The case for Swadeshi Indology

This talk will discuss how the study of Indian civilization has shifted in the past 250 years, correlated with the political and social mandates of a given elite in each period. The post-independence period has undergone at least five “waves” or genre of Indology or South Asian Studies as pursued globally. An understanding of Indology’s past can help us better manage its future. The lecture will assess the present state of this discipline, both in India and outside, in the academy and elsewhere, and why we need to think of Swadeshi Indology moving forward. The talk will present a vision for Indology’s future and discuss the need for certain essential pillars to support, sustain and grow Indology as a formal discipline.
