk of the sun becomes larger than the universe the darkness and the light is turned into the pure light.

13 Or after destroying the sleep the wakefulness destroys itself and remains in its pure form (where there is no consciousness of wakefulness.)

14 In the same way knowledge that shines by ignorance, is swallowed up by the Absolute knowledge.

15 At that time the Absolute knowledge is like the moon whose seventeenth digit remains constant without its light being enhanced by the full moon night or lessoned by the dark night.

16 The sun alone, who is never thrown into background by any other lusterous body and who can never be covered by darkness, bears comparison with it.

17 It is the Pure Knowledge itself that is not enlightened by any other knowledge or darkened by ignorance.

18 But can the Pure Consciousness be conscious of itself? Can the eye ball perceive itself?

19 Can the sky enter into itself? Can the fire burn itself? Can any person climb upon his head?

20 Will the eye sight be able to see itself? Can the taste have its own taste? Can the sound listen to its own noise.?

21 Can the sun enlighten himself? Can a fruit grow upon the fruit? Can a fragrance smell itself?

22 Therefore, that which is Pure Consciousness itself without the quality of being conscious, is not conscious of itself.

23 If the knowledge requires the aid of another knowledge, it is nothing but ignorance.

24 What is light is not darkness. But is it a light to itself?
(As in the above instance the light is neither darkness nor light) So He neither exists nor non-exists. Now by saying this He appears as non-existing.

Then if the situation is this that nothing exists, who knows that there is nothing?

But on what ground the theory of Nihilism is proved? It is an unjust imputation to the Ultimate Substance.

If the extinguisher of a light is extinguished along with the light, who knows that there is no light.

Or if a person gives up his life as soon as he gets a sleep, then who will know that sleep is nice?

A pot appears as a pot. If it is broken the condition of breaking also appears. But if it does not exist at all who would say unnecessarily that it is not?

Therefore he who perceives that nothing exists, does not himself become nothing. The Atman has a unique existence, beyond existence and non-existence.

The Ultimate Substance is neither an object to itself nor an object to any other. Is it the cause of regarding it as not existing?

A person asleep in a lonely forest was not perceived by any other. He was not also conscious of himself.

Still he does not become lifeless. Pure existence (of the Substance) is like this. It does not bear the discussion of existence or non-existence.

When the sight is turned inward, the state of its perceiving the objects does not remain, but it does not cease to exist and knows what happens.

A person of a dark colour stands in a pitchy darkness. Neither he himself nor others are able to perceive him. But he knows himself perfectly well without any doubt.
37 His existence or non-existence is not like that of a person. He exists in Himself in His own way.

38 The sky being clear (without any cloud) the appearance of its form disappears. No form is seen by an observer but the sky stands as it is.

39 The water in a tank, being crystal clear, looks as if it has disappeared. Though it appears in this way to others it exists perfectly as it is.

40 Thus the Absolute exists in itself and is beyond the ordinary conceptions of existence and non-existence.

41 It is like the wakefulness where there is no trace of the consciousness of the sleep that has vanished and the consciousness of its own existence.

42 When a jar is placed upon the ground it is called the ground with a jar and when it is taken away it is called the ground without a jar.

43 But when both these conditions do not exist the ground exists in its pure state. The existence of the Absolute is a pure existence like this.

CHAPTER V

Existence, Knowledge and Bliss

1 The three attributes, existence, knowledge and bliss are incapable of exhaustively determining the Ultimate Reality. A poison being itself a poison is not the poison to itself.

2 Lustre, hardness and yellowness together constitute gold; Viscosity, sweetness and mellifluity together constitute nectar.

3 Whiteness, fragrance and softness, these three without being three separate things are only the camphor.
4. The colour of the camphor is white; that which is white is soft; or it is not these two, but the fragrance only.

5. Just as the three qualities mean but one thing like a camphor and do not point to the existence of the triad, similarly the three i.e., existence and others, are merged in one Reality.

6. As a matter of fact the three words existence, knowledge and bliss are different. But the triad is merged in one Bliss.

7. Existence is bliss and knowledge or is knowledge existence and bliss? This cannot be distinguished like the sweetness of a nectar.

8. The sixteen Kalas of the moon appear as increasing night after night in the first fortnight, but the moon is as it is in itself, perfect at all times.

9. When the water is falling in the form of drops, we can count them. But we cannot do so when there is all water, without separate drops, on the ground upon which it falls.

10. In the same way the Shruti calls It existence in order to ward off Its non-existence. It is called knowledge to keep it away from materiality.

11. The breath of the Lord i.e. the Vedas declare It to be bliss because there is a complete annihilation of pain.

12. Non-existence and others are counter-correlatives to existence and others. The latter are used to differentiate It from the former.

13. Thus the word Satchidananda applied to Atman, do not denote Its nature but differentiates It from its opposites.

14. Will the material objects that are enlightened by the Sun, be able to enlighten the Sun himself?

15. So, how the organ of speech will enlighten that by the light of which the organ itself knows its object?
16 What means of valid knowledge will be useful to the self-illuminating Atman who is not an object to any one and has no knowability?

17 The means of valid knowledge is limited by the object of knowledge. It is of no use in the case of the Substance which is self-evident.

18 Thus if we try to know the Substance the knowledge itself is, as a matte of fact, the Substance, Then how can the knowledge and the known would remain different?

19 So the words, existence, knowledge and bliss do not denote the Substance, but they are the residues of our thought.

20 Thus those well-known words, knowledge, existence and bliss become current, but when they are united harmoniously to the knower--

21 --they vanish at that time like the clouds that shower rain, or like the streams that flow into the sea or the paths that reach the goal.

22 A flower fades after giving rise to a fruit or a fruit is lost after giving its juice and the juice itself does not remain after giving satisfaction.

23 Or the hand of a sacrificer is drawn back after offering oblations; or a melody ends after giving rise to a pleasurable sensation.

24 Or a mirror disappears after showing the face its own reflection or a person goes away after awakening one who was asleep.

25 Similarly the three terms knowledge, existence and bliss after causing the Seer to see Himself, become lost in silence.

26 He is not that whatever we may speak about Him. It is not possible to speak about His real nature as it is
impossible to measure the height of one who measures, by the length of his shadow.

27 But when the person who measures becomes conscious of himself he feels abashed and gives up the act of measuring his shadow.

28 The existence naturally cannot be non-existence. Then can that existence be even called existence?

29 And can that which has become intelligence by destroying the non-intelligence be even called intelligence?

30 When there is the complete wakefulness, then it is no sleep or awakening. So there is no intelligence in the Pure Intelligence.

31 Being the bliss itself there is no feeling of unhappiness. So can that be even called the bliss?

32 Therefore, existence has vanished along with the non-existence, the intelligence along with the non-intelligence and bliss along with the misery. Nothing remains at last.

33 Now, renouncing the curtain of duality and pairs of opposite conceptions, it remains alone in its own blessedness.

34 If it is counted as "One" it becomes the other than one who counts. So it is one absolutely though not numerically.

35 One who remains outside the bliss can enjoy the bliss. Being bliss itself how can it enjoy itself?

36 At the beating of the drum of the Goddess, she enters the body of her worshipper. But when there is no worshipper she does not enter the sound of the beating itself.

37 In the same manner He, being bliss himself, cannot experience His bliss and for the same reason, He does not know that He cannot.
38 Without looking into a mirror the face is neither in front of it or behind it. In the same way He is not happiness or misery but pure bliss itself.

39 Giving up all the so called illuminating theories like irrelevant talk in a dream, He conceals Himself even from His own understanding.

40 Before a sugar-plant is planted the juice exists (in its own pure state) but its sweetness is known to that juice itself.

41 Or before the The Vina (musical instrument with strings) is struck, the sound is dumb (i.e. inaudible). It is only audible to itself in that state.

42 Or before entering the interior part of a flower, the fragrance has to act as a bee to appreciate its smell.

43 The flavour of a food which is not cooked as yet, cannot be known to others except to the flavour itself.

44 So can that, which is bashful to enjoy itself by manifesting its blissfulness, be tasted or experienced by others?

45 When the moon is in the sky at noonday her presence is known only to herself.

46 It is like beauty that has not yet assumed any form, youth without the birth of the body, religious merit before the performance of any ritual.

47 It would happen if the mind, before the springing of its sprout, would be intoxicated by the sexual desire in that condition.

48 Or the talk about the sound of the musical instruments that are not constructed as yet and so invisible, would be understood by that sound only.

49 Or the fire, utterly avoiding the contact with any fuel, has the contact of itself only.
Those only would understand the secret of the self-evident Reality, who are able to perceive their face without the help of a mirror.

Talking in this way is as plain as talking about the harvest in a storage without even sowing its seeds.

So the Pure Intelligence transcends generality and pertiallarity, ever enjoying itself.

Now, after this that talk is wise which has drunk deep the draught of silence.

In this way the various modes of proof have accepted their own inability to prove and analogies have solemnly declared their inability to illustrate the Reality.

The various arguments have dissolved themselves because of their own invalidity. The assemblage of definitions has also dispersed.

