THE
EAST INDIAN CALCULATOR;

OR

Tables for assisting Computation

OF

BATTA, INTEREST, COMMISSION, RENT, WAGES, &c.

IN INDIAN MONEY;

WITH COPIOUS TABLES OF THE EXCHANGES

Between London, Calcutta, Madras, and Bombay,

AND OF

The relative Value of Coins current in Hindostan;

TABLES OF THE WEIGHTS OF INDIA AND CHINA,

With their respective Proportions, &c.

TO WHICH IS SUBJOINED

An Account of the Monies, Weights, and Measures

OF

INDIA, CHINA, PERSIA, ARABIA, &c.

COLLECTED FROM THE BEST SOURCES AND LATEST AUTHORITIES.

BY THOMAS THORNTON,

Author of a "Compendium of the Laws and Regulations concerning the Trade with India," &c.

London:

PRINTED FOR KINGSBURY, PARBURY, & ALLEN,

PREFACE.

THE utility, or rather necessity, of a work like this, to diminish labour, and ensure the accuracy of Calculations, must be acknowledged by all who are acquainted with commercial transactions connected with India.

Several works of this kind have appeared at Calcutta and Madras, but they have generally been incomplete, or not to be relied upon.

Most of the Tables, now offered to the Public, have been derived (but in no instance without considerable improvement) from these sources. They were found embodied and enlarged in a Publication, entitled "*ANDERSON'S Universal Calculator*," to which the following assumes a similar form: but as the Tables have all been patiently examined, and the very numerous errors carefully corrected, this lays claim to the only merit of such publications—the accuracy of its performance: for in a work like this, the composition of which demands no genius or invention, correctness is the desideratum; and the Editor has exerted so much care in his repeated computation of the Tables, as warrants him in placing great confidence in their mechanical accuracy.

The Tables of Exchange are confined to those which are most needed. A Collection of Tables of comparison of all

the different kinds of money exchanged in India, would have increased the work to a most inconvenient bulk.

The monetary systems of our Indian empire, notwithstanding the improvement they have undergone, still occasion inconveniences, and present incongruities, to be obviated only by a measure scarcely to be contemplated—namely, the establishment of one uniform system throughout the Company's territories.

The following facts, which (with other statements relative to the Exchanges) appeared a few months since in the *Madras Courier*, are curious, and sufficiently demonstrate what has just been observed.

Omitting fractions, 335 Bengal Sicca Rupees are the equivalent exchange of 350 Madras Siccas, at which the Public Securities are transferrable; and consequently, 350 Madras Siccas (or 100 Star Pagodas, at 8s. each) being the equivalent of £40, 335 Bengal Siccas should give the same sum. But the interest Bills, payable in London, allow £40 for 320 Bengal Siccas only, at 2s. 6d. each, (the Company's rate of Exchange), which is in favour of the receiver of the Bills 37½ Bengal Siccas, or £4. 13s. 9d. sterling, per £100, against the Company.

Again:—335 Bengal Siccas, at 2s. 6d. each, give £41. 17s. 6d., and 350 Madras Siccas, at 2s. 3d. each, (the Company's rate of Exchange), give £39. 7s. 6d.; the former sum being £1. 17s. 6d. *above*, and the latter 12s. 6d. *below*, the nominal equivalent of each, namely £40.

Again:—The gold of the Guinea and Sovereign is of the same standard as that of the Madras Gold Rupee, *viz.* 22 carats fine; and the latter, weighing 180 grains of that

gold, exchanges for 15 Silver Rupees of the same weight, which gives 12 grains of gold to each Rupee of Silver, equivalent to 1 grain per Silver Fanam of the late coinage, and $1\frac{1}{3}$ per Silver Anna of the new coinage of that Presidency. Now the Sovereign, weighing clear $\frac{2}{3}$ of the Madras Gold Rupee, which should fetch, according to the foregoing estimate, a fraction above 10 Rupees, fetches only $8\frac{1}{4}$ Rupees, according to the Company's valuation of 875 Madras Rupees per £100; a difference against the receiver upon this footing of not less than 132 Rupees upon every £100.

The account subjoined of Money, Weights, and Measures is almost entirely new. This part of the work cannot be expected to possess equal pretensions to accuracy with the other. The impossibility of attaining that object, under existing circumstances, prevents the Editor from saying more than that it is more correct than preceding accounts, and as perfect as it could be made by a diligent examination of every authentic source of information upon the subject. He has derived great assistance (with permission of the Author) from the *Universal Cambist* of DR. KELLY, undoubtedly the best and safest authority. The communication he has had with that gentleman, convinces him that implicit reliance cannot be placed upon existing accounts of the Weights and Measures of India; a defect which can only be remedied by the plan adopted, under the authority of Government, with respect to those of other parts of the world, the true proportions of which have been accurately determined by an examination of specimens sent from abroad of the Weights and Measures actually used, accompanied with explanations from the proper authorities on the spot. Accordingly, the Court of Directors of the East India Company have issued orders to their servants in India, to transmit to England verified standards of the Weights and Measures in use throughout their territories, which, when received, are forwarded, for this important and desirable

object, to DR. KELLY, whose talent and qualifications render him the fittest person to be entrusted with the superintendence of this as of the former operation.

It is obvious that considerable time must elapse before this laborious undertaking can be accomplished. The multiplicity of the different measures of quantity used throughout India, and the confusion which prevails, especially in the interior, with respect to their standard, relative proportions, &c. have been frequently spoken of by travellers, and must greatly embarrass the undertaking. DR. HEYNE states that, in Mysore, almost every Cusbah, or chief town of the district, has Weights and Measures differing widely from those in its neighbourhood. The Scales commonly used, he says, are likewise extremely rude and inaccurate, being merely flat baskets suspended from a balanced pole, which is tied to a noose.

It is remarkable that an attention to this subject is distinctly enjoined by the ancient legislator of the Hindoos:—"Let all weights and measures," says MENU, "be well ascertained by the King, and once in six months let him re-examine them."—*Institutes of Hindoo Law*, Chap. VIII. tit. 403.

 ERRATUM.

Page 117, No. 16, line 2, for Sequins read Piastres.

TABLE I.

This Table shews the value or amount of any quantity of goods, ready cast up, from 1 to 10,000, at the rate of from 1 Pie to 100 Rupees each.

RULE FOR USING THIS TABLE.

If the value of 30 Covids of Baftah be demanded, at the rate of 2 Annas per Covid; look for number 30 in page 5, column the first, and opposite to that number in column the second, you will find 3 Rupees 12 Annas, the answer required.

Or, if the amount of 20 Peculs of Rice be demanded, at the rate of 15 Rupees per Pecul; look in page 10, for number 20, and opposite to it, in column the last, you will find 200 Rupees; and again, opposite to the same number, in page 9, column the fourth, you will find 100 Rupees, which, added together, make 300 Rupees, the answer required.

DENOMINATIONS.

12 Pies, or Pice, are equal to 1 Anna.

16 Annas..... 1 Rupee.

TABLE II.

This Table shews the exact value of any commodity (including decimal parts) in gross weight, from 2 Annas to 100 Rupees per Maund; and from 1 Seer to 1 Maund.

RULE FOR USING THIS TABLE.

If the price of 27 Seers of fine Benares Sugar be demanded, at 11 Rupees per Maund; look for the number 27, in page 18, column the first, and opposite to that number, in column the third, you will find 7 Rupees, 6 Annas, $9\frac{1}{2}$ Pies, the answer required.

DENOMINATIONS.

40 Seers make 1 Maund.

TABLE III.

This Table affords a Solution of Questions in 1. Multiplication; 2. Division; 3. Reduction; 4. Merchandizing; by following the ensuing Rules.

I.—THE USE OF THE TABLE IN MULTIPLICATION.

EXAMPLE I.—To multiply 81 by 53: look at the top of the Table, under the *Length or Value of any Thing*, for 53, and downward in the column of *Breadth or Things valued*, you will find 81, against which, under *Products*, you will find 4293, which is the Answer.

EXAMPLE II.—To find the product of any two numbers, with ciphers to one or both, work for the significant figures as before, and add the ciphers to the product. Thus the product of 53,000 by 81, is (adding the three ciphers to the product of 53 by 81,) 4,293,000; or the product of 5300 by 8100, is 42,930,000.

EXAMPLE III.—From the two foregoing Examples it may easily be gathered, that any two numbers may be multiplied together, though they exceed those actually mentioned in the Table: as, suppose you would find the product of 3159 by 95; divide the number given into two or three parts, as here the 3159 into 3100 and 59; by the Table you will find that the product of 3100 (or 31) by 95 (as by the 2d Example) is

294500

And the product of 59 by 95 is

5605

The sum of which is the Answer

300105

EXAMPLE IV.—Or if the figures, both in the multiplicand and multiplier, exceed those in the Table, the work may be performed thus:—

TABLE III.

If 3159 is to be multiplied by 957, the product of 3100 (as in the 2d Example) by 900, is.....	2790000
Also the product of 3100 by 57 is	176700
And the product of 59 by 57, (by the 1st Ex- ample) is	3363
And the product of 59 by 900 is	53100
The sum of which is the Answer	<u>3023163</u>

And thus may any two numbers, though ever so large, be multiplied together, with the help of the foregoing Table; dividing such large numbers given, into such numbers as are contained in the Table, observing the first and second Examples, and placing units under units, tens under tens, &c. of the several products, as in the last Example; and having regard to the places of the numbers you would have multiplied together, in order to the right placing of such products.

II.—THE USE OF THE TABLE IN DIVISION.

EXAMPLE I.—When one number is required to be divided by another, look for the dividend in the column of Products, and for the divisor at the top, and the quotient is found to the left hand of such dividend, under *Breadth, or Things valued*; thus, if 4559 were to be divided into 47 equal parts, look at the upper end of the Table for 47, and under that for 4559, right against which, towards the left hand, you will find 97; which is the quotient.

EXAMPLE II.—To divide 4,559,654 by 85, look for 85, your divisor, at the top of the Table, and underneath that number, in the column of Products, seek for the four first places of your dividend towards the left hand, which is 4559, and though you cannot find it exactly, yet you will find 4505 to be nearest, not exceeding it; against which, in the column under *Breadth, or Things valued*, you will find 53, which put in the quotient, or any where by itself; and deducting the 4505 from the 4559, the remainder is 54; to which bring down the two next figures in the dividend, or number to be divided, which is 65; then look under your divisor, 85, in the column of products for 5465, and you will find 5440 to be next to it, against which is 64 towards the

left hand, which put on the right hand of the 53 aforesaid, and deduct the 5440 from 5465—the remainder is 25; to which bring down the last figure, or that in the unit's place of the number given to be divided, and then look in the column of Products for 254, and you will find 170, against which, under your divisor, 85, you will find 2, which put to the right hand of your quotient, viz. of the said 5364, and deduct the 170 from 254—the remainder is 84; so that 4559654 being divided by 85, the quotient is 53642.

EXAMPLE :..... 85) 4559654 (53642

4505

5465

5440

254

170

80 remain.

Note, That if nothing had remained after deducting the said 4505 (or had but one figure remained), you might then have brought all the remainder of the dividend down, and so proceeded; but two places of figures remaining, viz. 54, if you had brought to that the 654, you would have had five places of figures to seek for in the Table, which is one more place than can be found there.

Note also, That the first of the two figures (towards the right hand) first put in the quotient, must always possess the same place therein, as that figure does in the dividend which you first subtract from: thus, in the last Example, 3 in the quotient must be in thousands' place, because 5 (the first figure you make subtraction from in the dividend) is in that place; and, therefore, to make the 3 in the thousands' place of the quotient, place the 2 ciphers between the 5 and the 7.

EXAMPLE..... 85) 4505654 (53007

4505

654

595

59 remain.

III. THE USE OF THE TABLE IN REDUCTION.

EXAMPLE I.—To reduce Rupees, Annas, and Pies, into Pies : as 47 Rupees, 13 Annas, 11 Pies. Under 16, and against 47, is 752, to which add the 13 Annas ; then by Examples the 3d and 4th of the Use of the Table in Multiplication, 760 by 12, produces 9120 ; to which add the product of 5 by 12, also 11 Pies, and the sum is the Answer.

	R.	A.	P.
EXAMPLE :	47	13	11
	16		
	<hr/>		
	752		
	13		
	<hr/>		
	765		
	12		
	<hr/>		
	9180		
	11		
	<hr/>		
	9191	Answer.	
	<hr/>		

EXAMPLE II.—To reduce Pies into Rupees : as 23774 Pies. First look in the column under 12, the Pies in 1 Anna, and you will find, by the Rules in Division, by the Table 1981 Annas, and 2 Pies, which reduce into Rupees by the column under 16, by the same Rules, and you will find Sicca Rupees 123 . 13 . 2, the Answer, as per

EXAMPLE : 12)23774(1981 Annas.

228
<hr/>
974
972
<hr/>
2 Pies.
<hr/>
16)1981 . 2(123 Rupees.
192
<hr/>
61
48
<hr/>
13 Annas.
<hr/>

EXAMPLE III.—To reduce Avoirdupois Weight by the Table: as 47 Cwt. 1 qr. 16 lbs. into Pounds: look at the top of the Table for 47, and against 4, you will find 188; to which add your quarter of a hundred, and the sum is 189 Quarters, because 4 Quarters make 1 Cwt.; then multiply 189 by 28 (as by the 3d and 4th, or last Example), and adding the 16 lbs. the sum is 5308 lbs. for Answer.

$$\begin{array}{r}
 47 \cdot 1 \cdot 16 \\
 \underline{4} \\
 189 \\
 28 \\
 \hline
 5040 \\
 252 \quad \left. \vphantom{\begin{array}{l} 5040 \\ 252 \end{array}} \right\} \text{Add.} \\
 16 \quad \left. \vphantom{\begin{array}{l} 5040 \\ 252 \\ 16 \end{array}} \right\} \\
 \hline
 5308 \text{ Answer.}
 \end{array}$$

But this Question may be sooner resolved, by multiplying 47 by 112, and adding the 1 Quarter (or 28 lbs.) and the 16, thus:

$$\begin{array}{r}
 47 \\
 112 \\
 \hline
 47 \text{ by } 110 \text{ is } \dots\dots\dots 5170 \\
 47 \text{ by } 2 \text{ is } \dots\dots\dots 94 \\
 1 \text{ Quarter } \dots\dots\dots 28 \\
 16 \quad \left. \vphantom{\begin{array}{l} 5170 \\ 94 \\ 28 \\ 16 \end{array}} \right\} \text{Add.} \\
 \hline
 5308 \text{ Sum or Answer.}
 \end{array}$$

EXAMPLE IV.—If you would reduce liquid measure, viz. tuns, hogsheads, and gallons, into gallons, &c. as 32 tuns, 3 hogsheads, and 42 gallons, into gallons—look at the top of the Table for 4, the hogsheads in a tun, and against 32, you will find 128; to which add the 3 hogsheads given, and the sum is 131 Hogsheads.

Then, according to the 3d and 4th Examples of the Use of the Table in Multiplication, multiply 131 by 63 (the number of gallons in a hogshhead), and the product, adding the 42 gallons given, is 8295 gallons for Answer.

IV. THE USE OF THE TABLE IN MERCHANDIZING.

EXAMPLE I.—If the price of a unit of any commodity exceed 2 Rupees, the value of any number of units of such price may be found by this Table; as 13 dozen of Wine, at 37 Rupees per dozen, will cost 481 Rupees, which is found by looking at the top of the Table for the price 37, and underneath in the column of Products, against 13, is 481 Rupees, the Answer.

EXAMPLE II.—What cost 87 pieces of Cloth, at 17 Rs. 8 As. per piece? The 17 Rs. being found at the top of the Table, in the column of Products, under it you will find (against the 87) 1479 Rs. to which add half of 87 for the 8 Annas, and the sum is 1522 Rs. 8 As., the Answer.

Note, That where there are Annas above the Rupees in the price of a unit of any thing, then the best way is to work, as in the 1st Example, for the Rupees, and for the Annas, by multiplying them by the number of the things, and reducing them into Rupees by the Rules in Division.

EXAMPLE III.—This Table is also useful in casting up Bills of Exchange; as if you would know the value of 1500 Spanish Dollars, at 36 Annas, or 2 Rs. 4 As. per Dollar: by the Table, if you multiply 36 by 15, and add the ciphers to the product, you will find 54,000 Annas, which reduce at once into Rupees, by the 2d Example of the Use of the Table in Reduction, and you will find the Answer, Sa. Rs. 3375.

EXAMPLE IV.—You may likewise by this Table find the Interest or Discount of any Sum of Money: thus—The Interest of 472 Rs. 12 As. and 10 Ps. for 6 months, at 11 per Cent. per Annum, is Sa. Rs. 26.

This is done by dividing the given number by 10, supposing it 10 per Cent, (because 10 is one-tenth part of 100); so under 10, you will find in the column of Products 470, against which stands 47, and the 470, taken from 472, there rest 2 Rs. or 32 As. and the 12 As. given, make 44, against the next less to 44, viz. 40 in the column under 10, you will find 4, which is 4 As.; then deducting 40 from 44, there rest 4 As. or 48 Ps., and the 10 Pies given, make 58 Pies, the next number to which, in the Table under 10, is 50, against which stands 5, which is 5 Ps.; so that a tenth part of 472. 12. 10, is found 47. 4. 5; a tenth part of which is 4. 11. 7; for a tenth part of 47 Rs. is 4 Rs., and 7 Rs. remain, or 112 As., which, with the 4 As. make 116 As., a tenth part of which is 11 Annas, and there rest 6 As. or 72 Ps. and the 5 Ps. is 77 Ps.; a tenth part of which is 7 Ps. Thus, 4. 11. 7, added to 47. 4. 5, makes 52 Rs. the Interest of 472. 12. 10, for one year, half of which is the Interest for six months. See the whole work in the

R. A. P.

EXAMPLE:—Interest on 472. 12. 10 at 11 per Cent. for 6 months.

$\frac{1}{10}$ of 472. 12. 10 is 47. 4. 5 for 10 per Cent.

$\frac{1}{10}$ of that is 4. 11. 7 for 1 per Cent.

52. 0. 0 sum at 11 per Cent. per Ann.

$\frac{1}{2}$ of which is 26. 0. 0 the answer.

If the Discount for six months were required, that is to say, if 472. 12. 10 were paid six months before due, and an abatement, or Discount, were to be made of 6 per Cent. for prompt payment; you may do it near enough, by first finding the Interest of 472. 12. 10 for six months, as before taught, and deducting out of that Principal the Interest 26 Rs. so the remainder is 446. 12. 10, to be paid presently, in lieu of 472. 12. 10, six months hence.

TABLE IV.

This Table contains Calculations of Batta, from 1 per Cent. to 16 per Cent.; and from 1 Pie to 100,000 Rupees; from whence may be ascertained the equivalent Sum in Current Rupees, of any given Number of Arcot, Sonaut, or Sicca Rupees, according to the respective Batta that they bear.

EXAMPLE.

Suppose it be required to determine how many Current Rupees are in the sum of Sicca Rupees 5550 . 12 . 6, bearing 16 per Cent. Batta: refer to page 113, where, in the first column, will be found 16 per Cent. Rupees; then,

TABLE V.

EXCHANGES.

These Tables exhibit the relative Value of different Sorts of Money, which the following succinct Explanations will render more intelligible.

No. 1

Contains Current Rupees converted into Rupees of different values from 1 to 16 per Cent.; and from 1 Pie to 100,000 Rupees. It is proper to state (though it is pretty well understood) that the difference between any kind of Rupee and the Current is calculated in currency: so that although 16 per Cent. Rupees are 8 per Cent. better than those which are 8 per Cent. above currency; yet one hundred 16 per Cent. Rupees are not equal to one hundred and eight 8 per Cent. Rupees, but to one hundred 8 per cent Rupees increased by the addition of eight Current Rupees reduced to that Centage—namely R. 7, A. 6, P. 6, making the sum of 8 per Cent. Rupees 107, A. 6, P. 6, equivalent to one hundred 16 per Cent. Rupees. So of all other kinds, and *vice versâ*. The following Example will shew the Use of this Table:—Suppose Current Rupees 25355, A. 12, are to be paid in Sicca or 16 per Cent. Rupees; refer to page 126.

C. R.	A.	P.	S. R.	A.	P.	D. P.

	5000	. 0 . 0		4310	. 5 . 6	207
	300	. 0 . 0		258	. 9 . 11	172
	50	. 0 . 0		43	. 1 . 7	862
	5	. 0 . 0		4	. 4 . 11	586
	12	. 0		10	. 4	138
Cur. Rs.	25355.12	. 0	Equal to S. R.	21858	. 6 . 5	793

Nos. 2, 3, 4, & 5

Exhibit the relative value of Sicca, Current, Sonaut, and Arcot Rupees, the common Coins of Bengal, from 100,000 Rupees to 1 Pie. As an Example of the Use of these Tables, suppose that Sicca Rupees 10330, A. 4, P. 2, are to be paid in Sonauts : refer to page 127.

	S. R. A. P.		SON. R. A. P. D.P.

	300 . 0 . 0		313 . 8 . 2 595
	30 . 0 . 0		31 . 5 . 7 459
	4 . 0		4 . 2 162
	2		2 090
Sicca Rs. 10330 . 4 . 2		Equal Son. R.	10795 . 9 . 4 792

In the foregoing Tables no decimal part is given below the thousandth part of a Pie. To have carried the fraction lower, would (it is well known) in many cases afford but an approximation to accuracy, and at the same time would needlessly encumber the page. To facilitate the endeavours of persons desirous of greater exactness (which is unnecessary for business), the ensuing Table is subjoined,

No. 6,

Which shews the relative value of the different Rupees to eight places of decimals, by the hundred Rupees, the single Rupee, the Anna, and the Pie.

No. 7

Exhibits the Exchange between Calcutta and London, or Rupees converted into English money, from 100,000 Rupees to 1 Pie ; and from the rate of 1s. 8d. per Rupee to that of 3s. per Rupee. The following Example will explain the Use of this as well as the succeeding Tables, which are of the same nature :

If it be intended to remit to England the sum of Sicca Rupees 155432, A. 12, P. 9 ; to ascertain the value of the sum in English money, (supposing the rate of Exchange to be 2s. 6½d. per Rupee), refer to page 143.

TABLE V.

		9			1 1	719	
Sicca Rupees	155432	. 12 . 9	Equiv. to	£19752	. 18 . 4	1	219

No. 8

Contains the reverse of the foregoing Table, namely English money converted into Rupees, at the same rates of Exchange, from £10,000, to one farthing.

No. 9

Shews the Exchange between Calcutta and Bombay, or Sicca Rupees converted into Bombay Rupees, at the rates of from 101 to 116 of the latter per 100 of the former; from 100,000 Rupees to 1 Pie.

Denominations of the Bombay money :

100 Reas equal to 1 Quarter.

4 Quarters.....1 Rupee.

No. 10

Contains the reverse of the foregoing Table, namely Bombay Rupees converted into Sicca Rupees, at the same rates of Exchange, from 100,000 Rupees to 1 Rea.

No. 11

Shews the Exchange between Calcutta and Madras, or Sicca Rupees converted into Madras Rupees at the rates of from 101 to 110 of the latter per 100 of the former; from 100,000 Rupees to 1 Pie.

No. 12

Shews the Exchange between Madras and Calcutta, or Madras Rupees converted into Sicca Rupees, at the rates of from 90 to 99 of the latter, per 100 of the former; from 100,000 Rupees to 1 Pie. It was thought better to represent the Exchange between these two places thus, than as exhibited in No. 10, of which this Table would else have been almost a copy. The two Tables may now mutually aid each other.

No. 13

Contains the Exchange of Rupees into Dollars, from the rate of 201 Rupees to that of 212 Rupees per 100 Dollars; and from 50,000 Rupees to 1 Rupee.

No. 14

Contains the reverse of the foregoing Table—namely, Dollars converted into Rupees at the same rates of Exchange, from 50,000 Dollars to 1 Dollar.

No. 15

Shews the Exchange of Rix and Spanish Dollars converted respectively at the same rate of Exchange—namely, 125 Rix Dollars per 100 Spanish Dollars; from 1 Dollar to 100,000.

No. 16

Shews the Exchange of Spanish and Mocha Dollars converted respectively at the rate $121\frac{1}{2}$ Mocha Dollars or Sequins per 100 Spanish Dollars; from 1 Caveer to 10,000 Dollars.

Denominations:

80 Caveers are equal to 1 Dollar.

No. 17

Gives the Conversion of Gold Mohurs or Rupees, from 1 to 10,000, into 13, 11, 10, 9, and 8 per Cent. and Current Rupees, at the rate of 16 Sicca Rupees per Gold Mohur, omitting fractions lower than a Pie.

No. 18.

This Table shews the Exchange of the old Madras currency of Pagodas, Fanams, and Cash, into the new currency of Rupees, Annas, and Pies, at the regulated rate of 350 Rupees per 100 Star Pagodas ; from 1 Cash to 1 Pagoda, and from 1 Pie to 1 Rupee.

No. 19.

Contains the rates of Exchange adopted for the adjustment of the Calcutta and Madras Customs.

EXCHANGE, No. 1.

Current Rupees into 1 and 2 per Cent. Rupees.

Current Rupees.			1 per Cent Rupees.				2 per Cent Rupees.

TABLE IX.

This Table shows the relative Value or Proportion of different Weights to each other.

No. 1

Contains English Avoirdupois Weight converted into Bengal Factory and Bazar Weights, from 500 Tons to 1 Ounce. The following Example will serve as a Rule for the Use of this and the two following Tables, Nos. 2 and 3.

