## YAKISHIME: EARTH METAMORPHOSIS

### Exhibition of Japanese Ceramic Tradition

### ABOUT THE EXHIBITION

Yakishime: Earth Metamorphosis presents the enduring tradition of Japanese ceramics, highlighting Japan's rich cultural heritage and long-standing ceramic practices.

Yakishime is an ancient Japanese pottery technique involving the firing of unglazed ceramic forms at high temperatures, typically between 1200°C and 1300°C, resulting in dense textures and naturally evolved surfaces. Practised for over eight centuries, with origins dating back to the 5th century, the technique reflects a deep aesthetic philosophy rooted in nature, materiality, and time.

The exhibition celebrates the transformation of earth through fire and reflects the continuity of craftsmanship and cultural memory.