The various means have gone away becoming futile. The experience has given up its object.

Here the thought along with the decision is extinct like a courageous warrior in the cause of his master.

And the understanding, being ashamed of its quality of knowing, caused its own destruction and there the experience being left alone became as if crippled.

If the crust of a piece of a tale is peeled off the tale itself disappears.

Or if the inner core of a plantain tree gives up the coverings because it is troubled by heat, how it can be made to stand erect?

The experience is there because of the existence of its object and the subject. When both of them vanish can the experience alone experience itself?

Are the words of any use where the experience dissolves itself in this way?
63 How can words describe the Reality where the supreme speech itself disappears and no trace is found of any sound?

64 Why should there be any talk about waking a person who is already awakened? Does any one try to cook his food when he is satisfied by taking his meals?

65 When the sun rises the light of lamps fade. Do they use plough in the field when there is the harvest?

66 There is no cause of bondage and freedom. Nothing is left to be accomplished. There is only the pleasure of expounding.

67 When a thing is lost to us or to others in forgetfulness, it is regained by the word that reminds it.

68 If the word thus glorifies itself as a reminder, it has no other merit beyond this.

CHAPTER VI

Inefficacy of the Word

1 Indeed, the word, wellknown as a reminder, is a useful thing. Is it not a mirror that reflects the formless?

2 It is no wonder that the visible is seen in a mirror; But, that which is invisible is seen in this mirror of the word.

3 It (the word) is like a rising sun in the family of the descendants of the great Avyakta (the unmanifested Reality). The sky comes to be what it is through the quality of the word.

4 It (the word) itself is the flower of the sky, but it is the cause of the fruit in the form of the universe. There is nothing that cannot be measured by the word.
It is like a torch-bearer that lights the path of right and wrong actions. It is a judge that decides between bondage and freedom.

When it sides with Avidya the unreal appears as real, and the real becomes worthless.

Like an exorciser this word makes the finite selfhood enter into the body of Pure Shiva.

The word sets free the finite self entangled in the body. The Atman meets Himself by means of the word.

When the sun causes the break of day, he becomes the enemy of night. Therefore we cannot compare the word with the sun.

The path of action and actionlessness, though opposite are supported at the same time by the word.

It sacrifices itself to help the knowledge of the Atman. How should I describe the different merits of this word?

In short, the word is wellknown as a reminder. But here it can have no relation.

The word is absolutely useless in the case of the Atman that is self-luminous and stands in no need of any obligation.

There is no other thing besides the One Substance. Therefore it cannot be the object of remembering or forgetting.

How can one remind or forget oneself? Can the tongue taste itself?

There is no sleep to one who is awake. But is there even awaking? In the same way there is no remembrance or forgetfulness to the Absolute.

The Sun does not know the night. How can he be conscious of the day? In the same way the Substance is without memory or forgetfulness.
18 What is the use of the reminder when there is no memory or forgetfulness? So the word is of no use in the case of the Absolute Reality.

19 Another good result is obtained by means of the word. But I am afraid to think about it.

20 It is foolish to say that Avidya is destroyed by the word and then the Atman became conscious of itself.

21 The Sun will first destroy the night and then will rise. These false words would be unworthy to be uttered in the assembly of the wise.

22 Where is that sleep by which the awakened one is offended? Is their awaking that tries to wake up one who is already awake.

23 So there is no Avidya even for the sake of being destroyed There is no Atman that wants to enter its own state.

24 Avidya is non-existent like the son of a barren woman. Then what should the axe of right thinking cut into pieces?

25 If the rain-bow were real as it seems what archer would not have applied a string to it?

26 I would beat Avidya by logical thinking if the water in the mirage would quench the thirst of the sage Agasti

27 If Avidya were such a thing as to be destroyed by the word then why should not fire easily burn the imaginary city in the sky?

28 The darkness does not tolerate the contact with a lamp But is there really any thing to be destroyed before the lamp?

29 It is futile to light a lamp in order to see the day.

30 The shadow is not there where it does not fall. It is equally not really there where it falls.
It is known in the waking state that the dream which
was seen was false. So Avidya does not exist even though
it appears to exist.

What is gained by storing in a house the ornaments
created by the spell of a magician or by plundering a
person who is naked?

If the person were to eat imaginary dishes for a hundred
thousand times, it is nothing more than fasting.

The soil on which a mirage does not appear is dry. But
is the soil moistened where it appears?

If it (Avidya) were real as it seems, men would have
been drenched by the rain painted in a picture; fields
would have been moistened and tanks filled by it.

What necessity would there be to prepare the ink if one
were able to write by mixing up darkness?

Does not the sky appear as blue to the eyes? (but it is not
really blue) In the same way, you should know that the
appearance of Avidya is false.

The Avidya itself naturally declares by its very name
that it does not exist.

And its indefinableness implies its imaginary nature.
Avidya proves its own non-existence in this way.

If it really exists why does it not tolerate the determina-
tion of its nature by thought? The earth appears to be
marked if the jar really exists upon it.

It is not a right apprehension if it be said that the
Atman is revealed after the destruction of Avidya. It is
like the knowledge of darkness residing in the sun (that
is revealed after its destruction)

This Avidya is illusive but it conceals its illusive nature
It proves its own absence.
Thus, as it has been shown in various ways, Avidya is by its very nature non-existent. Then whom should the word destroy?

The ground only is struck if the shadow is vehemently struck Nothing but the arm is damaged by slapping the void.

If with a great thrill a person is ready to drink the water of a mirage, or to embrace the sky, or to kiss his reflection, all his efforts become vain. The logic that tries to destroy Avidya is in the same situation.

One who yet entertains a desire to destroy this Avidya, may leisurely take off the skin of the sky.

Or milk the nipple of he-goat or perceive by means of the knees, or form a tablet of an evening by drying it

Or by crushing a yawn he may take out the juice from it, and mixing it with indolence, pour it into the throat of a headless body-

He may turn the direction of the flow of a stream, turn over the shadow on the ground or prepare a rope of the wind.

He may beat a bug bear bind his own reflection in a garment, or happily comb the hairs on his palm.

He may destroy the non-existence of a jar, pluck the flowers of the sky or break with ease the horn of a hair.

He may prepare the ink from the camphor, gather soot from the lamp of a jewel, or happily marry the child of a barren woman.

He may nourish the Chakor Birds by the nectar-like rays of the dark moon, and may catch with ease the aquatic animals in a mirage.

What more need be said? Avidya is made up of non-existence. Then what should this word destroy?
The word cannot be a pramana by destroying that which does not exist, as the darkness cannot determine the nature of the darkness.

Avidya is never born. So arguing about its non-existence is like lighting a lamp at noon in a courtyard.

Those, who go to gather the harvest without sowing the field, gain nothing but shame.

He, who has resorted to a naked person, is as if sitting in his house without doing anything.

What is the use of waters showering upon waters? In the same way the illumination of the word is of no use in destroying Avidya.

A measure may glorify itself as a measure so long as it does not try to measure the sky. The birth of a light is futile if it can perceive darkness.

If the tongue can be able to taste the dish of sky, its name ‘Rasana’ (that which is the cause of tasting a flavour) becomes meaningless.

Will the ornaments of a woman whose husband is alive, be fit to be worn by her when he is no more? To eat the interior core of a plantain tree is to eat nothing.

What object is there—small or great—that is not illuminated by the sun? But even he is of no use in the case of night.

What is there that is not perceived by the eye—sight? But it cannot perceive the sleep that does not exist in a person who is wakeful.

If Chakora Bird will try to search for the moon at daytime, its effort will be utterly vain.

The reader of a blank paper becomes dumb. The person walking in the void becomes lame.

In the same way if words are ready to destroy Avidya, they become a meaningless prattle.
Does not the moon that is present at the new moon day spread darkness? The thought in trying to destroy Avidya is in the same situation.

It is nothing but fast to partake the food that is yet to be prepared. The person, looking with eyes that have lost its sight, is blind.

In fact, the word would destroy itself if it tries to explain the meaning of a thing that does not exist.

Now should I, indeed, say that Avidya does not exist? Nothing remains of the word that tries to destroy it.

If the thought stands in front of Avidya, it destroys itself along with it (Avidya).

So this Avidya by its own non-existence prevents the word to be a pramana by destroying Avidya.

And that the word should rise to greatness by showing the Atman, is quite contradictory.

Is there any country where a person has married himself? Is there any eclipse where the sun has eclipsed himself?

Will the sky set to meet itself? Will the ocean flow into itself? Will the palm touch itself?

Does the sun illumine himself? Does the fruit bear a fruit? Can a fragrance smell itself?

We can enable all the animate and inanimate objects to drink the water in a moment. But can we enable the water to drink itself?

Is there a single day among thirty six days that would cause the sun to see with his own eyes?

If the God of destruction is angry he will burn the three worlds. But will he burn the fire itself?

Is it possible even for the Creator to stand in front of Himself without a mirror?
83 It is certainly impossible for the eye-sight to see itself, for the taste to taste its own flavour, or for any one to awaken a person who is wakeful.