	TONS	C.	Q.	Lbs.	
Required the Bazar Weight of...	47	6	1	14	
					E. M. S. C. D. P.
45 Tons.....	1227	10	14	5	
6 Cwt.....	8	7	4	4	
1 qr.....	0	13	10	2	
14 lbs.....	0	6	13	1	
45 . 6 . 1 . 14 equal to Bazar Maunds	1235	38	10	17 $\frac{1}{2}$	

Denominations :

ENGLISH WEIGHT.
 16 drams make 1 ounce
 16 ounces 1 lb.
 28 lbs..... 1 quarter
 4 qrs..... 1 Cwt.
 20 Cwt. 1 Ton.

BENGAL WEIGHT.
 16 Chittacks make 1 Seer
 40 Seers 1 Maund.

No. 2

Contains Bazar Weight converted into Factory and English Weights, from 10,000 Maunds to 1 Chittack.

C c

No. 3

Contains Factory Weight converted into Bazar and English Weights, from 10,000 Maunds to 1 Chittack.

No. 4

Exhibits Canton Weight converted into English Troy Weight, and *vice versâ*, at the rate of 120 oz. 16 dwts. per 100 tales; from 1 cash to 50,000 tales; and from 1 grain to 50,000 ounces, including in both cases the decimal parts.

Denominations:

CANTON WEIGHT.	ENGLISH WEIGHT.
10 Cash make 1 Candarine	24 grains make 1 pennyweight
10 Candarines 1 Mace	20 pennywts... 1 ounce
10 Mace 1 Tale.	12 ounces 1 pound troy.

No. 5

Exhibits a general view of the principal commercial Measures and Weights of India compared with those of England, Bengal, Madras, and Bombay.

Denominations:

ENGLISH and BENGAL.—See No. 1.

MADRAS.	BOMBAY.
40 Pollams equal to 1 Vis	30 Pice equal to 1 Seer
8 Vis 1 Maund	40 Seers 1 Maund
20 Maunds 1 Candy.	20 Maunds 1 Candy.

Note.—For the Value of the Denominations, see the beginning of the Table.

TABLE X.

TIME.—No. 1

Shews the number of days from any given day in one month to the same day of any other month. It must be observed that in Leap Year, if the end of the month of February be included in the time, one day must be added. If it be desired to find the number of days from a given day in one month to a different day in another, the difference between the dates must be added to, or subtracted from (as the case may be) the amount. For Example:—To find the number of days between the 5th of January and 12th of November:—

From 5th of January to 5th of November.....304 Days.

From 5th to 12th of November..... 7

311

If it be Leap Year, add..... 1

Answer..... 312

No. 2

Shews the decimal parts for each and all of the days in the twelfth part of a year, consisting of $365\frac{1}{4}$ days.

TIME, No. 1.

Number of Days from one Month to another.

Between	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.
JANUARY	365	334	306	275	245	214	184	153	122	92	61	31

AN ACCOUNT

OF THE

Money, Weights, and Measures,

OF

*India, China, Persia, Arabia, and other Parts of the East ;
under the respective Places, alphabetically arranged.*

ABYSSINIA.

COINS.—Spanish Dollars pass at Massuah, on the Red Sea, and Venetian Sequins, as well as Austrian Dollars, called Patakas, circulate throughout other parts of the kingdom. Large payments are made in ingots of gold, weighed by the Wakea, or Abyssinian ounce; and bricks of salt dug out of the mines, about 80 of which are valued at a Wakea of gold, are used for smaller payments, as well as glass beads, called Borjookes. The proportions of monies at Massuah are as follow :

3 Borjookes or grains	} are equal to	1 Kibear.
10 Kibears		1 Diwani, or Para.
4 Diwanis		1 Harf, or Dahab.
23 Harfs		1 Pataka, or Dollar.
2½ Patakas		1 Sequin.

The Wakea is reckoned to be worth 11½ Patakas.

WEIGHTS.

10 Drachms	} are equal to	1 Wakea = 400 grains troy.
12 Ditto ...		1 Mocha.
12 Wakeas..		1 Rottolo, or Liter—10 oz. troy, or 10oz. 15½ dr. av.

The Mocha Vakia is to the Massuah Wakea as 5 to 6.

MEASURES.—The Ardeb for grain, at Gondar, contains 10 Madegas, each weighing 12 ounces Cairo weight, equal to about an eighth of an English bushel. But the Ardeb at Massuah contains 24 Madegas, and is therefore nearly ½ of a bushel.

The Cuba, a liquid measure, contains 62 English cubic inches, equal to 2½ pints.

The principal long measure is the Turkish Pic, ¾ of an English yard.

ACHEEN.

(N. W. Extremity of Sumatra.)

COINS.—Spanish Dollars, Rupees, and other foreign coin, pass current. They have a small gold coin, called a Manna, which serves to pay servants and other small disbursements; but it is of very base metal, and difficult to pass: also a small lead cash, of which about 2500 are usually obtained for a mace.

Accounts are kept as follows:

4 Copangs	} equal to	1 Mace.
4 Mace ...		1 Pardow.
4 Pardows		1 Tale.

In the gold dust trade, imaginary coins are adopted, viz. Tales and Maces of gold; and 5 of these are reckoned equal to 4 pieces of the same denomination of the common coin.

The gold dust is reckoned $9\frac{1}{4}$ touch of Malabar, or $22\frac{1}{2}$ Carats fine. A Buncal of gold is valued at 7 Tales of gold in merchandize, but at $7\frac{1}{2}$ Tales in goods.

WEIGHTS.—All goods are weighed by the Dotchin, which should be carefully examined and proved. The smaller the quantity of goods weighed at a time to the natives, under 100 catties, the more to the advantage of the seller.

The great weights are the Bahar, which equals 423 lbs. 6 oz. 13 drs. avoidupois, and contains 200 Catties, and 4000 Buncals.

One Chinese Catty and a half is commonly equivalent to a Malay Catty, which makes 3 Chinese Peculs equal to 1 Bahar; but this is under the true equivalent.

The lesser weights are as follow:

4 Copangs	} equal to	1 Mace.
8 Mace ...		1 Pagoda.
2 Pagodas		1 Tale. oz. dwts. gr.
5 Tales ...		1 Buncal = 1 . 10 . 21 troy.
20 Buncals.		1 Catty = 30 . 17 . 12

In gold, the Buncal is 92 touch, and is therefore worth £6. Os. 7 $\frac{3}{4}$ d.

The Buncal is often altered in its proportion to the standard number of Mace (80), at the pleasure of the Merchants, and consequently the Catty varies.

A Maund of 75 lbs. rice contains 21 Bamboos. The Bamboo consists of 4 Cauls, when the King's chop is on it; but it is reckoned commonly at 5.

MEASURES.—With the following they receive and deliver all kinds of grain:—

2 Chopas...	} equal to	1 Quarter.	lbs.	oz.	dr.
2 Quarters		1 Bamboo =	3	10	10 avoird.
8 Bamboos		1 Nelly.			
10 Nellies..		1 Guncha.			
10 Gunchas		1 Coyang.			

They have a particular measure for salt, called a Parah, which ought to contain 25 Punies or Bamboos, 80 of which make a Coyang, about $\frac{2}{3}$ of a Madras Garce.

Betel Nut is measured by the Parah swept off with a board, one of which, being counted, serves for a cargo. A Loxa of Betel Nut is 10,000 nuts, and, when good, should weigh 168 lbs.

The Corge of Cloth is 20 pieces.

AMBOYNA.

(*One of the Molucca or Spice Islands.*)

COINS.—All kinds of coins pass here. The following are the rates at which different foreign coins are current:—

New Ducatoon.....	80 Stivers.	Rix Dollar	48 Stivers.
Old Ducatoon	78 "	Rupce	30 "
Spanish Dollar	64 "	Star Pagoda	99 "
German Crown	60 "	Gold Mohur.....	480 "

Accounts are kept in Rix Dollars, divided as follow. The Rix Dollar may be valued at 3s. 4d. sterling, and its divisions in proportion.

4 Doits.....	} equal to	1 Stiver.
4 Stivers...		1 Dubbeltjee.
6 Stivers...		1 Schilling.
8 Schillings		1 Rix Dollar.

WEIGHTS.—Dutch and Chinese weights are in common use; and while the English had possession, goods were generally sold by avoirdupois. At present, heavy goods are weighed by either of the three kinds.

Gold and silver are weighed by the Catty, equivalent to 12288 Dutch Asen, or to 18 oz. 19 dwts. 14 gr. troy; the Catty is divided as follows:—

$$\left. \begin{array}{l} 4 \text{ Copangs} \\ 16 \text{ Mace ...} \\ 20 \text{ Tales ...} \end{array} \right\} \text{equal to } \left\{ \begin{array}{l} 1 \text{ Mace} \\ 1 \text{ Tale} \\ 1 \text{ Catty.} \end{array} \right.$$

Diamonds are weighed by the Carat of 4 grains; 2500 of which Carats make 1lb. Dutch troy weight. Hence 1 Carat is equal to 3.038 English grains.

The Bahar of Cloves weighs 550 lbs. Dutch troy, or 596½ lbs. avoirdupois. A Coyang of Rice contains 25 Peculs, 2500 Catties, or 3000 lbs. Dutch troy; equal to 3255½ lbs. avoirdupois.

MEASURES.—The Kanne, a liquid measure, of 91 English cubic inches, or $3\frac{1}{3}$ pints; and the Covid, a long measure of $18\frac{3}{4}$ English inches, are used throughout the Molucca Islands.

ANJENGO.

(*On the Coast of Malabar.*)

COINS.—Accounts are kept here in Fanams, Pice, and Budgerooks.

$$\left. \begin{array}{l} 4 \text{ Budgerooks.....} \\ 12 \text{ Pice, or 16 Vis} \end{array} \right\} \text{equal to } \left\{ \begin{array}{l} 1 \text{ Pice} \\ 1 \text{ Fanam.} \end{array} \right.$$

A silver Rupee is worth 6 new, or Gallion Fanams; and 7 old, or Travancore Fanams. All these are real coins.

In the Company's accounts, an Anjengo Fanam is reckoned worth $\frac{1}{3}$ of a Calicut Fanam, or $\frac{1}{4}$ of a Surat Rupee; which makes its intrinsic value about $4\frac{1}{4}$ d.

The mean rates of Exchange at which other foreign coins pass current here, are as follow, in Anjengo new Fanams:—

19½ Fanams	} equal to	1 Madras Pagoda
5 "		1 Current Rupee
13½ "		1 Ducatoon
70 "		1 Gold Rupee
23 "		1 Gubber, full weight
18 "		1 Carwar Pagoda
1 "		1½ Persian Shakee
20 "		1 Negapatam Pagoda
17 "		1 St. Thomas old Pagoda
14½ "		1 St. Thomas new Pagoda
22 "		1 Venetian.

WEIGHTS.—The Maund is 28 lbs. avoirdupois ; and 20 Maunds make 1 Candy, equal to 560 lbs. avoirdupois ; or 7 Bengal Factory Maunds, 20 Seers ; or 22 Madras Maunds, 3 Vis, 8 Polams ; or 20 Bombay Maunds.

MEASURE.—The Coid is 18 inches, or half an English yard.

ARABIA.

See the Places in alphabetical order.

ARACAN.

(Province of the Birman Empire.)

There was a mint here, where Silver Rupees were coined. An Aracan Rupee is equal to 12 Annas duss mussa ; or in Aracan to 3 Kahawons, each Kahawon being equivalent to 16 Puns of Cowries.

ARCOT.

(Capital of the Carnatic.)

RATES OF EXCHANGE.—The following are the proportions of different monies to 100 Star Pagodas, or 350 Rupees, at Madras :

Raumatunkee	at 80	Shannah Coss, or Venetians	94 $\frac{1}{2}$
Kurkee Pagoda, new.....	90 $\frac{1}{2}$	Sravanooddy Pagoda	133 $\frac{1}{2}$
Porto Novo Pagoda, new...	123 $\frac{1}{2}$	Venkertaputtee ditto	106 $\frac{1}{2}$
Sultany and Bahadre Pagoda	92 $\frac{1}{2}$	Naid Postaup ditto	172 $\frac{1}{2}$
Peddatala Bangalore Pagoda	94 $\frac{1}{2}$	Mahomed Shamjee, new ...	114 $\frac{1}{2}$
Doorgee	101 $\frac{1}{2}$	old.....	117 $\frac{1}{2}$
Atchootaroyee	99 $\frac{1}{2}$	Raussee Mohur	26 $\frac{1}{2}$
Pulleput	133 $\frac{1}{2}$	Canteria Fanam.....	1200
Sharekhauny	96 $\frac{1}{2}$	Chuckery ditto	2709 $\frac{1}{2}$
Pulkbunder Kurkee	92 $\frac{1}{2}$	Raussee Rupee 1st sort.....	375
Pulicat	106 $\frac{1}{2}$	Narrainput and Neelakunttee	
Wundawash	117 $\frac{1}{2}$	Rupee	400

AURUNGABUNDER.

(In the Deckan.)

COINS.—Accounts are kept in Rupees, Carivals, and Pice; 12 Pice making a Carival, and 50 Carivals a Rupee. Cowries are current in Scindy, and are occasionally circulated here at 48 per Pice. Bombay money and other foreign coins pass here. There is a difference of 1 dwt. 11.78 grs. troy between the weight of 100 gold Venetians at Judda and at Bombay; viz.

	oz. dwts. grs.		
Weight at Judda.....	11	4	10.50
Ditto, at Bombay.....	11	2	22.72
	0	1	11.78

WEIGHTS.—Gold and silver are weighed by the Tola, equal to 179 English grains nearly; heavy goods by the Maund, equal to 74 lbs. 5 oz. 7 dr. avoirdupois; the divisions as follow:

SMALL WEIGHTS.		GROSS WEIGHTS.	
24 Moons	} make {	4 Pice...	} make {
6 Ruttees		16 Annas	
12 Massas		40 Seers	
			{ 1 Anna
			{ 1 Pucca Seer
			{ 1 Maund.

Diamonds and Pearls are sold by Hubbas and Ruttees; 8 Hubbas equal to 1 Ruttee, about 2 grains troy.

MEASURES.—The Measures for Grain and Cloth are as follow:—

GRAIN MEASURE.		LONG MEASURE.	
4 Puttoes	} make {	1 Garce	} equal to {
4 Twiers		16 Garces	
60 Cossas		1 Guz of Cloth at Tatta	
			{ 2 in. English
			{ 1 Guz; but
			{ 34 inches.

The Carival weighs 24 Cutcha Seers. The Carival of Barley is 19 Pucca Maunds; of Paddy, 20 Pucca Maunds; and of Wheat, 22 Pucca Maunds, or 21 Bombay Parahs.

BANDA.

(One of the Molucca or Spice Islands.)

COINS.—Accounts are kept in Rix Dollars, Schillings, and Stivers.

16 Pennings ...	} equal to {	1 Stiver
6 Stivers		1 Schilling
8 Schillings...		1 Rix Dollar.

Spanish Dollars are current here, and are exchanged into Rix Dollars, at 125 Rix per 100 Spanish. (See TABLE V. No. 15.) The Rix Dollar may be valued at 3s. 4d.

WEIGHTS.—The Catty weighs $5\frac{1}{2}$ lbs. Dutch, or $6\frac{1}{8}$ lbs. avoirdupois. The Bahar is 100 Catties, or 610 lbs. avoirdupois. Nutmegs are sold by Dutch troy weight, one pound containing 7596 grains English troy weight, or 1 lb. 1 oz. $5\frac{1}{2}$ drs. avoirdupois.

A Soekel of Nutmeg-blossoms is 28 Catties, or 170 $\frac{1}{2}$ lbs. avoirdupois.

BANJAR MASSIN.

(On the Island of Borneo.)

COINS.—Spanish Dollars are the chief currency, with a few Coins from Batavia, and Chinese Cash for small change. The following Coins likewise circulate:—

Pillar Dollars, which, if full weight, pass for the same as Spanish.

French Crowns; there is a loss on these, if taken to China.

Rupees of various kinds, liable to the same objection.

Ducatoons, which pass at the rate of 125 Spanish Dollars for 100

Ducatoons.

WEIGHTS.—Those in common use for gross articles are the Pecul and Catty; the small weights are Teeas, Mace, and Malaboorong:—

3 Malaboornings	} equal to {	1 Teea
6 Teeas		1 Mace.
16 Mace		1 Tale = 614 grs.

MEASURES.—Grain is measured by the Ganton, 230 of which are a Last of Rice, weighing 3066½ lbs. avoirdupois. Cloth is measured by the Covid.

BANTAM.

(*On the Island of Java.*)

COINS.—Those current are Spanish Dollars, Ducatoons, Rupees, Schillings, Dubbeltjees, Doits, and Cash; the King having no Coin of his own. The Cash vary in their value. Accounts are kept decimally, thus:—

10 Peccoes	} equal to {	1 Laxsan
10 Laxsans		1 Catty
10 Catties		1 Uta
10 Utas ...		1 Bahar.

The Peccoe should contain 1000 Cash, but are frequently deficient. The price varies from 25 to 35 per Spanish Dollar.

WEIGHTS.—The weight for gold, musk, &c. is the Tale, equal to 1055 English Grains; nearly double the Chinese Tale.

Of the great weights 100 Catties make a Pecul; and 3 Peculs, one Bahar, which weighs 396 lbs. avoirdupois: but the Bahar of Pepper is 200 Kulacks, or Goelacks, and weighs 375 lbs. Dutch troy, or 407 lbs. avoirdupois. A Coyang of Rice is 200 Gantams. The Gantam is 8 Bamboos, or 32 Catties. The Coyang weighs 8000 lbs. Dutch troy, or 8681 lbs. avoirdupois.

The Pecul at Cheribon weighs 125 lbs. Dutch troy, or 135 lbs. 10 oz. avoirdupois; and the Tiayang of Rice is 2000 Catties, or 2640 lbs. avoirdupois.

MEASURES.—The long measure is the Hasta, which is 18 English inches.

For further information consult the ensuing article.

BATAVIA.

(*On the Island of Java.*)

COINS.—A new monetary system has recently been established in Java by the King of the Netherlands. A brief account of the former system may, however, still be useful.

Accounts were kept in Rix Dollars, an imaginary money, containing 48 stivers, and valued at 5s. sterling. But the currency consisted of the following Coins:—Rupees of 4 Schillings, 12 Dubbeltjees, 15 Cash, 30 Stivers, or 120 Doits. The Rupee valued at 3s. 1½d.; and the Stiver at 1¼d. Half Doit, Doit, and 2 Doit Coins of copper were in circulation.

In the new system, the monetary unit is the new Gulden or Florin of the Netherlands; but instead of decimal divisions, it is here divided as follows:—

4 Doits.....	} equal to {	1 Indian Stiver
5 Doits.....		1 Dutch Stiver
2 Dutch Stivers		1 Dubbel
3 Dubbels		1 Schilling
4 Schillings.....		1 Gulden.

A paper currency has been also established, consisting of Billets of 1000, 600, 300, 100, 50, 25, 10, 5, and 1 Guldens; which are convertible into specie on demand. For this purpose, Exchange Offices are erected at Batavia, Samarang, and Sourabaya; the two latter issue no paper of greater value than 100 Guldens.

The principal Coins of the Island are Patacks and Cash. The Patack is equal to 6 Mace, or 24 Cash. There are also pieces called Pities, composed of 4 parts lead and 1 part tin, 50 of which make 1 Stiver.

The rates at which foreign coins pass here are subject to variation; they are mostly valued, both silver and gold, according to weight and fineness. The following Coins are current, and are received in the Government Treasury at the rates of exchange here specified:

	Doits		Doits
Rupee of Java, Surat and		Old Ducatoon	at 312
Arcot.....at 120		Milled Ducatoon.....	320
Sicca Rupee..... 126		Gold Ducat of the Nether-	
American Dollar..... 240		lands	528
Spanish Dollar	264	Gold Rupee	1920

WEIGHTS.—Gold and Silver are weighed by the Dutch mark troy, divided into 9 Reals, each weighing 422 grains English, taking the mark at 3798 grains, which, according to Dr. Kelly, has been recently determined to be its true value at the London Mint, from attested standards transmitted from abroad.

The Dutch troy pound of 2 marks is used generally in foreign trade, but the Chinese weights are those in common use, viz.

16 Tales...	} equal to {	1 Catty = 1½ lb. Dutch troy.
100 Catties		1 Pecul 125 lbs. Ditto, or 135 lbs. 10 oz. avoird.
3 Peculs		1 small Bahar.
4½ Peculs		1 large Bahar.

The small Bahar is equal to 406 lbs. 14 oz. and the large Bahar to 610 lbs. 5 oz. English avoirdupois. Examination and comparison are, however, necessary to guard against deception.

MEASURES.—Rice and other Grain are sold by the Coyang, which should weigh 3300 lbs. Dutch troy, or 3581 lbs. avoirdupois; or in small quantities by the Timbang of 5 Peculs, or 10 Sacks. There is also the Kulack of 7½ Catties; and the Last of 46 Measures, each containing 5 Gantons.

The liquid measure generally used is the Kanne, containing 91 English cubic inches: thus 33 Kannes are equal to 13 English gallons. A Leager of Wine is reckoned 360 Rands, each Rand 10 Mursies; and a Leager of Arrack, 396 Rands.

A Vorn of Firewood is 225 feet long, and 4 feet high. The Ell of Stone is 10 inches long, 5 broad, and 2½ thick.

Of Long Measure, the Ell is 27 English inches; and the Foot, 12 Thumbs, or inches, Dutch or Rhineland measure, equivalent to 12⅔ inches English.

BEETLEFAKEE or BETELFAGUI.

(In Yemen, or Arabia.)

COINS.—All foreign coins pass current here; and as Coffee is always paid for in ready money, various kinds are met with. Payments are mostly made in Sequins and Spanish Dollars. The Commassee is a small copper coin, containing a little silver, and used in small payments. A Spanish Dollar is worth from 40 to 80 Commasseees. 100 Dollars in specie are equal to 121½ Piastres of account (see TABLE V., No. 16): hence this Piastre may be valued at 3s. 8½d. sterling.

Accounts are kept here in Piastres or Mocha Dollars of 80 Carats or Cavears; and also in Spanish Dollars, consisting of 40 Cavears. The Cavears are imaginary money, both here and at Mocha.

WEIGHTS.—These are as follow :—

15 Vakias..	} equal to {	1 Rattle.	
2 Rattles.		1 Maund.	lbs. oz. dr.
10 Maunds		1 Frazil, or Parcel	= 20 . 6 . 4 avoird.
40 Frazils..		1 Bahar	= 815½ lbs. avoird.

Of Coffee 14½ Vakias make a Rattle; of Dates, Jaggery, Candles, and Iron, 16 Vakias make a Rattle. The latter weight is only used in the Bazar. 7 Frazils in Mocha are equivalent to 10 Frazils in Beetlefakée. A bale of Coffee is 14 Frazils, and the allowance for tare, 8 Maunds.

A Tommond of Rice contains 40 Kellas, and weighs 168 lbs. avoirdupois.

Cotton is sold per Harraff, an imaginary money, 9 of which are equal to 11½ Mocha Dollars, or Piastres of account.

The weights at this place are seldom exact, though annually rectified by the Imaum's shroff.

MEASURES.—These are as follow :—

CLOTH MEASURE.	LIQUID MEASURE.
The Covid is 18 inches, English.	16 Vakias are equal to 1 Noosfia.
The Guz is 25 ditto.	8 Noosfias " 1 Caddy.
The long Iron Covid is 27 ditto.	The Caddy, or Gudda, contains about 2 Gallons.

BENCOOLEN.

(On the Island of Sumatra.)

COINS.—Accounts are kept in Dollars, sometimes called Reals, reckoned at 5s. sterling.

2 Satallies }	} equal to {	1 Sooka.
4 Sookas.. }		1 Dollar or Real.

WEIGHTS.—The Chinese Pecul is used in the Bazar. The Bahar weighs 560 lbs. avoirdupois. The Tale is 26 dwts. 12 grs. troy.

MEASURES.—The Coyang dry measure contains 800 Bamboos, each Bamboo equal to an English wine gallon.

BENGAL.—See CALCUTTA.

~~~~~  
B E R B E R.

(*In Nubia.*)

MONEY.—The common currency at this place, and all the way from thence to Sennaar, is Dhourra (a grain like millet), and Spanish Dollars; every thing of minor value has its price fixed in Dhourra, which is measured by Selgas, or handfuls. A Selga is as much as can be heaped upon the flat extended hand of a full grown man, and eighteen Selgas make a Moud or measure. These Mouds, which are of wood, are seldom trusted, the hand measure being preferred. Another substitute for money is the Dammour, a coarse cotton cloth, a piece of which, exactly sufficient to make one shirt, is called Tob, and is divided into 2 Ferde, each subdivided into 2 Fittige. In commerce 2 reals or dollars are called Kesme; 4 are called Mithkal; 8, or half an ounce, Nosfwokye; and 16, or an ounce, Puma, or Wokye. These denominations were taken originally from the gold weights, 1 ounce of gold being generally worth about 16 dollars; but they have now become fixed appellations, and 16 dollars are called Wokye, even though the ounce of gold should be worth 18 or 20 dollars.

~~~~~  
BINTANG.

(*Island in Malay Straits.*)

COINS.—All bargains are made for Spanish Dollars, which are the principal Coin. Chinese Cash pass current for small payments.

WEIGHTS.—All goods are bought and sold by the Chinese Pecul and Catty.

BIRMAN EMPIRE.—See RANGOON.

BOMBAY.

