Scapes & Isms

IGNCA cordially invites you to the 2018 global edition of a landmark first of its kind public art project on environment by one of India's leading contemporary artists.

arth by **MANAV GUPTA** explores nature as a museum laboratory of art espousing sustainable development by excavating the philosophies of ancient civilizations, like Indian vedic practices, on environment. He converts quintessential rural Indian clay pottery into avant garde contemporary installations that embrace nature through the five elements.

Join us to light an earthen lamp and experience