84 How is it possible for the sandle to smear itself, for a colour to colour itself, or for a pearl to adorn itself by another pearl?

85 Can gold be its own touchstone, a lamp its own illumination? Can a flavour enjoy its own sweetness?

86 The Almighty God Shankar held the moon on his head. But can the moon herself perch on her own head?

87 In the same way the glorious Atman is pure and perfect knowledge itself. So how can the knowledge embrace itself?

88 Being knowledge itself He does not understand to know Himself. It is as difficult as the perception of the eye by itself.

89 The knowledge would be able to know itself if the mirror would be able to reflect its own image.

90 A knife would be able to pierce a thing that is beyond all quarters by running towards it. But can it pierce itself?

91 The tip of a tongue is expert in tasting the different flowers. But can it taste itself?

92 But does its being as an organ of tasting a flavour cease on that account? It is not so because the tasting is immanent in it.

93 So the Atman, who is knowledge, existence and bliss, is self-evident. Now how can the word offer him that which is already his own?

94 The Ultimate Substance does not prove or disprove itself with the help of any means of knowledge. It is self-evident, self-existent and beyond proof or disproof.
It is therefore groundless to believe that the word can gain greatness by enabling the Atmam to experience himself.

The lamp lit up at midday neither dispells darkness nor spreads light. The condition of the word is the same (as it neither destroys Avidya nor illumines the Atman.)

Now Avidya, being non-existent, there is no destruction of it, and when Atman is self evident what is there to be proved by any means.?

Thus being futile both ways, the word disappears like a stream that is lost in the waters of the deluge.

Now the right thinking reveals that the word has no entrance howsoever in the Atman.

As it is meaningless to say that a bug–bear has come or the sky is hanging on the palm,

So the word with all its associates becomes a meaningless prattle like a picture with unnatural colours.

Now the knowledge and Ignorance whose very life pitiably depends upon the word, are as real as the forests in a picture.

As a cloudy day vanishes when the clouds pass away, so when the word is vanished in deluge it vanishes along with both the knowledge and ignorance.

CHAPTER VII

Refutation of Ajnanavada

But for the help of knowledge the very word ignorance would have concealed itself under the ear i. e. would never have been heard.

A firefly shines by entering into darkness (i. e. it has no real illumination) so the so called beginningless ignorance is utterly false.
The ignorance is great only in itself as a dream and darkness are great in themselves.

The horses of mud cannot be harnessed; or the magician's ornaments cannot be worn.

Though taken forcibly in the abode of knowledge the ignorance does nothing. Will there be any ripple of mirage in the moonlight?

And what is called knowledge is nothing but ignorance. Any one of them can be shown by concealing the other (because they resemble each other).

Let us discontinue this preamble. Let us, first search for ignorance. Then the falsity of knowledge will be understood by understanding the real nature of ignorance.

If the ignorance really lives in the knowledge, why does it not turn its dwelling (i.e. knowledge) into ignorance?

It is the inborn nature of ignorance to befool a thing in which it dwells.

Now if it be said that the sacred texts declare that the ignorance dwells in the Atman and envelops its resort,

(The objection can be answered thus) If the seed of ignorance dwells in the condition where there is no rise of duality then who knows that it exists?

The ignorance, being non-intellectual, cannot know itself. Can it be a proof to its existence?

So, no sooner it is said that the ignorance would cause its understanding than the very contradiction would compel the speaker to keep silence.

If ignorance befools the knower (the Atman) who would say that this is ignorance?

Would it not be shameful to call it ignorance if it cannot conceal the consciousness of its own existence?
16 If the clouds really eclipsed the sun, who would enlighten them? If the person is annihilated by the sleep, who would experience it?

17 Therefore if the thing in which ignorance resides becomes ignorant, the ignorance being unable to know itself would vanish.

18 That, by which the existence of ignorance is distinguished, can never be itself ignorance.

19 It is meaningless to say that there is a cataract in the eye and yet the sight is not impaired.

20 If the fuel does not burn by its contact with the wild fire its power of burning will be futile.

21 If there is darkness in the house and yet it does darken it, it cannot be called darkness.

22 Who would call it a sleep that does not affect the wakefulness? Can it be called night if it does not cause the daylight to disappear?

23 The word ignorance becomes futile if the Atman is entirely pervaded by ignorance and yet it remains as it is.

24 Moreover it will be logically inconsistent to say that the ignorance resides in the Atman.

25 Ignorance is the gathering of darkness while Atman is the mine of effulgence. Now how can both of them be united?

26 (They can be united) If wakefulness and dream, memory and forgetfulness, would go hand in hand.

27 If cold and heat can travel together to their resting place or a bundle of the sun's rays can be tied by the rope of darkness,

28 Or if night and day came to stay together at the same place, the Atman would continue to live with the help of ignorance.
If death and life can be intimate relatives, the Atman’s existence will be dependent on ignorance.

Why should there be a contradictory talk that the ignorance that is dispelled by the Atman, dwells happily with it?

Oh, if the darkness gives up its nature and is turned into light, naturally it becomes the sun without any doubt.

If the fuel gives up its nature and is turned into a fire, the same fuel becomes the fire certainly.

Or no sooner a stream, giving up its separate existence, flows into the Ganges, then it turns into the Ganges herself.

In the same way there is no ignorance. It is entirely Atman. In fact the ignorance is turned into knowledge as soon as it comes in contact with it.

Ignorance, being contradictory to knowledge, cannot reside in it. Also it cannot exist independently.

If the fish of salt becomes alive, it can neither live in water nor outside the water.

“Atman shines where there is no ignorance” talks like these should not be, therefore, listened to by the wise ones.

The illusory serpent, apppearing on a rope, cannot be bound by it, much less can it be driven away.

Or the darkness, being afraid of day light, turned to the full moon light but it was swallowed by the moon instantaneously.

Similarly the word ignorance becomes meaningless both the ways. The nature of the ignorance cannot be understood without logical inference.

Then what is the nature of ignorance? Is it to be logically inferred from its effect or is it directly apprehended? Now let us search.
Oh, that which can be apprehended by the Pramanas like perception and others, is the creation of ignorance and not the ignorance itself.

The creeper with its strait sprout, looks charming. It is not a seed but the result of the seed.

Or the auspicious or inauspicious forms are seen in a dream. They are not sleep itself but the offspring of sleep.

Or, the moon is one but appears as two in the sky. It is not the defect of eyesight but the effect of that defect.

In the same way the triad of the subject, the object and the means of valid knowledge, are the results of ignorance and not ignorance itself.

Therefore, these Pramanas like perception, as the effect of ignorance, cannot certainly apprehend the ignorance.

If the effect of the ignorance is regarded as ignorance the senses by which it is apprehended, are themselves created by ignorance. (hence they are not reliable)

If that which appears in a dream is illusory then is the perceiver of the dream different? (i.e. he is also not a real perceiver) So if the effect is nothing but ignorance, (the ignorance will be the cause of knowing ignorance)

It will be like tasting of the raw sugar by itself, besme- aring collyrium by itself, or like impaling of the stake by the same stake.

In the same manner if the effect, being identical with the cause, is ignorance, then there will be all ignorance and who will know the existence of any thing?

In such a state one cannot think of the knower and the known. It would be like taking the evidence of a fish in a mirage.

So, oh dear friend, that which escapes the measuring of any proof, is not different from a sky-flower.
The ignorance does not allow any proof to exist. So who will begin to discuss about it? The futility of ignorance should be known from this.

In this way ignorance is disproved by not being the object of perception or inference.

I am afraid to believe that the ignorance is real since it is neither the cause of any thing nor the producer of its effect.

It can neither cause the Atman to dream nor put him to sleep in his own resting place.

Let it be so, (If the Ajjanavadin again says) the ignorance was in union with the Atman when he was in his pure state.

Fire exists in wood before two pieces of it are rubbed together.

(It can be replied that) The pure state of the Atman does not even tolerate the name Atman. So how can ignorance desire to find any room there?

Should we remove the snuff before lighting a lamp or abandon the shade of the tree that has not yet grown?

Or, besmear with an ointment the body that is not yet formed or cleanse the mirror that is not yet made?

Or try to remove a cream of the milk that is yet in the udder?

So, how can there be any thing like ignorance in the Atman where there is even no room for the state of being called Atman?

So naturally it becomes clear that even at that time ignorance does not exist. Now what is the propriety of even saying that it is nct?

Inspite of this if one persists in saying that ignorance exists in the Atman that is beyond all being and non-being,
(It will be like saying that) The no-existence of a jar is broken into a hundred pieces, or the death itself has been killed entirely.

Or like saying that sleep or fainting itself has fainted away, or darkness has fallen into a dark well.

Or the non-existence got into troubles, or the interior part (i.e. void) of a plantain tree is broken, or the sky is turned into a whip and sounded.

Or a poison was administered to a dead man, or the lips of a dumb man were silenced or the unwritten letters were erased.

So it is fulite to say that ignorance remains (in the state of the Atman). Now it is said that it is identical with the Ultimate Substance.

See how can a barren woman give birth to a child? or can the seeds that are burnt, grow? Can darkness meet the sun?