COINS.—Accounts are kept at Bombay in Rupees of 4 quarters and 400 Reas.

		£	s.	d.	q.	d.p.
2 reas	} make	1 urdee	0	0	0	60
4 reas		1 doogany, or single pice	0	0	0	1 20
6 reas, or 3 urdees		1 doreea	0	0	0	1 80
8 reas, or 4 urdees		1 fuddea, or double pice	0	0	0	2 40
31 fuddeas, or pice		1 anna	0	0	1	3 50
12½ pice, or 4 annas		1 quarter rupee	0	0	7	2
25 pice, or 8 annas		1 half rupee	0	1	3	
50 pice, or 16 annas		1 rupee	0	2	6	
5 rupees		1 paunchea	0	12	6	
3 pauncheas, or 15 rupees		1 gold mohur	1	17	6	

The annas and reas are imaginary money.

Remarks on the Coins of Bombay.

SILVER.—The old Bombay Rupee is the same as was coined at Surat under the Mogul Government. It weighed 178.314 grains, and contained 1.24 per Cent. of alloy. By an ancient agreement with the Nabob of Surat, the Rupee of both Governments was to circulate through both at an equal value; while they mutually pledged themselves to keep up the Coin to its exact standard of weight and fineness. The Nabob, however, did not keep to this agreement; for his Rupees were found soon afterwards to contain, instead of 1.24 per Cent. of alloy, no less than 10, 12, and even 15 per Cent. The consequence of this was, that all the Bombay Rupees were carried to Surat to be recoined. This mint was entirely stopped in its silver coinage for more than twenty years, and the circulation of silver was occupied by the Surat Rupee.

In this situation of things the merchants could not afford to coin their bullion here, and therefore Bombay was long without a silver coinage of its own; when Government in 1800 ordered the Surat Rupee to be struck in this mint, and since that time the Rupee has been kept at an equal value in both mints. In both the Silver Rupee weighs 179 grains, and contains 7.97 per Cent. of alloy.

GOLD.—In the year 1774 the Gold Mohur was made of the same weight as the Silver Rupee. It was ordered to be of the fineness of a Venetian, and to pass for 15 Silver Rupees. In this coinage, therefore, 14.9 grains of silver represented one grain of gold; for such is the proportion between the quantity of gold in this Gold Mohur, and the Silver in 15 old Bombay Rupees. When the Surat silver currency had occupied the circulation, this proportion between gold and silver was quite destroyed; so that gold coined according to the regulation of 1774, was now exchanged for no more than thirteen times its weight in silver, and often for much less.

In order to remedy this, and to bring back the Coins of gold and silver to nearly their ancient proportions, and their relative value in the market, it was ordered in 1800, that the Gold Mohur should be of the same weight as the Silver Rupee, that it should contain the same quantity of alloy, and that it should pass for 15 Rupees.

The present weight, fineness, and sterling value of the Gold and Silver Rupees of Bombay are as follow, according to the new money system :

	Grains pure.	Grains Alloy.	Grains gross Weight.	Value. £ s. d.
Gold Rupee	164.68	14.32	179	1 9 14 ¹ / ₂
Silver Rupee	164.68	14.32	179	0 1 11

From the following recent official Report from the Bombay Assay Office, the value of the Coins current at Bombay, or imported from other parts, may be ascertained with little difficulty, and with perfect accuracy.

ASSAY REPORT, showing the Mint Standards of Bombay, Calcutta, Madras, and England, and the Weight, Purity, and intrinsic Value, by Assay, of all the Coins, either current in the Company's Territories under the Presidency of Bombay, or imported as Bullion.

	Gr. dec.	Per Ct. Dvs.	Gr. dec.	Rs. dec.	
Shree Sica	172.00	91.50	157.58	85.597	— Coined formerly at Poonah, and is esteemed better than the Ankoosee Rupees by one per Cent.*
Haltee Sica	174.75	96.25	168.19	102.118	— Coined at Poonah for mercantile purposes.
Waulgaum	172.55	91.50	157.88	95.572	— Coined at Waulgaum; bears a discount with the Ankoosee Rupees of eight Annas per Cent.*
Purkee	178.88	94.25	168.59	102.376	— Coined in Candahar; bears by Schindin, and is perhaps the same coin as assayed under the name of Berhanpoor Sica.
Channagoodree	171.00	84.75	144.92	88.060	— Coined at Channagoodree, and bears a discount with the established Ankoosee of two per Cent.*
Mullashoor Bagulooda	172.5	90.00	153.54	93.118	— Coined at Bagulooda; current in the Doab, Malwa, &c.
Shapoorsee	174.00	87.00	151.38	91.924	— Coined at Shapoor, and produces 102 Ankoosee per 100 at Poonah.*
Kittoor Shapoorsee	174.00	86.25	150.07	91.015	— This Coin was struck originally at Kittoor; this mint has continued the coinage during the last 25 years; it is current in the district of Pettikorra, Belgaum and Pashlapoor.
Ougien	173.00	90.25	156.13	94.000	— Coined at Ougien and Challemaishwar; passes in Poonah at a premium of two per Cent. for Ankoosee Rupees; current throughout Malwa.
Indore	174.50	92.50	161.41	98.000	— Coined at Indore; current throughout Malwa.
Gorind Bukah	171.16	78.00	153.50	81.006	— Coined at Aurangabad; is issued in payment to the troops at 120 for 100 Company's Rupees.
Nagpore	166.75	86.5	144.22	87.575	— Coined at Nagpore, and is inferior at Poonah to the Ankoosee Rupee by four per Cent.*
Broach	177.3	97.02	153.07	94.440	— The only currency in Broach; current also at Surat, Kalra, &c. &c.
Old Brouch	177.06	94.25	166.88	101.335	— Coined formerly at Brouch; now disappearing.
Camlay	177.50	84.58	146.97	83.247	— Current in the Nalood's Districts, Kalra, &c.
Bahay	177.50	84.58	146.97	83.247	
Walkerye	177.30	87.75	156.65	94.532	
Ashay	177.50	86.5	152.08	82.703	
Mukunye	176.69	87.5	154.54	85.942	— Coined at Baroda, also current at Kalra, &c. &c.
Wullahy	175.56	85.00	150.07	81.711	
Ahmedabad Sica	179.99	84.00	151.15	91.771	— Coined formerly at Ahmedabad.
New	180.75	85.00	151.15	93.772	— Present currency there; current also at Anjar and throughout Cutch.
Haltee	174.77	96.25	168.19	102.117	— Coined at Ahmedabad, current within the walls of the city only.
Cutch Kowrie	72.16	68.75	43.85	31.513	— Coined at Anjar, current throughout Cutch.
Porebunder	74.50	69.75	51.96	31.513	— Coined at Porebunder.
Persian	159.12	94.50	150.36	91.309	— Imported as Bullion; current in the Persian Gulf.
New Persian	141.3	91.50	135.59	81.005	— do.
Goa	168.50	86.00	144.91	87.993	— do.
Mysore or New Holker	173.56	94.25	165.58	93.300	— Coined formerly at Mysore, now disappearing.
Mulkpoor	175.2	91.25	164.97	75.461	— Coined at Mulkpoor, and bears a discount of 12 per Cent. with the Ankoosee.*
Merlich Hookaree	172.6	84.00	144.98	88.039	— Coined at Merlich; bears a discount in Poonah of five per Cent.*
Narrainpet	177.5	88.50	158.86	84.321	— A species of Hyderabad Rupee coined at Narrainpet, but little known at Poonah; rate uncertain, from 9 to 12 per Cent. discount.

Perkansee Neweset	177.9	88.75	157.88	98.875	Coined at Chilli in 1817, by the Independent.
Spanish Independent Dollars	420.5	89.50	376.34	228.537	

By order of the Honourable the Governor in Council,

J. FARISH, Secretary to Government.

BOMBAY ASSAY OFFICE, 4th August, 1821.

* The Rates of Exchange marked thus (*), were established previous to the Assay which was made in the year 1819, and may have been since corrected.

† The Coins marked thus (†), in the course of circulation, frequently receive numerous marks or claps, and when thus disfigured, are called chupes, &c., and bear a discount, greater or less, according to circumstances.

WEIGHTS.—The English weights being in common use here, and at all the other Presidencies, the following account of their relative proportions may be found useful.

The two principal weights established in Great Britain, are the avoirdupois and troy weights; the last is again divided into diamond and money weights; the grain is understood to be a grain of wheat, gathered in the middle of the ear.

AVOIRDUPOIS WEIGHTS.

3 scruples . . .	} make	1 dram
16 drams . . .		1 ounce
16 ounces . . .		1 pound
28 pounds . . .		1 quarter
4 quarters . . .		1 Cwt.
20 Cwt.		1 ton.

Comparison between Troy and Avoirdupois.

175 troy lbs. . .	} make	144 avoirdupois lbs.
175 troy ounces		192 avoirdupois oz.
1 troy lb. . . .		3760 grains
1 avoirdupois lb. . .		7000 grains
1 avoirdupois oz. . .		437½ grains
1 troy oz.		480 grains.

TROY WEIGHTS.

24 grains	} make	1 penny wt.
20 penny wts. . .		1 ounce
12 ounces		1 pound.

The moneyers have a peculiar subdivision of the grain troy thus:

24 blanks	} make	1 periot
20 periot		1 droit
24 droits		1 mite
20 mites		1 grain.

DIAMOND WEIGHTS

Are carats, each carat being divided into 4 grains or 64 parts. The ounce troy contains 150 such carats; therefore this carat is 3½ grains troy; hence 5 diamond grains are equal to 4 gold grains.

The other weights in use at this Presidency are the under-mentioned:—

SILVER WEIGHTS.

6 chows	} make	1 goonze, or gr.	Silver is commonly sold from 96 to 100 single pice per tola; but computations in money are made by fuddeas, or double pice. The tola equals in weight the silver rupee.
2½ goonzes . . .		1 vall	
40 valls		1 tola, or rupee	
24 tolas		1 seer	
32½ tolas . . .		1 lb. troy.	

The Bombay great weights are Pice, Seers, Maunds, and Candies, thus divided:—

30 pice	} make	1 seer	avoirdupois	lbs.	oz.	drs.
40 seers		1 maund		23	0	0
20 maunds		1 candy		560	0	0

Although the above represent the commonly received standard of gross weights at Bombay, yet there are a great number of commodities which are not governed by them, but sold by the Surat Maund, which, notwithstanding it is said to contain only 40 Seers, is sometimes 41, 42, 43, through all the intermediate gradations up to 46; nor is the Candy uniformly confined to 20 Maunds.

MEASURES.

LONG MEASURE.

18 inches or tusso } make { 1 hauntercubit
28 inches } make { 1 guz.

The English yard of 36 inches is in common use.

N. B. Piece goods, and a few other articles are sold by the corgé of 20 pieces.

SALT MEASURE.

100 baskets } make { 1 anna = 2½ tons
16 annas. . } make { 1 rash = 40 tons.

DRY MEASURE.

2 tiprees. . } make { 1 seer
4 seers . . } make { 1 adowley, or pily
16 adowlies } make { 1 parah
8 parabs. . } make { 1 candy.

These measures serve for wheat, and all kinds of grain, except rice or batty, which is sold by

BATTY MEASURE.

2 tiprees. . } make { 1 seer
7½ seers . . } make { 1 adowley
20 adowlies } make { 1 parah*
6½ parabs. . } make { 1 candy
25 parabs. . } make { 1 moorah†
4 candies } make { 1 moorah.

* Equal to 34lbs. 8 oz. 12 drs.

† Equal to 863lbs. 12oz. 12 drs.

A bag of rice weighs 6 maunds, or 168 lbs. and is Madras Mds. 6 5 30.4

A Bombay candy is Do. 22 3 8 or equal to 25 bushels.

Pearls have here, as at Madras, a real and a nominal weight:—

REAL WEIGHT.

4 annas . . } make { 1 quarter
4 quarters } make { 1 ruttee
24 ruttees } make { 1 tank.

The tank equals 72 grains troy.

NOMINAL WEIGHT.

16 buddams } make { 1 docra
25 docras . . } make { 1 quarter
4 quarters } make { 1 chow.

The nominal standard is 1 tank to 330 chow.

RULE for reducing the real to the nominal weight:—Multiply the square of the number of tanks by 330, and divide by the number of pearls; the quotient is the number of Bombay chow.

By the Cutch weight are sold Jaggery, Sugar, Tamarinds, Turmeric, Ginger, Mustard, Capsicum, Betel-nut, Assafetida, Garlic, Spices, Pepper, Cardamoms, Sandal-wood, Wool, Silk, Cotton, Thread, Ropes, Honey, Wax, Lac, Oil, Ghee, &c. The two latter are frequently sold by measure.

~~~~~  
**BORNEO, ISLAND OF**—See **BANJAR MASSIN**.  
~~~~~

BORNEO, TOWN OF.

(On the Island of same Name.)

COINS.—Spanish Dollars and Chinese Cash constitute the common currency. The Chinese Kangash are used in the same manner as at Sooloo.

WEIGHTS.—These are the Chinese Pecul and Catty.

~~~~~  
**BOURBON, ISLE OF**—See **MAURITIUS**.  
~~~~~

BUNDAREEK, OR BENDER RIGK.

(In the Persian Gulf.)

COINS.

4½ Marmodies	} equal to {	1 Naderee
64 Ditto		1 Gold Mohur.

WEIGHT.—The Maund weighs $7\frac{1}{2}$ lbs. avoirdupois.

BUSHIRE, OR ABUSCHÆHR.

(In the Persian Gulf.)

COINS.—Many European and most of the Asiatic coins pass here at the same rates as at Bussorah; but the price fluctuates in proportion to the quantity of specie in the Market.

Accounts are kept in Floose, Mamoodies, and Tomands; 100 Mamoodies making 1 Tomand.

WEIGHTS.—Pearls are sold by the Abas, a weight equal to about $3\frac{1}{2}$ diamond grains, or 2.875 gold grains.

BUSSORAH.

(A City of Arabia, near the Gulf of Persia.)

COINS.—Here, as at the last-mentioned place, various sorts of money are met with, which are constantly fluctuating in value; being higher during the monsoon than after it, when all the foreign ships are gone. Few of the coins current in Persia are coined in the country. The consequence of this want of standard coins, and the introduction of foreign money, is such a constant variation in the price, that it is impossible to ascertain, for any length of time, the value of gold coins; and the Governors of the different districts often alter their standard value without assigning any reason. All coins are taken at a disadvantage, except the Tomand, and the Turkish coins. The latter have a fixed value; though merchants, in dealing with strangers, generally rate them something above their legal price.

Accounts are kept in Mamoodies of 10 Danims or 100 Floose. 100 Mamoodies make 1 Tomand, which is valued at 15 Rupees. The real money is as follows:—

10 Floose	} equal to	1 Danim.
12 Danims.....		1 Mamoodie.
4½ Mamoodies..		1 Kruse or Dollar.
75 Ditto.....		1 Tomand Zelotte.
100 Ditto.....		1 Tomand Howess.

WEIGHTS.—Gold and silver are weighed by the Cheki of 100 Miscals, or 150 drachms. The Miscal weighs about 72 English grains. A Miscal of the finest gold is worth about 22½ Mamoodies: a Cheki of fine silver is worth 180 Mamoodies nearly; hence, the Mamoodie is equal to 3½ grains of fine gold, or 40 grains of fine silver, or about 5½d. sterling.

The Pearl weight is 72 Habbab, or 27 Batta Surat, equal to 1 Miscal, which is equivalent to 14 oz. 19 dwts. 6 gra. avoirdupois.

The great weights are the Maund atteree, the Maund sofy or sessee, and the Oka of Bagdat.

1 Vakia.....	} equal to	19 oz. avoird.	oz.
2½ Vakias tary		1 Oka of Bagdat = 47½ avoird.	
14½ Vakias tary		1 Rattle.	
24 } Vakias tary			lbs. oz.
or 25 } Vakias tary		1 Maund atteree = 28 . 8 avoird.	
or 26 } Vakias tary			
24 Vakias sofy, or }	}	1 Maund sofy ... = 90 . 4 avoird.	
76 Vakias tary ... }			
117 Vakias tary		1 Cutra of Indigo = 138 . 15 avoird.	

The Maund sofy is equal to 1 Bengal Factory Maund, 8 Seers, 5½ Chittacks; and the Maund atteree to 15 Seers, 4½ Chittacks.

There are sundry allowances made on delivering of goods beyond the foregoing weights, viz.

26 Vakias per Maund,	for Ginger, Pepper and Coffee.
25 Ditto	for Cardamoms, Sugar Candy, and Benjamin.
24 Ditto	for Sugar and all kinds of Metals.

The Maund for Cotton is equal to 2 Surat Maunds; and for Indigo, 3 Surat Maunds, 35 Seers. Rice is sold at 78½ Vakias per Maund sofy.

The weights of the Arabians in the Bazars differ from the above, which are those used by Europeans settled at Bussorah; and likewise vary among themselves. The Vakia tary, which should be about 115 Miscals, varies from 110 to 118.

MEASURE.—The Guz or Cubit is about 37 English inches; 93 being equal to 100 yards, English.

CACHAO. (*In Tonquin.*)

COINS.—Cash are the only coins here, and are of two sorts, large and small: 600 large and 1000 small Cash make 1 Maradoc. Accounts are kept in Tales, Mace, and Candarines; all of which are regulated by the price of Maradoes and copper Cash.

The price of silver coins varies according to the quantity of silver brought in: of this variation the Chinese take advantage. Sometimes they allow 28 Maradoes for a bar of silver of 10 Tales weight; at others not more than 21. All the Mexican and Pillar Dollars imported are run into bar silver; these bars should weigh 10 Tales each. They frequently alloy them, so that they are seldom so good as the Dollar silver; though in payments they expect an allowance of three per cent., to make it their standard, as they term it.

WEIGHTS.—All goods are weighed by the Chinese Dotchin. The King's weights hold out full 132 lbs. to a Pecul of 100 Catties, but every person should have a true Dotchin of his own. The Tale equals 1 oz. 4 dwts. $14\frac{3}{4}$ grs., being about 11 grains more than the China Tale.

MEASURES.—The Chinese Covid and Punta are in common use for long measure.

CALCUTTA IN BENGAL.

COINS.—Accounts are kept here in imaginary money, called Rupees, either Current or Sicca, with their subdivisions, Annas and Pice; 12 Pice make 1 Anna; 16 Annas 1 Rupee; and 16 Rupees 1 Gold Mohur. To this currency must all the real specie be converted, before any sum can be regularly entered into a merchant's book. The Company keep their accounts in Sicca Rupees, which bear a Batta of 16 per Cent. against the Current.

The Coins current are Gold Mohurs, with their subdivisions, halves and quarters; Sicca Rupees, halves and quarters; Annas, Pice, and half Pice. The two last are of copper.

In 1766 the Bengal Gold Mohur weighed 179.66 grains, was of the fineness of 20 Carats, and passed for 14 Silver Rupees. The gold was here overvalued, for it passed in proportion to silver, as 169.45 to 1. In 1769 it was ordered that the Bengal Gold Mohur should weigh 190.773 grains, and in this coinage gold was valued to silver nearly as 14.8 to 1; and, by Regulation 35, Anno 1793, it was directed that the nineteen Sun Gold Mohur should weigh 190.894 grains, and contain $\frac{3}{4}$ of a grain in 100 of alloy, and that it should pass for 16 nineteen Sun Sicca Rupees. Here gold is valued in proportion to silver as 14.85 to 1.

Gold Mohurs are coined only at the mint of Calcutta; at the subordinate mints of Benares and Furruckabad, silver alone is coined. The fineness of both metals is the same as English standard gold, $\frac{11}{12}$. The following statement shews the present weight, fineness, and sterling value of the Coins, reckoning the value of gold at £3. 17s. 10½d. per standard ounce; and silver at 5s. 2d.

	Grains pure.	Grains alloy.	Grains gross weight.	Value. £ s. d.
Gold Mohur	187.651	17.059	204.710	1 13 2½ $\frac{2}{3}$
Sicca Rupee	173.923	15.993	191.916	0 2 0½ $\frac{5}{8}$
Furruckabad Rupee ..	165.215	15.019	180.234	0 1 11½ $\frac{5}{8}$

By Regulation, 1819, the coinage of the Benares Rupee is discontinued; and the Furruckabad Rupee made the legal coinage of Benares.

It will be observed that the alloy has been increased; a regulation which took place in 1819, whereby much expence is spared in refining. The charge for coining and for refining is the same at all the mints, for silver; namely, 2 per cent., if the bullion be of the standard fineness; but where it differs, a proportional charge of from $\frac{1}{4}$ to 2½ per cent. is made for refining.

See also the Assay Report, 1821—BOMBAY.

The standard of the Bengal money has ever been silver. Gold is occasionally coined, but the great bulk of the currency is silver. The most common silver coin is the Rupee of 1 Sicca, or 10 Massa weight.

These Rupees were formerly called Sicca Rupees only during the year after their coinage, when the batta they bore on Current

Rupees was 16 per cent.; the second this was reduced to 13, and the third and following years the batta was 11 per cent.; they were then called Sonaut or Sunat Rupees. But with a view to abolish this distinction, all the Rupees coined of late years by the East India Company, have been dated the nineteenth Sun, that is the 19th year of the Mogul's reign; and by Regulation 35, Anno 1793, it was ordered that the nineteen Sun Sicca Rupees should be received as the legal coin of Bengal, Bahar, and Orixia.

There are various other kinds of Rupees to be met with in Bengal, whose fineness and weight are different, though their denominations are the same. From this, and from the natives frequently punching holes in the Rupees, and filling up the vacancy with base metal, and their wilfully diminishing the weight of the coin after coming from the mint, the currencies of Rupees from the different provinces are of different values. This defect has introduced a custom of employing shroffs or money-changers, whose business is to set a value upon these different currencies, according to every circumstance, either in their favour, or their prejudice. When a sum of Rupees is brought to one of these shroffs, he examines them piece by piece, and arranges them according to their fineness; then by their weight; he then allows for the different legal battas upon Siccas and Sonauts; and this done, he values in gross by the Rupees current what the whole are worth; so that the Rupee current is the only thing fixed, by which coin is valued.

A Current Rupee is reckoned at 2s., and a Sicca Rupee of account commonly at 2s. 6d.

A Lac of Rupees is 1,00,000; and a Crore, 100 Lacs, or 1,00,00,000 Rupees; and in accounts, sums are distinguished into Crores, Lacs, and single Rupees, by marks or divisions, as in the foregoing examples.

Cowries, small white glossy shells, are made use of for small payments in the Bazar, and are generally thus reckoned:

4 Cowries	} equal to {	1 Gunda
20 Gundas		1 Pun
4 Puns ...		1 Anna
4 Annas		1 Cahun, which is about $\frac{1}{4}$ of a Rupee.

But they rise and fall according to the demand there is for them, and the quantity in the Market.

THE FOLLOWING IS A TABLE OF THE DIFFERENT KINDS OF RUPEES CURRENT AT THE PRESIDENCY,
WITH THEIR RELATIVE VALUE TO EACH OTHER.

Current Rupees compared with other Rupees.

	R.	A.	P.

WEIGHTS.—Great Weights are Maunds, Seers, Chittacks, and Siccas, thus divided:—

$$\left. \begin{array}{l} 5 \text{ Siccas} \\ 16 \text{ Chittacks} \\ 40 \text{ Seers} \end{array} \right\} \text{are equal to} \left\{ \begin{array}{l} 1 \text{ Chittack.} \\ 1 \text{ Seer.} \\ 1 \text{ Maund.} \end{array} \right.$$

There are two Maunds in use here, *viz.* the Factory Maund, which is 74 lbs. 10 oz. 10.666 drs. avoirdupois; and the Bazar Maund, which is 10 per cent. better, and is 82 lbs. 2 oz. 2.133 drs.

80 Sicca Weight equal to a Calcutta Bazar Seer.

60 Ditto a Serampore Seer.

82 Ditto a Hooghly Ditto.

84 Ditto a Benares Mirzapore Ditto.

96 Ditto an Allahabad and Lucknow Ditto.

A Calcutta Factory Seer is equal to 72 Sicca weight, 11 Annas, 2 Puns, 10 Gundas, 3.63 Cowries.

GOLD AND SILVER WEIGHTS.

4 punkos.	} are equal to	1 dan or grain.
4 dans ..		1 rutty.
6½ ratties..		1 anna.
8 ratties..		1 massa.
10 massas.		1 sicca weight
		= 179½ grains
		troy, or 6.5706
		drs. avoird.
100 ratties..		1 tolah.
12½ massas.		1 tolah.
16 annas...		1 tolah.
166½ ratties..	}	1 mohur.
13,28 massas.		1 mohur.
17 annas...		1 mohur.

The tolah is equal to 224,588 gr. Troy.

Measures.

CLOTH MEASURE.

3 jorbes	} make	1 angulla.
3 angullas		1 gheriah
8 gheriahs....		1 hant or cubit,
		= 18 inches.
2 hants		1 guz = 1 yard.

LAND MEASURE.

Land is measured by the hant, or cubit; 5 cubits long and 4 broad is 1 chittack, equal to 45 square feet.

16 chittacks..	} make	1 cottah.
20 cottahs...		1 biggah.
30½ biggahs ..		1 English acre.
40 biggahs...		1 Mad.cawney.

LIQUID MEASURE.

5 sicca weight	} make	1 chittack.

4 fingers		1 hand.
3 hands		1 span
2 spans		1 arm or cubit
		= 18 inches.
4 arms.		1 fathom.
1000 fathoms..		1 coss, or mile,
		which is one English mile, 1 furlong,
		3 poles, and 3½ yards.

