

Panel discussion and Q&A Session:
'Ever – changing Women: Mid Age Dilemma'

A Panel discussion and Q&A Session on the above theme was organized during the Foundation day celebrations of IGNCA, in the month of Nov., 2018 in which prominent gynecologists and doctors participated as panelists, and explained the medical conditions women face during the menopausal phase of their life and how women should be aware of the changes happening in their bodies and how they should equip themselves to handle these natural changes. The deliberations were extremely enriching for the participants, who asked some pertinent questions to the Panel of doctors.