In this way, howsoever we search for ignorance in the Pure Intelligence, it will not be found out.

Desiring the cream if one were to shake the pot of milk, would it appear on the surface or be disintegrated? It (the search for ignorance) would be like this.

Or if one wakes up hurriedly to catch the sleep, will it be caught hold of or be destroyed in vain?

So why should one go mad in search of ignorance? To search for it is naturally equal to not searching (because it does not exist)

The town of thought is not illuminated in any way by the existence of ignorance.

Can the eyes of thought be able to see the ignorance within or outside of Atman at any time?
The face of decision is not anointed by ignorance (i.e., the ignorance does not even exist for the sake of thinking and taking a decision). It does not bear any proof even in a dream. Indeed the thought that tries to grasp it, loses itself.

With all this, do you think that you will find some way towards the ignorance?

(To think like this would be) to erect a meeting hall using the horns of a hare as pillars, to illuminate it with the rays of the new moon,

And to enjoy the festival by adorning the children of barren women with the sky flowers!

The desire (for searching ignorance) will be fulfilled if we can fill the measure glass of the sky with the ghee of a tortoise.

We have tried, in various ways, to search for ignorance. How many times should we repeat that it does not exist?

So I would not utter the word ignorance even in a dream. But an idea occurs to me about it.

The Ultimate Reality is not such that it would become the seer by seeing itself or any other object.

Then how is it that it presents before it the great visible world and assumes itself the function of a seer?

The wide world rises and also is visible to us, in the state where even the name Atman cannot get access.

Though ignorance is not visible yet it exists without any doubt. It is roved by inference from the visible world.

The moon is one. But if it appears as two in the sky, should we not think that the eye-sight is impaired?

The trees look fresh and green and it is not seen that they are sucking water from the source different from the ground on which they stand.
Still we cannot avoid to infer that their roots are certainly sucking water. So the ignorance also is known by inference from the visible world.

Sleep vanishes as soon as one awakes, It is not known to one who sleeps, but its existence can be inferred from the dreams.

So if there is the appearance of this vast world upon the Pure Substance, we can easily infer the existence of ignorance.

(To this we reply) How can we call this kind of knowledge ignorance? Should we call the thing that causes day light as darkness?

Can it be called a collyrium (a dark thing) that makes an object look brighter and whiter than the moon?

We can call this world the process of ignorance if water can perform the function of fire.

The knowledge will be worthy to be called ignorance if the full moon will be the cause of the dark night.

Will the poison give out ambrosia with great love? And if it does, can it be called a poison?

Should we bring the flood of ignorance when all the becoming in front of us is enlightened with knowledge?

If it is called ignorance, then what would be the nature of knowledge? Is the Atman anything (knowledge or ignorance)?

He does not become anything. He does not know what he is. All the means of knowledge become void.

He does not behave in such a way as we can say that he exists. But there is no reason also to call him non-existent.

He exists without the existence of the other. He sees without being seen by any one. If this is so why should he be regarded as lost?
105 He silently endures the charge of the nihilists who regard him as nothing. He is not also disturbed by calling him of a particular nature. (i.e. as Sat, Chit and Ananda)

106 Does the Omniscient, who is the witness even of the deepest sleep, fail to understand this? But he himself does not become visible.

107 The Veda say so much but it does not mention the name of the Atman. It only says 'Not this.'

108 Whom does the sun not enlighten? But has he enlightened the Atman? Can the Substance (the Atman) be enveloped by the sky?

109 The egoism thinking 'It is I' embraces the physical body that is nothing but a bundle of bones. It leaves aside this Substance (i.e. Atman)

110 The understanding that grasps everything knowable, falters before this Substance. The mind imagines everything except the Atman.

111 The senses, that rub their mouths on the barren land of sensual objects, cannot taste the sweetness in the Atman.

112 Is it possible to apprehend in all its totality the Atman who has filled his belly by eating all the existence along with non-existence?

113 As a tongue cannot taste itself, the Atman cannot be its own object. How can he be the object to others?

114 Let it be. As soon as Avidya, along with her innumerable names and forms, comes before the Atman, it vanishes with fear.

115 So how can any other thing find room where there is no desire to see one's own complexion?

116 A person trying to put a stick into the puzzle of a string is troubled to find it outside the string when it is pulled
So any effort to decide the nature of the Atman becomes futile in the same way.

117 Or he who looks minutely his own shadow from head to foot and tries to jump over it fails to understand it.

118 So the person, who tries hard and decides that the Atman is like this, fails to grasp him.

119 Now, where the words cannot reach, tell me how the intellect can apprehend him as something other?

120 How on the strength of that apprehension, can the eyelessness and the blindness of the Atman be dispelled and his vision be regained?

121 He cannot experience his state of being an object of perception. So also his state of being a perceiver goes away. In such condition.—

122 Who meets whom? How can the eye-sight be opened where even the unity is dissolved.

123 He has opened the doors of light turning aside this great obstacle.

124 Innumerable forms and eye-sights arise but one Pure Intelligence underlies all.

125 The underlying Supreme Intelligence is so intoxicated by the great glory of the vision that he does not see again the same mirror of the jewels in the form of objects.

126 He is so munificent that he causes his sight to wear every moment new apparels in the form of the objects of the world.

127 As the Atman regards the objects once created as stale and worn out, he presents to his vision ever fresh and new objects.

128 Also he becomes subject by wearing every moment new ornaments of apprehensions. (i.e. It is the Atman that
himself appears as the knowing subjects, that vary with the variations of the objects that are known)

129 He felt uncomfortable in his original Atmanic dignity. So he girded up his loins to become many i.e. this manifold world

130 This is the way of the Omniscient. The Pure intelligence is full up to the brim But it is not known in any other house but in his own. (He knows Himself in the form of the visible world).

131 Thus the Pure Intelligence, where knowledge and ignorance embrace each other (i.e. vanish) opens His eyesight and meets himself in the form of visible objects.

132 As soon as He sees the visible world He enjoys it as its seer. The same enjoyment pervades the whole vision.

133 There goes on the process of giving and taking. But the thread of unity does not break as the unity of the original face is not disturbed though it is reflected in a mirror.

134 Or as the standing posture of a noble horse which sleeps while standing, is not disturbed when it wakes up.

135 Just as water plays itself by assuming the form of waves, so the Ultimate Substance or Atman plays happily with Himself.

136 Is the fire caught in the bondage of difference if it interweaves and wears garlands of flames?

137 Can it be said that the sun is separate from his own rays that thickly surround him?

138 Will the unity of the moon disturbed if she is enveloped in her light?

139 Though a lotus blooms into a thousand petals it is one.

140 The king Sahasrarjuna has thousand hands, but does he become one thousand and one?
141 Even when there are spread on a loom a number of strips, there is to be found in them nothing but thread.

142 Though a crore of words meet in the residence of speech, all of them are nothing but speech.

143 Though there are foliages of visible objects and waves of different visions, they are not different from the seer

144 If a lump of raw sugar is broken into pieces there is nothing but raw sugar.

145 So the Atman does not become the object of difference though he perceives the appearance or manifests himself in the form of the manifold objects.

146 The unity of the Atman is not lost even when he comes to fill the whole universe.

147 Though in a silken garment, having borders of two colours, there appear different shades of colour, all of them are threads only.

148 If the eye had been able to see the whole without opening its lids that are closed,

149 Or, if a Bunyan tree has its full growth without breaking of its seed, the expansion of the one Reality can be compared with it.

150 Then if he vehemently desires not to see himself, he rests in himself.

151 It is like absorbing of the sight in itself when the eye-lids are closed.

152 Or as the ocean is full in itself without the rising of the moon or as a tortoise naturally draws its feet within itself.

153 Or as on the new moon day the moon (with all her sixteen kalas) enters the seventeenth digit.
154 So when the Atman withdraws the seer and the objects that are seen, he is falsely called a conqueror. It really is his resting in himself.

155 The Atman naturally is all that exists. Then who perceives what? this state of not perceiving is his sleep.

156 He is naturally an object to himself if he says, "I don't desire this state of non-perception. I want to see myself"

157 The Atman is the eternal perceiver and the eternally perceived. Now what is there to be newly created?

158 Should the sky and the void, the air and touch, the light and brightness be newly related?

159 The Atman shining as the universe, sees the universe. When there is no universe he sees its non-existence.

160 If by chance both the existence or non-existence of the world merged, he is the seer even of this state.

161 Is the coolness of the camphor due to the moon-light? Is not the camphor anointed by itself (i. e. the coolness is due to its own nature)? So the Atman is the Absolute seer in himself.

162 What more should be said? The Atman is ever seeing himself in whatever condition he may be.

163 As a person imagines different countries of his liking and wanders through them with respect.

164 It is no wonder that when the eye is pressed it vibrates in the form of a pure shining star (that appears before the closed eyelids)

165 Therefore when the one Pure Intelligence ever seeing itself what is the cause of any super-imposition.

166 Who else covers a jewel with the garment of luster? Does gold decorate itself by securing its golden quality?

167 Does the sandal wears the garment of some other scent? Does the ambrosia serve itself? Will the sugar test itself?
168 Or is the camphor smeared with white lustre or is the fire made hot by heating?