FOR GOODS RECKONED BY TALE.

5 particulars ..	} make	1 gunda.
4 gundas, or 20		1 koorje, or 1
particulars ..		corge.

CALICUT.

(On the Malabar Coast.)

COINS.—The principal Coins in circulation are Tars, Fanams, and Rupees; but accounts are kept in Rupees, Quarters, and Reas, as at Bombay:—

16 Tars, or Vis	} equal to {	1 Fanam
5 Fanams.....		1 Rupee
3½ Rupees		1 Star Pagoda
3¼ Ditto		1 Porto Novo Pagoda
16 Ditto		1 Bombay Gold Mohur.

The Spanish Dollar, full weight, is accounted $2\frac{1}{2}$ Rupees, but passes in the Bazar only from 10 Fanams 4 Tars, to $10\frac{1}{2}$ Fanams.

The Fanam is a small gold coin, with a considerable alloy of silver and copper; and the Tar is a small silver coin.

The Calicut Fanams have been found, by assays made at Bombay, to contain $52\frac{1}{2}$ parts gold, 29 silver, and $17\frac{1}{2}$ copper. They are worth 6d. sterling.

WEIGHTS.—100 Pools make 1 Maund of 30 lbs. avoirdupois; and 20 Maunds make 1 Candy of 600 lbs.

In the Malabar weights, commonly used here, the Maund is 24 lbs. 2 oz.; and the Candy $482\frac{1}{2}$ lbs. The Calicut Miscal weighs 2 dwts. 21 grains troy.

MEASURES.—The Covid is 18 inches; and the Guz, $28\frac{2}{3}$ inches, long measure. Timber is sometimes measured by the Covid (18 inches) and Borell: 12 Borells make 1 Covid, when the timber is sawed, and 24 when unsawed.

See also TELlicherry.

CAMBAY.

(On the Malabar Coast.)

COINS.—Gold Mohurs, Rupees, and Pice are the current coin; 48 Pice make 1 Rupee. For small change, a species of Almond, called Baddam, brought from Persia, is used in the

same manner as Cowries at Bengal; the general rate is about 60 per Pice. For assay, &c. of the Cambay Rupee, see page 419.

Foreign coins are taken according to weight; their price varying in proportion to the supply and demand.

WEIGHTS.—The Cambay weights are the same as those of Surat, subject to a difference in the allowance on goods bought and sold, thus—

At Surat Metal is.....40 Seers to the Maund.
At Cambay.....40 Seers 11½ Pice to Ditto.

besides a rebate of $\frac{3}{4}$ per cent. on the whole weight.

MEASURES.—The long measures are the Cubit, about 18 inches, and the Guz, of 28, or in the bazar, of $28\frac{1}{2}$ inches.

CAMBODIA.

COINS.—The Gall, a small piece of silver, worth about fourpence, with characters on one side, is the only coin of the country. Spanish Dollars and Chinese Cash are current.

WEIGHTS.—The Chinese Pecul is the weight commonly used.

CANANORE.

(Coast of Malabar.)

All sorts of Indian coins pass current here; the weights and measures are the same as at Tellicherry.

CANARA.

(Province of Mysore.)

COINS.—Merchants' accounts are commonly kept in Sultany Pagodas, Rupees, and Annas or fractions of 16 parts: others are kept in Pagodas, a nominal Huna of 10 to the Pagoda, and Annas or 16 parts of the Huna.

The Exchanges between this place and Madras are as follow:

Bahadre Pagodas.....	at 87½	per 350 Madras Rupees.
Ahomady Ditto	21½	
Sidekies	43½	
Bombay Mohurs	23½	
Surat Ditto.....	25	
St. Thomé Pagodas	63½	
Jain Pontalee	82½	
Koorjantho	20½	
Jemsherry Pagodas	93½	
Surat Rupees	par.	
Goa Ditto	437½	
Mullarshee Ditto	388½	
Dollars.....	175	

WEIGHTS.—The Seer or Sida ought to weigh 24 Bombay Rupees; but the Bazar Seer weighs, according to Dr. Buchanan, rather more, namely 4297 grains. The Seer is divided into halves, quarters, eighths, and sixteenths; and 46 Seers make a Mana or Maund, which is equal to 28.14 lbs. The Maund by which merchants purchase, and the Company buy and sell, weighs 28.55 lbs. Jaggery is weighed by a Maund of 40 Seers, or 24.47 lbs. The Baru or Candy contains 20 Maunds, and varies accordingly from 571 lbs. to 489½ lbs.

MEASURES.—The Seer contains 73.683 cubic inches. The Moray or Mudi contains 38 Seers, or about 1¼ bushel. Grain, Salt, and sometimes Pepper are sold by measure: of the last, a Pucka Seer, or 73.683 cubic inches, is reckoned to weigh 51½ Bombay Rupees of 178½ grains each on an average.

CANCAO.

(*Gulf of Siam.*)

COINS.—Most bargains are made in Spanish Dollars, which, with Chinese Cash, are the current money.

WEIGHTS.—All goods are bought and sold by the Chinese Pecul and Catty.

CANTON.—*See CHINA.*

CAPE TOWN.

(*Cape of Good Hope.*)

COINS.—Accounts are variously kept: occasionally the English mode is adopted; sometimes they are kept in Guilders

or Florins of 20 Stivers, or 320 Pennings; also in Rix-Dollars, divided thus:

2 Stivers equal to.....	1 Dubbeltjee.
3 Dubbeltjees	1 Schilling.
8 Schillings.....	1 Rix-Dollar.

The Rix-Dollar is a paper currency, generally reckoned at 3s. 4d., but varying according to the quantity of specie in the Colony. There is no metallic currency except English Penny pieces. Bills on England, at 30 days' sight, are generally considered equal to cash, particularly Government Bills. The following are the rates at which foreign coins pass:—

	Sterling.			Schil.	Sti.
	£	s.	d.	lings.	vers.
Guinea.....	at 1	2	0	or 44	or 264
Doubloon, 16 Spanish Dollars.....	4	0	0	160	960
Johannes, 8 Ditto	2	0	0	80	480
Ducat and Venetian Sequin.....	0	9	6	19	114
Gold Mohur	1	17	6	75	450
Pagoda	0	8	0	16	96
Spanish Dollar.....	0	5	0	10	60
Rupee	0	2	6	5	30
English Shilling	0	1	0	2	12
Copper Penny.....	0	0	1	0	1

PAPER MONEY.

Rix-Dollar	0	3	4	8	48
Dutch Schilling	0	0	4½	1	6

The depreciation of paper money has already reached a serious extent, and still increases, as the following statement of the Exchange for March, April, and May, 1822, will shew:—

March, 1822.....	174½
April	185
May	195

WEIGHTS AND MEASURES.—The English are mostly used, except for Wines. These are sold by the Aum and Leager. One Leager is 4 Aums, or 388 Kannes.

CARWAR.

(On the Malabar Coast.)

COINS.—Accounts are kept in Pagodas, Fanams, and Pice; by the Country merchants, in Fanams of 24 Budgerooks.

6 Pice, or 36 Budgerooks, are equal to 1 Settle, or Jettal.	
48 Settles, or 36 Fanams	1 Pagoda.

A Carwar Pagoda is reckoned equal to $3\frac{1}{2}$ Surat Rupees; 18 Anjengo Fanams; $1\frac{1}{2}$ Star Pagoda; or 14 Fanams, $4\frac{1}{2}$ Vis of Calicut.

The Darwar Pagoda, being coined in the province, is most esteemed by the natives; but the Ikeri Pagodas are worth more, being of the same fineness, but differing in form and weight: $40\frac{1}{2}$ Ikeri are equal to $42\frac{1}{2}$ Darwar Pagodas.

The Darwar Pagoda passes for $3\frac{1}{2}$ Rupees.

The Venetian for 56 to 57 Settles, or 42 to $42\frac{1}{2}$ Fanams.

The Gubber for 53 to 54 Settles.

One hundred ounces of silver give 79 Pagodas and 34 Settles, equal to $286\frac{1}{4}$ Surat Rupees; or 89 Pagodas, 30 Fanams, $18\frac{1}{4}$ Cash, Madras old currency. Spanish Dollars pass current.

WEIGHTS.—The Candy is about 514 lbs. 14 oz. avoirdupois, though commonly reckoned at 520 lbs.

25 Pice are equal to 1 Seer=8 oz. 19 dwts. troy.

42 Seers 1 Maund.

20 Maunds 1 Candy.

MEASURES.—The Covid is equal to 18 inches.

~~~~~  
CELEBES.—See MACASSAR.

~~~~~  
CEYLON.—See COLOMBO.

~~~~~  
CHINA AND CANTON.

COINS.—Accounts are kept in Tales, Mace, Candarines, and Cash, thus divided:—10 Cash, 1 Candarine; 10 Candarines, 1 Mace; 10 Mace, 1 Tale.

There is but one kind of money made in China, which is called Petty, or Cash; it is of a base metal, cast, not coined, and very brittle; it is round, about the size of an English farthing, marked on one side with Chinese characters, rather raised at the edges, with a square hole in the middle. They are usually strung a hundred in a string; but they rise and fall according to the quantity in the market, varying from 750 to 1000 Cash for a Tale. Their

chief use is in making small payments amongst the lower classes of the people.

Spanish dollars are the principal coin current, but other silver coins are occasionally met with. For small change they cut the coins into pieces, and weigh them, for which purpose every merchant carries scales and weights with him, put up in small portable wooden cases; they are made somewhat after the plan of the English steelyards, and are called by the Chinese a dotchin. For the purpose of cutting the silver, they have a pair of scissors; and some are so dexterous, that they will cut the quantity required, without having occasion to cut a second time. All dollars which pass through the Hong Merchants' hands bear their stamp, or chop; so that by frequent exchanges, the dollars become soon mutilated, and are then cut up for small change, or melted into ingots. All duties are paid in sycee or pure silver.

In the East India Company's accounts the Tale is reckoned at 6s. 8d. sterling; but its intrinsic value is according to the price paid for silver in London.

The following Table shews the value of the Tale when Spanish dollars are from 5s. 3d. to 6s. 6d. per ounce.

| Price. |    | Value<br>of a Tale. |        | Price. |    | Value<br>of a Tale. |        |
|--------|----|---------------------|--------|--------|----|---------------------|--------|
| s.     | d. | s.                  | d.     | s.     | d. | s.                  | d.     |
| 5      | 3  | 6                   | 4.104  | 5      | 11 | 7                   | 1.758  |
| 5      | 4  | 6                   | 5.312  | 6      | 0  | 7                   | 2.966  |

At China they divide things decimally, as in buying gold and silver, which is not considered as money, but merchandise. It is esteemed by the hundredth part; and their touching needles (by which they try the fineness of gold and silver), are marked and numbered accordingly. The finest silver amongst them is 100 touch, called sycee, that is, without alloy. England silver standard is 11oz. 2 dwts. fine, and 18 dwts. alloy, making pure silver 12 oz. The following Table is calculated, supposing the China assay to be of equal goodness with the English, that is 100 touch, or sycee, and 12 ounces English.

*English Silver compared and adjusted with China Silver,  
from  $\frac{3}{4}$  to superfine, or 12 oz.*

| English Assay. |      |      | China Assay. |      |      | English Assay. |      |      | China Assay. |      |      | English Assay. |      |      | China Assay. |      |      |

| 11             | 7    | 94   | 14           | 10   | 12   | 88             | 8    |      | 9            | 17   | 82   | 2              | 9    | 2    | 75           | 20   |      |
| 11             | 6    | 94   | 4            | 10   | 11   | 87             | 22   |      | 9            | 16   | 81   | 16             | 9    | 1    | 75           | 10   |      |

The Chinese will sometimes take silver several pennyweights under full fine for sycee silver, but generally one pennyweight; thus English silver of 11oz. 19 dwts. and 1 dwt. alloy, will pass for sycee silver.

WEIGHTS.—The great weights are the Pecul, Catty, and Tale, thus divided:—

$$\begin{array}{l}
 \text{16 Tales...} \\
 \text{100 Catties}
 \end{array}
 \left. \vphantom{\begin{array}{l} \text{16 Tales...} \\ \text{100 Catties} \end{array}} \right\} \text{equal to } \left\{ \begin{array}{l} 1 \text{ Catty} = 1 \text{ } 5 \text{ } 5.333 \\ 1 \text{ Pecul} = 133 \text{ } 5 \text{ } 5.333 \end{array} \right\} \text{avoirdupois.}$$

lbs. oz. drs.

All goods are weighed at China; likewise provision, as milk, fowls, hogs, &c.

In delivering a cargo, English weights and scales are used, and afterwards turned into China Peculs and Catties. If the weights and scales are brought from Canton, care should be taken that the beam is not longer on one side than the other; some of them have holes or notches at each end of the beam, by which they can, by hanging the scales in one or other, diminish or increase the weight considerably.

The weights are in general light, particularly those they sell by, as have been found by weighing tutenague, raw silk, &c. Many of their dotchins are loaded in the pea. Above all, it is particularly necessary to pay attention to the weighing man, who is very apt to jerk the scale down, or pull it to him before he cries the weight, and that often erroneous. If a person delivering

a cargo, will take the trouble of putting in the weights himself, and balancing the scales, the benefit that will be derived by the cargo turning out well, will be an ample compensation for his trouble.

Gold and silver are also weighed by the Tale and Catty; 100 Tales are reckoned to weigh 120 oz. 16 dwts. troy, which make the tale equal to 579.84 grains. (See TABLE IX. No. 4, page 386.)

The foregoing Weights are sometimes otherwise denominated by the natives: the Catty is called Gin; the Tale, Lyang; the Mace, Tchen; the Candarine, Fwen; and the Cash, Lis.

Gold is purchased in ingots of a determined weight, which the English call Shoes of Gold; the largest weigh ten Tales, and the gold is reckoned 94 Touch, though it may be only 92 or 93. The following are some of the names and touches of Gold:—

|                  |          |                               |         |
|------------------|----------|-------------------------------|---------|
| Chaya .....      | Shoes 93 | Yangpohooes .....             | Bars 96 |
| Chroja .....     | 93       | Cochin China .....            | 96      |
| Chugja .....     | 93       | Samoy Shoes, no Chop, various |         |
| Shinjipore ..... | 94       | Touches.                      |         |
| Tinjee .....     | 93       | Pekin Bars, narrow .....      | 99      |
| Poojee .....     | Bars 96  | Shaja small Shoes .....       | 99      |

At Chinchew they falsify Yangpohooes Gold.

The Chinese arithmetic is mechanical. To find the aggregate of numbers, a machine is in universal use with all descriptions of people. By this machine, which is called a swanpan, arithmetical operations are rendered palpable. It consists of a frame of wood, about an inch deep, and of various sizes, from 4 to 12 inches long, by 2 to 6 broad, divided into two compartments by a bar down the middle: through this bar at right angles are inserted a number of parallel wires, and on each wire, in one compartment are five moveable balls, and in the other, two. These wires may be considered as the ascending and descending power of a numeration table, proceeding in a tenfold proportion; so that if a ball upon any of the wires in the larger compartment be placed against the middle bar, and called unity, or one; a ball on the next wire above it will represent ten; and one on the next, one hundred: so also, a ball on the wire next below that expressing unity, will be one-tenth; the next lower, one hundredth; and the third, one thousandth part of an unit: and the balls on the corresponding wires in the smaller compartment will be five,

fifty, five hundred, five-tenths, five-hundredths, five-thousandths ; the value or power of each of these in the smaller division, being always five times as much as those in the larger. This system, from its apparent ease and simplicity, is much admired, but is subject to error ; and a person commonly conversant with arithmetic, will make more progress, and be more correct, than the most skilful of the Chinese with the swanpan.

MEASURES.—The long measure in use at Canton is called the coid or cobre : it is divided into ten punts, and is equal to 14.625 English inches. There are several measures answering to our foot.

|                                                   | E. Inches. |
|---------------------------------------------------|------------|
| The Foot of the Mathematical Tribunal is equal to | 13.125     |
| The Builder's Foot, called Congpu.....            | 12.7       |
| The Tailors' and Tradesmen's Foot.....            | 13.33      |
| The Foot used by Engineers.....                   | 12.65      |

The Li contains 180 fathoms, each of ten feet of the last-mentioned length, which make the Li 1,897 English feet ; and 192½ Lis measure a mean degree of the meridian, nearly : but the European Missionaries divide the degree into 200 Lis, each Li 1,826 English feet, which makes the degree 69.166 English miles.

## COCHIN.

(*On the Malabar Coast.*)

COINS.—Accounts are kept in Rupees of 16 Annas, which are considered equal to the Surat Rupees. Accounts are also kept in Fanams, 20 of which equal the Rupee, and 4 Fanams make a Schilling.

Most Indian and other coins pass here : the Exchanges are generally as follow :

|                               | Schillings. | Fanams.        |
|-------------------------------|-------------|----------------|
| Ducatoons .....at 12½         | or          | 50             |
| Spanish Dollars in tale ..... | 10          | ... 38 to 40   |
| Venetians and Gubbers.....    | 18          | ... 72, 74, 76 |
| Surat and Bombay Rupees ..... | 5           | ... 20         |
| Rix-Dollars.....              | 8           | ... 32         |
| Negapatam Pagodas .....       | 16          | ... 64         |
| Copang.....                   |             | 48½            |

Spanish Dollars are seldom weighed here, but are taken by the tale at 2 Surat Rupees each. When these Dollars are valued at 40 Fanams, an English Crown is worth  $40\frac{1}{2}$ . When Surat Rupees are 20 Fanams each, Pagodas are 64. Gubbers are 1 per cent. less than Sequins.

WEIGHTS.—Gold and Silver are weighed by the Sicca weight (See BENGAL): 1 Sicca is equal to 31 Fanams; 72 Fanams make 8 Pagodas, or 1 Dollar Weight; and 93 Fanams are the weight of 10 Sequins, or 3 Sicca weight.

The great weights are the Maund, which is 27 lbs  $2\frac{1}{2}$  oz. avoirdupois; 20 of which make a Candy, or  $543\frac{1}{2}$  lbs. The Cochīn Candy equals 7 Bengal Factory Maunds, 11 Seers,  $2\frac{1}{2}$  Chittacks.

