ABSTRACTS

Soma Lata- A Precious Gift to Mankind: Soma has been shrouded in mystery for centuries. It is simultaneously a sacred plant used in secret Hindu rituals, a personified god and a vital cosmological principle: yet despite its importance, scholars have been unable to positively identify Soma or to pierce the mysteries surrounding its use. Soma provides an important key to understanding the earliest systemized methods of medicine, psychology, magic, rejuvenation, longevity and alchemy. Most significant is that Sacred Soma Vedic Science Research Foundation intensive research has at last produced a convincing and surprising identification of the plants used to create the Soma drink (Somarasa). Soma the Divya Mahaushadhi of India, as well as member if the Mahaushadhi Varga, with the renewed interest in the ritual use of psychoactive substances, shamanism and psychoactive phenomena. Soma provides a much needed bridge between Eastern and Western esoteric traditions contained within the enigmatic verses about Soma in the Rigveda is a secret about ourselves and the nature of our relationship to the world and cosmos.

Effect of Soma Yajna- A Scientific Analysis: Agnihotra is a sacred tradition started by ‘Rishis’ of Ancient India. It is considered as the worship of the Lord Yajna Naaraayana. “Agnihotra” means worshipping Lord Vishnu – Naarayana riding in the divine serpent and controlling the cosmos. The Great Yagaas that can be done in Kaliyuga are the Seven Somayaagas. Aapthoryaamam is the Seventh. Using a holy pyre (Aghinothram) and the shasthrs, incorporating the ancient (Sanaathana) Indian Vedic knowledge and increasing life energy in nature via the Somarasa derived from the Somalatha and submitting it to Nature (Gods) is the Somayaagam. Soma means moon (Sa + Uma) and also means Lord Shiva. Uma mean Shakthi or Energy. By doing Somayaaga, our personal wishes and desires may not be obtained but what nature needs is absolutely obtained. The lecture will highlight relevant information on Somayaaga with its environmental, analytical and scientific observations.