169 Or that the creeper entwining itself with its own foliage should naturally create a bower for itself.

170 Or as a lamp is wholly filled with light, the Pure Intelligence is filled with the spirit and vibrates (in the form of the seer and the seen)

171 Thus without any obligation He is observing himself naturally.

172 The seeing or the non-seeing is like this. Does the moon think about any difference due to darkness or light?

173 Therefore if He desires that this (i.e. observing) should not be, he is already of that nature.

174 The Atman appears as the object of seeing for a short time. But when they meet each other both of them vanish.

175 There the object is filled with the seer, and the seeing is merged in the object. Both vanish, and their real essence remains.

176 Both of them come to embrace each other in any place and at any time melting their state of being seer and the seen.

177 Neither the camphor enters fire nor the fire enters the camphor. Both of them are destroyed at the same time.

178 When one is substracted from one there remains only a zero, and its figure is rubbed out. Similar thing happens when the seer and the seen merge into each other.

179 Or if any one tries to wrestle with his reflection, both the wrestling and the reflection vanish.

180 So when the perception is gone the perceiver and the perceived meet and are united.
181 There is a difference between eastern and western sea so long as they do not mingle. But there is all water after their intermingling.

182 So many triads (of the perceiver, perception and the perceived) are naturally emerging. Do they require determining at every moment?

183 The swallowing of the two particulars, (the seer and seen) and emitting their opposites is like the opening and the closing of the eye of the Reality.

184 It is wonderful that as soon as the eyelids close the Atman assumes the form of a seer which vanishes as soon as the eye-lids open.

185 The natural condition of the Atman lies between the destruction of the seer and the seen and a new revival of them.

186 It is like the water remaining in its natural state, when the wave that is arisen vanishes and a new one has not yet arisen.

187 Or like our condition when our sleep ends and yet we are not fully awake.

188 Or it can be imagined if we think about the eye-sight that has ceased to see one object and yet has not begun to see another.

189 It is like the state of the sky when the day ends and the night is yet to come.

190 Or like the state of Vital breath when one respiration is finished and the other is yet to be taken in.

191 Or like the state of an individual at the moment when all his senses are enjoying their objects simultaneously.

192 The ultimate nature of the Atman is like that. So can there be seeing or not seeing?

193 Can it be said that a mirror can see its own cleanliness or not?
194 Or by means of a mirror a face can be infront of or behind (the mirror)? But can it be so to itself in the absence of the mirror?

195 The Sun sees everything. But is it possible for him to witness the beauty of his own rising and setting?

196 Or can a juice drink itself? Or does it hide its place on that account? Both the things are impossible because it is a juice in itself.

197 Being the vision itself he does not know seeing and not not seeing. He himself is the cause of both.

198 Being the perception Himself he could not see himself. And so naturally he is the non-perception.

199 And how can the non-perception can perceive itself? Then again he is the perception himself.

200 These two dwell happily with each other and are destroyed by each other.

201 If the seeing is ever seeing itself, would this not be like not seeing? so both seeing and not seeing do not touch Him. (who is pure Intelligence)

202 So if the Atman who conceals himself from seeing and not seeing, sees, then who has seen what? (The Atman sees himself. So the seeing is like not seeing)

203 If the visible world appears, how can it be said that the seer has not perceived it? (the answer to this objection is) His seeing is not due to the appearance.

204 Indeed, the appearance is seen, But in reality the appearance is nothing but the seer. So how can the non-existent be seen?

205 Let the complexion be seen in a mirror. But it exists as a complexion in its own place. So the experience (of seeing it in a mirror) is futile.

206 This perception is like one’s own perception in a dream when one is asleep.
207 If the person who is asleep is carried away, in his dream in a comfortable carriage to the other place, is he really in that condition?

208 Or is it really so if a headless couple of beggars appear (in a dream) to be ruling a kingdom?

209 A person in a dream, without being changed, is in the same condition in which he was in the absence of the sleep.

210 The distress of a thirsty person who has not seen the mirage is the same when he sees it. Because what he has gained (by seeing the mirage)?

211 Or if a person made friendship with his shadow, his behaviour is of no use.

212 So the seer, by becoming the seen and showing it to himself, has made futile the act of showing.

213 Because if the seen is nothing but the seer how can it tolerate the act of showing? Is he absent to himself if it is not shown?

214 Does the face become futile if it does not see itself in a mirror? It exists in itself as it is even without the mirror.

215 So the Atman does not become futile if he is not shown to himself by the appearance. The act of not showing is of no use.

216 So the Atman is in his own state without making himself a seer. Now why should he, who is in such a state, be made an object of seeing?

217 It becomes redundant if it is said that what already existed was shown again. The showing becomes futile by also saying this.

218 It is the rope that really exists when there is the appearance of a snake on it. So it is the seer that really exists when there is the appearance of the seen upon the seer.
219 When there is a mirror before the face it appears unmistakably in the mirror. But as a matter of fact the face is in its own place and not in the mirror.

220 So among the seer and the seen, the seer really exists. So the seen is futile though it is seen.

221 Indeed, it is futile. But it does appear. So if by saying this its existence seems to be proved,

222 (It is not so) If some one sees the other and becomes the seer we can regard that he has seen it.

223 But here (in the case of the Atman) does the Atman see any thing other than himself, though he may see or not see, though he may remain one or become many?

224 The face has seen itself though a mirror has shown it. The face is as it is in itself though it is not shown by the mirror.

225 So if he is not shown, he is as he is in himself, or if he is shown, he is also the same.

226 Though revealed by wakefulness or concealed by sleep the person is the same in himself.

227 Or a king is as he is though he is made conscious of his position by saying "You are a king"

228 Or is there any loss to his dignity if he is not reminded of his kingship.

229 So he (the Atman) may be shown or not shown, he does not reach a higher or lower position. He is naturally in his own state of existence.

230 So what other thing there is that is mad after showing the Atman to himself? If there is no seer who should see the mirrors?

231 Does a lamp create the person who lights it or does it exist on account of that person? So the existence of any cause is due to the Atman.
The flame enlightens the fire. But can it be considered different from the fire?

And the thing that we call a cause is manifested and shown by him. If he sees it, he is by his own nature the object that is seen.

So there is no other cause besides him, for the self-illuminating Atman to see himself.

In whatever form the appearance may be, it appears through him. Here there is no other besides him.

It is the gold that shines in the form of an ornament or a solid piece, because there is nothing but gold.

There is nothing else but water in the current or its waves. So no other thing exists or is brought into existence.

There is nothing else in the camphor but itself, though it may be inferred by the sense of smell, or taken into one’s palm or seen with one’s eyes. So in whatever way it is he—the Atman that experiences himself.

Now let him appear as the seen or let him be the seer, nothing else is manifested without him.

The Ganges may flow as the Ganges or may remain as the ocean by mingling with it, but we cannot see anything new and wonderful in its existence as water.

Whether liquid or frozen the ghee does not become anything else. Such an inquiry is meaningless.

The fire and the flames are not regarded as two separate things because both of them constitute the fire and are not different from it.

So it may be the seer or the seen, both the states are futile, because really it is the one state of the Atman that pulsates every where.
245 There is nothing else besides pulsation if we look from the point of view of the pulsation. So does the Atman see though he sees?

246 It is not that the appearence is spread before and the seer watches it remaining behind. It is his pulsation when he sees himself.

247 It is like ripples sprinkling themselves upon water, gold covering a piece of gold, eyesight remaining spell-bound with its own vision.

248 It is like uniting a tune with a tune, a fragrance with a fragrance or serving the dish of contentment to contentment.

249 Or as if the raw sugar is anointed with the raw sugar, Meru, the mountain of gold, is enamelled with gold or the fire is surrounded with flames.

250 What more should I say? It is like the sky resting on the couch of the sky. Then who should sleep? and who should wake?

251 He saw himself as if he did not see. And without seeing himself his seeing is natural.

252 Here no talk is tolerated, no knowledge can get entrance, no experience can be proud of its greatness.

253 So his seeing himself is like this. It is like no one seeing nothing.

254 In short, the Atman is illuminated by the Atman. He awakens himself without awaking.

255 On account of the desire to see himself all the states (i.e. that of the seer and the seen) are manifested without disturbing his own condition.

256 If he wishes to remain without seeing, the not-seeing itself becomes seeing. And on account of this seeing both seeing and not-seeing go away.
Though he may evolve in any form, his unity is not lost. Or if he contracts he is as perfect as before.

The sun can never catch hold of darkness. Then why should he listen to the talk about light?

Let there be darkness or light. He is like the Sun that remains alone in his glory in any condition.

So he (the Atman) may assume any position, he does not miss his own self.

Though innumerable waves rise and fall the ocean does not give up its nature.

The richness of the Atman who is Pure Illumination cannot be compared to the Sun because his rays go out of himself.

There will be no cloth in the world if the cotten-fruit does not break. (So the Atman cannot be compared to it.)

If a piece of gold remains as it is, it cannot adorn the various organs of the body.