~~~~~  
COCHIN CHINA.—See FAIFOE.
~~~~~

COIMBATOOR.

(In Mysore.)

COINS.—Accounts are kept in this province in Sultany Rupees and fractions, as usual in India,  $\frac{1}{2}$ ,  $\frac{1}{4}$ ,  $\frac{1}{8}$ ,  $\frac{1}{16}$ , &c. The sixteenths are here called Vishuns. The Sultany Rupee contains 165 grains of pure silver, and therefore would be worth somewhat less than 2s. But  $3\frac{1}{4}$  Rupees purchase 1 Star Pagoda, containing  $41\frac{47}{56}$  grains of pure gold, worth  $88\frac{1}{2}$ d. nearly. Besides, 1 Rupee exchanges for  $4\frac{1}{2}$  of  $\frac{1}{2}$  Sultany Fanams, worth at the mint price, 32d. Silver, therefore, both here and at Seringapatam, is of considerably more value in proportion to gold, than it is by the standard of British Coin. The most common Coins current in the province of Coimbatore are Sultany Fanams, (worth 7.489d.) and Virraya Fanams, (worth 5.952d.) For changing a Rupee into copper money, the dealers in coin take 2 Cash. If silver is wanted for gold, nothing is required; but if gold is wanted for silver, 9 Cash are required for every Pagoda.

Exchanges between this place and Madras are as follow:—

|                         |                        |
|-------------------------|------------------------|
| Porto Novo Pagodas..... | at 120 per 350 Rupees. |
| Bahadre..... Ditto      | } ..... 92 111         |
| Sultany ..... Ditto     |                        |
| Ferokee ..... Ditto     |                        |

|                            |                    |                             |
|----------------------------|--------------------|-----------------------------|

| Mysore ..... Ditto         |                    |                             |
| Elephant..... Cash .....   | 762 $\frac{1}{2}$  | per 3 $\frac{1}{2}$ Rupees. |
| Paulghant ... Ditto .....  | 572                |                             |
| Twenty Ditto Pieces.....   | 180                |                             |

**WEIGHTS.**—A new standard of Weights and Measures has been introduced by Major Macleod, *viz.*

|                                       |                                  |
|---------------------------------------|----------------------------------|
| 10 Star Pagodas are equal to 1 Polam. |                                  |
| 9 Polams .....                        | 1 Cutcha Seer = 0.5941 lbs.      |
| 5 Cutcha Seers .....                  | 1 Visay                          |
| 8 Visays.....                         | 1 Munnagu or Maund = 23.765 lbs. |

The old weights are still occasionally used, especially by the Cultivators. They are as follow :—

|                |   |          |                       |
|----------------|---|----------|-----------------------|
| 8 Dudus.....   | } | equal to | 1 Polam               |
| 3 Polams ...   |   |          | 1 Seer = 0.6067 lb.   |
| 5 Seers .....  |   |          | 1 Visay               |
| 100 Polams ... |   |          | 1 Tola = 20.2226 lbs. |

Cotton Wool is sold by the Tucu of 50 Polams, equal to 10.111 lbs.

**MEASURES.**—The Dry Measures in use are these :—

|                               |   |          |                            |
|-------------------------------|---|----------|----------------------------|
| 56 Dudus weight of Horse Gram | } | equal to | 1 Puddy = 45.305 Cub. in.  |
| 4 Puddies .....               |   |          | 1 Bulla = 181.22 ditto     |
| 40 Bullas .....               |   |          | 1 Candaca = 3.372 bushels. |

The Land Measure, according to regulation, is as follows :—

**FOR RICE LAND.**

|                          |   |          |                      |
|--------------------------|---|----------|----------------------|
| 24 Adies, or feet square | } | equal to | 1 Culy               |
| 100 Curies .....         |   |          | 1 Chei = 1.322 acre. |

**FOR DRY FIELD.**

|                          |   |          |                        |
|--------------------------|---|----------|------------------------|
| 16 Mars.....             | } | equal to | 1 Chingali = 104 feet  |
| 4 Chingalis square ..... |   |          | 1 Bulla = 3.972 acres. |

## COLUMBO.

*(The Island of Ceylon.)*

COINS.—Accounts are kept in Rix Dollars, or Elephant Rupees, thus divided :—

|                                                   |                         |
|---------------------------------------------------|-------------------------|
| 3 Dutch or 4 English Chalias are equal to 1 Pice. |                         |
| 4 Pice .....                                      | 1 Fanam.                |
| 12 Fanams .....                                   | 1 Rix Dollar, or Rupee. |

The Rix Dollar is worth 1s. 9d. sterling ; and was fixed at that rate for the pay of the public officers in 1812 ; thus

|                                             |     |
|---------------------------------------------|-----|
| 11 Rix Dollars, 5½ Fanams are equal to 20s. |     |
| 6 Fanams, 3½ Pice .....                     | 1s. |
| 2½ Pice ..                                  | 1d. |

The Star Pagoda varies from 59 to 61½ Fanams in Bills of Exchange drawn on Madras. The Sicca Rupee passes for 18 Fanams, either in Specie or Bills. The Bombay Rupee passes current for 17 Fanams in exchange for Bills, and for 18 in the Bazar. The Spanish Dollar varies from 37 to 39 Fanams, according to the demand. 350 Arcot Rupees are equivalent to 400 Ceylon Rupees or Rix Dollars, or 100 Star Pagodas.

WEIGHTS.—In receiving and delivering foreign goods, English weights are commonly used. The Candy or Bahar equals 500 lbs. avoirdupois. The Garce is 82 Cwt. 2 qrs. 16½ lbs.

MEASURES.—For the produce of the Island, the following dry measure is used :—

|                                                    |           |
|----------------------------------------------------|-----------|
| 4 Cut Chundoos are equal to 1 Cut Measure or Seer. |           |
| 4½ Seers .....                                     | 1 Corney. |
| 2½ Corneys .....                                   | 1 Marcal. |
| 2 Marcals .....                                    | 1 Parah.  |
| 8 Parahs .....                                     | 1 Amonam. |
| 9½ Amonams, or 1800 Measures, 1 Last.              |           |

The Parah measures 16.7 English inches square, and 5.6 deep : it consequently contains 6¾ English Wine Gallons. It is generally estimated by weight, which varies according to the articles. Thus the Parah of Salt weighs 55 lbs. ; of Coffee, Pepper, and Chunam, 30 lbs. ; of Rice, 44 lbs. The Parah of Paddy cleared from the husk, gives half a Parah of Rice.

The Amonam contains 16 Parahs to the northward, among the Malabars; and  $2\frac{1}{2}$  Amonams to the acre; but to the southward, among the Hindoos, 8 Parahs make one Amonam.

In Wine Measure,

|                          |                       |
|--------------------------|-----------------------|
| 15 Drams                 | are equal to 1 Quart. |
| 2 Quarts                 | ..... 1 Canade.       |
| $2\frac{1}{2}$ Canades   | ..... 1 Gallon.       |
| 5 Canades, or 2 Gallons, | 1 Welt.               |
| 75 Welts                 | ..... 1 Leager.       |

Arrack is bought at 80, and sold at 75 Welts to the Leager.  
The English long and land measures are used.

### DARAPORAM.

(*In Malabar.*)

COINS.—The Virraya Fanam is the commonest currency among the people, who reduce all other Coins to its standard. The following statement shews the number of Virraya Fanams for which each Coin passes, with the value.

|                                              |                               |    |      |
|----------------------------------------------|-------------------------------|----|------|
| <b>GOLD.</b> —Sultany, Bahadry, and Ikeri    |                               |    |      |
| Varahun, Huns or Pagodas...at                | $16\frac{1}{2} + \frac{3}{4}$ | =  | 8 1  |
| Star Pagoda .....                            | $14\frac{1}{2} + \frac{1}{4}$ | =  | 7 4  |
| Porto Novo or Feringy Ditto.....             | $12\frac{1}{2}$               | =  | 6 2½ |
| Sultany Fanam .....                          | $1\frac{1}{2}$                | =  | 0 7½ |
| <b>SILVER.</b> —Pondicherry or Sultany Rupee |                               |    |      |
| 4½ + ½ + ¼ =                                 | 2                             | 2½ |      |
| Company's Madras Rupee .....                 | $4\frac{1}{4} + \frac{1}{2}$  | =  | 2 1  |

**WEIGHTS.**—Those in use here are,

|                                    |                 |
|------------------------------------|-----------------|
| 24 Star Pagodas equal to 1 Polam = | 0.1782 lb.      |
| 100 Polams .....                   | 1 Tolam = 17.22 |

**MEASURES.**—Those of the Bazar are as follow :

|                                            |                             |
|--------------------------------------------|-----------------------------|
| 84 Sultany Rupees weight of grain equal to | 1 Puddy.                    |
| 3 Puddies .....                            | 1 Bulla = 216 cubic inches. |
| 40 Bullas .....                            | 1 Siliga or Candy.          |
| 30 Siligas .....                           | 1 Mau.                      |

Rice is measured by the above: for dry grains also 16 Bullas make one Morau, Siliga, or Candy, equal to 3456 cubic inches.

## FAIFOE.

(Cochin China.)

**COINS.**—The only currency of the country is a sort of Cash made of tutenague, 600 making a Quan, which is equivalent to 2 Rupees, or 1 Spanish Dollar; this is divided into 10 Mace of 60 Cash each, the whole strung together, and divided by a knot at each Mace. Those received from the King in payment for goods, are always new, and may be paid away again without any doubt of a deficiency; but in dealings with the merchants, the Cash is old and mixed, which occasions trouble in disposing of them, besides a loss of 6 or 7 per cent.

The King refines and runs all his silver into bars of 10 Tales weight, with which he sometimes pays his troops at the rate of 20 Quans each; but they never pass current, being sold at from 16 to 17 Quans each.

**WEIGHTS.**—The weights are exactly the same as in China, and all goods are weighed by the dotchin. Only for Sugars they

allow, instead of 100, 150 Catties to the Pecul, though the Chinese in general receive 160 Catties to a Pecul.

MEASURE.—The Measure is the Covid, equal to about 15 English inches.

### GOA.

(*Coast of Malabar.*)

—

COINS.—Accounts are kept in Pardos, Tangas, Vintins, and Budgerooks, but there are good and bad of each kind ; 1 Pardo is worth 4 good or 5 bad Tangas ; 16 good Vintins, or 20 bad ; 300 good budgerooks, or 360 bad : the Pardo is also divided into 240 good or 300 bad reas.

The current Coins are, the St. Thomé, a gold piece of nearly the weight of a Ducat, which passes for 11 good Tangas ; it weighs 53½ grains troy, and is of the purity of 18 carats, and worth about 6s. 8d. sterling.

The Silver Coin is the Pardo, which is of two sorts: the pardo xeraphin passes current for 5 good Tangas each, about 7½d. sterling ; and the common Pardo for 4 Tangas ; the former has on one side a figure of St. Sebastian, and on the other a Sheaf of Arrows.

The Budgerook is made of Tin, having on one side a Globe, and on the other, two Arrows crossed.

Spanish Dollars, Venetians, Rupees, and all other foreign coins pass current here; but the price fluctuates according to the quantity in the market.

WEIGHTS.—The Quintal of 4 Arobas, or  $129\frac{1}{2}$  lbs. is in common use; but they have the Indian Candy, thus divided:—

|                                     | lbs. | oz. | drs. |
|-------------------------------------|------|-----|------|
| 1 Rattle is equal to avoirdupois... | 1    | 0   | 8    |
| 24 Rattles make 1 Maund.....        | 24   | 12  | 0    |
| 20 Maunds make 1 Candy.....         | 495  | 0   | 0    |

MEASURES.—Corn and Rice are sold by the Candy of 20 Maunds, equal to 14 English bushels, nearly. The Maund is divided into 24 Medida. A Bahar is  $3\frac{1}{2}$  Portuguese Quintals.

The long measures are the Portugal Vara and Covado; the former  $1\frac{1}{2}$  English yard; the latter  $26\frac{3}{4}$  inches.

### GOMBROON OR GAMRON.

*(Called also Bender Abassi.—In the Persian Gulf.)*

COINS.—Accounts are kept in Mamoodies current, of 20 Gassas; also in Shakees of 10 Coz or Pice.

A Toman contains 100 Mamoodies; a new Abassee, 2 Mamoodies or 4 Shakees or Shatreas; a Shakee, 10 Coz or Cozbauques, a small Copper Coin. The Shakees are imaginary money, in which bargains are made; the returns for goods, shewing 7 or 8 per cent. for the exchange, are generally made in Abassees.

A Mamoodie is to contain  $\frac{1}{4}$  Silver and  $\frac{3}{4}$  Copper: 100 Mamoodies, coined at Avesa, in Chusistan, weigh  $71\frac{3}{4}$  Mussals, or Miscals, equal to 5136 English grains. Hence a Mamoodie contains  $20\frac{1}{4}$  grains of fine silver; 100 being worth about 24s. or nearly 3d. each.

All sorts of Coins pass here; the Exchanges generally as follow:—

|                              |                |
|------------------------------|----------------|
| Venetian.....                | at 28 Shakees. |
| Rupee.....                   | 6½ to 9        |
| Dollar.....                  | 13½ to 20      |
| Larees (Ispahan money) ..... | 2½             |

Abassees and Sequins are the common Coins; of the latter there are several kinds, the Venetians being the best by 2 per cent. When a parcel of Venetian Ducats are mixed with others, the whole go by the name of Sequins; but when separate, one sort is called Venetians, and all the rest indifferently by the name of Gubbers.

See also PERSIA.

WEIGHTS.—Gold and silver, and other valuable commodities are weighed by the Miscal, of 2 dwts.  $23\frac{7}{12}$  grs:  $2\frac{1}{2}$  Miscals are equal to a Surat Tola.

The larger weights are of different sorts, and vary according to the commodities sold.

The Maund Tabree weighs  $6\frac{3}{4}$  lbs. avoirdupois in commerce, but only  $6\frac{1}{4}$  in the Bazar. By this weight, sugar, copper, tutenague, and all kinds of drugs are sold.

The Maund Copra is  $7\frac{3}{4}$  lbs. at the Custom House, but in the Bazar, from  $7\frac{1}{4}$  lbs. to  $7\frac{1}{2}$  lbs. By this weight, rice, almonds, raisins, and other eatables are sold.

The Maund Shaw is equal to 2 Maunds Tabree, or  $13\frac{1}{4}$  lbs.

MEASURES.—The long measure is the Guz, 93 of which are reckoned to 100 English yards.

## GUZERAT.

(Part of the Mahratta Country.)

### COINS.

|                          |                         |
|--------------------------|-------------------------|
| 2 Peckas are equal to... | 1 Pice.                 |
| 4 Pice .....             | 1 Fanam.                |
| 5 Pice .....             | 1 Vis = 1 Madras Fanam. |

| A Gold Rupee.....             | 4 Pagodas = £1 15s. |

See also MUDDI.

~~~~~

HONAWERA.—*See* ONORE.

~~~~~

### HYDRABAD.

(*Capital of Golconda.*)

COINS.—Accounts are kept in Rupees, each containing 16 Annas and 192 Pice.  $388\frac{1}{2}$  Hydrabad Rupees are exchangeable for 350 Madras Rupees.

~~~~~

JAPAN.

~~~~~

COINS.—Accounts are kept in Tales, Mace, and Candarines; 10 Candarines make 1 Mace, and 10 Mace 1 Tale. The Dutch reckon the Tale at  $3\frac{1}{2}$  Florins, equal to about 6s. 2d. The Gold Coins current are the new and old Itjib and Cobangs, or Kopangs; the Silver Coins are the Nandiogin, Itaganne, and Kodama. They are in general very simple, struck plain and unadorned, the greater part of them without any rim round the margin, and most of them without any determined value. For this reason they are always weighed by the merchants, who put their chop or stamp upon them, to signify that the coin is standard weight, and unadulterated.

The new Cobangs are oblong, rounded at the ends, and flat, about two inches long, and rather more than two inches broad, scarcely thicker than an English farthing, of a pale yellow colour; the die on one side consists of several cross lines stamped, and at both ends there is a parallelogramical figure, with raised

letters on it, and, besides, a moonlike figure, with a flower on it in relief. On the other side is a circular stamp, with raised letters on it, and within the margin, towards one end, two smaller sunk stamps with raised letters, which are different on each Cobang; these are valued at 60 Mace. There are old Cobangs occasionally met with, which are of fine gold, somewhat broader than the new.

The old Cobangs weigh 371 Dutch asen, or 275 English grains; and the gold is said to be 22 carats fine, which would give 44s. 7d. for the value of the old Cobang. But the Japanese Coins are reckoned at Madras only 87 touch, which is  $20\frac{1}{3}$  carats; this reduces the old Cobang to 41s. 10d. The new Cobangs weigh 180 grains; the gold is about 16 carats fine, and the value 21s. 3d. The Oban is thrice the value of the Cobang.

The Itjib is called by the Dutch *golden bean*, and is made of pale gold, of a parallelogramical figure, and flat, rather thicker than a farthing, with many raised letters on one side, and two figures or flowers in relief on the other; the value of this is one-fourth of a Cobang. There are old Itjibs also to be met with; these are thicker than the new ones, and in value 22 Mace 5 Candarines.

Nandiogin is a parallelogramical flat silver coin, of twice the thickness of a halfpenny, one inch long, and half an inch broad, and formed of fine silver. The edge is stamped with stars, and within the edges are raised dots. One side is marked all over with raised letters, and the other on its lower and larger moiety is filled with raised letters, and at the same time exhibits a double moonlike figure. Its value is 7 Mace 5 Candarines.

Itaganne and Kodama are denominations by which various lumps of silver, without form or fashion, are known, which are neither of the same size, shape, nor value. The former of these, however, are oblong, and the latter roundish, for the most part thick, but sometimes, though seldom, flat. These pass in trade, but are always weighed in payment from one individual to another, and have a dull leaden appearance.

Seni is a denomination applied to pieces of copper, brass, and iron coin, which bear a near resemblance to our old farthings. They differ in size, value, and external appearance, but are

always cast, and have a square hole in the middle, by means of which they may be strung together; and likewise have always broad edges. Of these are current Sjumon Seni, which pass for half a Mace, or 10 common Seni. Simoni Seni, of the value of 4 common Seni, are made of brass, and are almost as broad as a halfpenny, but thin. The common Seni are the size of a farthing, and made of red copper; 60 of them make a Mace. Doosa Seni is a cast iron coin, in appearance like the last, of the same size and value, but so brittle that it is easily broken by the hand, or breaks in pieces when let fall on the ground.

The Seni are strung 100 at a time, or, as is most commonly the case, 96 on a rush. The coins in one of these parcels are seldom all of one sort, but generally consist of two, three, or more different kinds; in this case, the larger sorts are strung on first, and then follow the smaller; the number diminishing in proportion to the number of large pieces in the parcel, which are of greater value than the smaller.

The Schuit is a silver piece, of 4 oz. 18 dwts. 16 grs. troy, and is 11 ounces fine, which gives its value 25s. 3d. The name is Dutch, referring probably to its shape, like a boat.

WEIGHTS.—These are the Candarine, Mace, Tale, Catty, and Pecul, thus divided:—

|                  |   |      |   |          |
|------------------|---|------|---|----------|
| 10 Candarines    | } | make | { | 1 Mace.  |
| 10 Mace .....    |   |      |   | 1 Tale.  |
| 16 Tales .....   |   |      |   | 1 Catty. |
| 100 Catties..... |   |      |   | 1 Pecul. |

The Pecul is 125 Dutch pounds, which are equal to 133½ lbs. avoirdupois. It is, however, said to weigh only 130 lbs.

MEASURES.—The revenues of Japan are estimated by two measures of rice, the Man and Kokf; the former contains 10,000 Kokfs, each 3000 bales or bags of rice.

The long measure is the Inc, which is about 4 China cubits, or 6½ feet English, nearly; and 2½ Japanese leagues are computed to be about 1 Dutch league.

~~~~~

JAVA.—See BANTAM AND BATAVIA.

JUDDA, OR JIDDA.

(A Town of Arabia, on the Red Sea.)

COINS.—Accounts are kept in Cruse and Duanees, 40 of the latter making one of the former.

No money is coined here. Foreign coins of all denominations pass current. From the great influx of pilgrims, large quantities of small coins are in circulation, but they are never carried out of the country by Europeans.

List of Silver and Gold Coins at Judda, and what they commonly pass current for.

	Dollars.	oz.	dwt.	
Judda weight.....	100.....	87	4	at 250 Cruse.
German Crowns.....	100.....	91	6	255 Ditto.
Razeens (Barbary)	100.....	87	4	240 Ditto.
Lump Silver, if good	100.....	87	4	250 Ditto.
Pistareens of Philip V.	100.....	87	4	225 Ditto.
Lion Dollars	100.....	87	0	195 to 200.
Pope's Coins, per 100				125 Ditto.
Muscovy Coins				150 Ditto.
Bar Silver	100.....	87	4	250 Ditto.
Zelottas, per Late	100 Dollars...	100	to	105 Cruse.
Venetians, 100=22½	Sicca Rupees...			4½ Ditto.
Stamboles				4½ Ditto.
Zermabobs				3½ Ditto.
Gingilees				3 Ditto.
Turahs				3 Ditto.
Gubbers, 100 of which are 2½ per cent. less than that of Venetians or Stamboles				4½ Ditto.
Ring Gold, sold per Vakia				40 Ditto.

The exchange at Judda fluctuates; but the general average may be taken at 250 Judda Cruse per 100 Spanish Head Dollars. The Pillar and Head Dollars are esteemed here of the same value, although the Pillar is about 2 per cent. better than the Head. French Crowns are 13 per cent. less, though of equal standard, by which an advantage may be gained in purchasing French Crowns or Pillar Dollars; but, if possible, the taking any gold coins to India should be avoided.

A comparative View of the relative Value of Coins taken at Judda with Bombay.

100 Mexico Dollars will mint	239 2 44	100 Old Abasseees will mint	226 3 80
100 French Crowns.....	239 0 59	100 New Abasseees.....	256 3 0
100 English Crowns	239 2 74	100 Estimates	239 2 74
100 Pillar Dollars	241 3 38	100 Old Seville Estimates...	242 3 70
100 German Crowns	226 3 92	100 Peru, or Cobb Dollars...	224 2 28
100 Ducatoons	244 1 39	100 Lion Dollars.....	193 1 4

The above statement will be found pretty correct, exclusive of mintage, which amounts to about 4 per cent. One hundred ounces of standard silver will bring 258½ or 259 Arcot Rupees; and there being only 1 per cent. difference between Arcot and Madras Rupees, makes it 7 per cent. It is better thus to sell to the shroffs than coining it into Madras Rupees.

WEIGHTS are Vakias, Maunds, Frazils, and Bahars, and are thus divided:

15 Vakias	}	make	{	1 Rattle.
2 Rattles				1 Maund.
10 Maunds				1 Frazil.
10 Frazils				1 Bahar = 222 lbs. 6 oz. nearly.

But as all goods are weighed by the steelyards, after the Turkish manner, the European as well as the Turkey merchants are obliged to rest contented with such weights as the weigher thinks proper to give them. No merchants are allowed to weigh goods, when bought or sold, at their houses.

JUNKCEYLON.

(An Island on the W. Coast of Malacca.)

COINS AND WEIGHTS.—All kinds of Indian coins pass current here; but the preference is given to Spanish Dollars. They have not the small Cash in circulation as at Acheen and other places. They have certain pieces of tin, shaped like the under half of a cone, called Poot, which are used on the Island as money, weighing about three pounds: these are also their weights:—

3 Punchors.	}	equal to	{	1 Poot.
4 Poots.....				1 Vis.
10 Vis				1 Capin. lbs. oz. dr.
8 Capins ...				1 Bahar = 485 . 5 . 5½ avoir.

which is equal to 6½ Bengal Factory Maunds. The China Pecul is in use here, by which tin is generally sold; the price varying from 12 to 16 Spanish Dollars per Pecul.

ISLE OF FRANCE.—See MAURITIUS.

LOHEIA.

(A Town of Arabia, on the Red Sea.)

COINS.—The only money is a small piece of base and adulterated silver, about the size of a sixpence, called Commassee, and by this all different denominations of foreign coins are ascertained. There are likewise Half Commassees, which are the smallest coin current.

1 Venetian Sequin passes for...	90 Commassees.
1 Fundunclee	80 Ditto.
1 Barbary Sequin.....	80 Ditto.
1 Dollar, or Patack.....	40 Ditto.

When the Indian merchants or vessels are here, the Fundunclee is raised 3 Commassees more; but all specie is scarce, notwithstanding the quantity brought hither in Dollars, which is the coin in which all purchases are made. When it is necessary to change Dollars, the shroff, or broker, only allows 39 instead of 40 Commassees, so that there is a loss on the exchange of $2\frac{1}{2}$ per cent.

WEIGHTS.—The weights are the Dram, Ounce, Rottolo, and Quintal. Their proportions are as follow:—

10 Drams...	} equal to {	1 Ounce.
16 Ounces...		1 Rottolo.
100 Rottolos.		1 Quintal.

The Rottolos are of two sorts, one of 140 drams, which is used in selling fine goods; the other of 160, which is used in weighing sugar, lead, and other heavy articles. There is also another weight, called the Faranzula, equal to 20 Rottolos.

MEASURE.—The long measure is the Peek of 27 inches.

MACASSAR.

(Island of Celebes.)

COINS.—Accounts are kept in Rix Dollars and Stivers. Spanish Dollars are the common coin, but the under-mentioned also pass current at the following rates:—

Ducatoons	13 Schillings.	Bombay Rupees	5 Schillings.
English Crowns.....	10 Ditto.	Madras Rupees.....	4 Ditto.

The exchange is 4 Rix Dollars for 3 Spanish Dollars. All bargains are made in the former, which is a nominal coin. They have a kind of Mace, 7 of which go to a Dollar.

WEIGHTS.—All merchandise is weighed by the dotchin, and then reduced to other weights.

The Pecul is 100 Catties, or 135 lbs. 10 oz. avoirdupois. The Ganton among the natives is $7\frac{1}{2}$ lbs. Dutch troy, or 8 lbs. 5 oz. avoirdupois; but the Ganton used by the Dutch Company, is $11\frac{1}{2}$ lbs. Dutch troy, or $12\frac{1}{2}$ lbs. avoirdupois.

Gold and Silver are weighed by the Tale of 16 Mace, equal to $827\frac{1}{2}$ Dutch Asen, or 614 English grains.

MADEIRA.

(*An Island in the Atlantic.*)

COINS.—Accounts are kept in Reas and Milreas, which are imaginary coins; the latter is 1000 Reas, and equivalent to 5s. 6d. sterling. The coins current on the Island are,

Spanish Dollars, which pass for...	1000 Reas, equal to 10 Bits.	
Pistareens.....	200	2 Do.
Half Pistareens, or Bits	100	1 Do.
Quarter Pistareens.....	50	

The gold coins of Portugal do not pass current on the Island.

The copper coins are pieces of 5, 10, and 20 Reas, being the $\frac{1}{10}$, $\frac{1}{5}$, and $\frac{1}{2}$ parts of the Pistareen.

WEIGHTS AND MEASURES.—Those of Portugal are in general use on the Island. The commercial Pound is equal to 7076 $\frac{1}{2}$ grains English: thus 100 lbs. of Madeira is 101.09 lbs avoirdupois.

COMMERCIAL WEIGHTS.

72 Grains of Wheat	} make	1 Oitavo.
4 Oitavos		1 Ounce.
4 Ounces		1 Quarta.
4 Quartas		1 Aratel=1 lb.
32 Aratels.....		1 Aroba.
4 Arobas.....		1 Quintal.
13 $\frac{1}{2}$ Quintals		1 Tonelada.

LIQUID MEASURE.

2 Meyos	} make	1 Quartillo.
4 Quartillos		1 Canada.
6 Canadas		1 Pote.
2 Potes		1 Almude.
23 $\frac{1}{2}$ Almudes		1 Pipe.
2 Pipes		1 Tun.
18 Almudes		1 Barrel.

LONG MEASURE.—There are two principal measures, the Vara and the Covado; the former is five Palms, and the latter three. The Palm is eight Portuguese, nearly nine English inches; the Covado being 26.7 English inches; and the Vara 43.2 inches.

MADRAS.

COINS.—According to the old monetary system, accounts were kept at this Presidency in Star Pagodas, Fanams, and Cash. The Pagoda weighed 52.56 grains troy, and was commonly valued at 8s. It was divided into 45 Fanams, each Fanam containing 80 Cash. This was the proportion observed by Government, the Bank, and Agency Houses; but in the shops and bazar exchange, the number of Fanams to the Pagoda fluctuated according to circumstances, from 42 to 46 Fanams.

The Gold Coins were the single and double Pagodas; the Silver Coins were the single, double, and 5 Fanam pieces; the one-eighth, quarter, half, 1 and 2 Rupees; and quarter and half Pagodas; the Copper Coins consisted of 1, 5, 10, 20, and 40 Cash pieces.

According to the new currency, fixed by proclamation, dated *Fort St. George*, 7th January, 1818, the Silver Rupee constitutes the standard coin of this Presidency. The public accounts are accordingly converted from the Star Pagoda (the coinage of which is discontinued) into the Madras Rupee, at the exchange of 350 Rupees per 100 Star Pagodas. All Government transactions will in future be concluded in Rupees.

The new coinage of Silver the same document announced would consist of the following Coins, of the fineness and weight here specified:

	Grains pure.	Grains alloy.	Grains gross weight.	Value about £ s. d.
Rupee.....	165	15	180	0 1 11½
Half Rupee.....	82½	7½	90	0 0 11½
Quarter Rupee....	41¼	3¾	45	0 0 5¾
Double Anna.....	20¾	1½	22½	0 0 2¾
Anna.....	10⅜	¾	11¼	0 0 1⅞

The new coinage of Gold Rupees, each equal to 15 Silver Rupees, consists of Rupees, Half Rupees, and Quarter Rupees; the Rupee containing 165 grains of pure gold, and 15 grains of alloy; weighing consequently the same as the Silver Rupee.

The new Copper Coinage consists of Pies or Pice, 12 being equivalent to 1 Anna.

See also the Assay Report, in BOMBAY.

The Arcot Rupee weighs 176.4 grains, and contains 166.477 grains of pure silver; its sterling value is therefore 1s. 11½d.

Many other coins circulate on the Coromandel Coast.

The old 3 Swamy Pagoda, which is about 20½ carats fine, bears generally a batta of 10 per cent. against the new coins of Negapatam and Madras.

The old Pagodas of Negapatam and Tutecorin are about the same weight and value as the Star Pagodas, (*i. e.* 52.56 grains, and worth 7s. 5½d.); but in the later coinage of these Pagodas, they are depreciated, being only 18½ carats fine; and 104 are equal to 100 Star Pagodas.

The Porto Novo Pagoda is only 17¾ carats fine, and passes current at 120 per 100 Star Pagodas.

The Pondicherry Pagoda was originally considered equal in value to the Star Pagoda, but its standard has been lowered to 17 carats, and even less.

A coinage took place, in 1811, of double Rupees, single Rupees, halves, quarters, and pieces of 1, 2, 3, and 5 Fanams each, from Spanish Dollars, which are estimated at 8 dwts. worse than the British standard. A silver coinage of half and quarter Pagodas, of the same fineness, likewise took place. Into the details of this money it is not requisite to enter, as the new currency has placed the coins upon a new footing.

The following is the relative value of the Madras or Arcot Rupees with other Rupees current in India:

				Arcot Rupees.	
100 Arcots equal to	{	Siccas ...	93 . 1 . 8	equal to {	107 . 6 . 6
		Bombay	98 . 2 . 11		101 . 13 . 7
		Sonauts	97 . 4 . 9		102 . 12 . 5
		Current	108 . 0 . 0		92 . 9 . 6
		100 Siccas			
		100 Bombay			
		100 Sonaut			
		100 Current			

The following is an official statement of the rates at which Gold and Silver Coins of the Governments of Calcutta and

Bombay will be received into the several Treasuries subject to the Presidency of Fort St. George: dated 18th March, 1814.

CALCUTTA MINT COINS.			Value of 100.			Value of one.		
	Pag.	Fan.	Cash.		Pag.	Fan.	Cash.	
Gold Mohurs	451	4	57	4	22	79.77	
Half Ditto	225	24	68½	2	11	39.885	
Quarter Ditto	112	34	74¼	1	5	59.9425	
Sicca Rupees	30	8	38	0	13	46.78	
Half Ditto	15	4	19	0	6	63.39	
Quarter Ditto	7	24	49½	0	3	31.695	

BOMBAY MINT COINS.								
	Pag.	Fan.	Cash.		Pag.	Fan.	Cash.	
Gold Mohurs	392	4	22	3	41	35.42	
Panchea	130	30	61	1	13	64.61	
Gold Rupees	26	5	76	0	11	60.76	
Silver Rupees	28	11	52	0	12	57.32	
Half Ditto	14	5	66	0	6	28.66	

To convert the above rates into the new currency, at 350 Rupees per 100 Star Pagodas, (See TABLE V. No. 18, p. 118.)

