10	. Construction Techn	ology		
	Structural System	The tomb appears to have stood in a complex of buildings including perhaps a palace. Recent excavations have revealed a wll conceived drainage system on the site. To the east is another compartment which is believed to be the tomb of Balban's son. On the west is smaller compartment with an unknown grave.

- □ Sign of Deterioration✓ Serious Deterioration
- Danger of Disappearance

In Brief (Attach extra sheet if necessary)

It's very apparent that the building was roofed by a dome which has now collapsed. The grave is also missing and so is the dressed stone which would have covered the building. The northern wall of the tomb served as retaining wall and has now collapsed.