No individual can go from one quarter to another without crossing the intervening distance. So he cannot be compared to the Atman.

So the play of the Atman has no parallel. He can be compared only with himself.

He is devouring the mouthfuls of his own light. But neither his food of light is reduced in quantity nor the size of his belly is changed.

Thus the Atman is ruling his kingdom in his own place with his unparalleled sport.

If this is called ignorance, it means the end of all logical thinking. Can we tolerate the talk of one who speaks like this.
270 If that which illumines is called ignorance, it is like calling the thing that enables a man to see an underground store of wealth, a collyrium (a dark substance).

271 Is not the idol of Ambika (the consort of Shiva), though made of gold and hence shining, is called Kalika (dark goddess)? So to call the self-illumination of the Atman ignorance is like this.

272 In reality all the sorts of elements from the God Shiva to the earth are illumined by his rays.

273 It is on account of him that knowledge knows, sight sees, and the light enlightens.

274 Ah! who is the mean person that has pointed him as ignorance? Is it really not like binding the sun in a sack of darkness?

275 To write the letter "A" before the word "Jnana" (knowledge) and to regard it as enhancing the greatness of that "Jnana"! Is it not an extraordinary method of elucidating the meaning of a word?

276 Why should one place fire inside a box made of lac? It will reduce everything to fire.

277 Therefore it would be irrelevant to speak about the doctrine of ignorance when all the universe is the vibration of knowledge.

278 First it is like committing a sin by uttering the word 'killing of a cow' (because the animal cow is regarded as sacred) and secondly it is utter falsehood (and hence another sin). So how can the knowledge be called ignorance?

279 And the talk about ignorance is itself a vibration of knowledge (i.e. becomes intelligible through knowledge.) So why should not knowledge be regarded as knowledge?

280 Let it be, by the same illumination of his own the Atman is seeing himself in various forms.
How can ignorance that pales before the searching thought
gain eye-sight and see itself in the form of the visible
world in front of it?

If the ignorance says that it gives birth to the world
which is knowledge and it tries to establish its existence
by means of ignorance,

Then the world itself has proved emphatically the non-
existence of ignorance, because ignorance and knowledge
can not be related like a substance and its quality.

Knowledge would be the quality of ignorance if pearls
are produced from water or a lamp is sustained by ashes.

Ignorance would emit the lustrous knowledge if the
moon emits burning flames or the sky would be turned
into a slab of stone.

It is astonishing that a deadly poison should come out of
the ocean of milk. But how can there be a pure nectar
in the deadly poison?

Or suppose that ignorance is produced from knowledge;
but the ignorance would vanish at its very birth (because it cannot remain with knowledge) Then the know-
ledge only will remain and there will be no ignorance.

So the sun is as great as the sun, the moon is like the
moon and the lamp is like the lamp.

Do not fail to know that the light (of knowledge) is
nothing but the light. The whole world is nothing but
the illumination of the Substance or Atman.

The Shruti (the Upanishadas) declares with content-
ment that all that exists is illuminated by His light. Is it pursposeless?

Therefore the light of the Substance or Atman is the
cause of the manifestation of the Atman's beauty that is
enjoyed by the Atman himself.

But discarding this, to regard ignorance as the cause of
the Atman's self-illumination, is utterly unreasonable.
Therefore the existence of ignorance is not found out in any way. It becomes futile though we try to search for ignorance.

The sun would find no existence of darkness though he visited the residence of night.

If a person tries to put sleep into a bag, he can not even catch hold of wakefulness and remains alone as he is in himself.

CHAPTER VIII

Refutation of Knowledge

1 As for ourselves, we have neither ignorance nor knowledge. Our spiritual teacher has made us realize what we really are.

2 If we try to see how we are to ourselves the seeing itself is ashamed. So what we should do?

3 Happily our spiritual teacher has made us so great that we cannot contain ourselves within ourselves.

4 We are not limited by the state of being Atman. We are not disturbed by self-cognition. There is no change in us even by the contact of final emancipation.

5 No word, that can describe us, has yet come into existence. No sight that is able to see us is possible.

6 Who can onjoy or perceive us making us an object of enjoyment? We are not even able to perceive ourselves.

7 It is no wonder that we can remain neither concealed nor manifest. But oh! how it is difficult for us even to exist!

8 In short, how can we describe by words the condition in which we are placed by shri Nivritti?
9 Then, how can ignorance dare to come before us? How can Maya come into existence after her death.

10 Who can know any talk about knowledge when ignorance cannot get entrance?

11 We have to light the lamps because there is night. The efforts of doing so are of no use when there is the sun.

12 So knowledge also disappears when there is no ignorance. Now both of them vanish.

13 Really speaking the words knowledge and ignorance are destroyed in the process of giving them separate meanings. (Thes supposition of ignorance leads to the supposition of knowledge. But, the word ignorance itself is illuminated by knowledge. So there is no ignorance that is taken for granted and hence no knowledge based upon this conception of ignorance.)

14 If a husband and a wife exchange their heads cutting each other’s throat, both of them would lose their lives without exchanging their positions.

14 The lamp that is lighted behind a person is of no use to him. If the eye-sight can perceive in darkness, that darkness becomes futile (i.e. there is no difference between light and darkness)

15 So the utter non-cognition is called ignorance. How can that be the ignorance by means of which everything is comprehended?

16 In this way knowledge became ignorance and ignorance disappeared on account of ignorance. Both of them become futile through each other.

17 Now he who knows does not know, and he, who does not know, knows. So where should knowledge and ignorance live?

18 In this way, swallowing both the night of ignorance and the day of knowledge, the Sun of Pure Intelligence has arisen in the sky of Pure Consciousness.
CHAPTER IX

The secret of Natural Devotion

1 Now the fragrance became the nose, ears emerged out of a tune and mirrors evolved out of the eyes.

2 The fans become the blowing breezes. The heads assuming the form of Champaka flowers, give out sweet fragrance.

3 The tongue is turned into the flavour, the lotus opens in the form of the sun, the Chakor birds became the moon.

4 The flowers assumed the form of the bee, the damsel became a youth, or the sleeping person became his own couch.

5 The blossoms of a mango-tree became the cuckoo, the body itself became the breezes of winds coming from the Malaya mountain (where sandal trees grow), the flavours themselves got the tongues.

6 Or as a piece of pure gold made out of itself engraved armaments for the sake of charming appearance,

7 So the enjoyer and the object of enjoyment, the seer and the object of sight become one in the unity which is an unbroken whole.

8 A Shevanti flower blooms into a thousand petals without coming out of its own state of being a Sheventi flower.

9 So, though the auspicious drums of new experiences are beating they are not heard in the town of inactivity.

10 Therefore the multitudes of senses simultaneously run to their objects in front of them.

11 But as soon as the eye-sight touches a mirror, the sight meets the sight (giving up the mirror). The same thing happens in the case of the running of the desires. (senses) (The object of the sense is no other than the seer and no sooner they meet their object, than the seer is united with his own self)
Though there are three different things like a serpent-like ornament, an ear-ring, and a bangle their purchaser purchases nothing but gold.

If the hand is stretched out to gather the ripples it gets nothing but water.

Though the camphor presents itself as touch to the hand, as a nice object to the eye, or as a fragrant thing to the tongue, it presents itself as nothing but fragrance. So Atman alone vibrates in the form of the sensible manifold.

So when the hands, in the form of various senses like the ear and others, are ready to catch the object like words,

Then as soon as there is a contact between the object and the senses, the object does not remain as an object of sense. There is no other contact because everything is the Atman.

The parts that appear in a sugar cane are all contained in the juice or the full moon has all her lustre.

The meeting of the senses and their objects is like the moon light falling on the moon, or waters showering on the sea.

Though he may speak anything he likes, his silent meditation is not disturbed.

His actionless condition is not affected even though he performs countless actions.

Stretching the arms of desires the eye-sight embraces her objects but really she gains nothing (because both the sight and its object are nothing but the Atman)

As the sun, stretching the thousand arms of his rays to take hold of darkness, remains alone as he is,

As a person, getting up to meet the sport of a dream, finds himself alone.

So when there are objects of the senses before him the person who has attained the spiritual wisdom appears to
become an enjoyer of that object, but we do not know whether he enjoys it or not.

26 If the moon tried to gather the moon-light then who has gathered what? It is like a futile imagination without any result.

27 The yoga that is attained by the yogis through the means like restraining the senses, is as lustreless before this path (of the wise one) as the moon is by day.

28 There is no action or inaction and everything goes on as the experience of the Atman.

29 The non-dual one enters of his own accord the courtyard of duality. And the unity deepens along with the growth of difference.

30 The enjoyment of the objects of senses becomes sweeter than the bliss of final emancipation, and in the home of loving devotion the devotee and his God experience their sweet union.

31 Though he may walk in a street or may sit still he is always in his own house.

32 He has no goal to attain though he may perform any action. And it is not that without doing anything he does not achieve his object.

33 He does not allow any room to the memory or forgetfulness. In this condition his behaviour is uncommon.

34 His own sweet will becomes the moral discipline, any kind of behaviour is his meditation. The glory of the final emancipation serves as a sitting carpet to this condition.