The fineness of gold and silver is expressed by dividing it into 10 touch, or matt, which are subdivided into 10 parts, answering to the Chinese division of 10 touch.

To reduce any Coin to the standard fineness:—

RULE.—As the touch of gross weight

Is to the out-turn;

So is the standard touch (91½)

To the standard fineness.

EXAMPLE:

Touch of Gross Weight.	Out-turn. oz. dwts. grs.	Standard Touch.	Standard Fineness. oz. dwts. grs.
30	5447 . 0 . 5	91½	1782 . 13 . 3⅛

Thus:

$$5447 . 0 . 5 = \frac{2614565 \times 3 \times 30}{91\frac{1}{2} \times 3} = 855675\frac{5}{11}$$

WEIGHTS.—Pearls are valued, as at Bombay, by two kinds of weight, real and nominal. The former they are weighed by, and are sold by the latter. The real weight is the Mangelin, which is divided into 16 parts, and is equal to 6 English grains. The nominal weight is the Chow, which is divided into 64 parts, and is deduced from the Mangelin thus:—

RULE.—Square the number of Mangelins, and divide three-fourths of this product by the number of Pearls. The quotient is the number of Chow.

The great weights are the Pagoda, Pollam, Seer, Vis, Maund, and Candy, thus divided :—

		lbs. oz.
10 Pagodas	} equal to {	1 Pollam, is ... avoirdupois 0 1½
8 Pollams		1 Seer 0 10
5 Seers ...		1 Vis 3 2
8 Vis.....		1 Maund 25 0
20 Maunds		1 Candy 500 0

The Malabar weights are these :

10 Varabuns	} equal to {	1 Pollam
40 Pollams...		1 Visay, or Vis = 3 lbs. 0 oz. 3 drs.
8 Vis		1 Maund, or Manungu = 24 lbs. 2 oz
20 Maunds ..		1 Baruay, or Candy = 482 lbs. 4 oz.
20 Baruays...		1 Gursay, or Garce = 9645 lbs. 8 oz.

Gold and Silver are sometimes sold by the Pagoda weight, poising each Pagoda 2 dwts. 4.56 grs. troy.

The following is a comparative view of the several denominations of great weights used in various parts of India, with those of the Presidency of Madras :—

Country.	Species of Weight.	MADRAS WEIGHT.		
		Mds.	Vis.	Pol.
Bengal	Factory Maund.....	2	7	35½
Ditto	Bazar Maund	3	2	11½
Bombay.....	Candy of 20 Maunds	22	3	8
China	Pecul of 100 Catties.....	5	2	26
Mocha	Bahar of 15 Frazils	18	0	0
Surat	Candy of 20 Maunds	29	6	37½
Junkceylon	Bahar of 8 Capins.....	19	3	12
Bencoolen	Bahar	22	3	8
Calicut	Maund of 1000 Pools	1	1	24
Cochin	Candy of 20 Maunds	21	5	36½
Malacca.....	Bahar of 3 Peculs.....	16	1	24
Tellicherry	Candy of 20 Maunds	24	0	0

MEASURES.—GRAIN AND DRY MEASURE are the Olluck, Measure, Marcal, Parah, and Garce, thus divided :

1 Olluck.....	} equal to {	Cubic inches.....	11.719
8 Ollucks ...		1 Measure, or Puddy	93.752
8 Measures ..		1 Marcal	750
5 Marcals ...		1 Parah of Chunam ..	3,750
400 Marcals ...		1 Garce	300,000

The Marcal and lesser measures were ordered, when made of wood, to be round, and rimmed with iron or brass, and the

Marcals to be $9\frac{1}{6}$ inches deep, and $10\frac{1}{6}$ inches diameter inside, and to hold 27 lbs. 2 oz. and 2 drs. avoirdupois, of fresh well-water: hence 43 Marcals are equal to 15 English bushels. The Parah to measure 2 feet square, and $6\frac{1}{2}$ feet deep.

When grain is sold by weight, 9,256 $\frac{1}{2}$ lbs. equal to 18 Candies, 12 $\frac{4}{5}$ Maunds, are a Garce, which is nearly 17 $\frac{1}{2}$ English quarters.

LIQUID MEASURE.—The Puddy, by which milk, ghee, oil, and some other liquids are sold, is equal to the Puddy in grain measure, containing 8 Ollucks; but for wine, spirits, &c. the English measure is used.

$$\left. \begin{array}{l} 8 \text{ Ollucks.....} \\ 8 \text{ Measures ...} \\ 20 \text{ Marcals ...} \end{array} \right\} \text{equal to } \left\{ \begin{array}{l} 1 \text{ Measure, or Puddy} \\ 1 \text{ Marcal} \\ 1 \text{ Candy, = 64 gallons.} \end{array} \right.$$

LAND MEASURE.—Land is generally measured with a Gunter's chain of 100 links, or with a rod of 10 feet, and reduced to Cawnies, Grounds, and square feet, agreeably to the following Table:—

60 feet long, and 40 feet broad, make 1 Ground, or Mauney, equal to 2,400 square feet.
24 Grounds, or Maunies, make 1 Cawney, equal to 57,600 square feet.

The Indian Cawney is in proportion to the English acre, as 1 is to 1.3223, or as 121 is to 160.

To reduce Indian Cawnies to English acres, multiply the given number of Cawnies by 160, and divide by 121; the quotient will be the number of acres, and the remainder the fractional part of an acre. Or multiply the Cawnies by 1.3223, and the product, cutting off 4 places to the right hand, will be the same, and the figures so cut off, are the decimal parts of an acre.

In the Jaghire, the Ady, or Malabar foot, is used, which is 10.46 inches English; 24 Adies make 1 Culy; and 100 square Culies make 1 Cawney, or nearly an English acre. The common Culy, however, is 26 Adies, or 22 $\frac{3}{4}$ English feet, which makes the Cawney 1 acre, 28 $\frac{3}{4}$ perches. The proper Cawney would only contain 43,778 square feet.

LONG MEASURE.—The Covid in cloth measure is 18 inches; but the English yard is generally used.

MADURA.

(In the Carnatic.)

EXCHANGES between this Place and Madras are as follow :—

Porto Novo Pagodas	at 120 per 350 Rupees.
Bahadre ditto	92. 11½c.
Canteria Chuck	119. 1½c.
Coily ditto	165
Shooly ditto.....	276
Gopauly ditto	330
Auna Cash	660 per 3½ Rupees.
Chiller ditto	1320
Coily ditto	441½

MAGINDANAO.

(Chief of the Philippine Islands.)

COINS AND MEASURES.—The currency in most parts of the country, as in Sooloo, is the Chinese Kangan, a piece of coarse cloth, thinly woven, 19 inches broad, and six yards long ; the value at Sooloo is 10 Dollars for a bundle of 25, sealed up, and at Magindanao much the same : but here Spanish Dollars are scarce. These bundles are called Gandangs, rolled up in cylindrical form. They have also as a currency Cousongs, a kind of Nankeen, died black ; and Kompow, a strong white Chinese linen, made of Flax.

In the bazar, or market, the immediate currency is Paly ; 10 Gantangs, of about 4 lbs. each, make 1 Battell, and 3 Battells (a cylindrical measure, 13½ inches high, the same in diameter) about 120 lbs., are commonly sold for a Kangan. Speaking of the value of things here and at Sooloo, they say such a Horse, Proa, &c. is worth so many Slaves, the old valuation being one Slave for 30 Kangans.

China Cash is in use here, their price from 160 to 180 for a Kangan. In making bargains, it should be specified whether is meant real or nominal Kangan ; the dealing in the nominal or imaginary Kangan is an ideal barter. When dealing in real Kangans, they must be examined, and the Gandangs, or bundles of 25 pieces, are not to be trusted, as the dealers will often forge a seal, having first packed up damaged Kangans ;—at this the Chinese here and at Sooloo are very expert.

MALABAR.

(Province of Hindostan.)

COINS.—In South Malabar accounts are kept in Feringy, or Porto Novo Pagodas, or Varahuns; Pudameni, or Virraya Fanams; and Cash. The intrinsic value of the two Gold Coins is given under the Article DARAPORAM. Cowries are not in use. A Brahman has the exclusive privilege of coining copper money, which is recoined every year. At the beginning of the year he issues out his money at the rate of 22 Cash per Virraya Fanam; and buys the old ones at the rate of 40. The value of the Cash therefore gradually sinks towards the end of the year, until it falls to the 40th part of a Fanam. The Company's Niruc, or rate of exchange, necessarily varies. The batta allowed to money changers for giving Fanams for Pagodas, is 2 Cash per Pagoda.

WEIGHTS.—The Polam weighs 9 Pondicherry Rupees, 1 Cash; equal to 1624 grs. The Tolam is equal to 23.19248 lbs.

2½ Polams...	} equal to	1 Seer
5 Seers		1 Visay
8 Visays ...		1 Tolam.

MEASURES.—The Merchants sell by the following standard:—84 Pondicherry Rupees' (or 14868 grs.) weight of Rice fill a Puddy measure, containing 79.875 cubical inches; and 9 Puddies are equal to 1 Poray, which is therefore about 1.3375 peck. The standard Puddy, as well as the Tolam, is stamped by Government. Mustard, capsicum, oil, and ghee are sold by measure.

MALACCA.

(On the Malay Peninsula.)

COINS.—They have no particular coins of their own; some few Dutch Schillings and Stivers are to be seen; the rest are gold, as Coupangs, Ducats, &c.; but all contracts for goods, bought or sold, are made in Dutch Dollars.

Accounts are kept in Rix Dollars, Schillings, Stivers, and Doits, which are thus divided:—

4 Doits.....	} make	1 Stiver.
6 Stivers ...		1 Schilling.
8 Schillings		1 Rix Dollar.

All Indian coins are current here. The following are the rates at which they usually pass :—

Bombay Rupee.....	5 Schillings	Japan Cobang, stamped	80 Schillings
Madras Rupee.....	4 Ditto.	Ducatoon	13 Ditto.
Spanish Dollar.....	10 Ditto.	English Crown.....	10 Ditto.

A Dubbeltjee is 10 Doits, and 3 are equal to a Tangre or Schilling. 10 Tangres or 68 Stivers, equal to a Spanish Dollar, exchange for 27 Dubbeltjees, 2 Doits. $1\frac{1}{2}$ Spanish Dollar, equal to a Pagoda, exchanges for 40 Dubbeltjees, 8 Doits. 2 Rupees, or 24 Dubbeltjees, are equal to 1 Keesers Daalder.

WEIGHTS.—All goods are weighed here by the dotchin, for which 1 per cent. is paid to the Captain of the Chinese, who is dotchin-keeper.

GREAT WEIGHTS.		GOLD WEIGHTS.	
16 Tales...	} make {	16 Miams...	} make {
100 Catties.		20 Buncals..	
3 Peculs..		equal to 29 oz. 17 dwts. 16 grs. troy.	
		1 Catty.	1 Buncal.
		1 Pecul.	1 Catty.
		1 Bahar.	

The Pecul weighs 135 lbs. avoirdupois ; but what is called the China Pecul at Malacca, weighs only 125 lbs.

MEASURES.—1 Ganton is equal to 6 Dutch lbs. or $6\frac{1}{2}$ lbs. avoirdupois ; 10 Gantons, one Measure ; 50 Measures, 1 Last ; 800 Gantons, 1 Quoyane. 40 China Peculs make a Quoyane of rice, which then weighs 5400 lbs. avoirdupois.

A Kip of Tin contains 15 Bedoors, or 30 Tampangs, and weighs $37\frac{1}{2}$ lbs. Dutch troy, or 40 lbs. 11 oz. avoirdupois.

The Covid is two-thirds of a Dutch ell, about $18\frac{1}{2}$ English inches.

MALDIVES.

(Islands in the Indian Ocean.)

COINS.—Their money is of silver wire, and called Larins ; the value about a quarter of a Rupee each. All other monies pass current by weight, and every man keeps weights for the purpose ; so that they are frequently obliged to cut Dollars, Rupees, &c. into pieces, to pay for any commodity.

MANGALORE.

(On the Malabar Coast.)

COINS.—The following are the coins in common currency here, and their value in Rupees; viz.—

Ikeri or Swamy Pagoda.....	4 Rupees	Madras or Star Pagoda.....	3½ Rupees.
Bahadary or Hyder's Pagoda	4 Ditto.	Porto Novo Ditto.....	3 Ditto.
Sultany or Tippoo's Ditto....	4 Ditto.	Canter Raya or Ikeri Fan.	½ Ditto.
Kristna or Mysore Ditto....	4 Ditto.	Virraya Fanam	½ Ditto.

Of Silver Coins, the Surat and Madras Rupees are considered of equal value, and pass for 5½ Silver Fanams, the same as are current in Malabar; in the bazar they exchange for 10 Dudus or Dubs, but in revenue are taken for 14 Dubs each.

Of Copper Coins, the Bombay Pice coined in England, and Tippoo's Dubbs are current here; these with their fractions ½, ¼, and ⅛, are the only small coins in use. Cowries are not in circulation.

In payment for goods or debts, every person must receive these coins at the above rate of exchange. The money changers give silver for gold at the regulated price; but they take a small batta, or exchange, when they give gold for silver. They also give copper for silver at the regulated price, but demand 10½ Dubs for the Silver Fanam.

Accounts are commonly kept in Sultany Pagodas, Rupees, and Annas; others are kept in Pagodas, a nominal Fanam or Huna of 10 to a Pagoda, and Annas or 16 parts of these Fanams.

See also SERINGAPATAM.

WEIGHTS.—The Seer, or Sida, used for weighing, contains 4297 grains, which is rather more than 24 Bombay Rupees. The Seer is divided into halves, quarters, eighths, and sixteenths. The number of Seers in the Maund varies according to the goods to be disposed of.

The Maund by which goods are sold in the market, is 46 Seers, or 28.14 lbs.—The Maund by which the merchants purchase, and by which the Company buy and sell, weighs 16 Rupees more, or 28.55 lbs.—Jaggery is bought and sold by the Maund of 40 Seers, or 24.47 lbs.

The Candy, or Bara, contains 20 Maunds, and varies accordingly, from 571 lbs. to 589½ lbs.

MEASURES.—The Seer in the bazar is formed by mixing equal quantities of salt, and of the nine most common grains, and then by taking of the mixture 84 Bombay Rupees weight; this fills the Seer measure, and is about 73.683 cubical inches. The Moray, or Mudi, contains 38 Seers, or about 1¼ bushel English.

The Grain Measure, by which the farmers sell their crops, is thus formed:—64.125 cubical inches make 1 Hany, 14 Hanies make 1 Cullishigay, 3 Cullishigays make 1 Mudi, or Moray, which is about 1.2525 bushel.

Grain, salt, and sometimes pepper, are sold by measure; of this last, a Pucka Seer, or 73.683 cubical inches, is reckoned to weigh 51½ Bombay Rupees, or 21 oz. avoirdupois. The Corge of 42 Robins for rice is 49 Morays.

MANILLA.

(*In Luconia, one of the Philippine Islands.*)

COINS.—Accounts are kept thus:—

34 Maravedis, or 7 Granos ...	} equal to {	1 Rial.
8 Rials, or 16 Quartellos.....		1 Dollar, or Peso.
16 Dollars		1 Doubleloon.

The Course of Exchange between Bengal and Manilla varies from 38 to 45 Spanish Dollars per 100 Current Rupees.

WEIGHTS.—Besides the Spanish weights, the Chinese Pecul is used here. The small weights are as follow:—

1 Mexico Dollar in weight	} equal to {	1 Ounce.
16 Ounces		1 Pound=1 lb. 7½ drs. avoird.
10 Ditto.....		1 Tale of Gold weight.
11 Ditto.....		1 Tale of Silk.
9 Ditto.....		1 Punto of Gold or Silver Thread.
22 Ditto.....		1 Catty.
8 Ditto.....		1 Mark of Silver.

MASSUAH.—See ABYSSINIA.

MASULIPATAM.

(On the Coast of Coromandel.)

COINS.—Accounts are kept in Pagodas, Rupees, and Annas; the Pagoda is $3\frac{1}{2}$ Silver Rupees, and the Rupee is 16 Annas.

The Coins are Gold Rupees, which weigh $171\frac{1}{3}$ English grains: they are about $23\frac{3}{4}$ carats fine, and worth 30s. sterling. Pagodas, nearly the value of the Star Pagoda of Madras, ($3\frac{1}{2}$ Rupees). Silver Rupees, $24\frac{1}{4}$ of which weigh a Seer, or 4293 English grains. The fineness of these Rupees is 11 oz. $12\frac{1}{2}$ dwts.; their value therefore is $23\frac{1}{2}$ d. sterling.

WEIGHTS are as follow:—

1½ Dabou.....	} equal to	1 Neve.
15 Neves.....		1 Seer.
5 Seers.....		1 Vis.
8 Vis.....		1 Maund=24½ lbs. avoird. nearly.
20 Maunds...		1 Candy.

MAURITIUS,

(Or Isle of France.)

COINS.—The principal French Coin in common currency is the Sol Marqué, of copper, equal to 3 Colonial Sols:—

2 Sols.....	} equal to	1 Cent.
1½ Cent.....		1 Sol Marqué.
10 Cents.....		1 Livre.
66½ Marqués...		1 Dollar.

The following are the Rates of Exchange, compared with the Dollar, at which foreign coins pass here:—

2 Sica Rupees.....per 1 Dollar.	10 Ikeri Pagodas.....per 17 Dollars.
220 Bombay, or Arcot Rupees.....100 Dollars.	1 Bombay Gold Mohur.. 7½
10 Star Pagodas.....16	15 Double Fanams.....1
10 Porto Novo Pagodas 13½	4s. 8d. sterling.....1
	20 Cash.....1 Marqué.

Accounts are kept either in Dollars of 100 Cents, the mode generally adopted in public or Government transactions, or in Dollars of 10 Livres, or 200 Sols, mostly used by merchants. These Livres are called Colonial Livres, two of which equal a French Franc.

The following is an official Tariff of the current money, and its equivalent in colonial money. The Ten Livre Pieces struck in the Colony under the French Government, the Five Franc Pieces of France, and the German Crown Pieces, have the same value in exchange as the Spanish Dollar. In converting these monies into sterling, it will be sufficiently correct for ordinary purposes, to reckon the Livre at $5\frac{1}{2}$ d., and the Sol at $\frac{1}{4}$ d.

SILVER COINS.

Spanish Dollar.....	at 10 Colonial Livres.
Sicca Rupee.....	5
Bombay and Arcot Rupee.....	$4\frac{1}{2}$
Half Silver Pagoda.....	8
Double Fanam.....	$1\frac{1}{2}$
Fanam.....	$12\frac{1}{2}$ Sols.

GOLD COINS.

Spanish Doubloon.....	at 160 Colonial Livres.
Portuguese Half Doubloon	80
Ikeri Pagoda	17
Porto Novo Pagoda.....	$13\frac{1}{2}$
Star Pagoda.....	16
Bombay Gold Mohur	75
Bengal Gold Mohur	90

The chief currency of this place is (1820) Government paper, payable to bearer on demand in Spanish Dollars. The specie Dollar is generally at an agio, being the most marketable kind of bullion in the East.

WEIGHTS.—The weight used here is generally the Poids de Marc of France, 100 lbs. of which are considered equal to 108 lbs. avoirdupois. The pound Poids de Marc is equal to 7555 grains English troy weight.

MEASURES.—The English and ancient French measures of capacity are both used.

