

About the Book: The edited volume deals with different contours of data science with special reference to data management for the research innovation landscape. The data is becoming pervasive in all spheres of human, economic and development activity. In this context, it is important to take stock of what is being done in the data management area and begin to prioritize, consider and formulate adoption of a formal data management system including citation protocols for use by research communities in different disciplines and also address various technical research issues.

About editors:

Dr. Usha Mujoo Munshi: a Fulbright Scholar is currently with Indian Institute of Public Administration (IIPA). Prior to joining, IIPA, she has served at many other prestigious organizations like INSDOC, New Delhi, Indian National Science Academy, New Delhi and Indian Statistical Institute, Kolkata. She has over 100 research and conference publications and a few books to her credit, besides a number of other publications.

Neeta Verma: is the Director General of National Informatics Centre, the Premier ICT organization of Government of India to implement Digital India initiatives of the country. She has been associated with the introduction of World Wide Web Services in Government way back in 1996.