35 The God himself becomes the devotee. The destination itself becomes the path, and the whole universe becomes solitude.

36 He may be a god or a devotee at any time. He is enjoying the kingdom of inaction in his own condition.

37 The temple is merged in God pervading everything. The process of time and the expanse of space vanish.
38 The God contains his own being within himself. Then how can the Goddess find room there? So also there would be no attendents.

39 In such a condition if a faithful desire for the relation of the master and the servant arises, he has to employ God alone for this purpose.

40 All the means of devotion like the silent repetition of the name of God, meditation, a staunch belief, are not different from God.

41 Now God should worship God with God in the form of any kind of offering.

42 The idol of God, the temple and God’s attendents, all of them are carved out of the same mountain-rock. So in the same manner why should there not be the performance of the acts of devotion (though there is nothing but God everywhere)

43 A tree has no other object besides it though it spreads in the form of its foliage, flowers and fruits.

44 There is nothing wonderful if a dumb person observes the vow of silence or does not observe. So the wise one remains in his divinity whether he may worship or not.

45 The Goddess formed of rice, though she is not worshipped, is already worshipped by the grains of rice. Should she be now worshipped by the grains of rice?

46 Will the flame of a lamp remain uncovered (i.e. without light) if we do not ask her to wear the garment of light?

47 Is not the moon entirely covered with her light though we do not ask him to wear the moon light?

48 The fire has its heat naturally. Why should we think of heating or not heating it?

49 The wise one is naturally the God Shiva himself. So not only he worships while worshipping but also does the same while not worshipping.

50 Now the lights of action and inaction are put out and the devotion and non-devotion sitting in the same row
have the same dish before them (i.e. they occupy the same position).

51 In this condition the sacred texts of the Upanishadas become a censure and censure itself becomes charming hymns.

52 In fact both praise and censure are reduced to silence. Though there is any talk it is silence.

53 It is the pilgrimage to God Shiva though he wanders at any place. If he goes to the Shiva, the going is like not going.

54 It is wonderful that in this condition both walking and sitting in one place become the same thing.

55 If his eye sight sees any object at any time in any way he experiences the joy of seeing the God Shiva.

56 Or though God Shiva is seen before him, he has, as if seen nothing. God and his devotee are on the same plain.

57 A ball falls down of its own accord, strikes itself, rebounds and enraptures itself with its own bliss.

58 If at any time it would be possible to see such a play of a ball, we would be able to speak about the natural behaviour of the wise one.

59 Neither the hand of action can touch it nor the knowledge can get entrance in it. The spontaneous devotion goes on this way.

60 It has no end. It is resounding in itself. What bliss can be compared to this?

61 This is the wondrous secret of natural devotion. This is the place where meditation and knowledge merge themselves.

62 Hari and Hara (God Shiva and Vishnu) are really identical. But the difference of their names and forms are also merged.

63 Oh! Shiva and Shakti, that were swallowing each other, are both of them swallowed simultaneously.
Here Para (the highest kind of speech) eating all the objects and drinking all the other kinds of speech, took rest in sleep.

Oh Blessed and mighty Lord! you have made us the sole sovereign of the kingdom of the supreme bliss.

It is wonderful that you have wakened the wakeful, laid down to sleep who was already slept and made us realize ourselves!

We are all in all your's. Out of loye you call us your own. It is becoming to your greatness.

You do not take anything from any one. You do not give your own to any one. We do not know how you enjoy your greatness (the state of being Guru).

You are supreme as a Guru (a spiritual teacher). You are laghu (a light object) because you help one to escape drowing in the waters of the worldly life. (The word Guru means both great and heavy. The word Laghu means both mean and light in weight). Both these qualities of your's are understood by one who is favoured by your grace.

If your unity had been disturbed while sharing it with your disciple, why should the sacred works have extolled you?

Oh Noble one, you are happy to become our kith and kin by taking away our feeling of difference from you.

CHAPTER X

Blessings to the World

1 Oh, Shri Nivrittinath! you have blessed me with this supreme bliss. Should I enjoy it within myself?

2 The Great God has endowed the sun with the fountain of light, that illumines the whole world.

3 Was it for the moon's sake that the nectar was given to her?, Or did the sea grant water to the clouds for their own use?
4. The light of the lamp is for illuminating the whole house
   The expense of sky is for the sake of the whole world.

5. There is the swelling of tides on the unfathomable sea.
   Is it not due to the power of the moon? It is the spring
   that enables the trees to offer their blossom and fruits.

6. So it is an open secret that all this is the gift of your
   blessed divinity. There is nothing that is mine.

7. But why should I explain myself in this way? It is like
   obstructing the expansion of my master’s glory.

8. What we have spoken is self-evident. Should the words
   illumine the self-luminous?

9. Or if we had kept silence would not a person have soon
   seen another person?

10. When a person sees another person it reveals naturally
    the self-evident truth that without any change the seer
    becomes the object of sight. (A person looking at another
    individual is also seen by him. So he is both the seer
    and object of sight)

11. There is no other secret about the nature of Pure In-
    telligence than this. This is evident even before its
    statement.

12. If it is said that under these circumstances the occasion
    to begin this work do not arise, we can reply that we
    are describing what is self-evident only out of love for it.

13. It may be the same thing that is dear to us, but there is
    a fresh flavour in tasting it again. So there a propriety in
    describing what is self-evident.

14. So it is not that I have spoken out a secret. It is self-
    luminous.

15. We are enveloped by perfect egoism. We have pervaded
    everything. We are not concealed or revealed by anything.

16. What can we offer to ourselves in the form of any expo-
    sition? Is it lost by remaining silent?

17. Therefore my speech has become the deepest silence. It
    is like drawing the picture of a crocodile on the surface
    of water.
In this way even the ten Upanishadas cannot approach it. The understanding has merged itself
Jnanadeva says that this is the rich nectar of spiritual experience. Let even the emancipated should take its draught.
The state of emancipation is nice, but the nectar of spiritual experience is so pure and sweet that even the eternal state of emancipation would eagerly desire to taste its sweetness.
Should I, who has got the vision of the sun, say that every night there is moon but it is so peculiarly bright on the full moon night?
The bloom of youth resides in a damsel, but it blossoms forth when she is united with her beloved.
With the advent of spring the trees begin to kiss the sky with their twigs bearing fruits and flowers.
Therefore I have served the dish of my spiritual experience in the form of this talk which is Anubhavamrit (i.e. the present work).
The difference between souls that are emancipated, or egar for emancipation or in bondage, remains so long as all of them have not tasted the sweetness of this nectar of experience.
As the waters (streams) coming to dip themselves in the Ganges become the Ganges. or as the darkness, meeting the sun becomes itself the light of the sun,
As we can talk of different qualities of metals so long as they have no contact with the philosopher's stone. All of them are turned into pure gold by that contact.
Those who enter the inner sanctorum of these words are like rivers mingling with the ocean.
As all the fifty letters — and others — meet in the letter 'Om', so there is nothing else besides the Atman in all the movable and immovables in the world.
There is no other thing that can be pointed out besides God. In fact everything is pervaded by Shiva.
"Therefore" says Jnanadeva, "Let the whole universe enjoy the festival of this nectar of spiritual experience"
INDEX

A
Abhangas of Jnanadeva, dealing with various topics (P. 22); and Amritanubhava (P. 123).
Abhasavada, of Kashmir Shaivism (P. 110).

Pramanas, on the number of p. s. in different schools of Indian Philosophy (P. 37); The Ultimate Reality is beyond all Pramanas according to Jnanadeva (P. 42).

Prayer, as the supreme end (P. 21); and Divine Experience (P. 21); as an eye to see God (P. 22).
Pringle Pattison Prof., On the nature of intelligent being (P. 115).

R

Radhakrishnan Dr., the philosophy of Jnanadeva not received the proper attentions of writers like R. (P. 32); His reference to Jnaneswari
based upon a wrong information (P. 33); On the origin of Bhakti in Vedic worship of Varuna (P. 85); explanation of Bergson’s position as regards God and Love (P. 98n.)

Rajawade V. K. first published the Chauryansri Inscription of Pandharapur (P. 2n).

Raju Dr. P. T., “Thought and Reality” (P. 81n.); identifies ‘Lila’ with ‘Maya’ (P. 129).

Ramanuja, Qualified monism of (P.37); refutation of Mayavada (P. 58); conception of Jiva (P. 81); conception of Bhakti. (P. 100).

Ramashram, the spiritual teacher of Jnanadeva’s father Vithalpant (P. 9).

Rand Benjamin, “The Classical Morality” (P. 138n.).

Rana Dr. R. D., On the date of the composition of the Amritanubhava (P. 25); On Jnanadeva’s Original contribution of Sphurtivada (P. 34, 107) On a passage in the Brihadaranyakopanishad (P. 49); Criticism of his view about the Virahinis of Jnanadeva (P. 124); On the Maya vada of Jnanadeva (P. 133); its criticism (P. 133).