Note.—While the English had possession of the Isle of Bourbon, the same system of monies, weights, and measures was in use there as at the Mauritius; but since 1814, the French system has been partially re-established.

~~~~~  
**MERGUI.**—See RANGOON.

## MOCHA.

*(In Arabia.)*

COINS.—The monies coined in the country are Commasseees and Carats, 7 of the latter being equal to 1 of the former. The Commasseees contain but little silver; they are used for small payments, but they rise and fall in value; sometimes 80, and occasionally only 40, pass for a Dollar.

Accounts are kept in Piastres, or Mocha Dollars, consisting of 80 Cavears current. The Piastre is an imaginary money; 121½ being equal to 100 Spanish Dollars, in which payments are mostly made. (See TABLE V. No. 16.) The Piastre is thus worth nearly 3s. 8½d.: other coins pass according to weight and fineness. The Venetian Sequin commonly passes for 2 Piastres, 25 Cavears.

Cotton is sold by the Haraff, an imaginary money, value 1 Piastre, 22 Cavears: thus 9 Haraffs are equal to 11½ Mocha Piastres of account, as at Beetlefakkee. A Tomand is equal to 80 Larins, each worth 80 Carats.

WEIGHTS.—The small weights, by which gold and silver are weighed, consist of the following:—

|                  |              | oz.                          | dwt.        | grs. |             |
|------------------|--------------|------------------------------|-------------|------|-------------|
| 16 Carats.....   | } equal to { | 1                            | Coffola = 0 | 2    | 0.912 troy. |
| 24 Ditto.....    |              | 1                            | Miscal = 0  | 3    | 1.368       |
| 10 Coffolas..... |              | 1                            | Vakia = 1   | 0    | 9.12        |
| 1½ Vakia.....    |              | 1                            | Beak = 1    | 10   | 13.68       |
| 87 Vakias.....   |              | 100 Spanish Dollars' weight. |             |      |             |

The large or Custom House weights are these:—

|                 |              |   |                             |
|-----------------|--------------|---|-----------------------------|
| 15 Vakias.....  | } equal to { | 1 | Rattle.                     |
| 40 Ditto.....   |              | 1 | Maund = 3 lbs. avoird.      |
| 10 Maunds.....  |              | 1 | Frazil, or Farcel = 30 lbs. |
| 15 Frazils..... |              | 1 | Bahar = 450 lbs.            |

In Coffee 14½ Vakias are reckoned equal to a Rattle, 2 Rattles to a Maund, and 10 Maunds, or 290 Vakias, to a Frazil. The Rattle is only a bazar weight.

Some difference exists in the reports of the Bahar's weight, which is variously represented, as 437½ lbs. 445 lbs. and 450 lbs. The weights at the Custom House are generally found to be heavier by two or three pounds than the regular weights; and in the interior the difference is still greater.

MEASURES.—The Tomand, or Teman, dry measure, contains 40 Mecmedas, or Kellas, and weighs, of Rice, 168 lbs. avoirdupois.

The Cuddy, or Gudda, liquid measure, contains about two English gallons, and weighs 18 lbs. It is divided into 8 Noos-fias, each subdivided into 16 Vakias, as at Beetlefakee.

The long measures are the Cobido, or Coid, of 19 inches, and the Guz of 25. The Baryd is 4 Farsakh, or 12 miles.

MOLUCCAS.—See AMBOYNA, BANDA, TERNATE, &c.

### MOSAMBIQUE.

(*East Coast of Africa.*)

COINS.—The Coins current are Spanish Dollars, Crusados, and Testoons, 4 Testoons making 1 Crusado, the exchange of which with Spanish Dollars varies from 250 to 270 Crusados per 100 Dollars.

WEIGHTS.—The weights are the Frazil and the Bahar, 20 of the former making one of the latter, which is considered equal to 240 avoirdupois pounds.

### MUDDI, OR MUTTY.

(*In Guzerat.*)

COINS.—The only Coin belonging to the place is of Silver, called a Cowrie. The exchange varies from 285 to 295 Cowries per 100 Bombay or Surat Rupees. All Indian coins pass current here. Their value fluctuates according to the quantity in the market.

WEIGHTS.—The weights are Seers and Maunds, the latter of two sorts, Cutch and Pucca.

|               |              |                                     |
|---------------|--------------|-------------------------------------|
| 2 Pice.....   | } equal to { | 1 Anna.                             |
| 16 Annas..... |              | 1 Cutch Seer.                       |
| 40 Seers..... |              | 1 Cutch Maund, avoirdupois 37½ lbs. |

The Pucca Maund is 2 Cutch Maunds, and 20 Cutch Maunds are equal to 1 Surat Candy.

MEASURES.—The Measures are the Grah and the Guz, 16 Grahs making 1 Guz, about 34 English inches. Broad Cloth, Velvets, Silks, &c. are sold by this measure; though the shopkeepers in the bazar often sell by hand, from the finger's end to the elbow, &c.: this is rejected by the merchants.

### MULKEY.

(*In the Province of Canara.*)

WEIGHTS.—The Maund here weighs 29 lbs., and 20 Maunds make a Candy, equal to 580 lbs.

### MUSCAT, or MASCAT.

(*A Town of Arabia.*)

COINS.—Accounts are kept here in Gass and Mamoodies; 20 Gass make 1 Mamoody. The coins current are

|                  |              |                   |
|------------------|--------------|-------------------|
| 30 Budgerooks... | } equal to { | 1 Mamoody.        |
| 3½ Mamoodies ... |              | 1 Surat Rupee.    |
| 4 Ditto .....    |              | 1 Bombay Rupee.   |
| 7½ Ditto .....   |              | 1 Spanish Dollar. |

All Persian, Turkish, and Indian coins are met with here, but are generally sold by weight.

WEIGHTS.—The weights are the Cucha and Maund; 24 Cuchas making a Maund, which is equal to 8 lbs. 12 oz. avoirdupois.

### MYSORE.

COINS.—The following monies circulate:—The Star Pagoda at 45 Fanams; the Bahadre Pagoda at 46 Fanams, 29 Cash. The Canteria Pagoda is worth about 6s. 4d.; and the Bahadre, 8s. 3d. nearly.

Accounts are kept thus:—

|              |              |                   |
|--------------|--------------|-------------------|
| 16 Cash..... | } equal to { | 1 Canteria Fanam. |
| 10 Fanams..  |              | 1 Ditto Pagoda.   |

WEIGHTS AND MEASURES.—These are as follow:—

|                          |              |                          |
|--------------------------|--------------|--------------------------|
| 40 Pucca Seers.....      | } equal to { | 1 Morah = 80 lbs. Rice.  |
| 60 Ditto.....            |              | 1 Batty = 120 lbs. Do.   |
| 521½ Ditto.....          |              | 1 Garce = 1042½ lbs. Do. |
| 1 Candy .....            |              | 560 lbs.                 |
| 9 Trichinopoly Measures. |              | 50 lbs.                  |

See also CANARA, COIMBATOUR, and SERINGAPATAM.

The following weights are given by Dr. Heyne as the standards for the Circars. As they are derived from the Sanscrit, they may be considered as general for Hindostan.

|                    |              |                                 |
|--------------------|--------------|---------------------------------|
| 1 Paddy Seed ..... | } equal to { | 1 Visum = ½ gr.                 |
| 4 Visums .....     |              | 1 Gulivinda, or Patika = 2 grs. |
| 2 Gulivindas ..... |              | 1 Addaga = 4 grs.               |
| 2 Addagas .....    |              | 1 Chinum = 8 grs.               |
| 2½ Chinums .....   |              | 1 Tsavila = 20 grs.             |
| 2 Tsavilas .....   |              | 1 Dharanum = 40 grs.            |
| 2 Dharanums .....  |              | 1 Mada = 1 dr. 20 grs.          |
| 3 Madas .....      |              | 1 Tulam = 4 drs.                |
| 6 Tulams .....     |              | 1 Pavu = 3 oz.                  |
| 4 Pavas .....      |              | 1 Siru = 12 oz.                 |
| 5 Sirus .....      |              | 1 Visa, or Tackeda = 3½ lbs.    |
| 2 Visas .....      |              | 1 Yettu = 7½ lbs.               |
| 2 Yettus .....     |              | 1 Arda Manugudu = 15 lbs.       |
| 2 Arda Manugudu... |              | 1 Manugudu = 30 lbs.            |
| 5 Manugudu .....   |              | 1 Yadum, or Pancakum = 150 lbs. |
| 2 Yadums .....     |              | 1 Pandum = 300 lbs.             |
| 2 Pandums .....    |              | 1 Putadu, or Candy = 600 lbs.   |

*List of Candies and Tums reduced to Pucca Seer, used in different Places of the Mysore, each Seer of 2 lbs. English weight.*

|                                                           | Tum.         | Candy.     |
|-----------------------------------------------------------|--------------|------------|

| 2 Manikas .....   |              | 1 Addadu = 4 lbs.    |
| 2 Addadus .....   |              | 1 Conchum = 8 lbs.   |
| 2 Conchums .....  |              | 1 Irasa = 16 lbs.    |
| 2 Irasas .....    |              | 1 Tum = 32 lbs.      |
| 5 Tums .....      |              | 1 Yadum = 160 lbs.   |
| 2 Yadums .....    |              | 1 Pandum = 320 lbs.  |
| 2 Pandums .....   |              | 1 Puttadu = 640 lbs. |

## NATAL.

*(On Sumatra.)*

COINS.—Spanish Dollars and Rupees are current ; besides these, there are single, double, and treble Fanams, the latter called Tali, coined at Madras ; 24 Fanams, or Tali, being equal to a Spanish Dollar.

In this part of the Island, where the traffic in gold is considerable, it is generally employed as currency instead of coin. Every man carries small scales about him, and purchases are made with it so low as a grain or two of paddy weight.

WEIGHTS.—Various seeds are used as gold weights, but more especially two, one the well-known scarlet Pea with a black spot, 24 of which make a Mace, and 16 Mace a Tale. The other is a scarlet, or rather coral Bean, much larger than the former, and without a black spot. It is the Candarine weight of the Chinese, of which 100 make a Tale. The Tale differs in the northern and southern parts of the Island ; here it is only 24 dwts. 9 grs. troy ; but at Padang, Bencoolen, and elsewhere, it is 26 dwts. 12 grs. troy.

English and Chinese weights are commonly used for merchandise.

## NEGAPATAM.

*(On the Coromandel Coast.)*

COINS.—During the period the Dutch held Negapatam, a coinage took place of four or five Lacs of Pagodas annually ; but this has been discontinued since the English obtained possession of it. As there is no gold coinage in any other place to the southward, nor any regular circulation of Rupees, the whole currency of these provinces, exceeding the Pagodas that happen to be in use, consists of Fanams. Of these every district coins a different sort ; and no comparative rate having been established between the Star Pagodas and those inferior coins, their value fluctuates according to the relative demand, and the coinage of one province is seldom at par in another.

## NICOBAR ISLANDS.

*(E. Side of the Bay of Bengal.)*

In trading here money is of no use ; the country ships purchase cocoa nuts, 4 for a leaf of tobacco, and 100 for a yard of blue calico ; and a bottle of cocoa nut oil for 4 leaves of tobacco.

## ONORE, OR HONAWERA.

*(A Town in Canara.)*

COINS.—The common currency here consists of Ikeri, Sultany, and Bahadre Pagodas ; Surat and Madras Rupees, which are considered of equal value ; Fanams, a small silver coin ; and Dubs, a copper coin.

|                 |            |           |
|-----------------|------------|-----------|
| 10 Dubs.....    | } equal to | 1 Fanam.  |
| 5 1/2 Fanams... |            | 1 Rupee.  |
| 4 Rupees...     |            | 1 Pagoda. |

WEIGHTS.—The Seer weight is the same as at Mangalore ; it ought to weigh 24 Bombay Rupees ; but these being scarce, in

their stead Dubs are commonly used, and are somewhat heavier. The number of Seers contained in the Maund, varies according to goods sold, viz.

|                                                   |            |       |
|---------------------------------------------------|------------|-------|
| Common articles in the Bazar are 40 Seers or..... | avoir. lbs | 24.55 |

| Beetle-nut .....                                  | 45½        | 27.92 |
| Dry Cocoa Nut Kernels.....                        | 48         | 29.46 |
| Jaggery.....                                      | 44         | 26.82 |

MEASURES.—There are two kinds of grain measures in use, one for the farmers, and one for the merchants; the basis of the former is the Hany, containing  $87\frac{3}{4}$  cubical inches.

|                |        |                                          |       |
|----------------|--------|------------------------------------------|-------|
| 16 Hanies ...  | } make | 1 Colaga, which is equivalent to Bushels | 0.816 |
| 20 Colagas ... |        | 1 Moray, or Mudy, for common use.....    | 1.632 |
| 22½ Colagas... |        | 1 Moray for sale .....                   | 1.813 |
| 15 Colagas ... |        | 1 Moray for seed.....                    | 1.224 |

The basis of the measure by which the merchants deal, is the Sida, of  $32\frac{1}{2}$  cubical inches.

|                |        |                |               |
|----------------|--------|----------------|---------------|
| 6 Sidas .....  | } make | 1 Colaga ..... | Bushels 0.907 |
| 20 Colagas ... |        | 1 Moray .....  | 1.814         |
| 30 Morays ...  |        | 1 Corge.....   | 54.419        |

The Bazar Moray, and that of the farmers for sale, ought to be the same, but they differ a little.

## PADANG.

(*W. Coast of Sumatra.*)

COINS.—Accounts are kept in Rix Dollars and Stivers; 48 Stivers making 1 Rix Dollar. Spanish Dollars and most of the Indian coins pass, nearly at the same rates as at Batavia.

WEIGHTS.—Both Dutch and Chinese weights are in common use.—See NATAL.

## PAHANG.

(*E. Coast of Malacca.*)

COINS AND WEIGHTS.—The Spanish Dollar is the current coin, and the Chinese Pecul the usual weight.

## PALEMBANG.

*(On the S. E. Coast of Sumatra.)*

COINS.—The currency of the country, and the only money allowed to be received at the King's Treasury, is Spanish Dollars; but there is also in general circulation a species of small base coin, called Petis, which are cut out of plates composed of lead and tin; and having a square hole in the middle, like the Chinese Cash, are strung in parcels of 500 each, 16 of which are equivalent to a Spanish Dollar. Accounts are kept in Rix Dollars (a nominal coin) of 48 Stivers; the exchange between Spanish and Rix Dollars being five of the latter for four of the former.

WEIGHTS.—Here, as well as at all other places where the Chinese have settled, their weights have become in common use. In weighing gold, the Tale is considered as the tenth part of the Catty, or equal to the weight of  $2\frac{1}{4}$  Spanish Dollars. The Catty weighs 19 oz. 15 dwts. 14 grs., troy.

The commercial weights are the Ganton, Baly, and Copang; 10 Gantons make 1 Baly, (about 60 Catties, or 81 $\frac{3}{8}$  lbs. avoirdupois), and 80 Balies 1 Copang. By this measure rice is also sold.

The Goelack of Pepper is  $1\frac{1}{4}$  Catty, or 27 oz. avoirdupois; but the weight used by the Dutch Company is the Pecul, which is equal to 133 lbs. avoirdupois.

## PASSIER.

*(East Coast of Borneo.)*

COINS AND WEIGHTS.—Spanish Dollars are the general coin, and goods are bought and sold by the China Pecul and Catty.

## PATANY.

*(On the Malay Peninsula.)*

COINS AND WEIGHTS.—The principal coin is the Spanish Dollar, and all goods are weighed by the Chinese dotchin.

## PATTA.

(*An Island near the East Coast of Africa.*)

COINS.—These are as follow :—

4 Annas... } equal to { 1 Quarter.  
4 Quarters } equal to { 1 Spanish Dollar.

WEIGHTS.—The Patta Maund is equal to 1 lb. 13 oz. avoirdupois.

## MEASURES.

10 Kellas } equal to { 1 Taub.  
3 Taubs } equal to { 1 Jessla.

## PEDIR.

(*North Coast of Sumatra.*)

COINS.—Spanish Dollars are the principal currency; the other coins are nearly similar to those at Acheen.

WEIGHTS.—The Pedir Catty weighs 37 Spanish Dollars; and the Bahar is equal to 424 lbs. avoirdupois.

## PEGU.

COINS.—Trade here is carried on mostly by barter; gold and silver being exchanged as merchandise. The Tical, a certain weight of silver, is sometimes used as a money of account, and divided into 16 Toques or Touch.

There is a small coin, called Ganza, composed of copper, lead, and tin, which is worth about 1½d.; but the price varies. Gold, silver, pearls, spices, and other articles are generally paid for in this money.

WEIGHTS.—Gold and silver are weighed by the Tical; and their fineness is expressed by dividing the weight into 16 parts, called Touch, corresponding with 100 Touch in China, or 10 Touch on the Malabar Coast. The Tical weighs 4½ Pagodas, or 237½ grains.

The commercial or great weights are these:—

|              |              |                                           |
|--------------|--------------|-------------------------------------------|
| 10 Moos.     | } equal to { | 1 Tical.                                  |
| 100 Ticals   |              | 1 Vis, = 3 lbs. 5 oz. 5 drs. avoirdupois. |
| 150 Vis..... |              | 1 Candy, = 500 lbs.                       |

From the foregoing weight of the Tical,  $237\frac{1}{2}$  grs., the Candy should weigh  $508\frac{1}{2}$  lbs. avoirdupois, nearly.

MEASURES.—A Basket, containing 16 Vis, or equal to 54 lbs. avoirdupois, is the measure by which rice is sold.

## P E R S I A.

COINS.—Accounts are kept thus:—

|                   |              |                      |
|-------------------|--------------|----------------------|
| 5 Dinars simple   | } equal to { | 1 Kasbequis.         |
| 2 Kasbequis.....  |              | 1 Dinar bisti.       |
| 5 Dinars bisti... |              | 1 Shahee or Shatree. |
| 2 Shahees.....    |              | 1 Mamoodie.          |
| 2 Mamoodies ...   |              | 1 Abassee.           |
| 50 Abassee.....   |              | 1 Toman.             |

The Toman and Dinar are imaginary.

Large payments are made commonly in silver; the sums are not counted, but weighed. If any of the pieces are thought light, they are weighed in lots of 25 each.

Some gold coins, called Cherassi, are struck for distribution on coronations, and are of different values. Thus the piece of Iman Riza is worth about 4s. 2d.; that of Aboul Faiz, about 12s. 3d.; that of Kouli Khan, 30s. 6d. nearly.

The silver coins are Haser Denaries, of 10 Mamoodies; Daezajees, of 5; Larins, of  $2\frac{1}{2}$ ; Albaajers or Abasseees, of 2; Single Mamoodies; half Mamoodies, or Shahees; and copper Kasbequis, of 5 Dinars.

The value of the Toman is much lower than formerly, having been estimated sometimes at 50s. See *Assay Report*, p. 417. The weight and fineness of all the coins are altered in different reigns.

WEIGHTS.—Two sorts, called Batman, are used in Persia—that of Shiraz, and that of Tauris; the former is exactly double the latter, and their divisions the same. The Batman contains 6

Rattles, each 50 Derhams, and each Derham 2 Miscals. The Shiraz Batman weighs 184 oz. 18 dwts. 19 grs. troy; and the Batman of Tauris,  $6\frac{1}{3}\frac{1}{4}$  lbs. avoirdupois. The Derham, used for weighing gold and silver, equals 149 grains.

Pearls are weighed by the Abas, equal to 3.66 diamond grains, or 2.25 grains troy.

Maunds of different sorts are sometimes used in Persia, viz.

|                      |                |
|----------------------|----------------|
| Tabreeze equal to... | 6½ lbs.        |
| Shaw Silk .....      | 12 to 13½ lbs. |
| Carmenia .....       | 5 lbs.         |
| Kismish .....        | 7 lbs.         |
| Bazar .....          | 7¼ to 7½ lbs.  |

MEASURES.—Of the Guz, or Guerz, for long measure, there are two sorts; the Royal Guz, or Monkelsar, is  $37\frac{1}{2}$  inches English; the common Guz is two-thirds of the royal. Another measure is called Arish, equal to 38.27 inches. The Aleppo Guz or Pic is nearly  $\frac{3}{4}$  of an English yard.

The Persian League, or Parasang, is the  $\frac{1}{18}$  of a degree at the Equator; and should therefore be equal to 3 geographical miles, or 3 miles, 3 furlongs, and 25 poles English measure.

The Corn measures are the Artaba, containing 25 Capichas, each two Chenicas, each subdivided into 4 Sextarios. The Artaba equals 1.86 English Bushel.

See also BUSSORAH and GOMBROON.

PHILIPPINE ISLANDS—See MAGINDANAO & MANILLA.

## PLETTEMBERG BAY.

(S. E. Coast of Africa.)

COINS.—The Cape paper money passes current here; and Spanish Dollars vary from 11 to  $12\frac{1}{2}$  Schillings paper currency, each.

## PONDICHERRY.

*(On the Coast of Coromandel.)*

COINS.—Accounts are kept in Pagodas, Fanams, and Cash; 60 Cash making 1 Fanam, and 24 Fanams 1 Pagoda. The Coins current are Gold Pagodas, Silver Rupees, and Fanams; also Copper Cash or Dudus, thus divided:

|               |              |           |
|---------------|--------------|-----------|
| 20 Dudus..... | } equal to { | 1 Fanam   |
| 24 Fanams ... |              | 1 Pagoda. |

There are various kinds of Pagodas current here, and nearly all of the same weight. That of Pondicherry was originally equal in value to the Star Pagoda; but its standard has been considerably lowered; it passes for  $3\frac{1}{2}$  Rupees, though the exchange varies from 350 to 360 Rupees per 100 Pondicherry Pagodas. The exchange for Spanish Dollars is from 210 to 215 Rupees per 100 Spanish Dollars.

WEIGHTS.—Gold and Silver are weighed by the Seer, Pagoda, Rupee, and Fanam. A Seer weighs  $24\frac{1}{2}$  Rupees,  $81\frac{1}{2}$  Pagodas, or  $731\frac{1}{2}$  Fanams; a Rupee weight is equal to 30 Fanams, or 480 Nellos; a Pagoda weight is 9 Fanams, or 144 Nellos: thus 3 Rupees are equal in weight to 10 Pagodas.

$71\frac{1}{2}$  Pagodas weigh a French Mark, or 3778 English grains, so that the Seer contains 4293 grains.

The commercial weights are the Candy of 20 Maunds, each Maund 8 Vis. The Pondicherry Maund is 25 lbs. 14 oz.  $5\frac{1}{2}$  drs. avoirdupois.

MEASURES.—Rice, and all other sorts of grain are sold by the Garce of 600 Marcals; and 100 Marcals are nearly 18 English bushels. The Garce thus equals  $13\frac{1}{2}$  English quarters.

## PONTIANA.

*(W. Coast of Borneo.)*

COINS AND WEIGHTS.—Spanish Dollars are the principal Coin; and the China weights of Pecul and Catty are in common use.

## PORTO NOVO.

*(On the Coast of Coromandel.)*

COINS.—Accounts are kept in Collums of Paddy, or in Chuckrums. The Collum is a measure which is between 70 and 80 quarts, but varies in different parts. The medium price of a Collum of Paddy is  $3\frac{1}{2}$  gold, or 7 silver Fanams, about 1s. 4d. sterling; so that 100,000 Collums of Paddy at the afore-mentioned price, will produce 15,555 Star Pagodas, 25 Fanams.

In the Tanjore Country the Star Pagoda is valued at 45 Madras, or silver Fanams; 1 Chuckrum is equal to 20 Madras, or 10 gold Fanams; 2 Chuckrums and 1 Fanam are equal to 1 Porto Novo Pagoda.

The Porto Novo Pagoda passes current at Madras for  $37\frac{1}{2}$  Madras Fanams. 100 Porto Novo Pagodas are reckoned  $83\frac{1}{2}$  Star Pagodas, and 100 Star Pagodas equal to 120 Porto Novo Pagodas. In the Company's accounts the Porto Novo Pagoda is reckoned at 36 Fanams.

## PRINCE OF WALES ISLAND.

COINS.—Accounts are kept by the Company in Spanish Dollars, Copangs, and Pice; 10 Pice making 1 Copang, and 10 Copangs 1 Spanish Dollar.

The Merchants keep their accounts in Spanish Dollars and Cents. The current Pice are coined on the island, being pieces of tin, nearly the size of an English penny; they have the Company's mark on one side, and are plain on the other: 100 of them ought to contain  $4\frac{1}{4}$  Catties of pure tin.

On the exchange of Dollars into Pice, there is a loss of 2 per cent.; on Dollars without the head, 10 per cent.; and on Dollars defaced, from 5 to 10 per cent.

In exchanges of the following money,

|                                  |                                         |
|----------------------------------|-----------------------------------------|
| A Spanish Dollar passes for .... | 2 Sonaut Rupees, 3 Annas.               |
| 10 Star Pagodas.....             | 15 to 16 Spanish Dollars.               |
| £1 Sterling.....                 | 4 Ditto.                                |
| 218½ Sonaut Rupees.....          | 100 Ditto.                              |
| 209½ Sicca Ditto.....            | 100 Ditto.                              |
| 220½ Bombay Ditto.....           | 100 Ditto.                              |
| 425 Current Ditto .....          | 100 Star Pagodas, or 350 Madras Rupees. |

**WEIGHTS.**—Gold and Silver are weighed by the Buncal, equal to 1 oz. 9 dwts.  $10\frac{1}{2}$  grs., which is divided into 16 Meams. A Catty is 20 Buncals, and weighs 29 oz. 15 dwts.  $11\frac{1}{2}$  grs.

The great weights are the following:—

|                  |              |                      |
|------------------|--------------|----------------------|
| 16 Tales .....   | } equal to { | 1 Catty.             |
| 100 Catties..... |              | 1 Pecul = 133½ lbs.  |
| 40 Peculs.....   |              | 1 Coyang = 5323 lbs. |

There are two Peculs in the bazar, one of which, used to weigh Tin and Pepper, is  $142\frac{1}{2}$  lbs., and three of these make a Bahar, equal to 428 lbs. The following equivalents are useful to be known:—

|                                  |                |
|----------------------------------|----------------|
| A Bag of Salt should weigh ..... | 100 lbs.       |
| A Bag of Rice or Dhol.....       | 164            |
| A Bazar Maund.....               | 82             |
| A Seer.....                      | $2\frac{1}{2}$ |

**MEASURES.**—Grain, oil, and liquids are sold by the Ganton, equal to  $1\frac{1}{2}$  Gallon English:—

|                            |              |                            |
|----------------------------|--------------|----------------------------|
| 4 Choopahs .....           | } equal to { | 1 Ganton.                  |
| 10 Gantons .....           |              | 1 Parah.                   |
| 20 Ditto .....             |              | 1 Bag of Rice.             |
| 40 Bags, or 80 Parahs..... |              | 1 Coyang, weight as above. |

Cloth is measured by the Astah, of 18 inches English.

Land is measured by the Orlong, equal to  $1\frac{1}{2}$  English acre, divided into 20 Jumbas.

## QUEDA.

(*West Coast of Malacca.*)

**COINS AND WEIGHTS.**—Spanish Dollars are the principal coin. All goods are weighed by the China dotchin, or wooden steelyard; but English scales and weights are in common use. The Bahar is 424 lbs. avoirdupois.

## RANGOON.

(*In the Birman Empire.*)

**COINS.**—The Birmans, like the Chinese, have no coin. Silver in bullion, and lead, are the current monies of the country;

weight and purity are of course the standard of value, and in the ascertainment of both, the natives are exceedingly scrupulous and expert.

What foreigners call a Tical, or Tackal, properly Kiat, is the most general piece of silver in circulation; it weighs 10 dwts. 10.75 grs., and is thus divided:—

|                  |              |          |
|------------------|--------------|----------|
| 2 Tubbees .....  | } equal to { | 1 Moo.   |
| 2 Moos .....     |              | 1 Math.  |
| 4 Maths .....    |              | 1 Tical. |
| 100 Ticals ..... |              | 1 Vis.   |

The Birmans keep their accounts in decimals, after the manner of the Chinese.

Money scales and weights are all fabricated at the capital, where they are stamped, and afterwards circulated throughout the empire; the use of any others is prohibited.