Ray Choudhari Dr., the author of “The Early History of Vaishnava sect” (P. 32).

Reality the ultimate, self-illuminating, beyond knowledge and ignorance (P. 29). Jnanadeva on the self-evident nature of (P. 39). as the presupposition of all proofs (P. 40); sacred words point to it only (P. 42); The words Sat, Chit and Ananda are not real designations of (P. 43); as pure knowledge beyond relative knowledge and ignorance (P. 45); is not a nihil (P. 45); Its knowledge is like immediate experience (P. 46); as the substratum of the subject and the object (P. 46); can be called Sat, Chit, and Ananda in a transcendent sense (P. 47); as experiencing itself (P. 47 as overflowing with delight (P. 49); as manifesting the triad of knowledge, knower and the known (P. 53); enjoying its wealth through finite selves (P. 83); as Pure Consciousness, Love and Energy (P. 98); Identity of R. and God (P. 98); coincidence of the highest value and R. (P. 100).

Religion, the appreciation of Divine Love is the essence of (P. 100) of love implied in the philosophy of Jnanadeva (P. 147).

Renunciation, advocated by Shâmkar (P. 3); Extreme forms in Mahanubhava sect and Buddhism (P. 5); Jnanadeva’s criticism of (P. 146).

Rigveda, Polytheism and henotheism in (P. 84); worship of various deities in (P. 85); the power of sacrifice (P. 86); Scepticism in (P. 86).

S

Sachchidananda-Baba, a biographer of Jnanadeva (P. 8)

Samkhya, the dualism of s. refuted by Jnanadeva (P. 20, 51); Influence on Gita (P. 90); conception of the finite self (P. 81).

Sarakar Dr. M. N., “Vedantism” (P. 82n); “Hindu Mysticism (Studies in Vaishnavism and Tantrism)” (P. 145).

Sarvajnatman, the author of Samskhep Sharirak (P. 28); On the location of Avidya (P. 76).

Satyamalanath, a biographer of Jnanadeva (P. 8).
INDEX

Scepticism, in Rigveda (P. 86).
Sen Dr. K. M., on the period of Ramananda (P. 10a). “Medieval Mysticism of India” (P. 32).
Shakti, Shiva always accompanied by (P. 52); Shakti is Bhakti according to Jnanadeva (P. 98); different from Maya according to Gorakhanath (P. 112); as the power inherent in Shiva (P. 112);
Shamkar, his attack on Vedic ritualism (P. 3); advocating renunciation (P. 3); his hymn in praise of Panduranga (P. 7); the monism of (P. 37); on the proof of testimony (P. 38) his explanation of the terms Sat, Chit, and Ananda (P. 43n);
On the nature of Knower, Knowledge and the Known (P. 55); denying the reality of becoming (P. 56); on Reality and Appearance (P. 56); his theory of Adhyasa (P. 57); accepting Maya as an indisputable fact (P. 57); on the world as the parinama of Avidya and the vivarta of Brahman (P. 57); on the phenomenality of God, world and the finite self (P. 57) Refutation of his Mayavada by Ramanuja (P. 58–60); by Madhwa (P. 60–61); by Nimbark (P. 61); by Vallabha (P. 62); by Jnanadeva (P. 64–76).

on the identification of the self and Brahman (P. 81); his conception of the individual self (P. 81); his conception of Bhakti compared with that of Jnanadeva (P. 100); and Jnanadeva (P. 113–115), points of similarities and difference between S. and Jnanadeva (P. 114–115) his philosophy ending in renunciation (P. 130); nearer to Jnanadeva than Vallabha and Ramanuja (P. 131); His conception of appareance compared to those of Bradley and Jnanadeva (P. 143).

Shamkari Vidya, the meaning of (P. 24).
Shandilya, the sutras of (P. 93); his discussion of the philosophical background of Bhakti (P. 93); His conception of Bhakti or devotion (P. 94); Bhakti as a means to liberation (P. 94); the empirical life of the finite self is due to the absence of Bhakti (P. 94).

Sharangadhar, the author of “Sangeeta Ratnakar” (P. 1).

Shivakalyan, a commentator of the Amritanubhava (P. 28).
Shiva, the primal spiritual teacher (P. 24); revealing Shiva-sutras (P. 108) inseparable from Shakti (P. 109); the view of Gorakhanath on the nature of (P. 112)

Shiva-sutras, reference in the Amritanubhava (P. 108); as the fountain head of Kashmir shaivism; (P. 108); Influence on Jnanadeva (P. 108–111); Shunyavada, the doctrine of (P. 24n). Jnanadeva’s criticism of (P. 44).
Shridhar, a wellknown commentator of Bhagawata Puran (P. 93).

Shrinivasachari Prof. P. N., on the Pancharatra Agam and the works of Alvar saints (P. 38n); on Prapatti (P. 100n).

Socrates, on the importance of self-knowledge (P. 80).
Sopan, the younger brother of Jnanadeva born in 1277 A. D. (P. 12).
Soul, see jiva.

Spinoza, on God’s love for Himself (P. 52); on the philosophy as a way of life (P. 140); difference between his intellectual love of God and Jnanadeva’s natural devotion (P. 141);
Sphurtivada, as the original contribution of Jnanadeva (P. 132); and the theory of emanation. See also Chidvilas.

Subandha Mr. P. S., his article on the abhangas of Namadeva (P. 10n).

Subhedar Bar. Manu, his translation of Jnaneshwari (P. 33n)

Svपनेश्वर, a commentator of the Shandilya Sutras, occupying middle position between Shamkar and Ramanuja (P. 93); considering jiva and Brahman as different yet one (P. 94).

Svētāsvatārōpanishad, Prakriti identified with Maya (P. 49,50) Emphasising the doctrine of grace (P. 88); Brahman as of the nature of bliss (P. 88); On Atman as the eternal subject (P.104).

T

Taittiriyaopanishad, on the Brahman as the source of all human joys (P.88) on the Atman being beyond the reach of thought and mind (P. 103)

Tvrambaka-pant, the great grandfather of Jnanadeva, initiated by Gorakhnath (P. 5, 8).

Tukarama, Jnaneshwari as the source of inspiration of the works of (P.20) His criticism of Mahanubhava (P.5) as the pinnacle of the temple of Bhagawata Dharma in Maharashtra (P. 148).

Tulapule Dr. S. G., on the Chowryans Inscription of Pandharpur (P. 2n).

U

Upanishadas, the concept of God and Bhakti in (P. 86); meditations in (P. 87); roots of later day systems found in (P. 88); germs of later day philosophies of Bhakti and yoga in the Atman's nature of bliss described in U. (P. 88); various suggestions of truth in U. (P. 88); Influence on Jnanadeva (P. 102–104).

V

Vachaspatimishra, on the location of Avidya in the finite self (P. 78);

Vallabh, the pure monism of (P. 37); refutation of Mayavada (P. 62–63); The conception of jiva (P. 82); his conception of Bhakti compared with that of Jnanadeva(P.100); His conception of the ideal world or Goloka (P. 101).

Vasugupta, the Shiva-sutras revealed to (P. 108).

Vedic Age, the concept of Bhakti in (P. 85); scepticism in (P. 86); Agnosticism in (P. 86); Monotheism in (P. 86).

Viraha, Jnanadeva on the nature of (P. 125).

Virahini, Jnanadeva's Abhangas of (P.22); meaning of the word (P.22) as the culmination of Jnanadeva's Haripatha (P. 22); Dr. Ranade's interpretation and its criticism (P. 124)— and the Amrītanubhava (P. 124–125); as the mature fruit of loving devotion (P. 124).

Vireswar, a commentator of the Amrītanubhava (P. 29).

Vishwanath Chakravarti, A chaitanyaite commentator of Bhagavata Puran (P. 93).

Vishwanath Kibe, the author of "Jyotsna"-a commentary on the Amrītanubhava (P. 29).
INDEX

Vithalpant, the father of Jnanadeva, his life story (P. 9—13).

W
Weber, on the meaning of Spinoza’s intellectual love of God (P. 141-142)
Webb, on the personality of God and His relation with man (P. 98—99).
World, Goudapada on the various views about the nature of (P. 56) as the Parinama (modification) of Avidya and the Vivarta (anillusory appearance) of Brahman according to Shamkar (P. 57); as Chidvilas or the expression of Divine love according to Jnanadeva (P. 77).

Y
Yajnyavalkya, on the Atman as the true object of love (P. 87); On the Atman as the eternal Knower (P. 104); His idealism (P. 145).
Yoga, Superiority of remembering the name of the lord to the path of (P.21); the experience of Y, paling into insignificance before natural devotion (P. 84).
Yogachar, the school of Buddhistic Philosophy denying soul as the unifying principle of ideas (P. 81); Yoga-Vasishth, the influence of Y. on Jnanadeva (P. 104); difference between the Prakriti in Y. and the Goddess of Jnanadeva (P. 106); on the world as an accident (P.108)

Z
Zeller, on the cynical ideal of freedom adopted by Plotinus (P. 139).
Zha Dr. Ganganath, one of the editors of saraswati Bhavan Studies Vol. II (P. 95n)