The Bankers, called by foreigners Pymons, are likewise workers in silver, and assayers of metal. This class of people is very numerous, and indispensably necessary, as no stranger can undertake either to pay or receive money without having it first examined. Every merchant has a banker of this description, with whom he deposits all his cash, and who, for receiving and paying, gets an established commission of 1 per cent.; in consideration of which, he is responsible for the quality of what goes through his hands, and a breach of trust is very seldom heard of.

The quantity of alloy varies in the silver current in different parts of the empire. At Rangoon it is adulterated 25 per cent. In pure, or what is called flowered silver, all royal dues are paid. The several modifications are as follow:—

|                |                       |                 |                        |
|----------------|-----------------------|-----------------|------------------------|
| Rouni .....    | or pure Silver.       | Rouassee .....  | or 20 per cent. alloy. |
| Rounika .....  | or 5 per cent. alloy. | Moowadzoo ..... | or 25 ditto.           |
| Rounizee ..... | or 10 ditto.          | Woombo .....    | or 30 ditto.           |

Any person may have his silver either purified or depreciated to whatever standard he chuses. The nearest silversmith will perform the work free from charge; as the bringer by the operation must lose a trifle, which the artist gains; the small quantity of metal that adheres to the crucible, being his profit.

WEIGHTS AND MEASURES.—The weights are the Moo, Tual, Vis, and Candy, and are thus divided:—

|                |              |          |
|----------------|--------------|----------|
| 100 Moos.....  | } equal to { | 1 Tual.  |
| 100 Tuals..... |              | 1 Vis.   |
| 150 Vis.....   |              | 1 Candy. |

The Vis is considered equal to 3 lbs. 5 oz. 5.33 dra., and the Candy to 500 lbs. avoirdupois.

Rice is sold by a measure called Tayndaung, or Basket; the weight is 16 Vis, about 53½ lbs.: it is said to be 56 lbs.

The measures of length are the Paulgaut, or inch, 18 of which compose the Taim, or Cubit. The Saundaung, or Royal Cubit, is equal to 22 inches, but varies according to the will of the King.

The Dha, or Bamboo, consists of 7 Royal Cubits; 1000 Dhas make 1 Dain, or Birman league, equal to 2 English miles, and 2 furlongs; the league is also subdivided into tenths.

---

## SAINT HELENA.

*(An Island in the Southern Atlantic.)*

COINS.—Accounts are kept in pounds, shillings, and pence; but coins of every denomination pass current here, both Indian and European.

Porto Novo Pagodas used to pass at the same rate as Star Pagodas, notwithstanding they are inferior; but Government having made an alteration, they only pass current at 7s. 6d. Guineas, Sovereigns, and Bank Notes, are generally at a premium; passengers returning to England preferring to put up with the loss here to that in England, upon the sale of East India coins.

WEIGHTS AND MEASURES.—All weighable commodities are bought and sold by avoirdupois weight, and the English yard is the common measure for cloth, linens, &c.

---

## SALANGORE.

*(West Coast of Malacca.)*

COINS AND WEIGHTS.—Spanish Dollars are in general use, but imaginary dollars are dealt for here, which are computed by weight, in the following manner:—8 Tompongs of Tin, of 8 Catties weight, are 1 Dollar; 30 Dollars, or 240 Catties, are 1 Bahar, equal to 324 lbs. The Malacca Bahar of 300 Catties is sometimes used for selling; it is therefore necessary in bargains to mention what Bahar you agree for, and insist upon having your Tin weighed by your own weights, as their dotchin is generally short of the weight you ought to receive.

The Bahar here is 3 China Peculs, or 400 lbs. avoirdupois.

## SALEM.

*(A Town in Mysore.)*

The Exchanges between this place and Madras are at the following rates per 100 Star Pagodas, or 350 Madras Rupees:—

|                                           |                  |
|-------------------------------------------|------------------|
| Porto Novo Pagodas.....                   | at 120           |
| Sultany, Bahadre, and Siddekee Ditto..... | 91 $\frac{1}{2}$ |
| Ferrokee Ditto.....                       | 91 $\frac{1}{2}$ |
| Ikery Ditto.....                          | 92 $\frac{1}{2}$ |
| Bangalore Ditto.....                      | 94 $\frac{1}{2}$ |
| Cantaria Fanam.....                       | 1181             |
| Raise Gopauly Ditto.....                  | 2953             |

SAMARANG.—*See* BATAVIA.

## SAMBASS.

*(West Coast of Borneo.)*

COINS AND WEIGHTS.—The Chinese weights are in common use. Spanish Dollars are the coin in which all bargains are made; but hereabouts wax is the currency of the country; it is

melted, but not refined, and cast into moulds of an oblong shape, the breadth about two-thirds of the length, and the thickness about half the breadth, having a Rattan to lift them by, cast in the wax. A piece weighs a quarter of a Pecul, and is valued in payment at about 10 Mace; for smaller payments they have pieces of eight and sixteen to a Pecul; and for smaller money, Cowries are in use.

### SCINDY.

(*On the Malabar Coast.*)

COINS.—Silver Rupees, Copper Pice, and Cowries, constitute the money here. 4 Cowries are equal to 1 Dumaree; 12 Dumarees are commonly the equivalent for 1 Copper Pice, and 48 Pice are equal to a Silver Rupee of 16 Annas.

WEIGHTS.—Gold and Silver are weighed by the Tola of 12 Massa, each divided into 6 Ruttees. The Tola weighs a Silver Rupee, or 179 English grains, nearly.

Diamonds and Pearls are weighed by the Ruttee of 8 Hublas, each Hubla equal to 2 grains troy.

The great weights are these:—

|                                               |            |          |
|-----------------------------------------------|------------|----------|
| 2 Pice...                                     | } equal to | { 1 Anna |
| 16 Annas                                      |            |          |
| } 1 Cutcha, or Surat Maund = 37½ lbs. avoird. |            |          |

There is also the Pucca or Scindy Maund, of 40 Seers, which is double the former.

MEASURES.—The Grain measure is the Carwar, equal to 12 Pucca Maunds of Barley or Paddy, but 15 of other grain:—

|                  |            |                    |
|------------------|------------|--------------------|
| 4 Bottwayees     | } equal to | { 1 Toi, or Towyah |
| 4 Tois .. .. .   |            |                    |
| 60 Cossas .. . . |            |                    |
| } 1 Carwar.      |            |                    |

### SERINGAPATAM.

(*Capital of Mysore.*)

COINS.—Accounts are kept in Cantaria Pagodas and Palams, or Fanams. The latter only is real money, and is the tenth part of a Pagoda: 16 Cash make a Fanam.

The Coins are Gold Mohurs, which pass for 4 Pagodas, Sultany and other Pagodas passing for 13 Fanams: also Sultany Fanams, and Cantaria Fanams, small Gold Coins of base alloy.

The Silver Coins are Sultany and Rajah Rupees, 26 of which are equivalent to 7 Sultany Pagodas. The Copper Coins are Dudus, commonly called Dubs; 260 of which pass for a Sultany Pagoda.

The shroffs when they exchange Copper for Gold or Silver, pay at the rate of 234 Dudus per Pagoda; but when they exchange Gold and Silver for Copper, they receive 240; whilst the price fixed by Government is 182 Dudus per Pagoda. Other Coins exchange in proportion. The following scale exhibits the Exchanges with Madras:—

|                                          |                           |
|------------------------------------------|---------------------------|
| Cantaria Pagoda, each .....              | at 2 R., 12 A., 2. 133 P. |
| Bahadre ditto, each .....                | 3 R., 9 A., 10. 4 P.      |
| Myla Fanams 4500.....                    | per 350 Rupees.           |
| Chellavany Rupees, 370 R. 4. 40 .....    | 350 "                     |
| Cantaria Fanams, 1203½ .....             | 350 "                     |
| Rajah Rupees, 343 R., 11. 76½ .....      | 350 "                     |
| Porto Novo Pagodas, 120 P., 13. 68 ..... | 350 "                     |
| Bahadre ditto, 92 P., 28. 64.....        | 350 "                     |

WEIGHTS.—There are two sorts of weight, the Cutcha Seer, and the Pucca Seer; the former weighs 24 Sultany Rupees, and is equal to 4,248 grains troy; the latter, 84 Sultany Rupees, or 14,868 grains.

|                                                                           |
|---------------------------------------------------------------------------|
| 5 Cutcha Seers } equal to { 1 Pansh Seer.                                 |
| 8 Pansh Seers. } equal to { 1 Maund = 24 lbs. 4 oz. 6½ drs. avoird.       |
| 20 Maunds... .. } equal to { 1 Candy, or Barua=485 lbs. 7 oz. 9½ drs. av. |

By the Cutcha weight are sold Jaggery, Sugar, Tamarinds, Turmeric, Ginger, Mustard, Capsicum, Betel-nut, Assafoetida, Garlic, Spices, Pepper, Cardamoms, Sandal-wood, Wool, Silk, Cotton, Thread, Ropes, Honey, Wax, Lac, Oil, Ghee, &c. The two latter are frequently sold by measure.

MEASURES.—The Candaca, dry measure, contains 20 Colagas, each 16 Pucca Seers. The Seer measures  $74\frac{1}{2}$  English cubic inches; thus the Colaga is equal to  $11\frac{1}{2}$  Winchester bushels.

The Guz, or Gujah, long measure, is  $38\frac{1}{2}$  inches, 6000 of which make 1 Hardary or Cos, equal to 3 miles,  $5\frac{1}{2}$  furlongs. 4 Har-

daries make 1 Gavada, or day's journey ; but the Hardary in common use is  $\frac{1}{2}$  less, and therefore equal to 2 miles,  $5\frac{1}{2}$  furlongs.

The foregoing is the system of weights and measures established by Tippoo Sultaun ; but differences prevail, particularly in corn and land measures, throughout the country. Cloth and Timber are usually measured by the purchaser's cubit, which may be considered as 18 inches.

## SHENDY.

(In Nubia.)

**MONEY.**—The common currency is Dhourra (grain), and Dammour (cotton stuffs). Of Dollars, those only are current which are coined in Spain ; and of these only such as have the inscription *Carolus III.*, pass at the full value. Those with *Carolus III.* are estimated (absurdly enough) at one-sixth below the real value. Those coined under the Ferdinands lose one-third ; and Austrian Dollars are not taken at all. Gold Coins have no currency ; but pure gold, in small pieces or lumps, or earrings, can always be procured from the Sennaar merchants at the market price.

**WEIGHT.**—The Rotolo, or pound, is equal to  $\frac{1}{2}$  of the avoirdupois pound.

## S I A M.

**COINS.**—Accounts are kept in Tales, Ticals, Miams, Fouangs, and Cowries, thus divided :—

|                |              |                                         |
|----------------|--------------|-----------------------------------------|
| 800 Cowries... | } equal to { | 1 Fouang, called by the natives Phuani. |
| 2 Fouangs...   |              | 1 Miam or Mace                          |
| 4 Miams ...    |              | 1 Tical, or Baat                        |
| 4 Ticals.....  |              | 1 Tale, or Tamluni                      |
| 20 Tales.....  |              | 1 Catty.                                |

10 Miams are equal to a China Tale, and 5 Siam Tales are always reckoned at 8 China Tales.

The Coins are Gold Ticals, which pass for 10 Silver Ticals ; Miams, Fouangs, and Samporfs, the latter being  $\frac{1}{2}$  of a Fouang.

The Silver Tical weighs  $225\frac{1}{2}$  grains, and is from 11 oz. 4 dwts. to 11 oz. 12 dwts. fine; thus it is worth 2s. 5d. to 2s. 6d. sterling: these coins are often adulterated. Two Ticals pass commonly for a Spanish Dollar, and  $2\frac{1}{2}$  Ticals for a Dutch Ducatoon.

The fineness of gold and silver is expressed, as in China, by Touches.

**WEIGHTS.**—Great weights are Ticals, Catties, and Peculs, thus divided:—80 Ticals make 1 Catty of 20 Tales; and 50 Siam Catties should be equal to 1 China Pecul of  $133\frac{1}{2}$  lbs. avoirdupois; for all their goods are weighed by the China dotchin; but the King's Pecul at Siam is never found to give more than 129 lbs., and the Catty 41 oz.  $4\frac{1}{2}$  drs.

Gold and Silver are weighed by the Tical, which is equal to 9 dwts. 10 grs.

**MEASURES.**—The largest measure for Corn is the Cochi, of 40 Sestes; the Seste contains 40 Sats, and weighs 100 Siam Catties, or 258 lbs. avoirdupois.

The long measure is 2 Soks, making 1 Ken; 2 Kens, 1 Vouah, which is  $75\frac{1}{2}$  English inches; 20 Vouahs make 1 Sen, and 100 Sens, 1 league, or Roeneng, which is 4204 English yards.

## SINKELL.

*(On the Island of Sumatra.)*

**COINS.**—Spanish Dollars are the principal currency; but accounts are kept in Tales, Sooccoos, and Satallies, viz.

$$\left. \begin{array}{l} 4 \text{ Satallies} \\ 4 \text{ Sooccoos} \\ 1 \text{ Tale ...} \end{array} \right\} \text{equal to } \left\{ \begin{array}{l} 1 \text{ Sooccoo} \\ 1 \text{ Tale} \\ 4 \text{ Spanish Dollars.} \end{array} \right.$$

**WEIGHTS.**—Benjamin is bought here by the Tompong or Cake, which ought to weigh 20 Catties, each Catty 56 ounces avoirdupois; and for Camphire 56 ounces troy weight.

The Chinese Pecul is in common use in buying and selling most commodities.

## SOOLOO.

*(One of the Sunda Islands.)*

COINS.—They have no Coin at Sooloo, only a currency which they reckon by Sanampoory, Cangan, and Cowsoong, or Nankeen: the first is a term only, and the second a coarse China cotton cloth, which goes in payment of goods, and is reckoned equivalent to a Spanish Dollar, a few of which are occasionally met with among them. In small payments they make use of Paddy, or Rice in the Husk, which rises and falls according to the plenty or scarcity of grain. In their accounts they sometimes reckon by Spanish money, but commonly by the Cangan and Sanampoory, of which the following is the rate:—

|                |        |                                  |
|----------------|--------|----------------------------------|
| 4 Sanampoories | } make | { 1 Cangan, of 6 fathoms long    |
| 4 Sanampoories |        | { 1 Cowsoong, of 4 fathoms long. |

The Cangan was formerly seven fathoms long; but as the Chinese suffered by impositions here, they have debased the manufacture, and contracted the measure, which example the natives so well imitate, that it scarce happens a Cangan is found six fathoms in length.

The use of Paddy as a currency has introduced the custom of measuring instead of weighing grain and some other commodities, as Cowries, &c.

WEIGHTS.—The Sooloo weights are similar to those of the Chinese; but they have given them other names, and they correspond with the latter in the following manner:—

|                  |        |              |            |             |
|------------------|--------|--------------|------------|-------------|
| 10 Moohooks...   | } make | 1 Choochock  | } equal to | 1 Candarine |
| 10 Choochocks... |        | 1 Ammas ...  |            | 1 Mace      |
| 10 Ammas.....    |        | 1 Tale ..... |            | 1 Tale      |
| 16 Tales.....    |        | 1 Catty..... |            | 1 Catty     |
| 5 Catties .....  |        | 1 Booboot... |            | 5 Catties   |
| 10 Booboots ...  |        | 1 Lacksa ... |            | 50 Catties  |
| 2 Lacksas.....   |        | 1 Pecul..... |            | 1 Pecul.    |

The weights in some of the islands are heavier than the standard; however, as an implicit confidence is not to be placed in their dotchins, it will be necessary to compare them with English weights.

MEASURES.—Their smallest Grain measure is a half Cocoa Nut Shell, called a Panching.

|                 |              |            |
|-----------------|--------------|------------|
| 8 Panchings...  | } equal to { | 1 Gantang. |
| 10 Gantangs ... |              | 1 Raga.    |
| 2½ Ragas.....   |              | 1 Pecul.   |

The Gantang of Rice is reckoned to weigh 4 Catties, according to which 2½ Ragas make 1 China Pecul of 133½ lbs.

The measure for Cloth is the Fathom, but the Chinese Coid is in common use.

### SOUAKIN.

*(On the African Coast of the Red Sea.)*

MONEY.—In all small concerns, the currency is Dhourra (grain), which is measured by handfuls, or with the same sized Mould as at Berber. For greater bargains Dollars are used. Neither the Piastre, nor the Para, nor the gold coins of Turkey are taken; but they have old Paras cut into four parts, which are paid for articles of little value. Sales to a large amount are paid by Wokye, or the ounce of gold, which has its fixed value in Dollars.

### SOURABAYA.—See BATAVIA.

### SUCCADANA.

*(On the Island of Borneo.)*

COINS.—Spanish Dollars are the only coin in circulation in the trade with Europeans, and all bargains are made in this money; but accounts are kept among the natives in Tale and Mace.

WEIGHTS.—All gross goods are weighed by English weights, and then turned into China Peculs. Their small weights are Busucks, Kupangs, Mace, Pahaws, and Tale, thus divided:—

|               |              |           |
|---------------|--------------|-----------|
| 2 Busucks ... | } equal to { | 1 Kupang. |
| 4 Kupangs...  |              | 1 Mace.   |
| 4 Mace .....  |              | 1 Pahaw.  |
| 4 Pahaws ...  |              | 1 Tale.   |

By these weights Diamonds, Gold, Bezoar, and other valuable articles are weighed.

## SUEZ.

*(Part of Egypt, N. Extremity of the Red Sea.)*

COINS.—The principal current Coins are Burbers, Medines, Sequins, and Spanish Dollars. The Burber is a copper coin, 12 of which make a Medine. The Sequin is of two sorts, one called Fundunclee, and passes current for 146 Medines; the other Zermabob, which passes for 110 Medines. The Asper, though not coined in Egypt, passes current here, 3 Aspers making 1 Medine.

WEIGHTS.—Four Grains make 1 Kellat, 16 of which make a dram, of which all the weights are compounded.

1½ Dram is 1 Metigal, by which gold and silver are weighed.

144 Ditto ... 1 Rottolo, equal to 1 lb. 4 ounces avoirdupois.

400 Ditto ... 1 Oke, by which sugar and other heavy goods are weighed.

The Quintal varies from 110 to 150 Rottolos, according to the species of goods to be weighed.

## SUMATRA.

*See the respective Places on this Island, in alphabetical Course.*

## SURAT.

*On the Malabar Coast.*

COINS.—Accounts are kept in Rupees of 16 Annas, or 64 Pice.

The Coins current are gold Mohurs, silver Rupees, their halves and quarters, and tin or copper Pice, 64 Pice to 1 Rupee. For small change they have Baddams, a species of Almond; these rise and fall according to the quantity in the market, and vary from 48 to 60 for a Pice.

The gold Mohur weighs 179 grains, and passes current for 15 silver Rupees.

The silver Rupee, coined under the Mogul Government, weighed 178.314 grains, and contained 1.24 of alloy; but in consequence of the Surat coinage being so much depreciated, as to contain from 10 to 15 per cent. of alloy, in 1800, the Bombay Government ordered the Surat Rupee, to be struck in that mint, to weigh 179 grains, and to contain 7.87 per cent. alloy.

Bullion of all kinds is sold in proportion to its fineness, reckoning Mexico Dollars the standard: this varies according to the rates of exchange.

|                                 |                          |                                      |
|---------------------------------|--------------------------|--------------------------------------|
| 100 ounces Mexico Dollars.      | 11 oz. 2 dwts. fineness, | will produce from 243 to 246 Rupees. |
| 100 ditto. Ducatoons . . . .    | 11 6½                    | ditto . . . . . 245 to 250 Ditto.    |
| 100 ditto. Old Seville . . . .  | 11 5                     | ditto . . . . . 244 to 249 Ditto.    |
| 100 ditto. Pillar Dollars . . . | 11 4                     | ditto . . . . . 242 to 248 Ditto.    |
| 100 ditto. French Crowns. . .   | 11 1½                    | ditto . . . . . 235 to 245 Ditto.    |
| 100 ditto. Lion Dollars . . . . | 8 19                     | ditto . . . . . 190 to 200 Ditto.    |
| Gold Venetians full wt. of Vals | 9½                       | ditto . . . . . 346 to 356 Ditto.    |
| Gubbers . . . . . ditto         |                          | ditto . . . . . 342 to 350 Ditto.    |

Coins of gold are seldom circulated as coin at Surat, but generally considered as bullion.—See *Assay Report*, p. 417.

WEIGHTS.—The great weights are Pice, Seers, Maunds, and Candies, but English weights are in common use.

|                              |              |           |      |     |      |
|------------------------------|--------------|-----------|------|-----|------|
| 20 great or 30 small Pice... | } equal to { | 1 Seer.   | lbs. | oz. | drs. |
| 40 Seers.....                |              | 1 Maund = | 37.  | 5.  | 5½   |
| 20 Maunds.....               |              | 1 Candy = | 746. | 10. | 10   |

The Maund is considered equal to one half of the Calcutta Factory Maund. There is also a Pucka Maund, which is equal to the Factory Maund. Although the above is the common

received standard of gross weight at Surat, yet most of the commodities in the market are sold by a different number of Seers to the Maund, varying from 40 to 46 Seers; nor is the Candy uniformly confined to 20 Maunds. For example:—Pepper and Sandal Wood are sold by the Bombay Candy of 21 Maunds; and Cotton, the great staple commodity of this country, by the Surat Candy of 21 Maunds. In the list of imports at Bombay it is specified by what number of Seers, &c. to a Maund each article is sold.

## PEARL WEIGHTS.

|                |            |                | dwts. grs.      |
|----------------|------------|----------------|-----------------|
| 20 Vassas..... | } equal to | 1 Ruttee ..... | = 0 1.951 troy. |
| 3 Ruttees...   |            | 1 Val .....    | = 0 5.853       |
| 24 Ruttees...  |            | 1 Tank .....   | = 1 22.829      |
| 30½ Vals ..... |            | 1 Surat Rupee. |                 |
| 32 Vals .....  |            | 1 Tola .....   | = 7 19.317      |

|                              | dwts. grs. | oz. drs.               |
|------------------------------|------------|------------------------|
| 1 small Surat Pice is troy 9 | 2.56       | or avoirdupois 0 7.992 |
| 1 great Ditto ..... 13       | 15.805     | ditto 0 11.988         |
| 1 Surat Tola ..... 7         | 19.317     | ditto 0 6.850          |

1 Miscal is 1 Tank, 2 Ruttees, 1 Vassa; and 38 Tolas, 25 Vals are 100 Miscals.

47 Tolas, 29 Vals, 1 Ruttee of 50 Surat Rupees, is troy 18 oz. 13 dwts. 23.61 grs.

1 Seer of coral or amber is 18 great Pice, 31½ Tolas, or 27 small Pice, and weighs troy 12.293 oz. or avoirdupois 13.487 oz.

The Venetian Sequin is 9½ Vals (but should be 54 grs.), and the Spanish Dollar 73 Vals (but should be 416 grs.)

MEASURES.—The measures are the large Guz or Coid, of 28½ inches; the Bazar Guz, of 28 inches; and the small Coid, of 18½ inches. Broad cloth, satins, velvets, &c. are generally sold by the English yard of 36 inches. The Parah, or Pherra, Corn measure, contains 20 Pallies, and weighs about 75 lbs. avoirdupois.

## TANJORE.

(Coromandel Coast.)

The Exchange between this place and Madras is as follows:—

Porto Novo Pagodas...at 120 per 350 Madras Rupees.

Scott Ditto.....121½

Tanjore Chuckrums ..... 22½ per 1 Star Pagoda, or 3½ Madras Rupees.

## TAPPANOOLY.

*(On the Island of Sumatra.)*

COINS.—Accounts are generally kept in Dollars of 24 Fanams, or 400 Keppings. Spanish Dollars are the principal coin used in foreign trade; but among the natives, the value of goods is estimated by Tompongs, or Cakes of Benjamin, and sometimes by Buffaloes; also by brass Wire, Beads, and Salt.

WEIGHTS AND MEASURES.—English weights, as well as the Chinese Pecul, are used here. A measure of salt, called a Salup, weighs about 2 lbs. avoirdupois.

## TELLICHERRY.

*(On the Malabar Coast.)*

COINS.—The Coins current here are Pagodas, Rupees, Fanams, Pice, and Tars.—There are two kinds of Fanams; the one is a small gold coin, with a considerable alloy of silver and copper; the other a silver coin; the Pice and Tar are copper, coined in England.

|                |              |                   |
|----------------|--------------|-------------------|
| 2 Tars.....    | } equal to { | 1 Pice = 80 Reas. |
| 10 Pice.....   |              | 1 Fanam.          |
| 5 Fanams ..... |              | 1 Bombay Rupee.   |

The following are the rates at which Gold Coins commonly pass current at Tellicherry:—

|                                                      |                                        |
|------------------------------------------------------|----------------------------------------|
| Porto Novo Pagodas.....3½ Rupees.                    | Venetians, 5 Rupees each; but if paid, |
| Star Pagodas.....3½ Ditto.                           | 520 Rupees per 100 Venetians.          |
| Sultany Ditto.....4½ Ditto.                          | Surat Gold Mohurs...15 Rupees each.    |
| But to pay for Goods, 430 Rupees<br>per 100 Pagodas. | Bombay Ditto.....16 Ditto.             |

In selling goods, all bargains should be made for Bombay Rupees, or you will lose considerably by the Coins you are obliged to take here, more particularly the Venetians, which seldom fetch more than four Rupees each at Bombay; and upon Pagodas the loss is from a quarter to half a Rupee each.

Accounts are kept in Rupees, Quarters, and Reas, the same as at Bombay.

**WEIGHTS.**—The commercial weights are Pollams, Maunds, and Candies, thus divided:—20 Pollams make 1 Maund, and 20 Maunds 1 Candy, which is reckoned equal to 600 lbs. avoirdupois; but the Maund does not exceed  $28\frac{1}{2}$  lbs., which makes the Candy only 570 lbs.

**MEASURES.**—The long measures are the Coid and the Guz; the former 18 inches, and the latter  $28\frac{1}{2}$  inches.

### TERNATE.

*(One of the Molucca Islands.)*

**COINS.**—Accounts are kept in Rix-Dollars, of 48 Stivers, equal to about 3s. 4d., and in Spanish Dollars. Ducatoons and Crowns are met with; 80 Ducatoons exchange for 100 Spanish Dollars, and 102 Crowns for the same.

**WEIGHTS.**—Gold and Silver are weighed by the Mark Dutch troy, divided into 9 Reals. The Real weighs 422 grains, English troy weight.

The Bamboo of Rice weighs  $1\frac{1}{2}$  lb. Dutch troy, or 1 lb. 10 oz. avoirdupois. The Pecul contains 100 Catties, which is 120 lbs. Dutch troy, or 130 lbs. 3 oz. 8.32 drs. avoirdupois. The Barotti weighs 11 lbs. 15 oz., and the Kaban  $100\frac{1}{2}$  lbs. avoirdupois.

The Tale of the Island of Timor weighs  $13\frac{1}{2}$  oz. avoirdupois.

| Sunnamola Rupees.....   | 11 F. 60½ C.    | per Rupee.                      |

TOCOPA.—*See* JUNKCEYLON.

TONQUIN.—*See* CACHAO.

### TRANGANIA.

(*On the Malay Peninsula.*)

COINS.—The Gold Coin is the Mace, 16 of which are worth a Tale in gold dust. The inferior coins are Kossangs and Patties:—

|                  |              |            |
|------------------|--------------|------------|
| 400 Patties..... | } equal to { | 1 Kossang. |
| 4 Kossangs.....  |              | 1 Mace.    |
| 16 Mace.....     |              | 1 Tale.    |

WEIGHT.—The weight in common use is the Pecul, which is equal to 140 lbs. avoirdupois.

### TRANQUEBAR.

(*On the Coromandel Coast.*)

COINS.—Accounts are kept here in Rix-Dollars of 12 Fanams; and also in Rupees of 8 Fanams, each Fanam equal to 80 Cash.

The Rix-Dollar is imaginary money, and 18 per cent. below the Danish current Rix-Dollar; its value therefore is  $37\frac{1}{2}$ d.

The Coins are Silver Rupees, Double and Single Fanams, and Copper Dudus, or Cash.

The value of the Tranquebar Rupee will be  $24\frac{3}{4}$ d. sterling; as the coinage is so regulated, that 1302 are worth 600 old Spanish Dollars, weighing 43 lbs. 7 oz. 2 dwts. troy.

Star Pagodas are worth about  $3\frac{1}{4}$  Fanams, and Spanish Dollars from 19 to 21 Fanams.

WEIGHT.—The Maund weighs 68 lbs. Danish, or  $74\frac{1}{2}$  lbs. avoirdupois.

## TRICHINOPOLY.

*(In the Carnatic.)*
